# Assessment Requirements for CPCCPB3022 Use mechanical jointing equipment to finish joints

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and equivalent to CPCCPB3022A Use mechanical jointing equipment to finish joints. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must satisfy all of the elements, performance criteria and foundation skills of this unit by using mechanical filling and taping equipment to finish a minimum of 3 metres of each of the following:

- smooth and even crowned joints
- internal angles
- external angles
- ceiling joints
- square set joints.

All work must be performed to the standard required in the workplace and must comply with Commonwealth and state/territory laws and regulations, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, and workplace requirements.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of Australian Standards for using mechanical equipment to finish joints
- quality policies and standards for using mechanical equipment to finish joints
- safety requirements for using mechanical equipment to finish joints, including personal protective equipment (PPE), job safety analyses, safe work method statements and safety data sheets
- environmental requirements for using mechanical equipment to finish joints
- processes and techniques for using mechanical equipment to finish joints
- manufacturers' specifications for equipment and materials
- types of mechanical tools and equipment for finishing joints.

## Assessment Conditions

This unit must be assessed:

- in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques replicate construction workplace conditions, materials, activities, responsibilities and procedures
- using realistic tasks or simulated tasks, relevant specifications and work instructions, standard work practices, safety requirements and environmental constraints.
