BSBSS00036 Design Fundamentals Skill Set

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Description

This Skill Set is for individuals working in any industry context who need to develop and apply an appreciation of the design process in improving individual work processes and practices. Good design processes include the application of critical thinking to a range of situations and challenges including product and service requirements arising from particular business or community needs.

Pathways Information

These units of competency provide credit towards a broad range of qualifications in multiple industry and community contexts.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

BSBDES202 Evaluate the nature of design in a specific industry context
BSBCRT101 Apply critical thinking techniques
BSBDES201 Follow a design process

Target Group

Design staff

Suggested words for Statement of Attainment

These units of competency from the BSB Business Services Training Package meet broad industry and community requirements for the development and application of basic design fundamental skills.
