Assessment Requirements for AVIY4054
Conduct hoisting operations

Release: 1
Assessment Requirements for AVIY4054 Conduct hoisting operations

Modification History
Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- applying crew resource management (CRM) principles
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant helicopter aeronautical knowledge
- applying relevant legislation and workplace procedures
- assembling hoisting equipment
- communicating effectively with others
- completing relevant documentation
- deploying and redeploying hoist cable to full length:
  - in ground effect
  - out of ground effect
- determining wind speed and direction
- identifying and using required communications technology
- implementing contingency plans
- maintaining situational awareness
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in communications equipment in accordance with standard operating procedures
- operating hoist and associated primary and alternate hoist controls
- operating hoisting accessories
- planning own work, predicting consequences and identifying improvements
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with workplace procedures
- using communication skills for conning
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or
damage to goods or equipment.

**Knowledge Evidence**

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- abnormal/emergency situations and responses
- aircraft approach and overshoot considerations
- aircraft control voice and communications procedures
- aircraft safety including day and night considerations
- approved operational procedures and processes for different hoisting operations
- aviation risk management processes
- CASR Part 61 Manual of Standards Schedule 3 Aeronautical Knowledge relevant to helicopter operations
- correct hoist and equipment configuration
- crew resource management (CRM) principles
- helicopter capabilities and limitations
- hoist capabilities and limitations
- hoist emergency procedures
- hoisting considerations within a range of operational environments:
  - bushfire affected areas
  - confined areas
  - forest/bush
  - mountainous areas
  - over water
  - over land
  - pinnacles
  - ship/boat transfers
- meaning of non-verbal communications signals relevant to aircraft hoist configuration:
  - aircraft go around
  - all clear
  - boom in/out
  - cease movement
  - come up/down
  - emergency descent
  - hoist in/out
  - hoist up/down
• move left/right
• ready to be hoisted
• stop hoisting
• organisational policy and procedures for conducting hoisting operations
• typical problems that may occur and actions and appropriate solutions
• work health and safety (WHS)/occupational health and safety (OHS) issues applicable to hoisting operations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:
• a range of relevant exercises, case studies and/or simulations
• acceptable means of simulation assessment
• applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
• relevant materials, tools, equipment and personal protective equipment currently used in industry.
