Assessment Requirements for AVIO2004 Conduct frisk search of persons

Release: 1

Assessment Requirements for AVIO2004 Conduct frisk search of persons

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- applying special frisk search methods to infants or children and people with specific needs
- communicating effectively with others
- completing relevant documentation
- identifying, selecting, using and routinely checking relevant equipment, processes and procedures
- implementing work health and safety (WHS)/occupational health and safety (OHS) procedures and relevant regulations
- implementing organisational contingency procedures
- implementing organisational transport security program and associated standard operating procedures
- modifying activities depending on workplace contingencies, risk situations and environments
- preparing a person for a frisk search, including obtaining permission from person being searched and informing person about frisk search processes and procedures
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying problems, faults or malfunctions promptly, in accordance with workplace procedures
- responding appropriately to cultural differences in the workplace
- responding appropriately to detection of weapons or prohibited items during frisk search
- using appropriate customer service skills when conducting frisk searches of persons in an aviation environment
- working collaboratively with others when conducting frisk searches of persons in an aviation environment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- components, operating principles and characteristics of typical weapons (especially potential explosive devices) that may be potentially carried on a person
- contact processes for airline, airport staff and relevant law enforcement agencies
- customer service standards and techniques to be applied when carrying out frisk searches of persons in an aviation environment
- law enforcement officers and other government officers, their roles and responsibilities within an aviation workplace
- methods, techniques and equipment involved when conducting frisk searches of persons in an aviation environment including procedures for conducting frisk searches of children and persons with specific needs
- organisational transport security program, screening standard operating procedures and contingency procedures as they relate to detecting weapons and/or prohibited items in a frisk search
- relevant sections of aviation legislation about conducting frisk searches of persons in an aviation environment including notices made under the Aviation Screening Notices
- site layout, including applicable security zones and standard operating procedures for aviation transport security screening process concerned and private rooms or a search room that can be used to frisk search people
- types of weapons and prohibited items that may be detected during a frisk search and distinguishing characteristics of such weapons and prohibited items as outlined in the Regulations
- typical issues that may occur when conducting frisk searches of persons in an aviation environment and appropriate action that can be taken to resolve and avoid these issues
- workplace aviation transport security standard operating procedures and policies applicable to conducting frisk searches of persons in an aviation environment.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in *the Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in *the Standards for Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace

conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
