Assessment Requirements for BSBITB501 Establish and maintain a workgroup computer network

Release: 1

Assessment Requirements for BSBITB501 Establish and maintain a workgroup computer network

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- choose, install and maintain software and hardware in accordance with network and organisation requirements
- identify and address network problems
- consult with information technology (IT) professionals
- provide training or assistance to users on using the network.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the features of computer networking
- outline organisational policies and procedures relating to the tasks required
- describe software licensing rights and responsibilities.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT building and implementation field of work and include access to:

- office equipment
- networked computers
- appropriate software.

Assessors must satisfy NVR/AQTF assessor requirements.
