Assessment Requirements for BSBDES602 Research global design trends

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- conduct research on a complex range of design issues, trends and ideas
- document the analysis, critique and synthesis of complex sources to develop own positions and ideas
- use opportunities to refine own design skills.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe broad global design trends that apply to all design disciplines
- discuss the business implications/consequences of adopting trends and emergent technologies
- compare and contrast different research methodologies and options
- outline sources of information on global design, design trends and broader references that may inform emerging and innovative design practice
- critique specific current and emerging design technologies and trends (at a global level) in at least one area of design.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to a current and varied range of familiar and unfamiliar information sources.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES801 Research and apply design theory

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to research, in significant depth and breadth, and apply different theories of design.

It applies to individuals who use sophisticated research and critical analysis skills in the exploration of design, design theory and its application to professional design practice.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Research design theory	1.1 Use a range of research techniques to source information about design theory 1.2 Identify and explore new, emerging and alternative sources of ideas and thinking on design 1.3 Expand own knowledge and understanding of design through review and critical analysis of information 1.4 Analyse, compare and contrast a range of theoretical perspectives and thinking on design

BSBDIV801 Conduct strategic diversity workforce planning

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conduct high level strategic diversity workforce planning for an organisation. This includes developing objectives and strategies, implementing initiatives and monitoring and evaluating trends and processes. It focuses on making provision for inclusivity to ensure that training, employment and promotional opportunities are provided to all cohorts of the Australian population in an attempt to actively leverage diversity in the workplace.

This unit also covers the research associated with labour markets, labour market programs and the requirement to match organisational needs with employee skills and knowledge.

It applies to individuals who assess factors that may affect the supply of workers; align workforce objectives with business plans; and design strategies and succession plans to ensure a competent and appropriately diverse workforce is available to meet anticipated changes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBFLM312 Contribute to team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to the effectiveness of the work team. It involves planning with the team to meet expected outcomes, developing team cohesion, participating in and facilitating the work team, and communicating with the management of the organisation.

It applies to individuals who play a prominent part in motivating, mentoring, coaching and developing team cohesion through team leadership and forming the link between the management of the organisation and the team members. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve complex or non-routine activities that require some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBINM302 Utilise a knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to access a knowledge management system, use monitoring and review processes to provide feedback and improve own work practices using the system.

This includes a whole range of strategies, methods, activities and techniques used formally and informally by individuals and the organisation (as formalised in a knowledge management system) to identify, collect, organise, store, retrieve, analyse, share and apply knowledge to the work of the organisation.

It applies to individuals who apply a broad range of competencies in various work contexts. They may exercise discretion and judgement using appropriate theoretical knowledge of knowledge management to assist in increasing productivity, to improve quality or to recognise the benefits to the organisation through the improved use of knowledge.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBINM601 Manage knowledge and information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- source and analyse information for business decisions including:
  - identifying business problems and issues and related knowledge and data requirements
  - confirming the clear and relevant objectives for analysis of information
  - applying statistical analysis, sensitivity analysis and other techniques to draw conclusions relevant to decisions
  - ensuring sufficient valid and reliable information or evidence is available to support decisions
  - using formal and informal networks to source information not held in formal systems
  - identifying and accessing sources of reliable information
  - using technology as appropriate
  - consultation with stakeholders and specialists
- contribute information and the outcomes of analysis to decision making
- disseminate information to relevant groups and individuals including:
  - documenting information and updating databases
  - meeting identified needs of recipients
  - adhering to legal and organisational requirements for privacy and security
  - developing and implementing communication plans
- design, test and adjust information systems to meet needs and objectives including:
  - management information systems and decision support systems
  - use of technology for optimum efficiency and quality
  - storage and retrieval of information.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025 Future Skills Organisation

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of existing and emerging technologies and how they can be used in knowledge and information management
- explain statistical analysis and other quantitative methods commonly used in decision making including several of:
  - correlation calculations
  - long-term trend analyses
  - probability assessment
  - regulation analyses
  - short to medium-term trend analyses
  - dynamic programming
  - linear programming
  - queuing theory
  - simulation
  - transportation methodology
- outline the key features of management information systems and decision support systems
- explain how to utilise risk management plans to determine acceptable courses of action.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- relevant technology and equipment
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN201 Contribute to workplace innovation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to make a pro-active and positive contribution to workplace innovation.

It applies to individuals working in any industry or community context, in both small and large organisations who take a pro-active approach to identifying, suggesting and developing ideas about better ways of doing things at a practical operational level in a specific area of activity. While the individual's overall work is undertaken with some supervision and guidance, they apply discretion, judgement and effective interpersonal skills in order to contribute to workplace innovation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

BSBIPR402 Protect and use new inventions and innovations

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to protect and use new inventions and innovations as the exclusive intellectual property of an organisation or individual. It covers identifying the need for protection of new inventions or innovations, working with specialists to file a successful patent application, monitoring and protecting intellectual property rights, and using the patent for business growth.

It applies to individuals who are actively involved in work concerning the development or ownership of inventive and innovative products. They may work as individual inventors or innovators in a range of industries or organisational contexts, as part of a research and development team within an organisation or be commissioning or employing others to develop new inventions or innovations.

It will give individuals an understanding of patent law and how patents are assigned, to develop an understanding of the actions of patent specialists employed to patent the organisation’s new inventions or innovations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and analyse information and advice from a range of sources to determine
  - legislation, regulations and organisational policies and procedures relevant to intellectual property (IP)
  - organisation's assets, their value and where they are created or procured
  - IP from other people or organisations that is used by the business
  - organisation's IP rights and options for protection
  - costs, benefits and risks of protecting IP
  - potential for business growth through organisation's IP
- review or develop organisational strategy, policies and procedures for protection, management and use of IP including
  - recordkeeping
  - ensuring employees, partners and contractors protect IP
  - identifying and responding to infringements
  - promoting a culture of compliance and respect for the intellectual property rights
- review and evaluate strategies, policies and procedures for IP and make adjustments and improvements as appropriate
- manage and contribute to the development and implementation of commercialisation of organisation's IP.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe types of intellectual property as they relate to the organisation

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain processes for identifying and valuing the organisation's IP
- give examples of options for commercialisation of IP
- outline typical barriers to implementing policy and procedures to manage IP and possible strategies to address them
- identify relevant legislation and regulations relating to the organisation's intellectual property rights and responsibilities
- outline internal and external sources of information and advice relevant to intellectual property.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk – intellectual property field of work and include access to:

- relevant legislation, standards and codes
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBIPR601 Develop and implement strategies for intellectual property management

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to obtain a strategic advantage from developing and implementing strategies for the management of intellectual property. It covers the evaluation of approaches to the management of intellectual property and focuses on establishing, implementing, evaluating and monitoring an organisation's intellectual property strategy.

It applies to directors or managers who take an active role in recognising and securing intangible assets which contribute to the organisation's profitability, productivity and market leadership. These managers and coordinators may work in a range of contexts and may have responsibility for managing people, systems or processes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBITA411 Design and develop relational databases

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to design and develop a multi-table relational database (including queries, forms and reports) to meet a defined need using existing data and available digital database applications/platforms.

It applies to individuals who may work independently or within an administrative support role, with the responsibility to develop and use databases to store and retrieve data using commercially available applications/platforms.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Analysis and Design

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Design database	1.1 Identify organisational and task requirements to confirm scope and functionality of database design, including data redundancy 1.2 Develop a logical data model to identify and classify data into types in accordance with organisational and task requirements 1.3 Select appropriate digital application/platform according to organisational and task requirements, available resources, and required scope and functionality of database

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Create and document proposed database structure, and share with appropriate personnel in accordance with organisational policies and procedures 1.5 Seek feedback on proposed database design from appropriate personnel
2. Develop database	2.1 Set field attributes according to data type and link databases by a common field in accordance with database application usage 2.2 Assign primary key to uniquely identify data 2.3 Assign foreign keys to establish associations between data, in accordance with organisational and task requirements 2.4 Use software functions and formulae to meet organisational and task requirements 2.5 Create password and access system according to organisational policies and procedures relating to data security 2.6 Access and use application help functions to overcome intermediate-level issues with database design and production, where required
3. Develop queries, forms and reports	3.1 Identify information output, database tables to be use and report layout, in accordance with task requirements 3.2 Identify data groupings, search and sort criteria, in accordance with task requirements 3.3 Run reports and queries to confirm that results and formulae produce required data 3.4 Modify reports to include or exclude additional requirements, where necessary
4. Test and finalise database	4.1 Populate database with sample dataset for testing, meeting organisational requirements for speed and accuracy 4.2 Assess and document effectiveness of data relationships, query forms and reports, assessing against organisational and task requirements 4.3 Document and address any errors in database design 4.4 Name and store database in accordance with organisational policies and procedures relating to data security, and exit the application without data loss or damage 4.5 Confirm database readiness with appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Comprehends the main messages in texts of varying complexity
Writing	• Uses basic models to produce a range of text types with formatting and font chosen appropriate to database design • Uses technical information and structure appropriate to the requirements of the audience and purpose
Oral Communication	• Confirms requirements using industry-specific language
Numeracy	• Extracts, interprets and comprehends routine formulae and digital application functions to establish data relationships
Navigate the world of work	• Adheres to organisational policies and procedures relevant to own role
Get the work done	• Develops plans to manage relatively complex, non-routine tasks according to organisational requirements • Takes responsibility for the outcomes of routine decisions related directly to own role • Understands the purposes, specific functions and key features of common digital systems and tools and operates them effectively to design, develop and test database functions • Recognises and takes responsibility for addressing predictable database problems in familiar work contexts

Assessment Requirements for BSBITA411 Design and develop relational databases

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- produce a relational database, containing a minimum of THREE tables, which uses queries, reports and forms
- adhere to organisational requirements when inputting, amending and storing data, including using correct naming conventions
- adhere closely to task requirements, including:
  - following designated timelines
  - achieving required speed and accuracy
- communicate with relevant personnel to check database design against requirements
- distribute reports to appropriate personnel in appropriate format.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features of advanced functions of available database applications
- Key features of organisational policies relating to transfer and security of data
- Key features of organisational requirements relating to data entry, storage and presentation.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT analysis and design field of work and include access to:

- office equipment and resources – including business technology
- workplace documentation and resources
- industry database applications/platforms
- sample data.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBITA611 Configure and optimise customer contact technology

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to establish optimal functionality and efficiency from customer contact technologies by configuring them to best suit organisational needs and strategies.

It applies to individuals working at a managerial or specialist level and within a customer contact environment where complex digital technology is employed, and where the configuring of this technology is undertaken on an ongoing basis to maximise efficiencies and benefits to the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Analysis and Design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Analyse capability of existing customer contact technology	1.1 Clearly identify the role of customer contact technology in customer contact operations 1.2 Identify the scope of the functions supplied by the existing digital technologies 1.3 Accurately align the capabilities of the existing technology to current and potential organisational needs and strategies

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Benchmark competing new technology applications	2.1 Identify specific operational needs that can be met by new and/or emerging digital technologies 2.2 Identify the range of functions and capabilities supplied by benchmarking competing technologies 2.3 Select critical features of competing technologies for analysis against organisational needs and strategies 2.4 Conduct an analysis of competing technologies using cost effective processes 2.5 Report on appropriate new technology by considering the analysis of critical features, and deliver report to appropriate personnel in accordance with organisational policies and procedures
3. Develop a customer contact system configuration	3.1 Identify and analyse business model to be facilitated by technology 3.2 Identify the required technology components 3.3 Identify all specific contact pathways to be managed by technology 3.4 Arrange configuration of technology to satisfy the business model and contact pathways, ensuring compliance with organisational policies and procedures 3.5 Develop comprehensive testing program to ensure delivery and reliability of new configuration 3.6 Evaluate configuration against organisational strategies
4. Develop a customer contact strategy to optimise existing technology	4.1 Identify unused capacity in existing technology 4.2 Identify applications for unused capacity appropriate to operational or business model 4.3 Develop and document a strategy for exploiting additional capacity and deliver to appropriate personnel 4.4 Assess the cost and efficiency of the strategy against available resources and budget 4.5 Recommend a course of action in accordance with the assessment, ensuring compliance with organisational policies and procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Interprets and analyses complex textual information to verify requirements and enhance system and user capabilities
Writing	• Prepares structured documents using appropriate specialised vocabulary to convey complex ideas, strategies and recommendations specific to the target audience
Oral Communication	• Engages in discussions to establish requirements and presents relatively complex information clearly using appropriate language and non-verbal features
Numeracy	• Comprehends, analyses and manipulates mathematical information for critical review and to achieve optimal outcomes
Navigate the world of work	• Understands how own role contributes to the broader business and financial objectives of the organisation
Get the work done	• Uses formal processes to identify key information and requirements, evaluate options and consider implementation issues and contingencies • Takes responsibility for high impact decisions in complex situations involving multiple variables and constraints • Actively identifies systems, devices and applications with potential to meet current and/or future needs • Uses a broad range of strategies to store, access and organise digital information

BSBITB511 Establish and maintain a network of digital devices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to establish a network of digital devices in a workgroup context and to manage the network by keeping records, responding to problems, assisting users and providing training.

It applies to individuals employed in a range of work environments, in which they are required to apply broad knowledge of digital networks. They may be responsible for installing and maintaining the network, but they will work closely with technology professionals in all aspects of this process. In doing so, they may provide administrative support within an enterprise, or may have been delegated these responsibilities for their workgroup or organisation.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Building and Implementation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Manage establishment of a workgroup network	1.1 Identify current and anticipated network requirements, as well as related opportunities, in accordance with organisational policy and budgetary constraints

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.2 Identify any potential incompatibilities between selected network and current organisational software applications, digital devices, and work practices 1.3 Obtain and install equipment in accordance with organisational requirements and manufacturers' instructions 1.4 Install software applications in accordance with organisational requirements and the manufacturers' instructions 1.5 Conduct research and document outcomes to demonstrate that the establishment of the network promotes efficiency and access for users
2. Manage maintenance of a workgroup network	2.1 Establish and maintain records to ensure control and security of digital devices and software applications, in accordance with organisational policies and procedures 2.2 Respond to network problems and rectify minor faults in accordance with organisational requirements 2.3 Report major problems and consult technology experts in accordance with organisational policies and procedures 2.4 Identify opportunities for improvements to the network and deliver recommendations to appropriate personnel, in accordance with organisational policies and procedures
3. Assist and train network users	3.1 Identify gaps in workforce knowledge and expertise relating to use of the network 3.2 Assist network users to maximise network potential 3.3 Examine user skills and provide access to appropriate training to improve individual and workgroup efficiency of network use

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Identifies and interprets workplace texts, including organisational policies and technical instructions, to identify relevant information
Writing	• Maintains accurate records and produces reports and recommendations using formats, terminology and conventions specific to workplace requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

Oral Communication	• Explains issues and requirements clearly using appropriate vocabulary and non-verbal features • Obtains information using active listening and questioning skills
Numeracy	• Identifies and interprets numerical information within budgets
Navigate the world of work	• Adheres to organisational policies and procedures and considers own role in terms of its contribution to broader goals of work environment
Interact with others	• Selects and uses appropriate conventions and protocols when communicating in a range of familiar work contexts • Collaborates with others, playing an active role in facilitating effective outcomes
Get the work done	• Plans and implements routine and non-routine tasks according to organisational requirements • Makes a range of critical and non-critical decisions in relatively complex situations, • Uses problem solving techniques to address issues of increasing complexity within own scope • Uses digital systems and tools to file and store information and programs in accordance with the organisation's requirements • Reflects on the ways in which digital systems and tools are used, or could be used to achieve work goals

BSBITB801 Implement advanced electronic technologies

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to improve business, learning and knowledge outcomes through implementing advanced electronic technologies.

It applies to individuals in senior management roles working to ensure learning advances individual and organisational capabilities. Individuals who provide learning should be able to make complex judgements and implement advanced electronic technologies such as those associated with electronic business (e-business) models; electronic retail (e-retail) sales, service and payment solutions; mobile and wireless technologies; and technologies relating to the management of the supply chain.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Building and Implementation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement electronic technologies to advance business models	1.1 Determine and communicate to stakeholders the commercial set up of the business to supply electronic commerce (e-commerce) products or services 1.2 Analyse and evaluate e-business models appropriate to a specific operational context

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Implement arrangements for conducting e-commerce appropriate to data management, and business and organisational requirements 1.4 Ensure e-business models interoperate technically and operationally with organisation's management of customer service, performance, learning and decision support 1.5 Implement customer authentication and transaction systems appropriate to business and organisational requirements 1.6 Review and report opportunities to improve e-commerce infrastructure, systems and solutions
2. Implement electronic technologies to advance retail sales operations	2.1 Determine and communicate to stakeholders the commercial set up of the business to supply e-retail services 2.2 Analyse and evaluate appropriate e-retail tools and processes 2.3 Align e-retail strategy with business strategies, and business and organisational requirements 2.4 Implement arrangements for conducting e-retailing appropriate to business and organisational requirements 2.5 Review and report opportunities to improve e-retail infrastructure, systems and solutions
3. Implement electronic technologies to advance mobile operations	3.1 Identify and communicate to stakeholders, range of options available in mobile computing devices and mobile technologies appropriate to business unit and organisational requirements 3.2 Confirm trends in mobile commerce and related systems 3.3 Research trends in mobile internet and other communication networks 3.4 Implement arrangements for mobile commerce and related systems appropriate to business and organisational requirements 3.5 Review and report opportunities to improve mobile electronic infrastructure, systems and solutions
4. Implement electronic technologies to advance supply chain management	4.1 Determine and communicate to stakeholders the commercial set up of the business to electronically manage a supply chain 4.2 Research and report strengths and weaknesses of options relating to electronic enhancement of supply chain management 4.3 Develop electronic supply chain model and strategy 4.4 Align supply chain management with e-business strategies and model 4.5 Implement electronic supply chain model

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	4.6 Review and evaluate electronic supply chain model against business and organisational requirements 4.7 Determine and report enhancements to electronic enablement of supply chain

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Assessment Requirements for BSBITB801 Implement advanced electronic technologies

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- research and evaluate appropriate electronic technology for a given business system
- analyse, develop and implement plans for an effective e-business solution, e-retail solution, mobile business solution and electronic supply chain management solution to meet specific organisational needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe trends in e-commerce and e-business systems
- outline business policies and procedures impacting job role or function
- identify relevant legislation, codes and standards relevant to the implementation of electronic technologies, including any obligations under the Australian Quality Training Framework (AQFT) Standards
- explain the effects of infrastructure on implementation of electronic technologies
- outline the technologies for implementing secure electronic payments
- explain methods for assuring safe and secure payment using electronic media
- explain current computing devices and technologies for mobile commerce
- explain principles of supply chain management.

BSBITS411 Maintain and implement digital technology

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to maintain the effectiveness of digital technology in the workplace. It includes maintaining existing technology, planning for future technology requirements, and identifying opportunities to improve workplace effectiveness and efficiency by introducing new digital technologies.

It applies to individuals with a broad knowledge of digital business technologies who may be required to contribute well-developed skills in creating solutions to maintenance and upgrade issues with existing digital technology. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Maintain performance of existing digital technologies	1.1 Monitor and evaluate system effectiveness to ensure it meets organisational and system requirements 1.2 Use operating system, available software, web-based tools, and relevant applications to identify performance problems

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Maintain digital technologies according to organisational requirements by troubleshooting solutions to diagnose issues
2. Maintain security and functionality of data and digital technologies	2.1 Carry out system back-up procedure at regular intervals according to organisational and system requirements 2.2 Install and operate software and other digital applications in accordance with developers' and organisational requirements 2.3 Identify sources of risk to digital security in line with organisational policies and requirements 2.3 Maintain and update digital security access procedures in line with organisational requirements 2.4 Ensure that licences for use of software are used, checked and recorded in accordance with organisational requirements
3. Identify future technology requirements and opportunities	3.1 Identify available and upcoming digital technology solutions by accessing relevant sources of information 3.2 Assess existing digital technologies against newly available and upcoming digital technology solutions to determine future needs, opportunities, and priorities 3.3 Identify and select new digital technologies to achieve and maintain continuous organisational development in line with organisational strategies 3.4 Develop and implement improved digital technology systems based on feedback from clients and colleagues, in line with organisational policies and requirements 3.5 Obtain management and budget approval for new selected technologies

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Gathers, analyses and interprets a range of textual information from a variety of sources and identifies relevant information

BSBITU112 Develop keyboard skills

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to develop basic keyboard skills (across multiple devices/keyboard types) using touch typing techniques in a broad range of settings.

It applies to individuals who perform a range of mainly routine tasks and generally work under direct supervision using limited practical skills and fundamental knowledge.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Use safe work practices	1.1 Adjust workspace, furniture and equipment to suit user ergonomic requirements 1.2 Ensure workspace meets organisational and work health and safety (WHS) requirements for device operation, taking into account type of device/keyboard to be used
2. Identify and develop keyboard skills	2.1 Identify and apply keyboard functions for both alpha and numeric keyboard functions on both physical and digital keyboards

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.2 Apply touch typing technique to complete a task 2.3 Develop speed and accuracy in accordance with workplace requirements for level of responsibility
3. Check accuracy	3.1 Proofread document carefully to identify errors 3.2 Amend document, correct errors and complete a final accuracy check

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Comprehends textual information in workplace documents to confirm work requirements • Checks own work to identify errors
Writing	• Enters and edits numerical and textual information according to a defined format
Navigate the world of work	• Complies with organisational requirements and meets expectations associated with own role
Get the work done	• Understands the specific functions and features of digital tools and uses these to perform work tasks

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Speed and accuracy must be:	• consistent with degree of experience of operator • relevant to level of responsibility.

Assessment Requirements for BSBITU213 Use digital technologies to communicate remotely

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- identify suitable methods for digital communication in the context of the purpose and content of the proposed communication
- follow organisational and technology provider requirements when communicating electronically across multiple digital applications/platforms, including in relation to security of communications
- follow organisational policy and procedures when managing all aspects of digital communication, including by storing, filing and archiving/deleting inbound communications
- communicate electronically with targeted groups of colleagues, clients or similar as relevant to organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features of existing and emerging methods of digital communication, including strengths and limitations of each
- Key features of relevant industry practice relating to digital communication etiquette in a workplace setting
- Key features of commercial sensitivities in relation to knowledge management
- Key features of relevant organisational policies and procedures relating to the use of digital communication.
-

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- industry technology
- relevant organisational policies and procedures
- relevant workplace documentation and resources
- industry applications/platforms for communicating digitally.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBITU306 Design and produce business documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design and produce various business documents and publications. It includes selecting and using a range of functions on a variety of computer applications.

It applies to individuals who possess fundamental skills in computer operations and keyboarding. They may exercise discretion and judgement using appropriate theoretical knowledge of document design and production to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Select and prepare resources	1.1 Select and use appropriate technology and software applications to produce required business documents 1.2 Select layout and style of publication according to information and organisational requirements 1.3 Ensure document design is consistent with company and/or client requirements, using basic design principles

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Discuss and clarify format and style with person requesting document/publication
2. Design document	2.1 Identify, open and generate files and records according to task and organisational requirements 2.2 Design document to ensure efficient entry of information and to maximise presentation and appearance of information 2.3 Use a range of functions to ensure consistency of design and layout 2.4 Operate input devices within designated requirements
3. Produce document	3.1 Complete document production within designated timelines according to organisational requirements 3.2 Check document produced to ensure it meets task requirements for style and layout 3.3 Store document appropriately and save document to avoid loss of data 3.4 Use manuals, training booklets and/or help-desks to overcome basic difficulties with document design and production
4. Finalise document	4.1 Proofread document for readability, accuracy and consistency of language, style and layout prior to final output 4.2 Make any modifications to document to meet requirements 4.3 Name and store document in accordance with organisational requirements and exit application without data loss/damage 4.4 Print and present document according to requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 2.2, 3.2, 3.4, 4.1	• Recognises and interprets textual information from a range of sources to determine and adhere to requirements • Applies strategies to self-correct and verify clarity and conformity of information

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	2.2, 2.3, 3.1, 4.2, 4.3	• Develops documents using required format, accurate spelling and grammar and terminology specific to requirements • Organises content to support purposes and audience of material, using clear and logical language
Oral Communication	1.4	• Confirms requirements with relevant personnel using specific terminology and listening and questioning techniques
Navigate the world of work	1.2, 1.3, 2.1, 2.4, 3.1, 3.2, 4.2-4.4	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.4	• Selects and uses appropriate conventions and protocols when communicating in a range of familiar work contexts
Get the work done	1.1-1.3, 2.1-2.4, 3.1-3.4, 4.1-4.4	• Uses basic features and functions within applications to access, store, organise data and perform routine work tasks

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- select appropriate technology and software for design and production of business documents
- adhere to organisational requirements when:
  - selecting layout and style
  - opening and generating files
  - producing documents within designated timelines
  - naming and storing documents
  - printing and presenting documents
- adhere to task requirements when producing documents including:
  - applying basic design principles
  - applying consistent formatting
  - using appropriate styles
  - using correct layouts
  - proofreading as required
- use appropriate data storage options
- apply knowledge of functions and features of contemporary computer applications
- print and present completed documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate technology for production requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe functions and features of contemporary computer applications
- outline organisational policies, plans and procedures
- list organisational requirements for document design e.g. style guide.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- office equipment and resources
- relevant software applications
- examples of style guides
- organisational procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Use safe work practices	1.1 Adjust workspace, furniture and equipment to suit ergonomic requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.2 Ensure work meets organisational and work health and safety (WHS) requirements for computer operation
2. Identify and develop keyboard skills	2.1 Identify and apply keyboard functions for both alpha and numeric strokes 2.2 Apply touch-typing technique to complete tasks 2.3 Develop speed and accuracy in accordance with workplace requirements for level of responsibility
3. Check accuracy	3.1 Proofread document carefully to identify errors 3.2 Amend document, correct errors and complete a final accuracy check

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.3, 3.1, 3.2	• Reviews information to be typed and recognises variations and inconsistencies with spelling and format
Writing	2.2, 2.3, 3.2	• Types numerical and textual information following a simple and defined format
Navigate the world of work	1.1, 1.2, 2.3	• Recognises and adheres to legislative and organisational requirements and meets expectations associated with own role
Get the work done	2.1-2.3, 3.1, 3.2	• Utilises a broad range of features and functions within digital applications in performing routine and complex tasks

Assessment Requirements for BSBITU307 Develop keyboarding speed and accuracy

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to remove reference to retired standard.
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop keyboard speed and accuracy in accordance with workplace, ergonomic, and work health and safety requirements
- complete a minimum of two 5-minute keyboarding speed and accuracy timings with at least 98% accuracy
- accurately proofread and amend documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key provisions of work health and safety (WHS) legislation that impact developing keyboard skills
- outline ergonomic requirements applicable to developing keyboard skills.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- relevant workplace documentation, including organisational policies and procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

- relevant legislation
- workplace resources, including industry software packages.

Assessment materials used for 5-minute keyboarding speed and accuracy timings must adhere to the following guidelines.

Subject

The subject of the test copy may be of a business or social nature.

Style

The test material must consist of continuous text without headings, enumerations or formatting features.

Syllabic intensity

The average syllabic intensity of the test material must range between 1.4 and 1.6 syllables per dictionary word.

Technical words, infrequently used words, commonly used words

The test material must not contain an unusually high proportion of highly technical, infrequently used words or commonly used words.

Numbers and signs

The test material may include numbers, signs and uppercase words, provided that they do not constitute more than one per cent of the total number of words.

Title

If the passage has a title, it does not form part of the test.

Length

The test material must be long enough to enable the individual to continue keying in previously unseen material for the duration of the test.

Warm up exercise

Individuals must have the opportunity to use a warm-up exercise.

Corrections

© Commonwealth of Australia, 2025 Future Skills Organisation

The automatic correction function may be used when completing a timing using a software package. Spell check cannot be used to correct errors at the completion of a timing.

On successful completion of this unit of competency, individuals may be issued with a speed and accuracy statement by a qualified workplace assessor or trainer.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ELEMENT	PERFORMANCE CRITERIA
	foreign key 1.5 Modify table layout and field attributes as required 1.6 Check and amend data entered, in accordance with organisational and task requirements
2. Create reports and queries	2.1 Identify information output, database tables to be used and report layout, in accordance with task requirements 2.2 Identify data groupings, search and sort criteria, in accordance with task requirements 2.3 Run reports and queries to check that results and formulae provide the required data 2.4 Modify reports to include or exclude additional requirements, where necessary
3. Use database	3.1 Ensure data input meets designated timelines and organisational requirements for speed and accuracy 3.2 Use help functions to overcome simple issues with database design and production 3.3 Preview, adjust and produce database reports or forms in accordance with organisational and task requirements 3.4 Name and store databases, in accordance with organisational requirements, and exit application without data loss or damage 3.5 Prepare and distribute reports to appropriate personnel in a suitable format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Recognises and interprets textual and numerical information to determine and confirm tasks are completed as per requirements
Writing	• Inputs numerical and key reporting information when creating and querying simple relational databases, and uses standard naming conventions and format to organise data
Numeracy	• Uses mathematical equations to create simple relational database queries and formulae

ELEMENT	PERFORMANCE CRITERIA
	1.4 Identify organisational and task requirements for text-based business documents to ensure consistency of style and image 1.5 Select most appropriate word processing application to produce document, in accordance with available resources and organisational policies
2. Design documents digitally	2.1 Design document structure and layout to suit purpose, audience and information requirements of task 2.2 Design document to enhance readability and appearance, and to meet organisational and task requirements for style and layout 2.3 Use available application functions to ensure consistency of design and layout, adhering to organisational and task requirements 2.4 Insert a standard table into document, changing cells, columns, and rows as necessary to meet information requirements 2.5 Insert and format visual elements (including, for example, images or icons) to meet organisational and task requirements for style and layout
3. Produce text documents digitally	3.1 Use intermediate-level application functions to enable efficient production of digital text documents 3.2 Enter or import, and edit text and other data to meet task requirements 3.3 Preview, adjust and prepare documents for delivery in accordance with organisational and task requirements 3.4 Name and store document, in accordance with organisational requirements and exit application without information loss/damage 3.5 Deliver document within designated timelines and organisational requirements for speed and accuracy 3.6 Use relevant help functions to overcome intermediate issues with document design and production

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Recognises and interprets textual information from a range of sources to determine and adhere to requirements

Assessment Requirements for BSBITU313 Design and produce digital text documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- follow correct ergonomic and conservation requirements, and relevant organisational policies and procedures
- design and produce digital text documents that align to document purpose and are appropriate to target audience
- adhere closely to task requirements and required specifications by:
  - following designated timelines
  - achieving consistency of style and image
  - ensuring correct editing and style requirements
  - adhering to designated timelines
- use application features for intermediate-level document design
- communicate effectively with relevant personnel
- overcome problems by referring to application help functions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key elements of intermediate-level formatting styles and their impact on formatting, readability and appearance of documents
- Key strengths and limitations of various word processing applications
- Key features of organisational requirements for ergonomics, work periods and breaks, and conservation techniques

© Commonwealth of Australia, 2025 Future Skills Organisation

- Key features relating to purpose and contents of organisational style guide.
-

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- office equipment and resources
- relevant word processing applications
- relevant organisational policies and procedures
- examples of correctly formatted text documents
- relevant workplace documentation and resources including style guides and user manuals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBITU314 Design and produce spreadsheets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to develop spreadsheets through the use of both cloud-based and non-cloud based spreadsheet applications.

It applies to individuals employed in a range of environments who tend to be personally responsible for designing and working with spreadsheets under minimal supervision. These individuals are generally required to have intermediate knowledge and understanding of a number of spreadsheet applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify suitable suppliers online	1.1 Identify purpose for goods or services to be procured 1.2 Conduct research to identify potential suppliers of required goods/services by accessing a range of digital sources/marketplaces 1.3 Assess service provider confidentiality, security and privacy facilities in accordance with individual and organisational requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Assess potential products/services for authenticity 1.5 Select most appropriate supplier of goods/services, in accordance with organisational budget, policies, and procedures
2. Procure goods or services online	2.1 Engage with supplier in a professional and appropriate manner via the relevant online platform 2.2 Identify risks in the digital transfer of information and take steps to ensure that information is secured in accordance with organisational requirements 2.3 Place purchase order with the relevant supplier using appropriate online functions to obtain required goods/services 2.4 Report any difficulties in accessing or using online facilities to the supplier as required 2.5 Make payment or receive invoice to complete transaction in accordance with terms of online transaction and organisational policies and procedures
3. Maintain records of online transactions	3.1 Maintain banking and other records of transactions in accordance with organisational policy, procedures and level of authority 3.2 Compare organisational records with online records and deal with irregularities according to organisational policy and procedures 3.3 Review goods/services obtained, assessing quality, timeliness, and level of customer service

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	• Accesses a range of online information and contextualises to transaction requirements
Reading	• Recognises and interprets numerical information within online content and organisational requirements to establish and complete required tasks and determine quality of content
Writing	• Ensures specific and relevant language is used to communicate required information, and information is accurately maintained

© Commonwealth of Australia, 2025 Future Skills Organisation

Oral Communication	• Articulates requirements clearly using listening and questioning techniques to clarify and confirm understanding • Delivers specific and factual information appropriate to audience and environment
Navigate the world of work	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	• Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer-term operational and strategic goals • Recognises a range of familiar problems and seeks assistance from appropriate parties • Uses a range of online applications to access, filter and extract information and process transactions

BSBLDR802 Lead the strategic planning process for an organisation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead the development of high-level strategic plans that serve the vision and mission of an organisation. It addresses analysing the environment, identifying risks and opportunities, planning staffing requirements, succession planning, and establishing and monitoring financial and non-financial performance indicators.

Leadership is applied in order to engage people with the organisation's vision and goals and in developing and implementing the plan.

It applies to senior managers and business owners who use cognitive and creative skills to review, critically analyse, consolidate and synthesise knowledge, in order to generate ideas and provide solutions to complex problems. They use communication skills to demonstrate their understanding of theoretical concepts and to transfer knowledge and ideas to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBLED502 Manage programs that promote personal effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage programs with a health and wellbeing focus. The unit addresses management of the range of programs that would typically be associated with health and wellbeing such as stress management, smoking cessation, exercise, and Employee Assistance Programs (EAPs).

It applies to individuals who take responsibility for managing staff health and wellbeing programs or activities.

It also has particular relevance for managers of human resources or diversity programs, frontline managers and specialist consultants responsible for promoting a balance between work demands and personal life. It is not assumed the individual will be directly involved in delivering the programs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- improve organisational capabilities by implementing advanced e-learning solutions
- identify and research trends in e-learning
- determine organisation’s learning requirements and create policy and procedures to support design or selection of e-learning resources to meet the organisation's requirements
- identify and report risks associated with e-learning implementation
- test, review and adjust e-learning resources and systems as required
- collaboratively research e-learning opportunities, constraints and improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how to create an effective learning experience using electronic technology
- describe a range of e-learning environments and their application in designing e-learning resources
- describe instructional design principles for electronic materials
- explain the considerations in devising an e-learning and assessment strategy
- describe methods for system testing and evaluation
- explain how international e-learning regimes and organisational policies and procedures impact on e-learning in the workplace
- list relevant policy, legislation, codes of practice and national standards, including AQTF Standards for Registered Training Organisations (if applicable).
-

BSBLED805 Plan and implement a mentoring program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and implement a mentoring program for a particular section or group within an educational organisation, or for a specific business purpose or objective within an enterprise whose core business is not education, or as a collaborative partnership spanning more than one organisation (such as to advance occupational or industry-specific skill needs).

It applies to individuals who plan, develop, implement, monitor and evaluate a mentoring program that results in learning forged through a defined and active learning partnership with a mentor. The program should develop and use tools that enhance both the learning and the phased relationship, and it should be monitored and evaluated to ensure it explores and meets the mentee's learning needs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBLED806 Plan and implement a coaching strategy

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan and develop a coaching strategy and to monitor implementation of the coaching program within an organisational context. A coaching strategy may be:

- an internal program forming part of the professional development activities of an educational organisation (such as a Registered Training Organisation) or an enterprise whose core business is not education
- developed for an external client, for example as part of the range of learning services offered or conducted in a collaborative partnership with more than one organisation.

It applies to individuals working to ensure learning advances individual and organisational capabilities. Leaders in learning are typically required to develop and implement coaching strategies in a systematic manner, and to monitor, review and improve strategies to optimise learning outcomes for individuals and the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBLIB502 Manage the development of collections

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- make and justify decisions regarding accessioning and de-accessioning collection material to meet collection needs
- apply organisational procedures and guidelines to manage development of collections
- negotiate and document processes and agreements in relation to collection material.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and interpret organisational procedures and guidelines regarding managing specific items and whole collections
- identify and explain the purpose of subject matter expertise, including curatorial and conservation
- locate and interpret sources for accessioning and de-accessioning options
- interpret and explain information regarding comparable collections and their importance
- describe legal, ethical and financial requirements for accessioning and de-accessioning
- locate and interpret cultural protocols for collections development and management that impact accessioning and de-accessioning of cultural material, including those for Aboriginal or Torres Strait Islander material
- explain security issues associated with collection material.

BSBLIB505 Develop disaster management plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to identify potential risks that could damage or destroy a collection of materials, and develop plans and take actions to eliminate or at least mitigate such risks.

It applies to individuals working in organisations holding significant collections. These include indoor and outdoor sites at museums, libraries, archives, galleries, cultural centres and organisations with records and information.

In large organisations, this role may be undertaken by specialist staff. However in many community-based organisations, generalists, often working with limited supervision such as managers, volunteers or committee members, may be responsible for the development of disaster management plans.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Maintain a record of key types of publications that provide information about literature 1.4 Source independent, print and electronic publisher reviews about literature 1.5 Use recognised classification systems to physically locate literary works and literary information 1.6 Update own knowledge of a broad range of literary works, publishing trends and formats 1.7 Share information collected on literary works, publishing trends and formats with colleagues
2 Implement a range of strategies to promote literature and reading	2.1 Research methods used to organise and access literature collections 2.2 Develop own strategies to promote literature and reading, including using current or emerging technologies 2.3 Interview and provide advice to customers to meet their literature and reading needs 2.4 Source information to meet customer literature requests 2.5 Identify and assess strategies used by organisations to promote reading, and adapt as appropriate for the organisation 2.6 Recommend purchase of literary works and literary information based on customer requests and analysis of reviews
3 Monitor and evaluate effectiveness of strategies to promote literature and reading	3.1 Analyse usage data to determine effectiveness of strategies 3.2 Track solicited and unsolicited feedback to the organisation regarding literature collections 3.3 Recommend changes to strategies in response to evaluation feedback

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.6, 2.1, 2.4-2.6,	• Selects, synthesises and critically evaluates ideas and information from multiple texts, continually reflecting

Assessment Requirements for BSBLIB507 Promote literature and reading

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- develop, implement and evaluate strategies to promote literature and reading
- meet customer literature requests
- apply information literacy skills when promoting literature and reading
- promote use of an organisation's collections and resources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- define the concept of literacy and describe the role organisations play in promoting reading
- analyse scope and arrangement of literature collections in libraries and related organisations
- identify relevant literature information sources located in publications such as:
  - blogs
  - catalogues
  - databases
  - websites
- describe and contrast methods for arranging literature collections
- identify several frequently asked literature requests and outline strategies for answering such requests
- identify several literature reference resources and describe their applications
- describe categories and genres into which literature is divided.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Library – Information Literacy field of work and include access to:

- use of special purpose tools, equipment, materials and industry software packages
- access to:
  - literature reference tools and resources
  - current industry systems to research information on literature
  - information about current and emerging technologies to promote literature.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBLIB508 Analyse and describe information resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to analyse and describe information resources in a range of formats so customers can easily retrieve information.

It applies to individuals who possess significant technical skills and knowledge to analyse and describe information materials according to national and international standards. Work is undertaken autonomously, within established guidelines.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Library – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify description requirements	1.1 Identify scope and likely use of resources 1.2 Assess customer requirements and expectations, including special needs 1.3 Determine appropriate type and structure of descriptions
2 Analyse resources	2.1 Use analysis and description tools and standards, precedents and techniques appropriate to the nature of the resources, including indexes

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.2 Analyse subject content of resources to clearly distinguish significant information from minor references 2.3 Integrate established general concepts and principles of description and knowledge of relevant standards, authorities and legislations. 2.4 Ensure concepts derived from analysis of resources are appropriate in context of the subject field
3 Describe resources and format descriptions	3.1 Create descriptions that represent concepts appropriately and reflect the overall purpose and intended use of the description 3.2 Conform format of description to general conventions 3.3 Develop a reference structure of descriptors to display relationships to assist customers 3.4 Enhance description to meet identified customer needs
4 Review description practices and procedures	4.1 In consultation with colleagues, review description practices and procedures to ensure they take account of industry developments and meet customer needs 4.2 Take appropriate action within scope of individual responsibility to enhance description practices and procedures 4.3 Check descriptions regularly for internal consistency and compliance with established structure, rules and authorities

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.4, 3.2-3.4, 4.1, 4.3	• Critically organises, analyses, evaluates and applies content from a wide range of potentially complex information, and distinguishes significant information from minor references
Writing	3.1-3.4, 4.1-4.3	• Utilises sophisticated writing skills to summarise information from multiple sources and express precise meaning appropriate to audience and context
Oral	1.1, 4.1	• Interacts effectively in verbal exchanges, using active listening and questioning, to convey and clarify

Release	Comments
Release 1	This version first released with BSB Business Services Training Package version 2.0

Performance Evidence

Evidence of the ability to:

- use tools, standards and communication skills to analyse and describe resources appropriately and satisfy customer requirements
- demonstrate use of current industry systems to analyse and describe a range of different resources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- apply principles of subject access to a specific resource
- demonstrate application of principles of thesauruses used in indexing
- compare and contrast types of indexes and abstracts
- demonstrate application of abstracting and indexing standards and methods, including descriptions and cross-referencing of access points and descriptors
- describe methods for allocating major and minor descriptors to information resources
- describe methods for matching reference structure to suit customer needs
- describe methods for enhancing subject access through indexing
- evaluate monitoring and review processes for indexes and abstracts.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Library – Information Management field of work and include access to:

- relevant policies and procedures manuals

Assessment Requirements for BSBLIB509 Provide subject access and classify material

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- construct subject access points and accurately classify material to be catalogued
- analyse subject content for cataloguing and classification purposes
- maintain and apply knowledge of bibliographic and catalogue record components, and cataloguing standards and conventions
- demonstrate a collaborative approach to resolving complex problems
- demonstrate use of current industry cataloguing systems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the purpose and function of various cataloguing tools
- select and apply appropriate classification schemes relevant to work context
- demonstrate subject access and control of methods, including:
  - authority control procedures
  - subject headings lists
  - thesauruses
- demonstrate application of authority systems and files
- select and apply common automated cataloguing modules relevant to work context
- critically review catalogue maintenance principles and activities
- compare and contrast ways of modifying and upgrading records to suit customer needs, including:
  - additional access points
  - establishing new authorities

© Commonwealth of Australia, 2025 Future Skills Organisation

- analyse precedents and their use to inform cataloguing of complex materials and demonstrate interpretation and judgement to deviate from precedents where necessary
- identify and apply national and international cataloguing standards
- review current industry trends relating to cataloguing and classification processes
- discuss copyright, moral rights and intellectual property issues and legislation relevant to cataloguing practices.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Library – Information Management field of work and include access to:

- relevant cataloguing standards, policies and procedures documents
- current industry cataloguing and classification tools, equipment, materials and industry software packages.

BSBLIB510 Use and monitor advanced functions of integrated library management systems

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to use and evaluate the functionality of integrated library management systems (ILMS) at an advanced level and to analyse the interrelated functions of an ILMS, as well as evaluate the systems and services.

It applies to individuals working autonomously, within established policies and procedures, in functional areas of libraries. In some contexts, work may involve supervisory or team leader roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Library – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Extend expertise in use of ILMS	1.1 Maintain currency of knowledge of basic functions and interrelation of different modules of an integrated library management system 1.2 Research enhanced functions of online catalogues, including web interfaces and applications 1.3 Provide information to customers regarding online catalogue

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	and circulation systems
2 Use advanced features of ILMS to assist customers	2.1 Use advanced search features of online catalogues to locate information resources for customers 2.2 Use advanced circulation system functionality to resolve complex borrower problems and complaints 2.3 Provide information to customers regarding range of services that may incur costs 2.4 Process financial transactions and provide customers with information about pre-paid service transactions 2.5 Refer complex customer transactions to relevant personnel
3 Use advanced ILMS functions for collection management	3.1 Order and receive library resources using automated acquisitions systems and procedures 3.2 Create records using automated cataloguing systems and procedures 3.3 Create reports and statistical data with different modules
4 Evaluate functionality of ILMS	4.1 Evaluate functions of an existing ILMS in relation to customer and organisational needs 4.2 Source information on current industry trends in relation to ILMS, including potential new systems, upgrades or add-ons 4.3 Consult with relevant personnel and make appropriate recommendations regarding improvements to ILMS

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

BSBLIB511 Research and analyse information to meet customer needs

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to provide customers with access to, and an analysis of, diverse and complex sources of information.

It applies to individuals working in public, corporate or institutional libraries, record management units, government departments, tourist information centres, community advisory organisations or other library and information services contexts, who respond to complex information needs, working autonomously with limited guidance from others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Library – Information Services

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Analyse information needs	1.1 Determine complete nature of information needs with reference to relevant documentation or information from customers 1.2 Conduct reference interviews with customers to determine specific information needs, including level, type and amount of information required

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Confirm the level of complexity customers need in their information 1.4 Formulate complex search strategies using sound knowledge of a broad range of potential information sources 1.5 Identify and assess customer expectations in relation to available resources and likely constraints 1.6 Advise customers of likely outcomes of information search and possible delivery options 1.7 Review and revise search terms or topics in consultation with customers
2 Implement strategies to locate difficult to find information	2.1 Consider access to information sources into account when evaluating different search strategies 2.2 Select and prioritise information sources 2.3 Evaluate and select logical and reasonable strategies to locate difficult to find information 2.4 Consult with colleagues, as required, to identify appropriate information sources 2.5 Use effective search techniques to locate relevant information 2.6 Assist customers to actively participate in search processes through practical demonstration of information-seeking skills
3 Ensure quality of customer service	3.1 Assess information obtained for its validity, reliability and suitability in relation to customer requirements and expectations 3.2 Ensure appropriate packaging and presentation of information to meet customer requirements and expectations, ensuring inclusion of relevant support information 3.3 Communicate with customers regarding problems, difficulties, suitable alternatives or follow-up requirements 3.4 Observe cultural sensitivities, ethics, privacy and copyright issues and obligations in meeting customer requirements

Assessment Requirements for BSBLIB511 Research and analyse information to meet customer needs

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- analyse information to ensure suitability to meet customer needs
- apply knowledge of the organisation's reference, research and general collections
- apply knowledge of types and scope of databases and other accessible reference tools
- define, locate, analyse and evaluate information
- demonstrate effective interviewing, communication and negotiation with customers about information needs
- efficiently and effectively respond to complex and varied information requests
- demonstrate effective search techniques using a range of print and electronic information sources and tools
- demonstrate working within time constraints that reflect industry practice and standards.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe scope and range of information sources available in print and electronic formats, including databases and technologies, such as current and emerging web applications
- analyse various techniques for searching and retrieving information from a range of sources, including the internet and other electronic sources
- compare and contrast strategies for obtaining information from external agencies or specialist organisations
- describe a range of available delivery options for presentation of information resources
- outline legal considerations relating to accessing information sources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- carry out and document activities according to procedures, including:
  - monitoring stock levels
  - ordering stock
  - unpacking and checking orders
  - storing and rotating stock
  - assisting in stocktaking
  - disposing of out-of-date stock
- communicate with required person if orders are incorrect.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant legislation, regulations, standards and codes of practice that affect stock
- explain enterprise policies and procedures for stock control including recordkeeping requirements for:
  - stock levels
  - stocktaking
  - disposal of out-of-date stock.

BSBMED401 Manage patient recordkeeping system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage a patient recordkeeping system within a medical environment and to supervise others. It covers clarifying roles and responsibilities, managing the operation of a patient recordkeeping system, and reviewing and improving the system. The unit does not cover the design of a new system but does cover reviews and improvements to an existing system.

It applies to individuals managing an existing recordkeeping system (and sub-systems within the overall system) in a medical context. It may involve supervising the work of other personnel who implement the system and maintain patient records day-to-day. It also involves working with users of the system such as the health practitioners in the enterprise.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – Medical Services Administration

BSBMGT404 Lead and facilitate off-site staff

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to supervise staff who perform agreed duties at an alternative site (usually home) during some or all of the scheduled work hours. Off-site work is a flexible employment option that meets all legal and regulatory employment requirements.

It applies to individuals who may be supervisors or team leaders and have responsibility for overseeing the work of off-site staff.

Increasingly, managers and staff are at different locations and the opportunities for face to face communication are reduced. In these cases, individuals must develop different techniques and approaches to ensure quality standards and work outcomes are met.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBMGT516 Facilitate continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead and manage continuous improvement systems and processes. Particular emphasis is on the development of systems and the analysis of information to monitor and adjust performance strategies, and to manage opportunities for further improvements.

It applies to individuals who take an active role in managing a continuous improvement process in order to achieve an organisation's objectives.

At this level, work will normally be carried out using complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem-solving and decision-making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBMGT521 Plan, implement and review a quality assurance program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, implement and review a quality assurance program for an organisation's products, processes or services. It covers determining the organisation's quality assurance objectives and defining product quality standards based on the needs of the customer.

It applies to individuals in any sector or type of organisation who take an active role in managing people, procedures or processes to achieve an organisation’s quality objectives. At this level, work will normally be carried out using complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem-solving and decision-making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBMGT803 Use financial and economic information for strategic decision making

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to analyse financial and economic information to achieve the objectives of an organisation. It covers the use and interpretation of financial information to support business decision making, analysis and use of budget systems and reporting processes and the impact of micro and macro-economic information on enterprise planning.

It applies to senior management, including strategic business analysts and executive managers, who use cognitive and creative skills to review, critically analyse, consolidate and synthesise knowledge, generate ideas and provide solutions to complex problems. They use communication skills to demonstrate their understanding of theoretical concepts and to transfer knowledge and ideas to others.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

BSBMKG409 Design direct response offers

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design, implement and evaluate direct response offers which match organisational business and marketing objectives and resolve marketing problems.

It applies to individuals working in a marketing assistant or account manager role who are required to design direct marketing offers for products or services. Such individuals may work in small, medium or large enterprises across a variety of industries; they usually work with a team and customers to design offers.

Direct response offers include payment related promises such as offers in relation to exchanging goods and services for money; terms of payment; performance and quality guarantees; delivery method; and time, place and method of order placement. Offers may also be made that do not involve payment matters, such as the offer of a free brochure or catalogue in return for providing a name and address.

No licensing, legislative or certification requirements apply to this unit at the time of publication.
