Release: 2

CPCCOM3001 Perform construction calculations to determine carpentry material requirements

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.6.

Typographical error corrected in Performance Criteria 3.3.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

New unit.

Application

This unit of competency specifies the skills and knowledge required to plan and perform calculations to determine material requirements for a construction project.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001* Prepare to work safely in the construction industry meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Plan and prepare.

1.1 Review drawings, specifications and workplace requirements for a construction project.

1.2 Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian

Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.

- | | |
|--|---|
| 2 Calculate area and volume of construction materials for the project. | 2.1 Review drawings and specifications to determine dimensions of each type of construction material for the project. |
| | 2.2 Calculate the area of each type of lining material. |
| | 2.3 Calculate the total area of the building wrap and of each type of external cladding material. |
| | 2.4 Calculate the total area of each type of roofing material. |
| | 2.5 Calculate the quantity of materials that are measured by volume. |
| 3 Calculate the requirements for construction for the project. | 3.1 Calculate the quantity of wall and roof framing materials. |
| | 3.2 Calculate the dimensions and quantity of sheets of each type of flooring and lining material, ensuring that the most economical layout is employed. |
| | 3.3 Calculate the length of linear flooring and lining material, ensuring that the most economical layout is employed. |
| | 3.4 Calculate the dimensions and quantity of sheets of external cladding material, ensuring that the most economical layout is employed. |
| | 3.5 Calculate the length of linear external cladding material, ensuring that the most economical layout is employed. |
| | 3.6 Calculate the dimensions and quantity of sheets or units of roofing material, ensuring that the most economical layout is employed and allowing for overlaps. |
| 4 Check and record results. | 4.1 Record workings and review calculations for accuracy. |
| | 4.2 Record results of calculations as required for costing and ordering materials. |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.
