Assessment Requirements for CPCCCA3005 Construct ceiling frames

Release: 2

Assessment Requirements for CPCCCA3005 Construct ceiling frames

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Performance Criteria 3.3 removed

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCA3005B Construct ceiling frames.
Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by planning, setting out, constructing and erecting a timber ceiling frame for structure with a minimum of three rooms and minimum area of 30 square metres.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to constructing ceiling frames, including AS 1684 Residential timber-framed construction
- workplace quality policies and standards for constructing ceiling frames
- safety requirements for constructing ceiling frames:
 - working at heights
- waste disposal requirements relevant to constructing ceiling frames
- materials handling relevant to constructing ceiling frames
- correct use of tools and equipment used to construct ceiling frames
- processes for:
 - setting out and measuring materials for ceiling frames
 - calculating material requirements for ceiling frames
- materials for constructing ceiling frames:
 - types of timber
 - engineered timber products and their structural properties and applications.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.
