CPPCLO3015 Treat complex carpet stains

Release: 2

CPPCLO3015 Treat complex carpet stains

Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCCL3015A Perform advanced stain removal. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

Application

This unit of competency specifies the outcomes required to remove complex stains from carpets after standard stain removal and cleaning techniques have failed. It covers selecting and preparing required equipment and chemicals, and applying complex stain removal techniques to the task.

The unit supports carpet cleaners who work alone or in teams. It applies in a range of commercial and residential work sites. Removing stains is undertaken as a separate task or in conjunction with other cleaning methods, such as vacuuming, extraction and general cleaning.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Pre-requisite Unit

Nil

Unit Sector

Cleaning operations

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- | | |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Plan and prepare. | 1.1. Type and condition of carpet, fibre and construction are identified, <i>complex stains</i> are assessed, job requirements are reviewed, and issues are clarified. |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

- 1.2. Work site ***hazards*** are assessed and risks controlled according to company, legislative, and ***health and safety requirements***.
 - 1.3. ***Complex stain removal techniques*** are selected according to job and company requirements.
 - 1.4. ***Equipment*** is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
 - 1.5. Required ***cleaning chemicals*** are selected and prepared.
 - 1.6. ***Personal protective equipment*** (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
 - 1.7. Signs and barricades are selected and installed according to health and safety, and company requirements.
 - 1.8. Pre-existing damage is identified and reported according to company requirements.
 - 1.9. Tasks are sequenced to ensure maximum efficiency for completing cleaning requirements.
2. Clean complex carpet stain.
 - 2.1. Furniture and fittings are removed to allow cleaning tasks to be performed.
 - 2.2. Pre-spotting cleaning treatment is applied to carpet stain and allowed to dwell according to manufacturer recommendations.
 - 2.3. Soil is removed using required techniques, equipment and chemicals, according to manufacturer specifications.
 - 2.4. Treated area is compared with surrounding surface to determine need for further action according to job and company requirements.
 - 2.5. Results are reported according to company requirements.
3. Tidy work site.
 - 3.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
 - 3.2. Furniture and fittings are returned to original position according to client requirements.

- | | | |
|-------------------------------------------------------------------------|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | 3.3. | Signs and barricades are removed according to health and safety, and company requirements. |
| 4. Clean and safety check equipment, and store equipment and chemicals. | 4.1. | Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements. |
| | 4.2. | Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements. |

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Numeracy skills to:	<ul style="list-style-type: none"> dilute and mix required chemicals using whole numbers and routine fractions.
Oral communication skills to:	<ul style="list-style-type: none"> ask questions to clarify job requirements respond clearly and concisely to client questions.
Reading skills to:	<ul style="list-style-type: none"> interpret simple, structured manufacturer instructions when using equipment and preparing chemicals interpret directions and safety instructions, including: <ul style="list-style-type: none"> equipment operating manuals product labels safety data sheets (SDS).
Writing skills to:	<ul style="list-style-type: none"> document and report faults in equipment to manufacturer and other personnel.
Teamwork skills to:	<ul style="list-style-type: none"> work collaboratively with others at the same work site.
Problem-solving skills to:	<ul style="list-style-type: none"> identify and perform a range of methods for cleaning stubborn stains without causing damage to the carpet.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs

of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Complex stains must include at least five of the following:

- beverage
- candle wax
- chewing gum
- cigarette butts
- dye stuffs
- food
- grease
- heavy dirt build-up
- hospital waste
- industrial and chemical waste
- lipstick
- nail polish
- oil
- plant stains
- shoe polish
- tar.

Hazards that must be assessed include:

- biological and environmental contaminants
- chemical exposure via absorption, ingestion and inhalation
- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.

Health and safety requirements must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals

- risk assessment procedures, including:
 - hazardous chemicals register
 - hierarchy of control
 - job safety analyses (JSA) for low-risk situations
 - safe work method statements (SWMS) for high-risk situations
 - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.
- chemical treatment followed by transfer method using hand application
- chemical treatment followed by extraction spot cleaning
- dye stripping
- heat transfer with a steam iron
- oxidisation.
- carpet groomers
- carpet spot-cleaning kits
- cloths
- extraction units
- eye droppers
- garbage bins
- nylon bristle brushes
- scrapers
- sponges
- spray equipment
- steam generators
- steam irons.
- acid cleaners
- alkaline cleaners
- low environmental impact chemicals
- neutral cleaners
- oxidising agents, such as bleaches
- reducing agents, such as dye strippers
- solvents.
- eye protection
- gloves
- respirators
- safety shoes.

Complex stain removal techniques

must include at least one of the following:

Equipment must include at least two of the following:

Cleaning chemicals must include at least one of the following:

Personal protective equipment must include at least two of the following:
