CPPCLO3035 Maintain cleaning storage areas

Release: 1

CPPCLO3035 Maintain cleaning storage areas

Modification History

Release 1.

Replaces superseded equivalent CPPCLO2035A Maintain cleaning storage areas.

This version first released with CPP Property Services Training Package Version 4.

Application

This unit of competency specifies the outcomes required to maintain cleaning consumable storage areas to ensure they are accessible to authorised personnel only, that their contents are safely stored, and that equipment is maintained in serviceable condition. It requires the ability to maintain and operate a safe and efficient cleaning storage area following established procedures for storing and using chemicals according to legislative and health and safety requirements. The unit includes the movement and control of equipment, chemicals and consumables used in the provision of cleaning services.

The unit supports cleaners who work alone or in teams. It applies to storage areas in a range of commercial and residential work sites, including cleaners' rooms at a client work site, chemical cupboards, equipment storage bays, and in-built vehicular storage arrangements to keep consumables and equipment secure during transportation.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Pre-requisite Unit

Cleaning operations

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Ensure safety and security of cleaning storage area and its contents.
 - 1.1. **Storage area** is secured from unauthorised access according to legislative, company, and **health and safety requirements**.
 - 1.2. **Hazards** in storage area are assessed and risks controlled according to legislative, company, and health and safety requirements.
 - 1.3. Safety warning charts and labels are prominently displayed and **safety information** is made accessible according to legislative, company, and health and safety requirements.
 - 1.4. **Equipment** is stored, maintained and checked to enable ready access and re-use according to manufacturer specifications and legislative, company, and health and safety requirements.
 - 1.5. **Cleaning chemicals** and **consumables** are stored according to manufacturer specifications and legislative, company, and health and safety requirements.
 - 1.6. **Personal protective equipment** (PPE) is cleaned, safety checked and stored, and maintenance requirements are recorded, according to manufacturer specifications, and health and safety and company requirements.
 - 1.7. Communication tools are stored and used according to company requirements.
 - 1.8. Storage area is kept accessible and free of obstacles according to practical restrictions of site or vehicle, and health and safety and company requirements.
2. Control equipment, chemical and consumable stock.
 - 2.1. Inventory system of equipment, PPE, chemicals and consumables with maximum and minimum holding levels is maintained according to company requirements.
 - 2.2. Usage patterns are monitored and chemicals and consumables are re-ordered to maintain required levels according to company requirements.
 - 2.3. Labelling system of containers is maintained according to manufacturer specifications and legislative, company, and health and safety requirements.
 - 2.4. Chemicals and consumables are issued on a first-in

- first-out basis according to company requirements.
3. Handle waste.
 - 3.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
 - 3.2. Obsolete equipment and chemicals are identified, collected and disposed of according to manufacturer specifications, and environmental, legislative, company, and health and safety requirements.
 4. Respond to emergency situations.
 - 4.1. Spillages and emergency situations are responded to in line with emergency response procedures and according to environmental, legislative, company, and health and safety requirements.
 - 4.2. Required documentation is completed following an emergency situation and submitted according to environmental, legislative, company, and health and safety requirements.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	<ul style="list-style-type: none"> • identify and access a range of resources to assist in maintaining security and safety of cleaning storage area.
Numeracy skills to:	<ul style="list-style-type: none"> • calculate current and required levels of stock.
Oral communication skills to:	<ul style="list-style-type: none"> • ask questions to clarify job requirements.
Reading skills to:	<ul style="list-style-type: none"> • interpret simple, structured manufacturer instructions when using equipment and chemicals • interpret directions and safety instructions, including: <ul style="list-style-type: none"> • equipment operating manuals • product labels • safety data sheets (SDS).
Writing skills to:	<ul style="list-style-type: none"> • report faults in equipment to manufacturer and other personnel • use legible handwriting when recording stock levels and completing incident reports.

- Teamwork skills to:
- work collaboratively with others accessing and using the same storage area.
- Initiative and enterprise skills to:
- proactively report the need for additional products or equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Storage area*** must include at least one of the following:
- cleaners' room located at client work site
 - in-vehicular cleaning storage facility.

- Health and safety requirements*** must include:
- access to communication devices when working alone
 - compliance with Safe Work Australia regulations and guidelines
 - electrical equipment test and tag compliance
 - emergency response procedures
 - environmental controls
 - hazard signs and barricades
 - health and safety induction and refresher training
 - manual handling techniques
 - processes for safely dispensing chemicals
 - risk assessment procedures, including:
 - hazardous chemicals register
 - hierarchy of control
 - job safety analyses (JSA) for low-risk situations
 - safe work method statements (SWMS) for high-risk situations
 - incident reporting
 - SDS
 - selection and use of required PPE
 - storage and maintenance of equipment according to manufacturer specifications
 - use of first aid according to SDS information.
- Hazards*** that must be assessed include:
- biological and environmental contaminants
 - chemical exposure via absorption, ingestion and inhalation
 - chemical reactivity
 - dust and fibre particulates

- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.
- chemical co-location, separation and segregation arrangements
- chemical manifests
- chemical registers
- company policies and procedures relating to workplace safety
- equipment operation manuals
- manufacturer specifications
- product labels
- SDS.

Safety information must include:

Equipment must include at least five of the following:

- access equipment, such as ladders
- bins
- brooms
- buckets
- buffers
- cleaning trolleys
- cloths
- cobwebbers
- doodle bag holders
- drop sheets
- drying equipment
- dustpans and brushes
- dusters
- extension poles
- extraction units
- wands
- hoses
- microfibre products
- mops
- polishers
- pressure-washing equipment and attachments
- scouring pads
- scrapers

- scrubbers
- sponges
- spray bottles
- squeegees
- steam cleaners
- sweepers
- vacuum cleaners and attachments
- window cleaning equipment
- work site communication devices.

Cleaning chemicals must include at least one of the following:

- acid cleaners
- alkaline cleaners
- low environmental impact chemicals
- neutral cleaners
- solvent cleaners.

Consumables must include at least two of the following:

- air fresheners
- hand towels
- liner bags
- soap
- toilet paper.

Personal protective equipment must include at least two of the following:

- disposable respirators
- eye protection
- gloves
- protective clothing
- safety shoes.
