# **AURT223104A Assemble and install refrigeration systems/components**

**Release: 1**

## AURT223104A Assemble and install refrigeration systems/components

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the competence required to assemble, install and test refrigeration systems and components.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>Work involved includes all vehicle refrigeration systems.</p> <p>The unit includes identification and confirmation of work requirement, preparation for work, assembly and installation, testing and analysis of outcomes and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p> <p>Work is carried out in accordance with award provisions.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to assemble and install refrigeration system/components	1.1. Nature and scope of work requirements are identified and confirmed 1.2. OH&S requirements, including individual State/Territory regulatory requirements and personal protection needs are observed throughout the work 1.3. Procedures and information such as workshop manuals and specifications, and tooling required, are sourced 1.4. Method options are analysed and those most appropriate to the circumstances are selected and prepared 1.5. Technical and/or hydraulic testing requirements for refrigeration systems are sourced and support equipment is identified and prepared 1.6. Warnings in relation to working with refrigeration systems are observed
2. Carry out assembly and installation of refrigeration system/components	2.1. Methods for the assembly/installation are implemented in accordance with workplace procedures and manufacturer/component supplier specifications 2.2. Adjustment made during the assembly/installation are in accordance with manufacturer/component supplier specifications
3. Conduct refrigeration system tests and analysis	3.1. Methods for the tests are implemented in accordance with workplace procedures and manufacturer/component supplier specifications 3.2. Test results are compared with manufacturer/component supplier specifications to indicate compliance or non-compliance 3.3. Results are documented with evidence and supporting information and recommendation(s) made 3.4. Report is forwarded to persons for action in accordance with workplace procedures
4. Prepare vehicle/ refrigeration system for use or storage	4.1. Assembly and installation schedule documentation is completed 4.2. Final inspection is made to ensure protective guards, safety features and cowlings are in place 4.3. Final inspection is made to ensure work is to workplace expectations

ELEMENT	PERFORMANCE CRITERIA
	4.4. Vehicle/refrigeration system is cleaned for use or storage to workplace expectations 4.5. Job card is processed in accordance with workplace procedures

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- apply research and interpretive skills sufficient to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills required for identification and analysis of technical information
- apply plain English literacy and communication skills in relation to dealing with customers and team members
- apply questioning and active listening skills for example when obtaining information from customers
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring one's own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to correctly calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to assembly and installation tasks, including the use of diagnostic and specialist tooling and equipment, measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

A working knowledge of:

**REQUIRED SKILLS AND KNOWLEDGE**

- OH&S and environmental regulations/requirements, equipment, material and personal safety requirements
- types, characteristics, uses and limitations of automotive related refrigeration systems/components
- types and layout of refrigeration system manuals (hard copy and electronic)
- dangers of working with refrigeration systems
- operating principles of refrigeration systems and their relationship to each other
- test procedures
- refrigeration assembly/installation procedures
- enterprise quality procedures
- work organisation and planning processes

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>It is essential that competence in this unit signifies ability to transfer competence to changing circumstances and to respond to unusual circumstances in the critical aspects of:</p> <ul style="list-style-type: none"> <li>• observing safety procedures and requirements</li> <li>• communicating effectively with others involved in or affected by the work</li> <li>• selecting methods and techniques appropriate to the circumstances</li> <li>• completing preparatory activity in a systematic manner</li> <li>• conducting the assembly/installation in accordance with workplace and manufacturer/component supplier requirements</li> <li>• accurately interpreting test results</li> <li>• completing assembly and installation of refrigeration systems and associated components within workplace timeframes</li> <li>• completing assembly and installation of refrigeration systems and associated components within workplace timeframes</li> <li>• equipment/refrigeration system is presented to customer in compliance with workplace requirements</li> </ul>
<p><b>Context of, and specific resources for assessment</b></p>	<p>Application of competence is to be assessed in the workplace or simulated worksite</p> <p>Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints</p> <p>Assessment is to comply with regulatory requirements, including Australian Standards</p> <p>The following resources should be made available:</p> <ul style="list-style-type: none"> <li>• workplace location or simulated workplace</li> <li>• material relevant to assembly and installation tasks</li> <li>• equipment, hand and power tooling appropriate to assembly and installation tasks</li> <li>• activities covering mandatory task requirements</li> <li>• specifications and work instructions</li> </ul>

<b>EVIDENCE GUIDE</b>	
<b>Method of assessment</b>	<p>Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&amp;R Training Package</p> <p>Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge</p> <p>Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies</p> <p>Assessment may be applied under project related conditions and require evidence of process</p> <p>Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances</p> <p>It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements</p> <p>Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role</p>
<b>Guidance information for assessment</b>	

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>OH&amp;S</b>	OH&S requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This

<b>RANGE STATEMENT</b>	
	may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of material, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulations/codes of practice and workplace policies and practices
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to the conduct of operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and site visitors
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and site evacuation
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, meters, gauges and load refrigerant gas devices
<b>Materials</b>	Materials may include spare parts and consumables and cleaning materials

<b>RANGE STATEMENT</b>	
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include site specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to the assembly and installation of refrigeration systems/components</li> <li>• regulatory/legislative requirements pertaining to the automotive industry, including Australian Design Rules</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised enterprise or external persons</li> <li>• Australian Standards</li> </ul>
