- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to matching direct gloss solid paint colour on vehicles or components, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using technical data sheets (TDS) and safety data sheets (SDS) for paint materials
 - handling and storing paint materials
 - using tools and equipment
 - using approved drying area
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- original equipment manufacturer (OEM) paint colour codes and formulas
- types and application methods for automotive paint
- types and use of paint colour matching equipment, including:
 - paint mixing systems
 - spray gun set-up, use and maintenance
 - paint drying equipment and methods
 - correct use of positive air feed masks
- colour matching methods and techniques for solid colour paints, including:

- mixing system set-up and operation
- colour test cards
- visual colour matching tests, including opacity and film build, texture and peel
- wet to wet matching
- edge to edge matching
- hard line matching
- dabbing
- paint mixing techniques
- procedures for protecting vehicle and components when colour matching
- procedures for final inspection of completed solid colour matching.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the direct gloss solid paint colour they have matched to vehicles or components, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- OEM paint codes and specifications
- TDS and SDS for paint materials
- PPE required to colour match direct gloss solid paint colours
- colour test cards
- paint and materials to colour match solid paint colours
- three different painted vehicle panels requiring colour matching of direct gloss solid paint
- tools, equipment and materials appropriate for matching direct gloss solid paint colour on vehicles or components.

AURVTP016 Rectify and touch up vehicle direct gloss paint faults using two-pack systems

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to rectify and touch up direct gloss paint faults on vehicle body components. It involves preparing for the task, selecting and using specialist tools and equipment, identifying and rectifying faults using two-pack paint according to manufacturer specifications, and completing workplace processes and documentation.

It applies to those working in the automotive paint refinishing repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Paint

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.

Assessment Requirements for AURVTP016 Rectify and touch up vehicle direct gloss paint faults using two-pack systems

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- rectify and touch up faults in the direct gloss paint of three different vehicles using two-pack systems, including:
 - using partial blend and fade-out blend on one vehicle
 - blending and clearing panels on one vehicle.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to rectifying and touching up vehicle direct gloss paint faults using two-pack systems, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using technical data sheets (TDS) and safety data sheets (SDS) for direct gloss two-pack paint
 - handling and storing paint materials
 - using tools and equipment
 - using approved drying area
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- paint manufacturer specifications
- types and features of direct gloss materials
 - types and use of painting equipment, including:
 - types of spray guns and maintenance requirements

- spray gun set-up, use and maintenance
- correct use of positive air feed masks
- paint rectification and touch-up techniques and procedures, including:
 - identifying paint surface faults
 - surface preparation methods
 - paint mixing procedures
 - direct gloss paint application methods and techniques
 - paint drying methods for direct gloss materials
- procedures for protecting vehicle and components when touching up paint faults
- procedures for final inspection of paint rectification and touch-up work using direct gloss two-pack systems.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to vehicle paintwork they have rectified using direct gloss two-pack materials, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- TDS and SDS for direct gloss two-pack paint
- PPE required to rectify paintwork using direct gloss two-pack paint systems
- direct gloss refinishing materials
- three different vehicles requiring paint rectification and touch-up using direct gloss two-pack refinishing
- tools, equipment and materials appropriate for rectifying and touching up paint faults using direct gloss two-pack paint.

Assessment Requirements for AURVTP017 Rectify and touch up vehicle paint faults using clear over base two-pack systems

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- rectify and touch up faults on three different vehicles using clear over base (COB) two-pack paint materials, including:
 - using partial blend and fade-out blend on one vehicle
 - blending and clearing panels on one vehicle.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to rectifying and touching up vehicle paint faults using clear over base two-pack systems, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using technical data sheets (TDS) and safety data sheets (SDS) for COB two-pack paint
 - handling and storing paint materials
 - using tools and equipment
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- paint manufacturer specifications and paint codes
- types and features of two-pack paint materials
- types and use of painting equipment, including:
 - types of spray guns and maintenance requirements
 - spray gun set-up, use and maintenance

- correct use of positive air feed masks
- using approved drying area
- paint rectification and touch-up techniques and procedures, including:
 - identifying paint surface faults
 - surface preparation methods
 - paint mixing procedures
 - COB two-pack paint application methods
 - paint drying methods
- procedures for protecting vehicle and components when rectifying and touching up paint
- procedures for final inspection of paint rectification and touch-up work using COB two-pack systems.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to vehicle paintwork they have rectified using COB two-pack systems, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- TDS and SDS for COB two-pack paint
- vehicle paint codes and specifications
- PPE required to rectify COB two-pack paint
- materials required to rectify and touch up COB two-pack paint
- three different vehicles requiring COB two-pack paint rectification and touch-up
- tools, equipment and materials appropriate for rectifying and touching up paint faults using COB two-pack systems.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=b4278d82-d487-4070-a8c4-78045ec695b1>

Assessment Requirements for AURVTP018 Rectify vehicle multi-layer and pearl paint faults using two-pack systems

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- rectify multi-layer and pearl paint faults on three different vehicles using two-pack materials, in which the work must involve:
 - blending and clearing a vehicle panel
 - partially blending and fading out blend.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to rectifying vehicle multi-layer and pearl paint faults using two-pack systems, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using technical data sheets (TDS) and safety data sheets (SDS) for multi-layer and pearl two-pack paint
 - handling and storing paint materials
 - using tools and equipment
 - using approved drying area
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- paint manufacturer specifications
- types and features of multi-layer and pearl two-pack materials
- types and use of painting equipment, including:
 - types of spray guns and maintenance requirements

- spray gun set-up, use and maintenance
- correct use of positive air feed masks
- paint rectification and touch-up techniques and procedures, including:
 - identifying paint surface faults
 - surface preparation methods
 - paint mixing procedures
 - multi-layer and pearl paint application methods
 - drying methods for multi-layer and pearl paint refinishing materials
- procedures for protecting vehicle and components when rectifying and touching up paint faults
- procedures for final inspection of paint rectification using multi-layer and pearl two-pack systems.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicle paintwork they have rectified using multi-layer and pearl two-pack systems, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- TDS and SDS for multi-layer and pearl two-pack paint
- PPE required to rectify multi-layer and pearl two-pack paint materials
- multi-layer and pearl two-pack refinishing materials
- three different vehicles requiring paint rectification using multi-layer and pearl two-pack paint refinishing materials
- tools, equipment and materials appropriate for rectifying and touching up multi-layer and pearl paint faults using two-pack systems.

AURVTP019 Prepare and paint plastic and composite vehicle surfaces

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to prepare and apply refinishing materials to plastic and composite vehicle surfaces. It involves preparing for the task, selecting and using specialist tools and equipment, preparing components, mixing and applying paint materials to plastic or composite components according to paint manufacturer specifications, and completing workplace processes and documentation.

It applies to those working in the automotive paint refinishing repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Paint

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to paint plastic and composite components	1.1 Job requirements are determined from workplace instructions 1.2 <i>Paint information</i> is accessed and interpreted 1.3 Plastic paint <i>materials</i> are selected and inspected for quality 1.4 Hazards associated with the work are identified and risks are managed 1.5 <i>Paint tools and equipment</i> and personal protective equipment (PPE) are identified and checked for serviceability 1.6 Work is planned to identify preparation and painting methods, minimise waste, and prevent damage to vehicle
2. Clean plastic or composite surface	2.1 Surface is prepared for refinishing according to paint manufacturer technical specifications and <i>safety and environmental requirements</i> 2.2 Surface is checked to ensure it is free of oil, dust and other contaminants 2.3 Surface preparation is completed without causing damage to vehicle, other components and systems
3. Apply refinishing material	3.1 Plastic or composite refinishing material is applied according to paint manufacturer approved methods 3.2 Refinishing material is dried using approved methods and equipment 3.3 Painted area is polished and finished using approved techniques and equipment 3.4 <i>Paint finish is checked</i> against specifications 3.5 Refinishing is completed without causing damage to surrounding painted areas and components
4. Complete work processes	4.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 4.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes.
Numeracy skills to:	<ul style="list-style-type: none"> use basic mathematical operations, including addition, subtraction, multiplication and division to: <ul style="list-style-type: none"> calculate quantities of refinishing materials measure and determine ratios for mixing refinishing materials set painting air pressure and drying equipment.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	<ul style="list-style-type: none"> use specialist paint refinishing tools and equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Paint information</i> must include:	<ul style="list-style-type: none"> paint manufacturer specifications paint technical data sheets (TDS) paint safety data sheets (SDS) workplace procedures.
<i>Materials</i> must include:	<ul style="list-style-type: none"> approved abrasive papers suitable fillers two-pack urethane acrylic enamels metallic two-pack and clear acrylic lacquers pearl finishes water-based finishes

	<ul style="list-style-type: none"> • paint thinners and reducers • cleaning materials • suitable primers • anti-static cleaning agents • flexible additives.
<i>Paint tools and equipment</i> must include:	<ul style="list-style-type: none"> • spray guns • air pressure regulators and air compressors • approved spray area.
<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> • work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> • selecting and using PPE • using TDS and SDS for paint materials • handling and storing paint materials • using tools and equipment • environmental requirements, including procedures for trapping, storing and disposing of waste materials.
<i>Checking paint finish</i> must include:	<ul style="list-style-type: none"> • checking colour, texture, depth and gloss • ensuring paint finish is free of defects • ensuring paint finish blends into surrounding surfaces.

Unit Mapping Information

Equivalent to AURVTP3019 Prepare and paint plastic components

Assessment Requirements for AURVTP019 Prepare and paint plastic and composite vehicle surfaces

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- prepare, paint and polish three different plastic and composite vehicle surfaces, in which the work must involve:
 - one plastic vehicle surface
 - one composite vehicle surface.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to preparing and painting plastic and composite vehicle surfaces, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using technical data sheets (TDS) and safety data sheets (SDS) for paint materials
 - handling and storing paint materials
 - using tools and equipment
 - using approved drying area
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- paint manufacturer specifications and recommended application methods
- types and use of plastic and composite painting and refinishing materials
- plastic and composite surface preparation techniques
- paint application methods and techniques, including:
 - spray and drying equipment

- paint fault and rectification procedures
- paint drying methods
- polishing methods and equipment
- correct use of positive air feed masks
- using approved drying area
- types and use of spray guns, including:
 - spray gun operation and spraying techniques
 - spray gun cleaning and maintenance methods
- procedures for protecting vehicle and components when painting vehicle components
- procedures for final inspection of painted plastic and composite components.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the plastic and composite vehicle surfaces that they have painted, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- TDS and SDS for paint materials
- PPE required to prepare and paint plastic and composite vehicle components
- materials required to prepare and paint plastic and composite vehicle components
- plastic and composite components specified in the performance evidence requiring painting
- tools, equipment and materials appropriate for preparing and painting plastic and composite vehicle surfaces.

AURVTP020 De-nib, buff and polish vehicle painted surfaces

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to carry out final polishing activities on vehicle painted surfaces. It involves preparing for the task, selecting and using specialist tools and equipment, identifying paint defects, selecting buffing and polishing materials, de-nibbing, buffing and polishing surfaces, and completing workplace processes and documentation.

It applies to those working in the automotive paint refinishing repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Paint

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to carry out	1.1 Job requirements are determined from workplace instructions

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- restore exterior paint on the following vehicle surfaces:
 - bonnet
 - roof
 - boot
 - vehicle side.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to restoring vehicle body exterior paint, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using safety data sheets (SDS) for polishing and cleaning agents
 - handling and storing polishing materials
 - using tools and equipment
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- paint manufacturer specifications
- types of vehicle body exterior finishing faults, including:
 - colour change
 - surface variations
 - rework

- pitting
- types and features of cleaning, polishing and restoration agents and their recommended applications
- types and use of cleaning and polishing tools and equipment
- cleaning and polishing methods and techniques, including:
 - identifying paint surface faults
 - surface preparation methods
 - applying polishing materials
- procedures for protecting vehicle and components when restoring exterior paint
- procedures for final inspection of restored vehicle exterior paint.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicle body exterior paint that they have restored, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

AURVTP023 Apply clear over base two-pack refinishing materials to vehicle body components

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to mix and apply clear over base (COB) paint materials to vehicle body components. It involves preparing for the task, selecting and using specialist tools and equipment, identifying paint faults, preparing surface to be painted, selecting and applying COB two-pack refinishing materials according to manufacturer specifications, and completing workplace processes and documentation.

It applies to those working in the automotive paint refinishing repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Paint

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to mix and apply COB two-pack refinishing materials to vehicle body components	1.1 Job requirements are determined from workplace instructions 1.2 Vehicle paint specifications, technical data sheets (TDS) and paint safety data sheets (SDS) are accessed and interpreted 1.3 Refinishing materials are selected and inspected for quality 1.4 Hazards associated with the work are identified and risks are managed 1.5 Refinishing tools and equipment , including personal protective equipment (PPE), are selected and checked for serviceability 1.6 Work is planned to identify mixing and application methods for COB two-pack materials, minimise waste, prevent damage to vehicle, and use time efficiently
2. Mix COB two-pack refinishing materials	2.1 COB two-pack refinishing materials are calculated according to paint manufacturer specifications, formulas and codes 2.2 Codes and information relevant to job requirement are recorded 2.3 Materials are mixed according to workplace procedures and safety and environmental requirements , and without causing damage to components or systems
3. Apply COB two-pack refinishing materials	3.1 Refinishing materials are applied using manufacturer recommended method and intervals, and according to safety and environmental requirements 3.2 Refinishing materials are dried using approved methods and equipment to ensure painted surface meets specifications
4. Rectify paint faults	4.1 Paint faults are identified according to industry and workplace procedures 4.2 Rectification procedures are selected to suit fault or damage type 4.3 Materials to rectify paintwork are determined from paint manufacturer information 4.4 Paint surface faults are rectified using compounds,

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
	polishes and glazes to blend rectified areas with existing paintwork
5. Complete work processes	5.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 5.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 5.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 5.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Assessment Requirements for AURVTP023 Apply clear over base two-pack refinishing materials to vehicle body components

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- mix and apply clear over base (COB) two-pack refinishing materials to three different vehicles, including two of the following vehicle body components:
 - single vehicle panel
 - full vehicle side
 - vehicle front end or rear end.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to applying clear over base two-pack refinishing materials to vehicle body components, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using technical data sheets (TDS) and safety data sheets (SDS) for COB two-pack paint
 - handling and storing paint materials
 - using tools and equipment
 - using approved drying area
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- vehicle paint specifications
- types and application of automotive paint, including correct use of positive air feed masks
- mixing and application techniques for COB two-pack materials, including:

- paint mixing techniques and systems
- visual colour matching techniques and use of colour test cards
- paint fault identification and rectification methods for COB two-pack refinishing materials
- types and use of paint colour matching equipment, including:
 - mixing system set-up and operation
 - set-up, operation and maintenance of spray guns
 - paint drying equipment
 - paint cleaning materials and equipment
- procedures for protecting vehicle and components when applying refinishing materials
- procedures for final inspection of completed COB two-pack application.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the COB two-pack materials they have applied to vehicle body components, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- paint and vehicle manufacturer specifications and paint codes
- TDS and SDS for COB two-pack paint
- PPE, including positive air feed masks
- COB refinishing materials
- three different vehicles with body components specified in the performance evidence requiring painting with COB two-pack refinishing materials
- tools, equipment and materials appropriate for applying COB two-pack refinishing materials.

Vehicle Body

Unit Sector

Technical - Paint

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to mix and apply COB multi-layer and pearl refinishing materials	1.1 Job requirements are determined from workplace instructions 1.2 Vehicle paint specifications, technical data sheets (TDS) and paint safety data sheets (SDS) are accessed and interpreted 1.3 <i>Refinishing materials</i> are selected and inspected for quality 1.4 Hazards associated with the work are identified and risks are managed 1.5 Refinishing <i>tools and equipment</i> , including personal protective equipment (PPE), are selected and checked for serviceability 1.6 Work is planned to identify mixing and application methods for COB multi-layer and pearl paint, minimise waste, prevent damage to vehicle and use time efficiently
2. Mix COB multi-layer and pearl refinishing materials	2.1 Refinishing materials are calculated and mixed according to paint manufacturer specifications, formulas and codes 2.2 Codes and information relevant to job requirement are recorded accurately 2.3 Mixing activities are carried out according to workplace procedures and <i>safety and environmental requirements</i> 2.4 COB multi-layer and pearl paints are mixed without causing damage to components or systems
3. Apply COB multi-layer and pearl refinishing materials	3.1 Refinishing materials are applied using manufacturer recommended method and intervals according to safety and environmental requirements 3.2 Refinishing materials are dried using approved methods and equipment 3.3 Refinishing techniques are used to ensure painted surface <i>meets specifications</i> 3.4 Paint surface faults are rectified using compounds, polishes and glazes to blend rectified areas with existing paintwork
4. Complete work processes	4.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 4.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes.
Numeracy skills to:	<ul style="list-style-type: none"> interpret paint codes and formulas accurately set and adjust settings for: <ul style="list-style-type: none"> spray painting air pressure paint measuring system spray booth temperature settings use basic mathematical operations, including addition, subtraction, multiplication and division to, determine ratios, measure and calculate quantities of paint and materials.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	<ul style="list-style-type: none"> use specialist equipment, including: <ul style="list-style-type: none"> spray painting equipment electronic paint measuring and mixing system computerised drying equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Refinishing materials</i> must	<ul style="list-style-type: none"> metallic, pearl two-pack base coat clear two-pack acrylic enamel
--	---

include:	<ul style="list-style-type: none"> • water-based paints • hardeners • paint reducers.
<i>Tools and equipment</i> must include:	<ul style="list-style-type: none"> • spraying equipment • paint tinting systems • approved spray area • drying equipment • paint measuring system.
<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> • work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> • selecting and using PPE • using TDS and SDS for COB two-pack paint • handling and storing paint materials • using tools and equipment • using approved drying area • environmental requirements, including procedures for trapping, storing and disposing of waste materials.
<i>Meeting specifications</i> must include:	<ul style="list-style-type: none"> • matching colour, texture, depth and gloss • ensuring paint finish is contaminant-free • ensuring paint finish blends into surrounding surfaces.

Unit Mapping Information

Equivalent to AURVTP3024 Mix and apply clear over-base multi-layer pearl refinishing materials

Assessment Requirements for AURVTP024 Apply clear over base multi-layer and pearl refinishing materials to vehicle body components

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- mix and apply clear over base (COB) multi-layer pearl refinishing materials on three different vehicles, including two of the following vehicle body components:
 - single vehicle panel
 - full vehicle side
 - vehicle front end or rear end.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to applying clear over base multi-layer and pearl refinishing materials to vehicle body components, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using technical data sheets (TDS) and safety data sheets (SDS) for COB two-pack paint
 - handling and storing paint materials
 - using tools and equipment
 - using approved drying area
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- vehicle paint specifications

- types and application methods for automotive paint, including correct use of positive air feed masks
- mixing and application techniques for COB multi-layer and pearl refinishing materials, including:
 - paint mixing techniques and systems
 - visual colour matching techniques and use of colour test cards
 - paint fault identification and rectification methods for COB multi-layer and pearl refinishing materials
- types and use of paint colour matching equipment, including:
 - set-up and operation of paint mixing system
 - set-up, operation and maintenance of spray guns
 - paint drying equipment
 - paint cleaning materials and equipment
- procedures for protecting vehicles and components when applying refinishing materials
- procedures for final inspection of completed COB multi-layer pearl application.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the COB refinishing materials they have applied to vehicle body components, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- paint and vehicle manufacturer specifications, paint codes
- TDS and SDS for COB multi-layer and pearl refinishing materials
- PPE, including positive air feed masks
- materials to apply COB multi-layer and pearl refinishing materials
- COB refinishing materials

- three different vehicles or panels requiring painting with COB multi-layer and pearl refinishing materials
- tools, equipment and materials appropriate for mixing and applying COB multi-layer and pearl refinishing materials.

AURVTP025 Apply water-based refinishing materials to vehicle bodies and substrates

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to mix and apply water-based refinishing materials in order to refinish a variety of vehicle bodies and substrates. It involves preparing for the task, selecting and using specialist tools and equipment, identifying paint defects, preparing surfaces, selecting, mixing and applying water-based refinishing materials according to manufacturer specifications, and completing workplace processes and documentation.

It applies to those working in the automotive paint refinishing repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Paint

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to mix and apply water-based refinishing materials	1.1 Job requirements are determined from workplace instructions 1.2 <i>Refinishing information</i> is accessed and interpreted 1.3 <i>Refinishing materials</i> are selected and inspected for quality 1.4 Hazards associated with the work are identified and risks are managed 1.5 <i>Refinishing tools and equipment</i> and personal protective equipment (PPE) are selected and checked for serviceability 1.6 Work is planned to identify mixing and application methods for water-based paint, minimise waste, prevent damage to vehicle, and use time efficiently
2. Mix water-based refinishing materials	2.1 Water-based paint materials are calculated and mixed according to paint manufacturer specifications, formulas, codes, workplace procedures, and <i>safety and environmental requirements</i> 2.2 Codes and information relevant to job requirements are recorded accurately
3. Apply water-based refinishing materials	3.1 Refinishing materials are applied using manufacturer recommended <i>method</i> and intervals, and techniques that ensure painted surface <i>meets specifications</i> , according to safety and environmental requirements 3.2 Refinishing materials are dried using approved methods and equipment
4. Rectify paint faults	4.1 Paint faults are identified according to industry and workplace procedures 4.2 Rectification procedures are selected to suit fault or damage type 4.3 Materials to rectify paintwork are determined from paint manufacturer information 4.4 Paint surface faults are rectified using compounds, polishes and glazes to blend rectified areas with existing paintwork
5. Complete work processes	5.1 Final inspection is made to ensure work meets workplace expectations and vehicle body is presented ready for use 5.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 5.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 5.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes.
Numeracy skills to:	<ul style="list-style-type: none"> interpret paint codes and formulas accurately set and adjust settings for: <ul style="list-style-type: none"> spray painting air pressure paint measuring system spray booth temperature settings use basic mathematical operations, including addition, subtraction, multiplication and division to, determine ratios, measure and calculate quantities of paint and materials.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	<ul style="list-style-type: none"> use specialist equipment, including: <ul style="list-style-type: none"> spray painting equipment electronic paint measuring and mixing system computerised drying equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Refinishing information</i>	<ul style="list-style-type: none"> paint manufacturer specifications paint technical data sheets (TDS)
---------------------------------------	--

must include :	<ul style="list-style-type: none"> • paint safety data sheets (SDS) • workplace procedures.
Refinishing materials must include:	<ul style="list-style-type: none"> • water-based solid, metallic and pearl paint materials • water-based paint reducers and hardeners • cleaning materials.
Refinishing tools and equipment must include:	<ul style="list-style-type: none"> • spaying equipment • paint drying equipment • paint mixing system.
Safety and environmental requirements must include:	<ul style="list-style-type: none"> • work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> • selecting and using PPE • using TDS and SDS for water-based paint • handling and storing paint materials • using tools and equipment • using approved drying area • environmental requirements, including procedures for trapping, storing and disposing of waste materials.
Methods must include:	<ul style="list-style-type: none"> • spraying techniques • drying procedures • detailing.
Meeting specifications must include:	<ul style="list-style-type: none"> • matching colour, texture, depth and gloss • ensuring paint finish is contaminant-free • ensuring paint finish blends into surrounding surfaces.

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- apply water-based refinishing materials on three different vehicle substrates, including two of the following:
 - vehicle panel
 - full vehicle side
 - vehicle front end or rear end.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to applying water-based refinishing materials to vehicle bodies and substrates, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using technical data sheets (TDS) and safety data sheets (SDS) for water-based paint
 - handling and storing paint materials
 - using tools and equipment
 - using approved drying area
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- paint manufacturer specifications
- types and application methods for automotive water-based refinishing materials, including correct use of positive air feed masks
- mixing and application techniques for water-based refinishing materials, including:

- paint mixing techniques and systems
- paint fault identification and rectification methods for water-based refinishing materials
- types and use of equipment used in water-based refinishing processes, including:
 - set-up and operation of paint mixing system
 - set-up, operation and maintenance of spray guns
 - paint drying equipment
 - paint cleaning materials and equipment
- procedures for protecting vehicle and components when applying refinishing materials
- procedures for final inspection of applied water-based refinishing materials.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to having applied water-based refinishing materials to vehicle bodies and substrates, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- paint and vehicle manufacturer specifications
- paint codes
- TDS and SDS for water-based paint
- PPE, including positive air feed masks
- water-based refinishing materials
- three different vehicle substrates specified in the performance evidence requiring painting with water-based refinishing materials
- tools, equipment and materials appropriate for mixing and applying water-based refinishing materials to vehicle bodies and substrates.

Assessment Requirements for AURVTP026 Apply basic airbrush techniques to vehicle body panels

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- airbrush basic customised designs on two different vehicle body panels or substrates, in which the work must involve:
 - pictorial reproduction
 - highlighting
 - special effects.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to applying basic airbrush techniques to vehicle body panels, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - handling and storing paint materials
 - using tools and equipment
 - using approved drying area
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- key features of stencils and graphic design techniques used with vehicle substrates
- types and application methods for airbrushing automotive paints and designs, including correct use of positive air feed masks
- airbrushing application techniques, including:
 - types and main parts of airbrush

- types of masking and stencil mediums
- types of clear top coat refinishing materials
- types and use of airbrush materials and equipment, including:
 - set-up, operation and maintenance of spray guns
 - airbrush spray gun operation and spraying techniques
 - paint cleaning materials and equipment
 - spray gun cleaning methods
- procedures for protecting vehicle and components when airbrushing
- procedures for final inspection of airbrush application.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the airbrushing activities that they have carried out on vehicle substrates, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- PPE required to apply airbrushing
- clear top coat refinishing materials
- airbrush spray guns and paint materials
- two different vehicle body panels or substrates specified in the performance evidence requiring the application of basic airbrush designs
- airbrush spray guns
- tools, equipment and materials appropriate for applying basic airbrush techniques to vehicle body panels.

AURVTP028 Carry out custom painting techniques to vehicle body panels

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to prepare and apply custom painting techniques to a variety of vehicle body panels or substrates in order to produce custom illustrations, graphics and visual effects. It includes developing paint stencils and applying clear or tinted top coat refinishing materials by spray gun application. The unit involves preparing for the task, selecting and using specialist tools and equipment, selecting designs and creating special painted effects using refinishing materials according to workplace or customer instructions, and completing workplace processes and documentation.

It applies to those working in the automotive paint refinishing repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Paint

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to carry out custom painting on vehicle body panels	1.1 Job requirements are determined from workplace instructions 1.2 <i>Painting information</i> is accessed and interpreted 1.3 Custom design specifications are accessed and interpreted 1.4 Hazards associated with the work are identified and risks are managed 1.5 Design stencils, painting equipment, and <i>materials</i> are identified and checked for quality and serviceability 1.6 Work plan is prepared to identify custom painting <i>application methods</i> , minimise waste, and prevent damage to vehicle
2. Determine custom design	2.1 Custom paint design, layout and colour are selected according to workplace instructions, design specifications, and customer order 2.2 <i>Draft design</i> is developed and refined to customer requirements 2.3 Approved custom graphic design is confirmed with customer
3. Prepare design templates and stencils	3.1 Design stencils and templates are prepared based on design and shape specifications and checked against workplace instructions 3.2 Design is <i>applied</i> to stencils 3.3 Stencils are cut out using selected tools according to workplace procedures and <i>safety and environmental requirements</i>
4. Mix and apply paint to create a variety of different visual effects	4.1 Substrate is prepared for the application of custom paint finishes 4.2 Appropriate colour combinations and equipment required to produce various painting effects are selected to reproduce the custom painting design 4.3 Paint colours are mixed and tonal order is applied to replicate custom design 4.4 Lines, shapes, patterns and illustrations are produced using freehand techniques with the assistance of stencils 4.5 Appropriate backgrounds, colour combinations, and effective colours are identified and <i>special effects</i> applied to produce custom illustrations and graphics 4.6 Accurate visual texture, and light and shade, on the given design or subject matter are produced according to customer specifications
5. Prepare and apply clear top coat	5.1 Painted surface is prepared for clear top coat finish using solvent cleaners and tack rags 5.2 Refinishing <i>clear top coat</i> materials are mixed and applied without causing damage to vehicle, systems or components

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
6. Complete work processes	<p>6.1 Final inspection is made to ensure work meets workplace expectations and vehicle is presented ready for use</p> <p>6.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored</p> <p>6.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures</p> <p>6.4 Workplace documentation is processed according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently interpret, respond and keep up-to-date with ways to address diverse customer custom painting design requests.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes.
Numeracy skills to:	<ul style="list-style-type: none"> identify and measure stencil and layout dimensions use basic mathematical operations, including addition and subtraction, to: <ul style="list-style-type: none"> determine ratios measure and calculate quantities of paint and materials.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	<ul style="list-style-type: none"> use custom painting equipment and measuring equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Painting information</i> must include:	<ul style="list-style-type: none"> workplace procedures paint technical data sheets (TDS) paint safety data sheets (SDS) paint manufacturer specifications.
<i>Materials</i> must include:	<ul style="list-style-type: none"> templates and stencils masking mediums paints and glazes cleaning materials.
<i>Application methods</i> must include:	<ul style="list-style-type: none"> stencil preparation and layout paint mixing and application various spraying techniques drying procedures polishing and detailing surfaces.
<i>Draft design</i> must:	<ul style="list-style-type: none"> incorporate size and colour specify the number of overlays specify stencils and graphic preferences.
<i>Application</i> of design to stencil must be by at least one of the following:	<ul style="list-style-type: none"> freehand drawing photography projector or computer-aided printing cutting methods.
<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> selecting and using personal protective equipment (PPE) using TDS and SDS for paint materials handling and storing paint materials using tools and equipment using approved drying area environmental requirements, including procedures for trapping, storing and disposing of waste materials.
<i>Special effects</i> must include:	<ul style="list-style-type: none"> highlighting, reflection and transparency techniques simulating texture, including metal, stone, liquid, leather, fish scales and marbling three-dimensional (3D) effects to create visual realism tribal or indigenous art styles

	<ul style="list-style-type: none">• colour layering processes.
Application of <i>clear top coat</i> must:	<ul style="list-style-type: none">• meet job requirements for texture, depth and gloss• be free of contaminants.

Assessment Requirements for AURVTP028 Carry out custom painting techniques to vehicle body panels

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- apply custom and special effects painting techniques to two different vehicle body panels, in which the work must involve:
 - determining design size
 - using a range of graphics
 - using different colours and paint layering.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to carrying out custom painting techniques to vehicle body panels, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - technical data sheets (TDS) and safety data sheets (SDS) for paint materials
 - handling and storing paint materials
 - using tools and equipment
 - using approved drying area
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- types and application methods for:
 - automotive paints used for custom painting
 - types of clear top coat refinishing materials
 - colour layering processes

- custom painting and application techniques, including:
 - custom graphic design templates, stencils and layout techniques
 - custom painting pictorial reproduction techniques
 - custom painting special effect techniques detailed in the range of conditions
- types and use of custom painting equipment, including:
 - types of spray guns
 - correct use of positive air feed masks
 - spray gun operation and spraying techniques
 - spray gun cleaning methods
 - paint cleaning materials and equipment
- procedures for protecting vehicle and components when applying paint
- procedures for final inspection of custom paint job.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the custom paint work they have completed on vehicle body panels, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- TDS and SDS for paint materials
- PPE required to apply custom painting, including positive air feed masks
- paint and materials required for custom painting
- airbrush spray guns
- paint drying equipment
- two different vehicle body panels requiring the application of custom painting
- tools, equipment and materials appropriate for carrying out custom painting techniques on vehicle body panels.

AURVTP029 Prepare surface and prime repaired body panels

Modification History

Release	Comment
Release 1	New unit of competency

Application

This unit describes the performance outcomes required to prepare and prime a repaired body panel of a vehicle. It requires the learner to plan and prepare the task; identify types of automotive abrasives; remove protective waxes and surface contaminants; feather paint edges; apply filler; and maintain the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Paint

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1.1 Prepare to prime a repaired body panel	1.1 <i>Safety and environmental requirements</i> are sourced and interpreted 1.2 Task instruction is interpreted and vehicle body panel to be

ELEMENTS	PERFORMANCE CRITERIA
	<p>worked on is identified</p> <p>1.3 Manufacturer specifications and workplace procedures for removing paint and preparing surface are sourced and interpreted</p> <p>1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p> <p>1.5 Tools and equipment required for priming body panel are identified according to manufacturer specifications</p>
2. Prepare body panel for priming	<p>2.1 Tools, equipment and materials for priming body panel are selected and checked prior to use according to manufacturer specifications and safety requirements</p> <p>2.2 Vehicle body panel is prepared for priming according to workplace procedures and safety and environmental requirements, and without causing damage to components, tools or equipment</p> <p>2.3 Body panel is inspected according to manufacturer specifications</p> <p>2.4 Body panel inspection results are recorded</p>
3. Apply primer to body panel	<p>3.1 Primer is prepared for application according to manufacturer specifications and safety and environmental requirements</p> <p>3.2 Primer is applied according to workplace procedures, manufacturer specifications, and safety and environmental requirements</p> <p>3.3 Primer is applied to body panel without causing damage to body panel, components, tools or equipment</p> <p>3.4 Body panel is inspected to ensure correct application of primer to body panel</p> <p>3.5 Body panel inspection results are recorded</p>
4. Complete work processes	<p>4.1 Final inspection is made to ensure work meets task instruction and workplace standards, and body panels are primed ready for use or storage according to workplace procedures</p> <p>4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures</p> <p>4.3 Tools and equipment are checked and stored according to workplace procedures, or tagged and reported where necessary</p> <p>4.4 Workplace documentation is processed according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of vehicle panel and priming information and procedures.
Reading skills to:	<ul style="list-style-type: none"> select and interpret key information from manufacturer specifications, safety requirements and workplace procedures for priming a repaired body panel select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation using correct industry terminology and conventions.
Oral communication skills to:	<ul style="list-style-type: none"> participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.
Numeracy skills to:	<ul style="list-style-type: none"> read and interpret numerical information in paint information use basic mathematical operations, including addition, subtraction, multiplication and division, to calculate volumes and ratios.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes.
Self-management skills to:	<ul style="list-style-type: none"> recognise own limitations when selecting and using tools and equipment and seek timely advice.
Problem-solving skills to:	<ul style="list-style-type: none"> identify potential or actual hazards and take action to minimise risk refer problems that cannot be readily resolved and seek assistance from workplace supervisor.
Technology skills to:	<ul style="list-style-type: none"> set up and operate equipment and tools required to prime repaired body panels.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Safety and environmental</i>	<ul style="list-style-type: none"> information about key aspects of work health and safety (WHS),
--	--

requirements must include:	<p>occupational health and safety (OHS) and environmental requirements, including:</p> <ul style="list-style-type: none"> • use of personal protective equipment, including safety glasses, ear protection and safety footwear • use of hand tools • procedures for handling and disposing of used primer, emulsions and solvents • procedures for extracting fumes.
Tools, equipment and materials must include:	<ul style="list-style-type: none"> • preparation and spray areas with fume extraction • spray gun equipment • wet and dry paper • spray gun equipment • sanding discs • emulsion materials • filler • primers, including: <ul style="list-style-type: none"> • etch primer • primer surfacer.
Vehicle body panel must include:	<ul style="list-style-type: none"> • a major body panel from one of the following: <ul style="list-style-type: none"> • passenger vehicle • light commercial vehicle • heavy vehicle • constructed vehicle.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for AURVTP029 Prepare surface and prime repaired body panels

Modification History

Release	Comment
Release 1	New unit of competency

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria and foundation skills:

- correctly surface prepare and prime a minimum of two major vehicle body panels.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
 - use of personal protective equipment, including safety glasses, ear protection and safety footwear
 - use of hand tools, including air and electric sanders
 - safety data sheets (SDS) and procedures for handling and disposing of used primer, emulsions and solvents
 - procedures for extraction of fumes
- types, grades and uses of abrasives and sandpaper
- workplace procedures for:
 - wet and dry sanding
 - surface preparation
 - paint feather edging and precautions
- types of filler and primers and their use
- filler and primer application procedures
- work area clean-up and maintenance requirements.

Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the repaired body panels that they have surface prepared and primed, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- two major vehicle body panels
- tools, equipment and materials, including:
 - preparation and spray areas with fume extraction
 - spray gun equipment
 - wet and dry paper
 - spray gun equipment
 - sanding discs
 - emulsion materials
 - filler
 - primers, including:
 - etch primer
 - primer surfacer
 - solvents.

AURVTP030 Apply paint to vehicle body panels

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to apply paint to vehicle body panels. It involves planning and preparing for the task, selecting paint from a colour code, tinting and mixing paint, applying paint to a panel using a spray gun, drying the panel, and maintaining the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry. The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Paint

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for work	1.1 Task instructions are interpreted and vehicle body panel to be worked on is identified 1.2 Vehicle colour codes are interpreted and paint type, colour, quality and quantity are determined, including top coat 1.3 Manufacturer specifications and workplace procedures for painting body panel are sourced and interpreted 1.4 <i>Safety and environmental requirements</i> are sourced and interpreted 1.5 Spray gun and air line equipment, and paint mixing and tinting equipment are identified and checked for serviceability 1.6 Potential hazards and risks associated with task are identified and reported to workplace supervisor
2. Tint and mix paint	2.1 Paint colour tint requirements are calculated to achieve vehicle colour code 2.2 Paint is mixed according to manufacturer specifications, workplace procedures, and safety and environmental requirements 2.3 Paint colour and mixing requirements are recorded
3. Apply top coat	3.1 Paint is applied using manufacturer recommended method and intervals according to safety and environmental requirements 3.2 Paint is dried using approved methods and equipment 3.3 Body panel is inspected to ensure painted surface meets requirements for colour and finish
4. Complete work processes	4.1 Final inspection is made to ensure work meets task instructions and workplace standards, and body panel is presented ready for use or storage according to workplace procedures 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures 4.3 Tools and equipment are checked and stored according to workplace procedures, or tagged and reported as required 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of vehicle colour information and paint procedures.
Reading skills to:	<ul style="list-style-type: none"> select and interpret key information from: manufacturer specifications, safety requirements and workplace procedures relating to applying paint to body panels environmental requirements and workplace procedures to ensure a clean and safe work site.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures
Numeracy skills to:	<ul style="list-style-type: none"> use basic mathematical operations, including addition, subtraction, multiplication and division, to calculate volumes.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes.

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- apply vehicle paint to two different major vehicle body panels.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to applying paint to vehicle body panels, including procedures for:
 - selecting and using personal protective equipment (PPE), including safety glasses, ear protection and safety footwear
 - using hand tools
 - using fume extraction equipment
- environmental requirements, including procedures for trapping, storing and disposing of paint and cleaning materials
- paint colour mixing procedures, including:
 - vehicle colour code systems
 - colour tint calculation procedures
 - use of mixing scales
- panel painting procedures, including:
 - types, application and operation of spray guns
 - spray gun strain and spray test patterns
- procedures for final inspection of painted vehicle body panels.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the body panels that they have painted, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- PPE for painting vehicle panels
- two different major vehicle body panels
- spray gun
- tools, equipment and materials for painting vehicle panels.

Assessment Requirements for AURVTP031 Cut and polish painted vehicle body panels

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- cut and polish the body panels of one vehicle.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to cutting and polishing painted vehicle body panels, including procedures for:
 - selecting and using personal protective equipment (PPE), including safety glasses, ear protection and safety footwear
 - using hand tools
- environmental requirements, including procedures for trapping, storing and disposing of polishing materials
- types of vehicle panel paints and finishes and implications for choice of polishing materials
- vehicle panel cutting and polishing procedures, including:
 - types and applications of polishing materials, including methods for testing on vehicle paints and finishes
 - types, application and operation of polishing equipment
- procedures for final inspection of cut and polished vehicle body panels.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the body panels that they have cut and polished, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- PPE for cutting and polishing vehicle panels
- one vehicle requiring its body panels to be cut and polished
- tools, equipment and materials for cutting and polishing vehicle panels.

Assessment Requirements for AURVTP032 Prepare and mask vehicle body panel surfaces

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- prepare the surface and apply masking materials to two different major vehicle body panels.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to preparing and masking vehicle body panel surfaces, including procedures for:
 - selecting and using personal protective equipment (PPE), including safety glasses, ear protection and safety footwear
 - using hand tools
- environmental requirements, including procedures for trapping, storing and disposing of used cleaning agents
- panel pre-painting preparation procedures, including cleaning and inspection
- panel masking procedures, including types and use of masking materials, including:
 - spray on
 - paper
 - plastics
 - templates
 - wheel covers
- procedures for final inspection of masked vehicle body panels.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the body panels that they have surface prepared and masked, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- PPE for preparing and masking vehicle panels
- two different major vehicle body panels requiring the application of masking materials
- tools, equipment and materials for preparing and masking vehicle panels.

AURVTS001 Fabricate wooden components for vehicles

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to fabricate wooden components, plugs or moulds for use on vehicles with wooden body frames or parts, using wood material and templates. It involves preparing for the task, selecting and using wood materials and wood working equipment to fabricate wooden components, and completing workplace processes and documentation.

It applies to those working in the automotive service and body industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical – Fabrication

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to fabricate	1.1 Job requirements are determined from workplace instructions

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
wooden component	1.2 Materials are selected and inspected for quality 1.3 Hazards associated with the work are identified and risks are managed 1.4 Wood working tools and equipment and personal protective equipment (PPE) are selected and checked for serviceability 1.5 Work area is prepared and work is planned to identify fabrication techniques, minimise waste, and use time efficiently
2. Fabricate wooden component	2.1 Drawings and specifications are interpreted and measurements taken to prepare templates to fabricate component 2.2 Wooden component is fabricated using appropriate techniques and adhesives according to workplace instructions and safety and environmental requirements , and without causing damage to equipment or machinery
3. Complete work processes	3.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 3.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 3.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 3.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

	subtraction, to calculate: <ul style="list-style-type: none"> • template measurements from drawings and specifications • quantities of required materials.
Planning and organising skills to:	<ul style="list-style-type: none"> • plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	<ul style="list-style-type: none"> • use specialist wood working tools and equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Wood working tools and equipment</i> must include:	<ul style="list-style-type: none"> • measuring equipment • hand tools • machine wood working equipment • gluing and screwing equipment.
<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> • work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> • selecting and using PPE • using safety data sheets (SDS) for adhesives • handling and storing wooden components • using tools and equipment • environmental requirements, including procedures for storing and disposing of waste materials and adhesives.

Unit Mapping Information

Equivalent to AURVTS3001 Carry out wood working operations for fabrication

Assessment Requirements for AURVTS001 Fabricate wooden components for vehicles

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- fabricate two of the following wooden vehicle components:
 - plugs
 - seat frame
 - door frame
 - timber dash panel.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to fabricating wooden components for vehicles, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using safety data sheets (SDS) for adhesives
 - handling and storing wooden components
 - using tools and equipment
- environmental requirements, including procedures for storing and disposing of waste materials and adhesives
- wood fabrication procedures and techniques, including:
 - types and application of wood working tools and equipment
 - types and features of wood
 - types and application of adhesives
 - measuring techniques

- patterns and template development
- procedures for final inspection of fabricated wooden component.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the wooden components they have fabricated for vehicles, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- PPE required for wood working
- SDS for adhesives
- materials relevant to fabrication of wooden components
- wooden vehicle components specified in the performance evidence requiring fabricating
- tools, equipment and materials appropriate for fabricating wooden components for vehicles.

AURVTS002 Repair wooden components in vehicles

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to repair plugs, moulds, frames and flooring in vehicle bodies using wood materials. It involves preparing for the task, selecting and using wood materials and wood working equipment to repair plugs, moulds, frames and flooring components, and completing workplace processes and documentation.

It applies to those working in the automotive service and body repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical – Fabrication

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for work	1.1 Job requirements are determined from workplace instructions 1.2 Materials are selected and inspected for quality

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
	1.3 Hazards associated with the work are identified and risks are managed 1.4 <i>Wood working tools and equipment</i> and personal protective equipment (PPE) are selected and checked for serviceability 1.5 Work area is prepared and work is planned to identify methods for repairing wooden components, minimise waste, and use time efficiently
2. Carry out repair procedures	2.1 Damaged component identified for repair is removed from vehicle, and damage or fault is assessed 2.2 Repairs to damaged component are carried out using manufacturer approved techniques, repair materials and equipment according to workplace procedures and <i>safety and environmental requirements</i> 2.3 Repairs to wooden component are completed without causing damage to equipment, machinery or vehicle 2.4 Repaired component is reinstalled and finished according to workplace procedures
3. Complete work processes	3.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 3.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 3.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 3.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

AURVTS003 Fabricate vehicle composite material components

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to fabricate components for automotive application, using composite materials such as fibreglass and carbon fibre. It involves preparing for the task, selecting and using specialist tools and equipment, identifying composite materials, calculating material quantities, mixing and applying recommended composite materials, finishing components to workplace and customer specifications, and completing workplace processes and documentation.

It applies to those working in the automotive body repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- fabricate two different vehicle composite components, in which the work must involve one air intake.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS), and occupational health and safety (OHS) requirements relating to fabricating vehicle composite material components, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using tools and equipment
 - satisfying ventilation requirements for work area
 - using safety data sheets (SDS) for composite materials
 - handling and storing hazardous resins and chemicals
- environmental requirements, including procedures for trapping, storing and disposing of resins, chemicals and waste materials produced during fabrication process
- types and features of composite materials
- fabrication methods and techniques, including:
 - hand and machine operations
 - mixing and measuring composite materials
 - mould and plug usage
- procedures for final inspection of fabricated composite components.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the composite components that they have fabricated for vehicles, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- PPE required to fabricate composite components
- SDS for composite materials
- materials to fabricate composite components
- two different vehicle composite components to be fabricated
- tools, equipment and materials tools, equipment and materials appropriate for fabricating vehicle composite material components.

Assessment Requirements for AURVTS004 Repair vehicle composite material components

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- repair composite components of two different vehicles, including a repair to:
 - 50 mm diameter hole
 - 100 mm split.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS), and occupational health and safety (OHS) requirements relating to repairing vehicle composite material components, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using tools and equipment
 - satisfying ventilation requirements for work area
 - using safety data sheets (SDS) for composite materials
 - handling and storing hazardous resins and chemicals
- environmental requirements, including procedures for trapping, storing and disposing of resins, chemicals and waste materials produced during fabrication process
- fibreglass and composite material repair procedures and techniques, including:
 - types and application of specialist composite tools and equipment
 - types and features of fibreglass and composite materials
 - use of composite moulds required for support backing during repair
 - measuring and calculation techniques
 - surface preparation for composite repairs

- mixing and applying composite materials according to manufacturer specifications
- finishing techniques for composite surfaces
- reinforcement methods to reinstate pre-damage strength
- composite repair problems and resolution techniques
- procedures for final inspection of repaired composite component.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicle components made of composite materials that they have repaired, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- PPE required to repair composite components
- SDS for composite materials
- composite materials
- two different vehicles requiring the composite component repairs specified in the performance evidence
- tools, equipment and materials appropriate for repairing vehicle composite material components.

Assessment Requirements for AURVTS005 Fabricate vehicle body panels and components

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- fabricate two different vehicle body panels and their components, including vehicle door skin lower half.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to fabricating vehicle body panels and components, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using tools and equipment
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- panel fabrication methods and techniques, including:
 - type of panel materials and application
 - marking out and cutting procedures
 - type and correct use of panel fabrication tools and equipment
 - techniques for producing paper patterns and templates
 - panel fabrication methods
 - wheeling and shaping techniques
- procedures for final inspection of fabricated body panels and components.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicle body panels and components that they have fabricated, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- PPE required to fabricate body panels
- materials to fabricate body panels and components
- two different vehicle body panels and components requiring fabrication
- tools, equipment and materials appropriate for fabricating vehicle body panels and components.

AURVTS006 Fabricate automotive and marine trim components

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to measure, mark out, cut and fabricate automotive or marine trim components to given specifications. It involves preparing for the task, selecting and using specialist tools and equipment, checking material quality, calculating material quantity, assembling and trimming components, identifying fabrication defects, and completing workplace processes and documentation.

It applies to those working in the automotive and marine trimming industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Fabrication

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to fabricate trim	1.1 Job requirements are determined from workplace instructions

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
components	1.2 Materials are selected and inspected for quality 1.3 Hazards associated with the work are identified and risks are managed 1.4 Fabrication tools and equipment and personal protective equipment (PPE) are selected and checked for serviceability 1.5 Work is planned to identify methods for fabricating trim components, minimise waste, and use time effectively
2. Perform fabrication	2.1 Components are <i>fabricated</i> to specification according to workplace instructions, customer and job requirements, and <i>safety and environmental requirements</i> 2.2 Fabricated component is inspected against workplace quality requirements and fabrication defects are reported to appropriate personnel according to workplace procedures
3. Complete work processes	3.1 Final inspection is made to ensure fabrication work meets workplace expectations and component is presented ready for use 3.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 3.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 3.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes.
Numeracy skills to:	<ul style="list-style-type: none"> use basic mathematical operations, including addition and

Skills	Description
	subtraction, to calculate: <ul style="list-style-type: none"> fitting measurements quantities and size of materials.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	<ul style="list-style-type: none"> use specialist trimming and fabrication equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Fabrication</i> must include:	<ul style="list-style-type: none"> measuring, marking and cutting sewing, fastening and assembling.
<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> selecting and using PPE using specialist tools and equipment environmental requirements, including procedures for storing and disposing of waste materials.

Assessment Requirements for AURVTS006 Fabricate automotive and marine trim components

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- fabricate three different automotive or marine trim components to specifications, including one seat assembly.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to fabricating automotive and marine trim components, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using specialist tools and equipment
- environmental requirements, including procedures for storing and disposing of waste materials
- types, operation and basic maintenance of fabrication equipment
- type of trim materials and their applications
- trim component fabrication methods and techniques, including:
 - material marking out and cutting techniques
 - fastening and assembly methods, including:
 - gluing
 - bonding
 - sewing
 - riveting
 - welding
- procedures for identifying material defects

- procedures for protecting vehicle or vessel and components during trim work
- procedures for final inspection of fabricated trim component.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the trim components that they have fabricated, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- workplace instructions
- PPE to fabricate trim components
- materials to fabricate trim components
- three different automotive or marine components requiring trim
- tools, equipment and materials appropriate for fabricating trim components.

AURVTT001 Carry out sewing repairs to automotive and marine trim

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to complete hand and machine sewing repairs to automotive or marine trim. It involves preparing for the task, selecting and using specialist sewing tools and equipment, selecting materials, calculating material quantity, conducting final inspection to ensure work meets workplace expectations and quality requirements, and repaired trim component is presented ready for use, and completing workplace processes and documentation.

It applies to those working in the automotive and marine trimming industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Trimming and Upholstery

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to carry out sewing repairs	1.1 Job requirements are determined from workplace instructions 1.2 Trim repair <i>materials</i> are selected and checked for quality 1.3 Trim material quantities are calculated according to job requirements 1.4 Hazards associated with the work are identified and risks are managed 1.5 Tools and equipment, including sewing machines and personal protective equipment (PPE), are selected and checked for serviceability 1.6 Work is planned to identify <i>sewing repair methods</i> , minimise waste, and use time effectively
2. Mark out and complete sewing repairs	2.1 Sewing repairs are marked out according to material specifications and workplace procedures 2.2 Sewing repairs are completed according to job requirements, <i>safety and environmental requirements</i> , and workplace quality standards and timeframes
3. Complete work processes	3.1 Final inspection is made to ensure work meets workplace expectations and quality requirements, and repaired trim component is presented ready for use 3.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 3.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 3.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.

Skills	Description
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes.
Numeracy skills to:	<ul style="list-style-type: none"> use basic mathematical operations, including addition and subtraction, to calculate measurements and required quantity of materials use rulers and tape measure to mark out materials.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	<ul style="list-style-type: none"> use sewing machines and specialist equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Materials</i> must include:	<ul style="list-style-type: none"> trim cloth leather carpet sewing materials.
<i>Sewing repair methods</i> must include:	<ul style="list-style-type: none"> hand sewing machine sewing.
<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> selecting and using PPE using specialist tools and equipment environmental requirements, including procedures for storing and disposing of waste materials.

Assessment Requirements for AURVTT001 Carry out sewing repairs to automotive and marine trim

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- carry out sewing repairs on three different automotive or marine trim components, including:
 - one seat repair
 - one carpet repair.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to carrying out sewing repairs to automotive and marine trim, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using specialist tools and equipment
- environmental requirements, including procedures for storing and disposing of waste materials
- types and uses of trim sewing materials
- types and uses of sewing tools and equipment, including sewing machine operation and basic maintenance
- sewing repair methods and techniques, including hand and machine sewing methods and techniques
- procedures for identifying and addressing material defects
- quality standards relating to sewing repair work
- procedures for final inspection of sewing repair.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the sewing repairs that they have worked on, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- workplace instructions
- PPE required for sewing repairs
- trim materials to carry out sewing repairs
- three different automotive or marine trim components requiring sewing repairs
- tools, equipment and materials appropriate for carrying out sewing repairs.

Assessment Requirements for AURVTT003 Remove and replace automotive and marine interior trim components

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- remove, store and replace trim components for three different vehicles or vessels, in which the work must involve:
 - door trims
 - carpets
 - head lining.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to removing and replacing automotive and marine interior trim components, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using specialist tools and equipment
 - manual handling components
- environmental requirements, including procedures for storing and disposing of waste materials
- original equipment manufacturer (OEM) specifications for removing and replacing automotive or marine interior trim components
- types and uses of specialist tools and equipment needed to remove and replace interior trim components
- trim component removal and replacement techniques and procedures, including procedures for protecting vehicle or vessel and components

- procedures for final inspection of automotive or marine interior trim components.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles or vessels in which they removed and replaced interior trim, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- workplace instructions
- PPE required to remove and replace vehicle or vessel interior trim components
- OEM specifications and manuals
- three different vehicles or vessels requiring the removal and replacement of interior trim components specified in the performance evidence
- tools, equipment and materials appropriate for removing and replacing automotive and marine interior trim.

AURVTT004 Trim vehicle components

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to calculate, mark, cut, sew and attach trim material to vehicle components. It involves preparing for the task, selecting and using specialist tools and equipment, selecting trim materials and checking their quality, developing material patterns, fabricating, assembling and attaching trim to components and checking trim against specifications, and completing workplace processes and documentation.

It applies to those working in the automotive and marine trimming industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AURVTT004 Trim vehicle components

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- manufacture and attach two different trim components.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to trimming vehicle components, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using safety data sheets (SDS) for trim materials
 - using specialist tools and equipment
 - manual handling techniques
- environmental requirements, including procedures for storing and disposing of waste materials
- types and uses of trimming materials, including detection of faults and repair defects
- types and uses of specialist tools and equipment needed to manufacture and attach trim components
- techniques and procedures for trimming components, including:
 - measuring, marking and cutting
 - sewing techniques
 - trim removal and replacement
 - trim cleaning
- procedures for protecting vehicle and components when trimming components
- procedures for final inspection of trimmed component.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicle components that they have trimmed, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- workplace instructions
- PPE required to trim components
- SDS for trim materials
- vehicle or components for trimming
- tools, equipment and materials appropriate for trimming vehicle components.

AURVTT005 Select trim and fabric materials

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to select trim and fabric materials and determine attaching methods. It involves preparing for the task, selecting materials for specific applications, checking material quality, and completing workplace processes and documentation.

It applies to those working in the automotive and marine trimming industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle body

Unit Sector

Technical - Trimming and Upholstery

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for work	1.1 Job requirements are determined from workplace instructions 1.2 Hazards associated with the work are identified and risks are

	<p>managed</p> <p>1.3 Work area is prepared and a range of trim materials is gathered for inspection according to workplace instructions</p>
2. Select and inspect materials	<p>2.1 Trim materials are selected against job and customer requirements</p> <p>2.2 Trim materials are checked for quality and reported if faulty</p>
3. Determine attachment methods	<p>3.1 Attachment material information is sourced and interpreted</p> <p>3.2 Attachment options are analysed and those most appropriate to the circumstances are selected</p> <p>3.3 Selected option is reported according to workplace procedures</p>
4. Complete work processes	<p>4.1 Final material selection is presented ready for use</p> <p>4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored</p> <p>4.3 Workplace documentation is processed according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures
Numeracy skills to:	<ul style="list-style-type: none"> use basic mathematical operations, including addition, subtraction, multiplication and division, to calculate: <ul style="list-style-type: none"> quantities of trim and materials fitting measurements in metric and imperial systems measure accurately using metric and imperial measuring equipment.

Planning and organising skills to:	<ul style="list-style-type: none">plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
------------------------------------	--

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

There is no Range of Conditions for this unit.

Assessment Requirements for AURVTT005 Select trim and fabric materials

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria and foundation skills:

- select trim and fabric materials for three different vehicle or marine components.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- environmental requirements, including procedures for storing and disposing of waste materials
- procedures for selecting trim and fabric materials for automotive and marine applications
- types and application of trims, including:
 - polyvinyl chloride (PVC)
 - leather
 - fabric
- procedures for identifying trim material faults and defects
- procedures for selecting attachment options, including types and application of attachments, including sewing, rivets, adhesives and stapling
- techniques and procedures to apply trim materials, including:
 - measuring, marking and cutting
 - fabrication and sewing techniques
 - trim attachment
 - trim cleaning.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the trim and fabric materials that they have selected, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- PPE requirements to apply trim materials
- workplace instructions
- trim and fabric materials
- trim attachment consumables
- three different vehicle or vessel components requiring trim material matching
- tools, equipment and materials appropriate for selecting trim materials.

AURVTT006 Apply trimming adhesives

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to select and apply trim adhesives. It involves preparing for the task, including preparing surfaces, selecting and applying adhesives to specifications, removing excess adhesive, and completing workplace processes and documentation.

It applies to those working in the automotive and marine trimming industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle body

Unit Sector

Technical - Trimming and Upholstery

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to apply trim adhesives	1.1 Job requirements are determined from workplace instructions 1.2 Adhesive specifications, application processes, and relevant

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
	safety data sheets (SDS) are accessed and interpreted 1.3 Hazards associated with the work are identified and risks are managed 1.4 Tools and equipment, including personal protective equipment (PPE), are selected and checked for serviceability 1.5 Work area is prepared and work is planned to minimise waste and use time efficiently
2. Prepare surfaces and apply adhesive	2.1 Adhesive is selected according to manufacturer recommendation, trim and material type 2.2 Surfaces are cleaned and prepared according to adhesive manufacturer specifications and SDS requirements 2.3 Adhesive is applied to surfaces using adhesive application tools and equipment and according to workplace procedures and <i>safety and environmental requirements</i>
3. Complete work processes	3.1 Final adhesive selection is made and presented ready for use 3.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 3.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 3.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Assessment Requirements for AURVTT006 Apply trimming adhesives

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- apply trim adhesives to three different vehicle or vessel components, in which the work must involve:
 - one vehicle or marine fixed cover
 - one vehicle or marine carpet section.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to applying trimming adhesives, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using specialist tools and equipment
 - using safety data sheets (SDS) for adhesives
 - handling and storing adhesives
- environmental requirements, including procedures for storing and disposing of waste adhesives
- types and uses of specialist trimming tools and equipment
- adhesive types required for different materials, including:
 - polyvinyl chloride (PVC)
 - fabric
 - leather
- adhesive application techniques, including:
 - surface preparation

- application
- cleaning
- procedures for protecting vehicle and components when applying trim adhesives.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles where they have applied trim adhesives, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- workplace instructions
- SDS for adhesives
- PPE required to apply trim adhesives
- adhesives for PVC, fabric and leather
- PVC, fabric and leather materials
- three different vehicles or vessels with components requiring trimming
- tools, equipment and materials appropriate for applying trim, materials and adhesives.

Assessment Requirements for AURVTT007 Clean plastic trim and fittings of vehicles

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- clean the internal and external plastic trim and fittings of three different vehicles.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to cleaning plastic trim and fittings of vehicles, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using safety data sheets (SDS) for cleaning products
 - using cleaning equipment
 - handling and storing cleaning products
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- types of vehicle plastic trim and fittings
- cleaning products required for different trims and fittings
- types and use of cleaning equipment
- procedures for final inspection of cleaned vehicle trim and fittings.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicle trim and fittings that they have cleaned, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive detailing workplace or simulated workplace
- workplace instructions
- PPE required to clean plastic trim and fittings
- SDS for cleaning products
- cleaning materials
- three different vehicles with plastic trim and fittings requiring cleaning
- cleaning tools, equipment and materials appropriate for cleaning vehicle plastic trim and fittings.

Assessment Requirements for AURVTT008 Clean vehicle interior trim

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- clean and finish the following interiors of three different vehicles, including:
 - seats
 - carpets
 - mats
 - dash
 - arm rests
 - consoles
 - door trim.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to cleaning vehicle interior trim, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using safety data sheets (SDS) for cleaning products and finishing agents
 - using tools and equipment
 - handling and storing cleaning products
- environmental requirements, including procedures for trapping, storing and disposing of waste materials and cleaning agents
- types of vehicle interior trim and components specified in the performance evidence
- cleaning and finishing products and equipment application methods and techniques

- procedures for protecting vehicle interiors while cleaning
- procedures for final inspection of cleaned interior.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicle interior trim that they have cleaned, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- workplace instructions
- PPE required to clean vehicle interiors
- SDS for cleaning products and finishing agents
- cleaning and finishing materials
- three different vehicles with the interiors specified in the performance evidence requiring cleaning
- tools, equipment and materials appropriate for cleaning vehicle interior trim.

Assessment Requirements for AURVTT009 Remove and replace vehicle and vessel seats and fittings

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- remove and replace three different vehicle or vessel front and rear seats and fittings.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to removing and replacing vehicle and vessel seats and fittings, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using specialist tools and equipment
 - manual handling techniques
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- manufacturer instructions for removing and replacing seats and fittings, including:
 - electric seats
 - seat massage
 - heated seats
 - memory seats
- types and use of workplace tools and equipment required for removing and replacing seats and fittings
- vehicle and marine electric seat disconnection and reconnection procedures
- procedures and requirements for safely storing seat and trim components

- procedures for protecting vehicle and components when removing and replacing seats and fittings
- procedures for final inspection and testing of replaced seats and fittings.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles or vessels where they have removed and replaced seats and fittings on, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- workplace instructions
- PPE required to remove and replace seats and fittings
- three different vehicle or vessel front and rear seats and fittings to be removed and replaced
- seat and fitting storage racks
- tools, equipment and materials appropriate for removing and replacing vehicle or vessel seats and fittings.

AURVTT010 Remove and manufacture or repair vehicle head lining

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to remove and manufacture or repair a vehicle head lining. It involves preparing for the task, selecting and using specialist tools and equipment, selecting materials and checking their quality, manufacturing or repairing a vehicle head lining, replacing it according to manufacturer specifications, and completing workplace processes and documentation.

It applies to those working in the automotive and marine trimming industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle body

Unit Sector

Technical - Trimming and Upholstery

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for work	1.1 Job requirements are determined from workplace instructions 1.2 Manufacturer specifications and workplace procedures are accessed and interpreted 1.3 Hazards associated with the work are identified and risks are managed 1.4 Tools and equipment, including personal protective equipment (PPE), are selected and checked for serviceability 1.5 Work is planned to minimise waste and use time efficiently
2. Remove head lining	2.1 Fittings are removed in preparation for removing head lining 2.2 Head lining is removed using vehicle manufacturer recommended tools, equipment and procedures 2.3 Activities are completed according to <i>safety and environmental requirements</i> and without causing damage to vehicle or components
3. Manufacture or repair head lining	3.1 Materials are selected according to workplace instructions and customer requirements 3.2 Manufacturing, repair and attachment methods are identified 3.3 Templates are produced from workplace instructions or head lining sample 3.4 Materials are measured, marked and cut according to workplace instructions 3.5 Head lining is manufactured or repaired according to workplace procedures and safety and environmental requirements
4. Replace head lining	4.1 Head lining is replaced using vehicle manufacturer recommended tools, equipment and procedures 4.2 Fittings are replaced after installing head lining according to safety and environmental requirements and without causing damage to vehicle or components
5. Complete work processes	5.1 Final inspection is made to ensure work meets workplace expectations and vehicle is presented ready for use 5.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 5.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 5.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes.
Numeracy skills to:	<ul style="list-style-type: none"> use basic mathematical operations, including addition and subtraction, to calculate: <ul style="list-style-type: none"> head lining fitting measurements quantities of required materials.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	<ul style="list-style-type: none"> use specialist removal and installation equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> selecting and using PPE using specialist tools and equipment manual handling techniques environmental requirements, including procedures for storing and disposing of waste materials.

Assessment Requirements for AURVTT010 Remove and manufacture or repair vehicle head lining

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- remove one vehicle head lining, in which the work must involve the following fittings:
 - interior lights
 - sun shields
 - rear vision mirrors
 - door rubbers
- manufacture or repair and then replace the above head lining.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to removing and manufacturing or repairing vehicle head lining, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using specialist tools and equipment
 - manual handling techniques
- environmental requirements, including procedures for storing and disposing of waste materials
- types of head linings and materials
- types and use of tools and equipment required for removing, manufacturing or repairing, and replacing vehicle head lining, including:
 - trimming tools and equipment
 - sewing machines

- methods and procedures for removing and replacing vehicle head lining, including:
 - electrical disconnection and reconnection
 - removal and installation of fittings, including:
 - interior lights
 - sun shields
 - rear vision mirrors
 - door rubbers
- head lining attachment techniques
- head lining repair or manufacturing methods
- procedures for protecting vehicle and components when removing, manufacturing or repairing, and replacing vehicle head lining
- procedures for final inspection of manufactured or repaired and fitted vehicle head lining.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles where they have removed, manufactured or repaired, and then replaced vehicle head lining, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive trimming workplace or simulated workplace
- workplace instructions
- PPE required to manufacture or repair head lining
- vehicle with head lining requiring replacement or repair
- tools, equipment and materials appropriate for removing, manufacturing or repairing, and then replacing vehicle head lining.

AURVTT012 Conduct sewing operations

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to conduct sewing operations using hand and machine techniques. It involves preparing for the task, selecting and using specialist sewing tools and equipment, selecting materials, and completing workplace processes and documentation.

It applies to those working in the automotive and marine trimming industry. It includes a range of automotive or marine trimming applications.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle body

Unit Sector

Technical - Trimming and Upholstery

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to carry out	1.1 Job requirements are determined from workplace instructions

Assessment Requirements for AURVTT012 Conduct sewing operations

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- machine sew two of the following vehicle or marine components or trim:
 - seat cover for bucket or bench seat
 - door trims
 - carpets
 - head linings
- hand sew one steering wheel cover.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to sewing operations, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using specialist tools and equipment
- environmental requirements, including procedures for storing and disposing of waste materials
- types of sewing tools, equipment and consumables and their uses
- hand and machine sewing methods and techniques
- final inspection procedures for sewing work.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicle or vessel components or trim that they have sewed, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- workplace instructions
- PPE to carry out sewing
- components and trim specified in the performance evidence requiring machine and hand sewing
- materials and consumables required to carry out sewing operations
- sewing tools, equipment and materials appropriate for carrying out sewing operations.

Prepare to fabricate canvas products	1.1 Job requirements are determined from workplace instructions 1.2 Canvas materials are selected and inspected for quality and quantities are calculated 1.3 Hazards associated with the work are identified and risks are managed 1.4 Tools and equipment, including personal protective equipment (PPE), are selected for appropriate <i>fabrication methods</i> and checked for serviceability 1.5 Work area is prepared and work is planned to minimise waste and use time efficiently
2. Cut, fabricate and install canvas covers and products	2.1 Materials are measured, marked out and cut according to job requirements and workplace instructions 2.2 Canvas products are fabricated using canvas sewing techniques and according to job requirements, workplace procedures, and <i>safety and environmental requirements</i> 2.3 Canvas products are assembled according to workplace procedures and safety and environmental requirements 2.4 Installation methods for canvas products are identified and applied according to work instructions
3. Complete work processes	3.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 3.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 3.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 3.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
---------------	--------------------

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes.
Numeracy skills to:	<ul style="list-style-type: none"> use basic mathematical operations, including addition and subtraction, to calculate: <ul style="list-style-type: none"> fitting measurements quantities of canvas materials use tape measure to take measurements.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	<ul style="list-style-type: none"> use specialist tools and equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Fabrication methods</i> must include:	<ul style="list-style-type: none"> measuring, marking out and cutting canvas material machine sewing reinforcing and edge finishing assembling and installing.
<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> selecting and using PPE using specialist tools and equipment manual handling components environmental requirements, including procedures for storing and disposing of waste materials.

Assessment Requirements for AURVTT015 Fabricate and install canvas products for automotive and marine components

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- fabricate and install one canvas product for an automotive or marine application.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to fabricating and installing canvas products for automotive and marine components, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using specialist tools and equipment
 - manual handling components
- environmental requirements, including procedures for storing and disposing of waste materials
- types and operation of trimming and fabrication tools and equipment
- designs and styles of different types of canvas products
- types, characteristics and applications of:
 - canvas materials
 - fasteners
- methods and techniques for fabricating and installing canvas products, including:
 - selecting canvas
 - planning
 - measuring
 - marking out

- cutting
- sewing
- procedures for protecting vehicle and components when installing products
- procedures for final inspection of fabricated and installed canvas products.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the canvas products that they have fabricated and installed, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- workplace instructions
- PPE required to fabricate and install canvas products
- materials required to fabricate and install canvas products
- one vehicle or vessel requiring a canvas product to be fabricated and installed
- tools, equipment and materials appropriate for fabricating and installing canvas products.

AURVTT017 Fabricate and install automotive and marine floor coverings

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to measure, mark out, and cut, and fabricate and install automotive or marine floor coverings. It involves preparing for the task, selecting and using specialist tools and equipment, selecting materials and checking their quality, following manufacturer and customer instructions, and completing workplace processes and documentation.

It applies to those working in the automotive and marine trimming service and repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Trimming and Upholstery

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.

AURVTT018 Fabricate and install automotive and marine soft top hoods

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to measure, mark out and cut, and fabricate and install vehicle or marine soft top hoods. It involves preparing for the task, selecting and using specialist tools and equipment, selecting materials and checking their quality, fabricating and assembling soft top hoods according to vehicle manufacturer specifications and customer instructions, and completing workplace processes and documentation.

It applies to those working in the automotive and marine trimming industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Trimming and Upholstery

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to fabricate soft top hood	1.1 Job requirements are determined from workplace instructions 1.2 Original equipment manufacturer (OEM) specifications and workplace procedures are accessed and interpreted 1.3 Materials required to fabricate soft top hoods are selected and inspected for quality 1.4 Hazards associated with the work are identified and risks are managed 1.5 Tools and equipment, including personal protective equipment (PPE), are selected and checked for serviceability 1.6 Work is planned to minimise waste and use time efficiently
2. Undertake fabrication and installation activities	2.1 Material is measured, marked out and cut using patterns and templates and according to OEM specifications and workplace instructions 2.2 Specialist tools and equipment are used according to safety and environmental requirements 2.3 Soft top hood is fabricated and assembled according to job requirements, workplace procedures, and safety and environmental requirements 2.4 Soft top hood is installed and fastened according to workplace procedures and without causing damage to vehicle or components 2.5 Installation and fastening are checked for correct operational requirements
3. Complete work processes	3.1 Final inspection is made to ensure work meets workplace expectations and vehicle or vessel is presented ready for use 3.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 3.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 3.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

AURVTT020 Select and use leather in automotive and marine trimming

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to identify, select and use leather in the trimming of automotive and marine components. It involves preparing for the task, selecting and using specialist tools and equipment, checking leather quality, calculating required quantities, matching leather, fabricating and attaching covers and trim to manufacturer and customer instructions, and completing workplace processes and documentation.

It applies to those working in the automotive and marine trimming industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Trimming and Upholstery

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to use leather trimming	1.1 Job requirements are determined from workplace instructions 1.2 Adhesive safety data sheet (SDS) information is accessed and interpreted 1.3 Materials are selected and inspected for quality, and quantities are calculated 1.4 Hazards associated with the work are identified and risks are managed 1.5 Trimming tools and equipment and personal protective equipment (PPE) are selected and checked for serviceability 1.6 Work and cutting are planned to minimise waste and use time efficiently
2. Fabricate leather components	2.1 Leather features and characteristics are checked carefully prior to cutting and are matched against workplace instructions 2.2 Leather pieces are laid and marked out in sequence according to developed cutting plan and safety and environmental requirements 2.3 Leather pieces are cut according to cutting plan and using predetermined measurements or patterns 2.4 Leather is sewn to produce required range of trimming components
3. Attach leather to vehicle, vessel or component	3.1 Leather component is positioned and checked prior to being attached to ensure correct fit 3.2 Leather is attached using most appropriate method and according to workplace procedures and job requirement
4. Complete work processes	4.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 4.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes.
Numeracy skills to:	<ul style="list-style-type: none"> use basic mathematical operations, including addition and subtraction, to calculate: <ul style="list-style-type: none"> fitting measurements in metric and imperial systems quantities of leather and materials.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	<ul style="list-style-type: none"> use specialist equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Materials</i> must include:	<ul style="list-style-type: none"> leather hides patterns trimming materials cleaning materials adhesives.
<i>Trimming tools and equipment</i> must include:	<ul style="list-style-type: none"> sewing machines trimming hand and power tools.
<i>Leather features and characteristics</i> must include:	<ul style="list-style-type: none"> natural markings colour variation flexibility

	<ul style="list-style-type: none"> • corrected grain • quality • wear quality and stress.
<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> • work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> • selecting and using PPE • using SDS information relating to adhesives • using specialist tools and equipment • manually handling leather materials • environmental requirements, including procedures for storing and disposing of waste materials.

Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- fabricate one leather seat cover and one trim component for a vehicle or vessel.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to selecting and using leather in automotive and marine trimming, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using safety data sheet (SDS) information relating to adhesives
 - using specialist tools and equipment
 - manually handling leather materials
- environmental requirements, including procedures for storing and disposing of waste materials
- technical characteristics and features of leather and criteria for their selection
- procedures for tanning leather
- type, use and basic maintenance of sewing and trimming tools and equipment
- methods and techniques for fabricating leather, including:
 - selecting and preparing leather hide
 - planning
 - measuring and calculating leather quantities
 - marking out and using patterns
 - cutting

- sewing
- using adhesives
- fitting and fastening
- procedures for cleaning leather
- procedures for protecting vehicle, vessel and components when using trimming
- procedures for final inspection of leather trimming components.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the automotive and marine trimming they have made using leather, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- workplace instructions
- PPE required to fabricate leather components
- leather and materials to carry out trimming activities
- component of one vehicle or vessel requiring leather trim
- tools, equipment and materials appropriate for selecting and using leather in automotive and marine trimming.

AURVTT021 Select and apply adhesives in automotive and marine service and repair work

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to select and use adhesives with a range of automotive and marine surfaces. It involves preparing for the task, selecting and using tools and equipment, and completing workplace processes and documentation.

It applies to those working in the automotive service and repair industry. The adhesives include those used with automotive, marine, motorcycle, aircraft or recreational vehicle materials.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Trimming and Upholstery

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for work	1.1 Job requirements are determined from workplace instructions 1.2 <i>Adhesive information</i> is accessed and interpreted 1.3 Hazards associated with the work are identified and risks are managed 1.4 Tools and equipment, including personal protective equipment (PPE), are selected and checked for serviceability 1.5 Work area is prepared and work is planned to minimise waste and use time efficiently
2. Select adhesive	2.1 Appropriate adhesive for specific automotive materials is selected according to manufacturer specifications and workplace procedures 2.2 Specific safety data sheet (SDS) information for selected adhesive is identified and followed
3. Apply adhesive to prepared surfaces	3.1 Surfaces are cleaned and prepared according to adhesive manufacturer specifications 3.2 Adhesives are applied according to workplace procedures and <i>safety and environmental requirements</i> , and without causing damage to system or components
4. Complete work processes	4.1 Final adhesive selection is made and presented for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected 4.3 Tools and equipment are checked and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.

Skills	Description
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	<ul style="list-style-type: none"> use specialist adhesive tools and equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Adhesive information</i> must include:	<ul style="list-style-type: none"> adhesive-specific specifications adhesive-specific application and removal instructions and processes SDS information manufacturer specifications.
<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> selecting and using PPE using SDS for adhesives using specialist tools and equipment storing adhesives environmental requirements, including procedures for trapping, storing and disposing of adhesives and waste materials.

Assessment Requirements for AURVTT021 Select and apply adhesives in automotive and marine service and repair work

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- select and apply adhesives to three different automotive or marine components, in which the work must involve one door trim.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to selecting and applying adhesives in automotive and marine service and repair work, including procedures for:
 - selecting and using PPE
 - using safety data sheets (SDS) for adhesives
 - using specialist tools and equipment
 - storing adhesives
- environmental requirements, including procedures for trapping, storing and disposing of adhesives and waste materials
- adhesive manufacturer specifications
- adhesive types required for different automotive and marine materials
- adhesive application techniques and procedures, including:
 - surface preparation
 - application
 - cleaning and disposal
- procedures for protecting vehicle, vessel and components when applying adhesives
- procedures for final inspection of applied adhesive.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the adhesives they have selected and used on vehicles, vessels and components, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- workplace instructions
- instructions relating to the selection and use of adhesives
- SDS for adhesives
- adhesives
- PPE required to use adhesives
- three different automotive or marine components as specified in the performance evidence requiring the use of adhesives
- tools, equipment and materials appropriate for applying adhesives.

AURVTV001 Remove, replace and test non-electrical vehicle components and accessories

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to remove, replace, fit and test non-electrical vehicle components and accessories. It involves preparing for the task, selecting and using specialist tools and equipment, removing, installing and testing non-electrical components and accessories during vehicle servicing or vehicle repair, and completing workplace processes and documentation.

It applies to those working in the automotive service and repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Accessories

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to remove, replace and test non-electrical components and accessories	1.1 Job requirements are determined from workplace instructions 1.2 Manufacturer specifications and workplace instructions are sourced and interpreted 1.3 Hazards associated with the work are identified and risks are managed 1.4 Tools and equipment, including personal protective equipment (PPE), are identified and checked for serviceability 1.5 Work is planned to sequence activities, minimise waste, and use time efficiently
2. Remove and replace non-electrical components and accessories	2.1 Work area is prepared and tools and equipment are set up according to workplace procedures and <i>safety and environmental requirements</i> 2.2 Non-electrical components and accessories are identified and removed without causing damage to vehicle or components 2.3 Non-electrical components and accessories are refitted according to manufacturer specifications and workplace instructions
3. Test non-electrical components and accessories	3.1 Test information is accessed and interpreted from manufacturer specifications 3.2 Testing of non-electrical components and accessories is completed according to manufacturer specifications and without causing damage to systems or components
4. Complete work processes	4.1 Final inspection is made to ensure work meets workplace expectations and components and accessories are presented ready for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 4.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

Assessment Requirements for AURVTV001 Remove, replace and test non-electrical vehicle components and accessories

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- remove, replace, fit and test three different non-electrical components and accessories, including two of the following:
 - bonnet and boot locking system
 - side window assemblies
 - door key locks
 - wiper blade assemblies
 - seat assemblies.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to removing, replacing and testing non-electrical vehicle components and accessories, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - handling and storing non-electrical components and accessories
 - using tools and equipment
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- vehicle manufacturer specifications and repair and service manuals
- removal, replacement and testing methods and techniques, including:
 - type and use of components and accessories

- procedures to remove, replace, fit and test a range of non-electrical components and accessories
- procedures for final inspection and testing of fitted non-electrical components and accessories.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the non-electrical components that they have removed, replaced and tested, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- vehicle manufacturer specifications and repair and service manuals
- PPE required to remove, replace and test non-electrical vehicle components and accessories
- vehicles requiring the non-electrical components and accessories specified in the performance evidence to be removed, replaced and tested
- tools, equipment and materials appropriate for removing, replacing and testing non-electrical vehicle components and accessories.

AURVTW001 Carry out manual metal arc welding on components

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to prepare and weld components using the manual metal arc welding (MMAW) process. It involves preparing for the task, selecting, setting up and operating MMAW equipment, identifying and selecting welding electrodes appropriate to welding requirements, selecting and using suitable personal protective equipment (PPE), performing welding to required standard and specifications, inspecting weld quality, and completing workplace processes and documentation.

It applies to those working in the automotive service and repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Welding, Grinding, Machining and Soldering

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare to weld component	1.1 Job requirements are determined from workplace instructions 1.2 Welding electrodes, weld size, type and sequence, and quantity of materials are identified 1.3 Hazards associated with the work are identified and risks are managed 1.4 <i>Tools and equipment</i> are selected and checked for serviceability 1.5 Work is planned to minimise waste and use time efficiently
2. Weld materials using MMAW	2.1 Welding equipment is set up and used according to workplace procedures and <i>safety and environmental requirements</i> 2.2 Distortion prevention measures are identified and adjusted as required 2.3 Test runs are conducted according to workplace instructions and quality requirements 2.4 Materials are welded using MMAW process to required specifications
3. Check welds	3.1 Weld quality and specifications are confirmed by non-destructive inspection 3.2 Weld defects are identified, prepared for re-welding as required, and appropriate personnel are notified
4. Complete work processes	4.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 4.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes.
Numeracy skills to:	<ul style="list-style-type: none"> identify and set welding machine settings identify welding rod specifications.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Problem solving skills to:	<ul style="list-style-type: none"> identify weld defects, quality issues and potential problems associated with MMAW process and refer problems to appropriate person.
Technology skills to:	<ul style="list-style-type: none"> use specialist MMAW equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Tools and equipment</i> must include:	<ul style="list-style-type: none"> PPE MMAW equipment MMAW electrodes and materials protective screens and fume extraction system.
<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> work health and safety (WHS), and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> selecting and using PPE when working with MMAW equipment, including approved welding helmet using specialist welding tools and equipment using protective screens and fume extraction system manually handling components and MMAW equipment identifying and controlling hazards environmental requirements, including procedures for trapping, storing and disposing of waste materials.

Assessment Requirements for AURVTW001 Carry out manual metal arc welding on components

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- carry out manual metal arc welding (MMAW), including:
 - three bead runs, 150 mm long
 - three pad welds, 150 mm long
 - three butt welds, 150 mm long
 - three lap welds, 150 mm long.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS), and occupational health and safety (OHS) requirements relating to carrying out manual metal arc welding on components, including procedures for:
 - selecting and using personal protective equipment (PPE) when working with MMAW equipment, including approved welding helmet
 - using specialist welding tools and equipment
 - using protective screens and fume extraction system
 - manually handling components and MMAW equipment
 - identifying and controlling hazards
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- hazards associated with MMAW, including:
 - arc eye and exposure to ultraviolet light
 - metal vapours, welding electrodes and welded components

- molten metal spatter and fire danger
- distortion control techniques, including:
 - bracing
 - pre-setting
 - tacking
 - bolting
 - clamping
 - jigs and fixtures
- material preparation techniques, including characteristics of different metal types
- procedures for setting up and operating MMAW equipment
 - methods and techniques for MMAW, including:
 - weld specifications
 - basic welding symbols
 - types of welding electrodes and their application
 - protection of vehicle electronics
 - weld inspection
 - identification and rectification of weld defects
- procedures for final inspection and testing of welded components.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the MMAW that they have carried out, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- PPE required for MMAW
- components to be welded as specified in the performance evidence

- welding materials and consumables
- MMAW equipment and operating instructions
- tools, equipment and materials appropriate for carrying out MMAW.

AURVTW002 Carry out oxyacetylene brazing of components

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to carry out oxyacetylene brazing. It involves preparing for the task, selecting, setting up and operating an oxyacetylene welding plant, setting gas pressures, identifying and adjusting required flame appropriate to brazing requirements, selecting and using suitable personal protective equipment (PPE), performing oxyacetylene brazing to given specifications, and completing workplace processes and documentation.

It applies to those working in the automotive service and repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Welding, Grinding, Machining and Soldering

Assessment Requirements for AURVTW002 Carry out oxyacetylene brazing of components

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- carry out oxyacetylene brazing procedures on the following:
 - butt joint of 1.00 mm steel, 150 mm long
 - fillet joint of 1.00 mm steel, 150 mm long
 - lap joint of 1.6 mm steel, 150 mm long
 - pipe joint of 1.6 mm steel, 50 mm diameter.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS), and occupational health and safety (OHS) requirements relating to carrying out oxyacetylene brazing of components, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using specialist tools and equipment, including approved oxyacetylene brazing glasses
 - manually handling components and oxyacetylene equipment
 - identifying and controlling hazards
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- types and application of brazing materials, including fluxes and rods
- use and operation of oxyacetylene plant, including procedures for setting and adjusting pressure and gauges
- oxyacetylene flame identification and applications, including:
 - natural
 - carburising

- oxidising
- basic maintenance procedures for oxyacetylene equipment
- methods and techniques for oxyacetylene brazing
- procedures for reporting faults and material defects
- procedures for final inspection and testing of brazed components.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the oxyacetylene brazing activities that they have carried out, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- PPE required to use oxyacetylene brazing equipment
- components to be brazed as specified in the performance evidence
- brazing equipment, consumables and materials
- oxyacetylene plant
- tools, equipment and materials appropriate for carrying out oxyacetylene brazing.

AURVTW003 Carry out advanced gas metal arc welding on vehicle body sections

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to carry out advanced gas metal arc welding (GMAW) to replace structural and non-structural vehicle body sections during vehicle body repair work. It involves preparing for the task, selecting and using GMAW equipment, setting gas flow pressures and welder settings, operating gas metal arc welder, selecting and using suitable personal protective equipment (PPE), inspecting and testing weld quality, and completing workplace processes and documentation.

It applies to those working in the automotive service and repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle body

Unit Sector

Technical - Welding, Grinding, Machining and Soldering

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare to carry out advanced GMAW	1.1 Job requirements are determined from workplace instructions 1.2 <i>Welding information</i> is accessed and interpreted 1.3 Hazards associated with the work are identified and risks are managed 1.4 <i>Tools and equipment</i> are selected and checked for serviceability 1.5 Work area is prepared and work is planned to carry out GMAW, minimise waste, and use time efficiently
2. Weld using GMAW welder	2.1 GMAW equipment is prepared, set up and adjusted for specific welding job requirement according to manufacturer procedures and <i>safety and environmental requirements</i> 2.2 Weld test runs are conducted according to workplace instructions and weld specifications 2.3 Materials are welded using standard or inverter GMAW process to industry and original equipment manufacturer (OEM) or authorised agency standards
3. Check welds	3.1 Welds are cleaned using appropriate tools and techniques and according to workplace instructions 3.2 Weld specifications and quality requirements are checked and confirmed by visual inspection and destructive testing 3.3 Weld defects are identified are prepared for re-welding as required, and appropriate personnel are notified
4. Complete work processes	4.1 Final inspection is made to ensure work meets workplace expectations and components are presented ready for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 4.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes.
Numeracy skills to:	<ul style="list-style-type: none"> identify and set gas metal arc welder settings identify weld measurements from job requirements.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Problem solving skills to:	<ul style="list-style-type: none"> identify defects, quality issues and potential problems associated with GMAW processes and refer problems to appropriate person.
Technology skills to:	<ul style="list-style-type: none"> use specialist GMAW equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Welding information</i> must include:	<ul style="list-style-type: none"> GMAW equipment operating procedures national standards and codes of practice for welding OEM or authorised agency standards workplace procedures.
<i>Tools and equipment</i> must include:	<ul style="list-style-type: none"> PPE GMAW standard or inverter welders GMAW consumables and materials approved welding helmets welding protective screens and fume extraction system.
<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> work health and safety (WHS), and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> selecting and using PPE when working with GMAW equipment, including approved welding helmet using specialist welding tools and equipment

	<ul style="list-style-type: none">• using protective screens and fume extraction system• manually handling vehicle components and GMAW equipment• identifying and controlling hazards• environmental requirements, including procedures for trapping, storing and disposing of waste materials.

Assessment Requirements for AURVTW003 Carry out advanced gas metal arc welding on vehicle body sections

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- use gas metal arc welding (GMAW) equipment to carry out the following welds:
 - three butt welds to 0.8 mm and 1.2 mm panel steel in the following positions:
 - down hand
 - vertical
 - horizontal
 - two lap welds to 0.8 mm and 1.2 mm panel steel in the following positions:
 - vertical
 - horizontal
 - three plug welds to 0.8 mm and 1.2 mm panel steel in the following positions:
 - down hand
 - vertical
 - horizontal
 - two butt welds on dissimilar material thickness 0.8 mm to 1.2 mm panel steel in the following positions:
 - down hand
 - horizontal.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS), and occupational health and safety (OHS) requirements relating to carrying out advanced GMAW on vehicle body sections, including procedures for:
 - selecting and using personal protective equipment (PPE) when working with GMAW equipment, including approved welding helmet
 - using specialist welding tools and equipment
 - using protective screens and fume extraction system
 - manually handling vehicle components and GMAW equipment
 - identifying and controlling hazards
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- GMAW equipment manufacturer operating procedures
- original equipment manufacturer (OEM) or authorised agency welding standards
- material and consumable preparation techniques, including characteristics of different metal types, including high strength steels (HSS)
- procedures for setting up and operating GMAW equipment
- methods and techniques for advanced GMAW, including:
 - GMAW silicone bronze process
 - weld speed
 - weld angle
 - weld distance
 - welding positions
 - welding of dissimilar metal thicknesses
 - distortion control techniques
 - GMAW testing, including:
 - non-destructive inspection
 - destructive testing
 - identification and rectification of weld defects, including:
 - porosity
 - lack of penetration
 - excessive weld build-up
 - excess heat
 - undercut
 - weld distortion
 - heat affected zone
- procedures for safeguarding vehicle electronics during GMAW
- post-weld inspection procedures.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the GMAW that they have carried out, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- GMAW equipment operating instructions
- PPE required for GMAW
- body sections specified in the performance evidence requiring GMAW
- protective screens and fume extraction system
- standard or inverter GMAW equipment
- tools, equipment, consumables and materials appropriate for carrying out advanced GMAW.

AURVTW004 Carry out tungsten inert gas welding

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to carry out welding operations using tungsten inert gas (TIG) welding. It involves preparing for the task, selecting and using TIG welding equipment, setting gas flow pressures and welder settings, selecting and using suitable personal protective equipment (PPE), performing welding to given specifications, inspecting and testing weld quality, and completing workplace processes and documentation.

It applies to those working in the automotive service and repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle body

Unit Sector

Technical - Welding, Grinding, Machining and Soldering

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare to	1.1 Job requirements are determined from workplace instructions

Assessment Requirements for AURVTW004 Carry out tungsten inert gas welding

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- carry out tungsten inert gas (TIG) welding to the following material sections:
 - 150 mm long:
 - aluminium
 - steel
 - stainless steel
 - perform the above TIG welding in the following weld positions:
 - butt
 - outside corner
 - fillet
 - lap.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS), and occupational health and safety (OHS) requirements relating to carrying out TIG welding, including procedures for:
 - selecting and using personal protective equipment (PPE) for TIG welding, including approved welding helmets
 - using specialist welding tools and equipment
 - using protective screens and fume extraction system
 - manually handling vehicle components and TIG equipment
 - identifying and controlling hazards

- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- different types of shielding gases used in TIG welding
- TIG manufacturer operating procedures
- material and consumable preparation techniques, including:
 - aluminium
 - steel
 - stainless steel
- procedures for setting up and operating TIG equipment
- methods and techniques for TIG welding, including:
 - welding positions:
 - butt
 - outside corner
 - fillet
 - lap
 - weld distortion and distortion control techniques
 - TIG testing procedures, including procedures for visual or non-destructive weld testing
- procedures for identifying and rectifying weld defects, including:
 - lack of penetration
 - excessive weld build-up
 - excess heat
 - undercut
 - heat affected zone
- procedures for protecting vehicle electronics during TIG welding
- procedures for final inspection of welded components.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to TIG welding that they have carried out, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- TIG equipment operating instructions
- PPE required for TIG welding
- protective screens and fume extraction system
- TIG welder and shielding gases
- TIG consumables
- materials specified in the performance evidence requiring TIG welding
- tools, equipment and materials appropriate for carrying out TIG welding.

AURVTW005 Carry out spot welding

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to carry out spot welding to replace structural and non-structural vehicle body sections according to original equipment manufacturer (OEM) or authorised agency procedures. It involves preparing for the task, selecting and using spot welding equipment, adjusting spot welder, operating spot welder, selecting and using suitable personal protective equipment (PPE), inspecting and testing weld quality, and completing workplace processes and documentation.

It applies to those working in the automotive service and repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Welding, Grinding, Machining and Soldering

Elements and Performance Criteria

Assessment Requirements for AURVTW005 Carry out spot welding

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- carry out spot welding to three different structural and non-structural vehicle body sections that include 50 spot welds to each
- undertake above work according to original equipment manufacturer (OEM) or authorised agency procedures, and cover different spot weld locations and spot weld sizes.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS), and occupational health and safety (OHS) requirements relating to carrying out spot welding, including procedures for:
 - selecting and using personal protective equipment (PPE) for spot welding, including safety glasses
 - using specialist welding tools and equipment
 - using protective screens
 - manually handling vehicle components and welding equipment
 - identifying and controlling hazards
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- OEM or authorised agency repair guidelines and quality requirements
- types of metals that can be spot welded
- types and operation of spot welding equipment covering:
 - set up
 - operation

- methods and techniques for spot welding, including spot welding principles:
 - squeeze time
 - weld time
 - hold time
- procedures for destructive testing of spot welds
- types of spot weld defects, including:
 - shunting
 - splashing
 - insufficient heat
- procedures for final inspection of welding work.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicle spot welds that they have carried out, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- OEM or authorised agency repair guidelines
- PPE required for spot welding
- spot welder that meets current industry standard
- spot welding consumables
- materials requiring spot welding
- vehicle body sections or components that require the spot welding specified in the performance evidence
- tools, equipment and materials appropriate for carrying out spot welding.

AURVTW006 Carry out thermoplastic welding on vehicle trim components

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to carry out thermoplastic welding on vehicle trim components. It involves preparing for the task, selecting and using thermoplastic welding equipment, setting equipment temperature, selecting and using suitable personal protective equipment (PPE), completing thermoplastic welds to vehicle manufacturer and customer specifications, finishing weld to pre-paint condition, and completing workplace processes and documentation.

It applies to those working in the automotive service and repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Welding, Grinding, Machining and Soldering

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to weld	1.1 Job requirements are determined from workplace instructions 1.2 <i>Welding information</i> is accessed and interpreted 1.3 Materials for thermoplastic welding are selected and inspected for quality 1.4 Hazards associated with the work are identified and risks are managed 1.5 Thermoplastic welding tools and equipment and PPE are selected and checked for serviceability 1.6 Work is planned to minimise waste and use time efficiently
2. Carry out thermoplastic welding activities	2.1 Work area and fume extraction system are prepared ready for thermoplastic welding 2.2 Thermoplastic welding equipment is set up and adjusted for specific job requirement following vehicle manufacturer specification 2.3 Reinforcement methods are applied to ensure pre-damage strength 2.4 Thermoplastic welding equipment is used according to workplace procedures and <i>safety and environmental requirements</i> 2.5 Thermoplastic weld is finished to pre-paint condition and completed without causing damage to vehicle or components 2.6 Completed thermoplastic weld is inspected for quality and faults are identified and rectified as required and according to workplace procedures
3. Complete work processes	3.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 3.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 3.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 3.4 Workplace documentation is processed according to workplace procedures

Assessment Requirements for AURVTW006 Carry out thermoplastic welding on vehicle trim components

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- carry out thermoplastic welding procedures on three different vehicle trim components, in which the work must involve:
 - two different types of thermoplastics
 - one weld to a minimum of 50 mm in length.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to carrying out thermoplastic welding on vehicle trim components, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using safety data sheets (SDS) for thermoplastics
 - manually handling vehicle components and welding equipment
 - using tools and equipment
 - using fume extraction equipment
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- vehicle manufacturer thermoplastic specifications
- type and use of fume extraction systems
- types and characteristics of plastics used in thermoplastic welding
- types and operation of thermoplastic welding equipment, including:
 - set-up

- operation
- methods and techniques for thermoplastic welding
- procedures for protecting vehicle and components during weld
- procedures for final inspection of thermoplastic weld.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the thermoplastic welding that they have carried out, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- SDS for thermoplastics
- PPE required for thermoplastic welding
- fume extraction systems
- consumables and materials to weld thermoplastic
- three different vehicle trim components specified in the performance evidence requiring thermoplastic welding
- thermoplastic welder
- tools, equipment and materials appropriate for carrying out thermoplastic welding.

AURVTW007 Carry out oxyacetylene thermal heating and cutting on vehicle body sections

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to set up an oxyacetylene plant, follow safety requirements, adjust gauges to recommended working pressures, and conduct thermal heating and cutting. It involves preparing for the task, identifying and adjusting flame appropriate to thermal heating and cutting requirements, selecting and using suitable personal protective equipment (PPE), performing oxyacetylene thermal heating and cutting to given instructions, and completing workplace processes and documentation.

It applies to those working in the automotive service and repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Welding, Grinding, Machining and Soldering

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for the job	1.1 Job requirements are determined from workplace instructions 1.2 Equipment manufacturer operating procedures and workplace procedures are accessed and interpreted 1.3 Materials for oxyacetylene thermal heating and cutting are selected and inspected for quality 1.4 Hazards associated with the work are identified and risks are managed 1.5 <i>Tools and equipment</i> and PPE are selected and checked for serviceability 1.6 Work is planned to minimise waste and use time efficiently
2. Conduct thermal heating and cutting activities	2.1 Work area is prepared according to workplace instructions and workplace procedures 2.2 Oxyacetylene equipment is set up, gauges and pressures are set, and flames are adjusted according to equipment manufacturer operating procedures and workplace procedures 2.3 Metal temperatures are monitored using a range of <i>methods</i> 2.4 Thermal heating and cutting are carried out according to <i>safety and environmental requirements</i> and without causing damage to vehicle or components
3. Complete work processes	3.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 3.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 3.3 Tools and equipment are checked, maintained and reported if faulty, and stored according to workplace procedures 3.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
---------------	--------------------

Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes.
Numeracy skills to:	<ul style="list-style-type: none"> identify and set oxyacetylene gas working pressure and gauges.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	<ul style="list-style-type: none"> use specialist oxyacetylene equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Tools and equipment</i> must include:	<ul style="list-style-type: none"> oxyacetylene plant thermal heating and cutting equipment.
<i>Methods</i> must include at least one of the following:	<ul style="list-style-type: none"> colour heat crayon temperature gauge.
<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> work health and safety (WHS), and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> selecting and using PPE when working with oxyacetylene equipment using specialist thermal heating and cutting tools and equipment manually handling vehicle components and heating and cutting equipment identifying and controlling hazards environmental requirements, including procedures for trapping, storing and disposing of waste materials.

Unit Mapping Information

Equivalent to AURVTW2007 Conduct oxy-acetylene, thermal heating and cutting

Assessment Requirements for AURVTW007 Carry out oxyacetylene thermal heating and cutting on vehicle body sections

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- carry out oxyacetylene thermal heating and cutting on three different vehicle body sections.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS), and occupational health and safety (OHS) requirements relating to carrying out oxyacetylene thermal heating and cutting on vehicle body sections, including procedures for:
 - selecting and using personal protective equipment (PPE) when working with oxyacetylene equipment
 - using specialist thermal heating and cutting tools and equipment
 - manually handling vehicle components and heating and cutting equipment
 - identifying and controlling hazards
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- equipment manufacturer operating procedures
- use and operation of oxyacetylene plant, including procedures for setting and adjusting pressure and gauges
- oxyacetylene flame identification and applications, including:
 - natural
 - carburising
 - oxidising

- maintenance requirements of oxyacetylene equipment, including checking for oxyacetylene gas leaks from gauges, fittings and hoses
- methods, techniques and procedures for oxyacetylene thermal heating and cutting
- procedures for protecting vehicle and components during oxyacetylene thermal heating and cutting work
- procedures for final inspection of oxyacetylene thermal heating and cutting work.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to having used oxyacetylene thermal heating and cutting on vehicle body sections, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- PPE required to conduct oxyacetylene thermal heating and cutting
- oxyacetylene plant
- three different vehicle body sections requiring thermal heating and cutting
- oxyacetylene safety equipment and operating instructions
- tools, equipment and materials appropriate for carrying out oxyacetylene thermal heating and cutting.

AURVTW009 Carry out basic gas metal arc welding

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to prepare and weld components using the gas metal arc welding (GMAW) process. It involves preparing for the task, selecting and using GMAW equipment and personal protective equipment (PPE), setting gas flow pressures and welder settings, inspecting and testing weld quality, and completing workplace processes and documentation.

It applies to those working in the automotive service and repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Welding, Grinding, Machining and Soldering

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to carry out	1.1 Job requirements are determined from workplace instructions

Assessment Requirements for AURVTW009 Carry out basic gas metal arc welding

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- carry out gas metal arc welding (GMAW) on the following steel sections:
 - three butt welds, 150 mm long
 - three fillet welds, 150 mm long
 - three steel exhaust pipe butt welds.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS), and occupational health and safety (OHS) requirements relating to carrying out basic GMAW, including procedures for:
 - selecting and using personal protective equipment (PPE) when working with GMAW equipment, including approved welding helmet
 - using specialist welding tools and equipment
 - using protective screens and fume extraction system
 - manually handling components and GMAW equipment
 - identifying and controlling hazards
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- hazards associated with GMAW, including:
 - arc eye and exposure to ultraviolet light
 - molten metal spatter and fire danger
- GMAW principles, including:
 - process of using an electric arc to melt and join metal

- basic construction and operation of welding gun and wire feed unit
- types and application of welding wire and shielding gases
- properties and characteristics of metals to be welded
- types of welds, including:
 - butt welds
 - fillet welds
 - tee joints
 - corner joints
- procedures for protecting vehicle electronics during welding
- GMAW procedures, including:
 - component cleaning and preparation
 - welder current and voltage settings, gas flow rates, wire diameters and wire feed speed
 - wire stick out distance, gun angle between the work pieces and travel angle
- weld testing procedures, including non-destructive testing
- post-weld inspection procedures including, weld defects.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the basic GMAW they have carried out on components, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- PPE required for GMAW, including approved welding helmet
- GMAW welder
- steel sections requiring GMAW as specified in the performance evidence
- tools, equipment and materials appropriate for carrying out basic GMAW.

AURVTW010 Set up and use welding equipment

Modification History

Release	Comment
Release 1	New unit of competency

Application

This unit describes the performance outcomes required to set up and use welding equipment to weld a range of materials. It requires the learner to plan and prepare the task; select and set up the correct welding equipment; weld using different welding techniques; and maintain the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Welding, Grinding, Machining and Soldering

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to set up and use welding equipment	1.1 <i>Safety and environmental requirements</i> are sourced and interpreted

ELEMENTS	PERFORMANCE CRITERIA
	<p>1.2 Task instruction is interpreted and welding equipment, tools and materials needed to complete the task are determined</p> <p>1.3 Manufacturer specifications and workplace procedures for use of welding equipment and associated materials are sourced and interpreted</p> <p>1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p>
2. Set up welding equipment and materials	<p>2.1 Identified welding equipment, tools and materials are sourced and checked according to manufacturer specifications, workplace procedures and safety requirements</p> <p>2.2 Welding equipment is set up according to manufacturer specifications, workplace procedures and safety requirements</p> <p>2.3 Materials to be welded are identified and sourced</p>
3. Use welding equipment	<p>3.1 Welding equipment and materials set up for the task are checked prior to use according to manufacturer specifications, workplace procedures and safety requirements</p> <p>3.2 Welding method and precautions outlined in the task instruction are interpreted and followed</p> <p>3.3 Welding task and demonstration are carried out correctly according to manufacturer specifications, workplace procedures and safety requirements</p>
4. Complete work processes	<p>4.1 Final inspection is made to ensure work is completed according to task instruction and workplace standards</p> <p>4.2 Welding equipment and tools are checked and stored in a condition ready for use according to workplace procedures, or tagged and reported where necessary</p> <p>4.3 Problems with welding equipment or tools are reported according to workplace procedures</p> <p>4.4 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures</p> <p>4.5 Workplace documentation is processed according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of welding information and procedures.
Reading skills to:	<ul style="list-style-type: none"> select and interpret key information from manufacturer specifications, safety requirements and workplace procedures to set up and safely operate welding equipment select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation using correct industry terminology and conventions.
Oral communication skills to:	<ul style="list-style-type: none"> participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.
Numeracy skills to:	<ul style="list-style-type: none"> use basic mathematical operations, including addition, subtraction, multiplication, division to calculate percentages, and to calculate, calibrate and set equipment settings read and interpret numerical information in welding equipment identification figures.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work and prioritise actions to set up, undertake and complete the welding task.
Self-management skills to:	<ul style="list-style-type: none"> recognise own limitations when selecting and using tools and welding equipment and seek timely advice.
Problem-solving skills to:	<ul style="list-style-type: none"> identify hazards or potential hazards and take action to minimise risk refer problems that cannot be readily resolved and seek assistance from workplace supervisor.
Technology skills to:	<ul style="list-style-type: none"> set up and operate equipment and tools required to complete the welding task.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Italicised wording, if used in the performance criteria, is detailed below.

<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> • information about key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including: <ul style="list-style-type: none"> • use of personal protective equipment, including safety glasses and welding helmets, ear protections and safety footwear • use of fume extraction system and welding bay • disposal of welding material and wastes.
<i>Welding equipment, tools and materials</i> must include:	<ul style="list-style-type: none"> • one of the following welders: <ul style="list-style-type: none"> • metal arc welder • gas metal arc (MIG) welder • welding bay, curtains and fume extraction • fluxes, gases, welding rods and wire.
<i>Setting up welding equipment</i> must include:	<ul style="list-style-type: none"> • checking for leaks from gas bottles • checking and adjusting gas pressures • checking gas plant earth straps and clamps.
<i>Welding task and demonstration</i> must include:	<ul style="list-style-type: none"> • producing the following types of welds: <ul style="list-style-type: none"> • butt weld • lap weld • bead run

Assessment Requirements for AURVTW010 Set up and use welding equipment

Modification History

Release	Comment
Release 1	New unit of competency

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria and foundation skills:

- set up and use welding equipment on at least two occasions.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
 - safety data sheets (SDS) and toxic chemicals and gases used and produced in welding
 - potential hazards and risks relating to welding, including fire hazards and ultraviolet skin and eye damage
 - use of personal protective equipment, including safety glasses and welding helmets, ear protections and safety footwear
 - use of fume extraction system and welding bay
 - disposal of welding material and wastes
- types of welding equipment, including:
 - metal arc
 - gas metal arc
- types of fluxes and gases used in welding
- welding equipment set-up procedures
- types and purposes of different welding techniques
- key steps in different welding techniques.

Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to welding activities, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application

The following resources must be made available:

- automotive workplace or simulated workplace
- welding equipment and tools, including at least one of the following:
- metal arc welder
- MIG welder
- welding bay, curtains and fume extraction
- fluxes, gases, welding rods and wire.

AURVTW018 Carry out oxyacetylene welding, thermal heating and cutting

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the skills and knowledge required to carry out basic welding, thermal heating and cutting operations. It involves preparing for the task, setting up and operating an oxyacetylene plant, setting gas pressures, identifying and adjusting flame appropriate for welding, thermal heating or cutting requirements, selecting and using suitable personal protective equipment (PPE), and completing workplace processes and documentation.

It applies to those working within the automotive service and repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical - Welding, Grinding, Machining and Soldering

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for oxyacetylene welding, thermal heating and cutting	1.1 Identify job requirements from workplace instruction 1.2 Obtain and interpret technical information, workplace procedures, national standards and codes of practice, original equipment manufacturer (OEM) or authorised agency standards relating to oxyacetylene welding, thermal heating and cutting 1.3 Identify hazards and environmental issues associated with the work, assess potential risks and implement control measures from workplace health and safety requirements 1.4 Identify tools, equipment and materials required for the job and examine for serviceability

	1.5 Plan welding, thermal heating or cutting activity to minimise waste and use time efficiently according to workplace expectations
2. Weld, thermal heat and cut using oxyacetylene plant	<p>2.1 Carry out oxyacetylene gas working pressure adjustment and flame identification and setting according to workplace procedures, workplace health and safety and environmental requirements</p> <p>2.2 Carry out welding, thermal heating, and cutting activity according to national standards and codes of practice, OEM or authorised agency standards, workplace procedures, workplace health and safety and environmental requirements</p>
3. Complete work processes	<p>3.1 Carry out final inspection to ensure work meets workplace expectations and component is ready for use</p> <p>3.2 Clear work area and dispose of or recycle materials according to workplace procedures</p> <p>3.3 Examine and store tools and equipment, ensuring faulty equipment is reported according to workplace procedures</p> <p>3.4 Complete workplace documentation according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate relevant sources of oxyacetylene welding, thermal heating and cutting information efficiently
Reading skills to:	<ul style="list-style-type: none"> read and interpret information and ideas from workplace procedures, documentation, legislation and regulations on safe operating procedures for oxyacetylene welding, thermal heating and cutting
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes
Numeracy skills to:	<ul style="list-style-type: none"> identify and set oxyacetylene gas working pressure and gauges
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements prioritise actions to achieve required outcomes ensure tasks are completed within workplace timeframes

Technology skills to:	<ul style="list-style-type: none"> use specialist oxyacetylene equipment

Assessment Requirements for AURVTW018 Carry out oxyacetylene welding, thermal heating and cutting

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

The candidate must demonstrate they can perform the following according to the standards defined in the elements, performance criteria and foundation skills of this unit.

The candidate must demonstrate using oxyacetylene welding, thermal heating and cutting equipment to carry out welds that safely follow workplace procedures to meet required outcomes. This includes:

- carrying out oxyacetylene welding procedures on:
 - one butt joint, 150 mm long
 - one fillet joint, 150 mm long
 - one lap joint, 150 mm long
 - one exhaust pipe joint
- carrying out a thermal cutting task:
 - a straight cut of 150 mm long
- carrying out one of the following thermal heating tasks:
 - freeing a corroded bolt or fitting
 - freeing a corroded exhaust component.

Knowledge Evidence

The candidate must demonstrate the following knowledge:

Key policies and procedures for carrying out oxyacetylene welding, thermal heating and cutting, including:

- how to locate and interpret the following:
 - original equipment manufacturer (OEM) or authorised agency standards relating to oxyacetylene welding, thermal heating and cutting activity
 - Australian welding Standard AS1554
 - workplace instructions relating to carrying out oxyacetylene welding, thermal heating and cutting activity

- workplace procedures relating to carrying out oxyacetylene welding, thermal heating and cutting activity
- the following workplace health and safety requirements for carrying out oxyacetylene welding, thermal heating and cutting:
 - selecting and using personal protective equipment (PPE) to use oxyacetylene equipment, including approved oxyacetylene welding glasses
 - using specialist welding, thermal heating and cutting tools and equipment
 - manually handling components and welding, thermal heating and cutting equipment
 - identifying and controlling hazards
- the following environmental requirements for carrying out oxyacetylene welding, thermal heating and cutting:
 - procedures for trapping, storing and disposing of waste materials
- the following procedures for oxyacetylene welding
 - the use and operation of oxyacetylene plant, including setting and adjusting pressure and gauges
 - reporting faults and material defects
 - final inspection
- workplace housekeeping and documentation procedures

Technical information regarding oxyacetylene welding, thermal heating and cutting including:

- the types and characteristics of different metals
- the following oxyacetylene flame identification and adjustment processes:
 - natural
 - carburising
 - oxidising
- the following maintenance requirements of oxyacetylene equipment:
 - checking for oxyacetylene gas leaks from gauges, fittings and hoses
- methods and techniques for thermal heating and cutting
-

Assessment Conditions

The assessment must:

- include access to:
 - an automotive repair workplace or simulated workplace that reflects workplace conditions - where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources
 - repair orders and workplace instructions relating to oxyacetylene welding, thermal heating and cutting activity

- workplace procedures relating to oxyacetylene welding, thermal heating and cutting activity
- oxyacetylene welding, thermal heating and cutting equipment operating procedures
- OEM or authorised agency standards relating to oxyacetylene welding, thermal heating and cutting
- Australian welding Standard AS1554
- PPE required to use oxyacetylene welding equipment
- welding equipment, consumables and materials
- oxyacetylene plant
- tools, equipment and materials suitable for carrying out oxyacetylene welding, thermal heating and cutting
- be demonstrated in the workplace or in a simulated environment that reflects workplace conditions
- be conducted in a safe environment
- be assessed in compliance with relevant legislation and regulations; and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed
- confirm consistent performance can be applied in a range of relevant workplace circumstance

Assessor Requirements

Assessors of this unit must:

- satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards
-

BSBCUE405 Survey stakeholders to gather and record information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to prepare, survey and record relevant and required details of information collected according to organisational, legislative and regulatory requirements.

It applies to individuals who need to solve a defined range of unpredictable problems, analyse and evaluate information from a variety of sources, and who may provide leadership and guidance to others with some limited responsibility for the output of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Engagement

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Obtain, record and analyse information	1.1 Identify information sources 1.2 Collect and document information according to organisational procedures and legislative and policy requirements 1.3 Collate, sort and analyse information collected in relation to purpose for which it is being obtained

ELEMENT	PERFORMANCE CRITERIA
	1.4 Ensure contents of recording forms and reports are in line with organisational requirements
2 Take and compile statements	2.1 Take comprehensive statements from sources appropriate to matter being investigated, according to organisational procedures and legislative and policy requirements 2.2 Use active listening when taking accurate statements from people
3 Conduct interviews	3.1 Plan, manage and conduct interviews to gather maximum information relevant to matter being examined 3.2 Treat all interviewees fairly and equitably 3.3 Conduct and record interviews according to legislation, policy and procedures
4 Use information and database systems	4.1 Enter information into database, adhering to data entry security procedures 4.2 Identify and use appropriate sources of information when recording data 4.3 Access and store information according to legislation, policy and procedures
5 Use interview and evidence recording equipment	5.1 Operate recording equipment according to legislation, policy and procedures 5.2 Produce records according to organisational requirements and procedures 5.3 Maintain equipment and usage logs in good order
6 Conduct follow-up activities	6.1 Identify and use communication links within organisation to exchange information 6.2 Assess relevance of information received in terms of its intended purpose 6.3 Dispose of irrelevant information according to legislation, policy and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.4, 4.2, 6.2	<ul style="list-style-type: none"> Analyses and reviews a range of texts of varying complexity to determine relevance, accuracy and usefulness
Writing	1.2	<ul style="list-style-type: none"> Documents a range of required information using structure, detailed language and format appropriate to purpose
Oral Communication	2.1, 2.2, 3.1, 3.3, 6.1	<ul style="list-style-type: none"> Participates effectively in exchanges with others using structure and tone appropriate to gather and exchange information Uses questioning techniques and active listening to confirm details and clarify responses

Assessment Requirements for BSBCUE405 Survey stakeholders to gather and record information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- source, analyse and record information in compliance with organisational requirements
- use professional interview techniques to conduct and record interviews, including audiotapes and statements if applicable to role, according to relevant statutory, regulatory and legislative requirements
- access, store and dispose of information in compliance with legal and organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify information types and their sources
- outline procedures and security measures for accessing, storing, retrieving and sharing data from databases
- describe rights of individuals in relation to conduct of interviews and compilation of statements
- identify statutory, regulatory and legislative requirements relating to surveying stakeholders
- outline use of evidence and contact recording technology.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations – customer engagement field of work. This includes access to:

- information and databases for analysis
- relevant legislation, standards and guidelines
- interviewees
- recording equipment.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBCUS501 Manage quality customer service

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and manage organisational systems for quality customer service
- develop and review plans, policies and procedures for delivering and monitoring quality customer service
- implement policies and procedures to ensure quality customer service
- solve complex customer complaints and system problems that lead to poor customer service
- monitor and assist teams to meet customer service requirements
- develop, procure and use human and physical resources to support quality customer service delivery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislative and regulatory context of the organisation relevant to customer service
- describe organisational policy and procedures for customer service including handling customer complaints
- identify service standards and best practice models
- summarise public relations and product promotion
- outline techniques for dealing with customers including customers with specific needs

- explain techniques for solving complaints including the principles and techniques involved in the management and organisation of:
 - customer behaviour
 - customer needs research
 - customer relations
 - ongoing product and/or service quality
 - problem identification and resolution
 - quality customer service delivery
 - record keeping and management methods
 - strategies for monitoring, managing and introducing ways to improve customer service relationships
 - strategies to obtain customer feedback.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- legislation, regulations and codes of practice related to customer service
- business technology
- workplace documentation and resources
- complex customer complaints
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use financial skills to work with and interpret budgets, ageing summaries, cash flow, petty cash, Goods and Services Tax (GST), and profit and loss statements
- communicate with relevant people to clarify budget/financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record keeping requirements for the Australian Taxation Office (ATO) and for auditing purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic accounting principles
- identify and explain the relevant legislation and current requirements of the Australian Taxation Office, including the Goods and Services Tax (GST)
- explain the key requirements for financial record keeping and auditing
- describe the principles and techniques involved in managing:
 - budgeting
 - cash flows
 - electronic spreadsheets

- GST
- ledgers and financial statements
- profit and loss statements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- resources and documentation used in the workplace
- workplace policies and procedures
- workplace budgets and financial plans
- business technology
- case studies and, where available, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFLM312 Contribute to team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to the effectiveness of the work team. It involves planning with the team to meet expected outcomes, developing team cohesion, participating in and facilitating the work team, and communicating with the management of the organisation.

It applies to individuals who play a prominent part in motivating, mentoring, coaching and developing team cohesion through team leadership and forming the link between the management of the organisation and the team members. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve complex or non-routine activities that require some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Frontline Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Contribute to team outcomes	1.1 Consult team members to identify team purpose, roles, responsibilities, goals, plans and objectives 1.2 Support team members to meet expected outcomes

ELEMENT	PERFORMANCE CRITERIA
2 Support team cohesion	<p>2.1 Encourage team members to participate in the planning, decision making and operational aspects of the work team to their level of responsibility</p> <p>2.2 Encourage team members to take responsibility for their own work and to assist each other in undertaking required roles and responsibilities</p> <p>2.3 Provide feedback to team members to encourage, value and reward team members' efforts and contributions</p> <p>2.4 Identify and address issues, concerns and problems identified by team members, or refer to relevant persons as required</p>
3 Participate in work team	<p>3.1 Actively encourage and support team members to participate in team activities and communication processes and to take responsibility for their actions</p> <p>3.2 Support the team to identify and resolve problems which impede its performance</p> <p>3.3 Utilise own contribution to work team to serve as a role model for others and enhance the organisation's image within the work team, the organisation and with clients/customers</p>
4 Communicate with management	<p>4.1 Maintain open communication with line manager/management at all times</p> <p>4.2 Communicate information from line manager/management to the team</p> <p>4.3 Communicate unresolved issues to line manager/management and follow up to ensure action is taken in response to these matters</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	2.3, 2.4, 4.2, 4.3	<ul style="list-style-type: none"> Uses appropriate vocabulary, grammatical structures and conventions to communicate information, matching style to purpose and audience
Oral	1.1, 1.2, 2.1-2.4, 3.1,	<ul style="list-style-type: none"> Presents ideas and seeks feedback from others using vocabulary and non-verbal features appropriate to the

Communication	3.2, 4.1-4.3	<p>audience</p> <ul style="list-style-type: none"> Participates in open discussions to elicit the views of others by asking questions and listening to responses

Assessment Requirements for BSBFLM312 Contribute to team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- discuss and clarify goals and responsibilities with a team of people
- apply management and communication skills with a range of people that:
 - provides direction and leadership
 - assists individuals to achieve goals
 - motivates and builds team cohesion
 - fosters contribution of and respect for ideas
- apply techniques for resolving problems within organisational and legislative requirements
- communicate effectively with management including escalating problems outside own area of responsibility
- manage communication of information to, and between, the team.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list organisational goals, objectives and plans that relate to the team
- identify legislation, regulations, standards or codes of practice that may impact team performance and outcomes
- describe the organisational structure with reference to the organisational chart
- describe options for addressing performance issues in the organisation
- explain the principles and techniques of:
 - group dynamics and processes
 - motivation

- negotiation
- explain why considering individual behaviour and differences is important to a manager.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant workplace documentation and resources
- relevant legislation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBHRM505 Manage remuneration and employee benefits

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop remuneration strategies for different occupational groups
- manage remuneration and benefits in accordance with all legislative and ethical requirements and operational policies
- apply awards and agreements to remuneration processes
- apply requirements of the Australian Taxation Office in relation to income tax, superannuation reporting, FBT and bonus payments.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline remuneration principles or models and approaches
- explain the ethical practices relating to remuneration and benefits strategies
- outline various remuneration or employee benefits
- describe ways to position an organisation an 'employer of choice'
- outline award structures for industrial agreements
- summarise organisational policies and procedures affecting remuneration strategies
- identify relevant legislation, regulations and standards that may affect remuneration strategies
- list the requirements of the Australian Taxation Office in relation to:

- income tax
- superannuation reporting
- FBT and bonus payments.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

- an appropriate range of documentation and resources normally used in the workplace
- organisational policies and procedures
- relevant legislation, regulations and codes of practice
- business technology.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINM202 Handle mail

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to receive and distribute incoming mail, and to collect and despatch outgoing mail.

It applies to individuals who perform a range of routine tasks in the workplace, using a limited range of practical skills and knowledge of mail handling under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Receive and distribute incoming mail	1.1 Ensure incoming mail is checked and registered in accordance with organisational policies and procedures 1.2 Identify titles and locations of company personnel and departments 1.3 Identify and distribute urgent and confidential mail in accordance with organisational requirements 1.4 Sort and deliver mail to nominated person/location in

ELEMENT	PERFORMANCE CRITERIA
	<p>accordance with organisational requirements</p> <p>1.5 Record and/or report damaged, suspicious or missing items and take appropriate action in accordance with organisational policies and procedures</p>
2 Collect and despatch outgoing mail	<p>2.1 Collect, check and sort outgoing mail to ensure all items are correctly prepared for despatch in accordance with organisational policies and procedures</p> <p>2.2 Record and process outgoing mail for despatch in accordance with organisational requirements</p> <p>2.3 Despatch mail to meet designated timelines</p>
3 Organise urgent and same day deliveries	<p>3.1 Evaluate delivery options and select best option</p> <p>3.2 Prepare items for urgent delivery in accordance with organisational requirements and carrier specifications</p> <p>3.3 Organise lodgement or pick-up of emergency deliveries and follow up if necessary</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.5, 2.1, 2.2, 3.2, 3.3	<ul style="list-style-type: none"> Recognises and interprets textual information to complete tasks according to organisational requirements
Writing	1.5, 2.2, 3.2, 3.3	<ul style="list-style-type: none"> Records simple and routine information using an established format and workplace-specific vocabulary
Oral Communication	1.4, 1.5, 3.3	<ul style="list-style-type: none"> Uses questions to clarify and confirm instructions, listens to directions and clearly articulates requirements
Numeracy	1.5, 2.1-2.3, 3.2, 3.3	<ul style="list-style-type: none"> Recognises basic mathematical data to verify weight, addresses and registered numbers Performs basic calculations needed to estimate time for a variety of mail despatches
Navigate the world of work	1.1, 1.3-1.5, 2.1, 2.2, 3.2	<ul style="list-style-type: none"> Recognises organisational expectations and follows explicit protocols, policies and procedures

Interact with others	1.4, 1.5	<ul style="list-style-type: none"> Identifies and responds effectively to information associated with job role using appropriate language Follows accepted communication practices and protocols in performance of tasks
Get the work done	1.2-1.5, 2.1-2.3, 3.1-3.3	<ul style="list-style-type: none"> Follows clear instructions within defined level of responsibility Makes low-impact decisions around clearly defined tasks Responds to predictable routine problems and implements standard procedures or logical solutions Uses organisational systems to enter and retrieve data

BSBINN301 Promote innovation in a team environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to be an effective and proactive member of an innovative team.

It applies to individuals who play a proactive role in demonstrating, encouraging or supporting innovation in a team environment. The individual may be a team participant or a team leader. Teams may be formal or informal and may comprise a range of personnel.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Create opportunities to maximise innovation within the team	1.1 Evaluate and reflect on what the team needs and wants to achieve 1.2 Check out information about current or potential team members' work in the context of developing a more innovative team 1.3 Bring people into the team or make suggestions for team members based on what needs to be achieved and the potential for cross fertilising ideas

ELEMENT	PERFORMANCE CRITERIA
	1.4 Acknowledge, respect and discuss the different ways that people may contribute to building or enhancing the team
2 Organise and agree effective ways of working	2.1 Jointly establish ground rules for how the team will operate 2.2 Agree and communicate responsibilities in ways that encourage and reinforce team-based innovation 2.3 Agree and share tasks and activities to ensure the best use of skills and abilities within the team 2.4 Plan and schedule activities to allow time for thinking, challenging and collaboration 2.5 Establish personal reward and stimulation as an integral part of the team's way of working
3 Support and guide colleagues	3.1 Model behaviour that supports innovation 3.2 Seek external stimuli and ideas to feed into team activities 3.3 Proactively share information, knowledge and experiences with other team members 3.4 Challenge and test ideas within the team in a positive and collaborative way 3.5 Proactively discuss and explore ideas with other team members on an ongoing basis
4 Reflect on how the team is working	4.1 Debrief and reflect on activities and on opportunities for improvement and innovation 4.2 Gather and use feedback from within and outside the team to generate discussion and debate 4.3 Discuss the challenges of being innovative in a constructive and open way 4.4 Take ideas for improvement, build them into future activities and communicate key issues to relevant colleagues 4.5 Identify, promote and celebrate successes and examples of successful innovation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 4.2	<ul style="list-style-type: none"> Interprets and analyses textual information, from a wide range of sources, to identify information relevant to team activities
Writing	2.2, 3.3, 4.4	<ul style="list-style-type: none"> Uses clear language and formats appropriate for the audience to highlight and present specific information
Oral Communication	1.2, 1.3, 1.4, 2.1, 2.2, 3.5, 4.1, 4.2, 4.3, 4.4, 4.5	<ul style="list-style-type: none"> Actively participates in verbal exchanges of ideas and elicits the views and opinions of team members by listening and questioning Uses clear language to clarify rules and roles relating to team activities in formal and informal situations
Numeracy	1.2, 4.2	<ul style="list-style-type: none"> Interprets numeric information relevant to team activities
Navigate the world of work	1.1, 3.1, 3.2, 3.5	<ul style="list-style-type: none"> Understands the nature and purpose of own role and how it affects others in the work context
Interact with others	1.1-1.4, 2.1, 2.2, 3.1, 3.2, 3.4, 3.5, 4.1, 4.2, 4.4, 4.5	<ul style="list-style-type: none"> Uses inclusive techniques to initiate, contribute and promote discussion amongst potentially diverse team members Recognises the importance of establishing and building effective working relationships Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.3, 1.4, 2.2, 2.4, 2.5, 3.2, 3.4, 4.2, 4.4, 4.5	<ul style="list-style-type: none"> Plans, sequences and prioritises tasks for efficient and effective outcomes Contributes to continuous improvement of current work practices by applying basic principles of analytical and lateral thinking Uses problem-solving processes to address less predictable problems, and when appropriate, seeking input from others Reflects on outcomes and further explores own and the team's role in implementing innovation

Assessment Requirements for BSBINN301 Promote innovation in a team environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply practices that promote innovation within a team including:
 - modelling open and respectful communications
 - contributing to the make-up and rules of the team
 - planning and scheduling of activities
 - reflecting on activities, feedback and challenges to identify improvement options
- encourage others to contribute to innovation in the team
- implement improvements and communicate about them.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain what innovation is, the different types of innovation and the benefits of innovation
- describe the internal and external factors that contribute to a team becoming and remaining innovative including:
 - team characteristics
 - the role of group dynamics and diversity
 - broader environmental factors
- explain how activities can encourage or hinder innovation in a team including:
 - allocation of time and activities
 - modelling behaviour
 - rewards and recognition
 - communications

- feedback.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN502 Build and sustain an innovative work environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create an environment that enables and supports the application of innovative practice focusing on a holistic approach to the integration of innovation across all areas of work practice.

It applies to individuals working in leadership or management roles in any industry or community context. The individual could be employed by the organisation, but may also be an external contractor, the leader of a cross organisation team or of a self-formed team of individuals. The work group could be permanent or temporary in nature.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Lead innovation by example	1.1 Make innovation an integral part of leadership and management activities 1.2 Demonstrate positive reception of ideas from others and provide constructive advice 1.3 Establish and maintain relationships based on mutual respect and trust

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Take considered risks to open up opportunities for innovation</p> <p>1.5 Regularly evaluate own approaches for consistency with the wider organisational or project context</p>
2 Establish work practices that support innovation	<p>2.1 Consult on and establish working conditions that reflect and encourage innovative practice</p> <p>2.2 Introduce and maintain workplace procedures that foster innovation and allow for rigorous evaluation of innovative ideas</p> <p>2.3 Facilitate and participate in collaborative work arrangements to foster innovation</p> <p>2.4 Build and lead teams to work in ways that maximise opportunities for innovation</p>
3 Promote innovation	<p>3.1 Acknowledge suggestions, improvements and innovations from all colleagues</p> <p>3.2 Find appropriate ways of celebrating and promoting innovation</p> <p>3.3 Promote and reinforce the value of innovation according to the vision and objectives of the organisation or project</p> <p>3.4 Promote and support the evaluation of innovative ideas within the wider organisational or project context</p>
4 Create a physical environment which supports innovation	<p>4.1 Evaluate the impact of the physical environment in relation to innovation</p> <p>4.2 Collaborate with colleagues about ideas for enhancing the physical work environment before taking action</p> <p>4.3 Consider potential for supporting innovation when selecting physical resources and equipment</p> <p>4.4 Design, fit-out and decorate workspaces to encourage creative mindsets, collaborative working and the development of positive workplace relationships</p>
5 Provide learning opportunities	<p>5.1 Pro-actively share relevant information, knowledge and skills with colleagues</p> <p>5.2 Provide or encourage formal and informal learning opportunities to help develop the skills needed for innovation</p> <p>5.3 Create opportunities in which individuals can learn from the experience of others</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.5, 2.2, 4.1, 5.1	<ul style="list-style-type: none"> Interprets and evaluates information that may deal with complex ideas related to issues both within and outside a given workplace context
Writing	3.3, 3.4, 5.1	<ul style="list-style-type: none"> Develops information for others using language to suit the context and audience
Oral Communication	1.2, 2.1, 2.3, 3.1, 3.3, 3.4, 5.1	<ul style="list-style-type: none"> Presents ideas and concepts to a range of audiences using structure and language to suit the audience Uses active listening and questioning to discuss and clarify information and to confirm understanding
Navigate the world of work	1.1, 1.5, 2.1, 2.2, 3.3, 5.1, 5.2	<ul style="list-style-type: none"> Takes responsibility for implementing practices and procedures to achieve organisational objectives in innovation according to role requirements Stays up to date with professional development options to provide relevant information to staff
Interact with others	1.2, 1.3, 2.3, 2.4, 3.1-3.4, 4.2, 5.1, 5.3	<ul style="list-style-type: none"> Uses appropriate communication techniques to build rapport and foster strong relationships with co-workers in a range of work contexts Uses inclusive and collaborative techniques to share, promote and convey complex information about new ideas and systems within the workplace
Get the work done	1.1, 1.4, 1.5, 2.1, 3.2, 3.3, 4.1, 4.3, 4.4, 5.2, 5.3	<ul style="list-style-type: none"> Accepts responsibility for planning and implementing tasks and practices to achieve organisational goals, negotiating key aspects with others and taking into account current capabilities and needs Develops new and innovative ideas through exploration, evaluation, analysis and critical thinking Facilitates a climate where people feel comfortable suggesting and discussing improvements or new ideas Uses problem solving processes to identify, assess and respond to challenges and risks around innovation

Assessment Requirements for BSBINN502 Build and sustain an innovative work environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to maximise opportunities for innovation by:

- establishing procedures and practices that foster innovation including:
 - collaborative work arrangements
 - building team capacity to contribute to innovation
 - providing formal and informal learning opportunities
 - evaluating ideas
 - celebration and promotion of innovation
 - consultation
 - respectful communications and sharing of ideas and feedback
- reinforcing the value of innovation to the vision and objectives of the organisation,
- modelling behaviour including being receptive to ideas, giving constructive advice, evaluating own work, establishing and maintaining relationships based on mutual respect and trust, taking considered risks that provide opportunities for innovation
- evaluating how the physical environment can be enhanced to support innovation and collaboration and collaborating on ideas to make improvements including in the selection of physical resources and equipment, and the design, fit-out and decoration of the workspaces
- making changes to a workspace that will encourage innovation in at least one of
 - design
 - fit-out
 - decoration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the concepts and theories of innovation and how these link to innovation in practice
- explain the context for innovation in the workplace including core business values, overall objectives, broader environmental context and the need to ensure the value and benefit of innovative ideas and projects
- discuss the factors and tools that can motivate individuals to use creative thinking and apply innovative work practices
- research the legislative framework that impacts on operations in the relevant workplace context
- explain how different approaches to management and leadership can support or hinder innovation
- discuss typical challenges and barriers to innovation within teams and organisations and ways of overcoming these including rewarding and celebrating innovation, coaching and learning, modelling behaviour and managing the physical environment.
-

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITS401 Maintain business technology

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain the effectiveness of business technology in the workplace. It includes maintaining existing technology and planning for future technology requirements.

It applies to individuals with a broad knowledge of business technology who may be required to contribute well-developed skills in creating solutions to maintenance and upgrade issues with existing technology. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Maintain performance of hardware and software	1.1 Monitor and evaluate system effectiveness to ensure it meets organisational and system requirements

ELEMENT	PERFORMANCE CRITERIA
	1.2 Use operating system, drive and disk structure, reports and files to identify performance problems 1.3 Maintain disk drives and peripherals according to manufacturers' and organisational requirements 1.4 Replace consumables in accordance with manufacturers' and organisational requirements
2. Provide basic system administration	2.1 Carry out system back-up procedure at regular intervals according to organisational and system requirements 2.2 Install and operate software applications in accordance with developers' and organisational requirements 2.3 Maintain and update security access procedures in line with organisational requirements 2.4 Ensure that licences for use of software are used, checked and recorded in accordance with organisational requirements 2.5 Regularly maintain and update virus programs in accordance with organisational requirements
3. Identify future technology requirements	3.1 Maintain knowledge of current and new technology by regularly accessing sources of information 3.2 Identify and develop improved technology systems using feedback from clients and colleagues 3.3 Assess existing technology against newly available technology to determine future needs and priorities 3.4 Identify and select new technologies to achieve and maintain continuous organisational development 3.5 Obtain management and budget approval for new selected technologies

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1-2.5, 3.1-3.4	<ul style="list-style-type: none"> Gathers, analyses and interprets a range of textual information from a variety of sources and identifies

		relevant information
Writing	2.3, 2.4, 3.5	<ul style="list-style-type: none"> • Produces texts of varying complexity using appropriate language and logical structure to record and convey information
Navigate the world of work	1.1, 1.3, 1.4, 2.1-2.5	<ul style="list-style-type: none"> • Complies with organisational policies and legal responsibilities related to own work
Get the work done	1.1-1.4, 2.1-2.5, 3.1-3.5	<ul style="list-style-type: none"> • Plans, implements and monitors tasks required to achieve required outcomes • Takes responsibility for the outcomes of routine decisions directly related to own role • Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts • Understands the purposes, specific functions and key features of common digital systems and tools and operates them effectively to complete routine tasks • Identifies innovations by monitoring trends from other contexts

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- install software and hardware and maintain performance according to manufacturers' and organisational requirements
- organise and access software, materials and consumables
- maintain and update technology and security systems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the costs and benefits of technology maintenance
- describe the general features and capabilities of current industry-accepted hardware and software products
- explain the importance of:
 - back-up and security procedures
 - maintenance and diagnostic procedures
 - licensing, installation and purchasing procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT support field of work and include access to:

- case studies and, where possible, real situations
- office equipment and resources
- examples of technology maintenance and security procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBLDR402 Lead effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access and analyse information to achieve planned outcomes
- apply techniques for resolving problems and conflicts and dealing with poor performance within organisational and legislative requirements
- review and improve workplace outcomes in consultation with relevant personnel
- adjust interpersonal style and communications to respond to cultural and social diversity
- apply relationship management and communication skills with a range of people that:
 - demonstrate integrity, respect, empathy and cultural sensitivity and promote trust
 - forge effective relationships with internal and/or external people and help to maintain these networks
 - encourage participation and foster contribution of and respect for ideas and feedback
 - provide support to colleagues to resolve difficulties.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of how work relationships, and the cultural and social environment, can support or hinder achieving planned outcomes
- explain techniques for developing positive work relationships and building trust and confidence in a team including interpersonal styles, communications, consultation, cultural and social sensitivity, networking
- explain the impact of legislation and organisational policies on workplace relationships
- describe a range of methods and techniques for communicating information and ideas to a range of stakeholders
- outline problems solving methods

- explain methods to resolve workplace conflict
- explain methods to manage poor work performance
- explain how to monitor, analyse and introduce ways to improve work relationships.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLED401 Develop teams and individuals

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify assessment requirements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine individual and team development needs and to facilitate the development of the workgroup.

It applies to individuals with a broad knowledge of learning and development who apply their skills in addressing development needs to meet team objectives. They may have responsibility to provide guidance or to delegate aspects of tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Learning and Development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine development needs	1.1 Systematically identify and implement learning and development needs in line with organisational requirements 1.2 Ensure that a learning plan to meet individual and group training and development needs is collaboratively developed, agreed to and

ELEMENT	PERFORMANCE CRITERIA
	<p>implemented</p> <p>1.3 Encourage individuals to self-evaluate performance and identify areas for improvement</p> <p>1.4 Collect feedback on performance of team members from relevant sources and compare with established team learning needs</p>
2. Develop individuals and teams	<p>2.1 Identify learning and development program goals and objectives, ensuring a match to the specific knowledge and skill requirements of competency standards relevant to the industry</p> <p>2.2 Ensure that learning delivery methods are appropriate to the learning goals, the learning style of participants, and availability of equipment and resources</p> <p>2.3 Provide workplace learning opportunities, and coaching and mentoring assistance to facilitate individual and team achievement of competencies</p> <p>2.4 Create development opportunities that incorporate a range of activities and support materials appropriate to the achievement of identified competencies</p> <p>2.5 Identify and approve resources and time lines required for learning activities in accordance with organisational requirements</p>
3. Monitor and evaluate workplace learning	<p>3.1 Use feedback from individuals or teams to identify and implement improvements in future learning arrangements</p> <p>3.2 Assess and record outcomes and performance of individuals/teams to determine the effectiveness of development programs and the extent of additional development support</p> <p>3.3 Negotiate modifications to learning plans to improve the efficiency and effectiveness of learning</p> <p>3.4 Document and maintain records and reports of competency according to organisational requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Learning	1.1-1.4, 2.1-2.4, 3.1, 3.3	<ul style="list-style-type: none"> • Uses structured approaches to set goals, monitor progress and adjust learning approaches for self and others • Builds on knowledge and experience to facilitate interaction and learning with others
Reading	1.1, 1.2, 1.4, 2.1, 2.2, 2.4, 2.5, 3.1-3.4	<ul style="list-style-type: none"> • Analyses textual information from a range of sources to identify organisational requirements • Analyses information from a range of sources to evaluate performance
Writing	1.1, 1.2, 1.4, 2.1, 2.5, 3.1-3.4	<ul style="list-style-type: none"> • Develops materials to suit the requirements of different roles and individuals in the organisation • Maintains records using correct technical and organisational vocabulary
Oral Communication	1.2, 1.3, 1.4, 2.3, 3.1, 3.3	<ul style="list-style-type: none"> • Uses vocabulary appropriate to context and to establish a supportive and learning environment • Uses listening and questioning techniques to confirm or show understanding of different perspectives
Navigate the world of work	1.1, 2.5, 3.4	<ul style="list-style-type: none"> • Recognises and responds to explicit and implicit organisational procedures and protocols Understands how own role meshes with others and contributes to broader goals
Interact with others	1.2, 1.3, 1.4, 2.2, 2.3, 3.1, 3.3	<ul style="list-style-type: none"> • Selects and uses appropriate conventions and protocols when communicating with co-workers in a range of work contexts • Recognises the importance of building rapport to establish effective working relationships • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction • Negotiates with others to achieve joint/agreeable outcomes playing an active role in facilitating consensus in potentially contentious situations
Get the work done	1.1, 1.2, 1.4, 2.1, 2.2, 2.3, 2.5, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> • Uses logical planning processes to organise, implement and monitor learning and development needs • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify opportunities for improvement

BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the organisation's continuous improvement systems and processes. It covers using systems and strategies to actively encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements.

It applies to managers who have an active role in implementing the continuous improvement process to achieve the organisation's objectives. Their position is closely associated with the creation and delivery of products and services which means that they have an important role in influencing the ongoing development of the organisation.

At this level, work will normally be carried out within routine and non-routine methods and procedures, which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Implement continuous improvement systems and	1.1 Implement systems to ensure that individuals and teams are actively encouraged and supported to participate in decision

ELEMENT	PERFORMANCE CRITERIA
processes	<p>making processes, assume responsibility and exercise initiative</p> <p>1.2 Communicate the organisation's continuous improvement processes to individuals and teams, and obtain feedback</p> <p>1.3 Ensure effective mentoring and coaching allows individuals and teams to implement the organisation's continuous improvement processes</p>
2. Monitor and review performance	<p>2.1 Use the organisation's systems and technology to monitor and review progress and to identify ways in which planning and operations could be improved</p> <p>2.2 Improve customer service through continuous improvement techniques and processes</p> <p>2.3 Formulate and communicate recommendations for adjustments to those who have a role in their development and implementation</p>
3. Provide opportunities for further improvement	<p>3.1 Implement processes to ensure that team members are informed of savings and productivity/service improvements in achieving the business plan</p> <p>3.2 Document work performance to aid the identification of further opportunities for improvement</p> <p>3.3 Manage records, reports and recommendations for improvement within the organisation's systems and processes</p>

Foundation Skills

Assessment Requirements for BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- implement continuous improvement systems and provide mentoring and coaching support to enable individuals and teams to participate in decisions, take responsibility, show initiative and implement improvement processes
- implement processes to inform team members about savings and productivity/service improvements achievements
- communicate effectively to support the continuous improvement system and implementation of improvements
- apply continuous improvement to customer services including internal and external customers
- implement, monitor and adjust improvement plans, processes and procedures to improve performance
- document performance to identify further opportunities for improvement
- manage records and reports within the organisation's systems and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of continuous improvement processes
- list typical areas of need for coaching and mentoring to support continuous improvement
- explain how change management techniques can support continuous improvement and initiative
- identify the organisation's systems and data that can be used for benchmarking and monitoring performance for continuous improvement.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT502 Manage people performance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage the performance of staff who report to them directly. Development of key result areas and key performance indicators and standards, coupled with regular and timely coaching and feedback, provide the basis for performance management.

It applies to individuals who manage people. It covers work allocation and the methods to review performance, reward excellence and provide feedback where there is a need for improvement.

The unit makes the link between performance management and performance development, and reinforces both functions as a key requirement for effective managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Allocate work	1.1 Consult relevant groups and individuals on work to be allocated and resources available

ELEMENT	PERFORMANCE CRITERIA
	<p>1.2 Develop work plans in accordance with operational plans</p> <p>1.3 Allocate work in a way that is efficient, cost effective and outcome focussed</p> <p>1.4 Confirm performance standards, Code of Conduct and work outputs with relevant teams and individuals</p> <p>1.5 Develop and agree performance indicators with relevant staff prior to commencement of work</p> <p>1.6 Conduct risk analysis in accordance with the organisational risk management plan and legal requirements</p>
2. Assess performance	<p>2.1 Design performance management and review processes to ensure consistency with organisational objectives and policies</p> <p>2.2 Train participants in the performance management and review process</p> <p>2.3 Conduct performance management in accordance with organisational protocols and time lines</p> <p>2.4 Monitor and evaluate performance on a continuous basis</p>
3. Provide feedback	<p>3.1 Provide informal feedback to staff on a regular basis</p> <p>3.2 Advise relevant people where there is poor performance and take necessary actions</p> <p>3.3 Provide on-the-job coaching when necessary to improve performance and to confirm excellence in performance</p> <p>3.4 Document performance in accordance with the organisational performance management system</p> <p>3.5 Conduct formal structured feedback sessions as necessary and in accordance with organisational policy</p>
4. Manage follow up	<p>4.1 Write and agree on performance improvement and development plans in accordance with organisational policies</p> <p>4.2 Seek assistance from human resources specialists, where appropriate</p> <p>4.3 Reinforce excellence in performance through recognition and continuous feedback</p> <p>4.4 Monitor and coach individuals with poor performance</p> <p>4.5 Provide support services where necessary</p> <p>4.6 Counsel individuals who continue to perform below expectations and implement the disciplinary process if necessary</p> <p>4.7 Terminate staff in accordance with legal and organisational</p>

ELEMENT	PERFORMANCE CRITERIA
	requirements where serious misconduct occurs or ongoing poor-performance continues

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	2.2, 3.3, 4.4	<ul style="list-style-type: none"> Consolidates and improves own knowledge and skills by coaching, mentoring or training others
Reading	1.2, 1.6, 2.4	<ul style="list-style-type: none"> Gathers, interprets and analyses texts in organisational documents to facilitate performance management

Assessment Requirements for BSBMGT502 Manage people performance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- consult with relevant stakeholders to identify work requirements, performance standards and agreed performance indicators
- develop work plans and allocate work to achieve outcomes efficiently and within organisational and legal requirements
- monitor, evaluate and provide feedback on performance and provide coaching or training, as needed
- reinforce excellence in performance through recognition and continuous feedback
- seek assistance from human resources specialists where appropriate
- keep records and documentation in accordance with the organisational performance management system.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant legislative and regulatory requirements
- outline relevant awards and certified agreements
- explain performance measurement systems utilised within the organisation
- explain unlawful dismissal rules and due process
- describe staff development options and information.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT517 Manage operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and monitor implementation of the operational plan to provide efficient and effective workplace practices within the organisation's productivity and profitability plans.

Management at a strategic level requires systems and procedures to be developed and implemented to facilitate the organisation's operational plan.

This unit applies to individuals who manage the work of others and operate within the parameters of a broader strategic and/or business plan.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop operational plan	1.1 Research, analyse and document resource requirements and develop an operational plan in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Develop and/or implement consultation processes as an

ELEMENT	PERFORMANCE CRITERIA
	<p>integral part of the operational planning process</p> <p>1.3 Ensure the operational plan includes key performance indicators to measure organisational performance</p> <p>1.4 Develop and implement contingency plans for the operational plan</p> <p>1.5 Ensure the development and presentation of proposals for resource requirements is supported by a variety of information sources and seek specialist advice as required</p> <p>1.6 Obtain approval for the plan from relevant parties and explain the plan to relevant work teams</p>
2. Plan and manage resource acquisition	<p>2.1 Develop and implement strategies to ensure that employees are recruited and/or inducted within the organisation's human resources management policies, practices and procedures</p> <p>2.2 Develop and implement strategies to ensure that physical resources and services are acquired in accordance with the organisation's policies, practices and procedures</p> <p>2.3 Recognise and incorporate requirements for intellectual property rights and responsibilities in recruitment and acquisition of resources and services</p>
3. Monitor and review operational performance	<p>3.1 Develop, monitor and review performance systems and processes to assess progress in achieving profit and productivity plans and targets</p> <p>3.2 Analyse and interpret budget and actual financial information to monitor and review profit and productivity performance</p> <p>3.3 Identify areas of under-performance, recommend solutions and take prompt action to rectify the situation</p> <p>3.4 Plan and implement systems to ensure that mentoring and coaching are provided to support individuals and teams to effectively, economically and safely use resources</p> <p>3.5 Negotiate recommendations for variations to operational plans and gain approval from designated persons/groups</p> <p>3.6 Develop and implement systems to ensure that procedures and records associated with documenting performance are managed in accordance with organisational requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.5, 2.1, 2.2, 3.1, 3.2, 3.3, 3.4, 3.6	<ul style="list-style-type: none"> Identifies and extracts relevant information from a range of complex texts Gathers, interprets and analyses workplace documentation to determine requirements for the operational plan
Writing	1.1-1.5, 2.1, 2.2, 3.1-3.6	<ul style="list-style-type: none"> Develops and documents a range of detailed texts relating to the management of an operational plan according to organisational requirements Ensures the vocabulary, grammatical structures and conventions are appropriate for the context and target audience
Oral Communication	1.1, 1.2, 1.5, 1.6, 3.4, 3.5	<ul style="list-style-type: none"> Presents information to a range of audiences using appropriate register, vocabulary and paralinguistic features Listens and comprehends information from a variety of spoken exchanges with clients, co-workers and other stakeholders Confirms understanding through questioning and active listening
Numeracy	1.1, 1.3, 1.4, 3.1-3.4	<ul style="list-style-type: none"> Selects and uses mathematical problem-solving strategies to organise resource requirements, performance benchmarks and financial viability of the operational plan
Navigate the world of work	2.1, 2.2, 3.4, 3.6	<ul style="list-style-type: none"> Monitors adherence to organisational policies, procedures and considers own role in terms of its contribution to broader goals of the work environment Appreciates the implications of legal responsibilities with specific reference to health and safety
Interact with others	1.1, 1.2, 1.5, 1.6, 3.5	<ul style="list-style-type: none"> Identifies and uses appropriate conventions and protocols when communicating with colleagues and external stakeholders Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role on occasion
Get the work done	1.1-1.5, 2.1, 2.2, 3.1, 3.3, 3.4, 3.6	<ul style="list-style-type: none"> Takes responsibility for developing and implementing systems and processes to achieve organisational objectives, seeking advice, feedback and support as

Assessment Requirements for BSBMGT517 Manage operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and implement an operational plan using a variety of information sources and consultation (including using specialist advice if required) which includes:
 - resource requirements
 - key performance indicators
 - monitoring processes
 - contingency plans
- communicate effectively with relevant stakeholders to explain the plan and supporting information, seek approvals, negotiate variations and engage work teams
- develop and implement strategies to achieve the operational plan within the organisation's policies, practices and procedures including:
 - recruiting, inducting and developing personnel
 - acquiring physical resources and services
 - protecting intellectual property
 - making variations to the plan
 - monitoring and documenting performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe models and methods for operational plans
- explain the role of an operational plan in achieving the organisation's objectives
- explain budgeting processes

- list alternative approaches to developing key performance indicators to meet business objectives
- outline the legislative and regulatory context relevant to the operational plan of the organisation
- outline the organisation's policies, practices and procedures that directly relate to the operational plan.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation and regulations
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG523 Design and develop an integrated marketing communication plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify and evaluate the range of marketing communication options and media, to design an integrated marketing communication plan, and to develop a marketing communication brief and creative brief reflecting client needs and preferences.

It applies to individuals working in a supervisory or management marketing or advertising role, within a marketing or advertising team or media organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine marketing communication requirements	1.1 Confirm marketing communication purpose and objectives with client 1.2 Obtain comprehensive client and product information 1.3 Review outcomes of previous marketing communication with client

ELEMENT	PERFORMANCE CRITERIA
	1.4 Confirm budget allocation with client
2. Develop marketing communication brief	2.1 Develop brief, ensuring it contains a client profile, purpose statement and objectives reflecting client needs 2.2 State marketing communication objectives in measurable terms and provide specific guidelines on what is to be accomplished by marketing communication 2.3 Define key characteristics, competitive factors and market situation facing product or service 2.4 Include a summary of information on target audience, and legal and ethical constraints
3. Design integrated marketing communication strategy	3.1 Select marketing communication options appropriate for marketing communication brief 3.2 Critically analyse advantages and disadvantages of each marketing communications variable and media vehicles for product or service 3.3 Determine media characteristics matching brief requirements 3.4 Analyse media consumption habits for primary and supplementary marketing media among target audiences 3.5 Evaluate media styles against the brand character of product or service being marketed 3.6 Compare advantages and disadvantages of selecting multiple media in a media plan 3.7 Develop and apply criteria for selecting multiple media combinations
4. Select and recommend media for marketing strategy	4.1 Select media vehicles that match requirements of marketing brief for product or service 4.2 Recommend primary and secondary marketing media that meet target audience preferences 4.3 Ensure recommended media meet the brief, client's requirements, and legal and ethical constraints
5. Develop creative brief	5.1 Identify creative content for chosen media using consumer language in the brief 5.2 Identify pitch or appeal for product or service in the brief that meets client requirements 5.3 Identify supporting information required for consumer understanding of product or service in the brief

ELEMENT	PERFORMANCE CRITERIA
	<p>5.4 Ensure budget for creative work, consistent with overall marketing budget, is contained in the brief</p> <p>5.5 Incorporate deadline for creative work consistent with overall media schedule in the brief</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.1-2.4, 3.3-3.7, 5.3	<ul style="list-style-type: none"> Accesses information from a range of sources and identifies, interprets and analyses information relevant to marketing activities
Writing	1.1, 1.3, 1.4, 2.1-2.4, 5.1-5.5	<ul style="list-style-type: none"> Uses clear, specific and culturally appropriate language to articulate potentially complex ideas, issues and concepts to clients Uses appropriate formats and structures information logically to present ideas and recommendations to clients
Oral Communication	1.1, 1.3, 1.4	<ul style="list-style-type: none"> Actively participates in verbal exchanges by listening and questioning to clarify and confirm information Uses appropriate language and non-verbal features to clarify, explain and present information on marketing activities
Numeracy	1.4, 2.2, 3.4, 5.4	<ul style="list-style-type: none"> Collates and interprets numeric information to analyse trend data, develop targets and prepare budgets for marketing activities
Navigate the world of work	2.4, 4.3	<ul style="list-style-type: none"> Considers legal and ethical implications in relation to own role
Get the work done	1.1-1.4, 3.1-3.7, 4.1, 4.2, 5.1-5.5	<ul style="list-style-type: none"> Plans, organises and implements tasks to achieve outcomes, with an awareness of client requirements, time and budgetary restraints Makes decisions by systematically analysing information, identifying and evaluating options against set criteria, and choosing most appropriate option Evaluates outcomes of decisions to identify opportunities for improvement Develops new and innovative ideas through

		exploration, analysis and critical thinking

Assessment Requirements for BSBMKG523 Design and develop an integrated marketing communication plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce an integrated strategic marketing communication plan for presentation to a client, including:
 - purpose statement
 - definition of target audience
 - analysis of product or service
 - legal and ethical constraints
 - marketing communication functions and media vehicles chosen, with rationale for each
 - creative brief for media options
 - schedule for creative work
 - budgetary allocation for each media vehicle.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline economic, social and industry trends relevant to choice of appropriate media options
- analyse industry products or services to recommend appropriate media options
- summarise key provisions of relevant legislation, codes of practice and national standards affecting marketing operations
- explain principles of consumer behaviour and influences on buyer behaviour
- summarise range of marketing communication options for different markets
- describe and contrast range of media vehicles for marketing communication options.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- office equipment and resources
- relevant legislation, regulations, standards and codes
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPRO401 Develop product knowledge

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop product knowledge in preparation for the sales process.

It applies to individuals who need to solve a defined range of unpredictable problems, analyse and evaluate information from a variety of sources and who may provide leadership and guidance to others with some limited responsibility for the output of others.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Product Skills and Advice

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Acquire knowledge of products in a specified area	1.1 Identify information sources about products in a specified area and evaluate them for reliability and validity 1.2 Identify product purpose/s and use/s 1.3 Identify key features of the product/s 1.4 Identify product strengths and weaknesses 1.5 Articulate guarantees and warranties and identify service support details

ELEMENT	PERFORMANCE CRITERIA
2. Convert product knowledge into benefits	<p>2.1 Identify features of the product which have potential buyer appeal</p> <p>2.2 Present features of the product which have buyer appeal as benefits to the buyer</p> <p>2.3 Present product benefits within the context of organisational requirements and legislation</p>
3. Evaluate competitors' products	<p>3.1 Use a range of information sources to identify competitors' products</p> <p>3.2 Compare features, benefits, strengths and weaknesses of competitors' products with own products</p> <p>3.3 Establish relative standing of the organisation's product with the competitors' product/s and communicate differences to the buyer</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 1.4, 2.1, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> Identifies, interprets, understands and compares information to monitor and evaluate quality of product and services and check against client requirements
Writing	1.1, 1.5, 2.2, 2.3, 3.2	<ul style="list-style-type: none"> Records results of product evaluations to show clear comparisons of features, benefits and weaknesses Uses clear and specific language to develop documents for different audiences in accordance with organisational requirements
Oral Communication	2.2, 2.3, 1.5, 3.3	<ul style="list-style-type: none"> Provides recommendations using language appropriate to the purpose and audience
Numeracy	1.3, 1.4, 3.2, 3.3	<ul style="list-style-type: none"> Analyses numerical information to measure, compare and evaluate features
Navigate the world of work	2.3	<ul style="list-style-type: none"> Understands and follows organisational policies and procedures and legislative requirement relevant to own role

Assessment Requirements for BSBPRO401 Develop product knowledge

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use valid and reliable sources to gather information about the organisation's products and competitors' products
- determine buyer needs and present key features and benefits of product to match needs, in accordance with organisational and legislative obligations
- compare competitors' products with own organisation's products and communicate differences to buyer.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list sources of information for own organisation's products and competitors' products
- explain why it is important to discuss features, benefits, strengths and weaknesses when describing products
- summarise industry competitors, including products offered and potential buyer markets
- outline organisational policies and procedures, relevant to the sales process
- outline the key provisions of relevant legislation, regulations, standards and codes of practice that are relevant to the sales process.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – product skills and advice field of work and include access to:

- information sources regarding an organisation's and competitors' products, service or ideas
- office equipment and resources
- relevant organisational policies and procedures
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPUR402 Negotiate contracts

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to negotiate terms of contracts with suppliers, and prepare and finalise contracts.

It applies to individuals who negotiate contracts as part of a broad purchasing role but are not specialist legal practitioners. They are required to negotiate and formalise complex purchasing arrangements involving significant risk and/or significant expenditure and detailed legal and documentation arrangements and are typically guided by organisational contract negotiation guidelines. They work under minimal supervision of a senior purchasing manager or in consultation with senior management.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – Purchasing and Contracting

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Negotiate terms of contracts with suppliers	1.1 Offer advice and undertake negotiations without prejudice 1.2 Advise suppliers of the organisation's intent to accept their offers 1.3 Negotiate issues with suppliers 1.4 Determine desired outcomes, negotiation plans and schedules

ELEMENT	PERFORMANCE CRITERIA
	<p>for negotiations</p> <p>1.5 Undertake negotiations and reach agreements with suppliers in accordance with plans</p> <p>1.6 Negotiate and document contract requirements to the satisfaction of the organisation and suppliers</p>
2. Prepare contracts	<p>2.1 Draft required contracts using legal expertise if required</p> <p>2.2 Distribute draft contracts to relevant personnel and suppliers</p> <p>2.3 Ensure any discrepancies or disagreements are clarified and resolved to the satisfaction of all parties</p> <p>2.4 Ensure checks of the legality and validity of draft contracts are made</p> <p>2.5 Obtain approvals to sign contracts</p>
3. Finalise contracts	<p>3.1 Ensure contracts are signed and exchanged between the organisation and suppliers</p> <p>3.2 Ensure contracts and related documents are stored and safeguarded</p> <p>3.3 Advise relevant personnel of contract requirements</p> <p>3.4 Advise unsuccessful suppliers of non-acceptance of offers</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.5, 2.1, 2.4	<ul style="list-style-type: none"> Interprets and analyses textual information from a range of sources and identifies relevant key information to assist in the negotiation process
Writing	1.2, 1.6, 2.1, 2.3, 2.5, 3.3, 3.4	<ul style="list-style-type: none"> Develops material to convey explicit information and results using clear and detailed language appropriate to audience and context
Oral Communication	1.1-1.3, 1.5, 1.6, 2.5, 3.3	<ul style="list-style-type: none"> Uses clear language and suitable features to provide information to a variety of individuals Uses active listening and questioning techniques to convey and clarify information

Navigate the world of work	1.5, 1.6, 2.1, 2.4	<ul style="list-style-type: none"> Monitors adherence to implicit and explicit organisational procedures and policies Recognises the implications of legal and regulatory responsibilities related to own work and is beginning to recognise some general legal principles applicable across work contexts
Interact with others	1.1-1.3, 1.5, 1.6, 2.2, 2.3, 2.5, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role Collaborates and negotiates with others as part of familiar routine activities
Get the work done	1.4, 2.2, 2.3, 3.1, 3.2	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks for efficient and effective outcomes Implements standard procedures to make routine decisions Recognises and takes responsibility for addressing predictable problems in familiar work contexts Understands the importance of secure information in relation to own work

Assessment Requirements for BSBRKG304 Maintain business records

Modification History

Release	Comments
Release1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- collate business records in compliance with organisational procedures and workplace requirements
- record and update control information accurately in business records system.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the organisational requirements regarding the maintenance and security of business records
- describe the general principles and processes of records management and records management systems, such as:
 - systems of control
 - records continuum theory
 - mandate and ownership of business process
 - environmental context
 - records characteristics.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – recordkeeping field of work and include access to:

- relevant workplace documentation and resources

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBSLS407 Identify and plan sales prospects

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify potential sales prospects by applying prospecting methods, and manage own sales performance by establishing a sales plan, while managing stress, time and sales-related paperwork.

It applies to individuals working in a sales-related position in a small, medium or large enterprise in a wide variety of industries, who identify, collate and follow up sales prospect information to generate leads. Individuals undertaking this unit may be at entry level, or have experience in sales sufficient to provide advice and support about aspects of sales solutions as part of a sales team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Sales

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Employ prospecting methods and qualify prospects	1.1 Identify, consider and evaluate strengths and limitations of range of primary and secondary prospecting methods 1.2 Select prospecting methods to match market to which the product or service is targeted 1.3 Target present, previous and new clients through chosen

ELEMENT	PERFORMANCE CRITERIA
	<p>prospecting methods</p> <p>1.4 Research and establish criteria for qualifying leads according to buyer accessibility, buyer motives, product affordability, purchase authority, legal compliance and return for seller</p> <p>1.5 Ensure established criteria represent a standard against which buying potential of individuals and groups is gauged</p>
2. Manage prospect information	<p>2.1 Develop and implement system for recording prospect information</p> <p>2.2 Monitor and evaluate effectiveness of system for recording prospect information</p> <p>2.3 Refine system for recording prospect information based on evaluation</p>
3. Establish individualised sales plan	<p>3.1 Establish individual sales goals and quotas to focus work activities, based on organisational sales and marketing objectives</p> <p>3.2 Establish consultation and communication structures with clients and supervisors</p> <p>3.3 Plan and document individualised sales plan to achieve sales goals and quotas within a work system constructed against clear timeframes</p> <p>3.4 Monitor and adjust sales plan to established goals and quotas</p> <p>3.5 Evaluate sales plan and adjust where necessary</p>
4. Complete sales paperwork and reports	<p>4.1 Establish system to collect, record and organise data associated with sales process</p> <p>4.2 Complete routine reports at regular intervals according to organisational requirements</p> <p>4.3 Use available technology to facilitate record-keeping and production of sales reports</p>
5. Organise workload effectively	<p>5.1 Establish routines to provide structure for work and to manage workload</p> <p>5.2 Allocate time for specific work tasks and unanticipated events and activities</p> <p>5.3 Conduct analysis of time spent on work-related activities and adjust time spent on tasks, if required</p> <p>5.4 Apply time-management strategies to minimise non-productive sales activities</p> <p>5.5 Delegate tasks to individuals or sales team members to share</p>

ELEMENT	PERFORMANCE CRITERIA
	workload as appropriate 5.6 Identify and monitor symptoms of stress and seek expert assistance

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.5, 2.1-2.3, 3.1-3.5, 4.1-4.3, 5.1-5.4	<ul style="list-style-type: none"> Analyses and evaluates textual information to develop research strategies, integrate facts and ideas and meet organisational requirements
Writing	1.1-1.5, 2.1-2.3, 3.1-3.5, 4.1-4.3, 5.1-5.4	<ul style="list-style-type: none"> Creates documents using specific and detailed language to convey explicit information, requirements and recommendations
Oral Communication	1.3, 5.2, 5.5	<ul style="list-style-type: none"> Presents information using clear language suited to the audience Uses listening and questioning skills to check and confirm understanding
Numeracy	1.4-1.5, 3.1, 3.3-3.5, 5.2-5.4	<ul style="list-style-type: none"> Applies ratios and percentages and relevant formulae to data to calculate and interpret time durations and establish financial goals
Navigate the world of work	1.4, 3.1, 3.4, 4.2	<ul style="list-style-type: none"> Follows explicit and implicit organisational objectives, protocols and legal requirements
Interact with others	1.3, 3.2, 5.5, 5.6	<ul style="list-style-type: none"> Tailors communication to achieve purpose, demonstrating a sophisticated understanding of audience needs Collaborates with others to achieve organisational objectives
Get the work done	1.1, 1.3, 1.4, 2.1, 2.2, 3.3-3.5, 4.1-4.3, 5.1, 5.3-5.6	<ul style="list-style-type: none"> Sequences and schedules complex activities of self and others and monitors implementation Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and evaluating options against agreed criteria Monitor implementation of solutions and reflects on outcomes to identify appropriate action

		<ul style="list-style-type: none"> • Develops new and innovative ideas through exploration, analysis and critical thinking • Uses main features and functions of digital tools to complete work tasks and access information

Assessment Requirements for BSBSLS407 Identify and plan sales prospects

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- evaluate and select the use and management of different sales prospecting methods
- develop, monitor and refine a system for recording prospecting methods
- plan, document and monitor individualised sales plan
- establish data collection system
- use appropriate technology
- organise, analyse and delegate workloads to maximise productivity
- identify and monitor symptoms of stress.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe information management strategies used to manage prospect and sales data
- identify key principles associated with self-management
- outline key provisions of relevant legislation, codes of practice and national standards related to the sales environment
- describe prospecting methods used in sales process
- identify principles of buyer motives
- describe strategies and techniques used to prevent and manage stress.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – sales field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBSLS408 Present, secure and support sales solutions

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to present sales solutions that respond to specific buying needs of a client, and to use sales processes associated with securing prospect commitment to proceed with a sale.

It also includes attending to post-sales activities that build and strengthen the partnership between a salesperson and client, and enhance the likelihood of future sales.

It applies to individuals working in sales-related positions in a small, medium or large enterprise, in a wide variety of industries, who may provide sales solutions individually, or provide advice and support on aspects of sales solutions to support a sales team.

No licensing, legislative or certification requirements apply to this unit at the time of publication

Unit Sector

Business Development – Sales

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for sales presentation	1.1 Obtain and organise products, ideas and services for use within sales presentation 1.2 Review product information to ensure familiarity with products

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Identify sales tactics, and assess and choose options that meet needs and preferences of the prospect</p> <p>1.4 Consider variety of sales solutions and prepare to meet buyer needs</p> <p>1.5 Identify and select sales aids</p> <p>1.6 Identify alternatives for prospects and assess in relation to anticipated buyer needs</p>
2. Present sales solution	<p>2.1 Use gestures, posture, body language, facial expressions and voice to create a supportive selling environment</p> <p>2.2 Use listening skills and open-ended questions to identify buyer needs, preferences, motives and objections</p> <p>2.3 Adjust presentation to match needs and preferences of buyer</p> <p>2.4 Use persuasive communication techniques to secure buyer interest</p> <p>2.5 Ensure presentation demonstrates and communicates key features of product and emphasises benefits in relation to identified buyer needs</p> <p>2.6 Obtain and present proof of benefits through product purchase</p> <p>2.7 Use sales aids to build buyer understanding of how product aligns with needs</p>
3. Respond to buyer signals	<p>3.1 Identify and assess verbal and non-verbal buying signals</p> <p>3.2 Use probing to identify source of buyer resistance</p> <p>3.3 Identify strengths and limitations of buyer resistance strategies</p> <p>3.4 Select and implement strategy for managing buyer resistance</p> <p>3.5 Use trial closes strategically during different stages of sales process</p>
4. Negotiate and finalise sale	<p>4.1 Initiate formal close to sales process following one or more trial closes</p> <p>4.2 Select strategy to close sale, and use supportive and confirming language to support closure</p> <p>4.3 Negotiate conditions of agreement, outline a summary of agreement to buyer, and confirm buyer's decision</p> <p>4.4 Provide advice on financing arrangements, if required</p> <p>4.5 Prepare and complete sales documents, and process and monitor client order</p>

ELEMENT	PERFORMANCE CRITERIA
	4.6 Identify and present cross-selling opportunities to buyer
5. Support post-sale activities	<p>5.1 Ensure contact is made with buyer post-sale to ensure agreed expectations have been met</p> <p>5.2 Provide technical assistance or advice and assist clients to access appropriate after-sales support</p> <p>5.3 Use feedback solicitation regarding sales process and product satisfaction</p> <p>5.4 Address and resolve service problems and difficulties identified through feedback</p> <p>5.5 Develop and implement client loyalty strategies to secure buyer loyalty and facilitate ongoing contact</p> <p>5.6 Offer and implement additional sales solutions and benefits to clients when opportunities arise</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

BSBSMB406 Manage small business finances

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement and review financial management strategies on a regular basis.

It applies to individuals who operate a small business that stands alone, or is part of a department within a larger organisation. Individuals in this role interpret financial reports and other numerical data to develop financial management strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Implement financial plan	1.1 Identify financial information requirements and obtain specialist services, as required, to profitably operate the business in accordance with the business plan 1.2 Produce financial budgets or projections, including cash flow

ELEMENT	PERFORMANCE CRITERIA
	<p>estimates, as required for each forward period, and distribute to relevant people in accordance with legal requirements</p> <p>1.3 Negotiate, secure and manage business capital to best enable implementation of the business plan and to meet requirements of financial backers</p> <p>1.4 Develop and maintain strategies to enable adequate financial provision for taxation in accordance with legal requirements</p> <p>1.5 Develop, monitor and maintain client credit policies, including contingencies for debtors in default, to maximise cash flow</p> <p>1.6 Select key performance indicators to enable ongoing monitoring of financial performance</p> <p>1.7 Record and communicate financial procedures to relevant people to facilitate implementation of the business plan</p>
2. Monitor financial performance	<p>2.1 Regularly monitor and report on financial performance targets, and analyse data to establish extent to which the financial plan has been met</p> <p>2.2 Monitor marketing and operational strategies for their effects on the financial plan</p> <p>2.3 Calculate and evaluate financial ratios according to own or industry benchmarks</p> <p>2.4 Assess financial plan to determine whether variations or alternative plans are needed, and change as required</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1, 2.4	<ul style="list-style-type: none"> Evaluates complex text to determine legislative, regulatory and workplace documentation
Writing	1.2-1.5, 1.7, 2.1	<ul style="list-style-type: none"> Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	1.3, 1.7, 2.1	<ul style="list-style-type: none"> Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to

		confirm understanding <ul style="list-style-type: none"> Participates in verbal negotiations using tone and language suitable to audience
Numeracy	1.1-1.5, 2.1, 2.3, 2.4	<ul style="list-style-type: none"> Interprets numerical information to calculate all relevant financial information
Navigate the world of work	1.2, 1.4	<ul style="list-style-type: none"> Appreciates implications of legal and regulatory responsibilities related to own work
Interact with others	1.7, 2.1	<ul style="list-style-type: none"> Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.1, 1.2, 1.4-1.6, 2.2, 2.4	<ul style="list-style-type: none"> Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer-term operational and strategic goals Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account Uses formal and informal processes to monitor implementation of ideas and reflect on outcomes

Assessment Requirements for BSBSMB406 Manage small business finances

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- operate the business according to the business plan, including:
 - adhering to legal requirements
 - meeting requirements of financial backers
 - defining strategies for debt collection and contingencies for debtors
 - managing cash flow
 - defining key performance indicators
 - communicating with relevant people
- monitor the business against financial plan and make changes as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss benchmarking
- explain financial decision-making relevant to the business
- summarise significant financial indicators
- outline purposes of financial reports
- clarify preparation and interpretation of budget/actual reports
- identify principles for preparing balance sheets and their interpretation
- outline debt collection procedures or strategies

- characterise principles for preparing profit and loss statements and their interpretation
- discuss stock records and stock control relevant to the business.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBSMB407 Manage a small team

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use the business plan to:
 - determine staffing requirements
 - coordinate skill-gap training where required
 - develop human resource policies and procedures
- develop job descriptions and selection criteria
- determine induction processes
- implement staff development program
- adhere to legal requirements and codes of practice
- develop staff records system
- conduct ongoing performance measures
- communicate effectively with staff members
- develop contingency plans
- develop strategies to review team performance
- monitor and review staff.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to staffing the business operation

- explain work health and safety (WHS) responsibilities and procedures for managing hazards
- summarise relevant industry awards or enterprise agreements
- outline staff development pathways
- identify training course options for staff development
- summarise staff counselling, grievance and disciplinary procedures
- identify unfair dismissal legislation and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS301 Maintain workplace safety

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement and monitor the organisation's work health and safety (WHS) policies, procedures and programs as part of a small work team.

The unit applies to individuals who have a key role in maintaining workplace safety in an organisation. In their role they closely monitor aspects of work associated with the safe delivery of products and services, and they have a responsibility for influencing safety in the workplace.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBWHS301 Maintain workplace safety

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- implement and monitor the organisation's work health and safety (WHS) policies and procedures
- identify hazards and assess and control risks
- assist in explaining and improving WHS policies, procedures and legislative requirements applicable to the organisation
- assist in explaining hazards identification and risk assessment outcomes to other team members
- implement and monitor consultation about WHS according to legislative and organisational requirements
- deal promptly with issues raised as a result of WHS consultation
- encourage work team to contribute to identifying and implementing improvements to WHS feedback
- assist others to develop WHS competence and provide advice on training needs
- complete WHS documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe characteristics and composition of the work team
- describe procedures for identifying hazards and assessing and controlling associated risks to health and safety, including the hierarchy of control
- outline organisational WHS policies and procedures including those relating to risk management, fire, emergencies, evacuation, incident investigation and reporting

- describe relevant Acts, regulations and codes of practice from all levels of government that impact on business operations, especially with regard to WHS and environmental issues, equal opportunity, industrial relations and anti-discrimination
- identify WHS aspects of other organisational systems and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- safety processes relevant to the area of work
- organisational policies and procedures, standard operating procedures and plans
- WHS Acts, regulations, codes of practice, licensing requirements and standards
- appropriate office equipment and resources used in the identification and rectification of WHS compliance breaches.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package release 1.0

Application

This unit describes the skills and knowledge required to implement and monitor an organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

It applies to individuals with supervisory responsibilities for implementing and monitoring the organisation's WHS policies, procedures and programs in a work area. These individuals have a broad knowledge of WHS policies and contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They provide supervision and guidance to others and have limited responsibility for the output of others.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the</i>	<i>Performance criteria describe the performance needed to</i>

ELEMENT	PERFORMANCE CRITERIA
<i>essential outcomes.</i>	<i>demonstrate achievement of the element.</i>
1. Provide information to the work team about WHS policies and procedures	1.1 Accurately explain to the work team relevant provisions of WHS Acts, regulations and codes of practice 1.2 Provide information about the organisation’s WHS policies, procedures and programs, and ensure it is readily accessible to, and understandable by the work team 1.3 Regularly provide and clearly explain to the work team information about identified hazards and the outcomes of risk assessment and control
2. Implement and monitor participation arrangements for managing WHS	2.1 Communicate to workplace parties the importance of effective consultation mechanisms in managing health and safety risks in the workplace 2.2 Apply consultation procedures to facilitate participation of the work team in managing work area hazards 2.3 Promptly deal with issues raised through consultation, according to organisational consultation procedures and WHS legislative and regulatory requirements 2.4 Promptly record and communicate to the work team the outcomes of consultation over WHS issues
3. Implement and monitor organisational procedures for providing WHS training	3.1 Identify WHS training needs according to organisational requirements and WHS legislative and regulatory requirements 3.2 Make arrangements to meet WHS training needs of team members in consultation with relevant individuals 3.3 Provide workplace learning opportunities and coaching and mentoring assistance to facilitate team and individual achievement of identified WHS training needs 3.4 Identify and report to management the costs associated with providing training for work team, for inclusion in financial and management plans
4. Implement and monitor organisational procedures and legal requirements for identifying hazards and assessing and controlling risks	4.1 Identify and report on hazards in work area according to WHS policies and procedures and WHS legislative and regulatory requirements 4.2 Promptly action team member hazard reports according to organisational procedures and WHS legislative and regulatory requirements 4.3 Implement procedures to control risks using the hierarchy of control, according to organisational and WHS legislative requirements

ELEMENT	PERFORMANCE CRITERIA
	<p>4.4 Identify and report inadequacies in existing risk controls according to hierarchy of control and WHS legislative requirements</p> <p>4.5 Monitor outcomes of reports on inadequacies, where appropriate, to ensure a prompt organisational response</p>
5. Implement and monitor organisational procedures for maintaining WHS records for the team	<p>5.1 Accurately complete and maintain WHS records of incidents of occupational injury and disease in work area, according to WHS policies, procedures and legislative requirements</p> <p>5.2 Use aggregate information and data from work area records to identify hazards and monitor risk control procedures in work area</p>

Foundation Skills

Assessment Requirements for BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- explain clearly and accurately to work team the relevant work health and safety (WHS) information including:
 - WHS legislative and organisational requirements
 - identified hazards and outcomes of risk assessment and control
- ensure that the team has access to information about WHS policies, procedures and programs in appropriate structure and language
- implement and monitor procedures according to organisational and legislative WHS requirements including:
 - consultation and communications to enable team members to participate in managing WHS risks and hazards
 - identifying WHS training needs and providing learning opportunities, coaching and mentoring as appropriate to needs
 - identifying, reporting and taking action on WHS hazards and risks
 - identifying and reporting inadequacies in existing risk controls and monitoring outcomes to ensure a prompt organisational response
 - reporting on the cost of WHS training
 - keeping WHS records
 - analysing aggregate WHS data to identify hazards and monitor risk control procedures in work area.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legal responsibilities and duties of managers, supervisors, persons conducting businesses or undertakings (PCBUs) and workers in relation to WHS risk management in the workplace
- identify key provisions of relevant WHS Acts, regulations and codes of practice that apply to the business and outline how they apply in the work area
- explain organisational policies and procedures relating to hazard identification, risk management, fire, emergency and evacuation, incident investigation and reporting
- explain the importance of effective consultation mechanisms in managing health and safety risks in the workplace
- explain how the hierarchy of control applies in the work area.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- an actual workplace or simulated environment
- workplace equipment and resources
- examples of documents relating to workplace safety, hazard identification and risk assessment
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS501 Ensure a safe workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish, maintain and evaluate the organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area, according to WHS legislative requirements. It takes a systems approach and addresses compliance with relevant legislative requirements.

This unit applies to managers working in a range of contexts who have, or are likely to have responsibility for WHS as part of their broader management role. It is relevant for people with obligations under WHS legislation, for example persons conducting a business or undertaking (PCBUs) or officers, as defined by relevant legislation.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

ELEMENT	PERFORMANCE CRITERIA
1 Establish a WHS management system in a work area	<p>1.1 Locate, adapt, adopt and communicate WHS policies that clearly define the organisation's commitment to complying with WHS legislation</p> <p>1.2 Identify duty holders and define WHS responsibilities for all workplace personnel in the work area according to WHS legislation, policies, procedures and programs</p> <p>1.3 Identify and approve financial and human resources required by the WHS management system (WHSMS)</p>
2 Establish and maintain effective and compliant participation arrangements for managing WHS in a work area	<p>2.1 Work with workers and their representatives to set up and maintain participation arrangements according to relevant WHS legislation</p> <p>2.2 Appropriately resolve issues raised through participation and consultation arrangements according to relevant WHS legislation</p> <p>2.3 Promptly provide information about the outcomes of participation and consultation to workers and ensure it is easy for them to access and understand</p>
3 Establish and maintain procedures for effectively identifying hazards, and assessing and controlling risks in a work area	<p>3.1 Develop procedures for ongoing hazard identification, and assessment and control of associated risks</p> <p>3.2 Include hazard identification at the planning, design and evaluation stages of any change in the workplace to ensure that new hazards are not created by the proposed changes and existing hazards are controlled</p> <p>3.3 Develop and maintain procedures for selecting and implementing risk controls according to the hierarchy of control and WHS legislative requirements</p> <p>3.4 Identify inadequacies in existing risk controls according to the hierarchy of control and WHS legislative requirements, and promptly provide resources to enable implementation of new measures</p> <p>3.5 Identify requirements for expert WHS advice, and request this advice as required</p>
4 Evaluate and maintain a work area WHS management system	<p>4.1 Develop and provide a WHS induction and training program for all workers in a work area as part of the organisation's training program</p> <p>4.2 Use a system for WHS record keeping to allow identification of patterns of occupational injury and disease in the organisation, and to maintain a record of WHS decisions made, including reasons for the decision</p> <p>4.3 Measure and evaluate the WHSMS in line with the</p>

ELEMENT	PERFORMANCE CRITERIA
	organisation's quality systems framework 4.4 Develop and implement improvements to the WHSMS to achieve organisational WHS objectives 4.5 Ensure compliance with the WHS legislative framework to achieve, as a minimum, WHS legal requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 4.2, 4.3, 4.5	<ul style="list-style-type: none"> Organises, evaluates and critiques ideas and information from WHS legislation, policies, procedures and programs
Writing	1.1, 2.3, 3.2, 3.5, 4.1, 4.2	<ul style="list-style-type: none"> Produces WHS policies, procedures and programs using appropriate vocabulary, grammatical structure and conventions to produce Records WHS decisions according to organisational requirements
Oral communication	1.1, 2.1, 2.2, 2.3	<ul style="list-style-type: none"> Presents and seeks information from others using structure and language suitable for the audience Provides information on resolution of WHS issues varying level of technical vocabulary to suit audience
Numeracy	1.3	<ul style="list-style-type: none"> Selects from, and applies, an expanding range of mathematical and problem solving strategies in identifying financial and human resources required
Navigate the world of work	1.1, 1.2, 2.1, 2.2, 3.3, 3.4, 4.5	<ul style="list-style-type: none"> Monitors adherence to legal and regulatory rights and responsibilities for self and others in relation to WHS Takes responsibility for developing, implementing and reviewing policies, procedures and processes in accordance with organisational and legislative requirements
Interact with others	1.1, 2.1, 2.3, 3.5	<ul style="list-style-type: none"> Plays a lead role in situations requiring effective collaboration demonstrating the ability to guide discussions and negotiate agreeable outcomes Provides feedback to others in forms they can

		understand and use
Get the work done	1.1, 1.3, 2.1, 2.2, 2.3, 3.2, 3.3, 3.4, 3.5, 4.1, 4.2 4.3, 4.4, 4.5	<ul style="list-style-type: none"> • Develops plans or processes to manage relatively complex, WHS management tasks with an awareness of how they contribute to operational and strategic goals • Uses systematic, analytical processes, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Considers whether, and how, others should be involved, using consultative or collaborative processes as an integral part of the decision-making process • Uses digital systems and tools to enter, store and retrieve relevant information

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

WHS legislation must include:	<ul style="list-style-type: none"> • applicable Commonwealth and state or territory WHS Acts, regulations and codes of practice.

Assessment Requirements for BSBWHS501 Ensure a safe workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- establish, implement, maintain and evaluate a work health and safety (WHS) management system for a work area of an organisation in accordance with WHS legislation including policies, procedures and record keeping
- ensure organisational WHS compliance
- establish, implement, maintain and evaluate effective and compliant participation arrangements for managing WHS including identifying duty holders, identifying and approving the required resources and developing and implementing a training program
- establish, implement, maintain and evaluate procedures for effectively identifying hazards, and assessing and controlling risks using the hierarchy of risk control
- provide information and complete documentation for a WHS management system
- identify requirements for and request expert WHS advice.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and detail relevant WHS Acts, regulations and codes of practice
- specify relevant WHS organisational policies, procedures, programs and practices
- explain hazard identification and risk-management processes
- describe the hierarchy of risk control and how it is applied in the workplace
- specify in-house and WHS legislative reporting requirements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational WHS policies and procedures
- WHS legislation, regulations and codes of practice
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBWOR204 Use business technology

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- select and use technology safely and according to organisational requirements
- access, retrieve and store required data
- demonstrate basic maintenance on a range of equipment using manuals or help-files
- identify and address faults according to requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the organisation's work health and safety requirements
- outline the organisation's requirements for file naming and storage
- explain why regular back-ups of data are done
- list 'routine maintenance' tasks
- summarise the procedure for addressing equipment faults.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – workplace effectiveness field of work and include access to:

- office equipment and resources
- electronic files and data
- workplace documentation and equipment manuals
- case studies and, where possible, real situations

- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR301 Organise personal work priorities and development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to organise own work schedules, to monitor and obtain feedback on work performance and to maintain required levels of competence.

This unit applies to individuals who exercise discretion and judgement and apply a broad range of competencies in various work contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise and complete own work schedule	1.1 Ensure that work goals, objectives or Key Performance Indicators (KPIs) are understood, negotiated and agreed in accordance with organisational requirements 1.2 Assess and prioritise workload to ensure tasks are completed within identified timeframes 1.3 Identify factors affecting the achievement of work objectives and incorporate contingencies into work plans 1.4 Use business technology efficiently and effectively to manage

ELEMENT	PERFORMANCE CRITERIA
	and monitor scheduling and completion of tasks
2. Monitor own work performance	<p>2.1 Accurately monitor and adjust personal work performance through self assessment to ensure achievement of tasks and compliance with legislation and work processes or KPIs</p> <p>2.2 Ensure that feedback on performance is actively sought and evaluated from colleagues and clients in the context of individual and group requirements</p> <p>2.3 Routinely identify and report on variations in the quality of and products and services according to organisational requirements</p> <p>2.4 Identify signs of stress and effects on personal wellbeing</p> <p>2.5 Identify sources of stress and access appropriate supports and resolution strategies</p>
3. Co-ordinate personal skill development and learning	<p>3.1 Identify personal learning and professional development needs and skill gaps using self assessment and advice from colleagues and clients in relation to role and organisational requirements</p> <p>3.2 Identify, prioritise and plan opportunities for undertaking personal skill development activities in liaison with work groups and relevant personnel</p> <p>3.3 Access, complete and record professional development opportunities to facilitate continuous learning and career development</p> <p>3.4 Incorporate formal and informal feedback into review of further learning needs</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1-3.4	<ul style="list-style-type: none"> Employs a range of approaches and investigative techniques to source the knowledge necessary to arrange personal learning experiences
Reading	1.1, 1.2, 2.1	<ul style="list-style-type: none"> Interprets textual information to determine organisation's procedures, own work performance and objectives

Writing	1.3, 1.4, 2.3, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> Prepares written reports and workplace documents that communicate information clearly and effectively
Oral Communication	2.2, 2.3, 3.1, 3.2	<ul style="list-style-type: none"> Clearly gives and receives feedback using specific and relevant language Uses listening and questioning techniques to confirm understanding
Numeracy	1.1, 1.3	<ul style="list-style-type: none"> Understands responsibilities and scope of role and complies with organisational policies, procedures and protocols
Interact with others	1.1, 2.2, 2.3, 3.1, 3.2	<ul style="list-style-type: none"> Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role Fosters and nurtures a culture of constructive and respectful feedback Proactively collaborates with others to achieve specific goals
Get the work done	1.2, 1.3, 1.4, 2.4, 2.5, 3.2	<ul style="list-style-type: none"> Plans and organises work commitments to ensure deadlines and objectives are met Uses formal analytical thinking techniques to recognise and respond to routine problems Uses digital systems and tools to enter, store and monitor information

Assessment Requirements for BSBWOR301 Organise personal work priorities and development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare a work plan according to organisational requirements and work objectives
- use business technology to schedule, prioritise and monitor completion of tasks in a work plan
- assess and prioritise own work load and deal with contingencies
- monitor and assess personal performance against job role requirements by seeking feedback from colleagues and clients
- identify personal development needs and access, complete and record skill development and learning.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key provisions of legislation that relate to own work role
- describe goals, objectives or key performance indicators of own work role
- explain ways to elicit, analyse and interpret feedback when communicating with other people in the workplace
- explain the principles and techniques of goal setting, measuring performance, time management and personal assessment of learning and development needs
- explain signs and sources of stress and strategies to deal with stress in the workplace
- identify methods to identify and prioritise personal learning needs.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- office equipment and resources
- work schedules and performance improvement plans
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR404 Develop work priorities

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to monitor and obtain feedback on own work performance and access learning opportunities for professional development.

This unit applies to individuals who are required to design their own work schedules and work plans and to establish priorities for their work. They will typically hold some responsibilities for the work of others and have some autonomy in relation to their own role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and complete own work schedule	1.1 Prepare workgroup plans which reflect consideration of resources, client needs and workgroup targets 1.2 Analyse and incorporate work objectives and priorities into personal schedules and responsibilities

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Identify factors affecting the achievement of work objectives and establish contingencies and incorporate them into work plans</p> <p>1.4 Efficiently and effectively use business technology to manage and monitor planning completion and scheduling of tasks</p>
2. Monitor own work performance	<p>2.1 Identify and analyse personal performance through self-assessment and feedback from others on the achievement of work objectives</p> <p>2.2 Seek and evaluate feedback on performance from colleagues and clients in the context of individual and group requirements</p> <p>2.3 Routinely identify and report on variations in the quality of service and performance in accordance with organisational requirements</p>
3. Co-ordinate professional development	<p>3.1 Assess personal knowledge and skills against organisational benchmarks to determine development needs and priorities</p> <p>3.2 Research and identify sources and plan for opportunities for improvement in consultation with colleagues</p> <p>3.3 Use feedback to identify and develop ways to improve competence within available opportunities</p> <p>3.4 Identify, access and complete professional development activities to assist career development</p> <p>3.5 Store and maintain records and documents relating to achievements and assessments in accordance with organisational requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1, 3.2, 3.3, 3.4	<ul style="list-style-type: none"> Develops strategies to reflect on own performance, obtain feedback, and plan and source professional development opportunities
Reading	1.2, 2.1, 2.3, 3.1, 3.5	<ul style="list-style-type: none"> Recognises and interprets textual information from relevant sources to understand organisation's policies and practices

Writing	1.1, 1.3, 2.2, 2.3, 3.2, 3.5	<ul style="list-style-type: none"> Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	2.2, 2.3, 3.2	<ul style="list-style-type: none"> Provides or seeks information using language suitable to audience and context Employs listening and questioning techniques to confirm understanding
Numeracy	1.1, 1.2, 1.3	<ul style="list-style-type: none"> Interprets numerical information related to budgets and timeframes
Navigate the world of work	1.2, 2.1, 2.3, 3.1, 3.5	<ul style="list-style-type: none"> Identifies and understands roles and responsibilities in relation to organisational objectives, policies and procedures
Interact with others	2.2, 2.3, 3.2	<ul style="list-style-type: none"> Selects and uses appropriate practices when communicating with internal and external stakeholders to seek or share information Establishes and builds rapport and relationships with others to foster a culture of trust and honesty in communications
Get the work done	1.1-1.4, 2.3, 3.1, 3.2, 3.4, 3.5	<ul style="list-style-type: none"> Plans, organises and implements tasks to meet organisational requirements Systematically gathers and analyses information and evaluates options in order to anticipate potential problems and develop contingency plans Uses the main features and functions of digital technologies and tools to complete work tasks efficiently and effectively

BSBWOR501 Manage personal work priorities and professional development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create systems and process to organise information and prioritise tasks.

It applies to individuals working in managerial positions who have excellent organisational skills. The work ethic of individuals in this role has a significant impact on the work culture and patterns of behaviour of others as managers at this level are role models in their work environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish personal work goals	1.1 Serve as a positive role model in the workplace through personal work planning 1.2 Ensure personal work goals, plans and activities reflect the organisation's plans, and own responsibilities and accountabilities 1.3 Measure and maintain personal performance in varying work conditions, work contexts and when contingencies occur

ELEMENT	PERFORMANCE CRITERIA
2. Set and meet own work priorities	<p>2.1 Take initiative to prioritise and facilitate competing demands to achieve personal, team and organisational goals and objectives</p> <p>2.2 Use technology efficiently and effectively to manage work priorities and commitments</p> <p>2.3 Maintain appropriate work-life balance, and ensure stress is effectively managed and health is attended to</p>
3. Develop and maintain professional competence	<p>3.1 Assess personal knowledge and skills against competency standards to determine development needs, priorities and plans</p> <p>3.2 Seek feedback from employees, clients and colleagues and use this feedback to identify and develop ways to improve competence</p> <p>3.3 Identify, evaluate, select and use development opportunities suitable to personal learning style/s to develop competence</p> <p>3.4 Participate in networks to enhance personal knowledge, skills and work relationships</p> <p>3.5 Identify and develop new skills to achieve and maintain a competitive edge</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1, 3.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> Investigates and uses a range of strategies to develop personal competence
Reading	1.2, 3.1, 3.2	<ul style="list-style-type: none"> Analyses and interprets textual information from organisational policies and practices or feedback to inform personal development planning

Assessment Requirements for BSBWOR501 Manage personal work priorities and professional development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use business technology to create and use systems and processes to organise and prioritise tasks and commitments
- measure and maintain personal work performance including assessing competency against competency standards and seeking feedback
- maintain an appropriate work-life balance to manage personal health and stress
- participate in networks
- develop a personal development plan which includes career objectives and an action plan
- develop new skills.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain principles and techniques involved in the management and organisation of:
 - performance measurement
 - personal behaviour, self-awareness and personality traits identification
 - a personal development plan
 - personal goal setting
 - time
- discuss management development opportunities and options for self
- describe methods for achieving a healthy work-life balance
- outline organisation's policies, plans and procedures
- explain types of learning style/s and how they relate to the individual
- describe types of work methods and practices that can improve personal performance.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace equipment and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR502 Lead and manage team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead teams in the workplace and to actively engage with the management of the organisation.

It applies to individuals working at a managerial level who facilitate work teams and build a positive culture within their work teams. At this level, work will normally be carried out using complex and diverse methods and procedures requiring the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish team performance plan	1.1 Consult team members to establish a common understanding of team purpose, roles, responsibilities and accountabilities in accordance with organisational goals, plans and objectives 1.2 Develop performance plans to establish expected outcomes, outputs, key performance indicators (KPIs) and goals for work team 1.3 Support team members in meeting expected performance

ELEMENT	PERFORMANCE CRITERIA
	outcomes
2. Develop and facilitate team cohesion	<p>2.1 Develop strategies to ensure team members have input into planning, decision making and operational aspects of work team</p> <p>2.2 Develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities</p> <p>2.3 Provide feedback to team members to encourage, value and reward individual and team efforts and contributions</p> <p>2.4 Develop processes to ensure that issues, concerns and problems identified by team members are recognised and addressed</p>
3. Facilitate teamwork	<p>3.1 Encourage team members and individuals to participate in and to take responsibility for team activities, including communication processes</p> <p>3.2 Support the team in identifying and resolving work performance problems</p> <p>3.3 Ensure own contribution to work team serves as a role model for others and enhances the organisation's image for all stakeholders</p>
4. Liaise with stakeholders	<p>4.1 Establish and maintain open communication processes with all stakeholders</p> <p>4.2 Communicate information from line manager/management to the team</p> <p>4.3 Communicate unresolved issues, concerns and problems raised by team members and follow-up with line manager/management and other relevant stakeholders</p> <p>4.4 Evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Reading	1.1, 4.4	<ul style="list-style-type: none"> Analyses and interprets textual information from the organisation's policies, goals and objectives to establish team goals or to determine corrective action
Writing	1.2, 2.1, 2.2, 2.4, 4.2, 4.3, 4.4	<ul style="list-style-type: none"> Prepares written reports and workplace documentation that communicate complex information clearly and effectively

Assessment Requirements for BSBWOR502 Lead and manage team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use leadership techniques and strategies to facilitate team cohesion and work outcomes including:
 - encouraging and fostering shared understanding of purpose, roles and responsibilities
 - identifying and resolving problems
 - providing feedback to encourage, value and reward others
 - modelling desired behaviour and practices
- develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities
- establish processes to address issues and resolve performance issues
- support team to meet expected performance outcomes including providing formal and informal learning opportunities as needed
- develop performance plans with key performance indicators (KPIs), outputs and goals for individuals or the team which incorporate input from stakeholders
- communicate effectively with a range of stakeholders about team performance plans and team performance
- facilitate two-way flow of information between team and management relevant to team performance
- evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how group dynamics can support or hinder team performance

- outline strategies that can support team cohesion, participation and performance
- explain strategies for gaining consensus
- explain issue resolution strategies.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

CSCORG003 Prepare reports

Modification History

Release	Comments
1	<p>This unit was released in CSC Correctional Services Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to CSCORG301A Prepare reports.</p> <ul style="list-style-type: none"> • PC wording revised in all Elements • PC 2.4 removed

Application

This unit describes the skills required to identify organisational reporting needs and collect, check and record information using available technology.

This unit applies to those working in a range of generalist and specialist roles within a range of occupational areas. For this reason this unit may be significantly customised, particularly in the assessment of knowledge, based on different organisational, sector and location requirements.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to reporting.

Those undertaking this unit consistently work independently and as part of a coordinated team while drawing upon support from a range of familiar resources. They would undertake complex tasks in a moderate range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Organisational administration and management

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify reporting needs	1.1 Identify the reasons and requirements for recording and reporting. 1.2 Adjust written communication to suit audience and situation.
2. Collect and check information	2.1 Collect information and sort it in logical order according to the nature of the report. 2.2 Check the information with a range of authorities and confirm its accuracy, relevance and status. 2.3 Check whether more information is needed and gather it from a range of sources where appropriate.
3. Record information	3.1 Record and report information in the required format, style, structure and timeframe. 3.2 Ensure that any conclusions drawn and recommendations match the report information. 3.3 Use technology available in the workplace to store and retrieve data. 3.4 Ensure that all written material complies with legislative requirements and organisational policies and procedures.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				
Performance variables																								
1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity									

Further information on ACSF and the foundation skills underpinning this unit can be found in the [Foundation Skills Guide](http://www.govskills.com.au/guides/correctional-services/foundation-skills-guide) <http://www.govskills.com.au/guides/correctional-services/foundation-skills-guide> on the GSA website.

Unit Mapping Information

Supersedes and is equivalent to CSCORG301A Prepare reports.

Assessment Requirements for CSCORG003 Prepare reports

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in CSC Correctional Services Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements revised

Please refer to the advice in the CSC Assessment Guide.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least two occasions.

- reading and interpreting documents containing the required information
- recording complete, accurate, clear and objective information
- recognising the urgency and high risk components of specific reports
- handling and storing information securely and safely

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- organisation's policies and procedures related to report writing
- basic written communication techniques
- security of information, confidentiality and right to information
- discriminative language
- technical and professional language used in the work environment
- an awareness of legislation and statutory obligations of reporting in own state or territory justice system, including legal requirements of own role

Assessment Conditions

Valid assessment of this unit requires a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when reading and writing routine workplace reports, including coping with difficulties, irregularities and changes to routine.

This unit has been identified by industry as suitable for holistic assessment with:

- CSCORG002 Communicate effectively
- CSCSAS001 Maintain security
- CSCSAS010 Conduct searches
- CSCTRA001 Maintain security during escort

Refer to advice in the [CSC Assessment Guide](#)

<http://www.govskills.com.au/guides/correctional-services/assessment-guide>.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

FDFPPL3003A Support and mentor individuals and groups

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to model appropriate work practices, provide feedback to groups and individuals and facilitate group processes.
------------------------	--

Application of the Unit

Application of the unit	This unit applies to support provided to a team or work group. A person competent in this unit may or may not have formal responsibility for managing others.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Support others in the work area	1.1. Individuals are mentored to meet work requirements 1.2. Performance that is inappropriate is identified and corrective action taken 1.3. Feedback on performance is provided
2. Facilitate group processes	2.1. Purpose of group process is identified 2.2. Meeting procedures required to achieve an agreed outcome are determined and applied 2.3. Group members are engaged in the process 2.4. Clear outcomes are reached in a timely manner

Required Skills and Knowledge

<p>REQUIRED SKILLS AND KNOWLEDGE</p> <p>This section describes the skills and knowledge required for this unit.</p>
<p>Required skills</p>
<p><i>Ability to:</i></p> <ul style="list-style-type: none"> • model behaviour consistent with company policies and procedures • identify behaviour or performance that is unacceptable • structure interventions and feedback to clearly convey required standard of performance • apply appropriate explanation, demonstration, questioning and active listening techniques when interacting with others

REQUIRED SKILLS AND KNOWLEDGE

- provide feedback appropriate to the audience requirements
- recognise and respond appropriately to difference and diversity in the workplace
- provide and/or arrange opportunities to develop/practice appropriate skills
- plan group processes, including clearly identifying the purpose of the discussion or meeting, confirming the appropriate people are available and planning a basic outline of the approach and/or agenda
- facilitate meetings, including confirming with group members the purpose of the discussion or meeting, engaging people in discussion and assisting the group to reach an agreed outcome within the allotted timeframe
- record meeting outcomes
- follow up group processes, including identifying actions required to follow up outcomes of a discussion or meeting
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- company policies and procedures as they apply to the work area, including areas covered by legislation, such as sexual harassment, equal employment opportunity (EEO)/affirmative action, anti-discrimination, racial vilification and workplace bullying, occupational health and safety (OHS), food safety and environmental management
- industry awards and enterprise agreements to develop an awareness of the main issues covered as they affect day-to-day work arrangements
- systems and programs in the workplace to support development and mentoring of others
- relevant resources to support mentoring role and responsibilities
- techniques for structuring and explaining work-related information to meet the needs of people in the work area
- interpersonal skills, including appropriate questioning, listening and feedback techniques
- training/assessment arrangements in the workplace and related responsibilities
- boundaries of responsibility and related procedures for feedback, counselling and disciplinary procedures
- formal arrangements and responsibilities for consulting others relating to work role
- meeting procedures and recording requirements as relevant in the workplace

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • model behaviour and performance consistent with company policy and procedures • support others in their behaviour and performance • provide feedback on performance and take corrective action on inappropriate behaviours • plan and organise group meetings or activities to engage participation • support group meetings to gain clear outcomes.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • advice on workplace policies, codes of practice and procedures • opportunities to interact with others using typical workplace communication processes • typical group forums, such as structured group discussions, committee meetings and work groups • workplace systems and procedures for consultation, feedback, counselling and discipline • advice on conditions of employment and entitlements • information systems, including recording and retrieval systems.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be: <ul style="list-style-type: none"> • FDFOP2005A Work in a socially diverse environment • FDFPPL3004A Lead work teams and groups.
Guidance information for	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over

EVIDENCE GUIDE**assessment**

a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures

Work is carried out in accordance with company policies, procedures, regulatory and licensing requirements, legislative requirements and industrial awards and agreements

Mentoring and feedback arrangements

Mentoring and feedback arrangements may be:

- formal or informal

Corrective action

Corrective action may include:

- reporting an incident to a more senior person as appropriate

Group processes

Group processes may include:

- formal meeting procedures and informal discussions
- group meetings

Communication systems

Communication systems reflect the culture of the workplace and the workforce. This may include:

- communicating with people from diverse cultural backgrounds and with people with limited English language and literacy skills

Meeting procedures

Meeting procedures include:

- developing an agenda
- seeking input
- recording actions arising and working towards

FNSASIC302 Develop, present and negotiate client solutions

Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to provide advice on deposit products, non-cash payment facilities and general insurance products

It applies to individuals with excellent communication skills who are authorised as Australian Securities and Investments Commission (ASIC) registered Australian financial services licence (AFSL) holders to provide advice about products and services at ASIC Tier 2 level.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the FNS Implementation Guide Companion Volume or the relevant regulator for specific guidance on requirements.

Unit Sector

ASIC units

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop appropriate strategies and solutions	<p>1.1 Determine appropriate strategy to provide for identified needs and outcomes by analysing products and client risk profile, and conducting assessment of client needs</p> <p>1.2 Conduct relevant research, analysis and product modelling, and draft appropriate solution, plan, policy or transaction for presentation to client demonstrating understanding of ASIC identified generic and specialist knowledge relevant to products</p>

ELEMENT	PERFORMANCE CRITERIA
	being offered
2. Present appropriate strategies and solutions to client	<p>2.1 Explain and discuss proposed transaction with client in clear and unambiguous way, demonstrating product knowledge appropriate for service or product offered</p> <p>2.2 Ensure that relevant details, terms and conditions of product or service are reinforced to client with impacts and possible risks of solution disclosed in clear and concise manner</p> <p>2.3 Provide client with written supporting documentation and guide client through key aspects of documentation</p>
3. Negotiate financial plan, policy or transaction with client	<p>3.1 Discuss and clarify any concerns or issues client has regarding proposed plan, policy or transaction</p> <p>3.2 Seek confirmation to ensure that client understands proposed plan, policy or transaction</p>
4. Coordinate implementation of agreed plan, policy or transaction	<p>4.1 Gain client's formal agreement to proposed plan, policy or transaction</p> <p>4.2 Clearly explain and confirm that client understands associated fees, cost structures and timeframes for execution and processing</p>
5. Complete and maintain necessary documentation	<p>5.1 Ensure that proposal and all other statutory and transactional documents are completed and signed off by client</p> <p>5.2 Confirm that signed agreement and all copies of appropriate documentation are exchanged</p>
6. Provide ongoing service where requested by client	<p>6.1 Ensure that type and form of ongoing service, including reporting on performance and review of plan, policy or transaction, is understood by client</p> <p>6.2 Clearly explain fees and costs for any ongoing and specifically defined services and ensure client understands these expenses</p> <p>6.3 Provide ongoing services as required</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Reading	1.2	<ul style="list-style-type: none"> Recognises and analyses information from relevant sources to safeguard client needs and ensure currency of product and service
Writing	1.1, 1.2, 2.3, 3.2, 4.2, 5.1, 5.2, 6.1-6.3	<ul style="list-style-type: none"> Uses clear, specific and industry related terminology to complete and update workplace documentation
Oral Communication	2.1-2.3, 3.1, 3.2, 4.2, 5.2, 6.1-6.3	<ul style="list-style-type: none"> Clearly articulates requirements using language appropriate to the audience and environment Confirms the understanding of others through active listening and questioning
Numeracy	4.2, 6.2	<ul style="list-style-type: none"> Interprets and uses financial product information and analyses numerical data within spreadsheets and database
Navigate the world of work	1.2 , 5.1	<ul style="list-style-type: none"> Develops knowledge of legislation and regulations relevant to current role Takes responsibility for providing advisory services and documentation that comply with legal and organisational requirements
Interact with others	2.1-2.3, 4.1, 4.2, 6.1, 6.2	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with clients to build rapport, seek or share information, negotiate agreement and maintain service relationship Adapts personal communication style to show respect for the values, beliefs and cultural expectations of others
Get the work done	1.1, 1.2, 2.3, 5.1, 5.2, 6.3	<ul style="list-style-type: none"> Takes responsibility for the sequence and priority of tasks within own workload to achieve effective and compliant outcomes for all stakeholders Uses analytical processes to determine appropriate solutions that meet client needs Uses familiar digital tools and systems to complete job tasks

Assessment Requirements for FNSASIC302 Develop, present and negotiate client solutions

Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- interpret and comply with industry regulations and codes of practice including, for insurance products, the required approval or authority to accept the transfer of risk
- explain the characteristics, benefits and impacts of financial products and services to clients
- present appropriate financial products and services to clients and successfully negotiate a plan, policy or transaction.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must satisfy the knowledge requirements relevant to the products and activities in which advice is given.

For general insurance, deposit products and non-cash payments and relevant first home saver account products the individual must:

- explain the legal environment including disclosure and compliance covering:
 - role of the representative or adviser
 - relevant legal principles including the Corporations Act, Financial Services Reform Act (FSRA), Competition and Consumer Act, Insurance Contracts Act and Australian Securities and Investments Commission (ASIC) Act
 - relationship between ethics and regulatory requirements including good faith, utmost good faith, full disclosure of remuneration and fees, and any other conflicts of interest which may influence the adviser's recommendation
- name relevant industry codes of practice and conduct

- identify complaints resolution procedures (internal and external)
- outline relevant ASIC regulatory guidelines.

For general insurance the individual must:

- summarise the characteristics and participants of Australian insurance markets and the roles played by intermediaries, and identify insurance products including:
 - definition of an insurance product
 - conditions, exclusions and level of coverage of risk transfer products
 - types of insurance products
 - pricing of risk products
- identify taxation issues relating to insurance products
- explain advisory functions including:
 - role of the representative, broker or adviser
 - participants in the insurance advisory services market
 - range of services provided
 - profile and financial information of the client
 - appropriateness of a risk assessment
- summarise the specific product knowledge for the general insurance products in which advice is given including:
 - standard cover (and deviations)
 - policy wordings
 - taxes and charges
 - insurance claims
 - premium rating and risk selection
 - reporting
 - product development
 - underwriting.

For deposit products and non-cash payment facilities the individual must:

- name the types of deposit products and non-cash payment products
- summarise the product characteristics.

For first home saver accounts the individual must:

- name the types of first home saver account products including the range of accounts, associated risks and alternative products
- summarise the product characteristics – eligibility and withdrawal, and government conditions
- explain the taxation issues relating to first home saver accounts.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial services and products advice field of work and include access to:

- common office equipment, technology, software and consumable
- financial services product information.

Assessors must satisfy NVR/AQTF assessor requirements

HLTAID003 Provide first aid

Modification History

Release	Comments
Release 6	Updated: <ul style="list-style-type: none"> • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 5	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 4	Updated mapping information. Equivalent outcome.
Release 3	Updated mapping information.
Release 2	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty. The unit applies to all workers who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation

- 1.1 Recognise an emergency situation
- 1.2 Identify, assess and manage immediate hazards to health and safety of self and others
- 1.3 Assess the casualty and recognise the need for first aid response
- 1.4 Assess the situation and seek assistance from emergency response services

2. Apply appropriate first aid procedures

- 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines
- 2.2 Provide first aid in accordance with established first aid principles
- 2.3 Display respectful behaviour towards casualty
- 2.4 Obtain consent from casualty where possible
- 2.5 Use available resources and equipment to make the casualty as comfortable as possible
- 2.6 Operate first aid equipment according to manufacturer's instructions
- 2.7 Monitor the casualty's condition and respond in accordance with first aid principles

3. Communicate details of the incident

- 3.1 Accurately convey incident details to emergency response services
- 3.2 Report details of incident to workplace supervisor as appropriate
- 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

ELEMENT

Elements define the essential outcomes.

4. Evaluate the incident and own performance

PERFORMANCE CRITERIA

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

4.2 Participate in debriefing to address individual needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Release 1	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:

- performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least two simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
 - conducted a visual and verbal assessment of the casualty
 - demonstrated safe manual handling techniques
 - post-incident debrief and evaluation
 - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
 - allergic reaction
 - anaphylaxis
 - bleeding control
 - choking and airway obstruction
 - envenomation, using pressure immobilisation
 - fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
 - respiratory distress, including asthma
 - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
 - ARC Guidelines relevant to provision of CPR and first aid
 - safe work practices to minimise risks and potential hazards
 - infection control principles and procedures, including use of standard precautions
 - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
 - awareness of potential need for stress-management techniques and available support following an emergency situation
 - duty of care requirements

- respectful behaviour towards a casualty
- own skills and limitations
- consent
- privacy and confidentiality requirements
- importance of debriefing
- considerations when providing first aid including:
 - airway obstruction due to body position
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - chain of survival
 - standard precautions
 - how to conduct a visual and verbal assessment of the casualty
- principles and procedures for first aid management of the following scenarios:
 - abdominal injuries
 - allergic reaction
 - anaphylaxis
 - basic care of a wound
 - bleeding control
 - burns
 - cardiac conditions, including chest pain
 - choking and airway obstruction
 - crush injuries
 - diabetes
 - dislocations
 - drowning
 - envenomation
 - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
 - eye and ear injuries
 - fractures
 - febrile convulsions
 - head, neck and spinal injuries
 - minor skin injuries
 - needle stick injuries
 - poisoning and toxic substances
 - respiratory distress, including asthma
 - seizures, including epilepsy
 - shock
 - soft tissue injuries, including strains and, sprains
 - stroke

- unconsciousness
- basic anatomy and physiology relating to:
 - how to recognise a person is not breathing normally
 - chest
 - response/consciousness
 - upper airway and effect of positional change
 - considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandages
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form for written reports
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

ICTWEB201 Use social media tools for collaboration and engagement

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish a social networking presence, using social media tools and applications. It includes the requirement to review, compare, and use different types of social networking tools and applications.

It applies to information and communications technology (ICT) personnel who need to develop a social networking web presence for a small or large office environment, using social media tools and applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Describe the different types of social media tools and applications	1.1 Explain the characteristics of the term 'social media' 1.2 Identify different types of social-media tools and applications 1.3 Illustrate some of the issues associated with the use of social media tools and applications

ELEMENT	PERFORMANCE CRITERIA
2. Compare different types of social media tools and applications	<p>2.1 Select one social media type to review</p> <p>2.2 Review the most popular tools, and applications, within that social media type</p> <p>2.3 Itemise the benefits across a range of the most popular tools and applications</p> <p>2.4 Select the most appropriate social media tool or application</p>
3. Set up and use, popular social media tools and applications	<p>3.1 Identify the social media tools and applications available for possible implementation</p> <p>3.2 Initiate the preferred social media tools, and applications, for use</p> <p>3.3 Establish the social media interface, using text and file content</p> <p>3.4 Initiate social networking interaction</p> <p>3.5 Test and evaluate tools, and applications, for ease of use</p> <p>3.6 Present the findings</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.2	<ul style="list-style-type: none"> Extract the relevant information from technical and organisational documents
Writing	1.1, 2.2, 2.3, 3.3, 3.4, 3.6	<ul style="list-style-type: none"> Develop the content in a manner that supports and conveys information, using the appropriate structures and specialised language
Navigate the world of work	1.3	<ul style="list-style-type: none"> Understands legal and ethical responsibilities, regarding the use of social media tools
Get the work done	2.1, 2.2, 2.4, 3.1, 3.2, 3.5, 3.6	<ul style="list-style-type: none"> Makes routine decisions and implements standard procedures for routine tasks Understands the purposes, specific functions, and the key features of common digital systems and tools, and operates them effectively to complete routine tasks

Assessment Requirements for ICTWEB201 Use social media tools for collaboration and engagement

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify different types of social media tools and applications, and the issues associated with their use
- access the internet, set up a social networking presence and upload and link a wide variety of files
- use and evaluate social media tools and applications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list basic technical terminology in relation to social networking, social media applications, and tools
- outline basic methods of uploading images, text files, portable document format (PDF) files, audio files, video files, and link the associated files
- state the features, and functions, of social media applications
- list import and export software functions
- explain how to link documents
- explain the process of tagging, in order to facilitate collaborative folksonomy
- list social media applications and procedures, for connecting to social networking sites
- identify and describe, input and output devices
- describe, and use, really simple syndication (RSS) feeds to connect a social network.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- a personal computer (PC) and printer
- the internet
- social-media tools and applications
- online instructional documents.

Assessors must satisfy NVR/AQTF assessor requirements.

MEM05004C Perform routine oxy acetylene welding

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers preparing materials and performing routine oxy acetylene welding.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies in a maintenance or manufacturing environment where the welding is not required to meet an Australian standard or equivalent. Fillet and butt welds would typically be performed on low carbon/mild steels.</p> <p>Where welding is required to meet Australian Standard 1554 General Purpose or equivalent codes, OHS regulations and/or licensing requirements, Unit MEM05022C (Perform advanced welding using oxy acetylene process) should be selected.</p> <p>Band: A</p> <p>Unit Weight: 2</p>
--------------------------------	---

Licensing/Regulatory Information

Refer to Application of the Unit

Pre-Requisites

Prerequisite units	

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. Location of welds is identified in accordance with standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Settings and consumables are selected.
4. Perform routine welding using <i>oxy acetylene</i>	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned in accordance with standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials
- setting up welding equipment
- welding with oxy acetylene fuel gas
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instructions
- using measurement skills for joint preparation and routine oxy acetylene welding

Required knowledge

Look for evidence that confirms knowledge of:

- preparatory requirements
- materials and consumables properties and characteristics
- equipment and equipment settings
- fuel gas properties and applications
- post welding treatments
- weld characteristics
- any applicable industry standards, NOHSC guides, State/Territory regulatory codes of practice/standards
- safe work practices and procedures
- safe welding practices
- use and application of personal protective equipment for routine oxy acetylene welding

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to prepare materials and carry out routine oxy acetylene welding.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing routine oxy acetylene welding or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Materials	Mild and low carbon steel and cast iron
Prepared	Preheating, setting up jigs, fixtures, clamps, joint preparation
Equipment	Hoses, blowpipes, regulators
Consumables	Filler rods, fluxes
Oxy acetylene	The term 'oxy-acetylene' is used here to describe a range of fuel gases, including acetylene, LPG, hydrogen etc.
Cleaned	Fluxes

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare materials and equipment	<p>1.1. Job requirements are determined from specifications and/ or instructions.</p> <p>1.2. Materials are correctly prepared using appropriate tools and techniques.</p> <p>1.3. Materials are correctly assembled/aligned to meet specifications as required.</p> <p>1.4. Distortion prevention measures are identified and appropriate action is taken as required.</p> <p>1.5. Heating equipment is assembled and set up safely and correctly in accordance with standard operating procedures.</p> <p>1.6. Correct and appropriate consumables are selected and prepared.</p> <p>1.7. Test run is undertaken and verified as required.</p>
2. Braze and/or silver	2.1. The correct process is selected to meet specifications.

ELEMENT	PERFORMANCE CRITERIA
solder	2.2. Materials are preheated as required. 2.3. Consumables are applied using correct techniques. 2.4. Jointing material is applied correctly and in appropriate quantities to meet job/specifications. 2.5. Material temperature is annealed using correct and appropriate techniques.
3. Inspect joints	3.1. Excess jointing materials are removed using correct and appropriate techniques. 3.2. Inspection of joints is undertaken to standard operating procedures. 3.3. Inspection results are reported/recorded using standard operating procedures as required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials
- performing brazing, braze welding, silver soldering
- undertaking visual inspection
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instructions

Required knowledge

Look for evidence that confirms knowledge of:

- the reasons for selecting specific methods of assembly/alignment
- the procedures for minimising distortion of the materials being brazed/braze welded/silver soldered
- the procedures for assembling and setting up the specific heating equipment
- the reasons for selecting specific heating equipment
- the reasons for selecting specific consumables
- conducting test runs

REQUIRED SKILLS AND KNOWLEDGE

- typical applications of brazing/braze welding and silver soldering processes
- the procedures and precautions for preheating the materials to be joined
- the effects of the use of inappropriate techniques on the performance of the jointed materials
- the effect of inappropriate quantities of jointing material on the performance of the jointed materials
- the procedures for normalising the temperature of jointed materials
- the consequences of using inappropriate techniques to normalise the temperature of the joint
- the procedures for removing excess jointing material
- the procedures for inspecting brazed/braze welded/silver soldered joints
- use and application of personal protective equipment for silver soldering and brazing/braze welding
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to perform brazing (including braze welding) and silver soldering.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both. Where assessment occurs off the job, i.e. the candidate is not in productive work, then appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assemble/disassemble plant and equipment	1.1. Accessories and equipment are correctly selected and assembled for manual heating and thermal cutting.
2. Operate heating and thermal cutting equipment	2.1. Cutting process and/or procedure appropriate for material is selected. 2.2. All safety procedures are observed. 2.3. Equipment start-up procedures are followed correctly to standard operating procedures. 2.4. Equipment adjustments are made correctly using standard operating procedures. 2.5. Appropriate cutting allowances are made. 2.6. Material is used in the most economical way. 2.7. Defects are identified and corrective action is taken to standard operating procedures. 2.8. Material is heated and cut to specification.

ELEMENT	PERFORMANCE CRITERIA
	2.9.Shape/size/length is to accepted workplace standards.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- performing pre-start checks
- safely starting equipment
- following standard operating procedures
- adjusting equipment to operating specifications
- making cutting allowances
- economising material and minimising wastage
- identifying cutting defects and taking corrective action
- heating and cutting materials to specifications
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures. May include drawings
- following oral instructions
- performing measurements needed to meet the requirements of this unit
- entering routine and familiar information onto proformas and standard workplace forms

Required knowledge

Look for evidence that confirms knowledge of:

- cutting processes appropriate to various materials
- heating and cutting specifications
- procedures for heating and cutting
- the tools, equipment and techniques for heating and cutting
- assembling procedures for equipment and accessories
- hazards and control measures associated with manual heating and thermal cutting
- use and application of personal protective clothing and equipment
- equipment pre-checks and operation
- procedures for adjusting heating and cutting equipment

REQUIRED SKILLS AND KNOWLEDGE

- cutting allowances and reasons for applying them
- procedures for minimising waste material
- reasons for minimising waste material
- cutting defects and their causes
- procedures for correcting cutting defects
- tools, equipment and techniques required to correct cutting defects
- use and application of personal protective equipment
- safe work practices and procedures

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to perform manual heating and thermal cutting.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with manual heating/thermal cutting or other units requiring the exercise of the skills and knowledge covered by this unit.

EVIDENCE GUIDE	
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questions should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Cutting	Use of hand held and self-propelled straight line cutters
Process	Fuel gas, oxy fuel gas and air fuel gas

MEM07005C Perform general machining

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit of competency covers determining the job requirements and sequence of operations, selecting and mounting tools, performing the machining, measuring the components, and adjusting and maintaining a range of standard machine tools.
------------------------	--

Application of the Unit

Application of the unit	<p>The unit of competency applies to the use of machinery to shape metal including lathes, mills, planers, shapers, radial arm drills, slotters and surface grinders.</p> <p>This unit has been developed to support Engineering Tradesperson - Mechanical apprenticeship training and the recognition of trade level skills in machining operations. Skills covered by this unit are generally applied in occupational and work situations associated with fitting and machining. It may also apply to other trade occupations requiring general machining skills. It may also apply in some circumstances to senior operators who have responsibility for machine set up, selection of materials and lubricants, establishment of datum points and basic marking out, and setting of speeds, feeds and other machining parameters.</p> <p>This unit has application in the MEM30205 Certificate III in Engineering - Mechanical qualification and other qualifications requiring a basic trade level of machining skills. It may also apply to MEM20205 Certificate II in Engineering - Production Technology and MEM30105 Certificate III in Engineering - Production Systems and other qualifications requiring machining skills.</p> <p>Machining is undertaken on one or more of a range of standard machine tools. Machines are not computer numerical controlled (CNC) machines.</p>
--------------------------------	--

	<p>Where machining is undertaken without undertaking any set up including mounting of tools, setting of speeds, feeds and other operational parameters then either MEM07024B Operate and monitor machine/process or MEM07025B Perform advanced machine/process operation should be selected.</p> <p>Drilling operations in this unit exclude those covered by MEM18002B Use power tools/hand held operations.</p> <p>Where substantial marking out is required, MEM12006C Mark off/out (general engineering) should be considered.</p> <p>Where precision measurement is required, MEM12003B Perform precision mechanical measurement should also be considered.</p> <p>For set-up and operation of electro-discharge (EDM) machines, refer to MEM07014B Perform electro-discharge (EDM) machining operations.</p> <p>Band: A</p> <p>Unit Weight: 8</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine job requirements	1.1. Drawings, instructions and specifications are interpreted and understood
2. Determine sequence of operations	2.1. Sequence of operations including job set-up is determined for maximum efficiency and to meet job specifications 2.2. Appropriate material is selected and datum established as required
3. Select and mount tools	3.1. Appropriate tools for job are selected, sharpened and shaped as required 3.2. Tools are mounted and positioned correctly
4. Perform machining operations	4.1. Basic marking out techniques are used where required 4.2. Machining parameters are set for job requirements and maximum tool life 4.3. Work is held or correctly clamped without damage to product, and all safety requirements are met 4.4. Machining is performed in a safe manner utilising all guards, safety procedures and personal protective clothing and equipment
5. Measure components	5.1. Components are checked with instruments or gauges appropriate to the measurement requirements to ensure compliance with specifications
6. Adjust and maintain machine	6.1. Routine maintenance and adjustments are carried out as required which may include slide and collar adjustment, cleaning and lubrication

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- reading and interpreting routine information on written job instructions, specifications and standard operating procedures which may include drawings
- following oral instruction
- planning and sequencing operations
- preparing operational work plan
- sharpening and shaping cutting tools
- identifying worn or damaged cutting tools
- correct mounting and positioning of cutting tools
- basic marking out of materials
- setting machining parameters to achieve the job requirements and maximise tool life
- using appropriate and sufficient clamping/mounting of the work piece
- using coolant/lubricant correctly
- checking for conformance to specifications
- measuring to specified tolerances and dimensions

Required knowledge

Required knowledge includes:

- reasons for selecting the chosen sequence of operations
- methods of work holding
- basic marking out techniques including datum points/lines
- geometry of cutting tools for a range of materials and applications
- benefits of using correctly sharpened cutting tools
- machine operation
- selection of feeds and speeds to suit a range of materials and operations within the scope of this unit
- correct methods of mounting a variety of cutting tools
- safety issues with regard to correct clamping, guards and shields
- tolerances and limits of size
- situations indicating the need for machine adjustment, lubrication and cleaning
- techniques, tools and equipment to measure materials and machined components

REQUIRED SKILLS AND KNOWLEDGE

- use and application of personal protective equipment
- safe work practices and procedures
- hazards and control measures associated with general machining

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to perform general machining including responsibility for selecting and mounting tooling and setting machining parameters. Competency in this unit cannot be claimed until all prerequisites have been satisfied

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently apply the skills covered in this unit of competency in new and different situations and contexts. Critical aspects of assessment and evidence include:

- correct job planning including identifying job requirements from drawings, instructions or specifications and sequence of operations
- identifying any required tooling, measuring equipment and accessories
- selecting and mounting required tooling
- selecting material and marking out if required
- setting machining parameters
- checking machined components for conformance to specifications.

Context of and specific resources for assessment

This unit has been developed to support training in and recognition of trade level competency in general machining as applied to a trade level fitting and machining, other trade or senior operator work environment. Assessment should emphasise a workplace context and procedures found in the candidate's

EVIDENCE GUIDE	
	<p>workplace.</p> <p>The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p>
Method of assessment	<p>Typically Engineering Tradespersons - Mechanical and other persons engaged in general machining work are required to apply their machining skills and techniques across a range of jobs and specifications.</p> <p>A single assessment event is not appropriate. On the job assessment should be included as part of the assessment process wherever possible. Where assessment occurs off the job, judgement must consider evidence of the candidate's performance in a productive work environment that includes a sufficient range of appropriate tasks and materials to cover the scope of application for this unit.</p> <p>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</p>
Guidance information for assessment	<p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing general machining or other units requiring the exercise of the skills and knowledge covered by this unit.</p> <p>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Operations	<p>Operations may include:</p> <ul style="list-style-type: none"> • parallel cutting • slotting • planing • drilling • knurling • cutting flats • non-precision surface grinding operations
Materials	Materials may include ferrous and non-ferrous
Tools	<p>Tools may include:</p> <ul style="list-style-type: none"> • cutting tools and accessories • measuring devices
Marking out techniques	Marking out techniques may include basic marking out techniques using calipers, steel rules, dividers and scribes
Machining parameters	<p>Machining parameters may include:</p> <ul style="list-style-type: none"> • speeds • feeds • stops • coolant and cutting lubricants
Machines	<p>Machines may include:</p> <ul style="list-style-type: none"> • lathes • mills • planers • shapers • radial arm drills • slotters

RANGE STATEMENT	
	<ul style="list-style-type: none"> • surface grinder
Maintenance and adjustments	Maintenance and adjustments may include: <ul style="list-style-type: none"> • slide and collar adjustment • cleaning and lubrication

MEM09002B Interpret technical drawing

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers interpreting technical drawing applying to any of the full range of engineering disciplines.
------------------------	---

Application of the Unit

Application of the unit	<p>Technical drawings may utilise perspective, exploded views or hidden view techniques. Drawings are provided to Australian Standard 1100 and/or Australian Standard 1102 and their equivalents from the full range of engineering disciplines.</p> <p>Standard symbols to Australian Standard 1100 and/or Australian Standard 1102 or equivalent are recognised in field of employment. Technical drawings may include symbol glossaries.</p> <p>Where any drawing, sketch, chart, diagram is only used as the technique for communication, then this unit does not apply: see Unit MEM12023A (perform engineering measurements) or Unit MEM16006A (Organise and communicate information).</p> <p>Band: A</p> <p>Unit Weight: 4</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select correct technical drawing	1.1. Drawing is checked and validated against job requirements or equipment. 1.2. Drawing version is checked and validated.
2. Interpret technical drawing	2.1. Components, assemblies or objects are recognised as required. 2.2. Dimensions are identified as appropriate to field of employment. 2.3. Instructions are identified and followed as required. 2.4. Material requirements are identified as required. 2.5. Symbols are recognised in the drawing as appropriate.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- checking the drawing against job requirements/related equipment in accordance with standard operating procedures
- confirming the drawing version as being current in accordance with standard operating procedures
- where appropriate, obtaining the current version of the drawing in accordance with standard operating procedures
- reading, interpreting information on the drawing, written job instructions, specifications, standard operating procedures, charts, lists and other applicable reference documents
- checking and clarifying task related information
- undertaking numerical operations, geometry and calculations/formulae within the scope of this unit

Required knowledge

Look for evidence that confirms knowledge of:

- application of AS1100.101 in accordance with standard operating procedures
- relationship between the views contained in the drawing
- objects represented in the drawing
- units of measurement used in the preparation of the drawing
- dimensions of the key features of the objects depicted in the drawing
- understanding of the instructions contained in the drawing
- the actions to be undertaken in response to those instructions
- the materials from which the object(s) are made
- any symbols used in the drawing as described in range statement
- hazard and control measures associated with interpreting technical drawings, including housekeeping
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	A person who demonstrates competency in this unit must be able to interpret technical drawings as described.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with interpreting technical drawings or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Interpret technical drawing</p>	<p>AS1100.101 is an extensive work and the candidate is not required to have complete familiarity with all its contents, the application of AS1100 would usually be in line with standard operating procedures; interpretation may require guidance particularly in respect to any geometric tolerancing</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select appropriate device or equipment	1.1.Measurement requirements are determined from specifications. 1.2.Appropriate device or equipment is selected according to standard operating procedures, to achieve required outcome.
2. Obtain measurements using a range of measuring devices	2.1. Correct and appropriate measuring technique is used. 2.2. Measurements are accurately obtained .

ELEMENT	PERFORMANCE CRITERIA
	2.3. Dimensions are determined or verified using basic calculations, where required.
3. Maintain measuring devices	3.1. Routine care and storage of devices is undertaken to manufacturers' specifications or standard operating procedures. 3.2. Routine adjustments to devices are made and checked.
4. Communicate measurements as required	4.1. Measurements are accurately recorded, where required. 4.2. Freehand sketch which depicts required information is prepared, as required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- selecting the appropriate measuring device for given measuring tasks
- using appropriate measuring technique
- reading all measurements taken accurately to the finest graduation of the selected measuring device
- handling and storing measuring devices in accordance with manufacturers' specifications or standard operating procedures
- verifying all measuring devices before use
- making, where appropriate, routine adjustments to measuring devices
- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- planning and sequencing operations
- checking and clarifying task related information
- checking for conformance to specifications
- undertaking numerical operations involving addition, subtraction, multiplication, division, fractions and decimals within the scope of this unit
- preparing drawings as required

REQUIRED SKILLS AND KNOWLEDGE

Required knowledge

Look for evidence that confirms knowledge of:

- correct application of a range of measuring devices
- correct and appropriate measuring technique for a range of measuring devices
- addition, subtraction, multiplication, division, fractions, decimals to the scope required by this unit
- procedures for handling and storing a range of measuring devices
- procedures for adjusting and zeroing a range of measuring devices
- methods of communicating measurements by drawings, as required
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to perform engineering measurements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication,

EVIDENCE GUIDE	
	materials handling, recording and reporting associated with performing engineering measurements or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Specifications	Drawings, sketches, job instructions, schematics, diagrams, technical manuals
Range of measuring devices	Protractors, combination squares, set squares, dial indicators, thermometers, tapes, rules, micrometers, vernier-scaled measuring equipment
Basic calculations	Calculations needed to assist in determining measurements where a reading of the graduated device is not sufficient, for example subtracting one measurement from another to give a third

RANGE STATEMENT	
	measurement. Examples of calculations needed are addition, subtraction, multiplication, division, fractions and decimals. Calculations may be made using a calculator
Routine adjustments	Validating the device using simple zeroing or scale adjustment
Measurements	Measuring length, squareness, flatness, angle, roundness, clearances or any other measurements that can be read off analog, digital or other measuring device
Information	Dimensions, instructions, base line or datum points

	<p>operational procedures, principles and techniques.</p> <p>1.6. Hand tools are stored safely in appropriate location according to standard operational procedures and manufacturers' recommendations.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting hand tools appropriate to the task
- using hand tools safely
- identifying hand tool defects and marking for repair
- maintaining/sharpening hand tools using appropriate techniques
- storing hand tools in accordance with manufacturers'/standard operating procedures

Required knowledge

Look for evidence that confirms knowledge of:

- applications of different hand tools in a general engineering context
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools
- storage location and procedures for a range of hand tools
- hazards and control measures associated with using hand tools
- use and application of personal protective equipment
- safe work practices and procedures

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Install/replace fluid power systems and controls	<p>1.1. Fluid power control principles and system/circuit diagrams are interpreted and understood.</p> <p>1.2. System/circuit components are identified and inspected for compliance with specifications.</p> <p>1.3. Sequential installation is undertaken according to manufacturers' specifications and standard operating procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
2. Check and adjust fluid power system control sequence and operation	2.1. Controls and system operation is checked against operational specifications using appropriate test equipment and application principles/techniques. 2.2. Adjustments are performed to sequence system to meet/align to operational requirements and specifications. 2.3. Modifications/alterations are recorded and reported in accordance with standard operating procedures. 2.4. Controls and system operation is checked and commissioned to specifications.
3. Fault find fluid power systems control circuit	3.1. System/circuit diagrams and data sheets are interpreted and understood. 3.2. System/circuit components are identified and inspected. 3.3. System/circuit is traced and action of components is diagnosed to identify and localise faults. 3.4. System/circuit parts are tested using appropriate test equipment and application principles. 3.5. System/circuit parts are assessed against operational specifications. 3.6. Fault condition is localised at the component level. 3.7. Faulty condition is evaluated, root cause is analysed and corrective action is planned.
4. Maintain and repair or rectify system control components	4.1. Correct maintenance procedures are applied according to standard operating procedures. 4.2. Repair procedures are selected and applied using correct and appropriate techniques, tools and equipment. 4.3. Faulty items are tested, repaired or replaced using sequential installation procedures according to manufacturers' recommendations. 4.4. Replacement items are selected from manufacturers' catalogues to meet specifications. 4.5. System control components are reassembled using appropriate principles and procedures according to specifications required.
5. Check and adjust sequence of fluid power system controls	5.1. Using circuit diagrams and fluid power system control principles, circuit sensors and controllers are identified. 5.2. Necessary adjustments to sequence system control circuit are made to meet operational specification.

ELEMENT	PERFORMANCE CRITERIA
	5.3. Correct operation of system control circuit is checked against operational specification. 5.4. Correct operation is confirmed. 5.5. Fluid power system controls are commissioned to specifications. 5.6. Appropriate follow-up procedures are adopted. 5.7. Service/maintenance report is completed to standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- obtaining and interpreting system/circuit diagrams, system operation data sheets and control data
- planning and sequencing operations
- checking/inspecting system/circuit components for compliance with specifications
- undertaking installation of the fluid power system and controls in accordance with manufacturers' specifications and work site procedures
- using test equipment to check control and system operation against specification
- adjusting the system where appropriate, to ensure that the sequence of operations conforms to operational requirements
- recording/reporting any modifications/alterations to the system
- checking the operation of the controls and system for conformance to specification
- commissioning the system in accordance with work site procedures
- identifying and localising components not conforming to operational specification
- conducting appropriate maintenance in accordance with work site procedures
- repairing control components where appropriate
- testing faulty items for conformance to specification
- installing repaired/replaced components
- selecting replacement items from manufacturers' catalogues
- reassembling control components
- initiating maintenance and/or service follow-up procedures
- completing maintenance and/or service reports

REQUIRED SKILLS AND KNOWLEDGE

Required knowledge

Look for evidence that confirms knowledge of:

- system operational and control requirements and specifications
- the application of common fluid power system components and controllers
- the system/circuit components
- any special installation requirements
- fluid power test equipment and application
- the correct operational sequence of the system
- typical adjustments to correct sequencing variations from specification
- the consequences of not recording/reporting modifications to systems
- the procedures for recording/reporting modifications/alterations
- the fluid power system commissioning procedures
- common test equipment and its application
- the component(s) not complying with operational specification
- typical causes of component failure
- the cause of the faulty condition in the component(s)
- appropriate procedures for rectifying the faulty condition
- the appropriate maintenance schedule and procedures
- appropriate control component repair procedures
- typical test equipment and its application
- circuit sensors and controllers
- common adjustments that can be made to control systems and their effect
- any maintenance/service follow-up procedures
- the maintenance/service recording/reporting requirements
- hazards and control measures associated with maintaining and rectifying fluid power controls, including housekeeping
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must

EVIDENCE GUIDE	
	be able to maintain fluid power controls. Competency in this unit cannot be claimed until all prerequisites have been satisfied.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with maintaining and rectifying fluid power controls or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Fluid power control principles

PLCs, relay logic control systems, unitised/modular sensors, transducers, timers, counters and associated equipment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess lubrication system operation	<p>1.1. Relevant information is obtained and correctly interpreted prior to any testing.</p> <p>1.2. Checks are undertaken safely and to prescribed procedures.</p> <p>1.3. Flows, pressures and temperatures are correctly determined and recorded.</p> <p>1.4. Faults are correctly isolated to component level and appropriate corrective action is determined.</p> <p>1.5. Lubricant fluid characteristics, terminology and applications are understood.</p> <p>1.6. Test equipment is used correctly.</p> <p>1.7. Results of spectrographic or laboratory analysis are correctly evaluated and recommendations are made regarding adjustments to future maintenance activities.</p> <p>1.8. Auxiliary lubrication systems are assessed for correct</p>

ELEMENT	PERFORMANCE CRITERIA
	operation.
2. Rectify faulty components	2.1.Replacement components are correctly selected using manufacturers' data. 2.2.Components are removed and refitted to engine by following prescribed procedures. 2.3.Final adjustments are made that bring system in line with specifications. 2.4.Test and rectification activities are accurately recorded. 2.5.Engine is free of lubricant leaks after repair work is carried out. 2.6.Component wear and clearances are correctly determined using appropriate test equipment and manufacturers' recommendations.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- planning and sequencing operations
- checking task-related information
- checking for conformance to specification
- checking the lubrication system
- determining and recording oil flows, pressures and temperatures
- identifying faulty components
- using test equipment
- obtaining/interpreting the results of lubricating oil tests
- checking auxiliary lubrication systems for correct operation where appropriate
- selecting replacement components
- removing, refitting and adjusting lubrication system components
- reporting and recording test and work activities

REQUIRED SKILLS AND KNOWLEDGE

- checking lubrication system components for wear and clearance
- undertaking calculations and numerical operations within the scope of this unit

Required knowledge

Look for evidence that confirms knowledge of:

- the operation of the lubrication system
- the procedures for testing/checking lubrication
- hazards and control measures associated with checking and rectifying lubrication systems, including housekeeping
- the tests to be undertaken and equipment and techniques to be used to determine oil flows, pressures and temperatures
- the procedures for recording lubrication system test results
- the specifications of the lubrication system components
- the appropriate corrective action for faulty components
- the characteristics of lubricants and application of a variety of lubricants
- the procedures and reasons for analysing lubricating oil samples
- the likely causes of a range of out of specification test results
- the appropriate corrective action to be taken
- the implications of out of specification test results on maintenance schedules and requirements
- the reasons for installing auxiliary lubrication systems on diesel plant and equipment
- the operation of the auxiliary lubrication system
- the procedures for removing/replacing lubrication system components
- the procedures for adjusting lubrication systems
- the procedures for recording test and repair activities
- the procedures for checking lubrication systems for leaks
- the measuring equipment/techniques used to determine lubrication system component wear and clearances
- safe work practices and procedures

--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare inspection areas for basic penetrant testing	1.1. Inspection areas are cleaned and prepared for testing using appropriate procedures and materials. 1.2. Preparation processes are carried out in accordance with the relevant procedures and OH&S requirements. 1.3. Inspection areas are visually assessed and obvious discontinuities are identified.
2. Perform basic penetrant testing	2.1. Nominated test is identified from standard operating procedures. 2.2. Test equipment is prepared in accordance with standard operating procedures. 2.3. Test media is selected and applied in accordance with workplace practices and specifications. 2.4. Penetrant test is carried out in accordance with relevant work instructions and OH&S requirements. 2.5. Penetrant testing equipment is maintained and stored in accordance with standard operating procedures and OH&S requirements.
3. Report the results of penetrant test(s)	3.1. Basic indications are checked and defects are identified in accordance with enterprise standards and/or procedures. 3.2. Basic indications are confirmed in accordance with enterprise standards and/or procedures. 3.3. Test results are reported in accordance with enterprise standards and/or procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: <ul style="list-style-type: none"> • preparing inspection areas • identifying discontinuities • applying procedures

REQUIRED SKILLS AND KNOWLEDGE

- applying test media
- applying principles of penetrant testing techniques
- identifying defects
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures.
- following oral instructions
- entering routine and familiar information onto proformas and standard workplace forms

Required knowledge

Look for evidence that confirms knowledge of:

- cleaning and preparation processes
- precleaning methods and their areas of use - solvents, vapour degrease, etching, detergents, paint removers, mechanical methods
- consequences of incorrect preparation
- procedures and OH&S requirements in relation to the preparation process
- basic concepts and principles of NDT; general terms, purpose of NDT and areas of application of NDT
- scope and basic description of test
- general properties of penetrants - penetrability, removability, visibility
- emulsifier types
- developer types
- use of standard test panels
- established inspection procedures and techniques
- types of discontinuities and their consequences
- procedure for carrying out penetrant testing
- penetrant application
- dwell times
- penetrant removal
- developer application
- dry powder
- development time
- factors affecting indications
- non-relevant indications
- post-cleaning methods and their areas of use
- basic maintenance and storage procedures for testing equipment
- OH&S requirements including storage requirements
- definition of a defect and common basic defects
- methods/procedures for reporting test results

Evidence Guide

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use concepts of arithmetic in the solution of engineering problems	1.1. Units of physical quantities are converted to facilitate engineering calculations. 1.2. Calculations are performed to solve problems involving rational and irrational numbers. 1.3. Scientific notation is used to represent numbers. 1.4. Calculations are checked for reasonableness using estimating and approximating techniques.
2. Solve engineering problems involving algebraic expressions with one independent variable	2.1. Algebraic expressions are manipulated using mathematical operations in their correct order.
3. Use two-dimensional geometry to solve practical problems	3.1. Angles expressed in degrees are correctly converted to radians and vice versa. 3.2. The perimeter, area, length and angles of a range of two-dimensional figures are correctly calculated. 3.3. The volume and surface area of complex figures are correctly calculated. 3.4. Points identified in terms of cartesian coordinates can be converted to polar coordinates and vice versa.
4. Use trigonometry to solve practical	4.1. Basic trigonometry functions are used to calculate the lengths of the sides of right-angled triangles.

ELEMENT	PERFORMANCE CRITERIA
problems	<p>4.2. Inverse trigonometry functions are used to determine angles in a right-angled triangle given the lengths of two sides.</p> <p>4.3. The sine rule is used to determine the lengths of the sides of acute and obtuse angled triangles given one side and two angles.</p> <p>4.4. The cosine rule is used to determine the lengths of the sides of acute and obtuse angled triangles given two sides and one angle.</p>
5. Graph linear functions	<p>5.1. Linear functions are solved graphically and equations of straight lines are determined from the slope and one point, or two points.</p> <p>5.2. Two linear functions are solved simultaneously both algebraically and geometrically.</p> <p>5.3. The length and mid point of a line segment are determined.</p>
6. Solve quadratic equations	<p>6.1. Quadratic equations are solved.</p> <p>6.2. Simultaneous linear and quadratic equations are solved.</p>
7. Perform basic statistical calculations	<p>7.1. Mean, median and mode are calculated from given data.</p> <p>7.2. Standard deviation is calculated and interpreted employing graphical representation.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- using and applying mathematical formulas:
 - logical thinking
 - problem solving
 - calculating
 - applying statistics

REQUIRED SKILLS AND KNOWLEDGE
<ul style="list-style-type: none"> • using computer numerical methods • drawing graphs
Required knowledge
<p>Look for evidence that confirms knowledge of:</p> <ul style="list-style-type: none"> • transposing and evaluating formulae • polynomials • straight line coordinate geometry • introduction to indices • introduction to trigonometry • circular functions • trigonometry of oblique triangles • trigonometric identities • introduction to functions and their graphs

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	<p>A person who demonstrates competency in this unit must be able to apply mathematical skills and knowledge to simple engineering applications. Evidence from tasks and projects should/may be used to complement and demonstrate integration of competency.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</p>
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop workplace sustainability policy.	1.1 Define <i>scope of sustainability policy</i> . 1.2 Identify and consult <i>stakeholders</i> as a key component of the policy development process. 1.3 Review environmental sustainability <i>strategies</i> relevant to all stages of work covered by the policy 1.4 Make recommendations for policy options based on likely effectiveness, timeframes and cost. 1.5 Develop policy is that reflects the organisation's commitment to sustainability as an integral part of the

ELEMENT	PERFORMANCE CRITERIA
	business planning and as a business opportunity. 1.6 Agree upon appropriate methods of implementation.
2. Communicate the policy.	2.1 Promote the policy, including its expected outcome to key stakeholders. 2.2 Inform those involved in implementing the policy as to outcomes expected, activities to be undertaken and responsibilities assigned.
3. Implement the policy.	3.1 Develop and communicate procedures to help implement the policy. 3.2 Implement <i>strategies</i> for continuous improvement in resource efficiency. 3.3 Establish record systems for tracking continuous improvements in sustainability approaches and assign responsibilities.
4. Review policy implementation	4.1 Record outcomes and provide feedback to key personnel and stakeholders. 4.2 Investigate success or otherwise of policy. 4.3 Monitor records to identify trends that may require remedial action, and use to promote continuous improvement of performance. 4.4 Modify policy and or <i>procedures</i> as required to ensure improvements are made.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- developing and implementing systems and procedures to aid in the achievement of sustainability in the workplace
- applying quality assurance systems relevant to own enterprise
- accessing and applying other relevant enterprise policies, procedures and protocols
- relevant industry competency
- interpreting business/strategic plans

This unit requires the ability to:

<p>REQUIRED SKILLS AND KNOWLEDGE</p> <ul style="list-style-type: none"> • read and evaluate complex and formal documents such as policy and legislation • research, analyse and present information • prepare written reports requiring precision of expression and language and structures suited to the intended audience • adjust communication to suit different audiences • deal with different points of view and dissenting stakeholders.
<p>Required knowledge</p> <p>Required knowledge includes:</p> <ul style="list-style-type: none"> • understanding of relevant policy development and implementation processes and practices • understanding of the principles, practices and available tools and techniques of sustainability management relevant to the particular industry context • best practice approaches relevant to own work area • equal employment opportunity, equity and diversity principles and occupational health and safety implications of policy/s being developed

Evidence Guide

<p>EVIDENCE GUIDE</p>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competence in this unit must be able to provide evidence of the ability to develop and implement integrated sustainability policies and procedures within an enterprise. The review of the policy after implementation will also need to be evidenced.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:</p> <ul style="list-style-type: none"> • develop relevant policy and procedures that comply with the regulatory requirements and business plans • develop a workable implementation strategy • include measurable criteria for reviewing improvement. <p>Consistent performance should be demonstrated. For</p>

EVIDENCE GUIDE	
	<p>example, look to see that:</p> <ul style="list-style-type: none"> • policy implementation is reviewed • policy is developed to become part of the routine practices of the organisation.
Context of and specific resources for assessment	<p>This section should be read in conjunction with the range of variables for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation.</p> <p>A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.</p> <p>Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.</p>
Method of assessment	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.</p> <p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed:</p> <ul style="list-style-type: none"> • by demonstration in the workplace • using targeted questioning for appropriate portions • through use of specific project(s) • by use of a suitable simulation and/or a range of case studies/scenarios • by a combination of these techniques. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment.</p>
Guidance information for assessment	<p>Assessors need to be aware of any cultural issues that may affect responses to questions.</p> <p>Assessment processes and techniques must be culturally</p>

EVIDENCE GUIDE	
	appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Procedures	<p>All operations are performed in accordance with procedures.</p> <p>Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.</p> <p>Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.</p>
Scope of sustainability policy	<p>Scope of sustainability policy include:</p> <ul style="list-style-type: none"> • The area/s of environmental sustainability to be targeted and whether social and economic sustainability will be incorporated • The parts of the enterprise to which it is to apply, including whether it is for the whole enterprise, one site, one work area or combinations of these • An investigation of the particular business and market context of the industry/ enterprise • Addressing sustainability initiatives through reference to standards, guidelines and approaches such as: <ul style="list-style-type: none"> • ISO 14001 Environmental Management Systems • Life Cycle Analyses

RANGE STATEMENT	
	<ul style="list-style-type: none"> • Cradle to grave/cradle to cradle • Global Reporting Initiative • Ecological Footprint Assessment • Triple Bottom Line reporting • Product Stewardship.
Stakeholders	<p>Stakeholders include individuals and groups both inside and outside the organisation that have some direct interest in the enterprise's conduct, actions, products and services, including:</p> <ul style="list-style-type: none"> • employees at all levels of the organisation • customers • suppliers • regulators • other organisations.
Strategies	<p>Implementation strategies include:</p> <ul style="list-style-type: none"> • awareness raising among stakeholders • training of staff in principles and techniques of sustainability • promotional activities. <p>Continuous improvement strategies include ongoing measuring, improving and monitoring such as:</p> <ul style="list-style-type: none"> • Plan, do, check, act cycles • Kaizen (continuous improvement) • Kaizen blitz (breakthrough improvement event) • Six sigma approaches <p>Environmental sustainability strategies include:</p> <ul style="list-style-type: none"> • reducing toxic material and hazardous chemical use • minimising resource use through changes in processes, facility design and management • supply chain and life cycle management approaches • sourcing renewable energy and low carbon footprint materials • reducing, re-using, recycling and waste

RANGE STATEMENT	
	reduction <ul style="list-style-type: none"> • product and process improvements • carbon offsets • reducing greenhouse gas and other emissions

MSFGG2005 Apply basic glass handling

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers handling and moving sheets of flat glass by hand safely and efficiently in a production, processing or installation environment, as an individual and involving teamwork for lifting.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Glass and Glazing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|----------------------------|-----|---|
| 1 | Prepare for glass handling | 1.1 | Work requirements in the form of type and quantity of glass to be relocated are identified from work instructions |
| | | 1.2 | Work health and safety (WHS) requirements for movement of glass sheets by hand, including personal protective equipment, are observed throughout the work |
| | | 1.3 | Sheet glass to be moved is identified and weight, shape and points of balance, and dimensions estimated or calculated |
| | | 1.4 | Tools and equipment and manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified |

- 1.5 Risks to self, others, material and equipment are identified arising from the required lifting, load carrying, set down or movement of the glass
- 1.6 Need for glass lifting equipment or team lifting is determined and team lifting processes are considered for application
- 1.7 Glass is checked for imperfections and damage prior to movement
- 2 Plan glass movement
 - 2.1 Locations for glass storage are identified and routes to be followed determined
 - 2.2 Required clearances are compared to available space and adjustments made, as required
 - 2.3 Process for relocating glass is planned, including predicting and planning for potential difficulties
 - 2.4 Proposed process is checked against advisory standards and workplace procedures for compliance
- 3 Relocate glass
 - 3.1 Actions of lifting, lowering and carrying, pulling and pushing are carried out in accordance with approved advisory standards and workplace procedures
 - 3.2 Team lifting tasks (where used) are coordinated according to approved advisory standards
 - 3.3 Planned process and route are followed and glass is relocated without damage to material, personnel or equipment
 - 3.4 Glass is labelled and stored following workplace procedures ensuring there are no projections
 - 3.5 Relocation is checked to see that it meets work requirements, and any differences reported
- 4 Complete work
 - 4.1 Work area is cleaned and rubbish disposed of, as appropriate
 - 4.2 Workplace documentation is completed, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- Unit context includes:**
- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
 - work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
 - work requires individuals to demonstrate some discretion, judgement and problem solving
- Sheet glass includes:**
- glass for residential and commercial windows and doors
 - tinted and heat reflecting
 - mirrors and furniture applications
 - annealed
 - laminated glass
- Tools and equipment include:**
- glass handling equipment and hand tools
 - lever and pump vacuum lifters
 - slings
 - trolleys
- Team lifting processes include:**
- nomination of team leader
 - calculation of capacity of team
 - techniques to be used
 - identifying tasks of team members
- Glass relocation includes:**
- loading and unloading of trucks and skips
- Personal protective equipment includes:**
- that prescribed under legislation, regulation and enterprise policies and practices:
 - gauntlets
 - gloves

Information and procedures include:

- safety glasses
- hard hats
- safety footwear
- aprons and overalls
- workplace procedures relating to the use of tools and equipment and personal protective equipment
- work instructions, including job sheets, cutting lists, plans, drawings and designs
- workplace procedures relating to reporting and communication
- manufacturer specifications and operational procedures

Unit Mapping Information

Supersedes and is equivalent to LMFGG2005C Move glass sheets by hand.

Assessment Requirements for MSFGG2005 Apply basic glass handling

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Demonstrate safety and inspection procedures prior to lifting
- Safely lift and relocate annealed and laminated glass up to, and including, 1.2 m² (17 kg)
- Safely team lift and relocate annealed and laminated glass up to, and including, 4.5 m² (68 kg)
- Load and unload glass safely and efficiently
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Qualities and characteristics of glass, including hazards and handling requirements and the behaviour of glass sheets when lifted and moved
- Work flow requirements in relation to the movement of glass by hand
- Principles, requirements and techniques of moving glass sheets by hand and loading and unloading glass to/from trucks and skips
- Workplace safety system requirements related to the moving of glass sheets by hand

Assessment Conditions

- Assessors must:

- hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
- have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to glass sheet to be relocated, workplace operating procedures and personal protection equipment, and an appropriate work area.

MSFGG3001 Store and handle glass

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers handling, relocating and storing sheet glass in the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Glass and Glazing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|-------------------------------|-----|--|
| 1 | Identify storage requirements | 1.1 | Work requirements in the form of type and quantity of glass to be handled and stored are identified from work instructions |
| | | 1.2 | Work health and safety (WHS) requirements for storage and handling of glass, including personal protective equipment, are observed throughout the work |
| | | 1.3 | Glass to be stored is checked against paperwork and any discrepancies reported according to workplace procedures |
| | | 1.4 | Storage requirements are identified from manufacturer instructions, statutory regulations and workplace procedures |
| | | 1.5 | Locations for glass storage are identified and checked for availability and suitability |

- 1.6 The process and procedures for moving, handling and storing glass are identified
 - 1.7 Team lifting processes are considered for application, including nomination of a team leader and calculating the capacity of the team
 - 2 Prepare for glass movement
 - 2.1 Work sequence is planned in a logical order to suit the job in accordance with workplace procedures
 - 2.2 Tools, equipment and materials are selected and checked prior to use to ensure they are appropriate for the work, serviceable and in a safe condition
 - 2.3 Planned route for relocating glass is determined and checked for hazards, and the work area is cleared of obstructions
 - 2.4 Risks to self and others are identified and acted upon according to statutory requirements and workplace procedures
 - 2.5 Required clearances are compared to available space and adjustments made
 - 2.6 Process for relocating glass is planned, including predicting and planning for potential difficulties
 - 2.7 Proposed process is checked against codes of practice and workplace procedures for compliance
 - 3 Relocate glass
 - 3.1 Safety checks are carried out on required handling equipment, and any damaged or worn parts reported according to workplace practices
 - 3.2 Handling equipment is operated safely and correctly in accordance with manufacturer instructions and workplace procedures
 - 3.3 Planned process and route are followed and glass relocated without damage to material, personnel or equipment
 - 3.4 Glass is labelled and stored following workplace procedures ensuring there are no projections
 - 3.5 Relocation is checked to see that it meets work requirements, and any differences are reported
 - 4 Complete job
 - 4.1 Handling equipment is cleaned, maintained and stored

requirements

according to workplace procedures

- 4.2 Work area is cleaned and rubbish disposed of, as appropriate
- 4.3 Workplace documentation is completed, as required, according to workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit context includes:

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

Glass includes:

- annealed
- laminated
- toughened
- patterned
- tinted
- heat reflecting
- domestic and commercial glass
- mirrors
- shower screens
- furniture glass

- safety glass
 - patterned or specialty glass
- Handling and storing glass includes:**
- handling and storing of glass in quantities appropriate to the workplace requirement
 - team lifting as well as the application of individual skills
- Tools and equipment include:**
- hand trolleys
 - pallet truck
 - gantry crane
 - scissors
 - slings
 - air and tilt tables
 - vacuum lifters
 - crawler track
 - articulating spider lifts
- Personal protective equipment includes:**
- that prescribed under legislation, regulation and enterprise policies and practices:
 - gauntlets
 - gloves
 - safety glasses
 - hard hats
 - safety footwear
 - aprons and overalls
- Information and procedures include:**
- workplace procedures relating to the use of tools and equipment and personal protective equipment
 - work instructions, including job sheets, cutting lists, plans, drawings and designs
 - workplace procedures relating to reporting and communication
 - manufacturer specifications and operational procedures
 - quality standards, including AS/NZS 4667:2000 Quality requirements for cut-to-size and processed glass

Unit Mapping Information

Supersedes and is equivalent to LMFGG3001C Store and handle glass.

Assessment Requirements for MSFGG3001 Store and handle glass

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Identify equipment for the handling and storage of glass and calculate the weight of glass
- Handle annealed and/or laminated glass up to, and including, 2.3 m² (17 kg)
- Team handle annealed and/or laminated glass up to, and including, 4.5 m² (68 kg)
- Relocate single sheets of glass by vacuum and/or scissor grabs up to 4.5 m² (170 kg)
- Safely load and secure glass
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Qualities and characteristics of glass, including hazards and handling requirements
- Work flow requirements in relation to the movement and storage of glass
- Glass storage requirements
- Correct identification of equipment, processes and procedures
- Workplace safety system requirements related to the handling, relocation and storage of glass

Assessment Conditions

- Assessors must:

- hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
- have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to glass to be stored, workplace operating procedures, personal protective equipment, and an appropriate work area and others to assist, as required.

MSFUP3001 Apply traditional foundations to upholstered furniture

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers applying traditional upholstery foundations to upholstered furniture.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Upholstery

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|----------------|-----|--|
| 1 | Plan operation | 1.1 | Work order or instructions are used to confirm type of traditional furniture foundations to be applied |
| | | 1.2 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.3 | Attaching methods are identified and fitting sequence is determined |
| | | 1.4 | Suitable work area is selected and prepared |
| | | 1.5 | Tools and hardware for the application of the foundation are selected and checked for safe operation |

- 1.6 Traditional foundation components are selected as required
- 2 Prepare and attach traditional foundation
 - 2.1 Mounting points are measured and marked on the frame, as required
 - 2.2 Traditional foundation is positioned and appropriate fasteners are used to secure it to the item
 - 2.3 Appropriate fasteners are used to secure the traditional foundation, as required
 - 2.4 The applied foundation is inspected for fit, finish and quality with those requiring reworking/refitting being tagged for further reprocessing or recycling/disposal in accordance with workplace practices
 - 2.5 Process is monitored and conditions which may affect quality standards are noted
 - 2.6 Variations to normal activities are reported in accordance workplace procedures
 - 2.7 Authorised changes in standard operating procedures and work order or instructions are implemented
- 3 Complete work
 - 3.1 Workplace documentation, including stock usage, is completed in accordance with workplace procedures
 - 3.2 Faulty and/or defective equipment is tagged and reported in accordance with workplace procedures
 - 3.3 Waste and scrap are removed in accordance with workplace procedures
 - 3.4 Tools and equipment used are cleaned, inspected for serviceable condition and stored appropriately in accordance with workplace procedures
 - 3.5 Equipment is maintained and work area is cleaned in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit context includes:

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

Tools and equipment include:

- tape measure
- web strainer
- scissors
- upholstery hammer
- tack lifter
- staple gun
- pincers
- long-nose pliers

Materials include:

- webbing
- coil springs
- flock
- wadding
- coconut fibre
- bridle
- bridle ties
- solid timber base
- padded frames
- hard edge
- hessian

- Personal protective equipment includes:**
- calico
 - lacing twine
 - mattress twine
 - that prescribed under legislation, regulations and enterprise policies and practices:
 - safety glasses/goggle
 - hair nets
 - ear muffs/plugs
 - gloves
 - footwear and protective clothing
- Information and procedures include:**
- workplace procedures relating to the use of tools and equipment
 - work instructions, including job sheets, cutting lists, plans, drawings and designs
 - workplace procedures relating to reporting and communication
 - manufacturer specifications and operational procedures

Unit Mapping Information

Supersedes and is equivalent to LMFUP3001B Apply traditional foundations to upholstered furniture.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

Assessment Requirements for MSFUP3001 Apply traditional foundations to upholstered furniture

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Interlace and turn back jute webbing, tie off and lace up coil springs, fit hessian bridles (loose and/or deep), coconut fibre, wadding and a stitched edge (one blind, one top) in a minimum of two (2) items of traditional upholstered furniture
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Work flow in relation to furniture production and refurbishment
- Features of range of traditional foundation types and fittings
- Materials and techniques used in the application of traditional foundations to upholstered furniture
- Materials used in the application of traditional foundations
- Identification of equipment, processes and procedures required for the application of traditional foundations to upholstered furniture

Assessment Conditions

- Assessors must:

- hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
- have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to furniture frames and traditional fittings, such as webbing stock, coil springs, padding materials, and a work order.

MSMENV272 Participate in environmentally sustainable work practices

Modification History

Release 1. Supersedes and is equivalent to MSAENV272B Participate in environmentally sustainable work practices

Application

This unit of competency covers the skills and knowledge required to effectively find out current resource use and carry out improvements, in own work area, including those that reduce the negative environmental impacts of work practices.

This unit of competency applies to operators/team members who are required to follow procedures to work in an environmentally sustainable manner. This maximises the environmental performance of the process and the organisation, ensures regulatory compliance, and aims to minimise environmental risks and impacts.

This unit of competency applies to all sectors of the manufacturing industry and members of its value chain. It may also be applied to all sections of an organisation, including office and warehouse. This unit will need to be contextualised for the industry sector, organisation and section.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

HSE

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Identify current resource use and environmental issues	1.1	Identify workplace environmental and resource efficiency issues
		1.2	Identify resources used in own work role
		1.3	Find out current usage of resources
2	Comply with environmental regulations	2.1	Read and follow environmental policies and procedures to ensure compliance with federal, state/territory and local government laws, by-laws, regulations and mandated codes of practice, and codes and standards that the organisation applies voluntarily
		2.2	Ask questions and seek clarification relating to environmental work requirements
		2.3	Identify incidents, including breaches or potential breaches of environmental regulations and occurrences outside of standard procedures, and report to appropriate personnel
		2.4	Report environmental incidents using workplace forms and procedures
3	Seek opportunities to improve environmental practices and resource efficiency	3.1	Follow workplace procedures to improve environmental practices and resource efficiency
		3.2	Make suggestions for improvements to environmental workplace practices and work plans

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Environmental and resource efficiency issues

Environmental and resource efficiency issues include minimisation of environmental risks and maximisation of opportunities to improve business environmental performance and to promote more efficient

production and consumption of natural resources. They include one or more of the following:

- minimisation of waste through implementation of the waste management hierarchy
- contribution to climate change and other macro threats that can arise from materials and work processes used
- efficient and effective use of energy and other resources
- seeking alternative sources of energy
- efficient use of materials and appropriate disposal of waste
- use of controls to minimise the risk of environmental damage from hazardous substances
- efficient water use
- reducing emissions
- life cycle analysis applied to issues, such as energy supply, materials, transport and production

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAENV272B Participate in environmentally sustainable work practices

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

Assessment Requirements for MSMENV272 Participate in environmentally sustainable work practices

Modification History

Release 1. Supersedes and is equivalent to MSAENV272B Participate in environmentally sustainable work practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and must include the ability to:

- find out resources used in own job, including one or more of:
 - making simple measurements, consistent with the job
 - counting the number of items entering/leaving a work area
 - reading indicators in the work area
 - obtaining relevant information from support personnel
- follow environmental policies and identify potential breaches of environmental regulations
- suggest improvements within the limit of own authority.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- a basic understanding of:
 - sustainability
 - the contribution to climate change and other macro threats that can arise from materials and work processes used
- the environmental hazards/risks, resource use and inefficiencies associated with own workplace and job
- the relevant environmental and resource efficiency policies and procedures for own work area
- the impact of laws and regulations at a level relevant to the work context.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations

- will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor /third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
- will typically include the use of appropriate tools, equipment and documents
- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry-based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMENV472 Implement and monitor environmentally sustainable work practices

Modification History

Release 1. Supersedes and is equivalent to MSAENV472B Implement and monitor environmentally sustainable work practices

Application

This unit of competency covers the skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices, and to implement improvements and monitor their effectiveness.

This unit of competency applies to those who have responsibility for a specific area of work or who lead a work group or team. It addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

It includes identifying areas for improvement, developing plans to make improvements, and implementing and monitoring improvements in environmental performance.

This unit of competency applies to all sectors of the manufacturing industry and members of its value chain. It may also be applied to all sections of an organisation, including office and warehouse. This unit will need to be appropriately contextualised as it is applied across an organisation and across different industry sectors.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

HSE

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Investigate current practices in relation to resource usage	1.1	Identify environmental regulations applying to the enterprise
		1.2	Assess procedures for assessing compliance with environmental regulations
		1.3	Collect information on environmental and resource efficiency systems and procedures and provide to the work group, as required
		1.4	Measure and record current resource usage by members of the work group
		1.5	Analyse and record current purchasing strategies
		1.6	Analyse current work processes to access information and data, and assist in identifying areas for improvement
2	Set targets for improvements	2.1	Seek input from stakeholders, key personnel and specialists
		2.2	Access external sources of information and data as required
		2.3	Evaluate alternative solutions to workplace environmental issues
		2.4	Set efficiency targets
3	Implement performance	3.1	Source and use techniques/tools to assist in achieving targets

improvement strategies	3.2	Apply continuous improvement strategies to own work area of responsibility, and communicate ideas and possible solutions to the work group and management
	3.3	Integrate environmental and resource efficiency improvement plans for own work group with other operational activities and implement them
	3.4	Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon them where appropriate
	3.5	Implement costing strategies to fully value environmental assets
4	Monitor performance	4.1
		Document outcomes and communicate reports on targets to key personnel and stakeholders
	4.2	Evaluate strategies and environmental performance, including breaches or potential breaches of regulations and occurrences outside of standard procedure which may lead to lower environmental performance
	4.3	Set new targets and investigate and apply new tools and strategies
	4.4	Promote successful strategies and reward participants where possible

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements
- *ISO 14001:2015 Environmental management systems*

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Unit Mapping Information

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

Assessment Requirements for MSMENV472 Implement and monitor environmentally sustainable work practices

Modification History

Release 1. Supersedes and is equivalent to MSAENV472B Implement and monitor environmentally sustainable work practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- investigate/analyse resource usage
- evaluate improvement alternatives and set targets
- implement improvements within the limit of own authority
- monitor the performance of improvements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant environmental and resource efficiency issues, specific to industry practices, including:
 - contribution to climate change and other macro threats that can arise from materials and work processes used
 - regulated environmental issues
 - issues relevant to licencing conditions
- best practice environmental approaches relevant to own area of responsibility
- methods for measuring and calculating resource usage.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations
 - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - will typically include the use of appropriate tools, equipment and documents

- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMENV672 Develop workplace policy and procedures for environmental sustainability

Modification History

Release 1. Supersedes and is equivalent to MSAENV672B Develop workplace policy and procedures for environmental sustainability

Application

This unit of competency covers the skills and knowledge required to develop and implement a workplace sustainability policy, including the modification of the policy to suit changed circumstances.

This unit of competency applies to team leaders/supervisors/managers who are required to develop approaches to environmental sustainability within workplaces, including the development and implementation of policy.

It includes communicating with relevant stakeholders, developing and monitoring sustainability policies and reviewing and improving sustainability policies.

This unit of competency applies to all sectors of the manufacturing industry. It may also be applied to all sections of an organisation, including the office and warehouse. This unit will need to be appropriately contextualised as it is applied across an organisation and across different industry sectors.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Develop workplace sustainability policy	1.1	Define the scope of sustainability policy
		1.2	Identify and consult with stakeholders during the policy development process
		1.3	Review the environmental sustainability strategies relevant to all stages of work covered by the policy
		1.4	Make recommendations for policy options based on likely effectiveness, timeframes and cost
		1.5	Develop policy that reflects the organisation's commitment to sustainability as an integral part of the business planning, and as a business opportunity
		1.6	Agree upon appropriate methods of implementation
2	Communicate the policy	2.1	Promote the policy, including its expected outcome to key stakeholders
		2.2	Inform those involved in implementing the policy as to outcomes expected, activities to be undertaken and responsibilities assigned
3	Implement the policy	3.1	Develop and communicate procedures to help implement the policy
		3.2	Employ strategies for implementation of policy in resource efficiency
		3.3	Establish recording systems for tracking changes in sustainability approaches and assign responsibilities
4	Review policy	4.1	Record outcomes and provide feedback to key personnel

implementation

and stakeholders

- 4.2 Investigate success or otherwise of policy
- 4.3 Monitor records to identify trends that may require remedial action to implemented policy and procedures
- 4.4 Modify policy and or procedures as required to ensure improvements are made

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements
- *ISO 14001:2015 Environmental management systems*

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)

- safe work method statements (SWMS)
- formulas/recipes

Assessment Requirements for MSMENV672 Develop workplace policy and procedures for environmental sustainability

Modification History

Release 1. Supersedes and is equivalent to MSAENV672B Develop workplace policy and procedures for environmental sustainability

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- scope and develop an integrated sustainability policy and procedure within an enterprise
- raise awareness among stakeholders and those involved in implementing the policy of expected outcomes
- develop a workable implementation strategy
- ensure policy implementation is monitored, reviewed and modified where

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant policy development and implementation processes and practices
- principles, practices and available tools and techniques of sustainability management relevant to the particular industry context.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
 - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
 - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP390 Use structured problem-solving tools

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem solving tools

Application

This unit of competency covers the skills and knowledge required to use structured process improvement tools to solve process and other problems.

This unit of competency applies to experienced operators, team leaders, supervisors or people in similar roles who are required to identify improvements and/or solve problems beyond those associated directly with the process unit/equipment.

A 'problem' in this context should be interpreted as 'an opportunity for improvement', not just something causing faulty product, product faults or process irregularities/breakdowns.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

Problem-solving techniques are often applied as group processes. Where the competency is achieved in a group context the individual being assessed must meet all aspects of the competency.

This competency does NOT cover the planning and facilitation of group problem-solving activities.

Other units of competency, including MSMOPS units, may include a problem-solving element where problems specific to that competency are to be resolved. However, this unit of competency requires structured problem-solving techniques to be applied more broadly and/or with greater depth and rigour than is implied by the problem-solving element of the other units.

This unit of competency applies to all work environments and sectors within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Support

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Identify the problem	1.1	Identify variances from desired operating/output parameters and quality
		1.2	Define the extent, cause and nature of the problem by observation and investigation
		1.3	State and specify the problem clearly
2	Determine fundamental cause of problem	2.1	Select problem-solving tool appropriate to the problem and the context
		2.2	Identify possible causes based on experience and the use of problem-solving tools/analytical techniques
		2.3	Develop possible cause statements
		2.4	Determine fundamental cause
3	Determine corrective action	3.1	Consider all possible options for resolution of the problem
		3.2	Consider strengths and weaknesses of possible options

- | | | |
|---|------------------------------------|---|
| | 3.3 | Determine corrective action to remove the problem and possible future causes |
| | 3.4 | Develop implementation plans identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures |
| | 3.5 | Develop recommendations for ongoing monitoring and testing |
| 4 | Communicate recommendations | |
| | 4.1 | Prepare report on recommendations |
| | 4.2 | Present recommendations to appropriate personnel |
| | 4.3 | Follow up recommendations if required |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Problem-solving tools/ analytical techniques

Problem-solving tools/analytical techniques include one or more of:

- basic techniques:
 - 5 why's
 - brainstorming
 - 6 hats (Edward de Bono)
 - similarity/difference analysis
- visual techniques:
 - Ishikawa/fishbone diagrams
 - logic tree
 - histograms/Pareto analysis
 - scattergrams
- process-based tools:
 - flow charts
 - process logic/process requirements
 - cause and effect diagrams/charts
 - divide and conquer
 - control charts and run charts (Shewhart charts)
- business/interpersonal techniques:
 - force field analysis
 - strengths, weaknesses, opportunities, threats (SWOT) analysis
 - plan, do, check, act (PDCA)/define, measure, analyse, improve, control (DMAIC)
- other structured processes defined in organisation procedures, (e.g. TapRoot)

- Corrective actions** Corrective actions will include one or more of the following:
- consideration of at least two alternative solutions
 - benefit-cost analysis (at least semi-quantitative, need not be in \$ terms)
 - health, safety and environment (HSE) impacts and controls
 - risk assessment (HSE, business and project)
 - determination of the preferred solution or a priority ranked shortlist
- Implementation plans** Implementation plans to solve problems will include:
- specific, measurable, achievable, relevant, timed (SMART) objectives
 - resource requirements (people, finances, plant/equipment, materials/consumables, time, skills and knowledge)
 - methods for reaching objectives
 - timelines
 - methods of checking and adjusting adherence to plan (e.g. communication and follow-up)
- Problems** A ‘problem’ in this context should be interpreted as ‘an opportunity for improvement’, not just something causing faulty product, product faults or process irregularities/breakdowns and will include one or more of the following:
- intractable process difficulty
 - observed process waste/inefficiency (‘Muda’)
 - issue with materials/components
 - procedures/practices/process conditions which might be improved

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem solving tools

Links

Assessment Requirements for MSMSUP390 Use structured problem-solving tools

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem solving tools

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- identify at least one (1) problem
- analyse problem using at least one (1) analysis tool drawn from each of two (2) different groups of tools (basic, visual, process, business and organisation specific)
- select the preferred solution
- develop and use an implementation plan
- communicate effectively with other personnel.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant organisation procedures
- risks, risk assessment and controls relevant to problem being analysed
- targets and measures for output and quality
- types and application of problem-solving tools/analytical techniques
- relevant equipment and operational processes.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations
 - will typically include a supervisor/third-party report focusing on the significance of the problem being addressed. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - demonstration of skills
 - industry-based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSS403030 Improve cost factors in work practices

Modification History

Release 1. Supersedes and is equivalent to MSS403030A Improve cost factors in work practices

Application

This unit of competency covers the skills and knowledge required by an individual to evaluate the product or process outcomes of a team or work group in terms of their cost components and to be able to determine, in general terms, the cost impacts of alternative actions.

Typical decisions include the efficient organisation of own work and that of others in a work area or within a team/group and the improvement of throughput and cycle times.

Decisions are made within the scope of the authority of the individual and other employees in the area or team/group and according to procedures.

This unit primarily requires the application of skills associated with communication and information gathering, teamwork and problem solving to analyse the cost components of work processes. Initiative and enterprise, and planning and organising are also required to identify opportunities for improved cost-efficiency. This unit also requires a degree of self-management and learning to effectively operate and maintain skills and performance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Analyse cost components of work area or team function	1.1	Identify cost components in the product or process.
		1.2	Identify costs factors under control of area or employees in the team.
		1.3	Identify causes of variability in costs.
		1.4	Analyse impact of costs on production or process activities undertaken.
2	Improve cost-efficiency of processes and procedures	2.1	Identify methods of improving productivity and/or reducing costs within area or team's responsibility.
		2.2	Determine cost/benefit ratio of alternative methods of improving productivity and/or reducing costs.
		2.3	Consult with all relevant stakeholders regarding possible changes.
		2.4	Recommend changes which will increase productivity and reduce cost and variability.
		2.5	Implement recommended changes in consultation with relevant stakeholders.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional

contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Cost components include consideration of all of:

- fixed and variable costs, such as power/energy, materials and other inputs, plant and equipment, salary and wages, and office expenses (e.g. telephone)
- government taxes and charges.

Causes of variability in costs include one or more of:

- time-based variation
- fluctuations in variable costs related to different volumes of sales, production or operations
- fluctuations in fixed/overhead costs related to changes in the economy, financial markets and similar
- abnormal cost fluctuations due to poor design of product or process, poor scheduling, faults, breakdowns and other muda (waste).

Process includes consideration of all of:

- all functions that go to meet customer requirements
- all other required functions (e.g. regulatory related functions)
- design
- production
- maintenance
- logistics

- office processes.

**Procedures
(written, verbal,
visual, computer
based, etc.) include
one or any
combination of:**

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

**Benefits include all
of:**

- positive benefits
- negative benefits
- quality
- safety
- reliability
- similar issues which may be impacted by a cost saving.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS403030A Improve cost factors in work practices

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSS403030 Improve cost factors in work practices

Modification History

Release 1. Supersedes and is equivalent to MSS403030A Improve cost factors in work practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to improve cost factors on one (1) or more occasion and to:

- analyse cost components
- improve cost efficiency in an area related to own work
- express cost factors in specific terms, such as cost per item, per unit of time or other measures of output.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- cost components of products made
- costs concepts, such as expense/capital, income and benefit/cost ratios
- major cost contributors to product (e.g. energy, materials/other inputs, labour and distribution, and so on depending on the product and process)
- distinguish between internally and externally controlled costs
- distinguish between overhead/capital, expense, labour and other consumables.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
 - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
 - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real cost improvement activity in an operational workplace.

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSTLG3001 Make a prototype

Modification History

Release 1. Supersedes and is equivalent to LMTLG3001A Make a prototype

Application

This unit of competency covers the skills and knowledge to design processes leading to the making of a prototype for marketing purposes and must reflect fashion trends and the enterprise focus of manufacture.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within industry codes, standards and defined procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Leather production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs

- 1.4 Identify job requirements from customer requirements, specifications, drawings, job sheets or work instructions
- 2 **Design or modify existing model**
 - 2.1 Set up workstation in accordance with specifications and workplace procedures
 - 2.2 Design components to conform with model, using computer-aided design (CAD) or manual technique with reference to all relevant operations
 - 2.3 Select materials, trims and colours
 - 2.4 Produce models from appropriate materials to specifications
 - 2.5 Ensure ongoing liaison occurs with relevant departments in workplace to ensure workability and marketability of design and availability of materials and resources, including workforce skills
- 3 **Produce prototype**
 - 3.1 Modify or design existing model to translate design concept into 3-D
 - 3.2 Coordinate making of prototype using sample patterns, relevant designed components and all relevant manufacturing processes
- 4 **Test prototype**
 - 4.1 Liaise with other relevant departments in relation to practicality of design and cost of production, and predicted commercial success
 - 4.2 Review prototype with customer specifications and customer, as appropriate
 - 4.3 Make corrections, as necessary
 - 4.4 Make samples for marketing or testing
- 5 **Produce patterns**
 - 5.1 Create standard or master pattern from the mean form
 - 5.2 Dissect standard to produce all working patterns, making adjustments for enterprise procedures and materials used

to create patterns

- 5.3 Derive patterns from the master pattern allowing for adjustments, as required
- 5.4 Prepare and store documentation

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, industry codes and standards, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Leather products include one or more of the following:

- clothing
- bags
- accessories
- saddles and saddlery components

Australian Standards

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

include:**WHS practices**

WHS practices must include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- PPE
- safe materials handling
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- other WHS practices relevant to the job and enterprise

Assessment Requirements for MSTLG3001 Make a prototype

Modification History

Release 1. Supersedes and is equivalent to LMTLG3001A Make a prototype

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices, industry codes and standards
- planning and coordinating complicated designs, that consist of at least four (4) components, and prototype operations in line with specifications, customer requirements and work deadlines
- preparing equipment and work prior to commencing operations
- using computer-aided design (CAD) or manual techniques to design components to conform with model
- selecting appropriate materials
- liaising with other relevant departments to determine practicality of design, cost of production and predicted commercial success
- producing prototypes for at least two (2) different products, using appropriate manufacturing processes over the full range of operations
- reviewing prototype with customer specifications and customer
- making samples for marketing and testing and correcting, as necessary
- producing working patterns for at least two (2) different leather products.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- manufacturing focus of the enterprise
- manufacturing capacity, skill capacity, and tool or equipment base of workplace
- materials and properties and their reaction to manufacturing processes
- pattern design and prototype construction
- CAD and manual techniques used in the design phase
- quality standards and handling procedures
- work health and safety (WHS) and environmental aspects of relevant processes
- relevant federal and state or territory legislative or regulatory requirements
- recording and reporting procedures.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in making a prototype, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTTF2002 Cut, bend and shape metal

Modification History

Release 1. Supersedes and is equivalent to LMTTF2017A Cut, bend and shape metal

Application

This unit of competency covers the skills and knowledge required to cut prescribed lengths of metal bar stock and to bend the lengths into various shapes by hand or with the aid of formers.

Work may involve interaction with other people in the workplace, including supervisors and production personnel. Work may be conducted in a variety of environments, such as operational indoor or outdoor workplaces and hazardous or exposed conditions

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Textile fabrication

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

- requirements at all times
- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare for cutting, bending and shaping metal**
- 2.1 Read and interpret workplace procedures and instructions
 - 2.2 Establish safe working environment
 - 2.3 Obtain specifications of material to be used and shape to be formed
 - 2.4 Plan sequence of task operations and calculate required length of material
 - 2.5 Select appropriate section material to meet specification, and choose suitable length of material stock for cutting to minimise waste
 - 2.6 Move material to be cut to work area
 - 2.7 Prepare appropriate hand and power tools
- 3 **Prepare for cutting process**
- 3.1 Mark out cutting points on material and select appropriate cutting equipment
 - 3.2 Check area to ensure equipment doesn't become entangled or damaged during operation
 - 3.3 Secure material to prevent movement
- 4 **Cut material and informally check product**
- 4.1 Use safety equipment in accordance with WHS requirements when using cutting equipment
 - 4.2 Select and install appropriate consumables as to manufacturers requirements
 - 4.3 Set and operate equipment in accordance with accepted industry and WHS practices

- 4.4 Cut material to correct length and remove burrs or rough edges by brushing, grinding or filing
 - 4.5 Inspect cut sections to verify that their size and condition meets specifications and relevant workplace and industry quality standards
- 5 **Prepare for forming process**
 - 5.1 Plan sequence of forming operations and select appropriate forming equipment
 - 5.2 Check forming equipment for damage or operating defects
 - 5.3 Select and set appropriate formers
- 6 **Form material and informally check product**
 - 6.1 Place metal section in former and secure, as necessary
 - 6.2 Heat metal section to facilitate bending, as necessary
 - 6.3 Hot or cold bend the metal section around formers or hand form to required specification
 - 6.4 Descale or otherwise finish formed product after forming
 - 6.5 Inspect formed product to verify that it meets specifications and relevant workplace and industry quality standards
- 7 **Maintain work area and equipment**
 - 7.1 Clean work area and stow tools and electrical equipment away safely
 - 7.2 Comply with environmental regulations to reuse, recycle or dispose of materials as required
 - 7.3 Clean and maintain cutting and forming equipment in accordance with workplace requirements and manufacturer specifications
 - 7.4 Perform programmed maintenance which is within the operator's area of responsibility
 - 7.5 Inform supervisor of any abnormal conditions needing maintenance or repair

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Hand tools include one or more of the following:

- hammers
- punches
- vices
- clamps
- jigs
- formers
- hand drills
- hacksaws
- files
- tongs

- wire brushes plus gloves
- goggles and other safety equipment

Power tools include one or more of the following:

- power hacksaws
- portable electric drills
- portable sanders and wire brushes
- guillotine
- abrasive disk cutting equipment
- gas cutting equipment

WHS practices

WHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- PPE
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- environmental practices

Assessment Requirements for MSTTF2002 Cut, bend and shape metal

Modification History

Release 1. Supersedes and is equivalent to LMTTF2017A Cut, bend and shape metal

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- complying with all relevant safety requirements applicable to the safe use of cutting and bending equipment
- interpreting work orders
- interpreting equipment and materials specifications and instructions needed for the cutting and forming processes
- setting up cutting and forming equipment
- performing cutting process using at least three (3) different tools or equipment according to workplace procedures, on at least three (3) different products
- performing forming processes according to workplace procedures on at least three (3) products
- inspecting completed work to assess quality
- performing normal operator maintenance of work area to enable work to be conducted safely and efficiently
- documenting and communicating work related information including reporting faults and other problems
- applying workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- specific work health and safety (WHS) requirements associated with cutting and heating equipment
- common metals and basic sections used in fabrication work
- metal cutting processes
- metal grinding and dressing processes
- metal forming processes

- the range of cutting and forming equipment, hand tools and power tools used in cutting and forming processes and their appropriateness for particular applications
- power sources, such as single phase, three phase and weather-protected outlets
- operating principles of tools and equipment used in cutting, dressing and forming metals, including abrasive cutting wheels, gas equipment, grinding wheels, guillotines and power hacksaws
- hazards associated with powered machinery and gas equipment
- materials and equipment specifications
- environmental requirements of relevant industry and workplace procedures
- general housekeeping policies and procedures
- WHS practices, including hazard identification and control measures
- quality practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in cutting, bending and shaping metal, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTTF2012 Stitch by hand

Modification History

Release 1. Supersedes and is equivalent to LMTTF2012A Stitch by hand

Application

This unit of competency covers the skills and knowledge required to stitch canvas and sail products by hand.

The unit of competency applies to standard stitching of damaged seams, gussets, reinforcements, general repairs or modifications, and new work. Work may be conducted in a variety of environments, such as operational indoor or outdoor workplaces or on site.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Textile fabrication

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

- requirements at all times
- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare to stitch by hand**
- 2.1 Read and interpret workplace procedures and instructions and organise work to maximise safety and productivity
 - 2.2 Clear and clean work area and establish safe working environment
 - 2.3 Seek assistance to move and position work piece, if necessary
 - 2.4 Seek advice on appropriate thread to be used with regard to thread material, diameter of thread, tensile strength and colour
 - 2.5 Seek advice regarding appropriate needle to suit type of thread, type of stitch and material to be sewn
 - 2.6 Check condition of needle to ensure it is sharp, clean and free from rust and dirt
- 3 **Perform hand stitching**
- 3.1 Lay out material on working table or other suitable surface or support in situ in preparation for stitching process
 - 3.2 Choose appropriate type of stitch to suit the particular application
 - 3.3 Start stitching properly and perform hand stitching according to specifications
 - 3.4 Tie off last stitch, cut thread and inspect finished work to ensure it conforms to specification
- 4 **Check quality and finalise work**
- 4.1 Inspect completed work to verify that it meets job specifications and relevant workplace and industry quality standards

- 4.2 Identify and mark any areas in need of re-work or rectification, perform re-work or arrange appropriate action
- 4.3 Label or tag completed product and complete any necessary documentation in accordance with workplace procedures
- 4.4 Store needles and threads in a dry and safe place and dispose of worn or damaged needles in accordance with manufacturer recommendations and workplace procedures
- 4.5 Clean work area and place tools back in storage

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

WHS practices WHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- PPE
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- environmental practices

Assessment Requirements for MSTTF2012 Stitch by hand

Modification History

Release 1. Supersedes and is equivalent to LMTTF2012A Stitch by hand

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- complying with all relevant safety requirements, including safe use of needles and associated tools
- interpreting work orders
- interpreting standard specifications of needles, threads and materials used in the hand stitching process
- preparing and setting up material for hand stitching
- performing standard hand stitching processes on at least two (2) occasions
- inspecting completed work, checking quality and determining any rectification necessary
- performing normal operator maintenance of work area to enable work to be conducted safely and efficiently
- labelling or tagging work, and documenting and communicating work-related information, including reporting of faults and other problems, according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- hazards associated with hand stitching process
- standard hand stitching principles and techniques, including various types of stitches used
- the normal range of needles, threads and associated tools used in hand stitching and their appropriateness for particular applications
- materials specifications and material sewing characteristics
- quality standards applicable to hand stitching
- work health and safety (WHS) and environmental requirements of relevant industry and workplace procedures
- general housekeeping policies and procedures
- quality practices
- workplace procedures

- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in stitching by hand, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. MSTTF2015 Install products on and off site

Modification History

Release 1. Supersedes and is equivalent to LMTTF2016A Install products on and off site

Application

This unit of competency covers the skills and knowledge required to install canvas and sail products both on site and off site.

The unit of competency applies to the installation, operation and maintenance of canvas and sail products and equipment both on and off site. Work may be conducted in a variety of environments, such as operational indoor, outdoor workplaces or on site

Work may require independence, discretion, judgement and acceptance of responsibility for overall work outcomes. Work may involve planning and coordination of tasks and processes, interaction with other enterprise personnel, enterprise clients, manufacturer representatives and other external personnel.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Textile fabrication

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | |
|---|-------------------------------------|---|
| 1 | Determine job requirements | <p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, drawings, job sheets or work instructions</p> |
| 2 | Prepare for installation | <p>2.1 Read and interpret workplace procedures and instructions, including interpreting drawings and technical information to guide installation</p> <p>2.2 Plan task operation sequence, identify suitable electrical power outlets and equipment to work above ground, as required</p> <p>2.3 Arrange additional assistance, if required</p> <p>2.4 Select and prepare appropriate tools and prepare site</p> |
| 3 | Prepare to work above ground | <p>3.1 Select, secure and adequately support ladders or other devices, such as steps or bosun's chair, as required for the tasks</p> <p>3.2 Erect appropriate barriers and signs when working overhead</p> <p>3.3 Obtain assistance, as necessary, when working above the ground or deck</p> |
| 4 | Fit products | <p>4.1 Use appropriate marking tools and measuring equipment to mark out fitting positions</p> <p>4.2 Check products to be installed to ensure they meet specifications and are fit for their intended purpose</p> |

- 4.3 Use appropriate ladders or other devices to gain height advantage
 - 4.4 Sequence all operations according to specifications and workplace procedures ,as required, to complete a normal installation
 - 4.5 Apply appropriate WHS precautions and environmental practices during all phases of the installation
 - 4.6 Work in cooperation with other team members, as required, to fit products
- 5 **Inspect and check quality**
- 5.1 Inspect completed work to verify that the products and installation work meet job specifications and relevant workplace and industry quality standards
 - 5.2 Check that installation is correct, and that products fit and operate correctly
 - 5.3 Determine if any re-work or rectification is required, undertake re-work or take other appropriate action
- 6 **Provide customer information and finalise work**
- 6.1 Supply customer with information on how to use product, as required
 - 6.2 Demonstrate product to customer and answer questions within scope of own responsibility
 - 6.3 Clean work area, clean and return tools to safe storage, and perform normal basic maintenance, in accordance with workplace procedures
 - 6.4 Clean and stow away ladders, bosun's chair or other equipment
 - 6.5 Complete project documentation and obtain customer signature, if required

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Products include one or more of the following:

- blinds
- awnings
- annexes
- sails

Tools include one or more of the following:

- hand tools:
 - hammers
 - punches
 - hand drills
 - saws
 - hacksaws
 - rasps
 - wire brushes
 - pop-rivets
 - expanding bolts

- power tools:
- portable electric drills
- routers
- portable sanders
- abrasive disk cutting equipment
- electric punches

Normal installation includes one or more of the following

- using appropriate tools to drill and prepare locating holes
- safely lifting or lowering products into position
- using appropriate fastenings to attach or anchor product
- fitting pulleys or sheave blocks
- threading or attaching ropes or cables, as necessary
- fitting stays or other fastenings
- cleaning up work area after fitting

WHS practices

WHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- PPE
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- environmental practices

Assessment Requirements for MSTTF2015 Install products on and off site

Modification History

Release 1. Supersedes and is equivalent to LMTTF2016A Install products on and off site

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- complying with all relevant safety requirements, including safe use of ladders, bosun's chair, load hoisting equipment and electrical equipment
- interpreting work orders, drawings and installation instructions
- complying with product and equipment specifications during installation
- performing normal installation and setting of products and equipment on at least two (2) occasions
- using relevant hand and power tools safely
- inspecting and testing operation of installed products and equipment
- specifying any rectification necessary
- performing normal operator maintenance of work area to enable work to be conducted safely and efficiently
- communicating effectively with client on installation process and product operation
- demonstrating products to customer, answering questions, completing project documentation and obtaining customer signature, if required, according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- electrical and general workplace hazards and means of identifying them
- operating principles of products and associated equipment to be installed
- the range of hand tools, power tools, measuring devices and other equipment used in the installation process, and their operating principles and appropriateness for particular applications
- power sources, such as single phase, three phase and weather-protected outlets
- format of product and equipment specifications

- setting and adjustment principles and processes for products and equipment being installed
- typical problems of products and associated equipment and their rectification procedures
- relevant product quality standards for products and equipment installed
- work health and safety (WHS) and environmental requirements of relevant industry and workplace procedures, including use of equipment for working aloft
- general housekeeping policies and procedures
- mathematical processes used in the installation and checking processes
- WHS practices, including hazard identification and control measures
- quality practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in installing products on and off site, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTTF3002 Gain customer acceptance of service proposal

Modification History

Release 1. Supersedes and is equivalent to LMTTF3002A Gain customer acceptance of service proposal

Application

This unit of competency covers the skills and knowledge required to gain customer acceptance of a proposal to provide a product and service.

The unit of competency applies to establishing and documenting a proposal to meet customer requirements and obtaining agreement for work to proceed. Interaction with the customer is usually performed individually but may involve collaborative approach with other personnel from the operator's workplace.

Work may be conducted in a variety of environments, such as operational indoor, outdoor workplaces or on site.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Textile fabrication

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | |
|---|---------------------------------------|--|
| 1 | Develop customer proposal | 1.1 Review documentation to confirm all required information is available

1.2 Establish customer requirements and determine products, processes and service for customer

1.3 Identify alternatives and determine material and production costs

1.4 Calculate costs for proposed service

1.5 Assess timing, costs and service against customer requirements

1.6 Develop proposal and document for customer |
| 2 | Present proposal to customer | 2.1 Contact customer and present proposal in person, or by using digital technology or by other arranged means

2.2 Provide customer with detailed information regarding products, processes and alternative solutions, which could satisfy customer requirements

2.3 Discuss features and benefits of proposal with the customer |
| 3 | Seek customer acceptance | 3.1 Respond to any customer concerns, seek customer approval and acceptance, and confirm agreement

3.2 Identify any required changes to the proposal and modify proposal accordingly

3.3 Obtain customer acceptance |
| 4 | Confirm service to be provided | 4.1 Confirm customer address and contact details

4.2 Establish agreement with the customer and obtain signature |

- 4.3 Confirm time, product and service to be provided and arrange delivery
- 4.4 Provide duplicate of proposal and agreement to customer for future reference
- 4.5 Obtain deposit, where applicable, or arrange other payment from customer
- 4.6 Provide customer receipt and record form of payment

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures (SOPs)
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- work health and safety (WHS) practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Documentation includes one or more of the following:

- sketches, diagrams and maps
- dimensions and measurements
- documentation on customer requirements

Customer requirements include one or more of the following:

- types of materials
- types of products and equipment
- operating principles and mechanisms
- costs
- timelines
- colours
- size, dimensions and shape
- delivery and installation dates
- installation procedure to be followed

WHS practices WHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- personal protective equipment (PPE)
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- environmental practices

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMSTTF3002A Gain customer acceptance of service proposal

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTTF3002 Gain customer acceptance of service proposal

Modification History

Release 1. Supersedes and is equivalent to LMTTF3002A Gain customer acceptance of service proposal

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least three occasions and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- establishing customer requirements and determining products, processes and services for customer, on at least three (3) occasions
- calculating costs and identifying details of proposed products and services
- providing customer with detailed proposal in person, or electronically or other appropriate method
- answering customer queries to clarify or amend proposal if required
- developing written proposal for customer approval, incorporating all required details, including costs, products and services and timeframe
- establishing agreement with the customer and obtaining signature and deposit or arranging other payment
- completing required documentation for customer and own workplace according workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- workplace documentation and procedures for establishing agreements to provide services
- hazards associated with working at heights
- range of products and services offered by the enterprise
- principles of operating products and equipment
- types of materials and their applications
- limitations of canvas and other materials used
- types of strengthening and fastenings
- service life of different materials
- instruments and techniques for measuring

- mathematical processes
- mathematical formulas for area and volume
- labour rates and approximate costs of products and materials
- power sources such as single phase, three phase, and weather protected outlets
- work health and safety (WHS) and environmental requirements of relevant industry and workplace procedures
- general industry housekeeping policies and procedures
- WHS practices, including hazard identification and control measures
- quality practices
- workplace procedures
- practices for documenting agreements and recording and reporting provision of products and services.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in gaining customer acceptance of service proposal, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

PMBPROD336 Inspect heavy off-the-road tyres

Modification History

Release 1. Supersedes and is equivalent to PMBPROD336A Inspect heavy off-the-road tyres

Application

This unit of competency covers the skills and knowledge required to inspect heavy off-the-road tyres. It applies to tyres defined by AS 4457.2-2008 Earth-moving machinery - Off-the-road wheels, rims and tyres - Maintenance and repair - Tyres (or its replacement) or similar tyres.

This unit of competency applies to operators who are required to plan the work, complete paperwork, determine reparability of the tyre, communicate with customers and solve problems within area of responsibility.

This unit of competency applies to an operator demonstrating theoretical and technical knowledge and well developed skills in situations that require some discretion and judgement. The operator may work alone or as a member of a team or group and will work in liaison with other shift team members, team leader and supervisor, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Prepare for inspection**
 - 1.1 Complete initial documentation for tyre
 - 1.2 Raise all relevant paperwork as required
 - 1.3 Clean tyre ready for inspection
 - 1.4 Position tyre securely for inspection

- 2 **Inspect tyre**
 - 2.1 Identify injuries to tyre both internally and externally
 - 2.2 Investigate injuries for extent and nature
 - 2.3 Identify injuries/tyres which are irreparable
 - 2.4 Determine injuries which should be repaired
 - 2.5 Mark areas requiring repair
 - 2.6 Categorise injuries to standard
 - 2.7 Determine overall reparability of the tyre

- 3 **Finalise inspection**
 - 3.1 Complete any required internal paperwork
 - 3.2 Prepare customer quotation as required
 - 3.3 Communicate with customer in accordance with procedures
 - 3.4 Make arrangements for tyre to be repaired, scrapped or returned as required

- 4 **Anticipate and solve problems**
 - 4.1 Recognise a problem or a potential problem
 - 4.2 Determine problems needing priority action
 - 4.3 Refer problems outside area of responsibility to appropriate person, with possible causes
 - 4.4 Seek information and assistance as required to solve problems
 - 4.5 Solve problems within area of responsibility

- 4.6 Follow through items initiated until final resolution has occurred

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used.

Applicable legislation, regulations, standards and codes of practice include:

- health, safety and environmental (HSE) legislation, regulations and codes of practice relevant to the workplace, manual handling and hazardous materials
- AS 4457.2-2008 Earth-moving machinery - Off-the-road wheels, rims and tyres - Maintenance and repair – Tyres, or its replacement
- other Australian/international standards relevant to the materials being used and products being made
- any relevant licence and certification requirements.

All operations to which this unit applies are subject to stringent HSE requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and such requirements the legislative requirements take precedence.

Procedures All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or any combination of:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

Tools and equipment

Tools and equipment include:

- inspection equipment, including one or more of:
 - NDI scanning equipment
 - nail hole detector
 - high pressure tester
 - x-ray
 - ultrasound
- ancillary equipment that is integral to the process.

Additional tools and equipment will be selected as required from:

- hand tools used in this process
- power tools used in this process
- hoists/lifting equipment not requiring any special permits or licences
- manual handling aids, such as hand carts and trolleys
- relevant personal protective equipment (PPE).

Problems

Routine and non-routine problems must be resolved.

Non-routine problems must be resolved by applying operational knowledge to develop new solutions, either individually or in collaboration with relevant experts, to:

- determine problems needing action
- determine possible fault causes
- develop solutions to problems which do not have a known solution
- follow through items initiated until final resolution has occurred
- report problems outside area of responsibility to designated person.

Non-routine problems are unexpected problems or variations of previous problems and include one or more of:

- variations in quality
- emergency situations
- intermittent faults.

Operational knowledge includes one or more of:

- procedures
- training
- technical information, such as journals and engineering specifications
- remembered experience
- relevant knowledge obtained from appropriate people.

Routine problems are predictable and have known solutions and include one or more of:

- equipment malfunctions
- hidden damage
- broken chords
- cord body fabric damage
- variations in materials.

Unit Mapping Information

Assessment Requirements for PMBPROD336 Inspect heavy off-the-road tyres

Modification History

Release 1. Supersedes and is equivalent to PMBPROD336A Inspect heavy off-the-road tyres

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- read and interpret procedures, job specifications, material labels and safety data sheets (SDS)
- distinguish between:
 - injuries which do not need repair and should be returned to the customer to be used as is
 - injuries which should be repaired
 - injuries which are beyond repair and require tyre to be scrapped
- determine injuries to tyres, including:
 - cuts, abrasion, splits, cracks and crazing
 - separations within the structure
 - deformities both surface and internal
 - penetrations into and through the casing/carcass
 - hidden injuries
- plan the inspection process and sequence tasks
- select and set up inspection equipment and materials to meet specifications
- start up and operate the equipment
- maintain output and product quality using appropriate instruments, controls, test information and readings
- safely shut down equipment in normal and abnormal circumstances
- identify hazards and apply relevant hazard controls
- apply safety procedures
- apply housekeeping procedures
- apply waste management procedures
- recognise early warning signs of equipment/processes needing attention or with potential problems
- distinguish between causes of problems, including:
 - operational problems
 - instrument failure/malfunction
 - electrical failure/malfunction
 - mechanical failure/malfunction

- wrong readings
- equipment design deficiencies
- materials properties
- process variables
- raw material variations/contamination
- process abnormalities
- procedural errors
- recognise and prioritise problems requiring action
- resolve routine and non-routine problems
- communicate effectively with team/work group and supervisors
- complete workplace records
- do basic arithmetical manipulations, including additions, subtractions, divisions, fractions and percentages.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job sufficient to operate independently and to solve routine and non-routine problems, including knowledge of:

- function and operating principles of inspection equipment, machine components and ancillary equipment
- types and application of inspection methods/processes
- heavy off-the-road tyre construction
- radial and bias ply construction
- common injuries to heavy off-the-road tyres and their indicators
- common hidden injuries and their indicators, including
 - cuts
 - oxidation
 - separations
- types of injuries which do not need repairing, injuries which are repairable and injuries which either individually or in the sum should not be repaired
- methods of identifying lug/position identification
- impact of significantly faulty tyres falsely passing inspection
- factors which may affect inspection output or product quality and appropriate remedies
- routine and non-routine problems that may arise, the range of possible causes and appropriate actions
- organisation procedures relevant to the work environment/job role
- hierarchy of control
- hazards that may arise in the job/work environment and:
 - their possible causes
 - potential consequences
 - appropriate risk controls.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- In all plants it may be appropriate to assess this unit concurrently with units such as:
 - teamwork
 - communication.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operation of an operating plant
 - will typically include a supervisor/third-party report or other evidence, focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - must include the use of an appropriate industrial item of equipment requiring demonstration of operation, start and stop procedures and responding to problems
 - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from demonstration of skills and one or more of:
 - walk-throughs
 - pilot plant operation
 - industry-based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

- In addition the assessor or anyone acting in subject matter expert role in assessment shall demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they shall assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
 - relevant VET or other qualification/Statement of Attainment
 - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
 - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:
 - being currently employed undertaking the type of work being assessed
 - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
 - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
 - conducting on the job training/assessments of the type of work being assessed
 - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work.

RIICOM201D Communicate in the workplace

Modification History

Release	Comment
1	This unit replaces RIICOM201A Communicate in the workplace
2	Editorial corrections.
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to communicate in the workplace within the Resources and Infrastructure Industries. This unit is appropriate for those working in operational roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

1 Plan and prepare for workplace communication using equipment and systems	1.1 Access, interpret and apply communication site documentation and ensure the work activity is compliant 1.2 Identify and access communication equipment and system components 1.3 Establish and maintain communication with others 1.4 Access and apply communication equipment and systems safety procedures
2 Communicate using communication equipment and systems	2.1 Identify and select the most appropriate method of communication 2.2 Use communication equipment and systems 2.3 Acknowledge and respond to communication 2.4 Take, confirm and pass messages on promptly to the others 2.5 Pass communications in a clear and concise manner

	<p>2.6 Follow safety procedures, including the passing of reports and observance of local communications and emergency procedures</p> <p>2.7 Identify and report faults in communication equipment</p>
3 Carry out face-to-face routine communication	<p>3.1 Speak clearly and listen carefully to promote understanding</p> <p>3.2 Ask questions of the audience and confirm meaning of information</p> <p>3.3 Maintain communication processes with others to assist flow of work activities</p> <p>3.4 Use site approved signalling methods to convey information</p> <p>3.5 Participate in discussion to obtain information and clarify meaning</p> <p>3.6 Communicate cooperatively and effectively with others</p>
4 Complete written documentation	<p>4.1 Complete written documentation clearly, concisely and on time</p> <p>4.2 Use approved documents</p> <p>4.3 Pass on written information to others</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIICOM201A Communicate in the workplace

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIICOM201D Communicate in the workplace

Modification History

Release	Comment
1	This unit replaces RIICOM201A Communicate in the workplace
2	Editorial corrections.
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of communicating in the work place that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - identifying communication strategies and systems
 - operating communications systems and equipment to convey meaning to others
 - communicating clearly and promptly to others to convey information and make meaning
 - listening carefully to instructions and information
 - participating in group discussions and engage with group members respectfully
 - asking questions to clarify meaning
 - communicating concisely both written and verbally
 - interpreting other communications such as flags, lights, signs, bells and whistles
 - identifying and reporting communication faults and deficiencies
 - using approved and preparing written documentation that communicates meaning to others

Knowledge Evidence

The candidate must demonstrate knowledge of communicating in the workplace through:

- relevant standards and site procedures
- worksite communication system components, applications and limitations
- procedures and safety requirements of communication equipment and systems
- common faults in communication equipment/systems
- emergency communication procedures
- record maintenance

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment; and,
- simulation may be used for assessment of this Unit of Competency where it does not compromise the quality of assessment outcomes and provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills;
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal	1	1 Year

Mining, Extractive (Quarrying) and Civil Construction	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIHAN301D Operate elevating work platform

Modification History

Release	Comment
1	This unit replaces RIIHAN301B Operate elevating work platform
2	Editorial corrections; Amend reference to Licensing requirements in Unit Application
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to operate an elevating work platform in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories and Industry sectors. Relevant information must be sourced prior to application of the unit.

Elements and Performance Criteria

1. Plan and prepare for operating an elevating work platform	<p>1.1 Access, interpret and apply elevating work platforms documentation and ensure the work activity is compliant</p> <p>1.2 Obtain, read, interpret, clarify and confirm work requirements</p> <p>1.3 Select and wear personal protective equipment appropriate for work activities</p> <p>1.4 Identify and select any required tools and equipment, check for serviceability and rectify or report, verbally or in writing, any faults prior to commencement</p> <p>1.5 Perform pre-start and post-start inspections/checks</p> <p>1.6 Coordinate activities with others prior to commencement of, and during, the work activity</p>
--	--

	<p>1.7 Identify and address potential risks, hazards and environmental issues, and implement control measures</p> <p>1.8 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency</p>
2. Conduct work activities from elevating work platform	<p>2.1 Stabilise elevating work platform</p> <p>2.2 Place tools and equipment into bucket/platform</p> <p>2.3 Use approved safety devices, ensure safety of personnel and surrounding site</p> <p>2.4 Act on or report, verbally or in writing, monitoring systems and alarms</p> <p>2.5 Recognise and respond to hazardous and emergency situations</p> <p>2.6 Complete work and shut-down in accordance with agreed work plan</p>
3. Carry out operator maintenance	<p>3.1 Carry out work platform inspections and fault finding</p> <p>3.2 Carry out routine operational servicing, lubrication and housekeeping tasks in accordance with manufacturer's instructions and site authorised procedures and practices</p> <p>3.3 Carry out minor operator maintenance to manufacturer's instructions and site requirements</p> <p>3.4 Process written records</p>
4. Clean up	<p>4.1 Clear work area and reuse, recycle or dispose of materials</p> <p>4.2 Check, clean, maintain and store plant, tools and equipment</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIHAN301D Operate elevating work platform

Modification History

Release	Comment
1	This unit replaces RIIHAN301B Operate elevating work platform
2	Editorial corrections; Amend reference to Licensing requirements in Unit Application
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of operating elevating work platforms including:
 - selecting and using the required plant, tools and equipment
 - planning and preparing for operating elevating work platforms
 - identifying, addressing and/or reporting, verbally or in writing monitoring systems and alarms
 - identifying and following procedures in emergency or hazardous situations
 - applying hand-eye coordination
- works effectively with others to undertake and complete the operation of elevating work platforms that meet all of the required outcomes including:
 - using a range of communication techniques and equipment to coordinate activities with others
 - maintaining written and verbal reporting requirements and procedures
- demonstrates completion of operating elevating work platforms that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:

- stabilising elevating work platform
- selecting safety devices and correctly ensuring safety of personnel and surrounding site
- completing work platform inspections and fault finding
- completing operational servicing, lubrication and housekeeping tasks
- disposing of environmentally sensitive oils, fluids and materials

Knowledge Evidence

The candidate must demonstrate knowledge of the following when operating an elevating work platform:

- the appropriate National Certification Standards
- site and equipment safety requirements
- equipment characteristics, technical capabilities and limitations
- elevating work platform operational procedures
- basic geological and survey data related to elevating work platforms
- site environmental requirements and constraints related to elevating work platforms

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,

- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIQUA201D Maintain and monitor site quality standards

Modification History

Release	Comment
1	This unit replaces RIIQUA201A Maintain and monitor site quality standards
2	Editorial corrections
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to maintain and monitor site quality standards in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

No licensing or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

1 Plan, prepare for quality work outcomes	1.1 Access, interpret and apply quality standards and ensure the work activity is compliant 1.2 Identify and agree on performance indicators for own work 1.3 Plan and prepare for work to achieve quality standards 1.4 Complete work within time, quality, cost and productivity parameters
2 Apply quality systems to own work	2.1 Carry out work to meet quality standards 2.2 Adjust performance indicators to meet changing circumstances that affect quality standard requirements 2.3 Suggest procedure improvements to others for continuous improvement quality standards 2.4 Take corrective actions to improve work outcomes 2.5 Complete quality documentation

3 Monitor and report quality standards	<p>3.1 Monitor quality of outputs and identify non-compliance</p> <p>3.2 Prepare written records of quality outputs and report non-compliance</p> <p>3.3 Monitor work processes, report incidents apply local risk control processes to minimise quality non-compliance</p> <p>3.4 Communicate variation to quality outputs and standards to others</p>
--	---

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIIQUA201A Maintain and monitor site quality standards

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIQUA201D Maintain and monitor site quality standards

Modification History

Release	Comment
1	This unit replaces RIIQUA201A Maintain and monitor site quality standards
2	Editorial corrections
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant legislation, documentation, policies and procedures
- demonstrates completion of the monitoring and maintenance of site quality standards that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - organising work activities to comply with site quality standards
 - identifies and agrees on performance indicators
 - completes work within set parameters
 - recommends and communicates continuous improvements to quality standards
 - processes quality written documentation
 - monitors work processes, reports incidents and applies local risk processes

Knowledge Evidence

The candidate must demonstrate knowledge of maintaining and monitoring site quality standards through:

- accessing, interpreting and applying the organisation and site requirements and procedures
- work healthy and safety
- maintaining the standards for site/enterprise quality systems and processes

- performing work planning processes
- technical and operational capability and limitations of resources and workplace equipment being used
- applying reporting procedures

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector’s work environment;
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert	

	experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.
--	---

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIRIS201D Conduct local risk control

Modification History

Release	Comment
1	This unit replaces RIIRIS201B Conduct local risk control
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to conduct local risk control in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

1 Plan and prepare for risk control	1.1 Access, interpret and apply risk management documentation and ensure the work activity is compliant 1.2 Inspect work area conditions to identify potential hazards 1.3 Apply risk management procedures to deal with recognised hazards 1.4 Recognise the type and scope of unresolved hazards and their likely impact
2 Assess and identify unacceptable risk	2.1 Assess and determine consequence of an event 2.2 Consider and determine likelihood of the event 2.3 Identify criteria for the acceptability/unacceptability of the risk 2.4 Assess risk against criteria to identify if it warrants 'unacceptable risk' status and action 2.5 Effectively communicate and clarify the decision to others
3 Identify, assess and	3.1 Identify and consider all possible risk treatment options

implement risk treatments	<p>3.2 Identify options by preliminary analysis and consideration of options</p> <p>3.3 Analyse options, including resource requirements</p> <p>3.4 Select most appropriate and effective course of action</p> <p>3.5 Plan and prepare the course of action in detail and acquire/obtain required resources and approval</p> <p>3.6 Implement the approved risk treatment</p> <p>3.7 Review risk management processes</p>
4 Complete records and reports	<p>4.1 Effectively communicate accurate information to others on the course of action and implementation</p> <p>4.2 Complete written records and reports for hazards and actions from personal risk assessment</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIIRIS201B Conduct local risk control

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIRIS201D Conduct local risk control

Modification History

Release	Comment
1	This unit replaces RIIRIS201B Conduct local risk control
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locate and apply relevant documentation, policies and procedures
- works effectively with others to undertake and complete conducting of local risk control including:
 - communicating clearly and concisely with others to receive and clarify treatment information
 - communicating clearly and concisely the likelihood and consequence of an identified risk
- demonstrates completion of conducting local risk control that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - identifying 'unacceptable risk' using the acceptability/unacceptability criteria
 - working with others to determine risk controls
 - assessing and determining consequence and likelihood of potential risk
 - controlling risk by selecting and implementing most appropriate treatment
 - reporting written information about risk assessment and treatment implementation

Knowledge Evidence

The candidate must demonstrate knowledge in conducting local risk control through:

- accessing, interpreting and applying the organisation and site requirements and procedures for:

- organisation risk management policy, procedure requirements
- conducting worksite risk management procedures
- conducting and maintaining worksite communication, reporting and recording procedures
- identifying and assessing hazards, risks, acceptability of risks and controls
- reading, preparing and using worksite safety systems information

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive	3-6	3 Years

(Quarrying)		
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIRIS301D Apply risk management processes

Modification History

Release	Comment
1	This unit replaces RIIRIS301B Apply risk management processes.
2	Performance Evidence and Knowledge Evidence replaced with correct information.
3	Performance Evidence and Knowledge Evidence amended.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to apply risk management processes in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational or supervisory roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Elements and Performance Criteria

1. Plan and prepare for risk management	<p>1.1 Access, interpret and apply risk management documentation and ensure the work activity is compliant</p> <p>1.2 Inspect and analyse work area conditions regularly and systematically to identify potential hazards</p> <p>1.3 Access, interpret and apply existing procedures to control identified hazards</p> <p>1.4 Identify hazards not controlled by existing procedures</p> <p>1.5 Recognise the type and scope of unresolved hazards and their likely impact</p>
2. Assess and identify unacceptable risk	<p>2.1 Consider and determine the likelihood of an event</p> <p>2.2 Evaluate and determine the consequence of the event</p>

	<p>2.3 Consider and determine the risk level (likelihood and consequence combined)</p> <p>2.4 Identify or source the criteria for determining the acceptability/unacceptability of the risk</p> <p>2.5 Evaluate the risk and identify 'unacceptable risk' status</p>
3. Review risk management documentation	<p>3.1 Monitor and review working instructions</p> <p>3.2 Seek authority and approval to amend in writing the working instructions</p> <p>3.3 Seek authority and approval to action amendments to the working instructions</p>
4. Identify and recommend controls	<p>4.1 Identify the range of controls which may eliminate or minimise the risk</p> <p>4.2 Conduct a detailed analysis of feasible options including the identification of resource requirements</p> <p>4.3 Select the most appropriate control for dealing with the situation</p>
5. Contribute to the implementation of controls	<p>5.1 Write up the risk management plans selected control in detail, including resource requirements</p> <p>5.2 Gain authorisation for selected control</p> <p>5.3 Document and review controls for the job</p> <p>5.4 Apply procedures to control recognised hazards</p> <p>5.5 Communicate information on the control and its implementation</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIRIS301D Apply risk management processes

Modification History

Release	Comment
1	This unit replaces RIIRIS301B Apply risk management processes.
2	Performance Evidence and Knowledge Evidence replaced with correct information.
3	Performance Evidence and Knowledge Evidence amended.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- obtains and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of risk management processes including:
 - applying relevant operational information
 - applying common industrial terminology
- works effectively with others to undertake and complete the application of risk management processes that meets all the required outcomes, including:
 - complying with written and verbal reporting requirements and procedures
 - communicating clearly and concisely with others to receive and clarify work instructions
 - communicating clearly and concisely with others to coordinate work activities
 - engaging co-workers, employers and supervisors in the risk management processes
- demonstrates completion of the application of risk management processes that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - applying planning and organising skills to the risk management processes
 - identifying or sourcing criteria to determine unacceptable risk

- identifying and recognising type and scope of hazards and their impact
- assessing and determining the consequence, likelihood and level of potential risk
- identifying unacceptable risk using the acceptable/unacceptable criteria
- assessing options for appropriate controls and implementing accordingly
- identifying and obtaining required resources
- preparing and maintaining written records and report requirements
- reviewing risk management documentation
- identifying and recommending controls
- contributing to the implementation of controls

Knowledge Evidence

The candidate must demonstrate knowledge of the following when applying the risk management process:

- WHS legislation and regulations
- appropriate resources and infrastructure context and language
- topics or subject areas which are target for assessment and treatment
- site risk management systems and their application
- conventions and requirements for written communications including report writing
- problem solving techniques

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,

- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWHS201D Work safely and follow WHS policies and procedures

Modification History

Release	Comment
1	The unit replaces RIIOHS201A Work safely and follow OHS policies and procedures.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.
5	Editorial correction of a typo to Performance Evidence. No new content.

Application

This unit describes a participant's skills and knowledge required to work safely and follow WHS policies and procedures in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1. Access and apply site safety procedures	<p>1.1 Access, interpret and apply work health and safety procedures and ensure the work activity is compliant</p> <p>1.2 Carry out isolation of energy sources and immobilisation of potential energy sources</p>
--	--

	<p>1.3 Locate destinations by interpreting and applying site plans, transport rules and signage</p> <p>1.4 Identify, act on, and report breaches in site safety</p>
2. Apply personal safety measures	<p>2.1 Select and wear personal protective equipment</p> <p>2.2 Establish and maintain a clean and tidy safe working area</p> <p>2.3 Obtain permits and clearances before specialised work is carried out</p> <p>2.4 Apply safe manual handling procedures</p> <p>2.5 Identify and apply site procedures for conducting high-risk activities</p>
3. Apply operational safety measures	<p>3.1 Recognise and respond to alarms</p> <p>3.2 Identify and clarify responsibility in responding to emergency situations</p> <p>3.3 Apply basic fire fighting techniques</p> <p>3.4 Identify emergency escape route(s) and procedures</p>
4. Maintain personal wellbeing	<p>4.1 Identify risks to personal wellbeing and recognise preventative strategies</p> <p>4.2 Identify, act on, and report situations which may endanger others</p> <p>4.3 Access and explain verbally or in writing the requirements for fitness for duty</p> <p>4.4 Comply with all work health and safety policies including smoking, alcohol and drug use</p>
5. Identify and report incidents	<p>5.1 Recognise and communicate incident and injury statistics</p> <p>5.2 Report and prepare written records of incidents and injuries</p> <p>5.3 Contribute to and participate in incident investigations</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIWHS201D Work safely and follow WHS policies and procedures

Modification History

Release	Comment
1	The unit replaces RIIOHS201A Work safely and follow OHS policies and procedures.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.
5	Editorial correction of a typo to Performance Evidence. No new content.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of working safely and following WHS policies and procedures that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - sourcing, interpreting, clarifying and applying site safety information
 - listening carefully to health and safety instructions and information
 - responding to and clarifying information and directions
 - carrying out work instructions that complies with WHS policies and procedures
 - selecting, wearing and caring for personal protective equipment for all activities that require personal protective equipment
 - applying safe lifting and manual handling techniques
 - identify and report on WHS issues to appropriate personnel
 - recognising and following procedure to respond to alarms
 - completing workplace reporting procedures

Knowledge Evidence

The candidate must possess knowledge of work safely and follow WHS policies and procedures through:

- determining equipment safety requirements
- identifying personal protective equipment
- follows hazardous substances procedures and handling techniques
- location of safety data sheets (SDS) information and their application
- adhering to isolation procedures
- identifying lifting techniques, including for both manual and automated lifting
- locating and complying with WHS procedures
- application of site safety requirements and procedures
- participating in procedures for workplace management of others (e.g. consultation, safety representatives, committees, dispute resolution)
- determining potential of biological effects (e.g. circadian rhythms, sleep, alertness, fatigue, stress, effects of heat stress and hypothermia)
- details of site drug and alcohol policy
- locating and using emergency equipment

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,

- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWH204D Work safely at heights

Modification History

Release	Comments
1	This unit replaces RIIOHS204A Work safely at heights.
2	Formatting corrections.
3	Inserted Application information.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to work safety at heights in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles where they are required to perform work at heights.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1. Identify work requirements	<p>1.1 Access, interpret and apply height safety procedures and ensure the work activity is compliant</p> <p>1.2 Inspect site to determine layout and physical condition, condition of structures, prevailing weather conditions, equipment requirements and potential hazards</p>
-------------------------------	--

	<p>1.3 Adhere to WHS requirements</p> <p>1.4 Identify, select and check safety equipment for serviceability</p> <p>1.5 Identify, manage and report potential risks and hazards</p>
2. Identify work procedures and instructions	<p>2.1 Consult with authorised personnel to select materials, tools and equipment and check for serviceability</p> <p>2.2 Select, wear and care for personal protective equipment</p> <p>2.3 Inspect/install fall protection and perimeter protection equipment</p> <p>2.4 Identify approved methods of moving tools and equipment to work area and minimise potential hazards associated with tools at heights</p> <p>2.5 Ensure safety system has been installed correctly</p> <p>2.6 Select and install appropriate signs and barricades</p>
3. Access and install equipment	<p>3.1 Consult with authorised personnel to ensure anchor fall protection and associated equipment is correctly fitted and adjusted</p> <p>3.2 Ensure all required equipment is installed</p> <p>3.3 Use recommended methods to access work area for people, tools and equipment</p> <p>3.4 Locate tools and materials to eliminate or minimise the risk of items being knocked down</p>
4. Perform work at heights	<p>4.1 Check access from ground to work area and ensure it is safe</p> <p>4.2 Keep fall equipment in place and adjusted appropriately for movement during work</p> <p>4.3 Undertake manual handling of materials and equipment</p> <p>4.4 Locate materials and equipment ensuring that they are safely secured and distributed</p> <p>4.5 Check safety system periodically for compliance</p> <p>4.6 Monitor risk control measures to ensure that they are effective and appropriate</p> <p>4.7 Reassess risk control measures, as required, in accordance with changed work practices and/or site conditions and undertake alterations</p>
5. Clean up work area	<p>5.1 Consult with authorised personnel to ensure safety system is dismantled and removed</p> <p>5.2 Clear work area and dispose of or recycle materials</p> <p>5.3 Clean, check, maintain and store tools and equipment</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIWHS204D Work safely at heights

Modification History

Release	Comments
1	This unit replaces RIIOHS204A Work safely at heights.
2	Formatting corrections.
3	Inserted Application information.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of working safely at heights that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - accessing, interpreting and applying technical and safety information for working at heights
 - assessing hazards and risk associated with working at heights and implement control methods
 - selecting wearing and caring for personal protective equipment
 - identifying required safety systems including fall protection and associated equipment
 - checking that fitting, adjusting and anchoring of fall protection and associated equipment is correct
 - performing work safely at heights

Knowledge Evidence

The candidate must demonstrate knowledge of the following when working safely at heights:

- names and functions of equipment, components and materials

- complying with equipment manufacturer’s instructions and specifications
- safe shifting and handling of tools and materials
- adhering to statutory and regulatory authority requirements
- the nature of work undertaken at heights
- complying with heights safety systems
- the processes of providing for safe working practices
- using safety equipment/systems and considerations to facilitate working safely at heights
- complying with safe work methods

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector’s work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years

Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWHS301D Conduct safety and health investigations

Modification History

Release	Comment
1	The unit replaces RIIOHS301A Conduct safety and health investigations.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.
5	Editorial correction to Performance Evidence. No new content.

Application

This unit describes a participant's skills and knowledge required to conduct safety and health investigations in the Resources and Infrastructure Industries.

This unit is appropriate for those working in technical specialist roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1 Determine the objectives	<p>1.1 Access, interpret and apply safety and health investigation procedures and documentation and ensure the work activity is compliant</p> <p>1.2 Determine the scope of the investigation. Ensure pre- and post-incident timeframe is consistent with all requirements</p> <p>1.3 Determine the proposed investigation objectives from an</p>
----------------------------	---

	<p>analysis of the available information and factors</p> <p>1.4 Test the proposed objectives and clarify the scope of the investigation</p> <p>1.5 Ensure the final objectives and scope of the investigation will be achievable within available resources and authority constraints</p>
2 Gather information	<p>2.1 Maintain site security and integrity of evidence in accordance with all requirements</p> <p>2.2 Plan and prepare for the systematic collection of information</p> <p>2.3 Schedule information collection and completion to ensure minimum backtracking or repeat actions</p> <p>2.4 Ensure methods used to collect and examine information, including interviewing and recording, meet all requirements</p> <p>2.5 Collect, test and organise all appropriate information</p>
3 Evaluate information	<p>3.1 Assess and evaluate information for validity and reliability and organise as evidence to aid decision making</p> <p>3.2 Undertake further research where information is unclear or inadequate, and rectify</p> <p>3.3 Analyse the evidence to determine the cause(s) of the incident</p> <p>3.4 Draw conclusion(s) based on agreed standard</p> <p>3.5 Ensure the findings address the established factual objectives</p>
4 Identify courses of action	<p>4.1 Frame options for the courses of action</p> <p>4.2 Ensure options are provided in a form which meets the audience requirements, can be easily understood and enables the selection of the most appropriate course of action</p> <p>4.3 Ensure the course of action selected will resolve the issues and reduce the probability of recurrence</p> <p>4.4 Ensure the selected course of action can be implemented in accordance with all requirements</p>
5 Prepare and present investigation reports	<p>5.1 Prepare investigation reports</p> <p>5.2 Present written and graphical reports clearly and concisely in a format which can be readily understood</p> <p>5.3 Present the reports to the required audience</p> <p>5.4 Review the investigation process and pass recommendations for process changes and improvements to the appropriate authority</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIWHS301D Conduct safety and health investigations

Modification History

Release	Comment
1	The unit replaces RIIOHS301A Conduct safety and health investigations.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.
5	Editorial correction to Performance Evidence. No new content.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant legislation, documentation, policies and procedures
- demonstrates completion of conducting safety and health investigations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - determining objective and authority of the investigation
 - planning and organising activity to gather evidence
 - undertaking research to gather evidence
 - engaging others in the investigation process
 - questioning and actively listening to those involved in the investigation
 - correctly collecting and maintaining the integrity of evidence
 - identifying and/or confirming the linkages between factors and outcomes, causes and effects and direct/indirect causal relationships
 - drawing conclusions and identifying appropriate course of action to resolve issue
 - writing clearly, concisely and effectively report investigation outcomes and presenting the outcomes to others

Knowledge Evidence

The candidate must demonstrate knowledge of conducting safety and health investigations:

- topic or subject area which is the target for the investigation
- theory of safety and health investigative research and analysis
- symptoms and possible immediate effects of post-traumatic stress in an investigation situation
- appropriate Industry context
- site procedures and conventions related to safety and health investigations
- site risk management processes and their applications
- conventions and requirements for written communications, including report writing

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to receive and store retail stock. It requires the ability to check stock quality and quantity against order requirements; store or present stock correctly; and maintain cleanliness of stock-handling areas.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to frontline personnel who have limited autonomy and work under close supervision and guidance of others in frontline operational roles. However; in smaller retail businesses, senior personnel also undertake this function.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Inventory

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Maintain stock handling and storage

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Maintain cleanliness of stock handling and storage areas.
- 1.2.Ensure correct environmental conditions for storage of

- areas. perishable and other stock to prevent loss or damage as required.
- 1.3. Remove and dispose of waste to minimise safety risks and environmental impacts.
 - 1.4. Report hazards and potential hazards to relevant personnel to minimise safety risks.
2. Accept stock delivery.
 - 2.1. Check incoming stock quantities against order documentation.
 - 2.2. Inspect incoming stock quality, and accurately report quality issues or damage to relevant personnel.
 - 2.3. Record stock delivery, and report discrepancies with orders as required.
 - 2.4. Unpack and handle stock according to manufacturer instructions and safe manual handling techniques to avoid personal health risk and stock damage.
 - 2.5. Store or display stock promptly in designated location.
 3. Replenish stock levels.
 - 3.1. Rotate, replenish and present stock according to organisational requirements for stock levels.
 - 3.2. Record stock waste or shrinkage according to organisational procedures.
 - 3.3. Maintain optimal stock levels on retail shop floor.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

- Reading skills to:
- interpret:
 - plain English documents that outline organisational policies and procedures for stock control
 - basic order and delivery documentation and stock labels.
- Numeracy skills to:
- calculate stock levels.
- Planning and organising skills to:
- complete stock control activities in a logical and time efficient sequence.
- Technology skills to:
- use stock control technology to aid stock control processes.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow organisational policies and procedures, safe work practices and manufacturer instructions to perform each of the following stock control procedures:
 - receive and process incoming stock
 - store retail stock
 - maintain retail stock levels
 - maintain stock delivery records
- follow organisational stock control policies and procedures to process stock in each of the following situations:
 - stock quality is poor
 - stock quantity errors
 - incorrect stock is delivered
- maintain stock handling and storage areas, according to organisational policies and procedures, when completing the above stock control activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in the elements and performance criteria of this unit:

- principles of stock control procedures:
 - rotation and replenishment
 - product life cycle
- organisational stock control policies and procedures for:
 - receiving stock from suppliers
 - recording incoming stock
 - recording and reporting stock discrepancies and quality issues
 - recording stock waste and shrinkage
 - stock quality standards
 - unpacking, storage and display of stock
 - damaged or missing stock

- key features of retail products that relate to handling and storage:
 - handling techniques to minimise damage
 - general care
 - optimum storage conditions
 - features of damaged or spoiled stock
 - correct disposal methods
- safe manual handling techniques for moving and storing retail stock
- relevant legislation and standards relevant to receiving and storing retail stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure use of:

- manufacturer instructions for stock handling and storage
- organisational policies and procedures for stock handling and control
- retail stock display areas
- range of retail stock
- stock control documentation
 - delivery dockets
 - orders
 - reporting documentation
- stock receiving bay or area
- stock storage areas
- assessment activities that allow the individual to:
 - work within commercial speed, timing and productivity
 - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRINV002 Control stock

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to process stock orders, maintain stock levels, minimise stock losses, manage stocktakes and maintain all documents that relate to the administration of any type of stock.

This unit applies to individuals responsible for stock control. They work within organisational systems and procedures, but make decisions about stock administration and may have responsibility for others.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Inventory

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Monitor stock receipt and dispatch.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Implement organisational policies and procedures for receipt, dispatch and secure storage of stock.
- 1.2. Allocate tasks and monitor staff to ensure organisational procedures are followed, and documentation is completed

- correctly.
- 1.3. Confirm that stock quantity and quality inspections on receipt meet organisational standards.
 - 1.4. Act on variations to quantity and quality of delivered stock.
 - 1.5. Supervise safe stock handling and storage.
2. Maintain stock records.
 - 2.1. Monitor stock and maintain stock at required levels.
 - 2.2. Maintain, monitor and adjust stock reorder cycles as required.
 - 2.3. Provide clear information to team members about individual stock recording responsibilities.
 - 2.4. Maintain stock storage and movement records.
 - 2.5. Record and report stock discrepancies.
 - 2.6. Monitor stock performance and identify and report fast and slow-selling items.
3. Process and follow up orders.
 - 3.1. Process and raise stock orders according to organisational procedures.
 - 3.2. Monitor delivery of stock to ensure agreed deadlines and inventory requirements are met.
 - 3.3. Liaise with suppliers to ensure continuity of supply.
 - 3.4. Resolve routine supply problems or refer to appropriate personnel for action.
 - 3.5. Distribute stock within the organisation according to required allocations.
 - 3.6. Handle routine supply problems or refer to management as required by store policy.
4. Minimise stock losses.
 - 4.1. Regularly check storage of stock and ensure its protection.
 - 4.2. Identify, record and report stock losses.
 - 4.3. Identify avoidable losses and establish reasons for them.
 - 4.4. Recommend solutions and implement procedures to prevent future losses.
5. Coordinate stocktake or cyclical count.
 - 5.1. Explain procedures for stocktake and cyclical counts to team members.
 - 5.2. Allocate stocktaking tasks to individual team members ensuring effective use of staff resources to complete task.
 - 5.3. Provide team members with clear directions for performance of each task.
 - 5.4. Produce accurate reports for management on stocktake data, including discrepancies.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none">interpret supplier purchasing agreements, purchase orders, records of incoming stock and organisational policies and procedures for stock control.
Numeracy skills to:	<ul style="list-style-type: none">calculate:<ul style="list-style-type: none">supplier costs and complex order costscomplex details of stock on hand and stock losses and produce complex numerically-based reportsreconcile incoming stock and invoices against purchase orders.
Technology skills to:	<ul style="list-style-type: none">use business technology for inventory management.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRINV002 Control stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain and order stock across one stock cycle according to organisational procedures using all of the following stock processes:
 - receipt
 - dispatch
 - ordering
 - stock level monitoring
 - records maintenance
- produce three different stock control reports
- organise and coordinate one stocktake or cyclical count
- provide clear and correct information to team members involved in stock control processes.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - receipt and dispatch of goods, including inspection for quantity and quality
 - stock ordering and reordering
 - stock replenishment
 - stock rotation
 - reporting of stock discrepancies, damage and loss
 - safe transport, handling and storage of goods
 - stock control
 - stocktaking and cyclical counts
 - pricing, labelling and packaging
 - stock security
- key aspects of legislation and codes of practice relevant to stock control:
 - Australian Consumer Law
 - Work Health and Safety (WHS)

- manual handling
- licensing for mechanical movement of stock
- principles of stock control:
 - rotation and replenishment
 - product life cycle
- impact of business planning and sales forecasts on stock control
- types of stock control systems used in the sector
- reasons for stock loss and damage and methods to control these and protect stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation and codes of practice relevant to stock control as listed in Knowledge Evidence
- a computerised stock control system
- stock for use in stock control activities
- organisational policies and procedures for stock control
- team members; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRMER003 Coordinate visual merchandising activities

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to coordinate store visual merchandising activities and ensure adherence to organisational standards, policies and procedures for the display of merchandise.

It applies to individuals working in frontline roles in a diverse range of retail industry sectors and business contexts that display retail products for sale. They operate with independence and under limited supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Merchandising

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Coordinate visual merchandise requirements.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Access and interpret organisational visual merchandising guidelines, and policies and procedures.
- 1.2. Communicate visual merchandising standards and display

- requirements to team members.
- 1.3. Plan appropriate timing for producing and dismantling visual merchandise displays.
 - 1.4. Communicate roles and responsibilities for visual merchandising to team members.
 - 1.5. Plan and coordinate promotional and special event displays as directed by management.
2. Supervise visual merchandise activities.
 - 2.1. Supervise construction and maintenance of displays to achieve balance and visual impact.
 - 2.2. Ensure display information accurately depicts product or service being promoted.
 - 2.3. Ensure displays are completed with minimum disruption to customer service and traffic flow.
 - 2.4. Ensure displays meet organisational standards and visual merchandise guidelines.
 - 2.5. Regularly monitor replenishment of merchandise and rotation of stock and take action to ensure optimal stock levels as required.
 3. Review impact of visual merchandise activities.
 - 3.1. Evaluate promotions or special event displays and determine impact on sales results.
 - 3.2. Report on visual merchandising activities to relevant personnel and make suggestions for improvements as required.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Problem solving skills to: • overcome difficulties relevant to the display of merchandise.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRMER003 Coordinate visual merchandising activities

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow merchandising display guidelines, and organisational policies and procedures to coordinate visual merchandise activities for two of the following:
 - an existing merchandise range
 - a new merchandise range
 - a seasonal merchandise range
 - a promotional event
 - discounted merchandise
- for each of the above visual merchandising activities:
 - communicate requirements with team members
 - monitor visual merchandising displays and standards
- report on the effectiveness of the above merchandising activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - merchandise labelling and pricing
 - required stock levels
 - merchandise rotation and replenishment
- organisational visual merchandise standards and guidelines and their application to visual merchandising activities
- key aspects of relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
 - Australian Consumer Law
 - Work Health and Safety (WHS)
- objectives and use of visual merchandise displays
- interpretation of scaled versions of store design, layout and fixture placements
- techniques for creating effective visual merchandise displays:
 - types of displays and their impact

- display location
- display lighting
- display signage
- fundamental elements and principles of visual design and their use in the display and merchandise of products
- commercial impact of incorrect pricing both favourable and unfavourable:
 - customer complaints
 - profitability
- safe work practices for displaying merchandise with particular emphasis on:
 - safe use of equipment
 - safe manual handling techniques for bending, lifting and shifting heavy items
- product knowledge relevant to visual merchandise activities:
 - price
 - features
 - benefits.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- retail merchandise
- display areas
- retail display equipment and props
- product labels and price tickets
- ticketing and pricing equipment
- relevant documentation:
 - organisational visual merchandise display guidelines
 - organisational policies and procedures for:
 - merchandise labelling and pricing
 - required stock levels
 - merchandise rotation and replenishment
 - relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
 - Australian Consumer Law
 - Work Health and Safety (WHS)
- team members; these can be:
 - individuals in an industry workplace, or

- individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRRTF001 Balance and secure point-of-sale terminal

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to balance and reconcile a register or terminal in a retail environment, clear registers, count money, calculate non cash transactions, and reconcile and record takings.

It applies to individuals working in frontline operational roles in a diverse range retail industry sectors and business contexts. They operate with some independence under general supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Retail Financials

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Balance and secure takings.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Perform register or terminal balance at designated times.
- 1.2.Separate cash float from takings prior to balancing and secure takings.

- 1.3. Supply change to register or terminal and accurately record.
 - 1.4. Obtain and interpret register or terminal reading or print-out.
 - 1.5. Secure cash and non cash documents according to organisational procedures.
2. Reconcile takings.
- 2.1. Count cash accurately.
 - 2.2. Calculate non cash documents accurately.
 - 2.3. Determine balance between register or terminal reading and sum of cash and non cash transactions.
 - 2.4. Investigate or report discrepancies between register or terminal reading and sum of cash and non cash transactions to relevant personnel.
 - 2.5. Record takings and file records according to organisational procedures.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Links

Assessment Requirements for SIRRRTF001 Balance and secure point-of-sale terminal

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- consistently apply organisational policies and procedures to:
 - balance a register or terminal on three occasions with complete accuracy
 - reconcile three different sets of takings comprising both cash and non-cash with complete accuracy
 - identify and resolve three different types of balancing discrepancies
 - process three different types of takings according to organisational policies and procedures.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role and importance of the balancing process
- techniques for identifying and resolving discrepancies
- functions and procedures for operating point-of-sale equipment:
 - opening and closing
 - balancing
 - clearance of terminal and transference of tender
 - recording takings
 - consumables required by system
 - security
- cash handling procedures:
 - counting cash
 - handling cash floats
 - change required, denominations of change and tendering change
 - security
- organisational policies and procedures for non-cash transactions:
 - credit cards
 - EFTPOS

- vouchers
- organisational policies and procedures for:
 - exchanges
 - refunds
 - lay-by
 - cash handling
 - cash float
 - operation of point-of-sale equipment
 - register or terminal balance
 - security of cash and non cash transactions.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures related to point-of-sale
- point-of-sale equipment and consumables
- financial transaction documentation for non-cash sales
- cash
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Customer Engagement

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Engage customers.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Greet customers in a polite and friendly manner within designated response times and make them a priority over other workplace duties.

- 1.2. Clearly communicate with customers using appropriate verbal and non-verbal communication.
 - 1.3. Adapt communication style to appropriately communicate with customers from diverse backgrounds.
2. Assist customers.
 - 2.1. Identify and act on opportunities to assist customers and be available to assist customers when needed.
 - 2.2. Question and actively listen to customers to determine their needs.
 - 2.3. Resolve routine customer problems according to individual responsibility level and organisational policies and procedures.
 - 2.4. Address general customer enquiries and provide accurate information in a clear and courteous manner.
3. Contribute to a service culture.
 - 3.1. Act in line with organisational service standards to ensure quality customer service.
 - 3.2. Show interest in customer's needs and maintain a welcoming customer environment free of complacency.
 - 3.3. Seek assistance from relevant personnel when customer's needs are beyond scope of own responsibility.
 - 3.4. Identify and take opportunities to improve customer service standards.
 - 3.5. Refer customer service issues and feedback to relevant personnel for action.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXCEG001 Engage the customer

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- contribute to a customer service culture by providing customer service, in line with organisational service standards, across four different customer interactions
- for the above four customer interactions, individually or cumulatively involve:
 - customers from diverse backgrounds
 - resolution of two routine customer problems
 - provision of accurate information to address two general customer enquiries
 - referral of unresolved customer enquiry
 - use of effective communication techniques and positive body language.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational service standards and procedures for:
 - designated customer service response times
 - interacting with customers
 - solving routine customer problems
 - providing information to customers
- basic principles for achieving positive customer service
- verbal and non-verbal communication
- techniques for effective communication:
 - open and closed questioning
 - paraphrasing
 - effective listening
 - voice tonality and volume
- body language and its role in customer service
- effective communication strategies for interacting with customers of diverse backgrounds
- commercial impact of:
 - positive customer service
 - poor customer service

- organisational information and sources of information to assist customer with customer enquiries.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
 - organisational service standards and procedures for:
 - designated customer service response times
 - interacting with customers
 - solving routine customer problems
 - providing information to customers
- customers from a diverse range of backgrounds; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXICT001A Operate retail technology

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to operate a variety of retail equipment. It involves identifying the correct equipment required for a given task, maintaining retail equipment, applying keyboard skills and operating data entry equipment.

Application of the Unit

This unit applies to frontline service personnel who operate and maintain a range of retail equipment, including point-of-sale systems, keyboards and data entry equipment, according to manufacturer instructions, design specifications, store policy and designated timeframes. This work is undertaken with some supervision and guidance.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Maintain retail equipment.	1.1. Identify purpose of <i>equipment</i> used in store or department. 1.2. Operate equipment, according to design specifications and <i>safety requirements</i> . 1.3. Identify equipment faults and report to <i>relevant personnel</i> . 1.4. Identify and apply maintenance program for retail equipment according to <i>store policy and procedures</i> .
2. Apply keyboard skills.	2.1. Operate keyboard using typing techniques within designated speed and accuracy requirements. 2.2. Enter and edit information accurately.
3. Operate data entry equipment.	3.1. Enter data using relevant equipment, according to store policy and procedures. 3.2. Operate price marking equipment, according to manufacturer instructions and store policy. 3.3. Enter data accurately and within designated time limits.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- planning and organising skills to complete tasks in set timeframe
- problem solving skills to deal with different types of transactions
- literacy and numeracy skills to:
 - read store procedures for operating equipment
 - enter data
 - perform point-of-sale transactions
 - follow common fault-finding procedures

Required knowledge

- store policy and procedures in regard to:
 - the operation and maintenance of store retail equipment
 - reporting problems and faults
- relevant legislation and statutory requirements in regard to operating retail technology, including Work Health and Safety (WHS) requirements
- relevant industry codes of practice
- purpose and impact of using electronic technology
- licensing requirements for carrying and moving merchandise (if applicable)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- operates a range of store retail equipment according to store policy and procedures and industry codes of practice
- operates and maintains a range of store retail equipment according to manufacturer instructions and design specifications
- applies store maintenance program and reports faults and problems
- consistently applies safe working practices in the operation and maintenance of store retail equipment according to OHS legislation and codes of practice
- reads and interprets operation manuals to solve routine faults and errors and maintains and uses equipment effectively
- uses keyboard skills to enter and edit data accurately
- completes tasks in set timeframe.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - store policy and procedure manuals
 - manufacturer instructions and operation manuals
- a range of store retail equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Equipment may include:

- point-of-sale terminals
- electronic bar coding equipment for price labelling and stocktaking
- portable data entry
- printers
- EFTPOS terminals
- electronic ordering equipment
- wrapping and packing equipment
- equipment for carrying or moving merchandise
- equipment for storage of merchandise, including refrigerators
- weighing machines
- thermometers
- security tag systems
- trolley return equipment
- computers
- scanners
- numerical keyboard equipment, including calculators.
- hazard identification (e.g. workplace inspections)
- emergency, fire and accident procedures
- personal safety procedures
- stress management
- procedures for the use of personal protective clothing and equipment

Safety requirements may include:

- Relevant personnel** may include:
- reporting incidents and accidents in the workplace.
 - supervisor
 - team leader
 - manager.
- Store policy and procedures** in regard to:
- store administration
 - clerical systems
 - operating and maintaining retail equipment
 - Work Health and Safety (WHS).

SIRXMER201 Merchandise products

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXMER001A Merchandise products.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to merchandise products within a retail store. It involves the consistent application of store policies and procedures in regard to displaying, merchandising, ticketing, labelling, pricing and storing stock. It also includes the application of correct manual handling, storage and display techniques according to stock characteristics, industry codes of practice, and relevant legislation.

Application of the Unit

This unit applies to frontline retail personnel.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Place and arrange merchandise.	<p>1.1.Unpack <i>merchandise</i> according to <i>store policy and procedures</i> and <i>legislative requirements</i>.</p> <p>1.2.Place merchandise on floor, fixtures and shelves in determined locations according to work health and safety (WHS) legislative requirements.</p> <p>1.3.<i>Display</i> merchandise to achieve a balanced, fully-stocked appearance and promote sales.</p> <p>1.4.Identify damaged, soiled or out-of-date stock and take corrective action as required according to store procedures.</p> <p>1.5.Place stock range in line with fixtures, ticketing, prices and bar codes.</p> <p>1.6.Rotate stock according to stock requirements and store procedure.</p> <p>1.7.Ensure stock presentation conforms to special <i>handling techniques</i> and other <i>safety requirements</i>.</p>
2. Prepare and apply labels and tickets.	<p>2.1.Prepare <i>labels and tickets</i> for window, wall or floor displays according to store policy.</p> <p>2.2.Prepare tickets using electronic equipment or neatly by hand according to design specifications and store procedures.</p> <p>2.3.Identify soiled, damaged, illegible or incorrect labels and tickets and take corrective action according to store procedures.</p> <p>2.4.Use, maintain and store electronic ticketing and labelling equipment according to manufacturer's instructions and store procedures.</p> <p>2.5.Place labels and tickets visibly and correctly on merchandise.</p> <p>2.6.Replace labels and tickets according to store policy.</p>
3. Maintain displays.	<p>3.1.Reset or dismantle unsuitable or out-of-date displays and <i>special promotion areas</i> as directed.</p> <p>3.2.Assist supervisor in selection of merchandise for display.</p> <p>3.3.Arrange and face up merchandise as directed and according to layout specifications and load-bearing capacity of fixtures.</p> <p>3.4.Maintain correct pricing and information on merchandise according to store procedures, industry codes of practice and</p>

- legislative requirements.
- 3.5. Identify optimum stock levels and replenish stock according to store policy.
- 3.6. Remove excess packaging and maintain display areas in a clean and tidy condition.
- 4. Protect merchandise.
 - 4.1. Identify and apply correct handling, storage and display techniques according to stock characteristics and legislative requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy and numeracy skills to:
 - prepare machine or manual labels and tickets
 - read and interpret store procedures and guidelines
 - read and interpret manufacturer instructions
- self-management skills to complete tasks in a set timeframe
- technology skills to operate and maintain manual and electronic labelling and ticketing equipment

Required knowledge

- store policies and procedures in regard to:
 - availability and use of display materials
 - correct storage of stock
 - correct storage procedures for labelling and ticketing equipment and materials
 - location of display areas
 - merchandise range
 - merchandising, ticketing and pricing of stock
 - scheduling for building or rotating displays
 - stock replenishment
 - stock rotation
 - store promotional themes, including advertising, catalogues and special offers
- correct manual handling techniques for protection of self and merchandise
- principles of display
- elements and principles of design and trends in retail design
- relevant WHS regulations, including:
 - manual handling
 - hygiene and sanitation

- hazardous substances
- labelling of workplace substances
- relevant legislation and statutory requirements relating to merchandising product
- pricing procedures, including inclusion and exclusion of GST
- relevant industry codes of practice relating to merchandising product

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies store policies and procedures and legislative requirements in regard to displaying, merchandising, ticketing, pricing and storing stock
- displays merchandise on floor, fixtures, shelves and display areas, in determined locations, according to special manual handling techniques and other safety requirements
- prepares display labels and price tickets for merchandise with regard to store policies and procedures
- operates, maintains and stores a range of ticketing equipment according to:
 - store policy and procedures
 - industry codes of practice
 - manufacturer instructions and design specifications
- identifies damaged, soiled or out-of-date stock and takes corrective action as required by store procedures and legislative requirements
- maintains display areas and replenishes stock as required according to store procedures and legislative requirements
- performs correct manual handling, storage and display techniques.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- a range of ticketing and pricing equipment
- merchandise for display
- display materials and props

- cleaning materials
- relevant documentation, such as:
 - store policy and procedure manuals on housekeeping, merchandising and WHS
 - manufacturer instructions and operation manuals for electronic ticketing equipment
 - relevant legislation and industry codes of practice.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXSLS201 Sell products and services
- SIRXSLS002A Advise on products and services.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Merchandise may be characterised by:

- type
- brand
- size
- customer needs
- colour
- price.

Store policy and procedures in regard to:

- merchandising of stock
- preparing and displaying labels and tickets
- maintaining displays.

Legislative

- pricing requirements, including GST requirements

- requirements** may include:
- industry codes of practice
 - discounted items
 - Australian Consumer law.
- Display** may include:
- setting new displays
 - maintaining existing displays.
- Handling techniques** may vary according to:
- stock characteristics
 - store policy
 - legislative requirements
 - industry codes of practice.
- Safety requirements** may relate to:
- transport, storage and handling of goods
 - hazardous substances
 - labelling of workplace substances.
- Preparation of **labels and tickets** may involve:
- pricing gun
 - shelf tickets
 - shelf talkers
 - written labels
 - swing ticketing
 - bar coding
 - price boards
 - header boards.
- Special promotion areas** may be:
- permanent or temporary
 - interior or exterior
 - publicly accessible
 - windows
 - shelves
 - wall fixtures
 - on floor.

SIRXRSK001A Minimise theft

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to minimise theft in a retail environment. It involves applying routine store security, taking appropriate action to minimise theft and maintaining security of cash, registers or terminals and keys.

Application of the Unit

Application of the unit

This unit applies to frontline service personnel. It requires the team member to apply store policy and procedures and industry codes of practice in regard to store security and theft prevention, reporting theft or suspicious behaviour to relevant personnel and monitoring stock, work areas, customers and staff to minimise opportunities for theft.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Apply routine store security.	<p>1.1 Apply store <i>security systems and procedures</i> according to store policy.</p> <p>1.2 Handle and secure cash according to <i>store policy and procedures</i>.</p> <p>1.3 Observe and deal with suspect behaviour by <i>customers</i> according to store policy and <i>legislative requirements</i>.</p> <p>1.4 Deal with internal and external theft according to store policy and legislative requirements.</p> <p>1.5 Store products and equipment in a secure manner.</p>
2 Minimise theft.	<p>2.1 Take appropriate action to minimise theft by applying store procedures and legislative requirements.</p> <p>2.2 Match merchandise to correct price tags.</p> <p>2.3 Maintain surveillance of merchandise according to store policy and <i>legislative requirements</i>.</p>

ELEMENT

PERFORMANCE CRITERIA

- 2.4 Check customers' bags as required at point of sale according to store policy and legislative requirements.
- 2.5 Maintain security of cash, cash register and keys according to store policy.
- 2.6 Maintain security of stock, cash and equipment in regard to customers, *staff* and outside contractors according to store policy and legislative requirements.
- 2.7 Deal with suspected or potential thieves according to store policy and procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- literacy and numeracy skills in:
 - recording of stolen items
 - reporting of theft.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - security
 - checking customers' bags and purchases
 - reporting problems and faults
- relevant legislation and statutory requirements, particularly in regard to checking customers' bags and purchases
- Trade Practices and Fair Trading Acts
- store merchandising system
- security procedures relating to cash and non-cash transactions
- location and operation of store security equipment
- reporting procedures for internal and external theft or suspicious circumstances.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures and legislative requirements, including industry codes of practice in regard to store security and theft prevention in a range of contexts and situations
- consistently applies store policy and procedures in regard to following security procedures and for reporting theft or suspicious behaviour to relevant personnel
- monitors stock, work area, customers and staff to minimise opportunities for theft.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - legislation and statutory regulations
 - industry codes of practice
 - Trade Practices and Fair Trading Acts
- relevant security equipment
- point-of-sale equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a simulated work environment
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge

EVIDENCE GUIDE

- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS001A Apply point-of-sale handling procedures
- SIRXCCS002A Interact with customers
- SIRXINV001A Perform stock control procedures
- SIRXFIN001A Balance point-of-sale terminal.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Security systems and procedures may deal with:

- customers
- staff
- keys
- visitors, sales representatives, contractors and vendors
- stock
- records

RANGE STATEMENT

- cash, credit cards
- equipment, including:
 - alarm systems
 - video surveillance
 - mirrors
 - security tags
- locked and secure areas
- premises
- armed hold-up.

Store policy and procedures may relate to:

- security
- surveillance of merchandise
- reporting problems and faults.

Customers may include:

- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Legislative requirements may include:

- privacy and confidentiality laws
- Trade Practices and Fair Trading Acts
- consumer law
- awards and agreements
- property offences
- credit laws
- reporting procedures
- criminal law.

Staff may include:

- management
- other staff members
- full-time, part-time and casual staff
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Monitor and maintain store security.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Implement organisational policies and procedures to ensure store security is maintained.
- 1.2. Monitor and review security procedures continually and act on opportunities to improve store security.
- 1.3. Maintain security of merchandise, cash, points of sale and

- keys.
- 1.4.Ensure store security equipment is used and in correct working order.
- 1.5.Report matters impacting store security to relevant personnel.
- 1.6.Document breaches of security as required.
- 2. Facilitate security awareness.
 - 2.1.Inform team members of organisational policies and procedures for security.
 - 2.2.Provide team members with feedback on their implementation or non-implementation of security procedures.
 - 2.3.Provide team members with ongoing supervision and training to facilitate security awareness.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXRSK002 Maintain store security

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain store security over three different work shifts by:
 - monitoring adherence to organisational security policies and procedures
 - responding to two occurrences of non-adherence to security policies and procedures
 - communicating security policies and procedures to one team member
 - ensuring security equipment is utilised and in correct working order
 - reporting on opportunities for improved store security.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - use of security equipment
 - suspicious customer behaviour
 - suspicious team member behaviour
 - armed robbery
 - cash and non-cash security
 - merchandise security
 - theft
 - responding to security breaches
 - reporting security risks and breaches
 - surveillance of merchandise
 - personal security
 - general store security
 - team members' security training
 - security for opening and closing premises
 - reporting problems and faults
 - security of visitors, sales representatives, contractors and vendors
 - security risks likely to endanger customers or team members

- legislation as relevant to store security and own level of responsibility:
 - privacy laws
 - Australian Consumer Law
 - reporting procedures
- impacts of security breaches on individuals and organisation:
 - emotional distress
 - financial loss
 - commercial impacts
- common security risks within the retail workplace and techniques to:
 - identify risk
 - minimise risk
- types of store alarms and security systems used in industry.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant equipment:
 - alarm systems
 - surveillance equipment
 - point-of-sale equipment
 - communication equipment
- relevant documentation:
 - current plain English regulatory documents distributed by government regulators legislation as relevant to store security and own level of responsibility as listed in Knowledge Evidence
 - organisational policies and procedures as listed in the Knowledge Evidence
- customers and team members; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Elements describe the essential outcomes.

1. Follow point of sale work systems.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Open and close point-of-sale terminal at designated times and according to organisational procedures.
- 1.2.Clear point-of-sale terminal and transfer cash.
- 1.3.Handle cash according to organisational policies and

- procedures.
- 1.4.Maintain supplies of change at agreed levels in point-of-sale terminal to agreed levels.
 - 1.5.Maintain adequate supplies of consumables.
2. Process point-of-sale transactions.
 - 2.1.Identify transaction type and required procedure to be followed.
 - 2.2.Correctly interpret sale price information.
 - 2.3.Make accurate calculations for pricing and collection of payment.
 - 2.4.Enter accurate sale information into point-of-sale equipment.
 - 2.5.Confirm price to customer and check customer payment against sale value.
 - 2.6.Provide correct change for cash payments.
 - 2.7.Identify transaction errors, follow procedures for resolution and complete accurate records.
 3. Complete sales.
 - 3.1.Generate and complete documentation associated with the sale.
 - 3.2.Confirm and process any purchase follow up activities.
 - 3.3.Acknowledge and thank customer in line with organisational policy.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Numeracy skills to:	<ul style="list-style-type: none"> • interpret numerical information from various sources and calculate accurately with or without the use of a calculator. • measure or estimate quantities to calculate costs. • calculate percentage discounts.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXSLS002 Follow point-of-sale procedures

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow procedures for set up, maintenance and close of point-of-sale area/terminal on three different occasions
- perform three point-of-sale transactions for each of the following:
 - cash sales
 - non-cash sales
- perform three point-of-sale transactions for each of the following:
 - refunds
 - exchanges
- make six accurate financial calculations relating to product pricing that individually or cumulatively involve:
 - multiple products
 - products of varying prices
 - products with percentage discounts
- follow procedures to complete four sales that require post purchase activity.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - exchanges
 - refunds
 - lay-by
- basic key aspects of legislation that impact point-of-sale activities:
 - Australian Consumer Law
- features of products sold by the organisation
- functions and procedures for operating point-of-sale equipment:
 - opening and closing
 - clearance of terminal and transference of tender

- recording takings
- consumables required by system
- security
- cash handling procedures:
 - counting cash
 - handling cash floats
 - change required, denominations of change and tendering change
 - security
- procedures for non-cash transactions:
 - credit cards
 - EFTPOS
 - vouchers
- types of purchase follow up activities and associated organisational policies and procedures:
 - placing of orders
 - delivery
 - issuing of invoices
 - issuing of receipts
 - wrapping and packing.

Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures for point-of-sale activities
- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation that impact point-of-sale activities as listed in the Knowledge Evidence
- point-of-sale equipment and consumables
- financial transaction documentation for non-cash sales
- cash
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXWHS003 Maintain workplace safety

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to ensure organisational policies and procedures and legislative requirements are adhered to in the workplace by monitoring and coordinating workplace health and safety practices.

It applies to individuals working in frontline management roles in a diverse range of industry sectors and business contexts. They operate independently with some responsibility for others and decision making, and within established organisational policies and procedures.

This unit incorporates the requirement, under state and territory Work Health and Safety (WHS) legislation, for businesses to take a systematic approach to managing the safety of their workers and anyone else in the workplace.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

SIRXWHS002 Contribute to workplace health and safety

Competency Field

Work Health and Safety

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--|---|
| 1. Facilitate team awareness of work health and safety. | 1.1. Communicate relevant work health and safety legislation, and organisational policies and procedures to team members.
1.2. Make all current work health and safety information readily accessible to staff.
1.3. Demonstrate adherence to work health and safety to reinforce information.
1.4. Regularly provide team members with information on identified hazards and risk control procedures |
| 2. Involve team members in work health and safety matters. | 2.1. Provide opportunities for team members to consult and contribute to work health and safety issues and practices.
2.2. Resolve issues raised by team members promptly or refer to relevant personnel. |
| 3. Maintain a safe work environment. | 3.1. Monitor team adherence to work health and safety requirements, and arrange work health and safety training as required.
3.2. Implement organisational policies and procedures for identifying, preventing and reporting potential hazards.
3.3. Take prompt action to address non-compliance with procedures and safe work practices.
3.4. Investigate unsafe or hazardous events, identify causes, and report inadequacies in risk control measures or resource allocation for risk control to relevant personnel. |
| 4. Maintain work health and safety records. | 4.1. Complete and maintain work health and safety records according to organisational policies and procedures and legislative requirements.
4.2. Use information from records to identify hazards and monitor risk control procedures.
4.3. Provide feedback to relevant personnel on workplace health and safety and areas for improvement. |

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> • interpret unfamiliar and complex materials describing regulatory requirements for work health and safety management and organisational policies and procedures.
Writing skills to:	<ul style="list-style-type: none"> • report on work health and safety practices, including recommendations for change and complete accurate records for

- Oral communication skills to:
- regulatory compliance.
 - conduct sometimes complex work health and safety consultation activities
 - explain all work health and safety procedures and information on safe work practices.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXWHS003 Maintain workplace safety

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- implement and monitor adherence to workplace health and safety requirements across three different work periods by:
 - identifying non-compliance and tasking appropriate action
 - providing feedback to team members relevant to work health and safety
 - coordinating a work health and safety consultative processes
 - monitor the effectiveness of the work health and safety procedures:
 - required adjustments
 - team member training needs
 - demonstrating correct procedure for applying work health and safety to a work activity
- follow organisational policies and procedures to conduct a work health and safety investigation of one unsafe situation or hazardous event
- complete all required documentation and reporting for the above work health and safety situation or event.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - manual handling and safe lifting
 - emergency procedures including fire, flood and cyclone
 - unsafe or hazardous goods
 - handling and storage
 - waste disposal
 - bomb threat procedures
 - store evacuation
 - accidents, sickness and injury
 - dangerous customers
 - recall and contamination
- relevant Work Health and Safety (WHS) legislation and codes of practice

- hierarchy of risk control
- use of personal protective equipment
- location of nearest first aid assistant or facility
- manual handling and safe lifting techniques
- possible fire and safety hazards
- communication techniques to clearly communicate work health and safety information
- reporting procedures for incidents and hazards
- use of safety alarms, fire extinguishers and emergency exits.

Assessment Conditions

Skills must be demonstrated in:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant work health and safety equipment
- relevant documentation:
 - Work Health and Safety (WHS) legislation
 - organisational policies and procedures for work health and safety
 - incident reporting forms
 - WHS records
- team members; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one's own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations,

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise instruction and demonstration	1.1 Gather information about learner characteristics and learning needs 1.2 Confirm a safe learning environment 1.3 Gather and check instruction, demonstration objectives, and seek assistance if required 1.4 Access and review relevant learning resources and learning

ELEMENT	PERFORMANCE CRITERIA
	<p>materials for suitability and relevance, and seek assistance to interpret the contextual application</p> <p>1.5 Organise access to necessary equipment or physical resources required for instruction and demonstration</p> <p>1.6 Notify learners of details regarding the implementation of the learning program and/or delivery plan</p>
2. Conduct instruction and demonstration	<p>2.1 Use interpersonal skills with learners to establish a safe and comfortable learning environment</p> <p>2.2 Follow the learning program and/or delivery plan to cover all learning objectives</p> <p>2.3 Brief learners on any workplace health and safety (WHS) procedures and requirements prior to, and during, training</p> <p>2.4 Use delivery techniques to structure, pace and enhance learning</p> <p>2.5 Apply coaching techniques to assist learning</p> <p>2.6 Use communication skills to provide information, instruct learners and demonstrate relevant work skills</p> <p>2.7 Provide opportunities for practice during instruction and through work activities</p> <p>2.8 Provide and discuss feedback on learner performance to support learning</p>
3. Check training performance	<p>3.1 Use measures to ensure learners are acquiring, and can use, new technical and generic skills and knowledge</p> <p>3.2 Monitor learner progress and outcomes in consultation with the learner</p> <p>3.3 Review relationship between the trainer/coach and the learner, and adjust to suit learner needs</p>
4. Review personal training performance	<p>4.1 Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement</p> <p>4.2 Maintain, store and secure learner records, according to organisational and legal requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.1	<ul style="list-style-type: none"> Reflects on practice to improve
Reading	1.1, 1.3, 1.4, 2.2	<ul style="list-style-type: none"> Sources and interprets processes and procedures, learning resources and information relevant to providing a work instruction and delivery
Writing	1.4, 1.6, 2.3, 2.6, 2.8, 3.2, 4.1, 4.2	<ul style="list-style-type: none"> Accurately maintains learner records and documentation appropriate to the learning context and audience
Oral Communication	1.1, 1.6, 2.3, 2.4, 2.6	<ul style="list-style-type: none"> Uses appropriate communication strategies to engage, build rapport, provide instruction, monitor progress and provide feedback to individuals or groups
Interact with others	1.2, 1.3, 2.1, 2.5, 2.8, 3.2	<ul style="list-style-type: none"> Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes Asks questions in order to clarify understanding, and to provide and seek feedback Builds rapport to establish effective working relationships and to achieve effective outcomes
Get the work done	1.1-1.6, 2.1-2.8, 3.1-3.3, 4.1, 4.2	<ul style="list-style-type: none"> Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches

Assessment Requirements for TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
 - different learning objectives
 - a range of delivery techniques and effective communication skills appropriate to the audience.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
 - roles and responsibilities of key personnel
 - responsibilities of learners
 - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
 - risk controls for the specific learning environment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL404 Mentor in the workplace

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to establish and develop a professional mentoring relationship with an individual in a workplace.

It applies to workplace supervisors or other work colleagues who work under limited supervision and who have responsibility for mentoring one or more individuals in the workplace. This may include, but is not limited to, those who mentor an apprentice or trainee employed by, or undertaking a work placement within, an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop a mentoring plan	1.1 Identify scope and boundaries of the mentoring relationship according to organisational procedures 1.2 Document mentoring plan in accordance with organisational requirements 1.3 Establish ground rules and negotiate realistic expectations 1.4 Establish and maintain confidentiality of the relationship in

ELEMENT	PERFORMANCE CRITERIA
	accordance with legislation, policy and procedures
2. Facilitate mentoring relationship	<p>2.1 Develop learner's confidence, self-esteem, respect and trust in the mentoring relationship</p> <p>2.2 Share personal experiences and knowledge with the person being mentored according to agreed objectives</p> <p>2.3 Support the person being mentored to develop and use skills in problem solving and decision making</p> <p>2.4 Use personal and professional networks to assist the person being mentored</p> <p>2.5 Provide information, and guidance to enhance engagement in the workplace</p> <p>2.6 Use techniques for resolving differences without damaging the relationship, and obtain assistance according to organisational policy and procedures</p>
3. Monitor mentoring relationship	<p>3.1 Provide planning assistance and guidance as requested by the person being mentored in a form and style to suit their requirements</p> <p>3.2 Provide feedback to the person being mentored on progress towards achieving the expectations and goals of the mentoring process</p> <p>3.3 Recognise and discuss changes in the mentoring relationship with appropriate stakeholders</p> <p>3.4 Negotiate and manage closure of the mentoring arrangement once objectives have been met</p>
4. Evaluate effectiveness of mentoring	<p>4.1 Establish and discuss benefits gained from the mentoring process</p> <p>4.2 Reflect on and articulate the personal benefits gained from providing mentoring</p> <p>4.3 Identify and report the outcomes of the mentoring arrangement and the benefits to the organisation according to organisational policy and procedures to improve the mentoring system or program</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4	<ul style="list-style-type: none"> Sources and interprets texts relevant to mentoring context, including organisational policies and learner information
Writing	1.1, 1.3, 2.5, 3.1, 3.2, 4.3	<ul style="list-style-type: none"> Develops content and documents information relevant to mentoring plan
Oral Communication	2.4, 3.3, 4.1, 4.2, 4.3	<ul style="list-style-type: none"> Uses appropriate communication techniques to build rapport, trust, engagement and provide guidance and feedback
Navigate the world of work	1.1, 1.4, 2.6, 4.3	<ul style="list-style-type: none"> Follows legislative requirements, organisational protocols, policies and procedures in workplace mentoring
Interact with others	1.2, 2.1-2.3, 2.5, 2.6, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> Builds rapport using collaboration with others to achieve joint outcomes and effective interaction Provides mentoring and role modelling to achieve agreed outcomes Cooperates and consults with others to clarify understanding and seek feedback
Get the work done	1.1-1.4, 2.1-2.6, 3.1-3.4, 4.1-4.3	<ul style="list-style-type: none"> Plans, organises and completes work according to defined requirements taking responsibility for decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to problems, considering options for different approaches

Assessment Requirements for TAEDEL404 Mentor in the workplace

Modification History

Release	Comments
Release1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, including:

- preparing a mentoring plan between the mentor and mentee that sets out clear objectives for a mentoring relationship that will last at least one year
- facilitating at least three mentoring sessions
- documenting information on sessions, including comments and notes from both mentor and mentee.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring, including training contracts and responsibilities of employer, registered training organisation (RTO) and funding body where they exist
- mentoring methodologies and strategies
- learning theories in relation to mentoring
- strategies for working with a mentee including encouraging self reflection, confidence and the building of rapport
- acceptable behaviour in the mentoring relationship
- equal employment opportunity, equity and diversity principles
- how a mentor can support the mentee's employer to meet its WHS obligations for the mentee.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to:

- documentation of any existing training plan or contract if applicable to the mentoring relationship.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TLIA2012 Pick and process orders

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to pick and process orders in accordance with relevant codes, regulations and workplace requirements within the transport and logistics industry.

It includes identifying workplace order picking processes, policies and procedures; picking and despatching orders; and recording stock levels.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify workplace order picking processes, policies

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|-----|--|
| 1.1 | Workplace procedures for order picking and related workplace documentation are interpreted |
| 1.2 | Stock allocation and location systems are identified and |

and procedures	located	
		1.3 Appropriate manual handling equipment is selected in accordance with work health and safety (WHS)/occupational health and safety (OHS) regulations and workplace procedures
2 Pick and despatch an order	2.1	Work requirements are planned and appropriate equipment and documentation is assembled
	2.2	Warehouse zones where required products are stored, are identified and located
	2.3	Pick path is established
	2.4	Appropriate pallet/s for orders are selected and stacked to minimise stock damage and to maximise stability, as required
	2.5	Products are selected and consolidated
	2.6	Products/pallets are located in despatch areas
	2.7	Products are assembled to meet workplace schedules
	2.8	Orders are consolidated, secured, arranged and placed in storage zones in accordance with schedules
3 Record stock levels	3.1	Storage areas are checked and stocks are noted for replenishment in accordance with workplace procedures
	3.2	Workplace records are completed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2012A Pick and process orders.

Assessment Requirements for TLIA2012 Pick and process orders

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist when picking and processing orders
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when picking and processing orders
- completing documentation related to picking and processing orders
- estimating the size, shape and special requirements of goods/loads
- identifying relevant stock and goods coding and labelling, including Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) markings
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading, interpreting, and following instructions, procedures, signs and labels relevant to picking and processing orders
- selecting and using relevant equipment and communications technology when picking and processing orders
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- documentation and record requirements when picking and processing an order
- equipment used during picking and processing operations and the precautions and procedures to be followed in its use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for picking and processing orders
- problems that may occur when picking and processing an order and appropriate action that can be taken to resolve these problems
- regulations relevant to picking and processing orders, including relevant bond, quarantine or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for picking and processing orders.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
-

- communicating and working effectively with others when receiving goods
- completing documentation related to receiving goods
- estimating the size, shape and special requirements of goods and loads
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) markings and where applicable, emergency information panels
- implementing contingency plans when receiving goods
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading, interpreting and following instructions, procedures, information, labels and signs relevant to receiving goods
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant load handling equipment when receiving goods
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to receiving goods including the ADG Code and relevant bond, quarantine or other legislative requirements
- documentation requirements for receiving goods
- focus of operation of work systems, equipment, management and site operating systems for receiving goods
- housekeeping standards and procedures
- problems that may occur when receiving goods and appropriate action that can be taken to resolve these problems
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- specifications and standards for checking and inspecting received goods
- workplace procedures and policies for receiving goods.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIA2020 Replenish stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to replenish stock in accordance with workplace requirements as part of work activities undertaken within the transport and logistics industry.

It includes applying product knowledge to participate in stock rotation activities, interpreting and filling replenishment requests, and completing all required stock replenishment tasks.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Participate in stock rotation activities

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Stock levels are counted against appropriate documentation

1.2 Stock levels are recorded and reported

1.3 Stocks are replenished, adjusted or rotated in accordance with

workplace procedures

- 1.4 Stock re-ordering processes are activated when appropriate
- 1.5 Routine and non-routine problems with products or storage systems are reported in accordance with workplace procedures

2 Interpret and fill replenishment request

- 2.1 Order request documentation is interpreted
- 2.2 Product/s in order are noted and workplace location/s are identified
- 2.3 Workplace and product knowledge is used to plan sequence of work
- 2.4 Appropriate materials handling equipment is selected in accordance with workplace procedures and timeframes, and work health and safety (WHS)/occupational health and safety (OHS) regulations
- 2.5 Required schedules for order movement and despatch or storage are identified

3 Complete stock replenishment

- 3.1 Products are sorted, assembled and consolidated in the appropriate storage areas
- 3.2 Work is checked in accordance with company procedures
- 3.3 Documentation and records are completed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2020A Replenish stock.

Assessment Requirements for TLIA2020 Replenish stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and working effectively with others when replenishing stock
- completing documentation related to replenishing stock
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in stock and equipment in accordance with standard operating procedures
- reading, interpreting and following instructions, procedures and labels relevant to replenishing stock
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant communications, computing and office equipment when replenishing stock
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian codes and regulations relevant to replenishing stock
- computer records and documentation requirements for replenishing stock
- focus of operation of work systems, equipment, management and site operating systems for replenishing stock
- housekeeping standards and procedures

- principles of operation and functions of stock control systems
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for replenishing stock.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIA3039 Receive and store stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to receive and store stock for a workplace store in an enterprise/organisation in a transport, logistics, production, hospitality, retail or other relevant industry sector, in compliance with relevant codes of practice, regulations and workplace procedures.

Work must be carried out for receiving and storing stock in a workplace store. It specifically covers taking delivery of stock, storing, rotating and maintaining stock received, and completing documentation.

Work is performed under general supervision, with some accountability and responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Take delivery of stock

- 1.1 Incoming stock is accurately checked against orders and delivery documentation in accordance with workplace procedures
- 1.2 Variations are accurately identified, recorded and communicated to appropriate person
- 1.3 Items are inspected for damage, quality, use-by dates, breakages and discrepancies, and records are made in accordance with workplace policy

2 Store stock

- 2.1 Hazards are identified, risks are assessed and control measures are implemented
- 2.2 Stock is promptly and safely transported to appropriate storage area without damage
- 2.3 Stock is stored in appropriate location within area and in accordance with workplace security procedures
- 2.4 Appropriate personal protective equipment is correctly used during receipt and storage operations
- 2.5 Stock levels are accurately recorded in accordance with workplace procedures
- 2.6 Stock is labelled in accordance with workplace procedures

3 Rotate and maintain stock

- 3.1 Stock is rotated as required in accordance with workplace policy
- 3.2 Stock is moved using appropriate equipment in accordance with work health and safety (WHS)/occupational health and safety (OHS) requirements, relevant regulations and workplace procedures
- 3.3 Quality of stock is checked and reported
- 3.4 Appropriate action is taken where stock quality is identified as outside specified standards
- 3.5 Stock is placed in storage or disposed of in accordance with workplace policy

4 Complete documentation

- 4.1 Required documentation procedures and processes are confirmed
- 4.2 Records and documentation are completed legibly and proofread
- 4.3 Records and documentation are processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA3039A Receive and store stock.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIA3039 Receive and store stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading and interpreting relevant instructions, procedures and labels
- selecting and using relevant communications and computing equipment
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- contacts and sources of information and documentation needed when receiving and storing stock
- customer service policies and procedures
- interpretation of workplace specifications and orders for supplies
- principles of stock control
- problems that may occur when receiving and storing stock and appropriate action that can be taken to resolve these problems
- procedures for operating electronic communications equipment
- protocols and procedures for liaising with supplier representatives, drivers and colleagues using appropriate technology

- purpose and procedures for using relevant personal protective equipment
- relevant codes of practice and legislative requirements (for example dangerous goods regulations, health and hygiene regulations)
- relevant WHS/OHS and environmental procedures and regulations
- safe lifting and handling procedures
- site layout
- stock control documentation and systems used in workplace stores
- stock security systems
- systems for completing relevant records and documentation.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIA4005 Check and evaluate records and documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to check and evaluate records and documentation in accordance with regulatory and workplace requirements, as part of work activities within the transport and logistics industry.

It includes checking documentation, and analysing and evaluating records.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Check documentation

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Documentation regulatory and workplace requirements are confirmed

1.2 Documentation is checked to ensure compliance with

regulatory and workplace requirements

- 1.2 Documentation is checked regularly and personnel responsible for documentation are advised of deadlines
- 1.3 Appropriate systems are used to ensure maintenance of records complies with regulatory and workplace requirements

2 Analyse and evaluate records

- 2.1 Records are analysed to identify unexpected deviations from plans or possible future problems with plant and/or equipment
- 2.2 Advice is provided to appropriate personnel when problems are identified
- 2.3 Security of records and documentation is maintained at all times and access is granted to authorised personnel in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA4005A Check and evaluate records and documentation.

Assessment Requirements for TLIA4005 Check and evaluate records and documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others when checking and evaluating transport documentation
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) markings, and emergency information panels
- identifying, selecting and using relevant equipment, processes and procedures when checking and evaluating documentation for local and/or international transport of cargo and containers
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- reading and interpreting relevant instructions, procedures and labels
- receiving, acknowledging and sending messages with available communications equipment
- reporting and/or rectifying identified problems, faults or malfunctions, in accordance with regulatory requirements and workplace procedures
- working collaboratively with others when checking and evaluating transport documentation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international standards, codes and regulations relevant to local and international cargo/container transport documentation requirements, including the ADG and IMDG Codes
- cargo marking and numbering systems
- operational work systems, equipment, management and site operating systems for checking and evaluating cargo/container transport documentation
- problems that may occur when checking and evaluating documentation, and appropriate action that can be taken to resolve these problems
- relevant bond, quarantine or other legislative requirements
- site layout, loading/unloading plans and sequence sheets
- types of cargo, containers and transport modes and their documentation requirements
- workplace procedures and policies for checking and evaluating documentation for local and/or international transport of cargo and containers.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIA5058 Manage facility and inventory requirements

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to manage a facility and its inventory requirements, in various contexts within the transport and logistics industry.

It includes identifying space, safety and security requirements; developing a documentation system; designing storage zones and evaluating facility utilisation.

This unit generally applies to those who provide leadership of others individually or in teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify space requirements

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Organisational medium-term and long-term storage needs are assessed to facilitate planning, in accordance with the enterprise business plan and legislative requirements

- 1.2 Product type, picking frequencies, value, fragility, weight, handling characteristics, quantity and holding periods are assessed to consider type and amount of storage
 - 1.3 Facility is assessed to determine stock holding and handling requirements for each inventory item
 - 1.4 Volume requirements are calculated to ensure ongoing stock holding needs are met
 - 1.5 Total space requirement is calculated and used to formulate a space utilisation plan
- 2 Identify safety and security requirements**
- 2.1 Assessment is made of risks to ensure maximum safety and security for personnel, stock and facilities
 - 2.2 Storage handling security and incident/emergency procedures for each class or type of product are identified and documented
 - 2.3 Fire prevention and firefighting systems are identified in accordance with building code regulations and storage material requirements
 - 2.4 Evacuation plan is developed in accordance with the enterprise safety program
- 3 Develop and implement documentation system**
- 3.1 System for recording and tracing stock location, receipt, throughput and despatch is developed and implemented to enable reporting, quality assurance and financial requirements to be met
 - 3.2 System for recording communication with carriers, customers and employees is developed and implemented to assess operational effectiveness and to provide data for system improvement
- 4 Design storage zones**
- 4.1 Space requirements and equipment operation are accurately assessed to facilitate warehouse zone planning
 - 4.2 Assessment is made of the facility to enable the most effective use of available space
 - 4.3 Positioning of storage areas, bays, work stations and the like is undertaken in accordance with planning process data
 - 4.4 Provision for maintenance and cleaning is catered for
- 5 Evaluate facility**
- 5.1 Continual system of review is used involving regular checks to ensure storage areas and systems are functioning at

utilisation

optimum levels

- 5.2 Receiving and despatching systems are assessed to ensure they provide efficient operations
- 5.3 Storage and handling systems are assessed to ensure they provide ease of access and comply with ergonomic principles
- 5.4 Product handling and storage process are assessed to ensure minimisation of product damage, contamination and stock losses
- 5.5 Flexibility of facility layout to meet changing storage and handling requirements is maintained
- 5.6 Appropriate reporting systems are established and used to capture and maintain data to design improved facilities and systems

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA5058A Manage facility and inventory requirements.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIA5058 Manage facility and inventory requirements

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when managing facility and inventory requirements
- developing and implementing contingency plans
- prioritising work and coordinating the work of others
- providing leadership to others when managing facilities and inventory requirements
- reading and interpreting plans, diagrams, regulations, codes of practice and other documentation relevant to managing facilities and inventory requirements
- reporting and/or rectifying identified problems promptly
- selecting and applying appropriate technology, information systems and procedures when managing facility and inventory requirements.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- emergency procedures
- enterprise business policies and plans including procedures for facility operations
- operational warehouse systems, resources, management and workplace operating systems
- principles, purpose and location of controls, monitoring devices and systems
- procedures for managing and controlling hazardous situations when carrying out work activities, particularly those that relate to storing materials

- procedures for operating electronic communications equipment
- relevant sections of national and state/territory regulatory requirements and codes of practice, including applicable facility fire safety and building regulations
- requirements for completing relevant documentation
- selection and appropriate application of technology, information systems and procedures
- throughput and storage requirements for specific types of inventory.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift loads safely using manual handling methods. Work must be carried out in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning the manual handling and movement of loads.

It includes assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Assess risks associated with

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Products, goods or materials to be relocated are identified and assessed to determine appropriate relocation method

relocating load

- 1.2 Storage locations are determined and potential routes to be followed are identified
- 1.3 Effect of load relocation on original load base is predicted
- 1.4 Points of balance are estimated
- 1.5 Required clearances are compared to available space and adjustments are made to moving loads to reflect required clearance
- 1.6 Effects of moving contents, which may be loose, liquid, dangerous or hazardous, are considered
- 1.7 Risks in potential routes are considered
- 1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods
- 1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified
- 1.10 Team lifting processes are considered when moving loads
- 1.11 Appropriate personal protective equipment is determined
- 1.12 Size to weight ratio of items to be manually handled are identified

2 Plan load relocation

- 2.1 Relocation of the load is planned, consistent with the code of practice for manual handling and in accordance with the risk assessment
- 2.2 Process for relocating load is proposed including predicting and planning for potential difficulties
- 2.3 Proposed process is checked for compliance with code of practice and workplace procedures

3 Relocate load

- 3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and WHS/OHS requirements
- 3.2 Applications appropriate for team relocation of load are identified
- 3.3 Team lifting tasks are coordinated
- 3.4 Planned process and route are followed

- 3.5 Relocated materials are set down without damage to goods, personnel or equipment and are checked for stability
- 3.6 Relocation is checked to see it meets work requirements and variance/s are reported

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID1001A Shift materials safely using manual handling methods.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- applying relevant legislation and workplace procedures
- communicating effectively with others when manually lifting and handling materials and goods
- implementing contingency plans when manually lifting and handling, materials and goods
- interpreting and following operational instructions and prioritising work
- interpreting manual handling risks
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in loads and materials in accordance with standard operating procedures
- reading and interpreting instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using correct manual handling practices
- working collaboratively with others when manually lifting and handling materials and goods
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards and procedures
- relevant WHS/OHS procedures and guidelines concerning the manual lifting and movement of loads
- risks when manually lifting and handling materials and goods, and related precautions to control the risk, including:
- controlled actions on a movement during lifting
- distance over which load is to be shifted
- frequency of shifting operations
- load on the spine during lifting
- postures and positions during lifting
- rotation and side movement of the spine during lifting
- time allowed for shifting the load
- type, weight and position of the load
- work layout
- site layout and obstacles
- workplace procedures and policies for manual handling.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice

and operation manuals.

TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload goods and cargo in accordance with relevant state/territory roads and traffic authority regulations/permit requirements.

It includes loading and unloading goods and cargo, securing and protecting a load and completing all required documentation.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Load and unload goods/cargo**
 - 1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading workplace procedures
 - 1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
 - 1.3 Dangerous or hazardous goods are identified and handled in accordance with the current Australian Dangerous Goods (ADG) Code and other relevant regulations/permit requirements
 - 1.4 Load is packed/unpacked to make safe and effective use of available spaces
 - 1.5 Goods/cargo are loaded in accordance with relevant mass and loading regulations and workplace procedures
 - 1.6 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
 - 1.7 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
 - 1.8 Goods requiring special handling and/or documentation are identified and workplace procedures are followed
 - 1.9 Relocated material is restacked appropriate for transport method, safe height, weight loading, size and crushability of goods
- 2 Secure and protect load**
 - 2.1 Load distribution is checked to ensure it is even, legal and within safe working capacity
 - 2.2 Load is checked to ensure dangerous goods and hazardous substances are appropriately segregated in accordance with current ADG Code
 - 2.3 Load is secured using correct load restraint and protection equipment for different loads, carrying and storage conditions
 - 2.4 Load is protected in accordance with legal and workplace safety requirements
- 3 Complete**
 - 3.1 Load is inspected and checked for security to travel, in accordance with relevant regulations/permit requirements

documentation

and current ADG Code, as required

- 3.2 All required goods documentation is completed in accordance with workplace requirements including current ADG Code, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2004A Load and unload goods/cargo.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying required action to minimise, control or eliminate identified hazards
- completing relevant documentation
- estimating load size, shape and special requirements and taking appropriate action
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels, and taking appropriate action
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in cargo and equipment in accordance with operating procedures
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures, information, signs and labels
- applying relevant legislation and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- chain of responsibility workplace procedures
- housekeeping workplace procedures
- national load restraint guidelines
- problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve these problems
- relevant Australian and international regulations and codes of practice for handling and transporting dangerous goods and hazardous substances
- relevant Australian Standards and regulations including state/territory mass and loading regulations
- risks when loading and unloading goods/cargo and related precautions to control risk
- safe work methods for securing load
- security awareness requirements when loading and unloading vehicles and in particular recognising, isolating and reporting suspicious cargo and goods
- site layout and obstacles
- WHS/OHS procedures and guidelines concerning the lifting and movement of loads
- workplace procedures and policies for loading and unloading goods/cargo.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, national Load Restraint Guide (LRG), codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in

industry.

TLID2013 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to move materials mechanically using automated equipment such as automatic guided vehicles, tow motors, low level order pickers, conveyor systems and mechanised pallet movers.

It includes selecting appropriate mechanical moving equipment, moving materials/goods in accordance with operational requirements, checking condition of materials/goods and completing all required documentation.

Work must be carried out in compliance with relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning moving materials mechanically using automated equipment.

Work is performed under limited or minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Select load moving equipment

2 Move goods

3 Check goods and complete documentation

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|-----|--|
| 1.1 | Mechanised handling equipment, route to be taken and procedures to be used are selected appropriate to goods characteristics |
| 1.2 | Dangerous goods and hazardous materials are identified and handled in accordance with codes of practice, WHS/OHS requirements and workplace procedures |
| 2.1 | Hazards are identified, risks are assessed and control measures are implemented |
| 2.2 | Goods are moved using selected materials handling equipment in accordance with WHS/OHS regulations, manufacturer instructions and workplace procedures |
| 2.3 | Problems moving goods and materials using automated equipment are identified and reported in accordance with workplace procedures |
| 3.1 | Relocated goods are inspected for possible damage during transit/movement and appropriate action is taken |
| 3.2 | Appropriate documentation is completed to track moved goods in accordance with workplace procedures |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2013A Move materials mechanically using automated equipment.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLID2013 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes during work activities
- communicating effectively with others
- ensuring servicing of automated equipment in terms of maintenance schedule and standard operating procedures
- implementing contingency plans
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of automated equipment and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for using automated equipment to move materials mechanically
- problems that may occur and appropriate action that can be taken to resolve these problems
- purpose, characteristics, capabilities, requirements and limitations of automated materials moving equipment
- relevant regulations, workplace procedures and policies for using automated equipment to move materials mechanically
- relevant WHS/OHS and environmental protection procedures and guidelines
- risks when using automated equipment to move materials and related precautions to control the risks
- site layout and obstacles.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

TLID3011 Conduct specialised forklift operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift with specialised attachments or all-terrain equipment, in accordance with relevant state/territory high risk work licence requirements and regulations, in a variety of operational contexts.

It includes checking attachments and worksite for suitability, selecting type of forklift and accessories for required workplace task, shifting load and completing work in accordance with operational requirements.

Specialised operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of equipment operation principles and procedures to maintain the safety and specialised operation of a forklift

A person who operates a forklift must hold a high risk work licence.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Check attachments and worksite for suitability

- 1.1 Suitable work area is selected for operations
- 1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
- 1.3 Work area is checked for overhead obstructions and proximity to service delivery lines
- 1.4 Barriers or warning signs are erected in areas subject to passing traffic
- 1.5 Attachments and platforms are securely fixed to carriage or tines
- 1.6 Personnel support platforms are inspected to ensure accordance with relevant Australian Standard/s

2 Select type of forklift and accessories for required workplace task

- 2.1 Special equipment, accessories or attachments are identified to match load characteristics and work requirements
- 2.2 Appropriate specialised equipment is selected
- 2.3 Existing attachments are removed and stored in accordance with workplace procedures
- 2.4 Specialised equipment is fitted in accordance with manufacturer instructions and workplace procedures
- 2.5 Designated staff are notified about specialist operations

3 Shift load and complete work

- 3.1 Equipment is operated within safe working limits and to maximise efficiency of operations
- 3.2 Load is lifted, carried and set down in accordance with workplace and manufacturer procedures, and regulatory requirements
- 3.3 Documentation is completed damage or faults to goods or equipment are reported to appropriate personnel
- 3.4 Specialist equipment and forklift are returned to appropriate storage/parking area

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3011A Conduct specialised forklift operations.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLID3011 Conduct specialised forklift operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- checking and replenishing fluids and carrying out lubrication processes during work activities
- checking forklift compliance plate for safe weight limits
- communicating effectively with others
- completing relevant documentation
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring equipment performance
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- servicing equipment in terms of maintenance schedule and operating procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- handling procedures for forklifts involved in specialised operations
- high risk work licence workplace requirements
- operating hazards, and related defensive driving and hazard control techniques
- pre-operational checks carried out on forklift and accessories, and related action
- procedures to be followed in an operational emergency
- relevant duty of care requirements for specialised operation of a forklift
- relevant WHS/OHS and environmental procedures and regulations
- safe weight limits
- site layout and obstacles
- types of forklift accessories and ancillary equipment, their purposes and procedures for their use
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIL4005 Apply conflict/grievance resolution strategies

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply conflict or grievance resolution strategies to resolve issues that may occur in the course of work.

It includes identifying potential conflict situations, implementing appropriate conflict resolution strategies and using effective interpersonal skills.

Work is performed under minimum supervision with general guidance on progress and outcomes. Work involves discretion and judgement for self and others when managing and resolving conflict or grievances internal and external to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify potential conflict situations

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Signs and stages of conflict or grievance are recognised

1.2 Possible causes of conflict or grievance are identified

- 2 Implement conflict resolution strategies**
 - 2.1 Factors and issues relevant to conflict or grievance are clarified
 - 2.2 Strategies for dealing with conflict or grievance are developed
 - 2.3 Options for resolving the conflict or grievance are presented that enable constructive responses to be negotiated and established relationships to continue
 - 2.4 Strategies are implemented to resolve the source of conflict
 - 2.5 Outcomes of the process are monitored to ensure objectives continue to be met
- 3 Use effective interpersonal skills**
 - 3.1 Effective verbal and non-verbal communication is used during negotiations, including body language, questioning, language style, active listening and reflection
 - 3.2 Feedback is given assertively and received non-defensively during negotiations
 - 3.3 Shared understanding is created through written communications

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIL4005A Apply conflict/grievance resolution strategies.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIL4005 Apply conflict/grievance resolution strategies

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying interpersonal skills
- applying relevant legislation and workplace procedures
- communicating effectively with others when applying conflict and grievance resolution strategies
- completing relevant documentation
- gathering, recording and conveying simple and routine work-related information
- identifying existing and potential conflict or grievances
- interpreting and following operational instructions and prioritising work
- negotiating effectively with others when applying conflict and grievance resolution strategies
- participating in small informal work groups
- reading and interpreting relevant instructions, procedures, information and signs
- responding appropriately to cultural preferences in the workplace, including modes of behaviour and interactions with others
- selecting and appropriately applying technology, information systems and procedures to complete workplace tasks
- working collaboratively with others when applying conflict and grievance resolution strategies
- working systematically with required attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- options for constructive responses to typical conflict/grievance situations
- relevant regulation and code requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) policies and procedures
- relevant workplace business marketing policies and practices, including requirements for maintaining security and confidentiality
- signs, stages and possible causes of conflict in the workplace
- typical problems that can occur when applying conflict or grievance resolution strategies and related appropriate action that can be taken
- workplace protocols and procedures for identifying and resolving conflict or grievances.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
-

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

TLILIC2001 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to operate a forklift truck safely.

Forklift truck means a powered industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other arms that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck.

A person performing this work is required to hold a forklift truck high risk work (HRW) licence.

This unit requires a person operating a forklift truck to plan the work, conduct routine checks on a forklift truck, shift loads in a safe manner, and safely shut down and secure equipment after completing operations.

Licensing/Regulatory Information

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations, HRW and meets Commonwealth, state and territory HRW licensing requirements.

Any alteration to this unit would result in a unit that would not be acceptable to work health and safety (WHS)/occupational health and safety (OHS) regulators for the purpose of licensing.

Pre-requisite Unit

Not applicable.

Competency Field

LIC – Licensing

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan work	<ul style="list-style-type: none">1.1 Potential workplace hazards are identified1.2 Risk control measures are identified consistent with regulatory requirements and the hierarchy of control1.3 Appropriate forklift truck is selected in accordance with load and workplace conditions1.4 Working area is inspected to determine appropriate paths for moving loads and forklift truck in accordance with workplace conditions1.5 Methods for communicating are identified and confirmed in accordance with workplace procedures
2 Conduct routine checks	<ul style="list-style-type: none">2.1 Prior to operation, forklift truck is visually checked for any damage or defects2.2 All signage and labels are checked to ensure they are visible and legible, in accordance with the appropriate standard2.3 All controls are located, identified and confirmed2.4 Pre-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures2.5 Forklift truck is started in accordance with manufacturer specifications and workplace procedures, and is checked for any abnormal noise2.6 Post-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures

- 2.7 All forklift truck functions and safety devices are tested to their maximum in accordance with manufacturer specifications and workplace procedures
- 2.8 Issues, defects and damage identified during routine checks are reported and recorded in accordance with workplace procedures, and appropriate action is taken

3 Shift load

- 3.1 Weight of load is assessed to ensure compliance with forklift truck data plate specifications
- 3.2 Appropriate hazard prevention/control measures are implemented and communicated to personnel in the work area
- 3.3 Forklift truck is operated at a safe speed in accordance with manufacturer specifications and workplace procedures
- 3.4 Loads are moved and placed to ensure stability of material and avoidance of hazards
- 3.5 Load movement is monitored constantly to ensure safety of personnel and load, and structural stability
- 3.6 Unplanned and/or unsafe situations are responded to in accordance with workplace procedures and emergency plans

4 Shut down and secure forklift truck

- 4.1 Forklift truck is parked to avoid hazards
- 4.2 Forklift truck is shut down in accordance with manufacturer specifications and workplace procedures
- 4.3 Routine post-operational forklift truck checks are carried out in accordance with manufacturer specifications and workplace procedures
- 4.4 Forklift truck is secured to prevent unauthorised access/use
- 4.5 All defects and damage are reported and recorded in accordance with manufacturer specifications and workplace procedures, and appropriate action is taken

Foundation Skills

The language, literacy, numeracy and employment skills that are essential to performance that are not explicit in the unit are listed below.

Skill	Performance feature
Employment skills to:	<ul style="list-style-type: none"> • operate a forklift truck in different types of workplaces transferring key principles of safe operation to different contexts • improve own performance in safely and efficiently operating a forklift truck by incorporating learnings from different workplaces and different conditions into current performance
Numeracy skills to:	<ul style="list-style-type: none"> • interpret numerical information including: <ul style="list-style-type: none"> • selecting appropriate forklift in accordance with load and workplace conditions • load weight assessment, to ensure compliance with forklift truck data plate specifications • controlling and monitoring instrument readings
Language skills to:	<ul style="list-style-type: none"> • use and interpret vocabulary specific to forklift truck operations and workplace procedures to communicate with other workplace personnel • use non-verbal feedback to support effective communication • use relevant communications conventions
Literacy (reading) skills to:	<ul style="list-style-type: none"> • interpret documentation that includes technical specificity including: <ul style="list-style-type: none"> • forklift truck data plate • plant operation manuals and manufacturer specifications • workplace procedures, including emergency plan • workplace signage and labels
Literacy (writing) skills to:	<ul style="list-style-type: none"> • accurately record and maintain information relating to operating a forklift truck, including: <ul style="list-style-type: none"> • incident reports • vehicle checking and maintenance records
Self-management skills	<ul style="list-style-type: none"> • implement risk control measures • initiate emergency management strategies

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit is equivalent to TLILIC2001A Licence to operate a forklift truck

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLILIC2001 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

A person who demonstrates competency in this unit must provide evidence of safely operating a forklift truck and satisfy all of the unit elements, performance criteria and foundations skills requirements on at least one occasion including:

- applying risk assessment and hazard control strategies, including hierarchy of control as applied to safely operating a forklift truck
- carrying out post-start operational checks, which must ensure:
 - attachment movements and control functions are smooth and comply with operating requirements
 - hazard warning systems (e.g. lights and horns) are functional
 - safety devices are checked, including
 - deadman's switch
 - emergency descent device (hydraulic)
 - reversing beepers
 - start-up is in accordance with procedures
 - steering, transmission and brake functions comply with operating requirements
- carrying out pre-start operational checks, which must include:
 - battery charge checks, as required
 - ensuring availability of logbook, records, handbook and/or operating manuals
 - fitting and interpreting forklift truck data plate
 - fluid checks
 - forklift truck attachment security checks
 - identifying approved modifications and/or attachments fitted, to manufacturer specifications in accordance with forklift truck or attachment data plate
 - locating, identifying and confirming all controls
 - safety equipment checks
 - signage and label visibility and legibility checks
 - updating records as required
- communicating with other workplace personnel through
 - using appropriate worksite protocols

- listening
- making and interpreting hand signals
- questioning to confirm understanding
- signage
- verbal and non-verbal language
- written instructions
- complying with Commonwealth, state and territory work health and safety (WHS)/occupational health and safety (OHS) legislation and regulations
- conducting and monitoring safe forklift truck operations that include moving loads safely, driving and manoeuvring, picking up and placing loads at various stack heights and carrying out all functions to the maximum height and load capacity
- driving a forklift truck with load in forward and reverse, while maintaining visibility
- planning and preparing for forklift truck operations including:
 - conducting a workplace risk assessment
 - identifying hazards associated with operating a forklift truck, which must include
 - forklift truck instability (e.g. due to overloading, poor load placement, irregular loads)
 - ground conditions (e.g. condition of pavement, slopes)
 - insufficient lighting
 - overhead hazards (e.g. electric lines, service pipes)
 - traffic (e.g. pedestrians, vehicles, other plant) and the risk of collision with people, moving plant and fixed structures
 - weather conditions (e.g. wind, lightning, rain)
 - selecting hazard prevention strategies in accordance with the hierarchy of control
 - putting in place effective controls for identified hazards
 - visually checking a forklift truck for any damage or defects prior to operation including
 - evidence of damage
 - leaks
 - structural weaknesses (including paint separation or stressed welds)
- receiving and interpreting workplace instructions, safety information and emergency procedures
- shutting down a forklift truck in accordance with manufacturer specifications and workplace procedures including
 - parking in a suitable location away from dangerous areas
 - correctly positioning fork arms (tips down, tilted forward, lowered to ground)
 - selecting appropriate transmission/gear for parking (relevant to transmission type)
 - applying hand/parking brake
 - turning off engine power
 - removing ignition key as required
 - shutting off LPG gas cylinder valve as required

- securing equipment in accordance with manufacturer specifications and against unauthorised operation
- securing site
- ensuring access ways are clear
- identifying and segregating defective equipment and reporting to authorised personnel
- connecting batteries to charger as required
- verifying problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including
 - environmental conditions (e.g. wind, lightning, storms)
 - failure/loss of control (e.g. brakes and steering)
 - failure of equipment (e.g. hydraulic system)
 - forklift truck instability (e.g. due to deterioration of ground condition, overloading, poor load placement, irregular loads).

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and industry standards relevant to operating a forklift truck
- Commonwealth, state or territory WHS/OHS legislation and approved codes of practice in relation to one's own responsibilities
- forklift truck characteristics and capabilities (including use of load data plates)
- forklift truck operations and safe operating techniques
- hierarchy of control:
 - elimination
 - substitution
 - isolation
 - engineering controls
 - administrative controls
 - personal protective equipment (PPE)
- methodology to determine weight of a load including the estimation or determination from labels, markings or load paperwork such as:
 - control labels
 - forklift data plates/labels
 - forklift warning decals
- organisational and workplace standards, requirements, policies and procedures for operating a forklift truck
- procedures for recording, reporting and maintaining workplace records and information
- relevant Australian and industry standards, codes of practice and guidelines to safely

- operate a forklift truck
- risk control measures including:
 - barricades and traffic control (e.g. traffic management plan)
 - compliance with permit condition requirements from electrical supply authority, including
 - adequate illumination
 - disconnected power
 - excavation safeguards
 - insulated electric lines
 - maintaining safety observer zone
 - movement of obstructions
 - observing limits of approach
 - pedestrian control (barricades, signs, etc.)
 - power disconnection or compliance with electrical supply authority requirements
 - safety tags on electrical switches/isolators
 - using safety observer inside exclusion zone
 - using personal protective equipment
- selecting forklift truck to suit load and workplace conditions
- typical routine problems encountered operating a forklift truck and equipment, and adjustments required for correction.

Assessment Conditions

Assessments must be conducted by an assessor accredited for this high risk work (HRW) licence class in the Commonwealth/state/territory where the licence will be obtained (i.e. an assessor authorised by a Commonwealth/state/territory WHS/OHS regulator).

As a minimum, assessors must satisfy applicable regulatory requirements, which may include requirements in the Standards for *Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and all assessment must be conducted in the English language.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which typically reflect:

- performing tasks/activities within timelines that would be expected in a workplace
- standard and authorised work practices, safety requirements and environmental constraints
- using full-scale equipment

Forklift truck operation assessment must be conducted in a working zone in accordance with state/territory arrangements.

If the working zone is located at a 'live' site, assessment should continue in all weather conditions unless the safety of the candidate or others could be compromised.

Simulators must **not** be used in the assessment of this unit of competency.

Accredited assessors are responsible for ensuring that candidates have access to:

- a suitable forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe condition
- associated equipment appropriate to forklift truck operations
- suitable loads
- required personal protective equipment (PPE) for the purpose of Performance Assessment
- relevant workplace procedures and standards for operating a forklift truck, including:
 - approved codes of practice and guidance
 - relevant Australian and international technical standards
 - manufacturer guidelines (instructions, specifications or checklists) for the purpose of Performance Assessment
 - relevant industry standards and operating procedures (where applicable)
 - safe work method statements (SWMS), as required.

AUR Automotive Retail, Service and Repair Training Package

Modification History

Version	Release Date	Comments
Version 1.0	December 2013	Primary release: 1 new qualification 7 new units.
Version 1.1	February 2014	One unit updated to correct data
Version 2.0	January 2015	3 new qualifications 31 new units 4 revised units.
Version 2.1	February 2015	1 new skill set
Version 3.0	April 2016	53 new qualifications 4 revised qualifications 604 new units of competency, recoded to conform with the new standards for Training Packages 20 revised units of competency 23 revised and recoded skill sets This Training Package replaces both AUR Release 2.1 and AUR12 Release 2.1
Version 4.0	January 2018	One qualification updated
Version 5.0	December 2018	2 revised qualifications 43 new releases of qualifications 2 new units of competency 23 revised units of competency 4 new skill sets

AURSS00026 Percussive Drill Maintenance and Advanced Systems Diagnosis Skill Set

Modification History

Release	Comment
Release 1	New skill set.
Release 2	Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.

Description

This is a skill set covering the fundamental requirements for technicians to diagnose and repair hydraulic and electronic over hydraulic system faults on machines associated with percussive drilling rigs in the mining industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of one of the following:

- Certificate III in Automotive Mechanical or Automotive Electrical Qualification
- Certificate III in Engineering - Mechanical or Electrical/Electronic Qualification
- Certificate III in Electrotechnology Electrician or Electrical Fitting Qualification

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **3 units of competency** must be completed.

Units

Units	
AURKTR001	Diagnose and repair electronic over hydraulic control systems
AURTTA013	Diagnose and repair hydraulic systems
AURTTA026	Diagnose complex faults in electronic over hydraulic systems

Target Group

The skill set targets tradespeople and final year apprentices working as automotive mechanical/electrical technicians, engineering mechanical/electrical/electronic technicians or electrotechnology electrician/electrical fitters.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of those required to diagnose and repair hydraulic and electronic over hydraulic control system faults on machines associated with percussive drilling in the mining industry.

Custom Content Section

Not applicable.

AURSS00027 Automotive CNG Installation, Service and Repair Skill Set

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS00004 Automotive CNG Installation, Service and Repair Skill Set.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for installing, servicing and repairing automotive CNG systems in the automotive retail, service and repair industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of one of the following:

- AUR30316 Certificate III in Automotive Electrical Technology or equivalent
- AUR30416 Certificate III in Agricultural Mechanical Technology or equivalent
- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent
- AUR31116 Certificate III in Heavy Commercial Vehicle Mechanical Technology or equivalent
- AUR31216 Certificate III in Mobile Plant Technology or equivalent
- AUR31716 Certificate III in Forklift Technology, or equivalent
- AUR31916 Certificate III in Elevating Work Platform Technology or equivalent

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **3 units of competency** must be completed.

Units	
AURTTL001	Inspect and service CNG fuel systems
AURTTL002	Diagnose and repair CNG fuel systems
AURTTL003	Install CNG fuel systems

Target Group

The skill set targets automotive mechanical and electrical technicians who require the skills and knowledge to install, service and repair CNG systems and components in an automotive workplace.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive mechanical and electrical technicians required to install, service and repair automotive CNG systems.

Custom Content Section

Not applicable.

AURSS00028 Automotive CNG Service and Repair Skill Set

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS00005 Automotive CNG Service and Repair Skill Set.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for servicing and repairing automotive CNG systems in the automotive retail, service and repair industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of one of the following:

- AUR30316 Certificate III in Automotive Electrical Technology or equivalent
- AUR30416 Certificate III in Agricultural Mechanical Technology or equivalent
- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent
- AUR31116 Certificate III in Heavy Commercial Vehicle Mechanical Technology or equivalent
- AUR31216 Certificate III in Mobile Plant Technology or equivalent
- AUR31716 Certificate III in Forklift Technology or equivalent
- AUR31916 Certificate III in Elevating Work Platform Technology or equivalent

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **2 units of competency** must be completed.

Units	
AURTTL001	Inspect and service CNG fuel systems
AURTTL002	Diagnose and repair CNG fuel systems

Target Group

The skill set targets automotive mechanical and electrical technicians who require the skills and knowledge to service and repair CNG systems and components in an automotive workplace.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive mechanical and electrical technicians required to service and repair automotive CNG systems.

Custom Content Section

Not applicable.

AURSS00029 Automotive Electrical Skill Set for Light Vehicle Technicians

Modification History

Release	Comment
Release 1	New skill set. Equivalent to AURSS00006 Automotive Electrical Skill Set for Light Vehicle Technicians. Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.

Description

This is a skill set covering the fundamental requirements for light vehicle mechanical technicians to diagnose and repair electrical faults in contemporary vehicles in the automotive retail, service and repair industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of the following:

- AUR30616 Certificate III in Light Vehicle Mechanical Technology qualification or equivalent.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **11 units of competency** must be completed.

Units

Units	
AURETK002	Use and maintain electrical test equipment in an automotive workplace
AURETR006	Solder electrical wiring and circuits
AURETR007	Apply knowledge of automotive electrical circuits and wiring systems
AURETR009	Install vehicle lighting and wiring systems
AURETR010	Repair wiring harnesses and looms
AURETR011	Install basic ancillary electrical systems and components
AURETR016	Read and apply vehicle wiring schematics and drawings
AURETR024	Diagnose and repair compression ignition engine management systems
AURETR028	Diagnose and repair instruments and warning systems
AURETR032	Diagnose and repair automotive electrical systems
AURETR043	Diagnose and repair electronic body management systems

Target Group

The skill set targets automotive light vehicle mechanical technicians who require the skills and knowledge to enable them to diagnose and repair electrical faults in contemporary vehicles in an automotive workplace.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive light vehicle mechanical technicians required to diagnose and repair electrical faults in contemporary vehicles.

Custom Content Section

Not applicable.

AURSS00030 Automotive LNG Installation, Service and Repair Skill Set

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS00007 Automotive LNG Installation, Service and Repair Skill Set.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for installing, servicing and repairing automotive LNG systems in the automotive retail, service and repair industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of one of the following:

- AUR30316 Certificate III in Automotive Electrical Technology or equivalent
- AUR30416 Certificate III in Agricultural Mechanical Technology or equivalent
- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent
- AUR31116 Certificate III in Heavy Commercial Vehicle Mechanical Technology or equivalent
- AUR31216 Certificate III in Mobile Plant Technology or equivalent
- AUR31716 Certificate III in Forklift Technology or equivalent
- AUR31916 Certificate III in Elevating Work Platform Technology or equivalent

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **3 units of competency** must be completed.

Units	
AURTTL004	Inspect and service LNG fuel systems
AURTTL005	Diagnose and repair LNG fuel systems
AURTTL006	Install LNG fuel systems

Target Group

The skill set targets automotive mechanical and electrical technicians who require the skills and knowledge to install, service and repair LNG systems and components in an automotive workplace.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive mechanical and electrical technicians required to install, service and repair automotive LNG systems.

Custom Content Section

Not applicable.

AURSS00031 Automotive LNG Service and Repair Skill Set

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS00008 Automotive LNG Service and Repair Skill Set.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for servicing and repairing automotive LNG systems in the automotive retail, service and repair industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of one of the following:

- AUR30316 Certificate III in Automotive Electrical Technology or equivalent
- AUR30416 Certificate III in Agricultural Mechanical Technology or equivalent
- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent
- AUR31116 Certificate III in Heavy Commercial Vehicle Mechanical Technology or equivalent
- AUR31216 Certificate III in Mobile Plant Technology or equivalent
- AUR31716 Certificate III in Forklift Technology or equivalent
- AUR31916 Certificate III in Elevating Work Platform Technology or equivalent

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **2 units of competency** must be completed.

Units	
AURTTL004	Inspect and service LNG fuel systems
AURTTL005	Diagnose and repair LNG fuel systems

Target Group

The skill set targets automotive mechanical and electrical technicians who require the skills and knowledge to service and repair LNG systems and components in an automotive workplace.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive mechanical and electrical technicians required to service and repair automotive LNG systems.

Custom Content Section

Not applicable.

AURSS00032 Automotive LPG Installation, Service and Repair Skill Set

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS00009 Automotive LPG Installation, Service and Repair Skill Set.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for installing, servicing and repairing automotive LPG systems in the automotive retail, service and repair industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of one of the following:

- AUR30316 Certificate III in Automotive Electrical Technology or equivalent
- AUR30416 Certificate III in Agricultural Mechanical Technology or equivalent
- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent
- AUR31116 Certificate III in Heavy Commercial Vehicle Mechanical Technology or equivalent
- AUR31216 Certificate III in Mobile Plant Technology or equivalent
- AUR31716 Certificate III in Forklift Technology or equivalent
- AUR31916 Certificate III in Elevating Work Platform Technology or equivalent

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **3 units of competency** must be completed.

Units	
AURTTL007	Inspect and service LPG fuel systems
AURTTL008	Diagnose and repair LPG fuel systems
AURTTL009	Install LPG fuel systems

Target Group

The skill set targets automotive mechanical and electrical technicians who require the skills and knowledge to install, service and repair LPG systems and components in an automotive workplace.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive mechanical and electrical technicians required to install, service and repair automotive LPG systems.

Custom Content Section

Not applicable.

AURSS00033 Automotive LPG Service and Repair Skill Set

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS000010 Automotive LPG Service and Repair Skill Set.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for servicing and repairing automotive LPG systems in the automotive retail, service and repair industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of one of the following:

- AUR30316 Certificate III in Automotive Electrical Technology or equivalent
- AUR30416 Certificate III in Agricultural Mechanical Technology or equivalent
- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent
- AUR31116 Certificate III in Heavy Commercial Vehicle Mechanical Technology or equivalent
- AUR31216 Certificate III in Mobile Plant Technology or equivalent
- AUR31716 Certificate III in Forklifts Technology or equivalent
- AUR31916 Certificate III in Elevating Work Platform Technology or equivalent

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **2 units of competency** must be completed.

Units	
AURTTL007	Inspect and service LPG fuel systems
AURTTL008	Diagnose and repair LPG fuel systems

Target Group

The skill set targets automotive mechanical and electrical technicians who require the skills and knowledge to service and repair LPG systems and components in an automotive workplace.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive mechanical and electrical technicians required to service and repair automotive LPG systems.

Custom Content Section

Not applicable.

AURSS00034 Battery Electric Vehicle Diagnosis and Repair Skill Set

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS000011 Battery Electric Vehicle Diagnosis and Repair Skill Set.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for diagnosing and repairing battery electric vehicle (BEV) systems and components in the automotive retail, service and repair industry.

Pathways Information

The skill set may only be undertaken in addition to one of the following:

- AUR30316 Certificate III in Automotive Electrical Technology or equivalent
- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent

or as part of the following:

- AUR40216 Certificate IV in Automotive Mechanical Diagnosis or equivalent
- AUR40616 Certificate IV in Automotive Electrical Technology or equivalent

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **5 units of competency** must be completed.

Units	
AURETH004	Diagnose and repair traction motor speed control systems in battery electric vehicles
AURETH005	Diagnose and repair high voltage traction motors in battery electric vehicles
AURETH006	Diagnose and repair auxiliary motors and associated components in battery electric vehicles
AURETH008	Diagnose and repair HVAC and rechargeable energy storage cooling systems in battery electric vehicles
AURETH009	Diagnose and repair DC to DC converters in battery electric vehicles

Target Group

The skill set targets automotive mechanical and electrical technicians who require the skills and knowledge to diagnose and repair BEV systems and components in an automotive workplace.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive mechanical and electrical technicians required to diagnose and repair battery electric vehicle systems and components.

Custom Content Section

Not applicable.

AURSS00035 Battery Electric Vehicle Inspection and Servicing Skill Set

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS000012 Battery Electric Vehicle Inspection and Servicing Skill Set.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for inspecting and servicing battery electric vehicle (BEV) systems and components in the automotive retail, service and repair industry.

Pathways Information

The skill set may only be undertaken in addition to one of the following:

- AUR30316 Certificate III in Automotive Electrical Technology or equivalent
- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent

or as part of one of the following:

- AUR40216 Certificate IV in Automotive Mechanical Diagnosis or equivalent
- AUR40616 Certificate IV in Automotive Electrical Technology or equivalent.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **4 units of competency** must be completed.

Units	
AURETH001	Depower and reinitialise battery electric vehicles
AURETH002	Service and maintain battery electric vehicles
AURETH003	Diagnose and repair high voltage rechargeable energy storage systems in battery electric vehicles
AURETH007	Diagnose and repair system instrumentation and safety interlocks in battery electric vehicles

Target Group

The skill set targets automotive mechanical and electrical technicians who require the skills and knowledge to inspect and service BEV systems and components in an automotive workplace.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive mechanical and electrical technicians required to inspect and service battery electric vehicle systems and components.

Custom Content Section

Not applicable.

AURSS00036 Heavy Commercial Vehicle Skill Set for Light Vehicle Technicians

Modification History

Release	Comment
Release 2	Replacement of superseded unit
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS000013 Heavy Commercial Vehicle Skill Set for Light Vehicle Technicians.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for light vehicle mechanical technicians to diagnose and repair heavy commercial vehicles in the road transport industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of :

- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **12 units of competency** must be completed.

Units

Units	
AURETR022	Diagnose and repair vehicle dynamic control systems
AURETR024	Diagnose and repair compression ignition engine management systems
AURHTB001	Diagnose and repair heavy vehicle air braking systems
AURHTD002	Diagnose and repair heavy commercial vehicle steering systems
AURHTD003	Diagnose and repair heavy commercial vehicle suspension systems
AURHTE002	Diagnose and repair heavy vehicle compression ignition engines
AURHTQ003	Diagnose and repair heavy vehicle drive shafts
AURHTX001	Diagnose and repair heavy vehicle manual transmissions
AURHTZ001	Diagnose and repair heavy vehicle emission control systems
AURTTA006	Inspect and service hydraulic systems
AURTTF002	Inspect and service diesel fuel injection systems
AURTTF005	Diagnose and repair engine forced-induction systems

Target Group

The skill set targets automotive light vehicle mechanical technicians who require the skills and knowledge to enable them to diagnose and repair heavy commercial vehicles in the road transport industry.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive light vehicle mechanical technicians required to diagnose and repair heavy commercial vehicles in the road transport industry.

Custom Content Section

Not applicable.

AURSS00037 Hybrid Electric Vehicle Inspection and Servicing Skill Set

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS000014 Hybrid Electric Vehicle Inspection and Servicing Skill Set.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for inspecting and servicing hybrid electric vehicle (HEV) systems and components in the automotive retail, service and repair industry.

Pathways Information

The skill set may only be undertaken in addition to:

- AUR30316 Certificate III in Automotive Electrical Technology or equivalent
- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent

or as part of one of the following:

- AUR40216 Certificate IV in Automotive Mechanical Diagnosis or equivalent
- AUR40616 Certificate IV in Automotive Electrical Technology or equivalent.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **3 units of competency** must be completed.

Units	
AURETH010	Diagnose and repair high voltage rechargeable energy storage systems in hybrid electric vehicles
AURETH011	Depower and reinitialise hybrid electric vehicles
AURETH012	Service and maintain electrical components in hybrid electric vehicles

Target Group

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive mechanical and electrical technicians required to inspect and service hybrid electric vehicle systems and components.

Custom Content Section

Not applicable.

AURSS00038 Mobile Plant Skill Set for Agricultural Equipment Technicians

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS000015 Mobile Plant Skill Set for Agricultural Equipment Technicians.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for agricultural equipment technicians to diagnose and repair mobile plant equipment in the construction and mining industries.

Pathways Information

The skill set may only be undertaken in addition to or as part of the following:

- AUR30416 Certificate III in Agricultural Mechanical Technology or equivalent.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **7 units of competency** must be completed.

Units	
AURETR024	Diagnose and repair compression ignition engine management

Units	
	systems
AURKTA005	Inspect, service and repair track type drive and support systems
AURKTD002	Diagnose and repair mobile plant steering systems
AURKTQ001	Diagnose and repair mobile plant final drive assemblies
AURTTA006	Inspect and service hydraulic systems
AURTTF005	Diagnose and repair engine forced-induction systems
AURTTX006	Diagnose and repair hydrostatic transmissions

Target Group

The skill set targets automotive agricultural equipment technicians who require the skills and knowledge to enable them to diagnose and repair mobile plant equipment in the construction and mining industries.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive agricultural equipment technicians required to diagnose and repair mobile plant equipment in the construction and mining industries.

Custom Content Section

Not applicable.

AURSS00039 Mobile Plant Skill Set for Heavy Commercial Vehicle Technicians

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS000016 Mobile Plant Skill Set for Heavy Commercial Vehicle Technicians.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for heavy commercial vehicle technicians to diagnose and repair mobile plant equipment in the construction and mining industries.

Pathways Information

The skill set may only be undertaken in addition to or as part of the following;

- AUR31116 Certificate III in Heavy Commercial Vehicle Mechanical Technology or equivalent.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **8 units of competency** must be completed.

Units	
AURHTF002	Diagnose and repair heavy vehicle diesel fuel injection systems

Units	
AURKTA005	Inspect, service and repair track type drive and support systems
AURKTA011	Diagnose and repair mobile plant hydraulic systems
AURKTB001	Diagnose and repair mobile plant braking systems
AURKTD002	Diagnose and repair mobile plant steering systems
AURKTQ001	Diagnose and repair mobile plant final drive assemblies
AURKTX001	Diagnose and repair powershift transmissions
AURTTX006	Diagnose and repair hydrostatic transmissions

Target Group

The skill set targets and automotive heavy commercial vehicle technicians who require the skills and knowledge to enable them to diagnose and repair mobile plant equipment in the construction and mining industries.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive heavy commercial vehicle technicians required to diagnose and repair mobile plant equipment in the construction and mining industries.

Custom Content Section

Not applicable.

AURSS00040 Mobile Plant Skill Set for Light Vehicle Technicians

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS000017 Mobile Plant Skill Set for Light Vehicle Technicians.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for automotive light vehicle mechanical technicians to diagnose and repair mobile plant equipment in the construction and mining industries.

Pathways Information

The skill set may only be undertaken in addition to or as part of the following:

- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **11 units of competency** must be completed.

Units	
AURHTE002	Diagnose and repair heavy vehicle compression ignition engines
AURHTF002	Diagnose and repair heavy vehicle diesel fuel injection systems

Units	
AURKTA005	Inspect, service and repair track type drive and support systems
AURKTA011	Diagnose and repair mobile plant hydraulic systems
AURKTB001	Diagnose and repair mobile plant braking systems
AURKTD002	Diagnose and repair mobile plant steering systems
AURKTQ001	Diagnose and repair mobile plant final drive assemblies
AURKTX001	Diagnose and repair powershift transmissions
AURTTA006	Inspect and service hydraulic systems
AURTTF005	Diagnose and repair engine forced-induction systems
AURTTX006	Diagnose and repair hydrostatic transmissions

Target Group

The skill set targets automotive light vehicle mechanical technicians who require the skills and knowledge to enable them to diagnose and repair mobile plant equipment in the construction and mining industries.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive light vehicle mechanical technicians required to diagnose and repair mobile plant equipment in the construction and mining industries.

Not applicable.

AURSS00041 Vehicle Air Conditioning Install and Overhaul Skill Set

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS000018 Vehicle Air Conditioning Install and Overhaul Skill Set.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for installing and overhauling air conditioning system components of vehicles in the automotive retail, service and repair industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of one of the following:

- AUR20216 Certificate II in Automotive Air Conditioning Technology or equivalent
- AUR20416 Certificate II in Automotive Electrical Technology or equivalent
- AUR21416 Certificate II in Automotive Cooling System Technology or equivalent
- AUR30316 Certificate III in Automotive Electrical Technology or equivalent
- AUR30416 Certificate III in Agricultural Mechanical Technology or equivalent
- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent
- AUR31116 Certificate III in Heavy Commercial Vehicle Mechanical Technology or equivalent
- AUR31216 Certificate III in Mobile Plant Technology or equivalent
- AUR31716 Certificate III in Forklift Technology or equivalent

Licensing/Regulatory Information

This skill set involves licencing, legislative, regulatory or certification requirements.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **2 units of competency** must be completed.

Units	
AURETU001	Install air conditioning systems
AURETU007	Overhaul air conditioning and HVAC system compressors

Target Group

The skill set targets automotive mechanical and electrical technicians who require the skills and knowledge to install and overhaul automotive air conditioning system components in an automotive workplace.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive mechanical and electrical technicians required to install and overhaul automotive air conditioning system components in vehicles.

Custom Content Section

Not applicable.

AURSS00042 Vehicle Air Conditioning Installation Skill Set

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS000019 Vehicle Air Conditioning Installation Skill Set.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for installing air conditioning systems in vehicles in the automotive retail, service and repair industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of one of the following:

- AUR20216 Certificate II in Automotive Air Conditioning Technology or equivalent
- AUR20416 Certificate II in Automotive Electrical Technology or equivalent
- AUR21416 Certificate II in Automotive Cooling System Technology or equivalent
- AUR30316 Certificate III in Automotive Electrical Technology or equivalent
- AUR30416 Certificate III in Agricultural Mechanical Technology or equivalent
- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent
- AUR31116 Certificate III in Heavy Commercial Vehicle Mechanical Technology or equivalent
- AUR31216 Certificate III in Mobile Plant Technology or equivalent
- AUR31716 Certificate III in Forklift Technology or equivalent

Licensing/Regulatory Information

This skill set involves licensing, legislative, regulatory or certification requirements.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **1 units of competency** must be completed.

Units	
AURETU001	Install air conditioning systems

Target Group

The skill set targets automotive mechanical and electrical technicians who require the skills and knowledge to install automotive air conditioning systems in an automotive workplace.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive mechanical and electrical technicians required to install automotive air conditioning systems in vehicles.

Not applicable.

AURSS00044 Vehicle Air Conditioning Service, Retrofit and Repair Skill Set

Modification History

Release	Comment
Release 1	New skill set. Equivalent to AURSS000021 Vehicle Air Conditioning Service, Retrofit and Repair Skill Set. Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.

Description

This is a skill set covering the fundamental requirements for servicing, diagnosing and repairing faults, and retrofitting and modifying air conditioning and HVAC systems of vehicles in the automotive retail, service and repair industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of one of the following:

- AUR20216 Certificate II in Automotive Air Conditioning Technology or equivalent
- AUR20416 Certificate II in Automotive Electrical Technology or equivalent
- AUR21416 Certificate II in Automotive Cooling System Technology or equivalent
- AUR30316 Certificate III in Automotive Electrical Technology or equivalent
- AUR30416 Certificate III in Agricultural Mechanical Technology or equivalent
- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent
- AUR31116 Certificate III in Heavy Commercial Vehicle Mechanical Technology or equivalent
- AUR31216 Certificate III in Mobile Plant Technology or equivalent
- AUR31716 Certificate III in Forklift Technology or equivalent

Licensing/Regulatory Information

This skill set involves licensing, legislative, regulatory or certification requirements.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **3 units of competency** must be completed.

Units	
AURETU003	Service air conditioning and HVAC systems
AURETU004	Diagnose and repair air conditioning and HVAC systems
AURETU005	Retrofit and modify air conditioning and HVAC systems

Target Group

The skill set targets automotive mechanical and electrical technicians who require the skills and knowledge to service, diagnose and repair, and retrofit and modify automotive air conditioning and HVAC systems in an automotive workplace.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive mechanical and electrical technicians required to service, diagnose and repair, and retrofit and modify automotive air conditioning and HVAC systems.

Custom Content Section

Not applicable.

AURSS00045 Vehicle Refrigerant Recovery Skill Set

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS000022 Vehicle Refrigerant Recovery Skill Set.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for recovering air conditioning refrigerants from vehicles in the automotive retail, service and repair industry.

Pathways Information

The skill set may be undertaken in addition to or as part of an automotive qualification or as a stand alone skill set.

Licensing/Regulatory Information

This skill set involves licensing, legislative, regulatory or certification requirements.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **1 units of competency** must be completed.

Units	
AURETU002	Recover vehicle refrigerants

Target Group

This skill set targets persons working in an automotive parts dismantler/parts recycler workplace or those working in the automotive industry that require the skills and knowledge to recover vehicle refrigerants from end of life vehicles in an automotive workplace.

Suggested words for Statement of Attainment

This unit of competency is drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of those employed within an automotive parts dismantler/parts recycler/vehicle wrecking yard.

Custom Content Section

Not applicable.

AURSS00046 Advanced Body Repair Skill Set

Modification History

Release	Comment
Release 1	New skill set. Equivalent to AURSS000023 Advanced Body Repair Skill Set. Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.

Description

This is a skill set covering the fundamental requirements for body repair technicians to conduct advanced body repairs in the automotive body repair industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of the following:

- AUR32116 Certificate III in Automotive Body Repair Technology or equivalent

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **6 units of competency** must be completed.

Units	
AURETH011	Depower and reinitialise hybrid electric vehicles
AURVTA002	Remove and replace vehicle supplementary restraint systems
AURVTN023	Repair adhesive bonded structural damage on vehicles

Units	
AURVTN028	Identify and repair high strength steel vehicle components
AURVTN029	Set up and operate universal vehicle measuring systems
AURVTN035	Apply original equipment manufacturer repair procedures during vehicle repairs

Target Group

The skill set targets automotive body repair technicians who require the skills and knowledge to conduct advanced body repairs.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive body repair technicians required to conduct advanced repairs.

Custom Content Section

Not applicable.

AURSS00047 Advanced Body Repair Welding Skill Set

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS000024 Advanced Body Repair Welding Skill Set.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for body repair technicians to conduct advanced body repair welding in the automotive body repair industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of the following:

- AUR32116 Certificate III in Automotive Body Repair Technology or equivalent.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **3 units of competency** must be completed.

Units	
AURTTA020	Apply heat induction processes
AURVTW003	Carry out advanced gas metal arc welding on vehicle body sections

Units	
AURVTW005	Carry out spot welding

Target Group

The skill set targets automotive body repair technicians who require the skills and knowledge to conduct advanced body repair welding.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive body repair technicians required to conduct advanced body repair welding.

Custom Content Section

Not applicable.

AURSS00048 Advanced Vehicle Refinishing Skill Set

Modification History

Release	Comment
Release 1	<p>New skill set.</p> <p>Equivalent to AURSS000025 Advanced Vehicle Refinishing Skill Set.</p> <p>Skill set structure unchanged. Units upgraded to reflect new standards for Training Packages.</p>

Description

This is a skill set covering the fundamental requirements for automotive refinishing technicians to conduct advanced refinishing activities in the automotive body repair industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of the following:

- AUR32416 Certificate III in Automotive Refinishing Technology or equivalent

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this skill set.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **5 units of competency** must be completed.

Units	
AURETH011	Depower and reinitialise hybrid electric vehicles
AURVTN035	Apply original equipment manufacturer repair procedures during vehicle repairs

Units	
AURVTP018	Rectify vehicle multi-layer and pearl paint faults using two-pack systems
AURVTP024	Apply clear over base multi-layer and pearl refinishing materials to vehicle body components
AURVTP025	Apply water-based refinishing materials to vehicle bodies and substrates

Target Group

The skill set targets automotive refinishing technicians who require the skills and knowledge to conduct advanced refinishing activities.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive refinishing technicians required to conduct advanced refinishing activities.

Custom Content Section

Not applicable.

AURSS00049 Vehicle Climate Control and HVAC Diagnostic Specialist Skill Set

Modification History

Release	Comment
Release 1	New skill set.

Description

This is a skill set covering the requirements for advanced diagnosis of vehicle climate control, heating ventilation and air conditioning (HVAC) systems and rechargeable energy storage systems (RESS) cooling systems in battery electric vehicles (BEVs) in the automotive retail, service and repair industry.

Pathways Information

The skill set may only be undertaken in addition to or as part of the following:

- AUR20216 Certificate II in Automotive Air Conditioning Technology or equivalent and the trainee must hold of a current ARC Refrigerant Handling License (RHL).

Licensing/Regulatory Information

This skill set involves licencing, legislative, regulatory or certification requirements.

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **4 units of competency** must be completed.

Units

Units	
AURETA006	Analyse and evaluate electrical and electronic faults in air conditioning and HVAC systems
AURETH008	Diagnose and repair HVAC and rechargeable energy storage cooling systems in battery electric vehicles
AURETR020	Diagnose and repair network electronic control systems
AURETU006	Diagnose complex faults in air conditioning and HVAC systems

Target Group

The skill set targets automotive mechanical and electrical technicians who require the skills and knowledge to carry out the advanced diagnosis of automotive air conditioning, climate control and HVAC systems and RESS cooling systems of BEVs in an automotive workplace.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive mechanical and electrical technicians required to carry out the advanced diagnosis of vehicle climate control, heating ventilation and air conditioning (HVAC) systems and rechargeable energy storage systems (RESS) cooling systems in battery electric vehicles.

Custom Content Section

Not applicable.

AURSS00050 Vehicle Body Repair Estimator Skill Set

Modification History

Release	Comment
Release 1	New skill set.

Description

This is a skill set covering the fundamental requirements for vehicle body repair estimators operating in the automotive body repair industry.

Pathways Information

Entry to this skill set is limited to those who:

Have completed one of the following Certificate III qualifications:

- AUR32116 Certificate III in Automotive Body Repair Technology or equivalent
- AUR32216 Certificate III in Automotive Glazing Technology or equivalent
- AUR32416 Certificate III in Automotive Refinishing Technology or equivalent
- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent
- AUR30316 Certificate III in Automotive Electrical Technology or equivalent

Or

Have five years equivalent relevant full time workplace experience in a motor trade or as an estimator.

Licensing/Regulatory Information

No licencing, legislative or certificate requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 3 units of competency must be completed.

Units	
AURAMA005	Manage complex customer issues in an automotive workplace

AURANN011	Estimate and quote automotive body repairs
AURVTN035	Apply original equipment manufacturer repair procedures during vehicle repairs

Target Group

The skill set targets light vehicle and heavy vehicle body repair technicians who require the skills and knowledge to undertake vehicle body repair estimates.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of vehicle body repair estimators required to prepare estimates and quotes.

Custom Content Section

Not applicable.

AURSS00051 Marine Transition Skill Set

Modification History

Release	Comment
Release 1	New skill set.

Description

This is a skill set covering the fundamental skills required for automotive mechanical technicians to transition to work in the marine retail, service and repair sector. The skill set builds on the skills and capabilities an automotive mechanical technician already has and provides individuals with core skills in marine retail, service and repair.

Pathways Information

The skill set may only be undertaken in addition to:

- AUR30416 Certificate III in Agricultural Mechanical Technology or equivalent
- AUR30316 Certificate III in Automotive Electrical Technology or equivalent
- AUR30916 Certificate III in Heavy Commercial Vehicle Mechanical Technology or equivalent
- AUR30816 Certificate III in Motorcycle Mechanical Technology or equivalent
- AUR30616 Certificate III in Light Vehicle Mechanical Technology or equivalent
- AUR31416 Certificate III in Automotive Diesel Fuel Technology or equivalent
- AUR31216 Certificate III in Mobile Plant Technology or equivalent
- AUR31516 Certificate III in Automotive Drivetrain Technology or equivalent
- AUR31316 Certificate III in Automotive Engine Reconditioning or equivalent
- AUR31816 Certificate III in Heavy Commercial Trailer Technology or equivalent
- AUR31616 Certificate III in Automotive Drivetrain Technology or equivalent
- AUR31716 Certificate III in Forklift Technology or equivalent
- AUR30916 Certificate III in Motor Sport Technology or equivalent

Licensing/Regulatory Information

No licencing, legislative or certificate requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 6 **units of competency** must be completed.

Units	
AURRTC001	Diagnose and repair marine exhaust and cooling systems
AURRTE002	Inspect and service marine outboard engines
AURRTE008	Install marine engines, controls and instruments
AURRTR006	Diagnose and repair marine electrical systems
AURRTX003	Diagnose and repair marine outboard and stern drive transmissions
AURRTX004	Diagnose and repair marine inboard transmissions

Target Group

The skill set targets automotive mechanical technicians who are seeking to transition into marine retail, service and repair occupations, and require the skills and knowledge to apply their automotive skills to marine specific activities.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of automotive mechanical technicians transitioning into occupations in the marine retail, service and repair sector.

AURSS00052 Light Vehicle Wheel Alignment Skill Set

Modification History

Code and title current version	Code and title previous version	Comments	Equivalence status
AURSS00052 Light Vehicle Wheel Alignment Skill Set (Release 1)	Not applicable	New skill set	No equivalent skill set

Description

This is a skill set covering the fundamental requirements for performing wheel alignment on light vehicles.

Pathways Information

This skill set may only be undertaken in addition to or as part of the following:

- AUR21916 Certificate II in Automotive Tyre Servicing Technology, AUR30616 Certificate III in Light Vehicle Mechanical Technology, AUR32518 Certificate III in Automotive Underbody Technology or equivalent, including:
 - AURLTJ011 Select light vehicle tyres and wheels for specific applications
 - AURLTJ002 Remove, inspect, repair and refit light vehicle tyres and tubes
 - AURLTJ013 Remove, inspect and refit light vehicle wheel and tyre assemblies
 -

Licensing/Regulatory Information

Licensing, legislative or certificate requirements may apply to this skill set at the time of publication.

Skill Set Requirements

A total of **4 units of competency** must be completed.

Units	
AURLTD006	Carry out light vehicle wheel alignment operations
AURTTD002	Inspect and service steering systems
AURTTD004	Inspect and service suspension systems
AURTTJ011	Balance wheels and tyres

Target Group

The skill set targets learners who require the skills and knowledge to undertake wheel alignment on light vehicles.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of workers required to perform wheel alignment on light vehicles.

Custom Content Section

Not applicable.

AURSS00053 Heavy Vehicle Wheel Alignment Skill Set

Modification History

Code and title current version	Code and title previous version	Comments	Equivalence status
AURSS00053 Heavy Vehicle Wheel Alignment Skill Set (Release 1)	Not applicable	New skill set	No equivalent skill set

Description

This is a skill set covering the fundamental requirements for performing wheel alignment on heavy vehicles.

Pathways Information

This skill set may only be undertaken in addition to or as part of the following:

- AUR21916 Certificate II in Automotive Tyre Servicing Technology, AUR31118 Certificate III in Heavy Commercial Vehicle Mechanical Technology, AUR31818 Certificate III in Heavy Commercial Trailer Technology or equivalent, including:
 - AURHTJ002 Select heavy vehicle tyres, wheels and rims for specific applications
 - AURHTJ003 Remove, inspect and refit heavy vehicle wheel and tyre assemblies
 - AURHTJ006 Remove, inspect, repair and refit heavy vehicle tyres and tubes
 -

Licensing/Regulatory Information

Licensing, legislative or certificate requirements may apply to this skill set at the time of publication.

Skill Set Requirements

A total of 4 units of competency must be completed.

Units

AURHTD004	Carry out heavy vehicle wheel alignment operations
AURTTD002	Inspect and service steering systems
AURTTD004	Inspect and service suspension systems
AURTTJ011	Balance wheels and tyres

Target Group

The skill set targets learners who require the skills and knowledge to undertake wheel alignment on heavy vehicles.

Suggested words for Statement of Attainment

These units of competency are drawn from the AUR Automotive Retail, Service and Repair Training Package and meet the needs of workers required to perform wheel alignment on heavy vehicles.
