# Assessment Requirements for CPPWMT3005 Maintain storage area for waste management equipment and consumables

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes but is not equivalent to CPPWMT2034A Maintain equipment and consumables storage area.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- identifying appropriate storage conditions for eight types of equipment from the list below:
  - compactor
  - consumable container
  - conveyor
  - generator
  - lifting and load-shifting equipment
  - personal protective equipment (PPE)
  - pump
  - sampling equipment
  - scales
  - skip
  - sorting table
  - spill kit
  - tools
  - trailer
  - trolley
  - vacuum
- storing two of the following fuels and chemicals in approved locations to meet regulatory requirements:
  - diesel
  - gas cylinder
  - oil
  - fertiliser

- controlling stock levels of consumables used in the workplace and producing one inventory report for a defined period.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and procedural requirements applicable to maintaining storage areas for waste management equipment and consumables and relevant to the workplace:
  - Australian Standards and codes of practice
  - commonwealth, state and territory legislation and regulations in the state or territory of operation, including work health and safety (WHS)
  - classifications of dangerous goods and hazardous substances
  - environmental protection
  - safety data sheets (SDSs)
- methods for safely mixing and decanting liquids, including flammable liquids
- methods for safely storing and securing fuels and chemicals
- procedures for labelling and coding consumables used in waste management, including dangerous goods
- requirements for maintaining chemical manifests and registers
- types of equipment and consumables used in waste management
- typical hazards encountered when maintaining storage areas for waste management equipment and consumables
- workplace policies and procedures for maintaining a storage area for waste management equipment and consumables:
  - documentation and reporting
  - inventory and stock control records and systems
  - plant and equipment maintenance
  - container labelling
  - WHS:
    - duty of care
    - emergency response
    - hazard identification, risk assessment and control using the hierarchy of control
    - injury, dangerous occurrence and incident reporting
    - PPE.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to workplace policies and procedures, SDSs, waste management storage area, equipment, consumables, and inventory system required to achieve the performance evidence.
