Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- collaborated with at least 3 different people with mental illness to develop, implement and review a plan for recovery using recovery orientated approaches
- performed the activities outlined in the performance criteria of this unit during a period of at least 80 hours of work
Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (international, national, state/territory and local) for mental health work, and how these are applied in organisations and individual practice:
  - codes of practice
  - discrimination
  - dignity of risk
  - duty of care
  - human rights
  - mandatory reporting
  - practice standards
  - privacy, confidentiality and disclosure
  - policy frameworks
  - records management
  - rights and responsibilities of workers, employers and individuals accessing the service
  - specific mental health legislation and its impact on individual workers
  - work role boundaries – responsibilities and limitations
  - work health and safety
- values and principles of the mental health sector
  - recovery
  - recovery oriented practice
  - health promotion and prevention
  - holistic approach
  - empowerment/disempowerment
  - access and equity
  - early intervention
  - rights
  - social justice and inclusion
  - citizenship
- evidence base for recovery including research and personal recovery experience
- types of mental illness
- local and international best-practice frameworks for:
  - planning
  - assessment
  - implementing plan
  - review
- strategies to:
  - support a person in distress or crises
  - de-escalate incidents of risk
- historical, current and emerging models of understanding mental illness in Australia and internationally
- techniques for communication and motivational interviewing/counselling, including:
  - active listening
- attending skills, use of body language, non-verbal communication
- paraphrasing
- reflecting feelings
- open and closed questioning or probing
- summarising
- reframing
- exploring options
- normalising statements
- reflective practice and its role in underpinning ongoing learning, growth and good practice

**Assessment Conditions**

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.
