1. Prepare to protect critical infrastructure and public assets.	<p>1.1 Review workplace policies and procedures to ensure compliance with legal rights and responsibilities when protecting critical infrastructure and public assets.</p> <p>1.2 Review work instructions to confirm procedures for protecting critical infrastructure or public assets, including emergency and evacuation.</p> <p>1.3 Discuss and clarify authority, role and responsibilities of self and delegated personnel to implement security procedures that protect critical infrastructure and public assets.</p> <p>1.4 Check communication equipment to confirm correct working order and resolve problems.</p>
2. Monitor security of work area.	<p>2.1 Monitor security of the work area to maintain vigilance and observational awareness according to work instructions.</p> <p>2.2 Gather intelligence to clarify the nature of potential security threats in consultation with delegated personnel.</p> <p>2.3 Verify the authority of people, items and vehicles in the work area, and take necessary actions to maintain security and safety of self, others, property and premises.</p>
3. Identify, report and respond to security threats.	<p>3.1 Identify indicators of potential terrorist or criminal activity.</p> <p>3.2 Use communication equipment to immediately report suspected threats to critical infrastructure or public assets following chain of command procedures.</p> <p>3.3 Receive and follow instructions to maximise the safety of self and others, and security of critical infrastructure and public assets.</p> <p>3.4 Record details of security threat and response using documentation in accordance with workplace requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to:

- provide information or advice using structure and language to suit the audience
- use security industry approved communication terminology, codes and signals
- writing skills to clearly and accurately record details of security threats and responses
- reading skills to interpret:
  - directional signs and information in written, pictorial and diagrammatic forms, such as emergency and evacuation procedures and site maps
  - procedures and policies that clarify legal rights and responsibilities
  - identity documentation when verifying the authority of persons and vehicles
- speaking and listening skills to:
  - give clear, sequenced instructions when using communication equipment to report security threats
  - use questions to clarify understanding when receiving spoken instructions
- numeracy skills to estimate time required to complete work tasks
- problem solving skills to:
  - identify faults and malfunctions in communication equipment
  - recognise suspicious items, behaviours and activities
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

Supersedes and is non-equivalent to CPPSEC1005A Apply critical infrastructure protection procedures. Significant changes made to the unit to reflect current industry needs.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3125 Implement security procedures to protect critical infrastructure and public assets

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC1005A Apply critical infrastructure protection procedures. Significant changes made to the unit to reflect current industry needs.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must implement security procedures to protect critical infrastructure or public assets in response to three different threats involving different locations.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when implementing security procedures to protect critical infrastructure and public assets:
  - anti-discrimination and diversity
  - apprehension, arrest and restraint of persons
  - counter terrorism
  - duty of care
  - licensing requirements and limits of own authority
  - personal search
  - use of force
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- current national terrorism threat level and context
- designated personnel responsible for collaborating to protect critical infrastructure and public assets
- indicators of potential terrorist activity
- methods for gathering intelligence and identifying sources of threat to critical infrastructure and public assets
- procedures for monitoring security of critical infrastructure and public assets
- process of dynamic risk assessment and how it is applied

- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
  - general features of improvised explosive devices and recommended incident response
- risk and associated risk events relating to critical infrastructure and public assets
- site emergency and evacuation plans and procedures
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- types of national critical infrastructure and public assets and the general impact of their destruction, degradation or unavailability on national well-being and security capabilities
- types of terrorist and criminal activity that can threaten the security of critical infrastructure and public assets.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to implement security procedures to protect critical infrastructure and public assets
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry including Australia's *Strategy for Protecting Crowded Places from Terrorism*
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC3126 Defend persons using spray

## Modification History

Release 1.

Supersedes and equivalent to CPPSEC3016A Defend persons using spray.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to defend persons using spray, commonly known as 'capsicum' (oleoresin capsicum) or 'pepper' spray.

It includes:

- complying with policies, procedures and legal rights and responsibilities including workplace health and safety (WHS)
- identifying and assessing the need to use spray based on risk and threat levels, and confirming personal safety needs including personal protective equipment (PPE) and options for withdrawal
- using negotiation techniques to defuse conflict and give spoken warning of the intention to use spray
- discharging spray in a controlled manner and adjusting discharge to respond to changing circumstances in a manner that protects self and others and does not cause undue harm to the subject
- monitoring the wellbeing of the subject and providing required assistance.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Assess need to use spray and response options.	1.1 Review workplace procedures and policies to ensure compliance with legal rights and responsibilities when using spray for security work. 1.2 Inspect spray canister for correct operation, locate actuator button, and clarify procedures for use. 1.3 Assess need to use spray against known information and potential and existing risks and threats, and decide preferred response option to contain incident.
2. Confirm personal safety needs and present spray.	2.1 Select and use PPE to meet WHS requirements. 2.2 Check and confirm personal safety needs and identify withdrawal options. 2.3 Present spray in a non-threatening manner while maintaining eye contact with subject.
3. Negotiate and give warning.	3.1 Use interpersonal techniques to exchange information with the subject and negotiate to defuse conflict and aggression. 3.2 Give clear spoken warning to the subject and advise of intention to use spray.
4. Discharge spray.	4.1 Control and direct spray to contain source of threat following manufacturer's specifications. 4.2 Discharge spray ensuring canister is upright and that grip and handling allows secure retention and continued control. 4.3 Use tactical positioning that is fluid, uses available cover and protection and allows options for withdrawal. 4.4 Adjust discharge to respond to changing circumstances and discontinue spray immediately when threat ceases. 4.5 Monitor wellbeing of subject and provide care or seek immediate assistance from relevant persons. 4.6 Decontaminate self, clothing and equipment from spray exposure.
5. Evaluate spray use and maintain spray.	5.1 Review and evaluate effectiveness of response using spray against incident circumstances and observations, in consultation with relevant persons. 5.2 Identify improvements to future security response procedures using spray. 5.3 Inspect condition of spray and report identified faults.

	<p>5.4 Complete and securely maintain documentation in accordance with workplace requirements.</p> <p>5.5 Recognise effects of stress and manage own well-being using stress management techniques.</p>
--	---

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information or advice in a form that is preferred and understood by the receiver and engages minority groups
- writing skills to:
  - record and describe incident observations and actions taken
  - complete routine reports and forms
- reading skills to interpret:
  - workplace procedures and policies that clarify legal rights and responsibilities
  - read canister labels to interpret manufacturer's instructions for using and maintaining spray and giving first aid
- speaking and listening skills to:
  - use questions and active listening to exchange and understand information with subject
  - control tone of voice when negotiating with the subject
  - give clear and succinct spoken warnings and directions when negotiating with the subject
  - use a radio to give clear and sequenced information when reporting incident details
- numeracy skills to estimate optimal distance for spray effectiveness and how long to spray
- problem solving skills to:
  - formulate response options to match nature of risk
  - recognise situations requiring the need to call emergency services.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3016A Defend persons using spray.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3126 Defend persons using spray

## Modification History

Release 1.

Supersedes and equivalent to CPPSEC3016A Defend persons using spray.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must defend persons using spray in response to three different threat situations involving subjects holding weapons.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when defending persons using spray:
  - anti-discrimination and diversity
  - apprehension, arrest and restraint of persons
  - duty of care
  - licensing requirements and limits of own authority
  - use of force
  - workplace health and safety (WHS)
- application methods for spray including how to hold the canister, how to discharge spray, target placement, distance and length of spray
- approved communication terminology, call signs and radio channels used in the security industry
- arrest and control techniques using spray
- basic negotiation techniques
- methods for caring for a spray recipient
- methods for decontamination after exposure to spray
- methods for storing and maintaining spray canisters
- methods of restraint and associated effects, including signs and symptoms of asphyxiation
- procedures for communicating with emergency services personnel
- procedures for effecting an arrest
- process of dynamic risk assessment and how it is applied

- response options using spray that are within specified legal limits
- risks associated with using spray and common physiological effects and symptoms, particularly related to eyes and the respiratory tract
- security risk situations that warrant the use of spray and situations where use may amount to excessive use of force
- signs that a person may be suffering from emotional or physical distress
- signs that a person may be suffering from mental illness
- signs that a person may be under the influence of intoxicating substances
- tactical positioning to be adopted when using spray
- types and purpose of sprays that may be used for security purposes
- types and uses of personal protective equipment (PPE) required when using spray
- ways in which social and cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to defend persons using spray
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations
- access to spray and threat scenarios to allow achievement of the performance evidence.

# CPPSEC3127 Conduct security screening using x-ray equipment

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC1006A Apply x-ray image interpretation procedures. Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to conduct security screening of items using x-ray equipment. X-ray equipment includes single or multi-view equipment which may have threat-image projection system capability that can differentiate between organic and inorganic material.

It includes:

- setting up, testing and operating x-ray equipment and managing the position and flow of items through the screening point
- interpreting x-ray images to clarify the meaning of colours, shapes and sizes and using image enhancement functions to detect the presence of prohibited items such as weapons, explosives or dangerous goods
- maintaining situational awareness to monitor and maintain security and respond quickly to detect and report security risks.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

essential outcomes.	demonstrate achievement of the element.
1. Prepare for screening using x-ray equipment.	<p>1.1 Review workplace procedures and policies to ensure compliance with legal rights and responsibilities when screening items using x-ray equipment.</p> <p>1.2 Set up and test x-ray screening equipment following manufacturers' instructions, and rectify or report problems to relevant persons.</p>
2. Operate x-ray equipment and screen items.	<p>2.1 Identify hazards and risks in the work area and implement necessary controls to maintain safety of people and property.</p> <p>2.2 Operate x-ray screening equipment following manufacturers' instructions.</p> <p>2.3 Manage position and flow of items through screening point for optimal image interpretation.</p>
3. Interpret x-ray images.	<p>3.1 Review x-ray images and verify meaning of colours, shapes and sizes of items being screened.</p> <p>3.2 Manipulate images using enhancement functions to clarify item components, and seek assistance in situations where image features cannot be clarified.</p>
4. Detect and report prohibited items.	<p>4.1 Detect actual or suspected prohibited items on x-ray image and check image features to confirm findings.</p> <p>4.2 Use security equipment to immediately report the presence or suspected presence of prohibited items to relevant persons.</p> <p>4.3 Monitor persons and items in the screening area to maintain situational awareness and promptly respond to potential security risks.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to use security industry approved communication terminology, codes and signals
- reading skills to interpret:
  - procedures and policies that clarify legal rights and responsibilities
  - manufacturers' instructions and equipment labels when setting up, testing and operating x-ray equipment
  - coloured, pictorial, graphical and written information and instructions
- speaking and listening skills to:

- give clear, sequenced instructions when managing position and flow of items
- use a radio or phone to report and describe detected prohibited items
- use questions to receive instructions when seeking assistance
- numeracy skills to interpret and calculate numerical information when calibrating x-ray equipment and interpreting images
- problem solving skills to:
  - identify equipment faults and malfunctions
  - recognise suspicious items and behaviours.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC1006A Apply x-ray image interpretation procedures.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3127 Conduct security screening using x-ray equipment

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC1006A Apply x-ray image interpretation procedures.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must on two separate occasions, conduct security screening using x-ray equipment, involving, on each occasion:

- correctly positioning and screening six different items
- correctly identifying the nature of the items by interpreting the colours, shapes and sizes of their x-ray images
- correctly using image enhancement functions of equipment to identify:
  - one weapon
  - the presence of explosives
  - the presence of another type of prohibited item, such as a dangerous good.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when conducting security screening using x-ray equipment:
  - anti-discrimination and diversity
  - counter terrorism
  - dangerous goods
  - duty of care
  - limits of own authority
  - workplace health and safety (WHS)
- components, operating principles and characteristics of typical weapons, explosives and prohibited items that may be contained in items being screened
- current national terrorism threat level and context
- features of x-ray images that indicate the possible presence of weapons, explosives or prohibited items in articles

- limitations of x-ray imaging processes and how to overcome these limitations
- methods and techniques for interpreting x-ray images and the meaning of colour (metals, organics and inorganics), shape and size
- potential hazards, risks and security risk situations that can arise when screening items using x-ray equipment
- procedures for reporting the detection of prohibited items and security risks
- procedures for setting up and testing x-ray screening equipment
- purpose and uses of image enhancement functions on x-ray equipment
- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
  - general features of improvised explosive devices and recommended incident response
- site emergency and evacuation plans and procedures
- surveillance techniques for monitoring security of the screening point
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- types of items that are prohibited including weapons, explosives and dangerous goods that are corrosive, flammable, explosive, spontaneously combustible, toxic, oxidising or water-reactive.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to conduct security screening using x-ray equipment

- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry including x-ray equipment and items to allow achievement of the performance evidence
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC3128 Conduct security screening using walk-through metal detection equipment

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC1007A Apply walk through metal detection procedures.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to conduct security screening of people and personal effects using walk-through metal detection equipment. Walk-through metal detection equipment is any electronic device in an upright configuration capable of being used in a security screening environment for the detection of metal by magnetic induction as a person walks through the detection zone.

It includes:

- setting up, testing and operating the walk-through equipment
- using sensitive spoken and non-verbal communication to manage the order and flow of people through the screening point and using special screening methods for infants, children and people with specific needs
- following legal requirements and procedures associated with personal search where required
- monitoring and maintaining security and responding quickly to positive alarms.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
<p>1. Prepare for screening using walk-through metal detection equipment.</p>	<p>1.1 Review workplace procedures and policies to ensure compliance with legal rights and responsibilities when screening people and personal effects using walk-through metal detection equipment.</p> <p>1.2 Set up and test walk-through metal detection equipment following manufacturers' instructions, and rectify or report problems to relevant persons.</p>
<p>2. Screen people and personal effects.</p>	<p>2.1 Identify hazards and risks in the work area and implement necessary controls to maintain safety of people and property.</p> <p>2.2 Operate walk-through metal detection equipment following manufacturers' instructions.</p> <p>2.3 Direct and assist people through the screening point using interpersonal techniques and communication that accounts for individual social and cultural differences.</p> <p>2.4 Use alternate screening methods to accommodate infants, children and people with specific needs.</p>
<p>3. Monitor screening and respond to potential security risks.</p>	<p>3.1 Monitor people through the screening point and give spoken and non-verbal instructions to maintain an orderly flow and address causes of potential delays.</p> <p>3.2 Identify persons not consenting to be screened and take appropriate action following workplace procedures.</p> <p>3.3 Respond to positive alarms and locate and secure prohibited items following workplace procedures.</p> <p>3.4 Identify the need to conduct personal search, and clarify legal authority to search in consultation with relevant persons.</p> <p>3.5 Obtain consent for personal search, and use approved search techniques locate or confirm the absence of prohibited items.</p> <p>3.6 Where permission to search is refused, use communication equipment to immediately report situation to relevant persons.</p> <p>3.7 Monitor persons and items in the screening area to maintain situational awareness and to respond promptly to potential security risks.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to:
  - provide information or advice using structure and language to suit the audience and engage minority groups
  - use strategies to overcome language barriers
  - use non-verbal signals to give directions to people through the screening point
- reading skills to interpret:
  - medical cards or letters for people requiring alternate screening methods
  - procedures and policies that clarify legal rights and responsibilities
  - manufacturers' instructions and equipment labels when setting up, testing and operating walk-through metal detection equipment
- speaking and listening skills to:
  - give clear, sequenced instructions when managing flow and assisting people through the screening point
  - use a radio or phone to report risks
  - use questions to clarify understanding when receiving spoken information
- numeracy skills to estimate time required to complete work tasks
- problem solving skills to:
  - identify equipment faults and malfunctions
  - recognise suspicious items and behaviours
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

# Assessment Requirements for CPPSEC3128 Conduct security screening using walk-through metal detection equipment

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC1007A Apply walk through metal detection procedures.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must on two separate occasions, conduct security screening using walk-through metal detection equipment, involving, on each occasion:

- modifying the screening process to accommodate the needs of:
  - one child
  - one person who is unable to walk unassisted through the screening point
- responding to positive alarms and identifying at least two prohibited items.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when conducting security screening using walk-through metal detection equipment:
  - anti-discrimination and diversity
  - counter terrorism
  - dangerous goods
  - duty of care
  - limits of own authority
  - personal search
  - workplace health and safety (WHS)
- current national terrorism threat level and context
- methods for screening infants, children and people with specific needs
- potential hazards, risks and security risk situations that can arise when screening people and personal effects using walk-through metal detection equipment
- procedures for obtaining permission to search

- procedures for reporting the detection of prohibited items and security risks
- procedures for responding to denied request to search
- procedures for setting up and testing walk-through metal detection equipment
- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
  - general features of improvised explosive devices and recommended incident response
- site emergency and evacuation plans and procedures
- situations requiring personal search to be conducted
- surveillance techniques for monitoring security of the screening point
- techniques for overcoming language barriers to ensure correct information exchange
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- types of items that are prohibited including weapons, explosives and dangerous goods
- ways that individual and social cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. # CPPSEC3129 Conduct security screening using explosive trace detection equipment

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC1009A Apply Explosive Trace Detection (ETD) procedures.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to conduct security screening of people using explosive trace detection (ETD) equipment. ETD equipment can detect and indicate by means of an alarm, the presence of a target amount of explosive material.

It includes:

- checking, calibrating and operating EDT equipment following manufacturers' specifications
- using sensitive spoken communication techniques to prepare people for ETD sampling, and using correct techniques to screen people and items using ETD equipment
- maintaining situational awareness and responding quickly to security risks and positive and negative ETD results.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

Prepare for screening using ETD equipment.</p>	<p>1.1 Review workplace procedures and policies to ensure compliance with legal rights and responsibilities when conducting security screening using ETD equipment.</p> <p>1.2 Follow manufacturers' instructions to prepare, check and calibrate ETD equipment, and rectify or report problems to relevant persons.</p>
<p>2. Conduct ETD sampling and testing.</p>	<p>2.1 Select person and items for ETD screening, and explain EDT screening procedures using interpersonal techniques and communication that accounts for individual social and cultural differences.</p> <p>2.2 Use an ETD wand to screen person and items following workplace procedures.</p> <p>2.3 Test sample using ETD equipment following workplace procedures.</p>
<p>3. Respond to sample results and potential security risks.</p>	<p>3.1 Recognise positive and negative results and repeat testing following workplace procedures.</p> <p>3.2 Take appropriate action to respond to a double positive result, and request assistance from relevant persons.</p> <p>3.3 Monitor persons and items in the screening area to maintain situational awareness and to respond promptly to potential security risks.</p> <p>3.4 Record results of screening using ETD equipment using workplace documentation.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to:
  - provide information or advice using structure and language to suit the audience and engage minority groups
  - use strategies to overcome language barriers
- reading skills to interpret:
  - procedures and policies that clarify legal rights and responsibilities
  - manufacturers' instructions and equipment labels when checking, testing, calibrating and operating ETD equipment
- speaking and listening skills to:
  - give clear, sequenced instructions when assisting people through the screening process
  - use questions to clarify understanding when receiving spoken information

- numeracy skills to estimate time required to complete work tasks
- problem solving skills to:
  - identify equipment faults and malfunctions
  - apply contingency measures to respond to a double positive screening results
  - recognise suspicious items and behaviours while applying screening procedures
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## **Unit Mapping Information**

Supersedes and is equivalent to CPPSEC1009A Apply Explosive Trace Detection (ETD) procedures.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3129 Conduct security screening using explosive trace detection equipment

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC1009A Apply Explosive Trace Detection (ETD) procedures.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must on two separate occasions, conduct security screening using explosive trace detection (ETD) equipment, involving, on each occasion:

- giving clear spoken instructions to direct the person for ETD sampling and screening
- responding to one double-positive and one positive-negative result and implementing appropriate responses for each.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when conducting security screening using explosive trace detection equipment:
  - anti-discrimination and diversity
  - counter terrorism
  - dangerous goods
  - duty of care
  - limits of own authority
  - workplace health and safety (WHS)
- client service standards for requesting ETD sampling and explaining screening procedures
- current national terrorism threat level and context
- methods and techniques involved in sampling and screening people and items using ETD equipment
- potential hazards, risks and security risk situations that can arise when screening people and personal effects using ETD equipment
- procedures for checking, testing, calibrating and operating ETD equipment

- procedures for conducting ETD swab testing and analysis
- procedures for obtaining verbal consent to ETD sampling
- procedures for reporting the detection of explosive material and other security risks
- procedures for responding to double-positive ETD detection
- procedures for when people do not consent to ETD sampling
- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
  - general features of improvised explosive devices and recommended incident response
- site emergency and evacuation plans and procedures
- situations requiring assistance when screening people and items using ETD equipment
- surveillance techniques for monitoring security of the screening point
- techniques for overcoming language barriers to ensure correct information exchange
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- ways that individual and social cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to conduct security screening using ETD equipment
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry including operational ETD equipment and scenarios to allow achievement of the performance evidence

- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC3130 Conduct security screening using hand-held metal detectors

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC1008A Apply hand-held metal detection procedures.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to conduct security screening of people and personal effects using a hand-held metal detector. Hand-held metal detectors are portable electronic devices that can detect metal by magnetic induction while the device is passed over a person or their personal effects.

It includes:

- checking, testing and operating hand-held metal detectors following manufacturers' specifications
- using screening techniques that cover the full body and personal effects and detect sources of positive alarms
- using sensitive spoken communication to direct, position and assist people through the screening process and investigate alarm sources
- maintaining situational awareness and responding quickly to security risks.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Prepare for screening using hand-held metal detector.	<p>1.1 Review workplace procedures and policies to ensure compliance with legal rights and responsibilities when screening people and personal effects using a hand-held metal detector.</p> <p>1.2 Follow manufacturers' instructions to check battery, turn detector on, test for correct audible and visual signals, and rectify or report problems to relevant persons.</p> <p>1.3 Calibrate detector to correct sensitivity and volume for screening tasks.</p>
2. Screen people and personal effects.	<p>2.1 Identify hazards and risks in the work area and implement necessary controls to maintain safety of people and property.</p> <p>2.2 Direct and position person at the screening point using interpersonal techniques and communication that accounts for individual social and cultural differences.</p> <p>2.3 Sweep hand-held metal detector over the body and personal items within the maximum range specified by manufacturers' instructions for the type of detector.</p> <p>2.4 Complete screening using hand-held metal detector ensuring full body and all personal effects have been scanned.</p>
3. Respond to positive alarms and potential security risks.	<p>3.1 Respond to positive alarms and locate and secure prohibited items following workplace procedures.</p> <p>3.2 Where there is a positive alarm without a visible source, request assistance from the person to reveal potential alarm sources and repeat the scan until all alarms have been investigated.</p> <p>3.3 Identify situations requiring specialist assistance and report to relevant persons.</p> <p>3.4 Monitor persons and items in the screening area to maintain situational awareness and promptly respond to potential security risks.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to:
  - provide information or advice using structure and language to suit the audience and engage minority groups

- use strategies to overcome language barriers
- reading skills to interpret:
  - medical cards or letters for people requiring alternate screening methods
  - procedures and policies that clarify legal rights and responsibilities
  - manufacturers' instructions and equipment labels when checking, testing, calibrating and operating hand-held metal detectors
- speaking and listening skills to:
  - give clear, sequenced instructions when assisting people through the screening process
  - use questions to clarify understanding when receiving spoken information
- numeracy skills to estimate time required to complete work tasks
- problem solving skills to:
  - identify equipment faults and malfunctions
  - find the sources of positive alarms and interference
  - recognise suspicious items and behaviours
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC1008A Apply hand-held metal detection procedures.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3130 Conduct security screening using hand-held metal detectors

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC1008A Apply hand-held metal detection procedures.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must on two separate occasions, conduct security screening using a hand-held metal detector, involving, on each occasion:

- giving clear spoken instructions to direct the person into the correct stance and body positioning to ensure scanning of the entire body and personal effects
- responding to positive alarms and identifying at least two prohibited items.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when conducting security screening using a hand-held metal detector:
  - anti-discrimination and diversity
  - counter terrorism
  - dangerous goods
  - duty of care
  - limits of own authority
  - workplace health and safety (WHS)
- current national terrorism threat level and context
- methods for screening people and items using a hand-held metal detector including infants, children and people with specific needs
- possible causes of positive alarms and interference from the work environment
- potential hazards, risks and security risk situations that can arise when screening people and personal effects using hand-held metal detectors
- procedures for checking, testing, calibrating and operating a range of hand-held metal detectors
- procedures for reporting the detection of prohibited items and security risks

- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
  - general features of improvised explosive devices and recommended incident response
- site emergency and evacuation plans and procedures
- situations requiring assistance when screening people and items using hand-held metal detectors
- surveillance techniques for monitoring security of the screening point
- techniques for overcoming language barriers to ensure correct information exchange
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- types of items that are prohibited including weapons, explosives and dangerous goods
- ways that individual and social cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to conduct security screening using a hand-held metal detector
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry including:
  - Australia's *Strategy for Protecting Crowded Places from Terrorism*
  - operational hand-held metal detectors and scenarios to enable achievement of the performance evidence

- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC3131 Select, use and maintain body armour for security purposes

## Modification History

Release 1.

New unit.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to select, use and maintain body armour for security purposes.

It includes:

- complying with work instructions, workplace procedures and policies, and legal rights and responsibilities, including firearms and weapons Acts and workplace health and safety (WHS)
- clarifying shift requirements and work tasks, and assessing the risks inherent in work instructions to understand threat and protection requirements
- selecting, fitting and using different types of body armour to protect against potential security threats.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
---	--

1. Prepare to use body armour.	<p>1.1 Review work instructions and procedures for shift and clarify work tasks with relevant persons.</p> <p>1.2 Review workplace policies including WHS to ensure compliance with legal rights and responsibilities when using body armour.</p> <p>1.3 Assess risks inherent in work instructions to clarify threat and protection requirements.</p>
2. Select and fit body armour.	<p>2.1 Select items of body armour to meet work instructions.</p> <p>2.2 Inspect body armour to confirm suitability for work tasks.</p> <p>2.3 Wear body armour and adjust for correct fit and maximum protective capacity.</p>
3. Clean and maintain body armour.	<p>3.1 Read manufacturers' instructions to confirm care and maintenance requirements for body armour.</p> <p>3.2 Clean and store body armour following manufacturers' instructions.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to use security industry approved communication terminology, codes and signals
- reading skills to interpret:
  - procedures and policies that clarify legal rights and responsibilities
  - manufacturers' instructions and technical information when checking, fitting, cleaning and maintaining body armour
- speaking and listening skills to ask questions and listen to answers to gain information or confirm understanding
- numeracy skills to calculate measurements to ensure correct size of body armour
  - problem solving skills to:
    - select body armour that is appropriate to protect against

## Unit Mapping Information

New unit.

This version first released with CPP Property Services Training Package Version 7.0.

## Links

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3131 Select, use and maintain body armour for security purposes

## Modification History

Release 1.

New unit.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must select, use and maintain for security purposes two different types of body armour.

On each occasion, the person must select items of body armour that are appropriate for protection against assessed threats.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when selecting, using and maintaining body armour for security purposes:
  - duty of care
  - legal requirements for using body armour
  - licensing requirements and limits of own authority
  - selection, use and fitting of body armour
  - workplace health and safety (WHS)
- criteria for selecting body armour for protection during security assignments
- difference between stab and bullet proof vests
- difference between stab and spike protection
- effect of secondary projectiles on body armour
- factors that affect the use of body armour
- factors that contribute to thermoregulation problems
- factors that impact the effectiveness of body armour
- health risks associated with using body armour including common heat disorders and their treatment
- importance of hydration when using body armour
- limitations of different types of body armour
- methods for cleaning and storing body armour

- National Institute of Justice (NIJ) Standards relating to:
  - Body armour performance standards
  - NIJ ballistic resistance standards
  - NIJ stab resistance standards (slashes and stabs from knives and spikes)
  - NIJ performance levels and protection classes
- nomenclature of modern law-enforcement body armour
- process for inspecting suitability of body armour
- types of body armour and the threats they protect against including:
  - ballistic protection
  - edged blade protection
  - spike protection.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to select, use and maintain body armour for security purposes
- appropriate documents, materials, and equipment currently used in industry
- body armour to meet work instructions
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations
- National Institute of Justice Standards.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS2012 Assist in collecting basic spatial data

## Modification History

Release 1.

Replaces superseded non-equivalent CPPSIS2012A Assist in the collection of spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to assist team members to collect basic spatial data in the field using surveying methods. Basic spatial data refers to measurements of distances, angles and height difference. The unit covers preparing for data collection by clarifying tasks and equipment to be used, and checking equipment for safe working order. The unit also covers participating in spatial data gathering activities, including recording data in the correct format and using equipment in a safe manner. It covers finalising work tasks by checking and storing equipment and reporting faults or problems, and completing and storing data and documentation. The unit requires the ability to follow instructions and communicate with team members, and to apply mathematical concepts used for basic surveying methods.

The unit supports those who work under direct supervision in a surveying team, in positions relating to field data collection and administration.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

- essential outcomes. text is used, further information is detailed in the range of conditions.
1. Prepare to collect basic spatial data.
    - 1.1. Task requirements are clarified with *appropriate persons*.
    - 1.2. Equipment is selected to meet task requirements in consultation with appropriate persons.
    - 1.3. Equipment is checked to ensure it is in safe working order according to organisational requirements.
  
  2. Collect basic spatial data.
    - 2.1. Data is collected and recorded in correct format in line with task and organisational requirements.
    - 2.2. Data is checked for accuracy and problems are reported to appropriate persons.
    - 2.3. Equipment is used according to task and safety requirements and manufacturer specifications, and problems are reported to appropriate persons.
  
  3. Finalise spatial data collection tasks.
    - 3.1. Equipment is checked and stored safely according to organisational requirements and manufacturer specifications.
    - 3.2. Unsafe or faulty equipment is reported according to organisational requirements.
    - 3.3. Data and documentation are completed and stored according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

- Numeracy skills to:
- use mathematical concepts in surveying methods relating to distance and angles.

- Oral communication skills to:
- ask questions to clarify task requirements and equipment selection.
- Reading skills to:
- locate specific information in standard operating procedures
  - understand forms required for recording collected data.
- Writing skills to:
- record clear and accurate measurements that can be interpreted by a third party.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- experienced colleague
  - site personnel
  - supervisor or line manager.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS2012 Assist in collecting basic spatial data

## Modification History

Release 1.

Replaces superseded non-equivalent CPPSIS2012A Assist in the collection of spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also collect basic spatial data for two field projects according to organisational procedures and instructions, and using surveying methods. For each project, the person must use safety equipment, including personal protective equipment (PPE), and a communication device.

During the above projects, the person must collect the basic spatial data using four of the following tools and equipment:

- clinometer or device to measure vertical angles
- compass
- data recording equipment
- digital or hard copy map
- distance measuring tape
- distance measuring wheel
- level
- scientific calculator
- simple global positioning system (GPS) device to determine position
- simple laser measuring device.

While assisting in collecting the above basic spatial data, the person must:

- communicate clearly with others to clarify work tasks and equipment use
- comply with organisational requirements and manufacturer specifications
- report problems and seek assistance with work tasks
- use organisational proformas to record accurate measurements and data.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- industry-accepted standards for recording surveying measurements and data
- organisational policies and procedures relating to:
  - accessing manufacturer specifications
  - collecting spatial data
  - formats for records and documentation
  - reporting problems
  - selecting and using the tools and equipment specified in the performance evidence
  - using communications equipment
  - working safely when using surveying equipment and working in the field.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence
  - PPE
- specifications:
  - equipment operating manuals and manufacturer specifications
  - standard operating procedures and documentation relating to work tasks
- relationships with team members and supervisor:
  - access to supervisor and other appropriate persons for assistance with work tasks.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS2013 Store and retrieve basic spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS2013A Assist in the storage and retrieval of spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to assist team members to store and retrieve basic spatial data. Basic spatial data refers to recorded surveying measurements or datasets of objects with coordinates. The unit covers following instructions to record, maintain and retrieve spatial data from either paper or digital sources. It requires the ability to follow instructions and communicate with team members to clarify work tasks.

The unit supports those who work under direct supervision in a surveying or spatial information services team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Store basic spatial
  - 1.1. Task requirements are clarified with *appropriate*

- |                                 |  |
|---------------------------------|--|
| data.                           | <i>persons.</i>  |
|                                 | 1.2. Computer and software are prepared and checked to meet task requirements, and problems are reported to appropriate persons. |
|                                 | 1.3. Requirements are followed to record data in index according to organisational requirements.                                 |
| 2. Retrieve basic spatial data. | 2.1. Requirements are followed to access and retrieve spatial data source according to task and organisational requirements.     |
|                                 | 2.2. Problems are identified and reported to appropriate persons.  |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• extract and compare numerical data.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify task requirements.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• understand graphical information in basic spatial data.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• store and retrieve spatial data in digital format.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least
- experienced colleague
  - supervisor or line manager.

one of the following:

# Assessment Requirements for CPPSIS2013 Store and retrieve basic spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS2013A Assist in the storage and retrieval of spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also follow procedures and instructions to store and retrieve basic spatial data for two different projects.

While storing and retrieving the above basic spatial data, the person must:

- adhere to data privacy and information copyright laws relating to data storage and retrieval
- communicate clearly with others to clarify work tasks
- comply with organisational requirements to work safely when using screen-based equipment
- cooperate with team members to store and retrieve spatial data
- report problems and seek assistance with work tasks
- use a computer and software to store and retrieve spatial data.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- organisational policies and procedures relating to:
  - data privacy and information copyright
  - preparing and using computers and software
  - reporting problems with spatial data availability and formats
  - working safely when using screen-based equipment.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computers and software required to collect basic spatial data
- specifications:
  - standard operating procedures and documentation relating to data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - access to supervisor and other appropriate persons for assistance with work tasks.

Timeframe:

- as specified by task and organisational requirements

# CPPSIS2015 Assist with surveying and spatial field activities

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS2015A Assist in field activity.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to assist members of a surveying and spatial information services team by carrying out field support tasks as directed. The unit covers preparing for work by clarifying tasks and equipment to be used, including personal protective equipment (PPE). The unit also covers participating in a range of support activities, including identifying and marking surface positions; and using and storing tools and equipment. It covers restoring the work site after tasks are completed, and checking tools and equipment to report faults or problems. The unit requires the ability to follow instructions and communicate with team members to clarify work tasks, and apply mathematical concepts used for distance measurements and calculations.

The unit supports those who work under direct supervision in a surveying and spatial information services team, in positions relating to field support and administration.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Prepare for field support tasks.
  - 1.1. Task requirements are clarified with *appropriate persons*.
  - 1.2. Tools and equipment are selected to meet task requirements in consultation with appropriate persons.
  - 1.3. PPE is accessed and used according to manufacturer specifications and organisational requirements.
  
2. Assist with field support tasks.
  - 2.1. *Support tasks* are carried out and problems reported to appropriate persons according to organisational requirements.
  - 2.2. Surface positions are identified and marked in line with task and organisational requirements.
  - 2.3. Tools and equipment are used according to task and organisational requirements.
  
3. Finalise field support tasks.
  - 3.1. Measurements are checked and recorded according to organisational requirements.
  - 3.2. Assistance is provided in restoring site as near as practicable to original condition, and waste is disposed of according to organisational requirements.
  - 3.3. Tools and equipment are checked and stored safely according to organisational requirements and manufacturer specifications.
  - 3.4. Unsafe or faulty tools and equipment are reported according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill Performance feature

Numeracy skills to: • apply basic mathematical concepts to measure and calculate

distances, area and volume.

Reading skills to:

- understand forms required for recording collected data
- understand standard operating procedures and equipment operating manuals.

Writing skills to:

- record clear and accurate measurements that can be interpreted by a third party.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least one of the following:

- site personnel
- supervisor or line manager.

***Support tasks*** must include at least two of the following:

- checking data
- identifying and marking positions of assets for which information is required
- maintaining equipment
- recording data.

## Unit Mapping Information

CPPSIS2015A Assist in field activity

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcfl3d9b>

# Assessment Requirements for CPPSIS2015 Assist with surveying and spatial field activities

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS2015A Assist in field activity.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also follow procedures and instructions to assist with field support activities in two projects in the surveying and spatial field.

For each project, the person must use safety equipment, including personal protective equipment (PPE), and a communication device, such as ultra-high frequency radio.

The person must also use four of the following:

- compass
- data recording equipment
- digital or hard copy map
- distance measuring wheel
- level
- measuring instruments
- scientific calculator
- hand-held laser measuring device.

While assisting in the above field support activities, the person must:

- use and check tools and equipment to identify faults or problems
- communicate clearly with others to clarify work tasks and report problems
- comply with organisational and manufacturer requirements in order to work safely and protect the environment
- cooperate with team members to follow instructions
- follow procedures to identify and mark surface positions
- report problems and seek assistance with work tasks

- assist in restoring work site to as near as practicable to original condition after field activities are completed.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- industry-accepted standards and practices for marking surface positions and measuring and recording basic spatial data
- organisational policies and procedures covering work tasks relating to field projects, including reporting and equipment use and maintenance
- purpose of and storage procedures for the tools and equipment required in above field activities
- site restoration and waste disposal procedures
- work health and safety procedures relating to field support activities, including required PPE.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence, including PPE
- specifications:
  - equipment operating manuals and manufacturer specifications
  - standard operating procedures and documentation relating to field activities
- relationships with team members and supervisor:
  - access to supervisor and other appropriate persons for assistance with work tasks.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS2016 Assist with load transfers

## Modification History

Release 1.

Replaces superseded non-equivalent CPPSIS2016A Assist with load transfer.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to assist team members to load, unload and transfer goods and personnel to a work site. The unit covers following procedures and instructions to select equipment to assist loading activities. It also covers complying with legal requirements relating to the transport and handling of hazardous materials, and to load mass, restraint and protection. The unit requires the ability to follow instructions and communicate with team members to clarify work tasks and seek assistance.

The unit supports those who work under direct supervision in a surveying and spatial information services team, in a range of work sites and positions, such as field hands and data collection assistants.

Licensing, legislative, regulatory or certification requirements concerning the loading and unloading of goods, including mass and loading regulations dealing with over-size and over-mass permits, apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Prepare for load transfer.
  - 1.1. Load transfer work tasks are clarified with *appropriate persons*.
  - 1.2. Loading and unloading plans are followed to ensure efficiency and safety according to organisational requirements.
  - 1.3. Type and nature of load are checked in consultation with appropriate persons to ensure even and legal distribution according to organisational requirements.
  
2. Assist with loading and unloading.
  - 2.1. Instructions are followed to assist with loading and unloading activities in a safe and efficient manner, taking into account suitable locations, stowage and balance of remaining load.
  - 2.2. *Lifting aids and equipment* are selected and used to assist loading and unloading according to organisational procedures and safety requirements.
  - 2.3. Instructions are followed to secure and protect load using correct load restraint methods and according to organisational requirements.
  - 2.4. Goods that require special handling are identified and procedures followed to complete required records according to organisational requirements.
  
3. Finalise load transfer activities.
  - 3.1. Documentation relating to own role is completed according to organisational requirements.
  - 3.2. Aids and equipment used in the load transfer process are cleaned and stored according to organisational procedures.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
--------------	----------------------------

- Numeracy skills to:
- apply basic computations relating to load mass, size and weight
  - check size, weight and shape of load against legal and safety guidelines.
- Oral communication skills to:
- ask questions to clarify work task requirements
  - receive and relay information clearly using a two-way radio.
- Reading skills to:
- recognise and understand Australian Dangerous Goods (ADG) markings and HAZCHEM signs.
- Writing skills to:
- record clear and accurate load details using organisational proformas.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- experienced colleague
  - supervisor or line manager.

- Lifting aids and equipment must include at least one of the following:***
- block and tackle
  - hoist
  - hydraulic lift
  - jack
  - stacker.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPSIS2016 Assist with load transfers

## Modification History

Release 1.

Replaces superseded non-equivalent CPPSIS2016A Assist with load transfer.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also assist with planning and conducting the loading, transfer and unloading of:

- dangerous goods in one load
- personnel in a separate load.

While assisting with the above activities, the person must:

- communicate clearly with others to clarify work tasks and relay accurate information using a communication device
- follow procedures for the safe manual handling of goods
- comply with organisational requirements relating to:
  - load mass, restraint and protection
  - working safely and using personal protective equipment (PPE)
- record data and complete required organisational documentation, including for goods that require special handling
- select and use the lifting aids and equipment specified in the range of conditions to assist loading and unloading.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- codes of practice for handling and transporting dangerous goods and hazardous substances
- communication protocols during load transfers
- factors that can impact on safety when loading and unloading, including risks posed by traffic and weather
- goods identification numbers and codes, including Australian Dangerous Goods (ADG) markings and HAZCHEM signs

- relevant parts of regulations relating to:
  - handling and transport of dangerous goods and hazardous substances
  - load mass (over-size and over-mass), load restraint and requirements to protect loads.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - communications equipment
  - load lifting aids and equipment, as specified in the range of conditions
  - PPE
- specifications:
  - equipment operating manuals
  - standard operating procedures relating to health and safety, including manual handling
  - task specifications for load transfer work, including load restraint guide
- relationships with team members and supervisor:
  - access to supervisor and other appropriate persons for assistance with work tasks.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPSIS3011 Produce basic maps

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS3011A Apply map presentation principles.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to use mapping software, such as geographic information system (GIS) functionality, to produce a basic map. The unit covers activities to prepare and process basic spatial data and produce a basic map, which includes simple marginal information and content, to meet task specifications.

The unit supports those who work under supervision in a surveying and spatial information services team, in areas such as surveying, cartography, mapping, town planning and GIS.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |                                 |   |
|---------------------------------|---|
| 1. Prepare to create basic map. | 1.1. <b><i>Task requirements</i></b> are clarified with <b><i>appropriate persons</i></b> . |
|---------------------------------|---|

- 1.2. Equipment and software are selected according to task and organisational requirements.
2. Compile map content.
  - 2.1. Map marginal information and content are prepared according to task specifications.
  - 2.2. Spatial data is processed to prepare map content according to task specifications.
3. Finalise basic map production.
  - 3.1. Map is produced in required format and content according to task requirements.
  - 3.2. Map content and format are checked against task requirements in consultation with appropriate persons.
  - 3.3. Map is finalised and documentation completed according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Performance feature

#### Skill

- Numeracy skills to:
- apply datums and projections to map
  - read data attributes and numerical data.
- Oral communication skills to:
- ask questions to clarify task requirements.
- Reading skills to:
- interpret instructions in standard operating procedures
  - interpret spatial data, software menus and messages.
- Writing skills to:
- label marginal information and map content.

Technology skills to:

- use mapping functions of basic software to format maps that meet task specifications.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Task requirements must include:***

- coordinate system
- format of map
- map content
- marginal information
- spatial data to be used
- type of map.

***Appropriate persons*** must include at least one of the following:

- experienced colleague
- supervisor or line manager.

## Unit Mapping Information

CPPSIS3011A Apply map presentation principles

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS3011 Produce basic maps

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS3011A Apply map presentation principles.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also use suitable software to produce two basic maps containing the following:

- two man-made features and two natural features and their symbology depicting data by points, lines and polygons
- data that has been geoprocessed from retrieved spatial data
- simple marginal information, including:
  - data sources
  - georeferencing system
  - legend
  - north point
  - scale.

While producing the above basic maps, the person must:

- communicate clearly when clarifying work tasks
- comply with organisational requirements regarding health and safety and completing records and documentation
- use a computer, printer and required ancillary hardware
- use basic software mapping functions to:
  - apply scale
  - change data appearance
  - change symbology
  - import simple point, line and areal data
  - label features
  - pan zoom
  - perform simple thematic mapping

- symbolise features by attributes.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- functions of mapping software suitable for making basic maps
- key geographic feature types and how they are portrayed in mapping software, including using points, lines and polygons
- key features of coordinate systems, datums and projections
- common types of maps used for surveying and spatial information services
- organisational policies and guidelines relating to basic map production
- typical scales used on different types of maps
- typical spatial referencing systems used on different types of maps
- typical symbology used on different types of maps.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computers and software relevant to basic map production
- specifications:
  - work task specifications
  - organisational policies, procedures and documentation relating to work health and safety when using screen-based equipment
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working under supervision.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS3015 Collect basic surveying data

## Modification History

Release 1.

This version first released with CPP Property Services Training Package Version 3.

Replaces superseded non-equivalent CPPSIS3015A Collect spatial data.

## Application

This unit of competency specifies the outcomes required to collect basic surveying data using measurements taken in the field. Basic surveying data refers to measurements of distances, angles and height difference with accuracy of one centimetre or better. The unit covers preparing for data collection by clarifying the data collection tasks and equipment to be used, and identifying and reporting hazards. The unit also covers operating equipment to take basic surveying measurements, and performing required data reductions and computations to ensure the accuracy of collected data before leaving the field. It requires the ability to follow standard operating procedures for setting up, using, checking and storing equipment; and completing records and documentation.

The unit supports those who work under supervision in a surveying and spatial information services team, in positions relating to field data collection.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Prepare for data collection tasks.
  - 1.1. Data collection requirements and basic surveying tasks are clarified with *appropriate persons*.
  - 1.2. Equipment and collection method are selected to meet task requirements, and set up in consultation with appropriate persons.
  - 1.3. Hazards are identified and risks controlled and reported according to organisational requirements.
  
2. Carry out basic data collection tasks.
  - 2.1. Factors affecting equipment use and accuracy of data are identified and reported.
  - 2.2. Basic surveying data is collected using selected equipment and according to manufacturer specifications, standard operating procedures, and task requirements.
  - 2.3. Measurements are recorded, calculated, reduced and checked before leaving the site according to organisational requirements.
  
3. Finalise data collection tasks.
  - 3.1. Documentation is completed and data stored according to organisational requirements.
  - 3.2. Equipment is checked, and faults and problems are reported.
  - 3.3. Equipment is packed up and stored according to manufacturer and organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

Numeracy skills to:
 

- perform mathematical reductions.

- Oral communication skills to:
- ask questions to clarify task requirements and equipment selection.
- Reading skills to:
- locate specific information in forms and standard operating procedures required for using equipment and recording collected data.
- Writing skills to:
- record clear and accurate measurements, computations, and field checks.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- experienced colleague
  - site personnel
  - supervisor or line manager.

## Unit Mapping Information

No equivalent unit

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS3015 Collect basic surveying data

## Modification History

Release 1.

This version first released with CPP Property Services Training Package Version 3.

Replaces superseded non-equivalent CPPSIS3015A Collect spatial data.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also accurately record basic surveying data for two field projects, including data relating to the position of geographic features and their attributes, including angles, distances and height.

During the above projects, the person must collect the basic surveying data using two of the following pieces of equipment:

- automatic, digital or laser level
- electromagnetic recording equipment
- global positioning system (GPS) for:
  - determining point position
  - navigating and recording a traverse
  - collecting designated attributes for designated features
- ground penetrating radar
- total station.

In addition, while collecting basic surveying data, the person must use two of the following:

- digital or hard copy maps and images
- distance measuring
- measuring bearings or angles
- measuring vertical angles or slopes.

During the above projects, the person must also:

- communicate clearly with others to clarify work tasks and equipment selection

- comply with organisational, legislative and manufacturer requirements to work safely and use personal protective equipment (PPE)
- comply with relevant safe work method statements (SWMS)
- follow manufacturer specifications and standard operating procedures to correctly set up, operate, pack up, and store tools and equipment
- use organisational and industry procedures and proformas to accurately collect and record measurements and data.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accepted organisational standards for recording surveying metadata
- attributes associated with a dataset
- organisational and industry policies and procedures relating to collecting, recording and storing surveying data
- organisational and industry procedures relating to work tasks specified in the performance evidence, including equipment use
- spatial data collection procedures for equipment used, as specified in the performance evidence
- work health and safety procedures relating to data collection activities.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence
- specifications:
  - standard operating procedures and documentation relating to data collection tasks
- relationships with team members and supervisor:
  - working under supervision.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPSIS3016 Provide field support services for surveying and spatial projects

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS3016A Provide field support services.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to provide field support services for surveying and spatial projects. The unit covers planning and preparing for work, including selecting equipment and supplies, and while in the field following safety procedures and carrying out field support tasks.

The unit supports those who work under supervision in a surveying or spatial information services team, in positions that provide assistance with data collection in the field.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Prepare for field
  - 1.1. Task requirements are identified and confirmed with ***appropriate persons*** according to organisational

- |                                  |   |
|----------------------------------|---|
| support tasks.                   | requirements.   |
|                                  | 1.2. Equipment and supplies appropriate to the task are selected and prepared according to task and organisational requirements.        |
|                                  | 1.3. Hazards relating to the work site are identified and risks controlled according to organisational and safety requirements.         |
|                                  | 1.4. Site drawings and plans are obtained and examined to determine location of services.   |
|                                  | 1.5. Personal protective equipment (PPE) is accessed and used according to manufacturer specifications and organisational requirements. |
| 2. Execute field support tasks.  | 2.1. <i>Support tasks</i> are carried out in consultation with appropriate persons and according to task requirements.                  |
|                                  | 2.2. Equipment is operated according to task and organisational requirements.   |
| 3. Finalise field support tasks. | 3.1. Site is restored as near as practicable to original condition, and waste is disposed of according to organisational requirements.  |
|                                  | 3.2. Equipment is cleaned and stored in a secure location according to manufacturer specifications.                                     |
|                                  | 3.3. Repair work is organised for unsafe or faulty tools and equipment according to organisational requirements.                        |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

- Learning skills to:
- locate features at the work site identified from maps and drawings.

- Numeracy skills to:
- record numerical data.
- Oral communication skills to:
- ask questions to clarify work task requirements.
- Reading skills to:
- understand and follow procedures in task requirements
  - understand graphical information on maps and site drawings.
- Writing skills to:
- record clear and accurate data and information.
- Technology skills to:
- set up tools and equipment.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- experienced colleague.
  - supervisor or line manager.

- Support tasks*** must include at least five of the following:
- assisting equipment operator with data collection and recording
  - clearing lines
  - finding survey marks
  - loading and unloading equipment and tools
  - performing simple measurements, such as height of instrument and target
  - placing survey marks
  - setting up tripods and equipment in preparation for use by an instrument operator
  - shifting equipment between designated points
  - using and maintaining tools, such as shovels, crow bars, axes

and brush hooks.

# Assessment Requirements for CPPSIS3016 Provide field support services for surveying and spatial projects

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS3016A Provide field support services.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also provide five of the field support tasks listed in the range of conditions for two different spatial data collection projects.

While providing the above field support services, the person must:

- communicate clearly with others to clarify work tasks
- comply with organisational, legislative and manufacturer requirements in order to work safely and protect the work environment while in the field
- cooperate with team members to collect and record data
- select and use the following spatial tools and equipment to complete support tasks:
  - communication device
  - data measuring and recording equipment and tools
  - safety equipment and supplies, including personal protective equipment (PPE).

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- industry-accepted standards and practices for measuring and recording basic spatial data
- organisational policies and procedures relating to work tasks, including reporting and equipment use and maintenance
- purpose and uses of required tools and equipment
- site restoration and waste disposal procedures
- work health and safety procedures relating to field support activities.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence
- specifications:
  - job specifications for field support work
  - equipment operating manuals
  - safety instructions
  - organisational policies, procedures and documentation relating to work tasks
- relationships with team members and supervisor:
  - working under supervision.

Timeframe:

- as specified by task and organisational requirements.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPSIS3018 Transfer loads

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS3018A Transfer personnel and loads.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to plan and conduct the loading, transfer and unloading of personnel and goods to a work site. The work site could be in a remote location in off-road conditions using a boat or four-wheel drive vehicle. The unit covers selecting equipment to assist loading activities, and complying with legal requirements relating to the transport and handling of hazardous materials, and to load mass, restraint and protection.

The unit supports those who work under supervision in a surveying and spatial information services team, in a range of work sites and positions, such as field support for data collection and site set-out.

Licensing, legislative, regulatory or certification requirements concerning the loading and unloading of goods, including mass and loading regulations dealing with over-size and over-mass permits, apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Prepare for load transfer.
  - 1.1. **Load transfer requirements** are identified and clarified with **appropriate persons**.
  - 1.2. Load transfer activities are planned to ensure efficient and safe operations and environmental protection, and according to organisational requirements.
  - 1.3. **Transport equipment** appropriate for the type of load and loading and unloading activities to be conducted is selected and accessed.
  - 1.4. Factors affecting safe and efficient load transfer are identified and assessed in consultation with appropriate persons to meet organisational and safety requirements.
  
2. Carry out loading and unloading.
  - 2.1. Loading and unloading activities are conducted in a safe and efficient manner, taking into account suitable locations, stowage and balance of remaining load.
  - 2.2. **Lifting aids and equipment** are selected and used to assist loading and unloading according to organisational procedures and safety requirements.
  - 2.3. Load is secured and protected using correct load restraint methods and according to organisational requirements.
  - 2.4. Goods and technical equipment requiring special handling are identified and documentation is completed according to organisational requirements.
  
3. Operate vehicle to complete load transfer.
  - 3.1. Pre-operational inspections and checks of vehicle are conducted, and problems or malfunctions reported according to organisational requirements.
  - 3.2. Vehicle is operated using most efficient route of travel and ensuring safety of load and equipment.
  - 3.3. Route conditions and vehicle performance are constantly monitored and occurrences affecting safety and efficiency of operations are reported according to organisational requirements.
  - 3.4. Vehicle records are completed and maintained according

to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Planning and organising skills to:	<ul style="list-style-type: none"><li>• plan and navigate a transport route to account for terrain, weather and traffic contingencies.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• apply basic computations relating to load mass, size and weight.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions to clarify work task requirements</li><li>• receive and relay information clearly using a two-way radio.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret Australian Dangerous Goods (ADG) markings and HAZCHEM signs</li><li>• interpret information from maps and manufacturer specifications.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• record clear and accurate load computations.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>• solve routine problems impacting on safety of load.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Load transfer requirements</i></b> must	<ul style="list-style-type: none"><li>• load shape</li><li>• load size</li></ul>
---	--

- include:
- load weight
  - route conditions
  - work site location for load transfer.

- Appropriate persons* must include at least one of the following:
- experienced colleague
  - supervisor or line manager.

- Transport equipment* must include at least one of the following:
- boat
  - car
  - four-wheel drive vehicle (with or without trailer)
  - light truck
  - quad bike
  - two-wheel drive vehicle (with or without trailer).

- Lifting aids and equipment* must include at least one of the following:
- block and tackle
  - hoist
  - hydraulic lift
  - jack
  - stacker.

## Unit Mapping Information

# Assessment Requirements for CPPSIS3018 Transfer loads

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS3018A Transfer personnel and loads.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also plan and transfer:

- dangerous goods in one load
- personnel in a separate load.

While transferring the above loads, the person must:

- communicate clearly with others to clarify work tasks and relay accurate information using a two-way radio
- comply with organisational and legislative requirements during transfer activities relating to:
  - load mass, restraint and protection
  - protecting the environment
  - working safely
- conduct pre-operational checks and inspections of the transport to identify defects and malfunctions, and report as required
- follow procedures for the safe manual handling of goods
- operate a vehicle safely while transporting loads on a variety of travelling surfaces and in varying weather conditions
- conduct a basic assessment of terrain, traffic flow and weather conditions impacting on the transfer route, including off-road routes
- navigate safe transport routes allowing for a range of terrain, weather and traffic conditions
- record data and complete required organisational documentation, including for goods that require special handling
- select and use lifting aids and equipment, as specified in the range of conditions, to assist loading and unloading
- work safely and follow procedures to ensure the safety of personnel, loads and equipment, including using personal protective equipment (PPE).

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- codes of practice for handling and transporting dangerous goods and hazardous substances
- communication protocols during load transfers
- factors that can impact on safety when loading and unloading, including risks posed by traffic and weather
- goods identification numbers and codes, including Australian Dangerous Goods (ADG) markings and HAZCHEM signs
- licensing requirements for operating vehicles on land and water
- regulations relating to the handling and transport of dangerous goods and hazardous substances, mass (over-size and over-mass), and load restraint and protection.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - communications equipment
  - load lifting aids and equipment, as specified in the range of conditions
  - safety equipment, including PPE
  - vehicle to suit transport route
- specifications:
  - organisational policies, procedures and documentation relating to work health and safety and load restraint guide
  - equipment operating manuals
  - job specifications for load transfer work
  - maps
- relationships with team members and supervisor:
  - working under supervision.

Timeframe:

- as specified by task and organisational requirements.
- 

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPSIS3019 Produce basic plans of surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS3019A Perform basic drafting.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to use suitable computer software to produce basic plans of a survey from surveying field data. The unit covers setting up equipment and software, establishing surveying data and dimensions, processing data, and producing basic plans to meet task specifications. It requires an ability to read and understand surveying data, and technology skills to manipulate, import and export data using software applications.

The unit supports those who work under supervision in a surveying and spatial information services team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Prepare to create
  - 1.1. Task requirements are clarified with *appropriate*

basic plan of survey.		<i>persons.</i>
	1.2.	Hardware, software and other equipment are set up and checked to ensure requirements are met.
	1.3.	Dimensions and data for required plan are established according to task requirements.
	1.4.	Required data is identified and retrieved according to task requirements.
2. Compile plan content.	2.1.	Basic software functions are used to process surveying data to prepare plan of survey according to task requirements.
	2.2.	Plan marginal information is prepared according to task requirements.
3. Finalise basic plan production.	3.1.	Preliminary plan of survey is reviewed and checked against task requirements in consultation with appropriate persons.
	3.2.	Adjustments to plan are made in consultation with appropriate persons.
	3.3.	Data files are stored according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• measure bearings, angles, distances, coordinates, perimeter and area within plans.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify work task requirements.</li> </ul>

- Reading skills to:
- interpret plan requirements
  - understand technical terminology in help files and prompts.
- Technology skills to:
- import and export data into software applications
  - manipulate screen-based information.
- Problem-solving skills to:
- identify errors by checking plans against given data.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- experienced colleague
  - supervisor or line manager.

## Unit Mapping Information

CPPSIS3019A Perform basic drafting

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS3019 Produce basic plans of surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS3019A Perform basic drafting.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also use suitable software to produce basic plans of surveys for two different tasks.

While producing the above plans, the person must:

- include content data obtained from collected field surveying data
- produce the plan content and marginal information
- take measurements of bearings, angles, distances, coordinates, perimeter and area from a digital plan
- communicate clearly with others to clarify work tasks
- comply with organisational requirements relating to work health and safety, completing records and documentation, privacy of information, and data storage
- use a computer, printer and required ancillary hardware.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- basic drafting design principles
- key features of coordinate systems
- industry-accepted standards relating to preparing and producing plans using appropriate software
- methods for checking and validating drawing accuracy
- software functions to produce basic plans
- typical content of plans of a survey.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - ancillary hardware necessary to prepare and print plans of a survey
  - computer software suitable for preparing and producing plans of a survey
- specifications:
  - design specifications
  - organisational policies, procedures and documentation relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working under supervision.

Timeframe:

- as specified by task and organisational requirements.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPSIS3020 Perform basic surveying computations

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS3020A Perform basic surveying computations.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to perform basic surveying computations in a plane coordinate system. The unit covers computations and conversions based on basic mathematical concepts of algebra, geometry and trigonometry. Computations are done on simple regular geometric figures, traverses, angles, bearings, distances, plane coordinates, heights, perimeter and area.

The unit supports those who work under supervision in a surveying and spatial information services team to perform basic computations associated with field work and data collection.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |                                |  |
|--------------------------------|--|
| 1. Prepare for basic surveying | 1.1. Computational requirements are identified in consultation with <i>appropriate persons</i> . |
|--------------------------------|--|

- computations.
- 1.2. Computational procedures are identified according to industry and organisational requirements.
  - 1.3. Computational equipment is selected according to computational and organisational requirements.
2. Calculate basic surveying data.
    - 2.1. Computations are performed on angles and bearings according to computational requirements and using computational equipment.
    - 2.2. Conversions between polar and rectangular coordinates are performed according to computational requirements.
    - 2.3. Computations are performed on the coordinates of a simple closed traverse.
  3. Finalise work processes.
    - 3.1. Computations and conversions are finalised and their accuracy confirmed according to computational requirements.
    - 3.2. Data is recorded according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• apply the basic concepts of algebra, geometry and trigonometry to plane geometry and measuring simple regular figures</li> <li>• perform calculations relating to geometric figures, area, angles, bearings, distances, traverses, plane coordinates, heights and perimeter.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify work task requirements and computational formulas</li> <li>• discuss computational methods.</li> </ul>

- Reading skills to:
- interpret computational data provided in diagrammatic form
  - interpret written computational tasks.
- Writing skills to:
- record computations and results in line with industry requirements and in an appropriate format.
- Problem-solving skills to:
- identify errors in computations.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- experienced computational colleague
  - qualified surveyor
  - supervisor or line manager.

## Unit Mapping Information

# Assessment Requirements for CPPSIS3020 Perform basic surveying computations

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS3020A Perform basic surveying computations.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also accurately perform basic computations for two different surveying computational tasks, demonstrating the ability to:

- calculate perimeter and areas of simple regular figures
- calculate adjusted coordinates of points on a closed traverse
- convert between:
  - polar and rectangular coordinates
  - vertical angles and gradients and vice versa
- check accuracy of above computations.

During the above surveying computational tasks, the person must:

- communicate clearly with others to clarify work tasks and computational results
- comply with organisational requirements and industry-accepted methods for systematically and legibly laying out computations
- use organisational documents to complete required records.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- common surveying and mathematical terms used in basic surveying computations
- industry-accepted methods for performing and laying out different types of basic surveying computations
- organisational policies and procedures for completing surveying records and documentation.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - scientific or programmable calculator or software application
- specifications:
  - task specifications
- relationships with team members and supervisor:
  - working under supervision.

Timeframe:

- as specified by task and organisational requirements.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS3021 Visually interpret image data

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to visually interpret image data to identify the basic features of the landscape, including land cover such as vegetation, roads, railways, buildings, water bodies and terrain forms. Image data can include aerial and terrestrial photographs and satellite images. The images can be digital or in hard copy. Mapping or other appropriate software can be used to assist visual interpretation if it is available. The unit requires the ability to apply the principles and methods of visual image interpretation. This unit is restricted to visual interpretation, as digital enhancement of images is covered in CPPSIS4026 Digitally enhance and process image data.

The unit supports those who work under direct supervision in a surveying and spatial information services team, in positions that support mapping, geographic information systems (GIS) and town planning.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Identify image and ancillary data.
  - 1.1. Task requirements are clarified with *appropriate persons*.
  - 1.2. Possible sources of image data are identified to meet task requirements.
  - 1.3. Constraints in using different types of image data are clarified in discussion with appropriate persons.
  - 1.4. Ancillary data that can be used to assist visual interpretation of image is identified and obtained.
  
2. Identify and record basic landscape features.
  - 2.1. Image data is visually interpreted using interpretation principles and ancillary data, and features are identified and recorded according to task and organisational requirements.
  - 2.2. Interpreted results are discussed and confirmed with appropriate persons.
  - 2.3. Ground control targets for photogrammetric mapping are checked to enhance understanding of image data.
  - 2.4. Scale is determined according to organisational requirements.
  - 2.5. Data is stored and documents are completed according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• measure and calculate scale objects from an image and ancillary data.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify work tasks.</li> </ul>

- Reading skills to:
- interpret graphical information, including shapes and patterns within aerial and terrestrial photographs and satellite images.
- Writing skills to:
- record details of image features using standard proformas.
- Technology skills to:
- use simple analogue and digital tools to assist with visual interpretation.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least one of the following:

- experienced colleague
- supervisor or line manager.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS3021 Visually interpret image data

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also visually identify three instances of the following from both an aerial or terrestrial photograph or image, and a satellite image:

- buildings
- rail lines
- roads
- terrain types
- vegetation
- water bodies.

Where images from ground penetrating radar (GPR) are required to be interpreted, the person must visually identify three of the basic landscape features listed above from:

- a GPR image display, and
- one of the following:
  - aerial photograph or image
  - satellite image.

While visually interpreting the above image data, the person must:

- assess task requirements to clarify types of image data to be accessed and interpreted
- communicate clearly with others to clarify and discuss work tasks
- identify possible sources of image and ancillary data to meet task requirements
- apply the principles and methods of visual image interpretation
- apply ground controls to aerial photographs
- calculate scale from image data
- comply with organisational requirements relating to:

- accessing and formatting image data
- data privacy and information copyright
- health and safety
- conduct basic measurements relating to image data to identify scale
- identify and report constraints and problems with image data
- use organisational proformas to accurately record measurements and data.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- basic formulas used to calculate scale relating to data images
- basic landscape features that can be identified from image data
- organisational policies and procedures relating to:
  - accessing and formatting image data
  - data privacy and information copyright
  - health and safety
- possible sources of image and ancillary data
- principles and methods of visual image interpretation
- types of image data used in spatial applications.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- specifications:
  - standard operating procedures and documentation relating to data privacy and information copyright
  - suitable image data in hard copy or digital format
- relationships with team members and supervisor:
  - working under supervision.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS4022 Store and retrieve spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4022A Store and retrieve spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to store and retrieve spatial data, including digital and hard copy storage. The unit covers locating, storing, and backing up data according to organisational procedures.

The unit supports those who work in support positions in a surveying or spatial information services team in surveying, town planning, cartography, mapping and geographic information systems (GIS).

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |                                      |  |
|--------------------------------------|--|
| 1. Prepare spatial data for storage. | 1.1. Task requirements are identified and clarified with <b><i>appropriate persons</i></b> . |
|--------------------------------------|--|

- 1.2. Method of spatial data storage and distribution is selected to ensure access to current data and to comply with organisational requirements.
  - 1.3. Data index is created to assist in retrieval and storage according to organisational requirements.
  - 1.4. Data is stored and recorded according to organisational requirements.
2. Access and retrieve spatial data.
    - 2.1. Required spatial data is located and retrieved according to organisational procedures.
    - 2.2. Spatial data is analysed and translated into required format according to task requirements.
3. Manage spatial data security.
    - 3.1. Data security and backup measures are applied to manage risk according to organisational risk management plan and procedures.
    - 3.2. Problems with data security, storage or retrieval are identified and reported according to organisational procedures.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• apply basic measurements and computations to accurately mark and record observations and position.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret graphical information obtained from global navigation satellite system (GNSS), GIS or other software.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• record digital data</li> <li>• write routine reports detailing problems with data storage or retrieval.</li> </ul>

- Technology skills to:
- use a range of software applications to access and store data
  - use querying commands to obtain information from a database.
- Problem-solving skills to:
- identify storage solutions appropriate to different types of spatial data
  - identify contingency procedures in the event of unforeseen risk to data security.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- client
  - colleague
  - qualified surveyor
  - supervisor or line manager
  - spatial data provider.

## Unit Mapping Information

# Assessment Requirements for CPPSIS4022 Store and retrieve spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4022A Store and retrieve spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also store and retrieve digital and hard copy spatial data for three different projects.

While storing and retrieving the above spatial data, the person must:

- follow organisational procedures to apply data security and backup measures
- comply with administrative and legal requirements for storing and retrieving spatial data, including data privacy and information copyright
- comply with organisational requirements for recording data and completing documentation, and when using the equipment specified in the assessment conditions
- create a workable indexing system
- develop and implement risk management plan, including strategies to protect spatial data
- translate spatial data downloaded from global navigation satellite system (GNSS), geographic information system (GIS), and other relevant software applications.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- key features of spatial reference systems
- methods for downloading data from GNSS, GIS and other relevant software applications
- organisational procedures for storing and retrieving digital and hard copy spatial data, including data privacy and information copyright
- spatial data classification and indexing systems
- spatial data querying techniques.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - data retrieval equipment
  - computer with software appropriate for spatial data storage and retrieval
  - hard copy and digital data storage media
- specifications:
  - organisational policies, procedures and documentation relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by task and organisational requirements.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPSIS4024 Source and assess spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4024A Collect and set out spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to source spatial data from a range of media and datasets, and assess its availability and suitability for use in meeting client requirements. The unit covers researching and assessing data suppliers and information, such as metadata and attributes, to determine the most suitable sources of available data to meet job specifications. The unit also covers collecting and setting out data using a computer and software suitable for manipulating and presenting spatial data. The unit requires the ability to measure and reduce data and write technical reports.

The unit supports those who work in support positions for surveying and mapping, town planning, cartography and geographic information systems (GIS).

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |                                     |  |
|-------------------------------------|--|
| 1. Source spatial data.             | <p>1.1. Job specifications for required spatial data are identified in consultation with <i>appropriate persons</i>.</p> <p>1.2. Search is undertaken of a range of media to identify sources of potential spatial data.</p> <p>1.3. <i>Metadata</i>, datasets and attributes are obtained and assessed to determine most appropriate data source according to job specifications.</p> <p>1.4. Potential sources of spatial data are listed according to job specifications and organisational requirements.</p> |
| 2. Assess potential spatial data.   | <p>2.1. Potential spatial data and datasets are assessed for suitability against job specifications.</p> <p>2.2. Availability of suitable spatial data is verified with potential suppliers, and constraints are identified according to organisational requirements.</p> <p>2.3. Spatial data indexing, backup and archiving requirements are determined to ensure currency.</p>  |
| 3. Prepare data suitability report. | <p>3.1. Spatial data is collected and set out according to job specifications and organisational requirements.</p> <p>3.2. Administrative and industry requirements for data collection are complied with and recorded.</p> <p>3.3. <i>Documentation</i> is completed according to organisational requirements.</p>  |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

Initiative and enterprise skills to:

- identify situations requiring the need to obtain further sample data to ensure data suitability.

- Numeracy skills to:
- interpret and compare data version information
  - measure spatial data components.
- Oral communication skills to:
- ask questions to clarify data requirements.
- Reading skills to:
- interpret graphical and technical information from maps and photographs.
- Writing skills to:
- prepare clear and accurate technical reports that can be interpreted by a third party.
- Technology skills to:
- use a computer and software to set out and format spatial data.
- Problem-solving skills to:
- implement contingency measures where there are constraints on the use of spatial data.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- client
  - colleague
  - qualified surveyor
  - supervisor or line manager
  - spatial data provider.

- Metadata*** must include at least four of the following:
- availability
  - conditions of use
  - coordinate system
  - currency

- custodian
- data accuracy
- data description
- date of acquisition
- licence
- quality
- source
- spatial data acquisition methodologies
- version control.

**Documentation** must include:

- written assessment of data availability, including cost, licensing conditions, and constraints on use
- written assessment of suitability of available data in meeting requirements for accuracy, completeness, coverage, density, logical consistency and specifications.

## Unit Mapping Information

CPPSIS4024A Collect and set out spatial data

# Assessment Requirements for CPPSIS4024 Source and assess spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4024A Collect and set out spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also source and assess the availability and suitability of spatial data for two different projects in consultation with colleagues.

While sourcing and assessing the above spatial data, the person must:

- clarify job specifications, including extent, content, intended use, accuracy, precision and format of spatial data
- complete required documentation, including written assessments as specified in the range of conditions
- communicate clearly with others to clarify and discuss work tasks
- comply with legal and organisational requirements relating to:
  - completing records and documentation
  - copyright and ownership of spatial data
  - using and storing equipment
  - working safely
- perform spatial data measurements, reduction and manipulation with accuracy
- set out spatial data and related attributes, including:
  - colour
  - layer
  - level
  - line type
  - line width
  - text
- verify availability of suitable data with suppliers, taking into account copyright and ownership constraints.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements relating to measuring and recording spatial data
- key features of spatial reference systems
- methods for assessing the availability and suitability of spatial data
- potential sources of spatial data and datasets
- range of basic spatial data capture and data set-out methodologies
- requirements to comply with data license agreements and copyright
- spatial data formats, handling and structure
- spatial data recording and reduction techniques.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer with software appropriate for spatial data manipulation and set-out
  - printer
- specifications:
  - job specifications
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS4025 Collect spatial data using GNSS

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4025A Collect basic GNSS data.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to collect spatial data using global navigation satellite system (GNSS) equipment for surveying purposes, using both single point and differential techniques. The unit covers planning work tasks and setting up and operating GNSS equipment to achieve the required accuracy. The unit includes validating data to identify errors.

The unit supports those who work in support positions collecting field surveying data.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |   |   |
|---|---|
| 1. Prepare for spatial data collection. | 1.1. Task requirements are reviewed and <i>spatial data</i> collection is planned in consultation with <i>appropriate persons</i> . |
|---|---|

- 1.2. GNSS equipment is selected and checked according to task requirements.
2. Use GNSS equipment to collect data.
  - 2.1. Site conditions are checked to identify factors that could obstruct or interfere with GNSS operation and impact on accuracy of data.
  - 2.2. Conditions for obtaining optimum GNSS positions are determined and basic methods to improve accuracy of GNSS point positioning are applied.
  - 2.3. GNSS equipment is set up and operated according to organisational requirements.
  - 2.4. Point positional data is collected, validated and recorded according to task specifications and organisational requirements.
  - 2.5. Checked data is collected according to organisational requirements.
3. Finalise spatial data collection.
  - 3.1. Data is downloaded and verified, and additional data gathered where required according to organisational requirements.
  - 3.2. Data is processed, and reports and documentation are completed according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• perform surveying calculations relating to height, distances, angles and coordinates</li> <li>• set required datum and map projection and other parameters in equipment.</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>• ask questions to clarify task requirements.</li> </ul>

skills to:

- Reading skills to:
- interpret equipment software menus and configurations
  - interpret three-dimensional (3-D) information.
- Writing skills to:
- compile a short report of data collection task
  - record data legibly by hand.
- Technology skills to:
- use GNSS software to communicate with GNSS receivers.
- Problem-solving skills to:
- recognise and address possible anomalies in collected data.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Spatial data*** must include:
- features and their attributes
  - horizontal position in latitude and longitude, easting and northing
  - vertical height.

- Appropriate persons*** must include at least one of the following:
- experienced colleague
  - qualified surveyor
  - supervisor or line manager.

## Unit Mapping Information

CPPSIS4025A Collect basic GNSS data

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS4025 Collect spatial data using GNSS

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4025A Collect basic GNSS data.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also collect spatial data using global navigation satellite systems (GNSS) for two different tasks in consultation with colleagues.

While collecting the above spatial data, the person must:

- collect point positional data and attributes to surveying accuracies for the task, both by single point positioning and differential techniques for designated datum and map projection
- communicate clearly with others to clarify data collection tasks and report task information
- comply with organisational and legislative requirements for identifying hazards and working safely
- operate the equipment specified in the assessment conditions, and comply with industry and organisational methods for data collection
- plan work tasks to take into account factors that affect accuracy of data collection using GNSS
- spatially view collected positional data, and non-spatially view collected attributes
- verify accuracy of a sample of collected points by recollecting points or other suitable method.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- difference in heights and height datums between GNSS heights and heights on Australian Height Datum
- factors that affect accuracy of data collection by GNSS
- methods for checking accuracy of data collected

- purpose of and methods for setting designated datum and map projection
- typical accuracies obtainable with different GNSS techniques.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - GNSS equipment and any associated software
- specifications:
  - job specifications and plans
  - organisational policies and procedures relating to work health and safety
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPSIS4026 Digitally enhance and process image data

## Modification History

Release 1.

Replaces superseded non-equivalent CPPSIS4026A Read and interpret image data.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to enhance and process image data using digital techniques. The unit covers using remote sensing software to manipulate, enhance, classify and process data to reveal geographic patterns and relationships and improve resolution. Image data can be digital, multispectral scanner, or radar. Platforms can be aircraft, unmanned aerial vehicles or satellites at low to high altitudes. The unit requires assessing the survey area and project specifications to determine the types and possible sources of image data to meet requirements.

The unit supports those who work in a spatial information services team in support positions, such as image analyst, geographic information system (GIS) analyst, GIS officer, or cartographer.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Identify image data.
  - 1.1. Project specifications, survey area and types of image data requirements are determined in consultation with *appropriate persons*.
  - 1.2. Possible sources of image data are identified to meet project specifications.
  - 1.3. Constraints of different types and formats of image data are identified in relation to project specifications.
  
2. Process image data.
  - 2.1. Image data is accessed and analysed using digital techniques to clarify features and properties according to project specifications.
  - 2.2. Ground control targets for photogrammetric mapping are checked to enhance image data.
  - 2.3. Image data is processed, analysed and classified according to organisational procedures to achieve project specifications.
  
3. Finalise digital image enhancement tasks.
  - 3.1. Data image problems are identified and resolved using enhancement techniques according to organisational requirements.
  - 3.2. Information from data images is used to meet project specifications, and documentation is completed according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

Learning skills to:
 

- conduct research to identify image data sources.

Numeracy skills to:
 

- calculate scale of image data

- solve problems relating to area, height, depth, dimension, direction and position in actual operational activity and virtual representation.
- Oral communication skills to:
- ask questions to clarify data image requirements.
- Reading skills to:
- interpret graphical and technical information, including shapes and patterns within digital images.
- Writing skills to:
- record clear and accurate measurements and computations.
- Technology skills to:
- use a computer and software to manipulate and enhance image resolution.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least one of the following:

- client
- experienced colleague
- supervisor or line manager.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS4026 Digitally enhance and process image data

## Modification History

Release 1.

Replaces superseded non-equivalent CPPSIS4026A Read and interpret image data.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also use remote sensing applications to digitally enhance, process and classify two of the following types of image data for two different projects:

- digital aerial photographs
- digital terrestrial images
- images from an unmanned aerial vehicle
- light detection and ranging (LiDAR)
- satellite images.

One of the above projects must have a built environment focus, and the other a natural environment focus.

While digitally enhancing and processing the above image data, the person must:

- analyse project specifications to clarify types of image data required and to identify possible sources of suitable image data
- apply ground controls to aerial photographs
- calculate information in digital and hard copy image data to measure and identify scale
- communicate clearly with others to clarify and discuss work tasks
- comply with industry-accepted standards for processing remotely sensed data
- comply with legislative and organisational requirements relating to data privacy and information copyright
- comply with organisational requirements relating to health and safety when using screen-based equipment, and completing records and documentation
- georeference images
- identify and resolve constraints and problems relating to image data
- identify ground controls, including targets for horizontal and vertical control

- use software applications to access, analyse and enhance image data.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- basic properties and characteristics of image data used in spatial applications
- key features of spectral signatures, discriminant functions, supervised and unsupervised clustering, and ground trothing
- organisational policies and guidelines relating to equipment use, health and safety, and accessing and formatting image data and copyright
- photogrammetric control requirements relating to three-dimensional (3-D) model image data
- possible sources of image data
- set-out and format requirements for image data
- techniques for enhancing image resolution, including basic interpolation.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer and software with image enhancement functionality
- specifications:
  - task specifications
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:
  - access to equipped workstation
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS4027 Organise surveying field services

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4027A Organise field services.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to organise surveying field services. The unit covers planning field activities to allow for contingencies and risks, and allocating resources. The unit also covers conducting organised field service tasks relating to measuring and marking surface positions, and documenting and reporting project results. It requires some client consultation.

The unit supports those who work in support positions for surveying, cartography, mapping and geographic information systems (GIS).

Licensing, legislative, regulatory or certification requirements concerning the use of vehicles apply to this unit in most States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Plan surveying
  - 1.1. Job specifications and principal work activities are

- field services. identified and clarified with *appropriate persons*.
- 1.2. Field services are planned to include objectives, spatial data specifications, required resources, constraints, and health and safety requirements.
  - 1.3. Plans and other relevant information are analysed to determine the location of services and site references.
  - 1.4. Risks and contingencies are identified and risk control measures incorporated into field services plan according to organisational requirements.
  - 1.5. Tools, equipment and supplies are selected and prepared to meet job requirements.
  - 1.6. Work is allocated to appropriate persons, and checks and measures are implemented to ensure work is completed within time available.
2. Conduct field service tasks.
- 2.1. Field service tasks are carried out according to job specifications.
  - 2.2. Surface positions are determined and marked according to site drawings and organisational requirements.
3. Complete field service tasks.
- 3.1. Site is restored as near as practicable to original condition, and waste is disposed of according to organisational requirements.
  - 3.2. Tools and equipment are cleaned and stored in a secure location according to organisational requirements.
  - 3.3. Documentation is completed accurately and promptly and checked against job specifications.
  - 3.4. Job completion is reported to appropriate persons according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Planning and organising skills to:	<ul style="list-style-type: none"><li>• prioritise activities to meet work requirements and immediate field needs.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• calculate time and resources to allocate to field services.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions to identify and clarify client requirements</li><li>• impart knowledge and ideas to meet client needs.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret technical information in manufacturer specifications.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• complete field records</li><li>• prepare clear and accurate technical reports that can be interpreted by a third party.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• use a computer and software to prepare reports.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least one of the following:

- client
- experienced colleague
- supervisor or line manager
- supplier.

## Unit Mapping Information

CPPSIS4027A Organise field services

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPSIS4027 Organise surveying field services

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4027A Organise field services.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also organise surveying field services for two different projects in consultation with colleagues.

While organising the above field services, the person must:

- review job specifications and objectives to determine resource allocations in consultation with others
- plan field services to allow for contingencies, such as inclement weather
- organise a small work team to provide field services
- conduct a range of field service tasks and assist in restoring the work site on completion
- determine and mark surface positions based on information in site drawings and references
- communicate clearly with others to clarify and report project information
- comply with organisational requirements when using and storing the equipment specified in the assessment conditions, and completing records and documentation
- comply with health and safety requirements to:
  - identify potential hazards and apply risk control measures
  - inspect equipment to ensure it is in safe working order.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- basic techniques for planning field services and organising a small work team
- industry requirements and standards for determining and marking surface positions
- organisational requirements relating to resource allocation, equipment use, and health and safety when working in the field

- types and uses of spatial data obtained from:
  - global navigation satellite system (GNSS)
  - level
  - total station
- ways to minimise environmental impact from field activities.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - data measuring and recording equipment
  - communications equipment
  - computer and relevant software
  - safety equipment, including personal protective equipment (PPE) for field work
  - vehicle as required
- specifications:
  - organisational policies, procedures and documentation relating to work health and safety
  - maps and site drawings
- relationships with team members and supervisor:
  - work in a team
- relationships with client:
  - client consultation required.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS4030 Operate surveying equipment

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4030A Operate surveying equipment.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to operate a range of surveying equipment for data capture or spatial data set-out. The unit covers selecting, setting up and using surveying equipment to perform basic measurements; and recording and calculating horizontal and vertical information. This includes validating and checking data accuracy and performing basic data reductions and manipulation using software. The unit requires the ability to check and adjust equipment to achieve task requirements, and to identify and report faults or problems. It also requires the ability to plan and execute work tasks in consultation with team members, and complete records and documentation.

The unit supports those who work in a surveying team in support positions relating to field data collection.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Plan surveying tasks.
  - 1.1. Task requirements and principal work activities are identified and clarified with *appropriate persons*.
  - 1.2. Design information is reviewed to identify components to be measured in consultation with appropriate persons.
  - 1.3. Surveying equipment is selected to meet task requirements, and set up according to manufacturer specifications.
  - 1.4. Hazards are identified and risks managed, and problems are reported according to organisational requirements.
  
2. Execute surveying tasks.
  - 2.1. Equipment is operated and adjusted as required to measure identified survey components according to task and organisational requirements.
  - 2.2. Measured surveying data is reduced for comparison with design and manipulated to meet task and organisational requirements.
  - 2.3. Data is checked against task requirements, and errors are identified and resolved in consultation with appropriate persons.
  - 2.4. Measurements are validated and recorded according to industry-accepted standards and organisational requirements.
  - 2.5. Team activities are performed according to task and organisational requirements.
  
3. Finalise surveying tasks.
  - 3.1. Surveying task is finalised and data processed according to task and organisational requirements.
  - 3.2. Documentation is completed and data stored according to organisational requirements.
  - 3.3. Equipment is checked, and faults and problems are reported according to manufacturer and organisational requirements.
  - 3.4. Equipment is packed up and stored according to manufacturer and organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"><li>• record and interpret statistics</li><li>• solve basic problems relating to height, depth, dimension, direction and position.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions to clarify task requirements.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret technical and diagrammatic information in task specifications and designs.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• record clear and accurate measurements, computations and field checks.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• operate equipment and software to manipulate basic spatial data.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least one of the following:

- experienced site personnel
- qualified surveyor
- supervisor or line manager.

## Unit Mapping Information

CPPSIS4030A Operate surveying equipment

# Assessment Requirements for CPPSIS4030 Operate surveying equipment

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4030A Operate surveying equipment.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also operate the following surveying equipment for spatial data capture or data set-out for two different surveying tasks:

- hand-held global positioning system (GPS) in single point positioning mode for:
  - determining point position
  - navigating and recording a traverse
  - collecting designated attributes for designated features
- automatic, digital or laser level
- total station.

In addition, while capturing or setting out surveying data for the above surveying tasks, the person must use two of the following pieces of surveying equipment:

- compass
- clinometer
- data recording equipment
- digital or hard copy map or image
- distance measuring wheel
- hand-held laser measuring device
- tape.

While capturing or setting out the above spatial data, the person must:

- plan work activities to meet design and task specifications
- communicate clearly with others to clarify work tasks and report problems and errors relating to data or equipment
- accurately perform the following:

- checks to validate measurements and identify potential faults and problems with equipment
- data manipulations and reductions
- measurements and computations that meet industry-accepted standards for accuracy, including calculating horizontal and vertical information
- comply with organisational, legislative and manufacturer requirements in order to work safely, including:
  - using personal protective equipment (PPE)
  - complying with relevant safe work method statements (SWMS)
  - identifying and managing hazards and risks
- cooperate with team members to operate equipment
- follow manufacturer specifications and standard operating procedures to correctly set up, operate, pack up and store surveying equipment and tools
- use organisational proformas to accurately record measurements and data.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accepted organisational standards for recording metadata
- attributes associated with a spatial dataset
- key features of spatial reference systems
- limitations of the surveying equipment specified in the performance evidence
- methods for downloading spatial data collected using the surveying equipment specified in the performance evidence
- methods for setting up, levelling, calibrating and using the surveying equipment specified in the performance evidence
- organisational policies and procedures relating to surveying data collection and set-out, and storage and retrieval of collected data
- organisational procedures for hazard reporting, and equipment use and maintenance
- surveying data acquisition methodologies using equipment specified in the performance evidence.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence
- specifications:
  - equipment operating manuals
  - standard operating procedures and documentation relating to work tasks
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by task and organisational requirements.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS4031 Perform surveying computations

## Modification History

Release 1.

This version first released with CPP Property Services Training Package Version 3.

Replaces superseded equivalent CPPSIS4031A Perform surveying computations.

## Application

This unit of competency specifies the outcomes required to perform surveying computations in a plane coordinate system. Computations involve simple and complex figures with regular and irregular sides, and computations for traverses, angles, bearings, coordinates, perimeter and area. Computations include simple horizontal curves and horizontal set-out data for curves. Specialised software applications are routinely used.

The unit supports those who work in support positions in a surveying team to conduct surveying and mapping tasks.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |                          |  |
|--------------------------|--|
| 1. Prepare for surveying | 1.1. Task requirements are identified in consultation with <b><i>appropriate persons</i></b> . |
|--------------------------|--|

- computations.
- 1.2. Computational methods are identified according to industry and organisational procedures.
  - 1.3. Computational equipment is selected according to task and organisational requirements.
2. Execute computation tasks.
    - 2.1. Computations are performed on coordinates of a simple closed traverse using computational equipment, and missing elements and coordinates are adjusted and computed.
    - 2.2. Traverse information is reduced and adjustments are performed according to industry-accepted standards and task requirements.
    - 2.3. Computations are performed on all elements of simple circular curves, and missing elements are solved according to standards and organisational requirements.
  3. Finalise computation tasks.
    - 3.1. Data and computations are checked to ensure accuracy according to standards and task requirements.
    - 3.2. Computations are finalised and recorded according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• apply the principles of algebra, geometry and trigonometry to the plane geometry and measuring figures with regular and irregular sides.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify task requirements and computational formulas</li> <li>• discuss solutions to computational problems.</li> </ul>

- Reading skills to:
- interpret computational data provided in diagrammatic form
  - interpret written computational tasks.
- Writing skills to:
- record computations and results using industry-accepted templates and formats.
- Problem-solving skills to:
- identify errors in computational results by applying rigorous checking procedures.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- client
  - experienced surveying colleague
  - qualified surveyor
  - supervisor or line manager.

# Assessment Requirements for CPPSIS4031 Perform surveying computations

## Modification History

Release 1.

This version first released with CPP Property Services Training Package Version 3.

Replaces superseded equivalent CPPSIS4031A Perform surveying computations.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also accurately perform the following computations for two different surveying tasks:

- calculate areas from bearings and distances or coordinates
- calculate angles, distances, perimeter and area for simple and complex figures
- set out data for simple horizontal curves
- calculate surveying data required to set out the position of curves and structures
- traverse calculations in east, north, misclose and adjustment calculations, and calculations based on adjusted coordinates
- traverse types, include opening and closing on same point and different points of known coordinates.

While performing the above surveying computations, the person must:

- communicate clearly with others to clarify work tasks and computational results
- comply with organisational requirements and industry-accepted standards for:
  - systematically and legibly laying out computations
  - completing records and documentation
- examine the computational results and verify the accuracy of results.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- common computational terms used in surveying
- industry-accepted methods for performing surveying computations in a plane coordinate system
- methods for checking accuracy of computations to identify errors and solve problems

- methods for computing basic traverse data
- organisational procedures for completing surveying records and documentation.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - scientific or programmable calculator or a software application that includes surveying calculations
- specifications:
  - task specifications
  - organisational policies, procedures and documentation relating to work tasks
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by the task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPSIS4032 Conduct field surveying operations

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4032A Plan and conduct survey expeditions.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to plan and conduct field surveying operations, which may include working in isolated or remote areas. The unit covers planning and preparing operations to ensure adequate equipment and supplies and to meet work health and safety requirements. The unit also requires completing documentation and cleaning, checking, maintaining and storing equipment after the field operation is completed. The unit requires knowledge of emergency procedures.

The unit supports those who work in support positions in a surveying team.

Licensing, legislative, regulatory or certification requirements concerning the use of vehicles apply to this unit in most States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |               |  |
|---------------|--|
| 1. Plan field | 1.1. Field surveying objectives, principal work activities and |
|---------------|--|

- surveying operation.
- site location are identified in consultation with *appropriate persons*.
- 1.2. Logistical considerations are planned according to location, duration and size of field trip, and resupply requirements.
  - 1.3. Maps, photographs and other available data are used in planning activities.
  - 1.4. Equipment and supplies are selected and prepared according to field surveying objectives, and health and safety requirements.
2. Carry out field surveying activities.
- 2.1. Vehicles are prepared and equipment and supplies loaded and secured according to organisational requirements.
  - 2.2. Surveying field site is located, prepared and maintained according to organisational requirements.
  - 2.3. Surveying activities are conducted according to operation objectives and timeframes, and health and safety requirements.
  - 2.4. Contingency procedures are implemented in the event of emergencies and unforeseen hazards according to organisational requirements.
  - 2.5. Environmental impact from field activities is minimised and waste disposed of according to organisational requirements.
3. Finalise field surveying operation.
- 3.1. Equipment is unloaded, cleaned and stored according to organisational requirements.
  - 3.2. Equipment is checked and necessary repairs organised and reported according to organisational requirements.
  - 3.3. Required documentation is completed according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Planning and organising skills to:	<ul style="list-style-type: none"><li>• prioritise work activities to meet field operation timeframes.</li></ul>

# Assessment Requirements for CPPSIS4032 Conduct field surveying operations

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4032A Plan and conduct survey expeditions.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also:

- plan two field surveying operations
- carry out field service tasks during one of the above planned operations.

While planning and conducting the above field surveying operations, the person must:

- assess field operation objectives to identify equipment and supply requirements
- comply with health and safety requirements when carrying out field service tasks by:
  - following procedures in the event of an emergency
  - identifying potential hazards and applying risk management strategies
  - inspecting equipment to ensure it is in safe working order
- comply with legislation and regulations when disposing of waste, and if using vehicles
- comply with organisational requirements when using and storing equipment and resources, and completing records and documentation
- monitor surveying activities to ensure planned schedules and objectives are met
- plan for logistical considerations to:
  - allow for contingencies in the event of adverse weather conditions and emergencies
  - arrange an appropriate method of communication and transport to and from the site
  - arrange appropriate amounts of equipment and supplies
  - locate an appropriate field site
- select and use the tools and equipment specified in the assessment conditions, to conduct field operation activities.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- emergency procedures, particularly survival procedures when working in remote and isolated areas
- methods of communication in an emergency situation, including procedures for using distress beacons
- organisational procedures for using equipment and instruments when carrying out surveying field service tasks
- procedures for communicating with emergency services personnel
- procedures for minimising the impact on the environment from field work activities
- requirements for survival kits
- project management techniques and their application to field surveying work.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - communications equipment appropriate to field site location
  - emergency and personal protective equipment (PPE) appropriate to the operation
  - surveying equipment and instruments, including scanning total station
  - vehicle
- specifications:
  - maps and other spatial and navigational data appropriate to field trip
  - organisational policies and procedures relating to:
    - work health and safety
    - protecting the environment
  - surveying data specifications
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by field operation requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS4034 Maintain spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4034A Maintain spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to implement a full cycle of spatial data maintenance, including updating, backup, recovery and archiving. The unit covers editing, updating and integrating existing and new spatial data, and problem solving to test and validate data currency and retrieval and backup systems. The unit requires the ability to use computers and software to display and manipulate data and create metadata. It also covers recording information and completing documentation.

The unit supports those who work in support positions in a spatial information services team in areas such as field work coordination, data collection and administration.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Confirm reliability 1.1. Task requirements are clarified with *appropriate*

- of spatial data.
- persons.*
- 1.2. Equipment is selected, set up and checked to ensure correct operation and functionality.
  - 1.3. Spatial data updates are accessed and checked to confirm currency and relevance, and recorded in consultation with appropriate persons.
  - 1.4. Spatial data is checked and edited to ensure it is compatible and in acceptable format according to task specifications.
  - 1.5. Entities and attributes are used to display spatial information while maintaining integrity and consistency of data.
2. Edit and update spatial data.
    - 2.1. Spatial data is amended and replaced to meet task requirements in consultation with appropriate persons.
    - 2.2. Existing and new data is edited, prepared and integrated according to task requirements.
    - 2.3. Spatial datasets are tested and validated to ensure integrity and quality according to task requirements.
    - 2.4. Documentation is amended and updated according to organisational requirements.
  3. Carry out data backup and recovery.
    - 3.1. Data backups are implemented to ensure data is accessible in contingency situations according to organisational requirements.
    - 3.2. Backup system is tested to ensure that data can be retrieved, and problems are resolved in consultation with appropriate persons.
  4. Archive data.
    - 4.1. Spatial dataset to be archived is checked for completeness and manipulated where necessary, in consultation with appropriate persons.
    - 4.2. *Metadata* is created according to organisational requirements.

- 4.3. Archived spatial data is stored in a secure location, and details are recorded according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"><li>• conduct research to source spatial data.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• interpret and compare data version information.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions to clarify process and instructions.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret graphical and technical information from maps and imagery.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• enter data into a database or document using a computer and software.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>• verify accuracy of data and identify errors.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons***

- end user

must include at least one of the following:

- supervisor or line manager
- technical staff.

*Metadata* must include at least four of the following:

- availability
- conditions of use
- coordinate system
- currency
- custodian
- data accuracy
- data description
- date of acquisition
- licence
- quality
- source
- spatial data acquisition methodologies
- version control.

## Unit Mapping Information

CPPSIS4034A Maintain spatial data

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS4034 Maintain spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4034A Maintain spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also work under direction to implement the full cycle of spatial data maintenance for two different tasks, including updating, backup, recovery and archiving of data.

While maintaining the above spatial data, the person must:

- comply with administrative and legal requirements for storing and retrieving spatial data, including data privacy and information copyright
- comply with organisational requirements and manufacturer specifications when using the equipment specified in the assessment conditions
- comply with organisational requirements for recording data, completing documentation, and working safely when using screen-based equipment
- display spatial information using vector and raster data, including:
  - arcs
  - circles
  - colour
  - hatch
  - imagery
  - layer
  - level
  - lines, including type and width
  - text
- manage and manipulate a range of spatial data, including:
  - hard copy
  - text
  - raster
  - vector.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- administrative and legal requirements for accessing, storing, retrieving and archiving digital and hard copy spatial data, including data privacy and information copyright
- methods for validating test results to identify systematic distortions
- querying and browsing techniques for obtaining information from databases
- key features of spatial reference systems
- types of spatial data formats
- types of storage media for a range of spatial data.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - data storage media, including hard copy and digital
  - computer with software appropriate for spatial data management and retrieval
  - printer
- specifications:
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPSIS4035 Apply GIS software to solve spatial data problems

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4035A Apply GIS software to problem-solving techniques.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to use geographic information system (GIS) software applications to integrate data and solve spatial data problems. The unit covers setting up hardware and GIS software applications and using features, such as spatial overlay techniques, to solve problems and test and validate the cartographic integrity of data. The unit also covers producing reports based on analysing basic spatial data and archiving the data. The unit requires the ability to use entity and attribute queries to generate results for presenting spatial data, and using univariate statistics to explore datasets.

The unit supports those who work in support positions in a spatial information services team in areas such as field work coordination, data collection and administration.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Query spatial data.
  - 1.1. Task requirements are clarified with *appropriate persons*.
  - 1.2. GIS software and equipment are set up and checked to ensure correct operation and functionality.
  - 1.3. Spatial datasets are accessed, interpreted and manipulated to ensure they are in acceptable format to meet task requirements.
  - 1.4. Entities and attributes are used to display spatial information, and entity and attribute queries are used to generate summary results.
  - 1.5. Query results are used to present spatial data graphically according to organisational requirements.
  - 1.6. Entity and attribute queries are applied when using univariate statistics to explore the dataset.
  - 1.7. Routine spatial data problems or irregularities are identified and resolved in consultation with appropriate persons.
  
2. Solve spatial data problems.
  - 2.1. Existing spatial and aspatial data is adjusted to integrate with new data according to organisational requirements.
  - 2.2. Spatial techniques and tools are used to combine spatial layers data to solve problems, highlight selected features, and improve visual aspects.
  - 2.3. Spatial overlay techniques are used to solve problems and generate results relating to spatial task in consultation with appropriate persons.
  - 2.4. Cartographic integrity is tested and validated to solve accuracy and quality problems.
  
3. Produce reports based on basic spatial data analysis.
  - 3.1. Map or plans are integrated into reports according to task requirements.
  - 3.2. Results, summary statistics and graphs from mapping application are incorporated into reports according to organisational requirements.

4. Archive data.
- 4.1. Spatial dataset to be archived is checked for completeness and manipulated where necessary, according to organisational requirements.
  - 4.2. *Metadata* is created according to organisational requirements.
  - 4.3. Archived spatial data is stored in a secure location, and details are recorded according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• conduct research to access spatial updates.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• apply understanding of height, depth, breadth, dimension and position to actual operational activity and virtual representation</li> <li>• check accuracy of cartographic tolerances and measurements</li> <li>• interpret statistics.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify task requirements.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret graphical information in vectors and rasters</li> <li>• interpret technical information from maps and imagery.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• use organisational templates to integrate existing and new data.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• enter data into database or document using a computer and software</li> <li>• operate a range of GIS software systems.</li> </ul>

Problem-solving skills to:

- identify errors by cross-referencing validation results.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least two of the following:

- colleague
- end user
- supervisor or line manager
- supplier.

***Metadata*** must include at least four of the following:

- availability
- conditions of use
- coordinate system
- currency
- custodian
- data accuracy
- data description
- date of acquisition
- licence
- quality
- source
- spatial data acquisition methodologies
- version control.

## Unit Mapping Information

CPPSIS4035A Apply GIS software to problem-solving techniques

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS4035 Apply GIS software to solve spatial data problems

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4035A Apply GIS software to problem-solving techniques.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also use geographic information system (GIS) software applications to integrate data and solve spatial data problems for two different tasks.

While undertaking the above tasks, the person must:

- combine spatial layers data, including:
  - raster, including aerial and terrestrial photography and satellite imagery in digital format
  - vector overlay
- comply with organisational requirements for documentation and reporting relating to:
  - audit trails
  - naming standards
  - templates
  - version control
- comply with organisational requirements to work safely when using the equipment specified in the assessment conditions
- comply with legal and ethical requirements for producing reports based on spatial data analysis
- display spatial information using entities and attributes, including:
  - arcs
  - circles
  - colour
  - hatch
  - layer
  - level

- lines, including type and width
- symbology
- text
- manage and manipulate a range of spatial data, including:
  - digital
  - hard copy
  - image
  - text
  - raster
  - vector
- operate a range of GIS software to perform entity and attribute queries and explore datasets
- use geospatial techniques, including:
  - buffer
  - clip
  - dissolve
  - intersect
  - merge union
  - overlay.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- legal requirements for accessing, manipulating, reporting and archiving digital and hard copy spatial data, including data privacy and information copyright
- methods for using univariate statistics and charting, including:
  - arithmetic mean, median and mode
  - histograms that illustrate the concepts of normal and other distributions
  - maximum and minimum
  - range
  - standard deviation
  - variance
- methods for validating test results to identify systematic distortions in accuracy of information
- printing and image formats for map production
- querying and browsing techniques for obtaining information from databases and solving problems
- spatial data storage technology
- spatial overlay techniques
- key features of spatial reference systems.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer with access to GIS software applications
  - printer and other hardware necessary for work tasks
- specifications:
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by task and organisational requirements.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# **CPPSIS4036 Operate spatial software applications**

## **Modification History**

Release 1.

Replaces superseded equivalent CPPSIS4036A Operate spatial software applications.

This version first released with CPP Property Services Training Package Version 3.

## **Application**

This unit of competency specifies the outcomes required to operate spatial software applications to produce, name and store spatial documents. The unit covers planning work tasks and selecting suitable software and equipment to meet task requirements. The unit requires the ability to use a computer and the features, tools and functions of different software applications to present, calculate and check spatial information.

The unit supports those who work as part of a surveying and spatial information services team in a range of support positions.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## **Pre-requisite Unit**

Nil

## **Unit Sector**

Surveying and spatial information services

## **Elements and Performance Criteria**

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |                 |   |
|-----------------|---|
| 1. Plan spatial | 1.1. Task objectives and audience and presentation requirements are identified and reviewed in consultation |
|-----------------|---|

- operation. with *appropriate persons*.
- 1.2. Appropriate *software application* and equipment are selected to meet task and organisational requirements.
  - 1.3. Equipment and software are set up and checked to ensure correct operation and functionality.
2. Carry out spatial operation.
    - 2.1. Work methodology and spatial data are selected and applied according to software application and task objectives and requirements.
    - 2.2. Software application is operated to produce spatial documents according to task requirements.
    - 2.3. Control structures are applied according to organisational requirements.
    - 2.4. Technical functions and tools are used to edit, format and complete documents according to task requirements.
  3. Finalise spatial operation.
    - 3.1. Spatial documents are checked and finalised using software functions according to task requirements.
    - 3.2. Spatial documents are named and stored in directories and folders according to organisational requirements.
    - 3.3. Documentation is completed according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

Initiative and enterprise skills to:

- design spatial document presentation and layout.

Learning skills to:

- conduct research to source spatial data for inclusion in documents.

- Numeracy skills to:
- undertake computations using basic formulas in software.
  -
- Oral communication skills to:
- ask questions to clarify software application requirements.
- Reading skills to:
- interpret technical commands and prompts in software applications.
- Writing skills to:
- record clear and accurate measurements and computations.
- Technology skills to:
- use a computer and software features, tools and functions to produce, name and store spatial documents
  - operate hardware, including computers and printers.
- Problem-solving skills to:
- verify accuracy of document content using formulas
  - use online help function to assist software operation.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- client
  - colleague
  - supervisor or line manager.

- Software application*** must include at least one of the following:
- database
  - spreadsheet
  - word processing.

## Unit Mapping Information

CPPSIS4036A Operate spatial software applications

# Assessment Requirements for CPPSIS4036 Operate spatial software applications

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4036A Operate spatial software applications.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also operate two different types of spatial software applications to produce spatial documents.

While operating the above spatial software applications, the person must:

- plan work tasks to select and access software, equipment and resources to meet spatial task objectives
- communicate clearly with others to clarify task requirements and required document content
- use a computer and spatial software applications to prepare spatial documents
- apply control structures, including:
  - acceptance criteria
  - inspection
  - review
  - test plans
- apply different spatial software applications to use the following tools and features:
  - alignment
  - clip art
  - comments
  - digital photographs
  - digital signatures
  - display features
  - embedding
  - exporting
  - fields

- fills and shading
- formulas
- importing
- lines and borders
- linking
- merging and splitting cells
- page and section breaks
- permissions
- reviewing
- sharing
- sort criteria
- spell check
- table of contents
- templates
- text direction
- versioning
- identify and resolve problems with spatial data and documents
- comply with organisational requirements relating to:
  - completing records and documentation
  - file naming and storing conventions
  - health and safety when using screen-based equipment
  - privacy of information.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- features, tools and functions of different commercial software applications used to prepare and present spatial information
- organisational conventions for naming and storing spatial documents
- organisational policies and procedures relating to:
  - data privacy and information copyright
  - using equipment safely
  - using spatial software applications and input and output devices
- presentation and format requirements for spatial documents
- technical terminology relating to online help files and functions.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - personal computer and keyboard

- printer
- specifications:
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
  - spatial task specifications
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by task and organisational requirements.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -

# CPPSIS4037 Produce computer-aided drawings

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4037A Produce computer-aided drawings.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to use appropriate software program functions and features to produce drawings for spatial tasks. The unit covers determining task requirements, including analysing task or design specifications and client needs, and setting up hardware and software applications. It requires the ability to use software functions and features to prepare digital and paper computer-aided spatial drawings, and to test and validate the integrity of drawings.

The unit supports those who work in technical support positions in a surveying and spatial information services team, and take some responsibility for liaising with clients or end users to meet task requirements.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Determine drawing requirements.
  - 1.1. Design specifications and client needs are identified and analysed to determine drawing requirements.
  - 1.2. *Appropriate persons* are consulted to clarify task specifications according to organisational requirements.
  - 1.3. Equipment and software are selected, set up and checked according to task specifications.
  
2. Gather object parameters and measures.
  - 2.1. Critical dimensions and data for required drawings are established and recorded.
  - 2.2. Quality requirements are identified and applied to design.
  - 2.3. Requirements in relation to accuracy and tolerances are identified according to organisational requirements.
  
3. Produce spatial drawings.
  - 3.1. *Software functions and features* are accessed and used according to task specifications.
  - 3.2. Preliminary drawings are prepared and reviewed in consultation with appropriate persons.
  - 3.3. Drawings are checked against task specifications and industry-accepted standards.
  - 3.4. Drawing integrity is checked and validated to ensure accuracy and quality.
  - 3.5. Adjustments to drawings are made to meet task specifications and final drawings are disseminated to appropriate persons.
  - 3.6. Data files are stored according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Initiative and enterprise skills to:	<ul style="list-style-type: none"> <li>• create spatial data layout and design.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• plan and prioritise work to meet contractual requirements.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• apply understanding of height, depth, dimension and position to actual operational activity and virtual representation</li> <li>• verify accuracy of drafting or drawing tolerances and measurements.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• liaise with clients and end users to identify task requirements and required drawing detail.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret technical drawing standards.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• load spatial data into software applications</li> <li>• operate hardware, including computers and printers.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Appropriate persons</i></b> must include at least two of the following:	<ul style="list-style-type: none"> <li>• client</li> <li>• colleague</li> <li>• end user.</li> </ul>
<b><i>Software functions and features</i></b> must include at least eight of the following:	<ul style="list-style-type: none"> <li>• arcs</li> <li>• dimensions</li> <li>• drawing features, such as polylines and texts</li> <li>• drawing functions</li> <li>• edit functions</li> </ul>

- isometrics and perspectives
- methods for drawing lines
- plotting and printing
- using attributes to make a report
- view displays
- working with layers
- three-dimensional (3-D) techniques, including displaying 3-D views
- two-dimensional (2-D) coordinate plotting.

## Unit Mapping Information

CPPSIS4037A Produce computer-aided drawings

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPSIS4037 Produce computer-aided drawings

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4037A Produce computer-aided drawings.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also use a range of software program functions and features to produce two different computer-aided spatial drawings that meet technical specifications.

While producing the above computer-aided spatial drawings, the person must:

- analyse the following specifications to translate requirements into design:
  - measurements and dimensions for objects and space
  - scope for making adjustments
  - technical objectives
  - timeframes for completing work tasks
  - allocated resources
  - specific client requirements
- select and use appropriate equipment and software, as specified in the assessment conditions, to produce spatial drawings
- communicate clearly with others to clarify task requirements and drawing detail
- comply with organisational requirements relating to:
  - completing records and documentation
  - data storage and privacy of information
  - health and safety when using screen-based equipment
- comply with industry-accepted drawing standards and legislation associated with the quality of computer-aided drawings, including:
  - accuracy of measurements, tolerances and information
  - complying with drawing principles, formats and standards for spatial drawings
- exercise precision and accuracy in relation to drawing production

- import a file containing a detail survey, including feature coding and digital terrain data, and produce a drawing containing appropriate symbols and a three-dimensional (3-D) terrain model
- produce drawings using data imported from other software.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- display principles, including:
  - colour
  - composition
  - font type
  - legends
  - media
  - scale
  - size
  - text and line style
- drawing principles, capabilities and uses in relation to the surveying and spatial information services industry
- industry-accepted drawing standards and common formats, and precision and accuracy requirements for preparing computer-aided drawings
- methods for validating drawings to identify errors
- spatial data storage technology.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - personal computer, including appropriate drawing software and software appropriate for accessing and storing spatial data
  - hardware, including printer, plotter and multimedia devices and peripherals
- specifications:
  - task and design specifications
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team
- relationships with client:

- client consultation required.

Timeframe:

- as specified by task and client requirements.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -

# CPPSIS4038 Prepare and present GIS data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4038A Prepare and present GIS data.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to prepare and present a range of geographic information system (GIS) data using various media. The unit covers consulting and assessing to identify display specifications, and selecting and applying appropriate data formats and presentation media. The unit also covers gathering feedback as the basis for implementing quality improvements. It requires the ability to translate client requirements into an appropriate design and layout, and to adhere to copyright requirements and drawing standards to ensure quality of output.

The unit supports those who work in technical support positions in a surveying and spatial information services team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Prepare for display of GIS data.
  - 1.1. Display specifications are determined in consultation with *appropriate persons*.
  - 1.2. Extent, content and intended use of output are assessed, and display format and medium are selected according to organisational requirements.
  - 1.3. Hardware, software and other equipment are set up and checked to ensure correct operation and functionality, and that compliance requirements are met.
  
2. Format GIS data.
  - 2.1. Spatial datasets are accessed and compiled to meet display specifications.
  - 2.2. Data formats are transformed to meet specifications.
  - 2.3. Formatted data is checked to ensure compatibility and quality according to display specifications.
  
3. Display GIS data.
  - 3.1. Spatial data is presented according to display specifications and organisational requirements.
  - 3.2. Feedback on display is obtained from appropriate persons using simple question and answer process.
  - 3.3. Feedback is analysed to identify improvements, and display is rectified according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

Initiative and enterprise skills to:

### Performance feature

- translate client requirements into spatial data design and layout.

Learning skills to:

- research and source GIS data.

- Oral communication skills to:
- ask questions and listen to responses provided during the feedback process.
- Reading skills to:
- interpret graphical information in GIS data.
- Writing skills to:
- communicate orders for sourcing spatial data
  - record details of quality improvements.
- Technology skills to:
- use computer and software applications to access and manipulate spatial data
  - use querying commands to obtain information from databases.
- Problem-solving skills to:
- resolve problems in data compatibility.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- client
  - end user
  - supervisor or line manager.

## Unit Mapping Information

CPPSIS4038A Prepare and present GIS data

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS4038 Prepare and present GIS data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4038A Prepare and present GIS data.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also prepare and present geographic information system (GIS) data for two different projects that use different mediums.

While preparing and presenting the above GIS data, the person must:

- communicate clearly with others to negotiate client requirements, clarify work tasks, and seek feedback to improve display
- access GIS data from a range of sources
- apply data formats and media that ensure compatibility of data and comply with display specifications
- comply with administrative and legal requirements for accessing spatial data, including data privacy and information copyright
- comply with organisational requirements and manufacturer specifications when setting up and using the equipment specified in the assessment conditions
- comply with organisational requirements for:
  - health and safety when using screen-based equipment
  - recording data and completing documentation
- present GIS data that complies with quality requirements relating to:
  - accuracy
  - detail
  - format
  - information
  - meeting client requirements
  - timeframe.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- administrative and legal requirements for accessing and presenting digital and hard copy GIS data, including data privacy and information copyright
- basic purpose and use of metadata, including:
  - availability
  - conditions of use
  - coordinate system
  - currency
  - custodian
  - data accuracy
  - data description
  - date of acquisition
  - licence
  - quality
  - source
  - spatial data acquisition methodologies
  - version control.
- GIS data formats, including:
  - databases
  - digital graphic output
  - hard copy
  - maps
  - nomenclature
  - plans and diagrams
  - spreadsheets
- display principles, including:
  - colour
  - composition
  - font type
  - legends
  - media
  - scale
  - size
  - symbology
  - text and line style
- organisational requirements for preparing and displaying GIS data, including:
  - accuracy and precision
  - Australian drawing standards.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer with access to suitable software
  - hardware, including plotter or printer
  - high resolution computer screen
- specifications:
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by client and project requirements.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS4039 Design and produce maps

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to apply cartographic design principles and conventions to design and produce maps and associated products for use in surveying and spatial information services applications. The unit covers activities to identify specifications and information on which to base the map design and layout, and produce a map that includes elements, features and spatial reference systems and which meets client needs. It requires using geographic information system (GIS) or map design and production software.

The unit supports those who work in support positions in a surveying and spatial information services team in areas such as surveying, cartography, mapping, town planning (land development) and GIS.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Plan map design.
  - 1.1. Project requirements, and *map type* and purpose are determined in consultation with *appropriate persons*.
  - 1.2. Information is gathered and analysed to determine geographic coverage of map area according to project requirements.
  - 1.3. Required datasets are identified, sourced and assessed for suitability according to project requirements.
  - 1.4. Geoprocessing workflow is planned according to project requirements.
  - 1.5. Scale and map layout are designed according to project requirements.
  - 1.6. Cartographic and infographic principles, standards and conventions are identified and applied according to project requirements.
  - 1.7. Equipment and software are selected and operated according to organisational requirements.
2. Produce map.
  - 2.1. Geoprocessing is carried out on source datasets to produce the data required for map content.
  - 2.2. *Map components* are identified and incorporated into map according to project requirements.
  - 2.3. Spatial reference systems are adopted and applied to locate and align features on map according to project requirements.
  - 2.4. Map is produced to meet project and organisational requirements and guidelines.
  - 2.5. Accuracy of map layout and position is checked against project and organisational requirements.
3. Finalise process.
  - 3.1. Map is finalised and hard copy or digital output is completed according to project requirements.
  - 3.2. Documentation is completed according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"><li>• apply datums and projections to map</li><li>• read data attributes and numeric datasets.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions to clarify map requirements.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret cartographic information, including symbols, colour, images, labels and typography.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• use the functions of mapping software applications to geoprocess data.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Map type</i></b> must include at least one of the following:	<ul style="list-style-type: none"><li>• cadastral map</li><li>• general reference map</li><li>• infographic map</li><li>• special purpose map</li><li>• thematic map</li><li>• topographic map.</li></ul>
<b><i>Appropriate persons</i></b> must include at least two of the following:	<ul style="list-style-type: none"><li>• client</li><li>• experienced colleague</li><li>• qualified cartographer</li><li>• supervisor or line manager.</li></ul>

*Map components* must include:

- elevations
- spatial data features
- spatial data references.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for CPPSIS4039 Design and produce maps

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also design and produce two different types of maps for use in surveying and spatial information services applications.

While designing and producing the above maps, the person must:

- carry out geoprocessing on several vector datasets with attributes from sourced data in order to produce the data that comprises map content
- communicate clearly with others to clarify project requirements and required map design and detail
- comply with organisational requirements relating to:
  - records and documentation
  - health and safety when working on screen-based equipment
  - quality assurance
- exercise precision and accuracy relating to map design and layout
- incorporate appropriate marginal information, including data sources, georeferencing system, map graticule, legend and scale
- incorporate raster data
- insert content into the map frame data that shows the application of cartographic principles
- use equipment, including a computer, printer and mapping software required to produce maps.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- cartographic and infographic design principles and conventions

- common scales used on maps
- key features of spatial reference systems
- procedures for applying datums and projections to map making
- main types of geoprocessing functions in mapping software
- map features and how they are represented
- organisational procedures for map production, reporting and equipment use
- typical characteristics and content of different types of maps, as listed in the range of conditions.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer, printer and required mapping software
- specifications:
  - project and design specifications
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team
- relationships with client:
  - client consultation required.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS4040 Collect spatial data using terrestrial technologies

## Modification History

Release 1.

Replaces superseded non-equivalent CPPSIS4029A Collect and set out basic surveying data.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to collect spatial data using terrestrial technologies, including total station. The unit covers planning work tasks to identify control marks, as well as equipment set-up and operation. The unit includes validating data to identify errors, and making corrections and adjustments using industry-accepted methods to achieve required accuracy range.

The unit supports those who work in support positions in a surveying and spatial information services team in areas such as surveying, town planning, cartography, mapping and geographic information systems (GIS).

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Prepare for spatial 1.1. Project specifications, information and control marks are

- data collection. reviewed, and surveying tasks planned in consultation with *appropriate persons*.
- 1.2. Terrestrial technologies are selected according to project requirements.
  - 1.3. Site conditions are checked to identify factors that could impact on operation of terrestrial technologies and accuracy of data.
2. Operate terrestrial technologies.
    - 2.1. Equipment is set up according to manufacturer specifications.
    - 2.2. Equipment is operated to collect data and attributes according to job specifications.
    - 2.3. Identified survey components are measured and data is reduced according to job specifications.
    - 2.4. Measurements are validated and recorded according to job specifications and data collection plan.
  3. Finalise spatial data collection.
    - 3.1. Data is checked and adjustments are made to identify and correct errors, and where required additional measurements are taken.
    - 3.2. Data is downloaded and project documentation completed according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

- Numeracy skills to:
- perform surveying calculations relating to height, distances, angles and coordinates
  - set required datums.
- Oral communication
- ask questions to clarify task requirements.

skills to:

- Reading skills to:
- interpret equipment software menus and configurations.
- Writing skills to:
- record legible measurements and computations by hand.
- Technology skills to:
- format data using equipment software.
- Problem-solving skills to:
- identify optimum equipment positions to improve accuracy of measurements.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- experienced colleague
  - qualified surveyor
  - supervisor or line manager.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS4040 Collect spatial data using terrestrial technologies

## Modification History

Release 1.

Replaces superseded non-equivalent CPPSIS4029A Collect and set out basic surveying data.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also collect spatial data using terrestrial technologies for two different projects in consultation with colleagues.

While collecting the above spatial data, the person must:

- plan work tasks by checking control marks and ensuring site conditions are appropriate for surveying tasks
- use a total station to collect the spatial data and related attributes
- measure and calculate basic spatial data based on control marks and set coordinates
- communicate clearly with others to clarify and report project information
- comply with organisational and legislative requirements for:
  - identifying hazards and working safely
  - recording, storing and filing data
- comply with manufacturer specifications when using above equipment
- use industry-accepted standards and procedures for checking accuracy of spatial data.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy ranges that can be achieved using terrestrial technologies
- formats and documentation used for recording spatial data collected using terrestrial technologies
- mathematical concepts relating to algebra, trigonometry and geometry and their use in calculating basic spatial measurements
- methods for calculating spatial data and verifying its accuracy using terrestrial technologies

- methods for downloading data collected using terrestrial technologies
- methods for setting up, levelling and calibrating equipment.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - total station
- specifications:
  - job specifications and plans
  - organisational policies and procedures relating to:
    - work health and safety
    - recording and storing spatial data
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS4041 Set out site and building works

## Modification History

Release 1.

Replaces superseded non-equivalent CPPSIS4029A Collect and set out basic surveying data.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to set out spatial data for building or site works using surveying methods and equipment. The unit covers using horizontal and vertical control techniques to set out marks and lines to define the position and level of design points on site. It also covers interpreting plans and specifications in order to conduct measurements and calculations that ensure building elements are the correct size, in the correct plan position, and at the correct reduced level. The unit requires the ability to check and validate measurements and calculations against specifications, and complete set-out documentation.

The unit supports those who work under supervision in a surveying field team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Prepare for set-out tasks.
  - 1.1. Relevant plans and specifications are accessed and interpreted to identify set-out requirements.
  - 1.2. Equipment is selected and prepared according to set-out and organisational requirements.
  - 1.3. Work is planned in consultation with *appropriate persons* to ensure correct understanding of set-out activities.
  
2. Use control techniques for set-out.
  - 2.1. Horizontal control points are located throughout work area and coordinates are set out according to plans and specifications.
  - 2.2. Design points are set out and checked to ensure correct tolerances according to specifications.
  - 2.3. Control points are used and accuracy is checked according to plans and specifications.
  - 2.4. Set-out pegs or markers are used to indicate base lines and offsets relative to work area.
  - 2.5. Vertical control points are established to ensure design points are positioned at correct levels according to plans and specifications.
  - 2.6. Offsets and profiles are put in place to define main lines of building or site works and provide vertical controls.
  - 2.7. Measured surveying data is reduced and calculations are conducted according to industry-accepted standards and organisational requirements.
  
3. Finalise set-out tasks.
  - 3.1. Measurements are checked and validated to ensure correct size, plan position, and reduced level of set-out according to plans and specifications.
  - 3.2. Discrepancies between specifications and actual activities are identified and addressed or reported according to organisational requirements.
  - 3.3. Set-out is finalised and documentation completed according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Numeracy skills to:	<ul style="list-style-type: none"><li>perform surveying calculations relating to height, distances, angles and coordinates</li><li>set required datums and projections.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>ask questions to clarify task requirements.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>interpret graphical information in construction plans and drawings.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>record field notes in a format that can be interpreted by a third party.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>identify and use primary and secondary controls to improve accuracy of measurements.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Appropriate persons</i></b> must include at least one of the following:	<ul style="list-style-type: none"><li>experienced colleague</li><li>qualified surveyor</li><li>site engineer</li><li>supervisor or line manager.</li></ul>

# Assessment Requirements for CPPSIS4041 Set out site and building works

## Modification History

Release 1.

Replaces superseded non-equivalent CPPSIS4029A Collect and set out basic surveying data.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also set out spatial data for site or building works for two different projects as follows:

- one project is to be conducted using a total station
- one project is to be conducted using a global navigation satellite system (GNSS).

While setting out the above spatial data, the person must:

- plan work tasks by checking plans, maps, specifications and control marks
- communicate clearly with others to clarify work tasks and report project information
- set out marks and lines to define position and level of design points on site
- use horizontal and vertical control techniques to position design points and markers
- comply with organisational and legislative requirements for:
  - identifying hazards and working safely
  - recording, storing and filing spatial data
  - setting up and using surveying equipment
- comply with manufacturer specifications when using surveying equipment
- measure and calculate spatial data within industry-accepted tolerances for accuracy.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- mathematical concepts relating to algebra, trigonometry and geometry and their use in calculating spatial measurements
- methods for performing the following:
  - calculating surveying data and verifying its accuracy using primary and secondary controls

- establishing a control network that meets specified tolerances
- recording spatial data relating to set-out
- setting up, levelling and calibrating equipment used to set out spatial data
- purpose of primary and secondary controls for set-out
- reference and coordinate systems for surveying data, including Australian Height Datum and Map Grid of Australia
- types of pegs and markers used during set-out, and methods for ensuring their optimal placement on site.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - GNSS
  - total station
- specifications:
  - job specifications, maps and plans
  - organisational policies and procedures relating to:
    - work health and safety
    - setting up and using surveying equipment
    - spatial data collection
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS5031 Plan spatial data collection

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5031A Plan spatial data collection and validation.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to develop and document a spatial data collection plan that meets client specifications. The unit covers analysing project specifications and client instructions to evaluate and determine appropriate data acquisition and collection options. The unit requires the ability to use technology to manage spatial data and prepare the written plan. It also requires the ability to assess the technical, financial, legal and resource implications of the project in order to select the preferred collection options.

The unit supports those who work in a lead role in a surveying or spatial information services team in areas such as surveying, cartography, town planning, mapping and geographic information systems (GIS).

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Scope spatial data acquisition.
  - 1.1. Client instructions are analysed and project specifications determined according to organisational requirements.
  - 1.2. Data requirements and constraints are identified in consultation with *appropriate persons* and recorded according to organisational requirements.
  - 1.3. Additional information is gathered to clarify acquisition requirements according to project specifications and organisational requirements.
2. Evaluate collection options.
  - 2.1. Technical, financial, legal and resource implications of available collection options are assessed to ensure preferred option meets project specifications.
  - 2.2. Preferred collection option is selected based on project specifications and organisational requirements.
  - 2.3. Assessment process is documented according to organisational requirements.
3. Develop collection plan.
  - 3.1. Spatial data collection specifications, deliverables, constraints and principal work activities are identified and documented in a plan according to project requirements.
  - 3.2. Identified risks, contingencies and resources, as well as technology and techniques to be used to collect spatial data, are included in plan.
  - 3.3. Process to verify integrity of required spatial data is specified in plan according to organisational requirements.
  - 3.4. Plan is finalised and communicated to appropriate persons according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"><li>• research sources of appropriate spatial data.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• apply budget constraints to project specifications.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• negotiate data requirements with clients and service providers.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret contractual obligations detailed in legal documents, such as contracts, agreements, memorandums of understanding, and licences</li><li>• analyse detailed technical descriptions of spatial data and their qualifiers.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• prepare written communications to clients and data providers.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• use a computer and software to prepare plan.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>• devise strategies to manage risk.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Appropriate persons</i></b> must include at least two of the following:	<ul style="list-style-type: none"><li>• client</li><li>• end user</li><li>• financial or legal specialist</li><li>• manager</li><li>• qualified surveyor</li><li>• spatial data provider</li></ul>

# Assessment Requirements for CPPSIS5031 Plan spatial data collection

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5031A Plan spatial data collection and validation.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also develop and document a spatial data collection plan that meets client specifications for two different projects.

While developing the above spatial data collection plans, the person must:

- conduct research and consultation to gather information as the basis for scoping spatial data acquisition requirements
- select a preferred spatial data collection method for inclusion in the plan based on evaluation of available options
- apply industry-accepted methods for assessing validity and integrity of spatial data
- apply contingency measures and risk management strategies to the planning process
- comply with organisational requirements for:
  - allocating resources and working within budgetary constraints
  - communicating with clients and spatial data providers
  - recording and reporting information, and completing documentation
  - using the equipment specified in the assessment conditions
  - working safely when using screen-based equipment
- comply with legal requirements relating to client service provision, and accessing spatial data
- exercise precision when archiving, retrieving and managing spatial data.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- legal requirements for accessing, storing, retrieving and archiving digital and hard copy spatial data, including data privacy and information copyright

- methods for assessing and validating spatial datasets and dataset sources
- organisational policies and procedures relating to:
  - budget and resource constraints
  - client service and communication
  - completing records and documentation
  - using equipment
  - work health and safety
- principles of risk management relating to collecting spatial data
- purpose and use of metadata, including:
  - availability
  - conditions of use
  - coordinate system
  - currency
  - custodian
  - data accuracy
  - data description
  - date of acquisition
  - licence
  - quality
  - source
  - spatial data acquisition methodologies
  - version control
- spatial data capture methodologies
- spatial data formats and structures
- key features of spatial reference systems.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer with software appropriate for report development and electronic communication
  - printer
- specifications:
  - organisational policies and procedures relating to data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team
- relationships with clients:

- client consultation required.

Timeframe:

- as specified by client and project requirements.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -

# CPPSIS5032 Capture new spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5032A Capture new spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to capture new spatial data to meet client specifications using a variety of data capture methodologies. The unit covers analysing project specifications, as well as organisational, administrative and legal requirements, to coordinate human resources, equipment and supplies. The unit also covers setting up and using specialist surveying equipment and technologies to capture and manipulate spatial data, including entities, attributes, topological features and metadata; and checking and validating the integrity and accuracy of results. In addition, the unit covers performing the operational maintenance of equipment to ensure its sound working order, and identifying faults and organising repairs as required. The unit requires the ability to use project management techniques to schedule, monitor and report on project activities, and supervisory skills to designate work and provide guidance to staff.

The unit supports those who work in a lead role in a surveying or spatial information services team in areas such as surveying, cartography, town planning, mapping or geographic information systems (GIS).

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Prepare for data collection.
  - 1.1. Project and client specifications, organisational requirements, and available resources are identified and key activities and timeline scheduled accordingly.
  - 1.2. ***Administrative and legal requirements*** for data collection are complied with and recorded according to organisational requirements.
  - 1.3. ***Appropriate persons*** are informed about the project according to organisational requirements.
  - 1.4. Equipment, supplies and technologies are selected according to project specifications.
  - 1.5. Designated responsibilities are communicated to staff to ensure understanding of work tasks according to organisational requirements.
2. Gather spatial data.
  - 2.1. Equipment is set up and operated according to manufacturer specifications and organisational requirements.
  - 2.2. Entities are related to a reference system, and data and attributes are collected according to project specifications.
  - 2.3. ***Metadata*** is documented according to industry-accepted standards and organisational requirements.
  - 2.4. Discrepancies between specifications and actual activities are identified, recorded and reported.
  - 2.5. Guidance is given to staff assisting in the data collection process as required and according to organisational requirements.
3. Maintain
  - 3.1. ***Operational maintenance*** of equipment is undertaken according to manufacturer specifications and

- equipment. organisational requirements.
- 3.2. Contingencies that may affect equipment use are identified and reported.
  - 3.3. Unsafe or faulty equipment is identified, and reported and referred for repair according to organisational requirements.
  - 3.4. Tools and equipment are stored safely according to manufacturer specifications and organisational requirements.
4. Finalise collection process.
    - 4.1. Attributes and topological structures are added to spatial data according to project specifications.
    - 4.2. Data is recorded correctly and documentation completed according to project specifications and organisational requirements.
    - 4.3. Data integrity and accuracy are checked and validated according to project specifications.
    - 4.4. Data and documentation are stored according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• prioritise activities to meet contractual requirements.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• apply budget constraints to project specifications</li> <li>• conduct precise measurements and computations relating to length, angle, elevation, area and volume.</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>• ask questions to clarify client requirements</li> <li>• explain procedures to staff.</li> </ul>

skills to:

- Reading skills to:
- interpret technical information detailed in manufacturer specifications and legislation.
- Writing skills to:
- record technical information in organisational documentation.
- Technology skills to:
- calibrate specialised surveying equipment
  - use equipment software to manipulate spatial data.
- Problem-solving skills to:
- apply contingency measures in the event of adverse weather or equipment failure.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Administrative and legal requirements*** must include at least one of the following:
- Indigenous considerations
  - licensing arrangements
  - relevant state, territory and federal legislation and regulations relating to data access, use and storage, including data privacy and information copyright
  - royalty obligations
  - title search processes.

- Appropriate persons*** must include at least two of the following:
- administrative staff
  - colleague
  - contractor
  - field survey staff
  - land occupier
  - land owner
  - manager
  - technician.

*Metadata* must include at least four of the following:

- availability
- conditions of use
- coordinate system
- currency
- custodian
- data accuracy
- data description
- date of acquisition
- licence
- quality
- source
- spatial data acquisition methodologies
- version control.

*Operational maintenance* must include at least three of the following:

- adjusting
- calibrating
- cleaning
- lubricating
- maintaining battery
- tightening
- undertaking simple repairs.

## Unit Mapping Information

CPPSIS5032A Capture new spatial data

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS5032 Capture new spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5032A Capture new spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also capture new spatial data that meets client specifications for two different projects, with each project using two of the following pieces of equipment:

- data logger or other mobile computing device
- global navigation satellite system (GNSS)
- laser scanner
- level
- sonar
- total station
- unmanned aerial vehicle.

While capturing the above new spatial data, the person must:

- coordinate technical and human resources to undertake scheduled work activities, designate work and provide guidance to staff
- accurately record metadata
- apply contingency measures and risk management strategies to ensure data is collected safely and within project timeframes
- comply with legal, administrative and organisational requirements for:
  - communicating with clients
  - copyright
  - recording and reporting information, and completing documentation
  - using, maintaining and storing tools and equipment
  - working safely and using personal protective equipment (PPE) when collecting data and operating equipment
- apply industry-accepted methods for assessing the validity and integrity of spatial data
- conduct operational maintenance on equipment to ensure good working order

- exercise accuracy and precision when collecting and recording spatial data using two of the following data capture methodologies:
  - aerial
  - conversion or translation from existing information, including hard copy or digital
  - data logging, including GNSS
  - photogrammetry
  - remote sensing
  - scanning
  - sonar
- manage and manipulate spatial data, including entities and attributes and topological structures, using surveying technologies
- plan and organise equipment and supplies required to capture spatial data
- set up, calibrate and use surveying equipment
- use two of the following tools to assist in capturing new spatial data:
  - compass
  - clinometer
  - digital imagery
  - distance measuring wheel
  - tape
  - ultra-high frequency radio.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- legal requirements for accessing and storing spatial data, including copyright
- methods for conducting operational maintenance on surveying equipment
- methods for validating the integrity of spatial data
- organisational policies and procedures relating to:
  - budget and resource constraints
  - client service and communication
  - completing records and documentation
  - using and maintaining equipment
  - work health and safety
- principles of risk management relating to data capture operations
- purpose and uses of various data capture technologies and equipment
- spatial data capture methodologies
- spatial data formats and structures
- key features of spatial reference systems
- supervisory processes required to delegate work tasks and communicate with staff.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment and tools:
  - as specified in the performance and knowledge evidence
  - PPE
- specifications:
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by client and project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS5035 Obtain and validate spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5035A Obtain and validate spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to obtain and validate spatial data to meet client specifications. The unit covers analysing project requirements and agreements and determining appropriate data acquisition options. It also covers applying industry-accepted validation methodologies to assess the validity and integrity of data and resolve problems. The unit requires the ability to use technology to access, manipulate, archive and retrieve a range of spatial data. It also requires the ability to record metadata and complete documentation and written communications.

The unit supports those who work in a lead role in a surveying or spatial information services team in areas such as surveying, cartography, town planning, mapping or geographic information systems (GIS).

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Prepare for spatial data acquisition.
  - 1.1. Project specifications, client instructions and agreements are determined and analysed according to organisational requirements.
  - 1.2. Data requirements are confirmed with *appropriate persons* and resources are allocated to project tasks according to organisational requirements.
  - 1.3. Protocols for communicating with spatial data providers are followed according to organisational requirements.
  - 1.4. Viability of provider's service agreement is assessed based on advice from appropriate persons.
  - 1.5. Data acquisition options are determined according to project specifications and organisational requirements.
  - 1.6. Data is received and processed according to project specifications and organisational requirements.
  
2. Validate spatial data.
  - 2.1. Data is assessed for validity and integrity according to project specifications.
  - 2.2. Omissions and gaps in spatial data are identified and resolved in consultation with appropriate persons.
  - 2.3. *Metadata* is recorded according to organisational requirements.
  - 2.4. Documentation is completed and stored according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

Planning and organising skills to:

### Performance feature

- delegate project tasks to staff.

- Numeracy skills to:
- interpret and analyse statistics.
- Oral communication skills to:
- negotiate data requirements with clients and service providers.
- Reading skills to:
- interpret contractual obligations detailed in legal documents, such as contracts, agreements, memorandums of understanding, and licences
  - analyse detailed technical descriptions of spatial data and their qualifiers.
- Writing skills to:
- communicate with clients and data providers using email
  - record measurements with accuracy and precision.
- Technology skills to:
- use a computer and software to access, manipulate, archive and retrieve a range of spatial data.
- Problem-solving skills to:
- apply contingency measures to resolve identified errors
  - verify authenticity of data against specifications.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least two of the following:
- client
  - end user
  - financial or legal specialist
  - manager
  - qualified surveyor
  - spatial data provider
  - supplier
  - town planner.

**Metadata** must include at least three of the following:

- availability
- conditions of use
- coordinate system
- currency
- custodian
- data accuracy
- data description
- date of acquisition
- licence
- quality
- source
- spatial data acquisition methodologies
- version control.

# Assessment Requirements for CPPSIS5035 Obtain and validate spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5035A Obtain and validate spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also obtain and validate spatial data that meets client specifications for two different projects.

While obtaining and validating the above spatial data, the person must:

- apply contingency measures when solving problems relating to data
- comply with organisational requirements and manufacturer specifications when using the equipment specified in the assessment conditions
- comply with organisational requirements for:
  - allocating resources, delegating duties and working within budgetary constraints
  - communicating with clients and spatial data providers
  - recording metadata and completing documentation
  - working safely when using screen-based equipment
- comply with legal requirements relating to client service provision, and accessing and managing spatial data
- exercise precision when archiving, retrieving, managing and manipulating spatial data
- use industry-accepted methods for assessing the validity and integrity of spatial data and resolving errors.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- industry-accepted standards relating to obtaining and validating spatial data
- legal requirements for accessing, storing, retrieving and archiving digital and hard copy spatial data, including data privacy and information copyright
- methods for assessing and validating spatial datasets and dataset sources

- organisational requirements relating to:
  - work health and safety
  - client services
  - human resource management
  - completing documentation
- spatial data capture methodologies
- spatial data formats and structures
- key features of spatial reference systems.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer with software appropriate for spatial data management and electronic communication
  - printer
- specifications:
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
    - project budget and resources
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by client and project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS5036 Integrate spatial datasets

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5036A Integrate spatial datasets.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to use technology and software applications to integrate spatial datasets for the purpose of providing spatially referenced information. The unit covers obtaining spatial and attribute data, creating datasets, and linking spatial and attribute data to meet client specifications for spatial data solutions. The unit also covers analysing and compiling metadata sets, assessing geographic coverage, establishing filtering parameters, and checking and validating the accuracy and integrity of data. The unit requires the ability to consult with appropriate persons to define project requirements and report outcomes, and use database querying operations and techniques.

The unit supports those who work in a lead role in a surveying or spatial information services team in areas such as surveying, cartography, town planning, mapping or geographic information systems (GIS).

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Prepare to integrate datasets.
  - 1.1. Client specifications are identified and analysed to determine specific needs and required outcomes.
  - 1.2. Requirements for spatial data and constraints are identified through further consultation with *appropriate persons* and outcomes are recorded according to organisational requirements.
  
2. Obtain spatial and attribute data.
  - 2.1. *Metadata* is used to determine sources of data consistent with project specifications.
  - 2.2. Data is obtained and checked for integrity and quality according to project specifications and organisational requirements.
  - 2.3. Geographic coverage is assessed for completeness according to project specifications.
  - 2.4. Metadata set is compiled based on sourced spatial data.
  - 2.5. Exception reports on non-conforming items are referred to appropriate persons according to organisational requirements.
  
3. Create resultant spatial datasets.
  - 3.1. Filtering parameters are established in line with scientific accuracy, redundancy and project specifications.
  - 3.2. Spatial data is translated into a format that satisfies project specifications.
  - 3.3. Spatial datasets are populated with edited spatial data according to project specifications and organisational requirements.
  
4. Link spatial and attribute data.
  - 4.1. Method required for referencing location of attribute data is identified according to organisational requirements.
  - 4.2. Spatial and attribute data are linked according to client specifications and organisational requirements.

- 4.3. Spatial queries are carried out on spatial data to access attribute data according to project specifications.
5. Test and validate spatial datasets.
  - 5.1. Test queries are determined and implemented to ensure spatial datasets meet project specifications and organisational requirements.
  - 5.2. Accuracy and integrity of spatial data are checked and validated to ensure correctness of links, and identified problems are resolved or escalated where required according to organisational requirements.
  - 5.3. Documentation is completed according to organisational requirements and appropriate persons are notified of project results.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Initiative and enterprise skills to:	<ul style="list-style-type: none"> <li>• design spatial data solutions to meet client specifications and organisational requirements.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• analyse and compare metadata and attribute ranges.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify client and project requirements.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret field records, images, and detailed technical descriptions of spatial data.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• record measurements with accuracy and precision.</li> </ul>

Technology skills to:

- use a computer and software to manipulate and compare spatial data.

Problem-solving skills to:

- identify exceptions and non-conformances within datasets.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least two of the following:

- client
- end user
- staff
- manager.

***Metadata*** must include at least four of the following:

- availability
- conditions of use
- coordinate system
- currency
- custodian
- data accuracy
- data description
- date of acquisition
- licence
- quality
- source
- spatial data acquisition methodologies
- version control.

## Unit Mapping Information

CPPSIS5036A Integrate spatial datasets

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPSIS5036 Integrate spatial datasets

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5036A Integrate spatial datasets.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also integrate spatial datasets for the purpose of providing spatially referenced information for two different projects.

While integrating the above spatial datasets, the person must:

- select and use industry-accepted software applications to obtain spatial data, create datasets, and link attribute data
- comply with organisational requirements while:
  - communicating with clients and other appropriate persons
  - ensuring quality of datasets
  - recording data and completing documentation
  - working safely when using screen-based equipment
- comply with legal requirements relating to data privacy and information copyright when accessing and using spatial data
- devise and implement functional solutions to spatial datasets
- exercise precision when editing, processing, comparing, manipulating and archiving spatial data
- perform querying techniques to access attribute data and test and validate spatial data
- prepare exception reports to identify non-conforming data
- reference and link the location of attribute data
- translate spatial data into industry-accepted formats
- use approved methods for assessing accuracy and integrity of spatial data and resolving errors
- use filtering parameters, including attribute range accuracy and geographic location to establish accuracy and redundancy of data.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- data acquisition methods
- database querying techniques and languages
- key features of spatial data
- legal requirements for accessing and manipulating spatial data, including copyright
- methods for comparing and checking different spatial datasets
- organisational requirements relating to:
  - work health and safety
  - recording data
  - completing documentation
- principles of data acquisition, including photogrammetry, remote sensing, terrestrial survey and hydrography
- quality guidelines regarding the validity of spatial data
- software applications used to compute spatial datasets
- key features of spatial coordinate and reference systems
- spatial data formats and structures
- spatial database design tools
- key characteristics of spatial database operation
- spatial dataset integration methods, including role of scale in dataset integration.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer with software appropriate for integrating spatial datasets
- specifications:
  - organisational policies, procedures and legislation relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## **Links**

# CPPSIS5037 Maintain spatial data systems

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5037A Maintain complex spatial data systems.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to implement a full cycle of maintenance of spatial data, including updating, backup, recovery and archiving. The unit covers analysing spatial data systems to determine maintenance requirements and constraints; confirming the reliability of spatial data by editing, updating and integrating existing and new spatial data; and problem solving to test and validate data currency and retrieval and backup systems. The unit requires the ability to use computers and software to manage spatial data, create metadata, and apply spatial data input, output and distribution technologies.

The unit supports those who work in a lead role in a surveying or spatial information services team in areas such as surveying, cartography, town planning, mapping or geographic information systems (GIS).

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Determine data maintenance requirements.
  - 1.1. Data maintenance objectives and constraints are identified and documented in consultation with **appropriate persons**.
  - 1.2. Data system is analysed to determine components to be maintained according to project objectives.
  - 1.3. Maintenance techniques are determined and evaluated according to organisational requirements.
  - 1.4. Work is allocated to appropriate persons and supervisory processes are implemented to ensure work is completed within time available.
2. Confirm reliability of spatial data.
  - 2.1. Spatial data updates are accessed and checked to confirm currency and relevance, and are recorded according to organisational requirements.
  - 2.2. Spatial data is checked and edited to ensure it is compatible, and in an acceptable format according to project requirements.
  - 2.3. Integrity and consistency of data are maintained according to organisational requirements.
3. Replace spatial data.
  - 3.1. Spatial data is amended and replaced according to project and organisational requirements.
  - 3.2. Existing and new data is edited, prepared and integrated according to project requirements.
  - 3.3. Spatial datasets are tested and **validated** to ensure integrity, quality and currency according to project requirements.
  - 3.4. Documentation is amended and updated according to organisational requirements.
4. Carry out backup and recovery of spatial data.
  - 4.1. Data backups are implemented to ensure data is accessible in contingency situations according to organisational requirements.

- 4.2. Backup system is tested to ensure that data can be retrieved, and any problems are resolved or contingencies managed according to organisational requirements.
5. Archive spatial data.
    - 5.1. Spatial dataset to be archived is checked for completeness and manipulated where necessary.
    - 5.2. *Metadata* is created according to organisational requirements.
    - 5.3. Archived spatial data is stored in a secure location, and details are recorded according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• schedule and prioritise work tasks to meet project timeframes.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• apply error tolerances when manipulating datasets</li> <li>• solve problems relating to height, dimension, direction, position, flow rates and slope.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to determine maintenance objectives.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret query language and graphic interfaces.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• apply spatial data input, output and distribution technologies</li> <li>• use scripting, queries, macros, networks and remote access when maintaining spatial data systems.</li> </ul>

Problem-solving skills to:

- verify accuracy and currency of data and identify errors.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least two of the following:

- client
- manager
- spatial technician
- staff.

***Validated*** must include at least two of the following methods:

- confounding bias
- information/data bias
- observational bias
- recall bias
- selection bias.

***Metadata*** must include at least four of the following:

- availability
- conditions of use
- coordinate system
- currency
- custodian
- data accuracy
- data description
- date of acquisition
- licence
- quality
- source
- spatial data acquisition methodologies
- version control.

# Assessment Requirements for CPPSIS5037 Maintain spatial data systems

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5037A Maintain complex spatial data systems.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also implement the full cycle of maintenance of spatial data systems for two different projects, including the full cycle of updating, backup, recovery and archiving.

While maintaining the above spatial data systems, the person must:

- allocate tasks within the work team, and provide supervision to ensure work is completed within required timeframes
- apply industry-accepted standards for:
  - accuracy, precision and error tolerances to ensure data systems are accurately maintained
  - creating and recording metadata
- comply with administrative and legal requirements for storing and retrieving spatial data, including data privacy and information copyright
- comply with organisational requirements and manufacturer specifications when using the equipment specified in the assessment conditions
- comply with organisational requirements for recording data and completing documentation, and working safely when using screen-based equipment
- evaluate and decide appropriate data maintenance techniques
- use spatial data input technologies, including:
  - digitising
  - scanning
  - remote sensing
  - satellite imagery
- use spatial data output and distribution technologies, including:
  - scripting
  - query language

- macro development
- graphic interfaces
- networks
- remote access.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- administrative and legal requirements for accessing, storing, retrieving and archiving digital and hard copy spatial data, including data privacy and information copyright
- advanced spatial data reduction processes
- key features of coordinate reference systems
- industry-accepted standards relating to accuracy and precision, error tolerances and metadata
- types of map projections
- methods for validating test results to identify systematic distortions
- organisational policy and procedures relating to work tasks, including:
  - health and safety when using the equipment specified in the assessment conditions
  - maintaining the quality and integrity of spatial data
  - reporting, including completing records and documentation
  - storing and retrieving data
- software that can be used to manage spatial data, create metadata, and apply spatial data input, output and distribution technologies
- types of spatial data formats
- techniques for using spatial data input technologies, as specified in the performance evidence
- techniques for using spatial data output and distribution technologies, as specified in the performance evidence
- types of storage media for a range of spatial data.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer with software appropriate for spatial data management and retrieval
  - hard copy and digital data storage media
  - printer
- specifications:
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:

- access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by task and organisational requirements.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS5038 Develop spatial databases

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5038A Develop a complex spatial and aspatial database.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to develop spatial databases using a range of storage media, including digital and hard copy storage. The unit covers analysing and evaluating storage requirements, specifications and constraints, to identify data components to be maintained and appropriate storage solutions. The unit also covers arranging to create data indexes to assist in data retrieval and storage; using indexes to record and retrieve data; and accessing and retrieving data. It requires the ability to translate data into the required format to meet task requirements. The unit also requires the ability to negotiate with data suppliers and network storage providers, and to implement project management techniques to manage risks and contingencies relating to data security, and use supervisory techniques to allocate tasks and achieve planned outcomes.

The unit supports those who work in a lead role in a surveying or spatial information services team in areas such as surveying, town planning, cartography, mapping and geographic information systems (GIS).

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |    |                                      |  |
|----|--------------------------------------|--|
| 1. | Prepare for storage of spatial data. | <p>1.1. Data storage objectives and constraints are identified and documented in consultation with <i>appropriate persons</i>.</p> <p>1.2. Data design is analysed to determine components to be maintained according to task requirements.</p> <p>1.3. Storage techniques to be used are determined and evaluated according to organisational requirements.</p> <p>1.4. <b><i>Administrative and legal requirements</i></b> for data storage are complied with and recorded according to organisational requirements.</p> <p>1.5. Work is allocated to appropriate persons and supervisory processes are implemented to ensure work is completed within time available.</p> |
| 2. | Store spatial data.                  | <p>2.1. Arrangements are put in place to create data indexes to assist in data retrieval and storage according to task requirements.</p> <p>2.2. Spatial data is recorded in an index according to organisational requirements.</p> <p>2.3. Method of spatial data storage is selected according to organisational requirements.</p> <p>2.4. Spatial data is backed up according to organisational requirements.</p> <p>2.5. Distribution method is determined to ensure that current data is available according to task and organisational requirements.</p>   |
| 3. | Access and retrieve spatial data.    | <p>3.1. Arrangements are put in place to use the indexing system to locate spatial data source.</p> <p>3.2. Spatial data is accessed and if necessary translated into required format according to task requirements.</p>  |

4. Manage contingencies.
  - 4.1. Risk management plan is developed to identify risks, **contingencies** and possible solutions to anticipated spatial data storage and retrieval problems.
  - 4.2. Risk and contingency plans are communicated to appropriate persons and, if necessary, implemented according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Performance feature

#### Skill

- Learning skills to:
- research and access sources of spatial data.
- Numeracy skills to:
- conduct image analysis
  - identify budgetary constraints relating to cost of storage systems.
- Oral communication skills to:
- negotiate distribution methods and network access with data storage providers.
- Reading skills to:
- interpret graphical information obtained from global navigation satellite systems (GNSS) and GIS.
- Writing skills to:
- write technical reports detailing problems and solutions relating to data storage and retrieval.
- Technology skills to:
- use a range of software applications to access and store data
  - use querying commands to obtain information from a database.
- Problem-solving
- analyse storage solutions appropriate to different types of spatial data

- skills to:
- identify contingency procedures in the event of unforeseen risk to data security.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least two of the following:
- client
  - end user
  - manager
  - network storage provider
  - qualified surveyor
  - spatial data supplier
  - staff.

- Administrative and legal requirements*** must include at least two of the following:
- Indigenous considerations
  - licensing arrangements
  - relevant state, territory and federal legislation and regulations relating to data access, use and storage, including data privacy and information copyright
  - royalty obligations
  - title search processes.

- Contingencies*** must include at least four of the following:
- duplicates
  - fireproof storage
  - insurance
  - media malfunction
  - media and formats becoming outdated
  - off-site storage
  - storage in different media.

## Unit Mapping Information

CPPSIS5038 Develop a complex spatial and aspatial database

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPSIS5038 Develop spatial databases

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5038A Develop a complex spatial and aspatial database.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also develop two different spatial databases to meet specifications.

While developing the above spatial databases, the person must:

- analyse written spatial data storage specifications to identify storage requirements and constraints
- arrange data indexes that allow for several notations for cross-referencing data
- access spatial data and translate it into required format
- arrange to create, access and use an indexing system for spatial data
- assess feasibility of data storage options based on available budget, resources and priorities
- comply with administrative and legal requirements for storing, using and retrieving spatial data
- comply with organisational requirements for:
  - recording data
  - completing documentation
  - health and safety when using screen-based equipment
- develop risk and contingency management plans to ensure security of stored spatial data
- negotiate with clients, data suppliers and data network storage providers to achieve required outcomes
- plan system design, including assessing available formats and storage requirements
- read and write technical reports detailing storage solutions for spatial data
- research and evaluate sources of spatial data
- supervise and coordinate staff to assist with research activities
- use project management techniques to coordinate database requirements

- use software, hardware and networking applications to access, store and retrieve data.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- administrative and legal requirements for storing, using and retrieving digital and hard copy spatial data, including copyright
- spatial data storage and retrieval methods
- key features of current indexing systems
- data retrieval methods, including querying and browsing techniques for obtaining information from databases
- industry metadata standards relating to:
  - availability
  - conditions of use
  - coordinate system
  - currency
  - custodian
  - data accuracy
  - data description
  - date of acquisition
  - licence
  - quality
  - source
  - spatial data acquisition methodologies
  - version control
- network and security guidelines relating to spatial data
- organisational policies and procedures relating to:
  - accessing, recording, storing and retrieving spatial data
  - communicating with clients, end users and network storage providers
  - completing records and documentation
  - working within budget and resource constraints and priorities
- spatial data formats, classification and indexing systems
- spatial data input technologies, including digitising, scanning, remote sensing and satellite imagery
- spatial data maintenance and management systems
- key features of spatial reference systems
- types of storage media for a range of spatial data.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer with software appropriate for spatial data storage and retrieval
  - ancillary hardware
- specifications:
  - organisational policies and procedures relating to:
  - work health and safety
  - data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by task and organisational requirements.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS5039 Plan and implement spatial projects

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5039A Produce spatial project deliverables.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to plan, implement and complete spatial projects to produce client-specified deliverables. The unit covers project planning processes to allocate and organise equipment, materials and resources; adhere to financial, administrative and legal requirements; and manage project risks and contingencies. The unit also covers designing, producing and validating spatial project deliverables and products. It requires the ability to interpret technical information relating to spatial products, and to communicate verbally and in writing with a range of project stakeholders.

The unit supports those who work in a lead role in a surveying or spatial information services team in areas such as surveying, cartography, town planning, mapping and geographic information systems (GIS).

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Develop spatial project plan.
  - 1.1. Spatial project specifications and client requirements are identified and analysed, and then confirmed and clarified with *appropriate persons*.
  - 1.2. Resources, equipment and materials are determined and organised according to project specifications and organisational requirements.
  - 1.3. Appropriate persons are informed of their involvement in project, parameters of their responsibilities, and project communication processes.
  - 1.4. Key activities and timelines are scheduled with full consideration given to project specifications, available resources, and organisational requirements.
  - 1.5. Risk management and contingency strategies are incorporated into documented project plan to meet administrative, legal and organisational requirements.
  
2. Implement spatial project plan.
  - 2.1. Project management mechanisms are implemented to monitor, record and report project progress in relation to project plan.
  - 2.2. Computations and analysis are undertaken for spatial product development according to project specifications.
  - 2.3. Project deliverables are designed and produced according to project specifications and project plan.
  - 2.4. *Metadata* is created according to project specifications and organisational requirements.
  - 2.5. Project deliverables are validated against project specifications and irregularities are identified, reported and resolved.
  
3. Monitor and complete spatial project.
  - 3.1. Project is monitored against specifications and plan, and contingencies managed to ensure quality is maintained.
  - 3.2. Actual expenditure is monitored to control costs according to organisational requirements.
  - 3.3. Project is completed and checked to ensure compliance

with specifications, plan and organisational requirements.

- 3.4. Project documentation is completed and outcomes are reported to appropriate persons.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• identify areas for improvement to meet budget constraints.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• use mathematical language and representation to prepare and communicate budgetary and financial information.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to seek information and confirm understanding.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret detailed technical descriptions of surveying data</li> <li>• interpret graphical information within image data.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• develop plans, reports and recommendations using technical language.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• use a computer and software to manage, manipulate, archive and retrieve spatial data.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

**Appropriate persons** must include at least two of the following:

- client
- end user
- manager
- qualified surveyor
- spatial data provider
- supplier.

**Metadata** must include at least four of the following:

- availability
- conditions of use
- coordinate system
- currency
- custodian
- data accuracy
- data description
- date of acquisition
- licence
- quality
- source
- spatial data acquisition methodologies
- version control.

# Assessment Requirements for CPPSIS5039 Plan and implement spatial projects

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5039A Produce spatial project deliverables.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also plan and implement two different projects to produce spatial products that meet specific client requirements.

While planning and implementing the above spatial projects, the person must:

- design and produce spatial project deliverables that meet specifications and client requirements
- accurately record metadata
- apply contingency measures and risk management strategies to ensure quality of project deliverables
- comply with legal, administrative and organisational requirements for:
  - allocating and using resources, materials and equipment
  - communicating with clients and stakeholders
  - copyright of spatial data
  - designating tasks within the work team
  - meeting financial management obligations
  - recording and reporting information, and completing documentation
- coordinate technical and human resources to undertake scheduled work activities
- exercise accuracy and precision when performing computations and spatial data analysis and manipulation
- use a computer and software to develop plans, reports and recommendations relating to the project
- use project management techniques to plan, schedule, measure, monitor and report project activities and outcomes.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- legal requirements for accessing, using and storing spatial data, including data privacy and information copyright
- methods for assessing and validating integrity of existing spatial datasets and dataset sources
- organisational policies and procedures relating to:
  - budget and resource constraints
  - client service and stakeholder communication
  - completing records, reports and documentation
  - quality and industry standards relating to spatial products
- techniques for managing risk to comply with administrative and legal requirements of spatial projects
- project management tools, techniques and methodologies
- project management techniques, including resource planning and costing
- spatial data formats, structures and presentation methods
- key features of spatial reference systems.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer, software and ancillary hardware to produce reports
- specifications:
  - project and client specifications for spatial product
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by client and project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS5040 Interpret and collate spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5040A Collate and interpret spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to interpret and collate spatial data to meet project deliverables and client requirements. The unit covers accessing, querying and interpreting spatial data from various sources to test and determine its relevance and compatibility for meeting project requirements. It also covers collating spatial data and facilitating links with other functional areas within the organisation as part of the broader knowledge management system. The unit requires the ability to use various technologies and software applications, including geographic information system (GIS) software to access, manipulate, archive, retrieve and validate spatial data. It also requires the ability to complete records and documentation.

The unit supports those who work in a lead role in a surveying or spatial information services team in areas such as surveying, cartography, town planning, mapping and GIS.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Access spatial data.
  - 1.1. Project spatial data requirements and constraints, and client requirements, are identified and documented in consultation with *appropriate persons*.
  - 1.2. Spatial datasets are retrieved from data storage and other relevant sources and new data is captured according to project and organisational requirements.
  - 1.3. Data is manipulated into appropriate format to meet project requirements.
  
2. Query and interpret spatial data.
  - 2.1. Data is queried and interpreted using appropriate equipment and software application according to project requirements.
  - 2.2. Data is verified for integrity and relevance using industry-accepted statistical tests and methods according to project requirements.
  - 2.3. Irregularities are identified and resolved, and results recorded and documented according to organisational requirements.
  
3. Collate spatial data.
  - 3.1. Spatial data is collated according to organisational requirements.
  - 3.2. Most appropriate format and database for spatial data are selected according to organisational requirements.
  
4. Validate spatial data.
  - 4.1. Tools for testing validity of information and data are identified, accessed and used according to organisational requirements.
  - 4.2. Problems with collated data are identified and resolved to ensure quality and usability according to organisational requirements.
  - 4.3. Spatial data is archived and records and documentation are completed according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"><li>• source spatial data appropriate to client needs.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• interpret and analyse statistics.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions to clarify client data requirements.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• analyse detailed technical descriptions of spatial data and its qualifiers.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• use a computer and software to manipulate spatial data.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>• apply contingency measures to resolve identified errors</li><li>• verify authenticity of data against specifications.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Appropriate persons</i></b> must include at least two of the following:	<ul style="list-style-type: none"><li>• client</li><li>• end user</li><li>• manager</li><li>• qualified surveyor</li><li>• spatial data provider</li><li>• supplier.</li></ul>

# Assessment Requirements for CPPSIS5040 Interpret and collate spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5040A Collate and interpret spatial data.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also interpret and collate spatial data that meets client requirements for two different projects.

While interpreting and collating the above spatial data, the person must:

- establish project and client requirements for new spatial data
- acquire spatial data from a range of industry-accepted sources
- comply with organisational requirements for:
  - communicating with clients and spatial data providers
  - completing documentation
  - facilitating information and knowledge management processes
  - working safely when using screen-based equipment
- comply with legal requirements relating to client service provision, and accessing and managing spatial data
- exercise precision when retrieving, managing, manipulating and archiving spatial data
- manipulate and analyse geographic information system (GIS) data using GIS software
- query and interpret spatial data using databases
- use industry-accepted methods for assessing validity and integrity of spatial data and resolving errors
- use one of the following statistical tests and methods to verify relevance of data:
  - broad analytical studies to determine estimates of risk
  - making comparisons using basic tests of significance
  - mean, standard deviation, regression analysis and percentage change.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- industry-accepted sources of spatial data, including photogrammetry, remote sensing, terrestrial survey and hydrography
- key features of coordinate reference systems
- GIS software, including ArcInfo, GenaMap and MapInfo
- industry-accepted standards and methods for assessing, verifying and validating spatial datasets and dataset sources
- legal requirements for accessing, storing, retrieving and archiving digital and hard copy spatial data, including data privacy and information copyright
- line instructions and programming for geographical information systems data
- organisational requirements relating to:
  - work health and safety
  - client service
  - information and knowledge management
  - completing documentation
- purpose and use of metadata, including:
  - availability
  - conditions of use
  - coordinate system
  - currency
  - custodian
  - data accuracy
  - data description
  - date of acquisition
  - licence
  - quality
  - source
  - spatial data acquisition methodologies
  - version control
- types of spatial data storage technologies
- key features of spatial reference systems
- statistical tests and methods used to verify relevance of spatial data
- techniques for manipulating datasets using:
  - command lines
  - general query language, such as structured query language (SQL)
  - programming language
  - scripts
- techniques for operating, querying and browsing spatial databases.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer with software appropriate for spatial data management and electronic communication
  - printer
- specifications:
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by client and project requirements.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPSIS5043 Design spatial data storage systems

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5043A Design a spatial data storage system.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to design spatial data storage systems to meet client requirements. The unit covers analysing client needs and storage requirements and assessing the feasibility of those requirements against organisational budgets, resources and priorities. It also covers planning the system design; scheduling development; and creating and testing prototypes where standard formats are unsuitable. The unit requires the ability to negotiate storage requirements and design solutions; and to seek agreement on the final design, as well as feedback from end users, as the basis for implementing improvements to the storage system.

The unit supports those who work in a lead role in a surveying or spatial information services team in areas such as surveying, town planning, cartography, mapping and geographic information systems (GIS).

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Determine spatial data storage requirements.
  - 1.1. Requirements for spatial data storage are determined in consultation with *appropriate persons*.
  - 1.2. Audit of existing spatial data sources is conducted to determine their suitability, useability, dependencies and adaptability in meeting storage requirements.
  - 1.3. Feasibility of storage requirements is assessed against organisational budget, resources and priorities; and documented according to organisational requirements.
2. Plan storage system design.
  - 2.1. Plan is developed based on functional requirements of storage system and detailing spatial data dependencies.
  - 2.2. Appropriate spatial data storage environment is determined according to data and organisational requirements.
  - 2.3. Schedule for introducing data storage system is developed and communicated to appropriate persons.
  - 2.4. Prototype is created and tested, or a standard format adopted, to confirm that design meets functional requirements.
3. Finalise storage system design.
  - 3.1. Final design of spatial data storage system is negotiated with appropriate persons according to organisational requirements.
  - 3.2. Final design is agreed and accepted, and documentation is created according to organisational requirements.
  - 3.3. End users are canvassed to determine effectiveness of designed spatial data storage system.
  - 3.4. Feedback is analysed and used to make improvements to storage system according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to

performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Initiative and enterprise skills to:	<ul style="list-style-type: none"><li>• assess standard storage formats against requirements for a new design.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• compare costs of spatial data storage systems against organisational budget and resource allocations.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret graphical information obtained from global navigation satellite systems (GNSS) and GIS.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• record details of quality improvements.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• use a range of software applications to access and store data</li><li>• use querying commands to obtain information from a database.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>• identify storage solutions appropriate to different types of spatial data.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Appropriate persons</i></b> must include at least two of the following:	<ul style="list-style-type: none"><li>• client</li><li>• end user</li><li>• manager</li><li>• spatial data supplier</li><li>• staff.</li></ul>

# Assessment Requirements for CPPSIS5043 Design spatial data storage systems

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5043A Design a spatial data storage system.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also design spatial data storage systems for two different clients.

While designing the above spatial data storage systems, the person must:

- negotiate with end users regarding spatial data storage requirements and design
- plan the system design, including assessing available formats and storage requirements
- assess existing spatial data sources to determine their capacity to meet user storage requirements based on suitability, useability, dependencies and adaptability
- assess the feasibility of storage options based on organisational budget, resources and priorities
- comply with administrative and legal requirements for storing and retrieving spatial data, including data privacy and information copyright
- comply with organisational requirements for recording data, completing documentation, and using the equipment specified in the assessment conditions
- test design prototypes to confirm that they meet functional requirements
- obtain feedback from end users on final storage system.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- administrative and legal requirements for storing and retrieving digital and hard copy spatial data, including data privacy and information copyright
- data storage and retrieval methods
- organisational policies and procedures relating to:
  - accessing, recording and storing data
  - communicating with clients and end users

- completing documentation
- working within budget and resource constraints and priorities
- querying and browsing techniques for obtaining information from databases
- spatial data classification and indexing systems
- spatial data formats
- key features of spatial reference systems
- types of storage media for a range of spatial data, including Cloud technology.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - data retrieval equipment
  - computer with software appropriate for spatial data storage and retrieval
  - hard copy and digital data storage media
- specifications:
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPSIS5044 Develop subdivision survey designs for local government approval

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5044A Develop a subdivision survey design for local government approval.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to develop a subdivision survey design for local government approval using cadastral surveying methods and equipment. The unit covers analysing and researching client service requests and existing information to assess and prioritise work tasks, and conducting a survey of the land to be subdivided. The unit also covers conducting measurements and calculations; and developing plans detailing required information, including boundary dimensions and corners, subdivision lots, features, surrounds, connections and offsets. The unit requires the ability to set up, calibrate and use surveying equipment to measure, record and reduce surveying data. The unit also requires the ability to prepare, lodge and monitor a detailed design submission for local government approval which details engineering aspects, physical constraints and any environmental impacts. The unit requires knowledge of land and planning law and local government building approval processes. It requires consultation with clients and professionals to obtain advice for input into the design submission.

The unit supports those who work in a lead role in a surveying or spatial information services team, in areas such as town planning, surveying and mapping.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States where cadastral surveying must be undertaken under the supervision of a registered surveyor. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Identify type of service requests.	<p>1.1. Client requirements and timelines are established in consultation with <b><i>appropriate persons</i></b>.</p> <p>1.2. Client service requirements are assessed to establish if they are within the jurisdiction and ability of relevant authority and any necessity for statutory compliance.</p> <p>1.3. Work is prioritised and recorded, and research is conducted to gather additional information as required according to organisational requirements.</p>
2. Conduct subdivision survey.	<p>2.1. Surveying equipment is set up, calibrated and used according to manufacturer specifications and organisational requirements.</p> <p>2.2. Identified components of land to be subdivided are measured and subdivision lots marked according to client service and organisational requirements.</p> <p>2.3. Measured surveying data is reduced according to organisational requirements.</p> <p>2.4. Measurements are validated and recorded according to organisational requirements.</p> <p>2.5. Problems are identified and resolved, and contingencies managed according to organisational requirements.</p>
3. Develop detailed design submission for local government	<p>3.1. Surveying data is used to develop plan according to client service and organisational requirements.</p> <p>3.2. Appropriate persons are consulted to obtain professional advice for input into subdivision submission.</p>

- approval.
- 3.3. Availability of existing services and costs of supply, including local government and utility authority contributions, are determined.
  - 3.4. Engineering aspects in subdivision design are considered and documented according to local government requirements.
  - 3.5. Subdivision submission is prepared to incorporate physical constraints and environmental impact of the development according to client service requirements.
4. Monitor approval process.
    - 4.1. Local government approval assessment criteria are further examined and advertising and exhibition requirements observed according to organisational requirements.
    - 4.2. Outcomes of subdivision submission are reviewed to identify required follow-up actions.
5. Advise client of outcomes.
    - 5.1. Client is advised of submission outcomes in writing and verbally according to organisational requirements.
    - 5.2. Rights of appeal are explained to client where appropriate, and advice is recorded according to organisational requirements.
    - 5.3. Documentation is completed and records stored according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

Initiative and enterprise skills to:

- conduct research to collect property information, including title searches.

- Planning and organising skills to:
- plan and prioritise work to meet submission timeframes.
- Numeracy skills to:
- conduct precise measurements and computations relating to length, angle, elevation, area and volume.
- Oral communication skills to:
- ask questions to clarify client requirements.
- Reading skills to:
- analyse graphical and technical information in photographs and drawings
  - interpret legal information in land and planning laws.
- Writing skills to:
- use templates to record field notes
  - write field notes that can be interpreted by a third party.
- Technology skills to:
- connect surveying equipment to coordinate systems.
- Problem-solving skills to:
- select appropriate validation methods to verify accuracy of data.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least two of the following:
- builder
  - client
  - colleague
  - engineer
  - local government representative
  - manager
  - registered or qualified surveyor

- statutory authority representative
- town planner.

## Unit Mapping Information

CPPSIS5044A Develop a subdivision survey design for local government approval

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPSIS5044 Develop subdivision survey designs for local government approval

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5044A Develop a subdivision survey design for local government approval.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also develop a subdivision survey design for local government approval in response to two different client requests.

While developing the above subdivision survey designs, the person must:

- analyse existing plans, drawings, surveying data and photographs to plan service provision
- conduct research to obtain information relating to planned subdivisions, including:
  - boundary dimensions
  - connections
  - land title information
  - local government provisions and restrictions relating to subdivision, zoning, heritage and flooding
  - services
  - subdivision plan
  - title search
  - topographic features
- accurately measure and calculate boundary dimensions and mark subdivision lots
- use industry-accepted methods to check and validate measurements and calculations
- analyse and comply with land and planning law and local government guidelines for building approvals
- communicate clearly with appropriate persons in writing and verbally, to obtain information, clarify service and survey detail, and explain and report submission processes and outcomes
- comply with organisational requirements relating to:
  - completing records and documentation, including field notes

- prioritising service requests
- recording, storing and filing surveying data
- using surveying equipment
- working safely and using personal protective equipment (PPE)
- comply with relevant legal and statutory requirements and standards to ensure accuracy of survey, field procedures, and submission information
- determine availability of existing services and costs of supply
- determine survey controls, land dimensions and corners, and locate features, boundaries, surrounds, connections and offsets
- identify physical constraints and environmental impacts of planned developments, including those relating to three of the following:
  - drainage
  - easements
  - public reserves
  - sediment control
  - sewerage control
- monitor local government approval process, including observing advertising and exhibition requirements
- perform surveying tasks using one of the following surveying equipment:
  - global navigation satellite system (GNSS)
  - total station
- prepare clear and concise subdivision survey design submission, with plans that comply with local government approval assessment criteria
- use surveying data and other relevant information to produce plans, including contours.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements for cadastral surveying data and subdivision survey design
- aspects of land and planning law impacting on surveying tasks, including:
  - common law and old system title
  - community title
  - crown land, alienation and native title
  - environmental protection
  - residential subdivision provisions
  - set-back requirements
  - strata title
  - Torrens title system
- data capture and set-out methodologies used in surveying
- data reduction techniques

- industry-accepted methods for validating data to identify errors and discrepancies
- industry-accepted standards relating to subdivision survey design
- land tenure systems appropriate to relevant jurisdiction
- legislative, statutory and industry requirements and standards relating to:
  - cadastral surveying
  - local government building requirements
- methods for determining availability of existing services and costs of supply
- methods for setting up and calibrating surveying equipment
- organisational policies and procedures relating to:
  - completing records and documentation
  - health and safety when using the surveying equipment specified in the performance evidence
  - prioritising service requests
  - recording, storing and filing data
- possible community issues and repercussions relating to building permits
- reference and coordinate systems for surveying data, including Australian Height Datum and Map Grid of Australia
- local government approval and submission processes relating to subdivision survey design
- road alignment design and associated computations.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence, including PPE
- specifications:
  - subdivision survey specifications, including relevant surveying, construction or engineering plans and drawings
  - equipment operating manual and manufacturer specifications
  - organisational policies, procedures and documentation relating to submission process
  - relevant legislative, statutory and industry requirements and standards relating to cadastral surveying and local government building requirements for the jurisdiction
- relationships with team members and supervisor:
  - supervision by a registered surveyor or licensed land surveyor is required in some jurisdictions
- relationships with clients:
  - client consultation required.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPSIS5046 Set out stormwater systems

## Modification History

Release 1.

Replaces superseded non-equivalent CPPSIS5046A Design a stormwater system.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to set out stormwater systems and associated engineering structures using surveying methods and equipment. The unit covers using horizontal and vertical control techniques to set out marks and lines to define the position and level of design points on site. It also covers interpreting plans, maps and specifications to conduct measurements and calculations that ensure stormwater components and related engineering structures are in the correct plan position and at the correct reduced level. The unit requires the ability to measure, calculate and reduce surveying data, including fall of land and volume relating to contours, spot heights and cross-sections. It also requires the ability to check and validate measurements against specifications and complete set-out documentation.

The unit supports those who work under limited supervision in a surveying team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Prepare for stormwater system set-out.
  - 1.1. Project and client requirements for stormwater system are identified and interpreted.
  - 1.2. Relevant plans, maps and stormwater specifications are accessed and analysed to identify principal work activities.
  - 1.3. Equipment is selected and prepared according to manufacturer specifications and organisational requirements.
  - 1.4. Work is planned in consultation with *appropriate persons* to meet survey specifications and timeframes.
  
2. Use control techniques for set-out.
  - 2.1. Horizontal control points are located throughout the work area and coordinates are set out according to plans and specifications.
  - 2.2. Design points are set out from base lines by offsetting, and positions are checked to ensure correct tolerances according to specifications.
  - 2.3. Primary and secondary controls are used and accuracy is checked according to plans and specifications.
  - 2.4. Set-out pegs or markers are used to indicate base lines and offsets relative to the work area.
  - 2.5. Vertical control points are established to ensure design points are positioned at correct levels according to plans and specifications.
  - 2.6. Offsets and profiles are put in place to define the main lines of stormwater works and provide vertical controls.
  - 2.7. Measured surveying data is reduced and calculations, including fall of land and volume, are conducted according to industry-accepted standards and organisational requirements.
  
3. Finalise stormwater system set-out.
  - 3.1. Measurements are checked according to plans and specifications to ensure correct plan position and reduced level of set-out.

- 3.2. Discrepancies between specifications and actual activities are identified and addressed or reported according to organisational requirements.
- 3.3. Stormwater system set-out is finalised and documentation completed according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"><li>• perform surveying calculations relating to height, distances, slope, angles and coordinates</li><li>• use datum and contours to calculate fall of land and volume.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions to clarify task requirements</li><li>• report and discuss project information.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret graphical information in plans, drawings and contour maps.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• record field notes in a format that can be interpreted by a third party.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• connect observations to coordinate systems</li><li>• set up, calibrate and operate surveying equipment.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>• identify and use primary and secondary controls to improve accuracy of measurements.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least one of the following:

- client
- colleague
- engineer
- manager
- registered or qualified surveyor.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS5046 Set out stormwater systems

## Modification History

Release 1.

Replaces superseded non-equivalent CPPSIS5046A Design a stormwater system.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also set out stormwater systems and associated engineering structures for two different projects.

While setting out the above stormwater systems and associated engineering structures, the person must:

- plan work tasks by checking plans, drawings, maps, specifications and control marks
- set out marks and lines to define position and level of design points on site using two of the following pieces of equipment:
  - hand-held laser measuring device
  - global navigation satellite system (GNSS)
  - level
  - tape
  - total station
- use horizontal and vertical control techniques to position design points and markers
- measure and calculate data within industry-accepted tolerances for accuracy
- comply with manufacturer specifications when using equipment
- check measurements to ensure accuracy of plan position and reduced level of set-out and address identified discrepancies
- reduce and manipulate surveying data
- communicate clearly with others to clarify and report project information
- comply with organisational and legislative requirements for:
  - identifying hazards, using personal protective equipment (PPE), and working safely
  - recording, storing and filing data
  - setting up and using surveying equipment.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- mathematical concepts relating to algebra, trigonometry and geometry and their use in calculating spatial measurements
- methods for calculating fall of land and volume relating to:
  - contours and spot heights
  - cross-sections: mean area and end area using trapezoidal, prismoidal and Simpson's rules
  - regular objects, including cone, cylinder, pyramid, wedge, frustum and sphere
- methods for calculating surveying data and verifying its accuracy using primary and secondary controls
- methods for establishing a control network that meets specified tolerances
- methods for recording spatial data relating to set-out
- methods for setting up, levelling and calibrating equipment used to set out stormwater systems
- purpose of primary and secondary controls for set-out
- reference and coordinate systems for surveying data, including Australian Height Datum and Map Grid of Australia
- types of pegs and markers used during set-out and methods for ensuring their optimal placement on site
- types of stormwater systems and their purposes.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence, including PPE
- specifications:
  - task specifications, drawings, maps and plans
  - organisational policies, procedures and documentation relating to work health and safety
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPSIS5047 Conduct GNSS surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5047A Conduct an advanced GNSS data collection and set out survey.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to conduct global navigation satellite system (GNSS) surveys for data collection and engineering set-outs, using GNSS equipment and suitable software to communicate with GNSS receivers. The unit covers project managing data collection activities, including planning collection methodologies and allocating work tasks in a team environment. The unit requires the ability to validate the accuracy of data and identify discrepancies between specifications and actual activities.

The unit supports those who work under limited supervision in a surveying team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Prepare for GNSS 1.1. GNSS survey specifications and organisational

- survey.
- 1.2. Equipment is prepared according to survey and organisational requirements.
  - 1.3. Survey methodology is planned to meet survey specifications and organisational requirements.
  - 1.4. Existing survey control data is obtained and validated according to organisational requirements.
  - 1.5. Set-out data is collated, validated, manipulated and uploaded into GNSS receiver.
  - 1.6. Work responsibilities are allocated and communicated to **appropriate persons** according to survey and organisational requirements.
2. Carry out GNSS surveying tasks.
- 2.1. GNSS equipment is operated according to survey specifications and organisational requirements.
  - 2.2. GNSS instruments are related to a reference system based on survey specifications.
  - 2.3. GNSS data is collected using planned methodology according to survey specifications and organisational requirements.
  - 2.4. GNSS measurements are validated and recorded on the reference system according to specifications.
3. Finalise GNSS survey.
- 3.1. GNSS software is used to process data according to survey specifications and organisational requirements.
  - 3.2. Validation checks are completed according to specifications and organisational requirements.
  - 3.3. Discrepancies between specifications and actual data are identified and addressed according to survey specifications and organisational requirements.
  - 3.4. Survey is finalised and documentation completed according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Initiative and enterprise skills to:	<ul style="list-style-type: none"><li>analyse and decide GNSS data collection methods.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>plan and prioritise work to meet survey timeframes and resource constraints.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>analyse metadata and positional data, and set-out positional accuracy</li><li>solve problems relating to height, dimension, direction and position in actual operational activity and virtual representation.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>ask questions to clarify colleagues' understanding of delegated tasks.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>analyse graphical and technical information in maps, engineering drawings, field records and survey plots.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>record technical information in organisational documentation.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>access, manipulate, retrieve and archive data</li><li>calibrate and validate GNSS equipment.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>select appropriate validation methods to verify accuracy of data.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least one of the following:

- client
- colleague
- end user
- manager
- registered or qualified surveyor.

CPPSIS5047A Conduct an advanced GNSS data collection and set out survey

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS5047 Conduct GNSS surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5047A Conduct an advanced GNSS data collection and set out survey.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also plan and conduct a global navigation satellite system (GNSS) survey for data collection and engineering set-outs for two different projects.

While conducting the above GNSS surveys, the person must:

- plan and document data collection methodologies that account for the following:
  - accessibility of marks
  - environmental considerations
  - field reconnaissance
  - GNSS methodology to be used
  - network design
  - placement of survey marks
  - work health and safety considerations
- schedule and allocate resources and work tasks
- collect data for GNSS positions, including differential methods
- operate GNSS equipment and software, as specified in the assessment conditions, to collect data appropriate to survey specifications
- communicate clearly with others to clarify and report work information
- analyse survey specifications, including:
  - cross-sections and plans
  - technical descriptions of surveying data and their requirements
- apply projection and datum parameters when using GNSS equipment and software
- comply with industry-accepted standards for validating accuracy of GNSS data
- comply with organisational requirements for:

- completing records and documentation
- recording, storing and filing data
- using and storing GNSS equipment
- working safely and using personal protective equipment (PPE)
- use industry-accepted validation methods to test accuracy of data and identify errors and discrepancies.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements for GNSS data and network surveys
- GNSS data formats and collection methods
- industry-accepted methods for validating data to identify errors and discrepancies
- methods for accessing, manipulating, retrieving and archiving GNSS data
- organisational policies and procedures relating to:
  - health and safety relating to survey activities
  - reporting and documentation
  - using and allocating resources
  - using GNSS equipment and software
- projection and datum parameters required for GNSS equipment and processing software
- reference systems for GNSS data
- techniques for project management
- types of GNSS equipment and software and their uses.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - geodetic GNSS receiver
  - GNSS equipment, including equipment capable of differential and real time modes of operation
  - GNSS software application
  - PPE
- specifications:
  - survey specifications
  - organisational policies, procedures and documentation relating to work health and safety
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPSIS5048 Conduct engineering surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5048A Conduct an engineering survey.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to conduct an engineering survey based on specifications and information in construction or engineering designs. The unit covers using surveying equipment to measure, record and reduce surveying data. It requires the ability to validate the accuracy of data, and identify discrepancies between specifications and actual activities.

The unit supports those who work under limited supervision in a surveying team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- survey. in consultation with *appropriate persons*.
- 1.2. Key survey activities are planned according to available resources, project and organisational requirements.
  - 1.3. Compliance with legal and statutory standards is planned according to project requirements.
2. Carry out engineering surveying tasks.
    - 2.1. Surveying equipment is selected, calibrated and checked to ensure correct operation and functionality, and problems are reported or resolved according to manufacturer specifications.
    - 2.2. Identified survey components are measured according to project requirements and specifications.
    - 2.3. Measured surveying data is reduced according to project requirements and specifications.
    - 2.4. Measurements are validated and recorded according to project specifications and organisational requirements.
    - 2.5. Problems are identified and resolved, and contingencies managed according to organisational requirements.
  3. Finalise and report engineering survey results.
    - 3.1. Survey is finalised and checked for compliance with project and organisational requirements.
    - 3.2. Appropriate persons are notified of survey results according to organisational requirements.
    - 3.3. Survey documentation is completed and data archived according to project and organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

Planning and organising skills to:

- plan and prioritise work to meet survey timeframes and resource constraints.

- Numeracy skills to:
- conduct precise measurements and computations relating to length, angle, elevation, area and volume.
- Oral communication skills to:
- ask questions to clarify client requirements
  - explain and discuss survey results with appropriate persons.
- Reading skills to:
- analyse graphical and technical information in construction and engineering drawings.
- Writing skills to:
- prepare conformance and non-conformance reports
  - record technical information in organisational documentation.
- Technology skills to:
- calibrate specialised surveying equipment.
- Problem-solving skills to:
- select appropriate validation methods to verify accuracy of data.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

# Assessment Requirements for CPPSIS5048 Conduct engineering surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5048A Conduct an engineering survey.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also conduct two different engineering surveys.

While conducting the above engineering surveys, the person must:

- plan and document data collection methodologies that allow for contingencies
- analyse survey specifications, including:
  - cross-sections and plans
  - technical descriptions of surveying data and their requirements
- collect data appropriate to surveying specifications using three of the following pieces of surveying equipment:
  - echo sounder
  - global navigation satellite system (GNSS)
  - level
  - tape
  - total station
- communicate clearly with others to clarify and report work information
- comply with organisational and legal requirements for:
  - applying industry-accepted standards to measurements and computations
  - completing records and documentation
  - recording, storing and filing data
  - using, checking and storing surveying equipment
  - working safely and using personal protective equipment (PPE)
- interpret design information to identify components to be measured
- comply with industry-accepted standards for validating accuracy of surveying data and identifying errors and discrepancies

- schedule work tasks to meet survey timeframes.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements for surveying data
- data reduction techniques
- industry-accepted methods for validating data to identify errors and discrepancies
- methods for calibrating surveying equipment
- methods for identifying and reporting non-conformities in collected surveying data
- organisational policies and procedures relating to:
  - health and safety relating to survey activities and work on construction sites
  - reporting and documentation
  - using the surveying equipment specified in the performance evidence
- project management techniques for scheduling work tasks and planning for contingencies
- key features of reference systems for surveying data.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence, including PPE
- specifications:
  - survey specifications, including relevant construction or engineering plans and drawings
  - organisational policies, procedures and documentation relating to work health and safety
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPSIS5049 Plan and implement surveying projects

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5049A Conduct an engineering surveying project.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to plan, monitor and finalise surveying projects to ensure that they meet client requirements and specifications. The unit covers organising resources and planning project tasks to manage risks and contingencies. It also covers project management tasks relating to stakeholder consultation, scheduling, measuring, recording and monitoring work progress. The unit requires knowledge of surveying techniques.

The unit supports those who work under limited supervision in a surveying team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information service

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |                   |  |
|-------------------|--|
| 1. Plan surveying | 1.1. Project, client and organisational requirements and associated activities are identified and clarified with |
|-------------------|--|

- project tasks.
- appropriate persons.*
- 1.2. Characteristics of operating environment, and special equipment and resource requirements are identified according to organisational requirements.
  - 1.3. Higher authorities are obtained to ensure resources and equipment operation comply with project and organisational requirements.
  - 1.4. Survey design is interpreted to identify components to be measured and monitored, and constraints are identified according to project specifications.
  - 1.5. Risk management strategies are planned and followed to ensure project complies with legal and statutory standards and organisational requirements.
  - 1.6. Project activities and timelines are scheduled according to available resources, project and organisational requirements.
2. Monitor surveying project.
- 2.1. Agreed communication processes between client and other appropriate persons are implemented and maintained.
  - 2.2. Project management mechanisms are implemented to schedule, measure, record, monitor and report work progress according to organisational requirements.
  - 2.3. Problems are identified and resolved, and contingencies managed according to organisational requirements.
3. Finalise surveying project.
- 3.1. Project is finalised and checked for compliance with specifications and organisational requirements.
  - 3.2. Appropriate persons are notified of project results according to organisational requirements.
  - 3.3. Documentation is completed and data archived according to project and organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

# Assessment Requirements for CPPSIS5049 Plan and implement surveying projects

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5049A Conduct an engineering surveying project.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also plan and implement two different surveying projects.

While planning and implementing the above surveying projects, the person must:

- analyse standards, specifications and information, including plans and drawings to determine project requirements, including necessary equipment and resources
- analyse the operating environment to ensure adequate equipment and resources
- communicate clearly with clients and stakeholders to clarify and report project information
- comply with organisational and legal requirements for:
  - completing records and documentation
  - recording, storing and filing data
- identify and manage project constraints and problems
- plan and implement risk management and contingency strategies
- prepare and document project reports
- use project management techniques to monitor projects to ensure they are completed within required timeframes and comply with specifications and standards.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements for surveying data
- data reduction and manipulation techniques
- industry-accepted methods for identifying errors and discrepancies in surveying data
- legislative, statutory and industry requirements and standards relating to work tasks
- methodologies for surveying data capture and data set-out

- organisational policies and procedures relating to:
  - client and stakeholder consultation processes
  - health and safety relating to surveying activities
  - reporting and documentation
  - using and allocating resources
- project management techniques for scheduling, measuring and monitoring work progress and planning for risks and contingencies
- spatial data reference systems used for surveying
- surveying techniques.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer, software and ancillary hardware necessary to prepare surveying project reports
- specifications:
  - organisational policies, procedures and documentation relating to work health and safety
  - specifications for a surveying project, including relevant plans and drawings
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# **CPPSIS5051 Apply land and planning law to surveying**

## **Modification History**

Release 1.

Replaces superseded equivalent CPPSIS5051A Apply land and planning law to surveying.

This version first released with CPP Property Services Training Package Version 3.

## **Application**

This unit of competency specifies the outcomes required to apply land and planning law to surveying. The unit covers marking out urban structures and identifying urban lots and related improvements using cadastral surveying methods and equipment. The unit also covers determining azimuth for identification and re-mark surveys, and undertaking mark-out surveys to fix front and rear corners, angles and line marks. It includes calculating identification surveys and preparing reports and sketches that identify physical constraints and environmental impacts. The unit requires the ability to set up, calibrate and use surveying equipment to measure, record and reduce surveying data; and to compile reports and sketches for submission to an approving authority as part of a development application. The unit requires knowledge of land and planning law, and of the submission process for local government building approvals.

The unit supports those who work under limited supervision in a surveying team, in areas such as town planning, surveying and mapping.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States where cadastral surveying must be undertaken under the supervision of a registered surveyor. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## **Pre-requisite Unit**

Surveying and spatial information services

## Elements and Performance Criteria

<p>Elements describe the essential outcomes.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</p>
<p>1. Determine survey requirements and azimuth.</p>	<p>1.1. Relevant information is gathered to determine survey requirements in consultation with <b><i>appropriate persons</i></b>.</p> <p>1.2. Survey marks are located as indicated on survey plan.</p> <p>1.3. Position of parcel of land corners is established from identified survey marks.</p> <p>1.4. Right on boundary or parallel azimuth is established.</p> <p>1.5. Monumented and non-monumented occupations are used to establish an azimuth parallel to street boundary.</p> <p>1.6. Assumed azimuth is adopted to enable completion of field survey, and subsequent calculations and adjustments to swing onto azimuth are made.</p> <p>1.7. Azimuth derived from marks at opposite extremities of survey is calculated.</p> <p>1.8. Relationship between alignment marks, kerb lines, kerb as laid, and occupations is interpreted when azimuth is fixed using alignment marks, kerbs and occupations shown in alignment plans.</p>
<p>2. Undertake mark-out survey and fix front and rear corners, angles and line marks.</p>	<p>2.1. Azimuth is established by direct or indirect means and front corners of allotment are fixed.</p> <p>2.2. Side fix is established for the allotment using occupations, and monuments or reference marks.</p> <p>2.3. Direct methods are used to establish positions of rear corners.</p> <p>2.4. Traverse and calculations from street azimuth and side fix are made to set out rear corners by indirect means.</p> <p>2.5. Requirement to use line marks on long or obstructed boundaries is identified.</p> <p>2.6. Suitable checking procedure to validate positioning of</p>

all placed marks is identified and followed.

- |    |  |      |   |
|----|--|------|---|
| 3. | Meet local government building requirements. | 3.1. | Re-mark surveys and local government siting requirements for the issue of building certificate are met.                             |
|    |  | 3.2. | Relevant survey regulations relating to supervision and accuracy of surveys, field procedures, and survey searching are adhered to. |
|    |  | 3.3. | Field notes are prepared according to organisational requirements and legal and statutory standards.                                |
| 4. | Calculate identification survey.             | 4.1. | Position of improvements in relation to boundaries is calculated using <i>industry-accepted methods</i> .                           |
|    |  | 4.2. | Position of improvements in relation to set-out buildings is calculated using coordinate system.                                    |
| 5. | Prepare draft survey report and sketches.    | 5.1. | Draft survey report and accompanying sketches are prepared for a re-mark survey according to organisational requirements.           |
|    |  | 5.2. | Physical constraints and environmental impacts of development are incorporated into report.   |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• conduct research to identify survey information and task requirements</li> <li>•</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• plan and prioritise work to meet survey timeframes.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• conduct precise measurements and computations relating to length, angle, elevation, area and volume.</li> </ul>

- Oral communication skills to:
- ask questions to clarify client requirements
  - discuss observations and evidence with appropriate persons.
- Reading skills to:
- analyse graphical and technical information in construction and engineering drawings and survey plans
  - interpret legal information in land and planning laws.
- Writing skills to:
- use templates to record field notes
  - write field notes that can be interpreted by a third party.
- Technology skills to:
- connect equipment to coordinate systems
  - set up and calibrate specialised surveying equipment.
- Problem-solving skills to:
- select appropriate validation methods to verify accuracy of data.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least two of the following:
- client
  - colleague
  - engineer
  - local government representative
  - manager
  - registered or qualified surveyor.

- Industry-accepted methods*** must include at least one of the following:
- coordinate system
  - direct methods
  - indirect methods, such as radiations.

# Assessment Requirements for CPPSIS5051 Apply land and planning law to surveying

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5051A Apply land and planning law to surveying.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also apply land and planning law to two different surveying projects.

While applying land and planning law to above projects, the person must:

- accurately calculate position of improvements in relation to boundaries and set-out buildings
- apply road alignment design and associated computations with accuracy and precision
- check and validate position of all marks
- communicate clearly with others to clarify and report survey information
- comply with organisational requirements relating to:
  - completing records and documentation, including field notes
  - meeting local government building requirements
  - recording, storing and filing data
  - setting up and using surveying equipment
  - working safely and using personal protective equipment (PPE)
- comply with relevant legal and statutory requirements and standards to ensure accuracy of survey, field procedures and searches
- conduct research to obtain survey information relating to:
  - boundary dimensions
  - design information
  - land title information
  - topographic features
- apply traverse surveying techniques and calculations
- follow standard operating procedures to perform cadastral surveying tasks using two of the following pieces of surveying equipment:

- global navigation satellite system (GNSS)
- level
- tape
- total station
- identify physical constraints and environmental impacts of planned developments, including those relating to two of the following:
  - drainage
  - easements
  - public reserves
  - sediment control
  - sewerage control
- implement project management mechanisms to ensure survey is completed within required timeframes and complies with specifications
- prepare clear and concise survey report and related sketches to accompany development application.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements for cadastral surveying data
- aspects of land and planning law impacting on surveying tasks, including:
  - common law and old system title
  - community title
  - crown land, alienation and native title
  - environmental protection
  - set-back requirements
  - strata title
  - Torrens title system
- data capture and set-out methodologies used in surveying
- data reduction techniques
- industry-accepted methods for validating surveying data to identify errors and discrepancies
- legislative, statutory and industry requirements and standards relating to cadastral surveying and local government building requirements
- methods for setting up and calibrating surveying equipment
- purpose of monuments in marking lines
- organisational policies and procedures relating to:
  - health and safety relating to survey activities
  - reporting and documentation
  - using the surveying equipment specified in the performance evidence
- possible community issues and repercussions relating to building permits

- reference and coordinate systems for surveying data, including Australian Height Datum and Map Grid of Australia
- submission process for local government building approvals.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence, including PPE
- specifications:
  - survey specifications, including relevant surveying, construction and engineering plans and drawings
  - local land and planning laws
  - organisational policies, procedures and documentation relating to work health and safety and complying with planning submission processes
- relationships with team members and supervisor:
  - supervision by a registered or licensed land surveyor is required in some jurisdictions.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPSIS5052 Integrate surveying datasets

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5052A Integrate surveying datasets.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to use technology and software applications to integrate spatial datasets captured using surveying methods and equipment. The unit covers importing or downloading, editing, checking and validating measured datasets. It also covers processing and comparing integrated datasets to check accuracy and resolve errors, and finalising the process by archiving data and completing documentation. The unit requires the ability to consult with appropriate persons to define project requirements and report outcomes; interpret field records, images and technical descriptions of data; and apply mathematical concepts used in surveying.

The unit supports those who work in a lead role in a surveying or spatial information services team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

text is used, further information is detailed in the range of conditions.

1. Prepare to integrate surveying datasets.
  - 1.1. **Project specifications** are identified in consultation with **appropriate persons**.
  - 1.2. Measured datasets are imported or downloaded into a processing package according to project specifications.
  - 1.3. Measurements are checked, validated and recorded according to project specifications.
  - 1.4. Data is edited according to project specifications and organisational requirements.
  
2. Process surveying datasets.
  - 2.1. Measured data is processed for comparison with dataset design using a processing package.
  - 2.2. Measurements are validated and recorded according to project specifications.
  - 2.3. Checks on integrated data are completed, and problems are identified and resolved or contingencies managed, according to organisational requirements.
  
3. Finalise surveying dataset integration.
  - 3.1. Documentation is promptly and accurately completed according to organisational requirements.
  - 3.2. Appropriate persons are informed of results of dataset integration according to organisational requirements.
  - 3.3. Data is archived according to project specifications and organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Initiative and	<ul style="list-style-type: none"> <li>• select and apply different software applications to meet specific project requirements.</li> </ul>

enterprise skills to:

- Numeracy skills to:
- apply mathematical concepts relating to depth, dimension, direction, height and position to check data measured through surveying activities.
- Oral communication skills to:
- ask questions to clarify client and project requirements
  - seek advice to resolve problems.
- Reading skills to:
- interpret field records, images and detailed technical descriptions of spatial data.
- Writing skills to:
- record measurements with accuracy and precision.
- Technology skills to:
- use a computer and software to manipulate and compare spatial data.
- Problem-solving skills to:
- apply contingency measures to resolve identified errors.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Project specifications*** must include:
- constraints
  - deliverables
  - principal work activities.

- Appropriate persons*** must include at least one of the following:
- client
  - field hand
  - manager
  - registered or qualified surveyor

- site personnel.

# Assessment Requirements for CPPSIS5052 Integrate surveying datasets

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5052A Integrate surveying datasets.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also integrate two different surveying datasets.

While integrating the above surveying datasets, the person must:

- exercise precision when editing, processing, comparing, manipulating and archiving spatial data
- select and use industry-accepted processing packages to process surveying datasets into integrated format
- comply with legal requirements when accessing and managing spatial data
- apply contingency measures when solving problems relating to accuracy and compatibility of data
- comply with organisational requirements for:
  - communicating with clients and other appropriate persons
  - recording data and completing documentation
  - working safely when using screen-based equipment
- use industry-accepted methods for assessing the validity and integrity of spatial data and resolving errors.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- different types of surveying equipment used to capture spatial data
- legal requirements for accessing, storing, retrieving and archiving digital and hard copy spatial data, including data privacy and information copyright
- methods for comparing and checking different spatial datasets
- organisational requirements relating to:

- work health and safety
- recording data
- completing documentation
- key features of software applications used to compute measured spatial datasets
- spatial data capture methodologies
- spatial data formats and structures
- spatial data reduction techniques
- key features of spatial reference systems.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer with software appropriate for integrating surveying datasets
- specifications:
  - organisational policies, procedures and documentation relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPSIS5053 Perform advanced surveying computations

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5053A Perform advanced surveying computations.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to perform advanced surveying computations to solve from a range of surveying and basic engineering-related problems. The unit covers applying mathematical concepts, computations and conversions relating to algebra, statistics, geometry and trigonometry. It also covers solving a range of surveying problems to identify errors and missing elements, and make necessary adjustments to computations. It requires the ability to analyse and evaluate spatial data as the basis for performing computations.

The unit supports those who work under limited supervision in a surveying team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Prepare for
  - 1.1. Task requirements are identified in consultation with

- surveying computations.
- appropriate persons.*
- 1.2. Standards in relation to accuracy and tolerances are identified according to organisational requirements.
  - 1.3. Computational equipment is selected according to task and organisational requirements.
2. Solve advanced computation problems.
    - 2.1. Computations are performed on the coordinates of a traverse using computational equipment, and missing elements and coordinates are adjusted and computed.
    - 2.2. Traverse information is reduced according to standards and task requirements.
    - 2.3. Problems involving linear figures of parallel, constant or different width are identified and solved according to standards.
    - 2.4. Road intersections involving different road widths are solved according to standards.
    - 2.5. Computations are performed to maintain areas of closed figures according to industry-accepted standards.
    - 2.6. Computations are performed on all elements of complex circular and reverse curves, and missing elements are solved according to industry-accepted standards.
  3. Finalise computations.
    - 3.1. Measurements and computations are checked to ensure accuracy according to industry-accepted standards and task requirements, and are adjusted as required.
    - 3.2. Computations are finalised and recorded according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
--------------	----------------------------

- Numeracy skills to:
- apply the principles of algebra, geometry and trigonometry to calculate area, height and missing lines
  - calculate linear, angular and height measurements.
- Oral communication skills to:
- ask questions to clarify work task requirements and computational formulas
  - discuss solutions to advanced computational problems.
- Reading skills to:
- interpret complex computational data provided in diagrammatic form.
- Writing skills to:
- record computations and results using industry-accepted templates and formats.
- Problem-solving skills to:
- identify errors with computational results by applying rigorous checking procedures.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- client
  - experienced surveying colleague
  - manager
  - qualified surveyor.

## Unit Mapping Information

# Assessment Requirements for CPPSIS5053 Perform advanced surveying computations

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5053A Perform advanced surveying computations.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also accurately perform advanced computations for two different surveying tasks.

While performing the above advanced surveying computations, the person must:

- communicate clearly with others to clarify work tasks
- comply with organisational requirements and relevant standards essential to the accuracy of:
  - measurement, including circular geometry and trigonometry
  - calculating horizontal and vertical information
  - recorded computations
- exercise precision and accuracy in performing advanced surveying computations
- interpret statistics from adjustments relating to normal curve and distributions, and standard deviations and errors
- select and use the computational equipment specified in the assessment conditions, to perform advanced surveying computations
- solve computational problems relating to angular, linear and height observations
- transform east and north coordinates from one system to another
- check accuracy of computations and make necessary adjustments
- comply with organisational requirements relating to completing records and documentation.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- industry-accepted standards relating to accuracy and tolerances for surveying computations

- methods for performing the following:
  - computing data from supplied field information
  - solving complex surveying computations
  - checking accuracy of computations to identify errors and solve problems
- organisational policies and guidelines relating to completing records and documentation.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - scientific or programmable calculator or a software application that includes surveying calculations
- specifications:
  - task requirements
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPSIS5054 Perform geodetic surveying computations

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5054A Perform geodetic surveying computations.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to perform geodetic surveying computations to solve a range of geodetic surveying problems. The unit covers applying mathematical concepts and formulas to geodetic components and performing computations relating to reference surfaces and projection planes. It covers using techniques for data reduction and checking data. It requires the ability to analyse data to comply with standards, and to consult with others to clarify and report on work tasks.

The unit supports those who work under limited supervision in a surveying team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

# Assessment Requirements for CPPSIS5054 Perform geodetic surveying computations

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5054A Perform geodetic surveying computations.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also accurately perform geodetic surveying computations for two different surveying tasks.

While performing the above geodetic surveying computations, the person must:

- apply formulas to geodetic data and obtain correct results
- communicate clearly with others to clarify work tasks
- comply with organisational requirements and relevant standards essential to accuracy of:
  - calculating geodetic data
  - recording computations
- exercise precision and accuracy in geodetic computations
- perform calculations in a logical progression to solve geodetic surveying problems
- perform point to point calculations on:
  - projection plane
  - spheroid
- relate reference surfaces to geodetic components
- check accuracy of computations and resolve errors
- select and use the following computational equipment to perform geodetic surveying computations: scientific or programmable calculator or a software application that includes surveying calculations
- comply with organisational requirements relating to completing records and documentation.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- industry-accepted standards relating to accuracy and precision for geodetic surveying data
- common terms used in geodetic surveying calculations
- computing aids and software used to perform geodetic computations
- data reduction techniques
- industry-accepted methods for validating data to identify errors and discrepancies
- methods to perform projection plane computations relating to the following:
  - angle or bearing calculations on Map Grid of Australia (MGA)
  - arc to chord corrections
  - grid bearings
  - grid convergence
  - latitude and longitude to grid coordinates
  - point and line scale factor
  - point to point calculations
  - project zone calculations
  - transforming coordinate axes
  - using MGA and Geocentric Datum of Australia software
  - zone to zone transformations
- methods to perform reference surface computations relating to the following:
  - meridian convergence
  - point to point calculations
  - principle radii
  - spheroidal distance from observed distance.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence
- specifications:
  - task requirements
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS5057 Conduct precision surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5057A Carry out a precision survey.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to conduct a precision survey, including techniques for precise levelling, precise setting out and industrial measurements, and detecting structural deflection and deformation. The unit covers preparing for precision surveying by analysing project specifications and information, and identifying and controlling risks and contingencies. The unit also covers selecting and using specialised equipment, attachments and instruments necessary for precise levelling and setting out, and checking horizontal and vertical movement of structures. The unit requires the ability to apply high level surveying computations to surveying problems, including conducting statistical analysis of measurements and errors to achieve specified accuracies and tolerances.

The unit supports those who work under limited supervision in a surveying team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Prepare for precision survey.
  - 1.1. Project specifications, precision survey objectives, and accuracy requirements are identified in consultation with ***appropriate persons***.
  - 1.2. Risks are identified and controlled, and contingencies managed according to organisational requirements.
  - 1.3. Specialised equipment and attachments for precise levelling and setting out are determined and selected according to project specifications.
  - 1.4. Precise levelling run is carried out and results are calculated and recorded according to organisational requirements.
2. Apply techniques for precise setting out.
  - 2.1. Applications of specialised surveying techniques used for precise setting out are determined according to project specifications.
  - 2.2. ***Remote measuring systems*** to be used for industrial measurements are determined according to project specifications.
  - 2.3. Set-out and observations are conducted according to project specifications, using instruments and attachments suitable for precise setting out.
3. Detect structural deflection and deformation.
  - 3.1. Survey methods used to check horizontal movement of engineering structures and instruments used to monitor verticality of tall structures are determined.
  - 3.2. Survey methods used to check vertical movement due to settlement of engineering structures caused by tunnelling and mining are determined.
  - 3.3. Precision survey of an accuracy that will detect and monitor deformation or deflection of engineering structure is carried out according to project specifications.
4. Finalise precision survey.
  - 4.1. Precision survey is finalised and checked according to project specifications and organisational requirements.

- 4.2. Appropriate persons are notified of survey results according to organisational requirements.
- 4.3. Survey documentation is completed and data archived according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Planning and organising skills to:	<ul style="list-style-type: none"><li>• plan and prioritise work to meet survey timeframes.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• analyse measurements between two or more points to achieve accuracy and precision in calculations</li><li>• conduct error analysis relating to angle, distance and height difference, observations, values and positional results.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions to clarify survey requirements</li><li>• report details of survey results.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• analyse graphical and technical information in construction and engineering plans.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• prepare technical reports</li><li>• record technical information in organisational documentation.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• calibrate specialist instruments and attachments.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>• apply risk control and contingency strategies to anticipated and identified problems.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least one of the following:

- client
- colleague
- engineer
- manager
- registered or qualified surveyor.

***Remote measuring systems*** must include at least one of the following:

- precise intersection techniques
- robotic instruments
- terrestrial photogrammetry.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS5057 Conduct precision surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5057A Carry out a precision survey.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also conduct two different precision surveys.

While conducting the above precision surveys, the person must:

- analyse standards, specifications and information in plans and drawings to determine surveying and precision requirements
- apply precision surveying techniques, measurements and error analysis to achieve specified accuracies and precision tolerances
- carry out precise levelling run, using two of the following pieces of specialised equipment and attachments:
  - global navigation satellite system (GNSS)
  - gyro-theodolite
  - optical and digital level
  - optical reading instruments
  - total station (reflectorless)
  - total station (theodolite function)
- carry out precise setting out using one of the following instruments and attachments:
  - auto collimation and laser eyepieces
  - total stations
  - zenith and nadir auto plumb instruments
- carry out precise setting out using one of the following remote measuring systems:
  - precise intersection techniques
  - robotic instruments
  - terrestrial photogrammetry

- use industry-accepted survey methods to detect and monitor deflection and deformation of structures
- communicate clearly with others to clarify and report project information
- comply with organisational and legal requirements for:
  - completing records and documentation
  - recording, storing and filing data
  - using, checking and storing surveying equipment
  - working safely and using personal protective equipment (PPE)
- plan and implement risk management and contingency strategies.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy standards and field procedures for high-precision horizontal and vertical control surveys
- basic application of electromagnetic measuring principles and techniques
- common terms used in precision surveying calculations
- data reduction techniques
- basic concepts of algebra, geometry and trigonometry
- industry-accepted methods for error analysis
- legislative, statutory and industry requirements and standards relating to work tasks
- methods for computing three-dimensional (3-D) coordinates and coordinate changes by intersection
- organisational policies and procedures relating to:
  - health and safety relating to survey activities
  - reporting and documentation
  - using specialised surveying equipment, attachments and instruments
- standard plan design and presentation conventions
- surveying methods used to detect horizontal and vertical movement of structures.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - PPE
  - specialised surveying equipment, attachments and instruments selected from those listed in the performance evidence
  - remote measuring system selected from those listed in the performance evidence
- specifications:
  - survey specifications, including relevant plans and drawings
  - organisational policies, procedures and documentation relating to work health and safety

- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by project requirements.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS5058 Conduct geodetic surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5058A Conduct geodetic surveying.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to conduct a geodetic survey based on specifications and client requirements. The unit covers project management tasks relating to scheduling, measuring, recording and monitoring work progress and planning for risks and contingencies. The unit also covers applying reference surfaces and projection planes to geodetic components, and performing geodetic calculations. The unit requires using specialist equipment to measure, record and reduce data, including global navigation satellite system (GNSS). The unit requires the ability to perform geodetic calculations, validate the accuracy of data, and identify discrepancies between specifications and actual activities. It also requires using a range of coordinate systems, such as Map Grid of Australia (MGA) and Geocentric Datum of Australia (GDA) to manage surveying data.

The unit supports those who work under limited supervision in a surveying team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Prepare for geodetic survey.
  - 1.1. Project specifications are analysed to determine geodetic survey and client requirements in consultation with *appropriate persons*.
  - 1.2. Characteristics of operating environment and special equipment or resource requirements are identified according to organisational requirements.
  - 1.3. Equipment is selected and checked according to manufacturer specifications to ensure correct operation and functionality according to manufacturer specifications.
  - 1.4. Risk management strategies are devised and followed to ensure project complies with legal and statutory standards and organisational requirements.
  
2. Plan geodetic survey.
  - 2.1. Key activities and timelines are scheduled according to available resources, and project and organisational requirements.
  - 2.2. Design is interpreted to identify required surveying data according to project requirements.
  - 2.3. Relevant reference surface and projection plane are selected for geodetic components.
  - 2.4. Existing survey control data is obtained and validated according to project and organisational requirements.
  
3. Carry out geodetic surveying tasks.
  - 3.1. Project management mechanisms are implemented to schedule, measure, record, monitor and report work progress according to organisational requirements.
  - 3.2. Identified surveying components are measured according to project requirements and specifications.
  - 3.3. Measured surveying data is reduced according to project requirements and specifications.
  - 3.4. Measurements are validated and recorded according to project specifications and organisational requirements.
  - 3.5. Discrepancies between specifications and actual

activities are identified and resolved, and contingencies managed according to organisational requirements.

- |                              |   |
|------------------------------|---|
| 4. Finalise geodetic survey. | <p>4.1. Survey is finalised and checked for compliance with project and organisational requirements.</p> <p>4.2. Appropriate persons are notified of survey results according to organisational requirements.</p> <p>4.3. Survey documentation is completed and data archived according to project and organisational requirements.</p> |
|------------------------------|---|

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• plan and prioritise work to meet survey timeframes and resource constraints.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• apply geodetic formulas for point to point calculations on MGA</li> <li>• conduct precise measurements and calculations relating to shape and size of the earth.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify client requirements</li> <li>• inform clients and other stakeholders of project progress.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• analyse graphical and technical information in project specifications.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• record technical information in organisational documentation.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• calibrate instruments using GNSS software</li> <li>• use coordinate systems, including MGA and GDA.</li> </ul>

- Problem-solving skills to:
- apply risk control and contingency strategies to anticipated and identified problems
  - select appropriate validation networks to verify accuracy of data.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- client
  - colleague
  - end user
  - engineer
  - manager
  - registered or qualified surveyor.

# Assessment Requirements for CPPSIS5058 Conduct geodetic surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5058A Conduct geodetic surveying.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also conduct a geodetic survey for two different projects.

While conducting the above geodetic surveys, the person must:

- analyse standards, specifications and information, including plans and drawings to determine survey requirements
- prepare for the survey by analysing specifications and operating environment to ensure adequate equipment and resources
- carry out a precise global navigation satellite system (GNSS) traverse for survey control using two of the following pieces of equipment:
  - barometer
  - GNSS equipment
  - thermometer
- identify and apply relevant geodetic coordinate systems and reference points to survey activities
- measure and compute GNSS survey traverse components using GNSS equipment and appropriate software to aid geodetic calculations
- perform calculations in a logical progression to solve geodetic surveying problems
- use coordinate systems, including Map Grid of Australia (MGA) and Geocentric Datum of Australia (GDA) to manage surveying data
- communicate clearly with clients and stakeholders to clarify and report survey information
- comply with industry-accepted standards for validating accuracy of data and identifying errors and discrepancies
- comply with organisational and legal requirements for:
  - completing records and documentation
  - recording, storing and filing data

- using, checking and storing surveying equipment
- working safely and using personal protective equipment (PPE)
- plan and implement project management mechanisms to ensure the survey is completed within required timeframes and project complies with specifications and standards
- plan and implement risk management and contingency strategies.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements for geodetic surveying data
- common terms used in geodetic surveying calculations
- coordinate systems that are compatible with GNSS, including MGA and GDA
- data reduction techniques
- industry-accepted methods for validating data to identify errors and discrepancies
- legislative, statutory and industry requirements and standards relating to work tasks
- organisational policies and procedures relating to:
  - health and safety relating to survey activities
  - reporting and documentation
  - using and allocating resources
  - using the equipment specified in the performance evidence
- project management techniques for scheduling, measuring and monitoring work progress and planning for risks and contingencies
- reference surfaces, projection planes and coordinate systems for geodetic components
- industry-accepted techniques for survey control
- standard survey plan design and presentation conventions.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence, including PPE
- specifications:
  - organisational policies, procedures and documentation relating to work health and safety
  - survey specifications, including relevant plans and drawings
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPSIS5060 Develop spreadsheets for spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5060A Use complex spreadsheets for spatial information.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to design and develop spreadsheets to enter, edit and format spatial data. The unit covers using functions and features of spreadsheet software, including linked spreadsheets, multiple documents and advanced mathematical formulas based on trigonometrical functions. The unit also covers work preparation activities, including evaluating tasks to identify design parameters and setting up software and spreadsheet templates to ensure quality and consistency in format and design. The unit requires the ability to use technology to apply advanced mathematical concepts to spatial data, including identifying and resolving errors relating to formulas and other spreadsheet functions.

The unit supports those who work in a lead role in a surveying or spatial information services team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

- essential outcomes. demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Prepare for spreadsheet tasks.
    - 1.1. Spreadsheet requirements for spatial data entry, storage, output, reporting and presentation are identified to determine task requirements in consultation with ***appropriate persons***.
    - 1.2. Tasks are evaluated to identify design parameters, required mathematical formulas and areas where automation would increase efficiency according to task requirements.
    - 1.3. Software is set up and checked to ensure functionality and capacity to meet task and organisational requirements.
  2. Set up spreadsheets.
    - 2.1. Spreadsheet templates are developed and edited to standardise spreadsheet operation and ensure quality and consistency in format and design.
    - 2.2. Linked worksheet solution is developed using software functions and formulas to meet task requirements.
    - 2.3. Worksheets are formatted to incorporate cell and data attributes, formulas and graphs with labels and titles.
    - 2.4. Formulas are tested to confirm that output meets task requirements and errors are identified and resolved or contingencies managed.
  3. Use functions and features of spreadsheet software.
    - 3.1. Spatial data is entered, checked and edited according to task and organisational requirements.
    - 3.2. Spatial data is imported and exported between compatible spreadsheets, and host documents are adjusted according to task requirements.
    - 3.3. Software documentation and online help are used to overcome problems with spreadsheet design and production.
    - 3.4. Spreadsheets, including graphs, are produced and stored according to organisational requirements.

- |                           |   |
|---------------------------|---|
| 4. Finalise spreadsheets. | 4.1. Completed spreadsheets are protected to prevent accidental corruption and are archived according to organisational requirements. |
|                           | 4.2. Documentation is completed and appropriate persons are informed of results according to organisational requirements.             |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Initiative and enterprise skills to:	<ul style="list-style-type: none"> <li>• translate spatial data into spreadsheet design and layout.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• use mathematical formulas involving trigonometrical functions</li> <li>• use spreadsheet functions that use mathematical and statistical terms, including absolute, value, integer, square root, standard deviation, and simple if functions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify spreadsheet requirements.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret cell references</li> <li>• interpret information in graphs.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• incorporate headings and labels into spreadsheets to enhance meaning of spatial data.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• create multi-page and linked documents</li> <li>• use querying commands to obtain information from databases.</li> </ul>

Problem-solving skills to:

- resolve problems with data compatibility.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least one of the following:

- client
- end user
- manager.

## Unit Mapping Information

CPPSIS5060A Use complex spreadsheets for spatial information

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS5060 Develop spreadsheets for spatial data

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5060A Use complex spreadsheets for spatial information.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also develop three spreadsheets for different spatial data, in which the work must involve:

- linking spreadsheets
- multiple documents
- advanced mathematical formulas based on trigonometrical functions.

While developing the above spreadsheets for spatial data, the person must:

- analyse task requirements and evaluate work tasks as the basis for designing data layout, formulas and areas of automation
- communicate clearly with others to clarify work tasks and notify task results
- comply with organisational and legal requirements for:
  - accessing spatial data, including data privacy and information copyright
  - completing records and documentation
  - naming, storing and archiving spreadsheets
- design and develop spreadsheet templates which ensure consistency in format, font type and size across multiple documents
- develop spreadsheets using a range of complex software functions and formulas, including:
  - cell and data attributes
  - cell protection
  - embedding cell references in formulas
  - graphs
  - headers and footers

- headings and labels
- importing and exporting data
- relative and absolute cell references
- edit and proofread spreadsheets to check for accuracy and data consistency, including checks for correct formula function and output
- identify errors and solve problems relating to data and spreadsheets
- preserve the integrity and accuracy of spatial data during import and export process
- use industry-accepted techniques to save and protect spreadsheets and data from corruption.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- advanced functions of spreadsheet software applications, including linking spreadsheets and using formulas
- display principles, including:
  - colour
  - composition
  - font type
  - legends
  - size
  - text and line style
- methods for applying trigonometrical functions to formulas in spreadsheets
- organisational requirements for:
  - completing records and documentation
  - preparing, naming, saving and archiving spreadsheet files.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer with access to appropriate spreadsheet software
  - printer
- specifications:
  - organisational policies, procedures and documentation relating to data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by client and project requirements.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -

# CPPSIS5061 Locate underground services in surveying practice

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5061A Locate underground services in surveying practice.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to locate underground services in surveying practice. The unit covers using specialised surveying equipment and electronic locating and geophysics methods, such as electro-magnetic detecting and ground penetrating radar, to identify and interpret targets on lines of subterranean assets. The unit also covers project management tasks relating to scheduling, recording, monitoring and reporting work progress, and planning for risks and contingencies. The unit requires the ability to perform surveying calculations and data reductions, read and interpret Dial Before You Dig (DBYD) plans, and to output data using equipment software.

The unit supports those who work under limited supervision in a surveying team.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States. This unit may also require adherence to AS5488 Classification of Subsurface Utility Information (SUI). Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

- essential outcomes. text is used, further information is detailed in the range of conditions.
1. Plan location processes.
    - 1.1. Project objectives, principal work activities, and constraints are identified and documented in consultation with *appropriate persons*.
    - 1.2. Geophysics methods to locate services and spatial data requirements are determined.
    - 1.3. Details of instruments and basic surveying techniques to be used are evaluated and determined according to project objectives.
    - 1.4. Surveying equipment is selected, calibrated and verified according to manufacturer specifications.
    - 1.5. Work is scheduled to be completed within available time according to organisational requirements.
  2. Carry out surveying tasks.
    - 2.1. Project management mechanisms are implemented to schedule, measure, record and report work progress according to organisational requirements.
    - 2.2. Underground services are located and required components measured and marked according to project specifications.
    - 2.3. Surveying equipment is used to collect and scrutinise spatial data to determine targets on lines of subterranean assets.
    - 2.4. Measured spatial data is reduced to project reference system for comparison with design.
    - 2.5. Measurements are validated and recorded according to project specifications, organisational requirements and standards.
    - 2.6. Problems are identified and resolved, and contingencies managed according to organisational requirements and plans.
  3. Finalise location processes.
    - 3.1. Location processes are finalised and achievements reviewed against project and organisational requirements.

- 3.2. Appropriate persons are notified of results according to organisational requirements.
- 3.3. Documentation is completed and spatial data archived according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"><li>• conduct surveying measurements and calculations relating to depth, dimension, direction, flow rates, position and angle.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions to clarify project requirements.</li></ul>

# Assessment Requirements for CPPSIS5061 Locate underground services in surveying practice

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5061A Locate underground services in surveying practice.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also locate underground services in surveying practice for two different projects.

For each of the above projects, two of the following pieces of equipment must be used:

- electro-magnetic equipment
- ground penetrating radar
- global navigation satellite system (GNSS)
- level
- total station.

While locating underground services in the above projects, the person must:

- plan work activities to identify and manage potential constraints, including those relating to:
  - confined spaces
  - traffic control
  - work health and safety
- prepare for survey by analysing specifications and operating environment to ensure adequate equipment and resources
- plan and implement project management mechanisms to ensure work is completed within required timeframes and that project complies with specifications and standards, including Dial Before You Dig (DBYD) requirements
- plan and implement risk management and contingency measures, including two of the following tools and strategies:
  - DBYD

- non-destructive digging
- pipe and cable tracers, including transmitter and receiver
- pipe cameras
- sonde
- analyse electronic and radar data to determine subterranean assets
- communicate clearly with clients and stakeholders to clarify and report project information
- comply with industry-accepted standards for validating accuracy of data and identifying errors and discrepancies
- comply with organisational and legal requirements for:
  - completing records and documentation
  - recording, storing and filing data
  - using, checking and storing equipment
  - working safely to identify and control hazards and risks, including those relating to traffic control and confined spaces, and to use personal protective equipment (PPE)
- use one the following geophysics methods to locate and measure underground services and components:
  - electro-magnetic locating
  - ground penetrating radar acquisition
  - interpreting presented data, including DBYD and other relevant evidence
  - spraying targets on the ground.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements for locating underground services
- data reduction and manipulation techniques
- electro-magnetic and geophysics methods used for locating underground services
- basic concepts of algebra, geometry and trigonometry that relate to locating underground services
- industry-accepted methods for validating data to identify errors and discrepancies
- legislative, statutory and industry requirements and standards relating to work tasks
- methods for identifying targets on lines of radar
- organisational policies and procedures relating to:
  - client and stakeholder communication
  - contacting relevant utility providers
  - health and safety relating to work activities
  - reporting and documentation
  - using the equipment specified in the performance evidence
- procedures for calibrating specialised surveying equipment
- project management techniques for scheduling, measuring and monitoring work progress and planning for risks and contingencies

- relevant industry standards, including AS5488 Classification of Subsurface Utility Information (SUI).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence, including PPE
- specifications:
  - task specifications, including relevant plans and drawings
  - organisational policies, procedures and documentation relating to work health and safety
  - AS5488 Classification of Subsurface Utility Information (SUI)
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPSIS5062 Conduct photogrammetric mapping

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5062A Conduct photogrammetric mapping.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to interpret information from various types of image data to conduct photogrammetric mapping. The unit covers assessing the survey area and project requirements to determine the types and possible sources of image data to meet project specifications as well as identifying constraints. The unit also covers visually analysing image data against spatial reference systems and ground controls for photogrammetric mapping. The unit requires the ability to measure and calculate information obtained from image data; identify and resolve problems; and implement project management techniques.

The unit supports those who work in a lead role in a spatial information services team in cartography, mapping and geographic information systems (GIS).

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

- |    |  |  |
|----|--|--|
| 1. | Apply photogrammetric data to project. | <p>1.1. Project specifications are identified, and survey area and <i>photogrammetric data</i> are analysed and applied to project plan.</p> <p>1.2. Possible sources of image data for mapping purposes are identified according to project specifications.</p> <p>1.3. Properties and constraints of different types of image data are identified according to project specifications.</p>   |
| 2. | Calculate information from image data. | <p>2.1. Image data is accessed and spatial reference systems are used to clarify properties according to project specifications.</p> <p>2.2. Ground controls targeted for photogrammetric mapping are checked to enhance understanding of image data.</p> <p>2.3. Scale of digital and hard copy image data is determined and calculated.</p> <p>2.4. Problems involving acquired image data are identified and resolved according to organisational requirements.</p> |
| 3. | Interpret and store image data.        | <p>3.1. Information from acquired photogrammetric data is used to meet project specifications.</p> <p>3.2. Captured data is stored according to organisational requirements.</p> <p>3.3. Documentation is completed according to organisational requirements.</p>  |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

Initiative and

- apply spatial reference systems to compare data images.

enterprise skills to:

- Learning skills to:
- conduct research to source photogrammetric data.
- Numeracy skills to:
- solve complex problems relating to height, depth, dimension, direction and position in actual operational activity and virtual representation.
- Oral communication skills to:
- ask questions to clarify data image requirements.
- Reading skills to:
- analyse graphical and technical information from maps and photographs.
- Writing skills to:
- document technical detail in project plan.
- Technology skills to:
- use a computer and software to manipulate and set out image data.
- Problem-solving skills to:
- apply ground controls to aerial photographs.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Photogrammetric data*** must include at least two of the following:
- aerial survey
  - computer vision
  - geoinformatics
  - geomatics engineering images
  - GeoPhoto
  - stereoplotter

- three-dimensional data acquisition and object reconstruction
- videogrammetry.

## Unit Mapping Information

CPPSIS5062A Conduct photogrammetric mapping

# Assessment Requirements for CPPSIS5062 Conduct photogrammetric mapping

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5062A Conduct photogrammetric mapping.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also conduct photogrammetric mapping of data images from a range of sources for two different projects.

While conducting the above photogrammetric mapping, the person must:

- analyse project specifications to clarify the types of image data required and the project survey area, which include:
  - aerial photographs
  - other forms of digital data in the horizontal or vertical plane
- develop a project plan and implement project management techniques to plan, schedule, monitor and report on project activities
- apply ground controls for photogrammetric mapping, including:
  - pre-marked targets
  - primary ground control
  - post-marked targets
  - secondary control
- analyse photogrammetric images to calculate information and measure and identify scale
- communicate clearly with others to clarify and negotiate project tasks
- comply with organisational requirements relating to:
  - completing records and documentation
  - health and safety when using screen-based equipment
  - data privacy and information copyright
- identify and resolve constraints and problems with image data
- record and interpret statistics with accuracy and precision
- research and access sources of photogrammetric data

- use a computer and software applications to access, analyse and store photogrammetric data.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- legal and administrative requirements for accessing, using and storing photogrammetric data, including data privacy and information copyright
- organisational policies and procedures relating to:
  - accessing and formatting image data and managing quality
  - health and safety when using screen-based equipment
- possible sources of image data
- properties and characteristics of photogrammetric data used in mapping
- relevant industry requirements and standards relating to photogrammetric mapping
- requirements for ground control in the photogrammetric process
- set out and format requirements for image data
- key features of spatial reference systems relating to photogrammetric mapping.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer and software applications appropriate to conducting photogrammetric mapping
- specifications:
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
  - project specifications
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS5064 Coordinate GIS data manipulation and analysis

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5064A Manipulate and analyse GIS data.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to coordinate geographic information system (GIS) data manipulation and analysis to meet client specifications. The unit covers analysing client needs and GIS data format requirements and developing procedures; assessing the applicability of existing tools, models, theories and applications; and developing models to achieve the required outcome, including feasible parameters, equations and assumptions. The unit also covers verifying data source integrity and manipulating and analysing data for presentation. The unit requires the ability to use computers and GIS software as well as querying and programming languages to capture geographic information, obtain information from databases, and create layers on maps. It also requires the ability to comply with organisational and legal requirements relating to client consultation and data ownership.

The unit supports those who work in a lead role in a surveying or spatial information services team in areas such as surveying, town planning, cartography, mapping and GIS.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

- essential outcomes. demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Prepare to meet client GIS data needs.
    - 1.1. Client requirements and project specifications for GIS data format are determined in consultation with *appropriate persons*.
    - 1.2. Parameters for data manipulation and analysis are specified according to project specifications.
    - 1.3. New procedures for manipulating and analysing data to meet project specifications are documented.
  
  2. Establish GIS data models.
    - 2.1. Applicability of existing tools, models, theories, applications and solutions is reviewed against project specifications.
    - 2.2. Feasible parameters, equations and assumptions are developed according to project specifications.
    - 2.3. Models are established to meet project specifications according to organisational requirements.
  
  3. Manipulate and analyse GIS data.
    - 3.1. Processes for data manipulation and analysis are determined and used to meet project specifications.
    - 3.2. Source data limitations and other restricting factors are analysed to ensure data integrity, and problems are identified and resolved or contingencies are managed.
    - 3.3. Data is isolated and retrieved from source, and interrogated to ensure reliability according to project specifications.
    - 3.4. Data is manipulated and prepared for presentation media, and project is finalised according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to

performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Initiative and enterprise skills to:	<ul style="list-style-type: none"><li>• translate client requirements into model design.</li></ul>

# Assessment Requirements for CPPSIS5064 Coordinate GIS data manipulation and analysis

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS5064A Manipulate and analyse GIS data.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also coordinate geographic information system (GIS) data manipulation and analysis to meet client needs for two different projects.

While coordinating the above GIS data manipulation and analysis projects, the person must:

- negotiate with clients regarding data format requirements
- conduct research to source geographic information
- develop parameters, equations and assumptions to meet task requirements
- develop procedures and establish models for data analysis that meet established client specifications for data format
- analyse data sources to verify data integrity to ensure:
  - accuracy
  - completeness
  - confidence limits
  - currency
  - quality
  - resolution
  - scale
- build up elements of a database
- capture geographic information
- manipulate and analyse datasets using general query and programming languages, scripts and command lines
- use GIS software to manipulate and analyse data for display on a map
- comply with organisational and legal requirements for:
  - client consultation

- data ownership, including accessing and using spatial data, including copyright, intellectual property, data privacy and trade practices
- comply with organisational requirements for recording data and completing documentation, and using screen-based equipment.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- data reduction and manipulation techniques
- database structures and spatial features of databases
- line instructions and programming languages to capture geographic information
- methods for creating layers on maps
- querying and browsing techniques for obtaining information from databases
- types of spatial data formats
- organisational and legal requirements for accessing and using spatial data, including copyright, intellectual property, and trade practices
- organisational policies and procedures relating to:
  - accessing, recording and storing spatial data
  - communicating with clients and end users
  - completing records and documentation
  - custodianship of data
  - using computer systems and software to manipulate GIS data.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer and software appropriate for manipulating GIS data
- specifications:
  - organisational policies, procedures and documentation relating to data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.
- relationships with clients:
  - client consultation required.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPSIS5065 Design basic engineering structures

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to design and create drawings for basic engineering structures. Basic engineering structures refer to small scale designs for structures, such as rural or urban roads, railway, and sewer and stormwater drainage lines. The unit covers interpreting plans and design standards and specifications, organising resources, and using surveying methods and equipment to conduct measurements and calculations and develop a design. The unit also covers preparing design documents and accompanying forms to gain engineering construction approval, and creating engineering drawings using design software functions and features. The unit requires the ability to perform calculations appropriate to the engineering structure, including volume relating to contours, spot heights and cross-sections. It also requires the ability to check and validate measurements against specifications and complete reports and documentation, including a schedule of quantities (SOQ). The unit requires knowledge of key design features of basic engineering structures.

The unit supports those who work under limited supervision in a surveying team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Organise resources for design work.	<ul style="list-style-type: none"><li>1.1. Plans, maps, planning approvals, and design and drafting <i>specifications</i> are identified, accessed and analysed to define type of engineering structure, principal work activities, and constraints.</li><li>1.2. Characteristics of operating environment and equipment and resource requirements are identified according to organisational requirements.</li><li>1.3. Surveying equipment and tools are selected, calibrated and checked to ensure correct operation and functionality according to manufacturer specifications.</li><li>1.4. Work is planned in consultation with <i>appropriate persons</i> to meet safety requirements, project specifications and timeframes.</li></ul>
2. Develop design of basic engineering structure.	<ul style="list-style-type: none"><li>2.1. Equipment is used to perform measurements and calculations according to <i>design type</i>, project specifications and organisational requirements.</li><li>2.2. Design plan is developed based on calculations and according to project specifications.</li><li>2.3. Natural surface terrain model is developed according to project specifications.</li><li>2.4. Vertical alignment is designed according to project specifications.</li><li>2.5. Plot design, natural surface cross-section and long section plots are designed according to project specifications.</li><li>2.6. Measurements are checked to ensure correct size, plan position and reduced level according to plans and specifications, and problems are resolved or reported.</li><li>2.7. Report is generated on set-out information and existing plans are edited according to organisational</li></ul>

requirements.

3. Create engineering drawings.
  - 3.1. Hardware and software systems are set up and used according to organisational requirements.
  - 3.2. Drawing menus and drawing defaults are customised to suit project specifications according to organisational requirements.
  - 3.3. Drawings for basic engineering structure are created using available software *drawing functions and features* to meet project specifications.
  - 3.4. Drawing entities are linked to database attributes to suit project specifications.
  - 3.5. Supplementary data is extracted from existing engineering drawings to meet project specifications.
  - 3.6. Detailed views are created using various scales to meet project specifications.
  - 3.7. Plots are produced at required scale to meet project specifications.
  - 3.8. Files are saved in various formats according to organisational requirements.
  - 3.9. Entities are produced from drawing files or database and listed in required format to meet project specifications.
4. Finalise drawings of structure.
  - 4.1. Drawings and SOQ are finalised and checked for compliance with project specifications and organisational requirements.
  - 4.2. Appropriate persons are notified of results according to organisational requirements.
  - 4.3. Documentation is completed and spatial data archived according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Initiative and enterprise skills to:	<ul style="list-style-type: none"><li>• translate specifications into design.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>• prioritise work to meet project timeframes.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• apply understanding of height, depth, dimension and position to actual operational activity and virtual representation</li><li>• perform surveying calculations relating to height, distances, slope, angles and coordinates</li><li>• reduce surveying data to required levels.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions to clarify design requirements.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret graphical information in plans, drawings and maps</li><li>• interpret technical drawing standards.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• record field notes in a format that can be interpreted by a third party.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• connect surveying equipment to coordinate systems</li><li>• load spatial data into software applications.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>• identify non-conforming aspects of design.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Specifications*** must include at least one of the following:

- industry-accepted standards and specifications
- local government design standards and specifications
- state government design standards and specifications.

***Appropriate persons*** must include at least one of the following:

- client
- colleague
- engineer
- registered or qualified surveyor
- manager.

***Design type*** must include at least one of the following:

- railway
- rural road
- sewer line
- stormwater drainage line
- urban road
- other basic engineering structure.

***Drawing functions and features*** must include at least eight of the following:

- batters
- chainages
- dimensions
- drawing features, such as polylines and texts
- drawing functions
- edit functions
- horizontal and vertical alignments
- isometrics and perspectives
- longitudinal sections and cross sections
- macros
- methods for drawing lines
- plotting and printing
- plotting in two dimensions (2-D)
- super elevation
- using attributes to make project report
- using geospatial techniques
- vertical curves

- view displays
- volumes
- working with layers
- three-dimensional (3-D) techniques, including displaying 3-D views.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPSIS5065 Design basic engineering structures

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also prepare a design and drawings for two projects using a basic engineering structure from one of the following categories:

- railway
- rural road
- urban road
- sewer line
- stormwater drainage line
- other basic engineering structure.

While designing the above basic engineering structures and creating related drawings, the person must:

- communicate clearly with others to clarify and report project information
- comply with organisational and legislative requirements for:
  - identifying hazards and working safely, using personal protective equipment (PPE)
  - recording, storing and filing data
  - reporting and completing documentation
  - setting up and using surveying equipment
- comply with manufacturer specifications when calibrating and using equipment
- create designs for basic engineering structures which include:
  - construction layout
  - cul de sac design
  - kerb returns
  - long section plots
  - natural surface cross-section

- natural surface terrain model
- plot design
- vertical alignment design
- create drawings that comply with design requirements, including:
  - data extracted from existing engineering drawings
  - drawing entities that are linked to database attributes
  - producing drawings, views and plots at required scale
- create, extract and output information from engineering plans
- organise resources and equipment appropriate to perform required work tasks
- perform advanced data reduction techniques to reduce and manipulate surveying data
- perform calculations appropriate to the type of engineering structure within industry-accepted tolerances for accuracy
- plan work tasks by checking plans, drawings, maps and specifications
- prepare the drawing environment by setting up the hardware and software system, drawing defaults and customising menus
- measure components and design specifications within industry-accepted tolerances for accuracy and using two of the following pieces of equipment:
  - hand-held laser measuring device
  - global navigation satellite system (GNSS)
  - level
  - total station
- save drawing files in a range of formats relating to the design software, including one of the following:
  - data exchange format (DXF)
  - format used in triangulation process to define position of points and triangles (PTS)
  - Excel spreadsheet format (XLS)
- use a broad range of software features and functions to produce engineering drawings.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- calculations relating to the design of basic roads, including:
  - cross-sections
  - cut and fill volumes
  - grades and levels of grades
  - grade intersections
  - vertical curves, including levels and length
- drawing software display principles, including:
  - colour
  - composition
  - font type

- legends
- media
- scale
- size
- text and line style
- industry drawing standards, data formats, and precision and accuracy requirements for preparing engineering drawings using software
- key design considerations for the basic engineering structures specified in the performance evidence
- methods for calculating volume relating to:
  - contours and spot heights
  - cross-sections: mean area and end area using trapezoidal, prismoidal and Simpson's rules
- methods for calculating surveying data and verifying its accuracy
- methods for setting up, levelling and calibrating equipment
- reference and coordinate systems for surveying data, including Australian Height Datum and Map Grid of Australia
- standard construction and engineering plan design and presentation conventions.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence, including PPE
- specifications:
  - job specifications, drawings, maps and related engineering plans
  - organisational policies, procedures and documentation relating to work health and safety
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS6021 Conduct open pit mine surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6021A Conduct open mine pit surveying.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to conduct open pit mine surveying operations to meet client specifications. The unit covers project management activities relating to scheduling, measuring, recording, monitoring and reporting work progress, organising resources and equipment, and planning for risks and contingencies. The unit also covers presenting schematic models of areas that may have mineral deposits to identify projects, and organising resources and planning to support an open pit mine surveying operation. The unit requires the ability to implement open pit mine surveying operations using specialist equipment to measure identified components of an open pit mine; capture and reduce data; create mine drawings; and comply with standards, legislation and regulations applicable to the mining industry. It requires knowledge of surface mining operations.

The unit supports those who work in a technical management role in an open pit mine environment.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States where mining surveying must be undertaken under the supervision of a registered surveyor. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

<p>Elements describe the essential outcomes.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</p>
<p>1. Prepare for open pit mine survey.</p>	<p>1.1. Open pit mine surveying objectives and specifications are identified in consultation with <b><i>appropriate persons</i></b>.</p> <p>1.2. Processes and procedures involved in exploring mineral deposits are planned according to organisational requirements.</p> <p>1.3. <b><i>Required mining methods</i></b> are detailed according to project specifications and organisational requirements.</p>
<p>2. Plan open pit mine survey.</p>	<p>2.1. Surveying objectives, deliverables, constraints, work activities and surveying resource and equipment needs are identified and documented according to spatial data specifications and organisational requirements.</p> <p>2.2. Project management mechanisms are implemented to schedule, measure, record and report progress of activities in relation to agreed schedule and plans.</p> <p>2.3. Agreed communication processes between client and other appropriate persons are implemented and maintained.</p> <p>2.4. Risk management and contingency strategies are followed to ensure project complies with legal and statutory standards and organisational requirements.</p>
<p>3. Carry out open pit mine surveying tasks.</p>	<p>3.1. Identified spatial components of open pit mine are accurately measured or set out according to project specifications.</p> <p>3.2. Measured spatial data is reduced to project reference system for comparison with design.</p> <p>3.3. Mine drawings are created to meet project specifications.</p> <p>3.4. Captured data is used to calculate mine volumes</p>

- according to project specifications.
- 3.5. Measurements are validated and recorded according to organisational requirements.
  - 3.6. Problems are identified and resolved, and contingencies managed according to organisational requirements.
4. Finalise and report open pit mine survey outcomes.
    - 4.1. Project is finalised and checked for compliance with project specifications and organisational requirements.
    - 4.2. Appropriate persons are notified of project results according to organisational requirements.
    - 4.3. Documentation is completed and spatial data archived according to project and organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• plan and prioritise work to meet contract and resource constraints.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• conduct precise measurements and calculations relating to height, depth, dimension, direction, position and volumes in actual operational activity and virtual representation.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• negotiate to clarify client requirements</li> <li>• inform clients and other stakeholders of project progress.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret graphical and technical information in mining and engineering plans.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• record accurate technical information in organisational documentation.</li> </ul>

- Technology skills to:
- connect equipment to coordinate systems
  - set up and calibrate specialised surveying equipment.
- Problem-solving skills to:
- identify and resolve areas of potential non-compliance with legislation, regulations and standards.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least two of the following:
- client
  - colleague
  - engineer
  - manager
  - site personnel
  - registered or qualified surveyor
  - supplier.

- Required mining methods*** must include at least two of the following:
- developing roads and ramps
  - drilling
  - removing interburden
  - pre-stripping
  - stockpiles, dumps and safety berms
  - tailings dams.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS6021 Conduct open pit mine surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6021A Conduct open mine pit surveying.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also conduct open pit mine surveys for two different projects.

While conducting the above open pit mine surveys, the person must:

- interpret relevant plans and documents to plan surveying project processes and activities
- communicate clearly with clients and stakeholders to clarify and report project information
- comply with organisational policies and procedures, standards, regulations and legislation relating to surface mining when planning for:
  - blasting
  - drainage and dewatering
  - dumps and stockpiles
  - equipment use
  - records and reporting
  - standards and quality
  - surveying tasks
  - work health and safety
- create mine drawings and capture and reduce data to calculate mine volumes
- perform calculations to measure, reduce and validate spatial data captured from open pit mine surveying
- measure survey components using two of the following pieces of surveying equipment:
  - global navigation satellite system (GNSS)
  - level
  - remote sensing
  - tape

- total station
- plan and implement project management mechanisms to ensure open pit mine surveying operations are completed within required timeframes and comply with project specifications
- prepare and document project plans that detail:
  - required surveying equipment
  - surveying objectives and deliverables
  - strategies for risk and contingency management
  - work processes and timeframes
- work safely, using personal protective equipment (PPE) when performing surveying tasks.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements for surveying data
- basic characteristics of common ore deposits
- data capture and set-out techniques
- data reduction and manipulation techniques
- explosives, blasting and blasting practices applicable to mining operations
- mineral exploration methods, including geophysical, geochemical and geological techniques
- mining methods, including:
  - developing roads and ramps
  - drilling
  - removing interburden
  - pre-stripping
  - stockpiles, dumps and safety berms
  - tailings dams
- organisational policies and procedures relating to:
  - client and stakeholder communication
  - records and reporting
  - using the surveying equipment specified in the performance evidence
  - work health and safety
- project management techniques for scheduling, measuring and monitoring work progress
- specialised surveying equipment requirements and accessibility in relation to open pit mining
- techniques for wall monitoring to derive a suitable pit wall slope, including:
  - batter stakes
  - measuring and recording ground cracks
  - required prism locations
  - toe and batter checks

- terminology and nomenclature applicable to surface mining.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence, including PPE
- specifications:
  - organisational policies, procedures and documentation relating to work health and safety
  - relevant mines safety legislation and regulations for the jurisdiction
  - surveying specifications, including relevant plans and drawings
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPSIS6022 Produce mine drawings

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6022A Create mine drawings.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to use high-level design software program functions and features to produce mine drawings. The unit covers preparing the drawing environment by analysing project specifications; and setting up hardware, software, menus and drawing defaults accordingly. It also covers designing and creating mine drawings; producing drawing files that are saved in various formats; measuring and calculating mine volumes; and checking and validating the results to identify and resolve errors. The unit requires the ability to link drawing entities to database attributes and create and plot detailed views using various scales.

The unit supports those who work in a technical management role in a mining environment and take responsibility for liaising with clients and end users to meet project requirements.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States where mining surveying must be undertaken under the supervision of a registered surveyor. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

- essential outcomes. text is used, further information is detailed in the range of conditions.
1. Prepare drawing environment.
    - 1.1. Project specifications are sourced and analysed; and objectives, deliverables, constraints and principal work activities are identified and documented in consultation with *appropriate persons*.
    - 1.2. Hardware and software are set up and used according to organisational requirements.
    - 1.3. Menus and drawing defaults are customised to suit project specifications according to organisational requirements.
    - 1.4. Survey database is created according to organisational requirements.
  2. Create mine drawings.
    - 2.1. Drawings for surface mine are created using available software *drawing functions and features* to meet project specifications.
    - 2.2. Drawings are designed to incorporate mines safety requirements according to project specifications and organisational requirements.
    - 2.3. Drawing entities are linked to database attributes to suit project specifications.
    - 2.4. Supplementary data is extracted from existing mining and engineering plans and drawings to meet project specifications.
    - 2.5. Detailed views are created using various scales to meet project specifications.
    - 2.6. Plots are produced at required scale to meet project specifications.
  3. Produce output.
    - 3.1. Files are saved in various formats according to organisational requirements.
    - 3.2. Entities are produced from drawing files or database and listed in required format to meet project specifications.
    - 3.3. Identified spatial components are accurately measured or

set out, and data is reduced to project reference system.

- 3.4. Mine volumes are calculated and validated using captured data and measurements, and errors are resolved or contingencies managed according to specifications and organisational requirements.
4. Finalise drawings.
    - 4.1. Drawings are finalised and checked for compliance with project specifications and organisational requirements.
    - 4.2. Appropriate persons are notified of results according to organisational requirements.
    - 4.3. Documentation is completed and spatial data archived according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Initiative and enterprise skills to:	<ul style="list-style-type: none"> <li>• translate specifications into drawing design.</li> </ul>
Learning skills to:	<ul style="list-style-type: none"> <li>• extract and output information from engineering plans.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• apply understanding of height, depth, dimension and position to actual operational activity and virtual representation</li> <li>• use statistics to reduce errors in measurements.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• liaise with clients and end users to identify drawing detail.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret technical drawing standards.</li> </ul>

Technology skills to:

- export drawings into different formats
- operate hardware, including computers and plotters.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least one of the following:

- client
- colleague
- end user
- registered or qualified surveyor
- site personnel.

***Drawing functions and features*** must include at least eight of the following:

- arcs
- area and volumes functions
- creating output files using designs or survey pick-up data
- dimensions
- drawing features, such as polylines and texts
- drawing functions
- edit functions
- grade reports
- isometrics and perspectives
- macros
- methods for drawing lines
- ore and waste reports
- two-dimensional (2-D) coordinate plotting.

## Unit Mapping Information

CPPSIS6022A Create mine drawings

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS6022 Produce mine drawings

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6022A Create mine drawings.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also use a range of design software program functions and features to produce mine drawings that meet technical specifications for two different projects.

While producing the above mine drawings, the person must:

- define and document project objectives, constraints and main work activities
- prepare the drawing environment by setting up hardware and software system and drawing defaults, and customising menus
- communicate clearly with clients and stakeholders to clarify drawing requirements and detail
- apply mathematical concepts and skills to a range of surveying-related problems
- comply with standard operating procedures, drawing standards and organisational requirements relating to:
  - completing records and reporting
  - drafting mine drawings
  - protocols for saving and formatting drawing files
- create mine drawings that comply with design requirements, including:
  - data extracted from existing mining and engineering drawings
  - drawing entities linked to database attributes
  - incorporating mines safety requirements
  - producing drawings, views and plots at required scale
- exercise precision and accuracy in relation to measurements, tolerances and design
- save drawing files in formats relevant to software
- select and use appropriate equipment and software, as specified in the assessment conditions, to produce mine drawings.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- display principles in relation to mine drawings, including:
  - colour
  - composition
  - font type
  - legends
  - media
  - scale
  - size
  - text and line style
- drawing principles, capabilities and uses in relation to mine drawings
- industry-accepted drawing standards, data formats, and precision and accuracy requirements for preparing mine drawings using software
- methods for validating drawings and measurements to identify errors
- organisational, legal and statutory requirements relating to:
  - records and documentation
  - reporting
- standard engineering and mining plan design and presentation conventions
- techniques for incorporating surface mining methods and mines safety requirements into mine drawings.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- Equipment:
  - personal computer, including drawing applications and software appropriate for producing mine drawings
  - hardware, including printer, scanner, plotter and multimedia devices and peripherals
- Specifications:
  - project and design specifications
  - organisational policies, procedures and documentation relating to legal requirements for mines safety
- Physical conditions:
  - access to equipped work station
- Relationships with team members and supervisor:
  - working in a team
- Relationships with client:
  - client consultation required.
- Timeframe:

- as specified by the client and project requirements.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -

# **CPPSIS6025 Apply quality control measures to spatial products and services**

## **Modification History**

Release 1.

Replaces superseded equivalent CPPSIS6025A Apply quality control measures to spatial information services industry.

This version first released with CPP Property Services Training Package Version 3.

## **Application**

This unit of competency specifies the outcomes required to design and implement quality control measures to assess the quality of spatial products and services. The unit covers analysing specifications and information to plan and design quality control standards and assessment criteria, and implementing quality control processes to assess sample products and services. Assessing quality includes analysing data; and identifying, isolating and rectifying faults. The unit also covers conducting independent inspection, tests and audits, and facilitating work groups to identify and resolve quality variances. It includes implementing procedures to monitor and maintain quality processes, and preparing quality assessment reports. The unit requires the ability to design computations and conduct error analysis using a computer and software.

The unit supports those who manage quality processes and staff in a surveying or spatial information services team, in areas such as surveying, cartography, town planning, mapping and geographic information systems (GIS).

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## **Pre-requisite Unit**

Nil

## **Unit Sector**

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Prepare to assess the quality of spatial product or service.	<ul style="list-style-type: none"><li>1.1. Spatial product or service to be assessed and project specifications are identified and analysed against organisational guidelines.</li><li>1.2. Quality control processes are identified and used to assess sample products or services in consultation with <b><i>appropriate persons</i></b>.</li><li>1.3. Information on identified risks, contingencies, resources, technologies and techniques is analysed and incorporated into quality control process.</li><li>1.4. Pertinent legal and statutory standards and legislative requirements are incorporated into quality control process.</li></ul>
2. Assess quality of spatial product or service.	<ul style="list-style-type: none"><li>2.1. Product or service is examined and assessed against assessment criteria and quality control measures.</li><li>2.2. Existing information and spatial data are checked to identify appropriate quality control measures.</li><li>2.3. Data is analysed and relevant information is used to identify variations and verify its reliability according to quality control measures.</li><li>2.4. Work groups are facilitated to assist in identifying and resolving quality variances according to organisational requirements.</li><li>2.5. Computations are designed to conduct error analysis, and faults are isolated and rectified or contingencies managed according to quality control measures.</li><li>2.6. Independent inspection, tests and audits are conducted according to organisational requirements.</li></ul>
3. Monitor quality	<ul style="list-style-type: none"><li>3.1. Quality improvement is monitored and maintained</li></ul>

- control process. according to organisational requirements.
- 3.2. Quality awareness is promoted among immediate work team according to organisational requirements.
  - 3.3. Quality assessment records and reports are completed and spatial data archived according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Planning and organising skills to:	<ul style="list-style-type: none"><li>• prioritise work to meet agreed timeframes.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• analyse statistics to identify errors</li><li>• apply cost considerations when planning quality control process.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions to gather information about products and services</li><li>• reiterate quality awareness with members of work team.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• compare technical information in assessment criteria and spatial products.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• prepare technical reports.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• connect equipment to coordinate systems</li><li>• set up and calibrate specialised surveying equipment.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>• select appropriate validation methods to verify reliability of data.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least two of the following:
- client
  - colleague
  - end user
  - engineer
  - manager
  - registered or qualified surveyor
  - site personnel
  - supplier.

## Unit Mapping Information

CPPSIS6025A Apply quality control measures to spatial information services industry

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS6025 Apply quality control measures to spatial products and services

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6025A Apply quality control measures to spatial information services industry.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also apply quality control measures to:

- one spatial product
- one spatial service.

While applying quality control measures to the above spatial product and service, the person must:

- analyse specifications and spatial data requirements to develop quality control processes
- schedule work tasks and organise resources and equipment
- determine and apply quality assessment criteria to products and services
- identify and resolve quality variances
- comply with industry-accepted standards for validating accuracy of surveying data and identifying errors and discrepancies
- comply with organisational, legal and statutory requirements for:
  - completing records and documentation
  - health and safety when using surveying equipment
  - recording, storing and filing data
  - using, checking and storing equipment
- conduct independent inspection, tests and audits of spatial products and services
- design and plan quality control measures to account for:
  - identified risks and contingencies
  - legal and statutory standards and legislative requirements
  - resources
  - technologies and techniques to be used

- design computations to be used to assess quality of spatial data
- implement project management mechanisms to ensure that quality control processes are completed within required timeframes and comply with specifications
- interpret specifications to identify products and services to be examined and assessed
- monitor and maintain quality improvements
- perform error analysis using one of the following methods or pieces of equipment:
  - computer-aided design
  - digital gauge
  - dimensional gauge
  - measurements
  - tapes
  - templates
  - visual inspection
- promote quality awareness among the work team
- communicate clearly with others to clarify and report quality control information and negotiate task completion
- supervise staff to complete work tasks on time.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements and tolerances for surveying products and services
- data formatting, processing and reduction techniques
- industry-accepted methods for validating data to identify errors and discrepancies
- legislative, statutory and industry requirements and standards relating to work tasks
- methods of assessing existing spatial datasets and dataset sources
- methods for calculating surveying data and verifying its accuracy using spatial reference systems
- methods for error analysis using sample products and services
- methods for reporting non-conformities in spatial product or service
- organisational policies and procedures relating to:
  - health and safety when using screen-based equipment
  - reporting and documentation
  - supervising the work team
  - using and allocating resources
  - using computers and software
- quality control measures and assessment criteria that can be applied to spatial products and services
- project management techniques for scheduling, measuring and monitoring work progress and planning for contingencies
- purpose and application of independent inspection, testing and auditing of the quality of spatial products and services

- reference and coordinate systems for surveying data, including Australian Height Datum and Map Grid of Australia
- purpose and use of metadata in relation to quality assessment of spatial products and services.

## Assessment Conditions

### Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence
- specifications:
  - quality assessment specifications, including relevant data, plans and drawings
  - organisational policies, procedures and documentation relating to quality measures for spatial products and services
- relationships with team members and supervisor:
  - lead role in a team.

Timeframe:

- as specified by project requirements.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPSIS6031 Design basic mines

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6031A Carry out basic mine design.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to design basic mines to meet client specifications. The unit covers designing a mine development that incorporates identified mine design parameters, as well as accounting for levels of rock stability and ground support and methods for obtaining ore and mineral samples. The unit includes assessing the environment to recognise the geological aspects of possible ore deposits. The unit also covers planning the design project, including objectives, deliverables and constraints to comply with standards and legal and statutory requirements relating to the organisation and the mining industry. The unit requires the ability to implement project management activities relating to scheduling, measuring, recording, monitoring and reporting work progress. It also requires the ability to use computers and a range of software to produce mine designs. It requires knowledge of underground mining operations.

The unit supports those who work in a technical management role in a mining environment.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States where mining surveying must be undertaken under the supervision of a registered surveyor. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Plan design project.
  - 1.1. Client requirements and project specifications are determined and documented in consultation with *appropriate persons*.
  - 1.2. Project management mechanisms are implemented to schedule, record and report progress of activities in relation to agreed timeframes and plans.
  - 1.3. Agreed communication processes between client and other appropriate persons are implemented and maintained.
  - 1.4. Geological aspects of possible ore deposits are identified by assessing the environment, and information is verified.
  - 1.5. Pertinent legal and statutory requirements and standards are identified and analysed to ensure compliance.
2. Design mine development.
  - 2.1. Data required for mine design is identified and analysed according to project specifications.
  - 2.2. Mine design parameters are identified and analysed according to project specifications.
  - 2.3. Levels of rock stability and ground support requirements are incorporated into mine design according to project specifications.
  - 2.4. Methods for obtaining ore and mineral samples are incorporated into mine design ensuring compliance with relevant legislation and mining regulations.
  - 2.5. Mine design is developed using suitable software according to project specifications.
  - 2.6. Problems are identified and resolved, and contingencies and constraints are managed according to organisational requirements.

3. Finalise project.
  - 3.1. Project is finalised and checked for compliance with specifications and organisational requirements.
  - 3.2. Appropriate persons are notified of project results according to organisational requirements.
  - 3.3. Documentation is completed and spatial data archived according to project and organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• plan and prioritise work to meet contracts and resource constraints.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• conduct precise measurements and calculations relating to height, depth, dimension, direction and position in actual operational activity and virtual representation.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• negotiate to achieve client requirements.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• analyse graphical and technical information in mining and engineering plans.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• record technical information in organisational documentation.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• use a range of geological information systems software to design mine.</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• identify and resolve areas of potential non-compliance with</li> </ul>

skills to:                      legislation, regulations and standards.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least two of the following:

- client
- colleague
- engineer
- manager
- registered or qualified surveyor
- supplier.

## Unit Mapping Information

# Assessment Requirements for CPPSIS6031 Design basic mines

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6031A Carry out basic mine design.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also produce two different basic mine designs using a computer and relevant software.

While designing the above basic mines, the person must:

- plan and implement project management mechanisms to ensure the project is completed within required timeframes and complies with specifications and standards
- assess the environment to recognise geological aspects of possible ore deposits
- communicate clearly with clients and others to clarify and report project information
- comply with organisational policies and procedures, legislation, regulations and Australian standards for mine safety when planning mine design
- create basic mine drawings that detail:
  - levels of rock stability and ground support
  - mine design parameters
  - methods for obtaining ore and mineral samples
- perform calculations to measure, reduce and validate spatial data captured from mine surveying.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements for mine design
- basic characteristics of common ore deposits
- classification of economic mineral deposits and the process involved in presenting a schematic model
- data capture and set-out techniques
- data reduction and manipulation techniques

- legislation, regulations and Australian standards relating to mine safety
- methods for assessing the environment to recognise ore deposits
- methods for obtaining ore and mineral samples
- mineral exploration methods, including geophysical, geochemical and geological techniques
- organisational policies and procedures relating to:
  - client and stakeholder communication
  - using a computer and relevant software
  - mine design, including:
    - mine access
    - layout
    - service provision, such as water, air, power, lighting and dewatering
  - records and reporting
  - risk and contingency management
- project management techniques for scheduling, measuring and monitoring work progress and planning for risks and contingencies
- techniques for providing rock stability and ground support
- key features of underground mining operations.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence
- specifications:
  - mining and surveying specifications, including relevant plans and drawings
  - organisational policies, procedures and documentation relating to mine design
  - relevant legislation, regulations and Australian standards for mine safety
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - lead role in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS6032 Conduct advanced GNSS control surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6032A Conduct an advanced GNSS control survey.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to conduct advanced global navigation satellite system (GNSS) control surveys using GNSS equipment and suitable software to communicate with GNSS receivers. The unit covers project managing surveying activities, including planning collection methodologies and allocating resources and work tasks in a team environment. The unit also covers analysing existing survey control data and networks to identify non-conformities and the need for additional controls, and implementing a network of points for controlling horizontal and vertical positions. The unit requires the ability to program, calibrate and operate GNSS equipment, relate surveying data to a reference system, and identify and resolve discrepancies with the reference system.

The unit supports those who work in a technical management role in a surveying team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Prepare for advanced GNSS control survey.
  - 1.1. Survey specifications are identified and analysed and key activities and timelines scheduled according to available resources and organisational requirements.
  - 1.2. Organisational GNSS survey requirements are complied with and recorded.
  - 1.3. GNSS equipment is set up and calibrated according to survey and organisational requirements.
  - 1.4. Existing survey control data is obtained, validated and recorded, and need for additional controls is determined based on identified non-conformities.
  - 1.5. Set-out data is collated, validated, manipulated and uploaded into the GNSS receiver.
  - 1.6. Work responsibilities are allocated and communicated to *appropriate persons* according to survey and organisational requirements.
  
2. Carry out GNSS control surveying tasks.
  - 2.1. GNSS equipment is programmed and operated according to survey and organisational requirements.
  - 2.2. GNSS survey is related to a reference system according to survey specifications.
  - 2.3. Problems relating to discrepancies in the reference system are identified and resolved, or contingencies are managed.
  - 2.4. GNSS data is collected using planned methodologies according to survey and organisational requirements.
  - 2.5. Network of points for controlling horizontal and vertical positions is implemented according to project specifications.
  - 2.6. GNSS measurements are validated and recorded on the reference system according to specifications.
  
3. Finalise advanced GNSS control
  - 3.1. GNSS software is used to process data according to survey and organisational requirements.

survey.

- 3.2. Validation checks are completed according to project specifications and organisational requirements.
- 3.3. Discrepancies between survey specifications and actual data are identified and addressed according to survey and organisational requirements.
- 3.4. Survey is finalised and documentation completed according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

- |                                    |  |
|------------------------------------|--|
| Learning skills to:                | <ul style="list-style-type: none"><li>• research existing horizontal and vertical control networks.</li></ul>  |
| Planning and organising skills to: | <ul style="list-style-type: none"><li>• plan and prioritise work to meet contractual timeframes and resource constraints.</li></ul>  |
| Numeracy skills to:                | <ul style="list-style-type: none"><li>• apply accuracy tolerances to measurements and calculations</li><li>• conduct precise measurements and computations relating to length, angle, elevation, area and volume.</li></ul>                    |
| Oral communication skills to:      | <ul style="list-style-type: none"><li>• ask questions to clarify client requirements.</li></ul>  |
| Reading skills to:                 | <ul style="list-style-type: none"><li>• analyse graphical and technical information in aerial photographs, maps, drawings, field records and survey plots</li><li>• interpret technical terminology in specifications and contracts.</li></ul> |
| Writing skills to:                 | <ul style="list-style-type: none"><li>• use templates to record field notes.</li></ul>   |
| Technology skills to:              | <ul style="list-style-type: none"><li>• connect equipment to coordinate systems.</li></ul>   |

- Problem-solving skills to:
- identify situations impacting on effectiveness of GNSS technologies.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least two of the following:
- client
  - colleague
  - engineer
  - manager
  - registered or qualified surveyor.

## Unit Mapping Information

CPPSIS6032A Conduct an advanced GNSS control survey

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS6032 Conduct advanced GNSS control surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6032A Conduct an advanced GNSS control survey.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also plan and conduct an advanced global navigation satellite system (GNSS) control survey for two different projects using the following pieces of equipment:

- geodetic GNSS receiver
- associated equipment capable of differential and real time modes of operations.

While conducting the above advanced GNSS control surveys, the person must:

- analyse survey specifications, including:
  - cross-sections and plans
  - technical descriptions of surveying data and their requirements
- plan and document survey methodologies and control data
- apply projection and datum parameters when using GNSS equipment and software
- collect data for GNSS positions, including differential methods
- communicate clearly with others to report work information and allocate duties
- comply with industry-accepted standards for validating accuracy of GNSS data and existing control network
- comply with organisational requirements for:
  - recording, storing and filing data
  - resource allocation
  - using and storing equipment
  - working safely, using personal protective equipment (PPE) when conducting field work
- conduct field reconnaissance to analyse existing control networks
- implement a network of horizontal and vertical control points
- identify non-conformances in control networks and the need for additional controls

- implement project management techniques to schedule, monitor and report on survey tasks and outcomes
- program and operate GNSS equipment and software to analyse and manipulate images and data.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements for GNSS control networks
- GNSS accuracy enhancement techniques
- GNSS availability, structures, capabilities and limitations
- GNSS control surveying techniques
- industry-accepted methods for validating set-out data to identify errors and discrepancies
- methods for accessing, manipulating, retrieving and archiving GNSS data
- organisational policies and procedures relating to:
  - health and safety relating to survey activities
  - reporting and documentation
  - using and allocating resources
  - using GNSS equipment and software
- projection and datum parameters required for GNSS equipment and processing software
- reference and coordinate systems for surveying data, including Australian Height Datum and Map Grid of Australia
- situations and factors that impact on the effectiveness of GNSS technologies
- techniques for project management, including techniques for scheduling, monitoring and reporting on survey tasks and outcomes
- types of GNSS equipment and software and their uses.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence, including PPE
- specifications:
  - survey specifications, plans, maps and photographs
  - organisational policies, procedures and documentation relating to work health and safety when using GNSS equipment and conducting field work
- relationships with team members and supervisor:
  - lead role in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS6033 Conduct underground mine surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6033A Conduct underground mine surveying.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to conduct underground mine surveying operations to meet client specifications. The unit covers project management activities relating to scheduling, measuring, recording, monitoring and reporting work progress; organising resources and equipment; and planning for risks and contingencies. The unit also covers identifying projects, and organising resources and planning to support an underground mine surveying operation, including for developing headings, rock stability and ground support, loading and haulage and mine ventilation. The unit requires the ability to implement underground surveying operations using specialist equipment to measure identified components of an underground mine, capture and reduce data, and create mine drawings. The unit requires knowledge of underground mining operations and requirements to comply with standards, legislation and regulations applicable to the mining industry.

The unit supports those who work in a technical management role in an underground mining environment.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States where mining surveying must be undertaken under the supervision of a registered surveyor. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Prepare for underground mine surveying.	<p>1.1. Client requirements and project specifications are identified in consultation with <i>appropriate persons</i>.</p> <p>1.2. <i>Processes and procedures</i> involved in undertaking underground mining methods are planned according to organisational requirements.</p> <p>1.3. Mining techniques applicable to developing headings in underground mining operations are planned according to project objectives and organisational requirements.</p> <p>1.4. <i>Underground mining methods</i> for metalliferous and coal mines are determined according to project specifications and organisational requirements.</p> <p>1.5. Project specifications are developed that incorporate levels of rock stability, ground support, and loading and haulage requirements for underground mines.</p> <p>1.6. Mine ventilation requirements for underground mines are detailed in project specifications according to organisational requirements.</p>
2. Plan underground mine surveying operations.	<p>2.1. Surveying objectives, deliverables, constraints, work activities and surveying equipment needs are identified and documented according to spatial data specifications and organisational requirements.</p> <p>2.2. Project management mechanisms are implemented to schedule, measure, record and report progress of activities in relation to agreed schedule and plans.</p> <p>2.3. Agreed communication processes between client and other appropriate persons are implemented and maintained.</p> <p>2.4. Risk management and contingency strategies are devised and followed to ensure project complies with legal and statutory standards and organisational requirements.</p>

- |    |   |   |
|----|---|---|
| 3. | Conduct operational elements of underground mine surveying. | 3.1. Identified spatial components of mine design are accurately measured or set out according to project specifications. |
|    |   | 3.2. Measured spatial data is reduced to project reference system for comparison with design.                             |
|    |   | 3.3. Mine drawings are created to meet project specifications.  |
|    |   | 3.4. Captured data is reduced and used to calculate mine volumes according to project specifications.                     |
|    |   | 3.5. Measurements are validated and recorded according to organisational requirements.                                    |
|    |   | 3.6. Problems are identified and resolved, and contingencies managed according to organisational requirements.            |
|    |   | 3.7. Underground development is set out according to design parameters.   |
| 4. | Finalise and report project outcomes.                       | 4.1. Project is finalised and checked for compliance with project specifications and organisational requirements.         |
|    |   | 4.2. Appropriate persons are notified of project results according to organisational requirements.                        |
|    |   | 4.3. Documentation is completed and spatial data archived according to project and organisational requirements.           |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

Planning and organising skills to:

- plan and prioritise work to meet contracts and resource constraints.

- Numeracy skills to:
- conduct precise measurements and calculations relating to height, depth, dimension, direction and position in actual operational activity and virtual representation.
- Oral communication skills to:
- inform clients and other stakeholders of project progress
  - negotiate to meet client requirements.
- Reading skills to:
- analyse graphical and technical information in mining and engineering plans.
- Writing skills to:
- record technical information in organisational documentation.
- Technology skills to:
- connect equipment to coordinate systems
  - set up and calibrate specialised surveying equipment.
- Problem-solving skills to:
- identify and resolve areas of potential non-compliance of operations with legislation, regulations and standards.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least two of the following:
- client
  - colleague
  - engineer
  - manager
  - registered or qualified surveyor
  - supplier.

- Processes and procedures*** must include:
- mine access
  - mine layout
  - service provision.

- Underground mining methods*** must include at least one of the following:
- mining methods applicable to underground coal mining, including:
    - long wall
    - room
    - pillar
  - mining methods applicable to underground metalliferous mining, including:
    - block caving
    - cut and fill stoping and shrinkage stoping
    - sub-level caving
    - sub-level open stoping.

# Assessment Requirements for CPPSIS6033 Conduct underground mine surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6033A Conduct underground mine surveying.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also conduct underground mine surveys for two different projects.

While conducting the above underground mine surveys, the person must:

- analyse organisational priorities and plans and drawings to identify project specifications
- prepare and document project plans and specifications that detail:
  - levels of rock stability and ground support
  - loading and haulage requirements for underground mines
  - mine ventilation requirements
  - required equipment
  - strategies for risk and contingency management
  - underground mining methods for metalliferous and coal mines
- set out underground development based on design parameters in drawings
- communicate clearly with clients and stakeholders to clarify and report project information
- comply with organisational policies and procedures, standards, regulations and legislation relating to underground mining surveying operations when planning for:
  - drainage and dewatering
  - dumps and stockpiles
  - equipment use
  - loading and haulage
  - mine ventilation and air control
  - power and lighting
  - records and reporting
  - rock stability and ground support

- standards and quality
- surveying tasks
- water control and supply
- work health and safety and mines safety requirements
- conduct underground surveying tasks to create mine drawings, and capture and reduce data to calculate mine volumes
- perform calculations to measure, reduce and validate spatial data captured from underground mine surveying
- measure survey components using two of the following pieces of equipment:
  - cavity monitoring systems
  - gyro-theodolites
  - level
  - remote sensing
  - tape
  - total station
- plan and implement project management mechanisms to ensure the underground mine surveying operation is completed within required timeframes and the project complies with specifications and standards
- work safely, using personal protective equipment (PPE) when performing surveying tasks.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements for surveying data
- data capture and set-out techniques
- data reduction and manipulation techniques
- drilling techniques:
  - applicable to blasting in mining operations
  - used for sampling rock and unconsolidated sands
- methods for developing headings in underground mining operations
- methods for ensuring adequate mine ventilation, including:
  - duties of ventilation officer for an underground mining operation
  - exposure standards for atmospheric contaminants
  - methods for measuring air velocity and determining air quantity given relevant operational data
  - properties of natural air flow
  - methods of mechanical and auxiliary ventilation
  - procedures for testing and sampling atmospheric contaminants
  - requirements for ventilation plans
  - sources of atmospheric contaminants in an underground mining environment

- mineral exploration methods, including geophysical, geochemical and geological techniques
- mining methods for metalliferous and coal mines
- organisational policies and procedures, standards, regulations and legislation relating to:
  - client and stakeholder communication
  - using equipment, as specified in the performance evidence
  - mining industry and underground mining, including:
    - mine access
    - layout development
    - service provision, such as water, air, power, lighting and dewatering
    - work health and safety and mines safety requirements
  - records and reporting
  - risk and contingency management
- phases and stages of exploration procedure and possible methods of exploration relevant to each
- project management techniques for scheduling, measuring and monitoring work progress and planning for risks and contingencies
- safe work practices in all aspects of underground mining
- specialised surveying equipment requirements and accessibility in relation to underground mining
- techniques for providing rock stability and ground support, including cable bolts and rock bolts
- terminology and nomenclature applicable to underground mining.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence, including PPE
- specifications:
  - mining and surveying specifications, including relevant plans and drawings
  - organisational policies, procedures and documentation relating to:
    - work health and safety
    - mining regulations
- relationships with team members and supervisor:
  - lead role in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPSIS6034 Conduct mining geology operations

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6034A Conduct mining geology operations.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to conduct mining geology operations. The unit covers analysing organisational priorities and specifications to identify projects; and planning projects to identify and document factors, such as objectives, deliverables, risks, constraints and equipment requirements, in order to comply with regulations and legislation applicable to the mining industry. The unit also covers analysing mining geology to assess and recognise geological aspects of possible ore deposits, rock types and structures, and levels of rock stability and ground support; using surveying techniques to take measurements and reduce and manipulate spatial data to assist in analysing the geology of the mining operation. The unit requires the ability to implement project management activities relating to scheduling, measuring, recording, monitoring and reporting work progress. It also requires the ability to evaluate project activities and outcomes for compliance with specifications. It requires knowledge of underground mining and mining geology operations.

The unit supports surveyors of mine geology who work in a surveying team in a mining environment.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States where mining surveying must be undertaken under the supervision of a registered surveyor. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Identify and plan project.	<ul style="list-style-type: none"><li>1.1. Organisational priorities are determined to identify project objectives and specifications.</li><li>1.2. Project specifications are presented to <b><i>appropriate persons</i></b>.</li><li>1.3. Project objectives, deliverables, constraints, <b><i>environmental considerations</i></b> and work activities are planned and documented according to organisational requirements.</li><li>1.4. Mining regulations with regard to management and safety are detailed according to legislative and organisational requirements.</li><li>1.5. Equipment is selected and checked to ensure correct operation and functionality according to organisational requirements.</li></ul>
2. Analyse mining geology.	<ul style="list-style-type: none"><li>2.1. Geological aspects of possible ore deposits are identified by assessing the environment, and information is verified.</li><li>2.2. Rock types and structures fundamental to mining operations are identified and analysed according to project specifications.</li><li>2.3. Levels of rock stability and ground support requirements are observed according to project specifications.</li><li>2.4. Ore and minerals fundamental to mining operations are identified and analysed according to project specifications.</li><li>2.5. Methods for obtaining ore and mineral samples are identified and analysed according to project specifications.</li><li>2.6. Measurements are conducted and spatial data is reduced and manipulated according to project specifications.</li></ul>

- |    |                   |      |  |
|----|-------------------|------|--|
| 3. | Manage project.   | 3.1. | Project management mechanisms are implemented to schedule, record and report progress of activities in relation to agreed timeframes and plans.                    |
|    |                   | 3.2. | Agreed communication processes between client and other appropriate persons are implemented and maintained.  |
|    |                   | 3.3. | Pertinent legal and statutory requirements and standards are identified and analysed to ensure compliance.   |
|    |                   | 3.4. | Risk management and contingency strategies are devised and followed to ensure project complies with legal and statutory standards and organisational requirements. |
|    |                   | 3.5. | Problems are identified and resolved, and contingencies and constraints are managed according to organisational requirements.                                      |
| 4. | Finalise project. | 4.1. | Mining geology project is evaluated for compliance with project specifications and organisational requirements.  |
|    |                   | 4.2. | Appropriate persons are notified of project results according to organisational requirements.  |
|    |                   | 4.3. | Documentation is completed and spatial data archived according to project and organisational requirements.   |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

Planning and organising skills to:

- plan and prioritise work to meet schedules.

Numeracy skills to:

- conduct precise measurements and calculations relating to height, depth, dimension, direction and position in actual operational activity and virtual representation.

- Oral communication skills to:
- negotiate to achieve client requirements.
- Reading skills to:
- analyse graphical and technical information in specifications.
- Writing skills to:
- record technical information in organisational documentation.
- Technology skills to:
- calibrate and program specialised surveying instruments.
- Problem-solving skills to:
- identify and resolve areas of potential non-compliance of operations with pertinent legislation, regulations and standards.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least two of the following:
- client
  - colleague
  - engineer
  - manager
  - registered or qualified surveyor
  - supplier.

- Environmental considerations*** must include at least one of the following:
- chemical leakage
  - coal fire
  - erosion
  - loss of biodiversity
  - sinkhole formation
  - soil, groundwater and surface water contamination.

# Assessment Requirements for CPPSIS6034 Conduct mining geology operations

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6034A Conduct mining geology operations.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also conduct mining geology operations for two different projects.

While conducting the above mining geology operations, the person must:

- assess the environment to recognise geological aspects of possible ore deposits
- analyse mining geology to report on:
  - geological aspects of possible ore deposits
  - rock types and structures
  - levels of rock stability and ground support
  - ore and minerals fundamental to mining operations
  - methods for obtaining ore and mineral samples
- communicate clearly with clients and others to clarify and report project information
- comply with organisational policies and procedures, standards, mining regulations and legislation when planning and implementing project activities
- evaluate mining geology projects for compliance with specifications and identify non-conformances
- measure geological survey components using two of the following pieces of equipment:
  - current meter
  - echo sounder
  - global navigation satellite system (GNSS)
  - level
  - remote sensing
  - tape
  - total station

- perform calculations to measure, reduce and validate spatial data captured from surveying tasks
- plan and implement project management mechanisms to ensure the project is completed within required timeframes and complies with specifications and standards
- plan and implement risk and contingency management strategies
- use computers and relevant software applications to manipulate spatial data and develop reports
- work safely, using personal protective equipment (PPE) when performing surveying tasks.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements for mining geology surveying operations
- basic characteristics of common ore and mineral deposits
- classification of economic mineral deposits and the process involved in presenting a schematic model
- data capture and set-out techniques
- data reduction and manipulation techniques
- methods for assessing the environment to recognise ore deposits
- methods for obtaining ore and mineral samples
- mineral exploration methods, including geophysical, geochemical and geological techniques
- mining methods for metalliferous and coal mines
- organisational policies and procedures, standards, regulations and legislation relating to:
  - client and stakeholder communication
  - mining industry and mine design, including:
    - mine access
    - layout
    - service provision, such as water, air, power, lighting and dewatering
    - mines safety
    - records and reporting
    - risk and contingency management
    - using the equipment specified in the performance evidence
- phases and stages of exploration procedures and possible methods of exploration relevant to each
- physical and chemical characteristics of rock types and structures fundamental to mining operations
- project management techniques for scheduling, measuring and monitoring work progress and planning for risks and contingencies
- techniques for providing rock stability and ground support relating to underground mining.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence, including PPE
- specifications:
  - mining and surveying specifications, including relevant plans and drawings
  - organisational policies, procedures and documentation relating to work health and safety
  - relevant legislation and regulations relating to mines safety
- relationships with team members and supervisor:
  - lead role in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPSIS6035 Conduct complex engineering set-out surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6035A Conduct complex engineering set out surveys.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to conduct a complex engineering set-out survey based on specifications and client requirements. The unit covers analysing specifications and organisational priorities to identify and negotiate projects and organise resources. The unit also covers implementing project management mechanisms relating to scheduling, measuring, recording, monitoring and reporting, and reviewing project progress and outcomes against organisational goals. It covers planning for risks and contingencies and staff supervision, and involves setting up and using specialised surveying equipment to measure, record and reduce surveying data using an established control network and spatial coordinate and reference systems. The unit requires the ability to validate the accuracy of data, and identify and resolve problems.

The unit supports those who work in a technical management role in a surveying team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Prepare for complex engineering set-out survey.
  - 1.1. Organisational priorities are determined to identify project objectives and specifications.
  - 1.2. Project specifications are presented to *appropriate persons*.
  - 1.3. Characteristics of the operating environment and any special equipment or resource requirements are identified according to organisational requirements.
  - 1.4. Surveying equipment is selected and checked to ensure correct operation and functionality according to manufacturer specifications.
  
2. Plan complex engineering set-out survey.
  - 2.1. Design is interpreted to identify surveying data components required for set-out.
  - 2.2. Plan is developed detailing objectives, constraints, work activities, technologies and techniques to be used for set-out according to project specifications and client requirements.
  - 2.3. Project management mechanisms are implemented to schedule, measure, record and report progress of activities in relation to agreed schedule and plans.
  - 2.4. Agreed communication processes between client and other appropriate persons are implemented and maintained.
  - 2.5. Risk management and contingency strategies are devised and followed to ensure project complies with legal and statutory standards and organisational requirements.
  - 2.6. Work responsibilities are allocated and supervisory processes and problem-solving techniques implemented to ensure work is completed within time available.
  
3. Manage complex engineering set-out survey.
  - 3.1. Identified project components are accurately set out according to project specifications.
  - 3.2. Set-out measurements and calculations are conducted, validated and recorded using control network according to project specifications.

- 3.3. Project progress is reviewed and agreed changes are implemented to ensure consistency with project scope, objectives and constraints.
- 3.4. Problems are identified and resolved, and contingencies managed according to organisational requirements.
- 4. Finalise complex engineering set-out survey.
  - 4.1. Project is finalised and checked for compliance with project and organisational requirements.
  - 4.2. Appropriate persons are notified of project results according to organisational requirements.
  - 4.3. Documentation is completed and spatial data archived according to project and organisational requirements.
- 5. Review project.
  - 5.1. Project achievements are reviewed against organisational strategic goals.
  - 5.2. Recommendations are made on possible links between project achievements and future organisational goals.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• plan and prioritise work to meet contracts and resource constraints.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• conduct precise measurements and calculations relating to height, depth, dimension, direction and position in actual operational activity and virtual representation.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• negotiate to meet client requirements</li> <li>• inform clients and other stakeholders of project progress.</li> </ul>

- Reading skills to:
- analyse graphical and technical information in engineering plans.
- Writing skills to:
- record technical information in organisational documentation.
- Technology skills to:
- connect equipment to coordinate systems
  - set up and calibrate specialised surveying equipment.
- Problem-solving skills to:
- select appropriate validation methods to verify accuracy of data.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least two of the following:
- client
  - colleague
  - end user
  - engineer
  - manager
  - registered or qualified surveyor
  - supplier.

## Unit Mapping Information

CPPSIS6035A Conduct complex engineering set out surveys

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPSIS6035 Conduct complex engineering set-out surveys

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6035A Conduct complex engineering set out surveys.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also conduct a complex engineering set-out survey for two different projects.

While conducting the above complex engineering set-out surveys, the person must:

- analyse survey set-out specifications, including:
  - cross-sections and plans
  - technical descriptions of surveying data and set-out requirements
- develop a project plan, including detail of:
  - project objectives and deliverables
  - constraints
  - risk management and contingency strategies
  - work activities
  - technologies and techniques to be used
- interpret engineering design information and specifications to identify components to be measured
- plan and document data collection methodologies that allow for contingencies
- schedule work tasks and organise resources and equipment
- apply industry-accepted standards for performing surveying measurements and computations
- communicate clearly with others to clarify and report work information and negotiate completion of tasks
- comply with industry-accepted standards for validating accuracy of surveying data and identifying errors and discrepancies
- comply with organisational, legal and statutory requirements for:
  - completing records and documentation
  - recording, storing and filing data

- using, checking and storing surveying equipment
- working safely and using personal protective equipment (PPE)
- conduct set-out measurements and calculations to meet engineering specifications using two of the following pieces of surveying equipment:
  - current meter
  - global navigation satellite system (GNSS)
  - level
  - tape
  - theodolite
  - total station
- implement project management mechanisms to ensure the survey is completed within required timeframes and complies with specifications
- review project outcomes against strategic organisational goals to identify links to future goals
- supervise staff to complete work tasks on time.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements for setting out surveying data
- data capture, set-out and reduction techniques
- industry-accepted methods for validating data to identify errors and discrepancies
- legislative, statutory and industry requirements and standards relating to work tasks associated with set-out surveys
- methods for calculating surveying data and verifying its accuracy using primary and secondary controls
- methods for establishing a control network that meets specified tolerances
- methods for setting up, levelling and calibrating surveying equipment
- organisational policies and procedures relating to:
  - health and safety relating to surveying activities
  - reporting and documentation
  - using and allocating resources
  - using the surveying equipment specified in the performance evidence
- project management techniques for scheduling, measuring and monitoring work progress and planning for contingencies
- reference and coordinate systems for surveying data, including Australian Height Datum and Map Grid of Australia.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:

- as specified in the performance evidence, including PPE
- materials:
  - paper for printing reports, documents and data
- specifications:
  - organisational policies, procedures and documentation relating to work health and safety
  - survey specifications, including relevant engineering plans and drawings
- relationships with team members and supervisor:
  - lead role in a team.

Timeframe:

- as specified by project requirements.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS6036 Monitor engineering structures

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6036A Monitor complex engineering surveying structures.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to monitor engineering structures using surveying methods. The unit covers analysing project specifications and design information to identify components to be measured and monitored, and planning monitoring activities. The unit also covers implementing project management mechanisms, including risk management, and reviewing work outcomes against specifications. It covers setting up and using surveying equipment to measure, record and reduce surveying data using spatial coordinate and reference systems. The unit requires the ability to validate the accuracy of data, and identify and resolve discrepancies and non-conformities between specifications and activities.

The unit supports those who work in a technical management role in a surveying team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Prepare to monitor engineering structure.
  - 1.1. Project specifications and engineering design information are interpreted to identify components to be measured, and accuracy and precision tolerances to be applied in consultation with *appropriate persons*.
  - 1.2. Characteristics of operating environment and any special equipment and resource requirements are identified according to project specifications and organisational requirements.
  - 1.3. Equipment to be used to collect data is selected and checked to ensure correct operation and functionality according to manufacturer specifications.
  - 1.4. Organisation of project resources, equipment, materials and transport is designated to appropriate persons.
2. Develop project plan to monitor engineering structure.
  - 2.1. Project objectives, deliverables, constraints and principal work activities are documented according to project specifications.
  - 2.2. Information is included in project plan relating to identified risks and contingencies, resources, technologies and techniques to be used to collect spatial data.
  - 2.3. Validation processes to verify integrity of required spatial data are devised and specified in project plan.
  - 2.4. Work responsibilities are allocated and supervisory processes, checks and measures are implemented.
3. Implement monitoring tasks.
  - 3.1. Project management mechanisms are implemented to schedule, measure, record and report progress of activities in relation to project plan.
  - 3.2. Risk management and contingency strategies are devised and followed to identify and control hazards and risks, and ensure that monitoring activities comply with legal and statutory requirements.
  - 3.3. Surveying equipment is used to measure identified spatial components according to project specifications.

- 3.4. Measured spatial data is reduced to project spatial reference system for comparison with design.
  - 3.5. Measurements are validated, recorded and processed according to project specifications.
  - 3.6. Non-conformities between engineering structure and project specifications are identified and resolved, or contingencies are managed according to organisational requirements.
4. Finalise and report monitoring results.
    - 4.1. Monitoring is finalised and results are checked for compliance with project specifications and organisational requirements.
    - 4.2. Appropriate persons are notified of monitoring results according to organisational requirements.
    - 4.3. Documentation is completed and spatial data archived according to project and organisational requirements.
    - 4.4. Monitoring results are reviewed against project specifications and findings are reported to appropriate persons according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• prioritise work to meet contract and resource requirements and constraints.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• apply accuracy and precision tolerances to measurements and calculations</li> <li>• conduct precise measurements and calculations relating to height, depth, dimension, direction and position in actual operational activity and virtual representation.</li> </ul>

- Oral communication skills to:
- negotiate to meet client requirements
  - inform clients and other stakeholders of project progress.
- Reading skills to:
- analyse graphical and technical information in engineering plans.
- Writing skills to:
- record technical information in organisational documentation.
- Technology skills to:
- connect equipment to coordinate systems
  - set up and calibrate surveying equipment.
- Problem-solving skills to:
- select appropriate validation methods to verify accuracy of data.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least two of the following:
- client
  - colleague
  - end user
  - engineer
  - manager
  - registered or qualified surveyor
  - stakeholder
  - supplier.

# Assessment Requirements for CPPSIS6036 Monitor engineering structures

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6036A Monitor complex engineering surveying structures.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also monitor engineering structures for two projects.

While monitoring the above engineering structures, the person must:

- analyse surveying specifications, including:
  - cross-sections and plans
  - technical descriptions of surveying data and their collection and format requirements
- apply industry-accepted standards for performing surveying measurements and computations
- communicate clearly with others to clarify and report work information and negotiate task completion
- comply with industry-accepted standards for validating accuracy of surveying data and identifying errors and discrepancies
- comply with organisational, legal and statutory requirements for:
  - completing records and documentation
  - recording, storing and filing data
  - using, checking and storing surveying equipment
  - working safely and using personal protective equipment (PPE)
- conduct measurements and calculations to meet engineering specifications using two of the following pieces of surveying equipment:
  - current meter
  - global navigation satellite system (GNSS)
  - level
  - tape
  - theodolite

- total station
- develop a project plan to monitor engineering structures, including detail of:
  - project objectives and deliverables
  - constraints
  - risk management and contingency strategies
  - work activities
  - technologies and techniques to be used
- identify site hazards and control risks
- implement project management mechanisms to ensure monitoring activities are completed within required timeframes and comply with specifications
- interpret engineering design information and specifications to identify components to be measured and accuracy and precision tolerances to be applied
- plan and document data collection methodologies that allow for contingencies
- review project outcomes against specifications and objectives
- schedule work tasks and organise resources and equipment
- supervise staff to complete work tasks on time.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and precision requirements and tolerances for engineering structures
- data formatting, processing and reduction techniques
- industry-accepted methods for validating data to identify errors and discrepancies
- legislative, statutory and industry requirements, and standards relating to work tasks
- methods for calculating surveying data and verifying its accuracy using spatial reference systems
- methods for setting up, levelling and calibrating surveying equipment
- methods for identifying and reporting non-conformities
- organisational policies and procedures relating to:
  - health and safety relating to survey activities and work on construction sites
  - reporting and documentation
  - using and allocating resources
  - using the surveying equipment specified in the performance evidence
- processes to establish and use high-level survey control
- project management techniques for scheduling, measuring and monitoring work progress and planning for contingencies
- project zone design
- reference and coordinate systems for surveying data, including Australian Height Datum and Map Grid of Australia
- surveying data capture and set-out methodologies
- use and application of network and traverse adjustments.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence
- specifications:
  - survey specifications, including relevant engineering plans and drawings
  - organisational policies, procedures and documentation relating to work health and safety
- relationships with team members and supervisor:
  - lead role in a team.

Timeframe:

- as specified by project requirements.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPSIS6037 Conduct advanced remote sensing analysis

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6037A Conduct advanced remote sensing analysis.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to use computing platforms, software systems and image processing techniques to conduct advanced remote sensing analysis on hard copy and digital imagery. The unit covers preparing for work by analysing specifications and deciding appropriate techniques for collecting and analysing images, as well as appropriate hardware and software and image processing systems to perform the required image enhancements and manipulations. The unit also covers accessing and assessing available and suitable spatial datasets to identify constraints on use. The unit requires the ability to perform supervised and unsupervised classifications on datasets using classification algorithms, and to conduct related error analysis. It also requires the ability to merge remote sensing data and prepare data for geographic information system (GIS) integration.

The unit supports those who work in a technical management role in a spatial information services team, in areas such as cartography, town planning, mapping and GIS.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

- essential outcomes. text is used, further information is detailed in the range of conditions.
1. Determine image processing techniques.
    - 1.1. Project specifications are identified and analysed to determine appropriate image, merger and modelling techniques according to organisational requirements.
    - 1.2. Appropriate data collection and analysis techniques in remote sensing process are determined according to project specifications.
    - 1.3. Suitable digital image processing techniques and digital image data formats are selected according to project specifications.
    - 1.4. Additional characteristics of image and *metadata* are identified according to project specifications.
  2. Select computing platforms and software systems for image processing.
    - 2.1. Appropriate computing platforms and software systems are assessed for suitability according to project specifications.
    - 2.2. Availability of suitable data is verified with potential suppliers according to project specifications.
    - 2.3. Constraints on use of spatial data are assessed against project specifications and contingencies are planned according to organisational requirements.
    - 2.4. Commercially available image processing systems are assessed to determine appropriate components, menu items, *characteristics and statistics* to meet project specifications.
  3. Enhance and manipulate images.
    - 3.1. Transformation routines using *image calculations* are conducted.
    - 3.2. Edge enhancements and smoothing filters are applied using convolution matrices.
    - 3.3. Image transformation is performed with channels of brightness, greenness and wetness.
    - 3.4. Imagery for distribution is determined according to project specifications.

- |   |   |
|---|---|
| 4. Perform classifications on datasets.     | <p>4.1. Thematic classifications and relative differentiations between supervised and unsupervised classification algorithms are determined.</p> <p>4.2. Supervised classification algorithms are applied using training samples according to project specifications.</p> <p>4.3. Error analysis is conducted to perform an approximate accuracy assessment of classifications.</p> <p>4.4. Hard copy outputs are produced according to project specifications.</p> |
| 5. Conduct data merger and GIS integration. | <p>5.1. Integration and merging techniques are identified and documented.</p> <p>5.2. <i>Techniques for integrating GIS data</i> are identified and documented.</p> <p>5.3. Remote sensing data is merged and integrated into GIS according to project specifications.</p>  |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

skills to: requirements.

Reading skills to: • interpret graphical information in raster images.

Technology skills to: • use computers and software applications to manipulate and enhance images  
• use printers and plotters to produce hard copy outputs.

Problem-solving skills to: • apply solutions to identified classification discrepancies.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Metadata*** must include at least eight of the following:

- availability
- conditions of use
- coordinate system
- currency
- custodian
- data accuracy
- data description
- date of acquisition
- licence
- quality
- source
- spatial data acquisition methodologies
- version control.

***Characteristics and statistics*** must include at least two of the following:

- band selections
- hard copy outputs
- histogram plots
- look-up tables
- univariate and multivariate statistics.

***Image calculations*** must include at least one of the following:

- greenness ratios
- greenness ratios plus dark value
- normalised difference vegetation index (NDVI).

***Techniques for integrating GIS data*** must include at least one of the following:

- cartographic modelling
- environmental modelling
- land cover classification.

## Unit Mapping Information

# Assessment Requirements for CPPSIS6037 Conduct advanced remote sensing analysis

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6037A Conduct advanced remote sensing analysis.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also use a computer and remote sensing software system to conduct advanced remote sensing analysis for two different projects.

While conducting the above advanced remote sensing analysis, the person must:

- analyse and define job specifications, constraints and main work activities
- analyse remote sensing data to identify and describe its characteristics, including:
  - metadata
  - soil
  - vegetation bodies
  - water
- select and set up appropriate hardware and software systems to meet remote sensing project specifications
- assess commercially available image processing systems to ensure their suitability in meeting project specifications
- use remote sensing techniques to acquire spatial data from:
  - airborne platforms
  - ground observation
  - satellites
- comply with organisational and legal requirements for accessing and using spatial data, including copyright, intellectual property and trade practices
- comply with organisational requirements and industry-accepted standards relating to:
  - applying classification algorithms
  - quality and risk management
  - working safely when using above equipment

- conduct web-based searches to identify available spatial data and verify its suitability to meet project specifications
- exercise precision and accuracy when analysing and classifying remote sensing data
- identify and assess constraints relating to use of remote sensing data
- perform classifications on datasets using supervised and unsupervised classification algorithms and training samples
- save digital images in a range of formats, including two of the following:
  - band interleaved by line (BIL)
  - band interleaved by pixel (BIP)
  - band sequential (BSQ)
  - run length encoding (RLE)
- use integration and merging techniques to allow remote sensing data to be integrated into GIS
- use digital image processing techniques to enhance and rectify images.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- industry-accepted techniques for applying supervised and unsupervised classification algorithms to remote sensing data
- computer platforms and software systems for advanced remote sensing analysis and GIS integration
- copyright and ownership constraints relating to spatial data
- digital image processing techniques
- digital image data formats, including BIL, BIP, BSQ and RLE
- existing spatial datasets and dataset sources
- image calculations required for transformation routines, including:
  - greenness ratios
  - greenness ratios plus dark value
  - normalised difference vegetation index (NDVI)
- image enhancement, manipulation and merger techniques
- methods for analysing metadata
- methods for assessing commercially available image processing systems, including characteristics and statistics
- methods for validating spatial data sources and constraints on use
- key features of spatial referencing and coordinate systems
- techniques for integrating GIS data, including:
  - cartographic modelling
  - environmental modelling
  - land cover classification.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer, including computer-aided design (CAD) applications and software appropriate for developing two-dimensional (2-D) and three-dimensional (3-D) terrain visualisations
  - hardware, including printer, scanner, plotter and multimedia devices and peripherals
- specifications:
  - project and design specifications
  - organisational policies, procedures and documentation relating to data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - lead role in a team
- relationships with client:
  - client consultation required.

Timeframe:

- as specified by client and project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSIS6040 Develop 2-D and 3-D terrain visualisations

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6040A Develop 2-D and 3-D terrain visualisations.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to develop two-dimensional (2-D) and three-dimensional (3-D) visualisations in a geographic information system (GIS) or computer-aided design (CAD) context. It requires the ability to apply wide-ranging specialised technical, creative and conceptual skills and a broad knowledge of spatial datasets. The unit requires the development of technical documentation incorporating mapping and scientific techniques, as well as the ability to communicate graphically. It also requires an understanding of the latest technologies that are available to remotely capture raw elevation data.

The unit supports those who work in a technical management role in a spatial information services team in areas such as cartography, town planning, mapping and GIS.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Prepare 2-D or 3-D digital elevation model (DEM).
  - 1.1. GIS or CAD environment or surface elevation is designed according to project specifications and organisational requirements.
  - 1.2. Current remote sensing technologies for capturing raw elevation data are investigated.
  - 1.3. Views and layouts are established according to job specifications.
  - 1.4. Spatial computing platforms and software systems are selected and set up for suitability against job specifications according to organisational requirements.
2. Create 2-D drawings.
  - 2.1. Availability of suitable data is verified with potential suppliers and constraints are assessed according to job specifications.
  - 2.2. Detailed views and layouts are created using various scales according to job specifications.
  - 2.3. 2-D drawings are finalised and existing 2-D model is modified as necessary to meet job specifications.
3. Create 3-D model or DEM.
  - 3.1. Surface elevation is modelled by mathematically defined surfaces and by point or line data according to job specifications.
  - 3.2. Products that can be derived from a DEM are determined according to job specifications.
  - 3.3. Entities are created and manipulated in 3-D space according to job specifications.
  - 3.4. DEM is developed with a range of thematic data and profiles generated and draped over model according to project specifications.
  - 3.5. Contour map of area is created by employing procedures appropriate to data format and software according to job specifications.
  - 3.6. Slope map of area is created from gradient and aspect components according to job specifications.

- 3.7. Shaded relief map of area is created from gradient and relief map representations according to job specifications.
  - 3.8. 3-D model is finalised and existing 3-D model modified as necessary to meet job specifications.
4. Produce output.
    - 4.1. 2-D and 3-D outputs are documented according to project specifications and organisational requirements.
    - 4.2. Drawing files and elevation data outputs are saved in appropriate format according to job specifications and organisational requirements.
    - 4.3. Physical properties are extracted to job specifications and slope map of area is used for analytical purposes.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Initiative and enterprise skills to:	<ul style="list-style-type: none"> <li>• extract and output information from engineering and environmental plans</li> <li>• translate specifications into drawing and analysis design</li> <li>• understand how raw elevation data is captured and assigned quality measures.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• apply quality and accuracy measures on modelled 2-D and 3-D outputs</li> <li>• apply understanding of height, depth, breadth, dimension and position to actual operational activity and virtual representation</li> <li>• use appropriate interpolation techniques to convert from point to raster data.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• liaise with clients and end users to identify project requirements and drawing detail.</li> </ul>

Reading skills to:

- interpret graphical information, including rasters
- interpret technical drawing standards
- interpret engineering and environmental plans.

Technology skills to:

- conduct web-based searches and use digital techniques
- operate hardware, including computers and plotters.

## Unit Mapping Information

CPPSIS6040A Develop 2-D and 3-D terrain visualisations

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPSIS6040 Develop 2-D and 3-D terrain visualisations

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6040A Develop 2-D and 3-D terrain visualisations.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria and foundation skills of this unit. The person must also use a geographic information system (GIS) or computer-aided design (CAD) environment to develop two-dimensional (2-D) and three-dimensional (3-D) terrain visualisations that meet specifications for two different projects.

While developing the above 2-D and 3-D terrain visualisations, the person must:

- analyse and define job specifications, constraints and main work activities
- conduct web-based searches to identify available spatial data and verify its suitability to meet drawing specifications
- prepare the CAD environment by setting up the hardware and software system and drawing defaults and customising menus
- design the surface elevation, orientation and views to meet job specifications
- exercise precision and accuracy in relation to terrain visualisations
- select and use spatial computing platforms and software systems to prepare drawings and models that meet specifications relating to:
  - accuracy
  - completeness
  - coverage
  - density
  - logical consistency
- use appropriate interpolation techniques to convert from vector to raster data
- communicate clearly with clients and colleagues to clarify design requirements and detail
- comply with standard operating procedures, drawing standards and organisational requirements relating to:
  - completing records and reporting

- quality and risk management
- working safely when using the equipment specified in the assessment conditions
- create and manipulate entities in 3-D space to develop contour, slope and shaded relief maps of an area
- create detailed 2-D views using various scales
- create a digital elevation model in 3-D using mathematically defined surfaces and point or line data
- identify and assess constraints and problems relating to spatial data
- save drawing files in a range of formats.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- computer platforms and software for GIS, CAD and digital elevation models (DEM)
- copyright and ownership constraints relating to spatial data
- data formats and precision and accuracy requirements for preparing terrain visualisations in 2-D drawings and 3-D models
- digital image processing techniques
- display principles, including:
  - colour
  - composition
  - font type
  - legends
  - media
  - scale
  - size
  - text and line style
- existing spatial datasets and dataset sources
- GIS and CAD principles, capabilities and uses in relation to creating terrain visualisations
- methods for validating spatial data sources and constraints on use
- organisational requirements relating to records and reporting
- remote sensing technologies that capture raw elevation data
- key features of spatial referencing systems
- techniques for modifying existing 2-D and 3-D models
- types of products that can be derived from a DEM.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - personal computer, including GIS or CAD applications and software appropriate for developing 2-D and 3-D terrain visualisations

- hardware, including printer, scanner, plotter and multimedia devices and peripherals
- specifications:
  - project and design specifications
  - organisational policies, procedures and documentation relating to:
    - quality measures relating to 2-D and 3-D terrain visualisations
    - data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - lead role in a team
- relationships with client:
  - client consultation required.

Timeframe:

- as specified by the client and project requirements.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPSIS6041 Compile mine survey plans

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6041A Compile mine survey plan.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to compile a mine survey plan using computer-aided design (CAD) programs to produce mine drawings. The unit covers identifying and planning project deliverables and liaising with clients and others to present project specifications and report on outcomes. The unit also covers organising work processes by implementing project management mechanisms; checking and validating essential surveying information; planning for risks and contingencies; and creating a survey database, file structures and conventions and metadata. The unit requires the ability to use specialist surveying tools and techniques to measure, reduce and validate spatial data and create mine plans, cross-sections and plots.

The unit supports those who work in a technical management role in a mining environment and take responsibility for liaising with clients and end users to meet project requirements.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States where mining surveying must be undertaken under the supervision of a registered surveyor. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

- essential* outcomes. demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Organise work processes.
    - 1.1. Client requirements and project specifications are determined in consultation with *appropriate persons*.
    - 1.2. Design information is accessed and interpreted to identify spatial data requirements and components to be measured and monitored.
    - 1.3. Essential surveying information is checked for currency and validity.
    - 1.4. Survey database, file structures and conventions, and *metadata* are created according to project specifications.
    - 1.5. Project management mechanisms are implemented to schedule, measure, record and report progress of activities in relation to agreed timeframes and plans.
    - 1.6. Risk management and contingency strategies are followed to ensure project complies with legal, statutory and organisational requirements.
    - 1.7. Agreed communication processes between client and other appropriate persons are implemented and maintained.
  2. Standardise mine survey plan requirements.
    - 2.1. Requirements for lodging plan are identified according to organisational requirements.
    - 2.2. Mine plan drawing and plotting requirements are researched and summarised to meet project specifications.
    - 2.3. Contingencies and constraints are managed and problems resolved to ensure plans meet specifications.
  3. Produce mine survey plans.
    - 3.1. Measured spatial data is reduced to project reference system.
    - 3.2. Mine plans are created according to project specifications and organisational requirements.
    - 3.3. Measurements are validated and recorded according to

project specifications.

- |                                |   |
|--------------------------------|---|
| 4. Finalise mine survey plans. | 4.1. Mine survey plans are finalised and relevant personnel notified of results according to organisational requirements. |
|                                | 4.2. Documentation is completed and spatial data archived according to organisational requirements.                       |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Initiative and enterprise skills to:	<ul style="list-style-type: none"> <li>• translate specifications into drawing designs.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• apply coordinate system to measured spatial data</li> <li>• apply understanding of height, depth, dimension and position to actual operational activity and virtual representation.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• liaise with clients to identify plotting detail.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret graphical information in cross-sections and plans</li> <li>• interpret technical drawing standards.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• record measurements in a format that can be interpreted by a third party.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• calibrate specialist surveying equipment to take measurements</li> <li>• operate hardware, including computers and plotters</li> <li>• use CAD software to create plans.</li> </ul>

Problem-solving skills to:

- identify legal non-compliance issues.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least two of the following:

- client
- colleague
- end user
- registered or qualified surveyor
- site personnel
- supplier.

***Metadata*** must include at least eight of the following:

- availability
- conditions of use
- coordinate system
- currency
- custodian
- data accuracy
- data description
- date of acquisition
- licence
- quality
- source
- spatial data acquisition methodologies
- version control.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS6041 Compile mine survey plans

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS6041A Compile mine survey plan.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also use a computer and computer-aided design (CAD) software to compile a mine survey plan that meets technical specifications for two projects.

While compiling the above mine survey plans, the person must:

- define and document project deliverables, constraints and activities
- prepare for work by checking the following essential surveying information for currency and validity:
  - mine grid coordinate systems
  - requirements for data processing
- communicate clearly with clients and stakeholders to clarify and report project requirements and plot details
- comply with statutory, legal and organisational requirements relating to:
  - completing records and reporting
  - mine drawings
  - protocols for saving and formatting drawing files
- comply with drawing standards and specifications to create mine plans, views and plots at required scale, which incorporate:
  - grid convergence
  - long and cross-section plot requirements
  - map legends
  - plot symbols
  - sheet surround
- create metadata, database, file structures and conventions as the basis for design work
- exercise precision and accuracy in relation to measurements, tolerances and design

- follow project management techniques to schedule, measure, record and report progress of project activities
- prepare the CAD environment by setting up the hardware and software systems and drawing defaults, and customising menus
- identify and comply with plan lodgement requirements, standard drawing requirements and plotting specifications.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- Australian drawing standards, data formats and precision and accuracy requirements for preparing mine drawings using CAD
- CAD principles, capabilities and uses in relation to mine design
- data reduction and manipulation techniques
- industry-accepted standards for mine survey plans
- statutory, legal and organisational requirements for mine survey plans
- methods for validating measurements to identify errors
- key features of mine grid coordinate systems
- organisational requirements relating to:
  - completing records
  - reporting
  - saving and formatting drawing files
  - working safely
- standard engineering and mining plan design and presentation conventions
- types of mine plans, including:
  - accident plans
  - emergency plans
  - open cut mine plans
  - surface infrastructure plans
  - underground level plans
  - ventilation plans.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer and CAD software
- specifications:
  - organisational policies, procedures and documentation relating to data privacy and information copyright for plan content
- physical conditions:
  - access to equipped work station

- relationships with team members and supervisor:
  - lead role in a team
- relationships with client:
  - client consultation required.

Timeframe:

- as specified by the client and project requirements.

# CPPSPS3001 Handle, transport and store swimming pool and spa chemicals safely

## Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3001A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

## Application

This unit of competency specifies the skills and knowledge required to safely handle, transport and store swimming pool and spa chemicals.

It includes:

- assessing risks associated with different types of swimming pool and spa chemicals
- following legislative requirements for the safe handling, transport and storage of swimming pool and spa chemicals
- following emergency procedures for chemical spillages and leaks
- maintaining chemical storage areas and chemical inventories.

It applies to swimming pool and spa technicians, and related industry professionals and specialists, with limited supervisory responsibilities who perform their duties alone or as members of a team.

Licensing, legislative, regulatory or certification requirements apply to this unit of competency in some states and territories. State and territory regulatory authorities should be consulted to confirm these requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Swimming pool and spa servicing

## Elements and Performance Criteria

-----------------------	--

essential outcomes.	achievement of the element.
<p>1. Plan and prepare to handle, transport and store swimming pool and spa chemicals safely.</p>	<p>1.1 Review and clarify task to handle, transport and store swimming pool and spa chemicals safely, including types and amounts of chemicals to be transported.</p> <p>1.2 Review information on situations in which swimming pool and spa chemicals may become hazardous.</p> <p>1.3 Review work health and safety (WHS) requirements for the task in accordance with safety plans and policies, safety data sheets (SDSs), manufacturers' instructions, safety symbols and signs, government regulations and codes of practice in relation to the handling, transport and storage of swimming pool and spa chemicals.</p> <p>1.4 Identify hazards, assess risks and determine and implement risk control measures when handling, transporting and storing swimming pool and spa chemicals.</p> <p>1.5 Review and follow transport requirements.</p> <p>1.6 Review environmental requirements for the task in accordance with environmental plans and legislative requirements.</p> <p>1.7 Ensure that appropriate first aid and spill kits are ready and accessible for all stages of handling, transport and storage.</p>
<p>2. Safely handle and transport swimming pool and spa chemicals.</p>	<p>2.1 Carry out all work in accordance with task and legislative requirements.</p> <p>2.2 Select and fit personal protective equipment (PPE).</p> <p>2.3 Implement identified risk control measures to minimise risks involved in the handling and transport of swimming pool and spa chemicals.</p> <p>2.4 Check that swimming pool and spa chemical containers are in sound condition for transport.</p> <p>2.5 Select and handle required chemicals safely.</p> <p>2.6 Respond to any chemical spills and leaks in accordance with manufacturers' instructions, WHS, environmental, legislative guidelines and emergency action plans.</p> <p>2.7 Report transport incidents in accordance with workplace and legislative requirements.</p>
<p>3. Store equipment and chemicals.</p>	<p>3.1 Implement identified risk control measures to minimise risks involved in the storage of swimming pool and spa chemicals.</p> <p>3.2 Store chemicals safely, in accordance with manufacturers' instructions, WHS requirements, and legislative guidelines.</p> <p>3.3 Retain products in original containers with labels intact.</p>

	<p>3.4 Repackage and label unused chemicals.</p> <p>3.5 Dispose of unwanted and/or out-of-date chemicals and storage containers in accordance with manufacturers' instructions, WHS legislation, environmental legislation, and workplace requirements.</p> <p>3.6 Store equipment, chemicals, and PPE safely and to allow ready-to-use access.</p>
<p>4. Record storage details of swimming pool and spa chemicals.</p>	<p>4.1 Calculate and record quantities of used and unused chemicals in chemical storage inventory.</p> <p>4.2 Report storage incidents in accordance with workplace and legislative requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- reading skills to:
  - interpret task documentation
  - understand written instructions, procedures and signs
  - access information in safety data sheets (SDSs), chemical container labels
  - interpret manufacturers' instructions and workplace requirements
- writing skills to report incidents and record chemical storage details
- numeracy skills to calculate and record quantities of chemicals
- oral communication skills to:
  - use questioning to identify and confirm requirements
  - report work site hazards.

## Unit Mapping Information

Supersedes and is equivalent to CPPSPS3001A Handle, transport and store swimming pool and spa chemicals safely.

# Assessment Requirements for CPPSPS3001 Handle, transport and store swimming pool and spa chemicals safely

## Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3001A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

## Performance Evidence

To demonstrate competency in this unit, a person must demonstrate safe procedures when handling, transporting and storing swimming pool and spa chemicals safely on two different occasions.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- requirements of jurisdictional work health and safety and environmental legislation and regulations relating to handling, transporting and storing swimming pool and spa chemicals safely
- workplace requirements for undertaking all aspects of handling, transporting and storing swimming pool and spa chemicals, including:
  - workplace health and safety procedures
  - workplace emergency procedures
  - use of safety data sheets (SDSs)
  - safe handling of chemicals and equipment
  - interpreting work orders and reporting problems
- chemical handling, storage and disposal including:
  - chemical disposal principles
  - chemical safety principles and reasons and procedures for segregating chemicals
  - chemical storage requirements
  - purpose and types of chemical storage inventory and records systems
  - processes for calculating and recording quantities of used and unused chemicals in chemical storage inventory
- Commonwealth, state or territory legislation, and local government regulations impacting on the handling, transport and storage of swimming pool and spa chemicals relating to:
  - dangerous goods

- environmental protection
- health
- licensing requirements in relation to chemical transport and storage
- work health and safety (WHS)
- waste disposal
- handling, transport and storage requirements for different types of swimming pool and spa chemicals
- processes for clearing and cleaning up chemical spillages and leakages
- requirements for disposing of excess, unwanted and out-of-date swimming pool and spa chemicals
- requirements for disposing of used chemical containers
- types, uses and properties of swimming pool and spa chemicals, including:
  - algaecides
  - balancers
  - clarifiers and flocculants
  - oxidisers
  - sanitisers
  - specialised chemicals
  - water balancing chemicals
  - reactive properties of swimming pool and spa chemicals
  - situations in which chemicals may become hazardous
- reactive material hazards responses:
  - emergency action plans
  - firefighting
  - incident reporting procedures
  - risk triggers, including:
    - improper mixing
    - wetting
- risk control measures for:
  - chemicals, including safe chemical use principles and compliance with labels and instructions
  - dust prevention
  - fire prevention
  - keeping swimming pool and spa chemicals dry
  - adequate ventilation
- types and uses of PPE used in safe handling and transporting swimming pool and spa chemicals.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- work site/s and specifications to handle and transport swimming pool and spa chemicals safely
- appropriate documents, SDSs, materials, tools, equipment and PPE currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSPS3002 Perform basic swimming pool and spa measurements and calculations

## Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3002A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

## Application

This unit of competency specifies the skills and knowledge required to perform basic measurements and calculations in a range of workplace contexts.

It includes:

- planning for, performing and recording measurements
- performing calculations of quantity, area, volume, perimeter, dosing rates, flow rate and time
- interpreting graphical representations of mathematical information relating to swimming pools and spas.

It applies to swimming pool and spa technicians, and related industry professionals and specialists, with limited supervisory responsibilities who perform their duties alone or as members of a team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Swimming pool and spa servicing

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
---	--

<p>1. Plan and prepare to perform basic swimming pool and spa measurements and calculations.</p>	<p>1.1 Review and clarify task to perform basic swimming pool and spa measurements and calculations.</p> <p>1.2 Confirm measurement requirements and select method for achieving required result.</p> <p>1.3 Select measuring and calculating equipment and check for accuracy.</p>
<p>2. Perform basic swimming pool and spa measurements and calculations.</p>	<p>2.1 Obtain and check basic measurements using established work practices, measuring equipment and personal protective equipment (PPE) to ensure safety and security of self, others and property.</p> <p>2.2 Record basic measurements using appropriate measurement units.</p> <p>2.3 Convert measurement values into different measurement units.</p> <p>2.4 Perform and check basic calculations using online or electronic calculators and record results.</p> <p>2.5 Interpret results of basic calculations to solve problems relating to swimming pool and spa servicing.</p> <p>2.6 Clean measuring equipment and materials, check for serviceability and calibrate and store.</p> <p>2.7 Minimise environmental impact of basic measurement and calculation activities and dispose of waste following workplace procedures.</p>
<p>3. Interpret basic mathematical information.</p>	<p>3.1 Recognise and interpret information represented in graphs, symbols, diagrams and pictures to complete workplace tasks.</p> <p>3.2 Review limitations and risks associated with using inaccurate basic swimming pool and spa measurements and calculations.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- reading skills to:
  - interpret task documentation
  - interpret information in symbols, diagrams, pictures, packaging labels and safety data sheets (SDSs) e.g. for dosing rates

- writing skills to record swimming pool and spa measurements and results of basic calculations
- numeracy skills to perform basic measurements and calculations and to record quantities of chemicals
- oral communication skills to use questioning to identify and confirm requirements
- technology skills to use measurement equipment and online or electronic calculators.

## **Unit Mapping Information**

Supersedes and is equivalent to CPPSPS3002A Perform basic swimming pool and spa measurements and calculations.

## **Links**

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPSPS3002 Perform basic swimming pool and spa measurements and calculations

## Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3002A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

## Performance Evidence

To demonstrate competency in this unit, a person must perform basic swimming pool and spa measurements and calculations, including:

- at each of two different locations, measure and calculate:
  - the dimensions, area, perimeter and volume of each of one regular and one irregular shaped swimming pool or spa with sloped floors
  - water loss in one swimming pool or one spa
  - the quantity of pool chemicals required to improve water quality in one swimming pool or spa
  - flow and turnover rates and time taken to fill and empty one swimming pool or spa.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- requirements and application of jurisdictional work health and safety (WHS) and environmental legislation and regulations relating to performing basic swimming pool and spa measurements and calculations, including safety data sheets (SDSs)
- workplace requirements for undertaking all aspects of performing basic swimming pool and spa measurements and calculations,
- selection and use of personal protective equipment (PPE) when performing basic swimming pool and spa measurements and calculations
- hazards, risks and enterprise safety procedures associated with measurements undertaken on site
- uses and limitations of measuring equipment, including:
  - bucket
  - calculator
  - ruler, including laser ruler
  - measuring flask

- scales
- stopwatch
- tape measure
- trundle wheel
- taking basic measurements in the swimming pool and spa industry, including units of measurement, types and functions of measuring equipment
- basic measurement requirements, including for:
  - flow rates
  - swimming pool or spa chemical quantities
  - swimming pool or spa dimensions
  - temperatures
- methods for conversion of units of measurement, including:
  - distance units of measurement:
    - metric conversions
    - metric to imperial units of measurement and vice versa
  - surface area units of measurement:
    - metric conversions
    - metric to imperial units of measurement and vice versa
  - volume units of measurement:
    - metric conversions
    - metric to imperial units of measurement and vice versa
  - weight units of measurement:
    - metric conversions
    - metric to imperial units of measurement and vice versa
- processes for taking basic measurements, including for calculating areas, perimeters and volumes of regular and irregular shapes relevant to measuring swimming pools and spas, such as rectangles, squares, cubes, circles, semi-circles, triangles, trapeziums and cylinders
- conversion of measurement units used in the swimming pool and spa industry, including: metric system conversions, metric to imperial conversion and vice versa
- graphical representations of mathematical information used in basic swimming pool and spa measurements and calculations, including diagrams, graphs, pictures and symbols
- water loss in swimming pools and spas, including:
  - evaporation
  - plumbing and shell leaks
  - user splash-outs and drag-outs
  - planned dilution, including:
    - total dissolved solids (TDSs) levels
    - user loads.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- work site/s and specifications to perform basic swimming pool and spa measurements and calculations
- appropriate documents, safety data sheets (SDSs), measuring and calculating equipment and PPE currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

## CPPSPS3003 Maintain swimming pools and spas

### Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3003A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

### Application

This unit of competency specifies the skills and knowledge required to carry out routine maintenance of swimming pools and spas.

It includes:

- preparing for and carrying out routine swimming pool and spa maintenance
- assessing hazards and determining risk controls, including pool and spa safety barriers
- completing maintenance and minor repair activities, including work completion records.

It applies to swimming pool and spa technicians, and related industry professionals and specialists, with limited supervisory responsibilities who perform their duties alone or as members of a team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Swimming pool and spa servicing

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Prepare for routine maintenance of swimming pools and	1.1 Review task requirements for routine maintenance of swimming pools and spas.

spas.	<p>1.2 Review requirements of legislation relating to the task.</p> <p>1.3 Review work health and safety (WHS) requirements for the task, in accordance with safety plans, policies and safety data sheets (SDSs).</p> <p>1.4 Identify hazards, assess risks and determine and implement risk control measures including requirements for safety signage, barricade and personal protective equipment (PPE).</p> <p>1.5 Review environmental requirements for the task in accordance with environmental plans and legislative requirements.</p> <p>1.6 Inspect and assess swimming pools and spas and environs for operational effectiveness and safe operation against normal operating criteria.</p> <p>1.7 Select tools and equipment, check for serviceability and rectify or report any faults.</p> <p>1.8 Select materials for task and check against quality requirements.</p>
2. Carry out routine maintenance of swimming pools and spas.	<p>2.1 Carry out all work in accordance with task, workplace and legislative requirements.</p> <p>2.2 Implement identified risk control measures, including erecting safety signage and barricades, and fitting PPE.</p> <p>2.3 Carry out routine servicing of swimming pools and spas in accordance with manufacturers' specifications and workplace requirements.</p> <p>2.4 Identify faults in swimming pools and spas and make routine repairs or report faults and requirements for repairs.</p>
3. Complete routine maintenance of swimming pools and spas.	<p>3.1 Reinststate serviced swimming pool or spa to safe operational condition.</p> <p>3.2 Restore work area to original condition and check for and rectify or report safety hazards, dispose of waste in accordance with environmental requirements, and clean and store tools and equipment.</p> <p>3.3 Report for repair or replacement any malfunctions, faults, wear or damage to swimming pools and spas, environs, tools or equipment.</p> <p>3.4 Provide client with information on compliance with safety legislation of swimming pools, spas and environs.</p> <p>3.5 Complete and store work completion documentation.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- reading skills to:
  - interpret task documentation
  - understand written instructions, procedures and signs
  - access information in safety data sheets (SDSs), chemical container labels
  - interpret manufacturers' instructions and workplace requirements
- writing skills to report faults and record work completion information
- numeracy skills to interpret numerical information relating to routine swimming pool and spa maintenance
- oral communication skills to:
  - use questioning to identify and confirm requirements
  - provide client with information
  - report work site hazards.

## Unit Mapping Information

Supersedes and is equivalent to CPPSPS3003A Routinely maintain swimming pools and spas.

# Assessment Requirements for CPPSPS3003 Maintain swimming pools and spas

## Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3003A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

## Performance Evidence

To demonstrate competency in this unit, a person must perform routine maintenance of each of two swimming pools and two spas.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- requirements of jurisdictional work health and safety and environmental legislation and regulations relating to routinely maintaining swimming pools and spas
- workplace requirements for undertaking all aspects of routinely maintaining swimming pools and spas, including:
  - work health and safety procedures
  - workplace emergency procedures
  - use of safety data sheets (SDSs) and selection, care and use of PPE
  - safe handling of chemicals and equipment
  - emergency responses relating to hazardous materials and chemicals
  - interpreting work orders and reporting problems
- Australian Competition and Consumer Commission product safety guidelines and Commonwealth, state or territory legislation, and local government regulations, Australian Standards, and codes of practice impacting on the routine maintenance of swimming pools and spas relating to:
  - electrical and plumbing regulations controlling conduct of electrical and plumbing work
  - private and public swimming pools and spas
  - swimming pool and spa safety barriers
  - environmental health
  - waste disposal

- tools, materials and equipment used in routine maintenance of swimming pools and spas, their application and requirements for safe use
- processes to identify hazards, assess risks and determine and implement risk control measures in routine maintenance of swimming pools and spas
- personal protective equipment (PPE) requirements and use in routine maintenance of swimming pools and spas
- processes and requirements for inspection and assessment of swimming pools and spas for operational effectiveness and safe operation
- requirements for routine servicing of swimming pools and spas
- differences between hot and cold-water chemistry
- swimming pool and spa routine maintenance and repairs, including:
  - purpose
  - common faults in pools and spas
  - hazards
  - routine maintenance procedures for:
    - barriers
    - brushing
    - pumps
    - reporting
    - routine repairs
    - tile cleaning
    - vacuuming
    - water balancing
    - testing water quality
    - water testing
- routine servicing, maintenance and repairs of a swimming pool or spa, including:
  - addressing seasonal requirements
  - brushing pool
  - carrying out routine repairs to pool and spa systems
  - checking swimming pool and spa safety barriers and gates
  - checking and cleaning skimmer basket and hair and lint-pot basket
  - checking and maintaining:
    - pool blankets and rollers, if present
    - pool chlorinators, if present
    - pool cleaning equipment
    - pool filters
    - pool heating, if present
    - pump
    - signs and safety equipment
    - water level
    - checking operation of pool lighting

- checking suction openings in gutters and skimmers for debris
- checking that handrails, ladders, diving boards, slides and other equipment are secure and in good condition
- checking that return inlet fittings and vacuum line covers are in place
- checking tiles, including water line and gutter tile
- maintaining sanitation
- recording routine maintenance activities and required follow-up actions
- vacuuming pool
- checking water quality
- testing and balancing water
- processes for:
  - reinstating a swimming pool and spa to safe operational condition after routine servicing
  - restoring work area after routine servicing
  - disposing of waste
  - cleaning and storing tools and equipment
  - providing client with information on compliance of swimming pool or spa and environs with safety legislation
  - completing workplace documents on routine maintenance of swimming pool or spa.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- work site/s and specifications to routinely maintain swimming pools and spas
- appropriate documents, SDSs, manufacturers' instructions, materials, tools, equipment and PPE currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

# CPPSPS3004 Maintain swimming pool and spa water circulation and filtration systems

## Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3004A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

## Application

This unit of competency specifies the skills and knowledge required to carry out routine maintenance of swimming pool and spa water circulation and filtration systems.

It includes:

- preparing for and carrying out maintenance to swimming pool and spa circulation and filtration systems
- assessing hazards and determining risk controls, including pool and spa safety barriers
- completing maintenance and minor repair activities, including work completion records.

It applies to swimming pool and spa technicians, and related industry professionals and specialists, with limited supervisory responsibilities who perform their duties alone or as members of a team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Swimming pool and spa servicing

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Prepare for	1.1 Review task requirements for routine maintenance of

<p>routine maintenance of swimming pool and spa water circulation and filtration systems.</p>	<p>swimming pool and spa water circulation and filtration systems.</p> <p>1.2 Review requirements of legislation relating to the task.</p> <p>1.3 Review work health and safety (WHS) requirements for the task, in accordance with safety plans, policies and safety data sheets (SDSs).</p> <p>1.4 Identify hazards, assess risks and determine and implement risk control measures including requirements for safety signage, barricade and personal protective equipment (PPE).</p> <p>1.5 Review environmental requirements for the task in accordance with environmental plans and legislative requirements.</p> <p>1.6 Inspect and assess swimming pool and spa water circulation and filtration systems and environs for operational effectiveness and safe operation against normal operating criteria.</p> <p>1.7 Select tools and equipment, check for serviceability and rectify or report any faults.</p> <p>1.8 Select materials for task and check against quality requirements.</p>
<p>2. Carry out routine maintenance of swimming pool and spa water circulation and filtration systems.</p>	<p>2.1 Carry out all work in accordance with task, workplace and legislative requirements.</p> <p>2.2 Implement identified risk control measures, including erecting safety signage and barricades, and fitting PPE.</p> <p>2.3 Carry out routine servicing of swimming pool and spa water circulation and filtration systems in accordance with manufacturers' specifications and workplace requirements.</p> <p>2.4 Identify faults in swimming pool and spa water circulation and filtration systems and make routine repairs or report faults and requirements for repairs.</p>
<p>3. Complete maintenance of swimming pool and spa water circulation and filtration systems.</p>	<p>3.1 Reinststate serviced swimming pool and spa water circulation and filtration systems to safe operational condition.</p> <p>3.2 Restore work area to original condition and check for and rectify or report safety hazards, dispose of waste in accordance with environmental requirements, and clean and store tools and equipment.</p> <p>3.3 Report for repair or replacement any malfunctions, faults, wear or damage to swimming pool and spa water circulation and filtration systems, environs, tools and equipment.</p> <p>3.4 Provide client with information on compliance with safety legislation of swimming pool and spa water circulation and filtration systems and environs.</p> <p>3.5 Complete and store work completion documentation.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- reading skills to:
  - interpret task documentation
  - understand written instructions, procedures and signs
  - access information in safety data sheets (SDSs)
  - interpret manufacturers' instructions and workplace requirements
- writing skills to report faults and record work completion information
- numeracy skills to interpret numerical information relating to routine swimming pool and spa water circulation and filtration systems maintenance
- oral communication skills to:
  - use questioning to identify and confirm requirements
  - provide client with information
  - report work site hazards.

## Unit Mapping Information

Supersedes and is equivalent to CPPSPS3004A Routinely maintain swimming pool and spa water circulation and filtration systems.

# Assessment Requirements for CPPSPS3004 Maintain swimming pool and spa water circulation and filtration systems

## Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3004A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

## Performance Evidence

To demonstrate competency in this unit, a person must perform routine maintenance of water circulation and filtration systems of each of two swimming pools and two spas.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- requirements of jurisdictional work health and safety and environmental legislation and regulations relating to routinely maintaining swimming pool and spa water circulation and filtration systems
- workplace requirements for undertaking all aspects of routinely maintaining swimming pool and spa water circulation and filtration systems, including:
  - work health and safety procedures
  - workplace emergency procedures
  - use of safety data sheets (SDSs)
  - safe handling of chemicals and equipment
  - emergency responses relating to hazardous materials and chemicals
  - interpreting work orders and reporting problems
- Australian Competition and Consumer Commission product safety guidelines and Commonwealth, state or territory legislation, and local government regulations, Australian Standards, and codes of practice impacting on the routine maintenance of swimming pool and spa water circulation and filtration systems relating to:
  - electrical and plumbing regulations controlling conduct of electrical and plumbing work
  - private and public swimming pools and spas
  - swimming pool and spa safety barriers
  - environmental health
  - waste disposal

- processes to identify hazards, assess risks and determine and implement risk control measures in routine maintenance of swimming pool and spa water circulation and filtration systems, including:
  - chemical hazards
  - electrical hazards
  - bacteria, viruses
  - bodily fluids
  - contaminated water and surfaces
  - working in confined spaces
- tools, materials and equipment used in routine maintenance of swimming pools and spas water circulation and filtration systems, their application and requirements for safe use
- personal protective equipment (PPE) requirements and use in routine maintenance of swimming pool and spa water circulation and filtration systems
- processes and requirements for inspection and assessment of swimming pool and spa water circulation and filtration systems for operational effectiveness and safe operation
- requirements for routine servicing of swimming pool and spa water circulation and filtration systems
- testing and overflow testing
- filtration principles
- flow rate
- direction suction
- types of filters
- filter area
- filter media changeover
- water removal
- swimming pool and spa water circulation and filtration systems' components, including:
  - circulation systems and pumps
  - control systems
  - dosing systems
  - gauges used to determine circulation performance
  - motors
  - piping
  - pressure side elements
  - suction side elements
  - valves
- processes for:
  - reporting faults, wear or damage
  - providing client with information on compliance of swimming pool and spa water circulation and filtration systems and environs with safety legislation
  - reinstating swimming pool and spa water circulation and filtration systems to safe operational condition after routine servicing
  - restoring work area after routine servicing

- disposing of waste
- cleaning and storing tools and equipment
- completing workplace documents on routine maintenance of swimming pool and spa water circulation and filtration systems
- differences between hot and cold-water chemistry.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

Release 1.

Supersedes and is equivalent to CPPSPS3007A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

## Performance Evidence

To demonstrate competency in this unit, a person must perform routine maintenance of the heating systems in each of two swimming pools and two spas.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- requirements of jurisdictional work health and safety and environmental legislation and regulations relating to routinely maintaining swimming pool and spa heating systems
- workplace requirements for undertaking all aspects of routinely maintaining swimming pool and spa heating systems, including:
  - work health and safety procedures
    - workplace emergency procedures
    - use of safety data sheets (SDSs)
    - emergency responses relating to hazardous materials and chemicals
    - interpreting work orders and reporting problems
- Australian Competition and Consumer Commission product safety guidelines and Commonwealth, state or territory legislation, and local government regulations, Australian Standards, and codes of practice impacting on the routine maintenance of swimming pool and spa heating systems relating to:
  - electrical and plumbing regulations controlling conduct of electrical and plumbing work
  - private and public swimming pools and spas
  - swimming pool and spa safety barriers
  - environmental health
  - waste disposal
- processes to identify hazards, assess risks and determine and implement risk control measures in routine maintenance of swimming pool and spa heating systems, including:

- chemical hazards
- electrical hazards
- bacteria, viruses
- bodily fluids
- contaminated water and surfaces
- working in confined spaces
- tools, materials and equipment used in routine maintenance of swimming pool and spa heating systems, their application and requirements for safe use
- personal protective equipment (PPE) requirements and use in routine maintenance of swimming pool and spa heating systems
- processes and requirements for inspection and assessment of swimming pool and spa heating systems for operational effectiveness and safe operation
- requirements for routine servicing of swimming pool and spa heating systems, including:
  - adjustments
  - cleaning
  - confirming operation
  - identifying worn parts
  - inspecting
  - lubricating
  - programming automated systems
  - replacing consumable or worn parts
  - routine repairs
  - testing
- swimming pool and spa heating systems equipment and tools, including:
  - communications equipment
  - computer and software
  - hand tools
  - ladders
  - lifting equipment
  - power tools
  - scaffolds
- swimming pool and spa heating systems, including:
  - gas
  - electric
  - heat exchangers
  - heat pumps
  - solar
  - freestanding
  - glazed
  - plastic

- roof-mounted
- rubber
- solar blankets
- processes for:
  - reporting faults, wear or damage
  - providing client with information on compliance with safety legislation of swimming pool and spa heating systems and environs
  - reinstating swimming pool and spa heating systems to safe operational condition after routine servicing
  - restoring work area after routine servicing
  - disposing of waste
  - cleaning and storing tools and equipment
  - providing client with information on compliance of swimming pool and spa heating systems and environs with safety legislation
  - completing workplace documents on routine maintenance of swimming pool and spa heating systems.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- work site/s and specifications for routine maintenance of swimming pool and spa heating systems
- appropriate documents, SDSs, manufacturers' instructions, materials, tools, equipment and PPE currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

# CPPSPS3008 Work in the swimming pool and spa servicing industry

## Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3008A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

## Application

This unit of competency specifies the skills and knowledge required to work in the swimming pool and spa servicing industry.

It includes:

- the basic entry-level functions that enable compliance with legislative requirements and industry
- complying with enterprise ethical standards and codes of conduct
- identifying own work role and responsibilities
- participating in a team
- identifying risks
- awareness of the environmental regulations and employment arrangements that apply to swimming pool and spa technicians.

It applies to swimming pool and spa technicians, and related industry professionals and specialists, with limited supervisory responsibilities who perform their duties alone or as members of a team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Swimming pool and spa servicing

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Comply with legislative and regulatory requirements for working in the swimming pool and spa servicing industry.	1.1 Identify and apply legislative and regulatory requirements for working in the swimming pool and spa servicing industry. 1.2 Confirm own understanding of legislative requirements for swimming pool and spa technicians with supervisor. 1.3 Identify situations requiring specialist advice to meet legislative requirements, and seek assistance as required. 1.4 Report breaches or potential breaches of legislative requirements.
2. Comply with ethical practices and codes of conduct while working as a swimming pool and spa technician.	2.1 Review and apply industry, business and association standards, and codes of ethics, practice and/or conduct. 2.2 Confirm own understanding of ethical and conduct requirements with supervisor 2.3 Identify and review situations requiring specialist advice and seek assistance as required.
3. Review own work role while working as a swimming pool and spa technician.	3.1 Identify own work role and responsibilities and confirm with supervisor. 3.2 Identify, schedule and complete work tasks within designated timeframes. 3.3 Seek feedback from clients and colleagues relating to own competence and performance and use to identify areas for improvement 3.4 Record and maintain information regarding learning and professional development in line with workplace requirements. 3.5 Complete and store work completion documentation.
4. Work as a member of a team.	4.1 Confirm team goals in accordance with workplace requirements. 4.2 Apply strategies to identify own role in the team, support other team members, and prevent conflict within the team. 4.3 Provide information to clients on compliance of swimming pool or spa and environs with safety legislation. 4.4 Give and receive feedback to assist the team to meet own, team and workplace goals.
5. Identify hazards and minimise risks involved in working as a	5.1 identify hazards, assess risks and determine and implement risk control measures. 5.2 Apply workplace policies and procedures for minimising

swimming pool and spa technician.	<p>risks.</p> <p>5.3 Provide information to clients on compliance of swimming pool or spa and environs with safety legislation.</p> <p>5.4 Identify and review own limitations in identifying risks, and seek assistance as required.</p>
6. Review industry employment requirements for working as a swimming pool and spa technician	<p>6.1 Access and review industry employment requirements to determine own professional development needs and priorities.</p> <p>6.2 Access and review employee and employer rights and responsibilities, including remuneration and employment conditions.</p> <p>6.3 Maintain organisational personal presentation standards.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- reading skills to:
  - interpret legislative and regulatory and workplace requirements
- writing skills to:
  - report breaches of requirements
  - record information on learning and professional development
  - record work completion information
- oral communication skills to:
  - seek specialist advice
  - confirm understanding with supervisor
  - communicate effectively with colleagues in a team
  - report potential risks
  - provide clients with information
  - seek feedback from clients and colleagues.

## Unit Mapping Information

Supersedes and is equivalent to CPPSPS3008A Work in the swimming pool and spa servicing industry.

## CPPSPS3009 Maintain swimming pool and spa stock

### Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3009A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

### Application

This unit of competency specifies the skills and knowledge required to order, receive, maintain and control swimming pool and spa stock.

It includes:

- sourcing and requisitioning stock
- receiving and storing stock
- controlling stock levels
- collecting and disposing of stock waste
- responding to emergency situations involving hazardous stock.

It applies to swimming pool and spa technicians, and related industry professionals and specialists, with limited supervisory responsibilities who perform their duties alone or as members of a team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Swimming pool and spa servicing

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Source and	1.1 Identify stock requirements.

requisition swimming pool and spa stock.	<p>1.2 Obtain and document information from suppliers on stock availability, cost and delivery capacity.</p> <p>1.3 Obtain approval for stock orders following workplace procedures to meet stock maintenance requirements</p> <p>1.4 Place and record orders for stock items with suppliers.</p>
2. Receive swimming pool and spa stock.	<p>2.1 Apply stock handling and storing procedures in accordance with legislative, manufacturers' and workplace requirements.</p> <p>2.2 Check stock quantities and quality with requirements of order and report discrepancies or unacceptable quality issues.</p> <p>2.3 Record stock receipt data.</p> <p>2.4 Manage deliveries of swimming pool and spa chemicals and other dangerous goods in accordance with safety requirements.</p> <p>2.5 Complete and maintain stock-control documentation and records.</p>
3. Store swimming pool and spa stock.	<p>3.1 Follow stock storage, transport and handling processes in accordance with safety requirements.</p> <p>3.2 Place stock placed on shelves or in storage locations in line with enterprise stock layout plan and in accordance with safety requirements.</p> <p>3.3 Separate, handle and store swimming pool and spa chemicals in accordance with workplace and safety requirements.</p> <p>3.4 Monitor and maintain storage conditions to ensure product integrity and compliance with legislative, manufacturers' and workplace requirements.</p> <p>3.5 Implement and follow workplace product-security procedures.</p>
4. Control swimming pool and spa stock levels.	<p>4.1 Identify and record working stock levels.</p> <p>4.2 Implement and apply stock-control procedures to maintain working stock levels.</p> <p>4.3 Implement and apply stocktaking procedures to conduct a stock take.</p> <p>4.4 Identify, investigate, record, resolve and stock discrepancies.</p>
5. Collect and dispose of swimming pool and spa stock waste.	<p>5.1 Identify, label and process expired, damaged and returned stock following enterprise procedures</p> <p>5.2 Dispose of expired, damaged and returned stock following with enterprise disposal procedures and legislative requirements.</p> <p>5.3 Update stock records following return of stock or after</p>

	disposal of expired and damaged stock.
6. Respond to emergency situations involving hazardous swimming pool and spa stock.	<p>6.1 Respond to accidental spillages and emergency situations following emergency response procedures and complying with environmental, legislative and workplace requirements.</p> <p>6.2 Complete regulatory and workplace documentation required in response to accidental leakages and emergency situations.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- reading skills to interpret:
  - stock requirements
  - information from suppliers
  - workplace and legislative requirements
- writing skills to:
  - place and record stock orders
  - record information on receiving and storing stock, and stock levels
  - record details of accidental spillages and emergency situations
- numeracy skills to calculate stock quantities during ordering, receipt and storage
- oral communication skills to communicate effectively with colleagues and suppliers
- technology skills to use computerised stock control systems.

## Unit Mapping Information

Supersedes and is equivalent to CPPSPS3009A Maintain swimming pool and spa stock.

# Assessment Requirements for CPPSPS3009 Maintain swimming pool and spa stock

## Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3009A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

## Performance Evidence

To demonstrate competency in this unit, a person must maintain swimming pool and spa stock in a one swimming pool and spa service and retail organisation.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- requirements of jurisdictional legislation and regulations relating to maintaining swimming pool and spa stock, including those for work health and safety (WHS) and protection of the environment
- workplace procedures for maintaining swimming pool and spa stock, including interpreting work orders and reporting problems
- Australian Competition and Consumer Commission product safety guidelines
- Commonwealth, state or territory legislation, and local government regulations, Australian standards, and codes of practice impacting on swimming pool and spa stocks and supplies relating to:
  - chemicals
  - dangerous goods
  - emergencies
  - private and public swimming pools and spas
  - product recall
  - WHS
- stock databases and information systems to support management of supplier information and goods requisition
- processes for:
  - identifying swimming pool and spa stock requirements
  - obtaining and documenting information on swimming pool and spa stock from suppliers

- obtaining approval for swimming pool and spa stock orders
- placing and recording orders for swimming pool and spa stock
- safely receiving, checking, handling, storing and recording deliveries of swimming pool and spa stock
- using and maintaining stock control and stocktaking systems
- safely handling and storing swimming pool and spa chemicals, including:
  - documentation requirements
  - emergency response procedures
  - equipment types and functions
  - handling and storage requirements
  - hazards and risks of storing, preparing, using and disposing of chemicals
  - injury, dangerous occurrence and incident reporting requirements
- securely maintaining storage conditions
- responding to emergency situations involving hazardous swimming pool and spa stock, and completing records of responses
- stock layout and storage locations and conditions for swimming pool and spa stock items
- product knowledge, including manufacturers' specifications for equipment and chemicals being used
- routes of entry to storage areas and potential symptoms of exposure from chemicals
- types of swimming pool and spa chemicals.
- HAZCHEM code system
- WHS and environmental management issues and processes relating to the handling and disposal of swimming pool and spa stock.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- work site/s and specifications to maintain swimming pool and spa stock
- swimming pool and spa stock-control system
- appropriate documents, safety data sheets (SDSs), tools, equipment and PPE currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

## CPPSPS3010 Sell swimming pool and spa products and services

### Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3010A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

### Application

This unit of competency specifies the skills and knowledge required to sell swimming pool and spa products and services. It involves applying selling skills and knowledge of swimming pool and spa products and services to meet customers' needs.

It applies to swimming pool and spa technicians, and related industry professionals and specialists, with limited supervisory responsibilities who perform their duties alone or as members of a team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Swimming pool and spa servicing

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Prepare for selling swimming pool and spa products and services.	1.1 Review own swimming pool and spa product and service knowledge. 1.2 Review own knowledge of the types, applications, features and benefits of swimming pool and spa products and services.
2. Determine customer	2.1 Determine and apply type and timing of approach to customer, taking into account customer and workplace

<p>requirements for swimming pool and spa products and services</p>	<p>requirements.</p> <p>2.2 Determine and apply appropriate sales approach to customer.</p> <p>2.3 Apply questioning techniques to determine and confirm customer-buying motives for swimming pool and spa products and services.</p> <p>2.4 Apply listening skills to determine and confirm customer requirements for swimming pool and spa products and services.</p> <p>2.5 Interpret customer non-verbal communication cues to determine and confirm customer requirements for swimming pool and spa products and services.</p>
<p>3. Apply sales strategies.</p>	<p>3.1 Match customer motives and requirements to swimming pool and spa products and services.</p> <p>3.2 Clearly communicate features and benefits of swimming pool and spa products and services to customer.</p> <p>3.3 Clearly communicate swimming pool and spa product use and safety requirements to customer</p> <p>3.4 Provide customer with manufacturers' and promotional information on swimming pool products and services.</p> <p>3.5 Refer customer to product and service specialists as required.</p> <p>3.6 Respond to customer questions about swimming pool and spa products and services accurately and honestly or refer to other staff for response.</p>
<p>4. Close sale of swimming pool and spa products and services.</p>	<p>4.1 Identify and monitor customer buying signals and respond appropriately.</p> <p>4.2 Acknowledge customer objections and offer solutions.</p> <p>4.3 Encourage customer to make purchase decisions.</p> <p>4.4 Select and apply appropriate method of closing sale.</p> <p>4.5 Process order and/or payment for swimming pool or spa product or service using ordering or point-of-sale systems, as required.</p>
<p>5. Maximise sale opportunities.</p>	<p>5.1 Identify and maximise opportunities for making additional sales.</p> <p>5.2 Review sales process, outcomes and feedback to develop changes to maximise future sales.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- reading skills to access and interpret product information for swimming pool and spa products and services
- writing skills to complete information, and sales and delivery documentation for swimming pool and spa products and services
- numeracy skills to interpret routine numerical and graphical information relating to price and specifications of swimming pool and spa products and services
- oral communication skills to ask questions to clarify customer requirements for swimming pool and spa products and services
- technology skills to:
  - use business technologies
  - access swimming pool and spa products information
  - access and update electronic documents
  - search on-line databases.

## Unit Mapping Information

Supersedes and is equivalent to CPPSPS3010A Sell swimming pool and spa products and services.

# Assessment Requirements for CPPSPS3010 Sell swimming pool and spa products and services

## Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3010A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

## Performance Evidence

To demonstrate competency in this unit, a person must successfully sell swimming pool and spa products and services, including each of:

- one swimming pool product
- one spa product
- one swimming pool or spa service.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- requirements of jurisdictional legislation and regulations relating to selling swimming pool and spa products and services, including those for work health and safety (WHS) and protection of the environment
- workplace procedures for selling swimming pool and spa products and services, including interpreting work orders and reporting problems
- Australian Competition and Consumer Commission product safety guidelines
- Commonwealth, state or territory legislation, and local government regulations impacting on the sale of swimming pool and spa products and services relating to:
  - consumer protection
  - dangerous goods
  - swimming pool and spa chemicals
  - environmental protection
  - health
  - work health and safety (WHS)
  - waste disposal
- processes for developing, documenting and demonstrating swimming pool and spa product service knowledge

- techniques for types and timing of sales approaches to customers for swimming pool and spa products and services
- customer service principles applicable to customers for swimming pool and spa products and services
- theories of customer types, characteristics and behaviours applicable to customers for swimming pool and spa products and services, including:
  - customer behaviour and cues
  - customer buying motives
  - demographics, lifestyle and income range of potential buyers
  - individual and cultural differences
  - types of customer needs:
    - environmental
    - functional
    - psychological
- questioning techniques, listening skills and non-verbal communication skills applicable to customers for swimming pool and spa products and services
- techniques for communicating features and benefits of swimming pool and spa products and services to customers
- sources of information on swimming pool and spa products and services, including:
  - demonstrations
  - enterprise manuals
  - franchise and business meetings
  - internet
  - product labels
  - product profiles
  - promotional materials
  - staff members:
    - business owner
    - field staff
    - senior sales staff
  - supplier manuals
  - suppliers and their representatives
  - trade displays and trade conferences
  - training programs
  - videos
  - on-line databases, websites and information
- knowledge of features and benefits of workplace swimming pool and spa product and service range
- swimming pool and spa products and services, including:
  - components, spare parts and consumable items for swimming pool and spa systems
  - swimming pool and spa equipment and accessories

- 
- swimming pool and spa maintenance, service and repair
  - swimming pool and spa toys
  - swimming pool and spa chemicals
  - technical advice on swimming pool or spa
  - water testing services
  - water testing kits
  - swimming pool and spa product and service knowledge, including:
    - after-sales service and support of product or service
    - application of product or service
    - availability of product or service
    - benefits of product or service
    - common faults and troubleshooting of product or service
    - comparative products and services
    - consumer reports on product or service
    - environmental protection relating to product or service
    - features of product or service
    - installation and set-up of product or service
    - legislative and regulatory requirements relating to product or service
    - manufacturer requirements relating to product or service
    - operation of product or service
    - potential hazards of product or service
    - price of product or service
    - risks associated with product or service
    - safe handling, transport, disposal and storage requirements of product or service
    - safety features and requirements of product or service
    - servicing requirements of product or service
    - time-saving features of product or service
    - use-by dates of product or service
    - warranties of product or service
  - components, spare parts and consumable items for swimming pool and spa systems, including:
    - circulation and filtration
    - cleaning and vacuuming
    - dosing
    - heating
    - lighting
    - spa equipment
    - swimming pool and spa accessories
    - swimming pool and spa maintenance, service and repair
    - swimming pool and spa toys

- swimming pool and spa chemicals
- technical advice on swimming pools and spas
- water testing services
- water testing kits
- techniques for closing sales of swimming pool and spa products and services and for making additional sales
- procedures for processing different methods of placing orders or payment
- operation of point-of-sale systems
- processes for reviewing sales process, outcomes and feedback and using the results to improve sales performance.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- work site/s and specifications to sell swimming pool and spa products and services
- appropriate documents, safety data sheets (SDSs), and product and service information currently used in industry
- access to product and service on-line data
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

# CPPSPS3011 Use and maintain business technology related to swimming pool and spa servicing

## Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3011A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

## Application

This unit of competency specifies the skills and knowledge required to select, use and maintain a range of business technology equipment to support swimming pool and spa servicing.

It applies to swimming pool and spa technicians, and related industry professionals and specialists, with limited supervisory responsibilities who perform their duties alone or as members of a team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement

## Pre-requisite Unit

Nil

## Unit Sector

Swimming pool and spa servicing

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Prepare to use business technology related to swimming pool and spa servicing.	1.1 Identify swimming pool and spa servicing task that requires use of business technology equipment. 1.2 Select business technology equipment related to swimming pool and spa servicing to achieve task requirements. 1.3 Identify and review manuals, training booklets and/or

	online help or help-desks to support use of business technology equipment related to swimming pool and spa servicing.
2. Operate business technology related to swimming pool and spa servicing.	<p>2.1 Identify and apply work health and safety (WHS) requirements relating to operation of swimming pool and spa servicing business technology equipment.</p> <p>2.2 Access manuals, training booklets and/or online help or help-desks to assist with use of business technology equipment.</p> <p>2.3 Operate business technology equipment following manufacturers' instructions.</p> <p>2.4 Where required, interpret results from application of business technology equipment following manufacturers' instructions.</p>
3. Maintain business technology related to swimming pool and spa servicing.	<p>3.1 Follow workplace procedures to check business technology equipment for serviceability and arrange service or repair if required.</p> <p>3.2 Perform routine maintenance of business technology equipment in accordance with maintenance schedule and within own work responsibility</p> <p>3.3 Store business technology equipment safely and securely.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- reading skills to access and interpret manufacturers' instructions for business technology equipment relating to swimming pool and spa servicing
- writing skills to complete documentation relating to swimming pool and spa servicing relating to use of business technology equipment
- numeracy skills to interpret routine numerical and graphical information relating to business technology equipment involved in swimming pool and spa servicing
- oral communication skills to ask questions to clarify applications of business technology equipment relating to swimming pool and spa servicing
- technology skills to use business technology equipment to access information relating to swimming pool and spa servicing.

## Unit Mapping Information

Supersedes and is equivalent to CPPSPS3011A Use and maintain business technology related to swimming pool and spa servicing.

# Assessment Requirements for CPPSPS3011 Use and maintain business technology related to swimming pool and spa servicing

## Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3011A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

## Performance Evidence

To demonstrate competency in this unit, a person must use and maintain business technology equipment related to swimming pool and spa servicing, including using and maintaining three pieces of equipment in completing work tasks associated with swimming pool and spa servicing.

One piece of equipment must be selected from each of the following three lists:

- general business equipment (select 1):
  - digital camera
  - electronic diary or scheduler
  - electronic tablet
  - global positioning system (GPS)
  - laptop or personal computer
  - modem
  - printer
  - smart phone
  - mobile device
- point-of-sale equipment (select 1):
  - cash register
  - EFTPOS equipment
  - scanner
- swimming pool and spa-specific equipment (select 1):
  - chlorometer
  - digital water testing device
  - electronic stopwatch
  - electronic thermometer
  - photometer
  - pool management software package.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- requirements of jurisdictional legislation and regulations relating to using and maintaining business technology equipment related to swimming pool and spa servicing, including those for work health and safety (WHS) and protection of the environment
- workplace procedures for using and maintaining business technology equipment related to swimming pool and spa servicing, including interpreting work orders and reporting problems
  - equipment manuals
  - training programs
  - videos
  - on-line information
- processes to access and use:
  - information in manuals, training booklets and/or online help or help-desks to support use of business technology related to swimming pool and spa servicing
  - items of business technology for tasks commonly undertaken in the swimming pool and spa servicing industry
- use, maintenance and storage procedures for:
  - general business technology related to swimming pool and spa servicing
  - point-of-sale equipment related to swimming pool and spa servicing
  - swimming pool and spa-specific equipment.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- work site/s and specifications to using and maintaining business technology equipment related to swimming pool and spa servicing
- appropriate documents, safety data sheets (SDSs) and business technology equipment currently used in industry
- business technology equipment use and maintenance information
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

# CPPSPS3012 Access and apply information from swimming pool and spa technical manuals

## Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3012A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

## Application

This unit of competency specifies the skills and knowledge required to access information from technical manuals required for the servicing of swimming pools and spas, and apply the information during servicing work.

It applies to swimming pool and spa technicians, and related industry professionals and specialists, with limited supervisory responsibilities who perform their duties alone or as members of a team.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Swimming pool and spa servicing

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Identify and access swimming pool and spa technical manuals.	1.1 Identify swimming pool or spa components and systems to be maintained serviced in servicing task. 1.2 Access manuals for the swimming pool or spa components and systems to be maintained or repaired. 1.3 Establish version status of swimming pool and spa technical manuals to ensure that correct specifications and

	<p>procedures are applied.</p> <p>1.4 Follow storage, back-up and retrieval procedures for manuals.</p>
<p>2. Interpret and apply information in swimming pool and spa technical manuals.</p>	<p>2.1 Locate required technical information using search techniques appropriate to type of swimming pool and spa technical manual and work to be carried out.</p> <p>2.2 Obtain clarification or further explanation of technical information from swimming pool and spa technical manuals where required.</p> <p>2.3 Carry out procedures in line with the information in technical manuals for the swimming pool or spa components or systems to be maintained or serviced.</p>

## Foundation Skills

A person demonstrating competency in this unit must have the following language, literacy, numeracy and employment skills:

- reading skills to access and interpret technical manuals relating to swimming pool and spa servicing
- numeracy skills to interpret complex numerical and graphical information relating to swimming pool and spa servicing located in technical manuals
- technology skills to use on-line technical manuals relating to swimming pool and spa servicing.

## Unit Mapping Information

Supersedes and is equivalent to CPPSPS3012A Read and apply information from swimming pool and spa technical manuals.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSPS3012 Access and apply information from swimming pool and spa technical manuals

## Modification History

Release 1.

Supersedes and is equivalent to CPPSPS3012A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.0.

## Performance Evidence

To demonstrate competency in this unit, a person must access and use information in swimming pool and spa technical manuals to carry out maintenance or repair of:

- one swimming pool component or system
- one spa component or system.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- workplace procedures for undertaking repairs to swimming pool and spa components and systems using information from technical manuals, including interpreting work orders and reporting problems
- processes for accessing and interpreting work tasks relating to repairs to swimming pool and spa components and systems from work instructions
- techniques for searching for information and data in swimming pool and spa technical manuals in the following media:
  - digital
  - print
- processes for accessing and interpreting version control information in swimming pool and spa technical manuals
- processes for accessing, storing, backing up and retrieving swimming pool and spa technical manuals
- techniques for locating information in swimming pool and spa technical manuals
- symbols, codes, legends and abbreviations used in swimming pool and spa technical manuals
- types of information found in swimming pool and spa technical manuals
- sources of clarification of technical information found in swimming pool and spa technical manuals.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- work site/s and specifications to access and apply information from swimming pool and spa technical manuals
- access to printed and on-line technical manuals
- relevant workplace policies and procedures.

## CUAACD301 Produce drawings to communicate ideas

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

### Application

This unit describes the skills and knowledge required to produce drawings that represent and communicate ideas. It does not relate to drawing as an art form.

It applies to individuals who use drawings, either electronic or hand drawn, for personal use or in response to a project or brief. Drawings may include design concepts for objects, processes or spaces, movement sequences for performances or screen productions, exhibitions, tenders, proposals or publications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual communication – art, craft and design

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan drawing work	1.1 Identify drawing requirements from reference material and confirm with appropriate people if required 1.2 Identify factors, including contractual, legal and ethical factors, that may impact on how drawing work is undertaken 1.3 Gather information about drawing techniques, materials and equipment from a range of sources and determine how they may be used to communicate ideas

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	1.4 Evaluate information for its application to specific drawing briefs
2. Experiment to represent ideas	2.1 Explore the capabilities of techniques, materials and equipment 2.2 Follow safety procedures for particular techniques, materials and equipment 2.3 Select approaches that best suit the purpose of drawings and their presentation context
3. Create drawings	3.1 Organise materials, tools and equipment for selected techniques 3.2 Produce preliminary drawings and discuss their effectiveness with relevant people 3.3 Confirm intellectual property and other relevant legislative requirements are met 3.4 Finalise drawings, incorporating feedback on work in progress as required 3.5 Prepare drawings for the presentation context

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Reading	1.1, 1.2, 1.4	<ul style="list-style-type: none"> <li>Interprets information from familiar sources to determine drawing production requirements and legal and safety constraints</li> </ul>
Oral Communication	1.1, 1.2, 3.2	<ul style="list-style-type: none"> <li>Uses questioning and active listening to gather information and opinions from others</li> </ul>
Navigate the world of work	1.2, 2.2, 3.3	<ul style="list-style-type: none"> <li>Complies with legal, ethical and safety requirements associated with creative work</li> </ul>
Interact with others	3.2	<ul style="list-style-type: none"> <li>Uses accepted practices and protocols in discussions of work progress with others</li> </ul>
Get the work done	1.2, 1.3, 2.1, 2.2, 2.3, 3.1, 3.4, 3.5	<ul style="list-style-type: none"> <li>Identifies and organises relevant information and resource requirements</li> <li>Analyses drawing requirements and tests the</li> </ul>

		<p>capabilities of materials, tools and equipment to determine the most appropriate approach for final production</p> <ul style="list-style-type: none"> <li>• Refine drawings in response to feedback and presentation requirements</li> </ul>
--	--	---

# Assessment Requirements for CUAACD301 Produce drawings to communicate ideas

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

## Performance Evidence

Evidence of the ability to:

- identify and analyse drawing requirements
- explore techniques, materials and equipment safely
- produce a series of drawings that:
  - show a command of selected techniques
  - successfully communicate the required ideas.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe physical properties and capabilities of the range of materials, tools and equipment used in drawing
- identify sources of information about different approaches to drawing
- identify work health and safety issues associated with tools and materials used for drawing
- explain intellectual property issues and other legislation relevant to drawing.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- equipment and materials required to produce drawings
- information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## FBPAUD4003 Conduct food safety audits

### Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

### Application

This unit of competency describes the skills and knowledge required to verify and confirm validation of food safety programs in the context of food safety legislation and client requirements.

This unit applies to individuals who conduct on-site audits, and is relevant to regulatory and commercial food safety system auditors who may be auditing food safety in various contexts.

This unit supports relevant legislation, including food standards included in the Australia New Zealand Food Standards Code, industry codes of practice relating to validation and verification of a food safety program, and the audit requirements detailed in the National Regulatory Food Safety Auditor Guideline and Policy, and should be read in conjunction with these documents.

Regulatory food safety audits in Australia are covered by state/territory legislative frameworks that support the requirements of the National Food Safety Audit Policy 2009.

### Pre-requisite Unit

Nil

### Unit Sector

Food safety auditing (AUD)

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Define the scope of the audit	1.1 Identify audit scope and define the extent of the audit to meet legislative and audit client requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Ensure audit criteria meet legislative and client requirements 1.3 Ensure the definition and levels of non-conformity and related reporting responsibilities are identified as consistent with legislative requirements and client requirements 1.4 Identify evidence required to address audit scope and criteria, and select appropriate collection methods 1.5 Review food safety management system documents to determine adequacy for the purposes of the audit
2. Plan the audit	2.1 Develop an audit plan that includes definitions and levels of non-conformity to meet the audit scope 2.2 Identify activities and responsibilities for the audit 2.3 Identify audit timing, including timetable for each stage of the audit 2.4 Identify resource, personnel and reporting requirements 2.5 Identify follow-up and completion procedures 2.6 Establish communication protocols to facilitate the effective exchange of information and suited to the auditee environment
3. Conduct the audit	3.1 Communicate information on the audit scope and methodology in an effective and timely manner 3.2 Follow stages and activities of the audit process 3.3 Review methods used by the food business to carry out preliminary work, identify food safety hazards and assess level of risk to confirm that they are appropriate and correctly applied 3.4 Identify and evaluate evidence used by the food business to support identification of control measures and establish control limits to determine adequacy and relevance 3.5 Review methods used by the food business to control hazards and determine corrective action where processes are identified as not meeting targets or critical limits to confirm they are adequate, effective and appropriate 3.6 Collect evidence to confirm that the documented food safety policies and procedures are working effectively, reflect actual practice and are consistently applied
4. Manage the audit	4.1 Monitor audit progress against the audit plan, and identify and

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
process	<p>address any variation to plan</p> <p>4.2 Identify and negotiate circumstances requiring the audit plan to be adjusted in a timely manner</p> <p>4.3 Ensure audits address audit scope and are conducted within time and resource constraints to meet quality and professional standards</p> <p>4.4 Review the audit process to identify opportunities for improvement</p>
5. Consolidate audit outcomes	<p>5.1 Analyse and assess evidence to identify any areas of non-compliance with legislation and/or client requirements as appropriate to the audit scope</p> <p>5.2 Identify and classify non-conformities as agreed by the audit plan</p> <p>5.3 Report non-conformities according to agreed client and/or legislative requirements</p> <p>5.4 Communicate audit findings to the auditee</p> <p>5.5 Prepare and submit audit reports and/or certificates or present as required to meet regulatory and client requirements</p> <p>5.6 Review corrective actions proposed by the auditee in response to non-conformances for compliance with the template or food safety program</p> <p>5.7 Review audit findings to confirm that evidence is appropriate and sufficient and findings are accurate</p> <p>5.8 Review the food safety management system to identify areas of potential improvement of the system according to audit scope</p>
6. Confirm and close out corrective actions	<p>6.1 Monitor and verify implementation and effectiveness of corrective actions, and identify and address any variation to the food safety plan</p> <p>6.2 Maintain audit records to record corrective actions</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

<b>Skill</b>	<b>Description</b>
--------------	--------------------

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Interpret legislation and audit guidelines</li> </ul>
Interact with others	<ul style="list-style-type: none"> <li>Select and use communication strategies appropriate for purpose when interacting with work colleagues and customers</li> </ul>
Get the work done	<ul style="list-style-type: none"> <li>Use problem-solving skills to identify and analyse non-conformance</li> </ul>

# Assessment Requirements for FBPAUD4003 Conduct food safety audits

## Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

## Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has effectively planned and conducted a food safety audit, for a minimum of one client, that complies with legal and client requirements, including:

- preparing audit documentation
- preparing a final audit report that refers to:
  - non-conformity reports
  - corrective action reports
  - follow-up reports
  - suggestions for improvements to the food safety management system and to the audit process.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- auditor roles and responsibilities, including:
  - audit activities and stages, including guidelines on audit stages and activities as outlined in International Organization for Standardization (ISO) 19011:2011
  - personal attributes required of food safety auditors, including those outlined in ISO 19011:2011, and additional client requirements where required
  - role, responsibilities and powers of enforcement agencies, authorised officers and commercial auditors, including reporting responsibilities, legal liability of auditors and delegation of authority to commercial auditors as may apply in some states and territories

- relevant competencies and certification/registration criteria and processes applying to both regulatory and commercial auditors
- audit management to develop and implement an audit against an agreed plan, including the scope/level of authority to revise the resource and allocate time allocations to take account of variation to plan
- food safety management systems, including:
  - purpose and intent of each element of a food safety management system
  - the underlying principles of risk-based approaches to controlling food safety hazards, including using critical control points as described in the Codex Alimentarius Guidelines
  - vocabulary and terms relating to food safety, including terms and jargon to describe technical processes, industry standards and common biological and chemical terms
  - food safety management system knowledge relevant to the system being audited, including system requirements, definitions and levels of non-compliance and related reporting responsibilities as defined by legal and management system requirements
  - the interaction between different types of management systems, including the impact of food safety decisions on other management systems, including workplace health and safety, quality, environmental risk management and animal welfare
  - technical knowledge required to assess the adequacy of the food safety management system performance and corrective actions
  - role of prerequisite programs in controlling hazards, including the relationship between prerequisite programs and risk-based approaches, including using critical control points to control food safety hazards
  - information handling and management system protocols, including rights of access to information, maintenance of confidentiality of audit information and reports and information dissemination requirements
- food safety legislation, including:
  - the purpose and intent of food safety legislation, including sources of information on importing country requirements and of requirements of countries and retailer driven systems in importing markets
  - the content covered by the Australia New Zealand Food Standards Code and/or other relevant standards
  - the structure and responsibilities of Commonwealth, state and territory government departments and local government to manage and implement food safety legislation, including where to find information on relevant Commonwealth, state/territory legislative requirements, product or industry sector legislation and regulations and import and export market requirements
  - the regulatory framework and specific legislation relevant to the audit, including relevant risk profiling or classification systems where they apply
  - sources of information on legislation and codes governing primary production and primary processing
  - requirements for scheduling and conducting further auditing as determined by food safety legislation and/or client system requirements

- legal liability of auditors and protection against litigation and professional practice issues, including the circumstances under which an auditor could be prosecuted, and insurance requirements
- the role of auditors when called on to provide evidence as a witness in court
- food safety audit processes, including:
  - preliminary work required to identify food to be covered by the food safety program, define the food and the method of distribution, identify customers and intended use of food, describe the process (flow chart) and check accuracy and completeness
  - methods used to identify food safety hazards and assess food safety hazard risk levels, taking account of severity and likelihood of occurrence
  - methods used to identify critical control points and establish critical limits, suited to the nature of the hazard, the requirements of the audit and the industry sector
  - methods used to validate control techniques and critical limits, including industry or sector codes of practice, technical standards and research
  - types of evidence, including the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
  - evidence collection methods, including record sampling and sample analysis, the evidence collection options relevant to a given audit situation, the reliability of each collection method and the range and extent of evidence collection methods required to ensure that audit outcomes are objective, consistent, fair and reliable
  - methods to assess skill requirements and options to confirm that the responsible personnel within the food business have the required skills and knowledge of food safety and food hygiene relevant to the food business
  - circumstances, implications and responsibilities in the event that the auditee requests that the audit ceases
  - circumstances and authority of an auditor to initiate cessation of an audit
  - the context in which audits are conducted, including workplace culture and preferred communication methods, industry, process and/or product knowledge and related jargon
  - requirements for recording audit information and reporting.

## Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - plant and equipment that would typically be used in a commercial food manufacturing business
- specifications:
  - food safety plans

- food safety-related documentation typical of commercial food manufacturing businesses and used for the purpose of verification
- evidence and documentation relevant to processes that would typically be used by commercial manufacturing businesses to support validation processes.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## FNSMCA303 Serve legal process

### Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to investigate and analyse client requirements for preparing legal documentation and serving legal processes.

It applies to individuals who are required to serve legal process as part of their role as a mercantile agent within financial services organisations of any size or location.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the FNS Implementation Guide Companion Volume or the relevant regulator for specific guidance on requirements.

### Unit Sector

Mercantile agents

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare procedures	1.1 Interpret and confirm client's written instructions accurately and clearly 1.2 Identify relevant legal and procedural issues for consideration and action, in accordance with legislative requirements and organisational policy and procedures 1.3 Identify type of service according to nature of debt or legal process and prepare necessary documentation

ELEMENT	PERFORMANCE CRITERIA
2. Serve documents	<p>2.1 Verify validity of documentation by checking contents and number of documents for service</p> <p>2.2 Serve documents according to legal requirements and appropriate organisational policy and procedures</p>
3. Prepare affidavit of service or non-service	<p>3.1 Prepare Affidavit of Service, or Non-Service where applicable, with relevant factual details recorded in affidavit</p> <p>3.2 Complete any other relevant court documents, ensuring they are signed and sworn, or affirmed, in accordance with court requirements and procedures</p> <p>3.3 Prepare final report for client detailing outcome of serving legal process</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2	<ul style="list-style-type: none"> <li>Interprets documentation from a variety of sources</li> <li>Checks documentation to ensure accuracy and compliance with legal and ethical principles and obligations</li> </ul>
Writing	3.1, 3.2, 3.3	<ul style="list-style-type: none"> <li>Records, gathers and consolidates client requirements</li> <li>Drafts reports and letters, and completes legal documentation</li> </ul>
Navigate the world of work	1.2, 2.2, 3.1, 3.2	<ul style="list-style-type: none"> <li>Takes responsibility for adhering to organisational policy, procedures and specified legal requirements relevant to own work context</li> </ul>
Get the work done	1.1-1.3, 2.1, 2.2, 3.1-3.3	<ul style="list-style-type: none"> <li>Clearly and thoroughly analyses information and tasks, and then plans strategies and actions to achieve optimal outcomes within given parameters</li> <li>Adopts efficient and effective organisational and time management skills to sequence tasks, meet timelines and arrange meetings</li> <li>Takes responsibility for the outcomes of routine decisions related directly to own role</li> <li>Initiates standard procedures when responding to familiar</li> </ul>

		<p>problems within own work context</p> <ul style="list-style-type: none"> <li>• Uses digitally based technologies and software packages to complete work requirements</li> </ul>

## Assessment Requirements for FNSMCA303 Serve legal process

### Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- interpret and comply with legislative requirements, industry regulations and organisational policy and procedures when serving legal process
- identify the appropriate type of service when serving legal process
- complete relevant documentation in accordance with legal, industry and organisational requirements and guidelines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify key requirements of relevant state or territory and Commonwealth legislation relating to debt collection and mercantile agents
- outline the key role, procedures and relevant documentation of the various relevant court jurisdictions and appeals procedures
- explain organisational policy and procedures in relation to serving legal process
- describe techniques of search and locating debtors to serve
- explain the types of services that can be offered to clients when serving legal process
- outline relevant factual details that would be recorded in an affidavit.

### Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the mercantile agents field of work and include access to:

- office equipment, technology, software and consumables
- relevant legal and industry documentation for process serving.

Assessors must satisfy NVR/AQTF assessor requirements.

## FNSORG501 Develop and manage a budget

### Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to collect and analyse information and apply sound accounting principles to the development and ongoing management of a budget for a small organisation or section of a large organisation.

It applies to individuals who use a range of specialist and managerial techniques to plan, monitor and control budgetary work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Organisational skills

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for and collect information for budget	<p>1.1 Determine and confirm areas for which budget is being prepared with appropriate personnel, and identify, access and analyse data required for development of budget</p> <p>1.2 Determine budget parameters with estimates based on research, consultation and negotiation with appropriate personnel</p> <p>1.3 Consult relevant colleagues in budget planning process as required</p>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
2. Develop budget	<p>2.1 Draft budget based on analysis of all available information in accordance with organisational policy</p> <p>2.2 Identify and support income and expenditure estimates with reliable information and circulate draft budget for comment</p>
3. Finalise budget and allocate resources	<p>3.1 Provide final budget which incorporates agreed modifications to appropriate personnel</p> <p>3.2 Inform personnel affected by budget of its limits and goals in their work area and clarify financial management and reporting responsibilities</p> <p>3.3 Obtain agreement to budget priorities and allocate resources</p>
4. Monitor and control budget	<p>4.1 Check actual income and expenditure against budget at regular intervals, and prepare and present budget reports to appropriate personnel</p> <p>4.2 Identify and respond to deviations, take appropriate action and advise relevant personnel on budget status</p>
5. Complete financial and statistical reports	<p>5.1 Complete all required financial and statistical reports accurately within designated timelines</p> <p>5.2 Make appropriate recommendations about future financial planning</p> <p>5.3 Provide clearly presented and accurate reports to appropriate personnel</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Reading	1.1, 1.2, 2.1, 2.2, 4.1, 4.2	<ul style="list-style-type: none"> <li>Extracts, analyses and monitors complex textual information from a range of sources to determine relevance, accuracy and compliance with organisational policy</li> </ul>
Writing	1.1, 1.3, 2.1, 2.2, 3.1, 3.2, 4.2, 5.1, 5.2, 5.3	<ul style="list-style-type: none"> <li>Analyses and compiles numerical data and text information to convey specific information and recommendations accurately and effectively to others using clear and detailed language</li> </ul>

		<ul style="list-style-type: none"> <li>Demonstrates effective control of text types required by financial and statistical report conventions and documentation</li> </ul>
Oral Communication	1.1 -1.3, 3.2, 3.3, 4.1, 4.2, 5.2	<ul style="list-style-type: none"> <li>Participates in verbal exchanges of information, demonstrating control of a range of oral techniques to elicit the views and opinions of others and confirm understanding</li> <li>Clearly articulates requirements and outcomes using language, tone and pace appropriate to the audience and environment</li> </ul>
Numeracy	1.1, 1.2, 2.1, 2.2, 3.1, 4.1, 4.2, 5.1, 5.3	<ul style="list-style-type: none"> <li>Interprets, analyses and uses numerically expressed data to effectively prepare, monitor, amend and present accurate budgetary information</li> </ul>
Navigate the world of work	2.1, 3.2, 5.1	<ul style="list-style-type: none"> <li>Works independently and collectively in making decisions about budget requirements in accordance with organisational policy</li> </ul>
Interact with others	1.1-1.3, 2.2, 3.1, 3.2, 4.1, 5.3	<ul style="list-style-type: none"> <li>Selects and uses appropriate conventions and protocols to gain and provide relevant budgetary information</li> <li>Plays a lead role in situations requiring effective collaborative skills, demonstrating high level negotiation skills and ability to gather information through consultation</li> </ul>
Get the work done	1.1, 1.2, 2.1, 3.3, 4.1, 4.2, 5.1, 5.2	<ul style="list-style-type: none"> <li>Accepts responsibility for planning and sequencing complex tasks and workload</li> <li>Applies systematic and analytical decision-making processes to make recommendations in complex and non-routine situations</li> <li>Uses digital technologies to access, extract and share relevant information to achieve required outcomes</li> </ul>

# Assessment Requirements for FNSORG501 Develop and manage a budget

## Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- collect and accurately interpret relevant data to develop and finalise a budget
- consult effectively and negotiate outcomes with others on budgetary issues
- accurately complete financial and statistical reports related to budgeting.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the evidence requirements safely and effectively, the individual must:

- define basic accounting and financial services industry terminology
- outline types of data required to develop the budget
- explain accounting techniques relevant to budget preparation and maintenance
- describe budgeting techniques and tools
- describe organisational and industry policy and procedures related to budget development and management.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the organisational skills field of work and include access to:

- a range of common office equipment, technology, software and consumables
- an integrated financial software system and data.

Assessors must satisfy NVR/AQTF assessor requirements.

## FNSORG508 Analyse and comment on management reports

### Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to identify and strategically analyse irregularities in management reports, and document recommendations to achieve business forecasts or expected outcomes.

It applies to individuals who use well-developed analytical and problem-solving techniques to complete their work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Organisational skills

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish items that require analysis	1.1 Identify and determine parameters and key requirements to be included in management reports 1.2 Review content of reports to identify abnormal or unusual items, exceptions and variations for comment
2. Analyse components identified	2.1 Compare actual results to forecast or expected outcomes to identify items requiring further examination 2.2 Obtain all information on identified items to enable report to be

ELEMENT	PERFORMANCE CRITERIA
	prepared
3. Report on findings	<p>3.1 Explain outcomes, results and variances to satisfy management questions</p> <p>3.2 Document recommendations on required action in accordance with organisational requirements</p> <p>3.3 Record outstanding matters to enable follow up action to be implemented</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2	<ul style="list-style-type: none"> <li>Selects from a broad repertoire of strategies to interpret, critically analyse and assess complex texts to identify inconsistencies, consulting other information sources as required</li> </ul>
Writing	1.1, 2.1, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> <li>Produces clear, logically sequenced texts that identify irregularities, convey precise meaning of recommendations and clearly record further action in accordance with organisational requirements</li> </ul>
Oral Communication	3.1	<ul style="list-style-type: none"> <li>Participates in complex spoken interactions using language appropriate to the purpose and audience</li> <li>Uses careful listening and questioning to clarify understanding</li> </ul>
Numeracy	1.1, 1.2, 2.1, 2.2	<ul style="list-style-type: none"> <li>Analyses and interprets complex financial calculations and predictions for accuracy, consistency and comparison with final results achieved</li> </ul>
Navigate the world of work	3.2	<ul style="list-style-type: none"> <li>Takes full responsibility for identifying and complying with organisational requirements</li> </ul>

## Assessment Requirements for FNSORG508 Analyse and comment on management reports

### Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- establish business items that require analysis and obtain relevant information
- analyse components within reports
- evaluate for comment and correction where necessary.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe key features of organisational policy and procedures relating to management reports
- outline the key points of relevant legislation, regulations and compliance requirements
- outline the key requirements of the financial services industry codes of practice
- describe common business objectives and expected outcomes in management reports.

### Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the organisational skills field of work and include access to:

- common office equipment, technology, software and consumables
- an integrated financial software system and data
- organisational policy and procedures documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

# FNSORG601 Negotiate to achieve goals and manage disputes

## Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

## Application

This unit describes the skills and knowledge required to establish and gain agreement to organisational goals, and identify, document and effectively manage disputes with stakeholders to achieve the best outcome.

It applies to individuals who use well-developed judgement skills and a range of negotiation techniques to manage others to reach agreement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Organisational skills

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish needs of parties	1.1 Identify desires, needs, requirements and outcomes of all parties using open and professional communication strategies 1.2 Identify and document potential issues and problems, and successful outcomes for organisation and client 1.3 Identify, analyse and discuss strategies and options for achieving outcomes with relevant parties 1.4 Identify and evaluate risks and contingency strategies

ELEMENT	PERFORMANCE CRITERIA
	1.5 Establish information, facts and issues relevant to situation, and obtain expert advice from third parties or other professionals where required prior to negotiations
2. Negotiate to achieve agreed outcome	<p>2.1 Obtain agreement on strategies and options to achieve goals and complete processes, and communicate it professionally to relevant parties</p> <p>2.2 Review strategies and options for compliance with contractual, legislative, regulatory and professional requirements, in accordance with organisational policy and procedures</p> <p>2.3 Obtain, confirm and correctly document agreement by all parties</p>
3. Identify and document causes of disputes	<p>3.1 Identify and analyse issues or disputes promptly and establish position of relevant parties</p> <p>3.2 Use professional communication techniques that demonstrate respect and empathy for other viewpoints and positions to establish confidence of relevant parties</p> <p>3.3 Document disputes and issues promptly and accurately, and verify with all relevant parties</p>
4. Implement and manage strategies to resolve disputes	<p>4.1 Identify, evaluate and implement strategies and options which are most likely to achieve favourable outcomes for all relevant parties</p> <p>4.2 Implement proceedings promptly to settle dispute in accordance with legislative, regulatory, professional and organisational requirements</p> <p>4.3 Manage dispute to optimise likelihood of favourable outcome for all parties in line with organisational policy and goals</p> <p>4.4 Ensure procedures to resolve dispute are in accordance with organisational policy and procedures, and legislative, regulatory and professional requirements</p> <p>4.5 Document accurate, thorough and accessible records of all aspects of dispute for follow up and future reference</p> <p>4.6 Contact relevant parties to identify any follow up action required to ensure client satisfaction</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.5, 2.2, 2.3, 3.3, 4.1, 4.2, 4.4	<ul style="list-style-type: none"> <li>Reviews information from stakeholders and other sources and assesses it to develop strategies that comply with organisational, regulatory and legislative requirements</li> </ul>
Writing	1.1-1.5, 2.1, 2.3, 3.1, 3.2, 3.3, 4.5, 4.6	<ul style="list-style-type: none"> <li>Records discussions of analysis and proposed solutions to a range of issues</li> <li>Documents agreements correctly using a range of text types</li> <li>Produces comprehensive records of evidence and dispute outcomes, including any further actions required</li> </ul>
Oral Communication	1.1-1.5, 2.1, 2.3, 3.1, 3.2, 4.6	<ul style="list-style-type: none"> <li>Uses clear and direct language to present information that is suitable for the audience and context</li> <li>Uses active listening and questioning techniques to encourage discussion, and confirm and clarify understanding</li> </ul>

## Assessment Requirements for FNSORG601 Negotiate to achieve goals and manage disputes

### Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- apply high level communication, interpersonal and negotiation skills to achieve rapport and empathy with others
- manage relationships to achieve goals and results
- use sound conflict resolution skills and contingency strategies
- comply with relevant legislation, regulations and professional codes of practice.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain dispute resolution and conflict theory and strategies
- describe negotiating processes and strategies
- explain the organisational policy and procedures that relate to negotiation and dispute management
- explain the application of risk assessment and evaluation strategies to dispute management
- explain the application of contract law to dispute management
- outline current legislative, regulatory and industry practices, procedures and services that relate to negotiation and dispute management
- outline relevant business principles and practices
- describe relevant consumer protection requirements.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the organisational skills field of work and include access to:

- common office equipment, technology, software and consumables
- organisational policy and procedures documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

## HLTAID003 Provide first aid

### Modification History

Release	Comments
Release 6	Updated: <ul style="list-style-type: none"> <li>• assessor requirements statement</li> <li>• foundation skills lead in statement</li> <li>• licensing statement</li> <li>• modification history to reflect 2012 standards</li> </ul> Equivalent outcome.
Release 5	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 4	Updated mapping information. Equivalent outcome.
Release 3	Updated mapping information.
Release 2	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit.

### Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty. The unit applies to all workers who may be required to provide a first aid response in a range of situations, including community and workplace settings.

*Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.*

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

1. Respond to an emergency situation

- 1.1 Recognise an emergency situation
- 1.2 Identify, assess and manage immediate hazards to health and safety of self and others
- 1.3 Assess the casualty and recognise the need for first aid response
- 1.4 Assess the situation and seek assistance from emergency response services

2. Apply appropriate first aid procedures

- 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines
- 2.2 Provide first aid in accordance with established first aid principles
- 2.3 Display respectful behaviour towards casualty
- 2.4 Obtain consent from casualty where possible
- 2.5 Use available resources and equipment to make the casualty as comfortable as possible
- 2.6 Operate first aid equipment according to manufacturer's instructions
- 2.7 Monitor the casualty's condition and respond in accordance with first aid principles

3. Communicate details of the incident

- 3.1 Accurately convey incident details to emergency response services
- 3.2 Report details of incident to workplace supervisor as appropriate
- 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

**ELEMENT****PERFORMANCE CRITERIA**

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

4. Evaluate the incident and own performance

4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

4.2 Participate in debriefing to address individual needs

**Foundation Skills**

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

**Unit Mapping Information**

No equivalent unit.

## Assessment Requirements for HLTAID003 Provide first aid

### Modification History

Release	Comments
Release 6	Updated: <ul style="list-style-type: none"> <li>• assessor requirements statement</li> <li>• foundation skills lead in statement</li> <li>• licensing statement</li> <li>• modification history to reflect 2012 standards</li> </ul> Equivalent outcome.
Release 5	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 4	Updated mapping information. Equivalent outcome.
Release 3	Updated mapping information.
Release 2	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit.

### Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:

- performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least two simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - conducted a visual and verbal assessment of the casualty
  - demonstrated safe manual handling techniques
  - post-incident debrief and evaluation
  - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - envenomation, using pressure immobilisation
  - fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
  - respiratory distress, including asthma
  - shock

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to provision of CPR and first aid
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements

- respectful behaviour towards a casualty
- own skills and limitations
- consent
- privacy and confidentiality requirements
- importance of debriefing
- considerations when providing first aid including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
  - how to conduct a visual and verbal assessment of the casualty
- principles and procedures for first aid management of the following scenarios:
  - abdominal injuries
  - allergic reaction
  - anaphylaxis
  - basic care of a wound
  - bleeding control
  - burns
  - cardiac conditions, including chest pain
  - choking and airway obstruction
  - crush injuries
  - diabetes
  - dislocations
  - drowning
  - envenomation
  - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
  - eye and ear injuries
  - fractures
  - febrile convulsions
  - head, neck and spinal injuries
  - minor skin injuries
  - needle stick injuries
  - poisoning and toxic substances
  - respiratory distress, including asthma
  - seizures, including epilepsy
  - shock
  - soft tissue injuries, including strains and, sprains
  - stroke

- unconsciousness
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest
  - response/consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions

## Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandages
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form for written reports
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

## Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Release 2	<p>Minor changes to formatting to improve readability.</p>
Release 1	<p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to elements and performance criteria, changes to scope of unit.</p> <p>Removal of embedded content from HLTF412A Apply First Aid.</p> <p>New evidence requirements for assessment.</p> <p>Removal of pre-requisite unit.</p>

### Application

This unit describes the skills and knowledge required to provide an advanced first aid response, including management of the incident and other first aiders, until the arrival of medical or other assistance.

The unit applies to workers who may be required to provide, coordinate and manage a first aid response across a range of complex situations, including community and workplace settings.

*Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.*

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

1. Respond to an emergency situation

- 1.1 Recognise an emergency situation
- 1.2 Identify, assess and manage immediate hazards to health and safety of self and others
- 1.3 Assess the casualty and recognise the need for first aid response
- 1.4 Assess the situation and seek assistance from emergency response services
- 1.5 Deploy resources to appropriate locations as required in line with workplace procedures

2. Apply appropriate first aid procedures

- 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines
- 2.2 Provide first aid in accordance with established first aid principles
- 2.3 Display respectful behaviour towards casualty
- 2.4 Obtain consent from casualty where possible
- 2.5 Use available resources and equipment to make the casualty as comfortable as possible
- 2.6 Operate first aid equipment according to manufacturer's instructions
- 2.7 Monitor the casualty's condition and respond in accordance with first aid principles

**ELEMENT****PERFORMANCE CRITERIA**

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

3. Coordinate first aid activities until arrival of medical assistance

3.1 Identify available resources required and establish communication links with appropriate personnel, emergency management services and medical assistance as appropriate

3.2 Deploy correct amount of required resources to appropriate locations in an effective manner to ensure timely arrival

3.3 Document the provision of resources and recommend modifications as required

3.4 Monitor the condition of casualties in accordance with first aid principles and workplace procedures

3.5 Coordinate evacuation of casualties according to relevant evacuation procedures

3.6 Arrange support services for personnel involved in the incident in accordance with relevant principles and procedures

4. Communicate details of the incident

4.1 Accurately convey incident details to emergency response services

4.2 Report details of incident in line with organisational policies

4.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

5. Evaluate the incident and own performance

5.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

5.2 Participate in debriefing to address individual needs

5.3 Evaluate management of the incident and develop an action plan in consultation with relevant parties

5.4 Review contingency planning to identify and select alternative management principles and procedures as required

## Foundation Skills

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit

# Assessment Requirements for HLTAID006 Provide advanced first aid

## Modification History

Release	Comments
Release 5	Updated: <ul style="list-style-type: none"> <li>• assessor requirements statement</li> <li>• foundation skills lead in statement</li> <li>• licensing statement</li> <li>• modification history to reflect 2012 standards</li> </ul> Equivalent outcome.
Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome.
Release 2	Minor changes to formatting to improve readability.
Release 1	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. Removal of embedded content from HLTF412A Apply First Aid. New evidence requirements for assessment. Removal of pre-requisite unit.

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- followed DRSABCD in line with ARC guidelines, including:

- performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- performed at least 2 minutes of Bag-valve-mask ventilation and at least 2 minutes of compression during a two rescuer procedure on an adult resuscitation manikin placed on the floor
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed the prompts of a Automated External Defibrillator (AED)
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- responded to at least three simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - demonstrated safe manual handling techniques
  - conducted a visual and verbal secondary survey assessment of the casualty
  - assessed vital signs (respirations, pulse and temperature)
  - communicated effectively with a first aid team providing direction and coordination of other first aiders
  - post-incident debrief and evaluation
  - provided an accurate verbal and written report of the incident
- applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - conducted a basic triage for multiple casualty incident
  - envenomation (using pressure immobilisation)
  - fractures, sprains and strains (using arm slings, roller bandages or other appropriate immobilisation principles)
  - head, neck and spinal injuries (using immobilisation principles)
  - respiratory distress - including asthma
  - seizures - including epilepsy
  - shock
- located and interpreted workplace policies and procedures

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC guidelines relevant to provision of CPR and first aid
  - guidelines of Australian national peak clinical bodies
  - safe work practices to deal with risks and potential hazards including manual handling, hazardous substances, dangerous goods and chemicals
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - capabilities of emergency management services
  - consent
  - duty of care requirements
  - importance of debriefing
  - own skills and limitations
  - legal requirements of administration of medication and the rights and responsibilities of the First Aider in the workplace regarding medication
  - privacy and confidentiality requirements
  - respectful behaviour towards a casualty
- considerations when providing first aid including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - assessment and interpretation of vital signs, including respirations, temperature and pulse
  - chain of survival
  - how to conduct a visual and verbal secondary survey assessment of casualty
  - priorities of management in first aid when dealing with life-threatening conditions
  - procedures for dealing with casualties who are aged or infirmed
  - procedures for dealing with major and minor accidents in the workplace
  - procedures when providing first aid to children
  - standard precautions
- principles and procedures for first aid management of the following scenarios, including complications:
  - abdominal injuries
  - allergic reaction

- anaphylaxis
- basic care of a wound
- bleeding control
- burns, including thermal, chemical, friction and electrical
- cardiac conditions, including chest pain
- choking and airway obstruction
- crush injuries
- diabetes
- drowning
- emergency childbirth
- envenomation
- environmental impact including hypothermia, hyperthermia, dehydration and heat stroke
- eye and ear injuries
- febrile convulsions
- head, neck and spinal injuries
- levels of consciousness
- needle stick injuries
- poisoning and toxic substances
- respiratory distress, including asthma
- seizures, including epilepsy
- shock
- skin injuries
- soft tissue musculoskeletal, including injuries including sprains, strains, dislocations and fractures
- stroke
- substance misuse, including common drugs and alcohol, including illicit drugs
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest, skeleton, joints and muscles
  - response/level of consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions

## Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device.
- bag-valve-mask
- eye patch
- placebo bronchodilator and spacer device
- roller bandages
- thermometer
- triangular bandages
- workplace first Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

### **Assessor requirements**

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>

## HLTAID007 Provide advanced resuscitation

### Modification History

Release	Comments
Release 5	<p>Updated:</p> <ul style="list-style-type: none"> <li>• assessor requirements statement</li> <li>• foundation skills lead in statement</li> <li>• licensing statement</li> <li>• modification history to reflect 2012 standards</li> </ul> <p>Equivalent outcome.</p>
Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome
Release 2	Updated mapping information.
Release 1	<p>This version was released in HLT Health Training Package release 1.0 and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to elements and performance criteria, changes to scope of unit.</p> <p>Removal of embedded content from HLTF404C.</p> <p>Removal of analgesic gases.</p> <p>New evidence requirements for assessment.</p> <p>Removal of prerequisite unit.</p>

### Application

This unit describes the skills and knowledge required to use specialised equipment in the provision of resuscitation in line with the Australian Resuscitation Council (ARC) guidelines.

This unit applies to workers who may be required to use specialised equipment to provide resuscitation in a range of complex situations, include community and workplace settings.

*Specific licensing requirements relating to this competency, including requirements for refresher training, should be obtained from the relevant state/territory Work Health and Safety Regulatory Authority.*

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

1. Respond to an emergency situation

- 1.1 Recognise an emergency situation
- 1.2 Identify, assess and manage immediate hazards to health and safety of self and others
- 1.3 Assess the casualty and recognise the need for advanced resuscitation response
- 1.4 Assess the situation and seek assistance from emergency response services where required

2. Perform advanced resuscitation

- 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with ARC guidelines
- 2.2 Provide supplemental oxygen
- 2.3 Display respectful behaviour towards casualty
- 2.4 Obtain consent from casualty where possible
- 2.5 Use available resources and equipment to make the casualty as comfortable as possible
- 2.6 Monitor casualty condition and rectify issues preventing adequate treatment

3. Communicate details of the incident

- 3.1 Accurately convey incident details to emergency response services
- 3.2 Report details of incident in line with organisational policies
- 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

4. Evaluate the incident and own performance

- 4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents
- 4.2 Participate in debriefing to address individual needs
- 4.3 Check, maintain and clean equipment ready for future use

## Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit

Release 2	Updated mapping information.
Release 1	<p>This version was released in HLT Health Training Package release 1.0 and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to elements and performance criteria, changes to scope of unit.</p> <p>Removal of embedded content from HLTF404C.</p> <p>Removal of analgesic gases.</p> <p>New evidence requirements for assessment.</p> <p>Removal of prerequisite unit.</p>

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

The demonstrated evidence is performed in line within state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures.

- Followed DRSABCD in line with ARC guidelines, including:
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - performed at least 2 minutes of bag-valve-mask ventilation and at least 2 minutes of compression on an adult resuscitation manikin placed on the floor
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed the prompts of an Automated External Defibrillator (AED)
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- conducted a visual and verbal secondary survey assessment of the casualty
- assessed vital signs (respirations, pulse and temperature)
- responded to at least three simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - demonstrated safe manual handling techniques
  - clearing the airway using a suction device
  - post-incident debrief and evaluation
  - provided an accurate verbal and written report of the incident
- selected and inserted an oropharyngeal airway adjunct
- administered oxygen to an unconscious/conscious casualty, including:
  - selected and prepared correct oxygen equipment
  - administered oxygen safely at correct flow rate
- monitored and coordinated maintenance of resuscitation equipment
  - dismantling
  - storage
  - disposal
  - cleaning and decontamination
  - checking and diagnosis of faults
- located and interpreted workplace policies and procedures
- 

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC guidelines relevant to provision of CPR
  - guidelines of Australian national peak clinical bodies
  - safe work practices to deal with risks and potential hazards including manual handling, hazardous substances, dangerous goods and chemicals
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace or community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - capabilities of emergency management services
  - consent
  - duty of care requirements
  - importance of debriefing
  - legal requirements of administration of medication and the rights and responsibilities of the First Aider in the workplace regarding medication
  - own skills and limitations
  - privacy and confidentiality requirements
  - respectful behaviour towards a casualty
- considerations when performing resuscitation including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - assessment and interpretation of vital signs (respirations, temperature and pulse)
  - benefits, contraindications and complications with the use of an oropharyngeal airway
  - chain of survival
  - how to conduct a visual and verbal secondary survey assessment
  - standard precautions
- considerations when providing supplementary oxygen, including:
  - benefits, contraindications and complications of providing oxygen to a casualty and of providing suction during the application of advanced resuscitation techniques
  - complications with the use of a bag-valve-mask device and suitable strategies to minimise these
  - selection and operation of oxygen masks and other appropriate delivery devices
- basic anatomy, physiology and toxicology as it relates to the provision of advanced resuscitation, including:
  - basic electrical activity associated with normal and abnormal heart rhythm
  - how to recognise a person is not breathing normally
  - relevant organs of the cardio pulmonary system and their operation

- response/level of consciousness
- upper airway and effect of positional change
- methods for cleaning, replenishing, recharging and maintaining resuscitation and oxygen equipment including:
  - actions to rectify problems
  - procedures to ensure operational readiness
  - storage, cleaning, decontamination and safe disposal of consumables
  - troubleshooting to identify minor and major faults
  -

## Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- airway model suitable for insertion of an oropharyngeal airway
- Automated External Defibrillator (AED) training device.
- bag-valve-mask
- oropharyngeal airway adjunct
- oxygen resuscitation system with oxygen cylinder
- selection of oxygen masks with tubing; nasal cannula, therapy mask, resuscitation mask with oxygen port
- thermometer
- suction device
- workplace incident, injury, trauma or illness record or other appropriate workplace incident report form.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

### Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

## HLTINF001 Comply with infection prevention and control policies and procedures

### Modification History

Release	Comments
Release 1	<p>This version was released in <i>HLT Health Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.</p>

### Application

This unit describes the skills and knowledge required to follow organisational infection prevention and control procedures, including implementing standard and transmission-based precautions and responding to infection risks.

This unit applies to individuals working in health and direct client care contexts.

*The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.*

### Elements and Performance Criteria

#### ELEMENT

*Elements define the essential outcomes*

1. Follow standard and additional precautions for infection prevention and control

#### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element*

1.1 Follow hand hygiene practices in accordance with organisations policies and procedures

1.2 Implement hand care procedures and cover cuts and abrasions

1.3 Follow organisation procedures for choice and use of personal protection equipment

## ELEMENT

## PERFORMANCE CRITERIA

*Elements define the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element*

- 1.4 Follow procedures for respiratory hygiene and cough etiquette
  - 1.5 Follow procedures for environmental cleaning
  - 1.6 Follow procedures for handling, transporting and processing of linen in a manner that controls the spread of infection
  - 1.7 Follow procedures for disposal of contaminated waste
  - 1.8 Follow procedures for handling and cleaning client equipment that prevents skin and mucous membrane exposures, contamination of clothing, and transfer of pathogens
  - 1.9 Identify and respond to situations where additional precautions may be required to prevent transmission of infection
- 
2. Identify infection hazards and assess risks
    - 2.1 Identify infection hazards associated with own role and work environment
    - 2.2 Identify own areas of responsibility in relation to infection prevention and control
    - 2.3 Assess risk by determining the likelihood and severity of harm from identified hazards.
    - 2.4 Document and report activities and tasks that put self, clients, visitors and/or other workers at risk
    - 2.5 Identify appropriate control measures to minimise risk in accordance with organisations procedures
- 
3. Follow procedures for managing risks associated with specific hazards
    - 3.1 Follow protocols for care after exposure to blood or other body fluids as required
    - 3.2 Place appropriate signs when and where appropriate
    - 3.3 Remove spills in accordance with the policies and procedures of the organisation
    - 3.4 Minimise contamination of materials, equipment and instruments by aerosols and splatter
    - 3.5 Identify, separate and maintain clean and

## ELEMENT

*Elements define the essential outcomes*

## PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element*

contaminated zones

3.6 Confine records, materials and medicaments to a well-designated clean zone

3.7 Confine contaminated instruments and equipment to a well-designated contaminated zone

## Foundation Skills

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for HLTINF001 Comply with infection prevention and control policies and procedures

## Modification History

Release	Comments
Release 1	<p>This version was released in <i>HLT Health Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.</p>

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established organisation infection prevention and control procedures on at least 3 separate occasions
- followed established organisation infection prevention and control procedures at least once for each of the following:
  - hand hygiene and care of hand
  - use of personal protective equipment
  - handling of waste
  - enforcing clean and contaminated zones
  - limitation of contamination
  - surface cleaning

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- established guidelines for the prevention and control of infection, including those for:
  - personal and hand hygiene:
    - how to hand wash
    - how to hand rub

- pre-surgical hand preparation
- clinical moments when hand hygiene should be performed with soap and water rather than alcohol-based hand rub
- non-clinical moments for hand hygiene hand care, including guidelines on maintaining intact skin, fingernails and jewellery/watches
- use and scope of personal protective equipment guidelines for:
  - glove use
  - wearing gowns and waterproof aprons
  - wearing masks
  - wearing protective glasses
- surface cleaning:
  - cleaning procedures and their specified times
  - routine surface cleaning
- managing a blood or body fluid spill
- sharps handling and disposal techniques
- reprocessing procedures for equipment
- types of additional precautions and their relevance to particular areas of work or client groups
- types of hazards in the work environment and associated risks and control measures
- chain of infection:
  - source of infectious agent
  - mode of transmission
  - susceptible host
- basis of infection, including:
  - bacteria and bacterial spores
  - difference between harmless microorganisms and pathogens
  - difference between colonisation, infection and disease
  - fungi
  - viruses
- key modes of disease transmission – contact, airborne and droplet:
  - paths of transmission including direct contact, aerosols and penetrating injuries
  - risk of acquisition
  - sources of infecting microorganisms including persons who are carriers, in the incubation phase of the disease or those who are acutely ill
- factors that increase the susceptibility to infection:
  - immune status
  - wounds or devices
  - medications and comorbidities
  - age

## Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace or may occur only rarely.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - organisational infection prevention and control guidelines
  - personal protective equipment
  - hand hygiene facilities and equipment
  - medical or client care equipment relevant to the workplace
  - clinical and other waste and waste disposal equipment
  - areas for cleaning
  - equipment for cleaning, including sterilised sharps if relevant to role
- modelling of industry operating conditions, including integration of problem solving activities to which the candidate responds

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

## HLTINF003 Implement and monitor infection prevention and control policies and procedures

### Modification History

Release	Comments
Release 1	<p>This version was released in <i>HLT Health Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant changes to knowledge evidence. Removed prerequisite.</p>

### Application

This unit describes the skills and knowledge required to provide information about infection prevention and control procedures, integrate those procedures into work practices and monitor workplace performance.

This unit applies to individuals working in health or direct client care contexts, who have a coordination, team leading or supervisory responsibility in relation to infection prevention and control.

*The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.*

### Elements and Performance Criteria

#### ELEMENT

#### PERFORMANCE CRITERIA

*Elements define the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element*

1. Provide information about infection prevention and control policies and procedures

- 1.1 Explain correct and current infection prevention and control information clearly to the work group
- 1.2 Regularly provide information about identified hazards and the outcomes of infection risk assessments
- 1.3 Provide opportunities for the work group to seek

## ELEMENT

## PERFORMANCE CRITERIA

*Elements define the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element*

further information on workplace infection prevention and control issues and practices

1.4 Adapt communication to the needs of different workers

2. Integrate infection prevention and control policy and procedure into work practices

2.1 Implement infection prevention and control policy and procedures with members of the work group

2.2 Maintain liaison with person responsible for organisation-wide infection prevention and control

2.3 Provide coaching and support as required to ensure that individuals or teams are able to implement infection prevention and control practices

2.4 Adopt work procedures to reflect appropriate infection prevention and control practice

2.5 Promptly resolve issues raised through consultation or refer to the appropriate personnel

2.6 Implement workplace procedures for dealing with infection prevention and control risks and hazardous events

2.7 Encourage colleagues to report infection risks and to improve infection prevention and control procedures

3. Monitor infection prevention and control procedures performance and implement improvements in practices

3.1 Promptly investigate infectious hazardous events to identify their cause in accordance with organisation policy and procedure

3.2 Monitor work procedures to control infection risks

3.3 Regularly review and adjust work procedures to improve infection prevention and control practice

3.4 Provide feedback to colleagues on compliance issues, changes in work procedures and infection prevention and control outcomes

3.5 Identify and respond to inadequacies in work procedures and infection prevention and control measures or report to designated personnel

3.6 Maintain accurate records of infection prevention and

# Assessment Requirements for HLTINF003 Implement and monitor infection prevention and control policies and procedures

## Modification History

Release	Comments
Release 1	<p>This version was released in <i>HLT Health Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant changes to knowledge evidence. Removed prerequisite.</p>

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- implemented and monitored infection prevention and control policy and procedures for at least 1 work area and at least 1 team of workers, incorporating:
  - hand hygiene and hand care
  - use of personal protective equipment
  - surface cleaning
  - waste management
  - handling of potentially infectious material
  - hazard identification and risk assessment and management

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- key features of infection prevention and control regulation and guidelines:
  - Australian standards
  - government guidelines
  - manufacturer documentation
- management and work processes used to control infection:
  - assessment

- monitoring
- reporting processes and hierarchies
- training requirements
- standard and additional infection prevention and control precautions, including:
  - personal hygiene
  - use of personal protective equipment
  - surface cleaning
  - handling of potentially infectious material
- key aspects of communicable disease transmission and their relationship to different work processes
- infection risks and control measures specific to work area and related work processes
- hierarchy of risk control measures from most to least preferred:
  - elimination
  - engineering controls
  - administrative control
  - personal protective equipment

## Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace or may occur only rarely.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - organisational infection prevention and control policies and procedures
  - personal protective equipment
  - hand washing facilities and equipment
  - medical or client care equipment relevant to the workplace
  - clinical and other waste
  - areas for cleaning
- modelling of industry operating conditions, including:
  - interaction with a team
  - presence of real or simulated risks, hazards and infection prevention and control problems to which the candidate responds

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

1. Contribute to workplace procedures for identifying hazards and controlling risks

1.1 Identify existing and potential hazards and record them according to workplace procedures

1.2 Contribute to the development of strategies for implementing risk controls in line with workplace procedures and policies

1.3 Implement risk controls in line with the hierarchy of risk control and workplace and legislative requirements

1.4 Identify and report issues with risk controls, including residual risk, in line with workplace and legislative requirements

2. Implement policies and procedures into work team processes

2.1 Regularly provide information about WHS policies and procedures to the work team

2.2 Provide information about identified hazards and the outcomes of risk assessment and risk controls to the work team

2.3 Monitor housekeeping practices to ensure that WHS policies and procedures are followed

2.4 Maintain WHS incident records in the work area according to workplace procedures and legislative requirements

3. Support consultation, cooperation and communication

3.1 Support workplace consultative procedures by encouraging work team participation in consultative activities

3.2 Report health and safety issues in line with workplace procedures and legislative requirements

3.3 Encourage and assist work team members to contribute to WHS

## Foundation Skills

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

- *Written communication* – in order to complete a workplace risk assessment and complete a workplace incident report in line with regulatory guidelines and organisational policies
- *Oral communication* – in order to accurately present information to a small group of at least two participants

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit

## Unit Mapping Information

## Assessment Requirements for HLTWHS003 Maintain work health and safety

### Modification History

Release	Comments
Release 3	<p>Updated:</p> <ul style="list-style-type: none"> <li>• assessor requirements statement</li> <li>• foundation skills lead in statement</li> <li>• licensing statement</li> <li>• modification history to reflect 2012 standards</li> </ul> <p>Equivalent outcome.</p>
Release 2	<p>Minor corrections to formatting to improve readability. Equivalent competency outcome.</p>
Release 1	<p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Updated to include relevant content from HLTWHS401A. Revised scope of unit to reflect requirements of supervisor and/or line manager.</p>

### Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be demonstrated evidence that the candidate has completed the following tasks at least once in line with state/territory WHS regulations, relevant codes of practice and workplace procedures:

- conducted a workplace risk assessment and recorded the results, including:
  - identification of hazards and potential hazards
  - risk assessment
  - strategies for minimising risk, and
  - analysis of residual risk
- provided WHS information to at least two workers, including:
  - explanation of WHS policies and procedures
  - demonstration of safe housekeeping practices
  - correct use of personal protective equipment (PPE)

- consistently monitored safety procedures in the day-to-day work activities required by the job role
- completed a workplace incident report
- followed workplace procedures for a simulated emergency situation

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/territory legislation and how it impacts on workplace regulations, codes of practice and industry standards, including:
  - state/territory WHS authorities
  - rights and responsibilities of persons conducting a business or undertaking (PCBUs), officers and workers, including duty of care
  - legislative requirements for record-keeping and reporting
  - regulatory requirements relevant to the particular industry/type of work site
  - hazardous manual tasks
  - infection control
- Hazards common to the work environment and how they cause harm
- Principles of hazards and risk assessment, including:
  - hazard identification procedures
  - risk assessment process
  - residual risk
  - risk controls
  - hierarchy of control
- Workplace emergency procedures
- Workplace policies and procedures for WHS.

## Assessment Conditions

Skills must be demonstrated in the workplace.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessment must ensure use of:

- current workplace policies and procedures for WHS.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

## HLTWHS004 Manage work health and safety

### Modification History

Release	Comments
Release 2	<p>Updated:</p> <ul style="list-style-type: none"> <li>• assessor requirements statement</li> <li>• foundation skills lead in statement</li> <li>• licensing statement</li> <li>• modification history to reflect 2012 standards</li> </ul> <p>Equivalent outcome.</p>
Release 1	<p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Updated to include relevant content from HLTWHS401A. Revised scope of unit to reflect requirements of managers and/or persons conducting a business or undertaking (PCBUs).</p>

### Application

This unit describes the skills and knowledge required to establish, maintain and evaluate work health and safety (WHS) policies, procedures and programs in the relevant work area, according to WHS legislative requirements.

This unit applies to workers who have responsibility for WHS as part of their role, including workers with obligations under WHS legislation, persons conducting a business or undertaking (PCBUs), or their officers (as defined by relevant legislation).

*The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.*

### Elements and Performance Criteria

#### ELEMENT

#### PERFORMANCE CRITERIA

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

1. Establish work health and

1.1 Access and interpret legislation, regulations, code

**ELEMENT****PERFORMANCE CRITERIA**

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

safety practices

of conduct and workplace policies and procedures for WHS

- 1.2 Develop procedures for ongoing hazard identification, and assessment and control of associated risks
- 1.3 Ensure risk controls and hazard-specific procedures are consistent with the hierarchy of control and are monitored to support compliance with legislative and regulatory requirements
- 1.4 Identify requirements for expert WHS advice, and request this advice as required

2. Facilitate consultation, cooperation and communication

2.1 Develop and provide consultative WHS activities to provide advice in relation to work health and safety issues

2.2 Monitor processes for ensuring that workers have an opportunity to contribute feedback on health and safety issues

2.3 Document outcomes of consultation and communicate to workers

2.4 Develop and implement processes to ensure that responsibilities and duties are documented and accountability processes are in place

2.5 Implement and monitor training programs to ensure identified WHS training requirements are addressed, including induction process

3. Monitor compliance with risk control processes

3.1 Develop WHS record-keeping policies and procedures and provide information to workers

3.2 Monitor hazard, incident and injury reporting processes to meet legislative requirements and to inform future prevention strategies

3.3 Evaluate WHS record-keeping policies and procedures for compliance with legislative requirements

**ELEMENT****PERFORMANCE CRITERIA**

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

4. Evaluate and maintain WHS

4.1 Determine WHS priorities in consultation with work group

4.2 Develop a WHS action plan taking account of priorities and training needs

4.3 Identify potential barriers to improvement

4.4 Establish processes to monitor achievement against the plan and update plans as required

**Foundation Skills**

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

- *Written communication* – in order to complete a workplace risk assessment and develop a WHS action plan in line with regulatory guidelines and organisational policies
- *Oral communication* – in order to accurately present information to a small group of at least two participants

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit

**Unit Mapping Information**

No equivalent unit

# Assessment Requirements for HLTWHS004 Manage work health and safety

## Modification History

Release	Comments
Release 2	<p>Updated:</p> <ul style="list-style-type: none"> <li>• assessor requirements statement</li> <li>• foundation skills lead in statement</li> <li>• licensing statement</li> <li>• modification history to reflect 2012 standards</li> </ul> <p>Equivalent outcome.</p>
Release 1	<p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Updated to include relevant content from HLTWHS401A. Revised scope of unit to reflect requirements of managers and/or persons conducting a business or undertaking (PCBUs).</p>

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be demonstrated evidence that the candidate has completed the following tasks at least once in line with state/territory WHS regulations, relevant codes of practice and workplace procedures:

- conducted a workplace risk assessment and recorded the results, including:
  - identification of hazards and potential hazards
  - risk assessment
  - evaluation of policy/procedure in line with state/territory legislation and industry guidelines
  - development of risk controls and measures
- conducted the following consultative activities with at least two workers:
  - information session about workplace policies and procedures, including demonstration of personal protective equipment (PPE) where required for the job role
  - consultative discussion regarding outcomes of a workplace risk assessment, including risk controls and measures developed as part of the risk assessment process

- monitored workplace compliance with WHS procedures
- developed a WHS action plan, including strategies for monitoring and review
- coordinated workplace procedures for a simulated emergency situation.

## Knowledge Evidence

The candidate must demonstrate knowledge of:

- state/territory legislation and how it impacts on workplace regulations, codes of practice and industry standards, including:
  - state/territory WHS authorities
  - rights and responsibilities of persons conducting a business or undertaking (PCBUs), officers and workers, including duty of care
  - legislative requirements for record-keeping and reporting
  - due diligence and general duty requirements
  - regulatory requirements relevant to the particular industry/type of work site
  - legislative requirements for consultation
  - hazardous manual tasks
  - infection control
- hazards common to the work environment and strategies for minimisation
- requirements for WHS policies, including:
  - hazard, incident and injury reporting
  - hazard identification, risk assessment and control
  - human resources policies and procedures
  - consultation and participation
  - incident investigation and record-keeping
  - quality system documentation
  - designated person/s for raising issues
  - workplace support services
  - use of personal protective equipment (PPE)
  - emergency procedures
- principles of hazard and risk management, including:
  - risk analysis
  - hazard identification procedures
  - hierarchy of control and its application
  - principles of risk assessment
  - examples of health and safety benchmarks
  - principles of safe design processes

## Assessment Conditions

Skills must be demonstrated in the workplace.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

In addition, assessment must ensure use of:

- current workplace policies and procedures for WHS

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

## ICPKNW322 Develop knowledge of the printing and graphic arts industry

### Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 2.0.

### Application

This unit describes the skills and knowledge required to work in or deal with individuals in various sectors of the printing and graphic arts industry.

It applies to individuals who require detailed technical knowledge in particular areas of the industry, together with a working knowledge of related areas. Individuals need the skills to facilitate technical communication and to work as a member of a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Holistic knowledge

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Apply knowledge of the printing industry	1.1 Printing industry terminology and vocabulary are used correctly and accurately 1.2 New technology and new work processes are monitored and implemented when required 1.3 Trends within the printing industry are monitored, on an ongoing basis, to inform personal work practices 1.4 Basic principles and obligations of legislative, standards and

ELEMENT	PERFORMANCE CRITERIA
	industrial awards are researched and followed within the workplace and in personal work practices
2. Acquire knowledge of the graphic pre-press, graphic design and multi-channel communications sector	<p>2.1 Principles behind pre-press functions such as image production, image combining, image output and workflow are researched</p> <p>2.2 Different types of images are assessed to identify the most appropriate usage</p> <p>2.3 Different types of output are researched and their effects on final product are evaluated</p> <p>2.4 Different output devices are researched to identify appropriate usage</p> <p>2.5 Differences between various markup and scripting languages and their application are assessed to identify most appropriate usage</p> <p>2.6 Platforms and computer systems requirements for different products are researched and their effects on final product are evaluated</p>
3. Acquire knowledge of printing machining sector	<p>3.1 Basic principles of printing processes (lithography, relief, flexography, gravure, pad printing, screen printing, digital and electronic printing) are researched</p> <p>3.2 Types of products and processes are researched to identify appropriate usage</p> <p>3.3 Capabilities and limitations of each process are reviewed</p>
4. Acquire knowledge and requirements of the converting, binding and finishing sector	<p>4.1 Basic characteristics of converting and finishing processes (guillotining, flat-bed and rotary cutting, collating, folding, adhesive, mechanical and thermal fastening) are researched</p> <p>4.2 Types of processes are researched to identify appropriate usage</p> <p>4.3 Capabilities and limitations of each process are reviewed</p>
5. Acquire knowledge and requirements of the ink manufacturing sector	<p>5.1 The ink manufacturing sector, its products, services and supplier profile are identified</p> <p>5.2 Enterprise products and services, their characteristics and their end use, specifically with regard to printing industry, are identified</p> <p>5.3 Printing processes and their implication for ink manufacture are researched</p> <p>5.4 Manufacturing processes and quality control procedures for</p>

ELEMENT	PERFORMANCE CRITERIA
	ink, coating, varnish, resin, or chemical production are identified
6. Acquire knowledge and requirements of mail house operations	<p>6.1 Australia Post Standards and weight and size limitations are researched</p> <p>6.2 Equipment used in mail house operations is researched</p> <p>6.3 Computer driven bar code, sorting, tagging and reading systems are researched to identify appropriate usage</p> <p>6.4 Data management and processing systems and software are researched to identify appropriate usage</p> <p>6.5 Computerised document management, design and reading systems and software are researched to identify appropriate usage</p> <p>6.6 Computerised market research, listing services and associated software are researched to identify appropriate usage</p>
7. Acquire knowledge of colour theory	<p>7.1 Colour theory of additive colours (light), Red, Green, Blue (RGB), is researched to inform pre-press and/or design decisions</p> <p>7.2 Colour theory of subtractive colours (pigments), Cyan, Magenta, Yellow, Key (black) (CMYK), is researched to inform pre-press and/or design decisions</p> <p>7.3 Relationship between ranges of visual colour RGB and CMYK is researched to inform pre-press and/or design decisions</p> <p>7.4 Relationship between hue, greyness and substrate for tone and colour correction is researched to inform pre-press and/or design decisions</p> <p>7.5 Colour matching conditions and colour matching systems are researched to inform pre-press and/or design decisions</p>
8. Apply knowledge of substrates and consumables	<p>8.1 Range of substrates used for each printing process is researched</p> <p>8.2 Relationship of different substrate sizes is researched to identify appropriate usage</p> <p>8.3 Effects of different weights and callipers of substrates on pre-press, printing and finishing operations are researched</p> <p>8.4 Effects of substrate on pre-press, printing and finishing operations are researched</p> <p>8.5 Effects of different properties of ink (drying properties, fastness, gloss) on pre-press, printing and finishing operations are researched</p> <p>8.6 Suitability of inks and coatings for particular finishing processes is identified</p>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
9. Acquire basic knowledge of costs of production	<p>9.1 Main cost elements (fixed, capital, variable) in production are identified</p> <p>9.2 Information required to accurately cost particular jobs is determined</p> <p>9.3 Ways of minimising use of materials without affecting quality of output are identified</p> <p>9.4 Ways of maximising efficiency of resources without affecting quality of output are identified</p>
10. Acquire basic knowledge of production management requirements and systems	<p>10.1 Types of information that need to be exchanged between different stages of production to facilitate production efficiency are identified</p> <p>10.2 Systems and strategies to exchange identified information are researched</p> <p>10.3 Basic principles of efficient production management are identified</p> <p>10.4 Principles of effective quality management are identified</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Reading	1.2, 1.3, 1.4, 2.1, 2.3, 2.4- 2.6, 3.1-3.3, 4.1- 4.3, 5.1- 5.4, 6.1-6.6, 7.1-7.6, 8.1-8.6, 9.1-9.4, 10.1-10.4	<ul style="list-style-type: none"> <li>Researches, comprehends and applies information extracted from various sources</li> </ul>
Writing	1.1`	<ul style="list-style-type: none"> <li>Uses appropriate vocabulary, including technical language, in written documents prepared for a range of audiences</li> </ul>
Oral Communication	1.1	<ul style="list-style-type: none"> <li>Uses appropriate vocabulary, including technical language, to interact with others</li> </ul>
Numeracy	5.3, 8.3, 9.1, 9.2,	<ul style="list-style-type: none"> <li>Uses mathematical techniques to estimate quantities, usage and costs</li> </ul>

	9.3, 9.4	<ul style="list-style-type: none"> <li>Interprets and analyses mathematical information included in texts</li> </ul>
Navigate the world of work	1.2-1.4, 5.4, 6.1	<ul style="list-style-type: none"> <li>Maintains knowledge of the printing industry required for current role</li> <li>Understands and adheres to relevant industry standards, legislative requirements and organisational policies and procedures</li> </ul>
Get the work done	1.2, 1.3, 2.1-2.6, 3.1-3.3, 4.1-4.3, 5.1-5.4, 6.2-6.6, 7.1-7.5, 8.1-8.6, 9.2-9.4, 10.1-10.4	<ul style="list-style-type: none"> <li>Plans, organises and implements systems and activities to achieve efficient and effective outcomes</li> <li>Analyses and evaluates information to solve problems and make decisions</li> <li>Monitors trends and identifies concepts, principles and features of approaches for use in new contexts</li> <li>Understands and uses digital technologies to access, organise, store and share information</li> </ul>

## Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
ICPKNW322 Develop knowledge of the printing and graphic arts industry	ICPKN311 Apply knowledge of the graphic pre-press sector	11 units merged into 1 due to duplication of information	Equivalent unit
	ICPKNW312 Apply knowledge of printing machining	11 units merged into 1 due to duplication of information	Equivalent unit
	ICPKNW313 Apply knowledge and requirements of the converting, binding and finishing sector	11 units merged into 1 due to duplication of information	Equivalent unit
	ICPKNW314 Apply knowledge and requirements of the screen printing sector	11 units merged into 1 due to duplication of information	Equivalent unit

<b>Code and title current version</b>	<b>Code and title previous version</b>	<b>Comments</b>	<b>Equivalence status</b>

# Assessment Requirements for ICPKNW322 Develop knowledge of the printing and graphic arts industry

## Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 2.0.

## Performance Evidence

Evidence of the ability to:

- use appropriate vocabulary and terminology in written and oral communications with tradespeople, colleagues, management or clients
- document current with trends in the printing industry
- apply relevant legislative and workplace requirements when completing tasks
- conduct research to determine image type, output settings, output requirements and output devices for different jobs
- conduct research to determine the correct process for a print job
- conduct research to determine the correct process for a converting or finishing job
- use a colour management system to determine colour requirements for a print job
- conduct research to determine appropriate substrate and ink for different print jobs
- accurately plan, cost and document a print job.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe legislative and enterprise requirements that affect work practice
- describe the basic principles behind the following pre-press functions:
  - image production (typesetting, scanning, graphic arts camera)
  - image combining (manual and electronic)
  - image output (film, plates, direct to press)
- describe the basic principles of the following printing processes:
  - lithography
  - relief

- flexography
- gravure
- pad printing
- screen printing
- digital and electronic printing
- describe the range of substrates used for each printing process
- describe designs that are appropriate for different printing processes
- describe the basic characteristics of the following converting and finishing processes:
  - guillotining
  - flat-bed and rotary cutting
  - collating
  - folding
  - adhesive
  - mechanical and thermal fastening
- describe the relationship between ranges of visual colour Red, Green, Blue (RGB) and Cyan, Magenta, Yellow, Key (black) (CMYK)
- explain the main cost elements in printing production
- explain the basic principles of efficient production management.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing industry and include access to:

- industry-standard technology, equipment and materials
- sources of information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## ICTCBL236 Install, maintain and modify customer premises communications cabling: ACMA Restricted Rule

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

### Application

This unit describes the skills and knowledge required to safely install, maintain and modify communications cabling required according to the Australian Communications and Media Authority's (ACMA) 'Restricted' Cabling Provider Rule on customers premises for cabling terminated on sockets and network termination devices (NTD) of indoor and external metallic cable in either aerial or underground situations.

It applies to individuals who may provide services to connect telecommunications devices including telephony systems, security alarm panels and fire control panels in either a new cable installation or upgrade of cable capacity for an existing network or subsystem for convergence to Next Generation Networks (NGN) applications. Customers are typically domestic premises, small offices, home offices and small business premises. Generally large commercial and industrial premises are excluded except in special circumstances where the cabling is behind a compliant device and is not via jumperable distributors or patch panels.

All customer cabling work in the telecommunications, fire, security and data industries must be performed by a registered cabler. All cablers are required to register with an ACMA-accredited registrar.

### Pre-requisite Unit

ICTWHS204 Follow work health and safety and environmental policies and procedures

ICTTEN201 Use electrical skills in telecommunications work

### Unit Sector

Telecommunications – Cabling

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for restricted cabling work	<p>1.1 Prepare for restricted cabling work within the ACMA regulatory environment, cabling environment, cable type, cable identification, termination systems, earthing and protection, records and according to requirements of relevant legislation, codes, regulations and standards</p> <p>1.2 Identify building infrastructure which places critical constraints on cabling</p> <p>1.3 Develop strategies to manage other infrastructure in relation to cabling</p> <p>1.4 Notify appropriate personnel of safety hazards at the cabling work site</p>
2. Manage remote power feed	<p>2.1 Identify and avoid the risks posed by contact with remote power feeding services when performing cabling activity</p> <p>2.2 Make site safe by identifying remote power feeding services which operate at above telecommunications network voltage (TNV) inside customer premises</p>
3. Install cables and protective earth wires	<p>3.1 Install cables according to manufacturer's application specifications, including tension and bending stress requirements</p> <p>3.2 Identify and avoid sources of possible damage to cable, including hot pipes, sharp edges and cable burn</p> <p>3.3 Allow sufficient excess at cable ends to facilitate termination</p> <p>3.4 Place and secure cable to maintain safety and interference segregation according to legislative and industry standards</p> <p>3.5 Install cable fasteners with correct tension to prevent cable sheath damage or transmission impairment and trimmed flush to prevent risk of personal damage</p> <p>3.6 Install underground cables to minimum depth of cover and segregation from hazardous electrical and other services according to current Australian Standards</p> <p>3.7 Install underground cables excluding blown fibre tube systems to incorporate a blocking agent within the cable to prevent the ingress of water</p> <p>3.8 Install aerial cables to minimum clearance, segregation from hazardous electrical and other services and minimum height</p>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	<p>requirements according to current Australian Standards</p> <p>3.9 Install over-voltage protection devices according to Australian Standards to all cable pairs, where required, to suppress voltage surges and protect from earth potential rise (EPR) hazards and protectively earth the devices</p> <p>3.10 Protect earth wire insulation against damage and segregate protective earths according to relevant legislative and industry standards</p>
<p>4. Terminate and test cables and earth wires</p>	<p>4.1 Remove cable sheath to allow for correct termination length and without damage to underlying conductors and their insulation</p> <p>4.2 Install Network Termination Device (NTD) modules according to manufacturer's specifications and cable pairs neatly and sequentially fanned for termination</p> <p>4.3 Terminate conductors according to recommended colour code sequence using appropriate termination tools in the manufacturer's specified manner</p> <p>4.4 Earth cable shield, if applicable, to manufacturer's specifications, relevant industry codes of practice and Australian Standards</p> <p>4.5 Conduct visual inspection to confirm termination colour code sequence has been followed prior to end-to-end testing of wire and pair termination integrity</p> <p>4.6 Terminate earth wire according to industry accepted codes of practice and Australian Standards</p> <p>4.7 Ensure earth wire continuity throughout and observe interface requirements with electrical systems</p> <p>4.8 Test earthing installation for continuity, insulation resistance and conductive resistance according to accepted industry standards and Australian Standards</p> <p>4.9 Confirm compatibility of alterations with existing systems and test new work both in isolation and when integrated with existing systems</p>
<p>5. Inspect cable route to ensure correct separations</p>	<p>5.1 Inspect separations along the entirety of the cable route and rectify separations which do not comply with regulations</p> <p>5.2 Install barriers to achieve separations where sufficient spatial separation cannot be met</p>
<p>6. Create records</p>	<p>6.1 Provide the client with a job sign-off, telecommunications cabling advice form, at the completion of each cabling task</p> <p>6.2 Complete NTD record cards for the work undertaken</p>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
7. Monitor work activity	7.1 Supervise cablers not holding appropriate registration for the task to ensure cabling activity is according to legislative requirements for safety and network integrity including the relevant Australian Standards

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Reading	1.1, 3.1, 3.8 - 3.9, 4.2 - 4.4, 4.8, 6.1 - 6.2, 7.1	<ul style="list-style-type: none"> <li>Recognises and responds to some conventions of complex texts</li> <li>Recognises when unknown words are essential to meaning and uses a range of decoding strategies to identify them</li> </ul>
Writing	1.4, 6.1 - 6.2	<ul style="list-style-type: none"> <li>Uses a legible handwriting style or a computer font appropriate to the audience and purpose</li> </ul>
Oral Communication	1.4	<ul style="list-style-type: none"> <li>Demonstrates awareness of choices for register, especially in situations that are familiar</li> </ul>
Numeracy	3.1, 3.6, 3.8 - 3.9, 4.1, 4.8, 4.9	<ul style="list-style-type: none"> <li>Relies substantially on hands-on (concrete) and real life materials, personal experience and prior knowledge to make estimations and check the reasonableness of processes</li> <li>Identifies appropriate tools and uses them to take measurements</li> <li>Interprets information based on results of technical tests</li> </ul>
Navigate the world of work	1.1, 1.4, 3.4, 3.6, 3.8 - 3.10, 4.2, 4.4, 4.8, 7.1	<ul style="list-style-type: none"> <li>Takes personal responsibility for adherence to legal/regulatory responsibilities relevant to own work context, and draws attention to any issues that may affect self or others</li> </ul>
Get the work done	1.1 - 1.3, 2.1 - 2.2, 3.1 - 3.7, 3.9 - 3.10, 4.1, 4.4 - 4.7, 4.9, 5.1 - 5.2	<ul style="list-style-type: none"> <li>Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues</li> <li>Automatically implements standard procedures for routine decisions in response to familiar problems</li> </ul>

## Range of Conditions

*This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.*

Termination systems must include:	<ul style="list-style-type: none"> <li>• network termination device</li> <li>• Australian modular socket</li> <li>• Mode 3 alarm socket</li> <li>• RJ45, RJ12 or RJ11 modular socket.</li> </ul> <p>(Note: jumperable distributors are not included in this requirement).</p>
Earthing and protection must include:	<ul style="list-style-type: none"> <li>• earthing for protection</li> <li>• surge suppression.</li> </ul>

## Assessment Requirements for ICTCBL236 Install, maintain and modify customer premises communications cabling: ACMA Restricted Rule

### Modification History

Release	Comments
Release 2	This version first released with ICT Information and Communications Technology Training Package version 3.1. New release provides updates to Elements and Performance Criteria.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

### Performance Evidence

Evidence of the ability to:

- complete a cabling installation and termination for the following:
  - three different types of telephone sockets:
    - Australian modular socket
    - RJ45, RJ12 or RJ11 modular socket
    - Mode 3 alarm socket
  - one network termination device (NTD) completion of TCA1 compliance forms and NTD records
- apply cable conductor identification codes
- conduct and interpret cable test results
- interpret and apply standards and regulations
- comply with all related work health and safety (WHS) requirements and work practices
- meet Australian Communications and Media Authority's (ACMA) requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss the basic electrical principles of - insulation, resistance, capacitance, induction - as causes of, impedance, attenuation and cross-talk
- identify Australian Communications and Media Authority's (ACMA) cabling provider rules, cabler registration rules, regulations and standards
- describe the regulatory environment in which cabling can be carried out including:
  - accredited registrars and registration
  - ACMA
  - Certified Components List
  - labelling requirements
- describe the customer cabling environment for which restricted cabling may be required for internal, external, above ground or below ground installation
- identify and describe the various cable types, their identifiers, termination systems, separations, support systems and fastening techniques used for communications cabling
- describe the features and operating requirements of recognised cabling specific industry test equipment
- describe the information required to operate equipment according to a test specification
- identify legislation, codes of practice and other formal agreements that impact on the work activity
- identify the manufacturer's requirements for safe operation of equipment
- identify specific workplace health and safety (WHS) requirements relating to the activity and site conditions
- describe test methods and performance requirements
- describe the typical issues and challenges that occur on site
- summarise the mandatory and workplace records required when installing communications cabling
- describe the installation requirements for underground and aerial cables including:
  - minimum depth of cover (below ground)
  - segregation from hazardous electrical and other services
  - earthing requirements
  - compliance with current Australian Standards
- describe the design parameters for underground cables in regard to the purpose they will serve and for the prevention of water ingress.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – cabling field of work and include access to special purpose tools, equipment and materials. These include:

- access to a site on which communications cabling activities may be carried out
- cabling and field equipment currently used in industry
- licensing requirements and other site related documentation.

Note: All client cabling work in the telecommunications, fire, security and data industries must be performed by a registered cabler. All cablers are required to register with an Australian Communications and Media (ACMA) accredited registrar. Assessment by a Telecommunications Industry Training Advisory Board (TITAB) registered assessor is recommended for this unit.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## ICTCBL237 Install, maintain and modify customer premises communications cabling: ACMA Open Rule

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

### Application

This unit describes the skills and knowledge required to safely install, maintain and modify customer premises communications cabling required according to Australian Communications and Media Authority's (ACMA) 'Open' Cabling Provider Rule for small installations connected to sockets, and larger commercial and industry installations involving many lines, multi-pair cables, backbone cabling, multi-story buildings and advanced termination modules and distributors.

It applies to individuals who provide services in telephony, carrier modems or multiplexers, private modems or data systems operating over a category one or two twisted pair metallic customer cable in a specific customer location and install, maintain or modify new cable or upgrade cable capacity either, indoor, external, underground or aerial cabling on private and public property for an existing network or subsystem, or cabling infrastructure for convergence to Next Generation Networks (NGN).

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

### Pre-requisite Unit

ICTCBL236 Install, maintain and modify customer premises communications cabling:  
ACMA Restricted Rule

### Unit Sector

Telecommunications – Cabling

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan open cabling work	1.1 Prepare for open cabling work according to the ACMA regulatory environment, cabling environment, cable type, cable identification, termination systems, earthing and protection, records and relevant legislation, codes, regulations and standards 1.2 Identify building infrastructure which places critical constraints on cabling 1.3 Develop strategies to manage other infrastructure in relation to cabling 1.4 Notify appropriate personnel of identified safety hazards at cabling worksite
2. Manage remote power feed	2.1 Identify and avoid the risks posed by contact with remote power feeding services when performing cabling activity 2.2 Make site safe identifying remote power feeding services which operate at above telecommunications network voltage (TNV) inside customer premises
3. Install and modify cable support, earthing and termination infrastructure	3.1 Install fixings and cable support structures of adequate strength, safely and aligned with the environment according to manufacturer's and customer's specifications 3.2 Secure catenary supports to building structure and tension, where necessary, to ensure cable weight can be carried in operating conditions with interference and safety segregation maintained including adherence to current Australian Standards 3.3 Install protective earthing of metal work to industry standards where required 3.4 Inspect installed support structure to ensure cable will not be exposed to damage during installation and general operation 3.5 Position terminating equipment and fixing to accepted industry codes of practice, standards and customer requirements 3.6 Inspect back-mount and outlet layout for compliance to manufacturer's specifications and allow adequate work space for ease of access and avoid overlaying 3.7 Segregate incoming and outgoing cables for ease of access and avoid overlaying
4. Install cables and	4.1 Install cables according to manufacturer's application

ELEMENT	PERFORMANCE CRITERIA
earth wires	<p>specifications, including tension and bending stress requirements</p> <p>4.2 Identify and avoid sources of possible damage to cable, including hot pipes, sharp edges, cable burn, kinks, crushing or stretching</p> <p>4.3 Allow sufficient excess at cable ends to facilitate termination</p> <p>4.4 Label telecommunication outlet ends of cable uniquely to match identifier at originating location</p> <p>4.5 Place and secure cable to maintain safety and interference segregation according to legislative and industry standards</p> <p>4.6 Install cable fasteners with correct tension to prevent cable sheath damage or transmission impairment and trimmed or fitted flush to prevent risk of personal damage</p> <p>4.7 Install aerial cables supported by catenaries in external environment to meet minimum above ground clearances and clearances from hazardous electrical services according to current Australian Standards</p> <p>4.8 Install underground cables to minimum depth of cover and segregation from hazardous electrical and other services according to current Australian Standards</p> <p>4.9 Install cables underground (excluding blown fibre tube systems) to incorporate a blocking agent within the cable to prevent the ingress of water</p> <p>4.10 Install over-voltage protection devices to all cable pairs, where required, according to current Australian Standards, to suppress voltage surges with the devices protectively earthed</p> <p>4.11 Conduct a visual inspection to verify telecommunications reference conductor (TRC)/ communications earthing system (CES)/ earth wire insulation is protected against damage and TRC/CES/ protective earths segregated according to relevant industry and legislative standards and current Australian Standards</p>
5. Terminate and test cables and earth wires	<p>5.1 Remove cable sheath to allow for correct termination length and without damage to underlying conductors and their insulation</p> <p>5.2 Install terminating modules to different telecommunications cables according to manufacturer's specifications and cable pairs neatly and sequentially fanned for termination</p> <p>5.3 Terminate conductors according to recommended colour code sequence using appropriate termination tools in the manufacturer's specified manner</p> <p>5.4 Earth cable shield, if applicable, to manufacturer's specifications,</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>relevant industry codes of practice and current Australian Standards</p> <p>5.5 Conduct visual inspection to confirm termination colour code sequence has been followed prior to end-to-end testing of wire and pair termination integrity</p> <p>5.6 Terminate earth wires with connectors recommended by manufacturers according to accepted industry codes of practice and current Australian Standards</p> <p>5.7 Ensure earth wire continuity throughout and observe interface requirements with electrical systems</p> <p>5.8 Test earthing installation for continuity, insulation resistance and conductive resistance according to accepted industry standards including current Australian Standards</p> <p>5.9 Confirm compatibility of alterations with existing systems and test new work both in isolation and when integrated with existing systems</p> <p>5.10 Test installed cable continuity after termination</p>
<p>6. Inspect cable route to ensure correct separations</p>	<p>6.1 Inspect separations along the entirety of the cable route and rectify separations which do not comply with regulations</p> <p>6.2 Install barriers to achieve separations where sufficient spatial separation cannot be met</p>
<p>7. Evaluate earthing needs for cable systems on customer premises</p>	<p>7.1 Locate existing earthing systems in customer premises and analyse the earthing needs of cable products</p> <p>7.2 Calculate the upper and lower limits of resistance for a variety of cable system earths using relevant cable characteristics</p>
<p>8. Label earthing systems</p>	<p>8.1 Identify label requirements for telecommunications earthing systems</p> <p>8.2 Attach label to earthing systems according to industry regulations</p>
<p>9. Create or update cable plans and records</p>	<p>9.1 Document installation details on record sheets and plans and store according to customer requirements</p> <p>9.2 Label cable pairs clearly to provide an accurate identification according to manufacturer's, industry and client standards</p> <p>9.3 Record cabling details in cable pair record books to provide an accurate record according to industry codes of practice and current Australian Standards</p> <p>9.4 Complete telecommunications cabling advice (TCA) forms</p>

ELEMENT	PERFORMANCE CRITERIA
10. Monitor work activity	10.1 Supervise cablers not holding appropriate registration for the task to ensure installation and maintenance activity comply with legislative requirements and industry standards for safety and network integrity including current Australian Standards

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	4.1, 5.3,	<ul style="list-style-type: none"> <li>Recognises the structures and distinguishing features of a range of familiar text types</li> </ul>
Writing	8.2, 9.1, 9.2, 9.3,	<ul style="list-style-type: none"> <li>Sequences writing to produce cohesive text and uses layout consistent with text type</li> </ul>
Oral Communication	1.4, 10.1	<ul style="list-style-type: none"> <li>Demonstrates awareness of choices for register, especially in situations that are familiar</li> </ul>
Numeracy	3.2, 4.1, 4.3	<ul style="list-style-type: none"> <li>Interprets and comprehends whole and familiar or routine fractions, decimals and percentages when measuring and preparing cables for installation</li> </ul>
Navigate the world of work	1.1, 3.1, 3.2, 4.6, 4.7, 6.1, 9.2, 10.1	<ul style="list-style-type: none"> <li>Takes personal responsibility for adherence to legal/regulatory responsibilities relevant to own work context, and draws attention to any issues that may affect self or others</li> </ul>
Get the work done	1.1, 1.2, 1.3, 2.1, 2.2, 3.1-3.7, 4.1-4.7, 5.1-5.7, 6.1, 6.2, 7.1, 8.1, 8.2,	<ul style="list-style-type: none"> <li>Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues</li> <li>Automatically implements standard procedures for routine decisions in response to familiar problems</li> </ul>

# Assessment Requirements for ICTCBL237 Install, maintain and modify customer premises communications cabling: ACMA Open Rule

## Modification History

Release	Comments
Release 2	This version first released with ICT Information and Communications Technology Training Package version 3.1. New release provides updates to Elements and Performance Criteria.
Release 1	This version first released with ICT Information and Communications Technology Training Package version 2.0.

## Performance Evidence

Evidence of the ability to:

- identify the correct telecommunications cable by its colour identifier
- terminate systems at both distributor and outlet locations
- install and terminate one jumperable distributor (campus distributor or building distributor) with a capacity of 100 pair or greater
- terminate one non-jumperable distributor (Local Distributor)
- terminate at least one 50 pair and one 4 pair data cable, including accurate completion of installation records, drawing alterations and compliance forms
- place cables on support structures and building faces for both internal and external locations
- secure cables with appropriate fasteners for the above locations
- demonstrate work practices which avoid cable damage
- install at least one common type of earthing system used in customer premises for cabling systems
- read and interpret drawings related to cable layouts, outlet location, cable coding system, and identifiers and distributor locations
- conduct and interpreting cable test results
- interpret and apply relevant legislation, codes, regulations and standards
- comply with all work, health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify Australian Communications and Media Authority's (ACMA) cabling provider rules, cabler registration rules, regulations and standards
- describe the features and operating requirements of recognised cabling specific industry test equipment
- describe the regulatory environment in which cabling can be carried out including:
  - accredited registrars and registration
  - ACMA
  - Certified Components List
  - labelling requirements
- describe the customer cabling environment for which cabling registration may be required for internal, external, above ground or below ground installation
- describe the information required to operate equipment according to a test specification
- identify legislation, codes of practice and other formal agreements that impact on the work activity
- identify and describe the various cable types, their identifiers, termination systems (including jumperable and non-jumperable distributor), separations, support systems and fastening techniques used for telecommunications cabling
- describe important documentation and records required when cabling
- identify the manufacturer requirements for safe operation of equipment
- identify and describe earthing and protection strategies and technologies relevant to different cabling applications
- identify specific WHS requirements relating to the activity and site conditions
- describe test methods and performance requirements
- identify typical issues and challenges that occur on site
- describe devices for a range of telecommunications cabling applications, including, ethernet data systems, audio and video systems, security systems and fire protection systems
- define where integral bearer wires are required according to current Australian Standards
- describe underground cable minimum depth of cover and segregation from hazardous electrical and other services according to current Australian Standards
- describe cable blocking agents within used to prevent the ingress of water underground (excluding blown fibre tube systems)
- describe the feature of cables designed for underground use that may be laid in conduit trenches or direct buried
- describe the responsibilities and process for supervising communications installation works.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – cabling field of work and include access to:

- a site on which communications cabling activities may be carried out
- a jumperable distributor (campus distributor or building distributor) with a capacity of 100 pair or greater
- a patched distributor
- a 50 pair and 4 pair data system
- use of cabling and field equipment currently used in industry
- relevant regulatory and site related documentation.

Note: All client cabling work in the telecommunications, fire, security and data industries must be performed by a registered cabler. All cablers are required to register with an Australian Communications and Media (ACMA) accredited registrar. Assessment by a Telecommunications Industry Training Advisory Board (TITAB) registered assessor is recommended for this unit.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTCBL301 Install, terminate and certify structured cabling installation

## Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 2.0.

## Application

This unit describes the skills and knowledge required to place, secure and terminate structured cabling for indoor and outdoor installations and to certify the installation within a domestic, commercial or industrial client's premises.

It applies to technical staff who install, terminate and certify structured cabling installations for communications applications including digital and analog, telephony, data, video, digital broadcasting, computer networks, local area networks (LAN), wide area networks (WAN) and multimedia.

All client cabling work in the telecommunications, fire, security and data industries must be performed by a registered cabler. All cablers are required to register with an Australian Communications and Media (ACMA) accredited registrar.

The ACMA Pathways for Cabler Registration of Specialist Competency ICTCBL301 requires completion of ICTCBL247 and a WHS/OHS unit.

## Unit Sector

Telecommunications – cabling

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for	1.1 Confirm client requirements and ensure compliance with relevant

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
installation of structured cabling	<p>legislation, codes, regulations and standards</p> <p>1.2 Arrange access to site according to required procedure</p> <p>1.3 Inform appropriate personnel of identified safety hazards on worksite</p> <p>1.4 Organise tools and cabling products equipment for given work</p> <p>1.5 Erect barriers according to safety requirements</p> <p>1.6 Select cable type and match structured cabling to installation environment and client requirements</p> <p>1.7 Verify proposed route to meet manufacturer's specifications and industry standards</p>
2. Install structured cable	<p>2.1 Place and secure correct type of cable following work health and safety (WHS) and environmental requirements, and according to accepted industry practice and standards</p> <p>2.2 Maintain cable and services separations in runs and cross overs to meet manufacturer and industry standards</p> <p>2.3 Install structured cabling to industry standards</p> <p>2.4 Minimise twist ratio defects to avoid accumulation effect on structured cable performance</p> <p>2.5 Fit over-voltage protection devices to all cables and metallic components where required</p>
3. Terminate structured cable	<p>3.1 Terminate cable according to accepted industry practice and standards</p> <p>3.2 Maintain correct twist ratio to optimise system performance at rated level</p> <p>3.3 Use correctly rated termination hardware with appropriate termination tool to ensure integrity and performance of termination</p> <p>3.4 Earth cable shield to manufacturer's specifications and relevant industry standards if applicable</p>
4. Certify system performance to required level and complete documentation for client	<p>4.1 Test installation and termination to comply with certification requirements</p> <p>4.2 Record and verify system performance promptly where required</p> <p>4.3 Authorise and issue appropriate documentation to client to certify system performance and complete records where required</p> <p>4.4 Reinstate site to client's satisfaction and dispose of waste in environmentally safe manner</p> <p>4.5 Notify client and obtain sign off</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Integrates new ideas and information with existing understanding</li> <li>Recognises the structures and distinguishing features of a range of familiar text types</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Sequences writing to produce cohesive text</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Uses clear language and concepts, and tone and pace appropriate for the audience and purpose</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Interprets and comprehends whole numbers and familiar or routine fractions, decimals and percentages</li> </ul>
Navigate the world of work	<ul style="list-style-type: none"> <li>Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context, and draws attention to any issues that may affect self or others</li> </ul>
Interact with others	<ul style="list-style-type: none"> <li>Recognises the purpose of various communications directly relevant to own role</li> </ul>
Get the work done	<ul style="list-style-type: none"> <li>Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues</li> <li>Automatically implements standard procedures for routine decisions in response to familiar problems</li> <li>Understands when to take responsibility and when to notify others</li> </ul>

## Range of Conditions

*This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.*

Over-voltage protection devices requirements <b>must</b>	<ul style="list-style-type: none"> <li>ACMA standards</li> <li>enterprise or local environmental hazard</li> </ul>
--	--

<i>comply with:</i>	<ul style="list-style-type: none"> <li>• manufacturer's specifications.</li> </ul>

# Assessment Requirements for ICTCBL301 Install, terminate and certify structured cabling installation

## Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 2.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- install, terminate and certify a structured cabling installation to industry standards, applying related work health and safety (WHS) requirements and work practices
- install and test the following UTP (Cat 6, Cat 6A & Cat 7) and FTP (Cat 6 2x2)
- install termination hardware
- conduct a termination test and interpret the results
- verify compliance with manufacturer's installation specifications and warranties
- provide a report certifying the installation and test results to the client.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- Australian Communications and Media Authority (ACMA) competency requirements for Telecommunications Cabling Provider Rules
- legislation, codes of practice and other formal agreements that impact on the work activity
- application of industry standards on cable bending, anchors, tension, twist and labelling
- tools and equipment commonly used in cable installations and testing
- features and operating requirements of test equipment

- types and structure of cable and termination hardware used in communications installations
- information required to operate equipment according to a test specification
- identify the manufacturer's requirements for safe operation of equipment
- identify specific WHS hazards and requirements relating to the activity and site conditions
- test methods and performance requirements
- different types of records and documentation that may be required for certification and reporting
- typical issues and challenges that occur on site.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- sites where installation, termination and certification of structured cabling may be conducted
- testing equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on installation.

Note: All client cabling work in the telecommunications, fire, security and data industries must be performed by a registered cabler. All cablers are required to register with an Australian Communications and Media (ACMA) accredited registrar. Assessment by a Telecommunications Industry Training Advisory Board (TITAB) registered assessor is recommended for this unit.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## ICTDBS502 Design a database

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to establish client needs and technical requirements and to design a database that meets those requirements.

It applies to individuals employed as database administrators and designers who are required to design databases.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Database

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine database requirements	1.1 Meet with the client, and conduct a user-needs analysis, to determine database functionality 1.2 Analyse the results of a user-needs analysis to identify technical requirements 1.3 Develop a conceptual model of the database 1.4 Submit the conceptual model to the client for review 1.5 Evaluate client feedback and make changes as required

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
2. Develop a logical data model	2.1 Identify the attributes and determine the data types 2.2 Undertake the normalisation of attributes 2.3 Develop an entity-relationship (ER) diagram in order to clarify the cardinality of relationships 2.4 Document attributes, normalised data, and the ER diagram 2.5 Forward documentation to the client for confirmation
3. Design the data structures	3.1 Confirm primary and foreign keys for tables 3.2 Review client business rules 3.3 Identify the referential integrity constraints 3.4 Establish database management system constraints and incorporate into database design 3.5 Develop the validation rules for data 3.6 Design indexes and develop the data dictionary 3.7 Document the database design
4. Design queries, screens and reports	4.1 Design the user interface for database, including menus, input screens and outputs 4.2 Design queries, based on requirements 4.3 Design output reports, based on requirements 4.4 Compare the physical design with the conceptual model, or user-needs analysis 4.5 Incorporate changes as required
5. Design access and security systems	5.1 Review the business security plan as a basis for commencing the access and security design 5.2 Design the password and access system for the database 5.3 Identify multiple-user requirements 5.4 Develop client access profiles using the client business model
6. Confirm the database design	6.1 Identify the database backup and recovery requirements 6.2 Develop and document the database backup and restore procedures 6.3 Submit the database, and documentation, to the client for final approval

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.2, 1.5, 2.1, 3.2, 3.3, 4.4, 5.1, 6.1	<ul style="list-style-type: none"> <li>Interprets textual information obtained from a range of sources and determines how content may be applied to requirements</li> </ul>
Writing	1.3, 2.3, 2.4, 3.7, 6.2, 6.3	<ul style="list-style-type: none"> <li>Develops content in a manner that supports the purposes and format of the requirements using appropriate structure, layout and specialised technical and programming language</li> </ul>
Oral Communication	1.1, 1.4, 1.5, 2.5, 3.2, 5.1, 6.3	<ul style="list-style-type: none"> <li>Uses listening, questioning and summarising techniques to identify needs, and uses specific and clear language when engaging with others</li> </ul>
Numeracy	3.4, 4.1, 4.3, 4.4	<ul style="list-style-type: none"> <li>Makes measurements and performs calculations for work layout, determine field lengths and table size and estimate database size</li> </ul>
Get the work done	All	<ul style="list-style-type: none"> <li>Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information and risks, identify and evaluate alternative strategies and resources</li> <li>Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information, and identifying and evaluating options against the agreed criteria</li> <li>Understands the key principles and concepts underpinning the design, and operation, of digital systems and tools</li> </ul>

# Assessment Requirements for ICTDBS502 Design a database

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- identify and confirm client requirements for a database application
- design database elements including:
  - structure
  - indexes
  - queries
  - screens
  - reports
- design secure access to the database
- confirm final database design with the client.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the process of data analysis, particularly in determining data types and data structures, query and report design
- describe the data modelling related to developing the conceptual data model
- explain how data redundancy is identified
- describe database management system (DBMS) fundamentals, particularly during the design phase
- explain encryption and authentication as these apply to database security features
- outline the functions and features of data types, and data structures
- describe the functions, and features, of databases
- describe logical design concepts, particularly those related to designing data structures, queries screens and reports

- outline the object model design concepts, particularly those related to designing data structures, queries, screens and reports
- explain the term ‘scalability’ as it applies to databases.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the database field of work, and include access to:

- equipment and materials
- current industry accepted database software
- network or other system for remote or multi-user access
- business requirements
- computer-aided software engineering (CASE) or diagramming software.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTICT101 Operate a personal computer

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Application

This unit describes the skills and knowledge required to operate a personal computer (PC) in a home or small office environment, including accessing files with application programs, sending and retrieving emails, using the internet, using peripheral devices and applying basic security procedures and power management settings.

It applies to individuals who require entry level information and communications technology (ICT) knowledge and literacy skills to perform a range of simple operation tasks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

General ICT

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to use the personal computer	1.1 Identify physical components and associated peripheral devices of the personal computer to become familiar with the available network 1.2 Check physical connectivity of devices to ensure correct operation and performance 1.3 Boot up and follow procedures to activate the computer

ELEMENT	PERFORMANCE CRITERIA
2. Manage computer configurations	2.1 Alter the computer settings to best suit the user 2.2 Configure power management settings to minimise power consumption as an environmentally sustainable measure 2.3 Identify operating system and the application programs loaded on the computer to determine computer capability 2.4 Conduct basic software installation and removal to improve computer capability 2.5 Navigate and manipulate desktop environment to create and customise desktop icons and access application programs
3. Access and use basic application programs	3.1 Open a folder with file documents containing basic office applications, make minor changes and save in a different folder 3.2 Send and retrieve a simple email message using the desktop icon to communicate with other parties 3.3 Access the internet using the web browser to view and conduct basic web information search 3.4 Use firewall and antivirus and malware scans to reduce security risks and threats in the system
4. Access and use basic peripheral devices	4.1 Access external storage devices to retrieve, copy, move and save information in different media and locations 4.2 Use printer settings on an installed printer to print a document 4.3 Access audio-visual (AV) devices to view and play a multimedia file
5. Shut down computer	5.1 Back up important documents and programs to minimise risk of data loss 5.2 Save any work to be retained and close open application programs 5.3 Shut down computer and switch off any unused peripheral devices

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.3, 2.1-2.5, 3.2, 3.3	<ul style="list-style-type: none"> <li>Recognises textual information to determine and complete technical functions</li> </ul>
Writing	3.1- 3.3, 4.1	<ul style="list-style-type: none"> <li>Enters information using familiar text types in a format appropriate to environment</li> </ul>
Get the work done	1.1-1.3, 2.1-2.5, 3.1-3.4, 4.1-4.3, 5.1-5.3	<ul style="list-style-type: none"> <li>Plans routine tasks with familiar goals and outcomes, taking some limited responsibility for decisions regarding sequencing</li> <li>Understands the purpose and specific functions of common digital tools used in work contexts</li> <li>Implements basic security requirements related to own tasks</li> <li>Recognises and responds to predictable routine problems related to role in the immediate work context</li> </ul>

## Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
ICTICT101 Operate a personal computer	ICAICT101A Operate a personal computer	<p>Updated to meet Standards for Training Packages.</p> <p>Minor edits to clarify intent of performance criteria</p>	Equivalent unit

# Assessment Requirements for ICTICT101 Operate a personal computer

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- use hardware and software
- navigate around the desktop, using features to perform tasks
- save results of work.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify basic parts of a computer and various hardware components
- explain commonly used software operation and application packages
- name basic security functions and computer functions
- list a range of peripheral devices that can be used with a personal computer
- describe common computer storage devices.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- appropriate learning and assessment support when required
- personal computer, including printer, mouse, keyboard and monitor
- use of basic software currently used in industry.

Assessors must satisfy NVR/AQTF assessor requirements.

## ICTICT102 Operate word-processing applications

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to operate word- processing applications and perform basic operations, including creating and formatting documents, creating tables and printing labels.

It applies to individuals in the workplace using fundamental knowledge of word-processing under direct supervision or with limited responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

General ICT

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Apply workplace health and safety (WHS) practices	1.1 Use workplace ergonomic work practices and strategies 1.2 Organise work area to ensure an ergonomic work environment
2. Create documents	2.1 Open word-processing application, create document and add data according to information requirements 2.2 Use document templates as required

ELEMENT	PERFORMANCE CRITERIA
	2.3 Use simple formatting tools when creating the document 2.4 Save document to directory
3. Customise basic settings to meet page layout conventions	3.1 Adjust page layout to meet information requirements 3.2 Open and view different toolbars 3.3 Change font format to suit document purpose 3.4 Change alignment and line spacing according to document information requirements 3.5 Modify margins to suit the document purpose 3.6 Open and switch between several documents
4. Format documents	4.1 Use formatting features and styles as required 4.2 Highlight and copy text from another area in the document or from another active document 4.3 Insert headers and footers to incorporate necessary data 4.4 Save document in another file format 4.5 Save and close document to a storage device
5. Create tables	5.1 Insert standard table into document 5.2 Change cells to meet information requirements 5.3 Insert and delete columns and rows as necessary 5.4 Use formatting tools according to style requirements
6. Add images	6.1 Insert appropriate images into document and customise as necessary 6.2 Position and resize images to meet document formatting needs
7. Print documents	7.1 Preview document in print preview mode 7.2 Select basic print settings 7.3 Print document or part of document from printer

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	2.1, 3.1, 3.4, 7.1	<ul style="list-style-type: none"> <li>Interprets specific information to determine and complete work required</li> </ul>
Writing	2.1, 4.3	<ul style="list-style-type: none"> <li>Prepares simple correspondence that incorporates key information in a format and style relevant to requirements</li> </ul>
Navigate the world of work	1.1	<ul style="list-style-type: none"> <li>Takes some personal responsibility for adherence to regulatory requirements</li> </ul>
Get the work done	1.2, 2.1, 3.1-3.6, 4.1-4.5, 5.1-5.4, 6.1, 6.2, 7.2, 7.3	<ul style="list-style-type: none"> <li>Plans routine tasks with familiar goals and outcomes, taking some limited responsibility for decisions regarding sequencing</li> <li>Understands the purpose and specific functions of common digital tools used in work contexts</li> <li>Recognises and responds to common operational problems when using word-processing applications</li> </ul>

## Unit Mapping Information

# Assessment Requirements for ICTICT102 Operate word-processing applications

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- follow organisational ergonomic work health and safety (WHS) requirements and practices
- create, open and retrieve documents using customised basic settings
- format documents by creating tables and adding text, objects and images
- save and prints documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe formatting styles and their effect on formatting, readability and appearance of documents
- identify organisational requirements for ergonomics, including work periods and breaks
- select organisational style guide to use
- outline purpose, use and function of word-processing software.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a personal computer and printer
- word-processing software currently used in industry

- documents detailing organisational style guide or policy and work health and safety (WHS) requirements
- data suitable for use with word-processing packages.

Assessors must satisfy NVR/AQTF assessor requirements.

## ICTICT105 Operate spreadsheet applications

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to use spreadsheet applications, including creating spreadsheets, formatting data, incorporating charts and objects, and printing spreadsheets.

It applies to individuals who perform a range of routine tasks in the workplace using a fundamental knowledge of spreadsheets under direct supervision or with limited responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

General ICT

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Create spreadsheets	1.1 Open the spreadsheet application, create spreadsheet files and enter numbers, text and symbols into cells according to information requirements 1.2 Enter simple formulas and functions using cell referencing when required 1.3 Correct formulas when error messages occur 1.4 Use a range of common tools during spreadsheet

ELEMENT	PERFORMANCE CRITERIA
	development 1.5 Edit columns and rows within the spreadsheet 1.6 Use the auto-fill function to increment data where required 1.7 Save the spreadsheet to a folder on a storage device
2. Customise basic settings	2.1 Adjust page layout to meet user requirements or special needs 2.2 Open and view different toolbars 2.3 Change font settings so they are appropriate for the document purpose 2.4 Change alignment options and line spacing according to spreadsheet formatting features 2.5 Format cell to display different styles as required 2.6 Modify margin sizes to suit the purpose of the spreadsheets 2.7 View multiple spreadsheets concurrently
3. Format spreadsheet	3.1 Use formatting features as required 3.2 Copy selected formatting features from another cell in the spreadsheet or from another active spreadsheet 3.3 Use formatting tools as required within the spreadsheet 3.4 Align information in a selected cell as required 3.5 Insert headers and footers using formatting features 3.6 Save spreadsheet as another file type 3.7 Save to storage device and close spreadsheet
4. Incorporate object and chart in spreadsheet	4.1 Import an object into an active spreadsheet 4.2 Manipulate imported object by using formatting features 4.3 Create a chart using selected data in the spreadsheet 4.4 Display selected data in a different chart 4.5 Modify chart using formatting features
5. Print spreadsheet	5.1 Preview spreadsheet in print preview mode 5.2 Select basic printer options 5.3 Print spreadsheet or selected part of spreadsheet 5.4 Submit the spreadsheet to appropriate person for approval or feedback

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 2.1	<ul style="list-style-type: none"> <li>Interprets and comprehends symbolic, textual and numerical information and data</li> <li>Identifies data specifically needed for the spreadsheet from information received</li> </ul>
Writing	1.1, 1.2, 1.5, 3.5, 4.5	<ul style="list-style-type: none"> <li>Enters both written and verbally received information and data into a format suitable for spreadsheet analysis</li> <li>Selects vocabulary, terminology and naming conventions suitable for the spreadsheet</li> </ul>
Oral Communication	1.1, 2.1, 5.4	<ul style="list-style-type: none"> <li>Uses simple and relevant language with listening and questioning skills to confirm user requirements and elicit feedback</li> </ul>
Numeracy	1.2, 4.3, 4.4	<ul style="list-style-type: none"> <li>Adds, subtracts, multiplies and divides whole numbers and decimals, identifying and selecting the correct formulas and functions to use</li> <li>Applies the order of operations in calculations</li> <li>Identifies and comprehends the specific numeric data needed to create charts</li> </ul>
Interact with others	5.4	<ul style="list-style-type: none"> <li>Begins to use some routine forms of written communication relevant to immediate work role, with a limited awareness of requirements and expectations</li> </ul>
Get the work done	1.1-1.7, 2.1-2.7, 3.1-3.7, 4.1-4.5, 5.1-5.3	<ul style="list-style-type: none"> <li>Plans routine tasks with familiar goals and outcomes, taking limited responsibility for decisions regarding sequencing</li> <li>Understands the purpose and specific functions of common digital tools used in work contexts</li> <li>Takes responsibility for routine low-impact decisions within familiar situations</li> </ul>

## Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
ICTICT105 Operate spreadsheet applications	ICAICT105A Operate spreadsheet applications	Updated to meet Standards for Training Packages.  Minor edits to clarify intent of performance criteria.	Equivalent unit

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for ICTICT105 Operate spreadsheet applications

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- create spreadsheets
- customise basic settings
- format spreadsheets
- create basic formulas
- insert objects and charts in spreadsheets
- save and print spreadsheets.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list basic technical terminology related to reading help files and prompts
- explain the effect of formatting and appearance on the readability and usability of spreadsheets
- outline log-in procedures relating to accessing a personal computer (PC)
- describe the purpose, use and function of spreadsheet applications.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a personal computer (PC) and printer
- spreadsheet software currently used in industry
- documents detailing organisational style guide and policy
- documents or information containing data suitable for creating spreadsheets.

Assessors must satisfy NVR/AQTF assessor requirements.

## ICTICT203 Operate application software packages

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to identify, select and operate three commercial software packages, including a word-processing and a spreadsheet application package.

It applies to individuals who utilise different software applications within a small to large office environment to produce diverse documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

General ICT

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Use appropriate workplace health and safety (WHS) office work practices	1.1 Use safe work practices to ensure ergonomic, work organisation, energy and resource conservation requirements are addressed 1.2 Use wrist rests and document holders where appropriate 1.3 Use monitor anti-glare and radiation reduction screens where appropriate
2. Use appropriate	2.1 Select word-processing software appropriate to perform

ELEMENT	PERFORMANCE CRITERIA
word-processing software	activity 2.2 Identify document purpose, audience and presentation requirements, and clarify with personnel as required 2.3 Identify organisational requirements for text-based business documents, and design document structure and layout to ensure consistency of style and image 2.4 Match document requirements with software functions to provide efficient production of documents 2.5 Use technical functions, other data and formatting to finalise documents 2.6 Ensure the naming and storing of documents in appropriate directories or folders and the printing of documents to the required specifications
3. Use appropriate spreadsheet software	3.1 Select spreadsheet software appropriate to perform activity 3.2 Identify document purpose, audience and presentation requirements, and clarify with personnel as required 3.3 Enter simple formulas and functions using cell referencing where required 3.4 Customise spreadsheet settings to meet requirements 3.5 Ensure the naming and storing of documents in appropriate directories or folders and the printing of documents to the required specifications
4. Use a third application software package	4.1 Select software application package appropriate to perform activity 4.2 Identify purpose, audience and presentation requirements, and clarify with personnel as required 4.3 Use technical functions, other data and formatting to finalise documents 4.4 Ensure documents are named and stored in appropriate directories or folders and printed to required specifications

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	2.2-2.5, 3.2-3.4, 4.2, 4.3	<ul style="list-style-type: none"> <li>Recognises and interprets textual information to determine organisational standards and job requirements</li> <li>Interprets and comprehends symbols, icons and text associated with applications software</li> </ul>
Writing	2.3-2.6, 3.3- 3.5, 4.3, 4.4	<ul style="list-style-type: none"> <li>Enters both written and verbally received information and data into a format suitable for the software application</li> <li>Selects vocabulary, syntax, terminology, labelling and naming conventions suitable for the program</li> </ul>
Oral Communication	2.2, 2.3, 3.2, 4.2	<ul style="list-style-type: none"> <li>Uses simple, relevant language, effective questioning, and active listening techniques to clarify work requirements</li> </ul>
Numeracy	3.2-3.4	<ul style="list-style-type: none"> <li>Adds, subtracts, multiplies and divides whole numbers and decimals, identifying and selecting the correct formulas and functions to use</li> <li>Applies the order of operations in calculations</li> </ul>
Navigate the world of work	1.1	<ul style="list-style-type: none"> <li>Takes some personal responsibility for adherence to legal and regulatory requirements</li> </ul>
Get the work done	1.2, 1.3, 2.1-2.6, 3.1-3.5, 4.1-4.4	<ul style="list-style-type: none"> <li>Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to role</li> <li>Understands purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks, adapting some functions to improve personal efficiency</li> <li>Plans routine tasks with familiar goals and outcomes, taking some limited responsibility for decisions regarding sequencing</li> </ul>

## Unit Mapping Information

# Assessment Requirements for ICTICT203 Operate application software packages

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- produce workplace documents using a minimum of three different software application packages
- open, amend and save files and documents according to organisational requirements
- apply workplace health and safety (WHS) principles and responsibilities for ergonomics, such as work periods and breaks
- use help manuals and online help.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify application software packages used by the organisation and list the purpose of each
- explain basic technical terminology related to reading help files and responding to system help prompts
- outline current business practices related to using software to prepare reports
- list features and functions of commercial computing packages
- describe import and export software functions
- describe the process of linking documents
- outline WHS principles and responsibilities for ergonomics, such as work periods and breaks
- explain the purpose of input and output devices.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a personal computer (PC) and printer
- software currently used in industry
- documents detailing organisational style guide and policy
- documents or information containing data suitable for developing software application documents.

Assessors must satisfy NVR/AQTF assessor requirements.

## ICTICT210 Operate database applications

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to operate database applications and create and develop simple relational databases using pre-existing data.

It applies to individuals who provide administrative support working under direct supervision or with limited responsibility within a wide range of industry occupations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

General ICT

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Create database	1.1 Open a database application and design a two-table, simple relational database incorporating basic design principles 1.2 Develop a table with fields and attributes according to database usage, as well as user requirements 1.3 Create a primary key and establish an index for each table 1.4 Modify table layout and field attributes as required 1.5 Create a relationship between the two tables 1.6 Add and modify data in a table according to information

ELEMENT	PERFORMANCE CRITERIA
	requirements 1.7 Add and delete records as required 1.8 Save and close down database to storage area
2. Customise basic settings	2.1 Adjust page layout to meet user requirements 2.2 Open and view different toolbars 2.3 Format font as appropriate for the purpose of the database entries
3. Create reports	3.1 Design reports to present data in a logical sequence 3.2 Modify reports to include or exclude additional requirements 3.3 Distribute reports to appropriate person in a suitable format
4. Create forms	4.1 Use a wizard to create a simple form 4.2 Open existing database and modify records through a simple form 4.3 Rearrange objects within the form to accommodate information requirements
5. Retrieve information	5.1 Access existing database and locate required records 5.2 Create simple query and retrieve required information 5.3 Develop query with multiple criteria and retrieve required information 5.4 Select data and display appropriately

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 5.1	<ul style="list-style-type: none"> <li>Identifies and analyses a wide range of hard copy and on-line forms, reports and other end-user documentation to identify end-user needs and data</li> </ul>
Writing	1.2, 3.1, 3.2, 4.1, 4.3, 5.2, 5.3	<ul style="list-style-type: none"> <li>Uses database related terminology and protocols when designing tables, queries, reports and forms</li> </ul>

		<ul style="list-style-type: none"> <li>• Uses clear plain English appropriate for end-users when labelling fields within reports and forms</li> </ul>
Oral Communication	1.2, 3.3	<ul style="list-style-type: none"> <li>• Uses simple, relevant language, effective questioning, and active listening techniques to clarify user requirements, confirm understanding and when liaising with the appropriate person</li> </ul>
Numeracy	5.3	<ul style="list-style-type: none"> <li>• Identifies and comprehends the specific numeric data needed, and uses logical functions, mathematical symbols and applies the order of operations in calculations when developing queries</li> </ul>
Interact with others	3.3	<ul style="list-style-type: none"> <li>• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role</li> </ul>
Get the work done	1.1-1.8, 2.1-2.3, 3.1,3.2, 4.1-4.3, 5.1-5.4	<ul style="list-style-type: none"> <li>• Plans a range of routine tasks and aims to achieve them efficiently</li> <li>• Takes responsibility for routine, low-impact decisions within familiar situations</li> <li>• Begins to identify and implement standard solutions for a number of routine problems</li> <li>• Understands the purpose and specific functions of common digital tools used in work contexts</li> <li>• Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to role</li> </ul>

# Assessment Requirements for ICTICT210 Operate database applications

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- design and develop a simple database using a standard database package
- add data
- create and use a query with multiple criteria
- create and modify reports and forms.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline basic database design principles
- discuss the purposes of forms, reports and queries for retrieving and displaying information
- outline the reasons for relationships between tables (cardinality)
- describe the purpose, use and function of database software.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry and include access to:

- a PC and printer
- database software currently used in industry
- documents detailing organisational style guide and policy

- documents or information containing data suitable for creating a database.

Assessors must satisfy NVR/AQTF assessor requirements.

## ICTICT211 Identify and use basic current industry specific technologies

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to engage in basic ongoing review and research of industry specific technologies in order to identify and apply these technologies or techniques to improve aspects of an organisation's activities.

It applies to individuals who work under minimal supervision and are responsible for ensuring that the quality of the business process is maintained at the highest level possible, through the appropriate application of industry specific technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

General ICT

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to use basic industry specific technologies	1.1 Identify technologies specific to an industry sector 1.2 Acquire and use the industry specific technologies 1.3 Identify, classify and use industry specific technologies for the benefit of the organisation
2. Use basic industry	2.1 Conduct testing of industry specific technologies

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
specific technologies to assist in solving organisational problems	<p>2.2 Use features and functions of industry specific technologies within an organisational context</p> <p>2.3 Demonstrate depth of knowledge of enabling technologies to an accepted industry standard</p> <p>2.4 Access and use sources of information relating to the industry specific technologies</p>
3. Evaluate performance of basic industry specific technology	<p>3.1 Evaluate industry specific technologies for performance, usability and benefit to the organisation</p> <p>3.2 Determine environmental considerations involved when using the technology</p> <p>3.3 Seek feedback from users where appropriate</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Learning	1.1-1.3, 2.3, 2.4	<ul style="list-style-type: none"> <li>Investigates, evaluates and applies information from a range of complex and technical texts to expand own knowledge and identify industry specific technologies that will benefit the organisation</li> </ul>
Reading	1.1, 1.3, 2.1, 2.4, 3.2, 3.3	<ul style="list-style-type: none"> <li>Identifies and interprets technical online and hard copy documentation containing complex terminology and diagrams to identify industry specific technologies that will benefit the organisation, and to determine environmental considerations</li> </ul>
Oral Communication	1.1-1.3, 2.4, 3.1-3.3	<ul style="list-style-type: none"> <li>Elicits information and feedback by using effective listening and questioning techniques to identify and evaluate industry specific technologies</li> <li>Uses clear, easy-to-understand language, and translates industry specific terminology into plain English where necessary</li> </ul>
Navigate the world of work	2.3, 3.2	<ul style="list-style-type: none"> <li>Recognises organisational expectations and follows explicit protocols and procedures</li> </ul>
Get the work done	1.1-1.3, 2.1-2.4, 3.1	<ul style="list-style-type: none"> <li>Determines priorities and sequences the steps involved in clearly defined familiar tasks, and</li> </ul>

		identifies and assembles the resources required <ul style="list-style-type: none"> <li>• Demonstrates the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks</li> </ul>
--	--	---

# Assessment Requirements for ICTICT211 Identify and use basic current industry specific technologies

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- identify basic new and emerging industry specific technologies and techniques
- use basic features and functions of identified industry specific technologies to an industry standard.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline current technology trends and directions in information and communications technology (ICT), and specifically of the major industry technology standards used in the specified area
- outline vendor product directions
- describe current industry hardware and software products, with broad knowledge of general features and capabilities, and their application
- outline information gathering techniques.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general ICT industry, and include access to:

- a site where industry specific technologies may be used
- industry specific technologies currently used in industry
- documents detailing work health and safety (WHS) standards, environmental guidelines and organisational requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

## ICTICT302 Install and optimise operating system software

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

### Application

This unit defines the skills and knowledge required to install, configure and optimise operating system (OS) software to meet business and client needs.

It applies to individuals who may work under supervision and support others using well developed skills in creating solutions through analysis and evaluation of information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

General ICT

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine function of operating system	1.1 Identify and demonstrate understanding of the purposes of operating system 1.2 Distinguish between batch system, real-time system and multi-tasking system 1.3 Compare and contrast different operating systems and their features 1.4 Identify and demonstrate knowledge of the basic functions of operating system, including file system, memory

ELEMENT	PERFORMANCE CRITERIA
	management, process scheduling 1.5 Identify and demonstrate management of virtual memory
2. Obtain operating system	2.1 Contact operating system vendors to obtain technical specifications and system requirements 2.2 Identify process and steps required to install and configure the operating system using installation components 2.3 Document adjustment recommendations and provide to appropriate person 2.4 Determine and apply knowledge of licensing, hardware and security requirements
3. Install, configure and optimise operating system	3.1 Install, configure and test operating system using installation components and boot-utility options 3.2 Use the relevant operating system user interface to correctly configure the installation 3.3 Optimise the system to meet organisational requirements 3.4 Document the system according to organisational requirements 3.5 Install the operating system with minimal disruption to client or users
4. Provide instruction to meet new software requirements	4.1 Provide one-to-one instruction about changes to the client or users as required 4.2 Obtain client evaluation about new system to ensure requirements are met, using appropriate feedback mechanism

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.3-1.5, 2.1, 2.2, 2.4, 3.1, 3.2, 4.2	<ul style="list-style-type: none"> <li>Identifies, analyses and evaluates a range of on-line and hard-copy text containing complex, OS specific terminology, and applies the information to the selection, installation, configuration and optimisation of operating systems</li> </ul>

		<ul style="list-style-type: none"> <li>Interprets and comprehends a large range of syntax, diagrams, icons, symbols, text, numbers and letters necessary to install and configure operating systems</li> </ul>
Writing	2.3, 3.4	<ul style="list-style-type: none"> <li>Uses the correct spelling and grammar, clear plain English and systems related text to document recommendations and processes, and develop feedback tools</li> </ul>
Oral Communication	2.1, 3.5, 4.1, 4.2	<ul style="list-style-type: none"> <li>Elicits and evaluates information using OS related terminology and effective listening and questioning techniques</li> <li>Uses simple and relevant language to liaise with clients, present information and obtain feedback</li> </ul>
Navigate the world of work	2.4	<ul style="list-style-type: none"> <li>Takes some personal responsibility for adherence to legal and regulatory requirements, and seeks clarification when required</li> </ul>
Get the work done	1.1-1.5, 2.1, 2.2, 3.1-3.3, 3.5	<ul style="list-style-type: none"> <li>Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency and considering how to link with the work of others</li> <li>Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks</li> </ul>

## Unit Mapping Information

## Assessment Requirements for ICTICT302 Install and optimise operating system software

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- install, configure and test an operating system to improve system performance with minimum disruption to clients.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare current industry accepted hardware and software products
- outline functions and features of operating systems used by the organisation
- explain the installation and configuration of systems software
- explain the architecture of current technical systems
- outline the deployment of current organisational systems
- list organisational requirements for operating system (OS) software
- explain prerequisites for system software installation
- outline set-up and configuration procedures
- list software packages supported by the organisation
- describe system's current functionality
- list system's diagnostic software
- outline vendor specifications and requirements for installation.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a personal computer where installation may be performed
- OS software and technical documentation
- organisational documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTICT307 Customise packaged software applications for clients

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Application

This unit describes the skills and knowledge required to analyse, design, implement and review the customisation of packaged software applications, using simple programming constructs.

It applies to individuals who have achieved a degree of autonomy as information and communications technology (ICT) users and support personnel for software application activities in the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

General ICT

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse customisation requirements	1.1 Determine and document client requirements in a requirement specifications file in line with organisational requirements and security requirements 1.2 Confirm that projected specifications meet client requirements 1.3 Determine level of documentation necessary to meet client requirements

ELEMENT	PERFORMANCE CRITERIA
2. Develop customisation	<p>2.1 Design software applications, taking into account system limitations and client needs</p> <p>2.2 Customise software applications using simple programming constructs, conforming to organisational requirements</p> <p>2.3 Obtain feedback from the client following client testing of the customised software applications</p> <p>2.4 Make further changes to software applications to meet client requirements</p> <p>2.5 Document the changes</p>
3. Provide support for customised application	<p>3.1 Produce documentation for client</p> <p>3.2 Produce help desk documentation for ongoing support</p> <p>3.3 Obtain clients' evaluation and feedback to ensure that their requirements have been met</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.2, 3.3	<ul style="list-style-type: none"> <li>Identifies and interprets a variety of hard copy and online technical information to identify organisational requirements and clarify client requirements</li> </ul>
Writing	1.1, 1.3, 2.1, 2.2, 2.4, 2.5, 3.1, 3.2	<ul style="list-style-type: none"> <li>Uses correct spelling and grammar, plain English and specific terminology to produce documents to organisational guidelines as required by the job role</li> <li>Uses the appropriate programming syntax and conventions to perform job role</li> </ul>
Oral Communication	1.1-1.3, 2.3, 3.3	<ul style="list-style-type: none"> <li>Elicits and evaluates information using effective listening and questioning techniques</li> <li>Uses simple and relevant language to confirm understanding of requirements, liaise with the client and obtain feedback</li> </ul>
Get the work	1.1, 1.3, 2.1-2.4	<ul style="list-style-type: none"> <li>Takes responsibility for planning and organising own workload, identifying ways of sequencing and</li> </ul>

done		combining elements for efficiency <ul style="list-style-type: none"> <li>• Understands the purposes, specific functions and key features of common digital systems and tools</li> <li>• Tests and operates common digital tools and systems to effectively complete routine tasks</li> <li>• Takes responsibility for the outcomes of routine decisions related directly to own role</li> </ul>
------	--	---

# Assessment Requirements for ICTICT307 Customise packaged software applications for clients

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- interpret and document client requirements to customise software applications
- design software applications
- analyse, implement and review customised software applications
- produce documentation for the client
- obtain feedback from client to ensure requirements have been met.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the general features and capabilities of current industry accepted hardware and software products
- discuss functions and features of software applications suitable for client
- discuss functions and features of the operating system (OS)
- identify information and communications technology (ICT) structure and system infrastructure
- describe organisational policy and procedures relating to customising software
- identify organisational security procedures.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general ICT industry, and include access to:

- a site where software applications may be customised
- use of customisable software applications currently used in industry
- client requirements documentation
- organisational requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

## ICTICT308 Use advanced features of computer applications

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to use computer applications employing advanced features. It involves manipulating data and accessing support resources to solve routine problems.

It applies to individuals who have achieved a degree of autonomy as advanced information and communications technology (ICT) users, and support information technology activities in software applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

General ICT

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Manipulate data	1.1 Employ advanced features of applications in the preparation and presentation of data 1.2 Transfer data between applications, linking and embedding related data files as required 1.3 Create and employ objects, macros and templates for routine activities

ELEMENT	PERFORMANCE CRITERIA
	1.4 Use shortcuts and features to increase personal productivity
2. Access and use support resources	2.1 Solve routine problems using support resources 2.2 Use online help to overcome difficulties with applications 2.3 Solve problems with manuals and training booklets 2.4 Access and apply technical support for system problems, using troubleshooting results and alert messages

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	2.1-2.4	<ul style="list-style-type: none"> <li>Identifies and interprets a variety of hard copy, online and software generated technical information containing software specific language, syntax and code to apply features and functions of applications to their fullest extent and to solve problems</li> </ul>
Oral Communication	2.1, 2.4	<ul style="list-style-type: none"> <li>Discusses and resolves problems using technical terms and language, and effective listening and questioning techniques</li> </ul>
Get the work done	1.1-1.4, 2.1-2.4	<ul style="list-style-type: none"> <li>Understands key principles and concepts underpinning the design and operation of digital systems and tools, and applies these when troubleshooting existing technology</li> </ul>

# Assessment Requirements for ICTICT308 Use advanced features of computer applications

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- use at least three computer applications employing advanced features and import and export capacities for efficiency and productivity purposes
- solve routine problems using support resources.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the basic features and functions of relevant operating systems software and system tools
- outline relevant vendor product directions in computer applications
- identify commonly available vendor applications and their features.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a site where advanced features of computer applications may be used
- computer applications currently used in industry
- documents or information containing data suitable to demonstrate advanced features of computer applications
- support resources, including online, manuals and training booklets.

Assessors must satisfy NVR/AQTF assessor requirements.

## ICTICT409 Develop macros and templates for clients using standard products

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to develop macros and templates for clients using industry recognised software applications.

It applies to individuals working in an office environment who achieve a degree of self-sufficiency as an advanced information and communications technology (ICT) user, and who support software applications activities in the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

General ICT

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine macro or template requirement	1.1 Determine client requirements in line with organisational guidelines 1.2 Develop macro or template specification 1.3 Confirm that macro or template specification meets client's needs and operational guidelines 1.4 Determine documentation requirements

ELEMENT	PERFORMANCE CRITERIA
2. Develop macro or template for client	2.1 Develop macro or template to specification using industry recognised software applications 2.2 Demonstrate macro or template to client and obtain feedback 2.3 Amend macro or template as required by client 2.4 Update macro or template specification
3. Provide client support for macro or template	3.1 Document support and instruction requirements 3.2 Provide documentation to client help desk for future support

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.4	<ul style="list-style-type: none"> <li>Reviews a range of written and online texts to identify relevant organisational guidelines and requirements relating to the job role</li> </ul>
Writing	1.2, 1.3, 2.1, 2.3, 2.4, 3.1	<ul style="list-style-type: none"> <li>Uses the appropriate macro syntax and conventions to develop macros</li> <li>Uses correct spelling and grammar; and organisational guidelines for terminology, address format, logos and document structure to develop templates</li> <li>Uses correct spelling and grammar, plain English and, when necessary, technical terminology to comply with documentation requirements and develop support documentation</li> </ul>
Oral Communication	1.1, 1.3, 1.4, 2.2, 3.2	<ul style="list-style-type: none"> <li>Uses simple and relevant language and effective listening and questioning techniques to determine client needs and obtain feedback</li> <li>Uses technical language suitable to the job role when liaising with help desk personnel</li> </ul>
Interact with others	3.2	<ul style="list-style-type: none"> <li>Actively identifies the requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience</li> </ul>

Navigate the world of work	1.1, 1.3	<ul style="list-style-type: none"> <li>Recognises and follows explicit and implicit protocols, and meets expectations associated with own role</li> </ul>
Get the work done	1.1, 1.2, 2.1- 2.4	<ul style="list-style-type: none"> <li>Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency</li> <li>Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks</li> <li>Recognises and takes responsibility for addressing predictable problems in familiar work contexts</li> </ul>

# Assessment Requirements for ICTICT409 Develop macros and templates for clients using standard products

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- determine client needs and specifications for macros and templates
- develop a variety of macros and templates using at least two industry recognised application packages
- provide support to the client for utilising the macros and templates.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline features and functions of particular categories of commercial computing packages, in particular procedures for:
  - creating macros and using default templates supplied by the software application package
  - creating new macros and templates
- identify functions and features of the operating system
- identify features and functions of software and hardware supported by the organisation.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- documents detailing organisational policies
- a personal computer where software installation may be performed
- internet connection
- networked computers
- server and workstation hardware and software

- style guides and design brief
- technical documentation and installation manuals
- use of software currently used in industry.

Assessors must satisfy NVR/AQTF assessor requirements.

## ICTTEN201 Use electrical skills in telecommunications work

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

### Application

This unit describes the skills and knowledge required for an entry- level worker to use electrical skills, working with analog and digital, cabling and wireless networking in telecommunications.

It applies to individuals who undertake basic testing, circuit building, and evaluation of cable and wireless devices, and who may work in domestic, commercial or industrial situations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Telecommunications – Telecommunications Networks Engineering

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Connect up, test and verify DC and AC circuitry	1.1 Identify any hazards and work health and safety (WHS) issues for a safe work site, and notify appropriate personnel 1.2 Connect a series and a parallel DC and AC circuit configuration following safe work practices 1.3 Choose appropriate test equipment and measure values of electrical quantities of circuits 1.4 Use calculations to verify measured values of electrical

ELEMENT	PERFORMANCE CRITERIA
	<p>quantities in a series and in a parallel circuit configuration</p> <p>1.5 Compare measured values to calculated values, and determine reasons for any variations</p> <p>1.6 Measure low voltage (LV), extra low voltage (ELV) or telecommunications network voltage (TNV) to determine if values are within equipment or power supply specifications</p> <p>1.7 Use appropriate test equipment to measure AC voltage (multimeter) or AC current (clamp meter) in a safe manner that does not require an LV circuit to be disconnected</p> <p>1.8 Test residual current devices (RCD) or earth leakage devices to ensure they are operational prior to working with AC mains powered equipment, power supplies and tools</p> <p>1.9 Evaluate results and determine probable faults, if relevant</p>
2. Evaluate analog and digital signals	<p>2.1 Compare characteristics of an analog signal and a digital signal</p> <p>2.2 Produce a layout using building blocks to represent a typical analog and a digital circuit showing different characteristics between an analog signal and a digital signal</p> <p>2.3 Produce 4-bit binary codes with their decimal equivalent to represent output voltages of a digital to analog converter</p> <p>2.4 Choose appropriate test equipment and measure output voltage of a digital device for <i>high</i> and <i>low</i> logic states</p>
3. Perform cable selection	<p>3.1 Compare basic transmission characteristics of different types of cables used in telecommunications and select the most appropriate cable type to suit application characteristics</p> <p>3.2 Connect two devices with a patch cable and test the connection</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	2.1, 3.1	<ul style="list-style-type: none"> <li>Interprets textual information to inform decision-making process</li> </ul>
Writing	2.2	<ul style="list-style-type: none"> <li>Uses industry specific language to produce technical documentation</li> </ul>

Oral Communication	1.1	<ul style="list-style-type: none"> <li>Articulates specific concerns and issues clearly and listens to and acts on responses of others</li> </ul>
Numeracy	1.4-1.6, 1.9, 2.2, 2.4	<ul style="list-style-type: none"> <li>Performs basic calculations to check data, make predictions and make comparisons</li> <li>Selects and uses appropriate tools to take measurements, analyse results and perform calculations</li> </ul>
Navigate the world of work	1.1, 1.2, 1.7, 1.8	<ul style="list-style-type: none"> <li>Follows legislative requirements and organisational protocols, policies and procedures relevant to own role</li> </ul>
Get the work done	1.3, 1.5, 1.6, 1.9, 2.3, 2.4, 3.1	<ul style="list-style-type: none"> <li>Determines job sequence and works logically and systematically to undertake clearly defined tasks</li> <li>Analyses task requirements to decide on appropriate equipment and practices</li> <li>Applies problem-solving processes to locate and resolve faults, and reviews impact of decisions</li> </ul>

# Assessment Requirements for ICTTEN201 Use electrical skills in telecommunications work

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

## Performance Evidence

Evidence of ability to:

- use fundamental electrical principles to solve basic AC and DC electrical problems
- connect and test an AC and DC circuit
- evaluate and compare characteristics of analog and digital signals
- compare and select cables according to transmission characteristics.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe principles of AC and DC electricity and how it impacts telecommunications work including:
  - AC and DC electrical SI units of measurement
  - work health and safety (WHS) issues
  - Ohm's law and other relevant calculations
  - circuit configuration
- identify and describe common AC and DC faults, fault finding techniques and use of testing equipment
- explain application of binary to decimal conversion and vice versa
- describe principles of analog and digital electronics and building blocks common to analog and digital circuits
- explain the distinction between analog and digital signals and devices
- explain encoding techniques and their application in wired, wireless and optical communications systems

- outline features and applications of unshielded twisted pair (UTP), coaxial and fibre cables
- list typical electronic devices, cable types and their applications
- explain modulation techniques used in wired, wireless and optical communications systems
- explain techniques to convert analog to digital and digital to analog
- describe characteristics of signal transmission
- list and describe common telecommunications cables and the characteristics of use and application.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications Network Engineering field of work and include access to:

- appropriate AC and DC testing equipment
- manufacturer's documentation and equipment
- safety equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## ICTTEN202 Use hand and power tools

### Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

### Application

This unit describes the skills and knowledge required to safely use hand and power tools in the workshop and on the worksite.

It applies to individuals who may work as technical staff and who may make use of safety equipment and workshop facilities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Telecommunications – Telecommunications Networks Engineering

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work activity	1.1 Identify the type of work to be performed from work instructions 1.2 Select appropriate hand and power tools for work to be performed in line with industry standards or specified approved tools for use

ELEMENT	PERFORMANCE CRITERIA
	1.3 Set up and check tools for use according to industry approved information 1.4 Examine work environment and plan work with tools to maximise safety and productivity 1.5 Clear and clean work area to make it free of obstructions and allow clear access to tools
2. Prepare work piece for tool use	2.1 Mount, support or align work piece correctly to the tool or machine to be used 2.2 Anchor work piece securely where necessary to prevent movement
3. Operate hand and power tools	3.1 Use hand and power tools correctly according to industry and enterprise safe working practices 3.2 Use safety equipment during tool operation according to industry and enterprise safe working practices 3.3 Monitor tool operation continuously and discontinue use if abnormal operation occurs 3.4 Clean work area on completion of work
4. Maintain hand and power tools after use	4.1 Clean and store tools according to industry and enterprise safe working practices 4.2 Report abnormal tool operation or other problems according to established procedures 4.3 Perform programmed maintenance of tools according to work role 4.4 Arrange inspection of power tools according to regulatory requirements

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Interprets and understands complex information required for preparation and use of tools</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Completes workplace documentation accurately using appropriate form and vocabulary</li> </ul>

Navigate the world of work	<ul style="list-style-type: none"> <li>Follows legislative requirements and organisational protocols, policies and procedures relevant to own role, with particular emphasis on safety</li> </ul>
Get the work done	<ul style="list-style-type: none"> <li>Plans and prioritises tasks, developing and implementing a work program in line with expectations and work role</li> <li>Makes decisions around immediate, clearly defined tasks regarding use of tools, personal protective equipment (PPE), cleaning agents and waste disposal</li> </ul>

## Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
ICTTEN202 Use hand and power tools (Release 2)	ICTTEN202 Use hand and power tools (Release 1)	Updates to performance criteria. Updates to template to apply consistent format between units.	Equivalent unit

# Assessment Requirements for ICTTEN202 Use hand and power tools

## Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- accurately interpret work orders relevant to selection and use of tools
- interpret specifications and instructions relating to materials and equipment on which tools are to be used
- prepare work environment and set up tools for safe and effective use
- perform work processes following all relevant safety requirements applying to use of hand and power tools
- monitor tool operation for correct operation during use
- inspect completed work to verify correct tool operation and use
- communicate evidence of faults and other problems
- comply with all related work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- electrical and compressed air safety
- equipment types, characteristics, technical capabilities and limitations

- features and operating requirements of hand and power tools
- general housekeeping policies and procedures
- industry and worksite terminology
- information required to operate equipment according to a test specification
- job safety analysis (JSA) or safe work method statement
- legislation, codes of practice and other formal agreements that impact the work activity
- manufacturer's requirements for safe operation of equipment
- materials commonly used in the industry
- safety data sheets (SDS) and materials handling methods
- operational, maintenance and basic diagnostic procedures
- common power sources
- specific WHS requirements relating to the activity and site conditions
- typical issues and challenges that occur onsite.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- sites where hand and power tools may be used
- hand and power tools currently used in industry
- relevant regulatory and equipment documentation that impact the use of hand and power tools.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## ICTTEN207 Install and test internet protocol devices in convergence networks

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

### Application

This unit describes the skills and knowledge required for entry-level installations and testing for internet protocol (IP) based telecommunications networking, using convergent technologies to deliver services of Next Generation Networks (NGN).

It applies to technicians and cable installers who install and maintain IP-based equipment for customer and service providers for NGN services, including internet protocol TV (IPTV), IP security, digital home networks, IP-based cable access TV (CATV), IP core and access networks, home automation, interactive TV, radio frequency identification (RFID), biometric recognition systems, mesh networks, smart grids and cloud computing.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Telecommunications – Telecommunications Networks Engineering

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Gather information to prepare for installation of IP device	1.1 Obtain work health and safety (WHS) requirements and environmental requirements for a given work area, and clarify with appropriate personnel

ELEMENT	PERFORMANCE CRITERIA
	<p>1.2 Identify safety hazards and notify appropriate personnel</p> <p>1.3 Obtain identified operating instructions, manuals, and hardware and software testing methodologies</p> <p>1.4 Obtain documentation on a range of IP devices that can be networked according to the open system interconnection (OSI) reference model in networking</p> <p>1.5 Obtain the range of required IP devices to be connected to the network and identify the IP-based telecommunications application that will be provided</p>
2. Prepare for installation of IP device	<p>2.1 Select IP device for installation that can be integrated into existing network</p> <p>2.2 Obtain appropriate hardware, software, network protocols, peripheral devices and media types and connectors for configuration process</p> <p>2.3 Draw physical topology of the device connection to network and seek approval from appropriate personnel</p> <p>2.4 Obtain configuration details to start setting up device</p>
3. Configure and test IP device	<p>3.1 Determine network addressing scheme for mapping network connectivity and verify by calculations</p> <p>3.2 Assign a valid static IP address to device</p> <p>3.3 Use network commands to determine and verify the media access control (MAC) address, the IP address and network performance of the device</p> <p>3.4 Determine security threats and initiate security solutions to prevent security breaches according to enterprise procedures</p>
4. Complete and document network installation	<p>4.1 Restore worksite to safe condition according to established safety procedures</p> <p>4.2 Record and store essential installation information according to enterprise procedures</p> <p>4.3 Notify appropriate person of task completion according to enterprise procedures</p>
5. Test wireless link	<p>5.1 Select types of wireless connections used in telecommunications</p> <p>5.2 Set up a wireless link to connect two wireless devices, following safe work practices</p> <p>5.3 Transmit data over the link and verify accuracy of received data</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.3-1.5, 3.3, 3.1	<ul style="list-style-type: none"> <li>Evaluates information and products from a variety of sources to ensure appropriateness to client needs</li> </ul>
Writing	2.3, 3.2, 3.3, 4.2, 4.3, 5.3	<ul style="list-style-type: none"> <li>Develops accurate and industry specific drawings</li> <li>Writes computer code and commands and records technical data, ensuring correct syntax and accuracy</li> </ul>
Oral Communication	4.3	<ul style="list-style-type: none"> <li>Uses clear language and concepts, and tone and pace appropriate for audience and purpose</li> </ul>
Numeracy	3.1	<ul style="list-style-type: none"> <li>Performs basic mathematical calculations to compare and verify connectivity</li> </ul>
Navigate the world of work	1.1, 3.4, 4.1-4.3, 5.2	<ul style="list-style-type: none"> <li>Understands roles and responsibilities for task and makes basic decisions on work and completion parameters</li> <li>Ensures knowledge of WHS requirements</li> <li>Recognises organisational expectations and follows explicit protocols and procedures</li> <li>Seeks clarification when required</li> </ul>
Interact with others	1.1, 1.2, 2.4	<ul style="list-style-type: none"> <li>Follows instructions regarding what and how to communicate, following predetermined scripts</li> <li>Initiates a connection with others through verbal, or nonverbal communication responding as appropriate</li> </ul>
Get the work done	1.2-1.5, 2.1-2.4, 3.1-3.4, 4.1, 5.1-5.3	<ul style="list-style-type: none"> <li>Plans and implements routine tasks and workload, making limited decisions on sequencing, timing and collaboration, and seeks assistance in setting priorities</li> <li>Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions and evaluates outcome effectiveness</li> <li>Responds to predictable routine problems and implements standard or logical solutions</li> <li>Uses digital technology for basic reading, recording and searching information, and for communications following routine procedures and security requirements</li> </ul>

# Assessment Requirements for ICTTEN207 Install and test internet protocol devices in convergence networks

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

## Performance Evidence

Evidence of ability to:

- prepare for installation of internet protocol (IP) device connected to a network
- set up and configure IP device with simple addressing schemes
- test and secure device against security threats
- produce essential installation information
- follow work health and safety (WHS) workplace procedures and practices
- test wireless link.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe principles of computer networking and identify common types and protocols used
- describe IP-based telecommunications and importance of network configuration including:
  - IP addressing
  - IP devices
- identify and describe the purpose of common hardware and software used in IP communications
- identify and summarise organisational policies and procedures relating to installation and testing of internet protocol devices
- describe common procedures for basic testing and troubleshooting an IP device
- describe procedures for assigning networking protocols
- explain the purpose for internet security and describe common configurations

- describe various basic wireless technologies and their application in communications
- describe environmental factors requiring management on telecommunications equipment
- identify and describe WHS requirements and personal safety issues relating to installation and testing of internet protocol devices
- define open system interconnection (OSI) and explain various levels involved
- identify common types of peripheral devices used in network communications systems
- calculate using the binary system
- describe common computer commands used to verify and manage IP and network performance
- identify common security threats attributed to networks and specify solutions to combat these threats
- identify common wireless technologies used in communications.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications network engineering field of work and include access to:

- a small network with IP devices
- tools, equipment, materials and documentation required for installing and testing IP devices
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN416 Install, configure and test an internet protocol network

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

## Application

This unit describes the skills and knowledge required to select network elements to meet client business specifications, ensure interoperability within the network, apply network topologies, protocols and security issues, and troubleshoot when required.

It applies to individuals who carry out installation, maintenance and upgrade of information and communications technology (ICT) networks, and are employed by telecommunications or information technology networking provisioning companies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to install IP network	1.1 Prepare for given work according to relevant legislation, work health and safety (WHS) regulations, codes and standards 1.2 Arrange site access according to required procedure 1.3 Review existing network design documentation to ensure it is current and complete

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Select components and network elements required to be installed to meet the technical requirements</p> <p>1.5 Contact vendors and service suppliers to obtain specifications and availability of identified components</p> <p>1.6 Develop plans, with prioritised tasks and contingency arrangements, for installation of components with minimum disruption to client</p> <p>1.7 Liaise with appropriate person to obtain approval for the plans, including security clearance and timing</p>
2. Install and configure IP network	<p>2.1 Install and configure server hardware and software according to organisational and industry standards, following plans</p> <p>2.2 Install and configure computer, other hardware and software, according to organisational and industry standards and plans</p> <p>2.3 Install and configure other software required for the network to operate with security and integrity according to the plan</p>
3. Test and reconfigure IP network	<p>3.1 Test installed software and hardware, utilising available technical tools, to ensure all components are functioning as expected</p> <p>3.2 Test the network to ensure it is functioning according to specifications</p> <p>3.3 Resolve problems identified in the modified network</p>
4. Complete documentation and clean worksite	<p>4.1 Complete hardware and asset recording document in line with organisational requirements</p> <p>4.2 Document installation, boot-up and configuration procedures according to organisational requirements</p> <p>4.3 Tabulate test results and complete all user reports</p> <p>4.4 Complete client report and notify of network status</p> <p>4.5 Clean up and restore worksite to client's satisfaction</p> <p>4.6 Secure sign-off from appropriate person</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance	Description

	Criteria	
Reading	1.1-1.3, 2.1-2.3, 3.2, 4.1, 4.2	<ul style="list-style-type: none"> <li>Recognises and interprets technical, legislative and operational documentation to determine job requirements</li> </ul>
Writing	1.5-1.7, 4.1-4.4	<ul style="list-style-type: none"> <li>Uses clear, specific and industry-related terminology to produce and update workplace documentation in predetermined formats</li> </ul>
Oral Communication	1.5, 1.7, 4.4	<ul style="list-style-type: none"> <li>Clearly liaises with internal and external personnel on technical, operational and business related matters</li> <li>Uses listening and questioning skills to confirm understanding for requirements</li> </ul>
Numeracy	3.1-3.3	<ul style="list-style-type: none"> <li>Makes calculations required to take test measurements, interpret results and evaluate performance and interoperability of network</li> </ul>
Navigate the world of work	1.1, 4.5	<ul style="list-style-type: none"> <li>Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context</li> <li>Recognises and follows explicit and implicit protocols and meets expectations associated with own role</li> </ul>
Interact with others	4.5, 4.6	<ul style="list-style-type: none"> <li>Cooperates with others as part of familiar routine activities and contributes to specific activities requiring joint responsibility and accountability</li> </ul>
Get the work done	1.2, 1.4, 1.6, 2.1-2.3, 3.1-3.3, 4.5	<ul style="list-style-type: none"> <li>Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required</li> <li>Works logically and systematically to monitor, analyse and action job priorities</li> <li>Implements actions according to a predetermined plan, making adjustments if necessary</li> <li>Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action</li> <li>Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, depending on differing operational contingencies, risk situations and environments</li> </ul>

## Unit Mapping Information

# Assessment Requirements for ICTTEN416 Install, configure and test an internet protocol network

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

## Performance Evidence

Evidence of ability to:

- plan and prepare for the IP network installation task
- select network elements to meet client's business specifications
- install, configure and test network elements to ensure interoperability within the network
- apply network topologies, protocols and security issues
- apply solutions to defined network problems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain client's business domain, business function and organisation
- describe current industry-accepted hardware and software products
- outline data and voice transmission technologies and protocols
- summarise networking technologies, incorporating substantial depth in some areas
- explain router-based network architectures.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where network installation may be conducted
- field measurement equipment currently used in industry

- network design documentation
- equipment specifications
- network components
- hardware and software
- a live network
- organisational guidelines
- networked (LAN) computers
- a wide area network (WAN) service point of presence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## Links

Companion Volume implementation guides are found in VETNet -

# ICTWEB401 Design a website to meet technical requirements

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Application

This unit describes the skills and knowledge required to design a website to specifications, within a particular technical and human interface environment.

This unit applies to individuals who are responsible for analysis, documentation and design, including identifying the technical and human computer interface requirements that drive design.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Define the technical environment	1.1 Identify the business requirements 1.2 Identify the appropriate standards required to develop the site 1.3 Identify the appropriate hardware and software required
2. Define the human computer interface	2.1 Conduct a user analysis, in order to determine a user profile and user needs 2.2 Determine the user content, and requirements

ELEMENT	PERFORMANCE CRITERIA
	2.3 Determine the appropriate design principles for the site 2.4 Identify the appropriate operating system
3. Determine the site hierarchy	3.1 Identify the hierarchy of pages 3.2 Ensure that the content is logical and accessible to the user 3.3 Ensure that navigation between pages is consistent and clear
4. Integrate the design components	4.1 Apply the appropriate information hierarchy to the site design 4.2 Ensure that the design principles are appropriate to the business, and to the user 4.3 Ensure that the process flow is developed in a logical and simple manner 4.4 Test the site against user needs 4.5 Complete and document the design structure

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.4, 3.1-3.3	<ul style="list-style-type: none"> <li>Interprets, analyses, and synthesises, technical and organisational information to inform decision-making, to construct and validate solutions, and to produce responses to pre-determined requirements and work tasks</li> </ul>
Writing	2.2, 3.2, 3.3, 4.5	<ul style="list-style-type: none"> <li>Develops content in a manner that supports and conveys information, using the appropriate structures, templates, software, and specialised language</li> <li>Produces a logically sequenced text to convey exact procedural requirements and specific, and concise, instructions/meaning</li> </ul>
Navigate the world of work	1.2	<ul style="list-style-type: none"> <li>Takes personal responsibility for adherence to the standards of industry bodies, where related to own work context</li> </ul>
Interact with others	2.1, 2.2, 4.2	<ul style="list-style-type: none"> <li>Selects the appropriate communication protocols and conventions, when conferring with clients to elicit information, and to determine specific needs and</li> </ul>

		requirements
Get the work done	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 2.4, 3.1, 3.2, 3.3, 4.1, 4.2, 4.3, 4.4	<ul style="list-style-type: none"> <li>• Takes responsibility for planning, sequencing, and prioritising tasks within own workload, for efficiency and effective outcomes</li> <li>• Uses analytical processes to make routine and some complex decisions, to develop logical structures within the website information and operation that meet client needs</li> <li>• Understands the purposes, specific functions and , key features of common digital systems, tools and software, and operates them effectively to complete routine tasks</li> </ul>

## Unit Mapping Information

## Assessment Requirements for ICTWEB401 Design a website to meet technical requirements

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- identify and select, the appropriate tools and procedures required to develop a website
- conduct a user analysis to identify the website, or design structure, required
- define the user interface
- determine the site hierarchy
- test the website, to ensure that it meets the standards required by the user.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the basic aspects of information architecture
- describe the business process design
- outline copyright and intellectual property requirements
- provide an overview of the customer, and business, liaison
- detail e-business sites and corporate strategy
- describe the implications of technology connectivity
- explain the procedures for documenting technical specifications
- discuss the relevant standards relating to website design
- compare website design methods, and standard website structures
- recognise and define, common operating systems
- recognise and operate, common computer hardware.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to the:

- analysis software
- customer relationship model
- e-business website
- requirements documentation
- site server
- site server software
- web servers
- relevant standards, and copyright information.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB411 Produce basic client-side script for dynamic web pages

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0

## Application

This unit describes the skills and knowledge required to develop interactive and engaging websites, using a range of features from various, appropriate languages.

It applies to individuals working in web development environments who are required to produce client-side scripts as a common means of creating interactive websites. These scripts offer an effective simple means of enabling websites to provide greater interaction with clients.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the requirements for web documents	1.1 Determine the necessary dynamic functionality of the web document 1.2 Determine the appropriate language to achieve that functionality 1.3 Determine the web document requirements

ELEMENT	PERFORMANCE CRITERIA
2. Design and produce web documents	2.1 Design the web document, and embedded scripts to achieve the required functionality 2.2 Write a simple hypertext markup language (HTML), considering accessibility 2.3 Write embedded scripts
3. Test the scripts and debug	3.1 Test the web document against the required functionality, and reiterate until correct 3.2 Complete the documentation and submit it to the appropriate person for their approval

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.3	<ul style="list-style-type: none"> <li>Recognises and interprets textual information in various information and communications technology (ICT) languages, in order to determine the dynamic functionality of the web document</li> </ul>
Writing	1.1, 1.3, 2.1, 2.2, 2.3, 3.2	<ul style="list-style-type: none"> <li>Develops material for a specific audience, using detailed ICT language, to convey explicit information</li> </ul>
Oral Communication	1.1, 1.3	<ul style="list-style-type: none"> <li>Articulates clearly, using the specific language suitable to technical, operational and business audiences, to convey requirements and listening, and questioning, techniques to confirm understanding</li> </ul>
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.2	<ul style="list-style-type: none"> <li>Plans approach to work based on internet protocols, and the analysis of business needs and requirements</li> <li>Sequences, schedules and prioritises own work activities</li> <li>Resolves issues, including design and functionality conflicts, debugging and handling errors, and implements tests to ascertain the functionality of solutions, prior to full implementation</li> <li>Utilises a combination of lateral and analytical thinking, and practice, to design and validate the reliability, and efficacy of web documents</li> </ul>

		<ul style="list-style-type: none"> <li>Uses a range of digitally-based technologies, software packages, and hardware to view the active elements or objects across different platforms, and to design, and produce, web documents</li> </ul>
--	--	--

## Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
ICTWEB411 Produce basic client-side script for dynamic web pages	ICAWEB411A Produce basic client-side script for dynamic web pages	Updated to meet Standards for Training Packages	Equivalent unit

## Links

# Assessment Requirements for ICTWEB411 Produce basic client-side script for dynamic web pages

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- determine the dynamic functionality and requirements of web documents
- select the appropriate language
- design web documents with embedded script
- produce dynamic web page documents
- test and debug, the web document functionality
- document and gain client approval.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss the basic principles behind open platform programming
- describe client-side scripting and its application to dynamic web page design, including:
  - events and event handlers
  - internet operation related to servers and clients
  - internet protocols
  - standard generalised markup language (SGML)
  - associated standards
- identify and outline, security restrictions on servers
- describe the difference between server-side and client-side scripting
- describe the standards associated with programming documentation.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the website technologies field of work, and include access to:

- special purpose tools
- equipment and materials
- industry software packages
- the web server
- the client requirements
- the security policy
- functionality and scope requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB429 Create a markup language document to specification

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Application

This unit describes the skills and knowledge required to use a text editor to design, create and save web pages to a given specification, rather than using an authoring tool.

It applies to individuals working as web designers and developers who interpret client briefs, generate a framework for internet information, and are resourceful in their application of technology in using a markup language.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the specifications and requirements	1.1 Determine the uses and audience of the document 1.2 Determine the appropriate markup language, based on the document's uses and audience, and current industry best practice 1.3 Determine the document structure
2. Create the document	2.1 Create and assign the basic elements of the document, taking

ELEMENT	PERFORMANCE CRITERIA
structure	into account accessibility 2.2 Mark-up the sections of the document required to describe the structure
3. Incorporate the web page components	3.1 Identify the web page components 3.2 Evaluate suitable web page components 3.3 Include the required web page components
4. Validate the documents	4.1 Validate the markup language document, against the specifications and record the outcomes 4.2 Validate the markup language document in different browsers for compatibility, and record the outcomes

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.3, 4.1, 4.2	<ul style="list-style-type: none"> <li>Identifies, analyses and evaluates instructions, technical information and industry guidelines, to determine client needs and business requirements</li> </ul>
Writing	1.3, 2.1, 2.2, 3.3, 4.1, 4.2	<ul style="list-style-type: none"> <li>Produces documentation for a specific audience, using clear and detailed language in order to convey explicit information</li> <li>Writes, edits and proofreads documents to ensure clarity of meaning, and accuracy and consistency of information</li> </ul>
Navigate the world of work	1.2	<ul style="list-style-type: none"> <li>Takes personal responsibility for following explicit and implicit policies, procedures and industry best practice</li> </ul>
Get the work done	1.1, 1.2, 3.1, 3.2, 4.1, 4.2	<ul style="list-style-type: none"> <li>Takes responsibility for planning, sequencing and prioritising tasks and own workload, for efficiency and effective outcomes</li> <li>Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations</li> <li>Addresses less predictable problems and initiates standard procedures in response to these problems,</li> </ul>

		<p>applying problem-solving processes in determining a solution</p> <ul style="list-style-type: none"> <li>• Uses familiar digital technologies and systems to access information, search and enter, data and code, present information, and communicate with others, cognisant of data security and safety</li> </ul>
--	--	--

## Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
ICTWEB429 Create a markup language document to specification	ICAWEB429A Create a markup language document to specification	Updated to meet Standards for Training Packages	Equivalent unit

## Links

# Assessment Requirements for ICTWEB429 Create a markup language document to specification

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- design, create and save a document using a markup language, without using an automated code generation program
- use a text editor for generating the markup language code for use on common web browsers
- validate the markup document against the standards set by the World Wide Web Consortium (W3C).

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- recognise and outline the use of markup languages including:
  - dynamic hypertext markup language (DHTML)
  - hypertext markup language (HTML)
  - standard generalised markup language (SGML)
  - virtual reality modelling language (VRML)
  - extensible hypertext markup language (XHTML)
  - extensible markup language (XML)
- identify and describe, standards applicable to a markup language
- summarise the range of available web browsers and their accessibility
- identify and describe, the issues of accessibility.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- an organisational style guide or policy
- all user requirements
- a text editor
- a range of browsers
- the internet, to validate the markup.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWHS204 Follow work health and safety and environmental policy and procedures

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

## Application

This unit describes the skills and knowledge required to follow safe working practices and environmental policy in the management of a telecommunications workplace.

It applies to telecommunications staff working under supervision in a technical environment and includes school based workers, entry-level workers, trainees and apprentices, and field officers deploying broadband access networks using optical technologies and other work on live systems.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Unit Sector

Telecommunications – work health and safety

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Identify work health and safety (WHS) legislative requirements	1.1 Locate WHS legislative requirements relevant to own work, role and responsibilities 1.2 Explain own responsibilities in relation to duty of care 1.3 Identify the relationship between legislative requirements and

ELEMENT	PERFORMANCE CRITERIA
	safe work practices
2 Identify construction hazards and control measures	2.1 Identify basic principles of risk management 2.2 Identify common construction hazards 2.3 Identify measures for controlling hazards and risks
3 Follow workplace procedures for hazard identification and risk control	3.1 Recognise and report hazards in work area to designated personnel according to workplace procedures 3.2 Follow WHS legislative requirements, workplace procedures and work instructions to control risks 3.3 Comply with safe work practices 3.4 Implement duty of care requirements 3.5 Complete job safety analysis (JSA) sheets or safe work method statement (SWMS) according to work requirements, including hazard identification and risk assessment 3.6 Use and complete checks of personal protective equipment according to work requirements 3.7 Assess and test for harmful gases associated with workplace
4 Follow safety requirements for working with optical fibre equipment	4.1 Identify and use safe work practices when handling optical fibre, lasers and optical connectors according to the relevant Australian Standards 4.2 Identify and use safe working practices when handling and disposing of chemical waste
5 Identify and implement WHS communication and reporting processes	5.1 Apply WHS communication processes, information and documentation 5.2 Identify designated WHS personnel 5.3 Comply with safety signs and symbols 5.4 Identify procedures and relevant authorities for reporting emergencies, incidents and injuries
6 Follow WHS incident response procedures	6.1 Follow general procedures for responding to incidents and emergencies 6.2 Identify procedures for accessing first aid 6.3 Select and use relevant personal protective equipment 6.4 Explain and apply workplace procedures for fire safety
7 Contribute to management of WHS	7.1 Raise WHS issues with designated personnel according to workplace procedures and relevant WHS legislation

ELEMENT	PERFORMANCE CRITERIA
	7.2 Contribute to participative arrangements for WHS management in workplace, within organisational procedures and scope of responsibilities and competencies
8 Contribute to management of workplace environmental issues	8.1 Raise environmental issues with designated personnel according to workplace procedures and relevant environmental requirements and legislation 8.2 Contribute to participative arrangements for environmental management in workplace, within organisational procedures and scope of responsibilities and competencies 8.3 Record and report all WHS issues, risks and hazards to designated personnel
9 Identify and respond appropriately to asbestos containing materials (ACM) hazards	9.1 Identify asbestos containing materials (ACM) hazards or their likelihood 9.2 Respond to asbestos containing materials hazards or their likelihood 9.3 Report identified or suspected asbestos containing materials hazards to designated personnel according to workplace procedures
10 Identify minor traffic management	10.1 Assess traffic safety requirement of general location with respect to regulatory and enterprise requirements 10.2 Identify safe work zone around vehicle and work space using traffic cones and signs according to regulatory requirements 10.3 Identify changed traffic conditions and act in accordance
11 Recognise and respond appropriately to confined space	11.1 Identify confined space in accordance with regulatory or enterprise guidelines that can only be entered by personnel with specialist training 11.2 Refer identified confined space to appropriate personnel

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1-1.3, 4.1, 5.4, 6.1-6.4	<ul style="list-style-type: none"> <li>Analyses and consolidates information and data from a range of sources, against</li> </ul>

		defined criteria and requirements, to identify safety requirements
Writing	1.1, 3.1, 3.5, 7.1, 7.2, 8.1-8.3, 9.3, 11.2	<ul style="list-style-type: none"> <li>Accurately records information and prepares documentation using clear language and organisational formats and protocols</li> </ul>
Oral Communication	1.1, 7.1, 7.2, 8.1-8.3, 9.3, 11.2	<ul style="list-style-type: none"> <li>Uses clear language and concepts, and tone and pace appropriate for the audience and purpose</li> </ul>
Navigate the world of work	1.1-1.3, 2.1-2.3, 3.1-3.6, 4.1, 5.1, 5.3, 5.4, 6.4, 7.1, 7.2, 8.1, 8.2, 9.3, 10.2, 11.1	<ul style="list-style-type: none"> <li>Builds an understanding of personal roles and responsibilities for work</li> <li>Explores and implements, where identified, the implicit expectations of policies and procedures</li> <li>Understands rights and responsibilities, and complies with legal and regulatory requirements</li> </ul>
Interact with others	1.1, 7.1, 7.2, 8.1- 8.3, 11.2	<ul style="list-style-type: none"> <li>Complies with work instructions and contributes to work group discussions using accepted conventions</li> <li>Recognises common differences in other people and implements basic strategies to address own reaction to these differences</li> </ul>
Get the work done	1.1-1.3, 2.1-2.3, 3.1, 3.4-3.7, 4.1-4.2, 5.1-5.4, 6.1- 6.4, 9.1, 9.2, 9.3, 10.1-10.3, 11.1	<ul style="list-style-type: none"> <li>Follows clearly defined instructions and sequencing, and monitors own progress for the task, seeking assistance when necessary</li> <li>Makes low impact decisions within familiar situations, based on a range of predefined or routine solutions</li> <li>Identifies ideas for other applications and considers them in current contexts</li> <li>Responds to predictable routine problems and implements standard and logical solutions</li> </ul>

# Assessment Requirements for ICTWHS204 Follow work health and safety and environmental policy and procedures

## Modification History

Release	Comments
Release 2	This version first released with ICT Information and Communications Technology Training Package Version 3.1.  Release created to correct numbering in performance criteria.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

## Performance Evidence

Evidence of the ability to:

- identify and apply the work health and safety (WHS) legislative and safety requirements for construction work
- identify the range of common construction hazards and procedures for the assessment of risk and application of the hierarchy of control
- apply WHS communication processes, information and documentation
- contribute to the WHS committees and support representatives
- recognise the common safety signs and symbols
- identify and apply procedures for reporting hazards, incidents and injuries
- identify and apply the general procedures for responding to incidents and emergencies, including evacuation, first aid, fire safety equipment and personal protective equipment
- recognise and report hazards to designated personnel
- follow workplace procedures necessary to control risks in the workplace
- recognise the safe handling procedures for optical fibres and laser sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the relevant Commonwealth, state and territory WHS legislation, regulations, codes of practice, and industry standards and guidance notes relevant to own workplace, role and responsibilities
- describe the differences between Commonwealth, state and territory WHS legislation and regulations
- identify and describe the common construction hazards
- identify different types of asbestos containing materials (ACM) (via photographs) and common sources of asbestos containing materials (ACM) found in the work environment and describe the controls required to mitigate risk
- identify the general construction work activities that require licences, tickets or certificates of competency
- identify and discuss the information and documentation used to maintain and inform on safe work practices
- explain the purpose of environmental control processes for the following:
  - air quality management
  - disposal and handling of hazardous and dangerous substances
  - noise pollution
  - safe disposal of fibre offcuts
  - stormwater and materials spillage
  - waste disposal
- describe the WHS responsibilities and rights of duty holders and workplace parties under environmental and WHS legislation, regulations and codes of practice, including:
  - persons in control of construction work and/or projects
  - employers and self-employed persons
  - persons in control of a business or undertaking (PCBU) and officers
  - supervisors
  - employees and workers
  - designers
  - inspectors
  - manufacturers and suppliers
- describe how individuals engage and participate in WHS activities in the workplace
- list the safety implications of working with optical fibres and equipment including:
  - hazards relating to handling of optical fibre and laser light source in the workplace
  - injuries that may occur:
    - damage to retina from lasers
    - damage to lungs from inhalation of fibre offcuts and particles
    - needle stick injury from fibres and offcuts
  - laser warning signs and labels relating to optical fibre components and equipment
  - safety requirements when handling and working with:
    - devices
    - laser light sources
    - optical fibre connectors

- optical fibres
- patchcords
- state the personal responsibilities in complying with safe work practices including those relating to:
  - housekeeping
  - identification of hazards
  - preventing bullying or harassment
  - smoking
  - use of amenities
  - use of drugs and alcohol
- discuss the principles of risk management (including hazard identification, risk assessment and control) for construction work
- state ways in which WHS is managed in the workplace, and activities required under WHS legislation including:
  - hazard identification
  - hazards that exist in the workplace
  - WHS instruction
  - preferred order of ways to control risks (known as the hierarchy of control)
  - risk assessment and controls
  - role of WHS committees and representatives
  - training and provision of WHS information
  - types of common personal protective equipment and fire safety equipment
  - types of WHS information and documentation
- describe the workplace environmental and WHS procedures relevant to various types of work being undertaken, including procedures for:
  - designated personnel responsible for WHS
  - employee and worker participation in WHS management
  - general first aid response requirements
  - general workers compensation and injury management
- describe the procedure for recognising, reporting and responding to WHS for:
  - accidents
  - dangerous occurrences
  - emergencies
  - hazards
  - incidents
  - injuries
  - fires
  - near misses
  - evacuation procedures
- identify and describe the function of WHS communications processes within an organisation

- discuss the purpose and process for completing job safety analysis or safe work method statements
- describe the meaning of WHS symbols found on signs and labels in the workplace
- describe the work operations to control risks
- explain the process of traffic control for a single vehicle
- describe the risks associated with confined spaces and harmful gasses, and explain the appropriate responses.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – work health and safety field of work and include access to:

- relevant WHS legislation, regulations and codes of practice
- WHS implementation resources, such as sample forms, signs and procedures
- enterprise WHS policies and procedures
- personal protective equipment
- first aid equipment
- fire safety equipment
- relevant work areas for identification of hazards and control measures
- optic fibre cabling and equipment.

Note: Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Refer to the ICT Implementation Guide Companion Volume for recommended assessor details.

## Links

# LGACOMP008A Apply conflict resolution strategies

## Modification History

LGACOMP008A Release 2: Layout adjusted.

LGACOMP008A Release 1: Primary release.

## Unit Descriptor

This unit covers dealing effectively with conflict, both in the workplace and outside the organisation. The unit outlines the knowledge and skills required to assess potential conflict situations and deal appropriately with the situation to achieve a resolution. The unit is suitable for all people working within the organisation.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the Range Statement. Assessment of performance is to be

consistent with the Evidence Guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess potential conflict situations	1.1 Signs, stages and possible <i>causes of conflict</i> are identified and anticipated. 1.2 Appropriate responses are evaluated against organisational procedures and <i>legal requirements</i> . 1.3 Additional information is identified and sought as required to assist in the assessment of the conflict situation.
2. Implement conflict resolution strategies	2.1 Factors and issues relevant to the conflict are clarified. 2.2 Strategies for dealing with conflict situations are developed in accordance with organisational procedures. 2.3 Assistance is sought as required and is appropriate to the person's skill and responsibility. 2.4 Options for resolution of the conflict are identified which allow for constructive responses to be negotiated. 2.5 <i>Negotiation techniques</i> are used to maintain positive interaction and to divert and minimise aggressive behaviour. 2.6 Effective <i>communication techniques</i> are used to ensure understanding of information received or relayed. 2.7 <i>Social and cultural differences</i> are taken into account in the negotiation style and approach taken. 2.8 Mutual agreement to the situation and its resolution is confirmed and follow up action is agreed upon by all parties. 2.9 Systems, records and reporting procedures are maintained according to organisational procedures.
3. Evaluate response and outcome	3.1 Effectiveness of response is evaluated and reviewed according to information available and organisational practices. 3.2 Accurate and constructive observations of incidents are provided in reviewing and debriefing the situation. 3.3 Records and reports are provided and maintained according to organisational requirements. 3.4 Effects of stress are recognised and addressed through stress management techniques and debriefing.

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

### Required Skills

- problem-solving strategies to know how to deal with unexpected questions or attitudes
- interpersonal skills to develop rapport with other parties in the conflict
- capacity to evaluate own response to situations of conflict and manage own emotions
- communication skills to effectively come to an agreed outcome
- negotiation skills to negotiate difficult situations and resolve problems as they arise
- flexibility to adjust quickly to differing situations
- empathy to develop rapport and understanding with and for the other party
- dealing with difficult people and situations

### Required Knowledge

- legislative and/or other legal provisions
- conflict resolution strategies
- organisational policies and procedures relating to managing conflict through negotiation
- recording and reporting procedures
- principles of cooperative team work
- different social and cultural practices

## Evidence Guide

### Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

### Critical aspects of evidence to be considered

The demonstrated ability to:

- interpret accurately and comply with legal and procedural requirements
- identify typical symptoms and causes of conflict in the workplace and ways of resolving conflict situations
- select conflict resolution strategies that are most effective for the objective
- use negotiation techniques to defuse and resolve conflict
- use communication techniques to give clear and accurate

	information in a form that is preferred and understood by the receiver
<b>Context of assessment</b>	<p>Competency is demonstrated by performance of all stated criteria, with particular attention to the critical aspects of evidence and the knowledge and skills elaborated in the Evidence Guide, and within the scope of the Range Statement.</p> <p>Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.</p> <p>Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment.</p> <p>Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the key competency levels at the end of this unit.</p>
<b>Relationship to other units(prerequisite or co-requisite units)</b>	To enable holistic assessment this unit may be assessed with other units that form part of the job role.
<b>Method of assessment</b>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> <li>• observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies</li> <li>• written and/or oral questioning to assess knowledge and understanding</li> <li>• completion of workplace documentation</li> <li>• third-party reports from experienced practitioners</li> <li>• completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor</li> </ul>
<b>Evidence required for demonstration of consistent performance</b>	Evidence should be collected over a set period of time that is sufficient to include dealings with an appropriate range and variety of formal and informal situations, involving different types of problems and clients.
<b>Resource implications</b>	The learner and trainer should have access to appropriate documentation and resources normally used in the workplace.

## Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Causes of conflict*** may include:
- refusal to follow directions and guidance
  - dissatisfaction of client with council service or information
  - disagreement between members of the public
  - disagreement between members of the organisation
  - ejection of persons
  - persons suffering from emotional distress
  - bystander behaviour
- Legal requirements*** may include:
- relevant state and commonwealth legislation
  - decisions of relevant tribunals
  - roles and responsibilities
  - terms and conditions of employment
- Negotiation techniques*** may include:
- strategic questioning and listening to gather information and direct the focus of the people involved
  - positive, confident and cooperative language
  - control of tone of voice and body language
  - using language and concepts appropriate to the people involved
  - using clear presentations of options and consequences
  - demonstrating flexibility and willingness to compromise
  - summarising positions and agreements made to confirm understanding between the negotiating parties
- Communication techniques*** may include:
- verbal and non-verbal language
  - two-way interaction
  - constructive feedback
  - active listening
  - reflection and summarising
- Social and cultural differences*** may include:
- verbal and non-verbal language
  - beliefs and values
  - religious or spiritual observances
  - relationships and family structures
  - social conventions
  - codes of conduct

Common

# MSFID4014 Produce digital models and documentation for interior design projects

## Modification History

Release 1. Supersedes and is equivalent to MSFID5014 Use CAD applications to complete models and documentation for interior design projects.

## Application

This unit describes the skills and knowledge required to review information about the design brief and proposed solution, and then use the features of computer-aided design (CAD) applications to produce models and extract two dimensional (2D) and three dimensional (3D) drawings and documentation in accordance with all standard practice notations and drawing protocols.

This unit applies to interior designers, including kitchen and bathroom designers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project requirements	1.1 Review and confirm project brief and its parameters 1.2 Identify drawing and documentation requirements based on examination of design concepts and proposed solutions 1.3 Confirm and check calculations and measurements for accuracy and cohesion 1.4 Select and prepare computing equipment and suitable software for use based on the project needs

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Create customised template in accordance with individual workplace requirements
2. Produce 3D model and documentation	<p>2.1 Design, create and apply layering strategy for project</p> <p>2.2 Develop architectural library for relevant design components</p> <p>2.3 Create custom designed library parts in accordance with operating system</p> <p>2.4 Apply text, line, font and dimension styles</p> <p>2.5 Use pan, zoom and orbit tools to navigate in the 2D and 3D windows within the model</p> <p>2.6 Add text and notations to the drawing in accordance with drawing protocols</p> <p>2.7 Add dimensions to the drawing in accordance with drawing protocols</p> <p>2.8 Produce 3D detailed suite of rooms, complete with fenestration and doors on appropriate layers</p> <p>2.9 Use advanced features of drawing tools to generate 3D form</p>
3. Create 2D drawings and edit components	<p>3.1 Create drawings from the model created</p> <p>3.2 Use editing tools correctly to modify drawing elements and text</p> <p>3.3 Modify, change or transfer object properties to a different layer</p>
4. Render surfaces	<p>4.1 Use CAD library to assign materials to surfaces and objects of the model</p> <p>4.2 Explore and create new material surfaces that supplement library of materials</p> <p>4.3 Edit texture, transparency, luminescence and patterns to achieve desired surface effects using shade settings</p> <p>4.4 Include light fixtures in model and adjust parameters to achieve desired effects</p>
5. Create and edit 3D views of the model	<p>5.1 Create isometric, two and three point perspective views using a range of camera settings and rendering techniques</p> <p>5.2 Reposition camera or target to provide alternate views using a variety of camera techniques</p> <p>5.3 Create effect of natural and artificial lighting in 3D space to achieve photo realistic awareness of the 3D model and the effect of</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	light on surfaces 5.4 Examine rendering time considerations to achieve specific output.
6. Plot and print for final presentations	6.1 Save perspective views and make appropriate for final media presentation 6.2 Save appropriate views to meet requirements of brief 6.3 Create page layout for plotting and printing 6.4 Prepare page layout using saved views and documentation 6.5 Plot 2D documentation with appropriate line weights 6.6 Prepare slide show presentation using saved views and documentation
7. Save and back up files	7.1 Create folders and files in logical structure to store drawing projects 7.2 Save and file drawings to allow easy access according to workplace documentation system 7.3 Identify and compare appropriate techniques for reducing file size 7.4 Back-up copies of files in accordance with organisation procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID5014 Use CAD applications to complete models and documentation for interior design projects.

## Links

# Assessment Requirements for MSFID4014 Produce digital models and documentation for interior design projects

## Modification History

Release 1. Supersedes and is equivalent to MSFID5014 Use CAD applications to complete models and documentation for interior design projects.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- designed and produced the following in accordance with the design concept and/or solution and the drafting and drawing protocols required by Australian Standards and the National Construction Code (NCC)
  - 2 sets of orthographic drawings comprising:
    - plans
    - elevations
    - sections
    - services
  - 2 3D perspective drawings.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for working with scale
- types of CAD equipment and procedures for their safe use, operation and maintenance
- CAD applications and their features, uses and limitations including those related to:
  - different views
  - layering
  - editing
  - rendering
- drafting and drawing codes and practices relevant to interiors including those for abbreviations
- 2D and 3D drawing techniques
- documentation control procedures
- types of challenges that occur using CAD, and how to avoid and respond.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design information for documentation
  - information technology hardware
  - CAD software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSL934005 Contribute to the ongoing development of HACCP plans

### Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL934001 Contribute to the ongoing development of HACCP plans. Foundation skill information added. Range of conditions removed. Assessment requirements amended.</p>

### Application

This unit of competency describes the skills and knowledge to collect and analyse data obtained from hazard analysis and critical control points (HACCP) records. Personnel are required to implement approved corrective actions and complete the review and update of documents and systems related to HACCP plans.

This unit of competency applies to technical assistants working in the food processing, manufacturing and pharmaceutical industry sectors. This unit of competency is relevant to experienced technical officers who may work individually or as part of a team. Members of a HACCP team contribute a range of expertise and relevant technical support. They would normally share responsibilities for the development of a HACCP plan.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

### Pre-requisite Unit

Nil

### Competency Field

Quality

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |  |     |   |
|---|--|-----|---|
| 1 | <b>Review existing HACCP plans</b>                           | 1.1 | Collect data and results from HACCP records   |
|   |  | 1.2 | Identify major and minor non-conformances to the HACCP plan   |
|   |  | 1.3 | Monitor critical control points to confirm performance  |
|   |  | 1.4 | Analyse problem areas using appropriate quality improvement tools and techniques  |
|   |  | 1.5 | Suggest corrective actions and strategies to prevent recurrence of the problem  |
|   |  | 1.6 | Document required amendments to the HACCP plan  |
|   |  | 1.7 | Report and present recommendations to appropriate personnel   |
| 2 | <b>Provide support for the implementation of HACCP plans</b> | 2.1 | Analyse roles, duties and current competency of associated personnel in relation to HACCP responsibilities                            |
|   |  | 2.2 | Identify training needs and skill development in relation to the successful implementation of the HACCP plan and assist with delivery |
|   |  | 2.3 | Maintain resource requirements to support HACCP plan  |
| 3 | <b>Review the implementation plan</b>                        | 3.1 | Implement any approved recommendations  |
|   |  | 3.2 | Update any changes to the HACCP plan documents  |
|   |  | 3.3 | Validate the effectiveness of changes to the HACCP plan   |

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Oral communication skills to work effectively as part of a team.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Equivalent to MSL934001 Contribute to the ongoing development of HACCP plans, Release 1.

## Links

MSL Laboratory Operations Companion Volume Implementation Guide is available from VETNet -

# Assessment Requirements for MSL934005 Contribute to the ongoing development of HACCP plans

## Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL934001 Contribute to the ongoing development of HACCP plans. Foundation skill information added. Range of conditions removed. Assessment requirements amended.</p>

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- actively contributed to the development of at least one HACCP plan, either individually or as part of a team, including:
  - monitoring and evaluating effectiveness of changes within the context of the ongoing development of HACCP plan
  - consulting and communicating appropriately with associated personnel.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the seven principles of HACCP and relationship to food or pharmaceutical safety, benefits of HACCP and preliminary steps for HACCP
- HACCP plan contents, including:
  - critical control points and control limits
  - consequences of non-conforming products being identified
- products and services provided by the workplace, and production process
- layout of the workplace, divisions and laboratory
- organisational structure of the workplace, communication channels and consultative arrangements
- role of laboratory services to the workplace and customers
- scheduling of tests and procedures to meet customer requirements
- quality policy, procedures and responsibilities of job role
- workplace procedures associated with the candidate's regular technical duties
- methods used to monitor each critical, quality and regulatory control point

- methods for systematically investigating and responding to problems
- flow charts, symbols, control charts, control limits and control measures
- equipment and instrument calibration requirements
- procedures for addressing non-compliance and continuous improvement practices
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - HACCP plans
  - workplace quality procedures and manuals.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSMSUP301 Apply HACCP to the workplace

## Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP301A Apply HACCP to the workplace

## Application

This unit of competency covers the skills and knowledge required to apply the hazard analysis and critical control point (HACCP) principles to the manufacture of products to be used in contact with food, beverages, pharmaceuticals or similar situations.

It applies to senior operators who are required to use a HACCP-based approach to analyse food, beverage or pharmaceutical safety risks, define controls and corrective action procedures, and ensure the system is working effectively.

The operator will have detailed operational and process knowledge but is not required to demonstrate 'hands on' operation of equipment as part of this competency.

**HACCP** is an internationally recognised systematic approach to identifying and controlling food and related safety hazards.

Related acronyms are used in this competency:

- CCP - critical control points
- CCF - critical control factors
- CCL - critical control limits
- HAT - hazard analysis table.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator as appropriate.

This unit of competency applies to all work environments and sectors within the industry where the product comes into contact with food, beverages or pharmaceuticals or otherwise requires 'food standards' to be maintained.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Support

## Unit Sector

## Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Apply a HAT to an existing process	1.1	Identify CCPs
		1.2	Recognise CCFs which are outside of or approaching CCLs
		1.3	Describe hazard related to CCFs and CCLs
		1.4	Implement corrective action in accordance with HAT
2	Develop/modify a HACCP	2.1	Conduct a hazard analysis
		2.2	Determine the CCPs
		2.3	Establish critical limits
		2.4	Establish/modify a system to monitor control of the CCPs
		2.5	Establish the corrective action to be taken when monitoring indicates that a particular CCP is not under control
		2.6	Establish procedures for verification to confirm that the HACCP system is working effectively
		2.7	Establish/modify documentation concerning all procedures and records appropriate to these principles and their application.

- |   |                                       |     |   |
|---|---------------------------------------|-----|---|
| 3 | Interpret HACCP/HAT to another worker | 3.1 | Explain the purpose and rationale of HACCP        |
|   |                                       | 3.2 | Identify CCPs, CCFs and CCLs                      |
|   |                                       | 3.3 | Describe indicators of CCFs not within their CCLs |
|   |                                       | 3.4 | Describe impact of non-conformances               |
|   |                                       | 3.5 | Demonstrate corrective action                     |
|   |                                       | 3.6 | Monitor worker implementing HACCP in their job    |

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

### **Regulatory framework**

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- Codex Alimentarius
- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

### **Procedures**

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other

form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

### **Hazards**

Hazards include one or more of the following:

- biological
- chemical
- physical
- product contamination
- material contamination
- methods/routes of exposure and contamination

### **Non-routine problems**

Non-routine problems must be resolved by applying operational knowledge to develop new solutions, either individually or in collaboration with relevant experts to:

- determine problems needing action
- determine possible fault causes
- develop solutions to problems which do not have a known solution
- follow through items initiated until final resolution has occurred
- report problems outside area of responsibility to designated person

Non-routine problems are unexpected problems, or variations of previous problems and include one or more of the following

- recognising CCFs approaching the CCLs
- determining corrective action from HAT
- applying HACCP principles to situations not directly covered by HAT
- recognising the need for a new/modified HACCP/HAT
- modifying HACCP/HAT to meet changes circumstances

Operational knowledge includes one or more of the following:

- procedures
- training
- technical information, such as journals and engineering specifications

- remembered experience
- relevant knowledge obtained from appropriate people

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMSUP301A Apply HACCP to the workplace

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

# Assessment Requirements for MSMSUP301 Apply HACCP to the workplace

## Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP301A Apply HACCP to the workplace

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- recognise HACCP/HAT issues and take appropriate corrective action
- analyse process and material variations in terms of the HACCP and determine appropriate actions
- apply HACCP principles to develop a new and/or modify an existing HACCP as part of a team
- communicate effectively with relevant personnel to convey technical information
- apply operational knowledge to non-routine problems
- write technical reports and HACCP/HAT tables
- interpret quantitative data, make comparisons and interpretations.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- 'seven principles' of HACCP
- importance of CCPs, CCFs and CCLs
- relevance of HAT to routine production
- impacts of variations in materials, process and product on HACCP.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of HACCP tools in the workplace

- may use industry-based simulation for part only of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

## Links

Companion Volume implementation guides are found in VETNet -

## PMAOMIR210 Control evacuation to muster point

### Modification History

Release 1. Supersedes and is equivalent to PMAOMIR210B Control evacuation to muster point

### Application

This unit of competency covers the skills and knowledge required to coordinate and control evacuation to a designated muster point.

This unit of competency applies to operators who are required to assess an incident; prepare for and control evacuation, including people requiring assistance; conduct head counts; respond to first aid and other needs of evacuees; and maintain communications and safety throughout these activities.

Generally the person would be part of a team during the incident but may be required to act independently. At all times they would be liaising and cooperating with other members of the team.

No licensing, legislative or certification requirements apply to this unit at the time of

### Pre-requisite Unit

Nil

### Competency Field

Incident readiness and response

### Unit Sector

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 **Prepare to evacuate**

1.1 Recognise alarm or other signs of incident

1.2 Determine nature and location of incident, wind

- direction and other relevant information
- 1.3 Assess incident situation and instigate relevant procedure
  - 1.4 Predict probable changes/escalation to incident
  - 1.5 Prepare the area and personnel for evacuation
  - 1.6 Facilitate incident roles and the operation of incident response stations according to procedures
  - 1.7 Coordinate incident response actions according to procedures
  - 1.8 Maintain communication channels with relevant personnel
- 2     **Control evacuation**
- 2.1 Identify hazards associated with evacuation
  - 2.2 Identify and communicate most appropriate path for evacuation to the desired muster point
  - 2.3 Implement relevant hazard control procedures
  - 2.4 Initiate evacuation when appropriate
  - 2.5 Ensure evacuation of mobility/sensory-impaired people
  - 2.6 Control incident evacuation according to procedures
  - 2.7 Undertake roll call of evacuated persons
  - 2.8 Communicate required details of evacuation to relevant personnel
- 3     **Complete evacuation**
- 3.1 Arrange and coordinate the first aid, welfare and other needs of evacuated persons
  - 3.2 Maintain control over evacuees
  - 3.3 Arrange for/provide assistance to the incident controller as required
  - 3.4 Maintain communication channels with relevant personnel

- 3.5 Move evacuees to a new location, or dismiss and return to work
- 3.6 Debrief evacuees and seek possible improvements
- 3.7 Complete all required records and reporting
- 3.8 Make recommendations for improvements to be incorporated into procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Regulatory framework** The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

**Tools and** Tools and equipment include one or more of the following:

- equipment**
- hard hats
  - armbands
  - torches
  - smoke hoods
  - lifejackets
  - incident communications equipment
  - check lists and floor plans

**Procedures** All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.
- 

**Hazards** Hazards include one or more of the following:

- spread of fire
- threat to adjoining areas
- danger of explosion
- loss of communications
- falling or shifting debris
- obstruction of evacuation routes
- heat, smoke, darkness, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- plant services (steam, condensate and cooling water)
- limited head spaces or overhangs

- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

## Unit Mapping Information

# Assessment Requirements for PMAOMIR210 Control evacuation to muster point

## Modification History

Release 1. Supersedes and is equivalent to PMAOMIR210B Control evacuation to muster point

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to:

- assess incident situation, related hazards and likely changes/escalation and apply procedures
- coordinate people and activities to effect evacuation according to procedures
- monitor and account for evacuees
- respond to needs of evacuees, including those who are injured, impaired and/or require other support
- communicate effectively with evacuees, incident controller and other personnel under stress
- complete forms and records.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisational procedures, including those covering:
  - safety, hazards and hazard control
  - incident, fire and accident
  - emergency response plans
  - communication systems
- hazards that may arise in an incident and risk controls
- accounting procedures and analysis of reports from evacuation areas
- types of first aid and welfare responses available in an emergency.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- Typically this evidence might be expected to be collected during an emergency drill.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations

- will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
- must include the use of appropriate tools, equipment and safety gear requiring demonstration of evacuation and mustering procedures
- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - 'what ifs'.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions

- appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:
  - being currently employed undertaking the type of work being assessed
  - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
  - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
  - conducting on-the-job training/assessments of the type of work being assessed
  - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work

## PSPCRT007 Compile and use official notes

### Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPCRT406C Compile and use official notes.</p> <ul style="list-style-type: none"> <li>• Unit code updated</li> <li>• Content and formatting updated to comply with new standards</li> <li>• All PC transitioned from passive to active voice</li> </ul>

### Application

This unit describes the skills required to keep notes and use them to give evidence in court, prepare statements and compile reports, including incident reports. It includes applying knowledge of the essential elements of note taking, statement and report preparation; and legislative and organisational requirements for the structure and content of official reports.

This unit applies to those working within the court system operating under procedures set by the court.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those set by the court.

Those undertaking this unit would generally work independently with occasional supervisory responsibilities. They would perform complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

## Competency Field

Courts

### Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
<b>1. Record and retain original notes</b>	1.1 Use official notebooks to record original notes relating to incidents and occurrences in appropriate format and timeframe. 1.2 Make notes that meet content and sequencing requirements within required timeframes. 1.3 Record identifying information retain and secure for the length of time required by law.
<b>2. Use notes to make statements</b>	2.1 Use notes to refresh memory and provide factual basis for statements. 2.2 Maintain receipts and bank records. 2.3 Format details for statements.
<b>3. Use notes to give evidence</b>	3.1 Use notes to refresh memory prior to giving evidence, enabling concise and factual answers. 3.2 Request authority of presiding official to refer to notes while giving evidence in court. 3.3 Present factual, correctly sequenced evidence that reflects information in notes. 3.4 Employ presentation standards.
<b>4. Compile reports</b>	4.1 Collect, analyse and organise information for reports into a logical sequence according to the purpose and audience of each report. 4.2 Format reports to meet organisational requirements for structure, style and content. 4.3 Complete incident reports containing all required information and outcomes. 4.4 Produce reports required for information management systems.

## Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

## Unit Mapping Information

This unit supersedes and is equivalent to PSPCRT406C Compile and use official notes.

# Assessment Requirements for PSPCRT007 Compile and use official notes

## Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"><li>• Assessment Requirements created drawing upon specified assessment information from superseded unit</li></ul>

## Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, rules, and organisational practices and procedures including WHS relating to official note taking or working in an office environment
- interpreting notes and giving evidence
- taking notes sequencing events chronologically
- compiling reports
- assigning report and file numbers
- operating equipment and/or technology to prepare reports

## Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- reasons for and key requirements of note taking for official purposes
- essential elements of a report
- legislative and organisational requirements for structure and content of official reports and statements
- requirements for giving evidence
- information management including retention and security of notes

## Assessment Conditions

Assessment of this unit requires evidence gathered over time in a workplace environment or one that closely resembles normal work practice and replicates the diverse conditions likely to be encountered when compiling and using official notes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## PSPLND001 Investigate tenure and land use history

### Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPLAND302A Investigate tenure and land use history.</p> <ul style="list-style-type: none"> <li>• Unit code updated</li> <li>• Content and formatting updated to comply with new standards</li> <li>• All PC transitioned from passive to active voice</li> </ul>

### Application

This unit describes the skills required to investigate a tenure and land use history. It includes identifying land, reading plans and/or maps, searching records, interpreting information, recording investigation findings and organising plans and/or diagrams.

This unit applies to those working to form a history of land use and tenure.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, performing routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

### Competency Field

Public land administration

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
<b>1. Identify land</b>	<p>1.1 Obtain sufficient details to identify the map, plan or aerial photo containing the area of land.</p> <p>1.2 Locate the area of land on the map, plan and aerial photo using the information gathered.</p>
<b>2. Read plans and/or maps</b>	<p>2.1 Establish the purpose of the plan and/or map.</p> <p>2.2 Identify the type of information that can be obtained from the different types of plans and/or maps.</p> <p>2.3 Obtain information from the plan and/or map to suit the intended purpose.</p>
<b>3. Search public land records</b>	<p>3.1 Establish the purpose for the investigation of tenure and/or land use history to determine the level of detail required.</p> <p>3.2 Access and search electronic data sources.</p> <p>3.3 Identify key repositories and access data sources and historic records to obtain information relating to the identified land.</p> <p>3.4 Conduct consultations when necessary to identify and/or corroborate tenure and/or land use information.</p> <p>3.5 Source and analyse all available land records related to the area and compile evidence in accordance with the purpose of the investigation.</p>
<b>4. Interpret information</b>	<p>4.1 Interpret legislation relevant to the jurisdiction.</p> <p>4.2 Interpret information in tenure related and land use documentation.</p> <p>4.3 Obtain expert assistance for interpretation as required.</p> <p>4.4 Identify and analyse evidence of past and present tenure and/or land use.</p>
<b>5. Record investigation findings</b>	<p>5.1 Compile chronology of tenure and/or land use history with sufficient detail to meet the investigations purpose.</p> <p>5.2 Record history to suit the intended purpose and audience.</p> <p>5.3 Present findings.</p>
<b>6. Organise plans/diagrams</b>	<p>6.1 Establish the purpose of the plan or diagram.</p> <p>6.2 Access and obtain the information and resources required to arrange for the diagram or plan.</p> <p>6.3 Check the diagram or plan to see that it suits the intended purpose.</p>

## Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

## Unit Mapping Information

This unit supersedes and is equivalent to PSPLAND302A Investigate tenure and land use history.

# Assessment Requirements for PSPLND001 Investigate tenure and land use history

## Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"><li>• Assessment Requirements created drawing upon specified assessment information from superseded unit</li></ul>

## Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- finding information in systems, databases and other sources
- researching data repositories, including libraries and archives
- interpreting legislation and instruments
- interpreting tenure documents, correspondence, maps, plans
- reading a gazette
- using microfiche
- producing accurate reports, setting out facts in logical sequence
- making assessments of facts where interpretation is required

## Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- the organisation's spatial and textual information systems, databases and archival storage/s
- land tenure legislation, tenure types and the effect of these
- maps, plans, title documents and related legal matter
- sources of historical information and how to access them
- public sector legislation, including work health and safety, environment, privacy and diversity

## Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## PSPLND002 Compile and check survey plans

### Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPLAND308A Compile and check survey plans.</p> <ul style="list-style-type: none"> <li>• Unit code updated</li> <li>• Content and formatting updated to comply with new standards</li> <li>• All PC transitioned from passive to active voice</li> </ul>

### Application

This unit describes the skills required to prepare a compiled survey plan to industry standards. This includes checking the plan to ensure compliance with organisational requirements and industry standards.

This unit applies to those working as land surveyors.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, while performing routine tasks in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

### Competency Field

Public land administration

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
<b>1. Check a survey plan</b>	<p>1.1 Check survey plans to ensure compliance with specialised requirements and industry standards.</p> <p>1.2 Refer any discrepancies or abnormalities to the appropriate personnel for verification or amendment.</p> <p>1.3 Endorse approval.</p>
<b>2. Compile a survey plan</b>	<p>2.1 Access and gather information and resources required.</p> <p>2.2 Check the compiled plan to ensure it is mathematically correct.</p> <p>2.3 Ensure the plan is endorsed by the appropriate personnel.</p>

## Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

## Assessment Requirements for PSPLND012 Review planning documents and environmental assessments

### Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"><li>• Assessment Requirements created drawing upon specified assessment information from superseded unit</li></ul>

### Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- assessing impacts of development on public land
- interpreting policy and strategies
- interpreting documents, including planing documents, engineering and construction plans, aerial photographs, electronic mapping
- communicating with a diverse range of stakeholders to enable a coordinated response
- preparing a response involving negotiation of an agreed position

### Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation, including work health and safety and environment, regulations, policies and practices relating to public land administration and land use planning approvals
- legal implications of a development on public land
- risk management
- departmental delegations

## Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## PSPREG006 Produce formal record of interview

### Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPREG407B Produce formal record of interview.</p> <ul style="list-style-type: none"> <li>• Unit code updated</li> <li>• Content and formatting updated to comply with new standards</li> <li>• All PC transitioned from passive to active voice</li> </ul>

### Application

This unit describes the skills required to produce formal records of interview. It includes preparing for, conducting and record interviews.

This unit applies to those working in public sector roles conducting regulatory activities.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and environment in the context of conducting interviews.

Those undertaking this unit would work independently, performing routine tasks, in a range of contexts including some that are unfamiliar or unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

### Competency Field

Regulatory

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
<b>1. Prepare for interview</b>	1.1 Develop interview plan. 1.2 Determine venue, equipment and personnel to be involved in or excluded from the interview. 1.3 Identify exhibits to be used in the interview and make readily available for reference. 1.4 Assess risks associated with the interview and instigate procedures for ensuring the safety of self and others.
<b>2. Conduct and record interview</b>	2.1 Provide interviewee with preliminary advice and question to ensure their understanding of the interview process and their rights. 2.2 Use questioning techniques to gather information, and test and confirm its relevance, reliability and sufficiency, prior to concluding the interview. 2.3 Introduce and fully describe exhibits. 2.4 Conduct, record and conclude interview in accordance with the rules of evidence so that outcomes are admissible in evidence. 2.5 Produce a true record of interview and complete post-interview procedures.

## Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

## Unit Mapping Information

This unit supersedes and is equivalent to PSPREG407B Produce formal record of interview.

# Assessment Requirements for PSPREG006 Produce formal record of interview

## Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"><li>• Assessment Requirements created drawing upon specified assessment information from superseded unit</li></ul>

## Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- using interviewing techniques and varying style and language structure to suit situation and interviewee(s)
- using techniques to defuse potentially dangerous situations
- engaging in exchanges of sometimes complex oral information
- using diverse communication techniques
- engaging in questioning that meets legal requirements for admissibility
- undertaking research, analysis and problem solving
- using judgment, to test the veracity of information and vary questions and interviewing techniques to suit
- preparing interview documentation requiring accuracy of expression and formality in structure and format
- operating technical and electronic equipment

## Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- organisational policies and guidelines relating to formal interviews
- interview techniques and points of proof
- rules of evidence and admissibility
- use of caution

- legal and ethical considerations for conducting interviews involving juveniles, Aboriginal and Torres Strait Islander peoples and disciplinary matters
- diversity issues in the context of interviewing suspects, witnesses and others
- procedures for using interpreters
- legal and organisational requirements for documentation
- legal requirements relating to electronic recording equipment
- public sector legislation relating to producing a formal record of interview

## Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## PSPREG017 Undertake compliance audits

### Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPREG417A Undertake compliance audits.</p> <ul style="list-style-type: none"> <li>• Unit code updated</li> <li>• Content and formatting updated to comply with the new standards</li> <li>• All PC transitioned from passive to active voice</li> </ul>

### Application

This unit describes the skills required to perform comprehensive compliance audits. It includes assisting in and undertaking preliminary audit planning, undertaking compliance audits as a member of a team, dealing with audit issues, and contributing to the reporting and presentation of audit findings.

This unit applies to those working in public sector roles conducting regulatory activities.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently as part of a team, performing complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

### Competency Field

Regulatory

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
<b>1. Assist in audit planning</b>	1.1 Identify the audit objectives, scope and focus. 1.2 Identify relevant operational and information systems in the audit context. 1.3 Identify audit team roles and key audit techniques. 1.4 Prepare an audit plan that meets organisational requirements and the objectives of the audit. 1.5 Prepare audit documentation. 1.6 Conduct pre audit communication with the client to be audited.
<b>2. Undertake preliminary activities</b>	2.1 Identify concepts, systems and reports relevant to the audit. 2.2 Perform analytical checks are performed. 2.3 Make and consider initial assessment to ensure it is appropriate and accurate. 2.4 Identify appropriate and significant controls and design control tests. 2.5 Undertake risk assessment activities to determine risks and risk treatments necessary.
<b>3. Undertake audit activity as a member of a team</b>	3.1 Identify sampling techniques to suit audit requirements and apply. 3.2 Test and assess controls in accordance with the audit plan 3.3 Conduct substantive testing when necessary. 3.4 Select and use technology in line with audit requirements. 3.5 Prepare audit documentation and working papers according to the established format.
<b>4. Deal with audit issues</b>	4.1 Identify and refer situations requiring specialist input. 4.2 Identify and refer situations requiring referral to other areas or agencies promptly. 4.3 Deal with issues which arise during the audit in a professional manner.
<b>5. Contribute to the reporting and presentation of audit findings</b>	5.1 Prepare audit reports in the approved format. 5.2 Conduct discussions with the client on audit findings in a professional manner. 5.3 Prepare internal reports in the required style and format. 5.4 Make final recommendations on action promptly. 5.5 Receive responses to audit recommendations and finalise the

	audit. 5.6 Record audit findings in information management systems.
--	--

## Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

## Unit Mapping Information

This unit supersedes and is equivalent to PSPREG417A Undertake compliance audits.

# Assessment Requirements for PSPREG017 Undertake compliance audits

## Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> <li>Assessment Requirements created drawing upon specified assessment information from superseded unit</li> </ul>

## Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying problems and solutions
- using decision-making using sound judgment
- undertaking research and analysis
- evaluating conflicting requirements
- using negotiation and conflict resolution techniques
- engaging in teamwork
- adjusting communication to suit different audiences
- writing ongoing and final reports, and official correspondence
- using scanning techniques
- reading complex and formal documents using information technology for preparing written advice and reports requiring precision of expression

## Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- knowledge of principal and allied legislation, policies and procedures, including aspects of criminal law and administrative law relating to the outcomes of compliance audits
- principles of auditing as detailed in organisational policies
- duties and responsibilities of auditors
- testing procedures and methods of inquiry

- industry knowledge
- requirements for security of documents and information
- procedures for declaring conflicts of interest
- protocols for reporting fraud, corruption and maladministration
- fundamental ethical principles in the handling of documents and information, natural justice, procedural fairness, respect for persons and responsible care
- other ethics standards, including professional standards
- public sector values/ethics and code of conduct
- public sector legislation

## Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## PSPSEC009 Handle sensitive information

### Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPSEC405A Handle security classified information.</p> <ul style="list-style-type: none"> <li>• Unit code updated</li> <li>• Content and formatting updated to comply with new standards</li> <li>• All PC transitioned from passive to active voice</li> <li>• Unit title changed to better reflect unit outcomes</li> <li>• PC 3.1 and 3.2 merged</li> </ul>

### Application

This unit describes the skills required to receive, deal with, maintain and dispose of sensitive information.

This unit applies to those working in a security role where they would receive, deal with and maintain sensitive information.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would generally work independently, as part of a team and with occasional supervisory responsibilities. They would perform complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

## Competency Field

Security

### Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
<b>1. Receive sensitive information</b>	1.1 Receive and check sensitive information to ensure transmission protocols have been exercised. 1.2 Take action if protocols have not been adhered to. 1.3 Record sensitive information.
<b>2. Deal with sensitive information</b>	2.1 Review sensitive information to ensure classification meets the security policy for protection of information. 2.2 Review aggregated sensitive information to ensure that it is classified. 2.3 Check classification requirement to ensure it is warranted, and the level of protection is assigned in accordance with the consequences that might result from any compromise of the information's confidentiality, integrity and availability. 2.4 Contact originators of information responsible for classifying the documents to discuss reclassification or declassification where necessary. 2.5 Transmit sensitive information. 2.6 Obtain expert advice as required.
<b>3. Maintain sensitive information</b>	3.1 Secure and account for sensitive information. 3.2 Dispose of sensitive information.

### Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

## Unit Mapping Information

This unit supersedes and is equivalent to PSPSEC405A Handle security classified information.

# Assessment Requirements for PSPSEC009 Handle sensitive information

## Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> <li>Assessment Requirements created drawing upon specified assessment information from superseded unit</li> </ul>

## Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least two occasions.

- applying legislation, regulations and policies relating to government security management
- applying security classification systems
- using analysis and problem solving
- tailoring communication to the needs of a diverse range of people inside and outside the organisation who classify, transmit or advise on sensitive information

## Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- legislation, regulations, policies, procedures and guidelines relating to government security management
- standards for management of sensitive information
- classification system for national security and non-national security information
- procedures for confirming initial security classifications
- international protocols and treaties impacting on government security management
- available sources of expert advice
- procedures relating to WHS and environment in the context of government security management
- equity and diversity principles

## Assessment Conditions

Assessment of this unit requires a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when handling sensitive information.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## PSPSEC010 Provide government security briefings

### Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPSEC406A Provide government security briefings.</p> <ul style="list-style-type: none"> <li>• Unit code updated</li> <li>• Content and formatting updated to comply with new standards</li> <li>• All PC transitioned from passive to active voice</li> <li>• PC 1.3 and 1.4 merged</li> </ul>

### Application

This unit describes the skills required to organise and conduct security briefings which may be delivered face to face, via telecommunication means or briefing papers.

This unit applies to those working in the security sector with some responsibility for determining the need for, and the provision of security briefings.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit will be working as part of a team or independently where support is available for more complex situations. They will perform complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

## Competency Field

Security

### Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
<b>1. Organise security briefing</b>	1.1 Determine the need for a security briefing and select relevant methodology. 1.2 Determine briefing purpose, level, structure and content. 1.3 Prepare a plan for the briefing including participants to be involved and materials required.
<b>2. Conduct security briefing</b>	2.1 Outline the purpose and structure of the briefing to participants according to the briefing plan. 2.2 Encourage active oral or written participation. 2.3 Convey organisational and legislated government security requirements using language and examples adapted to levels of understanding and diverse needs. 2.4 Check understanding of security requirements and the consequences of non-compliance and provide further information as required. 2.5 Conduct briefing. 2.6 Record outcomes and complete a report of the briefing where required.

### Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

### Unit Mapping Information

This unit supersedes and is equivalent to PSPSEC406A Provide government security briefings.

## PSPSEC015 Communicate security awareness

### Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPSEC506A Communicate security awareness.</p> <ul style="list-style-type: none"> <li>• Unit code updated</li> <li>• Content and formatting updated to comply with new standards</li> <li>• All PC transitioned from passive to active voice</li> <li>• PC 2.3, 2.4 and 2.5 merged</li> <li>• PC 5.1 and 5.4 removed</li> </ul>

### Application

This unit describes the skills required to promote security issues to improve government security management. It includes planning and designing awareness-raising activities, promoting security management and developing and nurturing cooperative client relationships.

This unit applies to those whose roles include promoting and conducting security awareness activities and evaluating their success.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to ethical and security management standards, guidelines and codes of conduct when communicating security awareness.

Those undertaking this unit would normally work independently, initiating support from a range of established resources, while performing complex tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

## Competency Field

Security

### Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
<b>1. Plan security awareness activities</b>	1.1 Determine need for activities and consult clients and staff to establish priorities in the organisation's security plan. 1.2 Initiate, gather and assess ideas for new or improved activities, taking into account the human, financial and physical resources required. 1.3 Obtain approval for security awareness activities.
<b>2. Design security awareness activities</b>	2.1 Establish formal and informal networks of targeted individuals and groups and use these as communication channels. 2.2 Incorporate precedents in security management into awareness activities. 2.3 Design and produce information presentations and support materials as required. 2.4 Create awareness activities based on the organisation's corporate objectives, core business, culture and an understanding of its client base.
<b>3. Promote government security management</b>	3.1 Prepare and disseminate information relating to incidents and effects of non-compliance. 3.2 Develop and present information to promote government security management and meet the needs of a diverse audience.
<b>4. Develop and nurture cooperative client relationships</b>	4.1 Establish and document expectations of clients and contractors. 4.2 Anticipate opportunities, in consultation with work colleagues and managers, for establishing contacts and networks with external and internal clients. 4.3 Monitor and inform clients of changes in organisational focus which may affect organisation-client relationships. 4.4 Obtain feedback on organisational activities and report outcomes. 4.5 Facilitate stakeholder understanding of organisation's security management philosophy, policy and procedures. 4.6 Advise clients when and how to modify their practices to meet

	organisational standards as required.
<b>5. Conduct security management activities</b>	<p>5.1 Implement security management activities using adult learning methodologies and within existing resource and time constraints.</p> <p>5.2 Identify intended outcomes based on expectations of the target audience.</p> <p>5.3 Adapt and refine activities as indicated by audience engagement and responses.</p>
<b>6. Evaluate success of awareness raising activities</b>	<p>6.1 Evaluate security awareness activities against predetermined objectives.</p> <p>6.2 Document results of evaluation and use as basis for planning future activities.</p> <p>6.3 Identify and act upon opportunities for new security awareness activities as required.</p> <p>6.4 Obtain evidence of status or changes in the type and level of security breaches as a result of activities.</p>

## Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

# Assessment Requirements for PSPSEC015 Communicate security awareness

## Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> <li>Assessment Requirements created drawing upon specified assessment information from superseded unit</li> </ul>

## Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least two occasions.

- designing security management activities
- developing and maintaining client relationships
- tailoring activity sessions to the needs of adult learners and a variety of audiences
- managing time effectively to plan and facilitate security management activities within existing resource and time constraints
- delivering oral presentations
- explaining complex concepts and formal documents, including legislation, standards and codes of conduct
- using communication styles to suit different audiences and purposes

## Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

Operational knowledge of:

- agency structure and core business activities
- security and how it relates to the specific functions and activities of the organisation, together with an understanding of ethical standards required by the organisation of its staff and contractors and suppliers
- national strategic objectives relating to government security management

- jurisdictional security requirements and strategic objectives
- cross-jurisdictional protocols
- international treaties and protocols
- the organisation's security risk management methodology
- security risk factors in the organisation
- identified instances of security breaches
- adult learning principles
- audience requirements
- anti-discrimination and diversity legislation
- legislation, policies and procedures relating to conduct of security management activities including WHS and environment

## Assessment Conditions

Assessment of this unit requires evidence gathered over time in a workplace environment or one that closely resembles normal work practice and replicates the diverse conditions likely to be encountered when communicating security awareness.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## RIISTD201D Read and interpret maps

### Modification History

Release	Comment
1	This unit replaces RIISTD201A Read and interpret maps
2	Removed irrelevant points in Knowledge Evidence; Editorial corrections
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

### Application

This unit describes a participant's skills and knowledge required to read and interpret maps in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

No licensing or certification requirements apply to this unit at the time of publication.

### Elements and Performance Criteria

1. Plan and prepare for navigation	<p>1.1 Access, interpret and apply navigation documentation and ensure the work activity is compliant</p> <p>1.2 Obtain, interpret, clarify and confirm navigation information, work requirements and travel details</p> <p>1.3 Select maps, equipment and navigation aids, and check for accuracy, currency and operational effectiveness</p> <p>1.4 Identify faults/errors in maps and equipment, and record, report and address issues</p> <p>1.5 Establish and maintain communication plan</p>
2. Plan the route	<p>2.1 Assess and select route to destination, consider information from map/plan/field observations</p> <p>2.2 Examine maps, and identify relevant symbols, information and navigation data</p> <p>2.3 Identify and locate current position in the field, on map/plan</p>

	<p>using landmarks and key geographical features</p> <p>2.4 Identify and locate required destination on map/plan</p> <p>2.5 Review the map route/plan, field observations, and local knowledge</p> <p>2.6 Identify potential hazards and plan risk control measures</p> <p>2.7 Measure and estimate distance to destination using map scale for selected route</p> <p>2.8 Document in writing planned route on a navigation data sheet</p>
3. Conduct navigation	<p>3.1 Navigate planned route and schedule</p> <p>3.2 Orientate the map/plan to surroundings and planned route</p> <p>3.3 Use and interpret navigation aids</p> <p>3.4 Navigate alternative routes to bypass obstacles and improve efficiency of route or course</p> <p>3.5 Maintain clear and concise communication during navigation activity</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

## Unit Mapping Information

RIISTD201A Read and interpret maps

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

# Assessment Requirements for RIISTD201D Read and interpret maps

## Modification History

Release	Comment
1	This unit replaces RIISTD201A Read and interpret maps
2	Removed irrelevant points in Knowledge Evidence; Editorial corrections
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

## Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements requirements, procedures and techniques for the safe, effective read and interpret map activities including:
  - applying problem solving skills to resolve issues to navigation route
  - applying mathematical skills, including: basic angles and geometry for compass bearings, estimation and measurement
- works effectively with others to undertake and complete read and interpret map activities that meets all of the required outcomes including:
  - communicating by speaking clearly and listening actively
  - demonstrating the practice of working with others to read and interpret maps
  - maintaining written records and reporting
- demonstrates completion of the reading and interpreting of maps that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - reviewing the map route/plan by identifying and using:
    - symbols
    - navigation data
    - landmarks

- geographical features
- scale
- identifying obstacles and navigating alternative routes
- undertaking a minimum 2 km navigation following established route
- traversing a 2 km route to specified destination
- orienting the map to ground and surrounds
- documenting the navigation route and details on the navigational data sheet
- communicating the planned navigation route to others

## Knowledge Evidence

The candidate must demonstrate knowledge of reading and interpreting maps through:

- identifying fatigue management techniques
- identifying and using various types of communication systems and equipment
- engaging map reading and road navigation techniques
- identifying and interpreting types of maps, charts and scales and their uses
- determining representation of topographic features on maps and plans
- determining common scales used on maps and plans
- identifying and using features and use of a compass and factors that affect compass accuracy
- identifying the applications of a GPS
- advantages and disadvantages of different map and chart types and sources of error
- techniques for estimating distance travelled

## Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current\* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,

- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

\*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

\*\*Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

## RIIWH202D Enter and work in confined spaces

### Modification History

Release	Comment
1	The unit replaces RIIOHS202A Enter and work in confined spaces.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

### Application

This unit describes a participant's skills and knowledge required to enter and work in confined spaces in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles undertaking work in confined spaces.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

*Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.*

### Elements and Performance Criteria

1 Plan and prepare for working in confined space	<p>1.1 Access, interpret and apply procedures for confined space entry and the environmental management plan and ensure the work activity is compliant</p> <p>1.2 Obtain, confirm, clarify and apply work instructions and agreed procedure</p> <p>1.3 Obtain, confirm, clarify and apply safety requirements</p>
--	---

	<p>1.4 Obtain and confirm authorisation (entry permit) meets regulatory requirements</p> <p>1.5 Confirm the emergency response procedure is with the stand-by person and understood</p> <p>1.6 Identify, obtain and implement signage and barrier requirements</p> <p>1.7 Select tools and equipment for the tasks, check for serviceability and rectify or report any faults</p> <p>1.8 Identify, confirm and apply the environmental protection requirements</p> <p>1.9 Position rescue equipment by the entry permit</p>
2 Work in confined space	<p>2.1 Gain access to confined space</p> <p>2.2 Ensure that the atmosphere is tested and monitored for harmful elements</p> <p>2.3 Correctly apply tagging and lock-out procedures</p> <p>2.4 Enter the confined space correctly</p> <p>2.5 Maintain ongoing communication with the stand-by person</p> <p>2.6 Comply with entry permit requirements</p> <p>2.7 Monitor and adhere to allocated entry time</p>
3 Exit confined space	<p>3.1 Exit confined space correctly</p> <p>3.2 Recover tools, equipment and materials</p> <p>3.3 Conduct inspection of the confined space</p> <p>3.4 Secure access to the confined space</p> <p>3.5 Remove tagging and lock-out</p> <p>3.6 Accurately complete confined space entry permit</p>
4 Clean up	<p>4.1 Clear work area and dispose of or recycle materials</p> <p>4.2 Clean, check, maintain and store tools and equipment</p> <p>4.3 Remove, clean and store barriers and signs</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

## Unit Mapping Information

## Assessment Requirements for RIIWHS202D Enter and work in confined spaces

### Modification History

Release	Comment
1	The unit replaces RIIOHS202A Enter and work in confined spaces.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

### Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of entering and working in confined spaces that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - obtain appropriate entry permit and instructions for performing work in confined space
  - interpreting and applying safe work method statements
  - apply tagging and lock out
  - selecting, wearing and caring for personal protective equipment applicable to all tasks and environment identified
  - entering the confined space
  - using atmospheric monitoring devices prior to entering the confined space
  - working in the confined space
  - using atmospheric monitoring devices during confined space activity
  - applying safe materials handling methods
  - exiting the confined space
  - remove tagging and lock out

## Knowledge Evidence

The candidate must demonstrate knowledge of enter and work in confined spaces through:

- identifying areas that constitute confined spaces
- complying with site and equipment safety requirements
- complying with the entry and exit procedures, risks and regulations
- types of air contaminants and toxic gases
- identifying the limitations of breathing apparatus
- identifying equipment types, characteristics, technical capabilities and limitations
- complying with site isolation and site control responsibilities and authorities
- locations of safety data sheets (SDS) information and application
- using confined space and Industry terminology

## Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current\* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

\*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

\*\*Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

## SIRRV002 Control stock

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to process stock orders, maintain stock levels, minimise stock losses, manage stocktakes and maintain all documents that relate to the administration of any type of stock.

This unit applies to individuals responsible for stock control. They work within organisational systems and procedures, but make decisions about stock administration and may have responsibility for others.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Inventory

### Unit Sector

Retail

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

1. Monitor stock receipt and dispatch.

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Implement organisational policies and procedures for receipt, dispatch and secure storage of stock.
- 1.2. Allocate tasks and monitor staff to ensure organisational procedures are followed, and documentation is completed

- correctly.
- 1.3. Confirm that stock quantity and quality inspections on receipt meet organisational standards.
  - 1.4. Act on variations to quantity and quality of delivered stock.
  - 1.5. Supervise safe stock handling and storage.
2. Maintain stock records.
    - 2.1. Monitor stock and maintain stock at required levels.
    - 2.2. Maintain, monitor and adjust stock reorder cycles as required.
    - 2.3. Provide clear information to team members about individual stock recording responsibilities.
    - 2.4. Maintain stock storage and movement records.
    - 2.5. Record and report stock discrepancies.
    - 2.6. Monitor stock performance and identify and report fast and slow-selling items.
3. Process and follow up orders.
    - 3.1. Process and raise stock orders according to organisational procedures.
    - 3.2. Monitor delivery of stock to ensure agreed deadlines and inventory requirements are met.
    - 3.3. Liaise with suppliers to ensure continuity of supply.
    - 3.4. Resolve routine supply problems or refer to appropriate personnel for action.
    - 3.5. Distribute stock within the organisation according to required allocations.
    - 3.6. Handle routine supply problems or refer to management as required by store policy.
4. Minimise stock losses.
    - 4.1. Regularly check storage of stock and ensure its protection.
    - 4.2. Identify, record and report stock losses.
    - 4.3. Identify avoidable losses and establish reasons for them.
    - 4.4. Recommend solutions and implement procedures to prevent future losses.
5. Coordinate stocktake or cyclical count.
    - 5.1. Explain procedures for stocktake and cyclical counts to team members.
    - 5.2. Allocate stocktaking tasks to individual team members ensuring effective use of staff resources to complete task.
    - 5.3. Provide team members with clear directions for performance of each task.
    - 5.4. Produce accurate reports for management on stocktake data, including discrepancies.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>interpret supplier purchasing agreements, purchase orders, records of incoming stock and organisational policies and procedures for stock control.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>calculate:<ul style="list-style-type: none"><li>supplier costs and complex order costs</li><li>complex details of stock on hand and stock losses and produce complex numerically-based reports</li></ul></li><li>reconcile incoming stock and invoices against purchase orders.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>use business technology for inventory management.</li></ul>

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for SIRRINV002 Control stock

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain and order stock across one stock cycle according to organisational procedures using all of the following stock processes:
  - receipt
  - dispatch
  - ordering
  - stock level monitoring
  - records maintenance
- produce three different stock control reports
- organise and coordinate one stocktake or cyclical count
- provide clear and correct information to team members involved in stock control processes.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - receipt and dispatch of goods, including inspection for quantity and quality
  - stock ordering and reordering
  - stock replenishment
  - stock rotation
  - reporting of stock discrepancies, damage and loss
  - safe transport, handling and storage of goods
  - stock control
  - stocktaking and cyclical counts
  - pricing, labelling and packaging
  - stock security
- key aspects of legislation and codes of practice relevant to stock control:
  - Australian Consumer Law
  - Work Health and Safety (WHS)

- manual handling
- licensing for mechanical movement of stock
- principles of stock control:
  - rotation and replenishment
  - product life cycle
- impact of business planning and sales forecasts on stock control
- types of stock control systems used in the sector
- reasons for stock loss and damage and methods to control these and protect stock.

## Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation and codes of practice relevant to stock control as listed in Knowledge Evidence
- a computerised stock control system
- stock for use in stock control activities
- organisational policies and procedures for stock control
- team members; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

## SIRXCEG003 Build customer relationships and loyalty

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to build customer relationships and foster customer loyalty.

It applies to individuals working in frontline customer service roles in a diverse range of industry sectors and business contexts. They operate with independence and under limited supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Customer Engagement

### Unit Sector

Cross-Sector

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

1. Develop relationships with customers.

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Provide personalised service to customers in a professional manner that promotes repeat business.
- 1.2. Identify repeat business and acknowledge customer return.
- 1.3. Provide tailored recommendations for products and services

- based on known individual customer needs.
2. Generate customer loyalty.
    - 2.1. Convert customers to brand advocates through exemplary customer service.
    - 2.2. Inform customers of benefits associated with promotions and loyalty programs as required.
    - 2.3. Identify trends in customer demands for products and services and communicate with relevant personnel to ensure availability.
  3. Deal with escalated customer complaints.
    - 3.1. Clarify information regarding escalated customer complaints referred from team members.
    - 3.2. Take action to pacify customer maintaining a calm and professional manner.
    - 3.3. Identify source of customer dissatisfaction and seek appropriate solutions in consultation with the customer.
    - 3.4. Ensure the customer is satisfied with solutions and offer compensation in line with level of responsibility.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret plain English documents that outline organisational policies and procedures relevant to customer service.</li> </ul>
Initiative and enterprise skills to:	<ul style="list-style-type: none"> <li>• identify and act on opportunities to enhance a customer's experience.</li> </ul>

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ca051b1b-5101-4ec2-ac1c-49699303188d>

## Assessment Requirements for SIRXCEG003 Build customer relationships and loyalty

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide current, accurate and relevant information and assistance to four different customers regarding the following to build customer brand loyalty:
  - promotional activities
  - products and services
  - brand or business customer benefits
- identify trends in customer purchasing patterns and make recommendations that enhance customer service and loyalty
- take appropriate action to resolve two escalated customer complaints.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- techniques for:
  - providing personalised extemporaneous customer service
  - anticipating customer preferences, needs and expectations throughout the service experience
  - building customer loyalty
  - resolving escalated customer complaints
  - pacifying dissatisfied customers
- commercial benefits of building customer relationships and loyalty
- industry and organisational:
  - professional service standards
  - attitudes and attributes expected when engaging with customers
  - different customer service needs and expectations
  - types of customer benefits
  - essential features and use of customer databases
- key aspects of Australian consumer and privacy law as relevant to customer interactions.

## Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
  - industry and organisational:
    - professional service standards
    - attitudes and attributes expected when engaging with customers
    - different customer service needs and expectations
    - types of customer benefits
- current plain English regulatory documents distributed by government regulators for:
  - Australian Consumer Law
  - privacy law
- customers; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

## SIRXCOM002 Work effectively in a team

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to communicate and work cooperatively with both peer and senior team members to contribute to the achievement of team goals.

It applies to individuals working in frontline operational roles in a diverse range of industry sectors and business contexts. They operate with some independence under general supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Communication and Teamwork

### Unit Sector

Cross-Sector

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes

1. Communicate with team members.

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Communicate effectively with team members giving consideration to cultural and other differences.
- 1.2. Check understanding of work requirements and seek

- clarification to prevent misunderstandings as required.
- 1.3. Display respect to team members and adherence to workplace expectations when interacting with others.
  - 1.4. Maintain open communication with team members to ensure transfer of information.
  - 1.5. Share information and ideas with team members to enhance work outcomes.
2. Actively participate in retail teams.
    - 2.1. Identify individual tasks for completion and responsibilities for contributing to the achievement of team goals.
    - 2.2. Carry out tasks and responsibilities to achieve workplace goals and organisational expectations.
    - 2.3. Work cooperatively with team members to maximise efficiency and quality of daily work outcomes.
    - 2.4. Seek, acknowledge and act upon constructive feedback from others.
    - 2.5. Participate in team problem-solving to improve team outcomes.
    - 2.6. Interact with team members to foster a positive team and work environment reflective of the organisational culture.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Oral communication skills to:	<ul style="list-style-type: none"> <li>• use open questions and paraphrasing to confirm correct understanding of work requirements</li> <li>• use gestures or simple words to communicate where language or communication barriers exist.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>• recognise when assistance is required of self or others and engage the appropriate support.</li> </ul>

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ca051b1b-5101-4ec2-ac1c-49699303188d>

# Assessment Requirements for SIRXCOM002 Work effectively in a team

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- actively participate in three different workplace activities individually or cumulatively demonstrating:
  - effective communication with team members
  - consultation with others to determine team goals and individual responsibilities
  - contribution to achievement of team outcomes
  - following direction from others
  - working with others to resolve one basic team problems.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- conventions and use of a range of communication methods:
  - verbal communication
  - non-verbal communication
- communication techniques and use in a team context:
  - open and closed questioning
  - paraphrasing
  - effective listening
  - voice tonality and volume
- effective communication techniques with team members of diverse backgrounds:
  - cultural diversity
  - special needs
- teamwork principles and the role of teamwork in the achievement of workplace goals
- role of feedback in the achievement of team goals
- problem-solving strategies for use in the achievement of team goals
- techniques for supporting team members in the achievement of workplace outcomes
- organisational policies and procedures for:
  - team interactions

- industry standards and expectations relevant to:
  - teamwork attitudes
  - teamwork ethics.

## Assessment Conditions

Skills must be demonstrated in:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures for team interactions
- workplace tasks for completion
- team members; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -

# SIRXMGT001 Supervise and support frontline team members

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to monitor the work activities and performance standards of team members to ensure organisational and team goals are achieved to an expected standard.

It applies to individuals working in frontline roles in a diverse range of industry sectors and business contexts. They operate with independence and under limited supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Management and Leadership

## Unit Sector

Cross-Sector

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

1. Communicate with the team.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Communicate organisational vision and individual responsibilities clearly to team members.
- 1.2. Inform team members of expected standards of work and behaviours.

- 1.3. Provide team members with relevant information regarding sales targets and team goals.
2. Monitor team performance.
  - 2.1. Follow up allocated tasks and check that standards of performance are met.
  - 2.2. Provide feedback to team members on their performance when required standards are not met.
  - 2.3. Recognise team member's efforts when high, or improved, standards of performance are displayed.
  - 2.4. Determine factors contributing to poor performance and implement solutions for improved performance.
  - 2.5. Recognise training needs of team members and notify relevant personnel as required.
3. Promote team morale.
  - 3.1. Determine team motivators and seek opportunities to improve motivation.
  - 3.2. Create a supportive team environment where all members feel valued.
  - 3.3. Encourage team members to share their views and feedback regarding the workplace and value their input.
  - 3.4. Treat all team members equally and with respect.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ca051b1b-5101-4ec2-ac1c-49699303188d>

# Assessment Requirements for SIRXMG T001 Supervise and support frontline team members

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- supervise a work team, across the duration of two different work shifts, to ensure organisational and team goals are achieved
- demonstrate the following skills during supervision of the above work shifts:
  - communicating responsibilities and expected standards of work to team members
  - implementing techniques to motivate team members and improve team morale
  - providing feedback on team members performance
  - monitoring team members for:
    - adherence to policies and procedures
    - customer service standards
    - productivity
    - team interactions.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- primary role of team supervisors
- organisational performance standards for frontline tasks
- strategies and techniques for:
  - effective communication with team members
  - improving team and individual morale
  - increasing team and individual productivity
  - creating a team environment in the workplace
  - motivation others
  - providing feedback regarding performance
    - constructive feedback
    - recognition of positive performance
- importance of providing team members with an understanding of the commercial impacts of their behaviours and goal attainment.

## Assessment Conditions

Skills must be demonstrated in:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant organisational documentation:
  - performance standards for frontline tasks
  - organisational vision
  - key elements and steps of frontline tasks
- team members; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

# SISCAQU001 Test pool water quality

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to conduct pool water tests, record test results and make visual ongoing checks.

This unit applies to those working as pool attendants or aquatic operators in aquatic environments, such as council or commercially operated aquatic and leisure centres. Work is performed according to public health regulatory requirements, organisational policies and procedures, and relevant legislation.

Work may be carried out under supervision or with some autonomy, depending on the individual situation and job role.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Aquatics

## Unit Sector

Community Recreation

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Conduct pool water tests.
  - 1.1 Complete routine pool water tests according to public health regulatory requirements.
  - 1.2 Interpret test results and compare with public health regulatory requirements.
  - 1.3 Identify and report pool water test irregularities to appropriate personnel for corrective action.
  - 1.4 Respond to contamination incidents within scope of own role.
  - 1.5 Conduct regular sample collection and initiate corrective actions as required.
  - 1.6 Perform regular visual checks of pool water quality, identify issues and initiate corrective actions when required.
2. Record test results.
  - 2.1 Record pool water test results accurately.
  - 2.2 Update swimming pool log according to aquatic facility specifications.

## Foundation Skills

Foundation skills essential to performance in this unit are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

SISCAQU201A Monitor pool water quality

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for SISCAQU001 Test pool water quality

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- test pool water for the following on a minimum of four separate occasions:
  - free chlorine and/or total bromine
  - total chlorine
  - combined chlorine
  - pH
  - total alkalinity
  - cyanuric acid
  - calcium hardness
  - total hardness
  - temperature
- perform routine visual checks for pool water quality.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation and organisational policies and procedures:
  - public health regulatory requirements in the local area
  - health acts
  - infectious diseases regulations
  - dangerous goods act and regulations
  - work health and safety/occupational health and safety
  - environmental legislation
  - local government regulation
  - roles, responsibilities and limitations of own role
- pool water chemistry terms and their meaning:
  - pH levels
  - alkalinity
  - chlorine and or bromine

- temperature
- calcium hardness
- types of pool water tests, their purpose and testing procedures
- visual checks made by pool attendants
- equipment and resources used for testing pool water quality
- responses to contamination incidents.

## Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic facility with an operating pool.

Assessment must ensure use of:

- pool water testing apparatus
- public health regulatory documentation
- organisational policies and procedures.

Assessment activities that allow the individual to:

- conduct regular pool water tests within industry realistic timeframes.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

# SISCAQU003 Maintain aquatic facility plant and equipment

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to make routine checks and complete minor maintenance on aquatic facility plant and equipment.

This unit applies to those working as aquatic operators in various aquatic environments, such as council or commercially operated aquatic and leisure centres. Work is performed according to public health regulatory requirements, organisational policies and procedures, and relevant legislation. Work may be carried out under supervision or with some degree of autonomy, depending on individual situation and job role.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Aquatics

## Unit Sector

Community Recreation

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes

1. Make routine plant and equipment checks.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Inspect plant and equipment according to required schedule.
- 1.2 Conduct safety checks according to manufacturer

- instructions and safety requirements and local regulation.
- 1.3 Interpret and accurately record results of routine equipment tests.
  - 1.4 Document the condition of plant and equipment.
  - 1.5 Identify faults and irregularities and report to appropriate personnel.
2. Complete minor maintenance and repairs.
    - 2.1 Interpret and follow maintenance schedules for plant and equipment.
    - 2.2 Identify and select tools and other resources needed to complete work.
    - 2.3 Make work area safe and erect signs and barriers as required.
    - 2.4 Remove, replace and repair faulty and defective equipment or consumables, within designated responsibility.
    - 2.5 Report faults outside scope of own expertise to appropriate personnel.
  3. Record and report maintenance and repair activities.
    - 3.1 Record repairs and maintenance activities in required format.
    - 3.2 Notify appropriate personnel of faults rectified.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

### SKILLS

### DESCRIPTION

Reading skills to

- interpret technical information in equipment manuals.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISCAQU003 Maintain aquatic facility plant and equipment

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- make routine inspections and complete minor maintenance of the following aquatic facility plant and equipment on a minimum of two occasions according to organisation and local regulatory requirements:
  - circulation plant
  - heating, lighting and ventilation systems
  - power supply and circuits
  - water supply and drainage systems
  - electronic and mechanical operations
  - circuit breakers
  - batteries and fuses
  - electrical hazards.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation and organisational policies and procedures:
  - public health regulatory requirements
  - health acts
  - infectious diseases regulations
  - dangerous goods act and regulations
  - work health and safety/occupational health and safety
  - environmental legislation
  - local government regulation
  - roles, responsibilities and limitations of own role
- organisational policies and procedures for:
  - incident reporting
  - use and care of equipment
  - communication protocols

- risk management
- accurate reporting of faults and irregularities
- timely repair of faulty and defective equipment within designated responsibility
- reporting lines
- public health and safety implications of unmaintained equipment in aquatic facilities
- types of equipment used in aquatic facilities and procedures for:
  - backwash
  - filtration
  - isolation
- resources required for the maintenance and management of aquatic facility plant and equipment and procedures for their safe use:
  - cleaning materials and equipment
  - hand tools
  - record keeping materials
  - spare parts
- safety apparatus used for particular types of aquatic facility equipment and its operation.

## Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic facility.

Assessment must ensure use of:

- aquatic plant, equipment and consumables as specified in the Performance Evidence
- resources to maintain facility and equipment
- organisational policies and procedures
- repairs and maintenance documentation.

Assessment activities that allow the individual to:

- complete inspections, maintenance and repair activities within workplace time constraints.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

# SISCAQU004 Develop and implement pool water maintenance procedures

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to develop, implement, monitor and evaluate systems and procedures for the maintenance of quality pool water in an aquatic recreation facility.

This unit applies to those working autonomously in aquatic leisure centres or community pools, in roles such as program coordinators, swim school coordinators, recreation coordinators or duty managers. Work is performed according to relevant legislation, and organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Aquatics

## Unit Sector

Community Recreation

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes

1. Develop pool water maintenance

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Evaluate pool water quality maintenance and treatment needs according to regulatory framework.

- procedures.
- 1.2 Develop and document systems for pool water maintenance in consultation with appropriate personnel.
2. Implement pool water maintenance procedures.
- 2.1 Provide accurate and current information and instruction to staff about legislative and technical requirements.
- 2.2 Delegate testing and treatment tasks according to staff skills.
- 2.3 Test pool water quality following established procedures.
- 2.4 Interpret results of tests made by self and others and identify where correction is needed.
- 2.5 Calculate the amount of chemicals required to correct chemical imbalances in pool water.
- 2.6 Select and use chemical dosing equipment for treatment of pool water according to manufacturer specifications.
- 2.7 Monitor pool water quality on ongoing basis, identify issues of concern and respond according to agreed procedures.
- 2.8 Identify and respond to emergency situations according to agreed procedures.
- 2.9 Complete accurate documentation
3. Evaluate pool water maintenance procedures.
- 3.1 Assess effectiveness of pool water maintenance procedures against testing and treatment records.
- 3.2 Identify and document potential improvements to maintenance procedures.
- 3.3 Communicate improvements and changes to relevant staff and stakeholders.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret technical content of regulatory requirements.

## Unit Mapping Information

SISCAQU414A Develop pool water maintenance procedures

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for SISCAQU004 Develop and implement pool water maintenance procedures

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop and document pool water maintenance procedures that meet regulatory requirements for at least one aquatic facility that incorporate:
  - monitoring and treatment procedures for:
    - microbiological levels
    - disinfectant levels
    - pH levels
    - clarity levels
  - staff training requirements
  - safety procedures
  - emergency response procedures
  - documentation and reporting
- implement and evaluate pool water maintenance procedures for at least one aquatic facility
- implement emergency procedures in the event of a chemical emergency on at least one occasion.

## Knowledge Evidence

Demonstrated knowledge required to do the task outlined in elements and performance criteria of this unit:

- legislation and industry standards relevant to aquatic facility maintenance with specific focus on local requirements:
  - work health and safety/occupational health and safety
  - dangerous goods act and regulations
  - local government regulations
  - building codes and regulations
- organisational policies and procedures:
  - standard operating conditions and levels
  - work health and safety/occupational health and safety
  - risk assessment and control

- handling of hazardous chemicals
- emergency response
- factors that affect pool water treatment needs in different contexts:
  - condition of aquatic facility
  - location
  - size
  - nature of services provided
  - availability of resources
- characteristics of water quality:
  - pH levels
  - alkalinity
  - chlorine and / or bromine
  - temperature
  - calcium hardness
  - disinfectant levels
- waterborne bacteria and how to enable these to be monitored and controlled safely:
  - pseudomonas
  - aeruginosa
- consultation and communication mechanisms to develop and implement procedural systems
- content considerations for procedure documents:
  - specific testing and treatment procedures
  - safety requirements (chemicals, plant and equipment)
  - emergency response
  - training requirements
  - documentation and reporting requirements
- water treatment processes:
  - routine pool water tests
  - pool water microbiological tests
  - superchlorination
  - shock dosing
  - dechlorination
  - ozonisation or use of sanitizer
  - pool water filtration and recirculation
  - backwashing
  - manual removal of visible contaminants
- features and sources of products for pool water quality maintenance.

---

## Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic facility or environment.

Assessment must ensure use of:

- a pool for which a maintenance program would be developed
- information about pool water quality maintenance to allow the individual to develop a tailored system
- organisational policies and procedures
- incident reporting documentation
- resources to maintain facility and equipment.

Assessment activities that allow the individual to:

- implement and monitor pool quality maintenance over time
- respond to a chemical emergency situation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Aquatics

## Unit Sector

Community Recreation

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes

1. Plan maintenance procedures.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Evaluate operational maintenance needs according to regulatory and business requirements.
- 1.2 Document uses and condition of the aquatic facility plant

- and equipment and identify priorities for action.
- 1.3 Identify potential sources of increased efficiency of the aquatic facility plant and equipment.
  - 1.4 Identify human, physical and financial resources associated with needed maintenance of aquatic facility.
  - 1.5 Integrate maintenance program with asset acquisition and disposal plans.
  - 1.6 Schedule maintenance activities to minimise disruption to facility users and ensure that supplies are available.
  - 1.7 Confirm, document and communicate maintenance procedures and costs according to organisational approval protocols.
2. Implement maintenance procedures.
    - 2.1 Monitor completion of inspection and maintenance schedules.
    - 2.2 Identify and assess failed or unsafe aquatic facility plant and equipment and determine underlying cause within scope of own role.
    - 2.3 Identify and evaluate emergency situations and respond according to local regulatory and organisational procedures.
    - 2.4 Remove defective equipment and/or facilities from operation and complete repairs within designated responsibility.
    - 2.5 Arrange for required repairs to be carried out by qualified and/or licensed contractors and record actions taken.
    - 2.6 Monitor maintenance records and take corrective action as required.
    - 2.7 Communicate maintenance actions to appropriate staff or personnel.
  3. Evaluate maintenance procedures.
    - 3.1 Assess the effectiveness of maintenance systems against short and long-term maintenance requirements.
    - 3.2 Identify and use alternative maintenance methods to maintain cost effectiveness.
    - 3.3 Document and communicate improvements and changes to maintenance systems.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret technical content of regulatory requirements.

# Assessment Requirements for SISCAQU005 Develop and implement aquatic facility maintenance procedures

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop and document maintenance procedures for at least one aquatic facility, incorporating consideration of:
  - circulation plant
  - heating systems
  - lighting or ventilation systems
  - disinfection systems
  - required supplies
  - servicing and repair
  - equipment replacement/redundancy
- implement and evaluate maintenance procedures for at least one aquatic facility.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation and industry standards relevant to aquatic facility maintenance:
  - work health and safety/occupational health and safety
  - dangerous goods act and regulations
  - local government regulations
  - building codes and regulations
- organisational policies and procedures:
  - standard operating conditions and levels
  - work health and safety/occupational health and safety
  - risk assessment and control
  - handling of hazardous chemicals
  - emergency evacuation
- factors affecting the operating cost of an aquatic facility:
  - faulty operation
  - cleaning requirements

- consumables
- replacements (whole or part)
- servicing and repair
- utility costs
- staff costs
- contractor costs
- plant and equipment manufacturer specifications in relation to operation, servicing and repair of:
  - circulation plant
  - heating systems
  - lighting and ventilation systems
  - disinfection systems
  - supplies
- emergency situations that can occur with plant and equipment, and how to respond
- project management techniques:
  - planning and scheduling
  - consultation and communication
  - evaluation.

## Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic facility or environment.

Assessment must ensure use of:

- equipment and plant for which the candidate plans maintenance procedures
- organisational policies, procedures and budget
- equipment operating and maintenance instructions
- resources to maintain facility and equipment.

Assessment activities that allow the individual to:

- implement and monitor maintenance activity over time.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

# SISCAQU014 Operate self-contained breathing apparatus in an aquatic facility

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to identify and respond to emergency situations requiring the use of self-contained breathing apparatus (SCBA).

This unit applies to those working at aquatic facilities where chlorine gas is used. The Australian and New Zealand Safety Standard 2927 requires a SCBA to be kept at any public swimming pool or public place where chlorine is stored or used. The Western Australian Code of Practice for the Design, Construction, Operation, Management and Maintenance of Aquatic Facilities imposes conditions on Pool Operators of Group 1 Swimming Pools to hold this Unit of Competence.

With regard to other states and territories, no licensing, regulatory or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Aquatics

## Unit Sector

Community Recreation

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |  |
|---|--|
| 1. Identify and evaluate emergency situations.            | 1.1 Identify emergencies requiring the use of self-contained breathing apparatus.  |
|   | 1.2 Communicate initial assessment of emergency to appropriate personnel and determine an appropriate response.                        |
| 2. Use self-contained breathing apparatus.                | 2.1 Check self-contained breathing apparatus unit is operational.  |
|   | 2.2 Fit and operate self-contained breathing apparatus unit according to manufacturer instructions.                                    |
|   | 2.3 Connect chlorine gas regulator to cylinder or drum installation.   |
|   | 2.4 Perform leak detection test on chlorine gas regulator.   |
|   | 2.5 Record and report details of routine maintenance.  |
|   | 2.6 Isolate chlorine gas equipment in an emergency situation and notify emergency personnel in line with organisational requirements.  |
| 3. Check and maintain self-contained breathing apparatus. | 3.1 Check self-contained breathing apparatus unit, report faults and take corrective action when required.                             |
|   | 3.2 Clear and store the self-contained breathing apparatus unit after use if no maintenance action required.                           |
|   | 3.3 Remove, replace or repair faulty equipment and defective parts according to manufacturer instructions and scope of responsibility. |
| 4. Complete post-emergency responsibilities.              | 4.1 Record and report details of emergency incident according to organisational procedures.  |
|   | 4.2 Evaluate emergency procedures and recommend any changes required to improve response.  |

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

### SKILLS

### DESCRIPTION

- Reading skills to:
- interpret technical documents such as manufacturer instructions for the use, care and maintenance of self-contained breathing apparatus units.
- Numeracy skills to:
- determine air supply limits of self-contained breathing apparatus units.

## Unit Mapping Information

SISCAQU417A Operate self-contained breathing apparatus in an aquatic facility

# Assessment Requirements for SISCAQU014 Operate self-contained breathing apparatus in an aquatic facility

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify, evaluate and respond to chlorine gas system operations and emergencies requiring the use of self-contained breathing apparatus according to legislative and organisational requirements on at least two occasions.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation and organisational policies and procedures:
  - work health and safety/occupational health and safety
  - codes of practice
  - use and care of equipment
  - communication protocols
  - safety, rescue and emergency procedures
  - incident reporting
  - appropriate responses to potential risk
- safe use, care and routine maintenance of chlorine gas equipment
- properties of chlorine gas
- atmospheric conditions and how they can affect chlorine gas cylinders
- responses to emergency situations involving the release of chlorine gas
- how to use a self-contained breathing apparatus.

## Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic facility where chlorine gas is used.

Assessment must ensure use of:

- chlorine gas system

- a self-contained breathing apparatus
- organisational policies and procedures for risk management
- incident and maintenance reporting documentation.

Assessment must ensure access to:

- first aid facilities and equipment.

Assessment activities that allow the individual to:

- respond to emergency situations in industry required timeframes.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

# SISXEMR001 Respond to emergency situations

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to recognise and respond appropriately in emergency situations, such as those caused by fire, accident or weather. It requires the ability to maintain participant welfare when responding to emergency situations.

This unit applies to individuals who work in a range of roles and settings in the sport, fitness or recreation industries. This includes after-school or holiday-care programs; those assisting with coaching activities, as attendants at sporting grounds or facilities; or undertaking a role in indoor and outdoor recreation activities, such as camps and other guided activities. This unit also applies to those working in aquatic centres, such as instructors, operators or lifeguards.

These individuals undertake work according to relevant legislation and organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Emergency Response

## Unit Sector

Cross-Sector

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Apply workplace emergency procedures.	1.1 Source and interpret relevant organisational policies and procedures. 1.2 Recognise emergency and potential emergency situations. 1.3 Identify personnel responsible for the appropriate area. 1.4 Identify location and use of emergency equipment as required. 1.5 Identify exits and assembly points.
2. Respond to an emergency situation.	2.1 Report workplace emergency situations to appropriate personnel as required. 2.2 Use communication systems during emergency situation. 2.3 Follow instructions from appropriate personnel during the emergency. 2.4 Select and use emergency equipment as required.
3. Coordinate and monitor participant response.	3.1 Convey emergency instructions to participants in the activity. 3.2 Implement strategies for group control. 3.3 Remove participants and other individuals from danger. 3.4 Monitor the condition and location of participants. 3.5 Provide information on developments to participants.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret and follow policies and procedures, and safety signage.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>• identify emergency situations and respond safely and promptly.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• use emergency and communication equipment.</li> </ul>

## Unit Mapping Information

SISXEMR201A Respond to emergency situations

# Assessment Requirements for SISXEMR001 Respond to emergency situations

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- respond to at least five of the following emergency situations, relevant to the individual's current or intended work situation:
  - fire
  - hazardous release
  - bomb threat
  - medical
  - accidents
  - panic and other emotional responses
  - equipment failure
  - lost party member
  - changing environmental conditions
  - activity specific
- use the necessary emergency equipment for each situation in an appropriate manner.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures related to emergency responses:
  - communication lines
  - debrief procedures
  - duty of care
  - emergency procedures
  - environment protection
  - exit and assembly points
  - hazardous substances and dangerous goods
  - industry codes of practice
  - reporting incidents
  - work health and safety/occupational health and safety

- reporting and managing customer incidents
- appropriate responses to emergency situations, as specified in the Performance Evidence
- safe use of emergency equipment required for emergency responses:
  - fire extinguisher
  - fire blanket
  - first-aid kit
  - emergency-signalling devices
  - portable emergency shelter
  - thermal blankets and sheets
  - emergency lighting
  - dehydration equipment
- the role of appropriate personnel in the workplace:
  - work health and safety/occupational health and safety representative
  - human resources personnel
  - team leader
  - manager
  - supervisor
  - fire warden
- role of appropriate personnel in emergency services:
  - police search and rescue
  - state emergency service
  - fire brigade
  - ambulance service
  - land management authorities
  - Australian volunteer coastguard
- role of communication systems:
  - emergency warning and alarm systems
  - hand signals
  - telephone and radio communications
  - whistles
  - flares
- communication techniques for supporting and reassuring customers
- range of formats for and inclusions of incident reports.

## Assessment Conditions

Skills must be demonstrated in:

- a sport, fitness or recreation environment where the individual is exposed to simulated emergencies requiring response. This can be a workplace or simulated environment.

Assessment must ensure access to:

- current industry procedures for reporting and managing emergency situations
- legislation relevant to emergencies:
  - occupational health and safety/work health and safety
  - duty of care
  - environment protection
  - hazardous substances and dangerous goods
  - public health and safety
  - industry codes of practice.

Assessment must ensure use of:

- equipment and resources to ensure adequate response to emergencies relevant to work role and workplace, for example:
  - hoses
  - ladders
  - rescue equipment
  - monitors
  - foam equipment and extinguishers
  - blankets
  - spill kits
  - personal protective clothing and equipment
  - salvage gear
  - first aid and evacuation equipment
- a variety of clients and/or participants requiring an emergency response, clients and participants can be:
  - clients and participants in a sport, fitness or recreation industry workplace who are assisted by the individual during the assessment process or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessment activities that allow the individual to:

- coordinate participant movement during emergency situations
- respond to a range of emergencies in a sport, fitness or recreation environment, within the required, but realistic, timeframe
- use the required emergency equipment to respond to emergency situations.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

## SISXEMR002 Coordinate emergency responses

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to coordinate a response to an emergency situation. The unit focuses on assessing emergency situations, implementing an emergency action plan, and coordinating a prompt and effective response.

This unit applies to individuals designated as safety officers during a specific indoor or outdoor activity at locations such as camp sites, training areas and other outdoor sites; or the warden in a sport, fitness or recreation, such as a community leisure centre, aquatic centre or indoor activities centre.

These individuals undertake work according to relevant legislation and organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Emergency Response

### Unit Sector

Cross-Sector

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |  |
|---|--|
| 1. Coordinate response to emergency reports or signals. | <ul style="list-style-type: none"> <li>1.1 Identify and respond to emergency reports or signals.</li> <li>1.2 Attend, where appropriate, emergency situations and respond accordingly.</li> <li>1.3 Assess emergency situations and report details to designated personnel.</li> <li>1.4 Coordinate emergency response actions.</li> </ul>   |
| 2. Assess the emergency.                                | <ul style="list-style-type: none"> <li>2.1 Conduct an assessment of the situation according to organisational policies and procedures.</li> <li>2.2 Establish an emergency action plan based on assessment of current situation and potential for escalation.</li> <li>2.3 Prioritise actions promptly.</li> </ul>   |
| 3. Coordinate the response.                             | <ul style="list-style-type: none"> <li>3.1 Implement organisational emergency procedures and policies.</li> <li>3.2 Supervise equipment selection suitable to the type of emergency.</li> <li>3.3 Confirm and coordinate the safe use of emergency equipment.</li> <li>3.4 Supervise selection and use of rescue techniques.</li> <li>3.5 Improvise, where necessary, equipment and technique.</li> <li>3.6 Arrange and confirm the safety of staff and participants.</li> </ul> |
| 4. Liaise with relevant authorities.                    | <ul style="list-style-type: none"> <li>4.1 Liaise with members of emergency team and monitor the emergency.</li> <li>4.2 Refer situations beyond the capability of the emergency team to the appropriate authorities for assistance.</li> <li>4.3 Provide information and assistance to authorities.</li> <li>4.4 Control and coordinate, if necessary, emergency evacuation.</li> </ul>   |
| 5. Finalise operational procedures.                     | <ul style="list-style-type: none"> <li>5.1 Complete and maintain an operational log.</li> <li>5.2 Debrief emergency team members.</li> <li>5.3 Evaluate operation of emergency procedures and recommend any changes.</li> <li>5.4 Advise emergency team members to refer media inquiries to the nominated spokesperson.</li> </ul>   |

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

### SKILLS

### DESCRIPTION

- Reading skills to:
- interpret emergency documentation, reports and signals.
- Writing skills to:
- complete accurate and detailed emergency documentation.
- Planning and organising skills to:
- coordinate resources and equipment necessary to respond effectively to emergency situations.
- Self-management skills to:
- review and reflect on own work performance in coordinating emergency responses.

## Unit Mapping Information

SISXEMR402A Coordinate emergency responses

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for SISXEMR002 Coordinate emergency responses

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify and assess at least five of the following emergency situations and coordinate the appropriate response:
  - fire
  - hazardous release
  - bomb threat
  - medical
  - accidents
  - panic and other emotional responses
  - equipment failure
  - lost party member
  - changing environmental conditions
  - activity specific
- two of the above situations must include an assessment that identifies possible escalation and an appropriate response actioned for each.
- confirm and supervise the selection and safe use of emergency equipment for each situation.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation to enable application of legal requirements according to own work role and level of responsibility:
  - duty of care
  - work health and safety/occupational health and safety
  - environment protection
  - hazardous substances
  - public health and safety
- organisational emergency policies and procedures related to coordinating emergency responses:

- communication lines
- debrief procedures
- duty of care
- emergency procedures
- environment protection
- exit and assembly points
- hazardous substances and dangerous goods
- industry codes of practice
- reporting incidents
- work health and safety/occupational health and safety
- appropriate responses to emergency situations, as specified in the Performance Evidence
- location and safe use of rescue and emergency equipment and resources:
  - hoses
  - ladders
  - rescue equipment
  - monitors
  - foam equipment and extinguishers
  - blankets
  - spill kits
  - personal protective clothing and equipment
  - salvage gear
  - first aid and evacuation equipment
- the potential for emergency escalation:
  - spread of fire
  - threat to adjoining areas
  - dangers of explosion
  - loss of communications
  - involvement of additional persons
  - deterioration in environmental conditions
- rescue techniques
- emergency response agencies within the activity area and direct communication channels to enable information about an emergency to be communicated quickly and directly
- factors that impact on emergency situations to enable appropriate contingency planning
- behaviour and characteristics of typical emergencies to enable the development of an action plan to quickly and effectively bring the situation under control.

## Assessment Conditions

Skills must be demonstrated in:

- a sport, fitness or recreation environment where the individual is exposed to simulated emergencies requiring response. This can be a workplace or simulated environment.

Assessment must ensure access to:

- current industry procedures for reporting and managing emergency situations
- legislation relevant to emergencies:
  - work health and safety/occupational health and safety
  - duty of care
  - environment protection
  - hazardous substances and dangerous goods
  - public health and safety
  - industry codes of practice
- equipment and resources to ensure adequate response to emergencies relevant to work role and workplace
- a variety of clients and/or participants requiring an emergency response, clients and participants can be:
  - clients and participants in a sport, fitness or recreation industry workplace who are assisted by the individual during the assessment process or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessment activities that allow the individual to:

- coordinate participant movement during emergency situations
- respond to a range of emergencies in a sport, fitness or recreation environment, within the required, but realistic, timeframe.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

## SISXRSK301A Undertake risk analysis of activities

### Modification History

The release details of this endorsed unit of competency set are in the table below. The latest information is at the top.

Release	Comments
3	Reduction of repetition. No changes to competency outcome.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to undertake a risk-analysis process in relation to an activity and in accordance with an organisation's risk-management policies and procedures. In this context, the risk-analysis process is conducted using structured analysis methodology according to the current Australian and New Zealand Standard.

### Application of the Unit

This unit applies to those who work in a range of roles and settings in the sport, fitness and recreation industry. This may include those working in after-school or holiday-care programs in a range of locations, in coaching activities or those undertaking a role in outdoor recreation activities, such as camps and other guided activities as well as indoor recreation and fitness activities.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
<p>1. Establish the context of the risk analysis.</p>	<p>1.1. Access the organisation's <i>records</i> for the activity and location.</p> <p>1.2. Obtain applicable technical documentation.</p> <p>1.3. Access and clarify <i>risk-evaluation criteria</i>, as determined by the organisation's risk-management policy and plan.</p>
<p>2. Identify risks associated with an activity.</p>	<p>2.1. Identify and document <i>potential sources of risk</i> for the specific activity and location.</p> <p>2.2. Consider and document areas of impact on the organisation.</p> <p>2.3. Consider and document possible causes of risk and hazards.</p>
<p>3. Conduct risk analysis of an activity.</p>	<p>3.1. Determine existing organisational controls for each risk according to <i>Work Health and Safety legislation</i> and industry best practice guidelines and standards.</p> <p>3.2. Assess the likelihood of any given risk turning into an accident, injury or loss.</p> <p>3.3. Assess the consequences of particular incidents in order to determine the degree of emphasis to be placed on the risk.</p> <p>3.4. Analyse the likelihood and consequences of particular risks and <i>classification of risk</i>.</p>
<p>4. Undertake risk assessment of an activity.</p>	<p>4.1. Compare the level of risk established during the analysis process with previously established risk-evaluation criteria.</p> <p>4.2. Rank or prioritise risks for further action, taking account of the wider context of the risk.</p> <p>4.3. Consider the objectives of the organisation and the extent of opportunity which could result from taking the risk.</p> <p>4.4. Accept risks that fall into the low or acceptable</p>

ELEMENT	PERFORMANCE CRITERIA
5. Treat risks associated with an activity.	<p>categories without further treatment.</p> <p>5.1. Identify specific <i>risk-treatment options</i> applicable to risks that fall outside the low or acceptable categories.</p> <p>5.2. <i>Evaluate</i> risk-treatment options according to the organisation's <i>risk-management plan</i>.</p> <p>5.3. Document the activity-specific risk-treatment plan.</p> <p>5.4. Implement the risk-treatment plan prior to and during the activity.</p>
6. Monitor and review the risk management of an activity.	<p>6.1. Document risk analysis, evaluation and treatment options.</p> <p>6.2. Monitor risks and the effectiveness of the risk-treatment plan.</p> <p>6.3. Repeat the risk analysis of the activity regularly to ensure the risk-treatment plan remains relevant.</p> <p>6.4. Make changes to the conduct of an activity, where required, in accordance with review recommendations.</p> <p>6.5. Implement recommendations of the organisation's risk audit in future risk analysis of the activity.</p>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- problem-solving skills to:
  - identify and assess hazards, level of risk and treatment options
  - develop appropriate strategies to manage risks for an activity, within the parameters of the organisational risk-management plan
- planning and organising skills to:
  - develop, implement and monitor a systematic risk-management plan for an activity
  - make changes in response to risk-management plan
- literacy and numeracy skills to:
  - access and analyse required risk-assessment information
  - document a risk-management plan for a specific activity
- communication skills to:
  - contribute to risk-management review

- consult with relevant personnel to implement review recommendations.

### Required knowledge

- organisation risk-management procedures to enable risks associated with activities to be assessed and addressed so that activities can be undertaken safely
- legislation and organisation policies and procedures to enable risk identification and assessment for relevant activities and identification of the legal responsibilities associated with risk-management
- sport, fitness and recreation industry risk-management standards and best practice guidelines for selected activity to inform selection of risk treatment options
- hierarchy of controls to enable the most appropriate and viable risk-treatment options to be applied to activities
- hazards associated with specific activities and locations to enable effective risk-treatment options to be identified for the activity and location
- risk-assessment principles and methodology
- common risk-management terminology, such as risk, risk-management, hazard, risk analysis and risk-management plan
- equipment design limits and effects of operating outside design limits
- risk-evaluation criteria to enable level of risk to be assessed accurately.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- work effectively and professionally within organisation risk-management systems and objectives and comply with legislative requirements to undertake risk assessments that are appropriate for specific activities and locations
- work within parameters of own job role and responsibilities to assess, select and where appropriate resource viable risk-treatment options; and develop and implement a risk-treatment plan consistent with organisation policies and procedures within required timeframes
- document and monitor the risk-treatment plan and contribute to the review of processes and outcomes
- access and clarify information to inform application of risk-analysis procedures.

- 
- Due to issues such as differences in risk associated with different client groups, different equipment, different locations and different environmental conditions, this unit of competency must be assessed through the analysis of risk associated with more than one activity (or one activity with different client groups and or in different locations) in order to ensure consistency of performance over the range statement and contexts applicable to risk analysis of activities.

**Context of and specific resources for assessment** Assessment must ensure:

- development and implementation of a risk-treatment plan for specific activities relevant to the individual's current or intended work environment to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- an environment or facility appropriate to the specific activity
- support staff, locations and resources to implement risk-control measures
- organisation policies and procedures related to risk analysis of activities
- organisation reporting requirements.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of applying organisational risk-analysis procedures to activities and locations
- oral and or written questioning to assess the knowledge of risk-analysis techniques and evacuation skills in relation to risk-assessment methodologies
- third-party reports from a supervisor detailing work performance over multiple applications
- portfolio of records and reports documenting risk-treatment plans and outcomes.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISFFIT304A Instruct and monitor fitness programs
- SISOODR303A Guide outdoor recreation sessions

- SISXCAI303A Plan and conduct sport, and recreation sessions.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Records*** may include:

- equipment maintenance history
- maintenance schedule
- incident reports
- injury statistics or records
- failure reports
- equipment or activity specific policies or procedures.

***Risk-evaluation criteria*** may include:

- legislation
- regulations
- Australian Standards
- organisational policies, aims and objectives
- operating procedures and guidelines.

***Potential sources of risk*** may include:

- physical
- chemical
- environmental
- psychological
- financial, commercial and legal
- behavioural.

***Work health and safety legislation*** include:

- hazards and risks
- emergency response
- consultation and participation.

***Classification of risk*** may include:

- diseases
- economic perils
- environmental
- financial
- human perils
- natural perils
- Work Health and Safety product liability
- professional liability

- Risk-treatment options* may include:
- property damage
  - public liability
  - security
  - technology.
  - avoidance
  - reduction
  - transfer
  - finance
  - acceptance.
- Evaluate* may include:
- extent of risk reduction
  - extent of benefits or opportunities created
  - taking into account the risk-evaluation criteria.
- Risk-management plan* may include:
- objectives
  - equipment and resources
  - contingencies.
- Risk-treatment plan* may include:
- implementation details
  - responsibilities
  - schedules
  - expected outcome
  - budgeting
  - performance measures
  - review process.

## Unit Sector(s)

Cross-Sector.

Risk Management.

## SISXWHS101 Follow work health and safety policies

### Modification History

The release details of this endorsed unit of competency set are in the table below. The latest information is at the top.

Release	Comments
1	New unit. Based on but not equivalent to SISXOHS101A Follow occupational health and safety policies. Changes to address new national Work Health and Safety (WHS) Bill and updated legislation.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to apply general work health and safety requirements in the workplace. It describes generic work health and safety responsibilities applicable to employees without managerial or supervisory responsibilities.

### Application of the Unit

This unit applies to those working under supervision in a range of sport, fitness and recreation environments. This may include those working as assistants in after-school or holiday-care programs in a range of locations, those assisting a responsible person in coaching or officiating activities or those undertaking a supporting role in indoor recreation and fitness activities, as well as outdoor recreation activities, such as camps and other guided activities.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

#### ELEMENT

#### PERFORMANCE CRITERIA

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

- |   |   |
|---|---|
| 1. Work safely.   | 1.1 Identify relevant <i>organisational policies and procedures</i> .<br>1.2 Carry out pre-start participant and equipment checks.<br>1.3 Follow established safety procedures during work activities.<br>1.4 Identify and report existing and potential <i>safety issues</i> to <i>designated persons</i> .<br>1.5 Identify and implement workplace procedures and work instructions for minimising risks.<br>1.6 Report work-related incidents and accidents to supervisor. |
| 2. Contribute to the management of work health and safety issues. | 2.1 Raise work health and safety issues with supervisor.<br>2.2 Contribute to workplace meetings and other consultative processes for work health and safety management in the workplace.<br>2.3 Make suggestions for improving work health and safety practices.   |
| 3. Minimise risks to personal and public safety.                  | 3.1 Identify <i>situations</i> that may endanger the personal safety of self, staff and other clients and implement action within scope of responsibility.<br>3.2 Complete incident report documentation.<br>3.3 Take action to eliminate workplace <i>hazards</i> or reduce risks.<br>3.4 Identify damaged items and equipment and notify supervisor.  |

### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

#### Required skills

- self-management skills to identify and meet work health and safety responsibilities
- communication skills to:
  - report actual or potential hazards and incidents
  - participate in workplace processes to manage work health and safety
- problem-solving skills to:

- identify unsafe work practices and hazards
- apply strategies for a safe work environment
- language and literacy skills to identify and interpret safety signs and symbols and complete incident reports.

### **Required knowledge**

- organisational policies and procedures to enable:
  - understanding of rights and responsibilities of employers and employees
  - conduct of safe work activities and reporting of unsafe practices or equipment
- consultative processes to manage and monitor health and safety issues to enable active participation in maintaining a safe workplace
- work health and safety consultative processes to enable contribution to a safe workplace
- potential hazards in the workplace
- commonly used hazard signs and safety symbols.

## **Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Overview of assessment**

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the ability to:

- access and interpret relevant workplace safety information to carry out all work tasks safely and responsibly according to organisational policies and procedures and legislative requirements
- address safety issues within the limits of own role and responsibility and identify, clarify and report safety issues outside area of responsibility to appropriate personnel, including actual and potential hazards
- contribute to participative arrangements for the management of the organisational work health and safety program.

#### **Context of and specific resources for assessment**

Assessment must ensure:

- application of general work health and safety requirements relevant to the individual's current or intended work environment on multiple occasions to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- a venue, facility or location with appropriate equipment and activity that reflects specific industry sector requirements and expectations
- organisational consultative structures, including key health and safety staff and equipment and or aids to carry out tasks safely
- documentation, such as work health and safety policies and procedures.

### **Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of applying safe work practices within work environment
- oral and or written questioning to assess knowledge of organisational WHS procedures
- portfolio of incident or accident reports submitted and or reported to relevant personnel
- third-party reports from a supervisor detailing work performance.

### **Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISXEMR201A Respond to emergency situations.

## **Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

***Organisational policies and procedures*** may include:

- chemical handling
- duty of care
- emergency procedures
- first aid
- general maintenance
- hazard identification
- health and hygiene
- issue resolution
- manual handling
- work health and safety
- personal safety

*Safety issues* may include:

- reporting procedures
- security
- stress management
- use of personal protective equipment
- use of motor vehicles
- waste disposal.
- environmental conditions
- slippery surfaces
- manual handling and lifting
- toxic or hazardous materials
- industrial gases
- body fluids
- fire
- contaminated waste
- participants with infectious diseases
- sharps
- chemical spills
- dust and vapours
- noise, light and energy sources
- hazardous equipment
- vehicles
- unsafe work practices
- medical emergencies (e.g. falls, bleeding, seizures, fainting, collapses, panic attack, psychosis)
- workplace stress.

*Designated persons* may include:

- designated health and safety officers
- health and safety representatives
- supervisors
- managers
- team leaders
- other persons nominated or authorised by the organisation or industry.

*Situations* may include:

- verbal abuse
- physical aggression
- emergencies.

*Hazards* may include anything which is a source of:

- potential harm in terms of human injury or ill health
- damage to property
- damage to the environment.

## TAEASS301 Contribute to assessment

### Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

### Application

This unit describes the skills and knowledge required to contribute to the assessment process.

It applies to a person with technical or vocational expertise who is in a supervisory or mentoring/coaching work role, and for whom collecting the evidence for assessment is an adjunct to principal work responsibilities. The unit applies to those involved in collecting evidence for assessment against units of competency or accredited courses.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Assessment

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Clarify role and responsibilities in the assessment process	<p>1.1 Discuss and confirm the purpose of the assessment with relevant people</p> <p>1.2 Discuss and confirm benchmarks for assessment with the qualified assessor</p> <p>1.3 Access, read and clarify assessment plan with the qualified assessor</p> <p>1.4 Discuss and agree with the qualified assessor specific responsibilities in gathering evidence, and the types of evidence to be gathered</p>
2. Confirm organisational arrangements for evidence gathering	<p>2.1 Access and confirm relevant assessment system policies and procedures, organisational, legal and ethical requirements, and other relevant advice on assessment</p> <p>2.2 Clarify the nominated assessment tools and methods for collecting evidence with the qualified assessor, to ensure that the procedures to be followed, and the instruments to be used are clear</p> <p>2.3 Discuss and confirm with the relevant people the assessment context, including the candidate's characteristics and any need for reasonable adjustments</p> <p>2.4 Confirm and arrange resource requirements in consultation with relevant people</p>
3. Collect evidence in accordance with the assessment plan	<p>3.1 Explain the assessment process to the candidate, including the different responsibilities of the parties involved, and refer any candidate issues or concerns to the qualified assessor, prior to undertaking assessment activities</p> <p>3.2 Use assessment instruments to gather quality evidence within the available time and resources, according to organisational, legal and ethical requirements</p>
4. Record and report findings	<p>4.1 Organise and provide evidence to the qualified assessor in a format suitable for analysis according to the assessment system's policies and procedures</p> <p>4.2 Actively seek feedback from the qualified assessor on whether evidence-gathering activities meet the principles of assessment, and whether the evidence collected meets the rules of evidence</p> <p>4.3 Document areas for improvement in collecting evidence for future assessment activities</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Learning	4.2	<ul style="list-style-type: none"> <li>Seeks feedback to build knowledge to improve process and professional practice</li> </ul>
Reading	1.3, 2.1, 2.2, 2.4, 3.2	<ul style="list-style-type: none"> <li>Sources and interprets procedural, and compliance information</li> </ul>
Writing	1.1, 1.2, 1.3, 2.1, 2.3, 2.4, 3.2, 4.1, 4.3	<ul style="list-style-type: none"> <li>Completes workplace documentation accurately using the appropriate language</li> </ul>
Oral Communication	1.1, 1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 2.4, 3.1	<ul style="list-style-type: none"> <li>Communicates information and process requirements clearly, based on techniques appropriate to the audience and environment</li> <li>Uses appropriate speaking and listening techniques to obtain specific information, and to support the assessment process</li> </ul>
Navigate the world of work	2.1, 2.2, 3.2, 4.1	<ul style="list-style-type: none"> <li>Accesses, confirms and takes responsibility for adherence to policies, procedures, and legal and ethical requirements</li> </ul>
Interact with others	4.2	<ul style="list-style-type: none"> <li>Asks questions to clarify understanding, and seeks feedback and further information</li> </ul>
Get the work done	3.1, 4.1	<ul style="list-style-type: none"> <li>Organises work according to defined requirements, taking some responsibility for decisions regarding the format of information</li> </ul>

# Assessment Requirements for TAEASS301 Contribute to assessment

## Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- clarifying the role to be taken during the assessment
- clarifying the assessment plan with the qualified assessor, including agreement about:
  - what evidence will be collected
  - how the evidence will be collected
- carrying out a minimum of three evidence-gathering activities and, on each occasion:
  - document evidence in a clear and concise manner
  - document feedback from others involved in the assessment

reporting findings to the qualified assessor, including an explanation of how the assessment meets the rules of evidence on each of the three occasions.

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- competency-based assessment
- the principles of assessment
- the rules of evidence
- the different purposes of assessment
- the diversity of assessment contexts
- different types of evidence
- evidence-gathering methods
- the purpose and features of assessment tools, and assessment plans

- potential barriers and processes relating to evidence-gathering procedures, and assessment processes
- the organisational policies and procedures relevant to this unit of competency.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to qualified assessors for consultation.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## TAEDEL301 Provide work skill instruction

### Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

### Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one's own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations,

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Delivery and facilitation

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise instruction and demonstration	1.1 Gather information about learner characteristics and learning needs 1.2 Confirm a safe learning environment 1.3 Gather and check instruction, demonstration objectives, and seek assistance if required 1.4 Access and review relevant learning resources and learning

ELEMENT	PERFORMANCE CRITERIA
	<p>materials for suitability and relevance, and seek assistance to interpret the contextual application</p> <p>1.5 Organise access to necessary equipment or physical resources required for instruction and demonstration</p> <p>1.6 Notify learners of details regarding the implementation of the learning program and/or delivery plan</p>
2. Conduct instruction and demonstration	<p>2.1 Use interpersonal skills with learners to establish a safe and comfortable learning environment</p> <p>2.2 Follow the learning program and/or delivery plan to cover all learning objectives</p> <p>2.3 Brief learners on any workplace health and safety (WHS) procedures and requirements prior to, and during, training</p> <p>2.4 Use delivery techniques to structure, pace and enhance learning</p> <p>2.5 Apply coaching techniques to assist learning</p> <p>2.6 Use communication skills to provide information, instruct learners and demonstrate relevant work skills</p> <p>2.7 Provide opportunities for practice during instruction and through work activities</p> <p>2.8 Provide and discuss feedback on learner performance to support learning</p>
3. Check training performance	<p>3.1 Use measures to ensure learners are acquiring, and can use, new technical and generic skills and knowledge</p> <p>3.2 Monitor learner progress and outcomes in consultation with the learner</p> <p>3.3 Review relationship between the trainer/coach and the learner, and adjust to suit learner needs</p>
4. Review personal training performance	<p>4.1 Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement</p> <p>4.2 Maintain, store and secure learner records, according to organisational and legal requirements</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Learning	4.1	<ul style="list-style-type: none"> <li>Reflects on practice to improve</li> </ul>
Reading	1.1, 1.3, 1.4, 2.2	<ul style="list-style-type: none"> <li>Sources and interprets processes and procedures, learning resources and information relevant to providing a work instruction and delivery</li> </ul>
Writing	1.4, 1.6, 2.3, 2.6, 2.8, 3.2, 4.1, 4.2	<ul style="list-style-type: none"> <li>Accurately maintains learner records and documentation appropriate to the learning context and audience</li> </ul>
Oral Communication	1.1, 1.6, 2.3, 2.4, 2.6	<ul style="list-style-type: none"> <li>Uses appropriate communication strategies to engage, build rapport, provide instruction, monitor progress and provide feedback to individuals or groups</li> </ul>
Interact with others	1.2, 1.3, 2.1, 2.5, 2.8, 3.2	<ul style="list-style-type: none"> <li>Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes</li> <li>Asks questions in order to clarify understanding, and to provide and seek feedback</li> <li>Builds rapport to establish effective working relationships and to achieve effective outcomes</li> </ul>
Get the work done	1.1-1.6, 2.1-2.8, 3.1-3.3, 4.1, 4.2	<ul style="list-style-type: none"> <li>Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes</li> <li>Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches</li> </ul>

# Assessment Requirements for TAEDEL301 Provide work skill instruction

## Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
  - different learning objectives
  - a range of delivery techniques and effective communication skills appropriate to the audience.

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
  - risk controls for the specific learning environment.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## TAEDEL404 Mentor in the workplace

### Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

### Application

This unit describes the skills and knowledge required to establish and develop a professional mentoring relationship with an individual in a workplace.

It applies to workplace supervisors or other work colleagues who work under limited supervision and who have responsibility for mentoring one or more individuals in the workplace. This may include, but is not limited to, those who mentor an apprentice or trainee employed by, or undertaking a work placement within, an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Delivery and facilitation

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop a mentoring plan	1.1 Identify scope and boundaries of the mentoring relationship according to organisational procedures 1.2 Document mentoring plan in accordance with organisational requirements 1.3 Establish ground rules and negotiate realistic expectations 1.4 Establish and maintain confidentiality of the relationship in

ELEMENT	PERFORMANCE CRITERIA
	accordance with legislation, policy and procedures
2. Facilitate mentoring relationship	<p>2.1 Develop learner's confidence, self-esteem, respect and trust in the mentoring relationship</p> <p>2.2 Share personal experiences and knowledge with the person being mentored according to agreed objectives</p> <p>2.3 Support the person being mentored to develop and use skills in problem solving and decision making</p> <p>2.4 Use personal and professional networks to assist the person being mentored</p> <p>2.5 Provide information, and guidance to enhance engagement in the workplace</p> <p>2.6 Use techniques for resolving differences without damaging the relationship, and obtain assistance according to organisational policy and procedures</p>
3. Monitor mentoring relationship	<p>3.1 Provide planning assistance and guidance as requested by the person being mentored in a form and style to suit their requirements</p> <p>3.2 Provide feedback to the person being mentored on progress towards achieving the expectations and goals of the mentoring process</p> <p>3.3 Recognise and discuss changes in the mentoring relationship with appropriate stakeholders</p> <p>3.4 Negotiate and manage closure of the mentoring arrangement once objectives have been met</p>
4. Evaluate effectiveness of mentoring	<p>4.1 Establish and discuss benefits gained from the mentoring process</p> <p>4.2 Reflect on and articulate the personal benefits gained from providing mentoring</p> <p>4.3 Identify and report the outcomes of the mentoring arrangement and the benefits to the organisation according to organisational policy and procedures to improve the mentoring system or program</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.4	<ul style="list-style-type: none"> <li>Sources and interprets texts relevant to mentoring context, including organisational policies and learner information</li> </ul>
Writing	1.1, 1.3, 2.5, 3.1, 3.2, 4.3	<ul style="list-style-type: none"> <li>Develops content and documents information relevant to mentoring plan</li> </ul>
Oral Communication	2.4, 3.3, 4.1, 4.2, 4.3	<ul style="list-style-type: none"> <li>Uses appropriate communication techniques to build rapport, trust, engagement and provide guidance and feedback</li> </ul>
Navigate the world of work	1.1, 1.4, 2.6, 4.3	<ul style="list-style-type: none"> <li>Follows legislative requirements, organisational protocols, policies and procedures in workplace mentoring</li> </ul>
Interact with others	1.2, 2.1-2.3, 2.5, 2.6, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> <li>Builds rapport using collaboration with others to achieve joint outcomes and effective interaction</li> <li>Provides mentoring and role modelling to achieve agreed outcomes</li> <li>Cooperates and consults with others to clarify understanding and seek feedback</li> </ul>
Get the work done	1.1-1.4, 2.1-2.6, 3.1-3.4, 4.1-4.3	<ul style="list-style-type: none"> <li>Plans, organises and completes work according to defined requirements taking responsibility for decisions and sequencing tasks to achieve efficient outcomes</li> <li>Identifies and responds to problems, considering options for different approaches</li> </ul>

# Assessment Requirements for TAEDEL404 Mentor in the workplace

## Modification History

Release	Comments
Release1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, including:

- preparing a mentoring plan between the mentor and mentee that sets out clear objectives for a mentoring relationship that will last at least one year
- facilitating at least three mentoring sessions
- documenting information on sessions, including comments and notes from both mentor and mentee.
- 

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring, including training contracts and responsibilities of employer, registered training organisation (RTO) and funding body where they exist
- mentoring methodologies and strategies
- learning theories in relation to mentoring
- strategies for working with a mentee including encouraging self reflection, confidence and the building of rapport
- acceptable behaviour in the mentoring relationship
- equal employment opportunity, equity and diversity principles
- how a mentor can support the mentee's employer to meet its WHS obligations for the mentee.
-

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to:

- documentation of any existing training plan or contract if applicable to the mentoring relationship.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## TLIB0002 Carry out vehicle inspection

### Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

### Application

This unit involves the skills and knowledge required to carry out an inspection of a commercial vehicle in accordance with relevant workplace procedures.

It includes conducting routine checks, cleaning vehicles, ensuring all specified safety requirements are met and ensuring vehicles are operational according to workplace procedures.

Work is performed with limited or minimum supervision, and with duty of care for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Competency Field

B – Equipment Checking and Maintenance

### Unit Sector

Not applicable.

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### 1 Check and clean vehicle

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

**1.1** Vehicle hazards are identified and required action is taken to minimise, control or eliminate identified hazards

**1.2** Visual check of internal and external condition of

vehicle is carried out and relevant documentation is completed in accordance with workplace procedures

- 1.3 Pre-operational inspections and checks are conducted in accordance with workplace procedures
  - 1.4 Associated equipment is tested to ensure it functions correctly to manufacturer specifications and workplace procedures
  - 1.5 Operational checks are carried out after engine is started to identify possible defects
  - 1.6 Shut-down checks are carried out to identify possible defects
  - 1.7 Warning systems (instruments and gauges) are checked to ensure they are operational in accordance with manufacturer specifications and workplace procedures
  - 1.8 Vehicle monitoring device including In Vehicle Monitoring System (IVMS) and telematics is logged on/off as required in accordance with manufacturer instructions and workplace procedures
  - 1.9 Vehicle is cleaned in accordance with work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) and environmental requirements and workplace procedures
- 2 Complete documentation**
- 2.1 Vehicle defects are identified and diagnosed, and appropriate action is taken to report to relevant person/s or remedy identified defects as required by workplace procedures
  - 2.2 Records of inspection are updated and recommended repairs from relevant person/s are documented in accordance with workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

## **Unit Mapping Information**

This unit replaces and is equivalent to TLIB2004 Carry out vehicle inspection.

## **Links**

Companion Volume Implementation Guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

# Assessment Requirements for TLIB0002 Carry out vehicle inspection

## Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- carrying out vehicle inspections in accordance with workplace and manufacturer requirements including:
  - conducting engine oil checks
  - conducting coolant level checks
  - conducting hydraulic oil and other fluid checks
  - conducting globe replacement procedure
  - conducting tyre checks for wear
  - checking of gauges, warning lights, screen displays and buzzers to confirm operational status
- communicating effectively with others when reporting identified problems, faults or malfunctions
- completing documentation related to routine vehicle inspection clearly and concisely
- reading and interpreting relevant instructions, procedures, information and manuals
- reporting and rectifying identified problems, faults or malfunctions promptly
- visual checking for defects to internal and external of vehicle
- operating relevant cleaning equipment and using relevant cleaning supplies
- completing relevant workplace documentation
- applying working at height procedures during cleaning of vehicles
- applying relevant work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH), environmental requirements and workplace procedures
- using relevant Personal Protective Equipment (PPE) while cleaning.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- duty of care requirements for routine vehicle inspections

- principles of systems operation on commercial vehicles
- problems that may occur during routine vehicle inspections and appropriate actions and solutions
- relevant reporting and documentation requirements for carrying out vehicle inspections
- relevant WHS/OHS/OSH and environmentally sustainable practices
- workplace procedures and manufacturer specifications for:
  - pre-operational inspection of a commercial vehicle
  - visual inspection
  - checking warning systems
  - associated equipment operation
  - function of gauges, warning lights and devices
  - In Vehicle Monitoring System (IVMS) and telematics
  - defect reporting
- safe use of vehicle cleaning supplies
- safe operation of cleaning equipment
- Safety Data Sheets (SDS) and relevant manufacturer specifications for cleaning products
- WHS/OHS/OSH and environmental requirements for waste disposal.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

# TLIC1051 Operate commercial vehicle

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Application

This unit involves the skills and knowledge required to maintain the safety of and to operate, a commercial vehicle across a variety of job roles.

It includes monitoring traffic and associated equipment, managing vehicle condition and performance, and effectively managing hazardous situations.

Driving must be carried out in accordance with relevant state/territory roads and traffic authority licence requirements and regulations.

Driving is performed with limited supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

Licensing, legislative, regulatory or certification requirements are applicable to this unit. Provisional car licence must be held prior to commencement of this unit of competency.

## Pre-requisite Unit

Not applicable.

## Competency Field

C – Vehicle Operation

## Unit Sector

Not applicable.

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
<b>1 Operate commercial vehicle</b>	1.1 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage
	1.2 Driving hazards are identified and/or anticipated and avoided
	1.3 Vehicle lights and indicators are used in accordance with traffic regulations and manufacturer instructions
	1.4 Vehicle is secured in accordance with manufacturer specifications, traffic regulations and workplace procedures
	1.5 Appropriate procedures are followed in a driving emergency
	1.6 Appropriate low-risk driving behaviour is displayed towards other road users in accordance with workplace procedures
	1.7 Vehicle is positioning and moved conveniently and safely for loading and unloading in accordance with regulatory and workplace instruction
	1.8 All associated equipment is operated in accordance with manufacturer and workplace instructions
<b>2 Monitor traffic and road conditions</b>	2.1 Most efficient route of travel is taken by monitoring and anticipating traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
	2.2 Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities
<b>3 Monitor and maintain vehicle performance</b>	3.1 Vehicle performance and safety is maintained through vehicle pre-operational inspections and
	3.2 Performance and efficiency of vehicle operation is monitored during use
	3.3 Vehicle is driven in a manner that incorporates eco driving principles
	3.4 Defective or irregular performance or malfunctions are repaired as a minor repair or reported to appropriate authority
	3.5 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to TLIC1051A Operate commercial vehicle.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for TLIC1051 Operate commercial vehicle

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes
- completing relevant documentation
- demonstrating low-risk driving behaviours
- monitoring and anticipating traffic hazards and taking appropriate action
- monitoring performance of vehicle and taking appropriate action
- operating a commercial vehicle and its associated equipment
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures, information and signs .

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on drivers
- differences between transmission types
- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions, and related action that can be taken
- fatigue management strategies including on-road techniques

- lifestyles that promote effective long-term fatigue management
- low-risk driving behaviours
- map reading and road navigation techniques
- pre-operational checks carried out on vehicle and related action
- principles of stress management when driving a vehicle
- procedures to be followed in a driving emergency
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental/emissions procedures and regulations
- relevant state/territory road traffic authority road rules, regulations, permit and licence requirements
- vehicle controls, instruments and indicators and their use
- vehicle handling procedures
- workplace driving and operational instructions.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

## TLIC2025 Operate four wheel drive vehicle

### Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

### Application

This unit involves the skills and knowledge required to operate a four wheel drive vehicle safely in a range of conditions in accordance with the relevant state/territory legislated roads and traffic licence requirements.

It includes driving a four wheel drive vehicle on roads, traversing gradients, ascending and descending steep gradients, and operating in rugged terrain. It also includes using vehicle equipment/controls and completing pre- and post-operational checks.

Recognised driver's licence or provisional car licence must be held prior to commencing this unit of competency.

Driving involves the application of four wheel drive vehicle operating principles and procedures to maintain the safety and operation of a four wheel drive vehicle across a variety of on-road and off-road contexts.

Driving is performed with limited supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Competency Field

C – Vehicle Operation

### Unit Sector

Not applicable.

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### 1 Operate four wheel drive vehicles on roads

- 1.1 Pre-start checks of vehicle and equipment are carried out in accordance with manufacturer specifications and roadworthy requirements
- 1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
- 1.3 Tyres are checked for pressure suitable for terrain and/or changed in accordance with manufacturer and workplace procedures
- 1.4 Vehicle fuel, water and any ancillary equipment are checked before starting vehicle journey in accordance with manufacturer and workplace procedures
- 1.5 Loads are secured in accordance with workplace and legislative requirements
- 1.6 Vehicle is driven on-road and off-road in accordance with legislative and workplace requirements, at appropriate operating speeds for road or track conditions and hazards
- 1.7 Vehicle equipment/controls are set and operated in accordance with manufacturer instructions for operation in surrounding terrain
- 1.8 Road conditions are constantly monitored, negotiated and appropriate operations and control techniques are used to ensure safe vehicle operation and no injury to people or damage to vehicle, tracks or loads is sustained
- 1.9 Vehicle is parked and shut down in accordance with workplace and manufacturer requirements

#### 2 Operate vehicle on, or across a gradient

- 2.1 Intended vehicle path is inspected prior to negotiating gradient
- 2.2 Loads are secured in accordance with workplace and legislative requirements
- 2.3 Appropriate gear and/or range are selected and engine revolutions are maintained to ensure constant traction

- 2.4 Vehicle is driven on-road and off-road in accordance with legislative and workplace requirements at appropriate speeds for conditions and gradient hazards
  - 2.5 Vehicle equipment/controls are set and operated in accordance with manufacturer instructions for operation in, on or across a gradient
  - 2.6 Gradient conditions are constantly monitored, and appropriate operations and control techniques are used to ensure safe vehicle operation and no injury to people or damage to vehicle, tracks or loads is sustained
- 3 Operate vehicle ascending a steep gradient**
- 3.1 Intended vehicle path is inspected prior to negotiating ascent
  - 3.2 Appropriate gear and/or range are selected to ascend grade, and engine revolutions are maintained to ensure constant traction
  - 3.3 Vehicle equipment/controls are set and operated in accordance with manufacturer instructions for operation while ascending a steep gradient
  - 3.4 Stall recovery techniques are applied in accordance with manufacturer and workplace procedures
  - 3.5 Ascent conditions are constantly monitored, and appropriate operations and control techniques are used to ensure safe vehicle operation and no injury to people or damage to vehicle, tracks or loads is sustained
- 4 Operate vehicle descending a steep gradient**
- 4.1 Intended vehicle path is inspected prior to negotiating gradient
  - 4.2 Appropriate gear and/or range are selected to descend grade, and engine revolutions are maintained to ensure constant traction
  - 4.3 Vehicle equipment/controls are set and operated in accordance with manufacturer instructions for operation while descending a steep gradient
  - 4.4 Stall recovery techniques are applied in accordance with manufacturer and workplace procedures
  - 4.5 Descent conditions are constantly monitored, and appropriate operations and control techniques are used to ensure safe vehicle operation and no injury to people or damage to vehicle, tracks or loads is sustained

- 5 Operate vehicle in rugged terrain**
- 5.1 Intended vehicle path is inspected prior to negotiating rugged terrain
  - 5.2 Appropriate gear and/or range are selected to negotiate rugged terrain and engine revolutions are maintained to ensure constant traction
  - 5.3 Vehicle equipment/controls are set and operated in accordance with manufacturer instructions for operation in surrounding terrain
  - 5.4 Vehicle chains are fitted in accordance with manufacturer instructions and environmental conditions, as required
  - 5.5 Vehicle load is inspected, positioned and secured to maximise traction for four wheel driving
  - 5.6 Rugged conditions are constantly monitored, and appropriate operations and control techniques are used to ensure safe vehicle operation and no injury to people or damage to vehicle, tracks or loads is sustained
- 6 Complete operations**
- 6.1 Vehicle is parked and shut down in accordance with workplace and manufacturer requirements
  - 6.2 Faults or malfunctions are corrected and/or reported in accordance with manufacturer and workplace requirements
  - 6.3 Vehicle and equipment are cleaned and stored after use in accordance with workplace requirements
  - 6.4 Documentation and journey reports are completed in accordance with workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to TLIC2025A Operate four wheel drive vehicle.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

# Assessment Requirements for TLIC2025 Operate four wheel drive vehicle

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- cleaning and storing vehicles and equipment
- communicating effectively with others
- completing relevant documentation
- conducting pre-start checks
- demonstrating low-risk driving behaviours
- identifying and correcting minor operational faults
- identifying job hazards and taking required action
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures, information and signs
- using and adjusting vehicle equipment/controls as required:
  - brakes
  - electronic traction control
  - freewheeling hubs
  - gears/range
  - heating and cooling systems
  - jacks
  - tyres
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- documentation and record keeping requirements
- effect of hard surface driving (such as transmission wind up) on a 4x4 system
- effect of loads while negotiating a gradient
- effect on centre of gravity of changing fluid loads
- efficient driving techniques and safe driving strategies
- environmental impact of 4x4 driving
- hazards and risks associated with traversing cross gradients
- hazards that may exist when operating a four wheel drive vehicle in on-road and off-road situations, and action to minimise, control or eliminate identified hazards
- low risk driving behaviours:
  - creating and maintaining crash avoidance space
  - protecting crash avoidance space
  - road rules and directions
  - space and time management
- pre- and post-operational checks and related action
- problems that may occur when operating a four wheel drive vehicle, and action that can be taken to report or resolve the problems
- relevant land management procedures and regulations
- relevant state/territory road traffic authority road rules, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- vehicle equipment/controls, instruments and indicators, and their use
- vehicle handling procedures and techniques for a range of road and track conditions
- workplace procedures for operating a four wheel drive vehicle in both on-road and off-road situations.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions in a four wheel drive vehicle typical of that used in industry.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

## TLIC3036 Apply safe car driving behaviours

### Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

### Application

This unit involves the skills and knowledge required for higher-order safe driving. This unit applies to driving instructors required to apply safe driving behaviours.

This includes higher-order skills involving broad cognitive, technical, communication and vehicle management. It also requires knowledge about hazard perception, risk control and safe driving behaviour, judgement, decision making and multi-tasking, that builds on driver licence requirements across a range of vehicles and driving situations.

Safe car driving behaviours are applied without supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Competency Field

C – Vehicle Operation

### Unit Sector

Not applicable.

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

**1 Apply relevant legislation applicable to safe car driving**

- 1.1 Current road rules and regulations are identified, interpreted and applied
- 1.2 Road signs, signals and markings are identified and complied with in safe car driving activities
- 1.3 Purpose of road rules and traffic safety laws in ensuring safe and efficient regulation of traffic flow, is interpreted and applied when driving a vehicle

**2 Apply safe car driving behaviours**

- 2.1 Requirements for safe car driving are applied
- 2.2 Importance of attitude in complying with road rules in relation to level of risk faced by a driver, is applied when driving a car
- 2.3 Importance of road sharing principles are applied when driving a car
- 2.4 Importance of motivation to drive safely is interpreted and explained
- 2.5 Principles of proactive driving methods, that maintain one's driving at a low risk, are identified and applied
- 2.6 Contributing risk factors to potential crash risks, are identified and are taken into consideration

**3 Apply low-risk driving strategies**

- 3.1 Contributing risk factors to forming opinions and beliefs about low-risk driving are applied
- 3.2 Human factors that can influence low-risk driving behaviour are outlined
- 3.3 Low-risk driving strategies are applied and their rationale is explained

**4 Explain risk factors that contribute to accidents when driving a car**

- 4.1 Contributing risk factors to accidents are recognised
- 4.2 External factors that could lead to accidents are outlined
- 4.3 Internal factors that could lead to accidents are outlined
- 4.4 Consequences of accidents in relation to relevant traffic laws and physical, financial and psychological costs to the individual and society, are explained
- 4.5 Functions of vehicle operations and controls, and how to

- recover control of a vehicle are explained
- 5 Apply operation and car control skills**
- 5.1 Appropriate action is taken to respond to hazardous situations
  - 5.2 Principles of braking are applied to a high level of technical competence
  - 5.3 Principles of steering are applied to a high level of technical competence
  - 5.4 Slow speed manoeuvres are carried out to a high level of technical competence
  - 5.5 Vehicle is operated and controlled to a high level of technical competence

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to TLIC3036A Apply safe car driving behaviours.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

# Assessment Requirements for TLIC3036 Apply safe car driving behaviours

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in vehicles, including their operations, controls and safety devices
- applying correct selection and application of a braking system
- applying correct steering control techniques in a variety of driving conditions
- applying high-level road craft skills
- applying road rules
- carrying out pre-operational checks and related action on vehicles
- complying with relevant legislative, regulatory and workplace procedures
- dealing with adverse road conditions while driving a vehicle
- evaluating risk and consequences of own driving actions
- following operational instructions
- identifying, monitoring and anticipating traffic hazards and taking appropriate and timely action
- identifying risk factors that might impact on driving behaviours and implementing appropriate low-risk driving response measures
- implementing contingency plans
- implementing work health and safety (WHS)/occupational health and safety (OHS) requirements and practices when:
  - conducting prestart-up checks
  - identifying hazards
  - minimising, controlling or eliminating hazards
  - observing and interpreting driver behaviour that may put people at risk
- maintaining situational awareness
- making necessary adjustments to suit driving environment
- managing speed and space while driving a vehicle
- manoeuvring a vehicle at slow speed
- monitoring traffic and road conditions and reacting appropriately
- monitoring vehicle performance and taking appropriate action as required

- negotiating complex traffic and road conditions
- reading and interpreting relevant instructions, road rules, procedures, jurisdictional requirements, information and signs
- selecting and using vehicle operations, controls and safety devices to enable safe car driving
- working collaboratively with other road users when driving a vehicle.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- cognitive factors that may influence performance in car driving activities
- consequences of vehicle accidents
- correct application of braking techniques
- critical factors underpinning high-level driving technical competence
- factors contributing to accidents:
  - age, experience, drugs, alcohol, medication, road conditions, fatigue and time of day
  - driver values, emotions, limitations and personal needs
  - emotional factors, driver's own behaviours and driver's operation at high levels of risk
  - speed, space, vision, road conditions, vehicle condition and environmental conditions
- low-risk driving behaviours including:
  - creating and maintaining crash avoidance space
  - protecting crash avoidance space
  - obeying road rules, safety information and directions
- observation and scanning techniques
- procedures for identifying and responding to hazards
- purpose and benefits of road rules enforcement for safe car driving
- rationale for ongoing development of traffic regulations to meet changing traffic conditions
- relevant road rules and traffic safety legislation including:
  - alcohol and drugs
  - driver licensing
  - vehicle registration
  - vehicle standards
- relevant laws and penalties for demerit point offences, such as driving while unlicensed, disqualified or under the influence of drugs or alcohol
- road signs, signals and markings
- sources and availability of relevant learning resources and learning materials

- steering operation and controls
- types of adverse driving conditions commonly encountered during driving activities
- vehicle operation and control including:
  - cabin drill
  - managing accelerator
  - managing brakes
  - managing steering
  - start, move off, shut down and secure.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations in a vehicle typical of that used in industry and on a variety of road conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, Australian Road Rules, codes of practice and operation manuals
- relevant materials, tools and equipment currently used in industry
- suitable vehicle that meets state/territory requirements.

# CPPSS00045 Manage complex fumigation operations

## Modification History

Release 2 This version first released with CPP Property Services Training Package Release 9.0.

This skill set has been updated to reflect updated unit codes and unit titles:

- CPPUPM3011 Manage organisms by applying fumigants to commodities and environments
- CPPUPM4002 Schedule, organise and monitor pest management operations
- CPPUPM4004 Assess and advise on pest management options for complex operations

Included the following to support licensing outcomes:

- CPPUPM3006 Manage pest by applying pesticides
- CPPUPM3018 Maintain equipment and pesticide storage area in pest management vehicles

BSBSMB407 Manage a small team has been removed from skill set.

Release 1 This version first released with CPP Property Services Training Package Version 2.0.

This skill set replaces equivalent CPPSS00022 Manage Complex Fumigation Operations Skill Set, now deleted from CPP07 Property Services Training Package Version 14.1.

## Description

This skill set provides pest management technicians with the competencies required to prepare proposals for complex fumigation work and manage a small team to complete the work to meet compliance requirements, such as quarantine regulations.

## Pathways Information

Completion of these units provides credit towards CPP30119 Certificate III in Urban Pest Management.

## Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements apply to pest management in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

The skill set is applicable in some States but does not meet the full licensing requirements of all States and Territories.

## Skill Set Requirements

CPPUPM3006	Manage pests by applying pesticides
CPPUPM3011	Manage organisms by applying fumigants to commodities and environments
CPPUPM3018	Maintain equipment and pesticide storage area in pest management vehicles
CPPUPM4002	Schedule, organise and monitor pest management operations
CPPUPM4004	Assess and advise on pest management options for complex operations

## Target Group

This skill set is for people managing large-scale fumigation operations, such as those conducted on aircraft and ships.

## Suggested words for Statement of Attainment

These units from CPP Property Services Training Package meet industry requirements for managing complex fumigation operations.

## CPPSS00046 Manage non-timber pests

### Modification History

Release 2 This version first released with CPP Property Services Training Package Release 9.0.

CPP units updated to latest releases.

Release 1 This version first released with CPP Property Services Training Package Version 2.0.

This skill set replaces equivalent CPPSS00023 Manage Non-Timber Pests Skill Set, now deleted from CPP07 Property Services Training Package Version 14.1.

### Description

This skill set provides pest management technicians with the competencies required to inspect premises for non-timber pests, excluding complex or high risk operations such as hospitals. It also covers developing pest management plans, and with the agreement of the client, implementing pest management methods including application of pesticides or modification of the environment. It also covers maintaining pest management equipment and chemical storage areas.

### Pathways Information

Completion of these units provides credit towards CPP30119 Certificate III in Urban Pest Management.

### Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements apply to pest management in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements

The skill set is applicable in some States but does not meet the full licensing requirements of all States and Territories.

### Skill Set Requirements

CPPUPM3005      Manage pests without applying pesticides

CPPUPM3006	Manage pests by applying pesticides
CPPUPM3018	Maintain equipment and pesticide storage area in pest management vehicles

## **Target Group**

This skill set is for people who provide an urban pest management service managing non-timber pests.

## **Suggested words for Statement of Attainment**

These units from CPP Property Services Training Package meet industry requirements for managing non-timber pests in most States and Territories.

## CPPSS00047 Manage timber pests

### Modification History

Release 2 This version first released with CPP Property Services Training Package Release 9.0.

CPP units updated to latest releases.

Release 1 This version first released with CPP Property Services Training Package Version 2.

This skill set replaces equivalent CPPSS00025 Manage Timber Pests Skill Set, now superseded and not replaced in CPP07 Property Services Training Package Version 14.1.

### Description

This skill set provides pest management technicians with the competencies required to inspect premises for timber pests. It also covers developing pest management plans, and with the agreement of the client, implementing pest management methods including biological controls, chemical barrier treatments, physical barrier treatments, management controls or the installation of physical termite management systems.

### Pathways Information

Completion of these units provides credit towards CPP30119 Certificate III in Urban Pest Management.

### Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements apply to pest management in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements

The skill set is applicable in some States but does not meet the full licensing requirements of all States and Territories.

### Skill Set Requirements

CPPUPM3008 Inspect for and report on timber pests

CPPUPM3010	Control timber pests
CPPUPM3042	Install termite management systems

## **Target Group**

This skill set is for people who provide an urban pest management service managing timber pests.

## **Suggested words for Statement of Attainment**

These units from CPP Property Services Training Package meet industry requirements for managing basic timber pests in most States and Territories.

## CPPSS00048 Clean and restore hard floors

### Modification History

Release 1.

New skill set.

This version first released with CPP Property Services Training Package Version 4.

### Description

This skill set covers the competencies required to clean and restore a range of hard floor surfaces found in commercial and residential cleaning work sites.

### Pathways Information
