Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant legislation and regulations
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBFLM306 Provide workplace information and resourcing plans

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Application

This unit describes the skills and knowledge required to support the information management system. It involves the identification, acquisition, initial analysis and use of appropriate workplace information.

It applies to individuals who use organisational and analytical skills to support business and resource planning processes. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve a number of complex or non-routine activities that require some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Management and Leadership – Frontline Management

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Locate relevant information	1.1 Identify and locate information required by teams 1.2 Acquire and review information according to organisational procedures 1.3 Apply plans and procedures to obtain information which is not immediately available/accessible

ELEMENT	PERFORMANCE CRITERIA
2 Collect and report information	2.1 Collect information relevant to the needs of teams in an adequate and timely manner 2.2 Ensure information acquired is in a format suitable for analysis, interpretation and dissemination 2.3 Use information to identify and report relevant trends and developments to relevant personnel, within the limits of own role
3 Use information systems	3.1 Effectively use management information systems to store and retrieve data 3.2 Use available technology to manage information effectively 3.3 Report recommendations for improving information system to designated persons and/or groups
4 Support preparation of business plan and/or budgets	4.1 Effectively utilise the contribution of the work team when preparing business plans and/or budgets to gain support for outcomes 4.2 Present and record information to support preparation of business plans and/or budgets in accordance with organisation's guidelines and requirements 4.3 Follow contingency plans when alternative action is required
5 Support preparation of resource proposals	5.1 Consult with colleagues to collect resource planning data as required 5.2 Report estimated resource needs and usage according to organisational requirements as necessary 5.3 Facilitate resourcing within limits of own role

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.3, 3.1, 4.2, 4.3, 5.2	<ul style="list-style-type: none"> <li>Interprets information from a range of familiar texts including organisational policies and procedures</li> </ul>
Writing	2.2, 2.3, 3.1, 3.3,	<ul style="list-style-type: none"> <li>Uses appropriate vocabulary and formats to achieve precise meaning in a range of documentation</li> </ul>

	4.1, 4.2, 5.2	
Oral Communication	2.3, 3.3, 4.1, 5.1	<ul style="list-style-type: none"> <li>Provides information using terminology and style appropriate to context and audience</li> <li>Uses questioning and listening techniques to exchange and clarify information</li> </ul>
Numeracy	1.1, 1.2, 2.1-2.3, 4.1, 4.2, 5.1, 5.2	<ul style="list-style-type: none"> <li>Interprets and analyses numerical information to identify budgetary requirements</li> </ul>
Navigate the world of work	1.2, 1.3, 4.2, 5.2	<ul style="list-style-type: none"> <li>Adheres to organisational protocols and procedures and understands the nature and purpose of own role and associated responsibilities</li> </ul>
Interact with others	3.3, 5.1	<ul style="list-style-type: none"> <li>Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role</li> <li>Seeks to cooperate with others to achieve results in immediate work context</li> </ul>
Get the work done	1.1, 1.3, 2.1, 2.2, 3.1-3.3, 4.1, 4.3, 5.1, 5.3	<ul style="list-style-type: none"> <li>Takes responsibility for planning and organising tasks required to achieve required outcomes</li> <li>Makes routine decisions based on implementation of standard plans and procedures</li> <li>Collects and analyses information efficiently to develop recommendations for improvements and perform resourcing tasks</li> <li>Uses digital systems and tools to access, store and retrieve data and manage information</li> </ul>

# Assessment Requirements for BSBFLM306 Provide workplace information and resourcing plans

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- use management information system to collect, store and retrieve data to support the preparation of business plans and/or budgets
- involve the work team in planning and budget preparation
- estimate resource needs and usage according to organisational requirements and allocating or acquiring resources within limits of own role.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe information contained in management information systems
- discuss basic financial concepts relating to operational plans and budgets
- list the main requirements of a business plan
- outline data required to prepare resource proposals
- outline methods to gain efficiencies in operational resource management.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others
- business technology.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBFLM312 Contribute to team effectiveness

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to contribute to the effectiveness of the work team. It involves planning with the team to meet expected outcomes, developing team cohesion, participating in and facilitating the work team, and communicating with the management of the organisation.

It applies to individuals who play a prominent part in motivating, mentoring, coaching and developing team cohesion through team leadership and forming the link between the management of the organisation and the team members. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve complex or non-routine activities that require some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Frontline Management

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Contribute to team outcomes	1.1 Consult team members to identify team purpose, roles, responsibilities, goals, plans and objectives 1.2 Support team members to meet expected outcomes

ELEMENT	PERFORMANCE CRITERIA
2 Support team cohesion	<p>2.1 Encourage team members to participate in the planning, decision making and operational aspects of the work team to their level of responsibility</p> <p>2.2 Encourage team members to take responsibility for their own work and to assist each other in undertaking required roles and responsibilities</p> <p>2.3 Provide feedback to team members to encourage, value and reward team members' efforts and contributions</p> <p>2.4 Identify and address issues, concerns and problems identified by team members, or refer to relevant persons as required</p>
3 Participate in work team	<p>3.1 Actively encourage and support team members to participate in team activities and communication processes and to take responsibility for their actions</p> <p>3.2 Support the team to identify and resolve problems which impede its performance</p> <p>3.3 Utilise own contribution to work team to serve as a role model for others and enhance the organisation's image within the work team, the organisation and with clients/customers</p>
4 Communicate with management	<p>4.1 Maintain open communication with line manager/management at all times</p> <p>4.2 Communicate information from line manager/management to the team</p> <p>4.3 Communicate unresolved issues to line manager/management and follow up to ensure action is taken in response to these matters</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Writing	2.3, 2.4, 4.2, 4.3	<ul style="list-style-type: none"> <li>Uses appropriate vocabulary, grammatical structures and conventions to communicate information, matching style to purpose and audience</li> </ul>

# Assessment Requirements for BSBFLM312 Contribute to team effectiveness

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- discuss and clarify goals and responsibilities with a team of people
- apply management and communication skills with a range of people that:
  - provides direction and leadership
  - assists individuals to achieve goals
  - motivates and builds team cohesion
  - fosters contribution of and respect for ideas
- apply techniques for resolving problems within organisational and legislative requirements
- communicate effectively with management including escalating problems outside own area of responsibility
- manage communication of information to, and between, the team.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list organisational goals, objectives and plans that relate to the team
- identify legislation, regulations, standards or codes of practice that may impact team performance and outcomes
- describe the organisational structure with reference to the organisational chart
- describe options for addressing performance issues in the organisation
- explain the principles and techniques of:
  - group dynamics and processes
  - motivation

- negotiation
- explain why considering individual behaviour and differences is important to a manager.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant workplace documentation and resources
- relevant legislation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## Assessment Requirements for BSBHRM405 Support the recruitment, selection and induction of staff

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- prepare job descriptions
- use job descriptions to support sourcing, selecting and appointing suitable staff
- use different advertising channels to promote vacancies and/or establish a potential talent pool
- consult with managers to gain approvals
- develop selection criteria and interview questions in consultation with relevant personnel
- schedule interviews and advise relevant people of times, dates and venues
- participate in interviews and other selection techniques including assessing candidates against selection criteria to short list them
- obtain referees' reports
- prepare and distribute a selection report including feedback to give unsuccessful candidates
- advise unsuccessful candidates of the results
- secure preferred candidate's agreement and provide an employment contract
- advise other staff of the successful candidate and arrange induction.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify documentation required for recruitment, selection and induction
- explain human resources life cycle and the place of recruitment and selection
- identify legislation relevant to recruitment, selection and induction of staff
- describe channels and technology to advertise vacancies

- explain a range of interviewing techniques and other selection processes and their application.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

- workplace policies and procedures
- business technology
- position descriptions
- legislation, regulations, Codes and Standards relevant to staff recruitment, selection and induction
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## Assessment Requirements for BSBHRM505 Manage remuneration and employee benefits

### Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- develop remuneration strategies for different occupational groups
- manage remuneration and benefits in accordance with all legislative and ethical requirements and operational policies
- apply awards and agreements to remuneration processes
- apply requirements of the Australian Taxation Office in relation to income tax, superannuation reporting, FBT and bonus payments.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline remuneration principles or models and approaches
- explain the ethical practices relating to remuneration and benefits strategies
- outline various remuneration or employee benefits
- describe ways to position an organisation an 'employer of choice'
- outline award structures for industrial agreements
- summarise organisational policies and procedures affecting remuneration strategies
- identify relevant legislation, regulations and standards that may affect remuneration strategies
- list the requirements of the Australian Taxation Office in relation to:

- income tax
- superannuation reporting
- FBT and bonus payments.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

- an appropriate range of documentation and resources normally used in the workplace
- organisational policies and procedures
- relevant legislation, regulations and codes of practice
- business technology.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBHRM513 Manage workforce planning

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- review and interpret information from a range of internal and external sources to identify:
  - current staff turnover and demographics
  - labour supply trends factors that may affect workforce supply
  - organisation's workforce requirements objectives and strategies
- manage workforce planning including developing, implementing, monitoring and reviewing strategies to meet workforce needs
- review relevant trends and supply and demand factors that will impact on an organisation's workforce
- develop a workforce plan that includes relevant research and specific strategies to ensure access to a skilled and diverse workforce.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain current information about external labour supply relevant to the specific industry or skill requirements of the organisation
- outline industrial relations relevant to the specific industry
- describe labour force analysis and forecasting techniques.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

- an appropriate range of documentation and resources normally used in the workplace
- organisational strategic and operational plans
- organisational policies and procedures
- business technology.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBHRM604 Manage employee relations

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge to develop and maintain a positive and productive workplace environment. It covers all aspects of employee relations impacting on managers at the strategic level.

It applies to individuals who are non-specialist human resource managers and covers a broad range of employee relations activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Workforce Development – Human Resource Management

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Implement employee relations strategy and policies for own work area	1.1 Ensure employee relations strategy is consistent with organisational strategic objectives 1.2 Develop strategies and policies through the application of a risk management approach and extensive consultation and participation by relevant groups and individuals 1.3 Ensure strategy and policies take account of equal opportunity, family/work relationships and promote the absence of discrimination and/or harassment

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Develop risk management strategies which take account of the withdrawal of labour and other potential outcomes of disputes</p> <p>1.5 Identify any potential areas of conflict and ensure strategies and policies take account of the objectives of relevant groups and individuals</p>
2 Build and maintain a productive culture	<p>2.1 Negotiate awards, agreements, and contracts which balance organisational objectives and employee rights and obligations</p> <p>2.2 Identify and meet all legal and organisational requirements within the conditions of employment</p> <p>2.3 Undertake regular and timely consultation and communication with individuals and relevant groups</p> <p>2.4 Develop policies and practices to facilitate employee recruitment, retention and satisfaction</p> <p>2.5 Provide induction programs and training to develop competence and confidence and to ensure work is performed safely and effectively</p> <p>2.6 Provide opportunities for employees to understand their role and how it contributes to the achievement of organisational objectives</p> <p>2.7 Develop, regularly review and update individual and team development plans</p> <p>2.8 Evaluate and revise employee relations policies regularly</p>
3 Resolve employee relations problems	<p>3.1 Establish processes for early intervention to identify and minimise problems or grievances</p> <p>3.2 Communicate problem solving processes to, and obtain support from, all relevant groups and individuals</p> <p>3.3 Provide training to develop competence in conflict management, negotiation and dispute resolution</p> <p>3.4 Obtain specialist advice where appropriate or where formal hearings are required</p> <p>3.5 Ensure processes are fair, equitable and consistent with all relevant awards agreements and legislation</p> <p>3.6 Ensure problem solving processes provide for external mediation and conciliation, and arbitration where appropriate</p>
4 Manage diversity	<p>4.1 Develop plans for the promotion of diversity within the organisation</p> <p>4.2 Openly promote diversity and its benefits within the organisation</p> <p>4.3 Develop education and communication plans to promote and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>encourage diversity</p> <p>4.4 Develop and implement processes to deal with events which inhibit the organisation from meeting its diversity objectives</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1-1.5, 2.1-2.8, 3.1, 3.3, 3.5, 3.6 4.1, 4.3, 4.4	<ul style="list-style-type: none"> <li>Identifies and interprets relevant information and ideas in a range of complex texts relating to employee relations</li> <li>Recognises relevant information within job specifications and work processes</li> </ul>
Writing	1.1-1.5, 2.1, 2.4, 2.7, 2.8, 3.1, 3.2, 3.3, 4.1, 4.3, 4.4	<ul style="list-style-type: none"> <li>Demonstrates sophisticated writing skills by selecting appropriate conventions and stylistic devices to express precise meaning to manage employee relations</li> </ul>
Oral Communication	1.2, 2.1, 2.3, 2.5, 2.6, 3.2, 3.3, 3.4, 4.2	<ul style="list-style-type: none"> <li>Presents information and opinions using language and non-verbal features appropriate to audience</li> <li>Uses verbal and listening skills to obtain specialist advice as well as promoting diversity within the organisation</li> </ul>
Numeracy	1.2, 1.4, 2.2	<ul style="list-style-type: none"> <li>Selects and interprets mathematical information embedded in a range of tasks and texts</li> </ul>
Navigate the world of work	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 2.4, 2.6, 2.8, 3.5	<ul style="list-style-type: none"> <li>Works autonomously making high level decisions to achieve and improve organisational goals</li> <li>Takes a lead role in the development of organisational goals, roles and responsibilities</li> <li>Develops and implements strategies that ensure organisational policies, procedures and regulatory requirements are being met</li> <li>Monitors and reviews the organisations policies, procedures and adherence to legislative requirements to implement and manage change</li> </ul>
Interact with others	1.2, 1.3, 1.5, 2.1, 2.3, 2.5-2.7, 3.1-3.4, 3.6, 4.2, 4.4	<ul style="list-style-type: none"> <li>Selects and uses appropriate conventions and protocols when communicating with staff at various levels</li> <li>Influences and fosters a collaborative culture</li> </ul>

		<p>facilitating a sense of commitment and workplace cohesion</p> <ul style="list-style-type: none"> <li>• Shares knowledge, information and experience openly as an integral part of the working relationship</li> <li>• Understands diversity and seeks to integrate diversity into the work context</li> <li>• Recognises potential for conflict and, working with others, develops organisational processes to deal with conflict</li> </ul>
Get the work done	1.1-1.5, 2.4, 2.5, 3.1, 3.3-3.6, 4.1-4.4	<ul style="list-style-type: none"> <li>• Sequences and schedules a range of complex activities, monitors implementation and manages relevant communication</li> <li>• Makes high impact decisions in a complex and diverse environment, using input from a range of sources</li> <li>• Anticipates potential problems and formulates plans to deal with them, as they arise</li> <li>• Gathers and analyses data and seeks feedback to improve plans and processes</li> </ul>

# Assessment Requirements for BSBHRM604 Manage employee relations

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- consult with relevant stakeholders to develop, implement, monitor and review employee relations strategies and policies including:
  - diversity
  - recruitment
  - induction
  - training and development
  - performance management
- develop an employee relations risk management strategy
- negotiate employment awards, agreements and contracts
- maintain high standards of performance in respect to equal opportunity and the management of diversity
- manage conflict and early intervention in respect to employee grievances and problems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify human resource specialist assistance requirements
- describe the principles of relevant industrial agreements
- determine key result areas of the organisation
- outline organisational plans (strategic, tactical and operational) for human resource planning
- identify and summarise organisational policies relating to balancing family/work relationships

- outline external and internal organisational support services for employees
- explain performance measurement systems utilised within the organisation
- outline relevant legislative and regulatory requirements
- outline staff development strategies
- explain unfair dismissal rules and due process.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

- organisational strategic and operational plans
- workplace policies and procedures
- legislation, regulations, codes of practice and industrial awards relevant to the business
- business technology
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBINN301 Promote innovation in a team environment

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to be an effective and proactive member of an innovative team.

It applies to individuals who play a proactive role in demonstrating, encouraging or supporting innovation in a team environment. The individual may be a team participant or a team leader. Teams may be formal or informal and may comprise a range of personnel.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Unit Sector

Creativity and Innovation – Innovation

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Create opportunities to maximise innovation within the team	1.1 Evaluate and reflect on what the team needs and wants to achieve 1.2 Check out information about current or potential team members' work in the context of developing a more innovative team 1.3 Bring people into the team or make suggestions for team members based on what needs to be achieved and the potential for cross fertilising ideas

ELEMENT	PERFORMANCE CRITERIA
	1.4 Acknowledge, respect and discuss the different ways that people may contribute to building or enhancing the team
2 Organise and agree effective ways of working	2.1 Jointly establish ground rules for how the team will operate 2.2 Agree and communicate responsibilities in ways that encourage and reinforce team-based innovation 2.3 Agree and share tasks and activities to ensure the best use of skills and abilities within the team 2.4 Plan and schedule activities to allow time for thinking, challenging and collaboration 2.5 Establish personal reward and stimulation as an integral part of the team's way of working
3 Support and guide colleagues	3.1 Model behaviour that supports innovation 3.2 Seek external stimuli and ideas to feed into team activities 3.3 Proactively share information, knowledge and experiences with other team members 3.4 Challenge and test ideas within the team in a positive and collaborative way 3.5 Proactively discuss and explore ideas with other team members on an ongoing basis
4 Reflect on how the team is working	4.1 Debrief and reflect on activities and on opportunities for improvement and innovation 4.2 Gather and use feedback from within and outside the team to generate discussion and debate 4.3 Discuss the challenges of being innovative in a constructive and open way 4.4 Take ideas for improvement, build them into future activities and communicate key issues to relevant colleagues 4.5 Identify, promote and celebrate successes and examples of successful innovation

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Reading	1.2, 4.2	<ul style="list-style-type: none"> <li>Interprets and analyses textual information, from a wide range of sources, to identify information relevant to team activities</li> </ul>
Writing	2.2, 3.3, 4.4	<ul style="list-style-type: none"> <li>Uses clear language and formats appropriate for the audience to highlight and present specific information</li> </ul>
Oral Communication	1.2, 1.3, 1.4, 2.1, 2.2, 3.5, 4.1, 4.2, 4.3, 4.4, 4.5	<ul style="list-style-type: none"> <li>Actively participates in verbal exchanges of ideas and elicits the views and opinions of team members by listening and questioning</li> <li>Uses clear language to clarify rules and roles relating to team activities in formal and informal situations</li> </ul>
Numeracy	1.2, 4.2	<ul style="list-style-type: none"> <li>Interprets numeric information relevant to team activities</li> </ul>
Navigate the world of work	1.1, 3.1, 3.2, 3.5	<ul style="list-style-type: none"> <li>Understands the nature and purpose of own role and how it affects others in the work context</li> </ul>
Interact with others	1.1-1.4, 2.1, 2.2, 3.1, 3.2, 3.4, 3.5, 4.1, 4.2, 4.4, 4.5	<ul style="list-style-type: none"> <li>Uses inclusive techniques to initiate, contribute and promote discussion amongst potentially diverse team members</li> <li>Recognises the importance of establishing and building effective working relationships</li> <li>Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role</li> </ul>
Get the work done	1.3, 1.4, 2.2, 2.4, 2.5, 3.2, 3.4, 4.2, 4.4, 4.5	<ul style="list-style-type: none"> <li>Plans, sequences and prioritises tasks for efficient and effective outcomes</li> <li>Contributes to continuous improvement of current work practices by applying basic principles of analytical and lateral thinking</li> <li>Uses problem-solving processes to address less predictable problems, and when appropriate, seeking input from others</li> <li>Reflects on outcomes and further explores own and the team's role in implementing innovation</li> </ul>

# Assessment Requirements for BSBINN301 Promote innovation in a team environment

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- apply practices that promote innovation within a team including:
  - modelling open and respectful communications
  - contributing to the make-up and rules of the team
  - planning and scheduling of activities
  - reflecting on activities, feedback and challenges to identify improvement options
- encourage others to contribute to innovation in the team
- implement improvements and communicate about them.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain what innovation is, the different types of innovation and the benefits of innovation
- describe the internal and external factors that contribute to a team becoming and remaining innovative including:
  - team characteristics
  - the role of group dynamics and diversity
  - broader environmental factors
- explain how activities can encourage or hinder innovation in a team including:
  - allocation of time and activities
  - modelling behaviour
  - rewards and recognition
  - communications

- feedback.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBITS401 Maintain business technology

### Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to maintain the effectiveness of business technology in the workplace. It includes maintaining existing technology and planning for future technology requirements.

It applies to individuals with a broad knowledge of business technology who may be required to contribute well-developed skills in creating solutions to maintenance and upgrade issues with existing technology. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

### Unit Sector

Information and Communications Technology – IT Support

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Maintain performance of hardware and software	1.1 Monitor and evaluate system effectiveness to ensure it meets organisational and system requirements

ELEMENT	PERFORMANCE CRITERIA
	<p>1.2 Use operating system, drive and disk structure, reports and files to identify performance problems</p> <p>1.3 Maintain disk drives and peripherals according to manufacturers' and organisational requirements</p> <p>1.4 Replace consumables in accordance with manufacturers' and organisational requirements</p>
2. Provide basic system administration	<p>2.1 Carry out system back-up procedure at regular intervals according to organisational and system requirements</p> <p>2.2 Install and operate software applications in accordance with developers' and organisational requirements</p> <p>2.3 Maintain and update security access procedures in line with organisational requirements</p> <p>2.4 Ensure that licences for use of software are used, checked and recorded in accordance with organisational requirements</p> <p>2.5 Regularly maintain and update virus programs in accordance with organisational requirements</p>
3. Identify future technology requirements	<p>3.1 Maintain knowledge of current and new technology by regularly accessing sources of information</p> <p>3.2 Identify and develop improved technology systems using feedback from clients and colleagues</p> <p>3.3 Assess existing technology against newly available technology to determine future needs and priorities</p> <p>3.4 Identify and select new technologies to achieve and maintain continuous organisational development</p> <p>3.5 Obtain management and budget approval for new selected technologies</p>

## Foundation Skills

## BSBITS411 Maintain and implement digital technology

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

### Application

This unit describes the skills and knowledge required to maintain the effectiveness of digital technology in the workplace. It includes maintaining existing technology, planning for future technology requirements, and identifying opportunities to improve workplace effectiveness and efficiency by introducing new digital technologies.

It applies to individuals with a broad knowledge of digital business technologies who may be required to contribute well-developed skills in creating solutions to maintenance and upgrade issues with existing digital technology. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

### Unit Sector

Information and Communications Technology – IT Support

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Maintain performance of existing digital technologies	1.1 Monitor and evaluate system effectiveness to ensure it meets organisational and system requirements 1.2 Use operating system, available software, web-based tools, and relevant applications to identify performance problems

ELEMENT	PERFORMANCE CRITERIA
	1.3 Maintain digital technologies according to organisational requirements by troubleshooting solutions to diagnose issues
2. Maintain security and functionality of data and digital technologies	2.1 Carry out system back-up procedure at regular intervals according to organisational and system requirements 2.2 Install and operate software and other digital applications in accordance with developers' and organisational requirements 2.3 Identify sources of risk to digital security in line with organisational policies and requirements 2.3 Maintain and update digital security access procedures in line with organisational requirements 2.4 Ensure that licences for use of software are used, checked and recorded in accordance with organisational requirements
3. Identify future technology requirements and opportunities	3.1 Identify available and upcoming digital technology solutions by accessing relevant sources of information 3.2 Assess existing digital technologies against newly available and upcoming digital technology solutions to determine future needs, opportunities, and priorities 3.3 Identify and select new digital technologies to achieve and maintain continuous organisational development in line with organisational strategies 3.4 Develop and implement improved digital technology systems based on feedback from clients and colleagues, in line with organisational policies and requirements 3.5 Obtain management and budget approval for new selected technologies

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Gathers, analyses and interprets a range of textual information from a variety of sources and identifies relevant information</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Produces texts of varying complexity using appropriate language and logical structure to record and convey information</li> </ul>
Navigate the	<ul style="list-style-type: none"> <li>Complies with organisational policies and legal responsibilities</li> </ul>

world of work	related to own work
Get the work done	<ul style="list-style-type: none"> <li>Plans, implements and monitors tasks required to achieve required outcomes</li> <li>Takes responsibility for the outcomes of routine decisions directly related to own role</li> <li>Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts</li> <li>Understands the purposes, specific functions and key features of common digital systems and tools and operates them effectively to complete routine tasks</li> <li>Identifies innovations by monitoring trends from other contexts</li> </ul>

# Assessment Requirements for BSBITS411 Maintain and implement digital technology

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

## Performance Evidence

Evidence of the ability to:

- identify and resolve system issues using a range of digital diagnostic tools
- perform routine system maintenance, including carrying out back-up procedures and software/application installation
- identify a range of risks to digital security and steps required to minimise/eliminate such risk
- develop and implement improved digital technology systems, drawing on research of available and upcoming digital technology solutions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features, capabilities, and limitations of current industry-accepted digital technology solutions
- Key features and limitations of existing organisational digital technologies, including software licences
- Key features of organisational policies and requirements related to digital security
- Key features of organisational commercial strategy relevant to digital technology
-

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT support field of work and include access to:

- case studies and, where possible, real situations
- office equipment and resources
- examples of technology maintenance and security procedures.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to design and produce desktop published documents.

It applies to individuals who work in a range of environments, which may include providing administrative support within an enterprise, or who may be technical or knowledge experts responsible for production of their own documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Information and Communications Technology – IT Use

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to produce desktop published documents	1.1 Use safe work practices including addressing ergonomic requirements and using work organisation strategies 1.2 Use energy and resource conservation techniques

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Identify document purpose, audience and presentation requirements, and clarify with relevant personnel as required</p> <p>1.4 Identify organisational and task requirements for desktop published documents to ensure consistency of style and image</p>
2. Set up desktop published document	<p>2.1 Design content structure and layout to ensure information and graphics are arranged according to related topics and in logical sequences</p> <p>2.2 Select appropriate formatting and create templates or master pages to ensure consistency of design and layout</p> <p>2.3 Confirm layout with appropriate person</p>
3. Create desktop published document	<p>3.1 Prepare, format and enter required text</p> <p>3.2 Import text from other applications and resolve any formatting issues</p> <p>3.3 Scan or import graphics from other applications and resolve any formatting issues</p> <p>3.4 Arrange text and graphics according to organisational and task requirements</p>
4. Finalise desktop published document	<p>4.1 Review text for possible errors and omissions, and resolve any issues</p> <p>4.2 Check page order, structure and linkages</p> <p>4.3 Produce completed document in required format</p> <p>4.4 Name and store text documents, in accordance with organisational requirements and exit application without information loss/damage</p> <p>4.5 Prepare text documents within designated timelines and organisational requirements for speed and accuracy</p> <p>4.6 Use manuals, user documentation and online help to overcome problems with document design and production</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance	Description
-------	-------------	-------------

	Criteria	
Reading	1.3, 1.4, 3.3, 3.4, 4.1, 4.2, 4.6	<ul style="list-style-type: none"> <li>Recognises and interprets diagrammatical and textual information from a range of sources to determine and adhere to requirements</li> <li>Applies strategies to self-correct and verify clarity and conformity of information</li> </ul>
Writing	2.1, 2.2, 3.1-3.4, 4.1-4.3, 4.5	<ul style="list-style-type: none"> <li>Enters and amends routine data using a format appropriate to requirements</li> <li>Develops documents using required format, accurate spelling and grammar, and organises content to support purpose and audience of material, using clear and logical language</li> </ul>
Oral Communication	1.3, 2.3	<ul style="list-style-type: none"> <li>Confirms requirements with relevant personnel using specific terminology and listening and questioning techniques to confirm understanding</li> </ul>
Navigate the world of work	1.3, 1.4, 2.1, 2.2, 3.4, 4.3-4.5	<ul style="list-style-type: none"> <li>Recognises and follows explicit and implicit protocols and meets expectations associated with own role</li> </ul>
Interact with others	1.3, 2.3	<ul style="list-style-type: none"> <li>Collaborates with others to achieve joint outcomes</li> </ul>
Get the work done	2.1, 2.2, 3.1-3.4, 4.1-4.6	<ul style="list-style-type: none"> <li>Recognises and responds to routine problems in context of own work</li> <li>Uses advanced features within applications to access, store, organise data and perform routine and complex work tasks</li> </ul>

### Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0.  Version created to correct typographical error
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- follow organisational and safe work practices including:
  - ergonomic requirements
  - energy and resource conservation techniques
- adhere to organisational requirements by:
  - ensuring consistency of style and image
  - logically sequencing data
  - producing documents within designated timelines
  - naming and storing documents
- adhere to task requirements when producing documents including:
  - applying consistent formatting
  - using appropriate templates and master pages
  - using correct layouts
- resolve any issues including:
  - formatting issues
  - errors and omissions
  - problems with design or production
- use appropriate data storage options
- apply knowledge of functions and features of contemporary computer applications
- communicate with relevant personal.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify energy and resource conservation techniques
- outline organisational requirements for ergonomics, work periods and breaks
- describe contents and purpose of organisational style guides
- explain purposes, uses and functions of desktop publishing software
- outline various formatting styles and their effect on formatting, readability and appearance of documents.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- organisational policies and procedures
- relevant workplace documentation and resources
- industry software packages and user instructions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBLDR402 Lead effective workplace relationships

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit defines skills, knowledge and outcomes required to use leadership to promote team cohesion. It includes motivating, mentoring, coaching and developing the team and forming the bridge between the management of the organisation and team members.

This unit applies to team leaders, supervisors and new or emerging managers where leadership plays a role in developing and maintaining effective workplace relationships. It applies in any industry or community context.

At this level work will normally be carried out within routine and non-routine methods and procedures, which require planning and evaluation and leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership - Leadership

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect, analyse and communicate information and ideas	1.1 Collect relevant information from appropriate sources and analyse and share with the work team to improve work performance 1.2 Communicate ideas and information in a manner which is appropriate and sensitive to the cultural and social diversity of the

ELEMENT	PERFORMANCE CRITERIA
	<p>audience and any specific needs</p> <p>1.3 Lead consultation processes to encourage employees to contribute to issues related to their work, and promptly relay feedback to the work team in regard to outcomes</p> <p>1.4 Seek and value contributions from internal and external sources in developing and refining new ideas and approaches</p> <p>1.5 Implement processes to ensure that issues raised are resolved promptly or referred to relevant personnel as required</p>
2. Develop trust and confidence as leader	<p>2.1 Treat all internal and external contacts with integrity, respect and empathy</p> <p>2.2 Use the organisation's social, ethical and business standards to develop and maintain effective relationships</p> <p>2.3 Gain and maintain the trust and confidence of colleagues, customers and suppliers through competent performance</p> <p>2.4 Adjust interpersonal styles and methods to meet organisation's social and cultural environment</p> <p>2.5 Lead and encourage other members of the work team to follow examples set according to organisation's policies and procedures</p>
3. Develop and maintain networks and relationships	<p>3.1 Use networks to identify and build relationships</p> <p>3.2 Use networks and other work relationships to provide identifiable benefits for the team and organisation</p>
4. Manage difficulties into positive outcomes	<p>4.1 Identify and analyse difficulties and take action to rectify the situation within the requirements of the organisation and relevant legislation</p> <p>4.2 Guide and support colleagues to resolve work difficulties</p> <p>4.3 Regularly review and improve workplace outcomes in consultation with relevant personnel</p> <p>4.4 Manage poor work performance within the organisation's processes</p> <p>4.5 Manage conflict constructively within the organisation's processes</p>

# Assessment Requirements for BSBLDR402 Lead effective workplace relationships

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- access and analyse information to achieve planned outcomes
- apply techniques for resolving problems and conflicts and dealing with poor performance within organisational and legislative requirements
- review and improve workplace outcomes in consultation with relevant personnel
- adjust interpersonal style and communications to respond to cultural and social diversity
- apply relationship management and communication skills with a range of people that:
  - demonstrate integrity, respect, empathy and cultural sensitivity and promote trust
  - forge effective relationships with internal and/or external people and help to maintain these networks
  - encourage participation and foster contribution of and respect for ideas and feedback
  - provide support to colleagues to resolve difficulties.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of how work relationships, and the cultural and social environment, can support or hinder achieving planned outcomes
- explain techniques for developing positive work relationships and building trust and confidence in a team including interpersonal styles, communications, consultation, cultural and social sensitivity, networking
- explain the impact of legislation and organisational policies on workplace relationships
- describe a range of methods and techniques for communicating information and ideas to a range of stakeholders
- outline problems solving methods

- explain methods to resolve workplace conflict
- explain methods to manage poor work performance
- explain how to monitor, analyse and introduce ways to improve work relationships.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBLDR403 Lead team effectiveness

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit defines skills, knowledge and outcomes required to plan and supervise the performance of the team and develop team cohesion.

It applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams.

Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership - Leadership

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan to achieve team outcomes	1.1 Lead the team to identify, establish and document team purpose, roles, responsibilities, goals, plans and objectives in consultation with team members 1.2 Engage team members to incorporate innovation and

ELEMENT	PERFORMANCE CRITERIA
	productivity measures in work plans 1.3 Lead and support team members in meeting expected outcomes
2. Lead team to develop cohesion	2.1 Provide opportunities for input of team members into planning, decision making and operational aspects of work team 2.2 Encourage and support team members to take responsibility for own work and to assist each other in undertaking required roles and responsibilities 2.3 Provide feedback to team members to encourage, value and reward individual and team efforts and contributions 2.4 Recognise and address issues, concerns and problems identified by team members or refer to relevant persons as required 2.5 Model expected behaviours and approaches
3. Participate in and facilitate work team	3.1 Actively encourage team members to participate in and take responsibility for team activities and communication processes 3.2 Give the team support to identify and resolve problems which impede its performance 3.3 Ensure own contribution to work team serves as a role model for others and enhances the organisation's image within the work team, the organisation and with clients/customers
4. Liaise with management	4.1 Maintain open communication with line manager/management at all times 4.2 Communicate information from line manager/management to the team 4.3 Communicate unresolved issues, concerns and problems raised by the team/team members to line manager/management and ensure follow-up action is taken 4.4 Communicate unresolved issues, concerns and problems related to the team/team members raised by line managers/management to the team and ensure follow-up to action is taken

## Foundation Skills

# Assessment Requirements for BSBLDR403 Lead team effectiveness

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- apply knowledge of organisational goals, objectives and plans
- develop a team work plan including documentation of how it was generated and how it will be monitored
- identify and incorporate innovation and productivity measures into a team work plan
- communicate with team members and management to identify and establish the team purpose, roles, responsibilities, goals plans and objectives and resolve problems
- use techniques to consult, encourage, support and provide feedback to team members
- model team leadership behaviours and approaches
- liaise with management to develop the teamwork plan, resolve issues and ensure follow-up action is taken.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must explain principles and techniques associated with:

- delegation and work allocation
- goal setting
- group dynamics and processes
- individual behaviour and difference
- leadership styles
- motivation
- negotiation
- problem solving
- planning

- workplace innovation
- workplace productivity.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- information about the organisation, including organisational structure, goals, objectives and plans
- case studies, and where possible, real situations
- workplace equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBLDR503 Communicate with influence

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- negotiate and present persuasively
- communicate clearly with business associates, client groups and others to position the business to best effect including listening actively, understanding the information needs of others and adapting communication to suit the audience
- prepare for, participate in, and lead meetings to obtain outcomes
- prepare and make presentations to groups of people including:
  - identifying suitable forums for presentations
  - presenting reliable information
  - designing the presentation to meet the needs of the audience
  - answering questions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the business and organisational protocols for the release of information and communicating internally or externally
- explain the requirements to maintain confidentiality in the workplace
- identify industry, media and government organisations, events and communication channels relevant to the organisation
- demonstrate principles of cross-cultural communication
- explain principles of negotiation, mediation, conflict resolution and incident de-escalation
- describe structured and inclusive meeting procedures.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBLED401 Develop teams and individuals

## Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0.  Version created to clarify assessment requirements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- systematically identify and implement learning opportunities for others
- collect feedback on team and individual performance
- give and receive feedback from team members to encourage participation in and effectiveness of the team
- collaboratively develop learning plans to match skill needs of individuals and groups
- provide mentoring and coaching assistance to teams and individuals
- monitor and review workplace learning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe facilitation techniques to encourage team development and improvement
- outline organisational policies, plans and procedures for developing teams
- identify career paths and competency standards relevant to the industry.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce learning and development field of work and include access to:

- office equipment and resources
- learning and development plans, policies and procedures
- case studies and, where available, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBMGT402 Implement operational plan

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, planning and acquiring resources and providing reports on performance as required.

It applies to individuals who plan activities to achieve the measurable, stated objectives of the team and the organisation. At this level work will normally be carried out within routine and non-routine methods and procedures which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Management

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Implement operational plan	1.1 Collate, analyse and organise details of resource requirements in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Implement operational plans to contribute to the achievement of organisation's performance/business plan 1.3 Identify and use key performance indicators (KPIs) to monitor

ELEMENT	PERFORMANCE CRITERIA
	operational performance 1.4 Manage contingencies by adjusting the implementation of the operational plan in consultation with others 1.5 Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes
2. Implement resource acquisition	2.1 Recruit and induct employees within organisation's policies, practices and procedures 2.2 Implement plans for acquisition of physical resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel
3. Monitor operational performance	3.1 Monitor performance systems and processes to assess progress in achieving profit/productivity plans and targets 3.2 Analyse and use budget and actual financial information to monitor profit/productivity performance 3.3 Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies 3.4 Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely 3.5 Present recommendations for variation to operational plans to the designated persons/groups and gain approval 3.6 Implement systems, procedures and records associated with performance in accordance with organisation's requirements

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Learning	3.4	<ul style="list-style-type: none"> <li>Actively reinforces learning by applying new knowledge and skills in mentoring, coaching and supervising others</li> </ul>
Reading	1.1-1.5, 2.1, 2.2, 3.1, 3.2, 3.6	<ul style="list-style-type: none"> <li>Identifies, interprets, analyses and reviews textual information related to the operational plan and</li> </ul>

# Assessment Requirements for BSBMGT402 Implement operational plan

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- interact with a range of people/groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- vary the operational plan and gain approval to deal with contingencies
- monitor operational performance against the performance objectives and budgets and take action to rectify unsatisfactory performance
- plan and acquire physical and human resources using organisation's systems and procedures
- manage and support personnel to achieve performance objectives. including inducting new employees and providing mentoring and coaching
- present information and recommendations to support implementation and variation of the operational plan
- document and provide reports on performance as required by the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe performance monitoring systems and processes
- describe methods for problem solving
- explain how organisational policies and procedures relate to the operational plan.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- organisational operational plans, policies and procedures
- workplace documentation and resources including budgets, physical and human resource procurement documentation, employee induction and performance monitoring procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBMGT403 Implement continuous improvement

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to implement the organisation's continuous improvement systems and processes. It covers using systems and strategies to actively encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements.

It applies to managers who have an active role in implementing the continuous improvement process to achieve the organisation's objectives. Their position is closely associated with the creation and delivery of products and services which means that they have an important role in influencing the ongoing development of the organisation.

At this level, work will normally be carried out within routine and non-routine methods and procedures, which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Management

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Implement continuous improvement systems and	1.1 Implement systems to ensure that individuals and teams are actively encouraged and supported to participate in decision

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
processes	<p>making processes, assume responsibility and exercise initiative</p> <p>1.2 Communicate the organisation's continuous improvement processes to individuals and teams, and obtain feedback</p> <p>1.3 Ensure effective mentoring and coaching allows individuals and teams to implement the organisation's continuous improvement processes</p>
2. Monitor and review performance	<p>2.1 Use the organisation's systems and technology to monitor and review progress and to identify ways in which planning and operations could be improved</p> <p>2.2 Improve customer service through continuous improvement techniques and processes</p> <p>2.3 Formulate and communicate recommendations for adjustments to those who have a role in their development and implementation</p>
3. Provide opportunities for further improvement	<p>3.1 Implement processes to ensure that team members are informed of savings and productivity/service improvements in achieving the business plan</p> <p>3.2 Document work performance to aid the identification of further opportunities for improvement</p> <p>3.3 Manage records, reports and recommendations for improvement within the organisation's systems and processes</p>

# Assessment Requirements for BSBMGT403 Implement continuous improvement

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- implement continuous improvement systems and provide mentoring and coaching support to enable individuals and teams to participate in decisions, take responsibility, show initiative and implement improvement processes
- implement processes to inform team members about savings and productivity/service improvements achievements
- communicate effectively to support the continuous improvement system and implementation of improvements
- apply continuous improvement to customer services including internal and external customers
- implement, monitor and adjust improvement plans, processes and procedures to improve performance
- document performance to identify further opportunities for improvement
- manage records and reports within the organisation's systems and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of continuous improvement processes
- list typical areas of need for coaching and mentoring to support continuous improvement
- explain how change management techniques can support continuous improvement and initiative
- identify the organisation's systems and data that can be used for benchmarking and monitoring performance for continuous improvement.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBMGT502 Manage people performance

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to manage the performance of staff who report to them directly. Development of key result areas and key performance indicators and standards, coupled with regular and timely coaching and feedback, provide the basis for performance management.

It applies to individuals who manage people. It covers work allocation and the methods to review performance, reward excellence and provide feedback where there is a need for improvement.

The unit makes the link between performance management and performance development, and reinforces both functions as a key requirement for effective managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Management

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Allocate work	1.1 Consult relevant groups and individuals on work to be allocated and resources available

ELEMENT	PERFORMANCE CRITERIA
	<p>1.2 Develop work plans in accordance with operational plans</p> <p>1.3 Allocate work in a way that is efficient, cost effective and outcome focussed</p> <p>1.4 Confirm performance standards, Code of Conduct and work outputs with relevant teams and individuals</p> <p>1.5 Develop and agree performance indicators with relevant staff prior to commencement of work</p> <p>1.6 Conduct risk analysis in accordance with the organisational risk management plan and legal requirements</p>
2. Assess performance	<p>2.1 Design performance management and review processes to ensure consistency with organisational objectives and policies</p> <p>2.2 Train participants in the performance management and review process</p> <p>2.3 Conduct performance management in accordance with organisational protocols and time lines</p> <p>2.4 Monitor and evaluate performance on a continuous basis</p>
3. Provide feedback	<p>3.1 Provide informal feedback to staff on a regular basis</p> <p>3.2 Advise relevant people where there is poor performance and take necessary actions</p> <p>3.3 Provide on-the-job coaching when necessary to improve performance and to confirm excellence in performance</p> <p>3.4 Document performance in accordance with the organisational performance management system</p> <p>3.5 Conduct formal structured feedback sessions as necessary and in accordance with organisational policy</p>
4. Manage follow up	<p>4.1 Write and agree on performance improvement and development plans in accordance with organisational policies</p> <p>4.2 Seek assistance from human resources specialists, where appropriate</p> <p>4.3 Reinforce excellence in performance through recognition and continuous feedback</p> <p>4.4 Monitor and coach individuals with poor performance</p> <p>4.5 Provide support services where necessary</p> <p>4.6 Counsel individuals who continue to perform below expectations and implement the disciplinary process if necessary</p> <p>4.7 Terminate staff in accordance with legal and organisational</p>

ELEMENT	PERFORMANCE CRITERIA
	requirements where serious misconduct occurs or ongoing poor-performance continues

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Learning	2.2, 3.3, 4.4	<ul style="list-style-type: none"> <li>Consolidates and improves own knowledge and skills by coaching, mentoring or training others</li> </ul>
Reading	1.2, 1.6, 2.4	<ul style="list-style-type: none"> <li>Gathers, interprets and analyses texts in organisational documents to facilitate performance management</li> </ul>
Writing	1.2, 1.4, 1.5, 1.6, 2.1, 2.3, 2.4, 3.4, 3.5, 4.1, 4.7	<ul style="list-style-type: none"> <li>Plans and prepares documents for allocating work and managing performance suitable for the target audience and in accordance with organisational requirements</li> </ul>

# Assessment Requirements for BSBMGT502 Manage people performance

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- consult with relevant stakeholders to identify work requirements, performance standards and agreed performance indicators
- develop work plans and allocate work to achieve outcomes efficiently and within organisational and legal requirements
- monitor, evaluate and provide feedback on performance and provide coaching or training, as needed
- reinforce excellence in performance through recognition and continuous feedback
- seek assistance from human resources specialists where appropriate
- keep records and documentation in accordance with the organisational performance management system.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant legislative and regulatory requirements
- outline relevant awards and certified agreements
- explain performance measurement systems utilised within the organisation
- explain unlawful dismissal rules and due process
- describe staff development options and information.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBMGT517 Manage operational plan

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to develop and monitor implementation of the operational plan to provide efficient and effective workplace practices within the organisation's productivity and profitability plans.

Management at a strategic level requires systems and procedures to be developed and implemented to facilitate the organisation's operational plan.

This unit applies to individuals who manage the work of others and operate within the parameters of a broader strategic and/or business plan.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Management

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop operational plan	1.1 Research, analyse and document resource requirements and develop an operational plan in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Develop and/or implement consultation processes as an

ELEMENT	PERFORMANCE CRITERIA
	<p>integral part of the operational planning process</p> <p>1.3 Ensure the operational plan includes key performance indicators to measure organisational performance</p> <p>1.4 Develop and implement contingency plans for the operational plan</p> <p>1.5 Ensure the development and presentation of proposals for resource requirements is supported by a variety of information sources and seek specialist advice as required</p> <p>1.6 Obtain approval for the plan from relevant parties and explain the plan to relevant work teams</p>
2. Plan and manage resource acquisition	<p>2.1 Develop and implement strategies to ensure that employees are recruited and/or inducted within the organisation's human resources management policies, practices and procedures</p> <p>2.2 Develop and implement strategies to ensure that physical resources and services are acquired in accordance with the organisation's policies, practices and procedures</p> <p>2.3 Recognise and incorporate requirements for intellectual property rights and responsibilities in recruitment and acquisition of resources and services</p>
3. Monitor and review operational performance	<p>3.1 Develop, monitor and review performance systems and processes to assess progress in achieving profit and productivity plans and targets</p> <p>3.2 Analyse and interpret budget and actual financial information to monitor and review profit and productivity performance</p> <p>3.3 Identify areas of under-performance, recommend solutions and take prompt action to rectify the situation</p> <p>3.4 Plan and implement systems to ensure that mentoring and coaching are provided to support individuals and teams to effectively, economically and safely use resources</p> <p>3.5 Negotiate recommendations for variations to operational plans and gain approval from designated persons/groups</p> <p>3.6 Develop and implement systems to ensure that procedures and records associated with documenting performance are managed in accordance with organisational requirements</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

# Assessment Requirements for BSBMGT517 Manage operational plan

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- develop and implement an operational plan using a variety of information sources and consultation (including using specialist advice if required) which includes:
  - resource requirements
  - key performance indicators
  - monitoring processes
  - contingency plans
- communicate effectively with relevant stakeholders to explain the plan and supporting information, seek approvals, negotiate variations and engage work teams
- develop and implement strategies to achieve the operational plan within the organisation's policies, practices and procedures including:
  - recruiting, inducting and developing personnel
  - acquiring physical resources and services
  - protecting intellectual property
  - making variations to the plan
  - monitoring and documenting performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe models and methods for operational plans
- explain the role of an operational plan in achieving the organisation's objectives
- explain budgeting processes

- list alternative approaches to developing key performance indicators to meet business objectives
- outline the legislative and regulatory context relevant to the operational plan of the organisation
- outline the organisation's policies, practices and procedures that directly relate to the operational plan.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation and regulations
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBMGT605 Provide leadership across the organisation

## Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to use interpersonal and risk management skills to:

- clearly communicate the organisation's objectives, values and standards to a range of stakeholders using appropriate media and language
- influence, support and provide resources for individuals and groups to:
  - participate in consultations and decision making processes
  - contribute to innovation and improvements
  - achieve their responsibilities and objectives
- facilitate consultative decision making processes with relevant internal and external stakeholders
- demonstrate ethical conduct and professional competence and continuing professional development
- encourage others to adopt business ethics and build their commitment to the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain business ethics and their application to leadership
- outline leadership styles and their application in supporting the organisation's mission, objectives and values
- explain the impact of legislation in providing leadership in the organisation
- explain the organisation's mission, purpose and values
- describe organisation objectives, plans and strategies
- explain organisational change processes.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulation, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBMGT616 Develop and implement strategic plans

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to establish the strategic direction of the organisation, sustain competitive advantage and enhance competitiveness. It covers analysis and interpretation of relevant markets, capability assessment of the organisation and analysis of the organisation's existing and potential competitors and allies. It also covers implementation of the strategic plan and developing specific actions and initiatives that will be undertaken by people working in various roles.

It applies to individuals working in senior roles in the organisation who have responsibility for ensuring that the organisation is positioned to ensure its long-term viability and success.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Management

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm organisational vision and mission	1.1 Check with stakeholders that organisational vision and mission are still held to be current and are supported 1.2 Make any changes or refinements to vision or mission statement as required 1.3 Review or develop organisational values to support the vision

ELEMENT	PERFORMANCE CRITERIA
	<p>and mission statement</p> <p>1.4 Gain support for strategic planning process from all relevant stakeholders</p>
2. Analyse the internal and external environment	<p>2.1 Determine information requirements and undertake or commission research to deliver relevant information</p> <p>2.2 Analyse political, economic, social, and technological developments in a global context</p> <p>2.3 Seek advice from appropriate experts wherever necessary</p> <p>2.4 Identify and consider strengths and weaknesses of existing and potential competitors and allies</p> <p>2.5 Analyse organisation's strengths, weaknesses, opportunities and threats</p> <p>2.6 Consider cooperative ventures that are supported by risk and cost benefit analyses, are consistent with the organisational vision, mission and values and provide for due diligence</p> <p>2.7 Check that analysis of internal and external environment is consistent with the perspectives of other informed people</p>
3. Write strategic plan	<p>3.1 Document relevant research and background for inclusion in the strategic plan</p> <p>3.2 Formulate strategic objectives and strategies needed for the future</p> <p>3.3 Detail each strategy with an assigned priority, a timeframe, responsible parties and measurable performance indicators</p> <p>3.4 Circulate strategic plan for comment, support and endorsement</p>
4. Implement strategic plan	<p>4.1 Communicate strategic plan to all relevant parties</p> <p>4.2 Brief people with a specific role in relation to strategies</p> <p>4.3 Use performance indicators to monitor progress in implementing plan</p> <p>4.4 Make necessary refinements to plan</p> <p>4.5 Evaluate achievement of objectives at agreed milestones</p> <p>4.6 Review effectiveness of plan and consider methods for improving strategic planning processes</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1, 2.2, 2.4-2.6, 3.1, 3.3, 4.4-4.6	<ul style="list-style-type: none"> <li>Identifies and analyses complex organisational texts to determine business requirements</li> <li>Reviews, evaluates, interprets and applies content from a range of sources to aid in development of strategies</li> </ul>
Writing	1.2, 1.3, 2.1, 2.2, 2.4-2.6, 3.1-3.3, 4.3-4.6	<ul style="list-style-type: none"> <li>Prepares strategic plans for relevant stakeholders incorporating appropriate vocabulary, grammatical structure and conventions</li> <li>Incorporates amendments to documents according to organisational requirements</li> <li>Collates and compiles data to convey specific information, requirements and recommendations</li> </ul>
Oral Communication	1.1, 1.4, 2.3, 4.1, 4.2	<ul style="list-style-type: none"> <li>Presents information and seeks advice using language and register appropriate to audience</li> <li>Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding</li> </ul>
Numeracy	2.6, 3.2, 3.3, 4.5, 4.6	<ul style="list-style-type: none"> <li>Interprets and analyses statistical data and mathematical information to consider trends and resource implications of proposed strategies</li> </ul>
Navigate the world of work	1.1-1.3	<ul style="list-style-type: none"> <li>Works autonomously making high level decisions to achieve and improve organisational goals</li> <li>Takes a lead role in the development of strategies to achieve organisational goals</li> </ul>
Interact with others	1.1, 1.4, 2.3, 3.4, 4.1, 4.2	<ul style="list-style-type: none"> <li>Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information</li> <li>Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role</li> <li>Seeks feedback or expert advice where required</li> </ul>
Get the work done	1.3, 2.1, 2.2, 2.4-2.7, 3.2, 4.3-4.6	<ul style="list-style-type: none"> <li>Develops flexible plans for complex, high impact activities with strategic implications, taking into account capabilities, efficiencies and effectiveness</li> <li>Systematically gathers and analyses all relevant information and evaluates options to inform decisions about organisational strategies</li> <li>Evaluates outcomes to identify opportunities for</li> </ul>

		improvement <ul style="list-style-type: none"> <li>• Applies problem solving processes to identify risks, evaluate options and determine solutions</li> </ul>

# Assessment Requirements for BSBMGT616 Develop and implement strategic plans

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- consult and communicate effectively with relevant stakeholders to:
  - confirm or revise the organisation's mission, vision and values
  - validate findings of research and analysis
  - get input to and endorsement of strategic plans
  - brief relevant parties about the plan
- analyse organisation's internal and external environment to formulate strategic plans including:
  - background and research relevant to the plan
  - legislation, regulations and codes of practice, including for intellectual property
  - objectives, strategies and priorities
  - roles and responsibilities
  - performance indicators
  - timeframes
  - consideration of co-operative ventures
  - cost-benefit and risk analysis
- seek advice from appropriate experts wherever necessary
- monitor and evaluate the implementation of the plan and make refinements as appropriate
- review effectiveness of planning processes and identify opportunities for improvement.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislation, regulations and codes of practice relevant to the organisation's strategic plan.
- give examples of risks and risk management strategies relevant to strategic planning including:
  - intellectual property rights and responsibilities
  - other risks
- outline strategic planning methodologies including political, economic, social and technological (PEST) analysis and strengths, weaknesses, opportunities and threats analysis (SWOT)
- identify internal and external sources of information relevant to the organisation's market, competitors, customer base, vision, values and capabilities
- outline techniques for developing organisational values.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBMKG507 Interpret market trends and developments

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to conduct an analysis of market data in order to determine organisational and competitor business performance and to prepare market and business forecasts. The information assists in developing an organisation's marketing plan and to determine the current or potential future success of marketing strategies.

This unit applies to marketing professionals who use statistical techniques to analyse organisational and competitor marketing performance and to interpret new and emerging trends when forecasting future business needs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Business Development – Marketing

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Interpret trends and market developments	1.1 Use statistical analysis of market data to interpret market trends and developments 1.2 Analyse market trends and developments for their potential impact on the business 1.3 Use measures of central tendency or dispersion and correlations between sets of data for quantitative interpretation of comparative

ELEMENT	PERFORMANCE CRITERIA
	<p>market data</p> <p>1.4 Perform qualitative analysis of comparative market information as a basis for reviewing business performance</p> <p>1.5 Analyse the market performance of existing and potential competitors and their products or services to identify potential opportunities or threats</p>
2. Analyse qualitative results	<p>2.1 Analyse performance data from all areas of the business to determine success of marketing activities</p> <p>2.2 Identify over-performing and under-performing products and services to be considered for redevelopment or withdrawal</p> <p>2.3 Forecast existing and emerging market needs based on information available using forecasting techniques</p>
3. Report on market data	<p>3.1 Prepare, plot and interpret data for visual presentation</p> <p>3.2 Assess visual presentation for potential problems, and take any necessary corrective action</p> <p>3.3 Report on analysis of market data to meet organisational requirements in terms of content, format, level of detail and scheduling</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.2, 1.5, 2.1, 2.3	<ul style="list-style-type: none"> <li>Researches, evaluates, analyses and interprets market information from a range of sources, and interprets requirements</li> </ul>
Writing	3.1, 3.2, 3.3	<ul style="list-style-type: none"> <li>Prepares reports containing complex ideas and concepts and writes in a range of styles to suit different audiences</li> </ul>
Numeracy	1.1-1.5, 2.1, 2.3	<ul style="list-style-type: none"> <li>Collects, organises and analyses data to draw conclusions or make forecasts about trends and probability</li> <li>Uses specialised statistical analysis techniques</li> </ul>
Oral Communication	3.1, 3.3	<ul style="list-style-type: none"> <li>Presents information to a range of audiences using appropriate vocabulary and non-verbal features</li> </ul>

Interact with others	3.1, 3.3	<ul style="list-style-type: none"> <li>Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a range of communication practices to present findings</li> </ul>
Get the work done	1.1, 1.2, 1.4, 1.5, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> <li>Develops plans and uses effective organisational and time management skills to complete tasks with an awareness of how they may contribute to longer term operational and strategic goals</li> <li>Applies systematic and analytical decision making processes in complex and non-routine situations</li> <li>Uses digital technologies and systems to enter and analyse data and to present information</li> </ul>

# Assessment Requirements for BSBMKG507 Interpret market trends and developments

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- apply statistical and qualitative analysis techniques to identify:
  - current business performance
  - competitor performance
  - potential threats and opportunities
- apply qualitative and forecasting techniques to identify:
  - success of marketing activities
  - over and under-performing products and services
  - existing and emerging market needs
- document the analysis of market data including visual presentation of findings.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline internal and external sources of information relevant to forecasting market trends including:
  - business and strategic objectives
  - marketing and other business performance
  - comparative market information
  - changes in technology
  - demographic changes
  - social and cultural factors
  - economic trends

- government activities and legislative changes
- industry trends
- supplier data
- outline the legislative and regulatory context as it applies to marketing
- identify software applications that are commonly used in quantitative and qualitative analysis and outline their key features
- outline statistical concepts, methods, techniques and reporting formats commonly used in marketing including:
  - conversion rate of leads to sales
  - measures of central tendency
  - measures of dispersion
  - nature and degree of relationship between variables
  - net response rate
  - normal distribution probability curve
  - sampling
  - speed of response curve
  - recency or frequency grids
  - lifetime value of customers
  - net present value of customers.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBPMG522 Undertake project work

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to undertake a straightforward project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects.

This unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project.

The unit does not apply to specialist project managers. For specialist project managers, the other units of competency in the project management field (BSBPMG) will be applicable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Project Management

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Define project	1.1 Access project scope and other relevant documentation 1.2 Define project stakeholders 1.3 Seek clarification from delegating authority of issues related to

ELEMENT	PERFORMANCE CRITERIA
	<p>project and project parameters</p> <p>1.4 Identify limits of own responsibility and reporting requirements</p> <p>1.5 Clarify relationship of project to other projects and to the organisation's objectives</p> <p>1.6 Determine and access available resources to undertake project</p>
2. Develop project plan	<p>2.1 Develop project plan in line with the project parameters</p> <p>2.2 Identify and access appropriate project management tools</p> <p>2.3 Formulate risk management plan for project, including Work Health and Safety (WHS)</p> <p>2.4 Develop and approve project budget</p> <p>2.5 Consult team members and take their views into account in planning the project</p> <p>2.6 Finalise project plan and gain necessary approvals to commence project according to documented plan</p>
3. Administer and monitor project	<p>3.1 Take action to ensure project team members are clear about their responsibilities and the project requirements</p> <p>3.2 Provide support for project team members, especially with regard to specific needs, to ensure that the quality of the expected outcomes of the project and documented time lines are met</p> <p>3.3 Establish and maintain required recordkeeping systems throughout the project</p> <p>3.4 Implement and monitor plans for managing project finances, resources and quality</p> <p>3.5 Complete and forward project reports as required to stakeholders</p> <p>3.6 Undertake risk management as required to ensure project outcomes are met</p> <p>3.7 Achieve project deliverables</p>
4. Finalise project	<p>4.1 Complete financial recordkeeping associated with project and check for accuracy</p> <p>4.2 Ensure transition of staff involved in project to new roles or reassignment to previous roles</p> <p>4.3 Complete project documentation and obtain necessary sign-offs for concluding project</p>
5. Review project	<p>5.1 Review project outcomes and processes against the project scope and plan</p>

ELEMENT	PERFORMANCE CRITERIA
	5.2 Involve team members in the project review 5.3 Document lessons learned from the project and report within the organisation

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 3.4, 3.5, 4.1, 4.3, 5.1	<ul style="list-style-type: none"> <li>Organises, evaluates and critiques ideas and information from a range of complex texts</li> </ul>
Writing	2.1, 2.3, 2.6, 3.3, 3.5, 4.1, 4.3, 5.3	<ul style="list-style-type: none"> <li>Develops plans, reports and recommendations using vocabulary, structure and conventions appropriate to text</li> <li>Establishes and maintains records according to organisational requirements</li> </ul>
Numeracy	1.6, 2.4, 3.4, 4.1	<ul style="list-style-type: none"> <li>Uses formal and some informal, oral and written mathematical language and representation to prepare and communicate budgetary and financial information</li> </ul>

# Assessment Requirements for BSBPMG522 Undertake project work

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- define the parameters of the project including:
  - project scope
  - project stakeholders, including own responsibilities
  - relationship of project to organisational objectives and other projects
  - reporting requirements
  - resource requirements
- use project management tools to develop and implement a project plan including:
  - deliverables
  - work breakdown
  - budget and allocation of resources
  - timelines
  - risk management
  - recordkeeping and reporting
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project
- finalise the project including documentation, sign-offs and reporting
- review and document the project outcomes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of project management tools and how they contribute to a project
- outline types of documents and other sources of information commonly used in defining the parameters of a project
- explain processes for identifying and managing risk in a project
- outline the organisation's mission, goals, objectives and operations and how the project relates to them
- explain the organisation's procedures and processes that are relevant to managing a project including:
  - lines of authority and approvals
  - quality assurance
  - human resources
  - budgets and finance
  - recordkeeping
  - reporting
- outline the legislative and regulatory context of the organisation in relation to project work, including work health and safety (WHS) requirements.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBREL401 Establish networks

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to develop and maintain effective work relationships and networks through relationship building and negotiation skills required by workers within an organisation as well as freelance or contract workers.

It applies to individuals with a broad knowledge of networking and negotiation who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or to delegate aspects of tasks to others.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Unit Sector

Stakeholder Relations – Relationship Management

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop and maintain business networks	1.1 Use appropriate network strategies to establish and maintain relationships that promote the development of business opportunities 1.2 Identify and pursue network opportunities to maximise a range of contacts 1.3 Communicate information regarding new networks to inform

ELEMENT	PERFORMANCE CRITERIA
	<p>individuals, colleagues and clients of potential benefits</p> <p>1.4 Participate in professional networks and associations to obtain and maintain personal knowledge and skills</p>
2. Establish and maintain business relationships	<p>2.1 Develop and maintain relationships to promote benefits consistent with organisational/client requirements</p> <p>2.2 Gain and maintain trust and confidence of contacts through demonstration of high standards of business practices</p> <p>2.3 Use a high level of negotiation skills to encourage positive outcomes</p> <p>2.4 Identify difficult situations and negotiate solutions using collaborative problem-solving techniques</p> <p>2.5 Seek specialist advice in the development of contacts where appropriate</p>
3. Promote the relationship	<p>3.1 Develop strategies to represent and promote the interests and requirements of the relationship</p> <p>3.2 Use appropriate presentation skills to communicate the goals and objectives of the relationship</p> <p>3.3 Effectively communicate issues, policies and practices of the relationship to a range of audiences, in writing and verbally</p> <p>3.4 Obtain feedback to identify and develop ways to improve promotional activities within available opportunities</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Learning	1.4, 3.4	<ul style="list-style-type: none"> <li>Seeks opportunities to develop and extend expertise and identify areas for professional improvement</li> </ul>
Reading	2.1	<ul style="list-style-type: none"> <li>Sources and analyses information to establish networks that consistently promote business opportunities</li> </ul>
Writing	1.1-1.3, 2.1, 2.2, 2.5 3.1-3.4	<ul style="list-style-type: none"> <li>Uses appropriate vocabulary, layout and grammatical structure to convey ideas and information</li> </ul>

Oral Communication	1.1-1.4, 2.1-2.5, 3.2, 3.3, 3.4	<ul style="list-style-type: none"> <li>Utilises persuasive language and appropriate non-verbal features to achieve mutually acceptable outcomes</li> <li>Uses active listening and questioning techniques to confirm understanding</li> </ul>
Navigate the world of work	2.1	<ul style="list-style-type: none"> <li>Understands and adheres to organisational policies and procedures</li> </ul>
Interact with others	1.1-1.4, 2.1-2.5, 3.1, 3.2	<ul style="list-style-type: none"> <li>Actively identifies the requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience</li> <li>Looks for ways of establishing connections and building genuine understanding with a diverse range of people</li> <li>Begins to cultivate relationships with people with the knowledge, skills and influence to get things done or provide support</li> </ul>
Get the work done	1.1, 1.2, 2.1, 2.4	<ul style="list-style-type: none"> <li>Takes responsibility for planning, sequencing and implementing tasks required to build and maintain networks</li> <li>Uses analytical processes to identify problems, gather relevant information, evaluate options and determine solutions</li> </ul>

## Assessment Requirements for BSBREL401 Establish networks

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- identify and use networking opportunities
- maintain records of relevant contacts
- use written and verbal communication skills to establish, cultivate and promote professional business relationships
- use feedback to improve promotional activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list and describe strategies for establishing and maintaining business relationships
- identify relevant networks, organisations, agencies, associations or individuals
- describe the principles and techniques needed to negotiate positive outcomes
- explain client or organisational policies, plans and procedures relevant to business relationships
- outline methods for obtaining feedback on promotional activities.

### Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations – relationship management field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBRES411 Analyse and present research information

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

### Application

This unit describes the skills and knowledge required to gather, organise, analyse and present workplace information using available systems and sources. This includes identifying research requirements and sources of information, applying information to a set of facts, evaluating the quality and reliability of the information, and preparing and producing reports.

It applies to individuals in roles in which they are required to apply their broad knowledge of the work environment to analysis and research tasks, evaluate information from a variety of sources and apply solutions to a range of predictable and unpredictable problems.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

### Unit Sector

Knowledge Management – Research

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify reliable sources of research information	1.1 Identify potential sources for research information relevant to the organisation requirements 1.2 Assess reliability of potential sources, considering accuracy, authority, audience, relevance and likelihood of bias 1.3 Access research information and extract in a format suitable for analysis, interpretation and dissemination in accordance with

ELEMENT	PERFORMANCE CRITERIA
	organisational requirements 1.4 Store research information, in accordance with organisational requirements
2. Analyse and synthesise research information	2.1 Clearly define objectives of research ensuring consistency with organisational requirements 2.2 Ensure that information research strategies are relevant to the requirements of the research and aligned to organisational objectives 2.3 Apply information research strategy to obtain relevant information, identifying themes and drawing conclusions in line with established objectives of research 2.4 Demonstrate that assumptions and conclusions used in analyses are clear, justified, supported by evidence and consistent with research and business objectives
3. Present research information	3.1 Identify appropriate methods of reporting, considering the intended audience and relevant organisational requirements 3.2 Report on findings in an appropriate format, style and structure within a pre-determined timeframe 3.3 Report and distribute research findings in accordance with organisational requirements 3.4 Obtain feedback and comments on suitability and sufficiency of findings in accordance with organisational requirements

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Analyses and evaluates textual information to develop information research strategies, integrate facts and ideas and meet organisational requirements</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Gathers, evaluates and integrates information from a range of sources</li> <li>Presents findings, recommendations and issues in required format using language, structure and style appropriate to audience</li> </ul>
Oral	<ul style="list-style-type: none"> <li>Presents recommendations and issues using language appropriate to</li> </ul>

Communication	audience and according to organisational requirements
Navigate the world of work	<ul style="list-style-type: none"> <li>Recognises and follows organisational policies and procedures and meets expectations associated with own role</li> </ul>
Interact with others	<ul style="list-style-type: none"> <li>Selects and uses appropriate communication practices when seeking or sharing information</li> </ul>
Get the work done	<ul style="list-style-type: none"> <li>Plans, organises and implements tasks to meet organisational requirements</li> <li>Takes responsibility for the outcomes of routine decisions related directly to own role</li> <li>Uses the main features and functions of digital technologies and tools to complete work tasks</li> <li>Recognises and takes responsibility for addressing foreseeable problems in familiar work contexts</li> </ul>

## Assessment Requirements for BSBRES411 Analyse and present research information

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

### Performance Evidence

Evidence of the ability to:

- identify research requirements and objectives
- gather, organise and present research information
- communicate effectively with research stakeholders to clarify requirements
- maintain and handle information and documents systematically and securely
- preparing reports on research findings including:
  - recommendations based on the analysis of research information
  - clear and justified assumptions and conclusions
  - use of efficient and reliable research methods
- analyse, evaluate and interpret research information to support organisational activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- Key features of organisational policies and procedures relating to:
  - the access of digital information
  - the storage/transmission of information
  - legal and ethical obligations relating to workplace information
- key concepts related to research and analysis including reliability and validity
- key features of research processes and strategies to identify new sources (online and print) of information and efficient and effective use.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- workplace information systems, equipment and resources
- workplace policies and procedures
- case studies and, where possible, real situations in the workplace.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## BSBRKG304 Maintain business records

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to maintain the records of a business or records system in good order on a day-to-day basis.

It applies to individuals who follow established guidelines and processes to assist them to carry out their work. They work under supervision or in consultation with more senior staff or system users to support effective recordkeeping and governance practices across the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Knowledge Management – Recordkeeping

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collate business records	1.1 Identify individual records or information which should be incorporated into business or records system according to organisational criteria 1.2 Sort records in accordance with workplace requirements 1.3 Follow security and access requirements in accordance with organisational procedures

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
2. Update business or records system	<p>2.1 Identify and record control information for describing new records to be incorporated into business or records system</p> <p>2.2 Update control information describing movement or use of records within business or records system</p> <p>2.3 Accurately record and update control information in business or records system</p> <p>2.4 Identify and remove records of completed business activities from current system for disposal</p>
3. Prepare reports from the business or records system	<p>3.1 Interpret requests for reports and clarify the content and frequency sought, where necessary</p> <p>3.2 Prepare reports from business or records system in accordance with instructions or request</p> <p>3.3 Prepare reports in accordance with organisational security and access procedures</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

# Assessment Requirements for BSBRKG304 Maintain business records

## Modification History

Release	Comments
Release1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- collate business records in compliance with organisational procedures and workplace requirements
- record and update control information accurately in business records system.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the organisational requirements regarding the maintenance and security of business records
- describe the general principles and processes of records management and records management systems, such as:
  - systems of control
  - records continuum theory
  - mandate and ownership of business process
  - environmental context
  - records characteristics.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – recordkeeping field of work and include access to:

- relevant workplace documentation and resources

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBRSK401 Identify risk and apply risk management processes

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to identify risks and to apply established risk management processes to a defined area of operations that are within the responsibilities and obligations of the role.

It applies to individuals with a broad knowledge of risk analysis or project management who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

In this unit, risks applicable within own work responsibilities and area of operation, may include projects being undertaken individually or by a team, or operations within a section of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Regulation, Licensing and Risk – Risk Management

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify risks	1.1 Identify the context for risk management 1.2 Identify risks using tools, ensuring all reasonable steps have

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	<p>been taken to identify all risks</p> <p>1.3 Document identified risks in accordance with relevant policies, procedures, legislation and standards</p>
2. Analyse and evaluate risks	<p>2.1 Analyse and document risks in consultation with relevant stakeholders</p> <p>2.2 Undertake risk categorisation and determine level of risk</p> <p>2.3 Document analysis processes and outcomes</p>
3. Treat risks	<p>3.1 Determine appropriate control measures for risks and assess for strengths and weaknesses</p> <p>3.2 Identify control measures for all risks</p> <p>3.3 Refer risks relevant to whole of organisation or having an impact beyond own work responsibilities and area of operation to others as per established policies and procedures</p> <p>3.4 Choose and implement control measures for own area of operation and/or responsibilities</p> <p>3.5 Prepare and implement treatment plans</p>
4. Monitor and review effectiveness of risk treatment/s	<p>4.1 Regularly review implemented treatment/s against measures of success</p> <p>4.2 Use review results to improve the treatment of risks</p> <p>4.3 Provide assistance to auditing risk in own area of operation</p> <p>4.4 Monitor and review management of risk in own area of operation</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Reading	1.2	<ul style="list-style-type: none"> <li>Comprehends documents and texts of varying complexity to extract and analyse relevant information</li> </ul>
Writing	1.3, 2.1, 2.3, 3.5	<ul style="list-style-type: none"> <li>Uses specific, industry related terminology and logical organisational structure in workplace documents that identify and analyse risk and report management process outcomes</li> </ul>

# Assessment Requirements for BSBRK401 Identify risk and apply risk management processes

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to apply organisational policies, procedures and processes to:

- identify risks
- consult with relevant stakeholders to analyse and evaluate risks
- identify and evaluate control measures
- develop and implement treatment plans for own area or responsibility
- refer risks that are beyond own area of responsibility to others
- maintain risk management documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline techniques for identifying and evaluating risks
- outline organisational policies, procedures or processes for risk management
- give examples of areas where risks are commonly identified in an organisation
- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- describe the organisation's auditing requirements relating to risk management.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk - risk management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBRSK501 Manage risk

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes skills and knowledge required to manage risks in a range of contexts across an organisation or for a specific business unit or area in any industry setting.

It applies to individuals who are working in positions of authority and are approved to implement change across the organisation, business unit, program or project area. They may or may not have responsibility for directly supervising others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Regulation, Licensing and Risk – Risk Management

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish risk context	1.1 Review organisational processes, procedures and requirements for undertaking risk management in accordance with current risk management standards 1.2 Determine scope for risk management process 1.3 Identify internal and external stakeholders and their issues 1.4 Review political, economic, social, legal, technological and policy context

ELEMENT	PERFORMANCE CRITERIA
	1.5 Review strengths and weaknesses of existing arrangements 1.6 Document critical success factors, goals or objectives for area included in scope 1.7 Obtain support for risk management activities 1.8 Communicate with relevant parties about the risk management process and invite participation
2. Identify risks	2.1 Invite relevant parties to assist in the identification of risks 2.2 Research risks that may apply to scope 2.3 Use tools and techniques to generate a list of risks that apply to the scope, in consultation with relevant parties
3. Analyse risks	3.1 Assess likelihood of risks occurring 3.2 Assess impact or consequence if risks occur 3.3 Evaluate and prioritise risks for treatment
4. Select and implement treatments	4.1 Determine and select most appropriate options for treating risks 4.2 Develop an action plan for implementing risk treatment 4.3 Communicate risk management processes to relevant parties 4.4 Ensure all documentation is in order and appropriately stored 4.5 Implement and monitor action plan 4.6 Evaluate risk management process

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 1.5, 2.2	<ul style="list-style-type: none"> <li>Comprehends a variety of relatively complex texts</li> <li>Gathers, interprets and analyses textual information from a range of sources to identify relevant information</li> </ul>
Writing	1.6, 1.8, 2.1, 2.3, 4.3	<ul style="list-style-type: none"> <li>Develops textual material and organises content in a manner that effectively documents</li> </ul>

		risk management analysis and assessment priorities and processes
Oral Communication	1.8, 2.1, 2.3, 4.3	<ul style="list-style-type: none"> <li>Participates in interactions with stakeholders using questioning and listening to elicit opinions, and to confirm and clarify understanding</li> </ul>
Numeracy	2.2	<ul style="list-style-type: none"> <li>Uses numerical tools to assess risk and uses numerical data to review plans</li> </ul>
Navigate the world of work	1.1, 2.1, 4.3	<ul style="list-style-type: none"> <li>Refers to organisational processes, procedures and requirements when making decisions about risk management</li> </ul>
Interact with others	1.8, 2.1, 2.3, 4.3	<ul style="list-style-type: none"> <li>Establishes and uses appropriate conventions and protocols when communicating with stakeholders about risk management</li> <li>Consults and negotiates with stakeholders about risk management processes and outcomes</li> </ul>

## Assessment Requirements for BSBR501 Manage risk

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- analyse information from a range of sources to identify the scope and context of the risk management process including:
  - stakeholder analysis
  - political, economic, social, legal, technological and policy context
  - current arrangements
  - objectives and critical success factors for the area included in scope
  - risks that may apply to scope
- consult and communicate with relevant stakeholders to identify and assess risks, determine appropriate risk treatment actions and priorities and explain the risk management processes
- develop and implement an action plan to treat risks
- monitor and evaluate the action plan and risk management process
- maintain documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- outline organisational policies, procedures and processes for risk management.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk - risk management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBSMB301 Investigate micro business opportunities

## Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0.  Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- research and analyse information from a range of sources to investigate a business opportunity, including:
  - financial considerations
  - digital technologies
  - market size, potential and trends
  - ethical and cultural requirements of the market
  - resource availability
- review data for potential impact on the market, products, services and customers
- match products and services to the business opportunity.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- locate and outline legislation and regulation relevant to specific micro business opportunities being investigated
- identify sources of specialist advice on trends in new and emerging markets and decline and risk factors

- summarise benefits and challenges of digital technologies relevant to micro business opportunities
- describe appropriate business research methods and data collection tools and software.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- internet access for research
- data collection tools and software
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies, or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBSMB305 Comply with regulatory, taxation and insurance requirements for the micro business

## Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- identify regulatory, taxation and insurance compliance requirements, and risk minimisation needs of the business
- identify, select and access sources of advice on compliance and risk minimisation procedures for the business
- complete a development and review of procedures for compliance and risk minimisation (with assistance from advisors).

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify micro business registration and licensing requirements
- list government legislative requirements relating to business operation
- categorise the nature of legal responsibility
- pinpoint relevant industry codes of practice
- list relevant WHS responsibilities and procedures
- name sources of advice and specialist services
- identify sources of information about regulatory, taxation and insurance requirements and issues
- outline taxation requirements.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business technology including internet access for research
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## Assessment Requirements for BSBSMB401 Establish legal and risk management requirements of small business

### Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0.  Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- demonstrate a systematic approach to identifying, managing and meeting legal and regulatory requirements, specifically in regard to WHS, business registration and environmental requirements
- ensure compliance, by:
  - following taxation and industrial relations principles
  - updating and maintaining legal documents
  - investigating areas of non-compliance
  - monitoring provision of products and services
  - taking corrective action where necessary
- negotiate and arrange contracts, including:
  - seeking legal advice
  - investigating procurement rights
  - identifying options of leasing or ownership of business premises.
- Identify, assess and treat risks specific to the business including
  - prioritising risks with highest probability of occurrence and greatest negative impact on the business
  - identifying insurance requirements

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline business registration and licensing requirements
- identify all government legislative requirements relating to the specific business operation
- explain creation and termination of relevant legal contracts
- summarise relevant cultural differences and legal implications
- describe legal rights and obligations of alternative ownership structures
- outline necessary record keeping to meet minimum legal and taxation requirements
- summarise relevant consumer legislation and industry codes of practice
- outline the key steps in the risk management process
- explain relevant insurance requirements and products.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- office equipment and resources
- business technology including internet access
- specialist software for analysis of data
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies, or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBSMB402 Plan small business finances

## Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- develop a financial plan which identifies financial requirements of the business, including cash flow projections and a projected profit statement
- follow the financial plan, including:
  - demonstrating an awareness of appropriate legal requirements
  - implementing strategies to monitor financial performance
- identify sources and investigate costs of securing appropriate financial assistance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain break-even analysis
- clarify costing for the business, including margin or mark-up, hourly charge-out rates and unit costs
- summarise financial decision-making relevant to the business
- outline methods and relative costs of obtaining finance
- summarise principles for preparing balance sheets
- provide a detailed explanation of:
  - principles for preparation of cash flow forecasts
  - principles for preparation of profit and loss statements

- purpose of financial reports
- explain relevant accounting terminology
- describe working capital cycles.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- software for financial calculations
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBSMB403 Market the small business

## Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 2.0.  Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- determine marketing activity focus in line with objectives of the business plan
- evaluate customer base
- understand what is ethically and culturally appropriate
- determine a marketing mix according to market and business needs, including:
  - ability to optimise sales and profit
  - ability to evaluate costs and benefits
  - determine customer needs and promotional activities
- determine marketing strategies, including briefing appropriate personnel on their responsibilities
- identify marketing opportunities in the digital environment
- develop approaches to engage, respond and monitor customers in the digital space
- monitor and evaluate activities and performance, and correct performance gaps
- consult and communicate effectively with relevant people
- research and monitor ongoing changes and improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss industry market trends
- identify performance evaluation methods
- explain methods of analysing costs and benefits of marketing strategies
- summarise methods of developing marketing objectives and marketing mix
- compare current digital devices, platforms and technologies for effectiveness in achieving marketing objectives
- outline methods of monitoring customer satisfaction
- identify relevant market analysis and research
- provide a detailed explanation of relevant marketing concepts and methods.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business technology
- software for analysis of data
- workplace documents and case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBSMB404 Undertake small business planning

### Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to research and develop an integrated business plan for achieving business goals and objectives.

It applies to individuals who operate a small business that operates independently, or as part of a larger organisation. Individuals in this role interpret business information and numerical data competently.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Small and Micro Business

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify elements of the business plan	1.1 Identify purpose of the business plan 1.2 Identify and review essential components of the business plan 1.3 Identify and document business goals and objectives as a basis for measuring business performance

ELEMENT	PERFORMANCE CRITERIA
2. Develop a business plan	<p>2.1 Research resources, legal and compliance requirements, specifically in relation to work health and safety (WHS), in accordance with business goals and objectives</p> <p>2.2 Research market needs, and market size and potential</p> <p>2.3 Identify sources and costs of finance, from financial plan, to provide required liquidity and profitability for the business</p> <p>2.4 Identify methods, from marketing strategies, to promote market exposure of the business</p> <p>2.5 Identify methods or means of production or operation from production or operations plan to conform with business goals and objectives</p> <p>2.6 Identify staffing requirements to effectively produce or deliver products and services</p> <p>2.7 Identify, assess and prioritise internal and external risks</p> <p>2.8 Identify specialist services and sources of advice, where required, and cost in accordance with available resources</p>
3. Develop strategies for minimising risks	<p>3.1 Identify specific interests and objectives of relevant people and seek and confirm their support of planned business direction</p> <p>3.2 Identify and develop risk management strategies according to business goals and objectives, and relevant legal requirements</p> <p>3.3 Develop a contingency plan to address possible areas of non-conformance with the plan</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.7, 3.1, 3.2	<ul style="list-style-type: none"> <li>Identifies, analyses and evaluates complex workplace documentation during planning process</li> </ul>
Writing	1.3, 2.3-2.7, 3.1-3.3	<ul style="list-style-type: none"> <li>Prepares written reports and workplace documentation that communicate complex information clearly and effectively</li> </ul>
Oral	1.1, 3.1	<ul style="list-style-type: none"> <li>Articulates ideas and requirements clearly and</li> </ul>

Communication		creatively based on techniques appropriate to assess business performance
Numeracy	2.2, 2.3, 2.5-2.7	<ul style="list-style-type: none"> <li>Interprets numerical information to determine prospective markets, resource allocations and business profits/losses</li> </ul>
Navigate the world of work	2.1, 3.2	<ul style="list-style-type: none"> <li>Appreciates implications of legal and regulatory responsibilities related to own work</li> </ul>
Interact with others	3.1	<ul style="list-style-type: none"> <li>Looks for strengths in others, finding ways of working with and building on these and sharing own knowledge and experience freely</li> </ul>
Get the work done	1.1, 1.2, 2.1-2.7, 3.2, 3.3	<ul style="list-style-type: none"> <li>Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information and to evaluate alternative strategies</li> <li>Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues</li> <li>Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account</li> <li>Identifies concepts, principles and features of approaches in use in other contexts, and redesigns these to suit own situation</li> <li>Uses formal and informal processes to monitor implementation of solutions and reflect on outcomes</li> </ul>

# Assessment Requirements for BSBSMB404 Undertake small business planning

## Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- develop a business plan which provides for finance, marketing and provision of products or services to facilitate all business goals and objectives
- identify and plan all work health and safety (WHS) and duty of care responsibilities
- identify and assess internal and external risks to the business
- develop risk management strategies including a contingency plan for non-conformance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to business operation, especially in regard to WHS and environmental issues, equal employment opportunity, industrial relations and anti-discrimination
- explain methods of evaluation
- summarise WHS responsibilities and procedures for identifying hazards relevant to the business
- outline planning processes
- describe preparation of a business plan
- identify principles of risk management relevant to small business planning
- outline common risks particular to the small business type or industry
- explain reasons for, and benefits of, business planning

- clarify relevant industry codes of practice
- outline setting goals and objectives
- explain types of business planning – feasibility studies; strategic, operational, financial and marketing planning.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBSMB405 Monitor and manage small business operations

### Modification History

Release	Comments
Release 3	This version released with BSB Business Services Training Package Version 2.0.  Version created to clarify intent of unit
Release 2	This version first released with BSB Business Services Training Package Version 1.1.  Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to implement a business plan and modify operations as required.

It applies to individuals who operate a small business which stands alone, or is part of a department within a larger organisation. Individuals in this role use problem-solving skills and take responsibility for developing approaches to manage business operations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Small and Micro Business

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the</i>	<i>Performance criteria describe the performance needed to</i>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
<i>essential outcomes.</i>	<i>demonstrate achievement of the element.</i>
1. Develop operational strategies and procedures	1.1 Develop an action plan to provide a clear and coherent direction, in accordance with business goals and objectives 1.2 Identify work health and safety (WHS) and environmental issues, and implement strategies to minimise risk factors 1.3 Develop a quality system for the business in line with industry standards, compliance requirements and cultural criteria 1.4 Develop performance measures and operational targets to conform with the business plan 1.5 Develop strategies for innovation, including utilisation of existing, new or emerging technologies, where practicable, to optimise business performance
2. Implement operational strategies and procedures	2.1 Implement systems and key performance indicators or targets to monitor business performance and customer satisfaction 2.2 Implement systems to control stock, expenditure or cost, wastage or shrinkage and risks to health and safety in accordance with the business plan 2.3 Maintain staffing requirements, where applicable, within budget, to maximise productivity 2.4 Carry out provision of goods or services in accordance with established legal, ethical cultural and technical standards 2.5 Provide goods or services in accordance with time, cost and quality specifications, and customer requirements 2.6 Apply quality procedures to address product or service and customer requirements
3. Monitor business performance	3.1 Regularly monitor and review achievement of operational targets to ensure optimum business performance, in accordance with business plan goals and objectives 3.2 Review systems and structures, with a view to more effectively supporting business performance 3.3 Investigate and analyse operating problems to establish causes and implement changes as required, as part of the business quality system 3.4 Amend operational policies and procedures to incorporate corrective action
4. Review business operations	4.1 Review and adjust business plan, as required, to maintain business viability, in accordance with business goals and

ELEMENT	PERFORMANCE CRITERIA
	objectives 4.2 Clearly record proposed changes to aid future planning and evaluation 4.3 Undertake ongoing research into new business opportunities and adjust business goals and objectives as new business opportunities arise

## Assessment Requirements for BSBSMB405 Monitor and manage small business operations

### Modification History

Release	Comments
Release 3	This version released with BSB Business Services Training Package Version 2.0.  Version created to clarify intent of unit
Release 2	This version first released with BSB Business Services Training Package Version 1.1.  Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- develop strategies and procedures to successfully manage business operations, including:
  - developing an action plan
  - identifying risk management procedures
  - developing a quality system
  - implementing performance measures
  - utilising technologies to optimise business performance
- implement and monitor strategies and procedures developed, including:
  - analysing and correcting business problems
  - reviewing and adjusting the business plan
- record and research business improvements
- make appropriate adjustments to business operations as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise relevant industry codes of practice
- explain methods for implementing operation and revenue control systems
- summarise methods for monitoring performance and implementing improvements
- outline work health and safety (WHS) responsibilities and procedures for managing hazards
- identify relevant principles of risk management, including risk assessment
- clarify quality system principles and methods
- summarise relevant performance measures
- discuss role of innovation
- outline systems to manage staff, stock, expenditure, services and customer service
- identify technical or specialist skills relevant to business operations.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBSMB407 Manage a small team

### Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to select, induct, train and develop staff members to enhance business operations within the parameters of all relevant legislative requirements.

It applies to individuals who operate a small business that stands alone, or is part of a department within a larger organisation. Individuals in this role have a good knowledge of industrial relations and team management and use effective, responsive and supportive communication in workplace interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Small and Micro Business

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop staffing plan	1.1 Determine staffing requirements to allow the business to run effectively, in accordance with requirements outlined in the

ELEMENT	PERFORMANCE CRITERIA
	<p>business plan</p> <p>1.2 Identify and compare existing skills of owner/s and staff with business requirements to identify any gaps</p> <p>1.3 Develop policies and procedures for owner/s and staff, in accordance with the business plan</p>
2. Recruit, induct, train and retain team	<p>2.1 Develop job or position descriptions, competencies required and selection criteria to meet business' needs</p> <p>2.2 Judge information obtained from each candidate against specified selection criteria, and select according to business needs and legal requirements</p> <p>2.3 Induct new staff members in accordance with policies and procedures of the business</p> <p>2.4 Make team members aware of their responsibilities and performance requirements as soon as practicable, and take opportunities to coach team members who are unfamiliar with procedures of the business</p> <p>2.5 Develop and implement a staff development program and career paths based on requirements of business and staff competencies</p> <p>2.6 Advertise staff vacancies appropriately in accordance with staffing plan</p>
3. Comply with industrial relations obligations	<p>3.1 Clarify workplace rights and obligations of employers and employees, in accordance with legal requirements and codes of practice</p> <p>3.2 Counsel staff, if required, in a positive and constructive manner and record outcomes accurately</p>
4. Maintain staff records	<p>4.1 Develop staff records system to provide timely and accurate information, in accordance with confidentiality, legal and taxation requirements</p> <p>4.2 Monitor and accurately maintain system for recording and retrieving personnel and payroll information, and seek specialist advice where required</p>
5. Manage staff	<p>5.1 Regularly review contribution and skills of self and other team members to ensure performance is in line with agreed performance measures</p> <p>5.2 Monitor and adjust staffing requirements to respond to any changes in tasks and functions required by the business</p> <p>5.3 Support and encourage staff, and acknowledge and reward</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>their contribution</p> <p>5.4 Regularly provide opportunities for staff to discuss work related issues</p> <p>5.5 Develop contingency plans to cope with unexpected or extreme situations and take appropriate corrective action as required</p>
6. Review team performance	<p>6.1 Develop positive and constructive relationships with and between team members</p> <p>6.2 Review and update team objectives in support of business goals on a regular basis in consultation with team members</p> <p>6.3 Identify strengths and weaknesses of team against current and expected work requirements</p> <p>6.4 Schedule time, on a regular basis, for team members to review work operations to maintain and improve operational efficiency</p> <p>6.5 Encourage team members to monitor their own performance, suggest improvements and identify professional development needs, in accordance with personal and business requirements</p> <p>6.6 Monitor and review staff turnover rate</p>

## Assessment Requirements for BSBSMB407 Manage a small team

### Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- use the business plan to:
  - determine staffing requirements
  - coordinate skill-gap training where required
  - develop human resource policies and procedures
- develop job descriptions and selection criteria
- determine induction processes
- implement staff development program
- adhere to legal requirements and codes of practice
- develop staff records system
- conduct ongoing performance measures
- communicate effectively with staff members
- develop contingency plans
- develop strategies to review team performance
- monitor and review staff.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to staffing the business operation

- explain work health and safety (WHS) responsibilities and procedures for managing hazards
- summarise relevant industry awards or enterprise agreements
- outline staff development pathways
- identify training course options for staff development
- summarise staff counselling, grievance and disciplinary procedures
- identify unfair dismissal legislation and procedures.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

### Application

This unit describes the skills and knowledge required to prepare a job description and recruit new staff to meet business needs.

It applies to individuals who run a small business that operates independently, or as part of a larger organisation. They have responsibility for defining future personnel requirements, determining job specifications, evaluating and selecting candidates, and recruiting staff.

### Unit Sector

Management and Leadership – Small and Micro Business

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for future staff requirements.	1.1 Calculate staffing requirements and determine the nature of employment 1.2 Determine the competencies and attitudes required 1.3 Develop a job description or position statement that accurately reflects the requirements of the role and meets legislation, codes, national standards and work health and safety (WHS) obligations 1.4 Consult with other staff where relevant to confirm requirements 1.5 Allocate budget and resources to the recruitment and selection process

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
2. Conduct a selection process	<p>2.1 Choose an appropriate strategy to advertise vacancies</p> <p>2.2 Determine if other people will be involved in the selection process and the nature of their input</p> <p>2.3 Decide on the information required from candidate and selection criteria to be applied</p> <p>2.4 Assess candidates against selection criteria</p> <p>2.5 Short-list candidates and schedule interviews or skills demonstrations if applicable and advise relevant people of times, dates and venues</p> <p>2.6 Contact referees for referee reports and investigate external sources of information about the candidate</p> <p>2.7 Select the preferred candidate based on information gained</p>
3. Recruit and induct staff	<p>3.1 Secure preferred candidate's agreement</p> <p>3.2 Advise unsuccessful candidates of outcomes and respond to any feedback requests</p> <p>3.3 Prepare an employment contract covering conditions of employment and other documentation or forms required</p> <p>3.4 Arrange for successful candidate's induction into business</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Reading	1.1-1.3, 2.4-2.7	<ul style="list-style-type: none"> <li>Identifies and analyses complex texts to determine legislative, regulatory and business requirements</li> <li>Analyses and evaluates a range of textual information to determine staff requirements of the organisation, and suitability of candidates</li> </ul>
Writing	1.1-1.4, 2.3, 2.4, 3.1-3.3	<ul style="list-style-type: none"> <li>Researches and develops documents that communicate effectively, attracting suitable candidates for available positions, and reflect all applicable legislative and national standards obligations</li> <li>Creates texts using formats and language appropriate to the audience and context</li> </ul>

Oral Communication	1.4, 2.5, 2.6, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> <li>• Presents information and seeks advice using language appropriate to audience</li> <li>• Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding</li> </ul>
Numeracy	1.1, 1.5	<ul style="list-style-type: none"> <li>• Uses basic numeracy skills to calculate staffing requirements, and resources and budget needed for the recruitment process</li> </ul>
Navigate the world of work	1.3, 3.3	<ul style="list-style-type: none"> <li>• Recognises and adheres to legislative requirements and organisational policies and procedures associated with the recruitment process</li> </ul>
Interact with others	1.4, 2.5, 2.6, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> <li>• Selects and uses appropriate conventions and protocols when communicating with internal stakeholders, as well as candidates and their referees, to seek or share information</li> </ul>
Get the work done	1.1-1.3, 1.5, 2.1-2.7, 3.1-3.4	<ul style="list-style-type: none"> <li>• Plans and organises workload, information, and recruitment that ensures compliance with organisational policies and procedures, national standards and legislative requirements</li> <li>• Uses systematic, analytical processes to define staffing needs, attract suitable candidates and select and recruit appropriate candidates</li> </ul>

## Assessment Requirements for BSBSMB417 Recruit staff

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

### Performance Evidence

Evidence of the ability to:

- calculate staffing requirements
- identify the personal attributes, knowledge and skills required for a particular role
- prepare a job description or position statement
- develop selection criteria and interview questions
- participate in interviews and other selection techniques including assessing candidates against selection criteria to short-list them
- obtain referees' reports
- advise unsuccessful candidates of the results
- secure preferred candidate's agreement and provide an employment contract
- arrange induction.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the differences between employees and contractors
- outline the components of a job description or position statement
- explain legislation relevant to recruitment, selection and induction of staff for small business
- identify sources of information on conditions of employment, including employee entitlements, awards and agreements
- identify potential strategies for advertising vacancies
- outline external sources of information about candidates
- explain a range of interviewing techniques and other selection processes and their application.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- workplace policies and procedures
- legislation, regulations, Codes and Standards relevant to staff recruitment, selection and induction
- case studies or, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBSMB420 Evaluate and develop small business operations

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

### Application

This unit describes the skills and knowledge required to evaluate and develop small business operations.

It applies to individuals who operate a small business which stands alone, or that is part of a department within a larger organisation. Individuals in this role use problem-solving skills and take responsibility for developing approaches to evaluating and developing business operations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Small and Micro Business

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Review and evaluate operational strategies and procedures	1.1 Develop a detailed operational plan that sets out clear action points to fulfil on business goals and objectives 1.2 Identify work health and safety (WHS) and environmental issues and implement strategies to minimise risk factors 1.3 Review and evaluate, where appropriate, a quality assurance process for the business in line with industry standards, compliance requirements and cultural criteria 1.4 Develop operational KPIs that align with the business plan 1.5 Align KPIs to business strategies, including utilisation of

ELEMENT	PERFORMANCE CRITERIA
	existing or new technologies, where practicable, to optimise business performance
2. Implement operational strategies and procedures	<p>2.1 Implement systems to evaluate business performance and customer satisfaction, including by setting key performance indicators or targets</p> <p>2.2 Implement systems to control stock, expenditure or cost, wastage or shrinkage and risks to health and safety in accordance with the business plan, incorporating new digital technologies where possible</p> <p>2.3 Identify and manage staffing requirements, considering a range of permanent and flexible arrangements, and adhering to budgetary constraints</p> <p>2.4 Provide goods or services in accordance with established legal, ethical cultural and technical standards</p> <p>2.5 Provide goods or services in accordance with time, cost and quality specifications, and customer requirements, incorporating new digital technologies where possible</p> <p>2.6 Apply quality procedures to address product or service and customer requirements</p>
3. Evaluate business performance	<p>3.1 Use digital technologies to regularly evaluate and review achievement of operational targets to ensure optimum business performance, in accordance with business goals and objectives</p> <p>3.2 Review and document systems and structures, with a view to more effectively supporting business performance</p> <p>3.3 Investigate and analyse operating problems to establish causes and implement changes as required, as part of the business quality system</p> <p>3.4 Update operational policies and procedures to incorporate corrective action</p>
4. Review business operations	<p>4.1 Review and adjust business operations to increase business success, in accordance with business goals and objectives</p> <p>4.2 Research new and emerging digital technologies periodically, implementing as relevant, in accordance with business goals and objectives</p> <p>4.3 Undertake ongoing research into new business opportunities and adjust business goals and objectives as new business opportunities arise</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Evaluates complex text to determine legislative, regulatory and workplace documentation</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Prepares written reports and workplace documentation that communicate complex information clearly and effectively</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to confirm understanding</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Interprets numerical information to manage performance information and regulate cash flow</li> </ul>
Navigate the world of work	<ul style="list-style-type: none"> <li>Evaluates adherence to organisational policies and procedures and considers own role for its contribution to broader goals of the work environment</li> <li>Appreciates implications of legal and regulatory responsibilities related to own work with specific reference to safety</li> </ul>
Get the work done	<ul style="list-style-type: none"> <li>Reflects on how digital systems and tools are used or could be used to achieve work goals, and begins to recognise strategic and operational applications</li> <li>Identifies concepts, principles and features of approaches in use in other contexts and considers how these may suit own situation</li> <li>Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer-term operational and strategic goals</li> <li>Uses each experience to reflect on how variables impact decision outcomes, and to gain insights into what constitutes an effective decision in different contexts</li> </ul>

# Assessment Requirements for BSBSMB420 Evaluate and develop small business operations

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

## Performance Evidence

Evidence of the ability to:

- develop strategies and procedures to successfully manage business operations, including:
  - developing an operational plan
  - identifying risk management procedures
  - developing a quality assurance process
  - developing and implementing performance measures
  - utilising existing, new and emerging digital technologies to optimise business performance
- implement and evaluate strategies and procedures developed, including:
  - controlling stock, expenditure, and work health and safety risks
  - identifying and meeting staffing requirements
  - analysing and correcting business problems
  - reviewing and adjusting the business plan
- record and research business improvements, including the potential to implement new and emerging digital technologies
- make appropriate adjustments to business operations as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features of relevant legislation and industry codes of practice
- Key features of methods for implementing operation and revenue control systems

- Key features of methods for evaluating performance and implementing improvements
- Key features of work health and safety (WHS) responsibilities and procedures for managing hazards
- Key features of relevant principles of risk management, including risk assessment
- Key features of quality assurance system principles and methods
- Key features of the role of digital technologies and innovation in modern business
- Key features of systems to manage staff, stock, expenditure, services and customer service
- Key features of required technical or specialist skills relevant to business operations.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources, including business technology
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBSMB421 Manage small business finances

### Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 5.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

### Application

This unit describes the skills and knowledge required to implement and review financial management strategies on a regular basis, including by using new and emerging digital technologies.

It applies to individuals who operate a small business that stands alone, or that is part of a department within a larger organisation. Individuals in this role interpret financial reports and other numerical data to develop financial management strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Small and Micro Business

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Implement financial strategy	1.1 Identify financial information requirements and obtain specialist services, as required, to profitably operate the business 1.2 Produce financial budgets or projections, including cash flow

ELEMENT	PERFORMANCE CRITERIA
	<p>estimates, as required for each forward period, and distribute to relevant people in accordance with legal requirements</p> <p>1.3 Develop a plan to negotiate and manage business capital to best enable implementation of the business plan</p> <p>1.4 Develop and maintain strategies to enable adequate financial provision for taxation in accordance with legal requirements</p> <p>1.5 Develop, monitor and maintain client credit policies, including contingencies for debtors in default, to maximise cash flow</p> <p>1.6 Select key performance indicators to enable ongoing monitoring of financial performance in line with the business plan</p> <p>1.7 Record and communicate financial procedures to relevant personnel to facilitate implementation of the business plan</p>
2. Monitor financial performance	<p>2.1 Use available digital technologies to regularly monitor and report on financial performance targets, and analyse data to establish extent to which the financial goals have been met</p> <p>2.2 Monitor marketing and operational strategies for their effects on the financial goals</p> <p>2.3 Calculate and evaluate financial ratios according to own or industry benchmarks</p> <p>2.4 Assess financial plan to determine whether variations or alternative plans are needed, and change as required</p> <p>2.5 Undertake research regularly to identify opportunities to implement new and emerging technologies to boost business profitability in accordance with the business plan</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Evaluates complex text to determine legislative, regulatory and workplace documentation</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Prepares written reports and workplace documentation that communicate complex information clearly and effectively</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to confirm understanding</li> </ul>

	<ul style="list-style-type: none"> <li>Participates in verbal negotiations using tone and language suitable to audience</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Interprets numerical information to calculate all relevant financial information</li> </ul>
Navigate the world of work	<ul style="list-style-type: none"> <li>Appreciates implications of legal and regulatory responsibilities related to own work</li> </ul>
Interact with others	<ul style="list-style-type: none"> <li>Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role</li> </ul>
Get the work done	<ul style="list-style-type: none"> <li>Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer-term operational and strategic goals</li> <li>Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account</li> <li>Uses formal and informal processes to monitor implementation of ideas and reflect on outcomes</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBSMB406 Manage small business finances.

## Assessment Requirements for BSBSMB421 Manage small business finances

### Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 5.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

### Performance Evidence

Evidence of the ability to:

- manage the business according to financial goals, including:
  - adhering to legal requirements
  - produce relevant financial projections, including cash flow estimates
  - develop a plan to negotiate and manage business assets and financial capital
  - defining strategies for debt collection and contingencies for debtors
  - managing cash flow
  - defining key performance indicators
  - communicating with relevant people
  - seeking specialist services where required
- monitor the business against financial plan and make changes as required
- identify opportunities to implement new and emerging digital technologies to support the financial management of the business.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features of benchmarking

- Key features of financial decision-making relevant to the business
- Key features of significant financial indicators
- Key purposes of financial reports
- Key features of balance sheet preparation and interpretation
- Key features of debt collection procedures or strategies
- Key features of profit and loss statement preparation and interpretation
- Key features of stock records and stock control relevant to the business.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources, including business technology
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBSUS201 Participate in environmentally sustainable work practices

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Application

This unit describes the skills and knowledge required to effectively measure current resource use and carry out improvements, including reducing the negative environmental impact of work practices.

It applies to individuals, working under supervision or guidance, who are required to follow workplace procedures and instructions, and work in an environmentally sustainable manner within scope of competency, authority and own level of responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Industry Capability – Sustainability

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify current resource use	1.1 Identify workplace environmental and resource efficiency issues 1.2 Identify resources used in own work role 1.3 Document and measure current usage of resources using appropriate techniques 1.4 Record and file documentation measuring current usage, using

ELEMENT	PERFORMANCE CRITERIA
	technology (such as software systems) where applicable 1.5 Identify and report workplace environmental hazards to appropriate personnel
2. Comply with environmental regulations	2.1 Follow workplace procedures to ensure compliance 2.2 Report breaches or potential breaches to appropriate personnel
3. Seek opportunities to improve resource efficiency	3.1 Follow organisational plans to improve environmental practices and resource efficiency 3.2 Work as part of a team, where relevant, to identify possible areas for improvements to work practices in own work area 3.3 Make suggestions for improvements to workplace practices in own work area

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.1, 3.1	<ul style="list-style-type: none"> <li>Recognises and interprets textual information to establish job requirements from relevant information</li> </ul>
Writing	1.3, 1.4, 1.5, 2.2	<ul style="list-style-type: none"> <li>Completes documents using required formats</li> </ul>
Oral Communication	1.5, 2.2, 3.3	<ul style="list-style-type: none"> <li>Articulates ideas clearly and uses simple and relevant language to identify and report issues to designated person</li> </ul>
Numeracy	1.3	<ul style="list-style-type: none"> <li>Calculates basic metric measurements to determine resource usage</li> </ul>
Navigate the world of work	2.1	<ul style="list-style-type: none"> <li>Understands and adheres to legal and regulatory responsibilities related to own work</li> </ul>
Interact with others	1.5, 2.2, 3.2, 3.3	<ul style="list-style-type: none"> <li>Selects and uses appropriate conventions and protocols when communicating with co-workers in range of work contexts</li> <li>Collaborates and cooperates with others to achieve joint outcomes</li> </ul>
Get the work	1.1-1.4, 3.1, 3.3	<ul style="list-style-type: none"> <li>Implements actions as per plan, taking some responsibility for sequencing and timing of tasks</li> </ul>

done		<ul style="list-style-type: none"> <li>• Uses main features and functions of digital tools to complete work tasks and access information</li> <li>• Analyses current practices to identify opportunities for improvement.</li> </ul>

# Assessment Requirements for BSBSUS201 Participate in environmentally sustainable work practices

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- locate and interpret a range of environment/sustainability legislation and procedural requirements
- participate in and support discussions for an improved resource efficiency process
- identify, document and measure usage of resources
- collaborate with team members on suggestions for improving workplace practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify environmental and resource hazards/risks as well as environmental or sustainability legislation, regulations and codes of practice applicable to own role
- outline sustainability requirements in the workplace
- identify reporting channels and procedures to report breaches and potential issues
- identify where to find environmental and resource efficiency systems and procedures.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- documentation, information and resources related to workplace environmental and resource efficiency issues
- office equipment and resources
- case studies and, where possible, real situations

- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBSUS401 Implement and monitor environmentally sustainable work practices

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.  Version created to better align unit to AQF level.

## Application

This unit describes the skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices and to implement improvements and monitor their effectiveness.

It applies to individuals with responsibility for a specific area of work or who lead a work group or team and addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Industry Capability – Sustainability

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Investigate current practices in relation to resource usage	1.1 Identify environmental regulations applying to the enterprise 1.2 Analyse procedures for assessing compliance with

ELEMENT	PERFORMANCE CRITERIA
	environmental/sustainability regulations 1.3 Collect information on environmental and resource efficiency systems and procedures, and provide to the work group where appropriate 1.4 Collect, analyse and organise information from a range of sources to provide information/advice and tools/resources for improvement opportunities 1.5 Measure and document current resource usage of members of the work group 1.6 Analyse and document current purchasing strategies 1.7 Analyse current work processes to access information and data to assist in identifying areas for improvement
2. Set targets for improvements	2.1 Seek input from stakeholders, key personnel and specialists 2.2 Access external sources of information and data as required 2.3 Evaluate alternative solutions to workplace environmental issues 2.4 Set efficiency targets
3. Implement performance improvement strategies	3.1 Source and use appropriate techniques and tools to assist in achieving efficiency targets 3.2 Apply continuous improvement strategies to own work area of responsibility, including ideas and possible solutions to communicate to the work group and management 3.3 Implement and integrate environmental and resource efficiency improvement plans for own work group with other operational activities 3.4 Supervise and support team members to identify possible areas for improved practices and resource efficiency in work area 3.5 Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon where appropriate 3.6 Implement costing strategies to fully utilise environmental assets
4. Monitor performance	4.1 Use and/or develop evaluation and monitoring, tools and technology 4.2 Document and communicate outcomes to report on efficiency targets to key personnel and stakeholders 4.3 Evaluate strategies and improvement plans 4.4 Set new efficiency targets, and investigate and apply new tools

ELEMENT	PERFORMANCE CRITERIA
	and strategies 4.5 Promote successful strategies and reward participants where possible

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1-1.4, 1.6, 1.7, 2.3, 3.1	<ul style="list-style-type: none"> <li>Identifies and analyses complex texts to determine legislative, regulatory and business requirements</li> <li>Reviews reported information to evaluate workplace strategies and improvement practices</li> </ul>
Writing	1.5, 1.6, 2.1, 2.2, 2.4, 3.1-3.3, 4.4, 4.5	<ul style="list-style-type: none"> <li>Documents findings of investigations from written and oral sources according to organisational requirements</li> <li>Provides updates about progress using formats and language appropriate to the audience and context</li> </ul>
Oral Communication	2.1, 2.2, 3.3-3.5, 4.4, 4.5	<ul style="list-style-type: none"> <li>Presents information and seeks advice using structure and language appropriate to audience</li> <li>Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding</li> </ul>
Numeracy	1.5, 2.4, 3.1, 3.6, 4.4	<ul style="list-style-type: none"> <li>Analyses numerical information to measure usage and calculates metric measurements, quantities/ratios and financial data using appropriate tools</li> </ul>
Navigate the world of work	1.1, 1.2	<ul style="list-style-type: none"> <li>Recognises and follows legislative requirements and organisational policies and procedures associated with own role</li> </ul>
Interact with others	1.3, 2.1, 2.2, 3.3-3.5, 4.2, 4.4, 4.5	<ul style="list-style-type: none"> <li>Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information</li> <li>Collaborates and consults with a range of stakeholders to achieve shared understanding of individual roles in meeting objectives</li> </ul>
Get the work done	1.2, 1.4-1.7, 2.3, 2.4, 3.1, 3.2, 3.3, 3.5, 3.6, 4.1, 4.3, 4.4	<ul style="list-style-type: none"> <li>Develops plans to manage routine and non-routine tasks for own work group with an awareness of how they contribute to the broader organisation</li> <li>Uses systematic, analytical processes to set</li> </ul>

# Assessment Requirements for BSBSUS401 Implement and monitor environmentally sustainable work practices

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.  Version created to better align unit to AQF level.

## Performance Evidence

Evidence of the ability to:

- analyse information from a range of sources to identify current procedures, practices and compliance requirements in relation to environmental and resource sustainability
- consult and communicate with relevant stakeholders to seek input and encourage engagement with developing and implementing sustainability improvements, encourage feedback and suggestions and report on outcomes
- plan and organise work group activities to:
  - measure current resource usage
  - solve problems and generate ideas for improvements
  - evaluate and implement strategies to improve resource usage
  - plan, implement and integrate improvements into operations
  - meet environmental requirements
- apply continuous improvement approach to sustainability performance
- apply change management techniques to support sustainability performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify relevant internal and external sources of information and explain how they can be used to identify sustainability improvements

- explain the compliance requirements for the work area with reference to legislation, regulations, codes of practice and workplace procedures that relate to environmental and resource issues
- outline common environmental and energy efficiency issues within the industry
- give examples of benchmarks for environmental and resource sustainability that are relevant to the organisation
- outline organisational systems and procedures that relate to environmental and resource sustainability improvements including:
  - supply chain, procurement and purchasing
  - quality assurance
  - making recommendations and seeking approvals

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBSUS406 Identify and apply sustainability rating tools

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

### Application

This unit describes the skills and knowledge required to effectively use rating tools to obtain a sustainability rating.

It applies to individuals who are responsible for implementing sustainability practices, either as their primary duty or as a part of a work role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Unit Sector

Sustainability

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to implement sustainability rating tools	1.1 Identify and interpret sustainability rating tools, categories and credits relevant to the organisation 1.2 Collect and organise required documentation for the rating tools and confirm methodology for their use 1.3 Access and interpret organisational and legislative requirements relevant to the use of rating tools 1.4 Identify and confirm requirements for the implementation of the rating tools and obtain approval to proceed

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
2 Implement the sustainability rating tools	<p>2.1 Advise relevant stakeholders of the sustainability rating tools to be used</p> <p>2.2 Apply the rating tools to gather data about sustainability credentials</p> <p>2.3 Calculate sustainability rating using all relevant data according to rating tool methodology</p> <p>2.4 Collate, organise and store data according to organisational and rating tool requirements</p>
3. Evaluate and communicate results	<p>3.1 Evaluate data to identify credits where scores meet, exceed or fall below organisational expectations</p> <p>3.2 Prepare a report on implementation results, according to internal and external reporting procedures</p> <p>3.3 Present findings and opportunities for future improvement to relevant stakeholders</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Reading	1.1-1.4, 2.3, 3.1	<ul style="list-style-type: none"> <li>Identifies and interprets complex texts to determine tools aligned with organisational goals and legislative requirements</li> </ul>
Writing	1.4, 2.1, 3.2, 3.3	<ul style="list-style-type: none"> <li>Researches, plans and prepares documentation using format and language appropriate to context, organisational requirements and audience</li> </ul>
Oral Communication	1.4, 2.1, 3.3	<ul style="list-style-type: none"> <li>Presents information and seeks advice using language appropriate to audience</li> <li>Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding</li> </ul>
Numeracy	2.2-2.4, 3.1, 3.2	<ul style="list-style-type: none"> <li>Includes all relevant data within calculations to provide a complete analysis for implementation and ongoing tracking</li> </ul>
Navigate the	1.3, 2.4, 3.2	<ul style="list-style-type: none"> <li>Develops, monitors and modifies organisational policies and procedures in accordance with legislative</li> </ul>

world of work		requirements and organisation goals
Interact with others	1.4, 2.1, 3.3	<ul style="list-style-type: none"> <li>• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information</li> <li>• Plays a lead role in presenting outcomes with a range of stakeholders</li> </ul>
Get the work done	1.1-1.4, 2.2-2.4, 3.1, 3.2	<ul style="list-style-type: none"> <li>• Uses systematic, analytical processes in relatively complex situations, setting goals, gathering relevant information, identifying and evaluating options</li> <li>• Manages implementation and tracks outcomes against organisational goals</li> <li>• Provides relevant communication and identifies opportunities for improvement</li> </ul>

# Assessment Requirements for BSBSUS406 Identify and apply sustainability rating tools

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

## Performance Evidence

Evidence of the ability to:

- conduct research to identify sustainability rating tools and their implementation requirements
- communicate with relevant stakeholders to obtain approval to proceed with implementation and provide ongoing information
- gather data using sustainability rating tools according to specified methodology and organisational requirements
- analyse data to prepare and present final report according to internal and external requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list and describe sustainability rating tools applicable to the organisation
- outline categories and credits used in the sustainability rating tools
- explain methodologies for using sustainability rating tools
- summarise the organisational and rating tool requirements for the storage of data
- explain how sustainability rating tools relate to the organisation's environmental goals and objectives.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- relevant sustainability rating documentation
- case studies or, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBWHS302 Apply knowledge of WHS legislation in the workplace

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Application

This unit describes the skills and knowledge required to understand and comply with work health and safety (WHS) Acts, regulations and codes of practice in the workplace.

This unit applies to individuals who contribute to actions to achieve compliance with WHS legislation as part of their WHS responsibilities, which are in addition to their main duties.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the legal framework for WHS in	1.1 Identify and access current WHS legislation and related documentation relevant to the workplace, occupation and industry

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
the workplace	<p>1.2 Apply knowledge of the relationship between WHS Acts, regulations and codes of practice to assist in identifying WHS legislative requirements in the workplace</p> <p>1.3 Identify duty holders</p> <p>1.4 Identify legal obligations and duties for who to consult with regarding training of workers and health and safety representatives</p> <p>1.5 Identify consequences of non-compliance with WHS Acts, regulations, codes of practice, standards and organisational WHS policies, procedures, processes and systems</p>
2. Contribute to activity that reflects WHS legislative requirements	<p>2.1 Contribute to monitoring compliance with legislation</p> <p>2.2 Contribute to ensuring that workplace complies with legislation</p> <p>2.3 Identify and take appropriate action on non-compliance with legislation</p> <p>2.4 Recognise limits of own expertise and legal duties, and access help and advice when required</p>
3. Keep up-to-date with legislation and relevant publications	<p>3.1 Use relevant sources to keep up-to-date with legislation and relevant publications</p> <p>3.2 Communicate information on relevant legislative changes and relevant publications to others</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Learning	3.1	<ul style="list-style-type: none"> <li>Identifies and evaluates information from formal and informal sources to update knowledge</li> </ul>
Reading	1.1-1.5, 3.1	<ul style="list-style-type: none"> <li>Interprets a range of textual information to determine regulatory and procedural requirements and necessary actions</li> </ul>
Writing	2.3, 3.2	<ul style="list-style-type: none"> <li>Documents WHS information in a sequential manner using required format, correct grammar and industry specific language</li> </ul>

# Assessment Requirements for BSBWHS302 Apply knowledge of WHS legislation in the workplace

## Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- identify and apply work health and safety (WHS) legislative requirements applicable to the workplace, occupation and industry, including keeping up to date with legislation and relevant publications
- identify and act on non-compliances with WHS legislation
- identify duty holders
- communicate WHS information to others
- refer issues of non-compliance to responsible persons or authorities and seek advice from appropriate sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the WHS legislative duties of self and others including limits on own expertise
- outline the key organisational WHS policies, procedures, processes and systems
- outline the key requirements in relevant commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material, and other relevant publications
- identify obligations and duties for consultation and who must be consulted
- identify people who could be accessed for help
- identify the consequences of non-compliance
- explain ways to get information about compliance with legislation.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational policies, standard operating procedures, procedures and plans with information on compliance requirements
- relevant Acts, regulations, codes of practice, licensing requirements and standards
- guidance materials and alerts issued by the relevant WHS regulator
- relevant WHS data files
- appropriate office equipment and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBWOR301 Organise personal work priorities and development

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Application

This unit describes the skills and knowledge required to organise own work schedules, to monitor and obtain feedback on work performance and to maintain required levels of competence.

This unit applies to individuals who exercise discretion and judgement and apply a broad range of competencies in various work contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Industry Capability – Workplace Effectiveness

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise and complete own work schedule	1.1 Ensure that work goals, objectives or Key Performance Indicators (KPIs) are understood, negotiated and agreed in accordance with organisational requirements 1.2 Assess and prioritise workload to ensure tasks are completed within identified timeframes 1.3 Identify factors affecting the achievement of work objectives and incorporate contingencies into work plans 1.4 Use business technology efficiently and effectively to manage

ELEMENT	PERFORMANCE CRITERIA
	and monitor scheduling and completion of tasks
2. Monitor own work performance	<p>2.1 Accurately monitor and adjust personal work performance through self assessment to ensure achievement of tasks and compliance with legislation and work processes or KPIs</p> <p>2.2 Ensure that feedback on performance is actively sought and evaluated from colleagues and clients in the context of individual and group requirements</p> <p>2.3 Routinely identify and report on variations in the quality of products and services according to organisational requirements</p> <p>2.4 Identify signs of stress and effects on personal wellbeing</p> <p>2.5 Identify sources of stress and access appropriate supports and resolution strategies</p>
3. Co-ordinate personal skill development and learning	<p>3.1 Identify personal learning and professional development needs and skill gaps using self assessment and advice from colleagues and clients in relation to role and organisational requirements</p> <p>3.2 Identify, prioritise and plan opportunities for undertaking personal skill development activities in liaison with work groups and relevant personnel</p> <p>3.3 Access, complete and record professional development opportunities to facilitate continuous learning and career development</p> <p>3.4 Incorporate formal and informal feedback into review of further learning needs</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Learning	3.1-3.4	<ul style="list-style-type: none"> <li>Employs a range of approaches and investigative techniques to source the knowledge necessary to arrange personal learning experiences</li> </ul>
Reading	1.1, 1.2, 2.1	<ul style="list-style-type: none"> <li>Interprets textual information to determine organisation's procedures, own work performance and objectives</li> </ul>

Writing	1.3, 1.4, 2.3, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> <li>Prepares written reports and workplace documents that communicate information clearly and effectively</li> </ul>
Oral Communication	2.2, 2.3, 3.1, 3.2	<ul style="list-style-type: none"> <li>Clearly gives and receives feedback using specific and relevant language</li> <li>Uses listening and questioning techniques to confirm understanding</li> </ul>
Numeracy	1.1, 1.3	<ul style="list-style-type: none"> <li>Understands responsibilities and scope of role and complies with organisational policies, procedures and protocols</li> </ul>
Interact with others	1.1, 2.2, 2.3, 3.1, 3.2	<ul style="list-style-type: none"> <li>Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role</li> <li>Fosters and nurtures a culture of constructive and respectful feedback</li> <li>Proactively collaborates with others to achieve specific goals</li> </ul>
Get the work done	1.2, 1.3, 1.4, 2.4, 2.5, 3.2	<ul style="list-style-type: none"> <li>Plans and organises work commitments to ensure deadlines and objectives are met</li> <li>Uses formal analytical thinking techniques to recognise and respond to routine problems</li> <li>Uses digital systems and tools to enter, store and monitor information</li> </ul>

# Assessment Requirements for BSBWOR301 Organise personal work priorities and development

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- prepare a work plan according to organisational requirements and work objectives
- use business technology to schedule, prioritise and monitor completion of tasks in a work plan
- assess and prioritise own work load and deal with contingencies
- monitor and assess personal performance against job role requirements by seeking feedback from colleagues and clients
- identify personal development needs and access, complete and record skill development and learning.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key provisions of legislation that relate to own work role
- describe goals, objectives or key performance indicators of own work role
- explain ways to elicit, analyse and interpret feedback when communicating with other people in the workplace
- explain the principles and techniques of goal setting, measuring performance, time management and personal assessment of learning and development needs
- explain signs and sources of stress and strategies to deal with stress in the workplace
- identify methods to identify and prioritise personal learning needs.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- office equipment and resources
- work schedules and performance improvement plans
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBWOR404 Develop work priorities

### Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to monitor and obtain feedback on own work performance and access learning opportunities for professional development.

This unit applies to individuals who are required to design their own work schedules and work plans and to establish priorities for their work. They will typically hold some responsibilities for the work of others and have some autonomy in relation to their own role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Unit Sector

Industry Capability – Workplace Effectiveness

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and complete own work schedule	1.1 Prepare workgroup plans which reflect consideration of resources, client needs and workgroup targets 1.2 Analyse and incorporate work objectives and priorities into personal schedules and responsibilities

ELEMENT	PERFORMANCE CRITERIA
	1.3 Identify factors affecting the achievement of work objectives and establish contingencies and incorporate them into work plans 1.4 Efficiently and effectively use business technology to manage and monitor planning completion and scheduling of tasks
2. Monitor own work performance	2.1 Identify and analyse personal performance through self-assessment and feedback from others on the achievement of work objectives 2.2 Seek and evaluate feedback on performance from colleagues and clients in the context of individual and group requirements 2.3 Routinely identify and report on variations in the quality of service and performance in accordance with organisational requirements
3. Co-ordinate professional development	3.1 Assess personal knowledge and skills against organisational benchmarks to determine development needs and priorities 3.2 Research and identify sources and plan for opportunities for improvement in consultation with colleagues 3.3 Use feedback to identify and develop ways to improve competence within available opportunities 3.4 Identify, access and complete professional development activities to assist career development 3.5 Store and maintain records and documents relating to achievements and assessments in accordance with organisational requirements

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Learning	3.1, 3.2, 3.3, 3.4	<ul style="list-style-type: none"> <li>Develops strategies to reflect on own performance, obtain feedback, and plan and source professional development opportunities</li> </ul>

# Assessment Requirements for BSBWOR404 Develop work priorities

## Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- prepare and communicate own work plan
- schedule work objectives and tasks to support the achievement of the workgroup goals
- review own work performance against workgroup objectives through self-assessment and seeking and acting on feedback from clients and colleagues
- plan and access learning opportunities to extend personal work competencies.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how business technology applications can be used to schedule tasks and plan work
- explain techniques to prepare personal plans and establish priorities
- identify methods to identify and prioritise personal learning needs
- outline a range of professional development options
- explain methods to elicit, analyse and interpret feedback
- provide a detailed explanation of methods that can be used to evaluate own performance.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace documentation including policies and procedures, and benchmarks for work group productivity and performance
- workplace equipment and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBWOR501 Manage personal work priorities and professional development

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Application

This unit describes the skills and knowledge required to create systems and process to organise information and prioritise tasks.

It applies to individuals working in managerial positions who have excellent organisational skills. The work ethic of individuals in this role has a significant impact on the work culture and patterns of behaviour of others as managers at this level are role models in their work environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Industry Capability – Workplace Effectiveness

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish personal work goals	1.1 Serve as a positive role model in the workplace through personal work planning 1.2 Ensure personal work goals, plans and activities reflect the organisation's plans, and own responsibilities and accountabilities 1.3 Measure and maintain personal performance in varying work conditions, work contexts and when contingencies occur

ELEMENT	PERFORMANCE CRITERIA
2. Set and meet own work priorities	<p>2.1 Take initiative to prioritise and facilitate competing demands to achieve personal, team and organisational goals and objectives</p> <p>2.2 Use technology efficiently and effectively to manage work priorities and commitments</p> <p>2.3 Maintain appropriate work-life balance, and ensure stress is effectively managed and health is attended to</p>
3. Develop and maintain professional competence	<p>3.1 Assess personal knowledge and skills against competency standards to determine development needs, priorities and plans</p> <p>3.2 Seek feedback from employees, clients and colleagues and use this feedback to identify and develop ways to improve competence</p> <p>3.3 Identify, evaluate, select and use development opportunities suitable to personal learning style/s to develop competence</p> <p>3.4 Participate in networks to enhance personal knowledge, skills and work relationships</p> <p>3.5 Identify and develop new skills to achieve and maintain a competitive edge</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Learning	3.1, 3.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> <li>Investigates and uses a range of strategies to develop personal competence</li> </ul>
Reading	1.2, 3.1, 3.2	<ul style="list-style-type: none"> <li>Analyses and interprets textual information from organisational policies and practices or feedback to inform personal development planning</li> </ul>
Writing	3.2	<ul style="list-style-type: none"> <li>Uses feedback to prepare reports that summarise ways to improve competence</li> </ul>
Oral Communication	3.2	<ul style="list-style-type: none"> <li>Uses active listening and questioning to seek and receive feedback</li> </ul>
Navigate the world of work	1.2, 2.1	<ul style="list-style-type: none"> <li>Understands how own role contributes to broader organisational goals</li> <li>Considers organisational protocols when planning own career development</li> </ul>

# Assessment Requirements for BSBWOR501 Manage personal work priorities and professional development

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- use business technology to create and use systems and processes to organise and prioritise tasks and commitments
- measure and maintain personal work performance including assessing competency against competency standards and seeking feedback
- maintain an appropriate work-life balance to manage personal health and stress
- participate in networks
- develop a personal development plan which includes career objectives and an action plan
- develop new skills.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain principles and techniques involved in the management and organisation of:
  - performance measurement
  - personal behaviour, self-awareness and personality traits identification
  - a personal development plan
  - personal goal setting
  - time
- discuss management development opportunities and options for self
- describe methods for achieving a healthy work-life balance
- outline organisation's policies, plans and procedures
- explain types of learning style/s and how they relate to the individual
- describe types of work methods and practices that can improve personal performance.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace equipment and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBWOR502 Lead and manage team effectiveness

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to lead teams in the workplace and to actively engage with the management of the organisation.

It applies to individuals working at a managerial level who facilitate work teams and build a positive culture within their work teams. At this level, work will normally be carried out using complex and diverse methods and procedures requiring the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Unit Sector

Industry Capability – Workplace Effectiveness

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish team performance plan	1.1 Consult team members to establish a common understanding of team purpose, roles, responsibilities and accountabilities in accordance with organisational goals, plans and objectives 1.2 Develop performance plans to establish expected outcomes, outputs, key performance indicators (KPIs) and goals for work team 1.3 Support team members in meeting expected performance

ELEMENT	PERFORMANCE CRITERIA
	outcomes
2. Develop and facilitate team cohesion	<p>2.1 Develop strategies to ensure team members have input into planning, decision making and operational aspects of work team</p> <p>2.2 Develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities</p> <p>2.3 Provide feedback to team members to encourage, value and reward individual and team efforts and contributions</p> <p>2.4 Develop processes to ensure that issues, concerns and problems identified by team members are recognised and addressed</p>
3. Facilitate teamwork	<p>3.1 Encourage team members and individuals to participate in and to take responsibility for team activities, including communication processes</p> <p>3.2 Support the team in identifying and resolving work performance problems</p> <p>3.3 Ensure own contribution to work team serves as a role model for others and enhances the organisation's image for all stakeholders</p>
4. Liaise with stakeholders	<p>4.1 Establish and maintain open communication processes with all stakeholders</p> <p>4.2 Communicate information from line manager/management to the team</p> <p>4.3 Communicate unresolved issues, concerns and problems raised by team members and follow-up with line manager/management and other relevant stakeholders</p> <p>4.4 Evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description

Reading	1.1, 4.4	<ul style="list-style-type: none"> <li>Analyses and interprets textual information from the organisation's policies, goals and objectives to establish team goals or to determine corrective action</li> </ul>
Writing	1.2, 2.1, 2.2, 2.4, 4.2, 4.3, 4.4	<ul style="list-style-type: none"> <li>Prepares written reports and workplace documentation that communicate complex information clearly and effectively</li> </ul>
Oral Communication	1.1, 2.3, 3.1, 4.1, 4.2, 4.3	<ul style="list-style-type: none"> <li>Engages in discussions or provides information using appropriate vocabulary and non-verbal features</li> <li>Uses listening and questioning techniques to confirm understanding and to engage the audience</li> </ul>
Navigate the world of work	1.1, 2.1, 2.2, 3.3	<ul style="list-style-type: none"> <li>Understands how own role contributes to broader organisational goals</li> <li>Modifies or develops policies and procedures to achieve organisational goals</li> </ul>
Interact with others	1.1, 1.3, 2.2, 2.3, 3.1, 3.2, 4.2, 4.3	<ul style="list-style-type: none"> <li>Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders</li> <li>Uses interpersonal skills to gain trust and confidence of team and provides feedback to others in forms that they can understand and use</li> <li>Adapts personal communication style to build positive working relationships and to show respect for the opinions, values and particular needs of others</li> <li>Plays a lead role in situations requiring effective collaboration, demonstrating high level conflict resolution skills and ability to engage and motivate others</li> </ul>
Get the work done	1.2, 2.1, 2.2, 2.4, 3.2, 4.1, 4.3, 4.4	<ul style="list-style-type: none"> <li>Develops, implements and monitors plans and processes to ensure team effectiveness</li> <li>Monitors and actively supports processes and development activities to ensure the team is focused on work outcomes</li> <li>Plans for unexpected outcomes and implements creative responses to overcome challenges</li> </ul>

# Assessment Requirements for BSBWOR502 Lead and manage team effectiveness

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- use leadership techniques and strategies to facilitate team cohesion and work outcomes including:
  - encouraging and fostering shared understanding of purpose, roles and responsibilities
  - identifying and resolving problems
  - providing feedback to encourage, value and reward others
  - modelling desired behaviour and practices
- develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities
- establish processes to address issues and resolve performance issues
- support team to meet expected performance outcomes including providing formal and informal learning opportunities as needed
- develop performance plans with key performance indicators (KPIs), outputs and goals for individuals or the team which incorporate input from stakeholders
- communicate effectively with a range of stakeholders about team performance plans and team performance
- facilitate two-way flow of information between team and management relevant to team performance
- evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how group dynamics can support or hinder team performance

- outline strategies that can support team cohesion, participation and performance
- explain strategies for gaining consensus
- explain issue resolution strategies.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBWRK411 Support employee and industrial relations procedures

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Application

This unit describes the skills and knowledge required to communicate and implement industrial relations policies and procedures to effectively represent organisations/employers.

It applies to individuals who work in support positions, assisting others in dealing with industrial relations conflicts and issues.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Workforce Development – Workplace Relations

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Communicate and implement organisation's industrial relations policies and procedures	1.1 Source and disseminate relevant legislation, agreements, policies and procedures to relevant persons and groups 1.2 Implement agreements, policies and procedures according to site, enterprise and statutory requirements 1.3 Support strategies to effectively communicate with relevant persons and groups on industrial relations matters 1.4 Promote the organisation's industrial relations procedures to

ELEMENT	PERFORMANCE CRITERIA
	<p>relevant persons and groups</p> <p>1.5 Represent the organisation appropriately in discussions with key stakeholders</p>
2. Assist in minimising industrial relations conflict	<p>2.1 Monitor the implementation of industrial relations policies and procedures</p> <p>2.2 Process documentation and report to management and other relevant parties about potential industrial relations conflicts</p> <p>2.3 Support managers to contain industrial relations conflicts and deal with grievances and disputes, within limits of own authority</p> <p>2.4 Work with employees to resolve personal grievances and prevent escalation of industrial relations conflicts</p> <p>2.5 Work under supervision to source specialist industrial relations expertise</p>
3. Enhance industrial relations	<p>3.1 Trial and implement strategies to monitor the implementation of the organisation's industrial relations policies and procedures</p> <p>3.2 Implement strategies to facilitate feedback on the industrial climate</p> <p>3.3 Implement strategies to strengthen relationships with relevant persons and groups</p> <p>3.4 Provide information and feedback to management on industrial relations</p> <p>3.5 Provide information and advice to relevant persons and groups</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 3.1	<ul style="list-style-type: none"> <li>Comprehends and analyses complex texts from a variety of sources and records to determine relevance to requirements or review implementation of strategies</li> </ul>
Writing	1.1, 1.2, 2.1, 2.2, 3.4, 3.5	<ul style="list-style-type: none"> <li>Prepares required documents using language and structure appropriate to purpose and audience</li> </ul>

Oral Communication	1.1-1.5, 2.2, 2.4, 2.5, 3.4, 3.5	<ul style="list-style-type: none"> <li>• Presents information and seeks advice using language and non-verbal features appropriate to audience and context</li> <li>• Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding</li> </ul>
Navigate the world of work	1.2, 1.4, 1.5, 2.1, 2.3, 3.1	<ul style="list-style-type: none"> <li>• Follows policies, procedures and legislative requirements and identifies implications of new legislation or regulation for self and others</li> <li>• Understands responsibilities and limits of own role</li> </ul>
Interact with others	1.1, 1.3-1.5, 2.2-2.5, 3.2-3.5	<ul style="list-style-type: none"> <li>• Selects and uses appropriate conventions and protocols when communicating with co-workers in a range of work contexts</li> <li>• Collaborates and cooperates with others to achieve required outcomes</li> <li>• Uses effective strategies to moderate conflict and negotiate solutions</li> </ul>
Get the work done	1.1, 2.1-2.3, 2.5, 3.1, 3.4, 3.5	<ul style="list-style-type: none"> <li>• Plans and organises tasks required to achieve required outcomes, seeking advice from others when necessary</li> <li>• Makes a range of critical and non-critical decisions in relatively complex situations</li> </ul>

# Assessment Requirements for BSBWRK411 Support employee and industrial relations procedures

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- locate information required to identify relevant legislation, agreements, policies and procedures in relation to industrial matters
- use effective communication techniques to support the resolution of workplace grievances and conflicts
- provide accurate written and oral advice about industrial matters
- use strategies to monitor and gather feedback on the implementation of industrial relations policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant industrial relations policies and procedures
- summarise grievance resolution policy and procedures
- describe relevant legislation, codes of practice and national standards
- describe the relevant state/territory and federal industrial relations systems
- identify sources of expert advice.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – workplace relations field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace policies and procedures

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBWRT401 Write complex documents

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to plan documents, draft text, prepare final text and produce documents of some complexity.

It applies to individuals who work in a range of business environments and are skilled in the creation of reports, information and general promotion documents that are more complex than basic correspondence, memos or forms and that require review and analysis of a range of information sources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Communication – Writing

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Plan documents	1.1 Determine the purposes of documents 1.2 Choose appropriate formats for documents 1.3 Establish means of communication 1.4 Determine requirements of documents 1.5 Determine categories and logical sequences of data, information and knowledge to achieve document objectives

ELEMENT	PERFORMANCE CRITERIA
	1.6 Develop overview of structure and content of documents
2 Draft text	<p>2.1 Review and organise available data, information and knowledge according to proposed structure and content</p> <p>2.2 Ensure data, information and knowledge is aggregated, interpreted and summarised to prepare text that satisfies document purposes and objectives</p> <p>2.3 Include graphics as appropriate</p> <p>2.4 Identify gaps in required data and information, and collect additional material from relevant enterprise personnel</p> <p>2.5 Draft text according to document requirements and genre</p> <p>2.6 Use language appropriate to the audience</p>
3 Prepare final text	<p>3.1 Review draft text to ensure document objectives are achieved and requirements are met</p> <p>3.2 Check grammar, spelling and style for accuracy and punctuation</p> <p>3.3 Ensure draft text is approved by relevant enterprise personnel</p> <p>3.4 Incorporate revisions in final copy</p>
4 Produce document	<p>4.1 Choose basic design elements for documents appropriate to audience and purpose</p> <p>4.2 Use word processing software to apply basic design elements to text</p> <p>4.3 Check documents to ensure all requirements are met</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 2.4, 3.1, 3.2, 4.3	<ul style="list-style-type: none"> <li>Interprets information to identify requirements and prepares material suitable to target audience and environment</li> <li>Proofreads texts for accuracy</li> </ul>
Writing	1.6, 2.2, 2.3, 2.5,	<ul style="list-style-type: none"> <li>Creates documents for a specific audience using cohesive and well-structured language to convey</li> </ul>

	2.6, 3.2, 3.4, 4.1	<p>detailed and accurate information</p> <ul style="list-style-type: none"> <li>Ensures vocabulary, layout and grammatical arrangement achieves meaning and intent of document</li> </ul>
Oral Communication	1.1, 1.4, 2.4, 3.3	<ul style="list-style-type: none"> <li>Obtains information or clarifies requirements by asking questions and listening</li> </ul>
Navigate the world of work	1.4, 4.3	<ul style="list-style-type: none"> <li>Adheres to organisational policies and procedures related to document production</li> </ul>
Interact with others	1.1, 1.4, 1.5, 2.4, 3.3	<ul style="list-style-type: none"> <li>Follows accepted communication practices and protocols when seeking advice about documents from colleagues, supervisors and managers</li> </ul>
Get the work done	1.1-1.6, 2.1-2.5, 3.3, 4.1-4.2	<ul style="list-style-type: none"> <li>Plans, organises and implements tasks required to produce documents</li> <li>Makes decisions based on standard procedures, using more formal decision making processes where required</li> <li>Uses the main features and functions of digital tools to complete work tasks</li> </ul>

# Assessment Requirements for BSBWRT401 Write complex documents

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- plan, draft and finalise complex documents that require review and analysis of a range of information sources
- use business technology to apply formatting, and incorporate graphics
- edit the draft text to ensure accuracy and clarity of information, obtain feedback on the draft and revise the draft
- apply the enterprise style guide/house style.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the enterprise style guide/house style
- outline formatting styles and their impact on formatting, readability and appearance of documents
- explain rules and conventions for written English, as defined by general and specialist sources.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the communication – writing field of work and include access to:

- office equipment and resources
- organisational policies and procedures
- organisational style guides.

Assessors must satisfy NVR/AQTF assessor requirements.

## **Links**

Companion Volume implementation guides are found in VETNet -

## CHCCCS020 Respond effectively to behaviours of concern

### Modification History

Release	Comments
Release 1	<p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Minimal change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.</p>

### Application

This unit describes the skills and knowledge required to respond effectively to behaviours of concern of people. Skills are associated with handling difficult incidents rather than managing ongoing behaviour difficulties.

The unit applies to workers in any context exposed to difficult and challenging behaviour.

*The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.*

### Elements and Performance Criteria

#### ELEMENT

*Elements define the essential outcomes*

1. Identify behaviour and plan response

#### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element*

1.1 Identify behaviours of concern in line with work role and organisation policies and procedures

1.2 Identify appropriate response to potential instances of behaviours of concern

1.3 Ensure planned responses to behaviours of concern maximise the availability of other appropriate staff and resources

1.4 Give priority to safety of self and others in responding

**ELEMENT****PERFORMANCE CRITERIA**

*Elements define the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element*

to behaviours of concern

## 2. Apply response

2.1 Ensure response to instances of behaviours of concern reflect organisation policies and procedures

2.2 Seek assistance as required

2.3 Deal with behaviours of concern promptly, firmly and diplomatically in accordance with organisation policy and procedure

2.4 Use communication effectively to achieve the desired outcomes in responding to behaviours of concern

2.5 Select appropriate strategies to suit particular instances of behaviours of concern

## 3. Report and review incidents

3.1 Report incidents according to organisation policies and procedures

3.2 Review incidents with appropriate staff and offer suggestions appropriate to area of responsibility

3.3 Access and participate in available debriefing mechanisms and associated support and/or development activities

3.4 Seek advice and assistance from legitimate sources as and when appropriate

**Foundation Skills**

*The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

## Assessment Requirements for CHCCCS020 Respond effectively to behaviours of concern

### Modification History

Release	Comments
Release 1	<p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Minimal change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.</p>

### Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- effectively dealt with at least 5 different behaviours of concern

### Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- different behaviours of concern:
  - aggression
  - confusion or other cognitive impairment
  - intoxication
  - intrusive behaviour
  - manipulation
  - noisiness
  - self-destructive behaviour
  - verbal offensiveness
  - wandering
- strategies for dealing with behaviours of concern
- issues needing to be referred to an appropriate professional

- legal and ethical consideration relevant to recognising and responding to behaviours of concern, including:
  - duty of care
  - human rights
  - work health and safety
- organisation reporting processes

## Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including organisation policies and procedures in relation to reporting behaviours of concern
- modelling of industry operating conditions and contingencies, including scenarios that reflect different behaviours of concern

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

# CPCBC4014A Prepare simple building sketches and drawings

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor** This unit of competency specifies the outcomes required to produce sketches and drawings. The sketches may be used to clarify or communicate ideas to clients or other parties. They may also be simplified versions taken from architectural drawings, designed to capture design concepts or options. The sketches may be used for estimating purposes and to show measurements and other requirements for building and construction works. This unit does not describe more complex drafting skills.

## Application of the Unit

**Application of the unit** This unit of competency supports the needs of builders, experienced tradespersons, project managers and estimators with a responsibility for preparing sketches and drawings.

## Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

**Prerequisite units** Nil

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

---

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

---

1. Prepare to make sketches and drawings.	1.1. <i>Types of drawings required</i> and <i>key features</i> to be recorded are identified in compliance with the scope and standard of the job being undertaken. 1.2. <i>OHS requirements</i> on site are identified and followed. 1.3. <i>Tools and equipment</i> required for inspection and measurement and for producing drawings are gathered and checked for serviceability.
2. Create simple sketches and drawings.	2.1. Inspection of relevant area is carried out as required and measurements are taken and recorded. 2.2. Simple two and three-dimensional sketches and drawings are created using <i>standard drawing conventions</i> and incorporating relevant codes and standards. 2.3. Sectional drawings of simple structural elements are created using standard drawing conventions.
3. Notate and process drawings.	3.1. Essential information is recorded on the drawing with symbols and abbreviations according to standard drawing conventions. 3.2. Drawings are labelled, dated and processed according to organisational administration and quality procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills for this unit are:

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- drawing techniques
- interpret and apply relevant standards and codes
- numeracy skills to apply measurements and calculations.

#### Required knowledge

Required knowledge for this unit is:

- drawing conventions and features, including direction, scale, key, contours, symbols and abbreviations
- requirements of the relevant codes, standards, statutory and authority requirements
- safe work methods.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

This unit of competency could be assessed by creating a set of sketches and drawings for a small work project in the relevant field of expertise.

Measurements of components, sub-assemblies, products, models, equipment, layouts or facilities needed for the preparation of the required

## EVIDENCE GUIDE

---

drawings and calculations of required dimensions and other drafting details based on the measurements and other relevant information should be made and recorded.

This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- produce clear and effective drawings and sketches with appropriate notations and labelling
- apply appropriate techniques for making inspections and taking measurements
- make good incursions into the fabric of a building
- comply with OHS regulations applicable to workplace operations
- apply organisational quality procedures and processes
- select and use appropriate processes, tools and equipment.

### **Context of and specific resources for assessment**

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include access to:

- an appropriate work site
- appropriate documentation and data related to tasks
- scaffolding and fall protection equipment
- tools and equipment relevant to activity

## EVIDENCE GUIDE

---

process.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

### Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in

## EVIDENCE GUIDE

---

relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Types of drawings required*** include:

- floor plan
- land boundaries and footprint of building
- orthographic drawings
- schematic drawings of wiring and pipe work
- sectional views.

***Key features*** to be recorded may include:

- ceiling heights and variations
- doors
- light fittings and power supplies
- services
- wall penetrations
- walls.

***OHS requirements*** include:

- detailing appropriate installation of scaffolding
- detailing power supplies
- details of all services
- understanding hazards located in the area
- use of personal protective equipment.

***Tools and equipment*** include:

- recording devices, including:
  - computer
  - digital camera
  - pen and paper.

***Standard drawing conventions***

- standard design symbols common to the

# CPCCCM2010B Work safely at heights

## Modification History

Photovoltaic (solar) panels added to range statement

Equivalent to CPCCCM2010A

## Unit Descriptor

This unit of competency specifies the outcomes required to work safely on construction sites where the work activity involves working above 1.5 metres from ground level and where fall protection measures are required.

## Application of the Unit

Construction work is undertaken on domestic and commercial work sites within new construction, renovation or refurbishment, and maintenance.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

CPCCOHS2001A      Apply OHS requirements, policies and procedures in the construction industry

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

- |   |                                  |     |   |
|---|----------------------------------|-----|---|
| 1 | Identify work area requirements. | 1.1 | Site of proposed <i>work at heights</i> is identified from relevant <i>information</i> .  |
|   |                                  | 1.2 | Method of accessing work area is identified.  |
|   |                                  | 1.3 | Tasks to be completed are identified from work orders and supervisor instructions.  |
|   |                                  | 1.4 | Fall protection equipment is identified if required by site job <i>workplace health and safety (WHS)</i> analysis and <i>statutory and regulatory</i> requirements.   |
|   |                                  | 1.5 | Approved methods of moving tools and equipment to work area are identified to minimise potential of falling objects, removal of scaffold components, inappropriate carrying of materials on ladders, and excessive bending or twisting in pass-up situations. |
| 2 | Access work area.                | 2.1 | Fall protection equipment where required is correctly fitted, adjusted and anchored.  |
|   |                                  | 2.2 | Arrangements are made to appropriately install required equipment taking account of all potential <i>hazards</i> .  |
|   |                                  | 2.3 | Appropriate methods are used to access work area for self, <i>tools and equipment</i> , and <i>materials</i> .  |
|   |                                  | 2.4 | Tools and materials are placed to eliminate or at least minimise the risk of items being knocked down.  |
| 3 | Conduct work tasks.              | 3.1 | Work is conducted following workplace approved procedures.  |
|   |                                  | 3.2 | Fall protection equipment is kept in place and adjusted appropriately to cater for movement during work.  |
|   |                                  | 3.3 | Scaffold components and fall barriers are kept in place during work.  |
|   |                                  | 3.4 | Egress from work area is completed following work site supervisor approved methods for self, tools, materials   |

and *environmental requirements*.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology
  - voice and hand signals to access and understand site-specific instructions.

### Required knowledge

Required knowledge for this unit is:

- construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- quality requirements
- types, characteristics, uses and limitation of plant, tools and equipment
- workplace and equipment safety requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

---

Guidelines for the Training Package.

**Overview of assessment**

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- select and use appropriate height access and fall protection equipment and work methods, including inspecting fall protection equipment, scaffold and fall barriers for faults
- apply knowledge of industry products to identify:
  - manual handling risks
  - types of lifting and support structures approved for use
- modify work activities to cater for variations in work site procedures, contexts and environment and use appropriate behaviour for safe work at heights
- use safe handling requirements, based on information provided, for equipment, products and materials.

**Context of and specific resources for assessment**

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement

- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

## Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning

experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

## Range Statement

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Work at heights*** includes:

- assessment of conditions and hazards
- determination of work requirements
- identification of equipment defects
- inspection of work sites.

***Information*** includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- material safety data sheets (MSDS)
- memos
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

***Workplace health and safety*** is to be in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control

and may include:

- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - photovoltaic (solar) panels
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working in confined spaces
  - working in proximity to others
  - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- relevant OHS legislation applying in the jurisdiction where work is carried out, including:
  - AS6001 - 1999 Working platforms for domestic application
  - AS1576 - Scaffolding
  - AS/NZS4576 - 1995 Guidelines for scaffolding
- use of tools and equipment
- workplace environment and safety.

***Statutory and regulatory*** authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

***Hazards*** include:

- air temperature
- construction activity involving other workers and contractors
- dust and vapours
- electrical equipment
- energy sources
- equipment and materials
- hazardous materials

- light
- manual handling
- moisture
- noise
- photovoltaic (solar) panels
- stationary and moving plant
- work at heights.

***Tools and equipment*** include:

- air compressors and hoses
- hand and power tools
- nail guns
- power leads
- scaffolding.

***Materials*** include:

- materials used on the construction work site.

***Environmental requirements***  
include:

- clean-up management
- noise and dust
- vibration
- waste management.

### **Functional area**

**Unit sector**                      Construction

## **Custom Content Section**

Not applicable.

# CPCCSV5011A Apply building codes and standards to residential buildings

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor** This unit of competency specifies the outcomes required to ensure that the building process complies with the Building Code of Australia (BCA) and relevant Australian standards.

The unit applies to residential buildings and includes the evaluation and interpretation of building requirements, classification of buildings according to the BCA criteria and strategies for compliance.

## Application of the Unit

**Application of the unit** This unit of competency supports the attainment of the understanding and skills to apply building codes and standards to residential buildings within the context of relevant legislation, the BCA and Australian standards.

## Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

**Prerequisite units** Nil

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse the purpose and basic intent of the BCA.	<p>1.1.Objectives of the BCA and the purpose of its respective components in relation to <b><i>construction in residential buildings</i></b> and <b><i>building categories</i></b> are evaluated and documented.</p> <p>1.2.Deemed-to-satisfy (DTS) concept for construction to meet BCA requirements is evaluated and documented.</p>
2. Locate and interpret code and standard requirements applicable to particular projects.	<p>2.1.Clauses from the BCA that apply to particular <b><i>residential building projects requiring review of compliance issues</i></b> are identified and documented.</p> <p>2.2.Prescriptive requirements of relevant BCA clauses and <b><i>standard specifications</i></b> are determined.</p> <p>2.3.Requirements of Australian standards referenced in the BCA are identified and documented.</p> <p>2.4.Special requirements that may be applicable to specific areas of <b><i>building surveying procedures</i></b> are identified and documented.</p>
3. Classify buildings.	<p>3.1.Nature of a building is determined in regard to its proposed use and site arrangement.</p> <p>3.2.BCA criteria are applied to determine the defined classification.</p>

ELEMENT	PERFORMANCE CRITERIA
4. Apply solutions to construction problems for compliance with the BCA.	<p>3.3. BCA requirements are interpreted for multiple classifications.</p> <p>4.1. Criteria to ensure construction methods comply with the intent of the BCA are determined.</p> <p>4.2. Alternative approaches to construction problems that comply with the requirements of the BCA are reported.</p> <p>4.3. Assessment methods used to determine whether a building solution complies with performance requirements or DTS provisions of BCA are analysed and applied.</p> <p>4.4. Assessment methods are confirmed and identified as appropriate to meet the DTS provisions of BCA.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills for this unit are:

- ability to respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - read and interpret:
    - Australian standards
    - BCA
    - other relevant documentation
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
  - written skills to:
    - document building requirements
    - report alternative approaches to construction problem
- innovation skills to develop compliant alternative solutions to construction

## REQUIRED SKILLS AND KNOWLEDGE

problems

- planning and organisational skills to collect, organise and analyse information
- technological skills to:
  - complete documentation and calculations
  - enable information gathering and analysis.

### Required knowledge

Required knowledge for this unit is:

- authorities and powers of a building surveyor
- behaviour of structural members undergoing stress, strain, compression, bending or combined actions
- BCA and primary referenced Australian standards
- criteria for Class 1 and 10 buildings
- design, construction and structural principles of buildings
- DTS provisions
- processes for the administration and preparation of documentation
- processes for the interpretation of reports, working drawings and specifications
- relevant federal, state or territory legislation and local government policy and procedures
- research methods.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

#### Critical aspects for assessment and evidence required to demonstrate competency in this

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

## EVIDENCE GUIDE

### unit

- comply with OHS regulations applicable to workplace operations
- apply organisational management policies and procedures, including quality assurance requirements where appropriate
- classify construction in residential buildings through the evaluation and interpretation of compliance with the BCA and associated reporting of data, findings, recommendations and strategies for at least one residential building project or equivalent in compliance with relevant legislation
- provide reports to appropriate body/individual as determined by the project brief.

### Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

## EVIDENCE GUIDE

---

### Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Construction in residential buildings*** includes:

- compliance with relevant legislation
- design specifications
- evaluation, interpretation and adherence to legislative requirements for BCA Class 1 and 10 buildings
- maintenance specifications
- relevant Australian standards.
- low-rise residential buildings
- single storey buildings.

***Building categories*** include:

***Residential building projects requiring review of compliance issues*** include:

- calculation and processing of application or inspection fees
- project milestones
- provision of site access/facilities
- work schedules.

***Standard specifications*** include:

- developed or detailed specifications addressing specific components, such as structural or other requirements
- industry standard specifications
- preliminary and outline specifications.

***Building surveying procedures*** include:

- mechanical, structural, electrical and other services.

# CPCCWHS1001 Prepare to work safely in the construction industry

## Modification History

Release    Comment

Version 1    Replaces superseded equivalent CPCCOHS1001A Work safely in the construction industry.

## Application

This unit of competency specifies the mandatory work health and safety training required prior to undertaking construction work. The unit requires the person to demonstrate personal awareness and knowledge of health and safety legislative requirements in order to work safely and prevent injury or harm to self and others. It covers identifying and orally reporting common construction hazards, understanding basic risk control measures, and identifying procedures for responding to potential incidents and emergencies. It also covers correctly selecting and fitting common personal protective equipment (PPE) used for construction work.

This unit meets the general construction induction training requirements of:

- Part 1.1 Definitions and Part 6.5 of the Model Work Health and Safety Regulations;
- Division 11 of Part 3 of the Occupational Safety and Health Regulations 1996 for Western Australia; and
- Division 3 of Part 5.1 of the Occupational Health and Safety Regulations 2007 for Victoria.

It is expected that site-specific induction training will be conducted prior to conducting construction work.

Licensing, legislative, regulatory or certification requirements apply to this unit. Relevant work health and safety state and territory regulatory authorities should be consulted to confirm jurisdictional requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Construction

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Identify health and safety legislative requirements of construction work.	1.1. Basic roles, responsibilities and rights of duty holders are identified and explained according to <b><i>jurisdictional health and safety legislative requirements</i></b> . 1.2. Duty of care requirements are identified. 1.3. Construction safe work practices are identified and explained.
2. Identify construction hazards and risk control measures.	2.1. Basic principles of risk management are identified. 2.2. Construction hazards are identified and discussed. 2.3. Purpose and use of PPE are identified and demonstrated. 2.4. Measures for controlling hazards are identified.
3. Identify health and safety communication and reporting processes.	3.1. Health and safety documents are identified and discussed. 3.2. Roles of designated health and safety personnel are identified and explained. 3.3. Safety signs and symbols are identified and explained. 3.4. Procedures for reporting hazards, incidents and injuries are identified.
4. Identify incident and emergency response	4.1. Procedures for responding to incidents and emergencies are identified and explained. 4.2. Procedures for accessing first aid are identified.

procedures.

- 4.3. Types and purpose of fire safety equipment are identified and discussed.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• locate and recognise numbers commonly used in safety signs.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify instructions</li> <li>• listen to instructions to identify key safety information</li> <li>• tell another person about a construction problem or hazard.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• follow simple pictorial safety instructions</li> <li>• follow simple safety instructions that are written in English.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>• select risk control measures.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Jurisdictional health and safety legislative requirements</i></b> must include at least one of the following state and territory Acts or their equivalent:	<ul style="list-style-type: none"> <li>• Australian Capital Territory: Work Health and Safety Act 2011</li> <li>• New South Wales: Work Health and Safety Act 2011</li> <li>• Northern Territory: Work Health and Safety (National Uniform Legislation) Act 2011</li> <li>• Queensland: Work Health and Safety Act 2011</li> <li>• South Australia: Work Health and Safety Act 2012</li> <li>• Tasmania: Work Health and Safety Act 2012</li> <li>• Victoria: Occupational Health and Safety Act 2004</li> <li>• Western Australia: Occupational Safety and Health Act 1984.</li> </ul>

# Assessment Requirements for CPCCWHS1001 Prepare to work safely in the construction industry

## Modification History

Release Comment

Version 1 Replaces superseded equivalent CPCCOHS1001A Work safely in the construction industry.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills, and range of conditions of this unit, in addition to the specific performance and knowledge evidence described below.

The person must:

- identify and orally report two construction hazards
- orally explain how risk could be reduced or removed in relation to those two hazards
- select appropriate personal protective equipment (PPE) to control the risk
- orally explain basic procedures for responding to incidents and emergencies, including types and purpose of the following fire safety equipment:
  - fire blankets
  - fire extinguishers, including water, carbon dioxide, powder and foam
  - hose reels and mains
- identify and orally explain the meaning of required safety signs and symbols
- orally explain the purpose of job safety analyses (JSAs), safe work method statements (SWMS) and safety data sheets (SDS)
- orally explain the roles of the following designated health and safety personnel:
  - first aid officers
  - work health and safety representatives
  - work health and safety committee members
  - supervisors.

The person must also demonstrate correctly fitting to themselves the PPE listed below:

- eye protection
- hearing protection
- hard hat
- high visibility retro reflective vest.

## Knowledge Evidence

A person must demonstrate knowledge of:

- basic duty of care, and the roles, rights and responsibilities of business owners and workers in relation to working safely while undertaking construction work
- basic meaning of the terms ‘hazard’ and ‘risk’
- basic principles of risk management, including the following five steps in order:
  - identify hazard
  - assess risk
  - consult and report
  - control hazard
  - review
- basic procedures for accessing first aid
- construction hazards, including those relating to:
  - asbestos
  - confined spaces
  - electrical: power lines, cords and equipment
  - excavations and trenches, including underground services
  - dust
  - falling objects
  - hazardous substances and dangerous goods
  - hot and cold work environments
  - manual handling
  - noise
  - plant and equipment operation
  - traffic and mobile plant
  - unplanned collapse
  - ultraviolet radiation
  - working at heights, including scaffolding
- construction work that requires a high risk work licence
- types, purpose and use of PPE used in construction, as specified in the performance evidence, and including safety footwear, harnesses and respiratory protection, and ultraviolet (UV) protective clothing and sunscreen
- construction emergencies, including:
  - chemical spill
  - fire
  - injury to personnel
  - structural collapse
  - toxic or flammable vapour emission
  - vehicle or mobile plant accident

- construction incidents, including:
  - incidents resulting in personal injury or damage to property
  - near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence
- safe work practices that should be followed in construction work, including:
  - accessing and using site amenities for drinking water, hand washing and toilets
  - following safety procedures when performing work tasks and using equipment
  - identifying and reporting hazards, incidents and injuries in the workplace
  - keeping the work area clean, tidy and free from debris
  - not using or being affected by drugs and/or alcohol while at work
  - preventing bullying and harassment in the workplace
  - selecting and using required PPE
  - smoking only in designated areas
  - storing and removing waste and debris in designated areas
- meanings and symbols associated with construction safety signs, symbols and tags, including:
  - emergency information signs: exits, emergency equipment and first aid
  - fire signs: location of fire alarms and firefighting equipment
  - hazard signs and symbols: danger and warning
  - regulatory signs and symbols: prohibition, mandatory and limitation or restriction
  - safety and lockout tags: danger and out-of-service tags.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - all of the PPE listed in the performance evidence
- specifications:
  - state or territory Act relevant to the location of the learner, as specified in the range of conditions.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically and/or by an assessor observing the learner via audio and visual media in real time.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

Assessors must hold the unit *CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry*, or its successor.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

## Modification History

Release 1.

Supersedes and equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

## Application

This unit specifies the outcomes required to carry out work health and safety (WHS) requirements through safe work practices in all on- or off-site construction workplaces.

It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

The unit covers fundamental WHS requirements necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

It applies to workers in the construction industry.

This unit also relates directly to the general construction induction training requirements of the Model Work Health and Safety Regulations 2011 and relevant occupational health and safety regulations for Victoria and for Western Australia. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* covers these induction training requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Unit Sector

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Identify and assess risks.	<p>1.1 Identify, assess and report hazards in the work area to designated personnel.</p> <p>1.2 Report safety risks in the work area based on identified hazards, to designated personnel.</p> <p>1.3 Follow safe work practices, duty of care requirements and safe work instructions for controlling risks.</p> <p>1.4 Contribute to WHS, hazard, accident or incident reports in accordance with workplace procedures, Australian government and state or territory WHS legislation, and relevant information.</p>
2. Identify hazardous materials and other hazards on work sites.	<p>2.1 Correctly identify and, if appropriate, handle and use hazardous materials on a work site in accordance with legislative requirements, and workplace policies and procedures.</p> <p>2.2 Apply measures for controlling risks and construction hazards effectively and immediately.</p> <p>2.3 Use appropriate signs and symbols to secure hazardous materials that have safety implications for self and other workers, immediately they are identified.</p> <p>2.4 Identify asbestos-containing materials on a work site and report to designated personnel.</p>
3. Plan and prepare for safe work practices.	<p>3.1 Identify, wear, correctly fit, use and store correct personal protective equipment and clothing for each area of construction work in accordance with workplace procedures</p> <p>3.2 Select tools, equipment and materials, and organise tasks in conjunction with other personnel on site and in accordance with workplace procedures.</p> <p>3.3 Determine required barricades and signage, and erect at the appropriate site location.</p> <p>3.4 Apply material safety data sheets (MSDSs), job safety analyses (JSAs) and safe work method statements (SWMSs) relevant to the work to be performed.</p>
4. Apply safe work practices.	<p>4.1 Carry out tasks in a manner that is safe for operators, other personnel and the general community, in accordance with legislative requirements, and workplace policies and procedures.</p> <p>4.2 Use plant and equipment guards in accordance with manufacturers' specifications, work site regulations and Australian Standards.</p> <p>4.3 Follow procedures and report hazards, incidents and injuries</p>

	<p>to relevant authorities.</p> <p>4.4 Recognise and do not use prohibited tools and equipment in areas containing identified asbestos.</p> <p>4.5 Identify and follow requirements of work site safety signs and symbols.</p> <p>4.6 Clear and maintain work site area to prevent and protect self and others from incidents and accidents, and to meet environmental requirements.</p>
5. Follow emergency procedures.	<p>5.1 Identify designated personnel in the event of an emergency for communication purposes.</p> <p>5.2 Follow safe workplace procedures for dealing with accidents, fire and other emergencies, including identification and use, if appropriate, of fire equipment within scope of own responsibilities.</p> <p>5.3 Describe, practice and effectively carry out emergency response and evacuation procedures when required.</p> <p>5.4 Carry out emergency first aid treatment of minor injuries and, as soon as possible, accurately report treatment details to designated personnel.</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

## Modification History

Release 1.

Supersedes and equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

## Performance Evidence

To demonstrate competency in this unit, a person must apply WHS requirements, policies and procedures on three separate and different occasions in the construction industry.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- jurisdictional work health and safety (WHS) and environmental legislation and regulations
- workplace requirements for undertaking all aspects of applying WHS requirements, policies and procedures in the construction industry including interpreting work orders and reporting problems
- procedures and policies for identifying and reporting hazards, safety risks and hazardous materials, including asbestos, in the workplace
- procedures for following safe practices when dealing with hazards and hazardous materials, and controlling risks associated with them
- use of appropriate protective equipment and clothing, choice of tools, use of barricades and signage, and the necessity of following relevant safety procedures as indicated
- methods of safely performing tasks in accordance with legislative requirements and workplace policies and procedures
- procedures for reporting hazards, incidents and injuries
- necessity for keeping work site clear of risks to prevent accidents and to meet environmental requirements
- policies and procedures to be followed in an accident, fire or other type of emergency.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- appropriate documents, materials, tools, equipment and personal protective equipment currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCSUS5002A Develop action plans to retrofit existing buildings for energy efficiency

## Modification History

New unit.

This version first released with CPC08 Construction, Plumbing and Services Training Package Version 9.

## Unit Descriptor

This unit of competency specifies the outcomes required when planning to improve the energy efficiency of an existing building.

## Application of the Unit

This unit of competency applies to those involved in the design or development of retro fits for energy efficiency, including building designers, tradespeople and building project managers.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Pre-Requisites

Nil

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

- |   |   |   |
|---|---|---|
| 1 | Commence retro-fit planning processes.  | <p>1.1 <b><i>Client requirements and expectations</i></b> for the specific use of the building and the energy efficient retro-fit priorities are discussed and incorporated into planning.</p> <p>1.2 <b><i>Energy assessment is initiated</i></b> or report from a prior assessment is reviewed and discussed with key stakeholders to determine energy conservation measures.</p> <p>1.3 <b><i>Client is provided with overview of recommended processes and information relevant to generating an energy efficient retro fit.</i></b></p>  |
| 2 | Identify and evaluate opportunities to improve energy conservation and efficiency of the existing building. | <p>2.1 Recommendations from energy efficiency assessor are reviewed and evaluated for input into the retro-fit action plan.</p> <p>2.2 <b><i>Limitations and obstacles</i></b> involved in the energy efficiency upgrade of the building are identified and appropriate <b><i>solutions</i></b> developed.</p> <p>2.3 <b><i>Risks</i></b> of retrofitting existing building for improved energy efficiency are identified and managed, including possible installation of mechanical ventilation systems.</p> <p>2.4 <b><i>Strategies</i></b> that provide a measurable increase in the operational energy efficiency of the existing building are developed and costed.</p> <p>2.5 Structural adequacy of the existing building is assessed to determine appropriateness of retro-fit solutions for energy efficiency.</p> |
| 3 | Research and select energy efficient materials, products and systems.                                       | <p>3.1 <b><i>Materials</i></b>, products and systems appropriate to the existing building are researched for energy efficiency specifications.</p> <p>3.2 Manufacturer representatives and literature are consulted to identify installation and operational specifications.</p>  |

- 3.3 Compliance requirements for selecting and installing materials, products and systems are understood and adhered to.
    - 3.4 Thermal and acoustic insulation of the building and quality of installation are assessed where appropriate to determine energy efficiency rating and appropriate solutions to improve insulating properties of the building.
- 4 Finalise retro-fit action plan.
  - 4.1 **Final retro-fit action plan** is developed according to organisational procedures.
  - 4.2 Projected **benefits** of undertaking each of the proposed retro fit measures are explained to client.
  - 4.3 Client sign-off is obtained and **documentation** of agreed plan is finalised.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- learning skills to evaluate information from a variety of sources to inform advice to client on retro-fitting buildings for energy efficiency
- numeracy skills to:
  - calculate and confirm correct quantities of materials for work tasks
  - prepare costings for proposed project work
- oral communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, and share information
  - use language and concepts appropriate to cultural differences
- reading skills to:
  - interpret documentation, including drawings and specifications
  - research and interpret manufacturer product information
- writing skills to develop recommendations and reports for clients

### Required knowledge

- building science principles and their application to the retro-fitting of existing buildings for improved energy efficiency
- compliance requirements relating to construction materials and methods, including:
  - Australian standards
  - environmental and sustainability requirements, including:
    - energy efficiency
    - fire resistance, including resistance from bushfire attack
  - National Construction Code deemed-to-satisfy requirements
- energy efficiency ratings available for buildings, and their meaning
- general construction terminology
- processes for calculating material requirements
- risks of completely sealing the building envelope and ways to mitigate them
- types, characteristics, uses and limitations of materials, products and systems used when retrofitting for energy efficiency
- types, uses and limitations of previously used materials
- types, uses and limitations of renewable sources of energy
- types, location and use of relevant safety information, such as:
  - job safety analyses (JSA) and safe work method statements
  - environmental and work site safety plans
  - safety data sheets (SDS)

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment** This unit of competency could be assessed by performing a range of tasks in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person should demonstrate the ability to:

- develop an action plan to retrofit and improve the energy efficiency of either one existing residential building or one existing commercial building, providing evidence of the following:
  - engaging in a team environment working with stakeholders across multiple disciplines, such as engaging or leading an integrated project design or delivery of a

project

- research undertaken to identify appropriate products, materials and systems for use in the retro fit
- evaluation of risks involved in the retro fit and identification of appropriate solutions to avoid risks or hazards to occupants and others
- written action plan for the retro fit of the building which responds to identified client requirements and expectations, as well as research undertaken into energy efficiency opportunities and recommended systems, materials and products to be used in the retro fit with relevant costings and timelines
- locate, interpret and apply relevant information, standards and specifications to ensure the development of compliant action plans that meet client expectations and organisational policies and procedures
- comply with work health and safety (WHS) legislation, regulations and codes of practice applicable to workplace operations.

**Context of and specific resources for assessment**

Assessment of this unit:

- must be in the context of the work environment
- may be conducted in an off-site context, provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills
- must meet relevant compliance requirements.

Resource implications for assessment include:

- an induction procedure
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- research resources, including industry-related systems information
- safety data sheets.

**Method of assessment**

Assessment for this unit must verify the practical application of the required skills and knowledge, using one or more of the following methods:

- direct observation of tasks in real or simulated work

conditions

- questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- review of relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

**Guidance information for assessment**

This unit could be assessed on its own or in combination with other units relevant to the job function, such as:

- CPPHSA4001A Assess household energy use

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Assessment processes and techniques should, as far as is practical, take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Client requirements and expectations*** may include:

- enhanced health and safety outcomes for occupants through improved air quality and selection of materials
- improved building durability
- increased return on investment through higher resale or higher rental income
- reduction in energy bills following retro fit.

***Energy assessment:***

- can include financial and non-financial benefits of retrofitting the building to improve energy efficiency
- can include recommendations that will improve the energy efficiency of the building
- identifies existing energy rating of a building using a variety of testing and assessment methods.

***Information*** must

- energy efficient materials and installation methods
- regulations, codes and standards governing energy efficient

include: construction.

***Limitations and***

***obstacles*** may include:

- budget constraints
- condition of existing building
- local council planning provisions, including land overlays and requirements relating to neighbourhood character
- orientation of the existing building
- original design and construction of existing building
- position of existing services to the building
- presence of protected vegetation adjacent to existing building
- protection of existing building under heritage listing
- proximity of other buildings or structures.

***Solutions*** may include:

- engaging experts in heritage construction to advise on appropriate solutions for heritage listed buildings undergoing energy efficiency upgrades
- repairing parts of the existing structure before commencing energy efficiency retro fit
- repositioning services to the building
- seeking permission from relevant authorities to remove large trees that may inappropriately overshadow the building and reduce energy efficiency opportunities
- selecting and using economical and effective energy efficient systems and materials.

***Risks*** must include:

- risks associated with completely sealing the building envelope, such as:
  - air pressure differentials
  - combustion
  - moisture and mould
  - poor indoor air quality.

***Strategies*** may include:

- changing light fittings to LEDs
- installing motion sensor lighting
- replacing insulation in ceilings, walls or floors
- sealing building envelope to reduce unwanted air leakage
- sealing openable windows
- repositioning the heating system
- installing solar photovoltaic systems
- replacing electric hot water system with gas or solar hot water system.

***Materials*** may include:

- aerated autoclaved concrete products
- bricks and mortar
- concrete blocks
- insulating materials
- plasterboard

***Final retro-fit action plan*** must address:

- reflective paints
- slabs
- timber
- window frames and glass.
- client expectations
- costings
- material use
- other resourcing
- risk management
- timelines.

***Benefits*** may include:

- improved levels of comfort for the occupants
- increased air changes per hour to improve indoor air quality
- increased durability of the building
- potential for improved return on investment
- reduction in and prevention of mould
- reduction in heating and cooling costs.

***Documentation*** may include:

- applications for permits and service connections
- copies of plans, drawings and specifications
- environmental applications.

## **Unit Sector(s)**

Construction

## **Custom Content Section**

Not applicable.

# CPPBDN4001 Research and evaluate construction materials and methods for building design projects

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Application

This unit of competency specifies the outcomes required to research and evaluate existing and emerging construction materials and methods for residential, commercial and industrial buildings, as defined in the Building Code of Australia (BCA), including for new buildings, additions and renovations to existing structures, and heritage restorations.

Research and evaluation are undertaken to develop an understanding of the range of contemporary construction materials and methods available; and their application, performance and interaction.

The unit supports drafters who work under the supervision and instruction of architects and building designers, ensuring that accurate and current information and data on construction materials and methods are identified and applied across building design projects.

Licensing, legislative, regulatory or certification requirements apply to building design drafting in some states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements

## Pre-requisite Unit

Nil

## Competency Field

Drafting

## Unit Sector

Building design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |  |  |
|--|--|
| 1. Review project brief and determine requirements.                              | 1.1. Project brief is reviewed and information relating to work requirements, BCA class, and type of building to be researched is identified.                      |
|  | 1.2. Requirements for research are confirmed, as required, with architect or building designer.  |
|  | 1.3. <b><i>Compliance requirements</i></b> relevant to project building class and type and research scope are identified.  |
| 2. Research materials and methods for structural elements of specified building. | 2.1. <b><i>Features and applications of materials used for structural elements</i></b> are researched and evaluated.   |
|  | 2.2. Compliance requirements <b><i>for materials used for structural elements</i></b> are researched and interpreted.  |
|  | 2.3. Construction methods and systems for <b><i>structural elements</i></b> are researched and evaluated.  |
| 3. Research materials and methods for building envelope of specified building.   | 3.1. Characteristics and applications of <b><i>materials used for building envelope</i></b> are researched and evaluated.  |
|  | 3.2. Construction methods for building envelope and their compliance requirements are researched and interpreted.  |
| 4. Research systems and components for services of specified building.           | 4.1. Features of systems and components for <b><i>services</i></b> are evaluated for costs and benefits according to client requirements for the building project. |
|  | 4.2. Compliance requirements for services are researched and interpreted.  |
|  | 4.3. Installation methods for services are researched in relation to different types of systems and components.  |
| 5. Document and maintain research findings.                                      | 5.1. Draft research findings with collated data, recommendations and supporting evidence are produced.   |
|  | 5.2. Input into draft research findings is sought according to agreed procedures.  |
|  | 5.3. Research findings are finalised and distributed to  |

appropriate stakeholders.

5.4. Research findings are updated as required.

## Foundation Skills

This section describes core skills that are essential to performance and not explicit in the performance criteria. Employment skills essential to performance are explicit in the performance criteria of this unit of competency.

Skill	Performance feature
Learning skills to:	<ul style="list-style-type: none"><li>• evaluate the validity and reliability of information relating to existing and emerging building materials and methods</li><li>• independently navigate and find specific information in the National Construction Code (NCC)</li><li>• use systems for ordering, classifying and storing familiar reference materials and research information for easy retrieval.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• extract and interpret numerical information relating to building materials and methods, including:<ul style="list-style-type: none"><li>• fractions, decimals and percentages, ratio, rates and proportions</li><li>• routine formulas and building design mathematical representations and conventions</li><li>• two-dimensional and three-dimensional shapes, including compound shapes</li><li>• statistical data in complex tables, spreadsheets and graphs</li></ul></li><li>• measure, estimate and calculate in order to recommend cost-effective solutions for building design projects.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• listen to and clarify instructions and information relating to building materials and methods received from architect, building designer or manufacturer</li><li>• consider audience when arguing for or against specific building materials and methods being used in a building project</li><li>• respond to specific enquiries regarding own research findings, and clarify as necessary.</li></ul>

<b>Skill</b>	<b>Performance feature</b>
Reading skills to:	<ul style="list-style-type: none"><li>• use different reading strategies to locate at times complex information about material characteristics and construction methods</li><li>• understand specialised NCC terminology.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• record data about building materials in text, table and diagram format</li><li>• integrate information and ideas from a range of sources and document associated recommendations, using support materials such as photographs, diagrams and graphs.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Compliance requirements*** must include:

- current Australian standards applicable to the building design
- federal, state or territory, and local authority legislation and regulations applicable to the building design
- NCC.

***Features*** must include:

- acoustic properties
- aesthetic properties
- availability
- cost
- defects
- durability
- energy efficiency
- fire resistance properties
- health and safety issues
- interaction with other materials
- limitations due to manufacturing process
- maintenance requirements
- structural safety
- sustainability features
- thermal properties
- tolerance.

***Applications of materials used for***

- coatings required
- compatibility with other elements

- Structural elements*** must include:
- fixings required
  - structural application
  - substructural application
  - use in specific construction methods or systems.

- Materials used for structural elements*** must include three or more of the following:
- existing and emerging materials
  - bricks
  - clay
  - composite materials
  - concrete
  - glass
  - glass blocks
  - metals
  - stone
  - timber and timber products.

- Structural elements*** must include:
- footings
  - floors
  - slabs
  - walls
  - roofs.

- Materials used for building envelope*** must include three or more of the following:
- existing and emerging materials
  - bricks
  - clay
  - composite materials
  - concrete
  - glass
  - glass blocks
  - metals
  - stone
  - timber and timber products.

- Services*** must include:
- energy
  - fire suppression
  - heating, ventilation and air conditioning (HVAC)
  - telecommunications
  - water

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPBDN4001 Research and evaluate construction materials and methods for building design projects

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also be able to provide evidence of the ability to develop and maintain current research findings to support the building design process for the following three different types of building design projects, as defined in the Building Code of Australia (BCA). At least one of the building design projects must include a Class 10 component:

- one Class 1 building
- one Class 2 building
- one building selected from Classes 3 to 9.

At least one of the above building projects must be two storeys and one building project must be three storeys or more.

The person must produce research findings, with recommendations and supporting evidence for each of the above buildings, based on an evaluation of:

- features and applications of a range of at least three materials suitable for the structural elements and building envelope of each building project
- different construction methods and systems applicable to structural elements and building envelope for each building project
- systems and components for services, having considered:
  - relevant compliance requirements for each building project
  - installation methods for each building project.

The person must also be able to demonstrate a process for:

- seeking feedback on and distributing findings from each of the building projects
- maintaining the currency of research findings.

## Knowledge Evidence

A person demonstrating competency in this unit must be able to demonstrate knowledge of the sections of the BCA relevant to the classes and types of buildings specified in the performance evidence, including knowledge of the following:

- performance features of building materials detailed in the range of conditions, and the cost benefits of their application
- building construction methods used for different materials that form structural elements and the building envelope
- construction and design terminology to describe the features and applications of materials and construction methods used.

In addition, evidence of the following knowledge must be demonstrated relevant to the classes and types of buildings specified in the performance evidence:

- sources of reliable information on existing and emerging uses of construction materials and methods
- workplace procedures for handling, storing and retrieving research information and outcomes.

## Assessment Conditions

Assessment must be conducted in the workplace or a close simulation of the workplace.

Suitable assessment of performance requires:

- equipment:
  - computer with internet access and software currently used in architectural and building design practices
  - telephone
- relationships with team members and supervisor:
  - tasks may be completed as an individual and as a team member, under the direction of an architect, building designer or other relevant person
- specifications – access to:
  - BCA and Australian standards applicable to the buildings specified in the performance evidence
  - manufacturer specifications relating to construction materials and methods used in the buildings specified in the performance evidence.

## Assessor requirements

As a minimum, assessors must satisfy SNR/AQTF assessor requirements.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPBDN4002 Research and apply compliance requirements to technical construction documentation

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Application

This unit of competency specifies the outcomes required to research and apply compliance requirements to building design documentation for residential, commercial and industrial buildings, as defined in the Building Code of Australia (BCA).

The unit applies to additions and renovations to a range of different types of new buildings and existing structures. It supports drafters who assist, and work under the supervision and instruction of an architect or building designer; and who take responsibility, at the level appropriate to their role, for ensuring that building design documentation complies with current and relevant legislation, codes and standards, including the National Construction Code (NCC) and local authority planning schemes.

Licensing, legislative, regulatory or certification requirements apply to building design drafting in some states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Drafting

## Unit Sector

Building design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

text is used, further information is detailed in the range of conditions.

1. Research building design project compliance requirements.
  - 1.1. **Legislation, codes and standards** relating to the compliance of specific building design project are accessed, and variations in requirements are interpreted and noted.
  - 1.2. **Compliance requirements** for designs in different project locations and different conditions are researched, and variations in requirements are interpreted and noted.
  - 1.3. Research findings are recorded, filed and regularly updated according to workplace procedures.
2. Analyse and interpret implications of compliance requirements.
  - 2.1. Ambiguous and conflicting compliance requirements are clarified with relevant professionals.
  - 2.2. **Constraints** placed on design options due to compliance requirements are identified and discussed with the designer.
  - 2.3. Potential exemptions from compliance with relevant codes are investigated and discussed with designer, and appropriate course of action is noted.
  - 2.4. Processes for obtaining an exemption are identified and actioned as required.
3. Review and action compliance requirements.
  - 3.1. Technical construction documentation is reviewed for compliance with relevant legislation, codes and standards according to designer's instructions.
  - 3.2. Non-compliance issues are noted and discussed with designer and required amendments are identified.
  - 3.3. Amendments or modifications to plans and technical documentation are made to ensure compliance with relevant legislation, codes and standards.

## Foundation Skills

This section describes core skills that are essential to performance and not explicit in the performance criteria. Employment skills essential to performance are explicit in the performance criteria of this unit of competency.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"><li>• access a range of resources, information and support, including the BCA, to assist in developing own understanding of compliance requirements relating to construction documentation</li><li>• draw on experience in compliance research and apply to analysis of different building design projects.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• interpret and apply information from technical drawings and reports, including ratios, scales and scale conversions.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• participate in discussions in the workplace and with external specialists using specialised vocabulary relating to compliance.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• understand specialised vocabulary and acronyms specific to technical documentation used in building design projects</li><li>• use different reading approaches to locate specific compliance requirements in a range of resources, including the BCA.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• make legible notes of discussions with colleagues and external specialists</li><li>• use specialised vocabulary relating to building design projects.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Legislation*** must include:
- legislation and regulations relating to:
    - building
    - construction materials and methods
    - disability access
    - energy efficiency
    - environment
    - local authority planning schemes
    - work health and safety (WHS).
- Codes and standards*** must include:
- Australian standards, including standards for drawing:
    - AS1100.101 Technical drawing - General principles
    - AS1100.301 Technical drawing - Architectural drawing
    - AS1101.1 Graphic symbols for general engineering - Hydraulic and pneumatic systems
  - NCC.

**Compliance requirements** must include:

- current Australian standards applicable to the building design
- federal, state or territory, and local authority legislation and regulations and planning schemes applicable to the building design
- NCC.

**Constraints** must include:

- reference to:
  - local authority planning scheme relevant to the applicable building design
  - project brief
  - sections of the BCA relevant to the applicable building design.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for CPPBDN4002 Research and apply compliance requirements to technical construction documentation

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence of the ability to apply compliance requirements to technical construction documentation for the following three different building projects, as defined in the Building Code of Australia (BCA). At least one of the building design projects must include a Class 10 component:

- one Class 1 building
- one Class 2 building
- one building selected from Classes 3 to 9.

At least one of the above building projects must be two storeys and one building project must be three storeys or more.

In each of the projects, the person must:

- develop a body of current research findings relating to the codes and standards affecting compliance of building designs
- analyse compliance requirements in relation to client requests
- review compliance of drawings, including those from other disciplines such as land surveyors, and hydraulic and fire engineers
- amend technical construction documents to ensure compliance with codes and standards
- document and store research findings.

## Knowledge Evidence

A person demonstrating competency in this unit must be able to demonstrate knowledge of the sections of the BCA relevant to the classes and types of buildings specified in the performance evidence, including knowledge of the following:

- compliance requirements relating to specific building design projects, including:
  - Australian standards for drawing applicable to the building projects
  - local authority planning schemes
  - National Construction Code (NCC) requirements

- state planning policies
- state building codes
- disability access requirements
- environmental and sustainability requirements, including:
  - energy efficiency
  - fire resistance, including resistance to bushfire attack
  - sound
  - flood
  - ventilation
- building designers' duty of care to ensure quality and safety of designs
- legislation as listed in the range of conditions and as relevant to the building project
- work health and safety requirements relevant to the building projects specified in the performance evidence.

## Assessment Conditions

Assessment must be conducted in the workplace or a close simulation of the workplace.

Suitable assessment of performance requires:

- equipment:
  - computer with internet access and building information modelling (BIM)-capable building design software and business software currently used in drafting, architectural and building design practice
  - telephone
- materials:
  - technical reports
  - working drawings and plans
- contingencies:
  - implications of non-compliance
  - implications of preparing and submitting to relevant authority insufficient or inaccurate documentation
- specifications – access to:
  - NCC and Australian standards
  - legislation, regulations, codes and other relevant compliance documentation relating to each building design project specified in the performance evidence
  - manufacturer product specifications on building materials and methods
  - project brief for the three building classes and types specified in the performance evidence, including specifications relating to:
    - building envelopes
    - services
    - structural components
- relationships with team members and supervisor:

- tasks may be completed as an individual and as a team member, under the direction of an architect, building designer or other relevant person
- relationship with client:
  - limited liaison with the client is required and only under direction of the architect or building designer.

### **Assessor requirements**

As a minimum, assessors must satisfy SNR/AQTF assessor requirements.

### **Links**

Companion Volume implementation guides are found in VETNet -

# CPPBDN4003 Collect, apply and store building design project information

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Application

This unit of competency specifies the outcomes required to set up project filing systems for documentation relevant to different residential, commercial and industrial building design projects as defined in the Building Code of Australia (BCA).

The unit covers setting up digital filing systems for documentation other than the building design project's design drawings; and hard copy filing systems, for both internal and externally-sourced documents. It also covers collecting and filing relevant documentation required at the initiation of building design projects, reviewing the contents of documentation, and applying the information to the progress of the building design project.

The unit supports the work of drafters who assist and work under the instruction and supervision of architects, building designers and other personnel, such as home sustainability assessors.

Licensing, legislative, regulatory or certification requirements apply to building design drafting in some states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Drafting

## Unit Sector

Building design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |   |  |
|---|--|
| 1. Set up project files.                      | 1.1. Building design project naming and version control system is confirmed and applied to project filing systems for incoming hard copy and digital documents from internal and external sources. |
|   | 1.2. Folders are created and named for storage of different types of documentation.  |
|   | 1.3. Systems for recording file removal from storage and amendments or additions to content are confirmed and applied.   |
| 2. Collect, store and maintain information.   | 2.1. Sources of information relating to client requirements for building design projects are identified and information is collected and stored.   |
|   | 2.2. Sources of information relating to <b><i>compliance requirements</i></b> are identified and information is collected and stored.  |
|   | 2.3. Sources of information relating to site location characteristics are identified and information is collected and stored.  |
|   | 2.4. Sources of information relating to existing site infrastructure and services are identified and information is collected and stored.  |
|   | 2.5. Building engineers' documents are collected and stored in relevant files.   |
|   | 2.6. Files are reviewed periodically to ensure storage is correct, contents are complete and up-to-date, and files are backed up according to workplace procedures.                                |
| 3. Apply building design project information. | 3.1. Information contained in documentation is summarised, with accurate references and discussed with designer and project team, as required.   |
|   | 3.2. Procedures for ensuring relevant information is incorporated into building design project drawings and documentation are confirmed with project manager and                                   |

followed.

## Foundation Skills

This section describes core skills that are essential to performance and not explicit in the performance criteria. Employment skills essential to performance are explicit in the performance criteria of this unit of competency.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"><li>• access a range of resources, information and support to assist in developing understanding of file management systems</li><li>• use hard copy and digital filing systems to collect, analyse, store, organise and facilitate ongoing access to information.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• apply version control systems to project files</li><li>• use mathematical language to discuss with colleagues information gathered from documentation.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• participate in workplace discussions using specialised technical vocabulary relating to building design projects.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret building design project information with specialised vocabulary and technical content in graphic form</li><li>• check own understanding of texts and use strategies to clarify meaning.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• integrate information from a variety of sources to create summary of information gathered</li><li>• use specialised vocabulary relating to building design projects when summarising information.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Compliance requirements</i></b> must include:	<ul style="list-style-type: none"><li>• current Australian standards applicable to the building design</li><li>• federal, state or territory, and local authority legislation and regulations applicable to the building design</li><li>• National Construction Code.</li></ul>
---	---

# Assessment Requirements for CPPBDN4003 Collect, apply and store building design project information

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence of the ability to collect, apply and store information for the following three different types of building design projects, as defined in the Building Code of Australia (BCA). At least one of the building design projects must include a Class 10 component:

- one Class 1 building
- one Class 2 building
- one building selected from Classes 3 to 9.

The person must provide evidence of:

- applying and maintaining project file naming and storage systems, including hard copy and digital drawing files and back-ups
- applying systems for monitoring file removals and amendments
- collecting, reviewing and filing digital and hard-copy documentation relating to:
  - client requirements
  - compliance requirements
  - site location characteristics
  - existing site infrastructure and services
- providing summarised information to project designer and team
- following procedures as directed to ensure relevant information is incorporated into the design process.

## Knowledge Evidence

A person demonstrating competency in this unit must be able to demonstrate knowledge of collecting, applying and storing information for three building design projects specified in the performance evidence, including:

- construction terminology required to summarise and discuss types and content of internally and externally-sourced information with colleagues and designer
- building design project file naming and storing systems for:
  - digital information, including:

- incoming drawing files
- internal and external text, database, spreadsheet and presentation files
- hard-copy documentation, including:
  - internal and externally-sourced drawing files
  - internal and external text, database, spreadsheet and presentation files
- file management processes for tracking both digital and hard-copy building design project information
- types and sources of information required at the initiation of building design projects, including:
  - client requirements
  - site-specific compliance requirements
  - site location characteristics
  - existing site infrastructure and services.

## Assessment Conditions

Assessment must be conducted in the workplace or a close simulation of the workplace.

Suitable assessment of performance requires:

- equipment:
  - computer with internet access and building information modelling (BIM)-capable building design software and storage capacity for a range of typical building design project information
  - electronic file storage devices
  - hard copy file storage system
- relationships with team members and supervisor:
  - tasks may be completed as an individual and as a team member, under the direction of an architect, building designer or other relevant person
- specifications – access to:
  - project information relating to the three buildings design projects specified in the performance evidence
  - National Construction Code (NCC) and relevant Australian standards relating to the three building design projects specified in the performance evidence.

## Assessor requirements

As a minimum, assessors must satisfy SNR/AQTF assessor requirements.

# CPPBDN4004 Set up BIM-capable software and files for building design drafting projects

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Application

This unit of competency specifies the outcomes required to set up digital project files in building information modelling (BIM)-capable industry-standard building design drawing software for residential, commercial and industrial building design projects as defined in the Building Code of Australia (BCA).

It covers installing BIM-capable design software and applying its functions and options to create, name and save project files and templates for different types of building design projects.

The unit supports the work of drafters who assist and work under the supervision and instruction of architects, building designers and other personnel, such as home sustainability assessors.

Licensing, legislative, regulatory or certification requirements apply to building design drafting in some states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Drafting

## Unit Sector

Building design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |   |  |
|---|--|
| 1. Prepare to use building design drawing software to set up project files. | 1.1. <b><i>Building design drawing software</i></b> is installed and configured following relevant instructions.<br>1.2. Information to operate building design drawing software is accessed and interpreted to prepare for setting up project files.<br>1.3. Support for software installation and interpretation and application of <b><i>software functions and operations</i></b> is obtained as required.   |
| 2. Plan software drawing file requirements.                                 | 2.1. Project brief and designer's notes are reviewed and scope and nature of building design project are identified.<br>2.2. Naming protocols for digital drawing files are determined according to project and workplace requirements and systems.<br>2.3. Types of drawings required by client, project and relevant authorities are determined in consultation with designer.<br>2.4. Title block information is confirmed with designer.<br>2.5. Checklist of drawing files required for project is prepared with file-naming protocols applied.<br>2.6. Folder name and location for digital project drawing files are confirmed with designer. |
| 3. Set up project templates.  | 3.1. Building design drawing software support information is accessed to assist in adapting built-in templates to set up project template files.<br>3.2. Software support information is accessed to assist in creating original project template files.<br>3.3. Project template files are named according to file-naming protocols and saved in project folder in correct location.  |

3.4. Files are backed up according to workplace procedures.

## Foundation Skills

This section describes core skills that are essential to performance and not explicit in the performance criteria. Employment skills essential to performance are explicit in the performance criteria of this unit of competency.

Skill	Performance feature
Learning skills to:	<ul style="list-style-type: none"><li>• access a range of resources, professional development activities, information and support, including proprietary help tutorials and instructions, to assist in understanding the operation of building design drawing software, especially relating to new versions and functions</li><li>• draw on experience with the functions and operations of building design software and apply to new work.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• interpret numerical information relating to building design project information and software options and functions including measurements of dimensions, scales, scale conversions and version control.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• participate in workplace discussions using specialised vocabulary relevant to building design drawing software and its functionality.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret software operation manuals and building design project information with specialised vocabulary and technical content, sometimes in graphic form</li><li>• apply strategies to clarify meaning of texts.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• make accurate notes of technical discussions with colleagues relating to digital building design drawings.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Building design drawing software*** must include:

- BIM-capable current industry-standard software.

- Software functions and operations* for setting project parameters and templates must include those for:
- fundamental project information, including:
    - name
    - number
    - location
  - project settings, including predefined elements
  - view templates
  - groups or families
  - title blocks
  - project views, including:
    - plan views
    - levels
    - schedules
    - legends
    - sheets
  - visibility and graphic settings
  - print settings
  - project and shared parameters.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPBDN4004 Set up BIM-capable software and files for building design drafting projects

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence of the ability to set up project template files for the following three different types of building design projects, as defined by the Building Code of Australia (BCA). At least one of the building design projects must include a Class 10 component:

- one Class 1 building
- one Class 2 building
- one building selected from Classes 3 to 9.

Within the context described above, a person must provide evidence of:

- installing and configuring building information modelling (BIM)-capable building design drawing software
- accessing and interpreting software operation information when setting up digital building design drawing files
- planning project file creation, including confirming project details and preparing a checklist of templates and required elements
- applying software functions and options to create project templates for the range of drawings required for the three building design projects, including:
  - using in-built proformas
  - creating original templates
- using workplace protocols and systems to name, save and back up building design templates and files.

## Knowledge Evidence

A person demonstrating competency in this unit must be able to demonstrate knowledge of:

- construction and technical terminology required to discuss digital building design drafting project templates and files with work colleagues, designer and external personnel
- functions and options of building design drawing software relevant to creating project templates and files
- strategies for developing knowledge of building design drawing software

- systems for naming, saving and backing up digital drawing files
- types of digital drawing templates and files required for building design projects.

## Assessment Conditions

Assessment must be conducted in the workplace or a close simulation of the workplace.

Suitable assessment of performance requires:

- equipment:
  - computer with internet access and BIM-capable building design drawing software
- relationships with team members and supervisor:
  - tasks must be completed individually but may rely on information sourced from team members and supervisor as relevant to the task
- specifications:
  - architect's or building designer's notes, sketches and instructions for digital building design project template and file requirements for three building design projects as specified in the performance evidence
  - building design drawing software specifications and manuals.

## Assessor requirements

As a minimum, assessors must satisfy SNR/AQTF assessor requirements.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPBDN4005 Review and report structural integrity of building designs

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Application

This unit of competency specifies the outcomes required to understand and apply principles of structural engineering to analyses of building designs for residential, commercial and industrial buildings as defined in the Building Code of Australia (BCA), including additions and renovations.

The unit supports the work of drafters who assist and work under the supervision and instruction of architects and building designers in preparing design drawings for client, planning and construction approval. The drafter is not responsible for the structural integrity of the building, but contributes to assessing building compliance with specific requirements relating to structural integrity, as specified in relevant codes and standards. The drafter requires the skills and knowledge to recognise and bring to the attention of the designer structural anomalies in the building design drawings.

Licensing, legislative, regulatory or certification requirements apply to building design drafting in some states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Drafting

## Unit Sector

Building design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |    |  |   |
|----|--|---|
| 1. | Review project documentation to identify structural systems. | 1.1. Site conditions and nature of proposed footings are identified from project documentation and noted in project file.   |
|    |  | 1.2. Nature and format of floor systems are identified from project documentation and noted.  |
|    |  | 1.3. Nature and format of walls and wall sheeting and cladding systems are identified from project documentation and noted.   |
|    |  | 1.4. Nature and format of roofs and roof cladding systems are identified from project documentation and noted.  |
| 2. | Evaluate effects of loads and forces.                        | 2.1. <b><i>Geophysical and climatic conditions</i></b> at different locations are researched.   |
|    |  | 2.2. <b><i>Types of loads</i></b> acting on project buildings are identified and noted.   |
|    |  | 2.3. <b><i>Stresses and strains</i></b> acting on project buildings are identified and noted.   |
|    |  | 2.4. Properties of project <b><i>structural building materials</i></b> and responses to loads and forces are researched and noted.  |
| 3. | Review structural integrity of building designs.             | 3.1. Structural integrity of proposed footings is reviewed, under supervision, for compliance with structural engineer's notes and relevant <b><i>codes and standards</i></b> .   |
|    |  | 3.2. Proposed floor system components are reviewed for structural integrity and compliance with structural engineer's notes and relevant codes and standards.                     |
|    |  | 3.3. Structural integrity of proposed walls and wall sheeting and cladding systems are reviewed for compliance with structural engineer's notes and relevant codes and standards. |
|    |  | 3.4. Structural integrity of proposed roofs and roof cladding system components are reviewed for compliance with structural engineer's notes and relevant codes and               |

- standards.
- 3.5. Anomalies in structural integrity and compliance are noted according to workplace procedures.
4. Report findings and amend drawings.
- 4.1. Review of structural integrity of project building is reported to, and discussed with, designer and consultant engineer according to workplace procedures, and information from discussion is noted.
- 4.2. Drawings are amended and notated according to instructions of designer as required.

## Foundation Skills

This section describes core skills that are essential to performance and not explicit in the performance criteria. Employment skills essential to performance are explicit in the performance criteria of this unit of competency.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• access a range of resources, information and support to assist in developing understanding of:               <ul style="list-style-type: none"> <li>• compliance requirements relating to structural integrity of buildings, including BCA requirements</li> <li>• structural systems, loads and forces</li> <li>• standards and conventions for different types of technical drawings</li> </ul> </li> <li>• draw on experience of drawing analysis and apply to new work.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret and apply ratios for loads and resistance from AS1684 Residential Timber Framed Construction</li> <li>• use mathematical language to discuss findings from analysis of plans and drawings with colleagues.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• participate in discussions in the workplace and with external specialists using specialised vocabulary relating to building designs.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• understand specialised technical vocabulary, abbreviations and acronyms specific to building design work</li> <li>• use different reading approaches to locate specific details in complex compliance documentation, including the BCA.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• make concise and accurate technical notes of findings and discussions with colleagues or external specialists</li> <li>• use specialised technical vocabulary, abbreviations and acronyms relating to building design projects in personal notes on review of</li> </ul>

structural integrity.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Geophysical and climatic conditions*** must include:

- bushfires
- earthquakes
- extreme temperatures
- flooding
- marine and industrial atmosphere
- noise
- snow
- steep land
- soil classification
- wind (cyclones).

***Types of loads*** must include:

- environmental loads, including wind events (cyclones)
- live, dead and combination loads
- moving loads, including volume of users
- permanent loads, including weight of building.

***Stresses and strains*** must include:

- bearing
- bending or deflection and long-term creep
- compression
- racking
- shearing
- tensile
- torsion
- yield.

***Structural building materials*** must include:

- concrete
- glass
- masonry
- metal
- plastics
- wood
- other materials in common use.

***Codes and standards*** must include:

- BCA and referenced Australian standards for structural provisions
- AS1684 Residential Timber Framed Construction.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for CPPBDN4005 Review and report structural integrity of building designs

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. They must also be able to provide evidence of the ability to review complete sets of drawings and then report on the structural integrity of the designs of the following four different types of building design projects, as defined by the Building Code of Australia (BCA). At least one of the building design projects must include a Class 10 component:

- one Class 1 building
- one Class 2 building
- two different buildings selected from Classes 3 to 9.

At least one of the above building projects must be two storeys and one building project must be three storeys or more.

Within the context described above, a person must provide evidence of:

- assessing the structural integrity of footings, floors, walls, wall sheeting and cladding systems, roofs and roof cladding systems covering:
  - identification of site conditions for projects
  - analysis of types of construction and materials used
  - evaluation of loads, forces, stresses and strains that could act on the buildings and effects on materials and construction methods used
  - compliance with relevant legislation, codes and standards
- sourcing and interpreting:
  - building material compliance certificates
  - structural data and reports
- reporting and discussing findings with designer and consultant engineer, according to workplace procedures
- amending drawings according to instructions of designer.

## Knowledge Evidence

A person demonstrating competency in this unit must be able to demonstrate the knowledge required to review and report on the structural integrity of building designs in relation to four different types of building design projects specified in the performance evidence, including:

- calculation methods for evaluating loads acting on buildings
- compliance requirements relating to the buildings' structural integrity
- construction methods used for the buildings specified in the performance evidence
- construction terminology required to discuss structural integrity of building designs with work colleagues, designer and consultant engineer
- drawing conventions, formats and standards
- drawing software functions
- loads and forces acting on buildings in different project locations, including nature of loads
- properties of structural building materials and responses to loads, stress and strain.

## Assessment Conditions

Assessment must be conducted in the workplace or a close simulation of the workplace.

Suitable assessment of performance requires:

- equipment:
  - computer with internet access and building information modelling (BIM)-capable building design software
- relationships with team members and supervisor:
  - tasks may be completed as an individual and as a team member, under the direction of an architect, building designer or other relevant person
- specifications:
  - BCA and Australian standards applicable to the four buildings specified in the performance evidence
  - building design plans and drawings for four buildings as specified in the performance evidence.

## Assessor requirements

As a minimum, assessors must satisfy SNR/AQTF assessor requirements.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPBDN4006 Import and transpose information from external sources into digital building design drawings

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Application

This unit of competency specifies the outcomes required to import drawing files and transpose information from drawings prepared by external surveyors, engineers and construction consultants into existing digital building design drawings for residential, commercial and industrial buildings as defined by the Building Code of Australia (BCA), using building information modelling (BIM)-capable building design software.

It also covers understanding and applying functions and options of drawing software for different methods of importing files and for managing elements in imported drawings.

The unit supports the work of drafters who assist and work under the supervision and instruction of architects and building designers and who check drawings and reports for accuracy and compliance with relevant legislation, regulations, codes and standards before importing or transposing into existing drawings; and who then check the integrity and accuracy of the completed drawings.

Licensing, legislative, regulatory or certification requirements apply to building design drafting in some states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Drafting

## Unit Sector

Building design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Confirm accuracy and compliance of externally-sourced drawings.
  - 1.1. Land survey *drawings* are checked for accuracy according to *workplace requirements*.
  - 1.2. Structural engineering drawings are checked for accuracy and *compliance* according to workplace requirements.
  - 1.3. Drawings and reports from *engineers* are checked for accuracy and compliance according to workplace requirements.
  - 1.4. Drawings, reports and drawing notations from *consultants* are checked for accuracy and compliance according to workplace requirements.
  - 1.5. Inaccuracies and non-compliance issues relating to drawings and drawing notations are reported to, and discussed with, architect or building designer.
  - 1.6. Architect's or building designer's observations on externally-sourced drawings are noted.
  - 1.7. Amended drawings are requested, noted details of amendments required are provided, and amended drawings are obtained from relevant engineers or consultants according to workplace requirements.
2. Import drawings from external sources into digital building design files.
  - 2.1. Compatibility of digital drawings from external sources for importing into digital building design files is determined and confirmed with architect or building designer.
  - 2.2. *Building design software* and work instructions relating to the importing of drawings from external sources are interpreted to determine *options to be applied* for different building design projects.
  - 2.3. Method for importing drawings is applied according to work instructions.
  - 2.4. Import options are applied to incoming files according to work instructions.

- 2.5. Files depicting materials and scenery are imported to enhance presentation and conceptual drawings, as required.
  - 2.6. Digital building design files are re-named and saved according to workplace requirements.
  - 2.7. Files are checked for integrity, submitted to architect or building designer for approval, and amendments made as directed.
3. Transpose information from externally-sourced drawings into digital building design files.
    - 3.1. Work instructions for transposing information from externally-sourced drawings into digital building design files are interpreted and confirmed with architect or building designer.
    - 3.2. Information is added to drawings according to work instructions and checked for accuracy and completeness of transposition according to workplace requirements.
    - 3.3. Details of externally-sourced documents are added to the list of supporting documents in the drawing set.
    - 3.4. Digital building design files are re-named and saved according to workplace requirements.
    - 3.5. Files are checked for integrity, submitted to architect or building designer for approval, and amendments made as directed.

## Foundation Skills

This section describes core skills that are essential to performance and not explicit in the performance criteria. Employment skills essential to performance are explicit in the performance criteria of this unit of competency.

### Skill

### Performance feature

- Learning skills to:
- access a range of resources, information and support to assist in developing understanding of:
    - building design software functions and options for importing digital drawing file
    - standards and conventions for different types of technical drawings
  - use hard copy and digital filing systems to collect, analyse, store, organise and facilitate ongoing access to information.

- Numeracy skills to:
- interpret and apply information from technical drawings and reports, including ratios, scales and scale conversions
  - use mathematical language to discuss information gathered from documentation with colleagues.
- Oral communication skills to:
- participate in discussions in the workplace and with external specialists using specialised vocabulary relating to building design projects.
- Reading skills to:
- understand specialised vocabulary, abbreviations and acronyms specific to building design work, including functions and operation of BIM-capable software
  - use different reading approaches to locate specific details in sometimes complex drawings and documentation.
- Writing skills to:
- prepare requests for amended drawings from external consultants, giving technical details of the changes or additions required using specialised vocabulary relating to building design projects.

## Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Drawings*** must include at least one from each of the following:

- consultant
- engineer
- land survey
- structural engineering.

***Workplace requirements*** must include:

- building design project procedures, including:
  - communication protocols for liaising with external consultants
  - file naming, storing and saving systems and procedures
  - quality requirements
  - work health and safety requirements

***Compliance*** must include:

- roles and responsibilities of building project team, including extent and limitations of drafter's role.
- current Australian standards applicable to the building design
- federal, state or territory, and local authority legislation and regulations applicable to the building design
- National Construction Code.

**Engineers** must include one or more of the following:

- electrical
- fire safety
- geotechnical
- hydraulic
- mechanical.

**Consultants** must include one or more of the following:

- access
- acoustic
- arborist
- bushfire
- energy efficiency
- flooding
- lighting
- traffic.

**Building design software** must include:

- BIM-capable current industry-standard software.

**Options to be applied** must include:

- colours
- external references
- layers
- positioning
- scale
- views.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPBDN4006 Import and transpose information from external sources into digital building design drawings

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also be able to provide evidence of the ability to import and transpose information from at least five different types of externally-sourced drawings into digital building design drawing files for the following three different types of building design projects, as defined by the Building Code of Australia (BCA). At least one of the building design projects must include a Class 10 component:

- one Class 1 building
- one Class 2 building
- one building selected from Classes 3 to 9.

At least one of the above building projects must be two storeys and one building project must be three storeys or more.

Within the context described above, a person must provide evidence of:

- identifying consultants' design discrepancies
- checking drawings and notations for accuracy and compliance before importing and transposing files
- consulting with architect or building designer to discuss inaccuracies or non-compliance and to obtain designer's observations
- requesting and obtaining amended drawings
- checking drawings for compatibility with design software
- applying building design software functions and options to import drawings into digital building design drawing files
- checking integrity of drawings once import is completed
- transposing information and notations from drawings into digital building design drawing files and confirming accuracy and completeness
- adding details of externally-sourced documents to supporting documentation list for the project
- applying naming conventions and version control protocols to renaming, storing and saving files according to workplace procedures.

## Knowledge Evidence

A person demonstrating competency in this unit must be able to demonstrate the knowledge required to import and transpose information from external sources into digital building design drawings for the three different types of building design projects specified in the performance evidence, including:

- compliance requirements relating to the three different types of building design projects
- construction terminology required to discuss content of externally-sourced drawings and reports with work colleagues, designers and external consultants
- functions and options of building design software relating to importing external digital drawings into project files
- protocols for communication and liaison with construction professionals who provide drawings and information for building designs
- roles and responsibilities of internal and external contributors to building design projects
- systems for naming, saving and storing digital files and ensuring version control
- types of drawings from external sources required for building designs, including the extent and level of detailed information required.

## Assessment Conditions

Assessment must be conducted in the workplace or a close simulation of the workplace.

Suitable assessment of performance requires:

- equipment:
  - computer with internet access, building information modelling (BIM)-capable building design software and storage capacity for a range of typical building design project information
  - electronic file storage devices
- materials:
  - electronic and hard copy project files for the three projects specified in the performance evidence
- relationships with team members and supervisor:
  - tasks may be completed as an individual and as a team member, under the direction of an architect, building designer or other relevant person
- specifications:
  - a range of project documentation, both hard copy and electronic, from construction professionals and consultants involved in the building design process for the three different building design projects specified in the performance evidence
  - National Construction Code and Australian standards relevant to building design projects.

## Assessor requirements

As a minimum, assessors must satisfy SNR/AQTF assessor requirements.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPBDN4007 Store and retrieve building design documentation

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Application

This unit of competency specifies the outcomes required to ensure documentation relating to building design projects is filed and stored safely and effectively. It addresses managing and archiving files for future retrieval and responding to requests for copies of documentation.

The unit supports drafters who assist and work under the supervision and instruction of an architect or building designer to produce and file a range of documentation as part of the building design and approval process.

Licensing, legislative, regulatory or certification requirements apply to building design drafting in some states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Drafting

## Unit Sector

Building design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |    |                                    |      |  |
|----|------------------------------------|------|--|
| 1. | Maintain filing system.            | 1.1. | Project file naming, storing, saving and version control systems are identified and followed when creating, amending and filing documents.   |
|    |                                    | 1.2. | Hard copy and digital files are reviewed to identify and remove duplicate, outdated and unnecessary documentation, and archived as required. |
| 2. | Manage file requests.              | 2.1. | Processes for actioning file requests are identified and followed.   |
|    |                                    | 2.2. | File requests are assessed and confirmed according to workplace procedures.  |
|    |                                    | 2.3. | Digital documents are made available to others with appropriate <i>file protections</i> in place according to workplace requirements.        |
|    |                                    | 2.4. | Hard copy documents are retrieved, logged as removed from file, and provided to others, photocopied or scanned as necessary.                 |
|    |                                    | 2.5. | Hard copy files are regularly monitored for missing documentation and logging systems are used to locate and replace documentation.          |
| 3. | Back up and archive project files. | 3.1. | Digital files are <i>backed up</i> periodically and stored in a safe and secure location for emergency access.                               |
|    |                                    | 3.2. | Hard copy files are collated, scanned where appropriate and saved to relevant electronic project files.                                      |
|    |                                    | 3.3. | Files relating to finalised projects are <i>archived</i> in a safe, secure and accessible manner.  |
|    |                                    | 3.4. | Processes allowing for access to archived project files are reviewed and implemented as required.  |

## Foundation Skills

This section describes core skills that are essential to performance and not explicit in the performance criteria. Employment skills essential to performance are explicit in the performance criteria of this unit of competency.

### Skill

### Performance feature

- Learning skills to:
- access a range of resources, information and support to develop own understanding of file management protocols and their application
  - use hard copy and digital filing systems to ensure the safe storage and retrieval of files.
- Numeracy skills to:
- use version control protocols when filing and storing documentation.
- Oral communication skills to:
- review, clarify and respond to requests for files
  - use appropriate file naming conventions when liaising with others in relation to current and archived digital and hard copy project files.
- Reading skills to:
- interpret and follow workplace file naming protocols and file management processes.
- Writing skills to:
- use appropriate vocabulary and terminology in relation to file naming and archiving.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- File protections*** must include:
- read only format
  - password-protected
  - portable document format (PDF).
- Back-up*** must include:
- computer hard drive
  - external storage devices, including:
    - portable and non-portable hard drives:
      - CD or DVD
      - USB devices
    - off-site location
    - remote, online and managed back-up services.
- Archived*** must include:
- online storage of electronic versions of documentation
  - physical offsite storage of hard copy project files.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPBDN4007 Store and retrieve building design documentation

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also be able to provide evidence of the ability to maintain current and accurate files of documents for the following three different types of building design projects, as defined by the Building Code of Australia (BCA). At least one of the building design projects must include a Class 10 component:

- one Class 1 building
- one Class 2 building
- one building selected from Classes 3 to 9.

Within the context described above, a person must provide evidence of:

- using file naming, storage, saving and version control systems when managing documentation
- forwarding digital and hard copy documents and files to relevant personnel as requested, in relevant formats and according to workplace procedures
- reviewing files for missing, duplicate and outdated information and following up or removing as required, according to workplace requirements
- backing up project files according to accepted workplace file management procedures
- archiving files for the three different projects, with one in hard copy, ensuring safety and security and future accessibility of documentation.

## Knowledge Evidence

A person demonstrating competency in this unit must be able to demonstrate knowledge of:

- building construction techniques and processes in order to recognise the relevance of documentation in the project files of those buildings specified in the performance evidence
- construction and technical terminology required to discuss appropriate file management processes applicable to the various documentation in files
- recognising plans from other disciplines, including land surveys, hydraulics and fire engineering, and determining appropriate file management processes for those plans
- workplace protocols addressing file naming, storing, back-up and retrieval.

## Assessment Conditions

Assessment must be conducted in the workplace or a close simulation of the workplace.

Suitable assessment of performance requires:

- equipment:
  - computer with:
    - internet access and building information modelling (BIM)-capable building design software and business software currently used in drafting, architectural and building design practice
    - storage capacity for a range of typical building design project information
  - electronic file saving devices
- materials – access to:
  - electronic and hard copy project files for a range of building projects
  - lockable filing cabinet
  - password-protected digital files
- relationships with team members and supervisor:
  - tasks may be completed as an individual and as a team member, under the direction of an architect, building designer or other relevant person
- specifications:
  - access to applicable codes and standards and local planning requirements
- timeframe:
  - completion of required tasks within timeframes specified by the workplace.

### Assessor requirements

As a minimum, assessors must satisfy SNR/AQTF assessor requirements.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPBDN4008 Produce digital building design concept drawings

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Application

This unit of competency specifies the outcomes required to produce building design drawings and documentation with appropriate scale and notations using current industry-standard software packages with building information modelling (BIM) capability.

The unit supports drafters who assist and work under the supervision and instruction of architects and building designers and produce design documentation for all types of residential, commercial and industrial buildings as defined in the Building Code of Australia (BCA), up to the stage of client approval of the design concept. It also covers ensuring that the drawings and documentation meet compliance requirements for the type of building and location and are formatted and notated to facilitate understanding by the client.

Licensing, legislative, regulatory or certification requirements apply to building design drafting in some states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Drafting

## Unit Sector

Building design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Produce building design sketches
  - 1.1. Client brief and designer's concept drawings and notes are reviewed and requirements confirmed.
  - 1.2. Existing site information and measured drawings are reviewed and information is applied to the production of sketches.
  - 1.3. **Compliance requirements** are confirmed and applied to the production of sketches.
  - 1.4. **Building design software** and project templates are used according to **workplace requirements** to produce and save sketches that illustrate designer's concept, with accurate proportions and within project timelines.
  - 1.5. Spatial and dimensional awareness is applied when producing sketches to allow ample space for movement of persons.
  - 1.6. **Rendering techniques** are applied to sketches as required by designer.
  - 1.7. Sketches are reviewed in consultation with designer to check that compliance requirements have been addressed, and adjustments are made and saved as required.
  - 1.8. Scaled renditions of design concept sketches are produced as required.
2. Review and apply designer's instructions in response to client feedback on building design concept sketches.
  - 2.1. Designer's instructions, notes and notations to drawings following client consultations are reviewed and client's required changes to sketches are confirmed.
  - 2.2. Sketches are adjusted and cross-checked to confirm that client requirements are incorporated.
  - 2.3. Impacts of changes on compliance requirements are identified and confirmed through consultation with relevant personnel and according to workplace requirements.
  - 2.4. Adjusted drawings and identified impacts on compliance requirements are reviewed with designer.
  - 2.5. Final adjustments to sketches are made according to instructions and following designer's final consultations

- with client and other relevant personnel.
- 2.6. Sketches are stored and saved according to workplace requirements.
3. Produce building design drawings.
- 3.1. Building design software and project templates are used to set up design drawings based on client-approved concept sketches.
- 3.2. Details of spatial, structural and technical elements of the building's design are confirmed with designer and incorporated into building design drawings.
- 3.3. Details of strategies to address work health and safety (WHS) issues in the building's design are confirmed with designer and incorporated into design drawings.
- 3.4. Details of sustainable building design for the project are confirmed with designer and incorporated into building design drawings.
- 3.5. Readability of drawings is *reviewed* and drawings are adjusted to ensure clarity of detail, consistency and ease of understanding by clients.
- 3.6. Design drawings are saved and stored according to workplace requirements.
- 3.7. Design drawings are reviewed in consultation with designers to ensure client and compliance requirements and anomalies are addressed, and drawings are adjusted as required.
- 3.8. Design drawings are rendered to watercolour wash or photo-realistic finish as required.
4. Review and apply client feedback to building design drawings.
- 4.1. Designer's instructions, notes and notations to drawings following client consultations are reviewed and client's required changes to design drawings are confirmed.
- 4.2. Design drawings are adjusted and cross-checked to confirm that client requirements are incorporated.
- 4.3. Impacts of changes on compliance of building are identified and confirmed according to workplace requirements.
- 4.4. Adjusted drawings and identified impacts on compliance requirements are reviewed in consultation with designer.

- 4.5. Final adjustments to drawings are made according to instructions and following designer's final consultations with client and other relevant personnel.

## Foundation Skills

This section describes core skills that are essential to performance and not explicit in the performance criteria. Employment skills essential to performance are explicit in the performance criteria of this unit of competency.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• develop an understanding of compliance requirements and the constraints they may place on client's requested changes to design concepts</li> <li>• seek advice and respond to feedback from designer.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret and convert ratios and scales on drawings</li> <li>• use and apply knowledge about space and shape to draw accurate two-dimensional and three-dimensional scale plans and drawings.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• consult with external professional personnel regarding interpretation of compliance requirements</li> <li>• discuss adjustments to drawings with designer using construction and design terminology.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret designer margin notes and simple diagrams to make connections between information and design requirements</li> <li>• interpret specialised vocabulary and acronyms used in compliance requirement documents, including the BCA.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• consider the audience for design drawings and represent technical information in notations using language suitable for clients with limited or no technical knowledge.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Compliance requirements*** must include:
- current Australian standards applicable to the building design
  - federal, state or territory, and local authority legislation and regulations applicable to the building design

- National Construction Code.
  - BIM-capable current industry-standard software.
- Building design software*** must include:
- Workplace requirements*** must include:
- application of drawing conventions according to:
    - AS1100.101 Technical drawing - General principles
    - AS1100.301 Technical drawing - Architectural drawing
  - building design project procedures relating to:
    - communication protocols for liaising with external consultants
    - file naming, storing and saving systems and procedures
    - quality requirements
    - WHS requirements
  - roles and responsibilities of building project team, including extent and limitations of drafter's role.
- Rendering techniques*** must ensure:
- depiction of light and shade
  - range of material finishes
  - readability.
- Review*** must include:
- labelling and notation of drawings
  - layout
  - scale
  - white space.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPBDN4008 Produce digital building design concept drawings

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also be able to provide evidence of the ability to produce digital building design sketches and concept drawings and documentation under the supervision and direction of an architect or building designer for the following three different types of building design projects, as defined by the Building Code of Australia (BCA). At least one of the building design projects must include a Class 10 component:

- one Class 1 building
- one Class 2 building
- one building selected from Classes 3 to 9.

At least one of the above building projects must be two storeys and one building project must be three storeys or more.

Each project must be in a different locality where local compliance requirements vary.

A person should provide evidence of:

- researching and applying compliance requirements relating to the nature and location of each building design project
- applying drawing conventions according to:
  - AS1100.101 Technical drawing - General principles
  - AS1100.301 Technical drawing - Architectural drawing
- applying dimensional awareness to designs to ensure ample space is allowed for movement of persons
- producing digital building design sketch drawings and documentation using building information modelling (BIM)-capable current industry-standard software, of the required quality standard and within project timelines, based on client specifications and designer's instructions
- incorporating client feedback into sketches and checking compliance of documentation
- consulting with designer on finalisation of sketches and discussing and implementing strategies to resolve compliance issues

- producing digital design drawings, documentation and building information models using BIM-capable current industry-standard software based on finalised sketches and according to designer instructions
- incorporating client feedback into design drawings, models and documentation and checking whether these meet compliance requirements
- consulting with designer on finalisation of design drawings, models and documentation and discussing and implementing strategies to resolve compliance issues.
- 

## Knowledge Evidence

A person demonstrating competency in this unit must be able to demonstrate the knowledge required to produce digital building design concept drawings and documentation for the three different types of building design projects specified in the performance evidence, including:

- compliance requirements relating to the three building design projects
- drawing conventions relevant to the sketch and design concept drawings
- construction and design terminology required to discuss aspects of digital design documentation with designer
- functions and options of BIM-capable building design software that enable the production of digital building design drawings for residential, commercial and industrial building design projects
- principles of BIM and its use by building and construction professions
- protocols for communication and liaison with construction professionals who provide information for building designs
- roles and responsibilities of internal and external contributors to building design projects
- systems for naming, saving and storing digital files and ensuring version control
- types of drawings, documentation and models required for client consultations regarding building design concepts.

## Assessment Conditions

Assessment must be conducted in the workplace or a close simulation of the workplace. Unit outputs must be completed to full industry and workplace standards and procedures.

Suitable assessment of performance requires:

- equipment:
  - computer with internet access and BIM-capable building design software
- materials:
  - project site information
  - reports from technical experts
- specifications – access to:
  - legislation, regulations, codes, standards and other relevant compliance documentation relating to each building design project
  - client's design brief

- designer's sketches and notes.

### **Assessor requirements**

As a minimum, assessors must satisfy SNR/AQTF assessor requirements.

# CPPBDN4009 Analyse building design drawings and review findings

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Application

This unit of competency specifies the outcomes required to analyse drawings relating to building designs for residential, commercial and industrial buildings, as defined by the Building Code of Australia (BCA).

It covers interpreting construction industry conventions for drawings, and analysing drawings for different projects to identify design and technical features. It also covers presenting findings and discussing these with the architect or building designer to inform the design process.

The unit supports the work of drafters who assist and work under the supervision and instruction of architects, building designers and other personnel, such as home sustainability assessors.

Licensing, legislative, regulatory or certification requirements apply to building design drafting in some states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Drafting

## Unit Sector

Building design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |  |   |
|--|---|
| 1. Interpret drawing conventions.                        | 1.1. <b><i>Industry standard formats and content for technical drawings</i></b> are interpreted.  |
|  | 1.2. <b><i>General technical drawing conventions</i></b> used in all types of construction drawings are interpreted.  |
|  | 1.3. <b><i>Architectural conventions</i></b> used in building design drawings are interpreted.  |
|  | 1.4. Notations used in general technical and architectural drawings are interpreted.  |
| 2. Analyse architectural drawings.                       | 2.1. <b><i>Key features of site plans</i></b> for different projects are identified in drawings and analysed.   |
|  | 2.2. <b><i>Key features of floor plans and sub-floor plans</i></b> are identified in drawings and analysed.   |
|  | 2.3. <b><i>Key features of elevations</i></b> of each aspect of building are identified in drawings and analysed.   |
|  | 2.4. Sections of buildings are analysed to determine construction methods and features of internal design and finishes.                                       |
|  | 2.5. Unknown elements of, or anomalies in, architectural drawings are noted for discussion with architect or building designer.                               |
| 3. Analyse drawings from other construction disciplines. | 3.1. Land survey drawings are analysed to identify topographical features of site for building design projects and requirements for cutting and filling.      |
|  | 3.2. Structural engineering drawings are analysed to determine construction methods and load considerations for building design project.                      |
|  | 3.3. Drawings and reports from electrical, hydraulic, fire and mechanical engineers are analysed to determine layout of services for building design project. |
|  | 3.4. Drawings and drawing notations from <b><i>consultants</i></b> are analysed to identify recommendations for building                                      |

- design project.
- 3.5. Unknown elements of, or anomalies in, drawings from other disciplines are noted for discussion with architect or building designer.
4. Present and discuss findings.
- 4.1. Advice is sought where required from architect or building designer to assist in identifying and analysing unknown elements of drawings.
- 4.2. Findings from analysis of architectural drawings are presented to, and discussed with, architect or building designer to inform building design process.
- 4.3. Findings from analysis of drawings from other construction disciplines are presented to, and discussed with, architect or building designer to inform building design process.
- 4.4. Strategies for producing corrections to drawings are developed in consultation with architect or building designer and followed up as required.

## Foundation Skills

This section describes core skills that are essential to performance and not explicit in the performance criteria. Employment skills essential to performance are explicit in the performance criteria of this unit of competency.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• access Australian standards to assist in developing understanding of different types of drawings and drawing standards and conventions</li> <li>• draw on experience in drawing analysis and apply to new work.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret and check the accuracy of numerical information in technical drawings and reports, including dimensions, ratios, scales and scale conversions</li> <li>• use mathematical language to discuss with colleagues findings from analysis of drawings, such as anomalies in dimensions or inaccuracies in scale conversions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• participate in discussions in the workplace and with external specialists using specialised vocabulary relating to building designs, including the names used for different types of drawings and the names for different building elements and fixtures.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• understand specialised vocabulary, abbreviations and acronyms specific to building design work, including terms used by external</li> </ul>

- consultants
  - use different reading strategies to locate specific and sometimes complex details in drawings and reports.
- Writing skills to:
- make concise and technically accurate personal notes on findings from analysis of drawings and reports and discussions with designer.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Industry standard formats and content for technical drawings*** must include:
- drawing types
  - project identification
  - version control.
- General technical drawing conventions*** must include:
- those specified in:
    - AS1100.101 Technical drawing - General principles
    - AS1100.301 Technical drawing - Architectural drawing
    - AS1101.1 Graphic symbols for general engineering - Hydraulic and pneumatic systems
  - abbreviations
  - components
  - dimensioning lines
  - gradients
  - layout
  - levels
  - scales
  - spaces
  - symbols.
- Architectural conventions*** must include:
- dimensioning
  - orientation
  - representations of:
    - doors
    - fittings
    - fixtures
    - materials
    - natural light
    - shadow

- windows.
- Key features of site plans** must include:
- site boundaries and dimensions
  - locations and orientations of buildings
  - locations of:
    - utility services
    - retaining walls
    - fences
    - driveways
    - walkways
  - setback requirements
  - easements
  - topographical data.
- Key features of floor and sub-floor plans** must include:
- access
  - construction methods
  - dimensions
  - locations of services
  - plan-level fittings, fixtures and features, including representations of overhead features
  - room and wall layouts.
- Key features of elevations** must include:
- dimensions of buildings
  - exterior finishes
  - fence locations
  - features of exterior design.
- Consultants** must include one or more of those contributing to the design drawings:
- land surveyors
  - structural, electrical, hydraulic, fire and mechanical engineers
  - access, acoustic, arborist, energy efficiency, lighting, traffic and other relevant consultants required to contribute to building design projects.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPBDN4009 Analyse building design drawings and review findings

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence of the ability to analyse complete sets of drawings for the following three different types of building design projects, as defined by the Building Code of Australia (BCA). At least one of the building design projects must include a Class 10 component:

- one Class 1 building
- one Class 2 building
- one building selected from Classes 3 to 9.

At least one of the above building projects must be two storeys and one building project must be three storeys or more.

The person must present and discuss with the project architect or building designer:

- an analysis of relevant information, features and details included on architectural drawings, including:
  - details
  - elevations
  - plans:
    - footings and slab setout
    - roof framing layout
    - wall framing layout
  - sections
  - site plans
  - sub-floor and floor plans
- analysis of information, features and details included on drawings specifically required for the project from consultants as listed in the range of conditions
- clarification of unknown elements of drawings through consultation, as required
- anomalies in drawings, including strategies for producing corrections to drawings
- strategies for correcting drawings, as required.

## Knowledge Evidence

A person demonstrating competency in this unit must be able to demonstrate the knowledge required to analyse building design drawings for the building projects specified in the performance evidence, including:

- principles of structural engineering sufficient to recognise structural anomalies in building design drawings for the building projects and report them to the designer
- basic principles of the work of those construction professionals who are required to contribute to the building designs of the projects, including:
  - consultants
  - engineers
  - surveyors
- building construction techniques and processes applied to the construction of the buildings
- building materials used in the construction of the buildings, and their application
- building designers' duty of care to ensure quality and safety of designs
- construction terminology required to discuss content of internally and externally sourced drawings with work colleagues and designer
- conventions and formats used for:
  - architectural drawings
  - general technical drawings
- drawing standards:
  - AS1100.101 Technical drawing - General principles
  - AS1100.301 Technical drawing - Architectural drawing
  - AS1101.1 Graphic symbols for general engineering - Hydraulic and pneumatic systems
- types of drawings relevant to building design projects.

## Assessment Conditions

Assessment must be conducted in the workplace or a close simulation of the workplace.

Suitable assessment of performance requires:

- equipment:
  - computer with internet access and building information modelling (BIM)-capable building design software materials
- relationships with team members and supervisor:
  - tasks may be completed as an individual and as a team member, under the direction of an architect, building designer or other relevant person
- specifications:
  - Australian standards for drawing
  - design drawings for building projects specified in the performance evidence.

## Assessor requirements

As a minimum, assessors must satisfy SNR/AQTF assessor requirements.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPBDN4010 Prepare documentation for planning approval

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Application

This unit of competency specifies the outcomes required to prepare documentation that complies with planning approval requirements for residential, commercial and industrial buildings as defined by the Building Code of Australia (BCA). The documentation is required as part of the process for preparing a planning application, which if successful will result in the issuing of a planning permit.

The unit supports drafters who assist and work under the supervision and instruction of architects and building designers to prepare a range of documentation as part of the planning approval process.

Licensing, legislative, regulatory or certification requirements apply to building design drafting in some states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Drafting

## Unit Sector

Building design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Plan and produce planning approval support documentation.
  - 1.1. Documentation requirements for planning approval applications are confirmed with relevant authorities.
  - 1.2. **Design drawings** required in applications for planning approval are confirmed with architect, building designer or relevant authorities.
  - 1.3. **Compliance requirements** for design drawings are confirmed with architect, building designer and relevant authorities.
  - 1.4. Timelines and methodologies for producing final design drawings are confirmed with architect or building designer.
  - 1.5. Drawings and documentation required from electrical, hydraulic, geotechnical, fire and mechanical engineers are specified and requested in consultation with architect or building designer.
  - 1.6. Drawings and documentation required from access, traffic, lighting, arborist, acoustic, energy efficiency and other relevant consultants are specified and requested in consultation with architect or building designer.
2. Prepare and submit planning approval application.
  - 2.1. Design drawings are checked for planning approval compliance and required additions or changes are made.
  - 2.2. Drawings and documentation required from technical experts are obtained within required timeframes and checked for completeness and compliance.
  - 2.3. Documentation for planning approval application is prepared, checked for compliance with requirements, and confirmed with client.
  - 2.4. Completeness of planning approval application is confirmed in consultation with architect or building designer and submitted to relevant authority according to workplace procedures.
  - 2.5. Notifications and advertisements are arranged as required.
3. Obtain feedback and amend documentation as
  - 3.1. Local authority, client and stakeholder feedback to planning application design drawings and documentation is obtained and discussed with architect or building

- required.
- designer to identify required amendments.
- 3.2. Design drawings and documentation are amended as required, and client approval is obtained, documented and processed according to workplace procedures.
4. Support and finalise the application through approval process.
- 4.1. Progress of application through planning approval processes is monitored and requests for information are responded to according to workplace procedures.
- 4.2. Requirements for changes to planning approval drawings and documentation are completed on time and in consultation with architect or building designer as requested.
- 4.3. Planning approval is obtained and filed with final design project documentation according to workplace procedures.
- 4.4. Client is notified of planning approval and any conditions, and copies of relevant documentation are provided according to workplace procedures.

## Foundation Skills

This section describes core skills that are essential to performance and not explicit in the performance criteria. Employment skills essential to performance are explicit in the performance criteria of this unit of competency.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• develop a sequenced plan for tasks required in the planning approval process</li> <li>• draw on experience in preparing planning documentation to ensure that processes and requirements meet the requirements of authorities within required timeframes.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• apply measurements prescribed in compliance requirements to sketches and drawings</li> <li>• apply scale accurately to working drawings</li> <li>• calculate and confirm measurements in drawings.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• consult with client and a range of external stakeholders regarding compliance requirements</li> <li>• discuss required changes to planning documentation as required.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret and adhere to documentation compliance requirements of the BCA and relevant authorities</li> </ul>

- Writing skills to:
- interpret specialised vocabulary and acronyms used in planning documentation.
  - prepare forms and other documentation required for planning approval
  - use appropriate vocabulary and technical terminology when compiling planning documentation and liaising with clients.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Design drawings*** must include:
- drawings produced by building designers or technical experts
  - elevations:
    - contour
    - demolition
    - floor
    - framing
    - roof
  - sections
  - shadow drawings
  - site analyses
  - landscape designs
  - services layout.
- Compliance requirements*** must include:
- current Australian standards applicable to the building design
  - federal, state or territory and local authority legislation and regulations applicable to the building design
  - National Construction Code.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPBDN4010 Prepare documentation for planning approval

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also be able to provide evidence of the ability to prepare documentation to meet planning approval requirements for the following three different building projects, as defined in the Building Code of Australia (BCA). At least one of the building design projects must include a Class 10 component:

- one Class 1 building
- one Class 2 building
- one building selected from Classes 3 to 9.

At least one of the above building projects must be two storeys and one building project must be three storeys or more.

For each of the three projects, the person must provide evidence of:

- confirming documentation and compliance requirements with the relevant authority for each of the building projects specified
- identifying and collecting relevant documentation and drawings from technical experts for each of the building projects specified and confirming that documents received are accurate and compliant
- preparing and finalising relevant planning approval documentation specified by the approving authority for each of the building projects
- amending relevant documentation to incorporate feedback from client and relevant approval authorities while ensuring compliance with relevant codes and standards
- submitting final, complete and accurate planning documentation to the relevant authority within specified timeframes and monitoring its progress, responding to feedback or questions as instructed by the architect or building designer
- processing planning approval and notifying client of the outcome.

## Knowledge Evidence

A person demonstrating competency in this unit must be able to demonstrate documentation required for planning approval relevant to the three classes and types of building projects specified in the performance evidence, including knowledge of :

- architectural styles and building construction terminology relevant to working with building plans specified in the planning approval process
- principles of energy efficiency and sustainable design sufficient to be able to communicate with others in relation to the designs and planning approval applications
- design drawings gathered and used in the planning approval process for each of the specified building projects
- duty of care required to ensure quality and safety of designs
- implications of changes to design throughout the planning approval process
- legislation, codes and standards relevant to sustainable design requirements required to ensure compliance with planning approval requirements
- processes that must be confirmed and satisfied for each of the building projects, including:
  - documentation requirements for planning approval applications
  - types of drawings required for planning approval applications.

## Assessment Conditions

Assessment must be conducted in the workplace or a close simulation of the workplace. Unit outputs must be completed to full industry and workplace standards and procedures.

Suitable assessment of performance requires:

- equipment:
  - computer with internet access and building information modelling (BIM)-capable building design software and business software currently used in drafting, architectural and building design practice
- materials:
  - planning application forms and documentation
  - technical reports prepared by external consultants and relevant to the planning approval process for each of the building projects specified in the performance evidence
  - working drawings and plans relevant to the planning approval process for each of the building projects specified in the performance evidence
- contingencies:
  - impact of variations to plans as directed by client or other stakeholders
  - implications of submitting non-compliant documentation to relevant authorities
  - types of documentation supplied by technical experts and their purpose in overall submission for planning approval
- relationships with team members and supervisor:
  - tasks must be completed individually but may rely on information sourced from team members and supervisor as relevant to the task
- relationship with client:
  - liaison with the client as directed by architect or building designer
- specifications – access to:
  - BCA

- client briefs
- state and local council planning regulations
- National Construction Code (NCC).

### **Assessor requirements**

As a minimum, assessors must satisfy SNR/AQTF assessor requirements.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPBDN4011 Prepare documentation for building approval

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Application

This unit of competency specifies the outcomes required to gather and prepare documentation that complies with building approval requirements, including detailed working drawings of designs for all types of residential, commercial and industrial buildings as defined by the Building Code of Australia (BCA). The documentation is required as part of the building approval process which, if successful, results in the issuing of a building permit.

The unit supports drafters who assist and work under the supervision and instruction of an architect or building designer to gather and produce a range of documentation as part of the building approval process.

Licensing, legislative, regulatory or certification requirements apply to building design drafting in some states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Drafting

## Unit Sector

Building design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Plan documentation production.
  - 1.1. **Documentation** required for building approval applications for building design projects is confirmed with design project manager and other relevant personnel.
  - 1.2. **Compliance requirements** to be addressed in **working drawings** are confirmed with relevant personnel.
  - 1.3. Timelines and methodologies for producing working drawings are confirmed and followed.
  - 1.4. Drawings and documentation required from construction contractors, engineers and consultants, are confirmed and obtained.
2. Prepare and gather documentation.
  - 2.1. Project design drawings and documentation are reviewed in consultation with design project manager and information relevant to different types of working drawings is identified.
  - 2.2. Construction details requiring clarification are resolved through research and consultation.
  - 2.3. Draft working drawings are prepared and notations added according to project and workplace requirements.
  - 2.4. **Working drawings are checked** and finalised, in consultation with design project manager.
  - 2.5. Required documentation is completed or obtained, and checked and confirmed as correct or referred for amendment in consultation with design project manager.
3. Submit and support building approval application.
  - 3.1. Documentation for building approval application is prepared, checked for compliance with requirements, and submitted to design project manager.
  - 3.2. Progress of application through building approval process is monitored and requests for clarification or changes are addressed in consultation with design project manager.
  - 3.3. Building approval is obtained and filed with final design project documentation according to workplace procedures.
  - 3.4. Client is notified of building approval and copies of relevant documentation are provided in consultation with design project manager, as required.

## Foundation Skills

This section describes core skills that are essential to performance and not explicit in the performance criteria. Employment skills essential to performance are explicit in the performance criteria of this unit of competency.

Skill	Performance feature
Learning skills to:	<ul style="list-style-type: none"><li>• develop a sequenced plan for tasks required in the building approval process</li><li>• draw on experience in preparing building documentation to ensure that documentation prepared and submitted meets the requirements of authorities within required timeframes.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• apply measurements prescribed in compliance requirements to sketches and drawings, for example distance of building from boundary</li><li>• apply scale accurately to working drawings</li><li>• calculate and confirm measurements in drawings.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions relating to design drawings and compliance requirements</li><li>• consult with external professional personnel regarding compliance requirements.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret and adhere to documentation compliance requirements of relevant authorities</li><li>• interpret specialised vocabulary and acronyms used in building documentation.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• prepare forms and other documentation required for building approval</li><li>• communicate with clients and prepare building documentation using appropriate vocabulary and technical terminology.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Documentation*** must include:

- contract administration documentation
- items specified in relevant authorities' requirements for building approval, including:

- localised pest management details
- relevant authority forms
- requests for exemptions
- risk assessments
- specifications for materials, fixtures and fittings
- technical reports, such as:
  - access
  - conservation
  - energy rating
  - fire safety
  - soil analysis
- two- and three-dimensional working drawings
- sub-floor ventilation details
- waterproofing details.

***Compliance requirements*** must include:

- current Australian standards applicable to the building design
- federal, state or territory, and local authority legislation and regulations applicable to the building design
- National Construction Code.

***Working drawings*** must include:

- detail drawings
- elevations
- location of neighbouring buildings
- plans
- sections
- site plans.

***Checking of working drawings*** must include:

- accuracy
- completeness
- compliance with relevant requirements, including building approval requirements
- consistency of presentation
- cross-referencing
- titles and reference numbers
- version control.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPBDN4011 Prepare documentation for building approval

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence of the ability to prepare drawings and documentation for the following three different building projects, as defined in the Building Code of Australia (BCA). At least one of the building design projects must include a Class 10 component:

- one Class 1 building
- one Class 2 building
- one building selected from Classes 3 to 9.

At least one of the above building projects must be two storeys and one building project must be three storeys or more.

For each of the building projects, the person must provide evidence of:

- confirming documentation and compliance requirements with the relevant authority, for each of the building projects specified
- preparing complete sets of compliant working drawings and documentation as required for the submission of the building application for each of the building projects specified in the performance evidence
- identifying and collecting supporting documentation from other construction professionals for each of the building projects specified in the performance evidence, and confirming that documents received are accurate and compliant
- submitting final, complete and accurate building approval application to the relevant authority within specified timeframe and monitoring its progress, responding to feedback or questions as instructed by the architect or building designer
- processing building approval permit and notifying the client.

## Knowledge Evidence

A person demonstrating competency in this unit must be able to demonstrate knowledge of documentation required for building approval relevant to the three classes and types of building projects specified in the performance evidence, including knowledge of:

- processes of the relevant approving authority that must be confirmed and satisfied for each of the building projects specified in the performance evidence, including:

- range of documentation and types of drawings required for building approval applications relating to specified types of building design projects in specified locations
- technical knowledge of plans required for building approval, including knowledge of:
  - bracing
  - ceilings
  - concrete slabs
  - floor finishes
  - floor footings
  - lighting
  - timber framing
  - services
  - sites
  - sustainability requirements
  - ventilation
- sections of the BCA relevant to the classes and types of buildings specified in the performance evidence, including:
  - architectural styles and building construction terminology relevant to working with building plans specified in the building approval process
  - principles of energy efficiency and sustainable design sufficient to be able to communicate with others in relation to the designs and approval applications
- duty of care required to ensure quality and safety of designs submitted for building approval
- potential cost implications of changes to design at each stage of the building approval process
- legislation, codes and standards relevant to sustainable building design required to ensure compliance with building approval requirements.

## Assessment Conditions

Assessment must be conducted in the workplace or a close simulation of the workplace.

Suitable assessment of performance requires:

- equipment:
  - computer with internet access and building information modelling (BIM)-capable building design software and business software currently used in drafting, architectural and building design practices
- materials:
  - building application forms and related documentation
  - reports from technical experts and external consultants, relevant to the building approval process for each of the building projects specified in the performance evidence

- working drawings relevant to the building approval process for each of the building projects specified in the performance evidence
- contingencies:
  - impact of variations to plans as directed by client or other stakeholders
  - implications of preparing and submitting to relevant authority insufficient or non-compliant documentation
- specifications – access to:
  - current Australian standards applicable to the building design and as required in the building approval process
  - local council planning regulations
  - National Construction Code
  - state codes and planning policies
- relationships with team members and supervisor:
  - tasks may be completed individually but may rely on information sourced from team members and supervisor as relevant to the task
- relationship with client:
  - liaison with the client is limited and only as directed by the architect or building designer
- timeframe:
  - according to the requirements for preparing and lodging documentation for building approval processes.

### **Assessor requirements**

As a minimum, assessors must satisfy SNR/AQTF assessor requirements.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPBDN4012 Provide support to project building designers

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Application

This unit of competency specifies the outcomes required to provide a range of support to project building designers.

It covers attending and supporting client and stakeholder meetings, undertaking site visits, using industry-approved software, and liaising with relevant authorities on behalf of the architect or building designer responsible for the overall project design.

The unit supports drafters who assist and work under the supervision and instruction of architects or building designers and engage in a range of consultation processes as part of the building design process.

Licensing, legislative, regulatory or certification requirements apply to building design drafting in some states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Drafting

## Unit Sector

Building design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Participate in client communications.
  - 1.1. Client consultations are attended and detailed *notes* are taken to support the role of the designer or architect according to workplace requirements.
  - 1.2. Client preferences and proposed building outcomes are represented in line with designer's instructions using *building design software*.
  - 1.3. Clients are consulted independently according to designer's instructions, as required.
  - 1.4. Records of written and verbal correspondence with clients are checked for accuracy, kept up-to-date, filed and stored for access by designer or architect in compliance with relevant legislation and standards.
2. Assist designer with project tasks.
  - 2.1. Concept plans are drafted under the supervision and instruction of the designer and according to client brief.
  - 2.2. Research into materials, mechanical systems and construction methods is conducted and documented as required, to assist in developing appropriate and compliant building design solutions.
  - 2.3. Accurate drawings are completed in line with *compliance requirements* to reflect client specifications and any requested variations.
  - 2.4. Project cost estimates and material quantities are identified and calculated with reference to plans and drawings as required.
3. Liaise with others to support the project.
  - 3.1. Consultation meetings with building design project contractors are attended and detailed notes are taken to support the designer.
  - 3.2. Relevant authorities are consulted and information is obtained to support the timely completion and compliance of the project.
  - 3.3. Technical experts are consulted for specialist advice, and information is noted and provided to the designer to assist in design development.
  - 3.4. Sales representatives and manufacturers are consulted regarding products, specifications and costings, and information is collated and filed according to workplace

procedures.

## Foundation Skills

This section describes core skills that are essential to performance and not explicit in the performance criteria. Employment skills essential to performance are explicit in the performance criteria of this unit of competency.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• independently access a range of information sources to assist in providing accurate and relevant support to the building designer</li> <li>• interpret research information relating to materials and products.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret and apply numerical information from technical documentation</li> <li>• estimate project costs and material quantities.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask technical questions concerning materials, systems and construction methods</li> <li>• consult with manufacturers and make enquiries that assist with providing support to the building designer.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• use different reading strategies to identify relevant information located through research into materials and systems.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• make legible notes of discussions with colleagues and external specialists in a range of agreed formats</li> <li>• use specialised vocabulary relating to building design projects.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b>Notes</b> must cover:	<ul style="list-style-type: none"> <li>• agreed actions</li> <li>• variations to drawings.</li> </ul>
<b>Building design software</b> must include:	<ul style="list-style-type: none"> <li>• current industry-standard building information modelling (BIM)-capable software.</li> </ul>
<b>Compliance requirements</b> must include:	<ul style="list-style-type: none"> <li>• current Australian standards applicable to the building design</li> <li>• federal, state or territory, and local authority legislation and</li> </ul>

- regulations applicable to the building design
- National Construction Code.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPBDN4012 Provide support to project building designers

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence of the ability to provide support to the architect or building designer for the following three different building projects, as defined in the Building Code of Australia (BCA). At least one of the building design projects must include a Class 10 component:

- one Class 1 building
- one Class 2 building
- one building selected from Classes 3 to 9.

At least one of the above building projects must be two storeys and one building project must be three storeys or more.

For each of the building projects, the person must provide evidence of:

- using industry-approved software to vary drawings and specifications during client consultations as support to the designer
- maintaining accurate and up-to-date client communications in an agreed format
- consulting with a range of technical experts to gather data and reports for the designer to assist in building design decisions
- liaising with sales representatives and manufacturers to gather relevant product information and costings
- documenting and storing accurate notes from meetings between the architect or building designer, clients, construction contractors and other relevant personnel.

## Knowledge Evidence

A person demonstrating competency in this unit must be able to demonstrate knowledge of the following, as they relate to the three classes and types of building projects specified in the performance evidence:

- building construction techniques and processes
- building materials and their application in the different building projects specified in the performance evidence

- compliance requirements and regulatory limitations relating to building design projects, including:
  - Australian standards
  - National Construction Code
  - state building codes
- design terminology used by architects and building designers when liaising with clients and other personnel
- environmental and sustainability requirements, including:
  - energy efficiency
  - fire resistance, including resistance to bushfire attack
- structural principles relevant to the construction of buildings specified in the performance evidence
- techniques for reading plans and drawings including those from other disciplines, such as land surveys, hydraulics and fire engineering.

## Assessment Conditions

Assessment must be conducted in the workplace or a close simulation of the workplace.

Suitable assessment of performance requires:

- equipment:
  - computer with internet access and building information modelling (BIM)-capable building design software and business software currently used in drafting, architectural and building design practice
- relationships with team members and supervisor:
  - tasks may be completed as an individual and as a team member, under the direction of an architect, building designer or other relevant person
- relationship with client:
  - liaison with the client is limited and only as directed by the architect or building designer
- specifications – access to:
  - applicable codes and standards
  - design drawings and specifications.

## Assessor requirements

As a minimum, assessors must satisfy SNR/AQTF assessor requirements.

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPBDN4013 Produce construction detail drawings

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Application

This unit of competency specifies the outcomes required to produce construction detail drawings and specifications for all types of residential, commercial and industrial buildings as defined by the Building Code of Australia (BCA). Construction detail drawings will provide construction contractors with information required to select, cost and apply construction materials and methods according to the client's design brief and relevant development approvals.

It also covers the production of drawings where variations are required during the construction process.

The unit supports drafters who assist and work under the instruction and supervision of an architect or building designer to produce drawings relied upon throughout the various construction phases of a building development.

Licensing, legislative, regulatory or certification requirements apply to building design drafting in some states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Drafting

## Unit Sector

Building design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Gather and interpret project information.
  - 1.1. Current ***documentation*** and project information are reviewed to identify components of drawings requiring construction detail and scope of detail drawings required.
  - 1.2. Approved changes in building design requirements that have occurred since approval to build was received are identified and their impact on existing documentation is confirmed with architect or building designer.
  - 1.3. Client specifications for materials, systems and fixtures are determined and clarified throughout the detail drawing process.
  - 1.4. Research into relevant materials, systems and fixtures is undertaken and noted for application to construction detail drawings.
2. Prepare for production of construction detail drawings.
  - 2.1. Digital files are set up and prepared according to workplace procedures.
  - 2.2. Amendments to original working drawings are made where required, to reflect agreed changes to the building project.
  - 2.3. Design methodology for areas and ***elements of the building*** to be drawn in detail are confirmed in consultation with architect or building designer.
  - 2.4. Specific requirements for construction detail drawings are confirmed based on marked-up drawings received from architect or building designer.
3. Create initial construction views and details.
  - 3.1. Existing library of objects is reviewed and relevant objects are imported and manipulated where appropriate for the production of construction detail drawings.
  - 3.2. Views of building elements are created according to requirements for the production of construction detail drawings.
  - 3.3. Callouts are used or created as necessary to show required detail in plans.

- |    |                                       |  |
|----|---------------------------------------|--|
|    | 3.4.                                  | Initial detail construction drawings and specifications are produced and submitted to the architect or building designer for feedback.   |
| 4. | Modify and update detail drawings.    | <p>4.1. Modifications to construction detail drawings are undertaken in response to architect or building designer feedback and instructions.</p> <p>4.2. Final construction detail drawings are provided to client and construction practitioners as directed and in an approved format.</p> <p>4.3. Approved variations to drawings received during construction are actioned and revised drawings are submitted to architect or building designer for sign-off.</p>   |
| 5. | Finalise construction detail drawing. | <p>5.1. Design personnel are consulted to ensure iterations of the construction detail drawings adhere to project design brief.</p> <p>5.2. Builder and other construction personnel are consulted where necessary to confirm construction methodologies and to inform finalisation of construction detail drawings.</p> <p>5.3. External consultant's documentation and expertise are sought as directed to ensure accuracy of drawings.</p> <p>5.4. Relevant approval authorities are consulted as required to undertake final cross-checking and confirmation of approval conditions and to resolve unforeseen conflicts.</p> |

## Foundation Skills

This section describes core skills that are essential to performance and not explicit in the performance criteria. Employment skills essential to performance are explicit in the performance criteria of this unit of competency.

### Skill

### Performance feature

- Learning skills to:
- assess nature and scope of construction detail drawings required across a range of different building types
  - independently access a range of information and resources to support the production of construction detail drawings required.

- Numeracy skills to:
- interpret and convert ratios and scales on drawings
  - use and apply knowledge about space and shape when drawing accurate two-dimensional (2-D) and three-dimensional (3-D) scale plans and construction detail drawings.
- Oral communication skills to:
- liaise with external consultants regarding interpretation of specialist documentation and plans
  - discuss required modifications to drawings with architect or building designer using construction and design terminology.
- Reading skills to:
- interpret margin notes on plans, drawings and simple diagrams.
- Writing skills to:
- represent technical information in notations using language suitable for clients with no technical knowledge.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Documentation** must include:
- building plans and permits, including:
    - approval conditions
    - comments and notations on drawings
    - services related approvals
  - 2-D and 3-D digital design drawings and models.
- Elements of the building*** must include one or more of:
- architraves
  - balustrades
  - box gutters
  - ceiling finishes
  - connections between floor and wall and wall and ceiling
  - doors, including trims
  - flashings
  - kitchen or bathroom interior, including wall finishes, fixtures, fittings
  - parapets
  - roof details, including fascias
  - skirting boards
  - stair construction details
  - timber reveals
  - vermin proofing

- wall design
- windows, including trims and rebates.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPBDN4013 Produce construction detail drawings

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence of the ability to produce construction detail drawings under the supervision and instruction of an architect or building designer for the following three building design projects, as defined in the Building Code of Australia (BCA). At least one of the building design projects must include a Class 10 component:

- one Class 1 building
- one Class 2 building
- one building selected from Classes 3 to 9.

At least one of the above building projects must be two storeys and one must be three storeys or more.

For each of the building design projects, the person must provide evidence of:

- producing three construction detail drawings in 1:20 or 1:10 scale for elements of the building required by the building design project as listed in the range of conditions
- applying drawing conventions according to:
  - AS1100.101 Technical drawing - General principles
  - AS1100.301 Technical drawing - Architectural drawing
  - current industry best practice
- making at least one modification to the construction detail drawings in response to feedback received from client, architect or building designer or other relevant specialist consultant.

## Knowledge Evidence

A person demonstrating competency in this unit must be able to demonstrate knowledge of the following, as they relate to the three classes and types of building projects specified in the performance evidence:

- construction terminology required to discuss construction detail drawings with colleagues, architect or building designer and specialist external consultants

- current industry drawing standards and conventions appropriate to the production of construction detail drawings, including:
  - appropriate use of dimensions, scale, layout, white space and notations on drawings to ensure ease of interpretation by client and others
  - current Australian standards relating to drawings
  - functions of building information modelling (BIM)-capable building design software used for producing construction detail drawings
  - line styles and conventions used in technical and detail drawings for construction purposes
  - principles of architectural conventions used in detail drawings
  - types of drawings, documentation and models required for client consultations regarding construction detail drawings
- methods of construction, including the sequencing of construction work and potential challenges experienced onsite during construction
- principles and qualities of construction materials used in the range of building classes and types.

## Assessment Conditions

Assessment must be conducted in the workplace or a close simulation of the workplace.

Suitable assessment of performance requires:

- equipment:
  - computer with internet access, BIM-capable building design software and business software currently used in drafting, architectural and building design practices
  - telephone
- materials – access to:
  - building design plans and drawings for building design plans and drawings for building projects specified in the performance evidence
  - legislation, regulations, codes, standards and other relevant compliance documentation relating to each building design project specified in the performance evidence
  - reports from technical experts
  - working drawings and plans
- specifications – access to:
  - technical drawings and plans
  - client design brief
- relationships with team members and supervisor:
  - tasks may be completed individually but may rely on information sourced from team members and supervisor as relevant to the task.

## Assessor requirements

As a minimum, assessors must satisfy SNR/AQTF assessor requirements.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPBDN5007A Inspect and analyse sites and produce measured drawings for small-scale building design projects

## Modification History

New unit

## Unit Descriptor

This unit of competency specifies the outcomes required to inspect sites for commercial, industrial and residential building design projects covered by the Building Code of Australia (BCA), except construction Type A buildings. Site inspections are conducted to determine contours and measurements; existing conditions, structures, features and services; and neighbourhood characteristics.

The unit also covers analysing sites; determining orientation and layout of building, access and egress points, and existing utilities and services infrastructure; and producing measured drawings.

## Application of the Unit

This unit of competency supports building designers who gather and correlate field data from small-scale building design project sites and produce accurate measured drawings.

## Licensing/Regulatory Information

Work in this area must be completed according to relevant legislative, industry and organisational requirements, including occupational health and safety (OHS) policies and procedures.

Different states and territories may have regulatory mechanisms that apply to this unit. Users are advised to check for regulatory limitations.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

- |   |  |     |  |
|---|--|-----|--|
| 1 | Inspect sites for small-scale building design projects | 1.1 | Site inspection tasks for <i>small-scale building design projects</i> are planned with reference to relevant <i>site information</i> and <i>workplace procedures</i> . |
|   |  | 1.2 | Site is inspected, sketched and where required photographed, and <i>existing characteristics</i> are noted according to workplace procedures.                          |
|   |  | 1.3 | <i>Features of surrounding area</i> that may affect design options are investigated and noted according to workplace procedures.                                       |
| 2 | Measure and record site dimensions                     | 2.1 | Linear site dimensions are measured or calculated, and recorded according to workplace procedures.   |
|   |  | 2.2 | Levelling devices are set up and adjusted according to manufacturer instructions and workplace procedures.   |
|   |  | 2.3 | Horizontal and vertical angles are determined and recorded.  |
| 3 | Plot contours and cut and fill areas                   | 3.1 | Contour lines are interpolated from spot level values and plotted on site plan.  |
|   |  | 3.2 | Cut and fill areas are measured or calculated and plotted in plan and section drawings.  |
| 4 | Analyse site and produce measured drawings             | 4.1 | Field data is correlated and applied to production of measured drawings according to workplace procedures.   |
|   |  | 4.2 | Orientation and layout of <i>key design elements</i> are   |

determined, in consultation with technical experts as required, and added to measured drawings.

- 4.3 Measured drawings and relevant site analysis documentation are finalised within project timelines and processed according to workplace procedures.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- administration and management skills to:
  - manage documents
  - manage time, including planning and prioritising work
- analytical and problem-solving skills to:
  - apply design principles and theories within regulatory requirements
  - correlate site information from different sources
  - respond to the challenges of irregularly shaped sites
- language, literacy and numeracy skills to:
  - calculate measurements
  - communicate with clients and colleagues
  - interpret complex documents, including:
    - client briefs
    - compliance requirements
    - land titles
    - reports
    - site plans
- technical skills to:
  - apply on-site OHS procedures
  - apply drawing skills, including:
    - drawing to scale
    - field sketching
    - producing measured drawings based on field data
  - take accurate measurements using basic surveying equipment, including:
    - chains and tapes
    - global positioning systems (GPS)
    - automatic, dumpy and tilting levels

- theodolites
- technology skills to use information technology and relevant software

### Required knowledge

- architectural styles and terminology
- construction materials and methods to accurately assess materials and methods used in existing on-site and neighbouring buildings
- contextual and site constraints
- design development processes and uses of on-site measured drawings in these processes
- key features of building life cycles to accurately assess potential for re-use of existing buildings
- legislation, codes and standards relevant to small-scale building design projects, including:
  - drawing standards
  - OHS
- organisational scope of business, service levels and fees
- principles of building design, including sustainable design
- safe operating procedures for basic levelling and surveying equipment

### Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person should demonstrate the ability to:</p> <ul style="list-style-type: none"> <li>• safely and thoroughly inspect at least three sites for small-scale building design projects, each site having significantly different features and characteristics</li> <li>• observe and document relevant features and characteristics of sites and neighbouring areas</li> <li>• accurately measure or calculate relevant angles, contours and dimensions</li> <li>• produce sets of accurate and scaled measured site drawings.</li> </ul>
<p>Context of and specific resources for assessment</p>	<p>Assessment of this unit:</p> <ul style="list-style-type: none"> <li>• must be in the context of the work environment</li> <li>• may be conducted in an off-site context, provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills,</li> </ul>

	<p>contingency management skills and job role environment skills</p> <ul style="list-style-type: none"> <li>• must meet relevant compliance requirements.</li> </ul> <p>Resource implications for assessment include:</p> <ul style="list-style-type: none"> <li>• access to: <ul style="list-style-type: none"> <li>• suitable assessment venue and equipment</li> <li>• suitable simulated or real opportunities and resources to demonstrate competence</li> </ul> </li> <li>• assessment instruments.</li> </ul>
Method of assessment	<p>Assessment for this unit must verify the practical application of the required skills and knowledge, using one or more of the following methods:</p> <ul style="list-style-type: none"> <li>• written and/or oral assessment of the candidates required knowledge for the unit</li> <li>• observed, documented and/or firsthand testimonial evidence of the candidates</li> <li>• implementation of appropriate procedures and techniques for the safe, effective and efficient achievement of the required outcomes</li> <li>• identification of the relevant information and scope of the work required to meet the required outcomes</li> <li>• identification of viable options and the selection of options that best meet the required outcomes</li> <li>• consistently achieving the required outcomes.</li> </ul>
Guidance information for assessment	<p>This unit could be assessed on its own or in combination with other units relevant to the job function.</p> <p>Where applicable, physical resources should include equipment modified for people with disabilities.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present

with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Small-scale building design projects:</i></b></p>	<ul style="list-style-type: none"> <li>• include buildings covered by the BCA, except construction Type A buildings</li> <li>• may be residential projects, such as:             <ul style="list-style-type: none"> <li>• additions and renovations</li> <li>• heritage restoration</li> <li>• new buildings</li> </ul> </li> <li>• may be commercial or industrial projects, such as:             <ul style="list-style-type: none"> <li>• factories</li> <li>• motels</li> <li>• offices</li> <li>• restaurants</li> <li>• retail and service outlets</li> <li>• warehouses.</li> </ul> </li> </ul>
<p><b><i>Site information</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• compliance requirements</li> <li>• environmental reports, including:             <ul style="list-style-type: none"> <li>• climate</li> <li>• flora and fauna</li> <li>• soil</li> <li>• water catchment</li> </ul> </li> <li>• maps</li> <li>• overlays</li> <li>• service and utility layouts</li> <li>• site plans</li> <li>• titles.</li> </ul>
<p><b><i>Workplace procedures</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• access arrangements</li> <li>• drawing production systems and procedures</li> <li>• equipment operation and maintenance procedures</li> <li>• hazard and risk assessment and control</li> <li>• OHS requirements</li> <li>• project management procedures.</li> </ul>
<p><b><i>Existing characteristics</i></b> of a site may include:</p>	<ul style="list-style-type: none"> <li>• access</li> <li>• boundaries</li> <li>• buildings, including:             <ul style="list-style-type: none"> <li>• materials and methods</li> <li>• structural integrity</li> </ul> </li> <li>• contours</li> <li>• easements</li> <li>• features</li> </ul>

	<ul style="list-style-type: none"> <li>• fences</li> <li>• flora, especially significant trees</li> <li>• relationship to adjoining properties</li> <li>• services, including power, telecommunications and water supply</li> <li>• structures</li> <li>• views</li> <li>• water and drainage, including:             <ul style="list-style-type: none"> <li>• absorption and transpiration areas</li> <li>• ground water</li> <li>• rainwater tanks</li> <li>• roof water</li> <li>• sewerage treatment plant</li> <li>• stormwater.</li> </ul> </li> </ul>
<i>Features of surrounding area</i> may include:	<ul style="list-style-type: none"> <li>• architectural styles of buildings and structures</li> <li>• dimensions, locations and uses of adjacent buildings and structures, including:             <ul style="list-style-type: none"> <li>• aesthetics</li> <li>• noise produced</li> <li>• shade cast on site</li> <li>• traffic</li> </ul> </li> <li>• landscaping, including significant trees</li> <li>• street features and furniture, such as poles and cables.</li> </ul>
<i>Key design elements</i> may include:	<ul style="list-style-type: none"> <li>• access and egress points</li> <li>• buildings</li> <li>• existing utilities and services infrastructure.</li> </ul>

# CPPBDN5017A Produce 2-D drawings for building design projects using CAD software

## Modification History

Release 2 - minor editorial correction removal of duplicate *Element 7 Import files*

This version first released with CPP07 Property Services Training Package Version 14.

## Unit Descriptor

This unit of competency specifies the outcomes required to produce two-dimensional (2-D) drawings for residential, commercial and industrial building design projects using computer-aided design (CAD) software.

Work in this area must be completed according to relevant legislative, industry and organisational requirements, including work health and safety (WHS) policies and procedures.

## Application of the Unit

This unit of competency supports the needs of industry personnel responsible for preparing 2-D building design drawings from instructions, sketches, drawings and plans for residential, commercial and industrial building design projects. The drawings produced and notations included should conform to Australian standards and drawing protocols.

## Licensing/Regulatory Information

Different States and Territories may have regulatory mechanisms that apply to this unit. Users are advised to consult with the relevant regulatory authorities.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised***

unit of competency. text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

- |   |                                |  |
|---|--------------------------------|--|
| 1 | Create drawing template files. | 1.1 Basic drawing environment is set up according to organisational standards and industry protocols.  |
|   |                                | 1.2 Layering strategy is created as needed to meet standard drawing requirements.  |
|   |                                | 1.3 Architectural library is created to meet standard drawing requirements.  |
|   |                                | 1.4 Text and dimension styles are created to meet standard drawing requirements.   |
|   |                                | 1.5 Line types of different thicknesses are created to meet standard drawing requirements.   |
|   |                                | 1.6 Hatch patterns and types are created to meet standard drawing requirements.  |
|   |                                | 1.7 Title blocks are set up for different drawing sizes.   |
|   |                                | 1.8 Reference schedules are set up according to workplace and statutory requirements.  |
| 2 | Create 2-D drawings.           | 2.1 <b><i>Drawing requirements</i></b> are identified and confirmed with relevant project personnel.   |
|   |                                | 2.2 2-D CAD software programs and functions are used to produce different types of 2-D drawings using appropriate layers if required.            |
|   |                                | 2.3 Notations, compliant with Australian standards and drawing protocols, are added to drawings as required.                                     |
|   |                                | 2.4 Dimensions are added to drawings as required, and scales are applied according to Australian standards and <b><i>drawing protocols</i></b> . |

- |   |                          |     |   |
|---|--------------------------|-----|---|
| 3 | Import files.            | 3.1 | Digital text and drawing files from other software applications are imported into 2-D CAD drawings.                             |
|   |                          | 3.2 | External 2-D drawing files are inserted into 2-D CAD drawings.  |
|   |                          | 3.3 | Hard copy documents are scanned and saved as correct file types to import into 2-D CAD drawings.                                |
|   |                          |     |   |
| 4 | Edit drawing components. | 4.1 | Elements that are not required are deleted or purged from drawings.   |
|   |                          | 4.2 | Editing commands are used to modify drawing elements and text.  |
|   |                          |     |   |
| 5 | Print CAD drawings.      | 5.1 | Page layout for the drawing file is set to suit printing requirements.  |
|   |                          | 5.2 | Print parameters for the printer are set.   |
|   |                          | 5.3 | Drawings are printed on the correct media.  |
|   |                          |     |   |
| 6 | Save and back up files.  | 6.1 | Suitable file directories are created for the drawing project.  |
|   |                          | 6.2 | Drawing files are saved for later retrieval and backed up to specified drives or directories according to workplace procedures. |
|   |                          |     |   |
| 7 | Export files.            | 7.1 | Drawing files are created and sent to external personnel for use in different software applications.                            |
|   |                          | 7.2 | PDF files are created for relevant personnel to view completed drawings without using CAD software packages.                    |

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

## Required skills

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - seek clarification
- creative design, drawing and drafting skills, including:
  - identifying and applying characteristics, decorative styles and text styles
  - using:
    - drafting technologies
    - drafting equipment
- numeracy skills to apply measurements and make calculations relating to scales and ratios in drawings
- planning and organising skills to ensure coordinated development of drawings
- reading skills to read and interpret:
  - plans, drawings, specifications and design briefs
  - documentation from a variety of sources
- technology skills to use information technology and 2-D CAD software
- writing skills to add notations to drawings

## Required knowledge

- architectural styles and terminology
- building materials used in building design projects, and their representation in drawings
- drafting and drawing protocols
- construction technology relating to building design projects
- functions and operation of 2-D CAD software programs
- general WHS principles and responsibilities relating to the production of 2-D CAD drawings
- hard copy and digital file management procedures
- relevant industry standards and codes of practice relating to the production of 2-D CAD drawings
- structural systems used in building design projects
- types and uses of architectural drawings

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p><b>Overview of assessment</b></p>	<p>This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques replicate workplace conditions, materials, activities, responsibilities and procedures.</p> <p>It may be assessed on its own or as part of an integrated assessment activity involving preparation of CAD drawings, including construction detailing and material identification, for a range of typical National Construction Code (NCC) structures.</p>
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>A person who demonstrates competency in this unit should provide evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use two different types of 2-D CAD software according to manufacturer specifications and organisational standards to produce at least five different types of 2-D building design drawings selected from the following: <ul style="list-style-type: none"> <li>• bracing plans</li> <li>• electrical power and lighting plans</li> <li>• floor framing plans</li> <li>• floor plans</li> <li>• house drainage plans (sewerage)</li> <li>• lot plans</li> <li>• roof drainage plans</li> <li>• roof framing plans</li> <li>• site plans</li> <li>• slab or footing layout plans</li> <li>• stormwater layout plans.</li> </ul> </li> </ul> <p>A person should also provide evidence of:</p> <ul style="list-style-type: none"> <li>• identifying and applying drawing protocols</li> <li>• identifying and applying styles, characteristics, technologies and decorative styles</li> <li>• sound understanding of the structural function of building elements</li> <li>• importing and exporting information.</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>Assessment of this unit:</p> <ul style="list-style-type: none"> <li>• must be in the context of the work environment</li> <li>• may be conducted in an off-site context, provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills</li> <li>• must meet relevant compliance requirements.</li> </ul>

	<p>Resource implications for assessment include access to:</p> <ul style="list-style-type: none"> <li>• suitable assessment venue and equipment, including computers with 2-D CAD software, printers, and building codes and standards</li> <li>• suitable simulated or real opportunities and resources to demonstrate competence.</li> </ul>
<p><b>Method of assessment</b></p>	<p>Assessment for this unit must verify the practical application of the required skills and knowledge, using one or more of the following methods:</p> <ul style="list-style-type: none"> <li>• written and/or oral assessment of the candidates required knowledge for the unit</li> <li>• observed, documented and/or firsthand testimonial evidence of the candidates</li> <li>• implementation of appropriate procedures and techniques for the safe, effective and efficient achievement of the required outcomes</li> <li>• identification of the relevant information and scope of the work required to meet the required outcomes</li> <li>• identification of viable options and the selection of options that best meet the required outcomes</li> <li>• consistently achieving the required outcomes.</li> </ul>
<p><b>Guidance information for assessment</b></p>	<p>This unit could be assessed on its own or in combination with other units relevant to the job function.</p> <p>Where applicable, physical resources should include equipment modified for people with disabilities.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Drawing requirements*** • details:

include:

- area analysis
- construction notes
- general notes
- location of neighbouring buildings
- services plans
- structural information
- types of drawings, such as:
  - isometric drawings
  - plans:
    - bracing plans
    - electrical power and lighting plans
    - floor framing plans
    - floor plans
    - house drainage plans (sewerage)
    - lot plans
    - roof drainage plans
    - roof framing plans
    - site plans
    - slab or footing layout plans
    - stormwater layout plans
  - perspective drawings
  - elevations or projections
  - sections
  - structural detail.

***Drawing protocols***

include:

- abbreviations
- commonly used symbols
- dimensioning
- drawing titles
- hatched regions
- legends
- lettering standards
- line types
- numbering
- paper size
- scale
- schedules
- standard units of measurement.

## CPPCCL2008 Clean carpeted floors

### Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

### Application

This unit specifies the outcomes to clean carpeted floors in a range of workplace contexts.

The unit applies to cleaning personnel who perform cleaning tasks on carpeted floors. It includes the ability to assess the cleaning task, understand client requirements and follow workplace safety procedures.

It applies to individuals who perform their duties alone or in a team environment, under routine supervision and without supervisory responsibilities.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

### Unit Sector

Cleaning Operations

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1.	Identify job requirements.	1.1	Review work order and work area to identify carpeted floor cleaning requirements.
		1.2	Identify carpeted floor surface and soil type on surface.
		1.3	Identify equipment and chemicals required.
		1.4	Assess workplace hazards and work restrictions affecting completion of work order.
		1.5	Communicate and clarify issues with supervisor, team member or client.
		1.6	Refer to Safety Data Sheets (SDS) and follow safe work methods.
		1.7	Position safety signage and barriers to control hazards.
2.	Clean carpet	2.1	Select, check, and use personal protective equipment (PPE).
		2.2	Safely move, cover, or protect furniture and fittings that impede cleaning operation.
		2.3	Select cleaning technique.
		2.4	Select carpeted floor cleaning equipment and check for correct operation and safe use.
		2.5	Calculate and prepare chemicals following manufacturers' instructions and job requirements.
		2.6	Patch test carpeted floor for colour fastness.
		2.7	Clean carpeted floor surface in accordance with workplace procedures and hygiene standards.
3.	Tidy work site.	3.1	Tidy work area and dispose of collected soil and waste in accordance with workplace procedures.
		3.2	Remove protective covers from furniture and fittings.
		3.3	Safely replace furniture and fittings.
4.	Complete cleaning task.	4.1	Safely clean equipment and PPE, as required by workplace standards.
		4.2	Check equipment for damage and wear before storing.
		4.3	Safely store equipment, chemicals, and PPE to allow ready-to-use access.
		4.4	Report malfunctions, faults, wear or damage to cleaning

			equipment and environs to supervisor.
		4.5	Complete workplace cleaning schedule.

## Foundation Skills

This section describes language, literacy, numeracy and employment skills that are essential to the performance in this unit, but not explicit in the performance criteria.

Skill	Performance Feature
Reading skills to:	<ul style="list-style-type: none"> <li>▶ Interpret work orders and workplace safety procedures</li> <li>▶ Interpret Safety Data Sheets (SDS)</li> <li>▶ Interpret equipment manuals and chemical labels</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>▶ Communicate effectively with supervisors and team members.</li> <li>▶ Ask questions and clarify any queries when necessary</li> <li>▶ Report any problems to supervisor</li> </ul>
Learning skills to:	<ul style="list-style-type: none"> <li>▶ Locate information in workplace documents, manuals, and labels</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>▶ Calculate and measure quantities of chemicals</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>▶ Complete workplace reports</li> </ul>

# Assessment Requirements for CPPCCL2008 Clean carpeted floors

## Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

## Performance Evidence

A person must demonstrate the ability to:

- select and use carpet cleaning equipment and cleaning agents; and
- clean, using a different technique in each instance, four different types of carpeted floor surfaces, including at least:
  - one carpeted floor with dry soiling; and
  - one carpeted floor with wet soiling.

Performance must include:

- selecting, using, and maintaining personal protective equipment (PPE);
- manual handling techniques;
- communicating effectively with supervisor, team members or clients;
- understanding, clarifying, and following supervisor or client instructions;
- safely using cleaning equipment and preparing and using cleaning agents;
- disposing of collected soil and waste; and
- using efficient carpet cleaning methods.

## Knowledge Evidence

A person demonstrating competency in this unit must identify:

- the main types of carpeted flooring and their characteristics including natural, synthetic, looped, tufted, and modular tiled carpeting
- the main types of wet and dry soiling and effects on carpeted surfaces including dust, dirt, food, beverages, liquids, and oil
- carpet cleaning techniques and equipment including:
  - vacuuming, steam cleaning and manual stain removal
  - industry standard equipment for cleaning wet and dry carpeted floors, including wet and dry vacuum cleaners and steam cleaners

- cleaning agents; cleaning solutions for carpets, including carpet shampoo and stain removal cleaning agents
- workplace requirements for undertaking all aspects of cleaning carpeted floors including:
  - key workplace health and safety, hygiene and environmental regulations
  - use of safety data sheets (SDS) and selection, care and use of PPE
  - safe handling and usage of cleaning equipment and cleaning agents
  - safe usage of carpet stain removal cleaning agents
  - manual handling techniques for moving furniture and fittings and installing covers
- methods for communicating and clarifying work requirements with supervisors and clients; verbally, in person or via phone, via electronic medium such as text and email, electronic or written reports
- workplace procedures for:
  - health and safety, hygiene and environmental care
  - communicating and clarifying work requirements with supervisor, team members or client
  - notifying supervisor, team members or client of work completion; verbal communication in person or by phone, written communication including hard copy cleaning schedules, text or electronic form
  - use and care of equipment; including checking electrical safety tags to ensure safe use of equipment
  - tidying work areas, disposing of soil and waste, cleaning equipment and PPE, and storing equipment and chemicals
  - reporting incidents; accidents and injury, damage to or breakages in the cleaning area or cleaning equipment, theft and threats to personal security
  -

## Assessment Conditions

As a minimum, assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which reflect:

- the use of industry standard equipment such as, residential and industrial wet and dry vacuums, steam cleaners, cloths and cleaning agents.
- performing tasks/activities to the level of proficiency and within timelines that would be expected in a workplace.

Assessors are responsible for ensuring that candidates have access to:

- appropriate documents, materials, tools, equipment, and personal protective equipment currently used in industry;
- legislation and regulations; and
- workplace policies and procedures.

-

## CPPCCL2009 Perform basic stain removal from carpets

### Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

### Application

This unit of competency specifies the outcomes required to identify and remove stains from carpets using basic stain removal techniques in a range of workplace contexts.

The unit applies to cleaning personnel who perform basic stain removal tasks. It includes the ability to assess the cleaning task, understand client requirements and follow workplace safety procedures.

It applies to individuals who perform their duties alone or in a team environment, under routine supervision and without supervisory responsibilities.

No licensing, legislative or certification requirements apply to this Unit at the time of publication.

# Assessment Requirements for CPPCCL2009 Perform basic stain removal from carpets

## Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

## Performance Evidence

A person must demonstrate the ability to:

- select and use stain removal equipment and cleaning agents; and
- remove, using a different technique in each instance, four different types of carpet stains, including at least:
  - one dry soil carpet stain; and
  - one wet soil carpet stain.

Performance must include:

- using efficient carpet stain removal methods.
- selecting, using, and maintaining personal protective equipment (PPE);
- manual handling techniques;
- communicating effectively with supervisor or clients;
- safely using carpet stain removal cleaning equipment and preparing and using cleaning agents; and
- disposing of collected soil and waste.

## Knowledge Evidence

A person demonstrating competency in this unit must identify:

- the main types of carpet and their characteristics, including natural, synthetic, looped, tufted, and modular tiled carpet
- different types of carpet stains; including staining from coffee, tea, juice, food, blood and ink
- stain removal and carpet cleaning techniques and equipment including:
  - basic stain removal techniques; including manual stain removal, pre-spotting, pre-spraying, vacuuming and steam cleaning
  - industry standard equipment for cleaning wet and dry carpeted floors, including; cloths, sponges and pads, wet and dry vacuum cleaners and steam cleaners

- cleaning agents; cleaning solutions for carpets, including carpet shampoo and stain removal agents
- manufacturers' instructions for mixing and using cleaning chemicals and stain removers
- workplace rules, regulations, and requirements for undertaking all aspects of cleaning carpeted floors including:
  - key workplace health and safety, hygiene and environmental regulations
  - use of safety data sheets (SDS) and selection, care and use of PPE
  - safe handling and usage of cleaning equipment and cleaning agents
  - safe usage of carpet stain removal cleaning agents
  - manual handling and moving of furniture and fittings
- methods for communicating and clarifying work requirements with supervisors and clients; verbally, in person or via phone, via electronic medium such as text and email and electronic or written reports.
- workplace procedures for;
  - health and safety, hygiene and environmental care
  - communicating and clarifying work requirements with supervisor, team members or client
  - notifying supervisor, team members or client of work completion; verbal communication in person or by phone, written communication including hard copy cleaning schedules, text, or electronic form
  - use and care of equipment, including pre-start inspection checks of electrical safety tags to ensure safe use of equipment
  - tidying work areas, disposing of soil and waste, cleaning equipment and PPE, and storing equipment and chemicals
  - reporting incidents; accidents and injury, damage to or breakages in the cleaning area or cleaning equipment, theft, and threats to personal security.

## Assessment Conditions

As a minimum, assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which reflect:

- the use of industry-standard equipment such as, residential and industrial wet and dry vacuums, steam cleaners, stain removal products, carpet cleaning agents, cloths, pads and sponges.
- performing tasks/activities to the level of proficiency and within timelines that would be expected in a workplace; and
- following standard and authorised work practices, safety requirements and environmental constraints.

Assessors are responsible for ensuring that candidates have access to:

- appropriate documents, materials, tools equipment and personal protective equipment currently used in industry;
- legislation and regulations; and
- workplace policies and procedures.

## Knowledge Evidence

A person demonstrating competency in this unit must identify:

- the main types of hard floor surfaces; including hardwood, wood tile, concrete, marble, ceramic tiling, laminate, and vinyl
- the main types of wet and dry soiling and effects on hard floor surfaces; including dust, heavy dirt build-up, food, beverages, liquids and oil
- cleaning techniques and industry standard equipment used to clean hard floor surfaces including:
  - scrubbing, mopping, sweeping, vacuum and pressure cleaning
  - mops, brushes, industrial scrubbers and sweepers, pressure washers, and vacuum cleaners

- cleaning agents; cleaning solutions for hard floor surfaces; including hard floor cleaning solutions, low environmental impact cleaning solutions, solvent cleaners, stain removal agents and
- manufacturers' instructions for mixing and using cleaning chemicals and stain removers
- workplace requirements for undertaking all aspects of cleaning hard floor surfaces including:
  - key workplace health and safety, hygiene and environmental regulations
  - use of safety data sheet (SDS) and selection, care and use of PPE
  - safe handling of equipment
  - safe usage of cleaning agents
  - manual handling techniques for moving furniture and fittings
- methods for communicating and clarifying work requirements with supervisors and clients; verbally, in person or via phone, via electronic medium such as text and email, electronic or written reports
- workplace procedures for;
  - health and safety, hygiene and environmental care
  - communicating and clarifying work requirements with supervisor, team members or client
  - notifying supervisor, team members or client of work completion; verbal communication in person or by phone, written communication including hard copy cleaning schedules, text or electronic form
  - use and care of equipment; including checking electrical safety tags to ensure safe use of equipment
  - tidying work areas, disposing of soil and waste, cleaning equipment and PPE, and storing equipment and chemicals
  - reporting incidents; accidents and injury, damage to or breakages in the cleaning area or cleaning equipment, theft and threats to personal security

## Assessment Conditions

As a minimum, assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which reflect:

- the use of industry-standard equipment such as, residential and industrial scrubbers and sweepers, brooms, dry and wet mops, residential and industrial wet and dry vacuums, pressure hose, cloths, sponges and pressure washers.
- performing tasks/activities to the level of proficiency and within timelines that would be expected in a workplace; and
- following standard and authorised work practices, safety requirements and environmental constraints.

Assessors are responsible for ensuring that candidates have access to:

- appropriate documents, materials, tools equipment and personal protective equipment currently used in industry;
- legislation and regulations; and
- workplace policies and procedures.

## CPPCLO2005 Maintain glass surfaces

### Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

### Application

This unit of competency specifies the outcomes required to maintain glass surfaces, including windows, in a range of workplace contexts.

The unit applies to individuals performing glass and window cleaning services, but may be applied to other custodial-cleaning roles. It includes the ability to assess the cleaning task, apply and follow workplace safety measures, and understand client requirements.

It applies to individuals who perform their duties alone or in a team environment, under routine supervision and without supervisory responsibilities.

Different states and territories may also have regulatory frameworks applicable to this unit or require a working at height licence. Users are advised to check for regulatory limitations.

### Pre-requisite Unit

essential outcomes.		needed to demonstrate achievement of the element.	
1.	Identify job requirements.	1.1	Review work order and work area to identify glass surface cleaning requirements
		1.2	Identify glass surface and soil type on surface.
		1.3	Identify equipment and chemicals required.
		1.4	Assess workplace hazards and work restrictions affecting completion of work order.
		1.5	Communicate and clarify issues with supervisor, team member or client.
		1.6	Refer to Safety Data Sheets (SDS) and follow safe work methods.
		1.7	Position safety signage and barriers to control hazards.
2.	Maintain glass surface.	2.1	Select and use personal protective equipment (PPE).
		2.2	Safely remove window coverings and fittings to permit access and prevent damage.
		2.3	Select cleaning technique.
		2.4	Select glass cleaning equipment and inspect prior to use to ensure safety.
		2.5	Calculate and prepare chemicals following manufacturers' instructions and job requirements.
		2.6	Wipe glass surface and window edges to remove soil and waste in accordance with workplace hygiene standards.
3.	Tidy work site.	3.1	Tidy work area and dispose of collected soil and waste in accordance with environmental requirements.

		3.2	Replace window coverings and fittings.
4.	Complete task.	4.1	Safely clean equipment and PPE, as required by workplace standards
		4.2	Check equipment for damage and wear before storing.
		4.3	Safely store equipment, chemicals, and PPE to allow ready-to-use access.
		4.4	Report malfunctions, faults, wear or damage to cleaning equipment and environs to supervisor.
		4.5	Complete workplace cleaning schedule.

## Foundation Skills

This section describes language, literacy, numeracy and employment skills that are essential to the performance in this unit, but not explicit in the performance criteria.

# Assessment Requirements for CPPCLO2005 Maintain glass surfaces

## Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

## Performance Evidence

A person must demonstrate the ability to:

- select and use glass cleaning maintenance equipment and cleaning agents; and
- to clean, using a different technique in each instance:
  - one internal glass surface with dry soiling;
  - one internal glass surface with wet soiling;
  - one external glass surface with dry soiling; and
  - one external glass surface with wet soiling.

Performance must include:

- selecting, using, and maintaining personal protective equipment (PPE);
- manual handling techniques;
- communicating effectively with supervisor or clients;
- understanding, clarifying, and following supervisor or client instructions;
- safely using glass surface cleaning equipment and preparing and using cleaning agents;
- disposing of collected soil and waste; and
- using efficient cleaning methods

## Knowledge Evidence

A person demonstrating competency in this unit must identify:

- standard glass surfaces; including float glass, toughened, and non-toughened glass
- the main types of wet and dry soiling and effects on glass surfaces
- glass surface cleaning techniques and industry standard equipment including:
  - pre-spraying, scraping, spot cleaning, squeegeeing and wiping
  - buckets, chamois cloths, lamb's wool applicator, lint-free cloths, microfibre products, cobwebber, ladders, extension pole, glass scraper and hose
  - cleaning solutions for glass; glass cleaners, solvent cleaners and surfactants.
- workplace requirements for undertaking all aspects of maintain glass surfaces including:

- key workplace health and safety, hygiene and environmental regulations
- use of safety data sheet (SDS) and selection, care and use of PPE
- safe handling and usage of cleaning equipment and cleaning agents
- methods for communicating and clarifying work requirements with supervisors and clients; verbally, in person or via phone, via electronic medium such as text and email, electronic or written reports
- workplace procedures for:
  - health and safety, hygiene and environmental care
  - communicating and clarifying work requirements with supervisor, team members or client
  - notifying supervisor, team members or client of work completion; verbal communication in person or by phone, written communication including hard copy cleaning schedules, text or electronic form
  - use and care of equipment; including checking electrical safety tags to ensure safe use of equipment
  - tidying work areas, disposing of soil and waste, cleaning equipment and PPE, and storing equipment and chemicals
  - reporting incidents; accidents and injury, damage to or breakages in the cleaning area or cleaning equipment, theft and threats to personal security

## Assessment Conditions

As a minimum, assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which reflect:

- the use of industry-standard equipment such as, glass cleaning agents, ladders, pressure hoses, dry and wet lint free cloths, lint free towels, microfibre clothes and squeegees.
- performing tasks/activities to the level of proficiency and within timelines that would be expected in a workplace; and
- following standard and authorised work practices, safety requirements and environmental constraints.

Assessors are responsible for ensuring that candidates have access to:

- appropriate documents, materials, tools equipment and personal protective equipment currently used in industry;
- legislation and regulations; and
- workplace policies and procedures.

## Assessment Requirements for CPPCLO2011 Maintain ceiling surfaces and fittings

### Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

### Performance Evidence

A person must demonstrate the ability to:

- select and use cleaning maintenance equipment and cleaning agents to clean; and
- two different types of ceiling surfaces, including:
  - one plaster ceiling; and
  - one tiled ceiling.
- two different types of fittings, including:
  - light fittings and fans;
  - vents or grills; and
  - decorative ceiling features such as; ceiling roses, cornicing and edging or exposed wooden beams.

Performance must include:

- selecting, using, and maintaining personal protective equipment (PPE);
- manual handling techniques;
- communicating effectively with supervisor or clients;
- understanding, clarifying, and following supervisor or client instructions;
- safely using ceiling surfaces and fittings cleaning equipment and preparing and using cleaning agents;
- disposing of collected soil and waste; and
- using efficient cleaning methods

### Knowledge Evidence

A person demonstrating competency in this unit must identify:

- standard ceiling surfaces; including plaster, concrete, mineral fibre tiles, panelling and wooden plank ceilings
- different types of ceiling fittings; including lights, fans, vents, grills, and cameras, decorative plaster features or exposed wooden or metal beams

- common soil and stain types found on ceilings and ceiling fittings and effects; including dust, cobwebs, grease, condensation and water based stains
- cleaning techniques and equipment for ceiling surfaces and fittings including:
  - dusting, vacuuming, washing, rinsing, stain removal and polishing
  - ladders, footstools, vacuum cleaners and extended fittings, extended squeegee, sponges and soft dusting cloths
  - cleaning agents; soap solutions for ceilings, stain removal agents, polishing fluid or spray
  - manufacturers' instructions for mixing and using cleaning agents
- workplace requirements for undertaking all aspects of maintaining ceiling surfaces and fittings:
  - key workplace health and safety, hygiene and environmental regulations
  - workplace regulations and procedures for working at heights
  - use of safety data sheets (SDS) and selection, care and use of PPE
  - safe handling of equipment and cleaning agents
  - safe usage of stain removal cleaning agents
  - manual handling techniques for moving ladders, furniture and fittings and installing covers
- methods for communicating and clarifying work requirements with supervisors and clients; verbally, in person or via phone, via electronic medium such as text and email, electronic or written reports
- workplace procedures for:
  - health and safety, hygiene and environmental care
  - communicating and clarifying work requirements with supervisor, team members or client
  - notifying supervisor, team members or client of work completion; verbal communication in person or by phone, written communication including hard copy cleaning schedules, text or electronic form
  - use and care of equipment; including checking electrical safety tags to ensure safe use of equipment
  - tidying work areas, disposing of soil and waste, cleaning equipment and PPE, inspecting and storing equipment and chemicals
  - reporting incidents; accidents and injury, damage to or breakages in the cleaning area or cleaning equipment, theft and threats to personal security

## Assessment Conditions

As a minimum, assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which reflect:

- the use of industry-standard equipment such as, ladders, footstools, rubber gloves, pressure hoses, long-handle cleaner, long-handle duster, extended squeegee, cloths and cleaning agents.
- performing tasks/activities to the level of proficiency and within timelines that would be expected in a workplace; and
- following standard and authorised work practices, safety requirements and environmental constraints.

Assessors are responsible for ensuring that candidates have access to:

- appropriate documents, materials, tools equipment and personal protective equipment currently used in industry;
- legislation and regulations; and
- workplace policies and procedures.

# CPPCLO2014 Clean and arrange furniture and fittings

## Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

## Application

This unit of competency specifies the outcomes required to clean and arrange furniture and fittings, and to present rooms in a range of workplace contexts.

This unit applies to individuals who clean furniture and fittings and then place the furniture and fittings in their original positions, or in an arrangement specified by a client. It includes the ability to assess the extent of the cleaning task, understand client requirements and apply procedures.

This unit applies to individuals with the ability to follow effectively company policies and procedures and to safely perform their duties alone or in a team environment, under routine supervision and without supervisory responsibilities.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

# Assessment Requirements for CPPCLO2014 Clean and arrange furniture and fittings

## Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

## Performance Evidence

A person must demonstrate the ability to:

- select and use furniture and fitting cleaning equipment and cleaning agents to clean, using a different technique in each instance:
- two different types furniture items, including at least:
  - one furniture item with dry soiling; and
  - one furniture item with wet soiling.
- two different types of fittings, including at least:
  - one fitting with dry soiling; and
  - one fitting with wet soiling.
- arrange furniture and fitting twice using a different technique in each instance.

Performance must include:

- selecting, using, and maintaining personal protective equipment (PPE);
- manual handling techniques;
- communicating effectively with supervisor or clients;
- understanding, clarifying, and following supervisor or client instructions;
- safely using cleaning equipment and preparing and using cleaning agents;
- disposing of collected soil and waste; and
- using efficient cleaning methods
- 

## Knowledge Evidence

A person demonstrating competency in this unit must identify:

- industry standard types of furniture including; beds, bedside cupboards, shelves, benches, chairs, tables, desks, work stations and filing cabinets,

- industry standard types of fittings including; door handles, light fittings and switches, railings, skirting, window sills, window coverings, picture frames, clocks, ornaments, telephone handsets, computers, kettles and microwaves
- the main surface types including; wood, laminate, metal, glass, plastic, tile, vinyl, leather or fabric
- the main types of wet and dry soiling and effects on furniture and fitting surfaces including; mud and dirt, dust, cobwebs, grease, wax, ink, nail polish, food, beverages, blood, and human and animal waste
- standard furniture and fitting cleaning techniques and industry standard equipment
- including;
  - wiping, washing, scrubbing, pre-spraying, vacuuming and polishing
  - cloths, sponges, scourers, microfibre products, lint-free dusters and polishing cloths, alcohol wipes, brooms, long-handle cleaner, extended squeegee, dry and wet mops, buckets, ladders, footstools, industrial dry and wet vacuums
  - cleaning agents; acid cleaners, alkaline cleaners, low environmental impact chemicals, neutral cleaners, solvent cleaners and stain removal agents
- workplace requirements for undertaking all aspects of cleaning furniture and arranging fittings including:
  - key workplace health and safety, hygiene and environmental regulations
  - use of safety data sheet (SDS) and selection, care and use of PPE
  - safe handling and usage of cleaning equipment and cleaning agents
  - manual handling techniques for moving furniture and fittings
- methods for communicating and clarifying work requirements with supervisors and clients; verbally, in person or via phone, via electronic medium such as text and email, electronic or written reports.
- workplace procedures for;
  - health and safety, hygiene and environmental care
  - communicating and clarifying work requirements with supervisor, team members or client
  - notifying supervisor, team members or client of work completion; verbal communication in person or by phone, written communication including hard copy cleaning schedules, text or electronic form
  - use and care of equipment; including checking electrical safety tags to ensure safe use of equipment
  - tidying work areas, disposing of soil and waste, cleaning equipment and PPE, and storing equipment and chemicals
  - reporting incidents; accidents and injury, damage to or breakages in the cleaning area or cleaning equipment, theft and threats to personal security

## Assessment Conditions

As a minimum, assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which reflect:

- the use of industry-standard equipment such as, ladders, footstools, brooms, long-handle cleaner, long-handle duster, extended squeegee, industrial dry and wet vacuums, dry and wet mops, cleaning agents, dry and wet cloth and sponges.
- industry-standards relating to workplace safety practices when moving and arranging furniture and fittings.
- performing tasks/activities to the level of proficiency and within timelines that would be expected in a workplace; and
- following standard and authorised work practices, safety requirements and environmental constraints.

Assessors are responsible for ensuring that candidates have access to:

- appropriate documents, materials, tools equipment and personal protective equipment currently used in industry;
- legislation and regulations; and
- workplace policies and procedures.

## Assessment Requirements for CPPCLO2016 Clean wet surfaces

### Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

### Performance Evidence

A person must demonstrate the ability to:

- select and use wet surface cleaning equipment and cleaning agents; and
- clean, using a different technique in each instance, four different types of wet surfaces, including at least:
  - one wet surface with dry soiling; and
  - one wet surface with wet soiling.

Performance must include:

- selecting, using, and maintaining personal protective equipment (PPE);
- manual handling techniques;
- communicating effectively with supervisor or clients;
- understanding, clarifying, and following supervisor or client instructions;
- safely using wet surface cleaning equipment and preparing and using cleaning agents;
- disposing of collected soil and waste; and
- using efficient cleaning methods

### Knowledge Evidence

A person demonstrating competency in this unit must identify:

- characteristics of a wet surface and the main industry environments with wet surface cleaning requirements including; bathrooms, toilets, change rooms and laundries
- the main types of wet and dry soiling and effects on wet surfaces
- cleaning techniques and equipment for wet areas including;
  - scrubbing, wiping, mopping, polishing, vacuum and pressure cleaning
  - dry and wet mops, buckets, soft cloths, microfibre cloths, lint free cloths, towels and
  - cleaning agents; cleaning solutions for hard floors, low environmental impact cleaning solutions, solvent cleaners, stain removal agents and stain removal cleaning agents
  - manufacturers' instructions for mixing and using cleaning chemicals and stain removers

- workplace requirements for undertaking all aspects of cleaning wet surfaces including:
  - key workplace health and safety, hygiene and environmental regulations
  - use of safety data sheet (SDS) and selection, care and use of PPE
  - safe handling of equipment
  - safe usage of cleaning agents
  - manual handling techniques for moving furniture and fittings
- methods for communicating and clarifying work requirements with supervisors and clients; verbally, in person or via phone, via electronic medium such as text and email, electronic or written reports
- workplace procedures for;
  - health and safety, hygiene and environmental care
  - communicating and clarifying work requirements with supervisor, team members or client
  - notifying supervisor, team members or client of work completion; verbal communication in person or by phone, written communication including hard copy cleaning schedules, text or electronic form
  - use and care of equipment; including checking electrical safety tags to ensure safe use of equipment
  - tidying work areas, disposing of soil and waste, cleaning equipment and PPE, and storing equipment and chemicals
  - reporting incidents; accidents and injury, damage to or breakages in the cleaning area or cleaning equipment, theft and threats to personal security
- 

## Assessment Conditions

As a minimum, assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which reflect:

- the use of industry-standard equipment such as, lint free cloths and towels, brooms, dry and wet mops, microfibre cloths and cleaning agents.
- performing tasks/activities to the level of proficiency and within timelines that would be expected in a workplace; and
- following standard and authorised work practices, safety requirements and environmental constraints.

Assessors are responsible for ensuring that candidates have access to:

- appropriate documents, materials, tools equipment and personal protective equipment currently used in industry;
- legislation and regulations; and
- workplace policies and procedures.
-

# CPPCLO2018 Sort, remove and recycle waste material

## Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

## Application

This unit of competency specifies the outcomes required to sort and remove waste and recyclable materials in a range of workplace contexts.

This unit applies to cleaning personnel who sort, remove and recycle waste material. It includes the ability to assess the task, identify types of waste and recyclable materials, identify the safety specifications and procedures of the task, understand client requirements and apply company policies and procedures.

It applies to individuals who perform their duties alone or in a team environment, under routine supervision and without supervisory responsibilities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

## Unit Sector

Cleaning Operations

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
---------	----------------------

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1.	Identify job requirements.	1.1	Review work order and work area to identify sorting requirements for waste and recyclable material.
		1.2	Identify types of waste and recyclables to be sorted and removed.
		1.3	Assess workplace hazards and work restrictions affecting completion of work order.
		1.4	Communicate and clarify issues with supervisor, team member or client.
		1.5	Refer to Safety Data Sheets (SDS) and follow safe work methods.
		1.6	Position safety signage and barriers to control hazards.
2.	Sort, remove and recycle waste.	2.1	Select, check and use personal protective equipment (PPE).
		2.2	Select cleaning and waste removal equipment and inspect prior to use to ensure safety.
		2.3	Identify, separate and sort recyclable materials.
		2.4	Safely sort materials and remove waste to waste carrier.
3.	Tidy work site.	3.1	Dispose of collected soil and waste in accordance with workplace procedures.
		3.2	Tidy work area.
		3.3	Spot-clean rubbish bins and surrounds in accordance with workplace hygiene standards.

		3.4	Replace soiled rubbish bin liners.
4.	Complete task.	4.1	Safely store equipment and PPE, as required by workplace standards.
		4.2	Check equipment for damage and wear before storing.
		4.3	Safely store equipment, chemicals, and PPE to allow ready-to-use access.
		4.4	Report malfunctions, faults, wear or damage to cleaning equipment and environs to supervisor.
		4.5	Complete workplace cleaning schedule.

## Foundation Skills

This section describes language, literacy, numeracy and employment skills that are essential to the performance in this unit, but not explicit in the performance criteria.

Skill	Performance Feature
Reading skills to:	<ul style="list-style-type: none"> <li>▶ Interpret work orders and workplace safety procedures</li> <li>▶ Interpret Safety Data Sheets (SDS)</li> <li>▶ Interpret equipment manuals and chemical labels</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>▶ Communicate effectively with supervisors and team members.</li> <li>▶ Ask questions and clarify any queries when necessary</li> <li>▶ Report any problems to supervisor</li> </ul>

# Assessment Requirements for CPPCLO2018 Sort, remove and recycle waste material

## Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

## Performance Evidence

A person must demonstrate the ability to:

- properly use personal protective equipment (PPE); and
- sort and remove waste and recyclable materials in two different workplace contexts.

Performance must include:

- selecting, using, and maintaining personal protective equipment (PPE);
- manual handling techniques;
- communicating effectively with supervisor or clients;
- understanding, clarifying, and following supervisor or client instructions;
- disposing of collected waste; and
- recycling materials

## Knowledge Evidence

A person demonstrating competency in this unit must identify:

- procedures to safely Identify, separate and sort and remove recyclable materials
- industry-standard equipment such as, waste bins, rubbish bags, cleaning solutions and disinfecting products.
- workplace requirements for undertaking all aspects of waste removal and recyclable materials including:
  - key workplace health and safety, hygiene and environmental regulations
  - use of safety data sheets (SDS) and selection, care and use of PPE
  - safe handling and usage of cleaning equipment and cleaning agents
  - Manual handling techniques for moving waste and recyclable materials
- methods for communicating and clarifying work requirements with supervisors and clients; verbally, in person or via phone, via electronic medium such as text and email, electronic or written reports
- workplace procedures for:

- health and safety, hygiene and environmental care
- communicating and clarifying work requirements with supervisor, team members or client
- notifying supervisor, team members or client of work completion; verbal communication in person or by phone, written communication including hard copy cleaning schedules, text or electronic form
- use and care of equipment; including checking electrical safety tags to ensure safe use of equipment
- tidying work areas, disposing of soil and waste, cleaning equipment and PPE, and storing equipment and chemicals
- reporting incidents; accidents and injury, damage to or breakages in the cleaning area or cleaning equipment, theft and threats to personal security
- 

## Assessment Conditions

As a minimum, assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which reflect:

- the use of industry-standard equipment such as, waste bins, rubbish bags, cleaning solutions and disinfecting products.

# Assessment Requirements for CPPCLO2034 Maintain storage area and cleaning equipment

## Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

## Performance Evidence

A person must demonstrate the ability to:

- select and properly use PPE and safely store and maintain cleaning equipment in three different types of storages.

Performance must include:

- selecting, using, and maintaining personal protective equipment (PPE);
- manual handling techniques;
- communicating effectively with supervisors; and
- understanding, clarifying, and following supervisor or client instructions
- 

## Knowledge Evidence

A person demonstrating competency in this unit must identify:

- common requirements for storage of equipment, chemicals, and consumables and reasons for storage methods
- PPE, cleaning solutions, vehicle security elastic straps and nets
- key procedures for keeping storage areas accessible and free of obstacles including the cleaning storage areas: commercial, industrial and vehicle
- principles of first-in first-out storage of chemicals and consumables
- workplace requirements for undertaking all aspects of maintaining storage area and cleaning equipment including:
  - key workplace health and safety, hygiene and environmental regulations
  - use of safety data sheets (SDS) and selection, care and use of PPE
  - safe handling of cleaning equipment and cleaning agents
  - manual handling techniques
- methods for communicating and clarifying work requirements with supervisors and clients; verbally, in person or via phone, via electronic medium such as text and email, electronic or written reports

- workplace procedures for:
  - health and safety, hygiene and environmental care
  - identifying and understanding the requirements of manufacturers' instruction for storing cleaning chemicals and equipment
  - communicating and clarifying work requirements with supervisor, team members or client
  - notifying supervisor, team members or client of work completion; verbal communication in person or by phone, written communication including hard copy cleaning schedules, text or electronic form
  - use and care of equipment; including checking electrical safety tags to ensure safe use of equipment
  - tidying work areas, disposing of soil and waste, cleaning equipment and PPE, and storing equipment and chemicals
  - methods for completing basic regulatory and company documentation
  - reporting incidents; accidents and injury, damage to or breakages in the cleaning area or cleaning equipment, theft and threats to personal security

## Assessment Conditions

As a minimum, assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which reflect:

# Assessment Requirements for CPPCLO2036 Maintain external surfaces

## Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

## Performance Evidence

A person must demonstrate the ability to:

- select and use external surface cleaning maintenance equipment and cleaning agents to clean; and
- maintain, using a different technique in each instance, four different types of external surfaces, including at least:
  - one external surface with dry soiling; and
  - one external surface with wet soiling.

Performance must include:

- selecting, using, and maintaining personal protective equipment (PPE);
- manual handling techniques;
- communicating effectively with supervisor or clients;
- understanding, clarifying, and following supervisor or client instructions;
- safely using cleaning equipment and preparing and using cleaning agents;
- disposing of collected soil and waste; and
- using efficient cleaning methods.
- 

## Knowledge Evidence

A person demonstrating competency in this unit must identify:

- the effects of wet and dry soils on external surfaces including: timber, tile, laminate, painted surface and canvas
- cleaning techniques and equipment including:
  - scrubbing, mopping, sweeping, polishing, vacuum and pressure cleaning
  - industry-standard equipment such as, glass cleaning agents, ladders, pressure hoses, dry and wet lint free cloths, lint free towels, microfibre clothes, mops, and squeegees.

- cleaning agents; cleaning solutions for external surfaces; including hard surface cleaning solutions for brick and glass, low environmental impact cleaning solutions, solvent cleaners, stain removal agents
- manufacturers' instructions for mixing and using cleaning chemicals and stain remover
- workplace requirements for undertaking all aspects for maintenance of external surfaces including:
  - key workplace health and safety, hygiene and environmental regulations
  - use of safety data sheets (SDS) and selection, care and use of PPE
  - identifying and understanding the requirements of manufacturers' instructions for mixing and using cleaning chemicals
  - safe handling and usage of cleaning equipment and cleaning agents
  - manual handling techniques for moving furniture and fittings
- methods for communicating and clarifying work requirements with supervisors and clients; verbally, in person or via phone, via electronic medium such as text and email, electronic or written reports
- workplace procedures for:
  - health and safety, hygiene and environmental care
  - communicating and clarifying work requirements with supervisor, team members or client
  - notifying supervisor, team members or client of work completion; verbal communication in person or by phone, written communication including hard copy cleaning schedules, text or electronic form
  - use and care of equipment; including checking electrical safety tags to ensure safe use of equipment
  - tidying work areas, disposing of soil and waste, cleaning equipment and PPE, and storing equipment and chemicals
  - reporting incidents; accidents and injury, damage to or breakages in the cleaning area or cleaning equipment, theft and threats to personal security
- 

## Assessment Conditions

As a minimum, assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which reflect:

- the use of industry-standard equipment such as, glass cleaning agents, ladders, pressure hoses, dry and wet lint free cloths, lint free towels, microfibre clothes, mops, and squeegees.
- performing tasks/activities to the level of proficiency and within timelines that would be expected in a workplace; and
- following standard and authorised work practices, safety requirements and environmental constraints.

Assessors are responsible for ensuring that candidates have access to:

- appropriate documents, materials, tools equipment and personal protective equipment currently used in industry;
- legislation and regulations; and
- workplace policies and procedures.
-

## CPPCLO2042 Clean surfaces using microfibre equipment

### Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

### Application

This unit of competency specifies the outcomes required to use microfibre cleaning equipment on a range of surfaces, including floor surfaces, walls, and furniture in range of workplace contexts.

The unit applies to cleaning personnel who clean using microfibre equipment. It includes the ability to assess the microfibre cleaning task, understand client requirements and follow workplace safety procedures.

This unit applies to individuals with the ability to follow effectively company policies and procedures and to safely perform their duties alone or in a team environment, under routine supervision and without supervisory responsibilities.

No licensing, legislative or certification requirements apply to this Unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

### Unit Sector

Cleaning Operations

## Elements and Performance Criteria

ELEMENT		PERFORMANCE CRITERIA	
Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1.	Identify job requirements.	1.1	Review work order and work area to identify microfibre cleaning requirements.
		1.2	Identify soil types on surfaces.
		1.3	Identify microfibre equipment required.
		1.4	Assess workplace hazards and work restrictions affecting completion of work order.
		1.5	Communicate and clarify issues with supervisor, team member or client.
		1.6	Refer to Safety Data Sheets (SDS) and follow safe work methods.
		1.7	Position safety signage and barriers to control hazards.
2.	Clean Surface.	2.1	Select and use personal protective equipment (PPE).
		2.2	Safely move, cover, or protect furniture and fittings that impede cleaning operation.
		2.3	Select and prepare microfibre-cleaning equipment.
		2.4	Perform microfibre-cleaning procedure in accordance with workplace hygiene standards.
3.	Tidy work site.	3.1	Sanitise, wash, dry and store microfibre cloths and mops to maximise their efficacy and longevity.
		3.2	Tidy work area and dispose of

			collected soil and waste in accordance with environmental requirements.
		3.3	Remove protective covers from furniture and fittings.
		3.4	Safely replace furniture and fittings.
4.	Complete cleaning task.	4.1	Clean microfibre cloth and PPE, as required by workplace standards.
		4.2	Safely store equipment and PPE to allow ready-to-use access.
		4.3	Report malfunctions, faults, wear or damage to cleaning equipment and environs to supervisor.
		4.4	Complete workplace cleaning schedule.

## Foundation Skills

This section describes language, literacy, numeracy and employment skills that are essential to the performance in this unit, but not explicit in the performance criteria.

An Implementation Guide to this Training Package is available at the VETNet website at - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO2042 Clean surfaces using microfibre equipment

## Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

## Performance Evidence

A person must demonstrate the ability to:

- select and use microfibre cleaning equipment; and
- clean, using a different technique in each instance, three different types of surface, including at least:
  - one dry soil surface; and
  - one wet soil surface.

Performance must include:

- selecting, using, and maintaining personal protective equipment (PPE);
- manual handling techniques;
- communicating effectively with supervisor or clients;
- safely using microfibre cleaning equipment;
- disposing of collected soil and waste; and
- using efficient cleaning methods.

## Knowledge Evidence

A person demonstrating competency in this unit must identify:

- microfibre equipment including; microfibre cloths, microfibre mop, microfibre towels
- different type of surfaces including; hardwood, tile, vinyl, laminate, glass and marble
- microfibre cleaning techniques for removing wet and dry soiling from surfaces
- workplace requirements for undertaking all aspects of microfibre cleaning methods including:
  - key workplace health and safety, hygiene and environmental regulations
  - use of safety data sheets (SDS) and selection, care and use of PPE
  - safe handling and usage of cleaning equipment and cleaning agents
  - manual handling techniques for moving furniture and fittings

- methods for communicating and clarifying work requirements with supervisors and clients; verbally, in person or via phone, via electronic medium such as text and email, electronic or written reports
- workplace procedures for:
  - health and safety, hygiene and environmental care
  - communicating and clarifying work requirements with supervisor, team members or client
  - notifying supervisor, team members or client of work completion; verbal communication in person or by phone, written communication including hard copy cleaning schedules, text or electronic form
  - use and care of equipment; including checking electrical safety tags to ensure safe use of equipment
  - tidying work areas, disposing of soil and waste, cleaning equipment and PPE, and storing equipment and chemicals
  - reporting incidents; accidents and injury, damage to or breakages in the cleaning area or cleaning equipment, theft and threats to personal security
  -

## Assessment Conditions

As a minimum, assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which reflect:

- the use of industry-standard equipment such as, microfibre cloths, microfibre towels, absorbent towels, and dusting products.
- performing tasks/activities to the level of proficiency and within timelines that would be expected in a workplace; and
- following standard and authorised work practices, safety requirements and environmental constraints.

Assessors are responsible for ensuring that candidates have access to:

- appropriate documents, materials, tools equipment and personal protective equipment currently used in industry;
- legislation and regulations; and
- workplace policies and procedures.

## CPPCLO2045 Clean rooms for guests and residents

### Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

### Application

This unit of competency specifies the outcomes required to clean rooms for guests and residents in a range of workplace contexts.

The unit applies to cleaning personnel who perform cleaning activities for guests and residents. It includes the ability to assess the cleaning task, understand client requirements and follow workplace safety procedures.

It applies to individuals who perform their duties alone or in a team environment, under routine supervision and without supervisory responsibilities.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

### Unit Sector

Cleaning Operations

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the	Performance criteria describe the performance

essential outcomes.		needed to demonstrate achievement of the element.	
1.	Identify job requirements.	1.1	Review work order and work area to identify requirements for preparing rooms for guests and residents.
		1.2	Identify number and types of rooms.
		1.3	Identify equipment and chemicals required.
		1.4	Assess workplace hazards and work restrictions affecting completion of work order.
		1.5	Communicate and clarify issues with supervisor, team member or client.
		1.6	Refer to Safety Data Sheets (SDS) and follow safe work methods.
		1.7	Position safety signage and barriers to control hazards.
2.	Clean rooms.	2.1	Select, check and use personal protective equipment (PPE).
		2.2	Safely move, cover, or protect furniture and fittings that impede cleaning operation.
		2.3	Select cleaning technique and related chemicals and equipment.
		2.4	Select cleaning equipment and inspect prior to use to ensure safety.
		2.5	Clean furniture, fixtures and fittings in accordance with workplace procedures and hygiene standards.
		2.6	Check and replenish room supplies.
		2.7	Collect, report and store guest or resident items left in vacated rooms in a safe location.
3.	Tidy work site.	3.1	Tidy work area and dispose of

			collected soil and waste in accordance with environmental requirements.
		3.2	Remove protective covers from furniture and fittings.
		3.3	Safely replace furniture and fittings.
4.	Complete cleaning task.	4.1	Safely clean equipment and PPE, as required by workplace standards.
		4.2	Check equipment for damage and wear before storing.
		4.3	Safely store equipment, chemicals, and PPE to allow ready-to-use access.
		4.4	Report malfunctions, faults, wear or damage to cleaning equipment and environs to supervisor.
		4.5	Complete workplace cleaning schedule.

## Foundation Skills

This section describes language, literacy, numeracy and employment skills that are essential to the performance in this unit, but not explicit in the performance criteria.

## Assessment Requirements for CPPCLO2045 Clean rooms for guests and residents

### Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

### Performance Evidence

A person must demonstrate the ability to:

- select and use cleaning and cleaning agents and clean; and
- prepare two different furnished rooms for guests and residents including one of the following:
  - lounge room;
  - bathroom;
  - kitchen; and
  - bedroom.

Performance must include:

- selecting, using, and maintaining personal protective equipment (PPE);
- manual handling techniques;
- communicating effectively with supervisor or clients;
- safely using cleaning equipment and preparing and using cleaning agents; and
- disposing of collected soil and waste.

### Knowledge Evidence

A person demonstrating competency in this unit must identify:

- cleaning techniques and equipment including:
  - industry-standard equipment such as, residential and industry vacuums, cloths, squeegee, microfibre cloths, towels, sponges, dry and wet mops, cleaning agents and brooms.
  - dusting, wiping, scrubbing, polishing, vacuuming, steam cleaning and manual stain removal
  - cleaning agents; cleaning solutions for floors, carpets, ceramic tiles, bathroom surfaces, toilets, and stain removal cleaning agents and low environmental impact cleaning solutions

- manufacturers' instructions for mixing and using cleaning chemicals and stain removers
- workplace requirements for undertaking all aspects cleaning rooms for guests and residents of including:
  - key workplace health and safety, hygiene and environmental regulations
  - use of safety data sheets (SDS) and selection, care and use of PPE
  - safe handling and usage of cleaning equipment and cleaning agents
  - safe usage of carpet stain removal cleaning agents
  - manual handling techniques for moving furniture and fittings and installing covers
- methods for communicating and clarifying work requirements with supervisors and clients; verbally, in person or via phone, via electronic medium such as text and email, electronic or written reports
- workplace procedures for:
  - health and safety, hygiene and environmental care
  - communicating and clarifying work requirements with supervisor, team members or client
  - notifying supervisor, team members or client of work completion; verbal communication in person or by phone, written communication including hard copy cleaning schedules, text or electronic form
  - use and care of equipment; including checking electrical safety tags to ensure safe use of equipment
  - tidying work areas, disposing of soil and waste, cleaning equipment and PPE, and storing equipment and chemicals
  - replenishing room supplies
  - collecting, reporting and storing guest or resident items left in vacated rooms
  - reporting incidents; accidents and injury, damage to or breakages in the cleaning area or cleaning equipment, theft and threats to personal security

## Assessment Conditions

As a minimum, assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which reflect:

- the use of industry-standard equipment such as, residential and industry vacuums, cloths, squeegee, microfibre cloths, towels, sponges, dry and wet mops, cleaning agents and brooms.
- performing tasks/activities to the level of proficiency and within timelines that would be expected in a workplace; and
- following standard and authorised work practices, safety requirements and environmental constraints.

Assessors are responsible for ensuring that candidates have access to:

- appropriate documents, materials, tools equipment and personal protective equipment currently used in industry;
- legislation and regulations; and
- workplace policies and procedures.

# CPPCLO3001 Maintain hard floor surfaces

## Modification History

Release 1 This version first released with CPP Property Services Training Package Version 4.0

Supersedes and is equivalent to CPPCLO2001A Maintain hard floor surfaces.

Release 2 This version first released with CPP Property Services Training Package Release 8.0.

Minor update in the Knowledge Evidence replaced the word 'distilling' with 'diluting'.

## Application

This unit of competency specifies the outcomes required to clean and maintain hard floor surfaces, selecting the required equipment, chemicals and methods in order to perform the task safely and efficiently.

The unit supports cleaners who work alone or in teams. It applies to both manual and mechanical methods of cleaning hard floor surfaces in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Assess hard floor to be cleaned.
  - 1.1. **Floor type** and condition are assessed, **soil type** is identified, job requirements are reviewed, and issues are clarified.
  - 1.2. Work site **hazards** are assessed and risks controlled according to company, legislative, and **health and safety requirements**.
  - 1.3. **Cleaning methods** for hard floor surface are selected according to company requirements.
  - 1.4. **Equipment** is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.5. **Cleaning chemicals** are selected and prepared according to task requirements.
  - 1.6. **Personal protective equipment** (PPE) is selected and used according to manufacturer specifications, and health and safety and company requirements.
  - 1.7. Signs and barricades are selected and installed according to health and safety, and company requirements.
  - 1.8. Tasks are sequenced to ensure maximum efficiency for completing cleaning requirements.
  - 1.9. Pre-existing damage is identified and reported according to company requirements.
2. Clean hard floor surface.
  - 2.1. Furniture and fittings are removed to allow cleaning tasks to be performed.
  - 2.2. Hard floor surface is cleaned using equipment, chemicals and cleaning techniques according to manufacturer specifications and legislative, health and safety, and company requirements.
  - 2.3. Treated area is compared with surrounding surface to determine need for further action according to company requirements.
3. Tidy work site.
  - 3.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
  - 3.2. Furniture and fittings are returned to original position

- according to job requirements.
- 3.3. Signs and barricades are removed according to health and safety, and company requirements.
4. Clean and safety check equipment, and store equipment and chemicals.
    - 4.1. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements.
    - 4.2. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix required chemicals using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret simple, structured manufacturer instructions when using equipment and preparing chemicals</li> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Floor types*** must

- brick

- include at least two of the following:
- ceramic tiles
  - concrete
  - cork
  - marble
  - parquetry
  - pavers
  - polished or unpolished wood
  - proprietary flooring
  - quarry tiles
  - rubber
  - slate
  - terrazzo
  - vinyl.

- Soil types* must include at least three of the following:
- beverage
  - cigarette butts
  - dust
  - food
  - gravel
  - heavy dirt build-up
  - hospital waste
  - industrial and chemical waste
  - liquids
  - oil
  - paint
  - paper
  - rainwater
  - stones
  - tar.

- Hazards* that must be assessed include:
- biological and environmental contaminants
  - chemical exposure via absorption, ingestion and inhalation
  - chemical reactivity
  - dust and fibre particulates
  - electrical
  - environmental allergens
  - explosions
  - fatigue
  - fire
  - manual handling
  - noise
  - poor ventilation
  - slips, trips and falls
  - syringes and sharps

**Health and safety requirements** must include:

- working in confined spaces.
- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

**Cleaning methods** must include at least two of the following:

- air blowing
- automatic floor scrubbing
- dry buffing
- dust mopping and sweeping
- low-water cleaning methods, such as using microfibre cleaning products
- scrubbing
- spray buffing
- wet mopping.

**Equipment** must include at least two of the following:

- air blowers
- brooms
- cleaning cloths
- cleaning trolleys
- damp mops
- doodle bag holder
- dust mops
- dustpans and brushes
- hospital mops
- mechanical sweepers
- microfibre products

- mop buckets
- scouring pads
- split mops
- squeegees
- water hoses.
- acid cleaners
- alkaline cleaners
- low environmental impact chemicals
- neutral cleaners
- solvent cleaners.
- disposable respirators
- protective clothing
- safety shoes.

**Cleaning chemicals** must include at least one of the following:

**Personal protective equipment** must include at least two of the following:

CPPCLO2001A Maintain hard floor surfaces

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO3001 Maintain hard floor surfaces

## Modification History

Release 1 This version first released with CPP Property Services Training Package Version 4.0

Supersedes and is equivalent to CPPCLO2001A Maintain hard floor surfaces.

Release 2 This version first released with CPP Property Services Training Package Release 8.0.

Minor update in the Knowledge Evidence replaced the word 'distilling' with 'diluting'.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- clean and maintain two of the following different hard floor surfaces:
  - brick
  - ceramic tiles
  - concrete
  - cork
  - marble
  - parquetry
  - pavers
  - polished or unpolished wood
  - proprietary flooring
  - quarry tiles
  - rubber
  - slate
  - terrazzo
  - vinyl
- use two of the following different cleaning methods when cleaning the above surfaces:
  - air blowing
  - automatic floor scrubbing

- dry buffing
- dust mopping and sweeping
- low-water cleaning methods, such as using microfibre cleaning products
- scrubbing
- spray buffing
- wet mopping.

In doing the above work, the person must:

- identify site hazards and control risks before commencing the task
- identify type and condition of hard floor surface
- select cleaning equipment and chemicals required for task
- correctly and safely handle waste, including contaminated materials
- comply with company, legislative and regulatory requirements relating to the cleaning work
- use safe and efficient cleaning methods.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- application methods for maintaining hard floor surfaces using microfibre cleaning techniques, including using:
  - cloth and water in spray bottle to spot clean low-level stains
  - damp mops for hard floor surface cleaning and finishing
  - dry mopping techniques
  - different cleaning chemicals and equipment for hard floor surfaces
- environmental requirements relating to maintaining hard floor surfaces, including:
  - clean-up, containment and isolation procedures
  - emergency chemical spill control measures
  - environmental protection agency requirements relating to using and disposing of cleaning chemicals
  - hazardous materials handling
  - use of low-energy cleaning methods
  - use of low-moisture cleaning methods
  - use of low water-use equipment and other water-efficient cleaning methods
  - use of non-chemical cleaning methods
- methods for cleaning and maintaining microfibre cloths and mops, including:
  - air drying for optimal performance
  - avoiding fabric softeners
  - regular hand or machine washing in hot soapy water
  - removing stains with hot water and washing liquid

- washing products on their own to avoid static transfer of lint
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to maintaining hard floor surfaces, including:
  - quality assurance and certification requirements
  - industry advisory standards and codes, such as dangerous goods codes
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - litter
  - obsolete equipment
  - sweeping detritus
  - used containers
  - used or contaminated personal protective equipment (PPE)
  - used or unused chemicals
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS)
- types and characteristics of different hard floor surfaces and required cleaning methods for each type.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
- specifications:
  - equipment operating manuals
  - product labels
  - SDS
- physical conditions:
  - suitable work site or venue with hard floor surfaces as listed in the performance evidence
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

## CPPCLO3002 Restore hard floor surfaces

### Modification History

Release	Comment
Release 1	Replaces superseded non-equivalent CPPCLO3002A Restore hard floor surfaces and CPPCLO3003A Replace a hard floor finish. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to assess the type and condition of hard floor surfaces, determine the nature and extent of damage, remove pre-existing floor sealant, and replace it with a new protective coating using selected chemicals and techniques.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Plan and prepare to restore hard floor surface.
  - 1.1. Work instructions are obtained, and *type of hard floor surface* and surface coating are identified.
  - 1.2. Work site *hazards* are assessed and risks controlled according to company, legislative, and *health and safety requirements*.
  - 1.3. Restoration techniques are selected according to company requirements.
  - 1.4. *Equipment* is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.5. Required *cleaning chemicals* are selected and prepared.
  - 1.6. *Personal protective equipment* (PPE) is sourced and used according to manufacturer specifications, and health and safety and company requirements.
  - 1.7. Signs and barricades are selected and installed according to health and safety, and company requirements.
2. Remove existing surface coating from hard floor.
  - 2.1. Furniture and fittings are removed to allow cleaning tasks to be performed.
  - 2.2. Wet and dry embedded soil types are removed and disposed of according to company requirements.
  - 2.3. Existing surface coating is sanded or stripped off hard floor using chemicals and equipment that are selected and prepared according to manufacturer specifications.
  - 2.4. Chemical residue is rinsed off hard floor and liquid waste is disposed of according to manufacturer recommendations and environmental requirements.
3. Seal exposed hard floor surface.
  - 3.1. Exposed floor is checked to be dry and clean of all chemical residue, and loose soil and debris are dry vacuumed.
  - 3.2. Sealant is applied to hard floor surface using correct application techniques and equipment according to manufacturer specifications and health and safety requirements.
  - 3.3. Sealant is allowed to dwell according to manufacturer recommendations.

- |    |  |      |   |
|----|--|------|---|
|    |  | 3.4. | Additional coats of sealant are applied according to manufacturer and client recommendations.   |
| 4. | Tidy work site.  | 4.1. | Furniture and fittings are returned to original position according to job requirements.   |
|    |  | 4.2. | Signs and barricades are removed according to health and safety, and company requirements.  |
| 5. | Clean and safety check equipment, and store equipment and chemicals. | 5.1. | Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements. |
|    |  | 5.2. | Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.                              |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• apply prior knowledge of techniques to strip and seal different hard floor surfaces.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix chemicals required for cleaning tasks using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions of clients and others to confirm work requirements and identify existing hard floor sealant type</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret safety instructions in a range of texts, including:               <ul style="list-style-type: none"> <li>• chemical labels</li> <li>• equipment operating manuals</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report equipment faults.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• develop and work to a sequenced plan of tasks with attention to timelines.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Type of hard floor surface*** must include at least three of the following:

- brick
- concrete
- cork
- granite
- parquetry
- pavers
- quarry tiles
- rubber
- slate
- terrazzo
- timber
- vinyl.

***Hazards*** that must be assessed include:

- biological and environmental contaminants
- chemical exposure via absorption, ingestion and inhalation
- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.

***Health and safety requirements*** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals

- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

**Equipment** must include at least two of the following:

- anti-static dusters
- buckets
- cleaning cloths
- cleaning trolleys
- drop sheets
- dust mops
- flat mops with extension pole
- fringe dusters
- lamb's wool applicators
- sponges
- vacuum cleaners.

**Cleaning chemicals** must include at least one of the following:

- glass cleaners
- solvent cleaners
- surfactants
- water.

**Personal protective equipment** must include at least two of the following:

- eye protection
- gloves
- masks
- safety shoes.

# Assessment Requirements for CPPCLO3002 Restore hard floor surfaces

## Modification History

Release	Comment
Release 1	Replaces superseded non-equivalent CPPCLO3002A Restore hard floor surfaces and CPPCLO3003A Replace a hard floor finish. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also restore:

- three of the following hard floor surfaces:
  - brick
  - concrete
  - cork
  - granite
  - parquetry
  - pavers
  - quarry tiles
  - rubber
  - slate
  - terrazzo
  - vinyl
- two different timber floor surfaces.

In doing the above work, the person must:

- identify site hazards and control risks before commencing the task
- identify type and condition of hard floor surface techniques required for the task
- correctly and safely handle waste, including contaminated materials.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- types and characteristics of different hard floor surfaces and restoration methods for:
  - non-slip
  - porous or non-porous
  - sealed or unsealed
  - smooth or textured
- environmental requirements relating to restoring hard floor surfaces, including:
  - clean-up, containment and isolation procedures
  - emergency chemical spill control measures
  - environmental protection agency requirements relating to restoring hard floor surfaces
  - hazardous materials handling
  - use of low-energy cleaning methods
  - use of low-moisture cleaning methods
  - use of low water-use equipment and water-efficient cleaning methods
  - use of non-chemical cleaning methods
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - obsolete equipment
  - packaging
  - sweeping detritus
  - used containers
  - used or contaminated personal protective equipment (PPE)
  - used or unused chemicals
- range, type and characteristics of timber floor sealants:
  - oil modified products
  - water-based acrylic
  - water-based urethane
- key requirements of legislation and regulations relating to restoring hard floor surfaces, including:
  - chemical controls
  - chemical registers and manifests
  - environmental protection
  - industrial equipment certificates of competency or licences
  - health and safety legislation and regulations
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals

- working according to safety data sheets (SDS)
- types and uses of different scrubbing machine pads:
  - white
  - red
  - green
  - blue
- techniques for identifying type of existing sealant on floors
- techniques for applying sealants to different hard floor types
- types and application of different signs and barricades to be installed prior to cleaning, including:
  - physical barriers and restraints erected to restrict access to site
  - signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including:
    - cleaning in progress
    - hazardous chemicals in use or present in work area
- types, characteristics and application methods of cleaning chemicals and equipment used in restoring hard floor surfaces.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
- specifications:
  - equipment operating manuals
  - product labels
  - SDS
  - safety instructions
- physical conditions:
  - work site or venue with hard floor surfaces as listed in the performance evidence
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## CPPCLO3003 Clean using safe work practices

### Modification History

Release	Comment
Release 1	Replaces superseded non-equivalent CPPCLO2033A Plan for safe and efficient cleaning activities and CPPCMN3003A Contribute to workplace safety arrangements. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to undertake cleaning tasks safely and according to company health and safety policies and procedures and legislative requirements. The unit covers assessing the work environment for hazards and ensuring risks are controlled; checking and maintaining equipment and materials, including storing and handling hazardous chemicals; safely handling equipment; and following required processes in the event of a health and safety incident in the workplace.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |   |  |
|---|--|
| 1. Plan and prepare to work.                    | 1.1. Work instructions, including client and environmental requirements, are obtained, confirmed, and applied to planning.   |
|   | 1.2. Work site and nature of cleaning task are assessed for <b>hazards</b> , and risks are controlled according to company, legislative, and <b>health and safety requirements</b> .   |
|   | 1.3. Cleaning tasks to be conducted at heights are identified and required <b>access equipment</b> is identified, obtained and prepared.   |
|   | 1.4. Cleaning equipment, including required <b>personal protective equipment</b> (PPE), is selected according to job requirements and checked for serviceability, and faults are rectified or reported prior to starting work. |
|   | 1.5. Cleaning products to be used are selected, diluted, and dispensed or prepared according to manufacturer specifications, and company and health and safety requirements.   |
|   | 1.6. Pre-existing damage to cleaning site is identified and reported according to client and company requirements.   |
|   | 1.7. <b>Signs and barricades</b> are selected and installed according to cleaning task and work site.  |
| 2. Apply safe work practices to cleaning tasks. | 2.1. Cleaning products and equipment are brought into position with cleaning trolley or other suitable form of transport, using safe work practices.   |
|   | 2.2. Techniques to prevent trips, falls, and repetitive sprains and strains are identified and implemented.  |
|   | 2.3. Cleaning tasks conducted at heights are undertaken using access equipment prepared and placed for the task.   |
|   | 2.4. Cleaning tasks undertaken in enclosed spaces are conducted using safe work practices that prevent chemical exposure.  |

- |    |   |  |
|----|---|--|
|    | 2.5.  | Cleaning tasks undertaken while working in the vicinity of building occupants are conducted using safe work practices.   |
| 3. | Participate in workplace health and safety initiatives. | <p>3.1. Health and safety training and coaching programs are undertaken as required.</p> <p>3.2. Incidents or accidents are reported and recorded according to company requirements.</p> <p>3.3. Suggestions to improve workplace health and safety conditions are submitted to required personnel.</p> <p>3.4. Workplace health and safety initiatives are implemented as required and in line with own role and responsibilities.</p>                                |
| 4. | Finalise cleaning tasks.                                | <p>4.1. Soil and waste collected from site are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.</p> <p>4.2. Equipment, including PPE and chemical products, are returned to cleaning storage area and stored according to legislative requirements.</p> <p>4.3. Quantity and condition of PPE are assessed and need for replacements is reported according to company requirements.</p> |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix chemicals required for cleaning tasks using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret simple, structured manufacturer instructions when using equipment and preparing chemicals</li> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> </ul> </li> </ul>

- product labels
  - product information sheets or posters
  - safety data sheets (SDS)
  - company risk assessment procedures.
- Writing skills to:
- document and report faults in equipment to manufacturer and other personnel.
- Planning and organising skills to:
- manage own time, prioritise work and schedule tasks.
- Teamwork skills to:
- work in pairs when using ladders
  - work safely and collaboratively with others.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Hazards*** that must be assessed include:
- biological and environmental contaminants
  - chemical exposure via absorption, ingestion and inhalation
  - chemical reactivity
  - dust and fibre particulates
  - electrical
  - environmental allergens
  - explosions
  - fatigue
  - fire
  - ground stability for access equipment
  - manual handling
  - noise
  - poor ventilation
  - slips, trips and falls
  - syringes and sharps
  - working in confined spaces.
- Health and safety requirements*** must include:
- access to communication devices when working alone
  - compliance with Safe Work Australia regulations and guidelines
  - electrical equipment test and tag compliance
  - emergency response procedures
  - environmental controls
  - hazard signs and barricades

- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

***Access equipment***  
must include at least one of the following:

- elevated work platform
- ladder
- scaffolding
- stepladder.

***Personal protective equipment*** must include at least two of the following:

- eye protection
- gloves
- masks
- safety shoes.

***Signs and barricades***  
must include at least one of the following:

- physical barriers and restraints erected to restrict access to site
- signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including:
  - cleaning in progress
  - hazardous chemicals in use or present in work area.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO3003 Clean using safe work practices

## Modification History

Release	Comment
Release 1	Replaces superseded non-equivalent CPPCLO2033A Plan for safe and efficient cleaning activities and CPPCMN3003A Contribute to workplace safety arrangements. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also safely perform three different cleaning tasks in a commercial or residential cleaning site, in which each task must involve:

- transporting equipment and cleaning products to the area to be cleaned
- completing cleaning tasks according to client and company requirements using cleaning equipment and products selected and prepared according to job requirements
- returning equipment and materials to cleaning storage area.

In doing the above work, the person must:

- identify site hazards and control risks before commencing the task
- use safe and efficient cleaning methods
- correctly and safely handle waste, including contaminated materials.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- company policies and procedures for applying work health and safety (WHS) practices while cleaning, including:
  - assessing and reporting hazards in the workplace

- incident reporting
- selecting and using personal protective equipment (PPE) required for the cleaning task
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS)
- key requirements of legislation, regulations and codes of practice relating to cleaning safely at heights
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - obsolete equipment
  - packaging
  - used containers
  - used or contaminated PPE
  - used or unused chemicals.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - access equipment
  - PPE as listed in the range of conditions
- materials:
  - cleaning products required for the task
- specifications:
  - company policies and procedures for applying WHS practices
  - equipment operating manuals
  - product labels
  - SDS
  - safety instructions
- physical conditions:
  - commercial or residential work sites
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

## **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## CPPCLO3004 Maintain carpeted floors

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2004A Maintain carpeted floors. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to maintain carpeted floors using a range of methods, including hand collecting waste, sweeping, using a dustpan and brush, using low-water cleaning methods, and vacuuming. It covers assessing the extent of the cleaning task, and selecting the required equipment, chemicals and methods to perform the task safely and efficiently.

The unit supports cleaners who work alone or in teams. It applies to both manual and mechanical methods of maintaining carpeted floors in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Plan and prepare to maintain carpets.
  - 1.1. Type and condition of carpet to be cleaned are assessed, fibre and construction method are identified, job requirements are reviewed, and issues are clarified.
  - 1.2. Work site *hazards* are assessed and risks are controlled according to company, legislative, and *health and safety requirements*.
  - 1.3. Required cleaning methods and carpet cleaning products are selected, and products are prepared according to job requirements.
  - 1.4. *Equipment* is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.5. *Personal protective equipment* (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
  - 1.6. Tasks are sequenced to ensure maximum efficiency for completing cleaning requirements.
  - 1.7. Signs and barricades are selected and installed according to health and safety, and company requirements.
  - 1.8. Pre-existing damage is identified and reported according to company requirements.
2. Clean carpet.
  - 2.1. Furniture and fittings are removed to allow cleaning tasks to be performed.
  - 2.2. Large items of waste are collected using selected equipment, and are transferred to waste receptacle according to health and safety requirements.
  - 2.3. Carpeted floor is *vacuumed* using required equipment, *accessories*, chemicals and techniques according to manufacturer specifications, and health and safety, and company requirements.
  - 2.4. Need for spot cleaning and stain removal is identified and documented according to company requirements.

3. Tidy work site.
  - 3.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
  - 3.2. Furniture and fittings are returned to original position according to client requests, and health and safety requirements.
  - 3.3. Signs and barricades are removed according to health and safety, and company requirements.
4. Clean and safety check equipment, and store equipment and chemicals.
  - 4.1. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements.
  - 4.2. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Performance feature

#### Skill

- Numeracy skills to:
- dilute and mix required chemicals using whole numbers and routine fractions.
- Oral communication skills to:
- ask questions to clarify job requirements.
- Reading skills to:
- interpret directions and safety instructions, including:
    - equipment operating manuals
    - product labels
    - safety data sheets (SDS).
- Writing skills to:
- report faults in equipment to manufacturer and other personnel.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Hazards*** that must be assessed include:

- biological and environmental contaminants
- chemical exposure via absorption, ingestion and inhalation
- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.

***Health and safety requirements*** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

- Equipment** must include at least three of the following:
- accumulation bags
  - brooms, such as deck fibre or millet
  - carpet rakes
  - dustpan and broom
  - hoses and filters
  - microfibre products.
- Personal protective equipment** must include at least two of the following:
- gloves
  - eye protection
  - protective clothing
  - respirators
  - safety shoes
  - tongs.
- Vacuuming** equipment must include at least one of the following:
- back-mounted unit
  - ducted system
  - floor-based mobile system
  - mechanical push sweeper
  - wet and dry system.
- Accessories** must include at least two of the following:
- brush
  - crevice tool
  - floor head
  - power head
  - upholstery head
  - variable pile height and adjustable head.

## Unit Mapping Information

CPPCLO2004A Maintain carpeted floors

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO3004 Maintain carpeted floors

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2004A Maintain carpeted floors. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also maintain two different carpets where:

- one carpet type must be a natural fibre selected from:
  - organic (plant) fibres, such as cotton and sisal
  - wool
- one carpet type must be a synthetic fibre selected from:
  - acrylic
  - nylon
  - polyester
  - polypropylene.

In doing the above work, the person must:

- identify site hazards and control risks before commencing the task
- correctly identify the type and characteristics of the carpet and carpet fibres
- select and prepare cleaning equipment and chemicals required for carpet type
- select and apply carpet maintenance method suited to carpet type.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- carpet characteristics, including:

- methods of carpet construction
- types and features of fibres
- environmental requirements relating to use of chemicals when maintaining carpeted floors, including:
  - clean-up, containment and isolation procedures
  - emergency chemical spill control measures
  - environmental protection agency requirements relating to maintaining carpeted floors
  - hazardous materials handling
  - use of low-energy cleaning methods
  - use of low-moisture cleaning methods
  - use of low water-use equipment and water-efficient cleaning methods
  - use of non-chemical cleaning methods
- range and characteristics of cleaning chemicals and equipment and their applications for carpet maintenance
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to maintaining carpeted floors, including:
  - AS/NZS 3733 Textile floor coverings – Cleaning maintenance of residential and commercial carpeting
  - industry advisory standards and codes, such as dangerous goods codes
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - disposable vacuum liner bags
  - litter
  - obsolete equipment
  - used containers
  - used or contaminated personal protective equipment (PPE)
  - used or unused chemicals
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - vacuuming equipment and accessories as listed in the range of conditions
  - PPE as listed in the range of conditions
- specifications:

- AS/NZS 3733 Textile floor coverings – Cleaning maintenance of residential and commercial carpeting
- equipment operating manuals
- product labels
- SDS
- safety instructions on equipment
- physical conditions:
  - suitable work site or venue with carpeted floors
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPCLO3005 Confirm and apply privacy and security requirements for cleaning work

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to confirm and apply personal and property security procedures when cleaning a work site, and to maintain client privacy. It also involves obtaining and securing property access information and equipment, and confirming and applying procedures when security risks are evident. It covers establishing which areas of the work site are not to be accessed, and maintaining privacy of information obtained in the course of providing cleaning services.

The unit supports the work of cleaners commencing at a new work site. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Confirm site access and security procedures.
  - 1.1. Client details, including address, are confirmed according to company requirements.
  - 1.2. Cleaning *work site access* and *security arrangements* are clarified.
  - 1.3. Areas of work site not to be accessed or cleaned are identified and clarified with client.
  - 1.4. New client is provided with details of company policy relating to maintaining privacy of client information.
2. Confirm personal or property security procedures.
  - 2.1. Client preferences and workplace procedures to be followed in the case of personal risk or incidents, and reporting requirements, are confirmed.
  - 2.2. Client and workplace procedures to be followed in the case of a breach of security are confirmed.
3. Implement privacy and security procedures.
  - 3.1. Client work site is accessed on arrival and secured on leaving the site, according to agreed procedures.
  - 3.2. Security systems are deactivated and reactivated according to agreed procedures.
  - 3.3. Internal areas of work site to be cleaned are accessed and secured according to agreed procedures and restricted areas are not entered.
  - 3.4. Confidentiality of client personal or commercial information is maintained according to privacy requirements, and not disclosed unless essential for incident reporting.
4. Implement security risk or breach procedures.
  - 4.1. Work site is assessed for signs of security risk or breach during site access and cleaning, and agreed procedures and reporting requirements are followed as required.
  - 4.2. Risks to personal security are assessed and workplace procedures and reporting requirements are followed as required.
  - 4.3. Incidents involving personal security are reported immediately and workplace procedures are followed.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Performance feature

#### Skill

- |                               |  |
|-------------------------------|--|
| Learning skills to:           | <ul style="list-style-type: none"> <li>• respond to feedback from client and supervisor following completion of security procedures and when applying privacy requirements.</li> </ul>             |
| Numeracy skills to:           | <ul style="list-style-type: none"> <li>• recognise and apply numbering to activate and deactivate security systems</li> <li>• determine site location and specific rooms on site plans.</li> </ul> |
| Oral communication skills to: | <ul style="list-style-type: none"> <li>• ask questions to clarify procedures</li> <li>• obtain and provide information from client relating to privacy and security requirements.</li> </ul>       |
| Reading skills to:            | <ul style="list-style-type: none"> <li>• interpret company policy documentation relating to privacy and confidentiality.</li> </ul>  |
| Writing skills to:            | <ul style="list-style-type: none"> <li>• legibly complete required documentation following a security breach or incident.</li> </ul>   |
| Technology skills:            | <ul style="list-style-type: none"> <li>• operate electronic devices for communication purposes or for accessing or securing a cleaning site.</li> </ul>  |

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- |  |  |
|--|--|
| <b><i>Work site access</i></b> must include at least one of the following: | <ul style="list-style-type: none"> <li>• electronic codes</li> <li>• keys</li> <li>• security cards.</li> </ul>  |
| <b><i>Security arrangements</i></b> must include:                          | <ul style="list-style-type: none"> <li>• processes for locking and unlocking doors</li> <li>• location of internal door keys if applicable</li> <li>• alarm deactivation and reactivation procedures.</li> </ul> |

## Unit Mapping Information

# Assessment Requirements for CPPCLO3005 Confirm and apply privacy and security requirements for cleaning work

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also confirm and apply privacy and security procedures for two different work sites to be applied when cleaning.

In doing the above work, the person must:

- implement agreed procedures for accessing and securing the work site
- assess work site for signs of security risks or breaches
- implement agreed procedures for responding to and reporting security risks and breaches.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- processes for obtaining and confirming client details
- procedures for using access passes and keys for different client sites
- company policy or code of conduct in relation to privacy and confidentiality of client information
- workplace procedures, including reporting requirements for:
  - security risks and breaches
  - personal security risks and incidents.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:

- access requirements as listed in the range of conditions
- contingencies:
  - risks to personal safety
- specifications:
  - alarm activation and deactivation procedures
  - company privacy and confidentiality policy
  - procedures for handling risks to personal or property security
  - reporting requirements and documentation in the event of security incidents
- physical conditions:
  - commercial or residential cleaning work sites
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

## CPPCLO3006 Clean carpets

### Modification History

Release	Comment
Release 1	Replaces superseded non-equivalent CPPCCL2001A Use hot water extraction, CPPCCL2002A Use bonnet cleaning, CPPCCL2003A, Use dry foam shampoo, CPPCCL2004A Use dry absorbent compound and CPPCCL2005A Use wet foam shampoo. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to clean carpets using selected processes, chemicals and equipment. Cleaning carpets is undertaken in addition to daily maintenance of carpets to provide a thorough and deep clean of the carpet fibres. The selection of equipment, chemicals and methods suited to the task is essential for performing the work safely and efficiently.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

- essential outcomes. text is used, further information is detailed in the range of conditions.
1. Plan and prepare to clean carpets.
    - 1.1. **Type of carpet fibre** and carpet construction are assessed, job requirements are reviewed, and issues are clarified.
    - 1.2. Work site **hazards** are identified and risks controlled according to company, legislative, and **health and safety requirements**.
    - 1.3. Required carpet cleaning process is determined according to type of carpet and job requirements.
    - 1.4. **Equipment** is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
    - 1.5. Required **cleaning chemicals** are selected and prepared.
    - 1.6. **Personal protective equipment (PPE)** is sourced according to manufacturer specifications, and health and safety and company requirements.
    - 1.7. Signs and barricades are selected and installed according to health and safety, and company requirements.
    - 1.8. Pre-existing stains or damage are identified and reported according to company requirements.
    - 1.9. Tasks are sequenced to ensure maximum efficiency for completing cleaning requirements.
  2. Undertake cleaning process.
    - 2.1. Furniture and fittings are removed to allow cleaning tasks to be performed.
    - 2.2. Carpet is **cleaned** according to manufacturer specifications, and legislative, health and safety, and company requirements.
    - 2.3. Cleaned carpet area is compared with surrounding carpet surface, and need for further cleaning action is identified and carried out according to job and company requirements.
    - 2.4. Results are reported according to company requirements.

- |    |  |      |   |
|----|--|------|---|
| 3. | Tidy work site.  | 3.1. | Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.      |
|    |  | 3.2. | Furniture and fittings are returned to original position according to client requirements.  |
|    |  | 3.3. | Signs and barricades are removed according to health and safety, and company requirements.  |
| 4. | Clean and safety check equipment, and store equipment and chemicals. | 4.1. | Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements. |
|    |  | 4.2. | Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.                              |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix required chemicals using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret simple, structured manufacturer instructions when using equipment and preparing chemicals</li> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>• work collaboratively with others when accessing and cleaning carpets.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Type of carpet fibre*** must include:

- natural:
  - organic (plant) fibres, such as cotton and sisal
  - wool
- synthetic:
  - acrylic
  - nylon
  - polyester.

***Hazards*** that must be assessed include:

- biological and environmental contaminants
- chemical exposure via absorption, ingestion and inhalation
- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.

***Health and safety requirements*** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing and handling chemicals while undertaking work tasks
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control

- job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
  - SDS
  - selection and use of required PPE
  - storage and maintenance of equipment according to manufacturer specifications
  - use of first aid according to SDS information.
- Equipment** must include at least two of the following:
- carpet-cleaning bonnets and hand bonnets
  - carpet-drying equipment
  - cleaning cloths
  - extraction unit
  - garbage bin
  - measuring equipment
  - plastic coaster or polystyrene block
  - rotary or cylindrical scrubbing machine
  - scraper or spatula
  - sponge
  - spray equipment
  - steam iron
  - trigger sprayer
  - vacuum cleaner
  - waste recovery tank.
- Cleaning chemicals** must include at least one of the following:
- acid cleaners
  - alkaline cleaners
  - neutral cleaners
  - protein spotter
  - solvent cleaners.
- Personal protective equipment** must include at least two of the following:
- disposable respirators
  - eye protection
  - gloves
  - safety shoes.
- Cleaned** must include:
- selecting and using required:
    - equipment
    - PPE
    - chemicals
    - cleaning techniques.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

## Assessment Requirements for CPPCLO3006 Clean carpets

### Modification History

Release	Comment
Release 1	Replaces superseded non-equivalent CPPCCL2001A Use hot water extraction, CPPCCL2002A Use bonnet cleaning, CPPCCL2003A, Use dry foam shampoo, CPPCCL2004A Use dry absorbent compound and CPPCCL2005A Use wet foam shampoo. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Performance Evidence

### Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also clean two different carpet types where:

- one carpet type must be a natural fibre selected from:
  - organic (plant) fibres, such as cotton and sisal
  - wool
- one carpet type must be a synthetic fibre selected from:
  - acrylic
  - nylon
  - polyester.

In cleaning the above carpets, the person must:

- identify site hazards and control risks before commencing the task
- correctly identify the type and characteristics of the carpet and carpet fibres
- identify cleaning techniques and chemicals required for the task
- use the following cleaning methods:
  - bonnet cleaning
  - hot water extraction
- use cleaning equipment safely

- check carpet after cleaning process and assess whether further cleaning is required
- correctly and safely handle waste.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- carpet characteristics, including:
  - carpet construction
  - features of fibres
- range and application of cleaning equipment and chemicals, including:
  - encapsulation
  - low environmental impact chemicals
  - low-moisture use equipment
- correct application and techniques for different cleaning methods, including:
  - dry absorbent compound
  - bonnet cleaning
  - hot water extraction
  - dry foam shampoo
  - wet foam shampoo
- environmental requirements relating to removing stains from carpets, including:
  - clean-up, containment and isolation procedures
  - emergency chemical spill control measures
  - environmental protection agency requirements relating to using and disposing of carpet cleaning chemicals
  - hazardous materials handling
  - use of low-energy carpet-cleaning methods
  - use of low-moisture carpet-cleaning methods
  - use of low water-use equipment and other water-efficient cleaning methods
  - use of non-chemical carpet-cleaning methods
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to carpet cleaning, including:
  - Australian standards AS/NZS 3733 Textile floor coverings – Cleaning maintenance of residential and commercial carpeting
  - industry advisory standards and codes, such as dangerous goods codes
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - litter
  - machine exhaust emissions
  - obsolete equipment
  - used containers
  - used or contaminated personal protective equipment (PPE)

- used or unused chemicals
- range and application of cleaning solutions used to clean carpets and their reactions with different carpet types
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
- specifications:
  - AS/NZS 3733 Textile floor coverings – Cleaning maintenance of residential and commercial carpeting
  - equipment operating manuals
  - product labels
  - SDS
- contingencies:
  - carpet cleaning action is repeated when carpet has not cleaned sufficiently first time
- physical conditions:
  - suitable work site or venue with carpet types listed in the performance evidence
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team
- relationship with client:
  - communication with the client is required.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

## CPPCLO3007 Remove carpet stains

### Modification History

Release	Comment
Release 1	Replaces superseded non-equivalent CPPCCL2007A Perform basic stain removal. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to identify the nature of carpet stains and remove the stains using selected stain removal techniques, chemicals and equipment. The selection of required equipment, chemicals and methods is essential for performing the task safely and efficiently.

The unit supports carpet cleaners who work alone or in teams. It applies in a range of commercial and residential work sites. Removing stains can occur as a separate task or in conjunction with other cleaning tasks, such as daily vacuuming, extraction and general carpet cleaning.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Plan and prepare to remove stain.
  - 1.1. **Type of carpet fibre** and construction are assessed, job requirements reviewed, and issues clarified as required.
  - 1.2. Work site **hazards** are assessed and risks controlled according to company, legislative, and **health and safety requirements**.
  - 1.3. **Stain type** is identified through observation or by discussing and clarifying with client, and previous treatments or removal techniques that have been applied are confirmed.
  - 1.4. Required stain removal process is determined according to carpet type and cause of stain, client is advised of likelihood of treatment success, and client approval to proceed with stain removal process is obtained before commencing work.
  - 1.5. **Equipment** is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.6. Required **cleaning chemicals** are selected and prepared.
  - 1.7. **Personal protective equipment** (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
  - 1.8. Signs and barricades are selected and installed according to health and safety, and company requirements.
  - 1.9. Pre-existing damage is identified and reported according to company requirements.
  - 1.10. Tasks are sequenced to ensure maximum efficiency for completing cleaning requirements.
2. Treat carpet stain.
  - 2.1. Furniture and fittings are removed to allow cleaning tasks to be performed.
  - 2.2. Physical remnants of stain are removed as much as possible using technique suited to cause of stain.
  - 2.3. Required cleaning chemical is applied and allowed to dwell according to manufacturer specifications.
  - 2.4. Carpet is inspected for evidence of previously used chemicals that may impede the cleaning process and all

- chemicals are removed using water treatment before reapplying chemical.
- 2.5. Treated area is agitated using required equipment and inspected to check that stain removal technique and process are working.
  - 2.6. Cleaning process is continued until stain is completely removed or until agreed job requirements have been met.
3. Finalise stain removal.
    - 3.1. Chemical residue is extracted using required extraction equipment and techniques.
    - 3.2. Treated carpet is checked for pH levels and neutraliser is applied if required.
    - 3.3. Treated area is dried or left to dry according to company and job requirements.
    - 3.4. Soil is removed and carpet is *cleaned* according to manufacturer specifications, and legislative, health and safety, and company requirements.
    - 3.5. Treated area is compared with surrounding surface area to determine need for further action according to job and company requirements.
    - 3.6. Results are reported according to company requirements.
  4. Tidy work site.
    - 4.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
    - 4.2. Furniture and fittings are returned to original position according to client requirements.
    - 4.3. Signs and barricades are removed according to health and safety, and company requirements.
  5. Clean and safety check equipment, and store equipment and chemicals.
    - 5.1. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements.
    - 5.2. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Numeracy skills to:	<ul style="list-style-type: none"><li>dilute and mix required chemicals using whole numbers and routine fractions.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>ask questions to clarify job requirements</li><li>respond clearly and concisely to client questions.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>interpret simple, structured manufacturer instructions when using equipment and preparing chemicals</li><li>interpret directions and safety instructions, including:<ul style="list-style-type: none"><li>equipment operating manuals</li><li>product labels</li><li>safety data sheets (SDS).</li></ul></li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>document and report faults in equipment to manufacturer and other personnel.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>work collaboratively with others when accessing and cleaning carpets.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Type of carpet fibre</i></b> must include:	<ul style="list-style-type: none"><li>natural:<ul style="list-style-type: none"><li>organic (plant) fibres, such as cotton and sisal</li><li>wool</li></ul></li><li>synthetic:<ul style="list-style-type: none"><li>acrylic</li><li>nylon</li><li>polyester</li><li>polypropylene.</li></ul></li></ul>
<b><i>Hazards</i></b> that must be assessed include:	<ul style="list-style-type: none"><li>biological and environmental contaminants</li><li>chemical exposure via absorption, ingestion and inhalation</li><li>chemical reactivity</li><li>dust and fibre particulates</li><li>electrical</li></ul>

***Health and safety requirements*** must include:

- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.
- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing and handling chemicals while undertaking work tasks
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.
- beverage
- candle wax
- chewing gum
- food
- grease
- heavy dirt build-up
- lipstick
- nail polish
- oil
- shoe polish

***Stain types*** must include at least three of the following:

- Equipment** must include at least two of the following:
- tar.
  - air mover
  - carpet groomer
  - cleaning cloths
  - extraction unit
  - measuring equipment
  - pH stick
  - scraper or spatula
  - sponge
  - spray equipment
  - steam iron
  - waste disposal container.
- Cleaning chemicals** must include:
- acid cleaners
  - alkaline cleaners
  - neutral cleaners
  - solvent cleaners
  - protein spotter.
- Personal protective equipment** must include at least two of the following:
- gloves
  - disposable respirators
  - eye protection
  - gloves
  - protective clothing
  - safety shoes.
- Cleaned** must include:
- selecting and using required:
    - equipment
    - PPE
    - chemicals
    - cleaning techniques.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

## Assessment Requirements for CPPCLO3007 Remove carpet stains

### Modification History

Release	Comment
Release 1	Replaces superseded non-equivalent CPPCCL2007A Perform basic stain removal. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also remove three different stains from each of the following types of carpet:

- one natural fibre carpet, selected from:
  - organic (plant) fibres, such as cotton and sisal
  - wool
- one synthetic fibre carpet, selected from:
  - acrylic
  - nylon
  - polyester.

Stain types to be removed during above work, must include three of the following:

- beverage
- candle wax
- chewing gum
- food
- grease
- heavy dirt build-up
- hospital waste
- industrial and chemical waste
- lipstick
- nail polish
- oil

- plant stains
- shoe polish
- tar.

In doing the above work, the person must:

- identify site hazards and control risks before commencing the task
- identify type and characteristics of each carpet and its carpet fibres
- identify type of stain and cleaning techniques, cleaning equipment and chemicals required for the task
- correctly and safely handle waste.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- carpet characteristics, including:
  - carpet construction
  - features of fibres
- characteristics of different carpet stains and process for cleaning them according to type, duration of stain, and whether previous treatments and chemicals have been applied
- range and application of cleaning equipment and chemicals required to remove carpet stains
- environmental requirements relating to removing stains from carpets, including:
  - clean-up, containment and isolation procedures
  - emergency chemical spill control measures
  - environmental protection agency requirements relating to using and disposing of carpet cleaning chemicals
  - hazardous materials handling
  - use of low-energy carpet-cleaning methods
  - use of low-moisture carpet-cleaning methods
  - use of low water-use equipment and other water-efficient cleaning methods
  - use of non-chemical carpet-cleaning methods
- regulations, codes of practice and industry advisory standards relating to carpet cleaning, including AS/NZS 3733 Textile floor coverings – Cleaning maintenance of residential and commercial carpeting
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - litter
  - machine exhaust emissions
  - obsolete equipment
  - used containers
  - used or contaminated personal protective equipment (PPE)

- used or unused chemicals
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
- specifications:
  - AS/NZS 3733 Textile floor coverings – Cleaning maintenance of residential and commercial carpeting
  - equipment operating manuals
  - product labels
  - SDS
- physical conditions:
  - suitable work site or venue with carpet stains as listed in the performance evidence
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team
- relationship with client:
  - communication with the client is required to confirm details of the carpet stain and for approval to proceed.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

## CPPCLO3008 Mitigate carpet water damage

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCCL3008A Mitigate water damage. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to mitigate water damage to residential or commercial carpets by stopping the inflow of water, extracting water and drying out the carpet, and making the site safe before carpets are restored or replaced. It requires assessing the category of water ingress and selecting equipment and methods to perform tasks safely and efficiently.

The unit supports carpet cleaners who work alone or in teams. It applies in a range of commercial and residential work sites, and to water ingress caused by an overflow of water from bathrooms and laundries, toilet backflows, overflowing gutters, roof leaks, and rising external waters.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Plan and prepare to mitigate water damage.
  - 1.1. Area of water damage is assessed, *category* and extent of water damage are determined, and issues are clarified.
  - 1.2. Work site *hazards* are assessed and risks controlled according to company, legislative, and *health and safety requirements*.
  - 1.3. Suitable water extraction method is determined and technique for pumping extracted water is identified and confirmed.
  - 1.4. *Equipment* is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.5. *Personal protective equipment* (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
  - 1.6. Tasks are sequenced to ensure maximum efficiency for completion.
  - 1.7. Signs and barricades are selected and installed according to health and safety, and company requirements.
2. Undertake water mitigation processes.
  - 2.1. Furniture and fittings are moved or removed according to job, health and safety, and company requirements.
  - 2.2. Water source is eliminated or contained according to health and safety and company requirements.
  - 2.3. Excess water is extracted and disposed of safely using required equipment and according to health and safety and company requirements.
  - 2.4. In-structure drying equipment is activated as required and drying progress is monitored according to company requirements.
  - 2.5. Work area is treated with antimicrobial chemicals as required.
  - 2.6. Options for carpet restoration or replacement are identified and discussed with client.
3. Secure work site.
  - 3.1. Furniture and fittings are returned to original position according to client requests, and health and safety requirements.

- 3.2. Site is assessed as safe for access, and level of access allowed is communicated to client and required personnel.
- 3.3. Signs and barricades are removed according to health and safety, and company requirements.
4. Clean and safety check equipment, and store equipment and chemicals.
  - 4.1. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements.
  - 4.2. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix required chemicals using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• communicate clearly and concisely with clients when explaining processes and expected outcomes</li> <li>• request advice or further information</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are

included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Category*** must include at least two of the following types of water:

- contaminated water:
  - black
  - grey
- non-contaminated water:
  - clean.

***Hazards*** that must be assessed include:

- biological and environmental contaminants
- chemical exposure via absorption, ingestion and inhalation
- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.

***Health and safety requirements*** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications

- Equipment* must include:
- use of first aid according to SDS information.
  - air filtration device
  - carpet-drying equipment
  - dehumidification equipment
  - extraction tools and units
  - moisture detection tools.
- Personal protective equipment* must include at least two of the following:
- gloves
  - eye protection
  - protective clothing
  - respirators
  - safety shoes
  - wet-work clothing.

## Unit Mapping Information

CPPCCL3008A Mitigate water damage

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

## Assessment Requirements for CPPCLO3008 Mitigate carpet water damage

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCCL3008A Mitigate water damage. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also mitigate water damage at two different sites where one site contains black or grey water and one contains clean water.

In doing the above work, the person must:

- identify site hazards and control risks before commencing the task
- correctly classify the category of water damage as being:
  - clean water
  - black water
  - grey water
- identify source of water damage and prevent further damage
- select and use cleaning equipment, including personal protective equipment (PPE), required for the task
- identify and implement water mitigation methods suited to each task
- comply with company, health and safety, environmental and legislative requirements.

### Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- environmental requirements relating to mitigating water damage, including:
  - clean-up, containment and isolation procedures
  - emergency chemical spill control measures

- environmental protection agency requirements relating to mitigating carpet water damage
- hazardous materials handling
- carpet characteristics, including:
  - carpet construction
  - features of fibres
  - sub-flooring structures
  - underlay types
- correct techniques for extracting water and drying carpets
- key requirements of legislation, regulations, codes of practice and standards relating to mitigating water damage to carpets, including IICRC S500 Water Damage Restoration
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS)
- types, characteristics and processes to identify different water categories:
  - clean
  - black
  - grey.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- specifications:
  - equipment operating manuals
  - IICRC S500 Water Damage Restoration
  - product labels
  - SDS
  - safety instructions
- physical conditions:
  - work site or venue with water ingress
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team
- relationship with client:
  - verbal and written communication with the client to clarify job requirements and communicate plans and costs.

Timeframe:

- as specified by the task.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

## CPPCLO3009 Clean glass surfaces

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2009A Clean glass surfaces. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'.

### Application

This unit of competency specifies the outcomes required to clean glass surfaces, including mirrors, doors and windows, from the ground using extension poles to aid access if required. The unit covers assessing the extent of the cleaning task and selecting required equipment, chemicals and methods. All work is conducted according to job, health and safety, and company requirements.

The unit supports cleaners who work alone or in teams. It applies to ordinary or frosted glass or mirrors as well as to textured glass surfaces in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Plan and prepare to clean glass surfaces.
  - 1.1. Glass surfaces to be cleaned are assessed for extent of cleaning required and issues are clarified.
  - 1.2. Work site *hazards* are assessed and risks controlled according to company, legislative, and *health and safety requirements*.
  - 1.3. Surface soil is inspected and identified as organic or inorganic and required *cleaning techniques* are confirmed.
  - 1.4. Glass surface is inspected for pre-existing damage and defects are reported according to company requirements.
  - 1.5. *Equipment* is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.6. *Cleaning chemicals* are selected and prepared according to manufacturer specifications, and health and safety and company requirements.
  - 1.7. *Personal protective equipment* (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
  - 1.8. Signs and barricades are selected and installed according to health and safety, and company requirements.
2. Clean glass.
  - 2.1. Existing soil is carefully scraped from glass surface as required, using required equipment.
  - 2.2. Spot cleaning techniques are used according to specified requirements.
  - 2.3. Glass surface is washed and squeegeed according to specified requirements.
  - 2.4. Window edges and sills are wiped to remove soil and waste.
  - 2.5. Glass surface, surrounding areas and floor are checked to be free of chemicals, water and soil.
3. Tidy work site.
  - 3.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.

- |    |  |      |   |
|----|--|------|---|
| 4. | Clean and safety check equipment, and store equipment and chemicals. | 3.2. | Signs and barricades are removed according to health and safety, and company requirements.  |
|    |  | 4.1. | Equipment and PPE are cleaned, safety checked, and stored according to manufacturer specifications, and environmental, health and safety, and company requirements. |
|    |  | 4.2. | Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.                                |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix chemicals required for cleaning tasks using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements</li> <li>• respond clearly and concisely to client questions</li> <li>• report faults or damage.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret simple, structured manufacturer instructions when using equipment and preparing chemicals</li> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Hazards*** that must be
- biological and environmental contaminants
  - chemical exposure via absorption, ingestion and inhalation

assessed include:

- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.

***Health and safety requirements*** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

***Cleaning techniques*** must include:

- pre-spraying
- scraping
- spot cleaning
- squeegeeing
- wiping.

***Equipment*** must include a squeegee and at least two of the

- bucket
- chamois
- cobwebber

- following:
- extension pole
  - glass scraper
  - hose
  - lamb's wool applicator
  - lint-free cloths
  - microfibre products.

- Cleaning chemicals*** must include at least one of the following:
- glass cleaners
  - solvent cleaners
  - surfactants.

- Personal protective equipment*** must include at least two of the following:
- eye protection
  - gloves
  - masks
  - safety shoes
  - sun protection.

## Unit Mapping Information

CPPCLO2009A Clean glass surfaces

## Links

Companion Volume implementation guides are found in VETNet -

## Assessment Requirements for CPPCLO3009 Clean glass surfaces

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2009A Clean glass surfaces. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'.

### Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also clean three different glass surfaces, including:

- one ordinary glass (including mirror) or frosted glass surface measuring at least 1.5 metres in height or length, in which the work must involve:
  - selecting and using required cleaning equipment, including a squeegee
  - spot cleaning the glass
  - removing smears and drips from the glass and surrounding surfaces and floor
- one textured glass surface, in which the work must involve:
  - selecting and using required cleaning equipment
  - spot cleaning the glass
  - conducting full clean of the glass to remove all soil
  - removing smears and drips from the glass and surrounding surfaces and floor
- one ordinary frosted or textured glass surface, in which the work must involve:
  - removing three different inorganic soils from the glass surface using required cleaning techniques, one of which must require use of the scraping technique
  - selecting and using required cleaning equipment.

In doing the above work, the person must:

- identify and plan for work site hazards
- identify types and characteristics of glass surfaces and select cleaning equipment and chemicals required for the task
- use safe and efficient cleaning techniques
- correctly and safely handle waste, including contaminated materials.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- types of glass surfaces, their characteristics and required cleaning methods
- types and characteristics of organic and inorganic soils and required cleaning chemicals, equipment and methods of treatment
- application methods for cleaning glass using microfibre products, including using:
  - cloth and water in spray bottle to spot clean low-level stains
  - damp mops and cloths for surface cleaning and finishing
  - dry mopping techniques
- environmental requirements relating to cleaning glass surfaces, including:
  - clean-up, containment and isolation procedures
  - emergency chemical spill control measures
  - environmental protection agency requirements relating to cleaning glass surfaces
  - hazardous materials handling
  - use of low-energy cleaning methods
  - use of low-moisture cleaning methods
  - use of low water-use equipment and water-efficient cleaning methods
  - use of non-chemical cleaning methods
- methods for cleaning and maintaining cloths, including:
  - air drying for optimal performance
  - avoiding fabric softeners
  - regular hand or machine washing in hot soapy water
  - removing stains with hot water and washing liquid
  - washing products on their own to avoid static transfer of lint
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - obsolete equipment
  - packaging
  - used containers
  - used or contaminated personal protective equipment (PPE)
  - used or unused chemicals
- range and use of cleaning chemicals and equipment for cleaning glass surfaces
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
- specifications:
  - equipment operating manuals
  - product labels
  - SDS
- physical conditions:
  - venue with access to glass surfaces as listed in the performance evidence
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPCLO3010 Apply odour control to carpets

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCCL3010A Apply odour control to carpets. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to remove odours from carpets by identifying the type of odour, and selecting and applying odour control methods according to the odour and carpet type.

The unit supports carpet cleaners who work alone or in teams. It applies in a range of commercial and residential work sites. The source of carpet odours can be due to factors such as animal or human body odour, animal waste, chemicals, decaying matter, faeces, fire damage, mould, urine, vomit and water damage.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Plan and prepare to apply odour control.
  - 1.1. **Carpet type** and condition are assessed, cause of odour is identified, and odour treatment techniques are confirmed according to job requirements.
  - 1.2. Work site **hazards** are assessed and risks controlled according to company, legislative, and **health and safety requirements**.
  - 1.3. **Equipment** is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.4. **Personal protective equipment** (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
  - 1.5. **Cleaning chemicals** are selected and prepared according to manufacturer specifications, and health and safety and company requirements.
  - 1.6. Signs and barricades are selected and installed according to health and safety, and company requirements.
  - 1.7. Pre-existing damage is identified and reported according to company requirements.
2. Apply treatment.
  - 2.1. Furniture and fittings are removed to allow cleaning tasks to be performed.
  - 2.2. Soiled carpet is cleaned using required cleaning methods, in preparation for odour control.
  - 2.3. Odour control treatment is applied to carpet using equipment and chemicals, according to manufacturer specifications and company requirements.
  - 2.4. Odour control chemicals are left to dwell according to manufacturer specifications.
  - 2.5. Chemical residue is removed from treated carpet area and odour of treated area is compared with surrounding surface to determine need for further action according to work order and company requirements.
  - 2.6. Results are reported according to company requirements.
3. Tidy work site.
  - 3.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.

- 3.2. Furniture and fittings are returned to original position according to client requests, work order, and health and safety requirements.
- 3.3. Signs and barricades are removed according to health and safety, and company requirements.
4. Clean and safety check equipment, and store equipment and chemicals.
  - 4.1. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements.
  - 4.2. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix required chemicals using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret simple, structured manufacturer instructions when using equipment and preparing chemicals</li> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• report faults in equipment to manufacturer and other personnel</li> <li>• provide written record of work undertaken and results achieved.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Carpet types*** must include:

- natural fibre:
  - organic (plant) fibres, such as cotton and sisal
  - wool
- synthetic fibre:
  - acrylic
  - nylon
  - polyester
  - polypropylene.

***Hazards*** that must be assessed include:

- biological and environmental contaminants
- chemical exposure via absorption, ingestion and inhalation
- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.

***Health and safety requirements*** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE

- storage and maintenance of equipment according to manufacturer specifications
  - use of first aid according to SDS information.
- Equipment** must include at least two of the following:
- air scrubber
  - carpet groomer
  - carpet repair kit
  - chemical hand spray unit
  - cleaning cloths
  - eye dropper
  - fogger
  - hair dryer
  - nylon bristle brush
  - ozone machine
  - scraper or spatula
  - sponge
  - steam generator
  - steam iron.
- Personal protective equipment** must include at least two of the following:
- gloves
  - eye protection
  - disposable respirators
  - protective clothing
  - safety shoes
  - splash-proof face masks
  - tongs.
- Cleaning chemicals** must include at least one of the following:
- acid cleaners
  - alkaline cleaners
  - antimicrobial
  - low environmental impact chemicals
  - neutral cleaners
  - odour neutralising, masking and destruction agents
  - ozone gas
  - sealers
  - solvent cleaner.

## Unit Mapping Information

CPPCCL3010A Apply odour control to carpets

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPCLO3010 Apply odour control to carpets

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCCL3010A Apply odour control to carpets. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also remove three different odours from each of the following carpet types, where:

- one carpet type must be a natural fibre selected from:
  - organic (plant) fibres, such as cotton and sisal
  - wool
- one carpet type must be a synthetic fibre selected from:
  - acrylic
  - nylon
  - polyester
  - polypropylene.

The odour types to be removed from each of the above carpets, must include three of the following:

- animal or human body odour
- animal waste
- chemicals
- decaying matter
- faeces
- fire damage
- mould
- urine

- vomit
- water damage.

In doing the above work, the person must:

- identify site hazards and control risks before commencing the task
- correctly identify type and characteristics of carpet to be treated
- correctly and safely classify the type of odour
- select and prepare equipment, including personal protective equipment (PPE), and chemicals required for the task
- prepare the work site
- comply with company, legislative and environmental requirements relating to applying odour control to carpets.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- environmental requirements relating to applying odour control to carpets, including:
  - clean-up, containment and isolation procedures
  - environmental protection agency requirements relating to applying odour control to carpets
- types and characteristics of carpets and fibres
- cleaning options for carpet, including:
  - low environmental impact chemicals
  - low moisture
  - water-efficient methods
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to applying odour control to carpets, including AS/NZS 3733 Textile floor coverings – Cleaning maintenance of residential and commercial carpeting
- range and application of different odour treatment techniques:
  - chemical treatment followed by:
    - extraction spot cleaning
    - heat application process
    - transfer method using hand application
  - sealing floor
  - lifting and refitting carpet
  - removing and replacing pad
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
- specifications:
  - AS/NZS 3733 Textile floor coverings – Cleaning maintenance of residential and commercial carpeting
  - SDS
- physical conditions:
  - work site or venue with carpets as listed in the range of conditions
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team
- relationship with client:
  - communications with the client to confirm and clarify job requirements.

Timeframe:

- as specified by the task.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPCLO3011 Clean using environmentally sustainable work practices

## Modification History

Release 1.

Revised unit of competency replacing superseded non-equivalent CPPCMN3001B Participate in environmentally sustainable work practices.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to clean using the environmentally sustainable work practices defined by company and government compliance requirements. The unit covers identifying resource use, ensuring compliance with regulatory requirements, and contributing to improvements in environmentally sustainable work practices.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |  |   |
|--|---|
| 1. Identify requirements for sustainable work practices. | <p>1.1. Company sustainability targets and measures for ensuring sustainable work practices are identified and confirmed.</p> <p>1.2. Impact of own work and <i>resource</i> consumption on sustainability measures is identified in discussion with supervisor.</p> <p>1.3. Company policies and procedures regarding resource efficiency issues are identified and benefits communicated to clients and colleagues.</p> |
| 2. Comply with environmental regulations.                | <p>2.1. Company environmental regulations are identified for the cleaning site or task and applied to planning.</p> <p>2.2. Breaches or potential breaches of environmental regulations are reported according to company requirements.</p> <p>2.3. Changes to sustainable work practices to rectify breaches are identified and followed.</p>  |
| 3. Contribute to resource efficiency improvements.       | <p>3.1. Practical ways to increase water usage efficiency and minimise waste are identified and followed.</p> <p>3.2. Own waste management practices and resource usage are monitored and opportunities to minimise waste and maximise resource efficiency are identified.</p> <p>3.3. Suggestions for improving resource efficiency in own work area are submitted to and discussed with designated personnel.</p>       |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• measure and calculate in order to monitor own resource use.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret company policies and procedures relating to environmentally sustainable work practices and requirements.</li> </ul>

- Writing skills to:
- document suggestions for improved work practices using required company procedures.
- Teamwork skills to:
- contribute to team interactions when discussing opportunities to improve environmentally sustainable work practices.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Resources*** must include at least two of the following:
- bin liners
  - cleaning chemicals
  - cleaning cloths
  - electricity usage
  - hand towels
  - liquid soap
  - toilet paper
  - water usage.

## Unit Mapping Information

No equivalent unit.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO3011 Clean using environmentally sustainable work practices

## Modification History

Release 1.

Revised unit of competency replacing superseded non-equivalent CPPCMN3001B Participate in environmentally sustainable work practices.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also identify and apply environmentally sustainable work practices while undertaking three different cleaning tasks, which must:

- involve the use of cleaning products, such as cleaning chemicals and water
- support company environmental sustainability policy and related procedures.

In doing the above work, the person must:

- locate and interpret company environmental sustainability policies and procedures relating to the three cleaning tasks
- contribute to the company's sustainability targets by suggesting one resource efficiency
- identify opportunities to improve own resource efficiency.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- benefits of efficient and environmentally sustainable use of resources
- key requirements of industry codes, legislation, regulations and standards relating to environmentally sustainable cleaning work practices
- principles of environmental sustainability and their application to cleaning
- environmental and resource efficiency systems and procedures relevant to own work area
- techniques for minimising environmental risks and maximising opportunities to improve environmental performance, including:
  - efficient energy use

- efficient water use
- minimising use of chemicals
- implementing waste management hierarchy.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- specifications:
  - company's sustainability targets
- physical conditions:
  - work site where cleaning tasks are undertaken
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

## CPPCLO3012 Repair and reinstall carpets

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCCL2006A Identify carpet fibre and construction, CPPCCL3011A Perform carpet repair and reinstallation and CPPCCL3012A Perform carpet colour repair and reinstallation. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to perform carpet re-stretching, seam repairs, patch work, colour repair, and basic carpet installation repairs. The unit covers assessing the extent of the repair and reinstallation task by identifying client requirements and examining the characteristics of the carpeted floor. The selection of suitable equipment and methods is essential for performing the task safely and efficiently.

The unit supports carpet cleaners who work alone or in teams. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Plan and prepare.
  - 1.1. Job requirements are identified and confirmed with required personnel.
  - 1.2. **Health and safety requirements** for site and type of work to be undertaken are identified and applied to planning.
  - 1.3. Work site **hazards** are assessed and risks controlled according to company, legislative, and health and safety requirements.
  - 1.4. Carpet repair and reinstallation **equipment** and **materials** are selected to carry out tasks according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.5. **Personal protective equipment** (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
  - 1.6. Signs and barricades are selected and installed according to health and safety, and company requirements.
2. Determine methods for repair and reinstallation.
  - 2.1. **Carpet type**, condition, fibre, construction method and **sub-flooring** are identified.
  - 2.2. Colour fastness of carpet is tested and agents causing colour damage are identified.
  - 2.3. **Repair and reinstallation techniques** are selected and confirmed according to assessment of carpet and company requirements.
3. Repair and reinstall carpet.
  - 3.1. Furniture and fittings are moved or removed according to health and safety and company requirements.
  - 3.2. Carpet is repaired using required techniques, equipment and materials according to manufacturer specifications and legislative, health and safety, and company requirements.
  - 3.3. Cleaning chemical is applied followed by extraction or heat transfer method according to manufacturer specifications and company requirements.
  - 3.4. Treated area is compared with surrounding surface to determine need for further action according to company

- requirements.
- 3.5. Spot dye baths are prepared and applied according to manufacturer specifications and company requirements.
  - 3.6. Carpet is reinstalled using required reinstallation method.
  - 3.7. Results are documented and reported according to company requirements.
4. Tidy work site.
    - 4.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
    - 4.2. Furniture and fittings are returned to original position according to job requirements.
    - 4.3. Signs and barricades are removed according to health and safety, and company requirements.
  5. Clean and safety check equipment, and store equipment and chemicals.
    - 5.1. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements.
    - 5.2. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix required chemicals using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>

- Writing skills to:
- document and report faults in equipment to manufacturer and other personnel.
- Teamwork skills to:
- work collaboratively with others on site when repairing carpets.
- Initiative and enterprise skills to:
- identify errors in own work and rectify faults.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Health and safety requirements*** must include:
- access to communication devices when working alone
  - compliance with Safe Work Australia regulations and guidelines
  - electrical equipment test and tag compliance
  - emergency response procedures
  - environmental controls
  - hazard signs and barricades
  - health and safety induction and refresher training
  - manual handling techniques
  - processes for safely dispensing chemicals
  - risk assessment procedures, including:
    - hazardous chemicals register
    - hierarchy of control
    - job safety analyses (JSA) for low-risk situations
    - safe work method statements (SWMS) for high-risk situations
    - incident reporting
  - SDS
  - selection and use of required PPE
  - storage and maintenance of equipment according to manufacturer specifications
  - use of first aid according to SDS information.
- Hazards*** that must be assessed include:
- biological and environmental contaminants
  - chemical exposure via absorption, ingestion and inhalation
  - chemical reactivity
  - dust and fibre particulates
  - electrical
  - environmental allergens

- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.

**Equipment** must include at least two of the following:

- glue guns with glue sticks
- hammers
- seam rollers
- seaming irons
- spatulas
- stair tools
- trimming knives.

**Materials** must include at least two of the following:

- adhesives
- awls
- duct tape
- kickers
- latex
- masking tape
- metal bars
- nails of various sizes and for different backing surfaces
- napping shears
- power stretchers
- protector boards
- seaming tape
- tackless carpet grippers.

**Personal protective equipment** must include at least two of the following:

- disposable respirators
- eye protection
- gloves
- kneepads
- protective clothing
- safety shoes.

**Carpet types** must include:

- natural fibre:
  - organic (plant) fibres, such as cotton and sisal
  - wool
- synthetic fibre:
  - acrylic
  - nylon

- polyester
  - polypropylene.
- Sub-flooring* must include at least one of the following:
- concrete
  - old carpet
  - wood
  - wood panelling.
- Repair and reinstallation techniques* must include at least one of the following:
- gluing
  - replacing
  - re-stretching
  - sewing.

## Unit Mapping Information

CPPCCL2006A Identify carpet fibre and construction, CPPCCL3011A Perform carpet repair and reinstallation and CPPCCL3012A Perform carpet colour repair and reinstallation

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO3012 Repair and reinstall carpets

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCCL2006A Identify carpet fibre and construction, CPPCCL3011A Perform carpet repair and reinstallation and CPPCCL3012A Perform carpet colour repair and reinstallation. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- repair one natural fibre carpet and one synthetic fibre carpet specified in the range of conditions
- select and apply repair equipment, materials and each of the following techniques:
  - gluing
  - replacing
  - re-stretching
  - sewing
- reinstall one natural or synthetic fibre carpet to an area measuring at least three square metres, using reinstallation techniques, equipment and materials specific to the carpet type and area.

In doing the above repair and installation work, the person must:

- identify site hazards and control risks before commencing the task
- identify type of carpet, sub-flooring and carpet installation method required for the job
- identify type of damage to carpet and its source
- clean repaired or reinstalled carpet using required cleaning and neutralisation methods.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- colour theory and range of carpet dye methods, including:
  - acid
  - beck
  - continuous
  - differential
  - print
  - solution
  - space
  - spray
  - stock
  - yarn
- range and characteristics of agents causing colour damage to carpet, including:
  - airborne pollutants
  - bleaches
  - dye strippers and reducing agents
  - fluorocarbons
  - hydrocarbons
  - oxidising agents
  - pesticides
  - pharmaceutical preparations
  - ultraviolet light from sunlight and artificial light
- types and applications of different carpet testing methods, including:
  - burn test
  - chemical test
  - sink and float test
- types, characteristics and repair methods for different carpets
- types of carpet construction methods and their characteristics, including:
  - flocked
  - fusion bonded
  - needle punched
  - tufted
  - woven
- types of carpet installation methods, including:
  - direct stick
  - double bond
  - loose lay
  - stretch in

- tackless carpet gripper
- turn and tack
- two-sided tape
- types of different underlay, including:
  - crumble foam
  - felt
  - foam
  - sandwich
  - urethane
  - waffle rubber
- types of carpet fibres, including:
  - continuous filament
  - staple yarn
- type and characteristics of different carpet yarn types, including:
  - heat set
  - plied
  - single
  - textured
  - twist
- range of different pile or tuft types, including:
  - cut
  - cut and loop
  - loop
- types and characteristics of carpet backing materials, including:
  - cotton
  - jute
  - latex
  - polyester
  - polypropylene
  - polyvinyl chloride (PVC)
- environmental requirements relating to repairing and reinstalling carpet, including:
  - clean-up, containment and isolation procedures
  - environmental protection agency requirements relating to repairing and reinstalling carpets
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to carpet repair and reinstallation, including AS/NZS 2455 Textile floor coverings – Installation practice
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - machine exhaust emissions

- obsolete equipment
- used containers
- used or contaminated personal protective equipment (PPE)
- used or unused chemicals
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - as listed in the range of conditions
- specifications:
  - AS/NZS 2455 Textile floor coverings – Installation practice
  - equipment operating manuals
  - product labels
  - SDS
  - safety instructions
- physical conditions:
  - work site or venue with carpets
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## CPPCLO3013 Clean window coverings

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO3013A Clean window coverings. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to assess the condition of blinds, curtains, screens and associated fixtures, and select required equipment, chemicals and methods to remove dirt and grime from a range of window coverings.

The unit supports cleaners who work alone or in teams. It applies to a range of window coverings, including blinds, curtains and screens in commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |                                     |  |
|-------------------------------------|--|
| 1. Plan and prepare to clean window | 1.1. Work instructions are obtained and window coverings and fixtures to be cleaned are assessed for type, fixture |
|-------------------------------------|--|

- coverings. method and scope of cleaning required.
- 1.2. Work site **hazards** are assessed and risks controlled according to company, legislative, and **health and safety requirements**.
  - 1.3. **Soil type** is identified by observation and required cleaning chemicals are selected and prepared.
  - 1.4. **Equipment** is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.5. **Personal protective equipment** (PPE) is sourced according to manufacturer specifications, and health and safety, and company requirements.
  - 1.6. Signs and barricades are selected and installed according to health and safety, and company requirements.
  - 1.7. Locations of washing and drying sites are selected according to health and safety, and legislative requirements.
  - 1.8. Pre-existing damage is identified and reported according to company requirements.
2. Clean and refit window coverings.
- 2.1. Window coverings and fixtures are removed according to health and safety and company requirements and loose fittings are tagged to ensure correct refit.
  - 2.2. Window coverings are sorted according to washing method and company requirements.
  - 2.3. Window coverings are washed, rinsed, and excess water is removed using equipment, chemicals and **cleaning techniques**, and according to health and safety requirements.
  - 2.4. Window coverings are dried, checked and spot cleaned according to company requirements.
  - 2.5. Window coverings are refitted and checked to be in working order according to manufacturer specifications.
3. Tidy work site.
- 3.1. Wash area is cleaned according to company requirements.
  - 3.2. Collected soil and waste are disposed of according to client and company specifications, and legislative,

- environmental, and health and safety requirements.
- 3.3. Signs and barricades are removed according to health and safety, and legislative requirements.
4. Clean and safety check equipment, and store equipment and chemicals.
    - 4.1. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements.
    - 4.2. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix chemicals required for cleaning tasks using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• communicate clearly and concisely when requesting advice or further information and responding to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret simple, structured manufacturer instructions when using equipment and preparing chemicals</li> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Hazards*** that must be
 

- biological and environmental contaminants

- assessed include:
- chemical exposure via absorption, ingestion and inhalation
  - chemical reactivity
  - dust and fibre particulates
  - electrical
  - environmental allergens
  - explosions
  - fatigue
  - fire
  - manual handling
  - noise
  - poor ventilation
  - slips, trips and falls
  - syringes and sharps
  - working in confined spaces.

***Health and safety requirements*** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

***Soil types*** must include at least three of the following:

- adhered soil
- cobwebs
- dust
- mould or mildew
- nicotine stains
- oil
- paint

- Equipment** must include at least two of the following:
- road grime.
  - access equipment
  - brushes
  - chamois
  - cleaning cloths
  - garbage bins
  - hoses
  - hot air dryers
  - microfibre products
  - pressure-washing equipment
  - scourers
  - soft brooms
  - water extraction machines.
- Personal protective equipment** must include at least two of the following:
- gloves
  - eye protection
  - safety shoes
  - sun protection
  - wet-work clothing.
- Cleaning techniques** must include at least six of the following:
- air blowing
  - dusting
  - low-water cleaning methods, such as using microfibre cleaning products
  - pressure washing
  - rinsing
  - scrubbing
  - spot cleaning
  - water extraction
  - wiping.

## Unit Mapping Information

CPPCLO3013A Clean window coverings

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO3013 Clean window coverings

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO3013A Clean window coverings. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also clean one fixed awning and:

- two of the following blinds:
  - holland blinds
  - roman blinds
  - venetian blinds
  - vertical blinds
- two of the following curtains:
  - lined curtains
  - unlined curtains
  - pelmet systems
- two of the following screens:
  - flywire screens
  - securing screens
  - shutter screens.

In doing the above work, the person must select and prepare required cleaning chemicals to clean each window covering. By the end of the whole task, the person must have removed three of the following soil types:

- adhered soil
- cobwebs

- dust
- mould and mildew
- nicotine stains
- oil
- paint
- road grime.

In doing the above work, the person must demonstrate six of the following cleaning techniques:

- air blowing
- dusting
- low-water cleaning methods, such as using microfibre cleaning products
- pressure washing
- rinsing
- scrubbing
- spot cleaning
- water extraction
- wiping.

During the above work, the person must also:

- identify type and characteristics of window coverings and fixtures
- select and prepare cleaning equipment, including personal protective equipment (PPE)
- select and apply safe and efficient cleaning methods
- remove, clean and refit window coverings according to specified requirements.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- environmental requirements relating to the use of chemicals and cleaning equipment when cleaning window coverings, including:
  - clean-up, containment and isolation procedures
  - low-energy cleaning methods
  - low environmental impact chemicals
  - low-moisture cleaning methods
  - low water-use equipment and water-efficient cleaning methods
  - non-chemical cleaning methods
- types of different window covering surfaces and their suitability for either wet or dry cleaning
- range of techniques and methods to clean window coverings, including:
  - basic wash-down

- full immersion wash
- spot cleaning
- cleaning chemicals and equipment suitable for cleaning window coverings, and their application for different window covering surfaces
- cleaning techniques for safely removing different soil types from different window coverings
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to cleaning window coverings
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - obsolete equipment
  - packaging
  - used containers
  - used or contaminated PPE
  - used or unused chemicals
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS)
- types of window coverings and fixtures, their characteristics and methods of operation.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - acid cleaners
  - alkaline cleaners
  - low environmental impact chemicals
  - neutral cleaners
  - solvent cleaners
- specifications:
  - equipment operating manuals
  - product labels
  - SDS
- physical conditions:
  - work site or venue with a range of window covering types listed in the performance evidence

- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -

## CPPCLO3014 Maintain clean-room environments

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO3014A Maintain clean-room environments. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to ensure clean-room environments housing electronic and other sensitive equipment are cleaned and maintained to avoid dust and moisture entering equipment and cabling. It covers assessing the extent of the cleaning task and selecting and using the equipment, chemicals and methods required for the task.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites. Clean rooms may be used for specialised computer installations, computer equipment repairs, installation of PABX units, manufacturing electronic components, laboratories and sterile rooms for food manufacturing. Some clean rooms may be pressurised to reduce the amount of dust entering the room.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

- essential outcomes. text is used, further information is detailed in the range of conditions.
1. Assess area to be cleaned.
    - 1.1. Clean room is *assessed* and issues are clarified as required.
    - 1.2. Work site *hazards* are assessed and risks controlled according to company, legislative, and *health and safety requirements*.
    - 1.3. Required *equipment* is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
    - 1.4. Required *cleaning chemicals* are selected and prepared.
    - 1.5. *Personal protective equipment* (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
    - 1.6. Cleaning procedures are planned and sequenced to start from work site highest point and move to lowest according to job, health and safety, and company requirements.
    - 1.7. Signs and barricades are selected and installed according to health and safety, and company requirements.
    - 1.8. Pre-existing damage is identified and reported according to company requirements.
  2. Implement cleaning plan.
    - 2.1. Furniture and fittings are removed to allow cleaning tasks to be performed.
    - 2.2. Equipment, chemicals and cleaning techniques are used to remove soil and clean surfaces according to manufacturer specifications, and health and safety and company requirements.
    - 2.3. Clean-room maintenance work is performed to minimise damage caused by electrostatic or electromagnetic contamination and loosening of cables or wiring according to manufacturer specifications and legislative, health and safety, and company requirements.
  3. Tidy work site.
    - 3.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.

- |    |      |   |
|----|------|---|
|    | 3.2. | Furniture and fittings are returned to original position according to job requirements.   |
|    | 3.3. | Signs and barricades are removed according to health and safety, and company requirements.  |
| 4. |      | Clean and safety check equipment, and store equipment and chemicals.  |
|    | 4.1. | Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements. |
|    | 4.2. | Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.                              |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix chemicals required for cleaning tasks using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret simple, structured manufacturer instructions when using equipment and preparing chemicals</li> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Assessed** must include:
- extent of cleaning required
  - types of clean-room surfaces to be cleaned, which must include at least two of the following:
    - benchtops and work stations
    - cabling
    - ceilings
    - equipment casings
    - hard floor surfaces
    - soft floor surfaces, such as special dust-catching carpets
  - types of clean-room fittings to be cleaned, which must include at least four of the following:
    - cameras
    - furniture
    - glass
    - lights
    - monitors
    - skylights
    - smoke detectors
    - sprinkler systems
    - vents and grilles
  - potential for damage to clean-room equipment.
- Hazards** that must be assessed include:
- biological and environmental contaminants
  - chemical exposure via absorption, ingestion and inhalation
  - chemical reactivity
  - dust and fibre particulates
  - electrical
  - environmental allergens
  - explosions
  - fatigue
  - fire
  - manual handling
  - noise
  - poor ventilation
  - slips, trips and falls
  - syringes and sharps
  - working in confined spaces.
- Health and safety requirements** must include:
- access to communication devices when working alone
  - compliance with Safe Work Australia regulations and guidelines
  - electrical equipment test and tag compliance
  - emergency response procedures
  - environmental controls

- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

**Equipment** must include at least two of the following:

- brooms
- buckets
- buffing machines with brushes and pads
- cleaning trolleys
- dustpans
- extension poles
- garbage bins
- glass cleaning equipment
- lint-free and anti-static cleaning cloths
- microfibre products
- mops:
  - damp
  - dust
- scourers
- vacuum cleaners and accessories.

**Cleaning chemicals** must include at least one of the following:

- acid cleaners
- alkaline cleaners
- low environmental impact chemicals
- neutral cleaners
- solvent cleaners.

**Personal protective equipment** must include at least two of the following:

- gloves
- eye protection
- masks
- protective clothing
- safety shoes.

# Assessment Requirements for CPPCLO3014 Maintain clean-room environments

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO3014A Maintain clean-room environments. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also maintain each of the following surfaces in two different clean-room environments:

- benchtops and work stations
- cabling
- ceilings
- equipment casings
- hard floor surfaces
- soft floor surfaces, such as special dust-catching carpets.

In doing the above work, the person must clean four of the following fittings in each clean room:

- cameras
- furniture
- glass
- lights
- monitors
- skylights
- smoke detectors
- sprinkler systems
- vents and grilles.

During the above work, the person must also:

- identify site hazards and control risks before commencing the task
- select cleaning equipment and chemicals required for the task
- use safe and efficient cleaning methods.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- cleaning chemicals and equipment suitable for using with sensitive equipment
- cleaning techniques for clean-room environments, including:
  - buffing
  - damp mopping
  - dust mopping
  - low-water cleaning methods using microfibre cleaning products
  - spot cleaning
  - steam cleaning
  - surface wiping with lint-free or anti-static cloths
  - vacuuming with crevice tool on hard-to-access surfaces
- correct procedures for handling and disposing of:
  - chemicals
  - contaminated and toxic waste
- environmental requirements when maintaining clean-room environments, including:
  - clean-up, containment and isolation procedures
  - environmental protection agency requirements relating to maintaining clean-room environments
  - use of low-energy cleaning methods
  - use of low-moisture cleaning methods
  - use of low water-use equipment and water-efficient cleaning methods
  - use of non-chemical cleaning methods
- impact of dust, moisture, electrical current and magnetic fields on sensitive electronic equipment
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to maintaining a clean-room environment
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - personal protective equipment (PPE) as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
- specifications:
  - equipment operating manuals
  - product labels
  - SDS
- physical conditions:
  - at least two different clean-room environments with surface types listed in the performance evidence
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

## CPPCLO3015 Treat complex carpet stains

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCCL3015A Perform advanced stain removal. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to remove complex stains from carpets after standard stain removal and cleaning techniques have failed. It covers selecting and preparing required equipment and chemicals, and applying complex stain removal techniques to the task.

The unit supports carpet cleaners who work alone or in teams. It applies in a range of commercial and residential work sites. Removing stains is undertaken as a separate task or in conjunction with other cleaning methods, such as vacuuming, extraction and general cleaning.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Plan and prepare.
  - 1.1. Type and condition of carpet, fibre and construction are identified, **complex stains** are assessed, job requirements are reviewed, and issues are clarified.
  - 1.2. Work site **hazards** are assessed and risks controlled according to company, legislative, and **health and safety requirements**.
  - 1.3. **Complex stain removal techniques** are selected according to job and company requirements.
  - 1.4. **Equipment** is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.5. Required **cleaning chemicals** are selected and prepared.
  - 1.6. **Personal protective equipment (PPE)** is sourced according to manufacturer specifications, and health and safety and company requirements.
  - 1.7. Signs and barricades are selected and installed according to health and safety, and company requirements.
  - 1.8. Pre-existing damage is identified and reported according to company requirements.
  - 1.9. Tasks are sequenced to ensure maximum efficiency for completing cleaning requirements.
2. Clean complex carpet stain.
  - 2.1. Furniture and fittings are removed to allow cleaning tasks to be performed.
  - 2.2. Pre-spotting cleaning treatment is applied to carpet stain and allowed to dwell according to manufacturer recommendations.
  - 2.3. Soil is removed using required techniques, equipment and chemicals, according to manufacturer specifications.
  - 2.4. Treated area is compared with surrounding surface to determine need for further action according to job and company requirements.
  - 2.5. Results are reported according to company requirements.
3. Tidy work site.
  - 3.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.

- 3.2. Furniture and fittings are returned to original position according to client requirements.
- 3.3. Signs and barricades are removed according to health and safety, and company requirements.
- 4. Clean and safety check equipment, and store equipment and chemicals.
  - 4.1. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements.
  - 4.2. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix required chemicals using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret simple, structured manufacturer instructions when using equipment and preparing chemicals</li> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>• work collaboratively with others at the same work site.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>• identify and perform a range of methods for cleaning stubborn stains without causing damage to the carpet.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Complex stains*** must include at least five of the following:

- beverage
- candle wax
- chewing gum
- cigarette butts
- dye stuffs
- food
- grease
- heavy dirt build-up
- hospital waste
- industrial and chemical waste
- lipstick
- nail polish
- oil
- plant stains
- shoe polish
- tar.

***Hazards*** that must be assessed include:

- biological and environmental contaminants
- chemical exposure via absorption, ingestion and inhalation
- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.

***Health and safety requirements*** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls

- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.
- chemical treatment followed by transfer method using hand application
- chemical treatment followed by extraction spot cleaning
- dye stripping
- heat transfer with a steam iron
- oxidisation.
- carpet groomers
- carpet spot-cleaning kits
- cloths
- extraction units
- eye droppers
- garbage bins
- nylon bristle brushes
- scrapers
- sponges
- spray equipment
- steam generators
- steam irons.
- acid cleaners
- alkaline cleaners
- low environmental impact chemicals
- neutral cleaners
- oxidising agents, such as bleaches
- reducing agents, such as dye strippers
- solvents.

***Complex stain removal techniques*** must include at least one of the following:

***Equipment*** must include at least two of the following:

***Cleaning chemicals*** must include at least one of the following:

*Personal protective equipment* must include at least two of the following:

- eye protection
- gloves
- respirators
- safety shoes.

## Unit Mapping Information

CPPCCL3015A Perform advanced stain removal

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPCLO3015 Treat complex carpet stains

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCCL3015A Perform advanced stain removal. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also remove three different complex stains from two different carpets as follows:

- at least one complex stain from one of the following natural fibre carpets:
  - organic (plant) fibres, such as cotton and sisal
  - wool
- at least one complex stain from one of the following synthetic fibre carpets:
  - acrylic
  - nylon
  - polyester
  - polypropylene.

The three different complex stains above must be selected from the following:

- beverage
- blood
- candle wax
- dye stuffs
- food
- human and animal waste
- lipstick and makeup
- medicine
- nail polish

- oil
- plant stains
- shoe polish
- tar
- timber stains.

In doing the above work, the person must also:

- identify site hazards and control risks before commencing the task
- correctly identify the type and characteristics of the carpet and carpet fibres
- classify the type of stain or spot and identify cleaning techniques, cleaning equipment and chemicals, required for the task
- use each of the following cleaning methods:
  - bonnet cleaning
  - dry absorbent compound
  - dry foam shampoo
  - hot water extraction
  - wet foam shampoo
- correctly and safely handle waste.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- environmental requirements to be applied when treating complex carpet stains, including:
  - clean-up, containment and isolation procedures
  - environmental protection agency requirements relating to treating complex carpet stains
  - use of low-energy carpet-cleaning methods
  - use of low-moisture cleaning methods
  - use of low water-use equipment and other water-efficient cleaning methods
  - use of non-chemical carpet-cleaning methods
- carpet characteristics, including:
  - carpet types
  - features of fibres
- cleaning methods for carpets, including:
  - heat transfer process
  - pre-spotting and stain-removal methods
  - testing methods
  - water-efficient cleaning methods
- correct techniques for performing:
  - extraction cleaning

- heat transfer
- treatments using:
  - oxidising agents, such as bleaches
  - reducing agents, such as dye strippers
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to treating complex carpet stains, including AS/NZS 3733 Textile floor coverings – Cleaning maintenance of residential and commercial carpeting
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - machine exhaust emissions
  - obsolete equipment
  - used containers
  - used or contaminated personal protective equipment (PPE)
  - used or unused chemicals
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
- specifications:
  - AS/NZS 3733 Textile floor coverings – Cleaning maintenance of residential and commercial carpeting
  - equipment operating manuals
  - product labels
  - SDS
- physical conditions:
  - suitable work site or venue with complex carpet stains
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team
- relationship with client:
  - communication with the client is required to confirm and clarify requirements.

Timeframe:

- as specified by the task.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPCLO3016 Apply topical treatments to carpets

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCCL3016A Apply topical treatments. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to protect carpets from the potential effects of odour and soiling by applying suitable topical treatments. The unit covers identifying the type of carpet and selecting equipment, treatments and treatment methods to perform the required task.

The unit supports carpet cleaners who work alone or in teams. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Plan and prepare to apply topical treatment.
  - 1.1. Type and condition of *carpet* fibre, construction method and type of underlay are identified, and job requirements are confirmed.
  - 1.2. Work site *hazards* are assessed and risks controlled according to company, legislative, and *health and safety requirements*.
  - 1.3. Application techniques are confirmed according to company requirements.
  - 1.4. *Equipment* is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.5. Topical *treatment chemicals* are selected and prepared according to manufacturer specifications, and health and safety and company requirements.
  - 1.6. *Personal protective equipment* (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
  - 1.7. Signs and barricades are selected and installed according to health and safety, and company requirements.
  - 1.8. Pre-existing damage is identified and reported according to company requirements.
2. Perform treatment.
  - 2.1. Furniture and fittings are removed to allow cleaning tasks to be performed.
  - 2.2. Surface area to be treated is prepared according to manufacturer specifications and company requirements.
  - 2.3. Area is *treated* according to manufacturer specifications and legislative, health and safety, and company requirements.
  - 2.4. Treated area is compared with surrounding surface to determine need for further action according to company requirements.
3. Tidy work site.
  - 3.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
  - 3.2. Furniture and fittings are returned to original position according to client requirements.

- |    |  |  |
|----|--|--|
|    | 3.3.   | Signs and barricades are removed according to health and safety, and company requirements.   |
| 4. | Clean and safety check equipment, and store equipment and chemicals. | 4.1. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements. |
|    | 4.2.   | Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.                                   |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix required chemicals using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• communicate clearly and concisely with clients</li> <li>• request advice or further information.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret simple, structured manufacturer instructions when using equipment and preparing chemicals</li> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>• work collaboratively with others at the same work site.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>• identify required treatments for different carpet types.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs

of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Carpet*** must include:
- natural fibre:
    - organic (plant) fibres, such as cotton and sisal
    - wool
  - synthetic fibre:
    - acrylic
    - nylon
    - polyester
    - polypropylene.
- Hazards*** that must be assessed include:
- biological and environmental contaminants
  - chemical exposure via absorption, ingestion and inhalation
  - chemical reactivity
  - dust and fibre particulates
  - electrical
  - environmental allergens
  - explosions
  - fatigue
  - fire
  - manual handling
  - noise
  - poor ventilation
  - slips, trips and falls
  - syringes and sharps
  - working in confined spaces.
- Health and safety requirements*** must include:
- access to communication devices when working alone
  - compliance with Safe Work Australia regulations and guidelines
  - electrical equipment test and tag compliance
  - emergency response procedures
  - environmental controls
  - hazard signs and barricades
  - health and safety induction and refresher training
  - manual handling techniques
  - processes for safely dispensing chemicals
  - risk assessment procedures, including:
    - hazardous chemicals register
    - hierarchy of control
    - job safety analyses (JSA) for low-risk situations
    - safe work method statements (SWMS) for high-risk situations
    - incident reporting

- SDS
  - selection and use of required PPE
  - storage and maintenance of equipment according to manufacturer specifications
  - use of first aid according to SDS information.
- Equipment** must include at least two of the following:
- absorbent cloths
  - airless sprayers
  - carpet rakes
  - chemical hand spray units
  - horsehair brushes
  - powered sprayers
  - pump-up sprayers.
- Treatment chemicals** must include at least one of the following:
- antimicrobial agents
  - antistatic agents
  - deodorisers
  - protectors.
- Personal protective equipment** must include at least two of the following:
- eye protection
  - gloves
  - protective clothing
  - respirators
  - safety shoes.
- Treated** must include:
- selecting and using required:
    - equipment
    - PPE
    - topical treatment chemicals.

# Assessment Requirements for CPPCLO3016 Apply topical treatments to carpets

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCCL3016A Apply topical treatments. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- select and apply suitable topical treatments to one natural fibre carpet and one synthetic fibre carpet specified in the range of conditions
- use each of the following topical treatments in the above work:
  - antimicrobial agents
  - antistatic agents
  - deodorisers
  - protectors.

In doing the above work, the person must:

- prepare the work site
- identify site hazards and control risks before commencing the task
- identify type and characteristics of carpet to be treated
- select and prepare equipment, including personal protective equipment (PPE) and topical treatment chemicals, required for the task
- use safe and efficient topical treatment methods.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- environmental requirements relating to applying topical treatments to carpets, including:

- clean-up, containment and isolation procedures
- environmental protection agency requirements relating to applying topical treatments to carpets
- use of low-energy cleaning methods
- use of low-moisture cleaning methods
- use of low water-use equipment and other water-efficient cleaning methods
- use of non-chemical cleaning methods.
- application processes for applying topical treatments, including:
  - antimicrobial agents
  - antistatic agents
  - deodorisers
  - protectors
- types of carpet installation methods and requirements for applying topical treatments, including:
  - direct stick
  - double bond
  - loose lay
  - stretch in
  - tackless carpet gripper
  - turn and tack
  - two-sided tape
- types of carpet fibres and requirements for applying topical treatments, including:
  - continuous filament
  - staple yarn
- types, characteristics and features of carpet underlay and requirements for applying topical treatments, including:
  - crumble foam
  - felt
  - foam
  - sandwich
  - urethane
  - waffle rubber
- types and characteristics of carpet backing materials and requirements for applying topical treatments, including:
  - cotton
  - jute
  - latex
  - polyester
  - polypropylene
  - polyvinyl chloride (PVC)

- types and characteristics of carpet construction methods and requirements for applying topical treatments, including:
  - flocked
  - fusion bonded
  - needle punched
  - tufted
  - woven
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to carpet cleaning, including AS/NZS 3733 Textile floor coverings – Cleaning maintenance of residential and commercial carpeting
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - litter
  - machine exhaust emissions
  - obsolete equipment
  - used containers
  - used or contaminated PPE
  - used or unused chemicals
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
- materials:
  - treatment chemicals as listed in the range of conditions
- specifications:
  - AS/NZS 3733 Textile floor coverings – Cleaning maintenance of residential and commercial carpeting
  - equipment operating manuals
  - product labels
  - SDS
- physical conditions:
  - suitable work site or venue with carpet requiring topical treatment
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team

- relationship with client:
  - communication with the client is required to confirm and clarify requirements.

Timeframe:

- as specified by the task.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPCLO3017 Clean wet areas

## Modification History

Release 1.

Replaces superseded equivalent CPPCLO2017A Clean wet areas.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to clean wet areas, including bathrooms, toilets, change rooms and laundries and their associated fixtures and fittings, so that they are free from soil, odour and hazards. The unit covers assessing the extent of cleaning required; selecting required equipment, chemicals and methods; and performing the cleaning task safely and efficiently.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |                     |  |
|---------------------|--|
| 1. Plan and prepare | 1.1. Wet areas to be cleaned are assessed, <b><i>soil types</i></b> are identified by observation, and areas requiring special |
|---------------------|--|

- to clean wet area. treatment, including graffiti, are identified and reported according to company requirements.
- 1.2. Work site *hazards* are assessed and risks controlled according to company, legislative, and *health and safety requirements*.
  - 1.3. Operation and condition of *fixtures and fittings* are checked and pre-existing damage at work site is reported according to company requirements.
  - 1.4. *Cleaning chemicals* and *techniques* for wet areas are selected according to company requirements.
  - 1.5. *Equipment* is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.6. *Personal protective equipment* (PPE) is selected and used according to manufacturer specifications, and health and safety and company requirements.
  - 1.7. Signs and barricades are selected and installed according to health and safety and company requirements.
2. Clean work site.
- 2.1. Loose soil is removed before commencing surface cleaning according to health and safety, and company requirements.
  - 2.2. Fixtures, fittings and *surfaces* are cleaned using equipment, chemicals and cleaning techniques according to company requirements.
  - 2.3. Remaining heavy soil, graffiti and stained surfaces are treated or reported for follow-up action according to company requirements.
  - 2.4. Soiled items are despatched for laundering according to company requirements.
3. Replenish consumables and tidy work site.
- 3.1. *Consumables* are replenished according to client requests and company requirements.
  - 3.2. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
  - 3.3. Signs and barricades are removed according to health and safety, and company requirements.

4. Clean and safety check equipment, and store equipment and chemicals.
- 4.1. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements.
- 4.2. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix chemicals required for cleaning tasks using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret simple, structured manufacturer instructions when using equipment and preparing chemicals</li> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>• work collaboratively with others on the same work site.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>• identify and select required cleaning products and equipment for a range of cleaning challenges</li> <li>• apply required chemicals and cleaning processes to different surfaces in wet areas.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are

included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Soil types*** must include at least five of the following:

- blood
- cobwebs
- dust
- food and residue
- grease
- human and animal waste
- litter
- mould and mildew
- mud and dirt
- pen, texta and pencil
- rust
- soap scum.

***Hazards*** that must be assessed include:

- biological contaminants
- chemical exposure via absorption and ingestion
- chemical reactivity
- contaminated waste material
- dust and fibre particulates
- electrocution
- environmental allergens
- fatigue
- loud and repeated noise levels
- respiratory hazards and poor ventilation
- slips and falls from wet or uneven surfaces
- strains or injury from damaged, heavy or awkward equipment
- syringes and sharps
- working in confined spaces.

***Health and safety requirements*** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk

situations

- incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

***Fixtures and fittings***  
must include at least  
ten of the following:

- baths
- bidets
- bins
- cleaner's sluices
- hand basins
- hand dryers
- mirrors
- paper dispensers
- personal item product dispensers
- racks
- showers
- sinks
- soap dispensers
- spas
- taps
- toilet bowls, seats and cisterns
- troughs
- urinal trough and wall
- vanity units.

***Cleaning chemicals***  
must include at least  
one of the following:

- acid cleaners
- alkaline cleaners
- low environmental impact chemicals
- neutral cleaners
- solvent cleaners.

***Cleaning techniques***  
must include at least  
three of the following:

- buffing
- cobwebbing
- dusting
- hosing
- mopping
- polishing
- pre-spraying
- scrubbing
- spot cleaning
- sweeping
- wet wiping.

- Equipment** must include at least six of the following:
- absorbent cleaning cloths
  - brooms
  - buckets
  - damp cloths
  - doodle bugs
  - dry cloths
  - microfibre products
  - hoses and nozzles
  - lint-free cloths
  - long-handled brushes and dustpan tongs
  - mops
  - sharps disposal units
  - nylon scourers
  - scrapers
  - scrubbing brushes
  - scrubbing and polishing machines
  - toilet brushes
  - squeegees
  - wringer buckets.
- Personal protective equipment** must include at least three of the following:
- safety shoes
  - gloves
  - eye protection
  - masks
  - tongs
  - wet-work clothing.
- Surfaces** must include at least five of the following:
- ceramics and porcelain
  - chrome
  - concrete
  - glass
  - laminate
  - metal
  - paint
  - plastic
  - stainless steel
  - stone
  - terracotta
  - vinyl.
- Consumables** must include at least three of the following:
- air fresheners
  - bin liners
  - cloth towels and tea towels
  - deodorant blocks
  - hand towels, such as cloth, rolls and sheets

- liquid and bar soap
- personal toiletries
- toilet paper.

# Assessment Requirements for CPPCLO3017 Clean wet areas

## Modification History

Release 1.

Replaces superseded equivalent CPPCLO2017A Clean wet areas.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also clean three of the following wet areas, and their fixtures and fittings:

- bathroom
- change rooms
- laundry
- shower facilities
- toilet.

During the above work, the person must select and use three of the following cleaning techniques:

- buffing
- cobwebbing
- dusting
- hosing
- mopping
- polishing
- pre-spraying
- scrubbing
- spot cleaning
- sweeping
- wet wiping.

During the above work, the person must also:

- identify site hazards and control risks before commencing task

- identify fittings, surfaces and soil types found in wet areas
- select and prepare cleaning equipment and chemicals required for the task
- use safe and efficient cleaning methods
- correctly and safely handle waste, including contaminated materials
- replenish three of the following consumables in each wet area:
  - air fresheners
  - bin liners
  - cloth towels and tea towels
  - deodorant blocks
  - hand towels, such as cloth, rolls and sheets
  - liquid and bar soap
  - personal toiletries
  - toilet paper.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- range, application and limitation of cleaning chemicals and equipment available for wet areas
- cleaning chemicals and methods suitable for wet area surfaces, including:
  - ceramics and porcelain
  - chrome
  - concrete
  - glass
  - laminate
  - metal
  - paint
  - plastic
  - stainless steel
  - stone
  - terracotta
  - vinyl
- environmental requirements relating to cleaning wet areas, including:
  - clean-up, containment and isolation procedures
  - emergency chemical spill control measures
  - environmental protection agency requirements relating to using and disposing of cleaning chemicals
  - hazardous materials handling
  - use of low water-use equipment and other water-efficient cleaning methods to clean wet areas
- processes for safely handling and disposing of waste, including:

- chemicals past their expiry date
  - contaminated waste
  - obsolete equipment
  - used cleaning cloths
  - used containers
  - used or contaminated PPE
  - used or unused chemicals
- routes of entry and potential symptoms of exposure to chemicals.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - personal protective equipment (PPE) as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
  - consumables as listed in the range of conditions
- specifications:
  - equipment operating manuals
  - product labels
  - safety data sheets (SDS)
- physical conditions:
  - suitable work site or venue with wet areas as listed in the performance evidence
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

## CPPCLO3018 Clean and maintain furniture and fittings

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2015A Maintain furniture, fittings and room dressing and CPPCLO3016A Wash furniture and fittings. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to wash furniture and fittings and to present rooms according to client requirements. The unit covers assessing the extent of the cleaning task; identifying the different surface types; selecting and using cleaning techniques and chemicals required for the task; and returning furniture and fittings, including loose items, to their original position.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential settings, including boardrooms, function rooms, hospital wards, offices and private residences.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Plan and prepare.
  - 1.1. Condition of *furniture* and *fittings* to be cleaned, including *surface type* and *soil type*, are assessed, job requirements are reviewed, and issues are clarified.
  - 1.2. Work site *hazards* are assessed and risks are controlled according to legislative, company, and *health and safety requirements*.
  - 1.3. *Cleaning techniques* and *chemicals* that reflect company requirements are selected, and chemicals are prepared.
  - 1.4. *Equipment* is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.5. *Personal protective equipment* (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
  - 1.6. Signs and barricades are selected and installed according to health and safety, and company requirements.
  - 1.7. Pre-existing damage is identified and reported according to company requirements.
2. Clean furniture, fittings and loose items.
  - 2.1. Furniture and fittings are moved to allow cleaning tasks to be performed, according to health and safety and company requirements.
  - 2.2. Floor, furniture and fittings are covered by drop sheets as necessary according to company requirements.
  - 2.3. Soil is removed from surfaces, and furniture and fittings are cleaned using selected equipment, chemicals and cleaning techniques.
  - 2.4. *Loose items* are cleaned using required cleaning equipment and techniques.
3. Place furniture and fittings.
  - 3.1. Drop sheets are removed and stored, and floors are cleaned according to client requirements and health and safety requirements.
  - 3.2. Cleaned furniture and loose items are placed in specified room locations according to client requirements.
  - 3.3. Fittings are checked to be in working order and wiped or

- cleaned according to specified requirements.
4. Tidy work site.
    - 4.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
    - 4.2. Signs and barricades are removed according to health and safety, and company requirements.
  5. Clean and safety check equipment, and store equipment and chemicals.
    - 5.1. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements.
    - 5.2. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix chemicals required for cleaning tasks using whole numbers and routine fractions</li> <li>• calculate current and required levels of stock.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• read and interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• chemical labels</li> <li>• equipment manuals.</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are

included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Furniture*** must include at least five of the following:

- beds
- bedside cupboards
- benches
- chairs
- compactus
- computers and associated equipment
- desks
- doors
- filing cabinets
- lamps
- ovens
- refrigerators
- shelves
- tables
- work stations.

***Fittings*** must include at least ten of the following:

- bars
- ceiling fans
- clocks
- door handles
- electrical items, including kettles and microwaves
- light fittings and switches
- ornaments
- picture frames
- railings
- skirting
- telephone handsets
- vents and grilles
- walls
- window coverings
- window sills.

***Surface types*** must include at least three of the following:

- fabric
- glass
- laminate
- leather
- metal
- paint
- plastic
- polyresin
- tile
- timber

**Soil types** must include at least three of the following:

- vinyl.
- beverage
- blood
- blu-tac
- candle wax
- chewing gum
- cobwebs
- dust
- food
- glue
- grease
- human and animal waste
- lipstick
- medicine
- mud and dirt
- nail polish
- paint
- shoe polish.

**Hazards** that must be assessed include:

- biological and environmental contaminants
- chemical exposure via absorption, ingestion and inhalation
- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.

**Health and safety requirements** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals

- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- safety data sheets (SDS)
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.
- for fittings, at least two of the following:
  - polishing
  - pre-spraying
  - scrubbing
  - vacuuming
  - washing
  - wiping
- for fabric surfaces, at least one of the following:
  - spot cleaning
  - spray pack foam
  - vacuuming
  - low-water cleaning methods, such as using microfibre cleaning products.

***Cleaning techniques*** must include:

***Cleaning chemicals*** must include at least one of the following:

***Equipment*** must include at least two of the following:

- acid cleaners
- alkaline cleaners
- low environmental impact chemicals
- neutral cleaners
- solvent cleaners.
- alcohol wipes
- buckets
- damp cloths
- drop sheets
- dust extraction tools, such as wall mates and fridge dusters
- extension poles
- lint-free dusters, such as lamb's wool and feather dusters
- lint-free polishing cloths, such as cotton and colour-fast cloths
- microfibre products
- mini mops
- oil impregnated cloths

- polishing cloths
  - scourers
  - sponges
  - vacuum cleaners.
- Personal protective equipment*** must include at least two of the following:
- eye protection
  - gloves
  - masks
  - safety shoes.
- Loose items*** must include at least five of the following:
- ashtrays
  - bins
  - books and magazines
  - calculators
  - crockery
  - desk calendars
  - electrical leads
  - food and drink containers
  - kitchen implements
  - mats
  - picture frames
  - radios
  - recognition awards
  - telephone indexes
  - tissue boxes
  - wall charts.

## Unit Mapping Information

CPPCLO2015A Maintain furniture, fittings and room dressing and CPPCLO3016A Wash furniture and fittings

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO3018 Clean and maintain furniture and fittings

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2015A Maintain furniture, fittings and room dressing and CPPCLO3016A Wash furniture and fittings. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- clean furniture and fittings according to client requirements in two of the following rooms:
  - boardroom
  - lounge room in private residence
  - home office
  - commercial office
  - function room
- identify the type and characteristics of furniture, fittings and loose items in the above rooms and their surface types, which must include three of the following:
  - fabric
  - glass
  - laminate
  - leather
  - metal
  - paint
  - plastic
  - polyresin
  - tile
  - timber

- vinyl
- clean five of the following different items of furniture and ten of the following different fittings in the two rooms:
  - furniture:
    - bed
    - bedside cupboard
    - bench
    - chair
    - compactus
    - computer and associated equipment
    - desk
    - door
    - filing cabinet
    - lamp
    - oven
    - refrigerator
    - shelf
    - table
    - work station
  - fittings:
    - bar
    - ceiling fan
    - clock
    - door handle
    - electrical item, including kettle and microwave
    - light fitting and switch
    - ornament
    - picture frame
    - railings
    - skirting
    - telephone handset
    - vent and grille
    - walls
    - window coverings
    - window sill
- clean five of the following loose items in each room:
  - ashtray
  - bin
  - books and magazines
  - calculator

- crockery
- desk calendar
- electrical leads
- food and drink containers
- kitchen implements
- mat
- photograph frame
- radio
- recognition award
- telephone index
- tissue box
- wall chart
- identify and remove three of the following soil types on the loose items above:
  - beverage
  - blood
  - blu-tac
  - candle wax
  - chewing gum
  - cobwebs
  - dust
  - food
  - glue
  - grease
  - human and animal waste
  - lipstick
  - medicine
  - mud and dirt
  - nail polish
  - paint
  - shoe polish.

During the above work, the person must also:

- identify site hazards and control risks before commencing the task
- identify type and characteristics of furniture and fittings and their surfaces
- apply cleaning techniques suited to the surfaces of fittings and fabric furniture
- use safe and efficient cleaning methods
- select cleaning equipment and chemicals required for the task
- place cleaned furniture in specified room locations according to client requirements.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- key features of cleaning chemicals and equipment and their application to furniture and fitting surfaces
- procedures for selecting and applying required cleaning chemicals for different surfaces
- cleaning methods for furniture and fittings, including:
  - pre-spotting and stain removal
  - low-water
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to cleaning furniture and fittings, including:
  - AS/NZS 4849.1 Upholstery cleaning – Fabric upholstery
  - industry advisory standards and codes, such as dangerous goods codes
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - obsolete equipment
  - packaging
  - used containers
  - used or contaminated personal protective equipment (PPE)
  - used or unused chemicals
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS)
- range of soil types found on furniture and fittings listed in the performance evidence, and methods for cleaning them.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals required for task
- physical conditions:
  - suitable work site with furniture, fittings and loose items
- specifications:
  - AS/NZS 4849.1 Upholstery cleaning – Fabric upholstery
  - equipment operating manuals

- product labels
- SDS
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

# CPPCLO3019 Remove waste and recyclable materials

## Modification History

Release 1.

Replaces superseded equivalent CPPCLO2019A Sort and remove waste and recyclable materials.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to identify waste and recyclable materials to be removed, assess hazards associated with their removal, remove waste collected or created through the cleaning process, and safely transfer it to a dedicated waste disposal point for collection using required equipment and methods. Waste collection is conducted as part of a regular cleaning routine, usually on a daily basis and can include a range of materials, such as chemicals, contaminated materials and general waste. The unit also covers identifying recyclable materials and transferring them to required collection points. Recyclable materials are those that may be reused or made into another product.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Plan and prepare to handle waste.
  - 1.1. **General waste, contaminated and biological waste and recyclable items** are identified according to company requirements, and any issues are clarified.
  - 1.2. Work site **hazards** are assessed and risks controlled according to company, legislative, and **health and safety requirements**.
  - 1.3. **Equipment** is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.4. **Cleaning chemicals** are selected and prepared according to manufacturer specifications, and health and safety, and company requirements.
  - 1.5. **Personal protective equipment (PPE)** is sourced and used according to manufacturer specifications, and health and safety, and company requirements.
  - 1.6. Tasks are sequenced to ensure maximum efficiency when completing cleaning requirements.
2. Transfer waste to waste carrier.
  - 2.1. Waste items are collected and safely transferred to waste carrier according to health and safety, and company requirements.
  - 2.2. Biological waste is transferred to biohazard bins according to health and safety requirements.
  - 2.3. **Rubbish bins** and surrounds are spot cleaned according to company requirements.
  - 2.4. Soiled rubbish bin liners are replaced according to health and safety, and company requirements.
3. Transfer waste to disposal unit.
  - 3.1. Waste is removed from site according to health and safety, and company requirements.
  - 3.2. Waste is transported to **disposal units** by shortest practical safest route and according to health and safety, and company requirements.
4. Deliver recyclable materials.
  - 4.1. Recyclable materials are identified and separated according to health and safety, and company requirements.
  - 4.2. Recyclable materials are transferred safely to dedicated

- recycling collection units for each type of material according to health and safety, and company requirements.
- 4.3. Recycling containers and surrounds are spot cleaned according to health and safety, and company requirements.
  - 4.4. Recycling containers are checked and replaced in designated locations.
  - 4.5. Transfer of recyclable materials is documented according to company requirements.
5. Clean and safety check equipment, and store equipment and chemicals.
    - 5.1. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements.
    - 5.2. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>• assess range of different waste types and determine required waste handling techniques.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- General waste** must include at least two of the following:
- drinks
  - food packaging
  - manufactured foods
  - non-recyclable plastics.
- Contaminated and biological waste** must include at least one of the following:
- blood and other bodily fluids
  - cytotoxic waste
  - human waste
  - soiled and disposable linen
  - syringes and needles.
- Recyclable items** must include at least one of the following:
- cardboard
  - computer consumables
  - glass
  - metal
  - packaging material
  - paper
  - plastic
  - printing consumables.
- Hazards** that must be assessed include:
- biological and environmental contaminants
  - chemical exposure via absorption, ingestion and inhalation
  - chemical reactivity
  - dust and fibre particulates
  - electrical
  - environmental allergens
  - explosions
  - fatigue
  - fire
  - manual handling
  - noise
  - poor ventilation
  - slips, trips and falls
  - syringes and sharps
  - working in confined spaces.
- Health and safety requirements** must include:
- access to communication devices when working alone
  - compliance with Safe Work Australia regulations and guidelines
  - electrical equipment test and tag compliance
  - emergency response procedures

- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
- incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

**Equipment** must include at least three of the following:

- bin liners
- cleaning cloths
- damp wiping kits
- litter picker
- long-handled dustpans and brooms
- microfibre products
- nylon pads
- pick-up trolleys
- scrubbing brushes
- sharps kits
- spray bottles
- wheelie bins.

**Cleaning chemicals** must include at least one of the following:

- acid cleaners
- alkaline cleaners
- low environmental impact chemicals
- neutral cleaners
- solvent cleaners.

**Personal protective equipment** must include at least two of the following:

- disposable respirators
- eye protection
- gloves
- high visibility vests
- protective clothing
- safety shoes
- sun protection
- tongs.

***Rubbish bins*** must include at least one of the following:

- biohazard bags and bins
- contaminated waste bins
- general purpose bins
- sharps disposal units
- radioactive waste bins
- recycle bins
- restroom bins
- wet rubbish bins.

***Disposal units*** must include at least one of the following:

- compactors
- dump masters
- open trucks
- wheelie bins.

## Unit Mapping Information

CPPCLO2019A Sort and remove waste and recyclable materials

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO3019 Remove waste and recyclable materials

## Modification History

Release 1.

Replaces superseded equivalent CPPCLO2019A Sort and remove waste and recyclable materials.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also use safe and efficient methods to remove waste at three different cleaning sites. Across all three sites they must remove both of the following types of waste:

- general
- contaminated and hazardous biological waste.

In doing the above work, the person must:

- identify the different waste types and correct methods for dealing with each, including health and safety requirements
- identify site hazards and control risks before handling waste
- select and prepare cleaning equipment and chemicals required for the task
- identify items for recycling at each site and arrange for their transfer
- clean the rubbish bins and surrounds.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- environmental requirements relating to removing waste and recyclable materials, including:
  - clean-up, containment and isolation procedures
  - environmental protection agency requirements relating to using and disposing of chemicals
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to removing waste and recyclable materials, including:

- AS/NZ 3831 Waste management – Glossary of terms
- industry advisory standards and codes, such as dangerous goods codes
- processes for safely handling and treating waste, including:
  - recyclable materials
  - used containers
  - used or contaminated personal protective equipment (PPE)
  - used or unused chemicals
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - working according to safety data sheets (SDS)
- waste transfer procedures, including:
  - location of disposal units
  - location of waste pick-up equipment
  - use of waste handling equipment
  - use of waste storage receptacles
  - selection and use of bin liners.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
- specifications:
  - AS/NZ 3831 Waste management – Glossary of terms
  - equipment operating manuals
  - product labels
  - SDS
- physical conditions:
  - suitable work site or venue with waste disposal requirements and facilities
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

## CPPCLO3020 Pressure wash and clean surfaces

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO3020A Clean using pressure washing. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to set up and use pressure washing equipment to clean surfaces by producing a variable stream of water or cleaning chemical. The unit covers assessing the extent of the cleaning task, and selecting the equipment, chemicals and cleaning methods required for the task.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Plan and prepare to clean using pressure washing.
  - 1.1. Type and condition of *surfaces* to be pressure washed are assessed, job requirements are reviewed, and issues are clarified.
  - 1.2. Work site *hazards* are assessed and risks controlled according to company, legislative, and *health and safety requirements*.
  - 1.3. *Soil types* are identified by observation and *cleaning chemicals* required for the task are selected and prepared.
  - 1.4. *Equipment* is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.5. *Personal protective equipment* (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
  - 1.6. Signs and barricades are selected and installed according to health and safety, and company requirements.
  - 1.7. Pre-existing damage is identified and reported according to company requirements.
2. Use pressure washing equipment and techniques.
  - 2.1. Items requiring protection from pressure spray are covered and secured according to specified requirements.
  - 2.2. Heavily soiled areas are pre-sprayed according to manufacturer specifications and company requirements.
  - 2.3. Pressure washing is conducted using equipment and chemicals and according to manufacturer specifications.
  - 2.4. Hand washing is performed on areas requiring additional treatment, using suitable equipment and chemicals according to manufacturer specifications.
  - 2.5. Washed area is rinsed using required equipment and allowed to dry.
3. Tidy work site.
  - 3.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
  - 3.2. Protective coverings are removed and items returned to position according to specified requirements.

- |    |  |      |   |
|----|--|------|---|
| 4. | Clean and safety check equipment, and store equipment and chemicals. | 3.3. | Signs and barricades are removed according to health and safety, and company requirements.  |
|    |  | 4.1. | Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements. |
|    |  | 4.2. | Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.                              |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix required chemicals using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Surfaces*** must include at least three of the following:
- brick, including rendered brick surfaces
  - concrete, including polished concrete
  - metal surfaces, including industrial kitchen equipment and industrial machinery

**Hazards** that must be assessed include:

- painted
- polyresin.
- biological and environmental contaminants
- chemical exposure via absorption, ingestion and inhalation
- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.

**Health and safety requirements** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

**Soil types** must include at least three of the following:

- graffiti
- grease and oil
- mould and mildew
- pollution marks.

- Cleaning chemicals*** must include at least one of the following:
- acid cleaners
  - alkaline cleaners
  - low environmental impact chemicals
  - neutral cleaners
  - solvent cleaners.
- Equipment*** must include at least two of the following:
- brooms
  - cloths
  - hoses
  - lances
  - pressure washers
  - squeegees
  - wet area electrical safety connections.
- Personal protective equipment*** must include at least three of the following:
- ear muffs and plugs
  - gloves
  - eye protection
  - disposable respirators
  - safety shoes
  - sun protection
  - wet-work clothing.

## Unit Mapping Information

CPPCLO3020A Clean using pressure washing

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPCLO3020 Pressure wash and clean surfaces

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO3020A Clean using pressure washing. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also pressure wash three of the following surface types:

- brick, including rendered brick surfaces
- concrete, including polished concrete
- metal surfaces, including industrial kitchen equipment and industrial machinery
- painted
- polyresin.

In doing the above work, the person must:

- remove three of the following different soil types:
  - graffiti
  - grease and oil
  - mould and mildew
  - pollution marks
- identify site hazards and control risks before commencing the task
- identify surface and soil types
- select and prepare required cleaning equipment, including personal protective equipment (PPE) and cleaning chemicals
- use safe and efficient cleaning methods using pressure washing.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- suitability of different surfaces for pressure washing
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to cleaning using pressure washing, including industry advisory standards and codes, such as dangerous goods codes
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - obsolete equipment
  - disposal of packaging
  - sweeping detritus
  - used containers
  - used or contaminated PPE
  - used or unused chemicals
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS)
- range and functionality of equipment used in pressure washing
- procedures for selecting and applying cleaning chemicals required for different surfaces, including:
  - acid cleaners
  - alkaline cleaners
  - low environmental impact chemicals
  - neutral cleaners
  - solvent cleaners.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
- specifications:
  - equipment operating manuals
  - product labels
  - SDS

- physical conditions:
  - suitable work site with range of surfaces as listed in the performance evidence
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Machinery</i></b> must include at least three of the following:	<ul style="list-style-type: none"> <li>• bottle-making machines</li> <li>• concrete-making machines</li> <li>• earth-moving equipment</li> <li>• food-processing machines and equipment</li> <li>• mining industry equipment</li> <li>• trucks</li> <li>• welders.</li> </ul>
---	---

- Hazards** that must be assessed include:
- biological and environmental contaminants
  - chemical exposure via absorption, ingestion and inhalation
  - chemical reactivity
  - dust and fibre particulates
  - electrical
  - environmental allergens
  - explosions
  - fatigue
  - fire
  - manual handling
  - noise
  - poor ventilation
  - slips, trips and falls
  - syringes and sharps
  - working in confined spaces.
- Machinery cleaning hazards** that must be assessed include:
- exposed or damaged electrical components, wiring and cabling
  - faulty pressure hoses or pressure relief valves
  - overriding, removing or interfering with machinery safety devices.
- Health and safety requirements** must include:
- access to communication devices when working alone
  - compliance with Safe Work Australia regulations and guidelines
  - electrical equipment test and tag compliance
  - emergency response procedures
  - environmental controls
  - hazard signs and barricades
  - health and safety induction and refresher training
  - manual handling techniques
  - processes for safely dispensing chemicals
  - risk assessment procedures, including:
    - hazardous chemicals register
    - hierarchy of control
    - job safety analyses (JSA) for low-risk situations
    - safe work method statements (SWMS) for high-risk situations
    - incident reporting
  - SDS
  - selection and use of required PPE
  - storage and maintenance of equipment according to manufacturer specifications
  - use of first aid according to SDS information.
- Equipment** must include at least two of
- air blowers
  - brooms

the following:

- cloths
- high-pressure water cleaning units
- hoses
- squeegees.

**Personal protective equipment** must include at least two of the following:

- ear muffs and plugs
- gloves
- eye protection
- hard hats
- hair and beard nets
- disposable respirators
- safety shoes.

**Cleaning techniques** must include:

- air blowing
- dry wiping
- hosing down
- low-water cleaning methods
- pre-spraying
- pressure washing
- rinsing
- scrubbing and wiping
- spot cleaning
- washing and wiping
- wet wiping.

**Cleaning chemicals** must include at least one of the following:

- acid cleaners
- alkaline cleaners
- low environmental impact chemicals
- neutral cleaners
- solvent cleaners.

**Cleaned** must include:

- selecting and using required:
  - equipment
  - PPE
  - chemicals
  - cleaning techniques.

## Unit Mapping Information

CPPCLO3021A Clean industrial machinery

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPCLO3021 Clean industrial machinery

## Modification History

Release	Comments
Release 1	Replaces superseded equivalent CPPCLO3021A Clean industrial machinery. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also use safe and efficient methods to clean three of the following types of industrial machinery:

- bottle-making machines
- concrete-making machines
- earth-moving equipment
- food-processing machines and equipment
- mining industry equipment
- trucks
- welders.

The person must demonstrate each of the following techniques when cleaning the above industrial machinery:

- air blowing
- dry wiping
- hosing down
- low-water cleaning methods
- pre-spraying
- pressure washing
- rinsing
- scrubbing and wiping
- spot cleaning

- washing and wiping
- wet wiping.

In doing the above work, the person must:

- identify site hazards and control risks before commencing the task
- select required cleaning equipment and chemicals according to type of machinery and extent of cleaning required
- identify surface and soil types
- handle and dispose of waste safely and according to client and environmental requirements.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- environmental requirements relating to cleaning industrial machinery, including:
  - clean-up, containment and isolation procedures
  - environmental protection agency requirements relating to cleaning industrial machinery
  - use of low-energy cleaning methods
  - use of low-moisture cleaning methods
  - use of low water-use equipment and water-efficient cleaning methods
  - use of non-chemical cleaning methods.
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to cleaning industrial machinery, including industry advisory standards and codes, such as dangerous goods codes
- machinery manufacturer cleaning specifications, including restrictions or limitations on surfaces that can be pressure washed
- procedures for avoiding incidental damage to industrial machinery through the cleaning process, including:
  - discoloration
  - electrical dampness
  - filter damage
  - paint removal
  - rust
- range and application of cleaning equipment and chemicals for industrial machinery
- range and application of cleaning methods for:
  - electrical equipment
  - industrial machinery
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals

- safe methods for diluting chemicals
- working according to safety data sheets (SDS)
- type and characteristics of different soil found on industrial machinery, including:
  - dust
  - exhaust and soot
  - food and food scraps
  - grease
  - oil
  - paint.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - personal protective equipment (PPE) as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
- specifications:
  - equipment operating manuals
  - SDS
- physical conditions:
  - suitable venue with access to range of industrial machinery listed in the performance evidence
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

## CPPCLO3024 Clean fabric upholstery

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCCL3014A Clean fabric upholstery. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to clean fabric upholstery. The unit covers identifying the backing materials used, classifying the fibre, and assessing the furniture construction. It also covers selecting equipment, chemicals and methods to perform the cleaning task safely and efficiently.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Identify upholstery construction.
  - 1.1. Job requirements are identified, upholstery is assessed, and yarn type and fibre form are identified and confirmed.
  - 1.2. Weave type and texture style are determined by observation and tactile methods according to company requirements.
2. Assess and classify upholstery fabric.
  - 2.1. Upholstery *fabric* sample is obtained and tested to identify fibre according to manufacturer specifications, company and *health and safety requirements*.
  - 2.2. Fibre is inspected to determine probable dye methods used during manufacture.
  - 2.3. Pre-existing conditions are identified and reported according to company requirements.
  - 2.4. Colour-fastness of fabric upholstery is *tested* and any previously applied topical treatments are identified.
3. Assess furniture construction.
  - 3.1. Backing materials and cushion filling are identified by opening cushioning where possible or inspecting behind buttons according to company requirements.
  - 3.2. Filling material in piping is inspected and classified according to manufacturer specifications and company requirements.
4. Determine cleaning methods.
  - 4.1. *Type of soil* is identified and cleaning techniques are selected according to company requirements.
  - 4.2. Cleaning processes and expected outcomes are explained clearly to client and client approval to proceed is obtained.
5. Prepare to apply cleaning techniques to fabric upholstery.
  - 5.1. Work site *hazards* are identified and risks controlled according to company, legislative, and health and safety requirements.
  - 5.2. Health and safety requirements for the site and type of work to be undertaken are identified and applied to planning.
  - 5.3. *Personal protective equipment* (PPE) is selected and used according to manufacturer specifications, and health and safety and company requirements.
  - 5.4. *Equipment* is selected according to job requirements,

- checked for serviceability, and faults are rectified or reported before starting work.
- 5.5. Chemicals are selected and prepared according to manufacturer specifications, and health and safety and company requirements.
  - 5.6. Signs and barricades are selected and installed according to health and safety, and company requirements.
6. Apply cleaning techniques to fabric upholstery.
    - 6.1. Furniture and fittings are removed to allow cleaning tasks to be performed.
    - 6.2. Soil is removed and fabric upholstery is *cleaned* according to manufacturer specifications and company requirements.
7. Tidy work site.
    - 7.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
    - 7.2. Furniture and fittings are returned to original position according to client requests, work order, and health and safety requirements.
    - 7.3. Signs and barricades are removed according to work order, and health and safety, and company requirements.
8. Clean and safety check equipment, and store equipment and chemicals.
    - 8.1. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements.
    - 8.2. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

- Learning skills to:
- recognise different fabrics, fibres and upholstery methods of construction based on previous experience.

- Numeracy skills to:
- dilute and mix required chemicals using whole numbers and routine fractions.
- Oral communication skills to:
- ask questions to clarify job requirements
  - respond clearly and concisely to client questions.
- Reading skills to:
- interpret directions and safety instructions, including:
    - equipment operating manuals
    - product labels
    - safety data sheets (SDS).
- Writing skills to:
- document and report faults in equipment to manufacturer and other personnel.
- Teamwork skills to:
- work collaboratively with others when cleaning at the same work site.
- Initiative and enterprise skills to:
- identify and rectify faults in own work.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Fabrics*** must include at least three of the following:
- acetate
  - acrylic
  - cotton
  - jute
  - linen
  - nylon
  - polyester
  - polypropylene
  - rayon
  - silk
  - wool.

- Health and safety requirements*** must include:
- access to communication devices when working alone
  - compliance with Safe Work Australia regulations and guidelines
  - electrical equipment test and tag compliance
  - emergency response procedures
  - environmental controls
  - hazard signs and barricades
  - health and safety induction and refresher training

- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
- incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

**Testing** of colour-fastness must use at least one of the following:

- burn test
- chemical test
- sink and float test.

**Types of soil** must include at least three of the following:

- beverage
- blood
- candle wax
- chewing gum
- dye stuffs
- food
- glue
- grease
- human and animal waste
- hydrocarbons
- lipstick
- medicine
- mud and dirt
- nail polish
- paint
- plant stains
- shoe polish
- tar.

**Hazards** that must be assessed include:

- biological and animal waste
- blood and blood-stained products
- confined and restricted spaces
- contaminated clothing, materials and equipment
- dust and fibres

- electrical hazards
- heights
- inadequate lighting and ventilation
- indoor air quality
- infectious diseases
- noise.

**Personal protective equipment** must include at least two of the following:

- disposable respirators
- eye protection
- gloves
- safety shoes.

**Equipment** must include at least one of the following:

- air filtration device
- dehumidification equipment
- extraction tools and units
- moisture detection equipment.

**Cleaned** must include

- selecting and using required:
  - equipment
  - PPE
  - chemicals
  - cleaning techniques.

## Unit Mapping Information

CPPCCL3014A Clean fabric upholstery

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO3024 Clean fabric upholstery

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCCL3014A Clean fabric upholstery. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- clean three of the following different types of fabric upholstery:
  - acetate
  - acrylic
  - cotton
  - jute
  - linen
  - nylon
  - polyester
  - polypropylene
  - rayon
  - silk
  - wool
- for each cleaning task, remove three of the following different types of soil:
  - beverage
  - blood
  - candle wax
  - chewing gum
  - dye stuffs
  - food

- glue
- grease
- human and animal waste
- hydrocarbons
- lipstick
- medicine
- mud and dirt
- nail polish
- paint
- plant stains
- shoe polish
- tar.

In doing the above work, the person must:

- identify site hazards and control risks before commencing the task
- analyse data gathered during visual and tactile inspection of fabric upholstery to identify type and characteristics of fabric upholstery to be treated
- identify type of yarns, fibres, methods, dyes, filling material and backing used in upholstery making
- correctly and safely test the colour-fastness of the fabric using one or more of the following tests:
  - burn test
  - chemical test
  - sink and float test
- select and prepare equipment, including personal protective equipment (PPE) and chemicals required for the task
- prepare the work site and apply safe and efficient fabric upholstery cleaning methods
- comply with company and environmental requirements relating to cleaning fabric upholstery.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- environmental requirements relating to cleaning fabric upholstery, including:
  - clean-up, containment and isolation procedures
  - low-energy cleaning methods
  - low environmental impact chemicals
  - low-moisture cleaning methods
  - low water-use equipment and other water-efficient cleaning methods
  - non-chemical cleaning methods
- types and characteristics of different upholstery textures and implications for cleaning:

- crushed velvet
- damask
- glazed
- moire
- quilted
- types and characteristics of different upholstery yarns and implications for cleaning:
  - novelty
  - plied
  - single
  - textured
  - twist
- types and characteristics of different upholstery weaves and implications for cleaning:
  - flat
  - jacquard
  - knitted
  - satin
  - twill
  - velvet
- types and characteristics of different upholstery fibre forms and implications for cleaning:
  - continuous filament
  - staple yarn
  - construction methods, including:
    - backing
    - dying
    - filling
    - manufacturing
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to upholstery cleaning, including:
  - AS/NZS 4849.1 Upholstery cleaning – Fabric upholstery
  - industry advisory standards and codes, such as dangerous goods codes
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS)
- procedures for applying fabric upholstery testing methods
- processes for conducting colour-fastness tests, including:
  - burn test
  - chemical test
  - sink and float test

- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - machine exhaust emissions
  - obsolete equipment
  - used containers
  - used or contaminated PPE
  - used or unused chemicals.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - fabrics as listed in the range of conditions
- specifications:
  - AS/NZS 4849.1 Upholstery cleaning – Fabric upholstery
  - equipment operating manuals
  - product labels
  - SDS
- physical conditions:
  - work site or venue with upholstered furniture
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team
- relationship with client:
  - communication with the client are required to confirm and clarify job requirements.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPCLO3029 Inspect sites prior to carpet cleaning

## Modification History

Release 1.

Replaces superseded equivalent CPPCCL3019A Inspect sites prior to cleaning or treatment.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to complete an initial analysis of a site prior to the carpet-cleaning process to ensure proper assessment of carpet or fabric cleaning needs. The unit requires the ability to analyse potential hazards and risks, assess the condition of the carpet or upholstery, and communicate with the client to confirm client needs and expectations.

The unit supports carpet cleaners who work alone or in teams. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |                                      |   |
|--------------------------------------|---|
| 1. Conduct pre-work site assessment. | 1.1. Approval to access and inspect premises is gained from client. |
|--------------------------------------|---|

- 1.2. **Hazards** are assessed, and risks are controlled and communicated to client.
- 1.3. Future access requirements are identified and negotiated with client.
2. Assess condition of carpet and upholstery.
  - 2.1. Age, usage patterns, and history of carpet or upholstery care are confirmed with client.
  - 2.2. Level of wear and tear, **soil type**, and carpet or fabric fading are identified and documented.
  - 2.3. Age, mobility and needs of people and pets on premises are identified to determine potential impact of work, which is then communicated to client.
3. Determine and communicate approach to cleaning.
  - 3.1. Cleaning approach for carpet or upholstery is identified according to manufacturer specifications.
  - 3.2. Cleaning techniques that achieve desired outcomes and satisfy company procedures and legislative requirements are identified following analysis of gathered information.
  - 3.3. Cleaning technique, limitations of achievable results, and requirements for care after cleaning process are determined and communicated to client.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document assessment and recommendations for the cleaning approach, limitations, and after care requirements.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Hazards*** that must be assessed include:

- biological and environmental contaminants
- chemical exposure via absorption, ingestion and inhalation
- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.

***Soil types*** must include at least five of the following:

- beverage
- blood
- candle wax
- chewing gum
- cigarette butts
- dust
- dye stuffs
- food
- grease
- heavy dirt build-up
- hospital waste
- hydrocarbons
- industrial and chemical waste
- lipstick
- nail polish
- oil
- paper
- plant stains
- rainwater
- shoe polish
- tar.

## Unit Mapping Information

CPPCCL3019A Inspect sites prior to cleaning or treatment

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPCLO3029 Inspect sites prior to carpet cleaning

## Modification History

Release 1.

Replaces superseded equivalent CPPCCL3019A Inspect sites prior to cleaning or treatment.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also inspect and assess the condition of two different types of carpet and one upholstered piece of furniture, and provide recommendations on suitable cleaning care for each.

In doing the above work, the person must:

- identify site hazards and control risks before commencing the task
- communicate with customers to obtain required information and negotiate access
- diagnose textile condition and determine cleaning techniques to be used
- communicate recommended cleaning approach to client.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- carpet characteristics, including:
  - carpet construction
  - carpet types
  - dying methods
  - features of fibres, piles and yarns
  - installation methods
- cleaning options for carpet, including:
  - drying times
  - low-moisture cleaning methods
  - pre-spotting and stain-removal methods

- water-efficient cleaning methods.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- physical conditions:
  - suitable work site or venue with carpets and upholstery
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team
- relationship with client:
  - communication with the client is required to negotiate site access, gather information and communicate recommendations.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPCLO3030 Develop a plan to mitigate water damage and restore carpets

## Modification History

Release 1.

Replaces superseded non-equivalent CPPCCL3018A Inspect sites with water damage and CPPCCL3020A Develop a plan to mitigate water damage and restore carpet.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to inspect water damaged sites, identify the cause of damage, and develop a plan to manage the water damage mitigation and carpet restoration process. Communicating effectively with the client or insurer to clarify their needs and expectations is central to the process. The unit includes working with the owner or manager of the premises and insurance company to plan and resource the project and select the most cost-effective and appropriate restoration techniques.

The unit supports carpet cleaners who work alone or in teams. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Access and prepare site for inspection.
  - 1.1. Client and insurance company contact details are obtained and confirmed, reporting requirements are determined, and approval to access and inspect site is gained.
  - 1.2. Work site *hazards* are assessed and risks controlled according to company, legislative, and health and safety requirements.
  - 1.3. *Health and safety requirements* for site and type of work to be undertaken are identified and applied to planning.
  - 1.4. Insurance arrangements are confirmed and insurance excess payment is collected according to company policy.
  - 1.5. Site is secured and immediate physical hazards are addressed prior to proceeding with assessment.
  - 1.6. *Equipment* required to conduct site assessment is selected and prepared.
  - 1.7. *Personal protective equipment* (PPE) is sourced and used according to manufacturer specifications and industry standards.
2. Assess water damage.
  - 2.1. Existing inundation of water is identified and water entry is isolated or stopped as required.
  - 2.2. Investigations and discussions are held with client to identify source and *type of water*.
  - 2.3. Extent of damage to carpet, underlay and sub-floor is assessed using selected *techniques*, and is documented.
  - 2.4. *Factors affecting mitigation and restoration* are analysed and documented.
  - 2.5. Other building materials and installations are checked for water damage using penetrative and non-penetrative measuring devices to determine degree of moisture and results are documented.
  - 2.6. Photographic evidence of site damage is recorded according to company procedures.
  - 2.7. Site measurements are documented to assist in

- calculating repair costs and determining techniques to be used to assist mitigation and restoration.
3. Develop and document plan.
    - 3.1. Information gathered during site assessment is analysed to determine potential for drying and restoring carpet or replacing carpet and underlay.
    - 3.2. Strategies to protect or restore other building materials and installations are analysed and documented.
    - 3.3. Risk management plan outlining cost-effective solutions for managing and mitigating water damage is developed and documented according to legislative and company procedures.
    - 3.4. Timeline for conducting mitigation and restoration work is negotiated with owner or manager and insurer of premises.
    - 3.5. Formal agreement to proceed with work is secured and documentation, including acceptance of quotation, is completed according to standard company procedures.
  4. Clean and safety check equipment, and store equipment and chemicals.
    - 4.1. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements.
    - 4.2. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• take accurate site measurements</li> <li>• perform cost estimates.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• request advice or further information from client or others</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• read and interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• work instructions</li> </ul> </li> </ul>

- safety data sheets (SDS).
- Writing skills to:
- document findings and produce reports.
- Problem-solving skills to:
- develop damage mitigation plans and strategies for different work sites.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Hazards*** that must be assessed include:
- biological and environmental contaminants
  - chemical exposure via absorption, ingestion and inhalation
  - chemical reactivity
  - dust and fibre particulates
  - electrical
  - environmental allergens
  - explosions
  - fatigue
  - fire
  - manual handling
  - noise
  - poor ventilation
  - slips, trips and falls
  - syringes and sharps
  - working in confined spaces.
- Health and safety requirements*** must include:
- access to communication devices when working alone
  - compliance with Safe Work Australia regulations and guidelines
  - electrical equipment test and tag compliance
  - emergency response procedures
  - environmental controls
  - hazard signs and barricades
  - health and safety induction and refresher training
  - manual handling techniques
  - processes for safely dispensing chemicals
  - risk assessment procedures, including:
    - hazardous chemicals register
    - hierarchy of control
    - job safety analyses (JSA) for low-risk situations

- safe work method statements (SWMS) for high-risk situations
  - incident reporting
  - SDS
  - selection and use of required PPE
  - storage and maintenance of equipment according to manufacturer specifications
  - use of first aid according to SDS information.
- Equipment** must include:
- digital camera
  - moisture measuring devices.
- Personal protective equipment** must include at least two of the following:
- eye protection
  - gloves
  - high visibility vests
  - protective clothing
  - respirators
  - safety shoes
  - tongs
  - wet-work clothing.
- Type of water** must include at least one of the following:
- black water
  - clear water
  - grey water.
- Techniques** must include at least five of the following:
- corner inspection
  - blue lights
  - high intensity inspection lights
  - hygrometers
  - moisture meters
  - moisture sensors or probes
  - psychometric evaluation
  - thermal imaging
  - thermometers
  - visual inspection.
- Factors affecting mitigation and restoration** must include:
- method of carpet construction
  - condition of carpet
  - type and condition of underlay
  - method of installation
  - condition of smooth edge
  - type and condition of sub-floor.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO3030 Develop a plan to mitigate water damage and restore carpets

## Modification History

Release 1.

Replaces superseded non-equivalent CPPCCL3018A Inspect sites with water damage and CPPCCL3020A Develop a plan to mitigate water damage and restore carpet.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also assess two different sites with water damaged carpet and develop and document a plan to mitigate the water damage, including a cost analysis to undertake works. The plan must include all associated costs of works to be undertaken, an assessment of the risks and hazards to be managed before commencing work, and timelines to complete the work.

In doing the above work, the person must:

- communicate with clients to obtain required information and arrange site access
- assess and protect the above sites against the following immediate physical hazards:
  - continuing water inundation
  - electrical dangers
- identify the source of water damage from the following common occurrences:
  - blocked drains
  - burst pipes
  - overflow of sinks and baths
  - river and stream overflows
  - storm damage
- identify the type of water damage from the following:
  - black water
  - clear water
  - grey water
- assess extent of water damage using five of the following different techniques:

- corner inspection
- blue lights
- high intensity inspection lights
- hygrometers
- moisture meters
- moisture sensors or probes
- psychometric evaluation
- thermal imaging
- thermometers
- visual inspection
- comply with company, legislative and regulatory requirements for water mitigation and restoration operations.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- range of methods and equipment used to assess water damage, and their application and limitations
- carpet characteristics, including:
  - carpet construction
  - carpet types
  - dying methods
  - features of fibres, piles and yarns
  - sub-flooring structures
  - underlay types
- carpet restoration options, including:
  - carpet removal and reinstallation
  - pre-spotting and stain-removal methods
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to restoring carpets, including AS/NZS 3733 Textile floor coverings – Cleaning maintenance of residential and commercial carpeting
- processes and techniques for confirming the presence of black, clean and grey water.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - personal protective equipment (PPE) as listed in the range of conditions
- contingencies:
  - water entering site may need to be isolated or stopped to make site safe

- specifications:
  - AS/NZS 3733 Textile floor coverings – Cleaning maintenance of residential and commercial carpeting
  - company documentation relating to developing plans to mitigate water damage and restore carpets
  - clients with differing needs and expectations
- physical conditions:
  - actual or simulated work environments
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team
- relationship with client:
  - confirm requirements
  - liaise with client and insurers.

Timeframe:

- as specified by the task.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

## CPPCLO3035 Maintain cleaning storage areas

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2035A Maintain cleaning storage areas. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to maintain cleaning consumable storage areas to ensure they are accessible to authorised personnel only, that their contents are safely stored, and that equipment is maintained in serviceable condition. It requires the ability to maintain and operate a safe and efficient cleaning storage area following established procedures for storing and using chemicals according to legislative and health and safety requirements. The unit includes the movement and control of equipment, chemicals and consumables used in the provision of cleaning services.

The unit supports cleaners who work alone or in teams. It applies to storage areas in a range of commercial and residential work sites, including cleaners' rooms at a client work site, chemical cupboards, equipment storage bays, and in-built vehicular storage arrangements to keep consumables and equipment secure during transportation.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Elements and Performance Criteria

Elements describe the      Performance criteria describe the performance needed to

- essential outcomes. demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Ensure safety and security of cleaning storage area and its contents.
    - 1.1. ***Storage area*** is secured from unauthorised access according to legislative, company, and ***health and safety requirements***.
    - 1.2. ***Hazards*** in storage area are assessed and risks controlled according to legislative, company, and health and safety requirements.
    - 1.3. Safety warning charts and labels are prominently displayed and ***safety information*** is made accessible according to legislative, company, and health and safety requirements.
    - 1.4. ***Equipment*** is stored, maintained and checked to enable ready access and re-use according to manufacturer specifications and legislative, company, and health and safety requirements.
    - 1.5. ***Cleaning chemicals*** and ***consumables*** are stored according to manufacturer specifications and legislative, company, and health and safety requirements.
    - 1.6. ***Personal protective equipment*** (PPE) is cleaned, safety checked and stored, and maintenance requirements are recorded, according to manufacturer specifications, and health and safety and company requirements.
    - 1.7. Communication tools are stored and used according to company requirements.
    - 1.8. Storage area is kept accessible and free of obstacles according to practical restrictions of site or vehicle, and health and safety and company requirements.
  2. Control equipment, chemical and consumable stock.
    - 2.1. Inventory system of equipment, PPE, chemicals and consumables with maximum and minimum holding levels is maintained according to company requirements.
    - 2.2. Usage patterns are monitored and chemicals and consumables are re-ordered to maintain required levels according to company requirements.
    - 2.3. Labelling system of containers is maintained according to manufacturer specifications and legislative, company, and health and safety requirements.

- |                                     |      |   |
|-------------------------------------|------|---|
|                                     | 2.4. | Chemicals and consumables are issued on a first-in first-out basis according to company requirements.   |
| 3. Handle waste.                    | 3.1. | Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.                                      |
|                                     | 3.2. | Obsolete equipment and chemicals are identified, collected and disposed of according to manufacturer specifications, and environmental, legislative, company, and health and safety requirements. |
| 4. Respond to emergency situations. | 4.1. | Spillages and emergency situations are responded to in line with emergency response procedures and according to environmental, legislative, company, and health and safety requirements.          |
|                                     | 4.2. | Required documentation is completed following an emergency situation and submitted according to environmental, legislative, company, and health and safety requirements.                          |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• identify and access a range of resources to assist in maintaining security and safety of cleaning storage area.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• calculate current and required levels of stock.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret simple, structured manufacturer instructions when using equipment and chemicals</li> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• report faults in equipment to manufacturer and other personnel</li> <li>• use legible handwriting when recording stock levels and completing incident reports.</li> </ul>

- Teamwork skills to:
- work collaboratively with others accessing and using the same storage area.
- Initiative and enterprise skills to:
- proactively report the need for additional products or equipment.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Storage area*** must include at least one of the following:
- cleaners' room located at client work site
  - in-vehicular cleaning storage facility.

- Health and safety requirements*** must include:
- access to communication devices when working alone
  - compliance with Safe Work Australia regulations and guidelines
  - electrical equipment test and tag compliance
  - emergency response procedures
  - environmental controls
  - hazard signs and barricades
  - health and safety induction and refresher training
  - manual handling techniques
  - processes for safely dispensing chemicals
  - risk assessment procedures, including:
    - hazardous chemicals register
    - hierarchy of control
    - job safety analyses (JSA) for low-risk situations
    - safe work method statements (SWMS) for high-risk situations
    - incident reporting
  - SDS
  - selection and use of required PPE
  - storage and maintenance of equipment according to manufacturer specifications
  - use of first aid according to SDS information.
- Hazards*** that must be assessed include:
- biological and environmental contaminants
  - chemical exposure via absorption, ingestion and inhalation
  - chemical reactivity
  - dust and fibre particulates

- electrical
  - environmental allergens
  - explosions
  - fatigue
  - fire
  - manual handling
  - noise
  - poor ventilation
  - slips, trips and falls
  - syringes and sharps
  - working in confined spaces.
- Safety information*** must include:
- chemical co-location, separation and segregation arrangements
  - chemical manifests
  - chemical registers
  - company policies and procedures relating to workplace safety
  - equipment operation manuals
  - manufacturer specifications
  - product labels
  - SDS.
- Equipment*** must include at least five of the following:
- access equipment, such as ladders
  - bins
  - brooms
  - buckets
  - buffers
  - cleaning trolleys
  - cloths
  - cobwebbers
  - doodle bag holders
  - drop sheets
  - drying equipment
  - dustpans and brushes
  - dusters
  - extension poles
  - extraction units
  - wands
  - hoses
  - microfibre products
  - mops
  - polishers
  - pressure-washing equipment and attachments
  - scouring pads
  - scrapers

- scrubbers
- sponges
- spray bottles
- squeegees
- steam cleaners
- sweepers
- vacuum cleaners and attachments
- window cleaning equipment
- work site communication devices.

**Cleaning chemicals** must include at least one of the following:

- acid cleaners
- alkaline cleaners
- low environmental impact chemicals
- neutral cleaners
- solvent cleaners.

**Consumables** must include at least two of the following:

- air fresheners
- hand towels
- liner bags
- soap
- toilet paper.

**Personal protective equipment** must include at least two of the following:

- disposable respirators
- eye protection
- gloves
- protective clothing
- safety shoes.

## Unit Mapping Information

CPPCLO2035A Maintain cleaning storage areas

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO3035 Maintain cleaning storage areas

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2035A Maintain cleaning storage areas. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also maintain one of the following cleaning storage areas:

- cleaners' room located at client work site
- in-vehicular cleaning storage facility used to transport cleaning equipment from site to site.

In doing the above work, the person must:

- maintain cleaning storage area and stock levels, ensuring correct storage of equipment, chemicals and consumables required for work site and client requirements
- maintain the security and accessibility of storage area
- maintain accurate labelling of chemicals
- maintain legible stock control records and documentation
- access each of the following documentation:
  - accident and incident reporting documentation
  - job sheets
  - health and safety control procedures, forms and documentation
  - safety data sheets (SDS).

In doing the above work, the person must also implement correct emergency response procedures in the event of a chemical spillage on site or inside the cleaning storage area, including:

- undertaking correct clean-up procedures, including erecting required signs and barricades
- accurately and legibly completing required incident reporting documentation.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- application and operation of on-site communication tools, including:
  - mobile telephones
  - noticeboards
  - two-way radios
  - whiteboards
- documentation requirements in the event of an incident or accident
- environmental requirements relating to maintaining cleaning storage areas, including:
  - clean-up, containment and isolation procedures
  - environmental protection agency requirements relating to maintaining cleaning storage areas
  - use of low-energy cleaning methods
  - use of low-moisture cleaning methods
  - use of low water-use equipment and water-efficient cleaning methods
  - use of non-chemical cleaning methods
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to maintaining cleaning storage areas, including:
  - health and safety legislation
  - industry advisory standards and codes, such as dangerous goods codes
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to SDS
- procedures for safe treatment and handling of the following waste:
  - chemicals past their expiry date
  - obsolete equipment
  - packaging
  - used containers
  - used or contaminated personal protective equipment (PPE)
  - used or unused chemicals
- processes for inventory and stock control and ordering replenishment stock
- manufacturer specifications for equipment and chemicals being used.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
  - consumables as listed in the range of conditions
- contingencies:
  - handling of chemicals that are past expiry
  - disposal of contaminated PPE and materials
  - handling of emergency situations
- specifications:
  - equipment operating manuals
  - product labels
  - SDS
- physical conditions:
  - access to commercial or residential cleaning site with suitable cleaning storage area
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPCLO3036 Clean at heights

## Modification History

Release 1.

Replaces superseded equivalent CPPCLO3036A Clean at high levels.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to clean at heights above two metres from the ground or from a solid floor construction. It covers assessing the extent of the cleaning task and selecting the required equipment, chemicals and cleaning methods. Cleaning at heights may occur indoors or outdoors and can involve the use of specialised equipment to access the area to be cleaned.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites. The unit does not apply to work requiring the use of elevated work platforms.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Identify work area 1.1. Work area and job requirements are identified and need

- requirements. for access equipment is confirmed according to work instructions.
- 1.2. Method of accessing work area is identified according to **safe work method statement** (SWMS).
  - 1.3. Access equipment is selected, set up and inspected for defects, and issues are reported and rectified before commencing cleaning tasks.
  - 1.4. Safe work methods for moving cleaning equipment and chemicals are identified to minimise risks.
  - 1.5. Personal protective equipment (PPE) is selected according to the work task, manufacturer specifications, and health and safety and company requirements.
  - 1.6. Tasks are sequenced to ensure maximum efficiency for completing cleaning requirements.
  - 1.7. Drop sheets are placed on floor, furniture and equipment as required and according to client and site requirements.
2. Access area to be cleaned.
    - 2.1. **Fall protection system** where required is correctly fitted, adjusted and anchored.
    - 2.2. Work site **hazards** are assessed and risks controlled according to company, legislative, and **health and safety requirements**.
    - 2.3. Access equipment is inspected for defects, and issues are reported and rectified within scope of own responsibilities according to health and safety requirements.
    - 2.4. Cleaning equipment and chemicals are positioned to eliminate risk of items falling.
  3. Conduct cleaning tasks.
    - 3.1. Cleaning is conducted following approved procedures and SWMS.
    - 3.2. Communication with team members and other site personnel is maintained as required to progress cleaning tasks within agreed timelines.
    - 3.3. Fall protection system is kept in place and adjusted to cater for movement during cleaning process.
    - 3.4. Scaffold components and fall barriers are kept in place during cleaning process.

- 3.5. Work area is exited following SWMS and supervisor-approved methods for moving self, cleaning equipment and chemicals to ground level.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix chemicals required for cleaning tasks using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret safety instructions in a range of texts, including:               <ul style="list-style-type: none"> <li>• equipment manuals</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• locate and apply instructions for cleaning tasks</li> <li>• plan and schedule cleaning tasks.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safe work method statement</i></b> must include:	<ul style="list-style-type: none"> <li>• tools and equipment, including PPE prescribed by legislation, regulations, and work site and workplace requirements</li> <li>• establishing exclusion areas using signs and barricades</li> <li>• hazard identification and risk assessment for work site and job tasks</li> <li>• health and safety and environmental requirements mandated by regulatory authorities, work site safety plan, and workplace procedures</li> <li>• risk control measures to be implemented for job tasks</li> <li>• safe operating procedures for:</li> </ul>
--	--

- accessing, moving within, and leaving work site
  - moving and placing tools, equipment and materials
  - using tools and equipment at heights.
- Fall protection systems*** must include at least one of the following:
- lanyards
  - harness.
- Hazards*** that must be assessed include:
- biological and environmental contaminants
  - chemical exposure via absorption, ingestion and inhalation
  - chemical reactivity
  - dust and fibre particulates
  - electrical
  - environmental allergens
  - explosions
  - fatigue
  - fire
  - manual handling
  - noise
  - poor ventilation
  - slips, trips and falls
  - syringes and sharps
  - working in confined spaces.
- Health and safety requirements*** must include:
- access to communication devices when working alone
  - compliance with Safe Work Australia regulations and guidelines
  - electrical equipment test and tag compliance
  - emergency response procedures
  - environmental controls
  - hazard signs and barricades
  - health and safety induction and refresher training
  - manual handling techniques
  - processes for safely dispensing chemicals
  - risk assessment procedures, including:
    - hierarchy of control
    - job safety analyses (JSA) for low-risk situations
    - SWMS for high-risk situations
    - incident reporting
  - SDS
  - selection and use of required PPE
  - storage and maintenance of equipment according to manufacturer specifications
  - use of first aid according to SDS information.

# Assessment Requirements for CPPCLO3036 Clean at heights

## Modification History

Release 1.

Replaces superseded equivalent CPPCLO3036A Clean at high levels.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- identify, assess and manage risks while completing three different cleaning tasks at a height above two metres from the ground or from a solid floor construction, with one of the cleaning tasks requiring the use of a fall protection system
- transport cleaning equipment and chemicals to the above work areas
- complete the above cleaning tasks using the transported cleaning equipment and chemicals
- return the cleaning equipment and chemicals to ground level at job completion.

In doing the above work, the person must:

- locate, interpret and apply cleaning task information, standards and specifications
- select, prepare and use required access and fall protection system and work methods
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to cleaning at heights, including:
  - Australian standards and codes of practice for the safe use of ladders
  - work health and safety legislation when cleaning at heights
- preparation and safe use of access equipment when cleaning, including:
  - bosun chairs

- building maintenance units
- extension poles
- industrial rope access
- ladders, including extension ladders
- scaffolding
- water-fed extension brooms
- processes for identifying and reporting faults in access equipment and fall protection systems.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - access equipment required for site
  - cleaning equipment required for task
  - fall protection systems required for site
  - signs and barricades required for task
- materials:
  - cleaning products required for task
- specifications:
  - safe work method statement (SWMS)
- physical conditions:
  - suitable venue with cleaning required at least two metres above ground or a solid floor construction
  - suitable weather conditions if task performed outdoors
- contingencies:
  - faults in access equipment
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

## CPPCLO3037 Clean external surfaces

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2037A Clean external surfaces. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to use cleaning equipment, chemicals and materials to remove soil from external surfaces. It covers assessing the extent of the cleaning task; selecting required equipment, chemicals and cleaning methods; and performing the task safely from ground level using extension poles if height access is required.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites. The unit does not apply to specialised cleaning of sandstone and heritage buildings.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Plan and prepare.
  - 1.1. Type and condition of **external surface** are assessed, **soil type** is identified, job requirements are reviewed, and issues are clarified.
  - 1.2. Work site **hazards** are assessed and risks controlled according to company, legislative, and **health and safety requirements**.
  - 1.3. Cleaning techniques are confirmed according to company requirements.
  - 1.4. **Equipment** is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.5. Required **cleaning chemicals** are selected and prepared.
  - 1.6. **Personal protective equipment** (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
  - 1.7. Signs and barricades are installed according to health and safety, and company requirements.
  - 1.8. Pre-existing damage is identified and reported according to company requirements.
2. Clean and tidy work site.
  - 2.1. Surface area is pre-sprayed with cleaning chemicals if required according to manufacturer specifications.
  - 2.2. Surface area is cleaned using selected and prepared equipment, chemicals and cleaning techniques to remove visible dirt and grime.
  - 2.3. Surface area is rinsed and wiped or squeegeed to remove streaks and excess water.
  - 2.4. Cleaning process is repeated if required for heavy staining.
  - 2.5. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
  - 2.6. Signs and barricades are removed according to health and safety, and company requirements.
3. Clean and safety
  - 3.1. Equipment and PPE are cleaned, safety checked and

check equipment, and store equipment and chemicals.

stored according to manufacturer specifications and environmental, health and safety, and company requirements.

- 3.2. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix required chemicals using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret simple, structured manufacturer instructions when using equipment and preparing chemicals</li> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>• work collaboratively with others at the same work site.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>• identify and select cleaning products and equipment for a range of external surfaces.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***External surfaces*** must include at least

- aluminium
- brick

- three of the following:
- ceramic
  - concrete
  - marble
  - metal
  - polymer resin
  - rendered surfaces
  - terrazzo
  - wood.

- Soil types* must include at least two of the following:
- food and beverage stains
  - graffiti
  - human and animal waste
  - mould
  - mud and soil
  - scuff marks.

- Hazards* that must be assessed include:
- biological and environmental contaminants
  - chemical exposure via absorption, ingestion and inhalation
  - chemical reactivity
  - dust and fibre particulates
  - electrical
  - environmental allergens
  - explosions
  - fatigue
  - fire
  - manual handling
  - noise
  - poor ventilation
  - slips, trips and falls
  - syringes and sharps
  - working in confined spaces.

- Health and safety requirements* must include:
- access to communication devices when working alone
  - compliance with Safe Work Australia regulations and guidelines
  - electrical equipment test and tag compliance
  - emergency response procedures
  - environmental controls
  - hazard signs and barricades
  - health and safety induction and refresher training
  - manual handling techniques
  - processes for safely dispensing chemicals
  - risk assessment procedures, including:
    - hazardous chemicals register
    - hierarchy of control

- job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
  - SDS
  - selection and use of required PPE
  - storage and maintenance of equipment according to manufacturer specifications
  - use of first aid according to SDS information.
- Equipment** must include at least two of the following:
- buckets
  - cloths
  - extension poles
  - extraction units for contaminated waste
  - garbage bins
  - microfibre products
  - nylon scourer pads
  - scrapers
  - scrubbing brushes
  - soft bristle brooms
  - spray bottles
  - squeegees
  - water-fed brooms.
- Cleaning chemicals** must include at least one of the following:
- acid cleaners
  - alkaline cleaners
  - low environmental impact chemicals
  - neutral cleaners.
- Personal protective equipment** must include at least two of the following:
- disposable respirators
  - eye protection
  - gloves
  - high visibility vests
  - masks
  - safety shoes
  - sun protection
  - wet-work clothing.

## Unit Mapping Information

CPPCLO2037A Clean external surfaces

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPCLO3037 Clean external surfaces

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2037A Clean external surfaces. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- clean three of the following different external surfaces, each measuring at least 10 square metres:
  - aluminium
  - brick
  - ceramic
  - concrete
  - marble
  - metal
  - polymer resin
  - rendered surfaces
  - terrazzo
  - wood
- select and use three of the following cleaning methods to clean the above surfaces:
  - low-water cleaning methods, such as using microfibre cleaning products
  - pre-spraying
  - rinsing
  - scraping
  - spot cleaning
  - squeegeeing.

In doing the above work, the person must:

- identify site hazards and control risks before commencing the task
- identify type and characteristics of external surfaces and types of soil
- select and prepare cleaning equipment and chemicals required for the task
- install required safety signs and barricades at the site
- correctly and safely handle waste generated or collected during the cleaning process.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- range and application of cleaning chemicals and equipment for external surfaces
- cleaning techniques suited to different surface types
- environmental requirements relating to cleaning external surfaces, including:
  - clean-up, containment and isolation procedures
  - environmental protection agency requirements relating to using and disposing of cleaning chemicals
  - use of low water-use equipment and other water-efficient cleaning methods
- processes for treating and handling waste, including:
  - chemicals past their expiry date
  - obsolete equipment
  - packaging
  - used containers
  - used or contaminated personal protective equipment (PPE)
  - used or unused chemicals
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS)
- types and characteristics of external surfaces and required cleaning methods.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions

- specifications:
  - equipment operating manuals
  - product labels
  - SDS
- physical conditions:
  - suitable work site or venue with a range of external surfaces as listed in the performance evidence
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## **Links**

Companion Volume implementation guides are found in VETNet -

# CPPCLO3038 Clean food-handling areas

## Modification History

Release 1.

Replaces superseded equivalent CPPCLO3038A Clean food-handling areas.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to clean areas where food is dispatched, handled, inspected, packaged, prepared, processed, received, stored and transported. The unit covers assessing the extent of the cleaning task and selecting required cleaning equipment, chemicals and methods.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites, including food courts and commercial or industrial food-processing kitchens or plants.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |                              |   |
|------------------------------|---|
| 1. Plan and prepare to clean | 1.1. Work site <b><i>hazards</i></b> , including cross-contamination, are assessed and risks controlled according to company, |
|------------------------------|---|

- food-handling areas.
- legislative, and *health and safety requirements*.
- 1.2. Requirements of food-safety program applicable to the area are accessed, interpreted and applied to planning.
  - 1.3. *Surfaces* and *soil types* are identified by observation, and cleaning techniques and *cleaning chemicals* required for task are selected and prepared.
  - 1.4. *Equipment* is selected, checked for serviceability and compliance with cleaning and sanitation requirements of food-safety program, and faults are rectified or reported before starting work.
  - 1.5. *Personal protective equipment* (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
  - 1.6. *Consumables* are obtained to meet anticipated usage patterns according to company requirements.
  - 1.7. Signs and barricades are selected and installed according to health and safety, and company requirements.
2. Replenish consumables and remove waste.
    - 2.1. Consumables are replenished according to client and company requirements.
    - 2.2. Rubbish bins are emptied, cleaned and sanitised according to specified requirements, and new replacement bin liners are inserted.
    - 2.3. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
3. Clean food-handling surfaces.
    - 3.1. Loose dirt and debris are removed from food-handling surfaces prior to applying cleaning treatment.
    - 3.2. Physical movement around food-handling areas is conducted according to food-safety program.
    - 3.3. Chemicals are applied to surfaces and allowed to dwell according to manufacturer specifications and company requirements.
    - 3.4. Surfaces are thoroughly rinsed and allowed to dry according to company requirements.
    - 3.5. Practices inconsistent with food-safety program are reported according to company requirements.

- |   |  |
|---|--|
| 4. Sanitise food-handling surfaces.         | 4.1. Chemical sanitisers or heat are applied to food-handling surfaces according to job requirements.  |
|   | 4.2. Surfaces are thoroughly rinsed and allowed to dry according to company requirements.  |
| 5. Clean, safety check and store equipment. | 5.1. Signs and barricades are removed according to health and safety, and company requirements.  |
|   | 5.2. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements. |
|   | 5.3. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.                              |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• source and apply requirements of different food-safety programs to different food-handling environments.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• perform calculations required for diluting and mixing chemicals as specified on product labels.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret manufacturer instructions when using equipment and preparing chemicals</li> <li>• read and interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• chemical labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Hazards*** that must be assessed include:

- biological and environmental contaminants
- chemical exposure via absorption, ingestion and inhalation
- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- sharps.

***Health and safety requirements*** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

***Surfaces*** must include

- ceramics and porcelain

at least five of the following:

- chrome
- concrete
- floors and walls
- fridge and freezer seals
- glass
- laminate
- metal
- paint
- plastic
- stainless steel
- stone
- terracotta
- vinyl.

*Soil types* must include at least three of the following:

- baked-on food and grease
- dust
- food and drink stains
- food and drink residue
- grease and oil
- litter
- mould
- rust
- tannin stains.

*Cleaning chemicals* must include at least one of the following:

- acid cleaners
- alkaline cleaners
- low environmental impact chemicals
- neutral cleaners
- solvent cleaners.

*Equipment* must include at least five of the following:

- brooms
- brushes and dustpan
- buckets
- cleaning trolleys
- cloths
- disposable wipes
- doodle bugs
- hoses and nozzles
- mops
- sharps disposal units
- scourers
- scrapers
- scrubbing and polishing machines
- scrubbing brushes
- tongs

- Personal protective equipment* must include at least two of the following:
- squeegees.
  - disposable respirators
  - eye protection
  - gloves
  - hair nets
  - safety shoes
  - tongs.
- Consumables* must include at least two of the following:
- air fresheners
  - bin liners
  - disposable gloves
  - paper hand towels
  - liquid hand-soap.

## Unit Mapping Information

CPPCLO3038A Clean food-handling areas

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO3038 Clean food-handling areas

## Modification History

Release 1.

Replaces superseded equivalent CPPCLO3038A Clean food-handling areas.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also clean three of the following different food-handling areas:

- commercial food-preparation area
- commercial food-processing area
- food court
- food storage area
- refrigeration area
- public food-handling area
- residential food-handling area.

In doing the above work, the person must:

- identify and control site hazards, including contamination hazards, before commencing cleaning, and take steps to prevent identified hazards
- identify type of surfaces and soil present in the work area
- select cleaning equipment required for the task
- fit and use personal protective equipment (PPE) as required by work tasks to meet food business requirements
- maintain housekeeping standards in food-handling area and dispose of waste to meet food-handling requirements
- maintain personal hygiene to ensure that food safety is not compromised
- replenish two different types of consumables.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- methods for cleaning food-handling areas, including the use of microfibre products
- methods for cleaning surfaces in food-handling areas
- cleaning and sanitation requirements of food-handling areas, including:
  - required chemicals, equipment and cleaning methods
  - personal hygiene practices, including:
    - clothing and footwear requirements associated with working and moving in and between food-handling and non food-handling areas
    - washing hands before entering food-handling areas
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to cleaning food-handling areas, including Food Safety Standard 3.2.2, Clause 17:3
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - obsolete equipment
  - disposal of packaging
  - sweeping detritus
  - used containers
  - used or contaminated PPE
  - used or unused chemicals
- processes for recording and reporting health conditions and illness as required by workplace food-safety procedures
- purpose and operation of food-safety program as it applies to cleaning food-handling areas, including specifications for:
  - how hazards can be controlled
  - how controls are monitored
  - corrective actions required if conditions are not met
  - information to be recorded and procedures to be signed off
  - key requirements of legislation and regulations relating to work in food-handling areas
  - responsibilities for any person visiting or working in food-handling areas
  - minimum procedures to ensure person does not:
    - contaminate food
    - have unnecessary contact with ready-to-eat food
    - spit, smoke or use tobacco or similar in food-handling areas
- range of potential contamination hazards in food-handling areas, including:
  - chemical contamination of food caused by cleaning and sanitation chemicals
  - microbiological contamination of food resulting from cross-contamination when moving into and between food-handling areas
  - physical contamination of food caused by metal, glass, plastic and cloths used in the cleaning process
- routes of entry and potential symptoms of exposure to chemicals

- types and application of different signs and barricades to be installed prior to cleaning, including:
  - physical barricades and restraints erected to restrict access to site
  - signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including:
    - cleaning in progress
    - hazardous chemicals in use or present in work area.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
  - consumables as listed in the range of conditions
- specifications:
  - Food Safety Standard 3.2.2, Clause 17:3
  - food-safety program
  - work instructions and schedules
- physical conditions:
  - work site with food-handling areas
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

## CPPCLO3040 Clean ceiling surfaces and fittings

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2010A Clean ceiling surfaces and fittings. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to clean ceiling surfaces and their fittings. It covers assessing the ceiling and fittings to identify the type of soil present, and then selecting and preparing required equipment and cleaning processes. Ceiling surfaces and fittings may be accessed using extension poles or ladders; and surfaces are cleaned to ensure they are free from adhered soil, cobwebs and dust.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites. Ceiling surfaces can be flat, suspended or raked, and made of hard or absorbent materials.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Plan and prepare.
  - 1.1. Ceiling surface area and *fittings* to be cleaned are assessed, soil types are identified, job requirements are reviewed, and issues are clarified.
  - 1.2. Work site *hazards* are assessed and risks controlled according to company, legislative, and *health and safety requirements*.
  - 1.3. Cleaning techniques are selected according to company requirements.
  - 1.4. *Equipment* is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.5. Required *cleaning chemicals* are selected and prepared.
  - 1.6. *Personal protective equipment* (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
  - 1.7. Signs and barricades are selected and installed according to health and safety, and company requirements.
  - 1.8. Pre-existing damage is identified and reported according to company requirements.
2. Clean ceilings and fittings.
  - 2.1. Floor, furniture and equipment are covered with drop sheets according to company requirements.
  - 2.2. Cobwebs and dry dust are removed from ceiling and fittings using required equipment according to job requirements.
  - 2.3. Difficult to reach areas are vacuumed according to job requirements.
  - 2.4. Fittings are dry wiped according to job requirements.
  - 2.5. Chemical solution is applied, if required, to surfaces and fittings, allowed to dwell, and rinsed from surfaces according to manufacturer specifications and job requirements.
  - 2.6. Adhered soil is removed and delicate surfaces are cleaned using equipment, including stepladder, selected according to manufacturer safety recommendations.

- |    |  |      |   |
|----|--|------|---|
| 3. | Tidy work site.  | 3.1. | Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.      |
|    |  | 3.2. | Furniture and fittings are returned to original position according to job requirements.   |
|    |  | 3.3. | Signs and barricades are removed according to health and safety, and company requirements.  |
| 4. | Clean and safety check equipment, and store equipment and chemicals. | 4.1. | Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements. |
|    |  | 4.2. | Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.                              |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix required chemicals using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret simple, structured manufacturer instructions when using equipment and preparing chemicals</li> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Fittings*** must include at least five of the following:

- audiovisual equipment
- cameras
- ceiling fans
- ceiling roses
- cornices
- lighting tracks
- pendant lighting
- recessed lights
- skylights
- sprinkler systems
- vents and grilles.

***Hazards*** to be assessed must include:

- biological and environmental contaminants
- chemical exposure via absorption, ingestion and inhalation
- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.

***Health and safety requirements*** must include:

- access to communication devices when working alone
- compliance with safe work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:

- hazardous chemicals register
- hierarchy of control
- job safety analyses (JSA) for low-risk situations
- safe work method statements (SWMS) for high-risk situations
- incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.
- buckets
- cleaning cloths
- cleaning trolleys
- cobwebbers
- drop sheets
- dust mops
- extension poles
- flat mop
- lamb's wool applicators
- microfibre cloths
- sponges
- vacuum cleaner and accessories.

**Equipment** must include at least three of the following:

**Cleaning chemicals** must include at least one of the following:

**Personal protective equipment** must include at least two of the following:

- glass cleaners
- solvent cleaners
- surfactants.
- eye protection
- goggles
- masks
- safety shoes.

## Unit Mapping Information

CPPCLO2010A Clean ceiling surfaces and fittings

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO3040 Clean ceiling surfaces and fittings

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2010A Clean ceiling surfaces and fittings. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- dust and cobweb one ceiling from the ground, using equipment selected for the job
- use selected equipment and materials to clean five of the following fittings:
  - audiovisual equipment
  - cameras
  - ceiling fans
  - ceiling roses
  - cornices
  - lighting tracks
  - pendant lighting
  - recessed lights
  - skylights
  - sprinkler systems
  - vents and grilles
- one of the above fittings must be accessed using a stepladder according to manufacturer and safety specifications.

In doing the above work, the person must:

- identify site hazards and control risks before commencing the task
- identify type and characteristics of ceiling surface and fittings

- select and prepare cleaning equipment and chemicals required for the task
- use safe and efficient cleaning methods
- correctly and safely handle waste, including contaminated materials
- comply with company requirements.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- cleaning techniques for removing soil from ceiling surfaces and fittings
- types and characteristics of cleaning chemicals and their application on different surfaces, including:
  - application techniques
  - risks of damage to surfaces caused by use of incompatible chemicals
  - environmental and health controls
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to cleaning ceiling surfaces and fittings
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - obsolete equipment
  - packaging
  - used containers
  - used or contaminated personal protective equipment (PPE)
  - used or unused chemicals
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS)
- types of ceiling and fitting surfaces and their characteristics.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
- specifications:
  - equipment operating manuals
  - product labels
  - SDS

- safety instructions
- physical conditions:
  - work site or venue with ceiling surfaces and fittings
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

# CPPCLO3043 Clean using microfibre and chemical-free techniques

## Modification History

Release 1.

Replaces superseded equivalent CPPCLO2043A Clean using microfibre techniques.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to use microfibre and chemical-free cleaning techniques to clean a range of surfaces, including durable and soft surfaces on floors, furniture and fittings. It covers assessing the capacity for microfibre and chemical-free cleaning techniques to clean surfaces, selecting required equipment and cleaning techniques, and ensuring microfibre products are cleaned and stored following the cleaning work according to manufacturer specifications.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Prepare for cleaning.
  - 1.1. Area to be cleaned is assessed, and company and client requirements are identified and confirmed.
  - 1.2. Pre-existing damage to surfaces is identified and reported according to company requirements.
  - 1.3. Work site *hazards* are assessed and risks controlled according to company, legislative, and *health and safety requirements*.
  - 1.4. *Personal protective equipment* (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
  - 1.5. *Microfibre cleaning equipment* is selected according to type of surface, level of soiling, and company colour-coding procedures; and is prepared for use.
2. Undertake cleaning process.
  - 2.1. Water is applied to low level stains and surface is cleaned using selected equipment.
  - 2.2. Dry microfibre cleaning equipment is applied to surfaces, dust and dry debris are removed, and surface cleaning is finished to client requirements.
  - 2.3. Damp microfibre cleaning equipment is applied to surfaces, and surfaces are cleaned and finished according to client requirements.
  - 2.4. Stains and marks that cannot be removed during the cleaning process are identified and reported according to company procedures and client requirements.
  - 2.5. Microfibre cleaning equipment is checked regularly during cleaning process and soiled equipment is stored separately from unsoiled equipment while moving between cleaning areas.
3. Clean and store equipment.
  - 3.1. Microfibre cleaning equipment is washed, dried and sanitised as required and according to manufacturer specifications.
  - 3.2. Microfibre cleaning equipment is stored according to company procedures.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions to clarify job requirements</li><li>• respond clearly and concisely to client questions.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret and apply manufacturer instructions for cleaning and maintaining microfibre equipment</li><li>• interpret directions and safety instructions, including:<ul style="list-style-type: none"><li>• equipment operating manuals</li><li>• manufacturer instructions</li><li>• safety data sheets (SDS).</li></ul></li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• document and report faults in equipment to manufacturer and other personnel.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>• identify type of soiling and confirm use of microfibre and chemical-free cleaning techniques required for the task.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Hazards</i></b> that must be assessed include:	<ul style="list-style-type: none"><li>• biological and environmental contaminants</li><li>• chemical exposure via absorption, ingestion and inhalation</li><li>• chemical reactivity</li><li>• dust and fibre particulates</li><li>• electrical</li><li>• environmental allergens</li><li>• explosions</li><li>• fatigue</li><li>• fire</li><li>• manual handling</li><li>• noise</li><li>• poor ventilation</li><li>• slips, trips and falls</li><li>• syringes and sharps</li><li>• working in confined spaces.</li></ul>
--	---

**Health and safety requirements** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

**Personal protective equipment** must include at least two of the following:

- clothing
- eye protection
- gloves
- masks
- safety shoes.

**Microfibre cleaning equipment** must include at least three of the following:

- cleaning trolley
- cloths
- dusting wand
- mitts
- mops
- spray bottles
- squeegees.

# Assessment Requirements for CPPCLO3043 Clean using microfibre and chemical-free techniques

## Modification History

Release 1.

Replaces superseded equivalent CPPCLO2043A Clean using microfibre techniques.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also clean two of the following surfaces in a commercial or residential work site, using microfibre and chemical-free cleaning techniques:

- fittings
- floor
- furniture.

In doing the above work, the person must:

- assess and manage work site risks
- assess suitability of microfibre and chemical-free cleaning techniques for the task
- clean and store used microfibre equipment at the end of the cleaning task according to manufacturer specifications.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- benefits and application of microfibre and low-water techniques when cleaning
- characteristics and techniques of microfibre and chemical-free cleaning products
- colour-coding conventions used when handling and storing cleaning products
- company processes and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
  - hazard and risk assessment techniques

- health and safety procedures
- injury, dangerous occurrence and incident reporting
- company procedures required for the cleaning tasks specified in the performance evidence, including:
  - client and contractual requirements
  - company service standards
  - documentation and information systems and processes
  - work roles and responsibilities
  - use of electronic job scheduling and communication devices
- methods for cleaning microfibre cloths and mops.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - microfibre cleaning equipment as listed in the range of conditions
  - personal protective equipment (PPE) as listed in the range of conditions
- specifications:
  - equipment operating manuals
  - colour-coding conventions
- physical conditions:
  - suitable work site or venue with surfaces listed in the performance evidence
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## CPPCLO3044 Prepare rooms for guests and residents

### Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2044A Prepare rooms for guests and residents. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to prepare rooms for guests or residents in a range of accommodation types. It covers assessing the extent of the cleaning task; selecting required equipment, chemicals and methods; and performing cleaning tasks safely.

The unit supports cleaners who work alone or in teams. It applies to preparing rooms for guests or residents in a range of accommodation types, including private residences, hotels and motels.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Plan and prepare to service guest room.
  - 1.1. Work site **hazards** are assessed and risks controlled according to company, legislative, and **health and safety requirements**.
  - 1.2. Cleaning methods are selected according to job requirements.
  - 1.3. **Equipment** required for **room** cleaning is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.4. Required cleaning chemicals are selected, prepared and loaded safely on to cleaning trolley.
  - 1.5. **Personal protective equipment** (PPE) is selected and used according to manufacturer specifications, and health and safety and company requirements.
  - 1.6. Pre-existing damage to room and contents is identified and reported according to company requirements.
  - 1.7. Signs and barricades are selected and installed according to health and safety, and company requirements.
2. Inspect rooms.
  - 2.1. Rooms are accessed in the correct order and with minimum disruption to guests or residents.
  - 2.2. Guest or resident items left in vacated rooms are collected and stored according to company requirements.
  - 2.3. Pests are identified promptly and action is taken to eliminate them according to safety and company procedures.
  - 2.4. Unusual and suspect items or occurrences are reported promptly according to company procedures.
3. Clean and service rooms.
  - 3.1. Linen is removed from beds, checked for stains and damage, and transferred for cleaning.
  - 3.2. Clean bed linen is fitted according to job requirements.
  - 3.3. **Furniture, fixtures and fittings** are cleaned according to client requirements.
  - 3.4. **Room supplies** for each room are checked and replenished or replaced according to client requirements.

- |    |  |      |   |
|----|--|------|---|
|    |  | 3.5. | Signs and barricades are removed according to health and safety, and company requirements.  |
| 4. | Clean and safety check equipment, and store equipment and chemicals. | 4.1. | Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements. |
|    |  | 4.2. | Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety, and company requirements.                             |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix required chemicals using whole numbers and routine fractions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify job requirements</li> <li>• respond clearly and concisely to client questions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• equipment operating manuals</li> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• document and report faults in equipment to manufacturer and other personnel.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b>Hazards</b> that must be assessed include:	<ul style="list-style-type: none"> <li>• biological and environmental contaminants</li> <li>• chemical exposure via absorption, ingestion and inhalation</li> <li>• chemical reactivity</li> <li>• dust and fibre particulates</li> </ul>
---	---

***Health and safety requirements*** must include:

- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.
- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

***Equipment*** must include at least two of the following:

- brushes
- buckets
- cleaning and polishing cloths
- mops
- vacuum cleaners.

***Rooms*** must include at least three of the following:

- balcony
- bathroom
- bedroom
- kitchen
- lounge room.

- Personal protective equipment*** must include at least two of the following:
- disposable respirators
  - eye protection
  - gloves
  - masks
  - safety shoes
  - sun protection.
- Furniture, fixtures and fittings*** must include at least three of the following:
- desks
  - floor surfaces
  - light fittings
  - mirrors and glassware
  - refrigerators
  - shelving
  - soft furnishings
  - telephones
  - televisions
  - wardrobes.
- Room supplies*** must include at least two of the following:
- bathroom supplies
  - crockery and cutlery
  - fridge supplies
  - glassware
  - linen
  - local information
  - magazines and newspapers
  - stationery
  - tea, coffee and sugar.

## Unit Mapping Information

CPPCLO2044A Prepare rooms for guests and residents

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPCLO3044 Prepare rooms for guests and residents

## Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2044A Prepare rooms for guests and residents. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- prepare three of the following rooms for guests:
  - balcony
  - bathroom
  - bedroom
  - kitchen
  - lounge room
- for each of the above rooms, replenish two of the following different room supplies:
  - bathroom supplies
  - crockery and cutlery
  - fridge supplies
  - glassware
  - linen
  - local information
  - magazines and newspapers
  - stationery
  - tea, coffee and sugar.

In doing the above work, the person must:

- identify site hazards and control risks before commencing the task
- select and prepare equipment required for the task, including personal protective equipment (PPE)
- use safe and efficient cleaning methods.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- cleaning chemicals and equipment for cleaning room furniture, fixtures and fittings
- cleaning methods, including:
  - methods for various types of furniture, fixtures and fittings
  - pre-spotting and stain removal
- key requirements of legislation, regulations, codes of practice and industry advisory standards when preparing rooms for guests and residents, including:
  - privacy requirements
  - health and safety requirements
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
- materials:
  - room supplies as listed in the range of conditions
- specifications:
  - equipment operating manuals
  - SDS
- physical conditions:
  - work site or venue with fully equipped guest or resident rooms with a range of furniture, fixtures and fittings requiring cleaning
  - housekeeping storage area
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## CPPCLO3045 Clean high-touch surfaces

### Modification History

Release	Comment
Release 1	Replaces superseded non-equivalent CPPCLO3044A Clean using steam sanitising techniques. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to remove all soils and microorganisms from a range of frequently touched surfaces. It covers selecting required cleaning equipment and solutions, applying techniques to remove contaminants from the high-touch surfaces, and preventing cross-contamination.

The unit supports cleaners who work alone or in teams. It applies to removing soil from high-touch surfaces in a range of commercial and residential work sites. It also applies to non-medical contexts, such as healthcare, aged care and childcare facilities; and to public areas, such as food courts, waiting rooms, washrooms and offices. The high-touch surfaces include door handles, hand railings, dining tables, nappy change tables, desks, reception counters, computer keyboards and mice, telephones and light switches.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the      Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Plan and prepare.
  - 1.1. Work instructions are obtained, high-touch surfaces and ***soil types*** are identified and assessed, and required cleaning methods are selected and confirmed.
  - 1.2. Work site ***hazards*** are identified and risks controlled according to company, legislative, and ***health and safety requirements***.
  - 1.3. Colour-coded ***cleaning equipment*** is selected according to area to be cleaned, checked for serviceability and cleanliness, and replaced as required before starting work.
  - 1.4. ***Cleaning solutions*** are selected and prepared according to surface and soil to be cleaned, and client and company requirements.
  - 1.5. Tasks are ***sequenced*** to ensure hygiene and efficiency in completion of cleaning tasks.
  - 1.6. ***Personal protective equipment*** (PPE) is selected and used according to manufacturer specifications, and health and safety and company requirements.
  - 1.7. Pre-existing damage to surfaces is identified and reported according to company requirements.
2. Clean surfaces.
  - 2.1. Loose soil and debris are removed from surfaces using required cleaning equipment and techniques.
  - 2.2. Required cleaning solution is applied to surfaces using correctly prepared cleaning equipment, and allowed to dwell according to manufacturer specifications.
  - 2.3. Surfaces are wiped clean using selected cleaning tools and techniques.
  - 2.4. Surfaces are rinsed free of residual cleaning solutions using selected equipment and techniques.

- 2.5. Moisture is removed from surfaces using required equipment or allowed to air dry according to company requirements.
- 3. Clean and store equipment.
  - 3.1. Unused cleaning solutions are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.
  - 3.2. Equipment and PPE are cleaned, safety checked and stored or disposed of according to manufacturer specifications and environmental, health and safety, and company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• dilute and mix required cleaning solutions using whole numbers and routine fractions.</li> </ul>

Reading skills to:	<ul style="list-style-type: none"> <li>• interpret directions and safety instructions, including:               <ul style="list-style-type: none"> <li>• product labels</li> <li>• safety data sheets (SDS).</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• report faults in equipment to manufacturer and other personnel.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>• identify and apply required solutions and cleaning techniques to different high-touch surfaces.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Soil types</i></b> must include:	<ul style="list-style-type: none"> <li>• chemical residue</li> <li>• dust</li> </ul>
--	--

- fingerprints
  - moisture
  - smears
  - soil
  - stickiness.
- Hazards* that must be assessed include:
- biological and environmental contaminants
  - chemical exposure via absorption, ingestion and inhalation
  - chemical reactivity
  - cross-contamination
  - dust and fibre particulates
  - electrical
  - environmental allergens
  - explosions
  - fatigue
  - fire
  - manual handling
  - noise
  - poor ventilation
  - slips, trips and falls
  - syringes and sharps
  - working in confined spaces.
- Health and safety requirements* must include:
- access to communication devices when working alone
  - compliance with Safe Work Australia regulations and guidelines
  - electrical equipment test and tag compliance
  - emergency response procedures
  - environmental controls
  - hazard signs and barricades
  - health and safety induction and refresher training
  - manual handling techniques
  - processes for safely dispensing chemicals
  - risk assessment procedures, including:
    - hazardous chemicals register
    - hierarchy of control
    - job safety analyses (JSA) for low-risk situations
    - safe work method statements (SWMS) for high-risk situations
    - incident reporting
  - SDS
  - selection and use of required PPE
  - storage and maintenance of equipment according to manufacturer specifications
  - use of first aid according to SDS information.

- Cleaning equipment*** must include at least two of the following:
- disposable wipes
  - dusting cloths
  - microfibre cloths
  - pre-impregnated disinfectant wipes
  - pre-impregnated dusting wipes
  - reusable cleaning cloths
  - spray or squeeze bottles.
- Cleaning solutions*** must include at least two of the following:
- acid cleaners
  - alkaline cleaners
  - disinfectants
  - ionised water
  - low environmental impact chemicals
  - neutral cleaners
  - soapy water
  - water.
- Sequence*** of cleaning must include cleaning:
- cleanest to dirtiest surfaces
  - top to bottom of vertical surfaces.
- Personal protective equipment*** must include at least two of the following:
- eye protection
  - gloves
  - masks
  - safety shoes.

## Unit Mapping Information

No equivalent unit.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO3045 Clean high-touch surfaces

## Modification History

Release	Comment
Release 1	Replaces superseded non-equivalent CPPCLO3044A Clean using steam sanitising techniques. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also clean five of the following high-touch surfaces:

- computer keyboards and mouse
- desks
- dining tables
- door handles
- hand railings
- light switches
- nappy change tables
- reception counters
- telephone receivers.

In doing the above work, the person must:

- identify site hazards and control risks before commencing cleaning tasks
- select and prepare cleaning solutions and equipment required for the task
- ensure surfaces are completely free of all soil types.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- application and limitation of different cleaning solutions

- cleaning techniques for nappy change tables
- processes for preventing cross-contamination while cleaning, including:
  - application and use of colour-coded cleaning equipment
  - sequence cleaning tasks to ensure hygiene and efficiency
  - maintenance and storage of cleaning equipment
- processes for maintaining personal hygiene to minimise spread of infection and germs
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - cleaning equipment as listed in the range of conditions
  - personal protective equipment (PPE) as listed in the range of conditions
- materials:
  - cleaning solutions as listed in the range of conditions
- specifications:
  - Safe Work Australia regulations and guidelines
  - SDS
- physical conditions:
  - suitable venue with access to high-touch surfaces listed in the range of conditions
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

# CPPCLO4001 Induct cleaning staff

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to brief a cleaning team on the client and workplace requirements for cleaning a work site. It involves identifying the client requirements, service level agreement, cleaning schedules and cleaning techniques for different areas of the work site; and planning and delivering induction sessions for cleaning team members. Induction includes a work site tour and presentation, including demonstrations where required, to ensure team members are fully informed of the cleaning tasks, schedules and quality standards required. The induction must also cover all health, safety and environmental compliance and security requirements.

The unit supports those who supervise small cleaning teams and take responsibility for the quality of cleaning at a particular work site. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Plan and prepare for cleaning team induction.
  - 1.1. Information relating to *work site* cleaning requirements is obtained and analysed, and items relevant to cleaning team are noted for inclusion in induction.
  - 1.2. Arrangements for *induction tour* are negotiated and confirmed with client and induction session is scheduled according to workplace requirements.
  - 1.3. Communication strategies that meet the needs of team members are identified for use in induction activities.
  - 1.4. Presentation, demonstrations and induction tour are planned, and personal notes and *induction documentation* for cleaning team are prepared.
  - 1.5. Cleaning team is notified of scheduled induction presentation and work site tour.
2. Present induction information.
  - 2.1. Cleaning team members are introduced and roles and responsibilities are outlined.
  - 2.2. Client business activity, work site location, and cleaning requirements are explained to cleaning team.
  - 2.3. Documentation relating to *cleaning task details* is distributed and explained.
3. Conduct work site induction tour.
  - 3.1. Work site access and security details are explained and cleaning team members are introduced to relevant site personnel.
  - 3.2. Work site areas are identified, cleaning techniques specific to each area are demonstrated, and coaching is provided to team members as required.
  - 3.3. *Work site health, safety* and environmental requirements and emergency procedures are identified and explained.
  - 3.4. Questions from cleaning team members are invited and addressed throughout induction tour and demonstrations.
  - 3.5. Cleaning team members' understanding of client and work site requirements is confirmed and further explanation, demonstrations and coaching are provided as required.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• prepare simple schedules and checklists relating to required frequency of cleaning tasks.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• present and explain cleaning requirements for new site to team members using accessible language</li> <li>• question team members to determine their understanding of induction information</li> <li>• present information to team members in a sequence that is easy to understand.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• identify information from the following for inclusion in induction material:               <ul style="list-style-type: none"> <li>• client work site documentation</li> <li>• health and safety and environmental protection legislation</li> <li>• workplace policies and procedures.</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare clear, sequenced documents for induction session, including work site information and cleaning procedures.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>• understand and apply knowledge of learning styles of team members to then present information in suitable formats.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Work site</i></b> must include:	<ul style="list-style-type: none"> <li>• wet areas</li> <li>• food service areas</li> <li>• general office areas</li> <li>• public areas.</li> </ul>
<b><i>Induction tour</i></b> must include:	<ul style="list-style-type: none"> <li>• access to, and security requirements of, work site</li> <li>• areas to be cleaned and cleaning techniques to be used</li> <li>• introduction to work site personnel</li> <li>• supplies to be used and storage arrangements.</li> </ul>
<b><i>Induction documentation</i></b> must	<ul style="list-style-type: none"> <li>• cleaning equipment colour-coding conventions</li> <li>• company policies and procedures relating to cleaner's work</li> </ul>

include at least three of the following:

- attendance
- emergency contact numbers
- hazard and incident reporting requirements
- safety requirements
- site map.

**Cleaning task details** must include:

- methods
- schedules
- material and equipment storage.

**Work site health and safety** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- safety data sheets (SDS)
- selection and use of required personal protective equipment (PPE)
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.
- calling emergency numbers as required
- use of first aid according to SDS information.

**Emergency procedures** must include:

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for CPPCLO4001 Induct cleaning staff

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- conduct an induction presentation and tour at a work site for a cleaning team consisting of a minimum of three members
- document the above induction presentation
- interpret client, legislative and workplace requirements and apply to induction presentation and documentation.

The above induction presentation must involve the following four different areas to be cleaned:

- wet area
- food service area
- general office area
- public area.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- cleaning techniques, and associated equipment and materials, suitable for different types of areas within work sites
- communication and presentation techniques for presenting induction information to team members
- information required in order to assess cleaning contract requirements and include required information in induction, including:
  - client service level agreement
  - health, safety and environmental protection legislation

- workplace policies and procedures, including sustainability policies
- work site information, including:
  - access and security arrangements
  - numbers and types of areas to be cleaned
  - storage areas for cleaning supplies
- client requirements relating to cleaning schedules and tasks for different types of areas within work sites
- safe handling and operating procedures for cleaning equipment and materials, including cleaning chemicals.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - cleaning equipment for demonstrating techniques
- materials:
  - cleaning materials for demonstrating techniques
- specifications:
  - client service level agreement
- physical conditions:
  - cleaning team with a minimum of three members
  - work site with a minimum of four areas to be cleaned
- relationships with team members and supervisor:
  - supervisory responsibility for a small team
- relationship with client:
  - client consultation required.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPCLO4002 Develop, implement and monitor new cleaning techniques

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to investigate cleaning methods and materials to develop new techniques for dealing with cleaning problems, such as stubborn stains, discolouration, deposits and moulds. It involves consulting with cleaning equipment and material suppliers, trialling new methods for dealing with cleaning problems, and demonstrating new techniques to cleaning teams. The unit also covers monitoring the effectiveness of new methods and introducing adjustments in consultation with suppliers and cleaning staff.

The unit supports those who supervise small cleaning teams and take responsibility for the quality of cleaning at a particular work site. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Analyse cleaning problems.
  - 1.1. Cleaning problems are identified in consultation with cleaning team and client.
  - 1.2. Locations of cleaning problems are examined, *substrate* is identified, and photographs and samples are taken as required.
  - 1.3. Cleaning techniques that have been applied to the problem are identified and effectiveness is assessed in consultation with cleaning team.
  - 1.4. Adaptations to current cleaning techniques that comply with client and workplace requirements are trialled and effectiveness is assessed.
2. Investigate new cleaning techniques.
  - 2.1. Alternative cleaning techniques that address the problem and substrate, and comply with client and workplace requirements, are researched and identified.
  - 2.2. Industry networks, manufacturers and suppliers, are consulted on alternative cleaning techniques that address the problem and substrate, and comply with client and workplace requirements.
  - 2.3. Cost-effectiveness of alternative cleaning techniques is assessed and new cleaning techniques are selected for trialling.
3. Trial new cleaning techniques.
  - 3.1. Equipment and materials required for trialling new cleaning techniques are identified and obtained according to workplace procedures.
  - 3.2. Locations where cleaning problems are most severe are identified for trialling new cleaning techniques.
  - 3.3. Cleaning techniques are applied according to research findings and manufacturer specifications, and results are assessed over recommended time period.
  - 3.4. Variations to new cleaning techniques recommended by research findings, consultation and manufacturer specifications are trialled, as required.
  - 3.5. Results of new cleaning techniques, including details of variations to techniques, are recorded and effectiveness is assessed.

- |   |   |
|---|---|
| 4. Implement and monitor new cleaning techniques. | 4.1. Effective new cleaning techniques are documented and communicated or demonstrated to cleaning team, as required.                         |
|   | 4.2. Cleaning team's implementation of new cleaning techniques is observed and coaching on application of techniques is provided as required. |
|   | 4.3. Effectiveness of new cleaning technique is monitored, recorded and reported according to company requirements.                           |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• apply knowledge of cleaning techniques used for different problems and substrates and develop modifications to suit new problems</li> <li>• find information on new cleaning techniques using simple internet searches.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• estimate numbers and volume of equipment and cleaning materials required</li> <li>• calculate probable costs of new cleaning techniques</li> <li>• compare costs of different new cleaning techniques.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• explain cleaning problem clearly to external industry personnel and discuss possible solutions</li> <li>• present and explain new cleaning techniques to team members using accessible language and in a sequence that is easy to understand.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret and analyse manufacturer information regarding:               <ul style="list-style-type: none"> <li>• product capacity to assist in solving cleaning problems</li> <li>• safe handling and operation of product.</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• maintain records of new cleaning techniques applied, including assessment of success and cost-effectiveness.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• access and search the internet.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Substrate*** must include three of the following:

- carpet
- concrete
- fabric
- glass
- painted surface
- plastic
- metal
- tiles
- vinyl surface
- wood.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for CPPCLO4002 Develop, implement and monitor new cleaning techniques

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also develop cleaning techniques for three of the following cleaning problems, each involving a different substrate as listed in the range of conditions:

- stubborn stains
- discolouration
- deposits
- moulds.

In doing the above work, the person must:

- research possible cleaning techniques with networks, manufacturers and suppliers to identify agreed cleaning techniques
- interpret and apply the following information relating to developing, implementing and monitoring new cleaning techniques:
  - safe handling and operating procedures for cleaning equipment and materials, including cleaning chemicals
  - health, safety and environmental protection legislation
  - workplace policies and procedures, including sustainability policies.
- apply the new cleaning techniques over a recommended timeframe agreed with those consulted, and assess results.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- common types of cleaning problems and cleaning techniques used to resolve them on different types of substrates
- equipment and materials required to implement new cleaning techniques
- industry personnel and networks that could provide information on solutions to cleaning problems
- internet research strategies and sources for finding information about products that could assist in identifying and resolving new cleaning techniques
- methods for coaching team members in new cleaning techniques
- methods for identifying causes of cleaning problems and type of substrate
- methods for monitoring success and cost-effectiveness of new cleaning techniques
- safe handling and operating procedures for cleaning equipment and materials, including cleaning chemicals
- workplace requirements for developing, implementing and monitoring new cleaning techniques, including compliance with:
  - health, safety and environmental protection legislation
  - workplace policies and procedures, including sustainability policies.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - cleaning equipment
  - telephone
  - computer with internet access
- materials:
  - cleaning chemicals
- specifications:
  - manufacturer product information
- physical conditions:
  - three different cleaning problems on different substrates
- relationships with team members and supervisor:
  - supervisory responsibilities for a small team
- relationship with client:
  - client consultation required.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPCLO4003 Manage cleaning equipment maintenance and supply

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to ensure that equipment used by a cleaning team is inspected, serviced and maintained regularly, is fit for purpose, and is replaced when required. The equipment involved includes items such as high pressure hoses, high-reach safety ladders, steam cleaners, vacuum cleaners, buffers, scrubbers and sweepers.

The unit involves conducting regular audits and developing and monitoring maintenance schedules.

The unit supports those who supervise cleaning teams and take responsibility for the quality of cleaning at a particular work site. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Initiate equipment audit and maintenance procedures.
  - 1.1. Initial *equipment* audit is conducted and number, type, age and condition of work site cleaning equipment are identified and noted.
  - 1.2. *Maintenance requirements* and service providers for different types of equipment are determined from manufacturer recommendations and company procedures.
  - 1.3. Maintenance schedules and checklists for work site equipment are developed and confirmed with cleaning team, service providers and required company personnel.
  - 1.4. Work site equipment audit schedule is developed and confirmed with required company personnel.
2. Manage equipment faults.
  - 2.1. Company procedures for equipment fault reporting are confirmed and explained to cleaning team members.
  - 2.2. Equipment fault reports are followed up promptly and substitute equipment is provided to cleaning team, or alternative cleaning methods are explained and demonstrated as required.
  - 2.3. Service providers are notified of equipment faults, and repair or replacement strategies are negotiated, actioned and recorded.
  - 2.4. Repaired or replacement equipment is examined and operation is checked according to company procedures before releasing to cleaning team for use.
3. Monitor equipment maintenance.
  - 3.1. Maintenance activities to be conducted by cleaning staff are explained and demonstrated, and observed and checked periodically.
  - 3.2. Regular maintenance checklists completed by cleaning team are monitored.
  - 3.3. Maintenance conducted by service providers, including electrical tag and testing services, is monitored to ensure scheduled checks are completed.
  - 3.4. Maintenance records and reports from service providers are reviewed and processed according to workplace procedures.

- |  |   |
|--|---|
| 4. Audit and manage work site equipment. | 4.1. Number, type, age and condition of work site cleaning equipment are assessed and compared to initial or previous audit and noted.                  |
|  | 4.2. Equipment requiring replacement is noted and suitable alternatives are researched and discussed with cleaning team and required company personnel. |
|  | 4.3. Replacement equipment is selected and obtained according to company procedures.  |
|  | 4.4. Industry information is reviewed regularly and new types of equipment suitable for workplace cleaning activities are noted for future reference.   |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• apply knowledge of cleaning equipment operation, common faults and required repairs to assess condition of equipment and effectiveness of maintenance, service and repair work</li> <li>• locate and use reliable sources for information about advances in equipment technology and performance.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret numerical data in manufacturer information to identify types and regularity of maintenance requirements for different equipment.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• explain fault reporting requirements and maintenance activities in language suitable for cleaning team members</li> <li>• negotiate services to be provided by equipment repair and service providers using technical language.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret technical details of manufacturer recommendations for regular maintenance, service and repair of equipment.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• complete equipment audit documentation according to company requirements</li> <li>• develop equipment maintenance schedules and checklists in suitable formats for use by cleaning team.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Equipment*** must include at least five of the following:

- high pressure hoses
- high-reach safety ladders
- steam cleaners
- vacuum cleaners
- buffers
- scrubbers
- sweepers.

***Maintenance requirements*** must include:

- daily, weekly and monthly operator maintenance tasks, including keeping equipment and attachments clean
- electronic tagging and testing
- periodic maintenance and servicing to be provided by manufacturer-approved service providers
- inspecting for damage
- cleaning filters and parts
- replacing consumables
- charging batteries.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCLO4003 Manage cleaning equipment maintenance and supply

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also audit cleaning equipment and manage and monitor equipment servicing, maintenance and replacement for a cleaning work site.

The cleaning equipment to be audited must include five of the following:

- high pressure hose
- high-reach safety ladder
- steam cleaner
- industrial vacuum cleaner
- buffer
- scrubber
- sweeper.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- communication strategies for ensuring cleaning team members understand equipment maintenance and fault reporting requirements
- types of equipment used in the cleaning industry
- manufacturer recommendations for equipment maintenance and servicing requirements
- common faults in cleaning equipment and repairs required to rectify them
- company procedures relating to auditing equipment and managing maintenance and supply, including:
  - engaging service providers

- fault reporting
- health and safety
- purchasing.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - at least five pieces of the cleaning equipment listed in the performance evidence
- specifications:
  - company procedures for maintaining cleaning equipment
  - manufacturer recommendations for maintaining and servicing equipment
- physical conditions:
  - work site with cleaning team
- relationships with team members and supervisor:
  - supervisory responsibility for a small team.

Timeframe:

- according to client requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

## CPPCLO4022 Schedule and monitor cleaning tasks

### Modification History

Release 1.

Revised unit of competency replacing superseded equivalent CPCCLO4022A Organise and monitor cleaning operations.

This version first released with CPP Property Services Training Package Version 4.

### Application

This unit of competency specifies the outcomes required to schedule and allocate staff to cleaning tasks to meet contracted service level agreements. It covers monitoring the efficiency and quality of the work through cleaning audits, preparing audit reports, and applying the information to ensure staff effectiveness for a cleaning contract. The unit involves interpreting client work orders, and applying knowledge of staff skills and availability and the range of cleaning methods available and required for the contract.

The unit supports cleaning supervisory staff with responsibility for supporting a small team and ensuring work targets are met. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-requisite Unit

Nil

### Unit Sector

Cleaning operations

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Determine work site requirements.
  - 1.1. **Work site areas** to be cleaned are assessed, and scope of cleaning work is clarified with client or nominated representative.
  - 1.2. Detailed client needs and expectations for cleaning different areas of work site are determined and recorded according to company requirements.
  - 1.3. Special requirements arising from site characteristics or client requests are identified according to company and **health and safety requirements**.
  - 1.4. Client's reporting requirements are clarified and reporting format negotiated and developed according to company requirements.
2. Analyse resource requirements of required cleaning tasks and provide resources.
  - 2.1. Shift arrangements, number of cleaners, and specific skill levels required to meet client needs are determined.
  - 2.2. Numbers, skills and availability of cleaners are analysed to identify shortfalls and recruitment procedures are initiated according to company procedures.
  - 2.3. Work schedules are developed and suitably qualified cleaners are assigned to shifts and work site cleaning areas according to health and safety and company requirements.
  - 2.4. Human resource requirements and staff schedules are assessed or reorganised according to company procedures when contingencies and special requests from clients arise.
3. Communicate and monitor work requirements.
  - 3.1. Cleaning team members are advised of **work requirements** according to company requirements.
  - 3.2. Cleaning schedule checklists are prepared and displayed at work site as required, and cleaning team is briefed using checklists.
  - 3.3. Work site audit schedule and checklist are prepared according to client needs and company procedures.
  - 3.4. Work team members' understanding of their tasks and responsibilities is confirmed according to company requirements.

- 3.5. Regular work site audits are conducted to ensure compliance with customer needs, cleaners' performance is monitored, and adjustments to work practices are made according to company requirements.
- 3.6. Restrictions affecting completion of work or changes in client needs are identified and work schedules are adjusted according to company requirements.
- 3.7. Client reports are prepared and processed according to agreed procedures.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• draw on prior knowledge of cleaning work and work sites to assess scope of work.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• calculate human resource requirements from estimated hours of work required per day, health and safety requirements, and cleaners' availability.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• clarify details of cleaning requirements with client to inform selection of cleaning methods and materials and development of task outlines and auditing checklists</li> <li>• give detailed briefing to cleaning staff outlining work requirements and responsibilities using accessible language.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret manufacturer information about equipment, chemicals and consumables in order to select and obtain required materials for the cleaning work.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare clear sequential schedules and associated checklists for team members to complete.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• allocate cleaning tasks efficiently according to staff skills and experience.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs

of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Work site areas*** must include:

- wet areas
- food service areas
- general office areas
- public areas.

***Health and safety requirements*** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- safety data sheets (SDS)
- selection and use of required personal protective equipment (PPE)
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

***Work requirements*** must include:

- work schedules
- individual tasks
- cleaning methods
- quality standards
- supplies to be used
- storage arrangements.

## Unit Mapping Information

CPPCLO4022A Organise and monitor cleaning operations

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPCLO4022 Schedule and monitor cleaning tasks

## Modification History

Release 1.

Revised unit of competency replacing superseded equivalent CPPCLO4022A Organise and monitor cleaning operations.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- schedule and monitor cleaning staff for cleaning operations in one of the following types of premises:
  - wet areas
  - food service areas
  - general office areas
  - public areas
- clarify details of the cleaning work requirements for the above premises, including:
  - timing of access to work site and specific access and egress points
  - completion times and dates
  - details of different cleaning tasks
  - dress and presentation requirements
  - need for cleaners to communicate while on site with client or members of the public
  - required use of signs and barricades
  - work site contact persons.

In doing the above work, the person must:

- analyse work order and assess resource requirements
- comply with company requirements relating to staff scheduling, including award or enterprise agreements
- develop work schedules for cleaning tasks, ensuring that scheduling and resourcing meet client and company requirements
- implement effective system for monitoring the completion of cleaning work order

- identify and supply equipment, personal protective equipment (PPE), chemicals and consumables to work team.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- company processes and procedures, including those relating to:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
  - identifying hazards and controlling risks
  - injury, dangerous occurrence and incident reporting
  - work health and safety (WHS) procedures
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to scheduling cleaning staff, including award or enterprise agreements
- mathematical methods required to calculate resource requirements specific to work order
- product knowledge, including:
  - chemicals and their uses
  - cleaning equipment and its uses
  - surfaces and effective and compatible cleaning methods
- types of restrictions that may affect volume of work and procedures for addressing contingencies that arise, including assessment of:
  - amount of cleaning anticipated
  - client activities at the work site during scheduled cleaning times
  - team member level of literacy and communication skills
  - faulty or unsuitable equipment
  - site accessibility
  - site hazards
  - skills of work unit or team
  - staffing resources
  - time limitations
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
  - chemicals
  - equipment, including PPE
- work order specifications.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- materials:

- client work order, instructions or service level agreement
- scheduling and rostering documentation
- physical:
  - cleaning work sites as listed in the performance evidence
- relationships with team members and supervisor:
  - supervisory responsibility for a small team
- relationship with client:
  - client contact required.

Timeframe:

- as specified by the task.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -

# CPPCLO4024 Manage the supply of cleaning stores to the work site

## Modification History

Release 1.

Revised unit of competency replacing superseded equivalent CPPCLO4024A Control the supply of resources to the work site.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to manage the supply of cleaning equipment, chemicals and consumables used when providing cleaning services at a work site. Supply is based on sound understanding of available cleaning methods, the equipment and chemicals used for each method, and demand estimates. The unit covers updating information on products and equipment and amending orders to improve cost-effectiveness.

The unit supports supervisory staff responsible for selecting and ensuring the continuous availability of cleaning supplies at a work site. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Identify and order required supplies.
  - 1.1. **Work site areas** to be cleaned are assessed, cleaning methods to be applied are confirmed according to company requirements, and issues are clarified.
  - 1.2. Types of required **equipment, personal protective equipment (PPE), cleaning chemicals and consumables** are determined according to client, company and **work health and safety requirements**.
  - 1.3. Suitability of different options for the supply of equipment, PPE, chemicals and consumables is assessed and items are selected to meet cleaning requirements.
  - 1.4. Quantities of equipment, PPE, chemicals and consumables are estimated and ordered to meet anticipated demand, based on cleaning and health and safety requirements.
2. Control and maintain stocks of equipment, PPE, chemicals and consumables.
  - 2.1. Stock control system for equipment, PPE, chemicals and consumables is implemented and operated according to health and safety and company requirements.
  - 2.2. Equipment, PPE, chemicals and consumables are acquired according to company requirements.
  - 2.3. Usage patterns are monitored and equipment, PPE, chemicals and consumables are re-ordered according to manufacturer specifications and legislative, health and safety, and company requirements.
  - 2.4. Stock records and chemical register are maintained according to legislative, health and safety, and company requirements.
3. Review effectiveness of equipment, PPE, chemicals and consumables.
  - 3.1. Effectiveness and efficiency of equipment, PPE, chemicals and consumables are reviewed according to company requirements.
  - 3.2. Industry information is reviewed and new products are assessed in comparison with existing selections of supplies.
  - 3.3. Recommendations for future purchases of equipment, PPE, chemicals and consumables are recorded and discussed with required personnel according to company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• apply prior knowledge of cleaning tasks and methods to assess equipment, chemicals and consumables required</li> <li>• identify and access reliable sources of industry information about new products.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• manage stock control systems</li> <li>• estimate turnover of supplies.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• confirm details of cleaning tasks required and methods to be used</li> <li>• question suppliers and manufacturers about new product performance using technical language.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret safety data sheets (SDS) for cleaning chemicals and ensuring availability of required PPE</li> <li>• ensure correct supplies for splashes or spillage are available at work site</li> <li>• interpret equipment operating manuals.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• maintain stock control documentation</li> <li>• prepare notes on cost-effectiveness, characteristics and performance of new products.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• implement stock control system efficiently, and on a first-in first-out basis for chemicals, to minimise waste.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Work site areas</i></b> must include:	<ul style="list-style-type: none"> <li>• wet areas</li> <li>• food service areas</li> <li>• general office areas</li> <li>• public areas.</li> </ul>
<b><i>Equipment</i></b> must include at least three of the following:	<ul style="list-style-type: none"> <li>• brooms</li> <li>• buckets</li> <li>• cleaning trolleys</li> </ul>

- cloths
- cobwebbers
- dustpans and brushes
- dusters
- extension poles
- mops
- scouring pads
- scrapers
- scrubbers
- site communication devices
- spray bottles
- squeegees
- vacuum cleaners and attachments
- window cleaning equipment.

***Personal protective equipment*** must include at least two of the following:

- ear muffs and plugs
- gloves
- eye protection
- high visibility vests and clothing
- protective clothing
- disposable respirators
- safety shoes
- splash-proof face masks
- sun protection
- tongs
- wet-work clothing.

***Cleaning chemicals*** must include at least two of the following:

- acid cleaners
- alkaline cleaners
- low environmental impact chemicals
- neutral cleaners
- solvent cleaners.

***Consumables*** must include at least one of the following:

- air freshener
- hand towels
- liner bags
- soap
- toilet paper.

***Work health and safety requirements*** must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training

- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

## Unit Mapping Information

CPPCLO4024A Control the supply of resources to the work site

# Assessment Requirements for CPPCLO4024 Manage the supply of cleaning stores to the work site

## Modification History

Release 1.

Revised unit of competency replacing superseded equivalent CPPCLO4024A Control the supply of resources to the work site.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- assess the requirements for equipment, personal protective equipment (PPE), chemicals and consumables for one work site over a two-week period
- in doing the above work:
  - select suitable supplies for the cleaning methods used
  - estimate volume of supplies required over the timeframe and ensure a continuous supply of suitable supplies to the work site
  - implement and maintain effective stores and ordering systems
  - review effectiveness of current products.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- cleaning tasks, methods and supplies required, including:
  - cleaning chemicals and their uses
  - cleaning equipment, including PPE and its uses
  - methods for assessing effectiveness of cleaning products
  - sources of information for updating knowledge
  - surfaces to be cleaned and compatible cleaning methods
- company requirements relating to managing the supply of cleaning stores to the work site, including:
  - client communication and confidentiality procedures and service standards

- environmental protection procedures
- quality and continuous improvement processes and standards
- records and information systems and processes
- stock purchasing processes and procedures
- work health and safety (WHS) policies and procedures, including:
  - emergency procedures
  - injury, dangerous occurrence and incident reporting
  - risk assessment and hazard control
  - routes of entry and potential symptoms of exposure to chemicals
  - safe operating practices and procedures
  - safe work method statements
- manufacturer specifications relating to supplies, including:
  - equipment operating manuals
  - instructional guides
  - product labels
  - safety data sheets (SDS)
  - safety instructions pre-printed on equipment
- mathematical methods for estimating resources
- regulatory compliance requirements in relation to managing the supply of cleaning stores to the work site, including:
  - AS 2508 Safe storage and handling information card for hazardous material
  - key requirements of legislation and regulations relating to managing work site cleaning stores, including:
    - chemical controls
    - chemical registers and manifests
    - consumer protection
    - energy conservation
    - environmental protection
    - industrial equipment certificates of competency or licences
    - health and safety legislation and regulations
    - privacy
    - public health
    - water conservation
  - quality assurance and certification requirements
- stock control procedures and methods.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:

- cleaning equipment and PPE required for a work site
- materials:
  - cleaning chemicals and consumables as listed in the range of conditions
  - company procedures for managing the supply of cleaning stores to the work site, including purchasing procedures
- specifications:
  - AS 2508 Safe storage and handling information card for hazardous material
  - manufacturer information relating to cleaning products
- physical conditions:
  - work site areas to be cleaned, as listed in the range of conditions
- relationships with team members and supervisor:
  - supervisory responsibility for a small team.

Timeframe:

- as specified by the task.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPCLO4025 Provide quotation for cleaning services

## Modification History

Release 1.

Revised unit of competency replacing superseded equivalent CPPCLO4025A Provide quotation for cleaning services.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to assess client requirements, calculate the cost of required cleaning services and service conditions, and develop quotations for clients detailing both. Comprehensive knowledge is required of the use of cleaning equipment and chemicals, the range of cleaning methods available and the associated human resource requirements, as well as the company's quoting policies and procedures.

The unit supports cleaning company staff who liaise with new clients. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Cleaning operations

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |               |  |
|---------------|--|
| 1. Assess and | 1.1. Client is contacted and <b><i>work site</i></b> is assessed, as required, |
|---------------|--|

- |   |      |   |
|---|------|---|
| calculate cost of services.                               |      | according to company procedures.  |
|   | 1.2. | Client and work site details and cleaning requirements are noted and client record is created according to company requirements.                            |
|   | 1.3. | Human resource requirements and product and costing information are sourced, selected and interpreted according to company requirements.                    |
|   | 1.4. | Costs, taxes and profit margin are calculated according to company requirements.  |
|   | 1.5. | Calculations are checked, and detailed and legible records of methods of calculations are kept, according to company requirements.                          |
| 2. Provide quotation to client.                           | 2.1. | Accurate details of cost of service and <b><i>conditions and limitations of quotation</i></b> are included in quotations according to company requirements. |
|   | 2.2. | Quotations are provided to client according to company requirements.  |
|   | 2.3. | Options, with secondary quotations, are offered according to company requirements.  |
|   | 2.4. | Details of quotations are recorded accurately and legibly and retained on file according to company requirements.   |
| 3. Respond to request for variation of existing contract. | 3.1. | Client <b><i>request for variation</i></b> is handled by authorised person as determined by company requirements.   |
|   | 3.2. | <b><i>Requests</i></b> are assessed according to company requirements.  |
|   | 3.3. | Accurate costing is prepared and quotation for requested changes is provided according to company requirements.   |
|   | 3.4. | Client record is updated and details of quotation are recorded according to company requirements.   |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• apply previous knowledge of work sites and cleaning requirements to assess scope of work at a new site.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• estimate numbers and volume of required human resources, equipment and cleaning materials</li> <li>• apply company costing policies and procedures, including formulas and percentages for calculating taxes and profit margins.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• identify details of client requirements in order to provide accurate quotations.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret company policies and procedures in relation to estimating, costing and quoting for cleaning services.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• assess feasibility of fulfilling requests for variations to contracts.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Work site</i></b> must include:	<ul style="list-style-type: none"> <li>• wet areas</li> <li>• food service areas</li> <li>• general office areas</li> <li>• public areas.</li> </ul>
<b><i>Conditions and limitations of quotation</i></b> must include:	<ul style="list-style-type: none"> <li>• dates of quotations</li> <li>• general conditions and rules</li> <li>• inclusions and exclusions</li> <li>• expiry dates of quotations</li> <li>• payment details.</li> </ul>
<b><i>Requests for variation</i></b> must be in response to four of the following:	<ul style="list-style-type: none"> <li>• change in level of client's business</li> <li>• contractor requirements</li> <li>• emergencies</li> <li>• irregular requirements, such as shampoo carpet or window cleaning</li> <li>• new building work.</li> </ul>
<b><i>Requests</i></b> must be assessed against:	<ul style="list-style-type: none"> <li>• existing contract conditions</li> <li>• additional work required</li> <li>• capacity to respond.</li> </ul>

# Assessment Requirements for CPPCLO4025 Provide quotation for cleaning services

## Modification History

Release 1.

Revised unit of competency replacing superseded equivalent CPPCLO4025A Provide quotation for cleaning services.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- prepare a quotation for cleaning services for two different new work sites, where each quotation must:
  - comply with company requirements
  - reflect company policies and procedures
  - present service offer, costing and conditions, and limitations of the quotation
- respond to two different requests for variations to existing contracts for cleaning services.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- consumer protection issues and fair trading and trade practices requirements relating to cleaning operations
- contractual requirements, including processes for handling and responding to requests to vary contracts
- company processes and procedures, including those relating to:
  - client records
  - environmental protection procedures
  - health and safety procedures
  - purchasing policy and processes
  - reporting procedures
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to providing quotations for cleaning services, including:

- chemical controls
- chemical registers and manifests
- energy conservation
- environmental protection
- privacy
- public health
- water conservation
- work health and safety (WHS)
- mathematical methods for calculating costs, taxes and profit margins
- product and service knowledge, including:
  - effective and compatible cleaning methods for various surface types
  - chemicals and their uses
  - cleaning equipment and its uses
- work order specifications.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- contingencies:
  - two requests for variations to contracts
- specifications:
  - company policies and procedures relating to developing quotations
  - costing information, including costs for human resources and equipment required to meet client requirements
- physical conditions:
  - two cleaning work sites to assess
- relationship with client:
  - client consultation required.

Timeframe:

- according to workplace requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Assessment Requirements for CPPCMN2002 Participate in workplace safety arrangements

### Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

### Performance Evidence

A person who demonstrates competency in this unit must participate in two different workplace safety arrangements.

Performance must include:

- communicating effectively with supervisors;
- understanding workplace safety procedures;
- applying basic safety principles in the workplace; and
- assessing and controlling workplace risks.

### Knowledge Evidence

A person demonstrating competency in this unit must identify:

- cleaning workplace safety policies and procedures, WHS standards, supervisory instructions relating to safety measures and PPE.
- workplace hazards and risk control measures in cleaning workplaces, including:
  - equipment and material use, storage, cleaning and disposal procedures
  - range and meaning of workplace safety signs and symbols
  - site safety plan
  - types and purpose of personal protective equipment (PPE)
  - ways to maintain WHS in emergency situations
- workplace requirements for undertaking all aspects of workplace safety arrangements tasks including;
  - key workplace safety policies and procedures,
  - work health and safety standards,
  - supervisory instructions relating to safety measures and PPE.

- workplace procedures for;
  - basic assessment of cleaning work areas for workplace hazards
  - basic health and safety including:
    - emergency response and evacuation procedures
    - injury, dangerous occurrence and incident reporting
    - reporting workplace hazards
- communicating and clarifying work requirements with supervisor, team members or client
- 

## Assessment Conditions

As a minimum, assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which reflect:

- cleaning workplace safety policies and procedures, WHS standards, supervisory instructions relating to safety measures and PPE.
- performing tasks/activities to the level of proficiency and within timelines that would be expected in a workplace; and
- following standard and authorised work practices, safety requirements and environmental constraints.

Assessors are responsible for ensuring that candidates have access to:

- appropriate documents, materials, tools equipment and personal protective equipment currently used in industry;
- legislation and regulations; and
- workplace policies and procedures.

# Assessment Requirements for CPPCMN2004 Provide basic client services

## Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Version 5.0.

## Performance Evidence

A person who demonstrates competency in this unit must provide effective client services to:

- two different clients with two different service requirements.

Performance must include:

- effectively communicating with clients;
- understanding of basic communications methods; and
- addressing client's needs.

## Knowledge Evidence

A person demonstrating competency in this unit must identify:

- workplace requirements for undertaking all aspects of providing effective customer service, including:
  - methods to greet clients, identify and confirm needs, timeframes and commitments
  - key features of effective communication with clients
- workplace procedures for:
  - communicating clearly and effectively with clients
  - dealing with client's complaints or comments
  - communicating and clarifying work requirements with supervisor, team members or client
  - notifying supervisor, team members or client of work completion; verbal
  - communication in person or by phone, written communication including hard copy
  - cleaning schedules, text or electronic form
  - reporting incidents; accidents and injury, damage to or breakages in the cleaning area or cleaning equipment, theft and threats to personal security

## Assessment Conditions

As a minimum, assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which reflect:

- Industry-standard client-based services, information relating to cleaning practices and methods, WHS safety measures in the workplace.
- performing tasks/activities to the level of proficiency and within timelines that would be expected in a workplace; and
- following standard and authorised work practices, safety requirements and environmental constraints.

Assessors are responsible for ensuring that candidates have access to:

- appropriate documents, materials, tools equipment and personal protective equipment currently used in industry;
- legislation and regulations; and
- workplace policies and procedures.

# CPPCMN3004 Respond to enquiries and complaints

## Modification History

Release 1.

Replaces superseded equivalent CPPCMN3004A Respond to enquiries and complaints.

This version first released with CPP Property Services Training Package Version 2.

## Application

This unit of competency specifies the outcomes required to respond effectively to client enquiries and complaints regarding company products and services. The worker needs to handle formal and informal enquiries, as well as negative feedback and complaints from clients.

The unit covers acknowledging and processing client enquiries and complaints, and communicating with clients to resolve issues. It also covers researching and documenting relevant information relating to an enquiry or complaint, which may include site visits where required; and referring the enquiry or complaint to other personnel or external organisations where appropriate.

The unit supports employees without managerial or supervisory responsibilities. Performance would usually be carried out under routine supervision, within company guidelines. It applies to workers who have significant contact with clients and who provide information on routine, well-defined services or products to clients, and deal with enquiries or complaints of a more complex nature.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

## Unit Sector

Common

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |  |   |
|--|---|
| 1. Identify nature and type of enquiry or complaint. | 1.1. <b><i>Client</i></b> is addressed according to company requirements.   |
|  | 1.2. Details of enquiry or complaint and degree of urgency are clarified and confirmed with client according to company requirements.   |
|  | 1.3. Details of enquiry or complaint are recorded according to company and legislative requirements.  |
|  | 1.4. Impact of relevant legislative and company requirements on handling of enquiry or complaint is identified.   |
|  | 1.5. Arrangements are made for enquiries or complaints requiring additional research and follow-up, according to company requirements.  |
| 2. Investigate enquiry or complaint.                 | 2.1. <b><i>Information</i></b> relevant to enquiry or complaint is obtained from internal and external sources as appropriate according to company requirements.                |
|  | 2.2. Site is inspected with client, where required, to clarify details of the enquiry or complaint according to company requirements.   |
|  | 2.3. Possible solutions to enquiry or complaint are determined and likelihood of associated problems is assessed using available information according to company requirements. |
|  | 2.4. Advice is sought from <b><i>appropriate personnel</i></b> where necessary on nature of enquiry or complaint, and proposed solution according to company requirements.      |
| 3. Refer enquiry or complaint.                       | 3.1. Enquiry or complaint that requires referral to other company personnel or external bodies is identified according to company and legislative requirements.                 |
|  | 3.2. Referral to appropriate personnel is made according to individual level of responsibility and company  |

- requirements.
- 3.3. Investigation report and other relevant documentation are forwarded to appropriate personnel according to company requirements.
- 3.4. Progress of referred enquiry or complaint is followed up with appropriate personnel according to company requirements and within expected timeframes.
4. Determine and communicate solution to client and relevant staff.
- 4.1. Solution to enquiry or complaint is determined and documented according to company requirements.
- 4.2. ***Method for responding*** to client or their agent is established according to nature of enquiry or complaint and company requirements.
- 4.3. Response to enquiry or complaint is prepared and communicated to client or their agent according to company requirements.
- 4.4. Client or agent agreement to solution is confirmed, or solution is negotiated according to company requirements.
- 4.5. Relevant staff members are promptly advised of work allocations required to resolve enquiry or complaint according to company requirements.
5. Satisfy complex client needs.
- 5.1. Complex needs requiring adaptation of routine products or services are identified and clarified with client.
- 5.2. Possibilities for meeting client needs are explained to client according to legislative and company requirements.
- 5.3. Client is assisted to evaluate product and service options to satisfy needs according to legislative and company requirements.
- 5.4. Preferred action is determined and prioritised according to legislative and company requirements.
- 5.5. Potential difficulties in client service delivery are identified and appropriate action is taken according to legislative and company requirements.

- |                               |  |
|-------------------------------|--|
| 6. Update company information | 6.1. Information on type and source of enquiry or complaint is collated and processed according to company requirements.   |
|                               | 6.2. Information on identified problems and solutions is recorded, processed and reported according to company requirements.   |
|                               | 6.3. Information on resolved enquiry or complaint is shared with co-workers according to legislative and company requirements and strategies to avoid repeat issues are discussed. |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• find and interpret information relevant to client enquiries and complaints by searching company and industry data and using simple internet searches</li> <li>• draw on experience of assessing and responding to client enquiries and complaints and apply knowledge to new issues, including assessing complexity of problem and need to refer to other personnel.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret numerical information relating to client enquiries and complaints, including technical data in manufacturer specifications.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• interact effectively with clients to identify and resolve problems and complaints, and express technical information in appropriate language for the client</li> <li>• negotiate and finalise agreed solutions to client enquiries and complaints.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret information relating to client enquiries and complaints, including company procedures and manufacturers' technical information</li> </ul>

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Writing skills to:	<ul style="list-style-type: none"> <li>• extract critical information from at times complex text, such as legislative information and Australian Privacy Principles.</li> <li>• record information regarding customer enquiries and complaints and their solutions using industry-specific technical vocabulary as required</li> <li>• communicate proposed solutions to clients in writing, using appropriate language and explaining technical terms as required.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Clients</i></b> must include those with one or more of the following:	<ul style="list-style-type: none"> <li>• routine enquiry for advice or general information that requires no specific research</li> <li>• suggestion for service or product improvement</li> <li>• special enquiry requiring further research or consultation with other staff</li> <li>• routine complaint requiring investigation to clarify details</li> <li>• complex complaint requiring referral to other technical or supervisory personnel</li> <li>• complex need involving adaptation or combination of products and/or services.</li> </ul>
---	---

<b><i>Information</i></b> must include:	<ul style="list-style-type: none"> <li>• client records, including verbal reports from staff if available</li> <li>• company policies and procedures relevant to the enquiry or complaint</li> <li>• legislative requirements relevant to the enquiry or complaint</li> <li>• manufacturer information relevant to the enquiry or complaint</li> <li>• workplace information relevant to the enquiry or complaint.</li> </ul>
---	---

<b><i>Appropriate</i></b>	<ul style="list-style-type: none"> <li>• colleagues</li> </ul>
---------------------------	--

*personnel* must include one or more of the following:

- manufacturers
- staff and employee representatives
- supervisors
- suppliers
- technical experts.

*Method for responding* must include one or more of the following:

- email
- face-to-face meeting
- letter
- phone call.

This version first released with CPP Property Services Training Package Version 2.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must deal with:

- one routine enquiry for advice or general information, or suggestion for service or product improvement
- one special enquiry requiring further research or consultation
- one routine complaint requiring investigation
- one complex complaint requiring referral to other personnel
- one matter where client needs are complex and require adaptation or a combination of products or services.

For each of the above, the person must:

- use knowledge of company procedures
- handle clients and situations with diplomacy and tact
- clarify customer enquiries and complaints using communication skills
- provide solutions or options and resolve issues within required timeframes
- record and document issues and resolution according to company requirements
- refer matters to appropriate personnel as required and according to company requirements.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- Australian standards, quality assurance and certification requirements relevant to responding to enquiries and complaints
- common industry and company service problems and solutions
- company policies and procedures for handling and documenting client complaints, including:
  - client confidentiality provisions

- client service procedures
- code of conduct or ethics
- company dress and presentation requirements
- quality and continuous improvement processes and standards
- work documentation and reporting procedures
- details of products and services offered by the company
- industry advisory standards and codes of practice relevant to company operation
- legislation and regulations that apply to responding to enquiries and complaints, including:
  - anti-discrimination
  - consumer protection
  - environmental protection
  - privacy
  - work health and safety
- options for solutions and responses to client enquiries and complaints, including:
  - additional service provision
  - changes in service provision
  - litigation
  - mediation
  - no action
  - payment of compensation
  - rectification
  - cancellation of services
  - client education
  - general advice
  - information on products and services available, including features and benefits
  - planned visits
  - provision of further information
  - quotations and pricing estimates
  - referral to others, including specialist advisors
  - standard industry disclaimers
- range of client expectations in relation to services offered by the company
- relevance of good communication and own role in processing client complaints.

## Assessment Conditions

Suitable assessment of performance requires:

- equipment:
  - telephone
  - computer with access to email, internet and company information

- materials:
  - tools and equipment for investigating site of client complaint, if required
- specifications:
  - company information
  - manufacturer specifications and other technical information
  - plain English guides to relevant legislative guidelines, standards and codes of practice
- physical conditions:
  - access to site of client complaint, if required
- relationships with team members and supervisor:
  - acting alone under supervision
  - access to supervisor and other relevant personnel for assistance with gathering information
- relationship with client:
  - direct communication with client or agent representing client
- timeframe:
  - according to work order.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## CPPCMN3005 Complete client documentation

### Modification History

Release 1.

Supersedes and is equivalent to CPPCMN3005A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.

### Application

This unit of competency specifies the skills and knowledge required to complete client documentation in the property services industry.

It includes gathering and verifying the information required to complete client documentation, and processing client documentation.

The unit supports the work of those engaged in servicing in a range of property services contexts.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

### Pre-requisite Unit

Nil

### Competency Field

### Unit Sector

Common

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Collate information required for processing client documentation.	1.1 Confirm client contact details. 1.2 Confirm details of products and services supplied to client and verify quoted prices.

	<p>1.3 Record time spent in providing service to client.</p> <p>1.4 Confirm guarantees or warranty arrangements for products and services.</p> <p>1.5 Check terms of client payment.</p> <p>1.6 Check discrepancies between costs quoted to client and actual cost of products and services, and undertake required follow-up to collect shortfall.</p>
2. Process client documentation.	<p>2.1 Prepare documentation containing complete details of product or service provided.</p> <p>2.2 Calculate cost of providing product or service, and record price in client documentation.</p> <p>2.3 Check documentation for accuracy and amend as necessary prior to providing to client.</p> <p>2.4 Provide and explain documentation to client, including advice on follow-up service if required.</p> <p>2.5 Maintain privacy and confidentiality of client information and documentation.</p>
3. Finalise client documentation process.	<p>3.1 Address client queries or complaints.</p> <p>3.2 Collect payments from client and issue receipts.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- reading skills to review and check:
  - client details
  - products and services documentation
  - guarantees and warranties
- writing skills to prepare client documentation
- numeracy skills to use methods and tools to calculate and check price of products and services provided for clients.

## Range of Conditions

Not applicable

## Unit Mapping Information

Supersedes and is equivalent to CPPCMN3005A Complete client documentation.

## Links

Companion volumes to this training package are available at the VETNet website -

# Assessment Requirements for CPPCMN3005 Complete client documentation

## Modification History

Release 1.

Supersedes and is equivalent to CPPCMN3005A.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 6.

## Performance Evidence

To demonstrate competency in this unit, a person must complete client documentation for two different property services industry clients.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- workplace procedures for completing property services industry client documentation
- requirements of legislation, regulations, Australian standards and codes of practice relevant to client interaction, including those related to:
  - confidentiality
  - consumer protection
  - privacy
- work health and safety (WHS)
- client documentation, including:
  - types of client documentation and standard forms used in the relevant property services industry sector
  - consequences of providing incomplete or inaccurate client documentation
  - details required for completing client documentation
  - importance of accuracy in completing client documentation
  - procedures for explaining documentation to client
- customer service principles
- procedures for processing different methods of payment
- operation and maintenance of equipment required for electronic processing of client documentation, including:
  - calculator
  - EFTPOS machine
  - electronic tablet

- computer
- scanner
- printer.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- work site/s and specifications to complete client documentation
- standard format or template for client documentation
- specifications for the product or service provided to client
- fee schedule for products and services
- relevant workplace policies and procedures.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPCMN3006 Provide effective client service

## Modification History

Release 1.

Revised unit of competency replacing superseded non-equivalent CPPCMN2003A Provide effective client service.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to establish client relationships, and identify and meet client needs through the delivery of services or by providing information and advice on products and services.

The unit supports those who work alone or in teams. It applies in a range of work sites, and to new or repeat client encounters, either on company or client premises.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Common

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |  |  |
|--|--|
| <p>1. Identify and confirm client needs.</p> | <p>1.1. Client is greeted according to company requirements and initial information regarding required products or services is obtained.</p> |
|--|--|

- 1.2. Client requests are analysed and confirmed with client or others where necessary.
  - 1.3. Personal limitations are identified while assessing client needs, and assistance is sought from others where required according to company requirements.
2. Confirm agreed products or services.
  - 2.1. Current sales brochures and product or service information are provided to client according to company requirements.
  - 2.2. Product or service features and benefits are communicated to client according to company requirements and established communication channels.
  - 2.3. Client requests for further information or explanation are responded to accurately and clearly.
  - 2.4. Agreement to provide product or service is established with client, and service level agreement, including costs and timelines, and legislative requirements, are discussed and agreed with client according to company requirements.
3. Deliver products or services to client.
  - 3.1. Human resources required to provide agreed client products or services are identified, briefed and coordinated.
  - 3.2. Client products or services are provided within agreed timelines and according to company requirements.
  - 3.3. Requests to provide products or services outside agreed client service agreement are directed to designated personnel and actioned as required.
  - 3.4. Alternative arrangements are negotiated with clients when commitments cannot be met, according to workplace procedures and company requirements.
4. Respond to client feedback.
  - 4.1. Client feedback is received and responded *to* within agreed timelines and according to company customer service standards and service requirements.

- 4.2. Opportunities to improve product or service delivery are identified and discussed with designated personnel.
- 4.3. Complaints are received and responded to within specified timeframes according to company complaints handling procedures.
- 4.4. Improvements to product or service delivery are communicated to clients.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"><li>• identify personal strengths and weaknesses when providing client services in different contexts</li><li>• seek to develop skills and knowledge in areas of need.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• identify, interpret and meet service timelines.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• interpret non-verbal cues from clients when communicating features and benefits of services and products</li><li>• request feedback from client where necessary.</li><li>•</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• understand specialised vocabulary and acronyms used in own area of expertise or work environment.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• respond to complaints in writing using layout and sequencing that produce cohesive text.</li></ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for CPPCMN3006 Provide effective client service

## Modification History

Release 1.

Revised unit of competency replacing superseded non-equivalent CPPCMN2003A Provide effective client service.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria and foundation skills of this unit.

The person must also provide a service to two different clients within the agreed service level agreement, in which the work must include:

- clarifying client needs and expectations and communicating the features and benefits of one product or service to each client verbally or in writing
- confirming and coordinating human resource requirements for the task
- responding verbally or in writing to one question from each client
- confirming the services to be provided to the client verbally or in writing, including service costs and timelines for service provision
- delivering agreed service to client within agreed timelines
- responding accurately and positively to one client complaint according to company's complaints handling procedures.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- communication techniques for establishing and building client rapport
- company expectations for maintaining personal presentation standards, including:
  - cleanliness and tidiness of own work space
  - codes of conduct
  - dress code
- company standards relating to customer service standards and providing effective client services, including complaints handling procedures

- key requirements of consumer protection legislation, regulations and codes of practice relating to providing client service, including:
  - Competition and Consumer Act
  - Privacy Act
- processes for accessing company products and services, including accessing:
  - company databases
  - manufacturer specifications and information
  - product brochures
- key features of effective negotiation processes and techniques
- range of company products and services available, including their features and benefits, and ways to communicate them to different clients.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - communication devices required for the task
- materials:
  - products and information used when providing client services, including sales brochures and company website
- contingencies:
  - customer complaints
- specifications:
  - client service manuals
  - company policies, including:
    - complaints handling procedures
    - dress code
- physical conditions:
  - suitable work site or venue.

Timeframe:

- according to workplace requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

| Reading skills to:            | <ul style="list-style-type: none"> <li>• read and interpret internal company documents specifying company and team goals and policies.</li> </ul>  |

Writing skills to:

- complete documentation using company templates.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Health and safety requirements*** must include at least six of the following:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- safety data sheets (SDS)
- selection and use of required personal protective equipment (PPE)
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

# Assessment Requirements for CPPCMN3007 Support leadership in the workplace

## Modification History

Release 1.

Replaces superseded equivalent CPPCLO3039A Support leadership in the workplace.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also provide the following support to a workplace supervisor or manager:

- participate in two team meetings, actively and constructively responding to group discussions
- provide coaching or mentor support to one colleague
- identify and resolve a conflict in the workplace using conflict resolution techniques and strategies according to company requirements
- communicate effectively one-to-one and with a small group
- actively contribute to two different team building activities in the workplace.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- causes of stress or conflict in teams and strategies for identifying, managing and reducing them
- company requirements and procedures relating to supporting leadership in the workplace, including:
  - codes of conduct
  - communication protocols
  - own role, responsibility and delegation requirements
  - reporting procedures
  - role and function of workplace teams
- developmental opportunities available to team members and ways to access them, including:
  - apprenticeship opportunities

- career pathways
- in-house training programs
- job rotations
- mentoring opportunities
- key requirements of legislation and regulations, including work health and safety (WHS) legislation and industrial awards and legislation in order to provide support to leadership
- company goals, including:
  - budgetary and profit targets
  - company service standards
- team development techniques.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- physical conditions:
  - suitable work site or venue where work is performed under supervision and where team meetings are conducted
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- according to workplace requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPCMN4001 Develop workplace policies and procedures for sustainability

## Modification History

Release 1.

Revised unit of competency replacing superseded equivalent CPPCMN4001B Develop workplace policies and procedures for sustainability.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to develop a workplace sustainability policy to minimise and reduce resources and toxic materials used during work functions. The unit supports the development of skills to review legislation and develop and communicate workplace policies and procedures relating to environmental sustainability.

The unit supports staff responsible for ensuring policies and procedures comply with environmental legislative requirements and that sustainability targets are achieved. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Common

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Identify scope of sustainability policy.
  - 1.1. Company's commitment to sustainability and sustainability objectives is identified and confirmed in consultation with required personnel.
  - 1.2. *Existing internal policies and procedures* are identified and reviewed for relevance and impact on sustainability policy.
  - 1.3. Impact of requirements of *environmental and sustainability legislation, standards and codes of practice* is reviewed to inform practices and policy development.
  - 1.4. Relevant *stakeholders* are identified and consulted as a key component of policy development process.
2. Develop sustainability policy.
  - 2.1. Strategies are developed and documented for minimising resource use and reducing toxic material and hazardous chemical use at all stages of work.
  - 2.2. Recommendations are made for policy options and benchmark indicators based on likely effectiveness, timeframes and cost.
  - 2.3. Policy is developed that reflects organisational commitment to sustainability.
3. Communicate policy.
  - 3.1. Policy and its expected outcomes are promoted to key stakeholders.
  - 3.2. Those involved in implementing policy are informed of expected outcomes, activities to be undertaken, and assigned responsibilities.
4. Develop sustainability procedures.
  - 4.1. Procedures to help implement policy are developed and documented, and communicated to required personnel.
  - 4.2. Staff coaching and training on sustainability expectations are conducted or arranged as required.
  - 4.3. Mechanisms for tracking resource usage and wastage are established and monitored.
  - 4.4. Opportunities for continuous improvement in resource efficiency are identified and actioned.
5. Review sustainability policy.
  - 5.1. Processes, including timeline for reviewing policy implementation, are documented and required personnel are briefed on roles and responsibilities.

- 5.2. Data on resource usage and waste minimisation efforts over specified timeframes is collated, analysed and documented.
- 5.3. Records are monitored to identify trends that may require remedial action, and used to promote continuous improvement of performance.
- 5.4. Sustainability outcomes are reported according to company requirements.
- 5.5. Policy and procedures are modified as required to ensure improvements are made.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Performance feature

# Assessment Requirements for CPPCMN4001 Develop workplace policies and procedures for sustainability

## Modification History

Release 1.

Revised unit of competency replacing superseded equivalent CPPCMN4001B Develop workplace policies and procedures for sustainability.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also develop a sustainability policy and associated implementation procedures for a workplace, referencing legislation and standards applicable to the work function.

In doing the above work, the person must:

- consult with stakeholders
- develop an implementation strategy for the sustainability policy that includes:
  - methods for communicating the policy objectives
  - plans for training stakeholders
  - strategies for continuous improvement of policy
  - timeline and processes for reviewing implementation of the policy and incorporating improvements.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- policy development processes and practices
- key requirements of environmental and sustainability legislation, standards and codes of practice, including:
  - energy rating standards
  - environmental protection legislation
  - industry codes of practice relating to environmental sustainability

- ISO 14001 Environment Management Systems
- health and safety legislation and regulations
- principles and practices of sustainability management
- methods for implementing sustainability policies and procedures in the workplace, including communication techniques and processes.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer with access to company policies and procedures
- materials:
  - company policies and procedures relating to environmental, health and safety, procurement, quality management and waste management
- specifications:
  - energy rating standards
  - environmental health legislation
  - environmental protection legislation
  - industry codes of practice relating to environmental sustainability
  - ISO 14001 Environment Management Systems
  - health and safety legislation.

Timeframe:

- according to workplace requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

Current purchasing strategies and potential for influencing suppliers to take up environmental sustainability are analysed and documented.</p> <p>1.6. Current work processes are analysed to assist in identifying areas for improvement.</p> |
| 2. Set targets for improvements.                 | <p>2.1. Input into achievable targets is sought from internal and external stakeholders.</p> <p>2.2. External sources of information and data on achievable targets are accessed as required.</p> <p>2.3. Improvements in efficiency targets are set.</p>  |
| 3. Implement performance improvement strategies. | <p>3.1. Techniques and tools are sourced to assist in achieving efficiency targets.</p> <p>3.2. Alternative solutions to workplace environmental issues are evaluated and applied.</p> <p>3.3. Continuous improvement strategies are applied to own area of responsibility, and ideas and possible solutions are communicated to work group and management.</p> <p>3.4. <b><i>Environmental and resource efficiency improvement plans</i></b> for own work group are integrated into other operational activities and are implemented.</p> <p>3.5. <b><i>Recommendations</i></b> for environment and resource efficiency management are sought from stakeholders and acted upon according to organisational policies and</p>                 |

procedures.

- 3.6. Costing strategies are implemented to fully value environmental assets.
4. Monitor performance.
    - 4.1. Outcomes are documented and reports on targets are communicated to key personnel and stakeholders.
    - 4.2. Strategies and benchmark indicators are evaluated.
    - 4.3. New targets are set and new tools and strategies investigated and applied.
    - 4.4. **Compliance** with requirements of legislative standards or codes is monitored and reported according to company requirements.
    - 4.5. Successful strategies are documented according to company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• identify and use reliable sources of information on requirements of environmental legislation, standards and codes of practice.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• analyse numerical information, including costs and volume of resources used</li> <li>• calculate realistic targets for environmental improvements and resource efficiency.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• engage, inform and gain information from stakeholders as part of consultation process.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret information on requirements of environmental and sustainability legislation, standards and codes of practice.</li> </ul>

- Writing skills to:
- prepare clear reports on strategies, targets and outcomes for environmental improvements and resource efficiency.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Resource use*** must include review of at least two of the following:

- chemicals
- consumables
- electricity usage rates
- gas usage rates
- water usage rates.

***Environmental and resource efficiency improvement plans*** must include at least two of the following:

- determining organisation's most suitable waste treatment, including waste to landfill, recycling, re-use and wastewater treatment
- initiating and maintaining organisational procedures for operational energy consumption, including for stationary and non-stationary (transport) energy
- sustainability initiatives, action plans, surveys and audits.

***Recommendations*** must include strategies that result in at least two of the following outcomes:

- elimination of hazardous and toxic materials
- improved energy efficiency
- improved opportunities to re-use and recycle materials
- increased use of renewable resources, including solar or other alternative forms of energy
- plans to offset or mitigate environmental impacts
- reduced greenhouse gas emissions
- reduced reliance on non-renewable resources.

***Compliance*** must include:

- coverage of at least one of the following:
  - energy efficient rating system
  - ISO 14001 Environment Management Systems.

# Assessment Requirements for CPPCMN4002 Implement and monitor environmentally sustainable work practices

## Modification History

Release 1.

Revised unit of competency replacing superseded equivalent CPPCMN4002B Implement and monitor environmentally sustainable work practices.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also implement three new strategies to support environmentally sustainable work practices. Each of the strategies must:

- relate to sustainability improvements in the use of the following resources:
  - consumables
  - electricity
  - gas
  - water
- specify:
  - current usage rates measured in quantities and cost
  - targeted usage rates and how these targets will enhance organisation's commitment to sustainability
  - methods for implementing each strategy
  - processes for documenting and monitoring strategy implementation.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- laws, by-laws, regulations and codes of practice relating to environmental sustainability and resource efficiency improvement
- types, limitations and uses of environmental and resource efficiency improvement plans, including:
  - environmental and resource sustainability initiatives, action plans, surveys and audits
  - applying waste management hierarchy in the workplace

- determining organisation's most suitable waste treatment, including waste to landfill, recycling, re-use and wastewater treatment
- initiating and maintaining organisational procedures for operational energy consumption, including stationary and non-stationary (transport) energy
- use of standards, guidelines and approaches:
  - energy efficiency rating systems
  - ISO 14001 Environment Management Systems.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer with internet access to retrieve and send company documentation
- specifications:
  - energy efficiency rating systems
  - ISO 14001 Environment Management Systems
  - existing company policies and procedures relating to sustainable work practices
- relationship with client:
  - consultation required.

Timeframe:

- according to workplace requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPCMN4003 Establish, develop and monitor teams

## Modification History

Release 1.

New unit of competency replacing superseded equivalent CPPCMN4005A Facilitate effective teamwork and CPPCMN4006A Facilitate effective workplace relationships.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to facilitate the development of team members' working relationships, monitor their interactions and performance, and manage coaching and incentive programs to improve team effectiveness.

The unit supports those who supervise small teams and take responsibility for the quality of work at a particular site. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |                    |  |
|--------------------|--|
| 1. Establish team. | 1.1. Company's social, ethical and business standards are promoted to ensure those standards and <b><i>legislative requirements</i></b> are applied. |
|--------------------|--|

- 1.2. Team communication requirements are established and communication methods are selected to meet team member needs, according to company requirements.
  - 1.3. Roles and tasks of team members are agreed through team consultation and negotiation, and recorded according to company requirements.
  - 1.4. Team and individual KPIs are established and communicated to team members, and recorded according to company requirements.
  - 1.5. Commitment of team members to key performance indicators (KPIs) is gained and maintained through consistent outlining and competent demonstration of workplace procedures.
2. Monitor and support team outcomes.
  - 2.1. Team's work performance is monitored against KPIs and team members are held accountable for completing activities and achieving required outcomes.
  - 2.2. Individual coaching is provided to team members in response to requests or as a result of team monitoring, as required.
  - 2.3. Individual or team member problems are discussed and issues resolved according to company requirements.
3. Develop team performance.
  - 3.1. Opportunities for staff development and training are regularly promoted to staff according to company requirements.
  - 3.2. Development needs of team are identified, recorded and discussed with team members according to company requirements.
  - 3.3. Development activities and support materials that suit identified needs of team members are planned and scheduled according to company requirements.
  - 3.4. Improvements in team and individual work performance are monitored, recorded and rewarded according to company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• apply simple performance assessment rating systems.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• facilitate team discussions and negotiations using accessible language.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• establish clear and measurable KPIs for a small team</li> <li>• take notes and record details of individual team member's performance and development needs.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>• listen to and resolve concerns in relation to workplace issues</li> <li>• understand and apply knowledge of learning styles of team members and select required development activities and support materials in suitable formats.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>• develop rapport and gain confidence of team members</li> <li>• work with diverse individuals and groups</li> <li>• actively encourage team members to learn in order to develop new skills and improve team performance.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Legislative requirements</i></b> must include:	<ul style="list-style-type: none"> <li>• anti-discrimination, equal employment opportunity and racial vilification</li> <li>• consumer law</li> <li>• environmental law</li> <li>• harassment and other laws specific to local government</li> <li>• industry codes of conduct</li> <li>• Work Health and Safety (WHS) Act and regulations</li> </ul>

# Assessment Requirements for CPPCMN4003 Establish, develop and monitor teams

## Modification History

Release 1.

New unit of competency replacing superseded equivalent CPPCMN4005A Facilitate effective teamwork and CPPCMN4006A Facilitate effective workplace relationships.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also establish a working team comprised of a minimum of three members, in which the work must involve:

- establishing three different key performance indicators (KPIs) for each team member according to their roles and responsibilities
- communicating KPIs to each team member and clarifying and confirming understanding and acceptance
- identifying and communicating one developmental opportunity with each person
- monitoring and recording team interactions and individual and team performance over a suitable timeframe.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- team dynamics, including causes of stress or conflict in teams and suitable resolution strategies
- communication requirements and methods suitable for team members and work roles
- company codes and standards for workplace conduct, ethics, and personal presentation
- company policies and procedures relating to own and team members' roles, responsibilities and delegation level, including:
  - work instructions
  - counselling and disciplinary procedures
  - reporting and documentation requirements
  - staff development and learning opportunities

- specific customer requirements
- quality and continuous improvement requirements
- legislative compliance requirements relating to teamwork and work role, including:
  - anti-discrimination
  - consumer rights
  - environmental protection
  - equal employment opportunity
  - privacy
  - sustainability
  - work health and safety (WHS), including personal protective equipment (PPE) requirements.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- materials:
  - company-specific business standards
  - legislative requirements as listed in range of conditions
- specifications:
  - teamwork instructions
- physical conditions:
  - work site
  - a minimum of three new team members
- relationships with team members and supervisor:
  - supervisory responsibility for a small team.

Timeframe:

- according to workplace requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPCMN4004 Develop and manage client relations

## Modification History

Release 1.

Revised unit of competency replacing superseded equivalent CPPCMN4004B Facilitate effective client relationships.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to establish business contacts and networks, and develop and manage these relationships effectively to increase and retain the client base of the company. The unit covers identifying and analysing potential clients and their needs. It also covers exploring products or services with the client that could improve or enhance their operations, which requires knowledge of the range of organisational products and services. The unit involves managing client problems, issues and changing needs; and identifying opportunities to promote additional products and services to meet those needs.

The unit supports those with significant contact with external clients but without managerial or supervisory responsibilities. It applies to those providing information on routine, well-defined products and services, and dealing with enquiries of a more complex nature, including pricing. Performance would usually be carried out under routine supervision, within company guidelines.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-requisite Unit

## Elements and Performance Criteria

Elements describe the      Performance criteria describe the performance needed to

essential outcomes.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Establish new business contacts.	<p>1.1. New organisations with potential to benefit from company products and services are identified according to company requirements.</p> <p>1.2. Individuals in target organisations with potential to benefit are identified and contacted, and effective relationships built according to <i>company requirements</i>.</p> <p>1.3. <i>Communication protocols</i> are agreed with business contacts and maintained according to own level of responsibility and company requirements.</p>
2. Work effectively with business contacts.	<p>2.1. Roles of business contacts are clarified and responsibilities of parties in business relationship are agreed according to company requirements.</p> <p>2.2. Realistic service commitments are set and adhered to according to company requirements.</p> <p>2.3. Flexibility in work practices required in unusual or difficult situations is adopted according to company requirements.</p> <p>2.4. Situations outside own area or level of responsibility are identified and, where appropriate, referred to designated <i>personnel</i> according to company requirements.</p>
3. Identify and monitor client needs.	<p>3.1. Needs and expectations for service delivery are regularly discussed with client according to company requirements.</p> <p>3.2. Feedback on company performance and level of satisfaction is sought from client according to company requirements.</p> <p>3.3. Prompt action is taken on feedback received according to company requirements.</p> <p>3.4. Contracts or variations to contracts or levels of agreed service provision are reviewed and implemented according to company requirements.</p>
4. Respond to complex client needs.	<p>4.1. Complex client needs are analysed and options for resolution are explained to client according to company requirements.</p>

- 4.2. Clients are assisted to evaluate product and service options to satisfy their needs according to company requirements.
- 4.3. Preferred action is determined and prioritised according to company requirements.
- 4.4. Potential difficulties in service delivery are identified and actions taken according to company requirements.
5. Communicate advice and pricing information.
  - 5.1. Pricing information for routine and specified products and services is provided where these match client needs, according to company requirements.
  - 5.2. Follow-up information required by client is provided promptly according to company requirements.
  - 5.3. Bookings with client are scheduled and confirmed according to company requirements.
6. Promote company.
  - 6.1. Strategies to represent, promote and grow company's interests are developed.
  - 6.2. Additional products, services and information are suggested to clients according to company requirements.
  - 6.3. Information is provided to company members to support the development of effective relationships with client.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Performance feature

#### Skill

- |                               |  |
|-------------------------------|--|

# Assessment Requirements for CPPCMN4004 Develop and manage client relations

## Modification History

Release 1.

Revised unit of competency replacing superseded equivalent CPPCMN4004B Facilitate effective client relationships.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also develop and manage business relationships with three new clients and respond to two client requests.

In doing the above work, the person must:

- identify each client's needs
- explain key features and benefits of company's products and services
- present verbal and written information on products and services to each client.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- processes to identify, establish and maintain business contacts and networks
- company requirements, including:
  - client confidentiality provisions
  - code of ethics
  - company image
- legislative and regulatory requirements relating to the work or service function, including:
  - codes of conduct
  - consumer law
  - environmental law
  - privacy legislation
  - quality and continuous improvement systems, standards and guidelines

- range of products and services available to business contacts
- benefits of maintaining good client communication when delivering customer service
- role of designated personnel in developing and managing client relations.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer with internet access
- materials:
  - company policies and procedures relating to client relations
  - legislation and regulatory information relating to job role
- contingencies:
  - two client requests
- specifications:
  - company product and service specifications
- relationship with client:
  - client consultation.

Timeframe:

- according to workplace requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPPCMN4007 Manage workplace safety arrangements

## Modification History

Release 1.

Revised unit of competency replacing superseded equivalent CPPCMN4007A Manage workplace safety arrangements.

This version first released with CPP Property Services Training Package Version 4.

## Application

This unit of competency specifies the outcomes required to implement and monitor the company's health and safety policies, procedures and programs to achieve and maintain health and safety standards and ensure the effective implementation of workplace safety arrangements. It includes managing the provision of information and the implementation, supervision and review of health and safety policies and programs that contribute to a safe work environment.

The unit supports employees with supervisory responsibilities who carry out work within company guidelines. It applies in a range of work sites.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Common

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |    |  |   |
|----|--|---|
| 1. | Provide information about company's health and safety policies, procedures and programs. | <p>1.1. Relevant provisions of health and safety legislation as they relate to workplace procedures are explained clearly and accurately to work group according to company requirements.</p> <p>1.2. Company <b>health and safety requirements</b>, policies, procedures and programs are explained clearly and accurately to work group according to company requirements.</p> <p>1.3. <b>Information about health and safety policies, procedures and programs</b> is provided to work group in a readily accessible manner according to company requirements.</p> <p>1.4. <b>Information about identifying hazards and assessing risks</b> and the process and outcomes of risk assessment and risk control procedures is provided and explained regularly, clearly and accurately to work group according to company requirements.</p> |
| 2. | Implement and monitor participative arrangements for managing health and safety.         | <p>2.1. Processes enabling participation in health and safety issues are implemented and monitored.</p> <p>2.2. Issues arising from participative arrangements are promptly assessed and resolved, or referred for resolution according to workplace procedures.</p> <p>2.3. Outcomes of participative arrangements pertaining to health and safety issues are documented and promptly communicated to work group according to company requirements.</p>  |
| 3. | Implement and monitor company procedures for identifying hazards and assessing risks.    | <p>3.1. Existing and potential <b>hazards</b> in the work area are identified and reported according to health and safety legislation, workplace procedures, and company requirements.</p> <p>3.2. <b>Risk analysis</b> using <b>risk analysis protocols</b> is conducted and action to <b>control risks</b> is taken according to health and safety legislation, workplace procedures, and company requirements.</p> <p>3.3. Work area is monitored continuously to identify new hazards according to health and safety legislation, workplace procedures, and company requirements.</p>   |
| 4. | Implement and monitor company  | <p>4.1. Work procedures for controlling risks are developed and implemented according to health and safety legislation</p>  |

- procedures for controlling risks.
- and company requirements.
- 4.2. Adherence to work procedures by work group is monitored according to company requirements.
- 4.3. Effectiveness of work procedures is monitored using hierarchy of control, and results are reported regularly according to company requirements.
- 4.4. Resource allocation requirements for implementing work procedures to control risks are identified, and inadequacies are reported according to company requirements.
5. Implement company procedures for dealing with hazardous events.
- 5.1. Incidents are investigated to establish cause according to health and safety legislation and company requirements.
- 5.2. **Hazardous event control procedures** for dealing with hazardous events and emergencies are implemented according to health and safety and environmental legislation, and company requirements.
- 5.3. Control measures based on hierarchy of control are implemented within scope of responsibilities or referred to **appropriate personnel** for implementation according to company requirements.
6. Implement and monitor company procedures for providing health and safety training.
- 6.1. Health and safety training needs are identified and documented according to company requirements.
- 6.2. Training, coaching and mentoring to meet identified needs of work group are arranged through consultation with involved parties according to company requirements.
7. Implement and monitor company procedures for maintaining health and safety records.
- 7.1. Company's incident or accident reporting and recording process is provided and explained to work group according to company requirements.
- 7.2. **Health and safety records** of occupational injury and disease are completed according to legal requirements, workplace procedures, and company requirements.
- 7.3. Hazard analysis data and information from health and safety records are used to identify hazards and monitor risk control procedures within scope of responsibilities and competencies and according to company requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Performance feature

#### Skill

- Learning skills to:
- identify and use reliable sources of information to confirm details of work health and safety (WHS) requirements
  - apply prior knowledge of assessing risks and evaluating risk control measures, including applying hierarchy of control to new work hazards.
- Numeracy skills to:
- interpret numerical information from manufacturer specifications and safety data sheets (SDS).
- Oral communication skills to:
- negotiate work group training, coaching and mentoring
  - explain accident and reporting and recording process to work group using suitable language.
- Reading skills to:
- locate and interpret WHS compliance requirements in complex texts.
- Writing skills to:
- prepare clear and sequential procedural documentation in language suitable for work group.
- Initiative and enterprise skills to:
- develop rapport with team members to facilitate coaching and mentoring.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Health and safety requirements*** must include:
- access to communication devices when working alone
  - compliance with Safe Work Australia regulations and guidelines
  - electrical equipment test and tag compliance
  - emergency response procedures
  - environmental controls
  - hazard signs and barricades
  - health and safety induction and refresher training
  - manual handling techniques
  - processes for safely dispensing chemicals

***Information about health and safety policies, procedures and programs*** must include:

***Information about identifying hazards and assessing risks*** must include:

- risk assessment procedures, including:
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required personal protective equipment (PPE)
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.
- hazards and risk management procedures
- information on the safety aspects of work, tasks and procedures
- procedures for providing direct supervision, such as to inexperienced workers
- information in industry association journals or workers' compensation literature
- details of health and safety representatives and health and safety committees.
- accessing manufacturer guidance information and manuals
- applying SWMS procedures
- assessing job and work systems
- assessing severity of identified hazards, and ranking according to severity
- briefing workplace safety inspectors or contracted health and safety advisers
- checking work area and equipment before and during work
- conducting pre- and post-operational equipment checks
- conducting workplace inspections
- consulting with employees, health and safety representatives and health and safety committee
- housekeeping
- performing routine job hazard analysis
- purchasing supplies and equipment
- reviewing SDS
- manufacturer or supplier information
- referencing government or industry hazard or safety alerts, including via industry association contacts and networks
- regularly maintaining plant and equipment
- reviewing health and safety records, including:
  - registers of hazardous substances and dangerous goods
  - undertaking safety audits.

- Risk analysis*** must include:
- hazard identification
  - risk assessment
  - risk treatment and/or control
  - risk monitoring and evaluation.
- Risk analysis protocols*** must be selected based on at least one of the following criteria:
- Australian standards, company standards and client standards
  - combination of quantitative and qualitative assessment tools, specific to risks being assessed
  - operational, technical, financial, legal, social, humanitarian or other criteria
  - scope of risk management project being undertaken.
- Controlling risks*** must include at least one of the following:
- applying hierarchy of control
  - consulting with manufacturers, suppliers, employers and their representatives
  - consulting with workers and their representatives
  - developing reliable systematic approach to risk control
  - ensuring adequate training of staff
  - measuring risk likelihood and consequence
  - implementing measures to remove cause of risk at its source
  - monitoring and regularly reviewing work systems and procedures
  - rewarding good health and safety practice.
- Hazardous event control procedures*** must include:
- following instructions from authorised and delegated personnel during hazardous events
  - chemical containment and clean-up
  - emergency management plan
  - evacuations
  - provision of first aid
  - accident and incident reporting
  - injury and dangerous occurrence reporting.
- Appropriate personnel*** must include at least one of the following:
- managers
  - health and safety personnel
  - other persons, including emergency service personnel, authorised or nominated by the company or industry to:
    - approve specified work
    - direct specified work or functions
    - inspect specified work
    - perform specified work or functions.
- Hazards*** that must be identified and reported include:
- biological hazards
  - chemical hazards, including unlabelled chemicals and substances
  - environmental hazards, such as:
    - noise

**Health and safety records** must include documented:

- radiation
- untidy work areas
- vibration
- ergonomic or mechanical hazards, such as those associated with electrical and mechanical faults of plant and equipment, including mobile plants
- physical hazards, such as:
  - electrical
  - obstructions or blocked exits
  - slippery or uneven floors
- psychological hazards.
- first aid and medical post records
- hazardous substances registers
- health surveillance and workplace environmental monitoring records
- maintenance and testing reports
- manufacturer and supplier information, including SDS and dangerous goods storage lists
- health and safety audits and inspection reports
- records of instruction and training
- safety bulletins or notices
- workers' compensation and rehabilitation records.

## Unit Mapping Information

CPPCMN4007A Manage workplace safety arrangements

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPCMN4007 Manage workplace safety arrangements

## Modification History

Release 1.

Revised unit of competency replacing superseded equivalent CPPCMN4007A Manage workplace safety arrangements.

This version first released with CPP Property Services Training Package Version 4.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also provide clear information and instruction to one work group on workplace procedures pertaining to health and safety in a readily accessible manner, and:

- apply company processes and procedures for health and safety
- demonstrate leadership skills in working with teams to identify hazards within work group, ensuring unresolved issues are referred and actioned
- apply risk management procedures, including undertaking hazard identification, risk assessment and risk control according to hierarchy of control
- identify and facilitate health and safety training needs and reporting requirements of work group
- identify characteristics of workforce that affect the management of health and safety
- identify health and safety compliance requirements relating to specific work tasks
- integrate health and safety into company systems
- apply key requirements of health and safety legislation, regulations and codes of practice applicable to work tasks
- provide clear information and instructions to work group on workplace procedures relating to health and safety in plain English and catering for individual language and literacy levels
- apply obligations for duty of care.

In doing the above work, the person must also demonstrate strategies in place to manage five of the following hazardous events that may occur in the workplace:

- accidents, including motor vehicle accidents
- bomb threats

- chemical spills
- electrocution
- fires and explosions
- inhalation of dangerous substances
- manual handling
- natural disasters
- slips, trips and falls
- violent incidents, such as:
  - armed robberies
  - workplace bullying.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- characteristics of the company's workforce, including type of work undertaken and impacts on health and safety management
- company processes and procedures, including those relating to:
  - accident and incident investigation
  - assessing and controlling risks
  - consultation and participation arrangements for employees and third parties
  - emergency planning and response
  - housekeeping and work environment
  - identifying hazards
  - health and safety management
  - health and safety procedures, including:
    - developing and communicating company health and safety policy
    - providing health and safety information, instruction, supervision and training
    - health and safety record keeping
    - reporting and resolving health and safety issues
    - training and assessment
  - risk management
- principles of:
  - access and equity
  - hazard management
  - leadership as it applies to managing workplace safety
  - health and safety management systems
- risk management procedures, including risk assessment and risk control procedures reflecting the following order of the process:
  - hazard identification
  - risk assessment
  - hazard control

- evaluation
- safe operating procedures or instructions that cover:
  - awareness of electrical hazards
  - chemical storage, handling and disposal
  - confined space procedures
  - dust
  - first aid and injury management
  - manual handling
  - noise
  - requirements for maintaining safety when working alone
  - safe use of tools and equipment
  - security
  - specific hazards
  - storage of dangerous goods
  - toxic, infectious and sharps waste
  - use of personal protective equipment (PPE)
  - use of safety data sheets (SDS)
  - vehicles and mobile equipment
  - working safely around electrical hazards, including wiring, cables and overhead powerlines
- processes and practices for training staff in workplace safety requirements
- strategies for providing workplace participative arrangements:
  - implementing employee performance feedback programs
  - formal and informal meetings of:
    - health and safety representatives
    - health and safety committees
    - other special purpose committees, such as consultative, planning and purchasing
  - company information, staff bulletins and notices
  - suggestions, requests, reports and concerns put forward by employees to management
- strategies for encouraging staff contributions to participative arrangements, including:
  - actively listening to ideas and opinions of staff
  - reinforcing positive behaviours that contribute to a safe workplace
  - sharing opinions, views, skills and knowledge of workplace health and safety
- key requirements of work health and safety (WHS) legislation and regulations, including:
  - dangerous goods codes
  - general duty of care under health and safety legislation and common law provisions relating to health and safety issue resolution
  - legal responsibilities of employers, employees and other parties with legal responsibilities

- provisions relating to roles and responsibilities of health and safety representatives and/or health and safety committees
- regulations and codes of practice, including those relating to hazards present in the workplace or industry
- maintenance and confidentiality of records of occupational injury and disease
- provision of health and safety information and training
- procedures for workplace safety inspections and audits.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- materials:
  - computer with internet access
  - health and safety records as listed in the range of conditions
- specifications:
  - company's health and safety policies, procedures and programs
  - plain English guides to legislation and other compliance requirements
- relationships with team members and supervisor:
  - supervisory responsibility for a small team.

Timeframe:

- as specified by the task.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPCMN4008 Read plans, drawings and specifications for residential buildings

## Modification History

Release 1.

Replaces superseded equivalent CPPCMN4008A Read and extract information from plans, drawings and specifications for residential buildings.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to read and extract information from different types of plans, building drawings and specifications for residential buildings.

The unit supports workers in the property industry who are required to read and extract routine information from a variety of plans and drawings associated with residential buildings. It applies to real estate agents, property managers, strata managers, Nationwide House Energy Rating Scheme (NatHERS) assessors, home sustainability assessors and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Common

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Identify and review plans and drawings.	1.1. Main <b><i>types of plans and drawings</i></b> for <b><i>residential buildings</i></b> are identified. 1.2. Purpose of different types of plans and drawings are identified. 1.3. <b><i>Key features of each type of plan and drawing</i></b> are identified.
2. Check amendments to plans and drawings.	2.1. Title panel is checked to verify latest amendment to plans and drawings. 2.2. Amendments to <b><i>specifications</i></b> are checked to ensure currency of information.
3. Identify symbols, terms, abbreviations and shading used in plans and drawings.	3.1. Symbols used in plans and drawings are identified. 3.2. Abbreviations used in plans and drawings are identified. 3.3. Colouring and shading used in plans and drawings are identified. 3.4. Building and construction terms used in plans and drawings are identified.
4. Locate and identify key features on a site plan.	4.1. Site is identified from location drawings. 4.2. True north and building orientation are identified from details provided on site plan. 4.3. <b><i>Key features of site plan</i></b> are identified.
5. Extract data from plans, drawings and specifications.	5.1. Key building features are identified in relevant plans and drawings. 5.2. <b><i>Data on key building features</i></b> is extracted from relevant plans, drawings and specifications. 5.3. Building codes or standards identified in specifications are identified. 5.4. Key features of products included in specifications are identified.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	<ul style="list-style-type: none"><li>maintain current knowledge of types and application of plans, drawings and specifications for residential buildings.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>convert numerical values and scales shown on plans, drawings and specifications for buildings.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>read and interpret information about agency practices, industry conduct standards, and employment conditions.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>record information extracted during review.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>use computerised databases to locate relevant plans, drawings and specifications for residential buildings.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Types of plans and drawings</i></b> must include:	<ul style="list-style-type: none"><li>drawings:<ul style="list-style-type: none"><li>details</li><li>elevation</li><li>ground plans</li><li>layout drawings</li></ul></li><li>plans:<ul style="list-style-type: none"><li>heritage and conservation overlays</li><li>landscaping and vegetation</li><li>locality</li><li>lot and common property survey plans</li><li>sites</li><li>strata plans</li><li>survey plans</li></ul></li><li>services drawings:<ul style="list-style-type: none"><li>drainage</li></ul></li></ul>
---	--

- ducts
  - piping
  - vertical section
  - waste disposal
  - wiring
  - sketches.
- Residential buildings** must include:
- any building categorised as Class 1, 2, 4 and 10a of the Building Code of Australia or in accordance with jurisdictional requirements.
- Key features of each type of plan and drawing** must include at least four of the following:
- certification
  - compatibility
  - construction
  - dimensions
  - legend
  - location
  - orientation
  - quantities of materials
  - scale
  - sizes
  - types of products or services.
- Specifications** must include at least two of the following:
- levels and survey information
  - material technical data
  - materials lists
  - performance data
  - schedules of quantities
  - stress, load and bearing calculations.
- Key features of site plan** must include:
- access and egress
  - common property
  - contours and slopes
  - drainage lines
  - easements
  - environmental and heritage overlays
  - existing dwellings, buildings or other structures
  - location and situation
  - major geological and topographical features
  - orientation
  - paving
  - retaining walls
  - scale
  - service connection points
  - set backs

- Data on key building features* must include:
- stormwater disposal
  - trees and other vegetation.
  - common property
  - dimensions
  - location
  - materials
  - ratings
  - standards.

## Unit Mapping Information

CPPCMN4008A Read and extract information from plans, drawings and specifications for residential buildings

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPCMN4008 Read plans, drawings and specifications for residential buildings

## Modification History

Release 1.

Replaces superseded equivalent CPPCMN4008A Read and extract information from plans, drawings and specifications for residential buildings.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must read and extract information from different types of plans, building drawings and specifications for four different residential buildings.

The person must also source the plans, building drawings and specifications relating to each of the above buildings, and identify the information needed to respond to three routine workplace requests for information on each building.

In doing the above, the person must:

- identify different types of plans and drawings for residential buildings and their functions
- read and interpret plans, drawings and specifications for each residential building, including identifying key features, levels, contours, sections, service entry points, and site features
- check amendments to plans and drawings for each residential building
- identify symbols, terms and abbreviations used in the plans and drawings.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- building drawings, including:
  - drawing perspectives
  - features
  - scale

- symbols, terms and abbreviations used
- types of building drawings and their respective purposes
- plans relevant to residential buildings:
  - heritage and conservation overlays
  - landscaping and vegetation
  - locality
  - lot and common property survey plan
  - sites
  - strata plan
  - survey plan
- key requirements of federal, state or territory building and construction codes, standards and regulations relating to:
  - residential building materials
  - residential building styles.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system to access online databases of residential building plans and drawings
- specifications:
  - plans, drawings and specifications for different styles of residential buildings
  - relevant codes, standards and regulations relating to the construction of residential buildings.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations (RTOs)* current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPCMN4009 Develop team understanding of and commitment to sustainability

## Modification History

Release 1.

Replaces superseded equivalent CPPCMN4009A Develop team understanding of and commitment to sustainability.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to develop and support team members to build their understanding of and commitment to the principles and practices associated with sustainability. The ability to lead and motivate a team and to develop and use coaching, mentoring and learning strategies that bring about organisational and cultural change are required.

The unit supports businesses in adopting sustainable practices and policies that go beyond meeting mandated requirements, to harnessing opportunities. It applies to individuals responsible for leading team members in a business committed to economic, social and environmental sustainability.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Competency Field

Common

## Unit Sector

Property services

## Elements and Performance Criteria

<p>Elements describe the essential outcomes.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</p>
<p>1. Support the building of skills to reflect sustainability principles.</p>	<p>1.1. Purpose, benefits and practices of <i>sustainability</i> are researched and analysed.</p> <p>1.2. Government policies and incentives regarding the implementation of sustainable business practices are accessed and reviewed.</p> <p>1.3. Current organisational strategies, policies and procedures regarding the implementation of sustainable practices are accessed and reviewed.</p> <p>1.4. Information is gathered on existing staff skills, knowledge and behaviours in relation to sustainability, and gaps are identified.</p> <p>1.5. Contribution is made to developing and documenting a strategy to build required staff skills, and their understanding of the purpose, benefits and practices of sustainability.</p>
<p>2. Support the implementation of sustainable practices.</p>	<p>2.1. Organisational goals and objectives relating to sustainability are communicated to staff.</p> <p>2.2. Individuals and teams are provided with guidance to establish goals, responsibilities and <i>performance indicators</i> relating to sustainability.</p> <p>2.3. Individuals and teams are supported in enhancing performance and achievement of organisation's goals, including effective implementation of sustainability processes, policies and procedures.</p> <p>2.4. Own performance is managed in line with organisational and legal requirements.</p>
<p>3. Lead the team effectively.</p>	<p>3.1. Updates on the organisation's plans and approach to implementing sustainability processes are communicated to staff using effective and open communication channels.</p> <p>3.2. Staff are coached and mentored to develop understanding of sustainability issues and improve the implementation and performance of workplace</p>

- processes.
- 3.3. Effective strategies to facilitate team growth and increase motivation are developed, trialled and implemented.
  - 3.4. Outcomes of sustainability initiatives in the workplace are communicated and effective performance is acknowledged and supported in line with organisational policies and guidelines.
4. Contribute to staff development needs.
    - 4.1. Current and future staff development needs relating to sustainability are identified and documented.
    - 4.2. Staff members are provided with opportunities to develop skills and knowledge relating to sustainability.
    - 4.3. Training and development needs of staff are accounted for in relevant budgets and operational plans.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of sustainability policies and practices used in business.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• use graphs and statistics to report on business attainment of performance indicators relating to sustainability.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• respond to complex questions from team members about sustainability policies and practices of the business and performance against sustainability performance indicators.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• read and assess reports and papers on building support among team members for organisational sustainability policies.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare reports on existing staff skills, knowledge and behaviours in relation to sustainability.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• use business technologies to communicate with team members on the outcomes of sustainability initiatives in the workplace.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Sustainability*** must include:
- economic sustainability, demonstrated by:
    - cost-effective use of resources
    - ensuring costs of ‘green’ solutions are properly accounted for and recovered
    - growing market share by appealing to socially aware customers
    - purchasing locally to reduce transport costs
    - seeking to participate in government schemes that reward or fund sustainable operations
  - social sustainability, demonstrated by:
    - building community involvement
    - communicating benefits of sustainable products and services to customers
    - purchasing locally and using local and community-based products and services
    - using ‘fair trade’ products
  - environmental sustainability, demonstrated by:
    - efficient use of resources
    - eliminating hazardous and toxic materials
    - identifying strategies to offset or mitigate environmental impacts, such as purchasing carbon credits
    - making more efficient use of energy
    - maximising opportunities to re-use and recycle materials
    - preventing and minimising risks and maximising opportunities, such as use of solar or other alternative forms of energy where appropriate
    - purchasing renewable energy
    - reducing emissions of greenhouse gases
    - reducing use of non-renewable resources
    - reducing waste.

***Performance***

***indicators*** must

include at least two of the following:

- benchmarks achieved against external certification process requirements
- costs measured against performance targets
- level of recycling achieved and reduction of waste
- response to marketing and communication strategies
- sales achieved measured against performance targets.

## **Unit Mapping Information**

CPPCMN4009A Develop team understanding of and commitment to sustainability

## **Links**

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPCMN4009 Develop team understanding of and commitment to sustainability

## Modification History

Release 1.

Replaces superseded equivalent CPPCMN4009A Develop team understanding of and commitment to sustainability.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also lead a team involved in implementing and monitoring a sustainable business practice in an organisation. The sustainable business practice must focus on at least one of the following:

- economic sustainability
- social sustainability
- environmental sustainability
- integrated economic, social and environmental sustainability.

In doing the above, the person must:

- research and identify good sustainability business practices
- support the implementation of sustainability practices, including leading and motivating a team involved in implementing sustainability practices
- develop and use coaching, mentoring and learning strategies that bring about organisational and cultural change in relation to the sustainability focus.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- concepts and models of sustainability
- concepts and models of team leadership
- organisational policies and procedures relating to sustainable practices
- strategies, tools and products to support sustainable practices in the organisation
- adult learning and development principles and processes

- legislative and regulatory requirements relating to sustainability
- techniques for identifying training needs
- theories of work team motivation.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - organisational sustainability policies
  - resources explaining and providing examples of sustainable business practices
  - reports from other parties involved in the process of identifying and implementing sustainability practices
- relationship with team members:
  - leading a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPCMN4012A Contribute to sustainable solutions throughout a building's life cycle

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to participate in the implementation throughout a building's life cycle of policies and practices that are environmentally responsible and resource efficient.

It covers the skills and knowledge necessary to research and implement policies and practices that address factors, including the use of non-toxic materials, enhancement of internal environmental quality, reduction of waste, efficient use of resources, and inclusion of alternative and renewable energy solutions.

Sustainable practices also relate to the retrofitting of 'green' solutions and the maintenance of buildings.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Application of the Unit

### Application of the unit

This unit of competency supports individuals responsible for contributing to the implementation of sustainable solutions.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

### Prerequisite units

Nil

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

**1. Develop understanding of environmental impact over a building's life.**

1.1 Purpose, benefits and practices of identifying and addressing *environmental impact* of a building during its life cycle are explored and used to inform the provision of services to customers.

1.2 Concepts and models of the *environmental life cycle of buildings* are explored and used to inform the provision of services to customers.

1.3 *Range of products and services* offered to support the sustainable and effective management of a building over its life cycle are reviewed and assessed.

**2. Identify and communicate effective environmental solutions.**

2.1 Benefits of adopting strategies that contribute to reducing environmental impact over the building's life cycle are analysed and communicated to customers.

2.2 Current products and services offered by the business are reviewed and analysed to identify their benefits and contribution to reducing environmental impacts.

2.3 Advice is sought from team members or related external professionals when services sought by the customer extend beyond current offerings.

## ELEMENT

## PERFORMANCE CRITERIA

### 3. Support implementation of effective environmental solutions.

3.1 Information and advice are provided to customer regarding optimal use and maintenance of the product or service to ensure environmental benefits are maximised.

3.2 Services provided by the business are checked for compliance with legislation and industry best practice to ensure optimum environmental performance.

3.3 Documentation, including 'green' certification and environmental performance ratings, is provided to the customer and its purpose explained.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to:
  - apply suitable sustainable practices
  - analyse risks
- problem-solving skills to identify appropriate sustainable solutions for the customer
- research skills to identify sustainable products, services and trends in sustainability and the environmental impact of buildings
- technical skills relevant to job role
- technology skills to use computer applications
- written and oral communication skills to:
  - communicate clearly and concisely verbally and in writing
  - consult with individuals and work team
  - read and interpret documentation

#### Required knowledge

- advanced understanding of the principles and practices of sustainability within the construction and property services industries
- concepts and models for building life cycle management
- concepts of risk management planning and processes
- environmental and resource hazards
- industry codes and standards, including Building Code of Australia (BCA)

## REQUIRED SKILLS AND KNOWLEDGE

- industry quality requirements
- organisational policies and procedures related to sustainable practices
- strategies, tools and products to support sustainable practices
- techniques and models for research
- legislative and regulatory requirements relating to environmental standards and OHS

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment** This unit of competency could be assessed by observing at least two instances of the implementation and monitoring of integrated economic, social and environmental sustainability policies and procedures in an organisation.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit** A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit.

In particular the person should demonstrate the ability to:

- identify and communicate the environmental impact of a building over its life cycle, from construction to demolition
- identify the products and services that support improved sustainability
- communicate with customers effectively and develop environmentally effective solutions.

**Context of and specific resources for assessment** Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include access to:

- relevant legislation, standards and guidelines
- workplace documentation and personnel
- reports from other parties involved in the process of identifying and implementing improvements.

<b>Method of assessment</b>	<p>Assessment methods must:</p> <ul style="list-style-type: none"><li>• satisfy the endorsed Assessment Guidelines of the Property Services Training Package</li><li>• include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application</li><li>• reinforce the integration of employability skills with workplace tasks and job roles</li><li>• confirm that competency is verified and able to be transferred to other circumstances and environments.</li></ul> <p>This unit could be assessed on its own or in combination with other units relevant to the job function.</p>
<b>Guidance information for assessment</b>	<p>Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.</p> <p>Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.</p>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Environmental impact*** of a building can be reduced by strategies, including:

- efficient use of energy
- efficient use of resources required for construction and maintenance
- elimination or minimisation of hazardous and toxic materials
- minimisation of water use

***Environmental life cycle of buildings*** refers to the impacts of:

- reduced use of non-renewable resources
- re-use and recycling of materials
- use of solar or other alternative forms of energy
- waste reduction.
- extraction and processing of the raw materials used in construction and the energy intensity used
- construction of the building, including:
  - design to minimise reliance on energy-intensive heating, cooling and lighting
  - efficient use of materials
  - installation of alternative energy sources
  - minimisation of waste
  - use of non-toxic materials
  - use of recycled materials
- maintenance of the building, including:
  - use of non-toxic cleaning and maintenance materials
  - efficient energy and water use
  - recycling and materials re-use
  - efficient waste recycling
- demolition of the building, including:
  - efficient and safe disposal of materials
  - recycling of building materials.

***Range of products and services*** is diverse, will typically be provided by a range of companies, and may include:

- building design services
- cleaning operations services
- construction services
- facilities management services
- supply of energy-efficient building systems
- waste management services.

## CPPCMN4013B Operate a sustainable business

### Modification History

Unit revised and equivalent to CPPCMN4013A Operate a sustainable business

- Minor changes to performance criterion 2.2 and range statement

### Unit Descriptor

This unit of competency specifies the outcomes required to, when operating a business, identify and implement products, services and practices that are economically, socially and environmentally sustainable over time.

The ability to monitor operations, implement plans efficiently, and deliver sustainable services, products and practices that meet customer needs is essential.

### Application of the Unit

This unit of competency supports individuals responsible for managing the operations of sustainable businesses.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

- |   |   |  |
|---|---|--|
| 1 | Seek sustainable business opportunities.  | 1.1 Trends in consumer expectations and business environment regarding <i>sustainability</i> are researched and analysed.  |
|   |   | 1.2 Developments in sustainable products and services offered within the market are researched and analysed, and their suitability is assessed.  |
|   |   | 1.3 Competitors' sustainable offerings and market position are identified and reviewed.  |
|   |   | 1.4 Existing and new customers are consulted to explore sustainable business opportunities.  |
| 2 | Communicate performance requirements and monitor sustainable product and service provision. | 2.1 <b><i>Performance indicators</i></b> to manage the delivery of products or services are identified and implemented.  |
|   |   | 2.2 Required sustainable business outcomes are documented and reports on progress against performance indicators are communicated to <b><i>stakeholders</i></b> .  |
|   |   | 2.3 Opportunities to gain certification or participate in external benchmarking activities to validate sustainable products, services and practices are identified and responded to in line with operational procedures and authorisation. |
|   |   | 2.4 Compliance with relevant legislative standards and codes is monitored and reported according to requirements.  |
|   |   | 2.5 Successful sustainable business strategies and practices are promoted and, where possible, compliance is recognised.   |
| 3 | Promote a workplace culture that supports   | 3.1 Policies and procedures are developed and communicated to establish understanding of and commitment to economic, social and environmental  |

	sustainable products, services and practices.		sustainability.
		3.2	Coaching and mentoring strategies are used to build the skills and knowledge of contractors and team members with regard to sustainable products, services and practices.
		3.3	Reward and recognition processes are developed to ensure staff commitment to implementing and applying sustainability solutions.
4	Monitor and manage customer satisfaction with sustainability policies, practices, products and services.	4.1	<b><i>Mechanisms to monitor client satisfaction</i></b> are designed and used.
		4.2	Effective and timely feedback is provided to staff, contractors and suppliers regarding the efficiency and effectiveness of their service provision.
		4.3	<b><i>Strategies to communicate and market</i></b> the benefits of sustainable strategies are planned and implemented.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- change-management skills to respond to new opportunities and implement sustainable business solutions
- decision-making skills to:
  - evaluate and select business opportunities
  - develop communication strategies
  - assess effectiveness of service provision
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - compare benchmarks
  - consult with work group
  - read and interpret documentation, including:
    - environment and energy efficiency requirements
    - resource use
  - report against identified performance indicators

- seek and receive feedback
- source, organise and record information
- use costing strategies
- lateral and creative thinking to identify new sustainable business opportunities and plan projects
- problem-solving skills to respond to customer service issues
- research skills to:
  - identify policies, practices, products and services that contribute to sustainability
  - analyse and compare their performance
- technology skills to use computer applications

### Required knowledge

- concepts and models that address:
  - economic sustainability
  - social sustainability
  - environmental sustainability
- concepts and models of strategic and tactical business planning
- governance and accountability models and processes that inform sustainability practices
- legislation, regulations, codes of practice and industry advisory standards that apply to sustainability
- organisational strategy, policy and procedures to enhance business sustainability
- performance characteristics and benefits of sustainable policies, products, services and processes
- strategies for:
  - continuous improvement
  - effecting outcomes
  - maximising opportunities
  - minimising impacts

### Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment** This unit of competency could be assessed by observing at least two instances of the implementation and monitoring of integrated economic, social and environmental sustainability policies and procedures in an organisation.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit.

In particular the person should demonstrate the ability to:

- identify opportunities for improved sustainability within the business
- build a culture that supports sustainability policies and practices
- implement and monitor the quality delivery of sustainable business operations.

**Context of and specific resources for assessment**

Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include access to:

- relevant legislation, standards and guidelines
- workplace documentation and personnel
- reports from other parties involved in the process of identifying and implementing improvements.

**Method of assessment**

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Property Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

This unit could be assessed on its own or in combination with other units relevant to the job function.

**Guidance information for assessment**

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Sustainability*** is broadly defined as having three separate but inter-related components with characteristics, including:

- economic sustainability, demonstrated by:
  - cost-effective use of resources
  - ensuring costs of ‘green’ solutions are properly accounted for and recovered
  - growing market share by appealing to socially aware customers
  - purchasing locally to reduce transport costs
  - seeking to participate in government schemes that reward or fund sustainable operations
- social sustainability, demonstrated by:
  - building community involvement
  - communicating benefits of sustainable products and services to customers
  - purchasing locally and using local and community-based products and services
  - using ‘fair trade’ products
- environmental sustainability, demonstrated by:
  - efficient use of resources
  - eliminating hazardous and toxic materials
  - identifying strategies to offset or mitigate environmental impacts, such as purchasing carbon credits
  - making more efficient use of energy
  - maximising opportunities to re-use and recycle materials
  - preventing and minimising risks and maximising opportunities, such as use of solar or other alternative forms of energy where appropriate
  - purchasing renewable energy
  - reducing emissions of greenhouse gases
  - reducing use of non-renewable resources
  - waste reduction.

***Performance indicators*** may include:

- benchmarks achieved against external certification process requirements

- costs measured against performance targets
  - level of:
    - recycling achieved
    - reduction of waste
    - response to marketing and communication strategies
  - sales achieved, measured against performance targets.
- Stakeholders* may include:
- contractors
  - customers
  - other stakeholders
  - staff
  - suppliers.
- Mechanisms to monitor client satisfaction* may include:
- customer satisfaction surveys that may be repeated over time to identify trends
  - formal customer debriefings of project and response received to the debriefing
  - tracking data to monitor:
    - resolution of problems, including time taken for response and completeness of resolution of issue
    - repeat purchases
  - verbal or written feedback provided to sales consultants or staff.
- Strategies to communicate and market* may include:
- advertising
  - brand management
  - internet and ‘viral’ marketing
  - personal selling
  - product placements
  - promotions
  - public relations
  - sponsorships
  - word of mouth.

## CPPCMN5001A Plan for a sustainable business

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to plan sustainable business operations.

The unit covers the skills and knowledge required to develop plans and strategies to ensure a business is successful in addressing factors that lead to economic, social and environmental sustainability.

Planning skills and the ability to review sustainable policies and practices are important. Understanding resourcing implications and the ability to put in place appropriate measures of sustainability outcomes are also essential for success.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Application of the Unit

#### Application of the unit

This unit of competency supports individuals responsible for managing sustainability planning.

### Licensing/Regulatory Information

Refer to Unit Descriptor

### Pre-Requisites

#### Prerequisite units

Nil

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. <b>Inform the development of a plan for sustainability.</b>	1.1 <i>Research</i> into the aspects of <i>sustainability</i> is conducted and analysed.
	1.2 Regulations applying to the sustainable operation of the business are identified.
	1.3 Procedures for assessing <i>compliance</i> with sustainability regulations are evaluated.
	1.4 Concepts of <i>triple bottom line</i> planning, budgeting and reporting are reviewed and used to inform the planning process.
2. <b>Review current sustainable business practices.</b>	2.1 Current business planning is reviewed to identify aspects that reflect sustainable practices.
	2.2 Sustainable practices and processes are reviewed and measured to assess current performance.
	2.3 Alternative solutions for improved and sustainable operations are evaluated.
3. <b>Prepare a business sustainability plan.</b>	3.1 Objectives and performance measures for the business sustainability plan are identified in consultation with organisation's key staff.
	3.2 Market conditions and market potential are analysed to inform plan development.

**ELEMENT****PERFORMANCE CRITERIA**

3.3 Research and industry intelligence are collated and analysed to build understanding of customer and community needs and preferences.

3.4 Competitors' sustainable offerings and market position are identified and reviewed.

3.5 Costings of proposed strategies are determined and included using standard budgetary processes.

3.6 Impact of proposed strategies on the community and the reputation of the business is reviewed and considered in the planning process.

3.7 Environmental impact of the proposed strategies is identified and evaluated to ensure positive outcomes for the business, community and environment.

3.8 Business sustainability plan is prepared using standard organisational procedures and approved by appropriate senior staff.

**4. Plan for implementation.**

4.1 *Performance indicators* relevant to the monitoring of plan performance are identified.

4.2 Team members involved in implementation of plan are briefed and ongoing communication channels are established.

4.3 Timelines and resources to support plan implementation are identified and sourced.

**Required Skills and Knowledge****REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

- organisational skills to undertake business and project planning
- change-management skills to respond to new opportunities and implement sustainable business solutions
- decision-making skills to:
  - determine costing and their impact
  - establish performance indicators

## REQUIRED SKILLS AND KNOWLEDGE

- select suitable strategies
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - compare benchmarks
  - consult with work group
  - read and interpret documentation, including:
    - environment and energy efficiency requirements

### resource use

- request information
- report against identified performance indicators
- seek and receive feedback
- source, organise and record information
- use costing strategies
- lateral and creative thinking to:
  - identify new sustainable business opportunities
  - strategically analyse information
- technology skills to use computer applications

### Required knowledge

- concepts and models of sustainability, corporate citizenship, and strategic and business planning
- ethics regarding the impact of business activity on the community and environment
- techniques for financial planning and modelling
- governance and accountability models and processes
- legislation, regulations, codes of practice and industry advisory standards that apply to environmental sustainability
- overarching organisational strategy, policy and procedures
- strategies for:
  - continuous improvement
  - effecting outcomes
  - maximising opportunities
  - minimising impacts

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment** This unit of competency could be assessed by observing at least two instances of the implementation and monitoring of integrated economic, social and environmental sustainability policies and procedures in an organisation.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit** A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit.

In particular the person should demonstrate the ability to:

- research and identify opportunities for improved sustainability within the business
- plan for economic, social and environmental business operations
- establish and monitor performance indicators for sustainable business operations.

**Context of and specific resources for assessment** Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include access to:

- relevant legislation, standards and guidelines
- workplace documentation and personnel
- reports from other parties involved in the process of identifying and implementing improvements.

**Method of assessment** Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Property Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

This unit could be assessed on its own or in combination with other units relevant to the job function.

**Guidance information for assessment** Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could

include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Research*** data may be sourced from:

- 'think tanks' and research houses
- industry associations
- primary research, such as surveys and focus groups
- publicly available data, such as Australian Bureau of Statistics (ABS)
- regional economic development plans
- secondary research, such as national and international literature searches.
- economic sustainability, demonstrated by:
  - cost-effective use of resources
  - ensuring costs of 'green' solutions are properly accounted for and recovered
  - growing market share by appealing to socially aware customers
  - purchasing locally to reduce transport costs
  - seeking to participate in government schemes that reward or fund sustainable operations
- social sustainability, demonstrated by:
  - building community involvement
  - communicating benefits of sustainable products and services to customers
  - purchasing locally and using local and community-based products and services

***Sustainability*** is broadly defined as having three separate but inter-related components with characteristics including:

- using 'fair trade' products
- environmental sustainability, demonstrated by:
  - efficient use of resources
  - eliminating hazardous and toxic materials
  - identifying strategies to offset or mitigate environmental impacts, such as purchasing carbon credits
  - making more efficient use of energy
  - maximising opportunities to re-use and recycle materials
  - preventing and minimising risks and maximising opportunities, such as use of solar or other alternative forms of energy where appropriate
  - purchasing renewable energy
  - reducing emissions of greenhouse gases
  - reducing use of non-renewable resources
  - waste reduction.

**Compliance** includes:

- meeting relevant federal, state or territory, and local government laws, by-laws, regulations and codes of practice
- addressing voluntary industry benchmarking and certification processes.

**Triple bottom line** refers to:

- methods of planning, monitoring and reporting business operations that measure:
  - financial performance
  - social impact and performance
  - ecological or environmental impact and performance.

**Performance indicators** may include:

- benchmarks achieved against external certification process requirements
- costs measured against performance targets
- level of:
  - recycling achieved
  - reduction of waste
  - response to marketing and communication strategies
- sales achieved measured against performance targets.

# CPPDSM3007 Identify risks and opportunities in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM3007B Identify risks and opportunities in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to identify risks and opportunities in the property industry. It requires the ability to identify key assets and business systems, identify risks associated with asset and system use, and document and report identified risks and opportunities.

The unit supports the work involved in identifying risks and opportunities to maintain effective use of assets and business systems. It applies to all people working in the property industry.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

<p>Elements describe the essential outcomes.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</p>
<p>1. Identify risks and opportunities in relation to assets and business systems.</p>	<p>1.1. Client and organisational assets and business systems to be analysed for risk and opportunities are identified.</p> <p>1.2. Potential <i>risks</i> to and <i>opportunities</i> for clients and organisation are identified and confirmed with relevant people in line with organisational requirements.</p> <p>1.3. Relevant legislative requirements, insurance, codes and standards applicable to use of <i>assets</i> and <i>business systems</i> are identified and examined to identify potential risks and opportunities.</p> <p>1.4. <i>Limitations</i> in identifying risks and opportunities are identified and <i>specialist advice</i> is sought as required.</p> <p>1.5. Gaps or breaches in established risk management practices are identified and reported.</p>
<p>2. Document and report identified risks and opportunities.</p>	<p>2.1. Identified risks and opportunities supported by verifiable evidence are documented in a clear and concise manner and suitable format.</p> <p>2.2. Feedback is actively sought to ensure sufficiency and relevance of information in meeting client and organisational requirements.</p> <p>2.3. <i>Information is securely maintained</i> according to legislative and organisational requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of routine risk identification and reporting procedures.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret routine graphical and statistical information on common risks in the property industry.</li> </ul>

- Oral communication skills to:
- ask questions to clarify scope of own responsibility with regard to identifying and reporting risks and opportunities.
- Reading skills to:
- read and interpret routine workplace documents on own responsibility for identifying and reporting risks to relevant people.
- Writing skills to:
- prepare routine documentation, including emails, memos and letters, to report risks and opportunities.
- Technology skills to:
- use business technology to access online information about routine risks and opportunities in the property industry.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Risks*** must include:
- people
  - performance
  - premises, plant and equipment
  - processes
  - profile or reputation
  - providers or suppliers.

- Opportunities*** must include at least five of the following:
- adding value
  - aggregating assets
  - altering existing property or facility
  - change in consumer perceptions or tastes
  - change in use, ownership, appearance and perception of property or facility
  - changing style of investment
  - creating something new
  - identifying a market niche
  - new or redeveloped property-related product or service
  - new source of funds.

- Assets*** must include at least three of the following:
- building facilities
  - buildings
  - cash
  - common property
  - equipment
  - goodwill
  - inventory

- land
- securities
- vehicles.

**Business systems** must include at least three of the following:

- administration
- finance
- information technology
- knowledge management
- marketing
- sales
- trust fund administration.

**Securely maintaining information** must include:

- using business equipment and technology according to work health and safety (WHS) requirements
- maintaining client confidentiality.

# Assessment Requirements for CPPDSM3007 Identify risks and opportunities in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM3007B Identify risks and opportunities in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also identify and document routine risks and opportunities relating to two different assets and two different business systems in a property-related organisation.

In doing the above, the person must:

- identify a range of potential risks and opportunities in key assets and business systems in the above organisation
- identify and report gaps or breaches in established risk management practices
- prepare risk and opportunity findings in a format suitable for presentation and review, using standardised styles and formats.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- client and organisational confidentiality requirements
- insurance policies, codes and operations relating to insurance requirements for assets and business systems
- limitations of own work role, responsibilities and professional abilities in relation to identifying risks and opportunities in the property industry
- mechanisms to obtain and analyse feedback
- methods to identify and prioritise a range of risks and opportunities
- risk management practices in the property industry
- types of assets and business systems in organisations in the property industry.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - organisational risk management policies and procedures
  - organisational procedures relating to asset and business system use
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM3017 Work in the strata community management sector

## Modification History

Release 1.

Replaces superseded non-equivalent CPPDSM3017A Work in the strata community management sector.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to apply foundation knowledge to work effectively and efficiently in the strata community management sector. It covers the basic entry-level functions to enable compliance with legislative, ethical and procedural requirements. It requires the ability to identify the role of strata communities, access information on by-laws relating to those communities, and clarify the roles and duties of strata managers and resident managers.

The unit supports the work of those involved in applying foundation knowledge to work effectively and efficiently in the strata community management sector. It applies to strata managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

<p>Elements describe the essential outcomes.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</p>
<p>1. Access information on strata.</p>	<p>1.1. <b><i>Legislation relevant to strata communities</i></b> is identified.</p> <p>1.2. <b><i>Developments that may exist under strata plans</i></b> and the management issues associated with different types of development are identified.</p> <p>1.3. Own interpretation and application of legislation relating to strata communities are confirmed to ensure consistent and accurate understanding.</p> <p>1.4. Procedures for use of the strata community's common seal are identified and checked for compliance with legislative requirements.</p> <p>1.5. Strata community decision-making processes, including meeting requirements and meeting procedures for lot owners and owners committee, are identified and checked for compliance with legislative requirements.</p> <p>1.6. Situations requiring specialist advice are identified and assistance is sought as required.</p>
<p>2. Identify role of the owners committee.</p>	<p>2.1. Membership, role and responsibilities of owners committee are identified and checked for compliance with legislative requirements.</p> <p>2.2. Key provisions of code of conduct for owners committees are identified and followed.</p> <p>2.3. Process for appointment, operation and powers of owners committee responsible for administering owners corporation is identified and checked for compliance with legislative arrangements.</p> <p>2.4. Process and powers of owners committee to raise funds by levying contributions against lot owners are identified and checked for compliance with legislative arrangements.</p>

- 2.5. Process for removal of owners committee or committee member is identified and checked for compliance with legislative arrangements.
    - 2.6. Situations requiring specialist advice are identified and authorised, and assistance is sought as required.
  3. Access information on by-laws for strata communities.
    - 3.1. By-laws relevant to strata communities are identified, accessed and interpreted to clarify rules that owners and tenants in strata communities must follow.
    - 3.2. Process for changing or amending by-laws is identified.
    - 3.3. Availability of model by-laws prepared by state or territory governments is determined, and suitability for use or amending for use with strata communities is assessed.
    - 3.4. Situations requiring specialist advice are identified and assistance is sought as required.
- 4 Identify role of strata managers.
  - 4.1. Role and *duties of strata manager* are identified and checked for compliance with legislative requirements and contract with strata community.
  - 4.2. Relationship between strata manager and the owners committee is identified.
  - 4.3. Roles and duties of strata manager and resident manager are determined and verified with owners committee.
  - 4.4. Role and duties of strata manager in facilitating meetings of owners and owners committee are identified and verified with owners committee.

- 4.5. Role of strata manager in resolving disputes in strata communities is identified.
- 4.6. Key provisions of the code of conduct for strata managers are identified and followed in all dealings with the owners corporation, lot owners and other parties.
- 4.7. Own interpretation of the role of strata managers is confirmed with relevant people to ensure consistent and accurate understanding.
- 4.8. Own professional development needs in relation to role as strata manager are determined and appropriate sources of continuing professional development are accessed.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• assess personal knowledge of legislation applying to strata communities and identify appropriate sources of professional development</li> <li>• identify and use reliable sources of information to confirm details of duties of strata managers and resident managers.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret routine numerical and graphical information on levies determined by the owners committee.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify procedures relating to the routine administration of strata communities.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• read and interpret:               <ul style="list-style-type: none"> <li>• by-laws for strata communities</li> <li>• industry competency standards</li> <li>• industry code of conduct.</li> </ul> </li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare minutes of meetings of owners committees and lot owners.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• use business technologies to:</li> </ul>

- access information
- complete standard forms
- lodge electronic documents
- search online databases.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Legislation relevant to strata communities*** must include:
- Australian Securities and Investments Commission, Australian Competition and Consumer Commission, and Foreign Investment Review Board requirements
  - Australian standards
  - common law relating to working in the strata community management sector
  - consumer protection laws and guidelines
  - court and tribunal precedents
  - environmental and zoning laws affecting access security, access and property use
  - freedom of information
  - home building requirements
  - licensing requirements
  - privacy and confidentiality requirements and laws applying to owners, contractors and tenants
  - public health requirements
  - quality assurance and certification requirements
  - federal, and state or territory legislation and regulations affecting organisational operation, including:
    - anti-discrimination and diversity
    - Acts Interpretation Act
    - environmental issues
    - equal employment opportunity (EEO)
    - electronic transactions
    - industrial relations
    - work health and safety (WHS)
  - federal and state taxation requirements
  - industry codes of conduct covering areas such as market sector, financial transactions, taxation, environment, construction, land use, native title, zoning, utility use (water, gas and electricity),

- and contract law
- relevant local government policies and regulations
  - strata, community and company titles
  - tenancy agreements.
- Developments that may exist under strata plans*** must include:
- agriculture
  - caravan parks
  - commercial
  - hotels
  - layered schemes
  - mixed use, such as retail, and/or commercial, and/or residential
  - residential
  - resorts
  - retail
  - retirement villages
  - serviced apartments
  - viticulture.
- Duties of strata manager*** must include:
- arranging payment of all invoices
  - attending to correspondence
  - attending to orders, submissions and appeals
  - ensuring strata community complies with WHS regulations
  - maintaining the strata community register
  - organising and coordinating repairs and maintenance of common property, including following a preventative maintenance program
  - preparing and distributing:
    - notices, including contribution notices
    - financial statements and budgets
    - meeting agendas and minutes
  - providing advice in handling difficult or complex strata issues
  - setting dates for committee meetings, annual general meetings, and extraordinary meetings.

# Assessment Requirements for CPPDSM3017 Work in the strata community management sector

## Modification History

Release 1.

Replaces superseded non-equivalent CPPDSM3017A Work in the strata community management sector.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also apply foundation knowledge to work effectively and efficiently in the strata community management sector.

The person must demonstrate this performance by responding to four routine workplace situations, one relating to each of the following aspects of work in the strata community management sector:

- complying with legislative requirements associated with strata communities
- clarifying the role of the owners committee
- accessing and interpreting by-laws for a strata community
- identifying the duties of strata managers.

In doing the above, the person must:

- comply with relevant legislative requirements and confirm own understanding and application with relevant people
- comply with ethical practices and code of conduct, and check own understanding and application with relevant people
- identify the role and duties of lot owners, owners committee, strata manager and resident manager in strata communities
- identify by-laws applying to individual strata communities and the processes involved in changing and amending them
- access and use industry employment and professional development guidelines and benchmarks, and seek assistance from own organisation and statutory organisations to ensure own continuing professional development

- identify and verify own role and responsibilities and demonstrate an understanding and respect of individual differences in carrying out work tasks.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- code of conduct relating to:
  - owners committees
  - strata managers
- limitations of own work role, responsibilities and professional abilities
- relevant federal, state or territory legislation and local government regulations relating to strata communities, including:
  - Australian Securities and Investments Commission, Australian Competition and Consumer Commission, and Foreign Investment Review Board requirements
  - Australian standards
  - common law relating to working in the strata community management sector
  - consumer protection laws and guidelines
  - court and tribunal precedents
  - environmental and zoning laws affecting access security, access and property use
  - freedom of information
  - home building requirements
  - licensing requirements
  - privacy and confidentiality requirements and laws applying to owners, contractors and tenants
  - public health requirements
  - quality assurance and certification requirements
  - federal, and state or territory legislation and regulations affecting organisational operation, including:
    - anti-discrimination and diversity
    - Acts Interpretation Act
    - environmental issues
    - equal employment opportunity (EEO)
    - electronic transactions
    - industrial relations
    - work health and safety (WHS)
  - federal and state taxation requirements
  - industry codes of conduct covering areas such as market sector, financial transactions, taxation, environment, construction, land use, native title, zoning, utility use (water, gas and electricity), and contract or common law
  - relevant local government policies and regulations
  - strata, community and company titles

- tenancy agreements
- social and ethical practices and business standards relevant to strata managers
- strata communities:
  - decision making processes in strata communities
  - distinction between the various strata title types
  - meetings, including:
    - meeting procedures
    - legislative requirements relating to notification and conduct of meetings
  - processes for appointing and managing owners committees
  - role and duties of resident manager
  - role and duties of strata manager
  - role of lot owners
  - role of owners corporation
  - situations in which common seal may be used
  - types of developments under strata plans
- WHS issues and requirements relating to working in the strata community management sector.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet access and printer to access legislation, ethical and conduct standards, and policies and procedures
- specifications:
  - strata community by-laws
  - relevant codes, standards and regulations relevant to the strata community management sector
- relationship with team members and supervisor:
  - member of a work team in a strata community management context under supervision of the strata manager.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM3020 Source and extract information from strata plans

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to read and interpret strata plans. It includes sourcing strata plans, extracting information from them, and safely storing and retrieving strata plans.

The unit supports the work of strata managers who are required to source and extract information on strata communities from strata plans. It applies to those involved in managing strata communities, including strata managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the      Performance criteria describe the performance needed to

- essential outcomes. demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Source strata plan.
    - 1.1. Copy of *strata plan* and other *source documents* are obtained.
    - 1.2. Sources of information on strata plans are accessed as required according to organisational requirements.
  2. Extract information from strata plan.
    - 2.1. *Administrative information* on strata plan is extracted from administrative documents.
    - 2.2. Key features of strata community are correctly identified on *plan drawing documents*.
    - 2.3. Features omitted on plans are identified and noted.
  3. Store and retrieve strata plan.
    - 3.1. Strata plan is safely and securely stored according to organisational requirements.
    - 3.2. Strata plan is accessed and retrieved using business technology.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Performance feature

#### Skill

- Learning skills to:
- maintain current knowledge of content and structure of strata plans.
- Numeracy skills to:
- perform routine calculations associated with extracting information from strata plans, including scale and area calculations.
- Oral communication skills to:
- ask questions to clarify information in strata plans.
- Writing skills to:
- make notes relating to features omitted from strata plans.
- Technology skills to:
- use business technology to store and retrieve strata plans.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Strata plan*** must include:

- administration documents
- plan documents:
  - location plan
  - lot plan.

***Source documents*** must include:

- building approvals
- planning approvals
- legislation, including:
  - land titles
  - subdivision.

***Administrative information*** must include:

- administrative information:
  - by-laws
  - name and address for service of notices
  - purpose or type of information
  - schedule of lot entitlement and liabilities
- approvals for the plan:
  - registration
  - surveyor certificate
- signatures
- seals.

***Plan drawing documents*** must include:

- location plan
- lot plan:
  - common property
  - easements
  - encroachments
  - stairs
  - strata lots
  - voids.

# Assessment Requirements for CPPDSM3020 Source and extract information from strata plans

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also source strata plans and extract information from them.

The person must demonstrate this performance by correctly sourcing one strata plan, and identifying the information needed to respond to six routine workplace requests for information relating to each of the following features of strata communities:

- common property
- easements
- encroachments
- lot boundaries and areas
- name and address for service of notices
- schedule of unit entitlements and liabilities.

In doing the above, the person must:

- identify the correct strata plan
- extract the information required from the strata plan
- retrieve and store the strata plan.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- codes, standards, legislation and regulations relating to strata plans
- definition and types of common property
- contents and structure of strata plans

- location plans, including:
  - purpose
  - content
  - abbreviations, symbols and shading
  - scale
  - orientation
- lot entitlements and liabilities
- lot plans, including:
  - purpose
  - content
  - abbreviations, symbols and shading
  - techniques for locating lots
  - scale
  - orientation
  - easements
  - encroachments
- sources of information on strata plans
- terms, symbols, abbreviations and shading used in strata plans.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - strata plans
  - organisational policies and procedures on strata plans
  - strata community to verify information on strata plan
  - relevant codes, standards, legislation and regulations relating to strata plans
- relationships with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# **CPPDSM3021 Collect and process information relevant to strata communities**

## **Modification History**

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 5.

## **Application**

This unit of competency specifies the outcomes required to gather and organise information relevant to strata community management in a format that is suitable for decision making. It requires the ability to review information requirements and obtain information from a variety of sources.

The unit supports the work of administrative staff involved in strata community management who are engaged in gathering and organising information on strata communities in a format suitable for decision making. It applies to strata managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## **Pre-requisite Unit**

Nil

## **Competency Field**

Strata community management

## **Unit Sector**

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |  |  |
|--|--|
| 1. Identify and collect information relevant to strata community management. | 1.1. <b><i>Information</i></b> requirements in relation to strata community are specified.   |
|  | 1.2. Information sources are identified and accessed.  |
|  | 1.3. Information is collected according to <b><i>organisational requirements</i></b> .   |
| 2. Organise and assess information.  | 2.1. Information is collated and organised in a suitable format to allow analysis and decision making.   |
|  | 2.2. Information is assessed for relevance, accuracy, and consistency with organisational reporting requirements.  |
|  | 2.3. Information is recorded, stored and retrieved using suitable business equipment and technology, and in line with client privacy and confidentiality requirements. |
| 3. Review information needs.   | 3.1. Information is reviewed in consultation with strata community to confirm its sufficiency.   |
|  | 3.2. Gaps in data are identified and addressed, where necessary.   |
|  | 3.3. Information database is maintained according to own role and responsibility.  |
|  | 3.4. Feedback on future information needs is obtained and incorporated into existing information collection and reporting processes.                                   |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Performance feature

#### Skill

- Learning skills to:
- maintain current knowledge of sources of information on routine matters relating to the operation of strata community schemes.
- Numeracy skills to:
- process and present numerical and statistical information in response to requests for routine information relating to the operation of strata community schemes.
- Oral communication skills to:
- ask questions to clarify information requirements.
- Reading skills to:
- read and extract information from routine workplace documents relating to the operation of strata community schemes.
- Writing skills to:
- prepare routine correspondence, including emails, electronic messaging and letters, relating to the operation of strata community schemes.
- Technology skills to:
- access the internet and web pages and search online databases
  - prepare and complete online forms
  - lodge electronic documents.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Information*** must include:
- strata community:
    - by-laws
    - fees and levies
    - functions
    - insurance
    - management of disputes
    - meetings
    - obligations of owners and tenants
    - operation
    - powers
    - public liability
    - repairs and maintenance
    - scope of decision making
  - property characteristics:
    - accessibility for people with disabilities
    - common property
    - energy costs

- energy efficiency
- lot boundaries
- safety
- strata community management company services
- strata community management legislation and regulations.

**Organisational requirements** must include collecting information:

- in an efficient manner
- using suitable business equipment and technology
- in line with time and resource constraints
- with due regard to privacy and confidentiality requirements.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for CPPDSM3021 Collect and process information relevant to strata communities

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also gather and organise information relevant to strata community management in a format that is suitable for decision making.

The person must demonstrate this performance by correctly gathering and organising the information needed to respond to five routine requests for information in relation to the operation of a strata community scheme. Each request for information must address a different strata community management topic from the following:

- operations and functions of a strata community
- by-laws
- characteristics of the property
- strata community management company services
- strata community legislation and regulations.

In doing the above, the person must:

- determine information requirements and provide information to meet identified and defined purposes
- identify and address gaps in collected data
- apply organisational practices, ethical standards and legislative requirements associated with gathering and organising property information in a format suitable for decision making
- source, organise and use information in compliance with applicable industry and legal requirements
- use consultative processes to review, maintain and improve existing information collection and reporting processes.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- data security and safe record-keeping practices
- internal and external sources of information relating to managing strata community schemes
- organisational policies and procedures relating to collecting and using information, including privacy and confidentiality
- organisational record-keeping and filing systems
- procedures for using office equipment and technology
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - managing strata community schemes
  - roles of strata managers
- software applications used to access, store and retrieve data
- types of information management systems used in strata community management.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system to access online databases and other electronic data and information sources
- specifications:
  - relevant codes, standards, legislation and regulations relating to strata communities
  - documentation relating to strata management schemes, including by-laws, and minutes of meetings
- relationship with team members and supervisor:
  - work is performed under supervision of a strata manager
- timeframe:
  - information request is responded to within organisational timeframes.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4009 Interpret legislation to complete work in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4009B Interpret legislation to complete agency work.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to source and interpret legislation affecting operations in the property industry. It includes identifying and applying statutory interpretation techniques, identifying and tracking changes to relevant property industry legislation and industry codes of conduct, and maintaining appropriate records.

The unit supports the work of professionals in the property industry, including licensed real estate and stock and station agents, strata managers and their authorised representatives, with regard to identifying, interpreting and applying legislation and industry codes of conduct affecting property operations.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Legal framework*** must include:
- common law
  - contract law
  - equity law
  - statute law.
- Components of statute law*** must include:
- principal legislation, such as Acts
  - subordinate legislation, such as:
    - approvals
    - determinations
    - mandatory and non-mandatory administrative guidelines
    - orders
  - regulations.
- Structure of property legislation and regulations*** must include:
- endnotes, including:
    - explanatory notes
    - index
    - table of amendments
  - section headings, margin notes and clause notes
  - parts, sections, subsections, paragraphs, regulations, sub-regulations and clauses
  - types of provisions, including:
    - approvals
    - deeming provisions
    - definitions and interpretations
    - general penalties
    - objectives
    - offences
  - prescribed arrangements relating to regulations and orders.
- Common interpretation problems*** must include:
- ambiguous words
  - broad phrases
  - need for words to be implied
  - printing and drafting errors
  - unforeseen developments, such as changes in technology or practice.
- Rules and techniques for interpreting property legislation and regulations*** must include:
- aids to interpreting legislation, including:
    - external: interpretations of legislation, Acts, Hansard/parliamentary papers, legal dictionaries and previous judicial interpretations
    - internal: objectives, legislation to be accessed as a whole, definitions and interpretation sections in legislation, headings, and margin notes
  - language conventions and expressions, including:
    - and, or

- gender
  - hierarchy
  - includes
  - may, should and must
  - reading rules, including:
    - context
    - golden
    - literal
    - mischief
    - purposive
  - express mention of one thing to the exclusion of another
  - words interpreted through their connection with other words
  - words with the same meaning.
- Processes** must include:
- government agency approval
  - governor approval
  - minister approval
  - parliament.
- Source documents** must include:
- amendment Acts
  - amendment regulations
  - Bills
  - consolidated or reprinted Acts.
- Techniques for tracking amendments** must include:
- government and industry newsletters and information sessions
  - use of margin notes and tables of amendments.
- Appropriate people** must include:
- agency or organisation principal
  - authorised representatives
  - bookkeepers, accountants and auditors
  - licensed real estate agents
  - property managers
  - sales people.
- Industry codes of conduct** must address at least two of the following:
- ethical behaviour
  - general business operations
  - property sales and management
  - strata community management.
- Records** must include at least two of the following:
- agency administration
  - property management
  - property sales
  - strata scheme administration.

# Assessment Requirements for CPPDSM4009 Interpret legislation to complete work in the property industry

## Modification History

Not applicable.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also source and interpret legislation affecting operations in the property industry.

The person must demonstrate this performance by sourcing and documenting the latest legislative requirements for three aspects of property operations in either the real estate, stock and station agency, or strata community management sector; and communicating this information in an accessible manner to those engaged in agency or organisation operations.

In doing the above, the person must:

- apply rules and techniques to interpret legislative provisions affecting operations in the property industry
- apply techniques to track amendments to legislation in a timely manner
- apply strategies to communicate legislative requirements and amendments to appropriate people in the agency or organisation in a timely manner
- identify changes to legislation and industry codes of conduct affecting agency or organisation operations
- apply general principles of legislation, regulations and industry codes of conduct affecting operations in the property industry
- maintain accurate and up-to-date records of legislation and industry codes of conduct.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- codes of conduct relating to property industry operations
- common problems associated with interpreting legislation
- principles and purpose of legislation
- key requirements of federal, and state or territory legislation and local government regulations relating to the property industry:
  - anti-discrimination and equal employment opportunity

- consumer protection and trade practices
- employment and industrial relations
- environment and sustainability
- financial services
- leases
- privacy
- property sales and management
- strata community management
- work health and safety (WHS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email, printing facilities, and online access to relevant legislative databases
- specifications:
  - agency or organisation policies and procedures for storing and retrieving documents
  - guidelines for interpreting property legislation and regulations, and tracking amendments to legislation
  - legislation, regulations and codes of conduct relevant to property industry operations
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4027 Analyse resource use in building operations

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4027A Analyse resource use in building operations.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to analyse requirements for resources used in building operations. It covers the processes required to analyse current resource requirements and advise on future resource needs. It requires the ability to identify work health and safety (WHS) hazards and apply appropriate risk-management processes.

The unit supports workers in the property industry who are required to analyse resource requirements for buildings. It applies to real estate agents, property managers, strata managers, home sustainability assessors, and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

- essential outcomes. demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Check and monitor store of resources.
    - 1.1. ***Stores*** are monitored routinely and checked to ensure availability of required resources using business equipment and technology.
    - 1.2. Variances in supply requirements are identified and documented.
    - 1.3. Stores records are routinely updated to ensure safe and effective use of materials.
    - 1.4. Advice is provided on ways to improve the use and control of stores.
  2. Undertake routine building function checks.
    - 2.1. ***Routine building inspections*** are conducted.
    - 2.2. Maintenance and repair requirements are identified and documented according to applicable WHS and organisational requirements.
    - 2.3. Maintenance and repair requirements are actioned within scope of own responsibility.
    - 2.4. Breaches of building controls are identified and reported.
    - 2.5. Recommendations to improve compliance with building tenancy and practice codes are prepared.
  3. Monitor waste collection and disposal arrangements.
    - 3.1. Sorting of waste is arranged and monitored according to legislative requirements and WHS procedures.
    - 3.2. Arrangements for hazardous waste to be collected and stored are assessed and where necessary variations to accepted procedures are identified.
    - 3.3. Risks to health and safety of self and others are identified and reported.
    - 3.4. Waste storage and disposal procedures are checked and monitored to ensure risk to others and own health and safety is minimised.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"><li>• maintain current knowledge of property inspection procedures.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• interpret graphical and statistical data on resource use in buildings.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions to verify availability of resource stores.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• access and interpret text on labels to identify dangerous goods.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• prepare summaries and take notes on building maintenance and repair items.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• access online sources of information on building controls.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Stores</i></b> must include at least one of the following:	<ul style="list-style-type: none"><li>• chemical items</li><li>• mechanical items</li><li>• tools and equipment.</li></ul>
<b><i>Routine building inspections</i></b> must include at least four of the following:	<ul style="list-style-type: none"><li>• access</li><li>• building services</li><li>• common areas</li><li>• dangerous goods</li><li>• emergency equipment</li><li>• hazardous materials</li><li>• hazards and risks</li><li>• health and amenity</li><li>• energy use</li><li>• safety</li><li>• security</li><li>• waste</li><li>• water.</li></ul>

# Assessment Requirements for CPPDSM4027 Analyse resource use in building operations

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4027A Analyse resource use in building operations.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also analyse requirements for resources used in building operations as follows:

- check and monitor the use of resource stores, such as chemical and mechanical items, in the operation of one building and report on usage over a three-month period
- undertake a routine building function check and present findings, including recommendations for action to the manager of facility or owners corporation
- monitor waste collection and disposal arrangements for above building, and present findings and recommendations for action.

In doing the above, the person must:

- identify and address breaches of building controls
- apply knowledge of agency practices, ethical standards, and legislative requirements associated with analysing requirements for resources used in building operations
- maintain and update inventory records during check and monitoring
- monitor waste collection and disposal arrangements.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- type and operation of building controls
- types, purpose of, and procedures for building function checks
- property contracts and administrative requirements
- building codes and Australian standards relating to access, dangerous goods storage, emergency equipment, hazards and risks

- common hazards to public and personal safety in building operations
- points of contact with emergency service agencies
- procedures for checking and monitoring use of stores
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - consumer protection
  - environmental issues
  - work health and safety (WHS)
- waste collection and disposal arrangements, including type, frequency, recycling and reuse options.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- materials:
  - software applications used to organise and analyse data
- specifications:
  - building function checklists
  - policies and procedures for collecting and analysing information on resource use in building operations
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4028 Identify and analyse risks and opportunities in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4028A Identify and analyse risks and opportunities in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to identify and analyse potential threats and opportunities to ensure safe and effective property operations. It requires the ability to assess property systems and assets to determine the level of risk exposure and identify areas of opportunity for property operations.

The unit supports workers in the property industry involved in identifying and analysing potential threats and opportunities to ensure safe and effective property operations. It applies to real estate agents, property managers, strata managers, Nationwide House Energy Rating Scheme (NatHERS) assessors, home sustainability assessors and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

<p>Elements describe the essential outcomes.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</p>
<p>1. Identify risks and opportunities.</p>	<p>1.1. Information on actual and potential <b><i>risks</i></b> and <b><i>opportunities</i></b> is collected and assessed for currency, accuracy and relevance.</p> <p>1.2. Structured plan for identifying and assessing likelihood of risk and opportunity is developed.</p> <p>1.3. Limitations in identifying and assessing risks and opportunities are recognised, and assistance is sought as required.</p>
<p>2. Analyse risks and opportunities.</p>	<p>2.1. Identified risks and opportunities are analysed for validity and reliability.</p> <p>2.2. Assessment criteria for measuring level of potential or existing risk or opportunity, together with an assessment of consequences, are developed according to terms of reference.</p> <p>2.3. Gaps in assessment methodology are identified and appropriate actions implemented.</p> <p>2.4. Valid and relevant data is analysed against assessment criteria to determine level of potential risk or opportunity.</p>
<p>3. Document findings.</p>	<p>3.1. Risk and opportunity assessment findings are documented.</p> <p>3.2. Feedback on findings is actively sought to ensure accuracy and relevance of information.</p> <p>3.3. Findings are updated as required and incorporated into risk and opportunity assessment plan for future management decision making.</p> <p>3.4. Information is securely maintained with due regard to confidentiality.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of routine risk identification and reporting procedures.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret routine graphical and statistical information to analyse occurrence of risks in the property industry.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify scope of own responsibility with regard to identifying and reporting risks and opportunities.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• read and interpret routine workplace documents on own responsibility for identifying and reporting risks.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare routine documentation, including emails, memos and letters, to report risks and opportunities.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• use business technology to access online information about routine risks and opportunities in the property industry.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Risks*** must include at least three of the following:

- deliberate, natural, accidental or perceived risks
- industry special risks
- loss of goodwill, reputation or credibility
- loss of profits
- loss, disclosure, destruction or compromise of asset
- equipment malfunction
- work health and safety (WHS)
- public liability
- trade practices issues.

***Opportunities*** must include at least four of the following:

- adding value
- aggregation of assets
- altering existing property or facility
- change in use, ownership, appearance and perception of property or facility
- changing style of investment

- creating something new
- use of bankers and financiers.

# Assessment Requirements for CPPDSM4028 Identify and analyse risks and opportunities in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4028A Identify and analyse risks and opportunities in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also identify and analyse potential risks and opportunities to ensure safe and effective property operations.

The person must demonstrate this performance by identifying and analysing three potential risks and three potential opportunities relating to the operations of one property-related organisation. The findings of this work must be documented in a form suitable for presentation to senior managers in the organisation.

In doing the above, the person must:

- assess level of potential risk or opportunity against agreed assessment criteria
- establish terms of reference and develop effective action plan and structure for analysis and assessment
- apply knowledge of organisation's practices, ethical standards, and legislative requirements associated with identifying and analysing potential risks and opportunities to ensure safe and effective property operations
- obtain information from a range of sources and consultative processes to ensure accurate understanding of operating environment
- review and prepare findings relating to risks and opportunities in a format suitable for presentation.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- client and organisational confidentiality requirements
- concept of litigation
- insurance policies, codes and operations
- mechanisms to obtain and analyse feedback on findings of risk and opportunity analysis
- principles and techniques for identifying and measuring risks and opportunities
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - equal employment opportunity (EEO)
  - financial probity
  - franchise and business structures
  - industrial relations
  - work health and safety (WHS)
  - property sales, leasing and management
- property industry code of conduct and professional standards
- risk and opportunity assessment techniques and processes.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - organisation's policies and procedures for identifying and assessing risks
  - procedures for identifying and analysing risks and opportunities
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4031 Arrange lease of space

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4031A Arrange lease of space.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to arrange and formalise lease arrangements for the use of space. It requires the ability to determine lease requirements, coordinate lease documentation, and formalise and review lease processes.

The unit supports workers in the property industry who are involved in arranging and formalising lease arrangements for the use of space. It applies to real estate agents, property managers, strata managers and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

text is used, further information is detailed in the range of conditions.

1. Establish lease requirements.
  - 1.1. **Space** lease requirements are determined.
  - 1.2. **Client needs** are confirmed and clarified using appropriate interpersonal techniques.
  - 1.3. Lease terms and conditions are identified.
  - 1.4. Retention strategies are devised and marketed to selected tenants.
  - 1.5. Situations requiring specialist advice are identified and assistance is sought as required.
2. Arrange lease agreement.
  - 2.1. **Lease agreement** is arranged.
  - 2.2. Accurate and relevant exchange of information with legal advisers is facilitated using appropriate interpersonal techniques.
  - 2.3. Lease documentation is reviewed to ensure it is accurate and meets client, legal and organisational requirements.
  - 2.4. Necessary amendments to documents are arranged prior to lease execution.
3. Formalise lease arrangements.
  - 3.1. Lease arrangements are implemented and standard lease documentation is completed.
  - 3.2. Lease documentation is stamped and registered.
  - 3.3. Copies of lease contracts are distributed to contracting parties to confirm respective obligations.
  - 3.4. Agents are appointed to facilitate completion of leasing arrangements.
  - 3.5. Lease records and relevant information are securely stored.
4. Review lease arrangements.
  - 4.1. Lease arrangements and documentation are reviewed.
  - 4.2. Variations to lease requirements are identified and negotiated with contracting parties, and amendments are made according to client, legislative and organisational requirements.
  - 4.3. Lease arrangements are monitored.

- 4.4. Business equipment and technology are used to maintain and securely store relevant documentation.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of leasing procedures.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• perform routine calculations associated with preparing lease documentation.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify space requirements with potential tenants.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• read and interpret standard lease documentation.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• use business technology to prepare, store and retrieve lease documentation.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Space</i></b> must include at least one of the following:	<ul style="list-style-type: none"> <li>• buildings</li> <li>• car parking</li> <li>• facilities</li> <li>• land</li> <li>• lettable areas</li> <li>• properties.</li> </ul>
<b><i>Client needs</i></b> must include at least two of the following:	<ul style="list-style-type: none"> <li>• developing fit-out guidelines for builders</li> <li>• facilitating transaction by separately meeting with fit-out and legal advisers</li> <li>• managing fit-outs to preserve building services</li> <li>• observing building rules.</li> </ul>
<b><i>Lease agreements</i></b> must	<ul style="list-style-type: none"> <li>• acceptance and consideration</li> <li>• agreement to lease</li> </ul>

include:

- building rules
- existing partitioned space
- fit-outs
- heads of agreement
- lessee and lessor obligations
- letters of intent
- negotiations containing offers.

# Assessment Requirements for CPPDSM4031 Arrange lease of space

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4031A Arrange lease of space.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also arrange and formalise a lease for the use of three of the following different spaces:

- building
- car park
- facility
- land
- lettable area
- property.

For each of the above spaces, the person must:

- determine requirements for lease of space through an accurate assessment of client needs and identification of lease terms and conditions
- devise and market retention strategies to selected tenants
- implement lease arrangements, including appointing an agent to facilitate the completion of lease arrangements
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with the lease of space
- monitor lease arrangements against lease agreement requirements, and safely and securely maintain associated documentation
- organise the preparation of lease documentation, reviewing it for accuracy and arranging necessary amendments.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- common lease terms and conditions
- contract law applied to property leasing
- government duties and taxes as applied to lease documentation
- legal operations for lease preparation
- limitations of own work role, responsibilities and professional abilities
- organisational and professional procedures, ethical practices, and business standards relating to arranging leases
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - equal employment opportunity (EEO)
  - financial probity
  - privacy
  - property sales, leasing and management
  - work health and safety (WHS)
- types of property leases
- WHS issues and requirements relating to arranging lease of spaces.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - organisational leasing policies and procedures
  - organisational tenant retention strategies
  - standard leasing documentation
- physical conditions:
  - spaces to lease and associated client requirements
  - potential tenants
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4034 Negotiate and implement strata community management agreement

## Modification History

Release 1.

Replaces superseded by non-equivalent CPPDSM4034A Negotiate and implement strata community management agreement.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to effectively assess and implement a strata community management agreement. It requires the ability to negotiate the implementation of the agreement, and monitor and review the implementation process.

This unit of competency applies to those involved in assessing and implementing strata community management agreements. It applies to strata managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

- essential outcomes. demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Determine functions and obligations of strata manager.
    - 1.1. Legislative, ethical and procedural requirements relevant to strata community management services are identified.
    - 1.2. Fiduciary duties are identified and disclosed in strata community management agreement.
    - 1.3. Procedures for appointing and terminating the manager are identified and disclosed in strata community management agreement.
    - 1.4. Registration or licencing requirements with appropriate authorities are identified and complied with.
    - 1.5. ***Record management systems*** are maintained.
    - 1.6. Execution procedures for strata community management agreement are identified.
  2. Determine functions and obligations of the strata community.
    - 2.1. Owners' responsibilities and accountabilities are identified and disclosed in strata community management agreement.
    - 2.2. Fiduciary duties of strata community and its owners committee are identified and disclosed.
  3. Negotiate strata community management agreement requirements.
    - 3.1. Functions and obligations of strata managers and owners are detailed in strata community management agreement.
    - 3.2. Owners' responsibilities, management fees and services are negotiated and agreed.
    - 3.3. Additional services are agreed according to strata community management agreement and budget allocations.
    - 3.4. Conflicts of interest are identified and disclosed.
    - 3.5. Strata community management agreement is reviewed to establish obligations, service and termination requirements.
    - 3.6. Delegations are identified.
  4. Implement strata community
    - 4.1. Strata community management agreement is agreed and entered in to according to legislative requirements.

management agreement.	4.2.	Record management system is maintained in relation to agreement.
	4.3.	Obligations of strata manager and strata community are monitored and complied with.
5. Review and report on operation of strata community management agreement.	5.1.	Agreement implementation processes and outcomes are reviewed.
	5.2.	Recommendations for improving processes are identified.
	5.3.	Report on implementation of strata community management agreement is prepared and distributed to strata community.
	5.4.	Strata community management agreement is revised to take into account review outcomes.
6 Terminate strata community management agreement.	6.1.	Legislative, contractual, ethical and procedural requirements relating to terminating strata community management agreement are identified.
	6.2.	Procedures for handing over strata community records to new manager or owners committee are identified and implemented.
	6.3.	Procedures for transfer of strata community funds to new manager or owners committee are identified and implemented.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of strata community management procedures.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify client service requirements relating to the implementation of strata community management agreement.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• read and interpret complex business documentation, including strata community management agreements.</li> </ul>

- Writing skills to:
- prepare complex written reports to strata community.
- Technology skills to:
- use business technology to prepare, store and retrieve strata community management agreement documentation.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Record management systems*** must include at least five of the following:
- administrative and sinking funds
  - ballots
  - bookkeeping accounts
  - budgets
  - building maintenance reports
  - by-laws
  - contracts and agreements
  - correspondence
  - disclosures
  - fee for service
  - income tax returns
  - insurance
  - investments
  - leases and licences
  - levies
  - maintenance plans
  - meeting management
  - notices and orders served on owners committee
  - register of owners
  - renewal dates of contracts
  - repairs
  - valuations.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for CPPDSM4034 Negotiate and implement strata community management agreement

## Modification History

Release 1.

Replaces superseded by non-equivalent CPPDSM4034A Negotiate and implement strata community management agreement.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- negotiate one strata community management agreement
- implement one strata community management agreement
- review one strata community management agreement
- terminate one strata community management agreement.

In doing the above, the person must:

- establish and negotiate strata community management agreement requirements
- implement and monitor a management agreement for a strata community
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with implementing strata community management agreements
- maintain records associated with above work
- review and report on agreement implementation processes and outcomes.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- administration of property strata plans
- business law relating to contracts and property management
- financial management in relation to budgeting and bookkeeping
- limitations of own work role, responsibilities and professional abilities
- management of administration and sinking funds

- work health and safety (WHS) issues and requirements
- organisational and professional procedures relating to strata community management agreements
- social and ethical practices and business standards relating to strata community management agreements
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - equal employment opportunity (EEO)
  - financial probity
  - franchise and business structures
  - industrial relations
  - privacy
  - strata community
  - WHS
- risk management processes and procedures relating to strata community management agreements, including required insurances
- use and application of statutory forms in strata community management.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - organisational policies and procedures for establishing and implementing management agreements for strata communities
  - management agreement for a strata community
  - source documentation or access to source documentation relating to management of a strata community
- physical conditions:
  - access to a strata community
- relationship with team members and supervisor:
  - member of a work team involved in managing a strata community.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4040 Contribute to asset life cycle maintenance strategy

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4040A Contribute to life cycle maintenance strategy.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to determine maintenance strategies that contribute to life cycle management of assets. It requires the ability to identify maintenance requirements.

The unit supports workers in the property industry who are involved in determining maintenance strategies that contribute to life cycle management of assets. It applies to real estate agents, property managers, strata managers and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

- essential outcomes. demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Identify asset requirements.
    - 1.1. *Assets* are identified and relevant documentation is obtained and analysed to establish asset *evaluation parameters*.
    - 1.2. Consultation is undertaken with relevant people to obtain information using appropriate interpersonal techniques.
    - 1.3. Source documents are accessed and reviewed to ensure information is valid and reliable.
    - 1.4. Asset characteristics are assessed and documented in a *maintenance strategy*.
  2. Recommend maintenance strategy.
    - 2.1. Information on asset performance is gathered and analysed against industry benchmarks.
    - 2.2. Asset performance is established and appropriate maintenance methods and schedules are documented.
    - 2.3. *Strategic prioritisation* is undertaken to identify risks, anticipate future maintenance requirements, and identify opportunities to improve quality or cost efficiency of asset.
    - 2.4. Limitations in providing objective client advice are recognised and specialist advice is sought as required.
    - 2.5. Cost-effective solutions regarding *asset life cycle* are presented to relevant people in required format, style and structure.
  3. Monitor and report on maintenance strategy.
    - 3.1. Asset life cycle maintenance strategy is monitored and evaluated to ensure it is effective.
    - 3.2. Feedback is used to identify and develop future strategies to improve life cycle maintenance.
    - 3.3. Business equipment and technology are used to complete and process relevant documentation.
    - 3.4. Asset information is securely maintained with due regard to client confidentiality.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of asset life cycle maintenance strategies.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• analyse complex statistical and graphical information on asset life cycle performance indicators.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify information provided by specialist advisers on asset maintenance strategies.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• read and interpret complex reports on asset maintenance requirements.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare written reports on asset maintenance requirements.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• use business technology to prepare written reports for asset owners on asset maintenance requirements.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Assets</i></b> must include at least two of the following:	<ul style="list-style-type: none"> <li>• building</li> <li>• equipment</li> <li>• furniture</li> <li>• land</li> <li>• facility</li> <li>• vehicle.</li> </ul>
<b><i>Evaluation parameters</i></b> must include:	<ul style="list-style-type: none"> <li>• financial performance</li> <li>• functionality</li> <li>• physical condition</li> <li>• utilisation.</li> </ul>
<b><i>Maintenance strategy</i></b> must include at least four of the following:	<ul style="list-style-type: none"> <li>• asset replacement strategies</li> <li>• emergency lighting and security</li> <li>• energy efficiency strategies</li> <li>• housekeeping</li> <li>• painting, cleaning and waste disposal</li> <li>• pest control</li> </ul>

**Strategic prioritisation** must include at least two of the following:

- plumbing and electrical.
- effect of not maintaining an asset
- future usage plans for the asset
- how long particular asset will be required to be in operation
- owner or manager-specific requirements for aesthetics
- risks associated with current condition
- risks associated with not maintaining a particular asset
- serviceability requirements of the asset.

**Asset life cycle** must include:

- acquisition
- disposal
- maintenance
- operation
- planning for and establishing a new asset
- replacement.

# Assessment Requirements for CPPDSM4040 Contribute to asset life cycle maintenance strategy

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4040A Contribute to life cycle maintenance strategy.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also determine maintenance strategies that contribute to life cycle maintenance of assets.

The person must demonstrate this performance by determining and monitoring a maintenance strategy for two of the following different types of assets:

- buildings
- common property
- equipment
- furniture
- land
- facilities
- vehicles.

In doing the above, the person must:

- determine asset system requirements through consultation and analysis of business and operational plans
- determine asset performance needs using industry benchmarks and consideration of risk
- identify performance of assets and incorporate life cycle strategies into maintenance plans
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with determining maintenance strategies that contribute to life cycle management of assets

- monitor asset life cycle strategies by obtaining feedback and using sound evaluation techniques.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- key stages of asset life cycles
- basic knowledge of property contracts and administrative requirements
- common hazards to public and personal safety associated with particular types of maintenance work in buildings
- company record-keeping policies and procedures relating to asset maintenance
- industry benchmarks for asset maintenance procedures
- limitations of own work role, responsibilities and professional abilities
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - equal employment opportunity (EEO)
  - financial probity
  - franchise and business structures
  - industrial relations
  - privacy
  - work health and safety (WHS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - details of characteristics of assets to be maintained
  - organisational policies and procedures for determining and monitoring asset maintenance strategies
  - source documentation or access to source documentation relating to determining and monitoring asset maintenance strategies
- relationship with team members and supervisor:
  - member of a work team involved in determining and monitoring asset maintenance strategies.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPDSM4045 Facilitate meetings in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4045A Facilitate meetings in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to prepare for meetings and facilitate groups to discuss common issues in the property industry. It requires the ability to coordinate meeting arrangements, facilitate meetings, and accurately record meeting outcomes.

The unit supports workers in the property industry who are involved in preparing for meetings and facilitating groups to discuss common issues. It applies to real estate agents, property managers, strata managers and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

text is used, further information is detailed in the range of conditions.

1. Arrange meetings.
  - 1.1. **Type of meeting** and its purpose are identified.
  - 1.2. Meeting participants are identified and meeting is scheduled to provide maximum opportunities for attendance.
  - 1.3. Participants are notified of **meeting agenda** and specific requests are actioned according to organisational and legislative requirements.
  - 1.4. Participants are advised of changes to original meeting details as required.
2. Facilitate meetings.
  - 2.1. Open and participative environment is provided for participants to discuss common issues.
  - 2.2. Arrangements for taking meeting notes are made to ensure accurate record of meeting outcomes.
  - 2.3. Meeting is facilitated and conducted in a manner that enables participation, discussion, problem solving, voting and resolution of matters.
  - 2.4. Meeting style and structure are selected appropriate to meeting purpose.
  - 2.5. **Leadership styles and strategies** are used that provide clear information at appropriate stages during meeting to assist in mutual understanding and agreement.
3. Record meeting outcomes.
  - 3.1. **Meeting minutes or notes** are documented, checked to ensure accuracy, and formatted according to organisational and legislative requirements.
  - 3.2. Meeting issues requiring urgent action are identified and addressed.
  - 3.3. Meeting records are distributed to relevant people within agreed timeframes, and are securely maintained and stored for easy retrieval.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to

performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of meeting procedures and where necessary statutory requirements for meetings.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• determine number of people in attendance at meeting and whether quorum requirements are met.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify routine meeting procedures.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• read and assess accuracy of meeting notes and minutes.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare routine documentation associated with the conduct of a property industry meeting, including agendas, minutes, meeting notes, and correspondence in the form of email and letters.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• use business technology to produce routine documentation associated with the conduct of a property industry meeting.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Type of meeting*** must include at least three of the following:

- annual general meeting
- board meeting
- committee meeting
- extraordinary general meeting
- formal meeting
- informal meeting
- one-off meeting
- owners committee
- regular meeting
- semi-formal
- special purpose meeting
- staff meeting
- teleconference
- videoconference.

***Meeting agenda*** must include:

- correspondence
- date, time and location of meeting
- statement of meeting purpose

- matters or business arising from previous meeting
- proxies
- reports.

***Leadership styles and strategies*** must include at least four of the following:

- maintaining ethical practice and beliefs in the face of opposition
- modelling behavioural and personal presentation standards
- acknowledging and respecting attitudes and beliefs of others
- not accepting unreasonable expectations
- presenting a confident, assured and unhesitant manner in challenging situations
- initiating action and directing decision making
- promoting active and genuine participation
- time management.

***Meeting minutes or notes*** must include:

- apologies
- decisions made and resolutions
- future action to be taken
- meeting outcomes
- meeting participants
- points discussed and suggestions made.

# Assessment Requirements for CPPDSM4045 Facilitate meetings in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4045A Facilitate meetings in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also prepare for two of the following different meetings in a property industry context and facilitate groups in those meetings to discuss common property industry issues:

- one formal meeting requiring the production of an agenda and compliance with formal meeting procedures, including legislative requirements
- one informal meeting requiring the production of a list of items for discussion and a statement of meeting outcomes.

In both cases the person must arrange the meeting, facilitate the meeting, and record the meeting outcomes.

In doing the above, the person must also:

- accurately record and securely maintain notes of meeting discussions
- effectively plan and administer meetings using appropriate procedures and protocols
- apply organisational practices, ethical standards, and legislative requirements associated with preparing for meetings and facilitating groups to discuss issues
- use effective communication and presentation skills to manage and conduct meetings
- use technology to prepare documentation relating to meeting outcomes and distribute to relevant people in a timely manner.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- different types, purpose and formats of meetings, including general awareness of procedures for formal meetings
- group dynamic principles and theory as applied to formal and informal meetings
- compliance with specific legislative requirements for particular meetings in the property industry
- meeting terminology
- organisation's system for recording and reporting meeting outcomes
- standard meeting procedures, including:
  - agenda format and order
  - decision-making processes
  - minutes or meeting notes
  - processing and implementing meeting decisions and outcomes
  - quorum
  - role of chairperson and note taker
  - types of seating arrangements
- strategies for facilitating meetings and discussing meeting issues
- types of minutes and their purpose.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- physical conditions:
  - venue suitable for formal and informal meetings
- specifications:
  - organisational meeting policies and procedures
  - organisational templates for meeting documentation
- contingencies:
  - conflict in meeting
  - lack of quorum for meeting
  - meeting documentation not provided to meeting participants in time for meeting
  - inaccurate or incomplete minutes of meeting
  - participants in meeting unable or unwilling to attend
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4047 Implement and monitor procurement process

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4047A Implement and monitor procurement process.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to implement and monitor purchasing processes for goods and services. It requires the ability to follow procurement procedures, determine and arrange appropriate suppliers, and check that final procurement meets client objectives.

The unit supports workers in the property industry who are involved in implementing and monitoring purchasing processes for goods and services. It applies to real estate agents, property managers, strata managers and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |  |   |
|--|---|
| 1. Determine procurement requirements. | 1.1. Procurement requirements and objectives are identified.  |
|  | 1.2. Information on procurement requirements is gathered and reviewed to determine appropriate <b><i>procurement process</i></b> and timelines. |
|  | 1.3. Factors likely to affect procurement objectives are identified.  |
|  | 1.4. Own limitations of authority are identified and appropriate approvals gained as required.  |
| 2. Monitor procurement process.        | 2.1. Procurement process is systematically monitored and variations to supply are identified.   |
|  | 2.2. Effective communication channels are used to ensure accurate communication flow with suppliers.  |
|  | 2.3. Expenditure and resource usage are monitored to ensure procurement objectives are achieved within budget parameters.                       |
|  | 2.4. Reliable methods of monitoring procurement are used to ensure efficient use of time and resources.   |
| 3. Finalise procurement process.       | 3.1. Purchase of goods and services is completed within designated timeframes.  |
|  | 3.2. Inspection is arranged to confirm procurement meets required quality standards and procurement objectives.                                 |
|  | 3.3. Defects or variances to procurement objectives are identified and prompt remedial action is taken.   |
|  | 3.4. Procurement system and records, and reports on procurement process, are maintained using business equipment and technology.                |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"><li>• maintain current knowledge of procurement procedures.</li></ul>

# Assessment Requirements for CPPDSM4047 Implement and monitor procurement process

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4047A Implement and monitor procurement process.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also implement and monitor purchasing processes for two different goods or services relating to managing a building or facility.

Each product or service must be procured using a different procurement method selected from the following:

- open tendering
- request for proposal
- request for quotation
- restricted tendering
- single source
- two-stage tendering.

In doing the above, the person must:

- review procurement objectives and relevant information to determine procurement processes, and source appropriate authority or delegations for procurement
- finalise procurement process within agreed timeframes, using business equipment and technology to maintain records and reports
- apply knowledge of organisation's practices, ethical standards, and legislative requirements associated with implementing and monitoring purchasing processes for goods and services
- use effective oral and written communication to effectively monitor the implementation of the procurement process against budget parameters.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- benefits and risks associated with, and procedures for, the following procurement processes:
  - open tendering
  - request for proposal
  - request for quotation
  - restricted tendering
  - single source
  - two-stage tendering
- best practice procurement principles
- implications of warranties, guarantees and exclusions relating to goods and services
- key principles of procurement, including:
  - accountability and recording
  - ethics and fair dealing
  - open and effective competition
  - planning and professionalism
  - value for money
- limitations of own work role, responsibilities and professional abilities
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - equal employment opportunity (EEO)
  - financial probity
  - franchise and business structures
  - industrial relations
  - work health and safety (WHS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - details of goods or services to be procured
  - organisational procurement policies and procedures
  - organisational procurement process checklist
  - guides on procurement processes and procedures

- relationship with team members and supervisor:
  - member of a work team in a property industry context.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4048 Implement customer service strategies in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4048B Implement customer service strategies in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to provide advice to identify customer needs and evaluate customer service in the property industry. It requires the ability to advise on customer needs, support implementation of customer service strategies relevant to the property industry, obtain and analyse customer feedback, and design strategies to improve customer service strategies.

The unit supports workers in the property industry who are involved in providing advice to customers and evaluating customer service. It applies to real estate agents, property managers, strata managers and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |   |   |
|---|---|
| 1. Advise on customer needs.                              | 1.1. <b><i>Customer needs</i></b> are assessed and clarified using appropriate communication techniques.  |
|   | 1.2. Problems matching service delivery to customer needs are diagnosed and options for improved service are developed.   |
|   | 1.3. Relevant and constructive advice is provided that promotes the improvement of customer service delivery.   |
|   | 1.4. Business equipment and technology are used to structure and present information on customer service needs.   |
| 2. Support implementation of customer service strategies. | 2.1. Customer service strategies and opportunities are promoted within the organisation.  |
|   | 2.2. Available resources are identified and allocated to fulfil customer service objectives.  |
|   | 2.3. Procedures to resolve customer difficulties and complaints are actioned.   |
|   | 2.4. Coaching and mentoring assistance is provided to colleagues to overcome difficulties in meeting customer service standards.                                |
| 3. Evaluate and report on customer service.               | 3.1. Customer satisfaction with service delivery is reviewed using verifiable data.   |
|   | 3.2. Changes necessary to maintain service standards are identified, and actions are implemented according to organisational procedures.                        |
|   | 3.3. Conclusions and recommendations are prepared from verifiable data and constructive advice is provided on future directions of customer service strategies. |
|   | 3.4. Systems, records and reporting procedures are maintained to compare changes in customer satisfaction.  |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	<ul style="list-style-type: none"><li>maintain current knowledge of customer service standards and strategies.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>interpret graphical and statistical data on customer satisfaction with service provided by organisation.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>discuss and confirm customer service standards with team members.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>interpret routine text on customer service strategies.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>prepare complex written reports on changes in customer satisfaction.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>use business technology to produce reports on impact of customer service strategies on customer satisfaction levels.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Customers</i></b> must include at least two of the following:	<ul style="list-style-type: none"><li>corporate customers</li><li>customers with routine or special requests</li><li>individual members of the organisation</li><li>internal or external customers</li><li>members of the public</li><li>other agencies</li><li>people from a range of social, cultural or ethnic backgrounds</li><li>regular or new customers.</li></ul>
<b><i>Customer needs</i></b> must include at least three of the following:	<ul style="list-style-type: none"><li>advice or general information</li><li>company information on services</li><li>contract administration</li><li>current and planned property development</li><li>making an appointment</li><li>management policy and procedures</li><li>property characteristics, including:<ul style="list-style-type: none"><li>availability of alternative energy sources</li></ul></li></ul>

- accessibility for people with disabilities
- energy efficiency
- energy ratings
- water saving devices
- property operations
- sales and marketing services
- specific information.

# Assessment Requirements for CPPDSM4048 Implement customer service strategies in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4048B Implement customer service strategies in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also implement and monitor customer services strategies for an organisation in the property industry. The person must demonstrate this performance by carrying out each of the following:

- identify the needs of one customer and communicate this to team members
- support the implementation of one improved customer service strategy in an organisation
- evaluate and report on customer satisfaction with service delivery within one department or organisation.

In doing the above, the person must:

- distinguish between different levels of customer satisfaction
- identify and confirm needs, priorities and expectations of the organisation in delivering service to customers
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with providing advice to customers and evaluating customer service
- provide constructive advice on customer service practices.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- principles of customer service
- service standards and best practice models in relation to customer service in the property industry

- common problems relating to customer service
- consultation methods, techniques and protocols for gathering information on customer satisfaction
- organisational business structure, products and services relating to implementing customer service strategies
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - financial probity
  - franchise and business structures
  - industrial relations
  - property sales, leasing and management
  - work health and safety (WHS)
- techniques for dealing with customers with special needs.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - baseline data on customer satisfaction in the relevant department or organisation
  - organisational customer service policies and procedures
  - guides on best practice customer service practices
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4055 Maintain asset management system

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4055A Maintain asset management system.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to provide advice to set up a system of asset control that applies to all property assets. It requires the ability to classify assets in line with organisational requirements.

The unit supports workers in the property industry who are involved in developing and implementing maintenance programs for all types of managed properties. It applies to real estate agents, property managers, strata managers and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

text is used, further information is detailed in the range of conditions.

1. Determine system requirements.
  - 1.1. *Asset management system* requirements are determined.
  - 1.2. Opportunities are given to colleagues and clients to contribute to identifying system requirements.
  - 1.3. Recommendations on system requirements are presented in required format, style and structure using relevant business equipment and technology.
2. Classify assets.
  - 2.1. *Assets* are identified and classified.
  - 2.2. Assets are recorded according to Australian accounting standards and legislative requirements.
  - 2.3. Level of security and disclosure of financial statements are determined.
  - 2.4. Reliable processes for classifying and recording assets are used, making efficient use of business technology and available time and resources.
3. Monitor and report on asset management system.
  - 3.1. System effectiveness is monitored and evaluated.
  - 3.2. Feedback from client and colleagues is used to identify and develop improved systems.
  - 3.3. Existing technology is assessed against newly available technology to determine needs and priorities.
  - 3.4. *Asset information* is securely maintained with due regard to client confidentiality.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of asset management systems and processes.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret graphical and statistical data on asset management system performance.</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>• discuss and confirm asset management requirements with team</li> </ul>

- skills to: members.
- Reading skills to: • interpret business documentation on asset management system needs.
- Writing skills to: • prepare complex written reports on asset management system requirements.
- Technology skills to: • use business technology to operate computerised asset management systems.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Asset management system*** must be either:
- computer-based
  - manual.
- Assets*** must include at least one of the following:
- intangible assets:
    - goodwill
    - human capital
    - intellectual property
  - tangible assets:
    - buildings
    - business and marketing contracts
    - equipment
    - furniture
    - goodwill
    - land
    - property
    - vehicles.
- Asset information*** must include at least two of the following:
- historical data
  - insurance
  - key personnel
  - lines of responsibility
  - maintenance schedules
  - operating environment of organisation, including financial markets, competitors, core business activities, functions and stakeholders
  - property management reports
  - register of assets

- reports and relevant documentation
- residual life of assets.

# Assessment Requirements for CPPDSM4055 Maintain asset management system

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4055A Maintain asset management system.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also set up a system that applies to all property assets of a department or organisation operating in the property industry. The system established can be manual, or it can be a computerised system using commercially available software.

In doing the above, the person must:

- determine the department or organisation's asset system requirements through consultation and analysis of business and operational plans
- classify and record assets using Australian accounting standards
- apply knowledge of legislative requirements and department or organisation's practices and ethical standards associated with setting up a system of control that applies to all property assets
- monitor and report on effectiveness of the asset management system.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- difference between tangible and intangible assets
- asset management principles
- asset management software systems, including their types, sources of information, and functions
- department or organisation's asset management policies and procedures
- key provisions of ISO 55000 Asset management - Overview, principles and terminology
- limitations of own work role, responsibilities and professional abilities in relation to maintaining an asset management system

- key financial record-keeping standards, practices and codes
- required asset financial record-keeping manuals
- relevant Australian standards and legislation, including Australian accounting standards
- key requirements of federal, state or territory legislation and local government regulations relating to asset management, including:
  - environmental issues
  - financial probity
  - property sales, leasing and management
  - work health and safety (WHS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - asset classification in Australian accounting standards
  - baseline data on assets of department or organisation
  - organisation's asset management policies and procedures
  - guides on best practice in asset management for property-related organisations
  - ISO 55000 Asset management - Overview, principles and terminology
- materials:
  - asset management software
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

# CPPDSM4056 Manage conflicts and disputes in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4056A Manage conflicts and disputes in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to use communication techniques to manage and resolve conflicts and disputes in the property industry. It requires the ability to assess conflict or dispute situations, accurately receive and relay information, adapt interpersonal styles and techniques to varying social and cultural environments, and evaluate responses.

The unit supports the work of those involved in using communication techniques to manage and resolve conflicts and disputes in the property industry. It applies to real estate agents, property managers, strata managers, Nationwide House Energy Rating Scheme (NatHERS) assessors, home sustainability assessors and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Assess conflict or dispute.	<p>1.1. <b><i>Causes of conflict or dispute</i></b> are identified and response required to prevent escalation is identified and evaluated.</p> <p>1.2. Effective <b><i>communication</i></b>, observation and active listening skills are applied to elicit and interpret verbal and non-verbal information and ensure an accurate exchange of information.</p> <p>1.3. Situations requiring specialist advice are identified and assistance is sought as required.</p>
2. Negotiate resolution.	<p>2.1. Conflict or dispute is negotiated and resolved constructively using strategies that comply with established organisational procedures.</p> <p>2.2. <b><i>Negotiation techniques</i></b> are used to maintain positive interaction, and divert and minimise aggressive behaviour.</p> <p>2.3. Communication with others is conducted in a courteous manner that reflects sensitivity to individual, social and cultural differences.</p> <p>2.4. Contradictions, ambiguity, uncertainty or misunderstandings are identified and clarified.</p> <p>2.5. Factors that might impact on the safety or security of clients and colleagues are identified and appropriate responses or <b><i>contingency measures</i></b> are formulated and implemented.</p>
3. Evaluate response.	<p>3.1. Response evaluation findings are organised in a format suitable for analysis.</p> <p>3.2. Effectiveness of response is reviewed and evaluated.</p> <p>3.3. Incident observations are provided in an accurate, concise and constructive manner when reviewing and debriefing situations.</p> <p>3.4. Records and, where required, report of conflict or dispute are prepared using business equipment and</p>

technology.

- 3.5. Information is securely maintained with due regard to confidentiality, and legislative and organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	<ul style="list-style-type: none"> <li>maintain current knowledge of conflict-resolution strategies.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>summarise positions and agreements of parties in dispute to establish common ground and advance discussions.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>clearly document areas of agreement and disagreement in complex disputes.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>prepare routine documentation associated with the resolution of workplace conflicts and disputes, including agendas, minutes, meeting notes, and correspondence in the form of emails and letters.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<p><b><i>Causes of conflict or dispute</i></b> must include at least three of the following:</p>	<ul style="list-style-type: none"> <li>breakdown of communication</li> <li>change of economic and commercial circumstances</li> <li>differing legal concepts and changes in law</li> <li>differing views of underlying facts</li> <li>impact of third parties and force majeure</li> <li>a person under the influence of intoxicating substances</li> <li>a person with criminal intent</li> <li>refusal to comply with committee or group decisions</li> <li>refusal to pay for services</li> <li>situations affecting the safety and security of self, others or property</li> </ul>
--	--

- technical problems or defective products.
  - active listening
  - clear, legible writing
  - giving customers full attention
  - maintaining eye contact
  - non-verbal communication, including body language and personal presentation
  - speaking clearly and concisely
  - using appropriate language and tone of voice
  - using open and closed questions.
  - control of tone of voice and body language
  - demonstrating flexibility and willingness to negotiate
  - using positive, confident and cooperative language
  - using clear presentation of options and consequences
  - using language and concepts appropriate to the people involved
  - using strategic questioning and listening to gather information and direct the focus of people involved
  - using summarising of positions and agreements to move understanding.
  - arbitration
  - counselling
  - cultural support
  - defusing strategies
  - intervention
  - legal action
  - mediation
  - selecting alternative actions that may require use of force, within legally permissible limits
  - security
  - specialists and experts.
- Communication techniques** must include at least four of the following:
- Negotiation techniques** must include at least four of the following:
- Contingency measures** must include at least two of the following:

## Unit Mapping Information

CPPDSM4056A Manage conflicts and disputes in the property industry

## Links

# Assessment Requirements for CPPDSM4056 Manage conflicts and disputes in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4056A Manage conflicts and disputes in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also use communication techniques to manage and resolve two of the following different conflicts or disputes in a property industry context:

- breakdown of communication
- change of economic and commercial circumstances
- differing legal concepts and changes in law
- differing views of underlying facts
- impact of third parties and force majeure
- a person under the influence of intoxicating substances
- a person with criminal intent
- refusal to comply with committee or group decisions
- refusal to pay for services
- situations affecting the safety and security of self, others or property
- technical problems or defective products.

In doing the above, the person must:

- evaluate resolution process and accurately record and report facts and outcomes
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with managing and resolving conflict and disputes
- negotiate conflict or dispute situations to an effective resolution where possible
- use communication techniques to accurately identify causes and incidences of conflict or dispute.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- conflict or dispute-resolution techniques and procedures
- consultation methods, techniques and protocols
- ethical practices and relevant codes of conduct
- negotiation strategies
- organisational policies and procedures for property services relating to managing conflicts and disputes, including procedures for handling complaints
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - equal employment opportunity (EEO)
  - financial probity
  - franchise and business structures
  - industrial relations
  - privacy
  - property sales, leasing and management
  - strata community management
  - work health and safety (WHS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - contextual information on conflicts or disputes to be managed and resolved
  - organisational conflict and dispute-resolution policies and procedures
  - organisational templates for reporting conflicts and disputes
  - guides on negotiation techniques and conflict-resolution strategies
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4066 Plan and coordinate property and facility inspection

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4066A Plan and coordinate property and facility inspection.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to plan and coordinate a property or facility inspection to evaluate its condition, worth and redevelopment requirements. It requires the ability to plan and document work activities effectively, monitor and conduct inspection tasks, and record and report results of the inspection.

The unit supports the work of those involved in planning and coordinating property and facility inspections. It applies to real estate agents, property managers, strata managers, Nationwide House Energy Rating Scheme (NatHERS) assessors, home sustainability assessors and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Plan property or facility inspection.	<ul style="list-style-type: none"><li>1.1. <b><i>Property or facility</i></b> information is researched and analysed to determine status and occupancy details.</li><li>1.2. Context and <b><i>purpose of inspection</i></b> are determined.</li><li>1.3. <b><i>Property or facility inspection plan</i></b> is developed.</li><li>1.4. Business equipment and technology are used to access, organise and monitor information.</li><li>1.5. Property or facility access arrangements and approvals required to conduct inspection are determined.</li></ul>
2. Inspect property or facility.	<ul style="list-style-type: none"><li>2.1. Property or facility is inspected according to inspection plan, using reliable inspection processes and ensuring all relevant aspects of the property or facility are sighted and noted.</li><li>2.2. Variations to inspection plan are determined and implemented to meet changing circumstances and improve service delivery.</li><li>2.3. Condition of features associated with property or facility is recorded.</li><li>2.4. Situations requiring specialist advice are identified and assistance is sought as required.</li></ul>
3. Review and report on inspection outcomes.	<ul style="list-style-type: none"><li>3.1. Inspection outcomes are reported and reviewed against inspection plan.</li><li>3.2. Recommendations and issues are prepared in required format and in style and structure suitable for review and interpretation.</li><li>3.3. Feedback on client satisfaction with inspection outcomes is sought using valid methods and verifiable data.</li><li>3.4. Relevant documentation is completed and processed.</li><li>3.5. Information is securely maintained with due regard to client confidentiality.</li></ul>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	<ul style="list-style-type: none"> <li>maintain current knowledge of property and facility inspection procedures.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>take measurements and perform calculations associated with building and facilities inspection.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>ask questions to clarify and seek further information on aspects of building or facility condition and performance as part of inspection procedures.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>access and interpret information from building or facility's technical and financial reports as part of the inspection process.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>prepare technical reports on the conditions and performance of buildings and facilities.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Property or facility</i></b> must include at least one of the following:	<ul style="list-style-type: none"> <li>commercial</li> <li>industrial</li> <li>mixed use</li> <li>residential</li> <li>retail</li> <li>strata community</li> <li>special use property, such as health, education or other community facility.</li> </ul>
<b><i>Purpose of inspection</i></b> must:	<ul style="list-style-type: none"> <li>be defined through a contract between organisation providing inspection service and legal entity commissioning the service</li> <li>form part of internal procedures of property management organisation.</li> </ul>
<b><i>Property or facility inspection plan</i></b> must:	<ul style="list-style-type: none"> <li>include range of suitable inspection activities and timelines</li> <li>be sufficiently flexible and adaptable to accommodate unforeseen contingencies that arise.</li> </ul>

# Assessment Requirements for CPPDSM4066 Plan and coordinate property and facility inspection

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4066A Plan and coordinate property and facility inspection.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also plan and coordinate the inspection of two of the following different properties or facilities to evaluate their condition, worth or redevelopment requirements:

- commercial
- industrial
- mixed use
- residential
- retail
- strata community
- special use property, such as health, education or other community facility.

In doing the above, the person must:

- conduct a property or facility inspection under normal industry conditions ensuring condition of features is recorded
- apply knowledge of organisational practices, ethical standards and legislative requirements associated with inspecting a property or facility, and assessing its condition
- report inspection conclusions and recommendations, including client feedback on level of satisfaction with service
- undertake sufficient research of property or facility to develop an inspection plan detailing a range of suitable inspection activities and incorporating appropriate contingency arrangements.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- basic knowledge of property and facility contracts and administrative requirements
- building construction principles
- key features of building drawings
- common building defects
- inspection methods for different property and facility types
- limitations of own work role, responsibilities and professional abilities
- local regulations affecting use and conditions of above properties or facilities
- organisational and professional procedures, ethical practices and business standards relating to inspecting properties and facilities
- principles of business and property law, and specific precedents likely to influence conduct of inspection
- building codes relevant to properties and facilities being inspected
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - financial probity
  - franchise and business structures
  - industrial relations
  - property sales, leasing and management
  - work health and safety (WHS)
- risks and risk management procedures to be followed during building and facility inspections
- sources of information and assistance for property or facility
- WHS issues and requirements for property and facilities inspections.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- materials:
  - buildings or facilities to be inspected
  - sources of specialist advice on building and facility inspections
- specifications:
  - organisational policies and procedures relating to inspecting buildings and facilities
  - organisational templates for inspection findings
  - specifications for building or facility to be inspected

- WHS requirements to be met during inspections of buildings and facilities
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

# Assessment Requirements for CPPDSM4071 Promote process improvement in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4071A Promote process improvement in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also research and implement two different improvement processes that reduce costs and improve quality services in one of the following property-related organisations:

- education and training
- energy conservation
- innovative product or service
- innovative work practices
- investment strategies
- marketing, including use of social media
- new markets
- online business expansion
- pricing strategies
- recycling and reusing materials
- redesign business process
- review financial performance
- take on a mentor or business coach
- use of new technologies
- waste reduction
- work experience, exchange and opportunities.

In doing the above, the person must:

- assess opportunities for improvement against business goals and objectives

- identify opportunities for improving processes through an accurate assessment of work practices, information gathering and consultation
- determine change requirements through development of an improvement plan incorporating an analysis of risk
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with researching and implementing improvement processes to reduce costs and improve quality services
- implement and monitor change using organisational systems and technology, and documenting and reporting the results.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- common effects of change and innovation in the workplace
- industrial and organisational context of change
- limitations of own work role, responsibilities and professional abilities
- organisational policies, plans, procedures and structure relating to promoting process improvements
- principles and techniques for goal setting and recording priorities
- principles of negotiation
- processes for interpreting and applying feedback in a change management process
- process improvement principles
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - industrial relations
  - privacy
  - property sales, leasing and management
  - work health and safety (WHS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- physical conditions:
  - sources of specialist advice on process improvement measures
- specifications:
  - case studies of best practice process improvement strategies relevant to the property industry

- organisational plans, policies and procedures relating to key business processes
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4072 Provide leadership in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4072A Provide leadership in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to provide effective leadership in the property industry. It requires the ability to model high standards of performance and behaviour, and positively influence individuals and work teams. It requires knowledge of financial, legal and procedural requirements relevant to the property industry.

The unit supports the work of those involved in leadership roles in the property industry. It applies to real estate agents, property managers, strata managers, Nationwide House Energy Rating Scheme (NatHERS) assessors, home sustainability assessors and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

- essential outcomes. demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Apply high standards of performance in undertaking individual and team tasks.
    - 1.1. Own work practices model high standards of performance and ethics in providing *property services*.
    - 1.2. Property services and work practices are planned and implemented.
    - 1.3. Work practices reflect an understanding of and respect for individual differences, and are adapted as appropriate to meet specific needs of clients and others.
    - 1.4. Individual and team efforts and contributions are encouraged and rewarded.
    - 1.5. Breaches of organisational *code of conduct and code of ethics* are identified and reported.
  2. Interpret and comply with financial, legislative and procedural requirements.
    - 2.1. Financial, legislative and procedural requirements relevant to property services are identified.
    - 2.2. Key financial, legislative and procedural principles relating to organisational values and requirements are identified and interpreted.
    - 2.3. Information relevant to property services is identified and assessed.
    - 2.4. Own interpretation and application of financial, legislative and procedural requirements are confirmed.
    - 2.5. Situations requiring specialist advice are identified and assistance is sought as required.
  3. Facilitate commitment to workplace change.
    - 3.1. Opinions and suggestions on improving work practices are encouraged to facilitate participation in change processes.
    - 3.2. Goals and objectives of change are communicated clearly and promptly to individuals and teams.
    - 3.3. Business equipment and technology are used to manage and provide access to information on progress towards objectives of change.
    - 3.4. Mentoring and coaching are provided to support individuals and groups through introduction of change.

- 3.5. Decisions to overcome problems in implementation of change are made in consultation with colleagues and clients.
- 3.6. Effective relations and communications are maintained with clients and colleagues during process of change.
4. Develop and maintain professional competence.
  - 4.1. Own professional development is maintained in consultation with relevant people.
  - 4.2. Feedback from clients and colleagues is used to determine professional competency and quality of performance, and to identify key areas for improvement in providing property services.
  - 4.3. Own knowledge and skills in providing property services are assessed against competency standards and other relevant benchmarks to determine professional development needs and priorities.
  - 4.4. Strategies to maintain currency of professional competency in providing effective property services are identified, planned and implemented.
  - 4.5. Professional networks are participated in to identify and build relationships with relevant individuals and organisations in the property industry to obtain and maintain personal knowledge.

# Assessment Requirements for CPPDSM4072 Provide leadership in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4072A Provide leadership in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also provide effective leadership by applying leadership skills in two situations to positively impact on the performance of a property-related organisation.

In doing the above, the person must:

- accurately interpret and comply with relevant legislative, financial and procedural requirements and prescribed codes of conduct, and check own understanding and application with relevant people
- demonstrate high standards of work practices and ethics in providing property services, including:
  - accurately determining and clarifying expectations of owners and owners corporations
  - acting in principal's best interests
  - adequately disclosing relevant information, including management fees
  - declaring beneficial interests
  - representing organisation and clients ethically
  - providing fair and honest property services
  - identifying and disclosing conflicts of interest
  - maintaining privacy and confidentiality
  - non-discriminatory practices
  - avoiding over-servicing
- use constructive feedback and industry competency standards and benchmarks to identify and implement opportunities for developing and maintaining own professional development

- use effective communication techniques to introduce and monitor change, while providing support to, and maintaining relationships with, clients and colleagues throughout the change process.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- characteristics of a positive role model
- common effects of change in the workplace
- industrial and organisational context of change
- limitations of own work role, responsibilities and professional abilities
- mechanisms to obtain and analyse feedback
- methods to identify and prioritise personal learning needs
- organisational and professional procedures, ethical practices and business standards, including:
  - acting in principal's best interests
  - adequate disclosure of relevant information, including management fees
  - declaration of beneficial interests
  - ethical representation of organisation and clients
  - fair and honest provision of property services
  - identification and disclosure of conflicts of interest
  - maintenance of confidentiality
  - non-discriminatory practices
- principles and techniques associated with:
  - establishing effective consultative processes
  - establishing key performance indicators
  - influencing others
  - leading people
  - making decisions
  - preparing performance plans
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - equal employment opportunity (EEO)
  - financial probity
  - franchise and business structures
  - industrial relations
  - property sales, leasing and management
  - strata communities

- work health and safety (WHS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - case studies of leadership in the property industry
  - organisational plans, policies and procedures
  - financial, legislative and procedural requirements of property organisations
  - industry competency standards and benchmarks
- supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4082 Monitor service requirements of owners and occupiers in strata communities

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to identify and respond to service requirements of owners and occupiers, and to report on the service provision of strata managers. It requires the ability to determine service requirements of owners and occupiers, monitor service provision to ensure compliance with management agreement and budget parameters, and report on service provision to owners and occupiers in strata communities.

The unit supports the work of those involved in managing strata communities who have responsibility for monitoring the service requirements of owners and occupiers and reporting on service provision. It applies to strata managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |   |  |
|---|--|
| 1. Identify and address service requirements of owners and occupiers. | 1.1. Professional rapport is established with owners and occupiers to encourage accurate and relevant exchange of information.   |
|   | 1.2. Communication protocols and points of contact for owners and occupiers with strata manager are established.   |
|   | 1.3. <b><i>Service requests</i></b> from owners and occupiers are handled in a professional manner, prioritised and actioned.  |
|   | 1.4. Potential difficulties in dealing with service requests of owners and occupiers are identified and addressed or referred to responsible officer in strata management organisation for recommended action. |
|   | 1.5. Service requests from owners and occupiers are analysed to determine risk factors and where necessary are referred to emergency services in line with organisational risk management procedures.          |
|   | 1.6. Occurrences that are likely to impact on quality of service provision are conveyed to owners and occupiers in a timely manner.  |
|   | 1.7. Service requests from owners and occupiers are documented detailing time, location, nature of service and action taken.   |
| 2. Monitor service provision.   | 2.1. <b><i>Information</i></b> on service provision is routinely collected and analysed.   |
|   | 2.2. Service provision is monitored to ensure compliance with management agreement and budget parameters.  |
|   | 2.3. Feedback from owners and occupiers on service delivery is collected, analysed and used to improve service provision.  |
| 3. Report and make recommendations                                    | 3.1. Reports on service provision are prepared and communicated to owners and occupiers.   |

on service provision.

- 3.2. Meetings are conducted with strata community to discuss and review service provision, including non-conformance and quality issues, in an open and participative environment.
- 3.3. Suggestions for improvements in service provision are noted and referred to responsible officer in strata community management organisation.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	<ul style="list-style-type: none"><li>• maintain current knowledge of ways of identifying and monitoring the provision of services to owners and occupiers in strata communities.</li></ul>

# Assessment Requirements for CPPDSM4082 Monitor service requirements of owners and occupiers in strata communities

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also identify and respond to service requirements of owners and occupiers and report on the service provision of strata managers as follows:

- respond to three of the following different service requests from either owners or occupiers in a strata community:
  - one request that falls within the terms of the management agreement
  - one request that varies from the terms of the management agreement
  - one request that requires authorisation to proceed
- collect relevant data and report to the owners and occupiers in a strata community on the quality of service provision of the strata manager.

In doing the above, the person must:

- consult with owners and occupiers in a strata scheme to determine service requirements
- log and report service requests
- respond to service requests promptly and determine appropriate action
- obtain feedback on service provision from owners and occupiers in a strata scheme
- monitor and report on service provision to owners and occupiers in a strata scheme.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- common areas of non-compliance and quality issues in relation to service provision in strata communities
- risk identification and management procedures

- role of strata community in relation to monitoring service provision of strata managers
- services offered by strata managers
- strata management agreements, including:
  - format
  - purpose
  - service requirements
  - obligations of strata community managers
- strata manager requirements to report to owners and occupiers on service provision
- techniques for:
  - gathering and analysing routine information gathered on service provision of strata managers
  - gathering feedback on service provision of strata managers
  - gathering information on service requirements of owners and occupiers in strata communities
  - communicating with owners and occupiers in strata communities.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - strata community management agreement
  - qualitative and quantitative data on service provision in a strata scheme
  - organisational policies and procedures relating to identifying and responding to service requests from owners and occupiers in a strata community
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4084 Administer insurance for strata communities

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to administer insurance for strata communities in line with strata community instructions. It requires the ability to identify the community's insurance requirements, place the suitable insurance, assist with lodging insurance claims, and review insurance arrangements.

The unit supports the work of those involved in administering insurance for strata communities. It applies to strata managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

text is used, further information is detailed in the range of conditions.

1. Establish legislative requirement for insurance.
  - 1.1. Research and access *legislative requirements for insurance* for each strata community.
  - 1.2. Organisational requirements for arranging insurance for individual strata community are identified.
2. Clarify insurance requirements for strata community.
  - 2.1. Legislative insurance requirements for *strata community* are communicated to strata community.
  - 2.2. Information on *optional insurance cover* is provided to strata community.
  - 2.3. *Relationships with insurers and insurance brokers* are disclosed to strata community.
  - 2.4. Information on extent of insurance cover is communicated to individual lot owners.
  - 2.5. Situations requiring specialist advice are identified and assistance is sought as required.
  - 2.6. Authority to obtain quotations from insurers or insurance brokers for strata community is obtained from owners committee.
  - 2.7. Insurance proposal documentation is completed.
3. Arrange valuation of asset for insurance purposes.
  - 3.1. *Source documents* are obtained.
  - 3.2. *Information on assets* to be insured is gathered.
  - 3.3. Valuation specialist is engaged to advise on value of asset.
  - 3.4. Valuation is recorded and associated documentation, including statement of limitations in determining value of asset, is stored for ease of retrieval.
  - 3.5. Information on value of asset is provided to strata community and as required to insurer.
4. Place insurance.
  - 4.1. Suitable insurers or insurance brokers are identified and quotations and product information are obtained in line with instructions from strata community.
  - 4.2. Insurance quotations are reviewed to ensure accuracy and compliance with strata community, legislative and

- organisational requirements.
- 4.3. Insurance quotations and associated documentation are communicated to the strata community.
  - 4.4. Adequate insurance policies and cover are acquired in line with instructions from the strata community.
  - 4.5. Certificates of currency for insurance policies for strata community are maintained and stored securely.
  - 4.6. Potential risks are monitored and communicated to strata community and strata community's insurer.
5. Assist with lodging insurance claim.
    - 5.1. Assistance is provided to strata community to make insurance claim.
    - 5.2. Documentation to support insurance claim is lodged with insurer or insurance broker.
    - 5.3. Roles and responsibilities of insurance assessors are recognised.
    - 5.4. Insurance claim records and relevant information are securely stored.
  6. Review insurance arrangements.
    - 6.1. Insurance arrangements are monitored and reviewed regularly in consultation with strata community to ensure compliance with legislative and strata community's requirements.
    - 6.2. Business equipment and technology are used to maintain and securely store insurance documentation.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of legislative requirements for insurance for strata communities.</li> </ul>

- establish legislative requirements for above insurance
- place required insurance
- assist owners corporation with lodging insurance claims
- apply knowledge of organisation's practices, ethical standards, and legislative requirements associated with administering insurance for strata communities
- monitor and review insurance requirements, and safely and securely maintain required documentation.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- asset valuation procedures
- insurance requirements for:
  - commercial developments
  - new builds
  - residential developments

- minimum legislative insurance requirements for strata communities
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - equal employment opportunity (EEO)
  - financial probity
  - privacy
  - strata communities
  - work health and safety (WHS)
- roles and responsibilities of strata managers in relation to insurance for strata communities
- sources of professional advice about insurance for strata communities.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - organisation's policies and procedures for administering insurance for strata community
  - sources of information on insurers and insurance brokers
  - information on insurance products for strata communities
  - legislation on minimum insurance requirements for strata communities
  - advice from relevant consumer affairs agencies and industry associations on duties of strata managers in relation to administering insurance for strata communities
- physical conditions:
  - strata community
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4085 Handle strata community funds held on trust

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to handle strata community funds received from clients that are held on trust. It includes identifying procedures for handling strata community funds held on trust, processing funds held on trust received from clients, and reporting discrepancies.

The unit supports the work of those involved in handling moneys held on trust. It applies to strata managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

text is used, further information is detailed in the range of conditions.

1. Identify procedures for handling strata community funds.
  - 1.1. Situations in which *funds* are held on trust are identified.
  - 1.2. Key legislative controls relating to handling funds are identified to ensure compliance with legislative and organisational requirements.
  - 1.3. Organisational policies and procedures for handling funds are sourced.
  - 1.4. Organisational personnel responsible for monitoring and communicating changes to legislation, industry codes, and organisational policies and procedures relating to handling funds are identified.
2. Process funds.
  - 2.1. Funds received from clients are promptly and accurately processed in line with organisational policies and procedures.
  - 2.2. Questions from strata communities and lot owners relating to funds are responded to promptly and honestly, within scope of own responsibilities, and according to organisational policies and procedures.
  - 2.3. Limitations in knowledge of legislation and organisational policies and procedures relating to processing funds are identified and specialist advice is sought as required.
  - 2.4. Compliance with relevant legislation, standards, codes, and organisational policies and procedures relating to processing funds is monitored.
3. Report fund discrepancies.
  - 3.1. Discrepancies in funds are reported in line with organisational policies and procedures.
  - 3.2. Non-compliance with organisational procedures for handling funds is reported in line with organisational policies and procedures.
  - 3.3. Records relating to fund discrepancies are completed according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	<ul style="list-style-type: none"><li>maintain current knowledge of legislative and organisational requirements for handling strata community funds held on trust.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>perform routine calculations required to verify records of funds held on trust.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>ask questions to clarify organisational policies and procedures for processing funds held on trust.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>read and interpret source documents, including organisational policies and procedures, relating to processing funds held on trust.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Funds*** must include:
- contractor payments
  - insurance claims and refunds
  - lot owner contributions
  - non-mutual income.

## Unit Mapping Information

No equivalent unit.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPDSM4085 Handle strata community funds held on trust

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also correctly handle four of the following situations relating to the strata community funds held for four different clients:

- contractor payments
- discrepancy in client account
- insurance claims or refunds
- lot owner's contribution
- processing non-mutual income.

In doing the above, the person must:

- identify and follow procedures for handling strata community funds held on trust
- process the funds held on trust received from the above clients.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- common discrepancies and non-compliances associated with handling strata community funds held on trust
- ethical requirements relating to handling strata community funds held on trust
- organisational administrative routines and practices for handling strata community funds held on trust
- organisational information technology and management systems used when handling strata community funds held on trust
- key requirements of federal, state or territory legislation and local government regulations relating to strata community funds held on trust

- risks and risk management strategies relating to strata community funds held on trust
- security requirements for strata community funds held on trust
- situations in which funds are held on trust by strata manager companies
- sources of information on requirements for handling strata community funds on trust.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - organisational policies and procedures for handling strata community funds
  - relevant codes, standards, legislation and regulations relating to handling strata community funds on trust
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4086 Oversee preparation of strata community budgets

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to oversee the preparation of the annual budget for a strata community. It includes gathering budget information, identifying projected income and expenditure, overseeing the preparation of a budget, and presenting the budget to the strata community.

The unit supports the work of those involved in preparing budgets for strata communities. It applies to strata managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

text is used, further information is detailed in the range of conditions.

1. Gather and analyse relevant budget information for strata community.
  - 1.1. Legislative provisions relating to strata community administrative funds, fee and contribution levies, as well as sinking funds and fees, are identified.
  - 1.2. **Budgeting method** is selected.
  - 1.3. Previous year's budget performance is reviewed.
  - 1.4. Budget planning information is collated.
  - 1.5. Strata community's expenditure priorities are identified.
2. Identify and document projected income and expenditure.
  - 2.1. **Sources of income** and **expenditure** are identified.
  - 2.2. Estimates of expenditure relating to administrative activities, including repairs and maintenance, are prepared.
  - 2.3. Potential variations to income and expenditure estimates are identified and their impact on overall budget is assessed.
  - 2.4. Identified items are documented and stored for easy retrieval.
3. Oversee budget preparation.
  - 3.1. Budget preparation is coordinated in consultation with owners committee and professional financial advisors.
  - 3.2. Budget documentation is reviewed and where necessary clarification is sought from owners committee or professional financial advisors.
  - 3.3. Expenditure commitments are checked against final income estimates.
  - 3.4. Cash flow forecasts are prepared.
  - 3.5. Contingencies are identified and included in draft budget.
  - 3.6. Draft budget is reviewed and modifications are proposed as required.
4. Present strata community budget.
  - 4.1. Owner's committee is engaged in finalising and approving draft budget.
  - 4.2. Draft budget and schedule of contribution levies and

fees are presented to strata community for approval.

- 4.3. Budget is regularly reviewed and variances are reported to owners committee.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of legislative and organisational requirements for overseeing preparation of a strata community budget.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• perform routine calculations required to estimate income and expenditure of strata community.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify planned expenditure of strata community.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• read and interpret source financial documents, such as bank statements, and identify relevant and key information.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• complete workplace documents used in preparing budgets.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Budgeting method</i></b> must include:	<ul style="list-style-type: none"> <li>• historical</li> <li>• zero.</li> </ul>
<b><i>Sources of income</i></b> must include:	<ul style="list-style-type: none"> <li>• bank interest</li> <li>• contribution levies</li> <li>• embedded network</li> <li>• fees from owners corporation records</li> <li>• interest from investments</li> <li>• penalty interest</li> <li>• recovered fees, such as from debt collection or insurance excess</li> <li>• rental income.</li> </ul>

*Sources of expenditure* must include:

- debt collection cost
- insurance
- grounds
- strata manager
- utilities.

# Assessment Requirements for CPPDSM4086 Oversee preparation of strata community budgets

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also oversee the preparation of the annual budget for one strata community, in which the work must involve:

- identifying typical information to be included in budget
- recognising when budget indicates expenditure is greater than income, and suggesting modifications that will bring it into balance
- overseeing the preparation of budget in collaboration with others in a manner that meets the strata community's identified needs.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- components of a typical budget
- concept of and procedures for financial contingency planning
- concept of strata community control and how it applies to budgetary decision making
- provisions of federal, state or territory legislation and funding body requirements that affect how finances and assets can be used by strata communities
- sources of income and expenditure for strata communities
- standard budgeting procedures.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities

- specifications:
  - organisational policies and procedures relating to budget preparation
  - relevant codes, standards, legislation and regulations relating to preparing budgets for strata communities
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

# CPPDSM4087 Facilitate operation of owners committee

## Modification History

Not applicable.

## Application

This unit of competency specifies the outcomes required to facilitate the effective operation of owners committees in strata communities. It includes establishing the legislative and governance requirements for owners committees, facilitating the establishment of owners committees, and supporting owners committees in managing strata communities.

The unit supports the work of those involved in forming and supporting the ongoing function of owners committees. It applies to strata managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |   |  |
|---|--|
| 1. Establish legislative and governance | 1.1. Legislative requirements governing establishment, appointment, operation and removal of owners committee are researched and identified. |
|---|--|

- requirements of owners committee.
- 
2. Facilitate establishment of owners committee.
- 1.2. Duties and good governance principles for committee are researched and identified.
  - 2.1. Support is provided to strata community to appoint and/or remove members of owners committee in line with legislative requirements.
  - 2.2. Support is provided to strata community to implement procedures governing operation of committee.
  - 2.3. Relationship between owners committee and strata manager is identified, documented in strata community management agreement, and communicated to strata community.
  - 2.4. Procedures for *delegating duties, powers and functions* of owners committee are identified and resolved by strata community.
  - 2.5. Appointment of owners committee is confirmed by strata community.
  - 2.6. Roles and responsibilities of owners committee are identified, documented and communicated to committee members.
- 
3. Support owners committee to manage strata communities.
- 3.1. Owners' committee is supported in establishing procedures for overseeing the management and governance of the strata community in line with the strata community management agreement.
  - 3.2. Fiduciary duties of owners committee is clarified and accepted by the committee.
  - 3.3. Meeting and voting legislated obligations, as well as best practice protocols, are developed and documented with and for owners committee.
  - 3.4. Support is provided to owners committee members to take management responsibility for the strata community and to assist each other in undertaking required roles and responsibilities.
  - 3.5. Owners' committee is assisted on an ongoing basis to ensure that legal, administrative and maintenance requirements of the strata community are monitored and met.

- 3.6. Owners' committee is given support to identify and resolve problems associated with managing the strata community.
- 3.7. Professional advice is sourced and communicated to owners committee to inform decision making as required.
- 3.8. Owners' committee is given support to create reporting to annual general meeting.
- 3.9. Professional and ethical relationships, based on trust and open communication, are fostered between strata managers and owners committee.
- 3.10. Communication and team building strategies are applied to develop commitment and cooperation between members of owners committee.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of legislative requirements of owners committees.</li> </ul>

# Assessment Requirements for CPPDSM5007 Coordinate construction or renovation of facilities

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM5007A Coordinate construction or renovation of facilities.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also coordinate the construction or renovation of two different facilities in the property industry, involving two of the following:

- creating an asset
- fitting out a new structure
- modifying an existing structure.

In doing the above, the person must:

- arrange inspections and prepare and collate documentation relating to finalisation of contract requirements using business technology
- determine construction requirements and develop a construction plan through research and consultation
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with coordinating the construction or renovation of facilities
- make available appropriate resources to support the construction or renovation process
- monitor construction processes using project management methodologies, and develop and communicate appropriate contingency plans
- negotiate variations and adjustments to work schedules
- prepare selection schedule and criteria for contractors and arrange people to be involved in the contract process by following organisational procurement procedures.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- common defects in facilities
- contract law applied to building contracts
- limitations of own work role, responsibilities and professional abilities in relation to coordinating the construction and renovation of facilities
- processes and procedures for project planning and scheduling
- key features of project management software
- regulations and legislation affecting property investments
- key provisions of the Building Code of Australia (BCA)
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - equal employment opportunity (EEO)
  - financial probity
  - franchise and business structures
  - industrial relations
  - privacy
  - property sales, leasing and management
  - strata community
  - work health and safety (WHS)
- roles and capabilities of contractors and consultants
- whole of life costing and price-quality relationship issues
- workplace policies and procedures relating to engaging consultants and contractors.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- materials:
  - project management software
- physical conditions:
  - work sites as specified in the performance evidence
- specifications:
  - specialist advice on renovation and construction of facilities
  - key provisions of the Building Code of Australia (BCA)
  - building drawings and plans
  - workplace policies and procedures relating to engaging consultants and contractors, constructing and renovating facilities, and workplace safety
  - details of facilities to be constructed or renovated

- supervisor:
  - member of a work team in a property industry context.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM5025 Maintain public relations in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM5025A Maintain public relations in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to promote and maintain positive public relations for a property organisation and the property industry. It requires the ability to facilitate effective communication processes, prepare media releases, and conduct media interviews.

The unit supports the work of those involved in promoting and maintaining positive public relations for the organisation and property industry. It applies to real estate agents, strata community managers, stock and station agents, Nationwide House Energy Rating Scheme (NatHERS) assessors, and home sustainability assessors.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Maintain relationships and networks with the media.	<ul style="list-style-type: none"><li>1.1. Relationships and networks with <i>media</i> are established and maintained in a positive and professional manner.</li><li>1.2. Organisational social, ethical and business standards are complied with to maintain positive relationships.</li><li>1.3. Systems to encourage communication flow and ongoing feedback are established and maintained to ensure accurate and relevant exchange of information.</li><li>1.4. Communication and interpersonal techniques are used to develop professional relationships with media that reflect sensitivity to individual differences and client requirements.</li><li>1.5. Media networks are accessed to ensure that information on unplanned events is communicated in an accurate and timely manner.</li></ul>
2. Prepare media release.	<ul style="list-style-type: none"><li>2.1. Media release is drafted using clear, concise and appropriately targeted language.</li><li>2.2. Media release is drafted in a manner that presents a positive image of the property and client and conforms to organisational requirements.</li><li>2.3. Professional service providers are engaged where required to support relationships with media.</li><li>2.4. Media release is distributed using established communication channels.</li><li>2.5. Information is securely maintained with due regard to client confidentiality and organisational requirements.</li></ul>
3. Conduct media interviews.	<ul style="list-style-type: none"><li>3.1. Media interviews are conducted in a professional manner that represents preferred position of property organisation and its clients.</li><li>3.2. Information is provided in a manner that is clear, accurate and protects the interests of the property organisation and its clients.</li></ul>

- 3.3. Suitable aids are used to ensure message is relevant and of interest to selected media.
- 3.4. Feedback is used to develop and implement strategies to maintain and improve the profile of the property organisation and its clients.
- 3.5. Communication and interpersonal techniques are used to deal with difficult situations in media interviews and effectively represent the views of the property organisation and its clients.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• evaluate information from a variety of sources to select appropriate media for communicating key message about the organisation.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• check complex statistical and graphical information in media releases for accuracy.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• conduct interviews on complex matters relating to the property industry</li> <li>• use language and concepts appropriate to cultural differences.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• check complex text in media releases for accuracy.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare media releases.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• analyse effectiveness of different forms of media in communicating property industry-related information.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Media*** must include:
- online
  - print

- radio
- social
- television.

# Assessment Requirements for CPPDSM5025 Maintain public relations in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM5025A Maintain public relations in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also promote and maintain positive public relations for an organisation in the property industry by:

- preparing one media release
- conducting one media interview
- demonstrating how to manage relationships and networks with the media in a positive and professional manner in response to both of the following situations:
  - undertaking a promotional activity for the property industry
  - responding to adverse media coverage.

In doing the above, the person must:

- conduct media interviews that provide clear and accurate information in a professional manner and are appropriate and sensitive to the audience
- maintain positive relationships and networks with the media and industry personnel through effective communication and interpersonal techniques
- promote and maintain positive public relations for the organisation and property industry
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with preparing and distributing media releases that present a positive image for the property organisation and its clients
- review work processes to include feedback from colleagues and clients on strategies to further improve and maintain media relationships and networks.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- forms of media
- types of media organisations in the property industry, including electronic and print
- media processes and protocols
- processes for conducting media interviews
- processes for preparing and distributing media releases
- social networking techniques
- sources of advice for dealing with the media
- techniques for dealing with adverse media coverage
- techniques for managing relationships with media and media networks
- trends in media use
- ways of using the media to convey key organisational messages.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - access to specialist advice on working with the media
  - workplace policies and procedures on media relations
  - key messages to be conveyed through the media
- supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM5026 Manage a consultant property project team

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM5026A Manage a consultant property project team.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to select and coordinate a consultancy team to complete property projects. It requires the ability to administer project contracts; select and appoint contractors; and monitor contractor compliance with contract requirements.

The unit supports the work of those involved in selecting and coordinating a consultancy team to complete property projects. It applies to real estate agents, strata community managers, stock and station agents, Nationwide House Energy Rating Scheme (NatHERS) assessors, and home sustainability assessors.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

<p>Elements describe the essential outcomes.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</p>
<p>1. Determine project requirements.</p>	<p>1.1. Project specifications and other relevant documentation are obtained and analysed to establish <b><i>project requirements</i></b>.</p> <p>1.2. Consultative processes are used to negotiate and confirm contract requirements with relevant people.</p> <p>1.3. Project plan is developed and contingencies are planned to ensure contract requirements are met.</p> <p>1.4. Financial, physical and human resource requirements are identified and organised according to project plan.</p> <p>1.5. Draft documentation is reviewed to ensure accuracy and relevance of information, and disseminated to relevant people for feedback.</p>
<p>2. Assess and select contractors.</p>	<p>2.1. Project information is reviewed and assessed to determine selection process and types of contractors required.</p> <p>2.2. Selection criteria are developed according to project requirements, ensuring adherence to <b><i>principles of value management</i></b>.</p> <p>2.3. <b><i>Selection processes</i></b> are implemented in line with agreed timeframes.</p> <p>2.4. Contractor assessment, selection and appointment processes are conducted.</p> <p>2.5. Selection decision is based on evaluation of sufficient evidence against specified selection criteria to enable a judgement to be made on the best candidate.</p>
<p>3. Monitor project.</p>	<p>3.1. Project plan is monitored against contracts and work schedules to ensure completion within designated timeframes.</p> <p>3.2. Effective communication channels are used that facilitate regular and accurate communication flow and feedback with contractor.</p>

- 3.3. Expenditure and resource usage are monitored to ensure objectives are achieved within project budgetary parameters.
- 3.4. Factors affecting achievement of scheduled work are identified, and variations to schedules are negotiated as required.
4. Finalise project.
  - 4.1. Notification of completed project is received and checked against contract and work schedules.
  - 4.2. Inspection is arranged to confirm that project meets industry standards and contract and client requirements.
  - 4.3. Faults, errors and omissions are identified and prompt remedial action is arranged.
  - 4.4. Business equipment and technology are used to maintain relevant documentation securely.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• evaluate information from a variety of sources to choose appropriate process for selecting and appointing consultant project team.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• check complex statistical and graphical information on projects.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• conduct selection interviews for consultant project teams undertaking complex tasks in the property industry</li> <li>• use language and concepts appropriate to cultural differences.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• evaluate written bids from potential project consultant teams.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare specifications for consultant project team services.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• analyse effectiveness of different forms of social media communicating property industry-related information.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Project requirements*** must include at least one of the following:
- create a new business product
  - create a new service
  - create an asset
  - develop a new business process
  - fit out a new or existing structure
  - improve service to clients
  - modify an existing structure
  - upgrade or modify an existing service.
- Principles of value management*** must include:
- adherence to costing constraints
  - attention to detail
  - coordination of services
  - effective selection of contractor and ancillary workforce
  - minimisation of variations.
- Selection processes*** must include at least one of the following:
- compulsory competitive tender
  - direct appointment
  - interview
  - public tender
  - selective tender.

# Assessment Requirements for CPPDSM5026 Manage a consultant property project team

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM5026A Manage a consultant property project team.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also select and manage a consultant project team to undertake a project in the property industry that involves one of the following activities:

- creating an asset
- fitting out a new or existing structure
- modifying an existing structure
- creating a new service
- upgrading or modifying an existing service
- developing a new business process
- creating a new business product
- improving a service to clients.

In doing the above, the person must:

- establish contractor requirements through research of project specifications and consultation
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with selecting and coordinating a project consultancy team
- prepare selection criteria and conduct a contractor selection process
- monitor a project against the project plan
- inspect a completed project to confirm it meets project plan requirements.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- consultant project team roles and capabilities
- consultative processes used in property-related projects
- limitations of own work role, responsibilities and professional abilities in relation to managing consultant property project teams
- principles of value management relating to managing a consultant property project team
- processes for administering project contracts, including managing contract variations
- processes for selecting and monitoring project teams
- systems and procedures for project planning and scheduling
- type and scope of property-related projects
- types of contingencies in property-related projects
- work health and safety (WHS) issues and requirements associated with managing consultant project teams.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - specialist advice on managing consultant project teams
  - tools for monitoring projects
  - workplace policies and procedures on project management
  - workplace policies and procedures on selecting and using consultant project teams
  - project specifications
- supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations (RTOs)* current at the time of assessment.

# CPPDSM5027 Provide facilities and amenities for property users

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM5027A Provide facilities and amenities for property users.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to provide facilities, amenities and associated services for property users. It requires the ability to establish the need for facilities and amenities; and coordinate the planning, implementation and review of services.

The unit supports the work of those involved in providing facilities and amenities and associated services for property users. It applies to real estate agents, strata community managers, and stock and station agents.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

- essential outcomes. demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Determine requirements for facilities and amenities.
    - 1.1. ***Facility and amenity*** requirements are identified in consultation with ***property users*** and other relevant people using appropriate research and survey techniques.
    - 1.2. Client needs are accurately assessed and clarified using appropriate consultative processes.
    - 1.3. Relevant documentation and legislative requirements are reviewed to ensure facilities and amenities comply with requirements.
    - 1.4. Situations requiring specialist advice are identified and assistance is sought as required.
  2. Plan for provision of facilities and amenities.
    - 2.1. Provision of facilities and amenities is planned.
    - 2.2. Project strategies, objectives and timelines are negotiated and agreed in consultation with client.
    - 2.3. Monitoring and reporting arrangements for project activities are established and documented.
    - 2.4. Financial, physical and human resource requirements are identified and arranged according to project plan.
    - 2.5. Risk management plan to identify, assess and control risks is prepared and incorporated into project plan.
    - 2.6. Relevant approvals are obtained within designated timeframe.
  3. Coordinate implementation of facilities and amenities.
    - 3.1. Facilities and amenities are implemented according to agreed project plan.
    - 3.2. Equipment and services are provided.
    - 3.3. Contingency arrangements for implementing facilities, and amenities are identified and activities planned to maximise quality outcomes.
    - 3.4. Expenditure and resource usage are monitored and controlled to ensure objectives are achieved within specified budgetary parameters.
    - 3.5. Regular reports on progress and outcomes are provided to relevant people according to project plan.

4. Review effectiveness of facilities and amenities.
- 4.1. Systematic review processes and established *evaluation methods* are used to assess effectiveness of facilities and amenities.
  - 4.2. Feedback from users is used to confirm quality of facilities and amenities, and to identify areas for future improvement.
  - 4.3. Identified non-conformances and non-compliances are documented and referred for action.
  - 4.4. Evaluation results and recommendations for improvements to processes are prepared in required format, style and structure, and presented to relevant people within agreed timeframes.
  - 4.5. Business equipment and technology are used to maintain relevant documentation.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• evaluate information from a variety of sources to select appropriate amenities and facilities for property users.</li> </ul>

# Assessment Requirements for CPPDSM5027 Provide facilities and amenities for property users

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM5027A Provide facilities and amenities for property users.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also provide facilities, amenities and associated services for property users; planning and coordinating the provision; and reviewing the operations of one of the following properties:

- commercial building
- educational institution
- hospital or health centre
- industrial complex
- industrial estate
- public building
- shopping centre
- strata scheme.

The above property may be a new facility or amenity, or the upgrade of an existing facility or amenity for its users.

In doing the above, the person must:

- coordinate the implementation of facilities and amenities, ensuring equipment and services meet manufacturer and supplier specifications, and expenditure and resource use are monitored against budgets
- evaluate effectiveness of facilities and amenities and feedback from users and recommend improvements to processes

- identify requirements for facilities and amenities by consulting with property users and reviewing documentation
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with providing facilities, amenities and associated services for property users
- plan the provision of facilities and amenities, incorporating strategies for monitoring and reporting, risk management, resource needs, and gaining necessary approvals.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- demographics of property users
- evaluation methods for assessing effectiveness of building facilities and amenities
- facilities and amenities for different types of properties and user groups
- planning methods and techniques
- product information on facilities and amenities
- public liability and insurance issues associated with installing facilities and amenities
- risk management strategies relating to facilities and amenities
- techniques for consulting with property users
- techniques for determining property users' requirements for facilities and amenities
- warranties, guarantees and service contracts for facilities and amenities
- work health and safety (WHS) issues associated with installing and using facilities and amenities.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - specialist advice on facilities and amenities for different types of properties and user groups
  - building drawings and plans
  - workplace policies and procedures on consulting with property users
- supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

## Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

- essential outcomes. demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Determine project requirements.
    - 1.1. ***Project*** brief is identified and analysed to determine project requirements.
    - 1.2. Project objectives and timelines are negotiated and agreed in consultation with client.
    - 1.3. Roles and responsibilities associated with project implementation are clearly defined and documented.
    - 1.4. ***Quality assurance goals and strategies*** are established.
    - 1.5. Monitoring and reporting arrangements for project activities are established and documented.
    - 1.6. Risk management plan to identify, assess and control ***risks*** is developed and incorporated into project plan.
    - 1.7. ***Project plan*** is developed and reviewed to ensure it accurately reflects agreed terms and conditions.
  2. Organise support processes.
    - 2.1. Resource requirements are identified and organised according to project plan.
    - 2.2. Targets and milestones are identified and linked to achievement of outcomes according to project plan.
    - 2.3. Effective communication strategies to encourage regular and accurate communication flow and feedback are established.
    - 2.4. Documentation and checklists associated with project plan implementation are prepared and disseminated.
    - 2.5. Contingencies are identified and activities planned to maximise quality outcomes.
  3. Monitor project processes and outcomes.
    - 3.1. Project progress is systematically monitored and variations to project plan are verified with client and adjusted accordingly.
    - 3.2. Expenditure and resource usage are monitored and controlled to ensure objectives are achieved within specified parameters.
    - 3.3. Coaching and mentoring assistance is provided to project team as required to overcome difficulties

- throughout implementation process.
- 3.4. Regular reports on project progress and outcomes are provided to client and project team to ensure adherence to project plan.
  - 3.5. Systems, records and reporting procedures are maintained.
4. Evaluate project outcomes.
    - 4.1. Project processes and outcomes are evaluated.
    - 4.2. Systematic review processes and established evaluation methods are identified and used to assess project processes and outcomes.
    - 4.3. Evaluation results and recommendations are prepared and presented to management.
    - 4.4. Relevant documentation is completed and processed.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain up-to-date information on project management strategies.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• reach agreement with stakeholders on procedures to be followed in project planning and implementation</li> <li>• use language and concepts appropriate to cultural differences.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• evaluate written progress and final reports on project activities.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare complex texts for use in presenting reports on project activities.</li> </ul>
Digital literacy skills to:	<ul style="list-style-type: none"> <li>• prepare presentations for use in communicating information on the project in an accessible manner to project stakeholders.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation,

needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Project*** must include:

- outcomes that are focused on the property industry.

***Quality assurance goals and strategies*** must include at least four of the following:

- formal structure against which progress can be evaluated
- budgets and timetables that enable the commitment of resources at appropriate points in the project
- compliance with Australian standards
- contingency plans to cater for a change of corporate focus or significant project difficulties
- continuous improvement strategies
- mechanisms for involving a wide variety of interested parties or stakeholders in the project
- procedures for monitoring and evaluating project outcomes and client satisfaction
- reducing risk by anticipating, evaluating and developing strategies for managing possible problems
- reporting procedures and protocols.

***Risks*** must include at least four of the following:

- budget constraints
- competing work demands
- inadequate active participation in the quality management process by all stakeholders
- resource and material availability
- equipment and technology breakdown
- time delays
- workplace hazards, risks and controls.

***Project plan*** must include at least five of the following:

- formal structure against which progress can be evaluated
- acquisition strategies
- budgets and timetables that enable the commitment of resources at appropriate points in the project
- consultation strategies to involve stakeholders
- contingency plans to cater for changes or significant project difficulties
- objectives, scope and expected benefits of the project
- project implementation plans
- project management methodology to be used
- quality assurance procedures
- risk management plans
- specifications
- structure of the project
- transition plans.

# Assessment Requirements for CPPDSM5030 Manage projects in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM5030A Manage projects in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also plan, organise and monitor one project in the property industry.

In doing the above, the person must:

- develop and implement feedback strategies to obtain information from relevant people on ways to improve relationships and delivery of client services
- identify networking requirements through consultation with clients and colleagues
- apply knowledge of organisation's practices and ethical standards associated with maintaining positive business relationships and active professional networks
- maintain up-to-date computer databases of relevant contacts and associated information
- promote and participate in networks and provide support to network members
- select appropriate methods and adapt communication styles when communicating with clients.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- consultative processes used in property-related projects
- contingency and risk analysis techniques
- continuous improvement processes relating to managing projects
- key project success factors and typical project pitfalls
- limitations of own work role, responsibilities and professional abilities in relation to managing projects
- organisational quality systems, such as:
  - issues relating to client satisfaction

- recording systems
- strategic planning processes
- project management concepts and principles
- project management systems and tools, such as:
  - critical path method
  - program evaluation and review technique (PERT)
- processes for administering project contracts, including managing contract variations
- systems and procedures for project planning and scheduling
- type and scope of property-related project specified in the performance evidence
- types of contingencies in property-related project.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- material:
  - project management software
- specifications:
  - project specifications
  - sources of information on project management
  - workplace policies and procedures on project management
- supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPDSM5039 Meet legal requirements in managing strata communities

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to comply with the legal requirements associated with managing strata communities. It includes identifying legal requirements; complying with relevant legislation, codes and regulatory requirements, and administering contracts for providing and/or procuring goods and services.

The unit supports the work of those involved in managing strata communities. It applies to strata managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

- essential outcomes. demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Identify legal requirements associated with managing strata communities.
    - 1.1. Reliable sources of information are identified and accessed to ensure that knowledge of ***legislation and regulations applying to strata communities*** is current, comprehensive and relevant.
    - 1.2. Professional relationships and networks are established and maintained to facilitate personal awareness of legislation and regulations relevant to managing strata communities.
    - 1.3. Applicable legislation and regulations are identified and their relationship to work practices is established.
  2. Comply with legislation, codes and regulatory requirements.
    - 2.1. Systems are established to ensure compliance with the legislative and regulatory requirements associated with managing strata communities.
    - 2.2. ***Duties and obligations*** of strata manager, lot owners and owners committees in relation to compliance with legislative and regulatory requirements are identified and communicated to relevant parties.
    - 2.3. Legal documents are identified, maintained and securely stored to ensure accessibility.
    - 2.4. Compliance with legal and regulatory requirements is monitored.
    - 2.5. Situations involving non-compliance with relevant legislative and regulatory requirements are reported and corrective actions are taken in line with organisational, strata community and legislative requirements.
  3. Administer contracts.
    - 3.1. Duties and obligations of strata manager in relation to administration of contracts are confirmed.
    - 3.2. Proposed contract is presented and terms and conditions are reviewed in consultation with strata community.
    - 3.3. Risks associated with contract terms and conditions are identified and action to mitigate risks is determined.
    - 3.4. Situations requiring specialist advice are identified and assistance is sought as required.

- 3.5. Instruction is taken from strata community on contract requirements.
- 3.6. Terms of contracts for provision of goods and services are negotiated with potential suppliers and contract documentation is updated as required.
- 3.7. Contracts are finalised ensuring that they are signed and exchanged between the relevant parties, and contract documentation is safely stored.
- 3.8. Performance of contractor is monitored and non-compliance is addressed and reported to strata community.
- 3.9. Plan for contract evaluation and renewal options are established.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain up-to-date information on legal requirements associated with managing strata communities.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify own understanding of legal requirements associated with managing strata communities</li> <li>• use language and concepts appropriate to cultural differences.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• read, extract information and interpret legislation and associated regulations applying managing strata communities.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare routine text that explains relevant legislation and associated regulations to lot owners, occupiers, owners committees, industry stakeholders and colleagues.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• access online sources of information on legal requirements associated with managing strata communities.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of

the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Legislation and regulations applying to strata community*** must include:

- anti-discrimination
- banking and investment
- building code
- consumer protection and trade practices
- contracts
- equal employment opportunity (EEO)
- electronic transactions
- environmental issues
- fencing
- industrial relations
- insurance
- nuisance and trespass
- privacy
- residential tenancy
- sale of property
- swimming pools
- taxation
- water
- work health and safety.

***Duties and obligations*** must include:

- expectations of different parties
- legislative requirements of strata managers
- maintaining records
- maintaining up-to-date knowledge and sources of information on legislation relevant to strata communities
- duty of care obligations
- identifying and reporting potential conflict of interests
- responsibilities with regard to communicating and reporting.

# Assessment Requirements for CPPDSM5039 Meet legal requirements in managing strata communities

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also comply with the legislative and regulatory requirements associated with managing strata communities.

In doing the above, the person must source relevant legislation and regulations and apply this information to perform each of the following on behalf of a strata community:

- check compliance with work health and safety (WHS) legislation
- check compliance with the provisions of legislation applying to strata community
- check that common property is managed in compliance with relevant legislation
- administer a contract for works to be performed or services to be provided.

In doing the above, the person must also:

- identify legal requirements associated with managing strata communities
- comply with identified legislative and regulatory requirements
- maintain knowledge of legislation impacting on strata communities
- identify key provisions of contract law
- administer contracts.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- duties and obligations of strata manager, owners committee and lot owners in relation to compliance with legislative and regulatory requirements

- key requirements of federal, state or territory legislation and local government regulations affecting strata communities
- principles of contract law
- relevant industry code of conduct
- WHS issues and requirements.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- physical conditions:
  - access to professional associations, networks and peer support activities
- specifications:
  - relevant legislation and associated regulations
  - workplace policies and procedures on compliance with legislation, including procedures for dealing with non-compliance
- supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM5040 Meet ethical and professional standards in managing strata communities

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to ensure that strata managers apply current and relevant professional, ethical and conduct standards in interacting with lot owners, occupiers, owners committees, and industry stakeholders in the general management of strata communities. The unit requires knowledge of professional codes of ethics and their application to practice. It requires the ability to consider a range of ethical issues and to reflect on and continuously develop professional practice.

The unit supports the work of those involved in managing strata communities. It applies to strata managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Identify professional, ethical and conduct standards.
  - 1.1. Reliable *sources* of information are identified and accessed to ensure that personal knowledge of professional, ethical and conduct standards is current, comprehensive and relevant.
  - 1.2. Productive professional relationships and networks are established and maintained to facilitate awareness of current issues relating to professional, ethical and conduct standards.
  - 1.3. Applicable professional, ethical and conduct standards are identified and their relationship to work practices is established.
2. Apply professional, ethical and conduct standards.
  - 2.1. Professional, ethical and conduct standards relevant to specific work assignments are identified.
  - 2.2. *Duties and obligations* associated with complying with professional, ethical and conduct standards are examined and fulfilled.
  - 2.3. Ethical, professional and conduct standards are applied in resolving work-related issues.
  - 2.4. Ethical, professional and conduct standards and practice are promoted with clients and colleagues.
  - 2.5. Situations involving non-compliance with relevant professional, ethical and conduct standards are reported in line with organisational, industry and legislative requirements.
3. Evaluate own professional practice.
  - 3.1. Own professional practice is monitored and reviewed against relevant professional, ethical and conduct standards.
  - 3.2. Advice and feedback are sought on performance to improve ethical practice.
  - 3.3. Professional development activities and networks are evaluated and accessed to address needs in relation to compliance with and knowledge of relevant

professional, ethical and conduct standards.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

# Assessment Requirements for CPPDSM5040 Meet ethical and professional standards in managing strata communities

## Modification History

Release 1.

New unit of competency.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also meet the professional, ethical and conduct standards required to effectively manage strata communities.

In doing the above, the person must source information on relevant professional, ethical and conduct standards, apply this information to resolve four of the following different workplace issues, and provide a written evaluation on own performance in addressing each issue:

- potential conflict of interest in business relations
- potential conflict of interest in contract management
- conflict between client requirements and industry standards
- differences in expectations caused by cultural requirements
- dilemmas caused by tensions between personal and professional standards of practice and values.

In doing the above, the person must also:

- apply codes of ethics and conduct, and professional standards to practice
- analyse practice and participate in professional development activities and networks to address identified needs
- maintain knowledge of ethical and professional issues and requirements.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- industry standards of professional behaviour and presentation relating to practice

- networks relevant to own professional practice
- professional techniques, strategies and responsibilities of strata managers
- types and sources of professional resources
- situations posing dilemmas and their implications for professional judgment and decisions
- relevant professional codes of ethics and conduct.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- physical conditions:
  - professional associations, networks and peer support activities
- specifications:
  - relevant professional, ethical and conduct standards
  - workplace policies and procedures on professional, ethical and conduct standards, including procedures for dealing with non-compliance
- supervisor:
  - member of a work team in a strata community management context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM6007 Develop life cycle asset management plans

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM6007A Develop life cycle asset management plan.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to develop a life cycle asset management plan. It requires the ability to determine asset management objectives, carry out strategic analysis, and interpret an asset management plan.

The unit supports the work of those involved in developing a life cycle asset management plan. It applies to real estate agents, strata community managers, and stock and station agents.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Determine asset management objectives.
  - 1.1. *Asset* management objectives are assessed and clarified using appropriate research and survey techniques and consultative processes.
  - 1.2. Strategic plans and other information are obtained and asset management issues analysed.
  - 1.3. Roles and responsibilities associated with developing an asset management plan are clearly defined and documented.
  - 1.4. Monitoring and reporting arrangements for *asset management activities* are determined.
  - 1.5. Information is reviewed to ensure accuracy, and a detailed budget and sinking fund forecast are prepared.
  - 1.6. Applicable industry, organisational and legislative requirements are interpreted and complied with.
2. Conduct strategic analysis.
  - 2.1. Information on current and future asset requirements is accessed and evaluated according to organisational policies and procedures.
  - 2.2. Economic trends and market developments are identified and evaluated in terms of potential factors that may impact on asset management objective.
  - 2.3. Comparative market data is obtained and analysis undertaken using standard financial analysis techniques.
  - 2.4. Risks and contingencies are identified and quantified according to industry standards, precedents and techniques.
3. Design support processes.
  - 3.1. Key performance criteria for measuring the achievement of objectives and strategies are developed and incorporated into asset management plan.
  - 3.2. Financial, physical and human resources to support the asset management plan are determined and organised within budget parameters.
  - 3.3. Quality assurance goals and strategies are determined.
  - 3.4. Draft asset management plan is prepared using business equipment and technology.

- |   |  |
|---|--|
| 4. Review and evaluate asset management plan. | 4.1. Asset management plan is reviewed and evaluated.  |
|   | 4.2. Systematic review processes are established and evaluation methods used to assess strategic processes and outcomes. |
|   | 4.3. Evaluation results are prepared.  |
|   | 4.4. Recommendations for improving strategy are presented to management within agreed timeframes.                        |

# Assessment Requirements for CPPDSM6007 Develop life cycle asset management plans

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM6007A Develop life cycle asset management plan.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also develop a life cycle asset management plan for one property-related asset.

In doing the above, the person must:

- conduct a risk analysis and evaluate potential factors that may impact on asset management objectives
- establish asset management objectives
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with developing a life cycle asset management plan
- formulate, review and evaluate an asset management strategy
- prepare a detailed budget outlining resource requirements to support asset management activities.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- asset life cycle
- asset management plans
- basic knowledge of property contracts and administrative requirements
- building codes and Australian standards relating to life cycle asset management plans
- building construction practice
- common hazards to public and personal safety associated with particular types of maintenance work in buildings
- industry benchmarks for maintenance procedures

- limitations of own work role, responsibilities and professional abilities
- organisational and professional procedures, ethical practices and business standards
- property-related assets
- key requirements of federal, state or territory legislation and local government regulations relating to asset management, including building control legislation
- work health and safety (WHS) issues and requirements relating to developing life cycle asset management plans.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - relevant legislation and associated regulations
  - workplace policies and procedures on asset management
  - specification for an asset for which a life cycle asset management plan is required
- supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPSEC2101 Apply effective communication skills to maintain security

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC2001A Communicate effectively in the security industry.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to apply oral, non-verbal and written communication skills to maintain security.

It includes:

- gathering information from a range of sources including standard operating procedures and signs written in English to understand and comply with workplace policies and legal rights and responsibilities
- using observation, listening, oral and non-verbal communication skills to interact with others and request behaviour modification in a manner that accounts for cultural differences, avoids aggression or hostility, and encourages conflict resolution
- using telephone and radio systems to report security risks
- using notebooks and information technology to record and store incident details.

It applies to people working under general supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

essential outcomes.	demonstrate achievement of the element.
1. Gather, convey and receive information for security work.	<p>1.1 Locate, read and apply standard operating procedures, workplace policies and other written information required to complete work instructions to ensure compliance with legal rights and responsibilities.</p> <p>1.2 Use listening and observation skills to receive and interpret spoken and non-verbal information.</p> <p>1.3 Use oral and non-verbal communication to develop and maintain positive relationships, mutual trust and confidence.</p> <p>1.4 Clarify understanding of received information with relevant persons using clear and concise language, questioning and summarising.</p>
2. Request behaviour modification to maintain security.	<p>2.1 Observe the work area and identify person demonstrating disruptive or inappropriate behaviour.</p> <p>2.2 Exchange information with person using non-verbal and oral communication that takes account of social and cultural differences, and uses basic strategies to overcome language barriers.</p> <p>2.3 Explain required behaviour and request modification in a manner that avoids an aggressive or hostile response.</p>
3. Report security risks using telephone and radio systems.	<p>3.1 Check radio or phone features and control functions to confirm sufficient battery and signal levels and that system is fully operational.</p> <p>3.2 Select radio channel appropriate for the location and type of communication.</p> <p>3.3 Convey security risk information using appropriate language, protocols and codes and following standard operating procedures.</p> <p>3.4 Receive and answer incoming communications promptly using clear and concise language and following standard operating procedures.</p>
4. Complete and store security records.	<p>4.1 Write security incident details in notebook ensuring information is accurate, concise and easy to read.</p> <p>4.2 Complete security incident form using clear and concise language and factual accuracy.</p> <p>4.3 Use information technology to enter, save, retrieve and export security information in a manner that complies with organisational standards of style, format and accuracy.</p> <p>4.4 Store information securely in accordance with standard</p>

	operating procedures.
--	-----------------------

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information or advice using structure and language to suit the audience
- writing skills to record and describe observations
- reading skills to understand and follow:
- standard operating procedures and policies that clarify legal rights and responsibilities and work tasks
- signs and forms written in English
- speaking and listening skills to exchange information with others in the workplace, including using questioning to clarify and confirm understanding and communicating with emergency service
- numeracy skills to calculate time when recording incident details
- problem solving skills to find solutions to defuse conflict
- self-management skills to plan tasks to meet job requirements
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others
- technology skills to use information technology to record and maintain security information.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC2001A Communicate effectively in the security industry.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2101 Apply effective communication skills to maintain security

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC2001A Communicate effectively in the security industry.

Unit of competency upgraded to reflect Standards for Training Packages 2012.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must apply effective communication skills to maintain security and request behaviour modification from two different people:

- one person who is being verbally abusive
- one person who is behaving in a physically aggressive manner.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when applying communication skills to maintain security:
  - anti-discrimination and diversity
  - use of force
- workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- basic communication process
- common barriers to effective communication
- how to read and use non-verbal communication to gain the confidence of others
- requirements for recording incident information that is factual and may be used as evidence in court
- strategies for overcoming language barriers
- the phonetic alphabet and how it is used
- types of non-verbal communication that can increase fear, aggression or hostility in others
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to apply effective communication skills to maintain security
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC2103 Apply WHS, emergency response and evacuation procedures to maintain security

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 7.0.

Supersedes and is equivalent to CPPSEC2002A Follow workplace safety procedures in the security industry.

Updated to meet the Standards for Training Packages.

Release 2 This version first released with CPP Property Services Training Package Release 7.1.

Supersedes and is equivalent to CPPSEC1004A Apply health care security procedures.

## Application

This unit specifies the skills and knowledge required to apply workplace health and safety (WHS), emergency response and evacuation procedures to maintain security and ensure the safety of self and others in the work environment.

It includes:

- clarifying and applying policies and procedures to comply with legal rights and responsibilities
- identifying, assessing and controlling security hazards and risks within the limits of own authority
- working with others to identify and respond to emergency situations including evacuation of the work area
- participating in a review of an emergency response to identify procedural improvements.

It applies to people working under general supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
<p>1. Follow WHS procedures and prepare for emergency response.</p>	<p>1.1 Read WHS and emergency procedures and workplace policies and apply to work tasks to ensure compliance with legal rights and responsibilities.</p> <p>1.2 Clarify emergency procedures, personal authority and response limitations with relevant persons.</p> <p>1.3 Identify and locate emergency resources and instructions within the workplace.</p> <p>1.4 Select and use communications and personal protective equipment (PPE) to follow safe work practices.</p>
<p>2. Identify, assess and control security hazards and risks.</p>	<p>2.1 Identify hazards in the work area and assess security risks.</p> <p>2.2 Report hazards and risks immediately to relevant persons following workplace procedures.</p> <p>2.3 Use the hierarchy of control to select and apply appropriate methods to control the hazard or minimise risk as far as possible within limits of own authority.</p>
<p>3. Identify and respond to emergency situation.</p>	<p>3.1 Identify emergency situation and promptly notify emergency personnel and relevant persons.</p> <p>3.2 Follow emergency response procedures and comply with instructions to maintain security within limits of own competence and authority.</p> <p>3.3 Seek information from relevant persons to maintain situational awareness.</p> <p>3.4 Identify need to evacuate from the work area according to nature of emergency and immediate danger level.</p> <p>3.5 Select safe evacuation pathway and methods following emergency procedures and instructions and modify evacuation pathway as required.</p> <p>3.6 Communicate regularly with relevant persons and others in the work area to give and receive instructions.</p> <p>3.7 Evacuate work area following emergency procedures.</p>

4. Complete documentation and assist review of emergency response.	4.1 Record details of identified hazards, risks and incidents using workplace documentation. 4.2 Discuss WHS arrangements and emergency response with relevant persons to seek feedback, exchange information and identify procedural improvements.
--	--

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information or advice in a form that is preferred and understood by the receiver
- writing skills to record and describe observations, actions, hazards, risks and incidents, and to complete forms
- reading skills to understand and follow:
  - standard operating procedures and policies that clarify legal rights and responsibilities and WHS requirements
  - emergency response and evacuation procedures and instructions that may be written in English or in diagrammatic form
- speaking and listening skills to:
  - ask questions and listen to answers to seek information and confirm spoken instructions
  - orally report WHS and emergency information
  - communicate with emergency services
- numeracy skills to estimate time required to carry out emergency procedures
- problem solving skills to adjust evacuation pathways where the usual means of evacuation are blocked or endangered
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

Release 1 This version first released with CPP Property Services Training Package Release 7.0.

Supersedes and is equivalent to CPPSEC2002A Follow workplace safety procedures in the security industry.

Updated to meet the Standards for Training Packages.

Release 2 This version first released with CPP Property Services Training Package Release 7.1.

Supersedes and is equivalent to CPPSEC1004A Apply health care security

procedures.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2103 Apply WHS, emergency response and evacuation procedures to maintain security

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 7.0.

Supersedes and is equivalent to CPPSEC2002A Follow workplace safety procedures in the security industry.

Updated to meet the Standards for Training Packages.

Release 2 This version first released with CPP Property Services Training Package Release 7.1.

Supersedes and is equivalent to CPPSEC1004A Apply health care security procedures.

## Performance Evidence

To demonstrate competency in this unit, a person must apply workplace health and safety (WHS), emergency response and evacuation procedures to maintain security for the following three scenarios:

- identify and control two different types of hazards in the work area
- respond to a bomb threat requiring evacuation of the work area
- respond to an accident involving injury to a person.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when applying WHS, emergency response and evacuation procedures to maintain security:
  - duty of care
  - limits of own authority
  - WHS or occupational health and safety (OHS)
- approved communication terminology, call signs and radio channels used by emergency personnel
- basic definition of a 'hazard'

- basic definition of a ‘risk’
- circumstances where evacuation methods or pathways may need to be modified
- current national terrorism threat level and context
- emergency warning system, resources, signals and instructions used in the workplace
- how to apply the hierarchy of control to control hazards and minimise risk
- location of assembly areas and post-evacuation actions
- location of emergency equipment in the workplace
- procedures for communicating and collaborating with emergency services
- process of dynamic risk assessment and how it is applied
- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
  - general features of improvised explosive devices and recommended incident response
- range and meanings of common WHS signs and symbols
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- types of security emergencies and the basic hazards and evacuation actions associated with each one.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer’s licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to apply WHS, emergency response and evacuation procedures to maintain security

- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC2104 Apply risk assessment to select and carry out response to security risk situations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 7.0.

Supersedes and is equivalent to CPPSEC2004B Respond to security risk situation.

Updated to meet the Standards for Training Packages.

Release 2 This version first released with CPP Property Services Training Package Release 7.1.

Supersedes and is equivalent to CPPSEC1001A Identify and report security risk situations.

## Application

This unit specifies the skills and knowledge required to apply risk assessment to select and carry out responses to identified security risk situations.

It includes:

- clarifying and applying standard operating procedures and workplace policies including workplace health and safety (WHS) to comply with legal rights and responsibilities
- following procedures to identify and report potential security risks and use risk assessment methods to carry out a response that is proportionate to the level of risk and own authority
- participating in a review of the response and identifying improvements to future response procedures.

It applies to people working under general supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Confirm work procedures and legal requirements for responding to security risk situations.	<p>1.1 Read standard operating procedures including WHS to clarify own responsibilities and authority to respond to security risk situations.</p> <p>1.2 Read workplace policies and procedures and apply to work tasks to comply with legal rights and responsibilities when responding to security risk situations.</p>
2. Monitor environment and identify security risks.	<p>2.1 Monitor environmental factors to maintain situational awareness in accordance with workplace requirements.</p> <p>2.2 Identify potential security risk situations.</p>
3. Assess risks and select security responses.	<p>3.1 Assess degree of risk to self, others, property and premises.</p> <p>3.2 Select security response proportionate to level of risk and own authority, and seek advice or assistance as required from relevant persons.</p>
4. Respond to security risk situations and record details.	<p>4.1 Carry out security responses to ensure the safety and security of self, others, property and premises is maximised within the scope of own responsibility, competency and authority.</p> <p>4.2 Use security equipment to communicate clear and accurate information to relevant persons and assist security responses according to standard operating procedures.</p> <p>4.3 Secure and preserve incident scenes and maintain security following response procedures.</p> <p>4.4 Record incident details in notebook using clear, concise and factual information.</p>
5. Assist in review of security responses.	<p>5.1 Participate in review of security responses and provide observations in a clear, concise and constructive manner.</p> <p>5.2 Identify effects of stress related to own well-being and use appropriate stress management techniques.</p> <p>5.3 Identify areas, in discussion with relevant persons, for improving future response procedures and for reducing the effects of stress.</p>

---

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information or advice using structure and language to suit the audience
- writing skills to record and describe observations
- reading skills to understand and follow standard operating procedures and policies that clarify legal rights and responsibilities and WHS requirements
- speaking and listening skills to ask questions and listen to answers to gain information or confirm understanding when communicating details of risk situations and communicating with emergency services
- numeracy skills to estimate time required to carry out security response procedures
- problem solving skills to match security responses to degrees of risk
- self-management skills to plan tasks to meet response requirements
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

Release 1 This version first released with CPP Property Services Training Package Release 7.0.

Supersedes and is equivalent to CPPSEC2004B Respond to security risk situation.

Updated to meet the Standards for Training Packages.

Release 2 This version first released with CPP Property Services Training Package Release 7.1.

Supersedes and is equivalent to CPPSEC1001A Identify and report security risk situations.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2104 Apply risk assessment to select and carry out response to security risk situations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 7.0.

Supersedes and is equivalent to CPPSEC2004B Respond to security risk situation.

Updated to meet the Standards for Training Packages.

Release 2 This version first released with CPP Property Services Training Package Release 7.1.

Supersedes and is equivalent to CPPSEC1001A Identify and report security risk situations.

## Performance Evidence

To demonstrate competency in this unit, a person must apply risk assessment to select and carry out appropriate responses to two different security risk situations:

- one risk situation involving a suspicious package in a public area
- one risk situation involving a person behaving in an aggressive and threatening manner.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when selecting and carrying out responses to security risk situations:
  - apprehension, arrest and restraint of persons
  - counter terrorism
  - duty of care
  - licensing requirements and limits of own authority
  - use of force
  - use of self-defence techniques
  - workplace health and safety (WHS)

- approved communication terminology, call signs and radio channels used in the security industry
- approved security response options
- basic understanding of the force model
- current national terrorism threat level and context
- methods and reasons for securing and preserving an incident or crime scene
- methods for preserving, maintaining, storing and transporting evidence and exhibits that may be used in court
- potential adverse health effects arising from the use of force or physical restraint including positional asphyxia
- procedures for communicating and collaborating with emergency services personnel
- process of dynamic risk assessment and how it is applied
- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
  - general features of improvised explosive devices and recommended incident response
- signs and indicators of stress
- signs of possible harassment or assault
- techniques for recognising and controlling own stress
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- types of behaviours and non-verbal language that can escalate conflict
- types of security risks that may be present in the work environment.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to apply risk assessment to select and carry out response to security risk situations
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations
- a suspicious package to enable achievement of the performance evidence.

# CPPSEC2105 Provide quality services to a range of security clients

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 7.0.

Supersedes and is equivalent to CPPSEC2006B Provide security services to clients.

Updated to meet the Standards for Training Packages.

Release 2 This version first released with CPP Property Services Training Package Release 7.1.

Supersedes and is equivalent to CPPSEC1002A Apply retail security procedures.

## Application

This unit specifies the skills and knowledge required to provide quality services to a range of security clients, demonstrating professionalism and courtesy. For the purposes of this unit of competency, clients are any persons or groups that request or use professional security advice or services, paid or unpaid.

It includes:

- identifying the range of security clients and their individual service needs
- clarifying and applying workplace procedures and policies to comply with legal rights and responsibilities, and meet client service standards
- working and communicating with clients to establish positive relationships, take required actions to meet their needs and resolve conflict and complaints, improve service provision.

It applies to people working under general supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
<p>1. Identify clients and establish positive relationships.</p>	<p>1.1 Identify security clients and their individual service requirements.</p> <p>1.2 Read workplace instructions, procedures and policies and apply to work tasks to meet client service standards to ensure compliance with legal rights and responsibilities.</p> <p>1.3 Check personal presentation to ensure it complies with workplace standards for appearance.</p> <p>1.4 Use communication and interpersonal techniques to establish client trust and respect in a manner that accounts for individual social and cultural differences.</p>
<p>2. Provide services to meet client needs and maintain client satisfaction.</p>	<p>2.1 Confirm security service needs with client and maintain confidentiality and professional conduct.</p> <p>2.2 Select and explain service options to meet client needs in accordance with work instructions.</p> <p>2.3 Identify conflict situations that may affect service provision, and take required action to minimise impact on client satisfaction.</p> <p>2.4 Seek assistance from relevant persons to meet client needs where personal limitations are identified.</p> <p>2.5 Provide security services to meet client needs, and report outcomes to the client in a timely manner.</p>
<p>3. Respond to client complaints and special requirements to improve service provision.</p>	<p>3.1 Identify client special needs or requirements and adjust service to meet needs.</p> <p>3.2 Seek feedback to ascertain possible causes of client dissatisfaction.</p> <p>3.3 Resolve client complaints with professionalism and courtesy, and develop ideas to improve future service provision.</p> <p>3.4 Report unresolved complaints or client dissatisfaction to relevant persons following workplace procedures.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information or advice in a form that is preferred and understood by the receiver, for example clients who are young or from minority groups
- writing skills to record and describe actions taken to meet client needs, and complete forms
- reading skills to understand and follow:
  - standard operating procedures and policies that clarify legal rights and responsibilities and service standards
  - signs and instructions that may be written in English or diagrammatic, for example directional signs
- speaking and listening skills to:
  - ask questions and listen to answers to elicit client needs and preferences and seek feedback on satisfaction with service provided
  - negotiate service options to meet client needs
  - orally report unresolved complaints and client dissatisfaction
  - communicate with emergency services
- numeracy skills to estimate time required to carry out work tasks
- problem solving skills to:
  - adjust service to address conflict and improve client satisfaction
  - find ways to improve future service provision
- self-management skills to plan work tasks to meet specified timeframes
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

# Assessment Requirements for CPPSEC2105 Provide quality services to a range of security clients

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 7.0.

Supersedes and is equivalent to CPPSEC2006B Provide security services to clients.

Updated to meet the Standards for Training Packages.

Release 2 This version first released with CPP Property Services Training Package Release 7.1.

Supersedes and is equivalent to CPPSEC1002A Apply retail security procedures.

## Performance Evidence

To demonstrate competency in this unit, a person must provide quality services to meet the needs of the following security clients:

- a person seeking assistance
- a person who is showing signs of being under the influence of an intoxicating substance, and seeking assistance
- a person from a culturally and linguistically diverse (CALD) background who has little English language and is seeking assistance
- a person who is paying for professional security services and has a complaint about service provision
- a person who is paying for professional security services because they are being threatened by another person.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when providing services to security clients:
  - anti-discrimination and diversity
  - duty of care
  - licensing requirements and limits of own authority
  - workplace health and safety (WHS)

- approved communication terminology, call signs and radio channels used in the security industry
- definition of ‘client’ and different types of security clients
- how to adjust communication to interact positively with people from a range of social, cultural and ethnic background and varying physical and mental abilities
- how to read and use non-verbal communication to gain the confidence of others
- how to safeguard confidential client information
- methods for accessing local youth services
- organisational client service standards
- procedures and standards for reporting to clients
- uniform and personal grooming requirements to maintain a professional image
- ways that individual and social differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer’s licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to provide quality services to a range of security clients
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC2106 Protect self and others using basic defensive techniques

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC2017A Protect self and others using basic defensive techniques.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to protect self and others using basic defensive techniques.

It includes:

- clarifying and applying workplace procedures and policies to understand and comply with legal rights and responsibilities
- identifying threats and assessing response and withdrawal options to prevent escalation and minimise use of force
- using interpersonal techniques to defuse conflict and give spoken warnings and applying basic defensive techniques to minimise the threat and restrain, secure or escort persons.

It applies to people working under general supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
---	--

<p>1. Identify need to use defensive techniques and assess response options.</p>	<p>1.1 Read and follow workplace policies and procedures including workplace health and safety (WHS) to ensure compliance with legal rights and responsibilities when using basic defensive techniques</p> <p>1.2 Maintain situational awareness and identify threat to safety of self or others.</p> <p>1.3 Assess response and withdrawal options to prevent escalation and minimise use of force in accordance with legislative and workplace requirements.</p> <p>1.4 Check personal safety requirements and seek advice or assistance from relevant persons.</p>
<p>2. Use interpersonal and communication techniques to defuse conflict.</p>	<p>2.1 Use interpersonal techniques to facilitate information exchange with subject of threat.</p> <p>2.2 Clarify misunderstandings and uncertainty with subject, using language that reflects sensitivity to individual social and cultural differences.</p> <p>2.3 Communicate with subject to maintain positive interaction and minimise aggressive behaviour, and to give clear spoken warnings.</p> <p>2.4 Identify factors that might impact on the safety and security of self and others and apply contingency measures within scope of own competence and authority.</p>
<p>3. Apply basic defensive techniques and report outcomes.</p>	<p>3.1 Apply basic defensive techniques to minimise immediate threat following legislative and workplace requirements.</p> <p>3.2 Monitor subject to anticipate movement and aggressive actions.</p> <p>3.3 Maintain stance and distance from subject to maximise ability to quickly apply recognised hold techniques, and immediately use lower force options when threat decreases or ceases.</p> <p>3.4 Request assistance from relevant persons and restrain, secure or escort subject.</p> <p>3.5 Record details of incident using a notebook in accordance with workplace requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information or advice in a form that is preferred and understood by the receiver and engages minority groups
- writing skills to record and describe observations and complete forms
- reading skills to understand and follow standard operating procedures and policies that clarify legal rights and responsibilities and WHS requirements
- speaking and listening skills to:
  - ask questions and listen to answers to gain information or confirm understanding when communicating to resolve conflict
  - orally report security risk information using a radio
  - communicate with emergency services
- problem solving skills to anticipate movement and aggressive actions, react in a timely manner, and adjust response accordingly
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC2017A Protect self and others using basic defensive techniques.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2106 Protect self and others using basic defensive techniques

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC2017A Protect self and others using basic defensive techniques.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must protect self and others using basic defensive techniques for three different threat situations. For each threat situation, the person must demonstrate correct techniques for avoidance, body safety and body positioning including:

- bladed stance
- interview stance
- defensive stance.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when protecting self and others using basic defensive techniques:
  - anti-discrimination and diversity
  - apprehension, arrest and restraint of persons
  - duty of care
  - licensing requirements and limits of own authority
  - trespass and the removal of persons
  - use of force
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- basic understanding of the force model
- basic defensive techniques and how and when they can be applied including:

- blocking techniques
- locking and holding techniques
- take-down techniques
- body safety and body positioning techniques including:
  - bladed stance
  - interview stance
  - defensive stance
- methods of restraint and associated effects, including signs and symptoms of positional asphyxiation
- pre-attack indicators
- procedures for communicating with emergency services
- procedures for effecting an arrest
- process of dynamic risk assessment and how it is applied
- response options using basic defensive techniques that are within specified legal limits
- signs that a person may be suffering from emotional or physical distress
- signs that a person may be suffering from mental illness
- signs that a person may be under the influence of intoxicating substances or substance-affected.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to protect self and others using basic defensive techniques
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC2107 Patrol premises to monitor property and maintain security

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC2015A Patrol premises.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to patrol premises to monitor property and maintain security.

It includes:

- clarifying and applying standard operating procedures and workplace policies including workplace health and safety (WHS) to comply with legal rights and responsibilities
- conducting a complete patrol sequence to meet work instructions, including activating and deactivating alarms or other security systems, monitoring and inspecting property and access points to confirm security status
- confirming alarm signals and assessing and responding to potential security risks.

It applies to people working under general supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Confirm and	1.1 Read work instructions and standard operating procedures

comply with work procedures and legal requirements for security patrol.	<p>for patrol and clarify work tasks with relevant persons.</p> <p>1.2 Read workplace policies including WHS and apply to work tasks to ensure compliance with legal rights and responsibilities when performing security patrol.</p>
2. Prepare for security patrol.	<p>2.1 Maintain personal dress and presentation to meet work instructions and workplace standards for appearance.</p> <p>2.2 Check resources and equipment for operational effectiveness following manufacturers' instructions, and replace or report faulty or damaged equipment.</p> <p>2.3 Confirm patrol area, access and entry points and alarm locations, and clarify issues with relevant persons.</p>
3. Carry out patrol sequence and monitoring.	<p>3.1 Conduct systematic personal safety checks on a regular basis in accordance with workplace requirements.</p> <p>3.2 Patrol premises following site patrol schedules, routes and work instructions.</p> <p>3.3 Activate and deactivate alarms or other security systems following procedures.</p> <p>3.4 Monitor and inspect property and access points to confirm security status in accordance with work instructions.</p> <p>3.5 Use communication processes and equipment to regularly convey security status to relevant persons.</p>
4. Identify, report and respond to security risks.	<p>4.1 Confirm alarm signals and identify potential security risks.</p> <p>4.2 Communicate security risk details to relevant persons, and request assistance.</p> <p>4.3 Assess risk and carry out security response within scope of own competence and authority.</p> <p>4.4 Monitor changing circumstances and adjust response to maintain security.</p>
5. Finalise patrol and complete documentation.	<p>5.1 Complete patrol sequence and confirm security of premises.</p> <p>5.2 Record details of patrol and incidents using workplace documentation.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information or advice using structure and language to suit the audience
- writing skills to record and describe observations and complete forms
- reading skills to understand and follow:
  - standard operating procedures and policies that clarify legal rights and responsibilities and WHS requirements
  - maps and other site information when clarifying the patrol area
- speaking and listening skills to:
  - ask questions and listen to answers to gain information or confirm understanding when negotiating to resolve conflict
  - orally report security risk information using a radio or telephone
  - communicate with emergency services
- numeracy skills to estimate time required to complete patrol activities
- problem solving skills to interpret alarm signals
- self-management skills to plan tasks to meet job requirements.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC2015A Patrol premises.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2107 Patrol premises to monitor property and maintain security

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC2015A Patrol premises.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must conduct two patrols to monitor property and maintain security, involving, at a minimum, the following scenarios for each patrol:

- an alarm activation
- indications of unauthorised access
- the presence of an intruder.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when conducting security patrols:
  - apprehension, arrest and restraint of persons
  - crowd control and control of persons under the influence of intoxicating substances
  - duty of care
  - licensing requirements and limits of own authority
  - trespass and the removal of persons
  - use of force
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- current national terrorism threat level and context
- differences between procedures for mobile and static patrols
- methods for monitoring property and access points
- operational principles of basic security and alarm systems, communications and protective equipment
- procedures for alarm response including responding to multiple alarm activations

- process of dynamic risk assessment and how it is applied
- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
  - general features of improvised explosive devices and recommended incident response
- types of security risk situations that may be encountered during patrol operations and appropriate responses
- site emergency and evacuation plan and procedures
- site layout, including access and exit points and location of alarms and security systems
- the phonetic alphabet and how it is used
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to patrol premises to monitor property and maintain security
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC2108 Screen people, personal effects and items to maintain security

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC2007A Screen people and CPPSEC2008A Screen items.

Units merged to reduce duplication and align with vocational needs.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to screen people, personal effects and items to maintain security.

It includes:

- clarifying and applying standard operating procedures and legal rights and responsibilities to ensure compliance
- obtaining required permissions and using a hand-held scanner and personal search methods to screen people, personal effects and items
- following procedures to carry out an appropriate response where prohibited or dangerous items are identified or alarms activated.

It applies to people working under general supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
---	--

<p>1. Confirm and comply with work procedures and legal requirements for security screening.</p>	<p>1.1 Read workplace instruction, standard operating procedures and policies including workplace health and safety (WHS).</p> <p>1.2 Clarify screening requirements with relevant persons.</p> <p>1.3 Apply to screening tasks to ensure compliance with legal rights and responsibilities.</p> <p>1.4 Check personal presentation to ensure it complies with workplace standards for appearance.</p>
<p>2. Prepare screening equipment.</p>	<p>2.1 Select and check screening equipment for operational effectiveness.</p> <p>2.2 Identify and report faulty and damaged equipment following workplace procedures.</p>
<p>3. Monitor and screen people and personal effects.</p>	<p>3.1 Observe and control flow of people through security point and provide information and assistance to maintain order.</p> <p>3.2 Direct people through screening process using interpersonal and communication techniques that are courteous, professional and account for individual social and cultural differences.</p> <p>3.3 Screen people using equipment that is fit-for-purpose, and adjust screening methods for infants and persons with special needs.</p> <p>3.4 Identify need to search person and personal effects and request authority to proceed, or seek assistance from persons authorised to conduct search.</p> <p>3.5 Conduct permitted personal search within legal constraints in a professional and courteous manner.</p> <p>3.6 Where required personal search is not permitted, deny access through screening point and report status to relevant persons following workplace procedures.</p> <p>3.7 Monitor people, personal effects and equipment to promptly identify prohibited or dangerous items.</p>
<p>4. Monitor and screen items.</p>	<p>4.1 Control position of items and carry out physical search and screening, using equipment that is fit-for-purpose.</p> <p>4.2 Monitor items and equipment to promptly identify prohibited or dangerous items.</p>
<p>5. Report and respond to prohibited or dangerous items and alarm activations.</p>	<p>5.1 Conduct further screening to clarify potential prohibited or dangerous items.</p> <p>5.2 Report and respond to identified prohibited or dangerous items and alarm activations following standard operating procedures.</p>

	5.3 Record screening outcomes using workplace documentation.
--	--

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information, advice and instructions, using structure and language that engages people, including young people and minority groups
- writing skills to record and describe observations
- reading skills to understand and follow:
  - standard operating procedures and policies that clarify legal rights and responsibilities and WHS requirements
  - signs and instructions that are written in English and may be diagrammatic, such as equipment instructions and dangerous goods or hazardous signs and labels
- speaking and listening skills to:
  - ask questions and listen to answers to gain information or confirm understanding when directing and explaining the screening process to members of the public
  - orally request authority to proceed with search of persons, and seek assistance where authority is not granted
  - communicate with emergency services
- problem solving skills to:
  - recognise suspicious behaviour when observing people through the screening process
  - recognise suspicious items, for example by checking size, shape and colour
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

Supersedes and is non-equivalent to CPPSEC2007A Screen people and CPPSEC2008A Screen items.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2108 Screen people, personal effects and items to maintain security

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC2007A Screen people and CPPSEC2008A Screen items.

Units merged to reduce duplication and align with vocational needs.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, after obtaining required permissions, a person must:

- use a hand-held scanner to screen two different people and their personal effects
- use physical search techniques to search two different bags containing several items that can hide or mask prohibited items, and identify one prohibited item
- use personal search techniques to search two different people and their personal effects and identify one prohibited item.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when screening people, personal effects and items to maintain security:
  - anti-discrimination and diversity
  - apprehension, arrest and restraint of persons
  - counter terrorism
  - duty of care
  - licensing requirements and limits of own authority
  - search of people, property and seizure of goods
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- basic features of screening technologies
- basic wandng techniques
- components and characteristics of typical weapons, prohibited or dangerous items and explosives that may be contained in items being screened

- current national terrorism threat level and context
- methods and techniques for physically searching items
- methods for screening infants and people with special needs
- personal search methods and techniques
- premises' emergency and evacuation procedures
- premises' layout and access points
- procedures for confiscating prohibited or dangerous goods
- procedures for responding to positive alarms
- procedures for selecting a random sample of persons for screening with hand-held equipment
- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
- general features of improvised explosive devices and recommended incident response
- situations requiring notification of emergency services
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to screen people, personal effects and items to maintain security

- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry, including a functioning hand-held scanner
- bags and items (including props representing prohibited items) to allow achievement of the performance evidence
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC2109 Monitor and control access and exit of persons and vehicles from premises

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC2011B Control access to and exit from premises and CPPSEC3017A Plan and conduct evacuation from premises.

Units merged to reduce duplication and align with vocational needs.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to monitor and control the access and exit of people and vehicles from premises. Vehicles include any mobile plant or equipment requiring access to or exit from premises.

It includes:

- clarifying and applying standard operating procedures and workplace policies including workplace health and safety (WHS) to comply with legal rights and responsibilities
- checking and validating the identity and authority of people and vehicles entering and exiting from premises and refusing access as required
- inspecting baggage and vehicles to verify loads and to identify and report prohibited or hazardous items
- managing premises' access control systems, such as locked or alarmed doors, and identifying and responding to indications of unauthorised entry.

It applies to people working under general supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
<p>1. Confirm and comply with work procedures and legal requirements for controlling access to and exit from premises.</p>	<p>1.1 Read work instructions and standard operating procedures to clarify requirements for controlling access to and exit from premises.</p> <p>1.2 Read workplace policies including WHS and apply to work tasks to ensure compliance with legal rights and responsibilities when performing security work.</p>
<p>2. Monitor people entering premises.</p>	<p>2.1 Check the identity of persons entering premises by matching relevant details on identification (ID) documents or using electronic ID equipment.</p> <p>2.2 Allow person to enter premises where ID and authority to enter have been validated.</p> <p>2.3 Use appropriate interpersonal techniques and oral and non-verbal communication to clarify issues and confirm compliance with conditions of entry.</p> <p>2.4 Refuse entry to persons where conditions of entry have been breached using communication that takes account of social and cultural differences, and is in a form that is preferred and understood by the receiver.</p>
<p>3. Inspect baggage and vehicles entering or exiting premises.</p>	<p>3.1 Carry out baggage and vehicle inspections following standard operating procedures.</p> <p>3.2 Report refusals to inspection requests immediately to relevant persons following workplace procedures.</p> <p>3.3 Identify and report prohibited or hazardous items found during inspection in accordance with standard operating procedures.</p>
<p>4. Monitor vehicular traffic entering and exiting premises.</p>	<p>4.1 Verify identification and authority of vehicles entering premises in accordance with workplace requirements.</p> <p>4.2 Direct incoming vehicles to appropriate unloading or parking areas in accordance with site requirements.</p> <p>4.3 Check vehicles carrying dispatched product by matching load details against relevant documentation.</p> <p>4.4 Report incidents that infringe or breach conditions of vehicular entry or exit.</p>
<p>5. Operate and monitor access control systems.</p>	<p>5.1 Monitor access control system in accordance with manufacturer's instructions.</p> <p>5.2 Activate and deactivate access control system to meet work</p>

	<p>instructions.</p> <p>5.3 Promptly identify and respond to indications of unauthorised entry following standard operating procedures.</p> <p>5.4 Record details of unauthorised entry incident using a notebook in accordance with workplace requirements.</p>
--	--

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information or advice using structure and language to suit the audience
- writing skills to record and describe observations
- reading skills to understand and follow:
  - standard operating procedures and policies that clarify legal rights and responsibilities and WHS requirements
  - manufacturers' instructions for operating access control systems
- speaking and listening skills to:
  - ask questions and listen to answers to gain information or confirm understanding when checking the authority of persons or vehicles to enter premises
  - orally report refusals to baggage or vehicle inspection requests
  - communicate with emergency services
- numeracy skills to calculate time and estimate vehicular speed
- problem solving skills to match identification documentation to persons and recognise suspicious behaviour and items
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

Supersedes and is non-equivalent to CPPSEC2011B Control access to and exit from premises and CPPSEC3017A Plan and conduct evacuation from premises.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2109 Monitor and control access and exit of persons and vehicles from premises

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC2011B Control access to and exit from premises and CPPSEC3017A Plan and conduct evacuation from premises.

Units merged to reduce duplication and align with vocational needs.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must monitor and control:

- the entry of three persons to premises where:
  - one person is carrying dangerous or prohibited goods
  - one person does not meet conditions of entry
  - one person refuses a request to search baggage
- the entry and exit of two vehicles where one is carrying dangerous or prohibited goods
- entry to premises via an access control system where there has been at least one unauthorised attempt at entry.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when monitoring and controlling access and exit of persons and vehicles from premises:
  - anti-discrimination and diversity
  - apprehension, arrest and restraint of persons
  - control of persons under the influence of intoxicating substances
  - duty of care
  - licensing requirements and limits of own authority
  - search of people, property and vehicles and seizure of goods
  - trespass and removal of persons
  - use of force
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry

- current national terrorism threat level and context
- how negotiation techniques can be used to defuse and resolve conflict
- operational principles and features of common access control systems
- premises' emergency and evacuation procedures
- premises' layout and access points
- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
  - general features of improvised explosive devices and recommended incident response
- signs of intoxication
- signs of positional asphyxiation
- the phonetic alphabet and how it is used
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- types of behaviours and non-verbal language that can escalate conflict
- types of identification and authority required to confirm entry to premises
- types of vehicles that may require monitoring while accessing and exiting from premises, including:
  - bicycles
  - buses
  - cars
  - motorcycles
  - personal transporters
  - ride-on lawnmowers
  - trolleys
  - trucks
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to monitor and control the access and exit of people and vehicles from premises
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC2110 Monitor and control individual and crowd behaviour to maintain security

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC2012A Monitor and control individual and crowd behaviour and CPPSEC2014A Operate basic security equipment.

Units merged to reduce duplication and align with vocational needs.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to monitor and control individual and crowd behaviour to maintain security of persons, property and premises.

It includes:

- clarifying and applying standard operating procedures and workplace policies including workplace health and safety (WHS) to comply with legal rights and responsibilities
- assessing site layout, and observing individual and crowd behaviour to maintain situational awareness and intervene early to defuse conflict, assess and respond to risks
- knowledge of crowd behaviour, dynamics and movement patterns that can pose a threat to security.

It applies to people working under general supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
---	--

<p>1. Confirm and comply with work procedures and legal requirements for monitoring and controlling individual and crowd behaviour.</p>	<p>1.1 Read work instructions and standard operating procedures for monitoring and controlling individual and crowd behaviour and clarify work tasks with relevant persons.</p> <p>1.2 Read workplace policies including WHS and apply to work tasks to ensure compliance with legal rights and responsibilities when performing security work.</p>
<p>2. Prepare for monitoring activities.</p>	<p>2.1 Maintain personal dress and presentation to meet work instructions and workplace standards for appearance.</p> <p>2.2 Check resources and equipment for operational effectiveness following manufacturers' instructions, and replace or report faulty or damaged equipment.</p> <p>2.3 Assess site layout to identify access and exit points, barriers and thoroughfares, and identify strategic observation points to monitor crowd movement and behaviour.</p>
<p>3. Monitor individual and crowd behaviour.</p>	<p>3.1 Conduct systematic personal safety checks on a regular basis.</p> <p>3.2 Observe individual and crowd behaviour to maintain constant situational awareness.</p> <p>3.3 Use communication equipment to regularly convey security status to relevant persons following workplace procedures.</p> <p>3.4 Identify persons behaving in a potentially disruptive manner and assess degree of risk to self, others, premises and property.</p> <p>3.5 Act promptly to calm the situation and defuse conflict, using interpersonal techniques that take account of individual social and cultural differences.</p>
<p>4. Control and report individual and crowd behaviour.</p>	<p>4.1 Identify potential security risks and assess degree of risk to self, others, premises and property.</p> <p>4.2 Communicate details of security risk to relevant persons and request assistance following standard operating procedures.</p> <p>4.3 Select and carry out security response within scope of own competence and authority.</p> <p>4.4 Monitor changing crowd and individual behaviour and adjust response to maintain security.</p> <p>4.5 Record details of security risk and response using a notebook in accordance with workplace requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information or advice using structure and language to suit the audience
- writing skills to record and describe observations
- reading skills to understand and follow:
  - standard operating procedures and policies that clarify legal rights and responsibilities and WHS requirements
  - manufacturers' instructions for operating communication equipment
  - maps and other information when assessing site layout
- speaking and listening skills to:
  - use negotiation skills to defuse conflict
  - ask questions and listen to answers to gain information or confirm understanding when negotiating to resolve conflict
  - orally report security risk information using a radio or telephone
  - communicate with emergency services
- numeracy skills to calculate time and estimate vehicular speed
- problem solving skills to recognise changes in crowd dynamics and individual behaviour
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

Supersedes and is non-equivalent to CPPSEC2012A Monitor and control individual and crowd behaviour and CPPSEC2014A Operate basic security equipment.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2110 Monitor and control individual and crowd behaviour to maintain security

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC2012A Monitor and control individual and crowd behaviour and CPPSEC2014A Operate basic security equipment.

Units merged to reduce duplication and align with vocational needs.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must monitor and control individual and crowd behaviour to maintain security, involving two separate risk scenarios:

- a queue of at least two people who are becoming disorderly and impatient
- a person behaving suspiciously in a public area.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when monitoring and controlling individual and crowd behaviour to maintain security:
  - anti-discrimination and diversity
  - counter terrorism
  - crowd control and control of persons under the influence of intoxicating substances
  - duty of care
  - licensing requirements and limits of own authority
  - trespass and the removal of persons
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- crowd behaviour, dynamics and movement patterns that can threaten security
- current national terrorism threat level and context
- how negotiation techniques can be used to defuse and resolve conflict
- measures for managing queues
- measures to prevent crushing in mass gatherings
- procedures for communicating and collaborating with emergency services

- process of dynamic risk assessment and how it is applied
- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
- general features of improvised explosive devices and recommended incident response
- security risks posed by crowds and mass gatherings
- signs of possible harassment or assault
- site emergency and evacuation plans and procedures
- site layout, including entrances, exits, first-aid points and potential hazards
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- types of behaviours and non-verbal language that can escalate conflict
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to monitor and control individual and crowd behaviour to maintain security
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC2111 Apply security procedures to manage intoxicated persons

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC1003A Apply security procedures for the responsible service of alcohol.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to apply security procedures to manage intoxicated persons.

It includes:

- clarifying and applying standard operating procedures and workplace policies to comply with legal rights and responsibilities when performing security work
- maintaining situational awareness and acting early to identify security risks and persons demonstrating disorderly behaviour or signs of intoxication
- finding options to assist intoxicated persons to comply with venue rules in a manner that avoids aggression or hostility.

It applies to people working under general supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
---	--

<p>1. Confirm and comply with work procedures and legal requirements for managing intoxicated persons.</p>	<p>1.1 Read work instructions and standard operating procedures for work in venues where persons may be intoxicated, and clarify requirements with relevant persons.</p> <p>1.2 Read workplace policies and apply to work tasks to ensure compliance with legal rights and responsibilities when maintaining security in venues where people may be intoxicated.</p>
<p>2. Prepare for work at venue.</p>	<p>2.1 Select and use communication equipment, and clarify reporting requirements with relevant persons.</p> <p>2.2 Check venue layout and confirm access and exit points, locations of facilities and emergency equipment.</p>
<p>3. Monitor the work area, and identify and assist intoxicated persons.</p>	<p>3.1 Maintain observation and situational awareness of noise levels, drink orders and individual and crowd behaviour to detect early warning signs of security risks.</p> <p>3.2 Where early warning signs are detected, intervene early to offer options to prevent intoxication.</p> <p>3.3 Maintain a visible presence and provide information, instructions and assistance using professional and courteous communication that accounts for individual social and cultural differences.</p> <p>3.4 Promptly identify persons showing signs of intoxication or disorderly behaviour.</p> <p>3.5 Ascertain cause of behaviour and assess intoxication level using calm, courteous and respectful oral and non-verbal language.</p> <p>3.6 Assess behaviour against venue rules and offer options to ensure compliance in a manner that avoids aggression or hostility.</p>
<p>4. Report security risk and complete incident documentation.</p>	<p>4.1 Report security risk and request assistance following standard operating procedures.</p> <p>4.2 Record security incident details using a notebook in accordance with workplace requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to:
  - provide information or advice using structure and language to suit the audience and which engages minority groups
  - communicate effectively with intoxicated persons

- writing skills to record and describe observations and incident details
- reading skills to understand and follow:
  - standard operating procedures and policies that clarify legal rights and responsibilities and WHS requirements
  - signs and instructions that are pictorial, graphical and written in English
- speaking and listening skills to:
  - ask questions and listen to answers to gain information or confirm understanding when ascertaining cause of behaviour and level of intoxication
  - orally report security risks using a radio or telephone
  - communicate with emergency services
- numeracy skills to estimate time required to complete work tasks
- problem solving skills to:
  - recognise changes in individual and crowd behaviour that indicate risk
  - assess intoxication levels
  - determine when to intervene in a potential security risk situation
  - find suitable options to comply with venue rules
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC1003A Apply security procedures for the responsible service of alcohol.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2111 Apply security procedures to manage intoxicated persons

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC1003A Apply security procedures for the responsible service of alcohol.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must apply security procedures to manage intoxicated persons in each of the following scenarios:

- a person who may be intoxicated and appears to be unwell
- a person who may be intoxicated and is behaving in an aggressive manner
- a group of people who may be intoxicated.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when applying security procedures to manage intoxicated persons:
  - apprehension, arrest and restraint of persons
  - duty of care
  - licensing requirements and limits of own authority
  - responsible service of alcohol:
    - underage drinking
    - definition of minors
    - undue intoxication
    - disorderly behaviour
  - venue policies and rules to comply with its liquor licence (trading hours, ways alcohol can be sold, number of people allowed in venue)
  - refusing entry to premises
  - removal of persons from premises
- use of force
- workplace health and safety (WHS)

- acceptable proof of age
- approved communication terminology, call signs and radio channels used in the security industry
- effects of alcohol on emotional state, health and physical alertness of persons
- how to recognise illegal substances and dangerous items
- methods for assessing intoxication level of persons
- options for assisting intoxicated persons to comply with venue rules
- process of dynamic risk assessment and how it is applied
- signs of intoxication including non-verbal indications
- situations requiring emergency services to be notified when dealing with intoxicated persons
- strategies to prevent a person from becoming intoxicated when early warning signs are detected
- time taken for alcohol to affect the body, and factors that can influence this including gender, size and rate of consumption
- types, strengths, alcohol percentages and standard size for alcoholic beverages
- ways that spoken and non-verbal communication can escalate conflict.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to apply security procedures to manage intoxicated persons
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC2112 Apply security procedures to remove persons from premises

## Modification History

Release 1.

New unit.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to apply security procedures to remove persons from premises.

It includes:

- clarifying and applying standard operating procedures and workplace policies to comply with legal rights and responsibilities when removing persons from premises
- maintaining situational awareness to identify and assess risk and select response options that avoid use of force where possible
- using communication skills to apply required interventions to remove persons from premises, and take precautions to ensure their safety and security upon departure.

It applies to people working under general supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Confirm and comply with work	1.1 Read work instructions and standard operating procedures to clarify requirements for removing persons from premises.

procedures and legal requirements for removing persons from premises.	1.2 Read workplace policies including WHS and apply to work tasks to ensure compliance with legal rights and responsibilities when performing security work.
2. Monitor the work area and identify person requiring removal from premises.	2.1 Check premises layout and confirm access and exit points, locations of facilities and emergency equipment. 2.2 Maintain observation and situational awareness to identify person behaving in a manner that poses a security risk or breaches premise's rules. 2.3 Approach person to discuss behaviours of concern using positive oral and non-verbal communication.
3. Assess risk, select response options and seek support.	3.1 Assess level of risk and select response options that avoid use of force where possible in accordance with workplace requirements. 3.2 Report security risk to relevant persons and request assistance.
4. Apply interventions and remove person from premises.	4.1 Explain the reasons for removal from premises and provide options or assistance to leave. 4.2 Ask the person to leave the premises using oral and non-verbal communication that is courteous and takes account of social and cultural differences. 4.3 Use interpersonal techniques and negotiation skills to defuse conflict and respond to incidents. 4.4 Escort person from premises in a calm manner, taking precautions to maximise their safety and security upon departure. 4.5 Escort person from premises using reasonable force and suitable and safe escort restraint.
5. Complete incident report.	5.1 Record incident details using a notebook in accordance with workplace requirements. 5.2 Store notebook following workplace procedures.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- oral and non-verbal communication skills to provide information or advice using structure and language to suit the audience and which engages minority groups

- writing skills to record and describe incident observations using workplace forms and notebook
- reading skills to understand and follow:
  - standard operating procedures and policies that clarify legal rights and responsibilities and WHS requirements
  - signs and instructions that are pictorial, graphical and written in English
- speaking and listening skills to:
  - ask questions and listen to answers to gain information or confirm understanding when explaining the reasons for removal from premises
  - orally report security risks and seek assistance using a radio or telephone
  - communicate with emergency services
- numeracy skills to estimate time required to complete work tasks
- problem solving skills to
  - recognise changes in individual and crowd behaviour that may indicate risk
  - assess behaviours against rules to identify the need to remove a person from the premises
  - offer options to assist the person to leave the premises
  - identify potential risks to the person's wellbeing after departing the premises
- teamwork skills to:
  - adjust personal communication styles in response to the opinions, values and needs of others
  - work collaboratively with others to assist a person to leave the premises.

## Unit Mapping Information

New unit.

This version first released with CPP Property Services Training Package Version 7.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2112 Apply security procedures to remove persons from premises

## Modification History

Release 1.

New unit.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must apply security procedures to remove persons from premises, involving each of the following scenarios:

- removing one person who is intoxicated without force
- removing one person who is intoxicated with reasonable force
- removing one person who is behaving in an aggressive manner with reasonable force
- removing one person who is behaving in an aggressive manner without force.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when applying security procedures to remove persons from premises:
  - anti-discrimination and diversity
  - apprehension, arrest and restraint of persons
  - crowd control and control of persons under the influence of intoxicating substances
  - duty of care
  - licensing requirements and limits of own authority
  - trespass and removal of persons
  - use of force
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- basic defensive techniques
- basic understanding of the force model and what constitutes reasonable force
- how negotiation techniques can be used to defuse and resolve conflict
- measures for ensuring safety and security of persons removed from premises
- methods for safely restraining persons for escort from the premises

- options to assist persons to leave premises
- potential adverse health effects arising from the use of force or physical restraint of persons including positional asphyxiation
- premises' emergency and evacuation procedures
- premises' layout and access points
- process of dynamic risk assessment and how it is applied
- signs a person is substance-affected
- signs of intoxication
- signs of positional asphyxiation
- situations requiring a person to be removed from premises
- situations requiring emergency services to be notified for persons being removed from premises
- techniques for safe physical restraint including standing, wall, seated and floor
- types of behaviours and non-verbal language that can escalate conflict
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to apply procedures to remove persons from premises
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

## CPPSEC2113 Escort and protect persons and valuables

### Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC2013A Protect valuables in transit.

Significant changes made to the unit to reflect current industry needs.

This version first released with CPP Property Services Training Package Version 7.0.

### Application

This unit specifies the skills and knowledge required to escort and protect persons and valuables.

It includes:

- clarifying and applying standard operating procedures and workplace policies including workplace health and safety (WHS) to comply with legal rights and responsibilities
- escorting persons and valuables to ensure their safety and security while maintaining constant and active observation and monitoring to assess, identify and respond to security risks
- participating in reviews of escort procedures to identify improvements
- knowledge of basic defensive techniques.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

### Pre-requisite Unit

Nil

### Unit Sector

Security operations

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
---	--

<p>1. Confirm and comply with work procedures and legal requirements for escorting and protecting persons and valuables.</p>	<p>1.1 Read work instructions and standard operating procedures for escorting and protecting persons and valuables, and clarify work tasks with relevant persons.</p> <p>1.2 Read workplace policies including WHS and apply to work tasks to ensure compliance with legal rights and responsibilities when escorting and protecting persons and valuables.</p>
<p>2. Prepare to escort person and valuables.</p>	<p>2.1 Select, organise and use equipment, personal protection equipment (PPE) and resources required to meet work tasks.</p> <p>2.2 Check equipment to ensure operational effectiveness and report faulty or damaged equipment.</p> <p>2.3 Check personal presentation to ensure it complies with workplace standards for appearance.</p> <p>2.4 Clarify communication processes with relevant persons.</p> <p>2.5 Assess risk and plan primary and secondary routes and schedule to maximise security and to meet work instructions.</p>
<p>3. Protect person and valuables during escort.</p>	<p>3.1 Collect and escort person and valuables following planned route and to meet work instructions.</p> <p>3.2 Conduct regular personal safety checks and monitor security of person and valuables during escort.</p> <p>3.3 Maintain constant and active observation of the environment to identify and assess potential security risks.</p> <p>3.4 Select and use appropriate security response to minimise risk and maximise protection of person and valuables within the scope of own competence and authority.</p> <p>3.5 Use communication equipment to report risk to relevant persons and request assistance.</p>
<p>4. Finalise and review escort procedures, and maintain equipment and documentation.</p>	<p>4.1 Escort person and valuables safely to destination point according to work instructions.</p> <p>4.2 Check, clean and store equipment and report faults or damage following workplace procedures.</p> <p>4.3 Provide accurate and constructive observations to assist in the review of escort procedures and improve future practices.</p> <p>4.4 Complete and maintain security documentation in accordance with workplace requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information or advice using structure and language to suit the audience
- writing skills to maintain escort documentation
- reading skills to understand and follow:
  - standard operating procedures and policies that clarify legal rights and responsibilities and WHS requirements
  - maps when planning and following escort routes
  - road signs and directions when following escort routes
- speaking and listening skills to:
  - ask questions and listen to answers to gain information or confirm understanding when clarifying work tasks
  - orally report security risk information using a radio or telephone
  - communicate with emergency services
- problem solving skills to assess risk and change routes when responding to security risks
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others
- technology skills to operate global positioning systems (GPS) to find safe and alternate escort routes.

# Assessment Requirements for CPPSEC2113 Escort and protect persons and valuables

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC2013A Protect valuables in transit.

Significant changes made to the unit to reflect current industry needs.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must escort and protect persons and valuables involving two different scenarios:

- one person requiring security escort
- one person carrying valuables.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when escorting and protecting persons and valuables:
  - counter terrorism
  - duty of care
  - licensing requirements and limits of own authority
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- basic contingency planning
- basic defensive techniques
- basic escort techniques
- basic understanding of the force model and what constitutes reasonable force
- operational functions of communications equipment
- options for security response within the limits of own competence and authority
- process of dynamic risk assessment and how it is applied
- types of threats that may exist and situations requiring assistance when:
  - escorting persons to safety
  - escorting persons carrying valuables.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

# CPPSEC2114 Monitor electronic security equipment and respond to alarm events

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC2018A Monitor electronic reporting facility.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to monitor electronic security equipment and respond to alarm events. The unit relates to work in a monitoring centre and does not include training for specific security equipment, covered by *AS 2201.2-2004 Intruder alarm systems - Monitoring centres* which specifies requirements and a grading convention for monitoring centres and the operations, equipment and staff necessary to carry out monitoring of intruder alarm systems.

The unit includes:

- receiving, interpreting, processing, transmitting and storing information and electronic security data using a range of electronic security and telecommunications systems
- checking equipment and systems to verify correct operation and data integrity, and resolving and reporting faults
- recognising and responding to different and multiple alarm events and taking appropriate response actions to verify alarm status, resolve alarm and ensure security
- using written and spoken English and communication equipment to provide clear and accurate spoken instructions.

It applies to people working under general supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Confirm and comply with work procedures and legal requirements for monitoring electronic security equipment.	<p>1.1 Read workplace procedures and policies including WHS and apply to work tasks to ensure compliance with legal rights and responsibilities when monitoring electronic security equipment.</p> <p>1.2 Clarify legislative and workplace requirements for monitoring tasks with relevant persons.</p>
2. Check equipment for correct operation.	<p>2.1 Check security equipment to ensure correct operation and connections following operating instructions.</p> <p>2.2 Identify actual or suspected faults or deficiencies in security equipment and report to relevant persons.</p> <p>2.3 Discuss and confirm preventative and breakdown maintenance procedures with relevant persons.</p> <p>2.4 Conduct equipment back-up to maintain security and integrity of data in accordance with workplace requirements.</p>
3. Receive, interpret, transmit and store electronic security data.	<p>3.1 Receive, interpret and transmit electronic security data following workplace procedures.</p> <p>3.2 Input data into security equipment and check to ensure accuracy following workplace procedures.</p> <p>3.3 Identify processing or transmission errors and take remedial action and report issues to relevant persons.</p> <p>3.4 Store security data securely to meet legislative and workplace requirements.</p>
4. Respond to alarm events and report security status.	<p>4.1 Recognise alarm event and follow procedures to action correct response to meet client instructions.</p> <p>4.2 Use communication equipment and interpersonal techniques to discuss alarm status with relevant persons.</p> <p>4.3 Action further response to resolve alarm event and maintain security following workplace procedures and client instructions.</p> <p>4.4 Report security status ensuring confidentiality of security information in accordance with workplace requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to:
  - provide information using security industry terminology, codes and signals
  - communicate in English
  - communicate in a manner that is preferred and understood by the receiver and engages minority groups
- reading skills to understand and follow:
  - standard operating procedures and policies that clarify legal rights and responsibilities and WHS requirements
  - technical equipment instructions that may be in written or diagrammatic form
- speaking and listening skills to:
  - ask questions and listen to answers to gain information or confirm understanding when clarifying work tasks and responding orally to alarm events
  - provide clear and accurate spoken instructions when responding to alarm activations
  - accurately interpret voice messages
  - communicate with emergency services
- numeracy skills to calculate and enter numerical data into security equipment
- problem solving skills to:
  - troubleshoot equipment malfunctions and select appropriate remedial actions
  - respond to multiple simultaneous alarm events
- technology skills to input, manipulate, retrieve and store electronic data in a variety of formats including databases.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC2018A Monitor electronic reporting facility.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2114 Monitor electronic security equipment and respond to alarm events

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC2018A Monitor electronic reporting facility.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must monitor electronic security equipment and respond to six different alarm events.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when monitoring electronic security equipment and responding to alarm events:
  - duty of care
  - licensing requirements and limits of own authority
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- categories of alarm events and procedures for responding to each category
- customer service standards
- methods for verifying polling connections
- operational functions of electronic security equipment
- own competence to operate electronic security system as required by *AS 2201.2-2004 Intruder alarm systems, Part 2: Monitoring centres*
- procedures for door, alarms, time clock, subsequent and further alarms and monitoring
- procedures to back-up and protect security data
- the phonetic alphabet and how it is used
- types of alarm events that may require response such as duress alarms, intrusion alarms, air conditioning alarms, smoke alarms, vehicle global positioning system (GPS) and satellite tracking
- types of alarm transmission technologies including wireless and internet protocol (IP) monitoring and dialler monitoring.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to monitor electronic security equipment and respond to alarm events
- electronic security equipment in a monitoring centre environment
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC3101 Manage conflict and security risks using negotiation

## Modification History

Release 1 This version first released with CPP Property Services Training Package Version 7.0.

Supersedes and is equivalent to CPPSEC3002A Manage conflict through negotiation.

Updated to meet the Standards for Training Packages.

Release 2 This version first released with CPP Property Services Training Package Version 8.1

Revised *Assessment of performance* in Assessment Conditions.

## Application

This unit specifies the skills and knowledge required to manage conflict and security risks using negotiation techniques.

It includes:

- reviewing and applying workplace procedures and policies including workplace health and safety (WHS) to comply with legal rights and responsibilities
- maintaining situational awareness to identify and assess sources of conflict and risk, and selecting and implementing response options within the scope of own authority
- using negotiation and communication techniques to resolve conflict, minimise risk and encourage a shared approach to conflict resolution
- working with others to report, evaluate and improve response procedures.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Identify and assess conflict situation and select response option.	<p>1.1 Review work instructions, procedures and policies including WHS to confirm own responsibilities and authority to ensure compliance with legal rights and responsibilities when performing security work.</p> <p>1.2 Select and use personal protective equipment to ensure own safety, and communication equipment to exchange information with relevant persons.</p> <p>1.3 Observe the work environment to maintain situational awareness and identify sources of conflict and security risk to people, property or premises.</p> <p>1.4 Assess conflict situation and nature and degree of risk, and use communication equipment to seek assistance from relevant persons.</p>
2. Negotiate conflict resolution.	<p>2.1 Use interpersonal techniques to exchange and gather information to clarify conflict situation.</p> <p>2.2 Use negotiation techniques to offer options and encourage a shared approach to conflict resolution.</p> <p>2.3 Use even tone of voice and positive non-verbal and spoken communication that takes account of individual social and cultural differences throughout negotiation.</p> <p>2.4 Anticipate factors that might escalate conflict or risk safety and security, and apply contingency measures.</p>
3. Report, evaluate and improve conflict response procedures.	<p>3.1 Report incident observations and response actions using workplace documentation.</p> <p>3.2 Discuss response with relevant persons and review procedures to evaluate effectiveness and identify improvements.</p> <p>3.3 Recognise effects of stress and manage own well-being using stress management techniques.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to:
  - provide information or advice using structure and language to suit the audience and engage minority groups
  - use strategies to overcome language barriers
- writing skills to record and describe incident observations and response actions
- reading skills to interpret:
  - workplace procedures and policies that clarify legal rights and responsibilities and WHS requirements
  - signs and forms written in English
- speaking and listening skills to:
  - use active listening to understand spoken information and instructions exchanged during negotiation
  - use questions to seek information during negotiation
  - use paraphrasing to check own understanding and show empathy during negotiation
  - seek and understand feedback from others when reviewing response procedures
  - orally request assistance using communication equipment
- numeracy skills to calculate time when recording incident details
- problem solving skills to:
  - formulate response options to match risk presented in conflict situations
  - modify response to changing circumstances when applying contingency measure
- teamwork skills to adjust

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC3002A Manage conflict through negotiation.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3101 Manage conflict and security risks using negotiation

## Modification History

Release 1 This version first released with CPP Property Services Training Package Version 7.0.

Supersedes and is equivalent to CPPSEC3002A Manage conflict through negotiation.

Updated to meet the Standards for Training Packages.

Release 2 This version first released with CPP Property Services Training Package Version 8.1

Revised *Assessment of performance* in Assessment Conditions.

## Performance Evidence

To demonstrate competency in this unit, a person must manage conflict and security risks using negotiation in three different security risk situations.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when managing conflict and security risks through negotiation:
  - anti-discrimination and diversity
  - apprehension, arrest and restraint of persons
  - duty of care
  - licensing requirements and limits of own authority
  - use of force
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- factors that may indicate escalation of conflict or risk and situations requiring specialist assistance
- how to access specialist assistance for negotiating conflict resolution

- negotiation techniques and how they can be used to defuse and resolve conflict, maintain positive interaction, divert and minimise aggressive behaviour
- principles of effective communication
- process of dynamic risk assessment and how it is applied
- the effects of power plays on a conflict situation
- the phonetic alphabet and how it is used
- types of behaviours and non-verbal language that can escalate conflict or incite aggressive or hostile responses from others
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in an operational workplace environment or an environment that reflects workplace conditions. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to manage conflict and security risks using negotiation
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC3102 Maintain operational safety and security of work environment

## Modification History

Release 1.

Supersedes and equivalent to CPPSEC3007A Maintain security of environment.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to maintain operational safety and security of the work environment.

It includes:

- reviewing work instructions and applying procedures and policies to comply with legal rights and responsibilities
- assessing the work environment to identify risks and vantage points
- monitoring environmental factors to maintain operational safety and security and recognise changing circumstances
- formulating and implementing security response measures that maximise safety and security
- reporting and preserving incident scenes.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the	Performance criteria describe what needs to be done to
-----------------------	--

essential outcomes.	demonstrate achievement of the element.
1. Prepare for security operation.	<p>1.1 Review work instructions and workplace procedures and policies including WHS to ensure compliance with legal rights and responsibilities.</p> <p>1.2 Use interpersonal techniques with relevant persons to develop, support and promote confidence.</p> <p>1.3 Select and organise security equipment required to meet work instructions.</p> <p>1.4 Assess work environment to locate access and entry points, emergency equipment and facilities, and to identify security vantage points.</p>
2. Monitor environment to maintain operational safety and security.	<p>2.1 Monitor environmental factors and security equipment to maintain situational awareness and promptly recognise changing circumstances.</p> <p>2.2 Gather and receive information from others in the work area using communication that is courteous and professional and which accounts for individual social and cultural differences.</p> <p>2.3 Conduct regular and systematic personal safety checks, and take corrective actions as required to maintain operational safety and security.</p> <p>2.4 Communicate regularly with relevant persons to give instructions and exchange up-to-date operational information in accordance with workplace requirements.</p>
3. Formulate and carry out response to security risk situation.	<p>3.1 Identify security risk situation and assess degree of risk to self, others, property and premises.</p> <p>3.2 Formulate security response appropriate to assessed risk level, and which maximises the safety and security of self, others, property and premises.</p> <p>3.3 Implement security risk control procedures and adjust response to adapt to changing circumstances.</p> <p>3.4 Promptly seek specialist assistance or advice as required to maintain operational safety and security.</p>
4. Finalise security operation.	<p>4.1 Finalise security response, record details of risk and response procedures undertaken, and preserve incident scene.</p> <p>4.2 Report operational outcomes to relevant persons.</p> <p>4.3 Complete and securely maintain operational documentation in accordance with workplace requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to use security industry approved communication terminology, codes and signals
- writing skills to:
  - maintain operational documentation
  - complete routine reports and forms
- reading skills to interpret:
  - workplace procedures and policies that clarify legal rights and responsibilities and WHS requirements
  - information and instructions written in English, such as directional signs and emergency procedures
- speaking and listening skills to:
  - use questions to clarify and verify spoken security risk information
  - communicate to give instructions
- numeracy skills to estimate time required to carry out operational tasks
- problem solving skills to:
  - formulate response options to match security risk situation
  - evaluate and adjust security response measures to meet changing risk circumstances
  - recognise security risk situations requiring specialist assistance
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3007A Maintain security of environment.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3102 Maintain operational safety and security of work environment

## Modification History

Release 1.

Supersedes and equivalent to CPPSEC3007A Maintain security of environment.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must maintain operational safety and security of the work environment for three separate security operations involving, in each operation, different security risk situations.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when maintaining operational safety and security of the work environment:
  - anti-discrimination and diversity
  - counter terrorism
  - crowd control and control of persons under the influence of intoxicating substances
  - duty of care
  - limits of own authority
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- chain of command relevant to security operation
- crowd behaviour, dynamics and movement patterns that can threaten security
- current national terrorism threat level and context
- factors that may indicate escalation of conflict or risk and situations requiring specialist assistance
- methods of restraint and associated effects including causes and signs and symptoms of asphyxia
- negotiation techniques and how they can be used to defuse and resolve conflict
- premises emergency and evacuation procedures
- premises site layout

- procedures for communicating and collaborating with emergency services
- process of dynamic risk assessment and how it is applied
- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
- general features of improvised explosive devices and recommended incident response
- site emergency and evacuation plan and procedures
- the phonetic alphabet and how it is used
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- types of behaviours and non-verbal language that can escalate conflict or incite aggressive or hostile responses from others
- types of security risk situations that may be encountered during guarding operations and response options for each, including situations involving terrorism and bomb threats
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to maintain operational safety and security of work environment
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry

- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC3103 Determine and implement response to security risk situation

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3003A Determine response to security risk situation.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to determine and implement responses to security risk situations.

It includes:

- reviewing and complying with workplace procedures, policies and legal rights and responsibilities to implement security risk responses within specified legal and strategic limits and the scope of own competence and authority
- identifying and verifying security risk situations and exchanging information with others to clarify risk factors, assess risk and formulate response options appropriate to the degree of risk
- evaluating, selecting and implementing a preferred security response that maximise the safety and security of people, property and premises
- reporting, securing and preserving the incident scene.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Confirm, verify and communicate security risk situations.	<p>1.1 Review workplace procedures and policies including workplace health and safety (WHS) to ensure compliance with legal rights and responsibilities and own role and authority for responding to security risk situations.</p> <p>1.2 Receive and verify information on security risk situation and confirm risk authenticity, in consultation with relevant persons.</p> <p>1.3 Monitor the work environment to promptly identify changing circumstances and factors that may impact security risk.</p> <p>1.4 Maintain accurate and up-to-date information exchange to clarify risk situation with relevant persons.</p>
2. Assess security risk situations and formulate response options.	<p>2.1 Assess security risk situation to establish nature and degree of risk to people, property and premises.</p> <p>2.2 Formulate security risk response options that are appropriate to the nature and degree of risk and comply with workplace policies and procedures.</p>
3. Evaluate and implement security response.	<p>3.1 Evaluate security response options and select preferred control measure to address known and potential risk factors.</p> <p>3.2 Ensure that security response is within scope of own competence and authority and maximises the safety and security of people, property and premises.</p> <p>3.3 Select and use equipment and resources to implement security response.</p> <p>3.4 Review and adjust security response to adapt to changing risk circumstances in consultation with relevant persons.</p> <p>3.5 Report security situation and response details using workplace documentation.</p> <p>3.6 Secure and preserve incident scene and maintain security following response procedures.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to use security industry approved communication terminology, codes and signals

- writing skills to record and describe security situations and responses
- reading skills to interpret:
  - workplace procedures and policies that clarify legal rights and responsibilities
  - signs written in English
- speaking and listening skills to:
  - use questions to clarify and verify spoken security risk information
  - give clear, sequenced instructions and reports
- numeracy skills to calculate time when recording incident details
- problem solving skills to:
  - formulate response options to match security risk situation
  - evaluate and adjust security response measures to meet changing risk circumstances
  - recognise security risk situations requiring specialist assistance
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

# CPPSEC3104 Coordinate monitoring and control of individual and crowd behaviour

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC2010A Protect safety of persons.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to coordinate monitoring and control of individual and crowd behaviour.

It includes:

- assessing and controlling potential threats and security risks associated with site layout and monitoring individual and crowd behaviour and movement
- implementing security response procedures to control risk, remove immediate threat and seek assistance
- recording, reporting and reviewing work outcomes to identify procedural improvements.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Confirm work	1.1 Review work instructions and workplace policies and

<p>and legal requirements for monitoring and controlling individual and crowd behaviour.</p>	<p>procedures and clarify requirements in consultation with relevant persons.</p> <p>1.2 Clarify legal rights, reporting chain of command, roles and responsibilities with relevant persons.</p>
<p>2. Prepare to oversee monitoring and control of individual and crowd behaviour.</p>	<p>2.1 Maintain personal dress and presentation to meet work instructions and workplace standards for appearance.</p> <p>2.2 Check resources and equipment for operational effectiveness following manufacturers' instructions, and rectify or report faulty and damaged equipment.</p> <p>2.3 Assess site layout including access and exit points, barriers and thoroughfares, and identify strategic observation points to monitor crowd movement and behaviour.</p> <p>2.4 Assess potential threats and security risks and provide clear response instructions to team members to maintain safety and security.</p>
<p>3. Oversee monitoring of individual and crowd behaviour.</p>	<p>3.1 Use communication equipment to exchange up-to-date situational information with team members and conduct regular and systematic personal safety checks.</p> <p>3.2 Monitor individual and crowd behaviour and movement and assess risk associated with changing circumstances.</p> <p>3.3 Identify persons behaving in a potentially disruptive manner and assess degree of risk to self, others, premises and property.</p> <p>3.4 Intervene early to explain legal rights and responsibilities and behavioural expectations for subject of threat to remain in the work area.</p>
<p>4. Oversee control of individual and crowd behaviour.</p>	<p>4.1 Act promptly to respond to threat and negotiate alternative strategies to de-escalate risk level.</p> <p>4.2 Apply security response procedures that minimise use of force and maximise safety and security of persons, premises and property.</p> <p>4.3 Use defensive techniques where reasonable to control person and remove immediate threat.</p> <p>4.4 Use communication equipment to request assistance from relevant persons.</p> <p>4.5 Monitor subject of threat and provide assistance to ensure their ongoing safety and wellbeing.</p>
<p>5. Report and review individual and</p>	<p>5.1 Record and report outcomes and observations of individual and crowd monitoring activities using workplace documentation.</p>

crowd monitoring and control outcomes.	5.2 Facilitate review and debrief of individual and crowd monitoring and control outcomes to identify procedural improvements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to use security industry approved communication terminology, codes and signals
- writing skills to:
  - use a variety of expressions and sentence structures to provide factual information and express opinions when recording incident observations
- reading skills to interpret:
  - work instructions and roles and responsibilities
  - procedures and policies that clarify legal rights and responsibilities
- speaking and listening skills to:
  - use questions to clarify and verify spoken information when clarifying roles and reporting chain of command
  - use a radio to give clear, sequenced instructions to team members and people in crowds
- numeracy skills to estimate time required to carry out work tasks
- problem solving skills to:
  - assess potential threats and security risks
  - formulate response options to match security threat
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC2010A Protect safety of persons.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3104 Coordinate monitoring and control of individual and crowd behaviour

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC2010A Protect safety of persons.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must on two separate occasions and at different sites, coordinate monitoring and control of individual and crowd behaviour. On each occasion the person must prepare documented outcomes and observations of individual and crowd monitoring activities that identify at least one procedural improvement.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- workplace policies and procedures and client policies that ensure compliance with legal rights and responsibilities when coordinating the monitoring and control of individual and crowd behaviour:
  - anti-discrimination and diversity
  - apprehension, arrest and restraint of persons
  - counter terrorism
  - crowd control and control of persons under the influence of intoxicating substances
  - duty of care
  - limits of own authority
  - right of entry under common law
  - trespass and the removal of persons
  - use of force
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- basic principles of effective leadership
- crowd behaviour, dynamics and movement patterns that can threaten security
- current national terrorism threat level and context
- how negotiation techniques can be used to defuse and resolve conflict

- measures to prevent crushing in mass gatherings
- procedures for communicating and collaborating with emergency services
- process of dynamic risk assessment and how it is applied
- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
  - general features of improvised explosive devices and recommended incident response
- right of entry rules for work area
- security risks posed by crowds and mass gatherings
- signs of intoxication
- signs and symptoms of restraint asphyxia
- signs that a person is drug-affected
- site emergency and evacuation plans and procedures
- site layout, including entrances, exits, first-aid points and potential hazards
- the phonetic alphabet and how it is used
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- types of behaviours and non-verbal language that can escalate conflict
- understanding of the force model
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in an operational workplace environment or environment that reflects workplace conditions. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to coordinate monitoring and control of individual and crowd behaviour
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC3105 Coordinate provision of quality security services to clients

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3006A Coordinate a quality security service to clients.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to coordinate provision of quality security services to a range of clients.

It includes:

- clarifying work instructions, procedures and policies to deliver quality client services that satisfy specific client needs and preferences
- using interpersonal techniques and negotiation to offer service options that meet client requirements
- monitoring services and implementing contingency measures to maintain client satisfaction and negotiate resolution of conflict or client complaints
- using interview and survey techniques to gather feedback on client service satisfaction and identifying and implementing service improvements.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Identify client needs and service preferences.	<p>1.1 Review workplace policies and procedures to ensure compliance with legal rights and responsibilities when providing services to a range of clients.</p> <p>1.2 Use interpersonal techniques to discuss and clarify client service preferences, needs and expectations.</p> <p>1.3 Provide client with information about security services and systems to meet their specific needs, and assist client to select preferred option.</p> <p>1.4 Recognise personal limitations that may impede the provision of required client services and seek assistance from relevant persons.</p>
2. Deliver quality client service.	<p>2.1 Review and follow work instructions to provide client services.</p> <p>2.2 Identify client's special requirements and adjust service to meet their needs.</p> <p>2.3 Anticipate service problems or delays and promptly implement contingency arrangements to maintain client satisfaction.</p> <p>2.4 Maintain communication with client and monitor service provision to provide up-to-date information and respond to changing circumstances.</p> <p>2.5 Use negotiation to resolve conflict and client complaints, and report issues to relevant persons.</p>
3. Review and improve client service.	<p>3.1 Seek regular feedback from clients to ascertain their satisfaction with service provision using interview and survey techniques.</p> <p>3.2 Analyse client feedback in consultation with relevant persons and identify improvements to future service provision.</p> <p>3.3 Record and implement agreed improvements to client service procedures.</p> <p>3.4 Securely maintain client records according to legislative and workplace requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to use security industry approved terminology
- writing skills to prepare routine reports and maintain client records using information technology such as a computer and software to send email communications
- reading skills to interpret:
  - procedures and policies that clarify legal rights and responsibilities and client service standards
  - information and instructions written in English
- speaking and listening skills to:
  - use questions and paraphrasing to clarify client needs
  - use negotiation to resolve client complaints and conflict
  - orally report client service information and issues, face-to-face and using a radio or phone
- numeracy skills to estimate time required to meet client service requirements
- problem solving skills to:
  - select client services to meet client needs and expectations
  - adjust service to meet changing circumstances or client needs
  - identify areas where client service can be improved
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC3006A Coordinate a quality security service to clients.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3105 Coordinate provision of quality security services to clients

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3006A Coordinate a quality security service to clients.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must coordinate provision of quality security services to three different clients.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when coordinating the provision of security services to clients:
  - anti-discrimination and diversity
  - duty of care
  - limits of own authority
  - privacy and confidentiality
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- how to read and use non-verbal communication to gain the confidence of others
- interpersonal techniques that promote positive interactions and communication with clients
- limits of own responsibility and authority
- methods for complying with privacy and confidentiality regulations when gathering, presenting and storing client information
- negotiation techniques and how they can be applied to resolve conflict
- organisational client service standards
- procedures and standards for reporting to clients
- questioning techniques that can be used to elicit specific information on client needs and preferences

- rights and responsibilities of different types of clients
- techniques for gathering and analysing client feedback using interviews and surveys
- types of security clients and available services and security systems to meet their needs
- uniform and personal grooming requirements to maintain a professional image
- ways that individual and social differences may be expressed
- ways to engage people with individual social and cultural differences and strategies for overcoming language barriers.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to coordinate the provision of quality security services to clients
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC3106 Gather, organise and present security information and documentation

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3005A Prepare and present security documentation and reports.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to gather, organise and present security information and documentation. It includes:

- collecting and validating security information using factual and surveillance methods and information technologies
- presenting gathered security information into a documented report within required timeframes
- technology skills to access, store, study, retrieve, transmit and manipulate data or information.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
---	--

<p>1. Gather security information.</p>	<p>1.1 Review and clarify work instructions and workplace procedures and policies to ensure compliance with legal rights and responsibilities when gathering, organising and presenting security information and documentation.</p> <p>1.2 Collect required security information from spoken, observed and written sources.</p>
<p>2. Organise and check security information.</p>	<p>2.1 Assess gathered security information to confirm validity, reliability and relevance.</p> <p>2.2 Identify omissions and source additional information from established sources.</p> <p>2.3 Review collected security information to confirm completeness and accuracy to meet work instructions.</p> <p>2.4 Prioritise and organise information in a logical manner that facilitates analysis and dissemination.</p>
<p>3. Edit and present security information and documentation.</p>	<p>3.1 Prepare draft security documentation and edit content to ensure it contains clear and concise language and accurate information.</p> <p>3.2 Review draft, and seek and incorporate feedback from relevant persons.</p> <p>3.3 Finalise security documentation and check that it complies with workplace standards for style, format and accuracy.</p> <p>3.4 Present final security documentation within designated timeframes to meet work instructions.</p> <p>3.5 File and securely store retained information in a manner that facilitates future retrieval and maintains confidentiality.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to use security industry approved terminology
- writing skills to:
- prepare security documentation using information technology such as a computer and software to send email communications
  - select and integrate security information to complete a range of formatted texts and forms
  - use concise and factual notes to record information gained from spoken sources such as voice recordings and interviews

- sequence security information to present cohesive text
- reading skills to interpret:
  - procedures and policies that clarify legal rights and responsibilities
  - information and instructions written in English
  - security information provided in different formats and contexts including medical reports
- speaking and listening skills to:
  - use questions to clarify the meaning and accuracy of security information
  - use paraphrasing to check understanding of information gathered from spoken sources
- numeracy skills to interpret and calculate security data in numerical format
- problem solving skills to:
  - edit own work to identify and correct omissions and errors
  - validate accuracy and sources when gathering information using the Internet
- technology skills to use a range of common information technologies to access, store, study, retrieve, transmit and manipulate data or information, for example mobile phones and devices, and computer and software packages including Internet browsers.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC3005A Prepare and present security documentation and reports.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3106 Gather, organise and present security information and documentation

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3005A Prepare and present security documentation and reports.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must, within required timeframes, develop two written reports to present gathered security information to meet the requirements of different work instructions.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when gathering, organising and presenting security information and documentation:
  - anti-discrimination and diversity
  - duty of care
  - limits of own authority
  - privacy and surveillance
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- basic research techniques that can be used to gather security information
- interpersonal techniques that promote positive interactions and communication with others
- interview techniques used to gather security information
- methods for complying with privacy and confidentiality regulations when gathering, presenting and storing security information
- methods for recording and reporting incidents
- observation and monitoring techniques used to gather security information
- operational functions of a range of information technologies used to gather, organise and present security information
- protocols and requirements for presenting evidence in court

- questioning techniques that can be used to elicit specific information
- requirements for recording information that is factual and can be used as evidence in court
- surveillance procedures that comply with legal requirements
- techniques for validating the accuracy and reliability of security information
- ways to engage people with individual social and cultural differences and strategies for overcoming language barriers
- workplace standards for the presentation of security information and documentation.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in an operational workplace environment or environment that reflects workplace conditions. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to gather, organise and present security information and documentation
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- information technologies required to gather, organise and present security information and documentation
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC3107 Monitor security and coordinate response from control rooms

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3020A Monitor security from control room.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to monitor security and coordinate a field response from within a control room.

It includes:

- checking security systems and equipment for correct operation and cross-checking consistent information exchange with companion monitoring systems
- monitoring security, interpreting information and alarms, assessing risk and deploying field staff for security response
- conducting regular and systematic checks with field staff to provide information and directions and assistance
- carrying out change of shift procedures, updating security databases and completing documentation.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the	Performance criteria describe what needs to be done to
-----------------------	--

essential outcomes.	demonstrate achievement of the element.
1. Prepare for control room operations.	<p>1.1 Review workplace procedures and policies to ensure compliance with legal rights and responsibilities when conducting control room operations.</p> <p>1.2 Clarify operational information in consultation with relevant persons.</p> <p>1.3 Check security system and equipment to confirm correct operation following manufacturers' instructions.</p> <p>1.4 Identify system or equipment faults or malfunctions and rectify or report for remedial action in accordance with workplace requirements.</p> <p>1.5 Cross-check systems and equipment with companion monitoring systems and confirm accurate and consistent information exchange.</p>
2. Monitor security and deploy field staff.	<p>2.1 Operate and monitor security systems and equipment to maintain security.</p> <p>2.2 Receive and interpret security information and alarm, and assess incident nature and risk.</p> <p>2.3 Deploy field staff to carry out security response proportionate to the nature of incident and risk.</p> <p>2.4 Conduct regular and systematic checks with field staff to provide information and directions and to maintain security.</p> <p>2.5 Respond promptly to irregular or non-responses from field staff to maintain safety and security of people, property and premises.</p>
3. Finalise control room operations and complete documentation.	<p>3.1 Carry out change of shift procedures ensuring monitoring and system continuity.</p> <p>3.2 Update security database following workplace procedures.</p> <p>3.3 Complete and securely maintain workplace documentation in accordance with workplace requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to use security industry approved communication terminology, codes and signals
- writing skills to:

- maintain workplace documentation
- complete routine reports and forms
- reading skills to interpret:
  - procedures and policies that clarify legal rights and responsibilities
  - technical information contained in manufacturers' instructions
  - visual information contained in closed circuit television (CCTV) screens and security cameras
- speaking and listening skills to:
  - use questions to clarify and verify spoken security information
  - use communication equipment to give clear, sequenced instructions and information when deploying field staff
- numeracy skills to estimate time and resources required to carry out operational tasks
- problem solving skills to:
  - formulate response options to match alarm or security risk situation
  - rectify equipment or system malfunctions
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others
- technology skills to input, manipulate, retrieve and store electronic data in a variety of formats including databases.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC3020A Monitor security from control room.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3107 Monitor security and coordinate response from control rooms

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3020A Monitor security from control room.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must monitor security and coordinate response from control rooms to four alarm events covering different risk scenarios in each event.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when monitoring security and coordinating a response from a control room:
  - casinos and gaming
  - counter terrorism
  - duty of care
  - information privacy and confidentiality
  - licensing requirements and limits of own authority
  - surveillance
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- chain of command relevant to control room operation
- communication formats relating to security systems (high speed, contact ID etc.)
- crowd behaviour, dynamics and movement patterns that can threaten security
- current national terrorism threat level and context
- difference between local and monitored alarms
- factors that may indicate escalation of conflict or risk and situations requiring specialist assistance

- operational principles of a range of security systems, equipment and software used in control rooms
- procedures for change of shift
- procedures for communicating and collaborating with emergency services
- procedures for deploying field staff to respond to security risks and alarms
- procedures for preparing, storing and retrieving surveillance footage
- process of dynamic risk assessment and how it is applied
- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
- general features of improvised explosive devices and recommended incident response
- range of security risk or incident situations and appropriate response procedures implemented from a control room
- roles and responsibilities of field staff
- signs of possible harassment or assault
- surveillance recording systems (digital and analogue) and interfaces
- the phonetic alphabet and how it is used
- types of computer operating systems used in a control room
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- types of detectors monitored from a control room including passive infrared sensor (PIR), and dual tech
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer. Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to monitor security and coordinate response from control rooms
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations
- a security control room with operational equipment and systems.

# CPPSEC3108 Store, protect and dispose of security information

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC3012A Store and protect information.

Significant changes made to the unit to reflect current industry needs.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to store, protect and dispose of security information, including evidence that may be used in future judicial proceedings.

It includes:

- storing information for future retrieval using methods that preserve and maintain data integrity
- monitoring information movement and security
- disposing of security information using appropriate disposal methods and maintaining records to track information disposal.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Collect, assess and record security	1.1 Review and apply workplace procedures and policies when storing, protecting and disposing of security information.

information.	<p>1.2 Collect security information and assess for accuracy and potential future use to meet client requirements.</p> <p>1.3 Clarify legal rights and responsibilities and apply to work tasks when protecting, storing and disposing of security information to meet client requirements with relevant persons.</p> <p>1.4 Use information technologies to label, register and record security information in accordance with workplace requirements.</p>
2. Store security information for future retrieval.	<p>2.1 Assess storage requirements and address factors that may impact on the safety of stored information in consultation with relevant persons.</p> <p>2.2 Store security information using methods that are appropriate to the required storage timeframe, that preserve information integrity and condition, and that prevent loss.</p> <p>2.3 Safely store security information for future analysis, dissemination and use in accordance with workplace requirements.</p> <p>2.4 Establish and maintain continuity logs to monitor information movement and security.</p>
3. Dispose of security information.	<p>3.1 Verify authorisation, with relevant persons, to dispose of security information.</p> <p>3.2 Assess type of security information and select appropriate disposal method.</p> <p>3.3 Dispose of security information using legal disposal methods.</p> <p>3.4 Complete and securely maintain records to track information disposal in accordance with workplace requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to use security industry approved terminology
- writing skills to label, register and record security information and continuity logs, using information technology and using concise and factual data
- reading skills to interpret:
  - procedures and policies that clarify legal rights and responsibilities
  - security information and evidence in a range of written, digital and diagrammatic or pictorial formats, such as film, photos, legal documents and text messages
- speaking and listening skills to:

- use questions and active listening to clarify and discuss factors that may impact on the safety of stored information
- use paraphrasing to check understanding when verifying authorisation to dispose of security information
- interpret information contained in audio files
- numeracy skills to interpret and calculate security data in numerical format
- problem solving skills to:
  - validate the accuracy of security information
  - assess potential future use of security information
  - select storage methods that are suitable for the preservation requirements of different types of security information
  - select information disposal methods
- technology skills to use a range of common information technologies to access, store, study, retrieve, transmit and manipulate data and information.

## Unit Mapping Information

Supersedes and is non-equivalent to CPPSEC3012A Store and protect information.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3108 Store, protect and dispose of security information

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC3012A Store and protect information.

Significant changes made to the unit to reflect current industry needs.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must store, protect and dispose of security information for two different security assignments. For each assignment, the person must use information technology to collect, assess, record, store and successfully retrieve in its original condition the following types of security information:

- two audio files
- two digital images
- two hard copy documents
- two text messages
- two emails.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when storing, protecting and disposing of security information:
  - anti-discrimination and diversity
  - duty of care
  - limits of own authority
  - privacy and surveillance
  - workplace health and safety (WHS)
- approved communication terminology used in the security industry
- basic research techniques that can be used to collect and assess security information
- different types and formats of security information and evidence that require storage and preservation and may be used in future judicial proceedings
- factors that may impact on the safety of stored security information
- interpret security information provided in different formats and contexts

- legal methods for disposing of different types of security information and evidence
- methods for complying with privacy and confidentiality regulations when collecting, storing and disposing of security information
- operational functions of a range of information technologies used to collect, store, record, retrieve and dispose of security information in a range of formats
- procedures for verifying authorisation to dispose of security information
- storage and preservation methods for a range of security information and evidence formats that:
  - are appropriate to the required storage timeframe
  - are suitable for the effective retention and preservation of information in original condition
  - prevent cross contamination
  - prevent damage
  - prevent interference or tampering
  - prevent theft
- techniques for establishing and maintaining continuity logs to monitor information movement and security
- techniques for validating the accuracy and reliability of security information.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in an operational workplace environment or environment that reflects workplace conditions. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to store, protect and dispose of security information
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- information technologies required to gather, organise and present security information and documentation

- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC3109 Use and maintain security databases and compile reports

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC3021A Maintain and use security database.

Significant changes made to the unit to reflect current industry needs

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to use and maintain security databases and compile reports.

It includes:

- setting up hardware, software, databases and information systems
- using and maintaining security databases and a broad range of database functions
- monitoring and reviewing database performance and effectiveness and using feedback to implement improvements
- compiling data in the required reporting format and checking accuracy, compatibility and reliability.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
---	--

<p>1. Establish security database and systems.</p>	<p>1.1 Review workplace procedures and policies to ensure compliance with legal rights and responsibilities when maintaining and using security databases.</p> <p>1.2 Set up workstation to comply with ergonomic considerations and use work processes that conserve resources.</p> <p>1.3 Use software and hardware to meet data requirements following manufacturers' specifications.</p> <p>1.4 Monitor and regularly update virus protection software to ensure continuous data integrity and protection.</p> <p>1.5 Confirm data access, security and storage requirements and set up systems to ensure data security and confidentiality.</p> <p>1.6 Set up and follow regular housekeeping, maintenance and back-up procedures.</p> <p>1.7 Implement stand-by database and alternative strategies to address operational faults and deficiencies in database systems.</p>
<p>2. Use and maintain security database.</p>	<p>2.1 Confirm and comply with data entry, output and presentation requirements to meet work instructions.</p> <p>2.2 Obtain data from verifiable sources and check for variations in data quality.</p> <p>2.3 Use database functions to input verified data, check data accuracy and quality, and rectify errors.</p> <p>2.4 Diagnose and report errors and lags in data processing or information discrepancies.</p> <p>2.5 Identify faults requiring specialist assistance and organise repairs in consultation with relevant persons.</p> <p>2.6 Monitor database performance and identify and implement measures to improve content, interfaces and effectiveness in consultation with relevant persons.</p>
<p>3. Compile report and improve database and systems.</p>	<p>3.1 Produce report in the required format, and check content to confirm accuracy and data compatibility and reliability.</p> <p>3.2 Request and use feedback to improve the effectiveness and performance of database and systems.</p> <p>3.3 Store and protect security data, and complete and maintain documentation with due regard to confidentiality in accordance with workplace requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- writing skills to:
  - produce reports using information technology such as a computer and software
  - collate and present data in a logical and sequential manner
- reading skills to interpret:
  - procedures and policies that clarify legal rights and responsibilities
  - manufacturers' instructions to correctly set up hardware and database systems
  - security data that may be technical and numerical in nature, such as database formulae and queries
- speaking and listening skills to:
  - use questions and active listening to clarify and discuss system faults
  - use paraphrasing to check understanding when receiving spoken feedback to improve systems
- numeracy skills to:
  - interpret and calculate statistical information
  - use simple mathematical formulae within databases
- problem solving skills to:
  - verify the accuracy of security data
  - recognise variations in data quality
  - troubleshoot system problems and identify faults
- technology skills to:
  - use a range of common information technologies to access, store, study, retrieve, transmit and manipulate data and information, for example computer and software packages involving spreadsheets
  - type and use a keyboard to enter data.

## Unit Mapping Information

Supersedes and is non-equivalent to CPPSEC3021A Maintain and use security database.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3109 Use and maintain security databases and compile reports

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC3021A Maintain and use security database.

Significant changes made to the unit to reflect current industry needs

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must use and maintain security databases to compile reports to meet the requirements of two different security assignments.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when using and maintaining security databases and compiling reports:
  - anti-discrimination and diversity
  - duty of care
  - limits of own authority
  - privacy and surveillance
  - workplace health and safety (WHS)
- backup and recovery methodologies used for security databases and systems
- basic research techniques that can be used to verify sources of security data
- data analysis techniques
- data entry procedures and processes
- database administration, security and storage requirements
- database functions and diagnostic tools
- methods for complying with privacy and confidentiality regulations when collecting, storing and disposing of security information
- methods for conserving energy and resources when using information technologies and their outputs
- methods for ensuring workstation meets ergonomic requirements
- presentation and reporting formats used for security data
- techniques for creating queries and formulae to analyse and process security data

- types of database software and hardware and their uses.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to use and maintain security databases and compile reports
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- information technologies required to gather, organise and present security information and documentation
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

## CPPSEC3110 Control persons using batons

### Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3014A Control persons using baton.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

### Application

This unit specifies the skills and knowledge required to control persons using batons.

It includes:

- following correct procedures for drawing and holding batons and adopting stance and tactical positioning
- using negotiation techniques to defuse conflict, and direct and restrain a person
- using a baton to apply defensive strikes to target areas of the body, and avoiding vital areas and monitoring the wellbeing of the subject
- reviewing and evaluating the effectiveness of the response to identify improved practices.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

### Pre-requisite Unit

Nil

### Unit Sector

Security operations

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Confirm legal requirements and	1.1 Review workplace policies and procedures including WHS to ensure compliance with legal rights and responsibilities when

<p>assess need to use baton.</p>	<p>using batons for security work.</p> <p>1.2 Assess need to present baton against known information and potential and existing risks and threats.</p>
<p>2. Confirm personal safety needs and draw baton.</p>	<p>2.1 Select and use PPE to meet WHS requirements.</p> <p>2.2 Check and confirm personal safety needs and identify withdrawal options.</p> <p>2.3 Draw baton in a non-threatening manner while maintaining eye contact with subject.</p> <p>2.4 Hold baton according to type, and maintain a secure grip to ensure continuous control.</p> <p>2.5 Adopt stance that is confident, assertive, balanced and allows for tactical positioning.</p>
<p>3. Direct person using baton.</p>	<p>3.1 Use interpersonal techniques to exchange information with the subject and negotiate to defuse conflict and aggression.</p> <p>3.2 Clearly and assertively advise subject of intention to use baton.</p> <p>3.3 Use baton to restrain person and adjust response to minimise force while preventing continued aggressive behaviour.</p>
<p>4. Apply defensive strikes using baton.</p>	<p>4.1 Continually observe subject to anticipate movement and aggression.</p> <p>4.2 Strike baton ensuring contact with the subject is minimised and avoids vital areas of the body.</p> <p>4.3 Restrict baton strikes to target areas of hands, arms, lower abdomen, legs or feet.</p> <p>4.4 Control and limit force of strike to prevent continued or escalated aggression, and discontinue baton use immediately when threat ceases or decreases.</p> <p>4.5 Monitor wellbeing of subject and provide first aid and seek immediate assistance as required from relevant persons.</p> <p>4.6 Use communication equipment to report incident details to relevant persons.</p>
<p>5. Finalise and evaluate response.</p>	<p>5.1 Review and evaluate effectiveness of baton response against incident circumstances and observations, in consultation with relevant persons.</p> <p>5.2 Identify improvements to future security response procedures using batons.</p> <p>5.3 Inspect condition of baton and report identified faults.</p> <p>5.4 Complete incident report and securely maintain</p>

	documentation in accordance with workplace requirements. 5.5 Recognise effects of stress and manage own well-being using stress-management techniques.
--	---

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information or advice in a form that is preferred and understood by the receiver and engages minority groups
- writing skills to:
  - record and describe incident observations and actions taken
  - complete routine reports and forms
- reading skills to interpret workplace procedures and policies that clarify legal rights and responsibilities
- speaking and listening skills to:
  - use questions and active listening to exchange and understand information with subject
  - control tone of voice when negotiating with the subject
  - give clear and succinct spoken warnings and directions when negotiating with the subject
  - use a radio to give clear and sequenced information when reporting incident details
- numeracy skills to estimate distance when adopting stance and tactical positioning
- problem solving skills to:
  - formulate response options to match nature of risk
  - target baton strikes and avoid vital areas of the body
  - recognise situations requiring the need to call emergency services.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC3014A Control persons using baton.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3110 Control persons using batons

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3014A Control persons using baton.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must control persons using batons in three different threat situations involving persons holding weapons.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when controlling persons using batons:
  - anti-discrimination and diversity
  - apprehension, arrest and restraint of persons
  - duty of care
  - licensing requirements and limits of own authority
  - trespass and the removal of persons
  - use of force
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- arrest and control techniques using batons
- basic negotiation techniques
- blocking techniques using batons
- first aid procedures and their application
- methods of restraint and associated effects, including signs of positional asphyxiation
- procedures for communicating with emergency services personnel
- procedures for effecting an arrest
- process of dynamic risk assessment and how it is applied
- response options using batons that are within specified legal limits
- signs that a person may be suffering from emotional or physical distress

- signs that a person may be suffering from mental illness
- signs that a person may be under the influence of intoxicating substances
- stances and grips to be adopted when using baton
- target (strike) areas of the body (hands, arms, legs and feet)
- techniques for drawing batons
- types and uses of personal protective equipment (PPE) required when using batons
- types of batons and holds and grips associated with each
- types of injuries that can be incurred from baton strike including fractures, shock and bleeding
- understanding of the force model
- vital areas of the body and reasons they are to be avoided (head, neck, throat, spine, tailbone, chest, kidney and liver, clavicle and collar bone)
- ways in which social and cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to control persons using batons
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry including:
  - a baton
  - weapon props to enable achievement of the performance evidence
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC3111 Restrain persons using handcuffs

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3015A Restrain persons using handcuffs.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to restrain persons using handcuffs.

It includes:

- identifying and assessing the need to use handcuffs, confirming personal safety needs including personal protective equipment (PPE) and monitoring and observing the subject to approach allowing a safe defensive distance
- applying handcuffs using appropriate pressure, checking that they are locked and can be unlocked, and minimising physical contact and humiliation or indignity that may be suffered by the subject
- using communication to give directions and warnings, and removing handcuffs in a manner that maintains control of the subject.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
---	--

<p>1. Prepare to use handcuffs.</p>	<p>1.1 Review workplace procedures and policies including WHS to ensure compliance with legal rights and responsibilities when using handcuffs for security work.</p> <p>1.2 Check handcuffs to ensure correct operation and report malfunctions.</p> <p>1.3 Select and use PPE to meet WHS requirements.</p>
<p>2. Assess need to use handcuffs</p>	<p>2.1 Assess need to use handcuffs against known information and potential and existing risks and threats.</p> <p>2.2 Monitor and observe movement and actions of subject and use approach that allows a safe defensive distance.</p> <p>2.3 Adjust response to minimise force and prevent continued aggressive behaviour.</p>
<p>3. Apply handcuffs with sensitivity to subject's needs.</p>	<p>3.1 Use interpersonal techniques to exchange information with the subject, negotiate to defuse conflict and aggression, and warn of intention to use handcuffs.</p> <p>3.2 Identify situations requiring assistance and use communication equipment to seek support from relevant persons.</p> <p>3.3 Apply handcuffs using appropriate pressure, and minimising physical contact, and humiliation or indignity suffered by the subject.</p> <p>3.4 Check that handcuffs are secure after application, and can be removed in the event of an emergency.</p>
<p>4. Direct and detain subject.</p>	<p>4.1 Direct subject to a seated or standing position that maximises control and opportunities for detention, and ensures their wellbeing.</p> <p>4.2 Monitor subject to ensure their safety and wellbeing, and ascertain their intention to comply with instructions.</p> <p>4.3 Give clear and succinct spoken warnings and directions to indicate intention to remove handcuffs, and maintain control of detained subject.</p>
<p>5. Finalise and evaluate response.</p>	<p>5.1 Review and evaluate effectiveness of response using handcuffs against incident circumstances and observations, in consultation with relevant persons.</p> <p>5.2 Identify improvements to future security response procedures where subjects are restrained using handcuffs.</p> <p>5.3 Inspect condition of handcuffs and report identified faults.</p> <p>5.4 Complete and securely maintain workplace documentation in accordance with workplace requirements.</p>

	5.5 Recognise effects of stress and manage own well-being using stress management techniques.
--	---

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information or advice in a form that is preferred and understood by the receiver and engages minority groups

# CPPSEC3112 Manage training and well-being of dogs for security functions

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3010A Manage dogs for security functions.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to manage the training and well-being of dogs used for security functions.

It includes:

- applicable legislative and organisational, animal welfare and licensing requirements relevant to handling guard dogs
- identifying and assessing the needs of the dog and handler team, and inspecting canine breeds to select a dog suitable for the security role
- developing and implementing a training maintenance plan to meet the performance objectives of the dog and handler team
- maintaining the dog's health and well-being including cleaning and maintaining its facilities and equipment.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the	Performance criteria describe what needs to be done to

essential outcomes.	demonstrate achievement of the element.
1. Select dog for security role.	<p>1.1 Review workplace procedures and policies including WHS to ensure compliance with legal rights and responsibilities when managing security dogs.</p> <p>1.2 Identify and assess needs of security dog and handler team.</p> <p>1.3 Inspect appropriate canine breeds and select suitable dog to meet security role.</p> <p>1.4 Check dog's health and training records and confirm suitability for security role.</p>
2. Develop dog and handler training maintenance plan.	<p>2.1 Develop a tailored training maintenance program to address the unique needs, strengths and weaknesses of the security dog and handler team.</p> <p>2.2 Schedule training to meet priority needs within an agreed timeframe.</p> <p>2.3 Update training plan to meet changing needs of security dog and handler team.</p>
3. Implement dog and handler maintenance training.	<p>3.1 demonstrate dog handling techniques which minimise risk to self, others and dog.</p> <p>3.2 Select and use suitable protective clothing and equipment and training aids.</p> <p>3.3 Conduct maintenance training according to schedule and timeframes.</p> <p>3.4 Assess the security dog's response to training and adjust methods to achieve team performance objectives.</p> <p>3.5 Complete training records using workplace documentation.</p>
4. Maintain dog's health and well-being.	<p>4.1 Monitor security dog's health and condition and immediately address identified needs and problems in consultation with relevant persons.</p> <p>4.2 Administer preventive health treatments and maintain a diet that meets security dog's nutritional requirements.</p> <p>4.3 Maintain security dog at a high level of fitness.</p> <p>4.4 Clean and maintain security dog's facilities and equipment to the required standard.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- writing skills to:
  - maintain security dog training records
  - document a training maintenance program
- reading skills to interpret:
  - procedures and policies that clarify legal rights and responsibilities and WHS requirements
  - security dog health and training records and information from the breeder
- speaking and listening skills to use questions and active listening to exchange and understand information when inspecting dogs
- numeracy skills to schedule and conduct training to meet timeframes
- problem solving skills to:
  - select a dog to match the requirements of the security role
  - formulate training exercises to meet dog and handler team objectives
  - identify symptoms of ill health and take necessary actions to maintain the well-being of dogs.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC3010A Manage dogs for security functions.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3112 Manage training and well-being of dogs for security functions

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3010A Manage dogs for security functions.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must manage the training and well-being of two dogs to ensure their competence to perform the following security functions:

- foot patrol
- assist with an arrest

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative, licensing and regulatory requirements when managing the training and well-being of dogs for security functions:
  - animal welfare
  - apprehension, arrest and restraint of persons
  - duty of care
  - licensing requirements and limits of own authority
  - trespass and the removal of persons
  - use of force
  - workplace health and safety (WHS)
- breeds, drives and behaviours of canines suitable for security work
- canine preventive health treatments and nutritional requirements
- canine training standards and procedures for the security context
- capabilities and limitations of a trained security dog
- common canine infections and contagious diseases
- kennel management including routine and emergency treatment of sick or injured dogs
- licensing and registration requirements for handling, using and owning security dogs
- methods to train dog to show aggression or bite with control and conditioning
- principles of continuation or maintenance training

- procedures for conducting a patrol with a security dog
- procedures for effecting an arrest using a security dog
- requirements for muzzle and tactical training of dogs
- risks and hazards associated with use, training and care of security dogs and appropriate control measures
- safe canine handling methods and techniques
- security roles and functions suitable for canines
- standards of cleanliness and safety relating to the dog's facilities and equipment
- standards of training for obedience and handler protection
- training maintenance exercises for dogs and handlers
- training methods to ensure dog can defend handler and not escalate risk.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to manage training and well-being of dogs for security functions
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations
- two security dogs to allow achievement of the performance criteria.

# CPPSEC3113 Handle dogs for security patrols

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3011A Handle dogs for security patrol.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to handle dogs while conducting a security patrol.

It includes:

- applicable legislative and organisational and licensing requirements relevant to handling guard dogs
- verifying the suitability of a dog to undertake patrol tasks
- handling and maintaining control of a dog while conducting a security patrol and assessing threat situations to determine appropriate use of the dog as a security measure
- applying the correct hold, release and arrest procedures to apprehend intruders.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Prepare for patrol with security	1.1 Review workplace procedures and policies to ensure compliance with legal rights and responsibilities when handling

dog.	<p>dog during security patrol.</p> <p>1.2 Interpret work instructions and clarify patrol requirements with relevant persons.</p> <p>1.3 Confirm security dog is suitable and trained to the standard required to meet patrol requirements</p> <p>1.4 Check health, hygiene and stability of dog, and take required remedial action where signs of poor health or abnormal behaviour are detected in accordance with animal welfare requirements.</p> <p>1.5 Organise and use personal protective equipment (PPE) and handling aids in accordance with workplace requirements.</p>
2. Conduct patrol with security dog.	<p>2.1 Carry out patrol tasks with security dog using safe handling methods.</p> <p>2.2 Handle security dog in a manner that ensures minimal risk of injury to the dog, self and members of the public.</p> <p>2.3 Monitor and maintain dog's operating efficiency and well-being throughout patrol.</p>
3. Identify and respond to security threat.	<p>3.1 apply general safety procedures to handle dogs, both leashed and unleashed in a security work environment.</p> <p>3.2 Identify security threat and assess degree of risk to persons, property and premises.</p> <p>3.3 Assess the threat situation to determine appropriate use of the dog as a security measure and implement response.</p> <p>3.4 Check personal safety needs and seek assistance as required.</p> <p>3.5 Apply hold, release and arrest procedures to apprehend intruder, ensuring minimal risk of injury to the dog, members of the public and self.</p> <p>3.6 Adjust or discontinue response promptly to meet changing circumstances while maintaining control of dog.</p> <p>3.7 Promptly attend to injuries to persons or the dog, and seek assistance from relevant persons as required.</p> <p>3.8 Record patrol and response details using documentation in accordance with workplace requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- writing skills to record patrol and response details using workplace documentation
- reading skills to interpret:
  - procedures and policies that clarify legal rights and responsibilities
  - work instructions that may be in written and diagrammatic formats
- speaking and listening skills to use questions and active listening to clarify patrol tasks and to effectively communicate with others, including emergency services
- numeracy skills to conduct patrol to meet required timeframes
- problem solving skills to:
  - verify the suitability of the dog's condition and training to meet patrol requirements
  - select security response options proportionate to the nature of risk
  - issue commands to a dog while responding to security threats.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC3011A Handle dogs for security patrol.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3113 Handle dogs for security patrols

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3011A Handle dogs for security patrol.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must handle a dog weighing a minimum of 30 kilograms (adult), leashed and unleashed, for three different security patrol functions:

- patrol a site or premises
- patrol in a crowd setting
- search a building.
- For each function, the person must:
- demonstrate correct hold, release and arrest procedures to apprehend an intruder whilst maintaining effective control of the dog.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative, license and regulatory requirements when handling dogs for security patrols:
  - animal welfare
  - apprehension, arrest and restraint of persons
  - duty of care relating to animals and persons
  - limits of own authority
  - trespass and the removal of persons
  - use of force
  - workplace health and safety (WHS)
- capabilities and limitations of a trained security dog
- hold, release and arrest procedures for apprehending intruders
- common canine infections and contagious diseases
- defensive tactics for use with and without dogs
- licensing and registration requirements in relation to the handling, use and ownership of dogs

- methods for inspecting baggage, vehicles and property using dogs
- methods to train dog to show aggression or bite with control and conditioning
- premises and property security requirements including search and confiscation procedures
- principles of continuation or maintenance training
- procedures for conducting a patrol with a security dog
- procedures for effecting an arrest using a security dog
- remedial action to be taken where the dog shows signs of poor health or abnormal behaviour
- requirements for use of muzzles
- risks and hazards associated with use, training and care of security dogs and appropriate control measures
- safe canine handling methods and techniques
- security roles and functions suitable for canines
- signs of poor health, hygiene and stability in a security dog.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to handle dogs for security patrols
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations
- a security dog to allow achievement of the performance evidence.

# CPPSEC3114 Control security risk situations using firearms

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3008A Control security risk situations using firearms.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to control security risk situations using a firearm.

It includes:

- reviewing and complying with work instructions, procedures, workplace policies and legal rights and responsibilities including workplace health and safety (WHS) to discharge a firearm in response to a life-threatening situation within specified legal and strategic limits
- selecting and using protective and communication equipment, firearm and ammunition to meet work instructions
- identifying security threats and assessing the need and opportunity to present a firearm, and formulating response options that allow for changing risk circumstances
- using firearm control and tactical positioning techniques, discharging the firearm with consistent accuracy, and unloading, inspecting and storing the firearm after use.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

### Note:

This unit requires appropriate permits to be obtained to conduct firearms training in some states and territories.

This unit does not result in a firearms licence or permit. Refer to the regulatory requirements of individual states and territories.

## Pre-requisite Unit

A learner must have achieved at least one of the three units of competency listed below, or a firearms training course approved in the relevant jurisdiction:

- CPPSEC3115 Carry, operate and maintain revolvers for security purposes
- CPPSEC3116 Carry, operate and maintain semi-automatic pistols for security purposes

- CPPSEC3117 Carry, operate and maintain shotguns for security purposes

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Prepare for security response using a firearm.	<p>1.1 Review work instructions to ensure compliance with workplace policies and legal rights and responsibilities when using a firearm to respond to a security risk situation.</p> <p>1.2 Select and use protective and communication equipment to meet work instructions and WHS requirements.</p> <p>1.3 Select firearm and conduct pre-operational checks to confirm safe and continuing operation of firearm.</p> <p>1.4 Obtain ammunition appropriate to type of firearm according to manufacturers' instructions.</p> <p>1.5 Load firearm with correct ammunition following manufacturers' specifications.</p> <p>1.6 Carry firearm in a manner that ensures it is secure, protected and accessible for security response.</p>
2. Identify need for security response and draw firearm.	<p>2.1 Identify security threat and assess need and opportunity to present firearm.</p> <p>2.2 Formulate response options that allow for changing risk circumstances.</p> <p>2.3 Identify personal safety needs and use communication equipment to request assistance from relevant persons.</p> <p>2.4 Negotiate with subject of threat to defuse conflict, and maintain communication that reflects sensitivity to individual social and cultural differences.</p> <p>2.5 Use interpersonal techniques to provide clear warnings and instructions that are legally justifiable.</p> <p>2.6 Draw firearm in a positive and controlled manner.</p>
3. Evaluate threat and response options and discharge firearm.	<p>3.1 Use personal positioning, stance and grip to maintain control of firearm.</p> <p>3.2 Continually monitor threat to assess risk and evaluate</p>

	<p>response options.</p> <p>3.3 Select response option that accounts for safety needs of self and others that may be at risk from firearm discharge.</p> <p>3.4 Use fluid tactical positioning to access available cover and protection during incident.</p> <p>3.5 Discharge firearm to respond to life-threatening situation when it is the only reasonable option to remove threat within legal and strategic limits.</p> <p>3.6 Maintain consistent accuracy when discharging firearm and react promptly to terminate force when threat ceases.</p>
<p>4. Finalise armed response and complete documentation.</p>	<p>4.1 Unload, inspect and store firearm, and report damage or faults.</p> <p>4.2 Review presentation and discharge of firearm against circumstances of incident.</p> <p>4.3 Identify improvements to procedures for future security response using firearms.</p> <p>4.4 Complete and securely maintain operational documentation in accordance with workplace requirements.</p> <p>4.5 Recognise effects of stress and manage own well-being using stress management techniques.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to:
  - provide instructions and warnings using structure and language to suit the audience and engage minority groups
  - use security industry approved communication terminology, codes and signals
- writing skills to:
  - record and describe incident observations and actions
  - complete routine reports and forms
- reading skills to interpret:
  - procedures and policies that clarify legal rights and responsibilities
  - technical information contained in manufacturers' instructions
- speaking and listening skills to:
  - use questions to clarify and verify spoken information
  - use a radio to give clear, sequenced information and request assistance

- numeracy skills to estimate time required to carry out operational tasks
- problem solving skills to:
  - formulate response options to match threat and risk situation
  - evaluate and adjust security response measures to meet changing risk circumstances
  - recognise security risk situations requiring specialist assistance
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## **Unit Mapping Information**

Supersedes and is equivalent to CPPSEC3008A Control security risk situations using firearms.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3114 Control security risk situations using firearms

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3008A Control security risk situations using firearms.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must control three different security risk situations using a firearm.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when controlling security risk situations using firearms:
  - anti-discrimination and diversity
  - apprehension, arrest and restraint of persons
  - carriage and use of firearms and weapons
  - counter terrorism
  - duty of care
  - licensing requirements and limits of own authority
  - use of force
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- approved course of fire and standard of accuracy
- chain of command relevant to security operation
- current national terrorism threat level and context
- factors that may indicate escalation of conflict or risk and situations requiring specialist assistance
- firearm retention techniques

- fundamentals of shooting including grip, stance, trigger control, sight alignment and picture, breathing and follow through
- legal consequences of pointing and discharging a firearm outside of an approved range
- negotiation techniques and how they can be used to defuse and resolve conflict and prevent discharge of firearm
- premises emergency and evacuation procedures
- procedures for communicating and collaborating with emergency services
- procedures for responding to multiple threats
- process of dynamic risk assessment and how it is applied
- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
  - general features of improvised explosive devices and recommended incident response
- techniques for safe handling, carriage, unloading and unloading firearm
- the phonetic alphabet and how it is used
- types of behaviours and non-verbal language that can escalate conflict or incite aggressive or hostile responses from others
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- types of security risk situations that may be encountered during armed assignments and appropriate responses
- understanding of the force model
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in an operational workplace environment or environment that reflects workplace conditions. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessment of performance must comply with jurisdictional regulatory requirements for conducting firearms training and assessment.

This unit must be assessed in conjunction with one of the following units of competency unless the person has already completed an approved firearms training course in the relevant jurisdiction and can provide appropriate supporting evidence:

- CPPSEC3115 Carry, operate and maintain revolvers for security purposes
- CPPSEC3116 Carry, operate and maintain semi-automatic pistols for security purposes
- CPPSEC3117 Carry, operate and maintain shotguns for security purposes.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to control security risk situations using firearms
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- firearm, ammunition and duty gear to complete work instructions
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC3115 Carry, operate and maintain revolvers for security purposes

## Modification History

Release 1.

New unit.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to safely and legally carry, operate and maintain revolvers for security purposes.

It includes:

- reviewing and complying with range rules and procedures, workplace policies and legal rights and responsibilities including firearms and weapons Acts and workplace health and safety (WHS)
- selecting and checking the revolver, ammunition, duty gear and required personal protective equipment (PPE), and following manufacturers' specifications to ensure correct and safe operation
- operating a revolver demonstrating correct techniques for loading and unloading, draw and recovery, retention, shooting and discharging multiple shots at the same target and multiple targets to the required standard of accuracy
- discharging a revolver at an approved range following local range rules and instructions from range personnel
- cleaning and maintaining revolvers following point, remove, observe, verify and examine (PROVE) safety procedures.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

### Note:

This unit requires appropriate permits to be obtained to conduct firearms training in some states and territories.

This unit does not result in a firearms licence or permit. Refer to the regulatory requirements of individual states and territories.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Prepare to carry and operate revolver.	<p>1.1 Review workplace policies and procedures including WHS to ensure compliance with legal rights and responsibilities when carrying and operating revolvers for security purposes.</p> <p>1.2 Select revolver and correct ammunition and duty gear for revolver type, and use required personal protective equipment (PPE) and clothing.</p> <p>1.3 Check that equipment is operational following manufacturers' instructions and rectify or report faults or malfunctions.</p>
2. Draw, use and recover revolver.	<p>2.1 Check and load ammunition following manufacturers' instructions and safely recover revolver.</p> <p>2.2 Draw revolver safely to ready position.</p> <p>2.3 Operate revolver demonstrating compliance with fundamentals of shooting principles.</p> <p>2.4 Control revolver to demonstrate correct retention techniques.</p> <p>2.5 Use available cover and concealment, and demonstrate correct techniques for low light shooting.</p> <p>2.6 Discharge multiple shots at the same target and multiple targets to meet the required standard of accuracy.</p> <p>2.7 Perform immediate and remedial actions in the event of revolver malfunction.</p> <p>2.8 Safely unload and recover revolver.</p>
3. Discharge revolver at approved range.	<p>3.1 Interpret and comply with local range rules at approved shooting range.</p> <p>3.2 Select and fit PPE including hearing and eye protection, and baseball cap to comply with range rules.</p> <p>3.3 Handle revolver according to fundamentals of shooting principles.</p> <p>3.4 Follow commands from range personnel or firearms</p>

	<p>instructors.</p> <p>3.5 Select correct ammunition for revolver and load as instructed by range personnel or firearms instructor.</p> <p>3.6 Discharge revolver to meet approved course of fire and achieve required standards.</p> <p>3.7 Complete range register and incident report as required.</p>
4. Clean and maintain revolver.	<p>4.1 Apply PROVE procedures to physically check revolver, swing out cylinder and confirm that the chamber is empty prior to cleaning.</p> <p>4.2 Select and use correct tools and cleaning kit for revolver following manufacturers' instructions.</p> <p>4.3 Access a suitable venue to clean revolver following WHS procedures.</p> <p>4.4 Disassemble and clean revolver following manufacturers' instructions.</p> <p>4.5 Reassemble revolver and inspect to confirm safety and correct operation.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- writing skills to complete range registers and incident reports
- reading skills to interpret:
  - standard operating procedures and policies that clarify legal rights and responsibilities
  - manufacturers' instructions and technical information when checking, operating and cleaning revolvers
  - signs that detail range rules that may be in written and diagrammatic formats
- speaking and listening skills to:
  - understand spoken commands from range personnel and firearms instructors
  - use questions to clarify instructions
- numeracy skills to apply basic mathematical techniques to:
  - select and use correct amount of ammunition
  - discharge correct number of shots
- problem solving skills to:
  - recognise faults and malfunctions in revolvers and equipment
  - correctly disassemble and reassemble revolver

- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## **Unit Mapping Information**

New unit.

This version first released with CPP Property Services Training Package Version 7.0.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3115 Carry, operate and maintain revolvers for security purposes

## Modification History

Release 1.

New unit.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must carry, operate and maintain revolvers for security purposes in:

- one dry fire environment
- one live fire shooting range.

On each occasion, the person must:

- draw and recover revolver safely keeping fingers off the trigger until target is acquired and ensuring the muzzle does not cross body parts
- demonstrate each of the following loading and unloading techniques:
  - administrative loading
  - tactical loading using speed strips and speed loaders
  - using pouches to store speed strips and speed loaders
- demonstrate compliance with fundamentals of shooting principles while handling a revolver:
  - grip
  - stance
  - trigger control
  - sight alignment and picture
  - breathing
  - follow through.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when carrying, operating and maintaining revolvers for security purposes:
  - carriage and use of firearms and weapons

- duty of care
- licensing requirements and limits of own authority
- range rules at approved shooting range
- selection and use of ammunition
- selection and use of duty gear
- use of force
- workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- approved course of fire
- different procedures for operating various revolver types and models
- duty gear required for carrying and using revolvers
- effective range of law-enforcement ammunition
- firearms retention techniques
- fundamentals of shooting including grip, stance, trigger control, sight alignment and picture, breathing and follow through
- legal consequences of pointing and firing a revolver outside of an approved range
- loading and unloading techniques including administrative loading, tactical loading using speed strips and speed loaders, and using pouches to store speed strips and speed loaders
- low light shooting techniques
- methods for discharging multiple shots at same target and multiple targets
- nomenclature of modern law-enforcement ammunition
- nomenclature of modern law-enforcement revolvers
- operating sequence and principles of revolvers
- personal protective equipment (PPE) required when carrying and using revolvers and using an approved range
- procedures for attending an approved shooting range
- procedures for responding to multiple threats
- reasons finger must remain off trigger until target is sighted
- reasons muzzle must not cross body parts when drawing and recovering revolvers from or to holsters
- process of dynamic risk assessment and how it is applied
- rules of approved shooting range
- situations where it is appropriate to draw or use a revolver to manage a perceived threat according to the use of force model
- techniques for proving a revolver: point in a safe direction, remove ammunition, observe chamber, verify feeding path, and examine bore for obstructions
- techniques for safely drawing and recovering a revolver and moving to ready position
- the phonetic alphabet and how it is used
- types of security risk situations that may be encountered during armed assignments and appropriate responses

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in an operational workplace environment or environment that reflects workplace conditions. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessment of performance must comply with jurisdictional regulatory requirements for conducting firearms training and assessment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to safely and legally carry, operate and maintain revolvers for security purposes
- appropriate documents, materials, and equipment currently used in industry
- revolver, ammunition, duty gear and PPE to meet work instructions
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC3116 Carry, operate and maintain semi-automatic pistols for security purposes

## Modification History

Release 1 This version first released with CPP Property Services Training Package Version 7.0

New unit

Release 2 This version first released with CPP Property Services Training Package Release 7.1.

Minor change to Knowledge Evidence for loading and unloading techniques.

## Application

This unit specifies the skills and knowledge required to safely and legally carry, operate and maintain semi-automatic pistols for security purposes.

It includes:

- reviewing and complying with range rules and procedures, workplace policies and legal rights and responsibilities including firearms and weapons Acts and workplace health and safety (WHS)
- selecting and checking the pistol, ammunition, duty gear and required personal protective equipment (PPE), and following manufacturers' specifications to ensure correct and safe operation
- operating a semi-automatic pistol demonstrating correct techniques for loading and unloading, draw and recovery, retention, shooting and discharging multiple shots at the same target and multiple targets to the required standard of accuracy
- discharging a semi-automatic pistol at an approved range following local range rules and instructions from range personnel
- cleaning and maintaining semi-automatic pistols following point, remove, observe, verify and examine (PROVE) safety procedures.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

### Note:

This unit requires appropriate permits to be obtained to conduct firearms training in some states and territories.

This unit does not result in a firearms licence or permit. Refer to the regulatory

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Prepare to carry and operate semi-automatic pistol.	<p>1.1 Review workplace policies and procedures including WHS to ensure compliance with legal rights and responsibilities when carrying and operating semi-automatic pistols for security purposes.</p> <p>1.2 Select semi-automatic pistol and correct ammunition and duty gear for semi-automatic pistol type, and use required personal protective equipment (PPE) and clothing.</p> <p>1.3 Check that equipment is operational following manufacturers' instructions and rectify or report faults or malfunctions.</p>
2. Draw, use and recover semi-automatic pistol.	<p>2.1 Check and load ammunition following manufacturers' instructions and safely recover semi-automatic pistol.</p> <p>2.2 Draw semi-automatic pistol safely to ready position.</p> <p>2.3 Operate semi-automatic pistol demonstrating compliance with fundamentals of shooting principles.</p> <p>2.4 Control semi-automatic pistol to demonstrate correct retention techniques.</p> <p>2.5 Use available cover and concealment, and demonstrate correct techniques for low light shooting.</p> <p>2.6 Discharge multiple shots at the same target and multiple targets to meet the required standard of accuracy.</p> <p>2.7 Perform immediate and remedial actions in the event of semi-automatic pistol malfunction.</p> <p>2.8 Safely unload and recover semi-automatic pistol.</p>

<p>3. Discharge semi-automatic pistol at approved range.</p>	<p>3.1 Interpret and comply with local range rules at approved shooting range.</p> <p>3.2 Select and fit PPE including hearing and eye protection, and baseball cap to comply with range rules.</p> <p>3.3 Handle semi-automatic pistol according to fundamentals of shooting principles.</p> <p>3.4 Follow commands from range personnel or firearms instructors.</p> <p>3.5 Select correct ammunition for semi-automatic pistol and load as instructed by range personnel or firearms instructor.</p> <p>3.6 Discharge semi-automatic pistol to meet approved course of fire and achieve required standards.</p> <p>3.7 Complete range register and incident report as required.</p>
<p>4. Clean and maintain semi-automatic pistol.</p>	<p>4.1 Apply PROVE procedures to physically check semi-automatic pistol, remove magazine and confirm the chamber is empty prior to cleaning.</p> <p>4.2 Select and use correct tools and cleaning kit for semi-automatic pistol following manufacturers' instructions.</p> <p>4.3 Access a suitable venue to clean semi-automatic pistol following WHS procedures.</p> <p>4.4 Disassemble and clean semi-automatic pistol following manufacturers' instructions.</p> <p>4.5 Reassemble semi-automatic pistol and inspect to confirm safety and correct operation.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- writing skills to complete range registers and incident reports
- reading skills to interpret:
  - standard operating procedures and policies that clarify legal rights and responsibilities
  - manufacturers' instructions and technical information when checking, operating and cleaning semi-automatic pistols
  - signs that detail range rules that may be in written and diagrammatic formats
- speaking and listening skills to:
  - understand spoken commands from range personnel and firearms instructors
  - use questions to clarify instructions

- numeracy skills to apply basic mathematical techniques to:
  - select and use correct amount of ammunition
  - discharge correct number of shots
- problem solving skills to:
  - recognise faults and malfunctions in semi-automatic pistols and equipment
  - correctly disassemble and reassemble semi-automatic pistols
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

New unit.

This version first released with CPP Property Services Training Package Version 7.0.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3116 Carry, operate and maintain semi-automatic pistols for security purposes

## Modification History

Release 1 This version first released with CPP Property Services Training Package Version 7.0

New unit

Release 2 This version first released with CPP Property Services Training Package Release 7.1.

Minor change to Knowledge Evidence for loading and unloading techniques.

## Performance Evidence

To demonstrate competency in this unit, a person must carry, operate and maintain semi-automatic pistols for security purposes in:

- one dry fire environment
- one live fire shooting range.

On each occasion, the person must:

- draw and recover the semi-automatic pistol safely keeping fingers off the trigger until target is acquired and ensuring the muzzle does not cross body parts
- demonstrate each of the following loading and unloading techniques:
  - administrative loading
  - tactical loading using magazines
  - using pouches to store magazines
- demonstrate compliance with fundamentals of shooting principles while handling a semi-automatic pistol:
  - grip
  - stance
  - trigger control
  - sight alignment and picture
  - breathing
  - follow through.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when carrying, operating and maintaining semi-automatic pistols for security purposes:
  - carriage and use of firearms and weapons
  - duty of care
  - licensing requirements and limits of own authority
  - range rules at approved shooting range
  - selection and use of ammunition
  - selection and use of duty gear
  - use of force
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- approved course of fire
- different procedures for operating various semi-automatic pistol types and models
- duty gear required for carrying and using semi-automatic pistols
- effective range of law-enforcement ammunition
- firearms retention techniques
- fundamentals of shooting including grip, stance, trigger control, sight alignment and picture, breathing and follow through
- legal consequences of pointing and firing a semi-automatic pistol outside of an approved range
- demonstrate each of the following loading and unloading techniques, including administrative loading, tactical loading using magazines and using pouches to store magazines
- low light shooting techniques
- methods for discharging multiple shots at same target and multiple targets
- nomenclature of modern law-enforcement ammunition
- nomenclature of modern law-enforcement semi-automatic pistols
- operating sequence and principles of semi-automatic pistols
- personal protective equipment (PPE) required when carrying and using semi-automatic pistols and using an approved range
- procedures for attending an approved shooting range
- procedures for responding to multiple threats
- process for dynamic risk assessment and how it is applied
- reasons finger must remain off trigger until target is sighted
- reasons muzzle must not cross body parts when drawing and recovering semi-automatic pistols from or to holsters
- rules of approved shooting range

- situations where it is appropriate to draw or use a semi-automatic pistol to manage a perceived threat according to the use of force model
- techniques for proving a semi-automatic pistol: point in a safe direction, remove ammunition, observe chamber, verify feeding path, and examine bore for obstructions
- techniques for safely drawing and recovering a semi-automatic pistol and moving to ready position
- the phonetic alphabet and how it is used
- types of security risk situations that may be encountered during armed assignments and appropriate responses.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessment of performance must comply with jurisdictional regulatory requirements for conducting firearms training and assessment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to safely and legally carry, operate and maintain semi-automatic pistols for security purposes
- appropriate documents, materials, and equipment currently used in industry
- semi-automatic pistol, ammunition, duty gear and PPE to meet work instructions
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC3117 Carry, operate and maintain shotguns for security purposes

## Modification History

Release 1.

New unit.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to safely and legally carry, operate and maintain shotguns for security purposes.

It includes:

- reviewing and complying with range rules and procedures, workplace policies and legal rights and responsibilities including firearms and weapons Acts and workplace health and safety (WHS)
- selecting and checking the shotgun, ammunition, duty gear and required personal protective equipment (PPE), and following manufacturers' specifications to ensure correct and safe operation
- operating a shotgun demonstrating correct techniques for loading and unloading, carrying, retention, shooting and discharging multiple shots at the same target and multiple targets to the required standard of accuracy
- discharging a shotgun at an approved range following local range rules and instructions from range personnel
- cleaning and maintaining shotguns following point, remove, observe, verify and examine (PROVE) safety procedures.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

### Note:

This unit requires appropriate permits to be obtained to conduct firearms training in some states and territories.

This unit does not result in a firearms licence or permit. Refer to the regulatory requirements of individual states and territories.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Prepare to carry and operate shotgun.	<p>1.1 Review workplace policies and procedures including WHS to ensure compliance with legal rights and responsibilities when carrying and operating shotguns for security purposes.</p> <p>1.2 Select shotgun and correct ammunition and duty gear for shotgun type, and use required personal protective equipment (PPE) and clothing.</p> <p>1.3 Check that equipment is operational following manufacturers' instructions and rectify or report faults or malfunctions.</p>
2. Operate a shotgun.	<p>2.1 Access shotgun from car carry position and load ammunition.</p> <p>2.2 Operate shotgun demonstrating compliance with fundamentals of shooting principles.</p> <p>2.3 Control shotgun to demonstrate correct retention techniques.</p> <p>2.4 Use available cover and concealment, and demonstrate correct techniques for low light shooting.</p> <p>2.5 Discharge multiple shots at the same target and multiple targets to meet the required standard of accuracy.</p> <p>2.6 Perform immediate and remedial actions in the event of shotgun malfunction.</p> <p>2.7 Safely unload, store and secure shotgun in car carry position.</p>
3. Discharge shotgun at approved range.	<p>3.1 Interpret and comply with local range rules at approved shooting range.</p> <p>3.2 Select and fit PPE including hearing and eye protection, and baseball cap to comply with range rules.</p> <p>3.3 Handle shotgun according to fundamentals of shooting principles.</p> <p>3.4 Follow commands from range personnel or firearms</p>

	<p>instructors.</p> <p>3.5 Select correct ammunition for shotgun and load as instructed by range personnel or firearms instructor.</p> <p>3.6 Discharge shotgun to meet approved course of fire and achieve required standards.</p> <p>3.7 Complete range register and incident report as required.</p>
4. Clean and maintain shotgun.	<p>4.1 Apply PROVE procedures to physically check shotgun is safe and empty of ammunition prior to cleaning.</p> <p>4.2 Select and use correct tools and cleaning kit for shotgun following manufacturers' instructions.</p> <p>4.3 Access a suitable venue to clean shotgun following WHS procedures.</p> <p>4.4 Disassemble and clean shotgun following manufacturers' instructions.</p> <p>4.5 Reassemble shotgun and inspect to confirm safety and correct operation.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- writing skills to complete range registers and incident reports
- reading skills to interpret:
  - standard operating procedures and policies that clarify legal rights and responsibilities
  - manufacturers' instructions and technical information when checking, operating and cleaning shotguns
  - signs that detail range rules that may be in written and diagrammatic formats
- speaking and listening skills to:
  - understand spoken commands from range personnel and firearms instructors
  - use questions to clarify instructions
- numeracy skills to apply basic mathematical techniques to:
  - select and use correct amount of ammunition
  - discharge correct number of shots
- problem solving skills to:
  - recognise faults and malfunctions in shotguns and equipment
  - correctly disassemble and reassemble shotgun
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others

## Unit Mapping Information

New unit.

This version first released with CPP Property Services Training Package Version 7.0.

# Assessment Requirements for CPPSEC3117 Carry, operate and maintain shotguns for security purposes

## Modification History

Release 1.

New unit.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must carry, operate and maintain shotguns for security purposes in:

- one dry fire environment
- one live fire shooting range.

On each occasion, the person must demonstrate:

- loading and unloading techniques:
  - administrative loading
  - combat load
  - loading for car carry
  - downloading to car carry
- compliance with fundamentals of shooting principles:
  - grip
  - stance
  - trigger control
  - sight alignment and picture
  - breathing
  - follow through.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when carrying, operating and maintaining shotguns for security purposes:
  - carriage and use of firearms and weapons
  - duty of care
  - licensing requirements and limits of own authority

- range rules at approved shooting range
- selection and use of ammunition
- selection and use of duty gear
- use of force
- workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- approved course of fire
- different procedures for operating various shotgun types and models
- duty gear required for carrying and using shotguns
- effective range of law-enforcement ammunition
- firearms retention techniques
- fundamentals of shooting including grip, stance, trigger control, sight alignment and picture, breathing and follow through
- legal consequences of pointing and firing a shotgun outside of an approved range
- loading and unloading techniques including administrative loading, combat load, loading for car carry and downloading to car carry
- low light shooting techniques
- methods for discharging multiple shots at same target and multiple targets
- nomenclature of modern law-enforcement ammunition
- nomenclature of modern law-enforcement shotguns
- operating sequence and principles of shotguns
- personal protective equipment (PPE) required when carrying and using shotguns and using an approved range
- procedures for attending an approved shooting range
- procedures for responding to multiple threats
- process of dynamic risk assessment and how it is applied
- reasons finger must remain off trigger until target is sighted
- rules of approved shooting range
- situations where it is appropriate to draw or use a shotgun to manage a perceived threat according to the use of force model
- techniques for proving a shotgun: point in a safe direction, remove ammunition, observe chamber, verify feeding path, and examine bore for obstructions
- the phonetic alphabet and how it is used
- types of security risk situations that may be encountered during armed assignments and appropriate responses.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessment of performance must comply with jurisdictional regulatory requirements for conducting firearms training and assessment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to safely and legally carry, operate and maintain shotguns for security purposes
- appropriate documents, materials, and equipment currently used in industry
- shotgun, ammunition, duty gear and PPE to meet work instructions
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC3118 Inspect and test cash-in-transit security equipment and rectify faults

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3052A Inspect and test cash-in-transit security equipment.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to inspect and test cash-in-transit security equipment and rectify identified faults to ensure continuity of cash-in-transit security services.

It includes:

- reviewing maintenance schedules and manufacturers' instructions to inspect and test a range of cash-in-transit equipment, components and warning systems to confirm operational effectiveness and identify faults
- assessing the impact of faults on cash-in-transit security services, and promptly coordinating replacement systems or equipment to ensure continuity of services
- regular monitoring of the work environment to identify, assess and control potential hazards and risks.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
<p>1. Inspect and test cash-in-transit security equipment.</p>	<p>1.1 Review maintenance schedules, procedures and equipment information to confirm inspection and testing requirements.</p> <p>1.2 Review work procedures to ensure compliance with legislative and workplace requirements for inspecting and testing cash-in-transit security equipment.</p> <p>1.3 Select and organise tools and equipment required to meet work instructions.</p> <p>1.4 Conduct pre-operational checks of cash-in-transit security equipment following manufacturers' specifications.</p> <p>1.5 Monitor the work area continuously to ensure ongoing safety.</p> <p>1.6 Check and test equipment, components and warning systems for operational effectiveness following manufacturers' specifications and report faults to relevant persons.</p>
<p>2. Assess and rectify faults in cash-in-transit security equipment.</p>	<p>2.1 Assess identified equipment faults to clarify impact on cash-in-transit security services.</p> <p>2.2 Identify and assess potential hazards and risks to security services and the work area, and implement necessary controls.</p> <p>2.3 Tag non-serviceable systems or equipment and arrange repair or disposal in accordance with workplace requirements.</p> <p>2.4 Promptly coordinate replacement system or equipment to ensure continuity of cash-in-transit security services.</p>
<p>3. Record and report inspection and testing results.</p>	<p>3.1 Report results of equipment inspection, testing and maintenance to relevant persons.</p> <p>3.2 Complete inspection and testing records using documentation in accordance with workplace requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to use security industry approved communication terminology, codes and signals
- writing skills to:
  - record equipment maintenance and fault details

- complete routine reports and forms
- reading skills to interpret:
  - workplace procedures and policies that clarify legal rights and responsibilities and WHS requirements
  - written and diagrammatic equipment manufacturers' instructions, procedures, technical data and specifications
- speaking and listening skills to:
  - use questions and active listening to clarify work tasks
  - orally report issues arising from equipment checking and testing
- numeracy skills to estimate time to complete work tasks
- problem solving skills to:
  - test equipment to identify faults
  - assess the impact of faulty equipment on provision of security services
- self-management skills to coordinate the timely replacement of faulty systems or equipment
- technology skills to check and test cash-in-transit security equipment.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC3052A Inspect and test cash-in-transit security equipment.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3118 Inspect and test cash-in-transit security equipment and rectify faults

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3052A Inspect and test cash-in-transit security equipment.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must inspect and test the following cash-in-transit security equipment items for operational effectiveness:

- two types of communication equipment:
  - mounted two-way radio
  - portable two-way radio
- one alarm system
- one access control system
- one surveillance camera.

For two different types of equipment listed above, the person must identify one fault.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when inspecting and testing cash-in-transit security equipment:
  - duty of care
  - licensing requirements for cash-in-transit operations
  - licensing requirements and permits for firearms
  - limits of own responsibility and authority
  - surveillance
  - workplace health and safety (WHS) including manual handling
- common faults and malfunctions in cash-in-transit security equipment and devices
- operational features and functions of a range of cash-in-transit security equipment and devices
- procedures for activating and de-activating a range of security systems and devices

- procedures for inspecting and testing a range of cash-in-transit security equipment and devices
- procedures for responding to a violent encounter including armed robbery
- procedures for tagging non-serviceable equipment and systems
- process of dynamic risk assessment and how it is applied
- risks and hazards posed by faulty equipment and inspection and testing activities, and related precautions and controls
- tools and equipment required to inspect and test cash-in-transit security equipment.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in an operational workplace environment or environment that reflects workplace conditions. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to inspect and test cash-in-transit security equipment and rectify faults
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry including equipment required to achieve the performance evidence:
- two types of communication equipment:
  - mounted two-way radio
  - portable two-way radio
- alarm system
- access control system
- surveillance camera
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC3119 Implement cash-in-transit security procedures

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3051A Implement cash-in-transit security procedures.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to implement cash-in-transit security procedures to protect consignments and secure the work area.

It includes:

- reviewing and complying with work instructions, workplace procedures and policies and legal rights and responsibilities including workplace health and safety (WHS) to identify and control hazards and risks
- constant surveillance of people, vehicles and goods in the work area, operating security systems to prevent unauthorised access, and coordinating a response to security incidents to maintain safety and security of the consignment, self, people and property
- problem-solving to predict consequences and apply contingencies where incidents can escalate to emergency situations.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the	Performance criteria describe what needs to be done to
-----------------------	--

essential outcomes.	demonstrate achievement of the element.
1. Prepare for cash-in-transit operation.	<p>1.1 Review work instructions, procedures and workplace policies to ensure compliance with legal rights and responsibilities when implementing cash-in-transit security procedures.</p> <p>1.2 Operate and check security and communications equipment to verify operational effectiveness.</p> <p>1.3 Conduct systematic safety checks and confirm correct strategic positioning and tactics to ensure security of consignment.</p> <p>1.4 Monitor people, goods and vehicles in the work area to identify hazards, assess risks to consignment, and implement necessary security controls.</p> <p>1.5 Record receipt and delivery of consignment in accordance with workplace requirements.</p> <p>1.6 Check consignment content to verify security, and report discrepancies to relevant persons.</p>
2. Maintain surveillance and security of work area.	<p>2.1 Monitor security equipment to maintain situational awareness and identify changing circumstances in the work area.</p> <p>2.2 Operate security systems to secure work area and prevent unauthorised access.</p> <p>2.3 Regularly check security equipment to ensure operational effectiveness and take immediate corrective actions where faults are identified.</p>
3. Coordinate response to security incident.	<p>3.1 Observe the work area to identify security incident and assess risk of escalation and emergencies.</p> <p>3.2 Direct immediate security response, following WHS procedures, to protect consignment and safety of self, people and property.</p> <p>3.3 Use communication equipment to receive and transmit accurate and concise incident information to relevant persons.</p>
4. Finalise cash-in-transit operation and report incident.	<p>4.1 Finalise cash-in-transit security procedures and record details using documentation in accordance with workplace requirements.</p> <p>4.2 Report account of security incident details to relevant persons.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to use security industry approved communication terminology, codes and signals
- writing skills to:
  - record consignment receipt and delivery information
  - complete routine reports and forms
- reading skills to interpret:
  - workplace procedures and policies that clarify legal rights and responsibilities and WHS requirements
  - information and instructions written in English, such as consignment documents and labels and safety data sheets (SDS)
- speaking and listening skills to:
  - use questions to clarify and verify spoken security risk information
  - use communication equipment to give clear, sequenced instructions and reports, for example when reporting discrepancies with consignment content
- numeracy skills to estimate time when receiving and delivering consignments
- problem solving skills to:
  - recognise suspicious movements of people, vehicles or goods in the work area
  - assess incidents and potential emergency situations and apply contingency measures
  - identify malfunctioning security equipment
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC3051A Implement cash-in-transit security procedures.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3119 Implement cash-in-transit security procedures

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3051A Implement cash-in-transit security procedures.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must implement cash-in transit security procedures for two separate operations involving different security risk situations.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when implementing cash-in-transit security procedures:
  - anti-discrimination and diversity
  - apprehension, arrest and restraint of persons
  - counter terrorism
  - duty of care
  - licensing requirements and permits for firearms, and handling and carrying dangerous goods
  - limits of own responsibility and authority
  - trespass and the removal of persons
  - use of force
  - workplace health and safety (WHS) including manual handling
- approved communication terminology, call signs and radio channels used in the security industry
- cash-in-transit surveillance and monitoring techniques
- chain of command relevant to cash-in-transit operation
- correct strategic positioning and tactics when conducting cash-in-transit operations
- factors that may indicate escalation of conflict or risk and situations requiring specialist assistance

- principles of effective teamwork
- procedures for activating and de-activating a range of common security systems and devices
- procedures for communicating and collaborating with emergency services
- procedures for handling non-conforming consignments
- procedures for responding to a violent encounter including armed robbery
- process of dynamic risk assessment and how it is applied
- the phonetic alphabet and how it is used
- types of security incidents and emergencies that may be encountered during cash-in-transit operations and appropriate responses for each
- understanding of the force model.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in an operational workplace environment or environment that reflects workplace conditions. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to implement cash-in-transit security procedures
- appropriate documents, materials, cash-in-transit equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC3120 Load and unload cash-in-transit in secured and unsecured environments

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC2027A Load and unload cash in transit in a secured environment and CPPSEC3050A Load and unload cash-in-transit in an unsecured environment.

Units merged to reduce duplication and align with vocational needs.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to load and unload cash-in-transit in secured and unsecured environments.

It requires

- constantly monitoring people, vehicles and goods in the loading area and implementing security procedures to prevent unauthorised access to cash-in-transit consignments
- securely transferring, verifying and delivering consignments and recording and reporting non-conformances
- formulating and applying contingency measures to respond to changing risk circumstances and maintain security during cash-in-transit operations.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

essential outcomes.	demonstrate achievement of the element.
1. Select cash-in-transit loading site.	<p>1.1 Review work instructions, procedures and policies including WHS to ensure compliance with legal rights and responsibilities when performing cash-in-transit operations.</p> <p>1.2 Clarify operational details with relevant persons.</p> <p>1.3 Select consignment loading site to meet work instructions.</p> <p>1.4 Assess accessibility and security of loading site and, where deemed inappropriate, identify an alternative site in consultation with relevant persons.</p> <p>1.5 Monitor people, goods and vehicles in the loading area to identify hazards, assess risks to consignment and implement necessary security controls.</p> <p>1.6 Use interpersonal techniques to discuss consignment transfer details with relevant persons and obtain necessary authorisations.</p>
2. Transfer and secure cash-in-transit.	<p>2.1 Monitor loading area to maintain situational awareness and identify changing circumstances.</p> <p>2.2 Implement security procedures and operate security systems to secure loading area and prevent unauthorised access.</p> <p>2.3 Identify potential security risks and formulate contingency measures in consultation with relevant persons.</p> <p>2.4 Respond to changing risk circumstances to maintain security of consignment and loading area.</p> <p>2.5 Safely and securely transfer load according to work instructions.</p> <p>2.6 Verify consignment information and record and report details of non-conforming items.</p>
3. Deliver cash-in-transit and complete transfer documentation.	<p>3.1 Deliver consignment and request client to verify consignment.</p> <p>3.2 Complete transfer documentation in accordance with workplace requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to use security industry approved communication terminology, codes and signals

- writing skills to:
  - complete consignment transfer documentation
  - complete routine reports and forms
- reading skills to interpret:
  - workplace procedures and policies that clarify legal rights and responsibilities and WHS requirements
  - information and instructions written in English, such as consignment documents, labels and safety data sheets (SDS)
  - site plans and features to assess security of loading site
  - consignment information to verify contents
- speaking and listening skills to:
  - use questions to clarify operational information
  - use a radio to give clear, sequenced instructions and reports, for example when reporting discrepancies with consignment content
  - orally request the client to verify the consignment
- numeracy skills to estimate time to meet scheduled timeframes for loading and unloading cash-in-transit
- problem solving skills to:
  - recognise suspicious movements of people, vehicles or goods in the loading area
  - assess the security and identify the need for an alternative site
  - formulate contingency measures to respond to risks when transferring consignment
  - select and use correct manual handling techniques when carrying, loading and unloading cash-in-transit
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

Supersedes and is non-equivalent to CPPSEC2027A Load and unload cash in transit in a secured environment and CPPSEC3050A Load and unload cash-in-transit in an unsecured environment.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3120 Load and unload cash-in-transit in secured and unsecured environments

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC2027A Load and unload cash in transit in a secured environment and CPPSEC3050A Load and unload cash-in-transit in an unsecured environment.

Units merged to reduce duplication and align with vocational needs.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must load and unload cash-in transit consignments in:

- one secured location
- two different unsecured locations.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when loading and unloading cash-in-transit:
  - anti-discrimination and diversity
  - apprehension, arrest and restraint of persons
  - counter terrorism
  - duty of care
  - licensing requirements and permits for firearms, and handling and carrying dangerous goods
  - limits of own responsibility and authority
  - trespass and the removal of persons
  - use of force
  - workplace health and safety (WHS) including manual handling
- accessibility and security issues that would deem a loading site to be inappropriate
- approved communication terminology, call signs and radio channels used in the security industry
- authorisations necessary to load and unload cash-in-transit consignments
- cash-in-transit carrying, loading and unloading techniques

- correct strategic positioning and tactics when conducting cash-in-transit operations
- difference between secured and unsecured loading sites and the risks associated with each
- principles of effective teamwork
- procedures for activating and de-activating a range of common security systems and devices
- procedures for handling non-conforming consignments
- procedures for responding to a violent encounter including armed robbery
- process of dynamic risk assessment and how it is applied
- the phonetic alphabet and how it is used
- types of security risks that may be encountered during cash-in-transit operations and appropriate responses for each
- understanding of the force model.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to load and unload cash-in-transit in secured and unsecured environments
- appropriate documents, materials, cash-in-transit equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC3121 Control persons using empty hand techniques

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3013A Control persons using empty hand techniques.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to control persons using empty hand techniques.

It includes:

- identifying threats posed by persons presenting a risk to the safety of self or others and assessing response and withdrawal options
- negotiating with subjects to defuse conflict and give spoken warnings and directions
- applying recognised empty hand techniques using the minimum amount of force necessary to remove the immediate threat while avoiding vital areas of the body and without harming subjects
- isolating subjects at a safe distance from members of the public and monitoring their wellbeing and safety.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the	Performance criteria describe what needs to be done to
-----------------------	--

essential outcomes.	demonstrate achievement of the element.
1. Assess need to use empty hand techniques and response options.	<p>1.1 Review workplace procedures and policies including WHS to ensure compliance with legal rights and responsibilities when using empty hand techniques for security work.</p> <p>1.2 Identify subject of threat and continually observe and anticipate movement and aggression.</p> <p>1.3 Ensure stance and distance from subject maximises range of defensive options and tactical advantages in physical contact.</p> <p>1.4 Assess alternative response and withdrawal options for viability and incorporate defensive options into selected response.</p> <p>1.5 Check and confirm personal safety needs and identify available escape routes.</p>
2. Apply defensive empty hand techniques.	<p>2.1 Use interpersonal techniques to exchange information with the subject and give spoken warnings and directions.</p> <p>2.2 Use empty hand techniques and ensure that grip on subject is secure, firm and applied using level of force proportionate to the threat context.</p> <p>2.3 Quickly apply holds to appropriate areas of the body in a safe manner.</p> <p>2.4 Anticipate strikes and blows from subject and adopt, parry or block positioning.</p> <p>2.5 Limit contact with subject to the minimum necessary to remove immediate threat, and use lower force options immediately when threat decreases or ceases.</p>
3. Restrain and isolate subject.	<p>3.1 Isolate and contain subject at a safe distance from members of the public, and minimise opportunities for escape.</p> <p>3.2 Identify situations requiring specialist assistance and seek assistance or advice from relevant persons using communication equipment.</p> <p>3.3 Escort subject from the incident scene to a secure location and monitor their wellbeing and safety.</p> <p>3.4 Use communication equipment to report incident details and subject location to relevant persons.</p>
4. Finalise and evaluate response.	<p>4.1 Review and evaluate effectiveness of response against incident circumstances and observations, in consultation with relevant persons.</p> <p>4.2 Identify improvements to future security response procedures using defensive techniques.</p> <p>4.3 Complete incident report and securely maintain</p>

	documentation in accordance with workplace requirements. 4.4 Recognise effects of stress and manage own well-being using stress management techniques.
--	---

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information or advice in a form that is preferred and understood by the receiver and that engages minority groups
- writing skills to:
  - record and describe incident observations and actions taken
  - complete routine reports and forms
- reading skills to interpret and follow workplace procedures and policies that clarify legal rights and responsibilities
- speaking and listening skills to:
  - use questions and active listening to exchange and understand information with subject
  - control tone of voice when negotiating with the subject
  - give clear and succinct spoken warnings and directions when negotiating with the subject
  - use a radio to give clear and sequenced information to emergency services personnel when requesting assistance and reporting incident details
- numeracy skills to estimate safe distances when engaging with and isolating subject
- problem solving skills to:
  - formulate response options to match nature of risk
  - apply empty hand techniques that avoid vital areas of the body
  - recognise security risk situations requiring specialist assistance
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC3013A Control persons using empty hand techniques.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3121 Control persons using empty hand techniques

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3013A Control persons using empty hand techniques.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must control persons using empty hand techniques in three different threat situations, and in each situation, demonstrating:

- correct techniques for body safety and body positioning:
  - bladed stance
  - interview stance
  - defensive stance
- correct application of defensive techniques:
  - blocking techniques
  - locking and holding techniques
  - take-down techniques.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when controlling persons using empty hand techniques:
  - anti-discrimination and diversity
  - apprehension, arrest and restraint of persons
  - duty of care
  - licensing requirements and limits of own authority
  - trespass and the removal of persons
  - use of force
  - workplace health and safety (WHS)

- approved communication terminology, call signs and radio channels used in the security industry
- basic negotiation techniques
- body safety and body positioning techniques, including:
  - bladed stance
  - interview stance
  - defensive stance
  - defensive techniques and how and when they are applied, including
  - blocking techniques
  - empty hand techniques
  - impact techniques to less-than-lethal parts of the body
  - locking and holding techniques
  - take-down techniques
- methods of restraint and associated effects, including signs and symptoms of asphyxiation
- pre-attack indicators
- procedures for collaborating with emergency services personnel to restrain and isolate subject of threat
- procedures for effecting an arrest
- process of dynamic risk assessment and how it is applied
- response options using defensive techniques that are within specified legal limits
- signs that a person may be suffering from emotional or physical distress
- signs that a person may be suffering from mental illness
- signs that a person may be under the influence of intoxicating substances
- understanding of the force model
- vital areas of the body and reasons they are to be avoided (head, neck, throat, spine, tailbone, chest, kidney and liver, clavicle and collar bone).

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to control persons using empty hand techniques
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

## CPPSEC3122 Plan provision of close protection services

### Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC3018A Provide for the safety of persons at risk. Significant changes made to the unit to reflect current industry needs.

This version first released with CPP Property Services Training Package Version 7.0.

### Application

This unit specifies the skills and knowledge required to plan to provide close protection services for the safety and security of a principal who may be a celebrity, political figure, very important person (VIP) or other person requiring close protection services.

It includes:

- clarifying the principal's protection requirements and complying with legal rights and responsibilities, policies and procedures associated with close protection tasks
- gathering, verifying and assessing protective intelligence to gain a full understanding of potential threats, vulnerabilities and risks to the principal
- selecting routes and performing reconnaissance to clarify the risk environment and identify factors that might compromise safety and security
- working with others to assess threats, vulnerabilities and operational risks and plan protection arrangements.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

### Pre-requisite Unit

Nil

### Unit Sector

Security operations

### Elements and Performance Criteria

Elements describe the	Performance criteria describe what needs to be done to
-----------------------	--

essential outcomes.	demonstrate achievement of the element.
1. Clarify roles, responsibilities and close protection requirements.	<p>1.1 Review work instructions, associated workplace and client's policies and procedures to clarify principal's close protection requirements.</p> <p>1.2 Clarify roles and responsibilities, with relevant persons, of self and others in the close protection team and chain of command.</p> <p>1.3 Review legal rights and responsibilities of self and others in the close protection team and apply to work instructions.</p>
2. Gather and assess protective intelligence.	<p>2.1 Source background information on principal from multiple sources, and verify accuracy and relevance to work instructions.</p> <p>2.2 Source and verify information to define and clarify operational parameters including the principal's itinerary, routes, venues and contacts.</p> <p>2.3 Assess and record information in a manner that can be used to analyse potential threats, vulnerabilities and risks to principal.</p> <p>2.4 Protect confidentiality and privacy of gathered information to comply with legal responsibilities.</p>
3. Select routes and perform reconnaissance.	<p>3.1 Analyse maps and other route information, and select primary and secondary routes to meet work instructions.</p> <p>3.2 Perform reconnaissance of routes and venues based on work instructions and information.</p> <p>3.3 Identify suitable embus and debus points, vulnerable areas and other factors that might compromise the safety and security of the principal.</p> <p>3.4 Locate available safe areas that can be used in emergency situations.</p> <p>3.5 Record reconnaissance findings and recommend changes to operational instructions to anticipate and avoid foreseeable risk situations.</p>
4. Assess threats, vulnerabilities and operational risks and plan protection arrangements.	<p>4.1 Evaluate factors that could influence threats, vulnerabilities and operational risks to assess and determine level and nature of potential threats, vulnerabilities and risks.</p> <p>4.2 Identify resources and equipment required to protect principal from potential threats, vulnerabilities and risks.</p> <p>4.3 Consult with principal and close protection team members to report potential threats, vulnerabilities and risks, to explain resource requirements, and to agree suitable protection arrangements.</p> <p>4.4 Record details of planned protection arrangements using</p>

	workplace documentation.
--	--------------------------

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to:
  - use security industry approved communication terminology, codes and signals
  - observe and follow accepted protocols and methods for communicating with people from different social, professional and cultural contexts, such as foreign diplomats, celebrities and other very important persons (VIPs)
  - use positive non-verbal skills to develop rapport with others when working as part of a team
- writing skills to:
  - use a variety of expressions and sentence structures to provide factual information and express opinions when recording information and reconnaissance findings
  - sequence and present cohesive text when recording details of planned protection arrangements
- reading skills to interpret:
  - procedures and policies that clarify legal rights and responsibilities
  - information in different formats and contexts when gathering protection intelligence
  - different types of maps and information contained within navigation systems when planning routes
- speaking and listening skills to use questions and active listening to clarify tasks and verify spoken information
- numeracy skills to:
  - estimate time required to carry out operational tasks
  - use basic mathematical techniques to calculate resource requirements
- problem solving skills to:
  - plan alternative routes using maps
  - evaluate and adjust protective arrangements to meet changing risk circumstances
  - source intelligence from multiple sources to ensure sufficiency, validity and relevance to meet work instructions
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others
- technology skills to use a range of information technologies and devices to gather information.

## Unit Mapping Information

Supersedes and is non-equivalent to CPPSEC3018A Provide for the safety of persons at risk.

## Links

Companion volumes to this training package are available at the VETNet website -

# Assessment Requirements for CPPSEC3122 Plan provision of close protection services

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC3018A Provide for the safety of persons at risk.

Significant changes made to the unit to reflect current industry needs.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must plan the provision of close protection services to meet the needs of two different principals.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when planning the provision of close protection services:
  - anti-discrimination and diversity
  - confidentiality and privacy
  - counter terrorism
  - duty of care
  - information privacy and legal use of gathered intelligence
  - licensing requirements and limits of own authority
  - search of premises
  - surveillance
  - workplace health and safety (WHS)
- access and exit points and layout of work environment and premises to be accessed by principal
- approved communication terminology, call signs and radio channels used in the security industry
- basic contingency planning techniques
- chain of command relevant to protection services
- current national terrorism threat level and context
- difference between static, mobile and direct protection and the tactics used for each

- emergency and evacuation plans and procedures for premises that may be accessed by principal
- factors that may compromise safety and security of principal during embus and debus points and when entering and exiting premises
- from where and how to collect sufficient information to determine levels of threats, vulnerabilities and risks to principals, without compromising the safety or security of the principal
- how to access and use different types of maps
- how to use common global positioning satellite (GPS) devices, maps and tracking systems
- methods for ensuring intelligence is sufficient, valid and relevant to protection operation
- methods for verifying sources of intelligence
- process of dynamic risk assessment and how it is applied
- purpose of reconnaissance in planning safety and security of close protection operations
- research techniques using multiple sources
- role and legal rights and responsibilities of a close protection operative
- types of equipment and resources used when providing close protection services
- types of potential threats, vulnerabilities and risks that can be encountered during close protection operations
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to plan provision of close protection services
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

# CPPSEC3123 Implement close protection services

## Modification History

Release 1.

New unit.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to implement close protection services to protect the safety and security of a principal who may be a celebrity, political figure, very important person (VIP) or other person requiring close protection services.

It includes:

- searching and securing premises to be used by the principal, and providing close protection escort services using approved foot formations and procedures for debus and embus
- maintaining communication with the principal and members of the close protection team to ensure ongoing safety and security, maintain situational awareness and identify and respond decisively to threats which may come from multiple sources
- using reasonable defensive techniques that minimise use of force and maximise the safety and security of the principal, self and others.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
---	--

<p>1. Prepare for close protection operation.</p>	<p>1.1 Review operational information and instructions to ensure compliance with legal rights and responsibilities and workplace policies and procedures when performing close protection tasks.</p> <p>1.2 Assess planning information to clarify protective arrangements including known threats, vulnerabilities and risks and contingency measures.</p> <p>1.3 Select and organise resources and equipment to meet work instructions and check to ensure correct operation.</p> <p>1.4 Liaise with members of close protection team to exchange and report operational information in accordance with chain of command.</p>
<p>2. Search and secure premises.</p>	<p>2.1 Confirm authority to search premises to be used by principal in consultation with persons on site.</p> <p>2.2 Use search methods and procedures to identify potential threats, vulnerabilities and risks, and implement necessary controls to ensure premises are secure.</p> <p>2.3 Report problems and request specialist assistance as required to maintain security of premises.</p>
<p>3. Provide close protection escort.</p>	<p>3.1 Monitor the environment to maintain situational awareness and avoid hazards while implementing protective arrangements.</p> <p>3.2 Exchange information with principal to ensure safety and security, and balance principal's needs with operational needs.</p> <p>3.3 Use communication equipment and non-verbal methods to convey information and to receive instructions from members of close protection team.</p> <p>3.4 Perform safe debus and embus of principal following workplace procedures.</p> <p>3.5 Carry out foot escort formations that avoid or minimise risks and threats to principal following standard procedures.</p>
<p>4. Respond to threat and protect principal.</p>	<p>4.1 Identify source of threat and assess risk to safety and security of principal.</p> <p>4.2 Use immediate and decisive response actions that extract principal from threat and minimise use of force.</p> <p>4.3 Give clear and concise instructions to the principal and close protection team members within limits of own role and responsibilities.</p> <p>4.4 Use defensive techniques that are reasonable in the circumstances to defend principal, self and others.</p> <p>4.5 Remain alert to multiple threats and identify and respond to</p>

	secondary or subsequent incidents to maintain safety and security of principal, self and others.
5. Finalise and review close protection operation.	<p>5.1 Fulfil close protection services in accordance with work instructions.</p> <p>5.2 Record operational outcomes and incident observations using workplace documentation.</p> <p>5.3 Participate in review and debrief of close protection outcomes to identify procedural improvements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to:
  - use security industry approved communication terminology, codes and signals
  - observe and follow accepted protocols and methods for communicating with people from different social, professional and cultural contexts, such as foreign diplomats, celebrities and other very important persons (VIPs)
  - use positive non-verbal skills to develop rapport with others when working as part of a team
- writing skills to use a variety of expressions and sentence structures to provide factual information and express opinions when recording operational outcomes and incident observations
- reading skills to interpret:
  - procedures and policies that clarify legal rights and responsibilities
  - different directional signs and information when escorting principal
- speaking and listening skills to:
  - use questions and active listening to clarify and verify spoken information when exchanging information with principal and team members, and confirming authority to search premises
  - convey and receive clear and succinct information and instructions using communication equipment
- numeracy skills to estimate time required to meet principal's needs relating to schedule and itinerary
- problem solving skills to:
  - recognise source of threat
  - modify actions to balance operational requirements with needs of principal
  - select response options that meet changing risk circumstances and multiple threats
- teamwork skills to:

- adjust personal communication styles in response to the opinions, values and needs of others
- work effectively with others and comply with chain of command reporting
- maintain professional working relationships with principal and members of close protection team.

# Assessment Requirements for CPPSEC3123 Implement close protection services

## Modification History

Release 1.

New unit.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must implement close protection services in separate operations to meet the protection needs of each of two different principals. In doing this, the person must demonstrate correct application of two different types of foot formations from the list below:

- wedge
- box
- diamond
- one-on-one.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when implementing close protection services:
  - anti-discrimination and diversity
  - confidentiality and privacy
  - counter terrorism
  - duty of care
  - information privacy and legal use of gathered intelligence
  - licensing requirements and limits of own authority
  - search of premises
  - surveillance
  - use of force
  - use of restraints and weapons including batons, firearms, handcuffs and spray
  - workplace health and safety (WHS)
- access and exit points and layout of work environment and premises to be accessed by principal

- approved communication terminology, call signs and radio channels used in the security industry
- chain of command relevant to protection services
- code of conduct and professional standards for providing close protection services
- crowd behaviour, dynamics and movement patterns that can threaten security
- current national terrorism threat level and context
- difference between static, mobile and direct protection and the tactics used for each
- empty hand techniques
- factors that may indicate escalation of conflict or risk and situations requiring specialist assistance
- methods for performing debus and embus procedures
- negotiation techniques and how they can be used to defuse and resolve conflict
- procedures for communicating and collaborating with close protection team
- process of dynamic risk assessment and how it is applied
- protocols and signals used to communicate with principal and team in a close protection operation
- purpose and types of foot formations used in close protection:
  - wedge
  - box
  - diamond
  - one-on-one
- role and legal rights and responsibilities of a close protection operative
- the phonetic alphabet and how it is used
- types of equipment and resources used when providing close protection services
- types of potential threats, vulnerabilities and risks that can be encountered during close protection operations
- understanding of the force model
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to implement close protection services
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations
- access to two different principals to enable achievement of the performance evidence.

## CPPSEC3124 Prepare and present evidence in court

### Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3009A Prepare and present evidence in court.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

### Application

This unit specifies the skills and knowledge required to prepare and present evidence in court.

It requires

- sourcing, organising and checking security information to be used as evidence in court proceedings, and checking compliance against rules of evidence and evidence management principles to ensure admissibility
- participating in oral briefing sessions, submitting evidence briefs and preparing documentation and exhibits
- adhering to court procedures and protocols such as those relating to personal presentation, manner and language
- presenting evidence in a clear, concise and unambiguous manner and providing specialist opinion on request.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

### Pre-requisite Unit

Nil

### Unit Sector

Security operations

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
---	--

<p>1. Prepare evidence.</p>	<p>1.1 Review workplace policies and procedures to ensure compliance with legal rights and responsibilities when preparing and presenting evidence in court.</p> <p>1.2 Source, research and collate case summary and supporting information.</p> <p>1.3 Select information to be used as evidence in court and confirm its relevance, validity and admissibility in court.</p> <p>1.4 Organise evidence and check compliance against evidence management principles.</p> <p>1.5 Interpret requirements for recording and presenting evidence in court.</p>
<p>2. Prepare for court proceedings.</p>	<p>2.1 Participate in oral briefing session with relevant persons to confirm court arrangements, own role and involvement.</p> <p>2.2 Discuss information to be presented as evidence and clarify negotiation parameters with relevant persons.</p> <p>2.3 Submit briefs of evidence in a logical sequence and check compliance with rules of evidence to ensure admissibility in court proceeding.</p> <p>2.4 Conduct a thorough review of material to be used or referred to in court proceeding prior to presentation in court to ensure familiarity, completeness and availability.</p> <p>2.5 Prepare documentation and exhibits and review to confirm their acceptability for use in court.</p>
<p>3. Attend court proceeding and present evidence.</p>	<p>3.1 Attend court and adhere to court procedures and protocols including those for personal presentation, manner and language throughout proceeding.</p> <p>3.2 Present admissible evidence in a clear, concise and unambiguous manner and on request, provide specialist opinion within own area of competence and expertise in accordance with evidence requirements.</p> <p>3.3 Note, file and store outcomes of proceedings and associated documentation and evidence in accordance with evidence management principles.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to use security industry approved terminology

- writing skills to:
  - prepare documentation using formal structure and language
  - sequence security information and evidence to present cohesive text
- reading skills to interpret:
  - procedures and policies that clarify legal rights and responsibilities
  - information and evidence that may be technical in nature, and in pictorial, diagrammatic or written formats
- speaking and listening skills to:
  - use active listening to check understanding when participating in briefing sessions
  - participate effectively in spoken interactions in a court setting using strategies to confirm, clarify or repair understanding
  - make constructive additions to what has been said when offering own specialist opinion in court
- numeracy skills to estimate time required to complete work tasks
- problem solving skills to:
  - verify accuracy and sources when gathering information and evidence
  - analyse information to ensure it complies with rules of evidence for admissibility
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others
- technology skills to use a range of common information technologies to access, store, study, retrieve, transmit and manipulate data or information that may be used as evidence.

## Unit Mapping Information

Supersedes and is equivalent to CPPSEC3009A Prepare and present evidence in court.

# Assessment Requirements for CPPSEC3124 Prepare and present evidence in court

## Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3009A Prepare and present evidence in court.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

To demonstrate competency in this unit, a person must prepare and present evidence in court in two separate court proceedings.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when preparing and presenting evidence in court:
  - anti-discrimination and diversity
  - duty of care
  - licensing requirements and limits of own authority
  - information privacy and confidentiality
  - workplace health and safety (WHS)
- basic research techniques that can be used to gather information and evidence
- evidence management principles
- methods for complying with privacy and confidentiality regulations when gathering, presenting and storing security information
- methods for identifying proofs of an offence
- methods for preserving, maintaining, storing and transporting evidence and exhibits that may be used in court
- operational functions of a range of information technologies used to gather, organise and present security information and evidence
- own areas of competence and expertise to provide specialist opinion in court
- procedures for preparing briefs of evidence
- procedures, protocols and rules to be followed when presenting evidence in court:
  - addressing court personnel
  - language

- manner
- participating and giving evidence
- personal presentation
- who's who in court
- purpose of the Evidence Act
- requirements for recording information that is factual and can be used as evidence in court, including meaning of 'continuity of evidence'
- requirements for recording and reporting incidents
- requirements for taking statements from witnesses
- rules of evidence that can be presented in court:
- contemporaneousness
  - must not be 'hearsay'
  - must not be opinion
  - must be relevant
  - must be admissible
- storage requirements for information that is susceptible to spoil or damage, such as film, tapes and images
- techniques for validating the accuracy and reliability of security information and evidence
- treatment of persons being interviewed
- types of documentation and exhibits that may be presented as evidence in court
- types of law:
  - civil
  - common
  - criminal
  - statute.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in an operational workplace environment or environment that reflects workplace conditions. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to prepare and present evidence in court
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- information technologies required to gather, organise and present security information and documentation
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations
- access to a court environment to allow achievement of the performance evidence.

# CPPSEC3125 Implement security procedures to protect critical infrastructure and public assets

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC1005A Apply critical infrastructure protection procedures. Significant changes made to the unit to reflect current industry needs.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to implement security procedures to protect critical infrastructure and public assets. Critical infrastructure is those physical facilities, supply chains, information technologies and communication networks which, if destroyed, degraded or rendered unavailable for an extended period, would significantly impact the social or economic well-being of the nation or affect Australia's ability to conduct national defence and ensure national security. Critical infrastructure provides essential services such as power, water, health services, communication and financial systems.

The unit includes:

- reviewing and complying with work instructions, workplace procedures and policies and legal rights and responsibilities when protecting critical infrastructure and public assets
- implementing security procedures to monitor security of the work area and maintain situational awareness, and identify and respond appropriately to indicators of terrorist or criminal activity and potential security threats in collaboration with others
- using communication equipment to report and receive instructions to respond to identified security threats.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria
