- computer data
- Part 101 of the Civil Aviation Safety Regulations (CASR) and guidance material
- discussions with experienced industry personnel

- industry compliance sources which may include:
  - regulator
  - associations and organisations
  - developers of codes of conduct or ethics
  - journals
  - seminars
  - lawyers
- networking with one or more of the following:
  - colleagues
  - suppliers
  - libraries
  - media
- reference one or more of the following:
  - personal observations and experience
  - reference books
  - training courses
  - unions
- functions and general operating procedures of regulatory authorities of particular relevance to industry
- methods of receiving updated information on laws and licensing requirements
- use of policies and procedures in managing regulatory compliance
- formats for and inclusions in policies and procedures
- workplace relations
- public liability and duty of care
- Damage by Aircraft Act 1999 or equivalent
- WHS requirements
- relevant laws, codes, standards and licensing requirements, including:
  - key practices that are prohibited by the law
  - auditing and inspection regimes
  - main consequences of non-compliance
- need to apply for and maintain business or occupational licensing and associated mandatory training and certification requirements
- requirements for record keeping and acceptable record keeping mechanisms
- statutory reporting requirements for businesses
- adherence to mandatory codes of conduct enshrined in legislation
- requirements to develop and implement plans, policies, codes of conduct or incorporate certain business practices
- rights and responsibilities of employees and employers
- other specific actions that must be taken for legal compliance
- opportunities to maintain knowledge of regulatory requirements, including:
  - discussions with experienced industry personnel

- networking with colleagues and/or suppliers
- participating in industry accreditation schemes
- participating in industry seminars
- membership of professional industry associations
- participating in training courses
- subscribing to regulatory newsletters.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.
