# **BSBXBD402 Test big data samples**

**Release: 1**

## BSBXBD402 Test big data samples

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

### Application

This unit describes the skills and knowledge required to test captured transactional and non-transactional big data samples prior to using them in the organisation. It involves assembling or obtaining raw big data, processing that big data, and testing it in a way that enables it to be used more broadly within the organisation.

It applies to those who work in a broad range of industries using data analysis techniques in the management of their day-to-day work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Data Literacy – Data Literacy

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Validate assembled or obtained big data sample	1.1 Establish a sampling strategy for big data testing and identify a representative sample for big data testing 1.2 Assemble or obtain sample of raw big data according to legislative requirements and organisational policies and procedures 1.3 Validate big data sample from various sources to ensure that big data is correct
2. Validate big data sample process and business logic	2.1 Align datasets to relevant parts of the organisation 2.2 Implement data aggregation and segregation rules on a small set of sample data and datasets 2.3 Consult with required personnel to clarify and resolve

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	<p>identified anomalies</p> <p>2.4 Conduct performance testing for data throughput, data processing and sub-component performance</p>
3. Validate output of captured big data sample and record results	<p>3.1 Design, formulate and select suitable test scenarios and test cases to validate output of big data sample</p> <p>3.2 Implement selected test scenarios and test cases with big data sample using common testing tools and according to organisational procedures</p> <p>3.3 Isolate sub-standard data and correct data acquisition paths as required</p> <p>3.4 Generate and store results of validation activity and associated supporting evidence according to organisational policies and procedures, and legislative requirements</p>
4. Optimise big data sample results and documentation	<p>4.1 Perform data cleansing on big data sample following testing according to industry practices and organisational procedures</p> <p>4.2 Collate validated output of testing, confirming absence of big data corruption in sample</p> <p>4.3 Recommend configuration optimisation changes based on performance testing results</p> <p>4.4 Communicate final sample results to required personnel</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

<b>Skill</b>	<b>Description</b>
Learning	<ul style="list-style-type: none"> <li>Modifies behaviour following exposure to new information</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>Asks open and closed probing questions and actively listens to feedback during big data testing</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Interprets numerical data</li> <li>completes at times complex calculations and records numerical data</li> </ul>
Reading	<ul style="list-style-type: none"> <li>Identifies and interprets information from relevant sources to complete work</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Uses clear, specific and industry-related terminology to represent test results</li> </ul>
Planning and	<ul style="list-style-type: none"> <li>Efficiently and logically sequences the stages of big data testing</li> </ul>

Skill	Description
organising	
Technology	<ul style="list-style-type: none"><li>• Uses appropriate technology platforms and query languages and scripts to test big data</li></ul>

## Unit Mapping Information

No equivalent unit. New unit.
