# **CPP Property Services Training Package**

**Release: 9.0**

## CONTENTS

<b>CPP Property Services Training Package.....</b>	<b>31</b>
<b>CPP20116 Certificate II in Surveying and Spatial Information Services .....</b>	<b>32</b>
<b>CPP20319 Certificate II in Technical Security.....</b>	<b>35</b>
<b>CPP20617 Certificate II in Cleaning.....</b>	<b>39</b>
<b>CPP20218 Certificate II in Security Operations .....</b>	<b>42</b>
<b>CPP30119 Certificate III in Urban Pest Management.....</b>	<b>45</b>
<b>CPP30216 Certificate III in Surveying and Spatial Information Services.....</b>	<b>48</b>
<b>CPP30316 Certificate III in Cleaning Operations.....</b>	<b>51</b>
<b>CPP30416 Certificate III in Strata Community Management .....</b>	<b>54</b>
<b>CPP30519 Certificate III in Technical Security .....</b>	<b>56</b>
<b>CPP30619 Certificate III in Investigative Services.....</b>	<b>59</b>
<b>CPP31218 Certificate III in Swimming Pool and Spa Service.....</b>	<b>63</b>
<b>CPP31318 Certificate III in Security Operations.....</b>	<b>66</b>
<b>CPP31418 Certificate III in Close Protection Operations .....</b>	<b>70</b>
<b>CPP31519 Certificate III in Real Estate Practice.....</b>	<b>73</b>
<b>CPP40115 Certificate IV in Building Design Drafting .....</b>	<b>77</b>
<b>CPP40216 Certificate IV in Surveying.....</b>	<b>80</b>
<b>CPP40316 Certificate IV in Spatial Information Services.....</b>	<b>83</b>
<b>CPP40416 Certificate IV in Cleaning Management .....</b>	<b>86</b>
<b>CPP40516 Certificate IV in Strata Community Management.....</b>	<b>88</b>
<b>CPP40719 Certificate IV in Security Management .....</b>	<b>92</b>
<b>CPP41119 Certificate IV in Home Energy Efficiency and Sustainability .....</b>	<b>96</b>
<b>CPP41319 Certificate IV in Swimming Pool and Spa Service .....</b>	<b>101</b>
<b>CPP41419 Certificate IV in Real Estate Practice .....</b>	<b>105</b>
<b>CPP41519 Certificate IV in Security Risk Analysis .....</b>	<b>112</b>
<b>CPP41619 Certificate IV in Urban Pest Management .....</b>	<b>116</b>
<b>CPP50116 Diploma of Surveying.....</b>	<b>119</b>
<b>CPP50216 Diploma of Spatial Information Services.....</b>	<b>122</b>
<b>CPP50316 Diploma of Strata Community Management.....</b>	<b>125</b>
<b>CPP50619 Diploma of Security Risk Management .....</b>	<b>128</b>
<b>CPP51119 Diploma of Property (Agency Management) .....</b>	<b>131</b>
<b>CPP60116 Advanced Diploma of Surveying .....</b>	<b>135</b>
<b>CPPCOM4001 Manage own work, professional development and ethical behaviour .....</b>	<b>138</b>
<b>Assessment Requirements for CPPCOM4001 Manage own work, professional development and ethical behaviour.....</b>	<b>141</b>
<b>CPPCOM4002 Implement safe work practices in the property industry .....</b>	<b>143</b>
<b>Assessment Requirements for CPPCOM4002 Implement safe work practices in the property industry.....</b>	<b>146</b>
<b>CPPDSM3009 Maintain workplace safety in the property industry .....</b>	<b>148</b>
<b>Assessment Requirements for CPPDSM3009 Maintain workplace safety in the property industry .....</b>	<b>152</b>
<b>CPPDSM3010 Meet customer needs and expectations in the property industry.....</b>	<b>154</b>
<b>Assessment Requirements for CPPDSM3010 Meet customer needs and expectations in the property industry.....</b>	<b>158</b>
<b>CPPDSM3011 Monitor building facilities.....</b>	<b>160</b>
<b>Assessment Requirements for CPPDSM3011 Monitor building facilities .....</b>	<b>164</b>
<b>CPPDSM3016 Work in the property industry.....</b>	<b>166</b>
<b>Assessment Requirements for CPPDSM3016 Work in the property industry.....</b>	<b>172</b>
<b>CPPDSM3019 Communicate with clients in the property industry .....</b>	<b>175</b>

**Assessment Requirements for CPPDSM3019 Communicate with clients in the property industry .....179**

**CPPDSM4020 Present at tribunals.....182**

**Assessment Requirements for CPPDSM4020 Present at tribunals .....187**

**CPPDSM4026 Analyse property and facility information .....189**

**Assessment Requirements for CPPDSM4026 Analyse property and facility information 193**

**CPPDSM4042 Coordinate construction contract.....195**

**Assessment Requirements for CPPDSM4042 Coordinate construction contract .....199**

**CPPDSM4044 Coordinate maintenance and repair of properties and facilities .....202**

**Assessment Requirements for CPPDSM4044 Coordinate maintenance and repair of properties and facilities.....206**

**CPPDSM4049 Implement maintenance program for managed properties .....209**

**Assessment Requirements for CPPDSM4049 Implement maintenance program for managed properties .....215**

**CPPDSM4057 Monitor a safe workplace in the property industry .....218**

**Assessment Requirements for CPPDSM4057 Monitor a safe workplace in the property industry .....223**

**CPPDSM4063 Participate in developing and establishing property or facility contracts 225**

**Assessment Requirements for CPPDSM4063 Participate in developing and establishing property or facility contracts .....229**

**CPPDSM4074 Select and appoint contractors in the property industry .....231**

**Assessment Requirements for CPPDSM4074 Select and appoint contractors in the property industry.....235**

**CPPDSM5006 Coordinate customer service activities in the property industry.....237**

**Assessment Requirements for CPPDSM5006 Coordinate customer service activities in the property industry.....241**

**CPPDSM5009 Coordinate risk management systems in the property industry .....244**

**Assessment Requirements for CPPDSM5009 Coordinate risk management systems in the property industry.....248**

**CPPDSM5018 Ensure a safe workplace in the property industry .....251**

**Assessment Requirements for CPPDSM5018 Ensure a safe workplace in the property industry .....257**

**CPPHES4001 Research and assess impact of building elements on thermal performance of residential buildings.....260**

**Assessment Requirements for CPPHES4001 Research and assess impact of building elements on thermal performance of residential buildings .....263**

**CPPHES4002 Advise clients on thermal performance of residential buildings .....266**

**Assessment Requirements for CPPHES4002 Advise clients on thermal performance of residential buildings.....270**

**CPPHES4003 Operate and maintain computer system to support thermal performance assessments .....273**

**Assessment Requirements for CPPHES4003 Operate and maintain computer system to support thermal performance assessments .....277**

**CPPHES4004 Conduct thermal performance assessment of residential buildings .....279**

**Assessment Requirements for CPPHES4004 Conduct thermal performance assessment of residential buildings.....283**

**CPPHES4005 Assess household energy use and efficiency improvements .....286**

**Assessment Requirements for CPPHES4005 Assess household energy use and efficiency improvements .....289**

**CPPHES4006 Assess household water use and efficiency improvements .....291**

**Assessment Requirements for CPPHES4006 Assess household water use and efficiency improvements .....295**

**CPPHES4007 Assess thermal performance of existing residential buildings .....298**

**Assessment Requirements for CPPHES4007 Assess thermal performance of existing residential buildings.....301**

**CPPHES4008 Assess household waste generation and waste management improvements 303**

**Assessment Requirements for CPPHES4008 Assess household waste generation and waste management improvements .....306**

**CPPHES4009 Promote the adoption of home sustainability practices .....308**

**Assessment Requirements for CPPHES4009 Promote the adoption of home sustainability practices.....311**

**CPPHES5001 Conduct thermal performance assessment of complex residential buildings 313**

**Assessment Requirements for CPPHES5001 Conduct thermal performance assessment of complex residential buildings .....317**

**CPPINV3026 Work effectively in investigative services.....320**

**Assessment Requirements for CPPINV3026 Work effectively in investigative services ..323**

**CPPINV3027 Develop investigation plans .....325**

**Assessment Requirements for CPPINV3027 Develop investigation plans .....328**

**CPPINV3028 Investigate and locate subjects.....330**

**Assessment Requirements for CPPINV3028 Investigate and locate subjects .....333**

**CPPINV3029 Provide quality investigative services to clients.....335**

**Assessment Requirements for CPPINV3029 Provide quality investigative services to clients.....338**

**CPPINV3030 Conduct factual investigations.....340**

**Assessment Requirements for CPPINV3030 Conduct factual investigations .....343**

**CPPINV3031 Conduct interviews and take statements to support investigations .....345**

**Assessment Requirements for CPPINV3031 Conduct interviews and take statements to support investigations .....348**

**CPPINV3032 Develop factual investigation reports.....350**

**Assessment Requirements for CPPINV3032 Develop factual investigation reports .....353**

**CPPINV3033 Conduct covert surveillance operations.....355**

**Assessment Requirements for CPPINV3033 Conduct covert surveillance operations.....358**

**CPPINV3034 Organise and operate surveillance vehicles.....361**

**Assessment Requirements for CPPINV3034 Organise and operate surveillance vehicles364**

**CPPINV3035 Develop surveillance investigation reports.....367**

**Assessment Requirements for CPPINV3035 Develop surveillance investigation reports 370**

**CPPINV4013 Undertake case management of investigations.....372**

**Assessment Requirements for CPPINV4013 Undertake case management of investigations 375**

**CPPREP3001 Comply with ethical practice in real estate.....377**

**Assessment Requirements for CPPREP3001 Comply with ethical practice in real estate379**

**CPPREP3002 Communicate effectively to support customer service in real estate.....381**

**Assessment Requirements for CPPREP3002 Communicate effectively to support customer service in real estate .....383**

**CPPREP3003 Access and process property information in real estate.....386**

**Assessment Requirements for CPPREP3003 Access and process property information in real estate.....388**

**CPPREP3101 Assist in listing and marketing properties for lease .....390**

**Assessment Requirements for CPPREP3101 Assist in listing and marketing properties for lease.....393**

**CPPREP3102 Assist in listing and marketing properties for sale.....395**

**Assessment Requirements for CPPREP3102 Assist in listing and marketing properties for sale.....398**

**CPPREP3103 Assist with the sale of properties.....400**

**Assessment Requirements for CPPREP3103 Assist with the sale of properties.....402**

**CPPREP3104 Assist with maintaining and protecting condition of managed properties 405**

**Assessment Requirements for CPPREP3104 Assist with maintaining and protecting condition of managed properties.....408**

**CPPREP3105 Assist with property inspection.....410**

**Assessment Requirements for CPPREP3105 Assist with property inspection.....412**

**CPPREP4001 Prepare for professional practice in real estate .....414**

**Assessment Requirements for CPPREP4001 Prepare for professional practice in real estate.....417**

**CPPREP4002 Access and interpret ethical practice in real estate.....420**

**Assessment Requirements for CPPREP4002 Access and interpret ethical practice in real estate.....423**

**CPPREP4003 Access and interpret legislation in real estate.....426**

**Assessment Requirements for CPPREP4003 Access and interpret legislation in real estate.....428**

**CPPREP4004 Establish marketing and communication profiles in real estate .....432**

**Assessment Requirements for CPPREP4004 Establish marketing and communication profiles in real estate .....435**

**CPPREP4005 Prepare to work with real estate trust accounts .....437**

**Assessment Requirements for CPPREP4005 Prepare to work with real estate trust accounts .....439**

**CPPREP4101 Appraise property for sale or lease .....441**

**Assessment Requirements for CPPREP4101 Appraise property for sale or lease.....444**

**CPPREP4102 Market property.....447**

**Assessment Requirements for CPPREP4102 Market property.....450**

**CPPREP4103 Establish vendor relationships .....452**

**Assessment Requirements for CPPREP4103 Establish vendor relationships.....455**

**CPPREP4104 Establish buyer relationships.....457**

**Assessment Requirements for CPPREP4104 Establish buyer relationships.....459**

**CPPREP4105 Sell property .....461**

**Assessment Requirements for CPPREP4105 Sell property.....465**

**CPPREP4121 Establish landlord relationships.....467**

**Assessment Requirements for CPPREP4121 Establish landlord relationships .....470**

**CPPREP4122 Manage tenant relationships .....473**

**Assessment Requirements for CPPREP4122 Manage tenant relationships.....476**

**CPPREP4123 Manage tenancy.....479**

**Assessment Requirements for CPPREP4123 Manage tenancy .....483**

**CPPREP4124 End tenancy.....485**

**Assessment Requirements for CPPREP4124 End tenancy.....488**

**CPPREP4125 Transact in trust accounts.....491**

**Assessment Requirements for CPPREP4125 Transact in trust accounts .....494**

**CPPREP4141 Establish and maintain property management portfolio.....496**

**Assessment Requirements for CPPREP4141 Establish and maintain property management portfolio.....499**

**CPPREP4142 Promote property management products and services.....501**

**Assessment Requirements for CPPREP4142 Promote property management products and services .....504**

**CPPREP4161 Undertake pre-auction processes .....506**

**Assessment Requirements for CPPREP4161 Undertake pre-auction processes.....509**

**CPPREP4162 Conduct and complete sale by auction .....511**

**Assessment Requirements for CPPREP4162 Conduct and complete sale by auction.....514**

**CPPREP4163 Complete post-auction process and contract execution.....517**

**Assessment Requirements for CPPREP4163 Complete post-auction process and contract execution.....520**

**CPPREP4171 Represent buyer in sales process.....522**

**Assessment Requirements for CPPREP4171 Represent buyer in sales process.....524**

**CPPREP4172 Develop and promote property industry knowledge - buyer's agent .....526**  
**Assessment Requirements for CPPREP4172 Develop and promote property industry knowledge - buyer's agent.....528**  
**CPPREP4173 Complete purchase of property as buyer’s agent .....530**  
**Assessment Requirements for CPPREP4173 Complete purchase of property as buyer’s agent.....532**  
**CPPREP4181 Manage onsite residential property.....534**  
**Assessment Requirements for CPPREP4181 Manage onsite residential property .....536**  
**CPPREP4201 Appraise commercial property .....538**  
**Assessment Requirements for CPPREP4201 Appraise commercial property.....540**  
**CPPREP4202 Establish and maintain vendor and lessor relationships and networks ....542**  
**Assessment Requirements for CPPREP4202 Establish and maintain vendor and lessor relationships and networks .....545**  
**CPPREP4203 Complete commercial property sale.....547**  
**Assessment Requirements for CPPREP4203 Complete commercial property sale .....549**  
**CPPREP4204 Establish commercial property lease.....551**  
**Assessment Requirements for CPPREP4204 Establish commercial property lease .....554**  
**CPPREP4231 Manage commercial property maintenance .....557**  
**Assessment Requirements for CPPREP4231 Manage commercial property maintenance 560**  
**CPPREP4232 Manage commercial property financial reports .....562**  
**Assessment Requirements for CPPREP4232 Manage commercial property financial reports .....564**  
**CPPREP4233 Manage lessee relationships - commercial.....566**  
**Assessment Requirements for CPPREP4233 Manage lessee relationships - commercial 569**  
**CPPREP4234 Manage lessor relationships - commercial.....571**  
**Assessment Requirements for CPPREP4234 Manage lessor relationships - commercial 573**  
**CPPREP4235 End commercial property lease.....575**  
**Assessment Requirements for CPPREP4235 End commercial property lease .....578**  
**CPPREP4261 Appraise business for sale .....580**  
**Assessment Requirements for CPPREP4261 Appraise business for sale.....583**  
**CPPREP4262 Establish vendor relationships in business broking.....585**  
**Assessment Requirements for CPPREP4262 Establish vendor relationships in business broking .....588**  
**CPPREP4263 Manage buyer relationships in business broking.....590**  
**Assessment Requirements for CPPREP4263 Manage buyer relationships in business broking .....592**  
**CPPREP4264 Manage the sales process in business broking .....594**  
**Assessment Requirements for CPPREP4264 Manage the sales process in business broking 597**  
**CPPREP4301 Confirm and market livestock for sale .....599**  
**Assessment Requirements for CPPREP4301 Confirm and market livestock for sale.....602**  
**CPPREP4302 Prepare livestock for sale .....604**  
**Assessment Requirements for CPPREP4302 Prepare livestock for sale.....607**  
**CPPREP4303 Establish vendor and buyer relationships in livestock sale .....609**  
**Assessment Requirements for CPPREP4303 Establish vendor and buyer relationships in livestock sale .....612**  
**CPPREP4304 Complete sales process - livestock .....614**  
**Assessment Requirements for CPPREP4304 Complete sales process - livestock.....617**  
**CPPREP4501 Prepare to complete the sales process - off the plan properties .....619**  
**Assessment Requirements for CPPREP4501 Prepare to complete the sales process - off the plan properties.....621**  
**CPPREP4502 Support providers of social and community housing.....623**  
**Assessment Requirements for CPPREP4502 Support providers of social and community housing .....625**

CPPREP4503 Present at hearings in real estate.....	627
Assessment Requirements for CPPREP4503 Present at hearings in real estate .....	630
CPPREP4504 Deliver presentations to clients in real estate.....	632
Assessment Requirements for CPPREP4504 Deliver presentations to clients in real estate.....	634
CPPREP4505 Value goods, chattels, plant and equipment .....	636
Assessment Requirements for CPPREP4505 Value goods, chattels, plant and equipment.....	639
CPPREP4506 Manage offsite and lone workers safety in real estate.....	641
Assessment Requirements for CPPREP4506 Manage offsite and lone worker safety in real estate.....	643
CPPREP4507 Provide property sustainability information in real estate .....	645
Assessment Requirements for CPPREP4507 Provide property sustainability information in real estate.....	647
CPPREP4508 Conduct livestock auction.....	649
Assessment Requirements for CPPREP4508 Conduct livestock auction.....	652
CPPREP4509 Auction goods, chattels or equipment .....	655
Assessment Requirements for CPPREP4509 Auction goods, chattels or equipment .....	658
CPPREP4510 Manage short-term or holiday letting .....	661
Assessment Requirements for CPPREP4510 Manage short-term or holiday letting.....	664
CPPREP5001 Manage compliance in the property industry.....	666
Assessment Requirements for CPPREP5001 Manage compliance in the property industry.....	669
CPPREP5002 Establish and monitor property industry trust account management practices.....	671
Assessment Requirements for CPPREP5002 Establish and monitor property industry trust account management practices.....	674
CPPREP5003 Manage ethical practice in the property industry .....	676
Assessment Requirements for CPPREP5003 Manage ethical practice in the property industry .....	678
CPPREP5004 Manage a safe workplace in the property industry .....	680
Assessment Requirements for CPPREP5004 Manage a safe workplace in the property industry .....	682
CPPREP5005 Manage teams in the property industry .....	684
Assessment Requirements for CPPREP5005 Manage teams in the property industry.....	687
CPPREP5006 Manage operational finances in the property industry.....	689
Assessment Requirements for CPPREP5006 Manage operational finances in the property industry .....	692
CPPREP5007 Develop a strategic business plan in the property industry .....	694
Assessment Requirements for CPPREP5007 Develop a strategic business plan in the property industry.....	696
CPPREP5008 Market the property agency.....	699
Assessment Requirements for CPPREP5008 Market the property agency.....	701
CPPREP5009 Develop a marketing and service strategy in real estate .....	703
Assessment Requirements for CPPREP5009 Develop a marketing and service strategy in real estate.....	705
CPPREP5010 Manage customer service activities in the property industry .....	707
Assessment Requirements for CPPREP5010 Manage customer service activities in the property industry.....	710
CPPREP5201 Develop and maintain commercial property market intelligence .....	712
Assessment Requirements for CPPREP5201 Develop and maintain commercial property market intelligence.....	714
CPPREP5311 Develop and maintain rural property market knowledge and intelligence.....	716
Assessment Requirements for CPPREP5311 Develop and maintain rural property market knowledge and intelligence .....	718
CPPSEC2021 Install security equipment and systems .....	720

Assessment Requirements for CPPSEC2021 Install security equipment and systems.....723  
 CPPSEC2022 Install electronic locks and locking systems.....726  
 Assessment Requirements for CPPSEC2022 Install electronic locks and locking systems 729  
 CPPSEC2023 Install video surveillance systems and equipment.....731  
 Assessment Requirements for CPPSEC2023 Install video surveillance systems and  
 equipment.....734  
 CPPSEC2024 Monitor and respond to electronic information from security equipment  
 and systems.....736  
 Assessment Requirements for CPPSEC2024 Monitor and respond to electronic  
 information from security equipment and systems .....739  
 CPPSEC2025 Sell security products and services .....741  
 Assessment Requirements for CPPSEC2025 Sell security products and services.....744  
 CPPSEC2026 Perform routine maintenance on security equipment and systems .....746  
 Assessment Requirements for CPPSEC2026 Perform routine maintenance on security  
 equipment and systems .....749  
 CPPSEC2102 Apply legal and procedural requirements to work effectively within a  
 security team.....752  
 Assessment Requirements for CPPSEC2102 Apply legal and procedural requirements to  
 work effectively within a security team.....755  
 CPPSEC3024 Install advanced technology security equipment and systems .....758  
 Assessment Requirements for CPPSEC3024 Install advanced technology security  
 equipment and systems .....762  
 CPPSEC3025 Diagnose faults in advanced technology security equipment and systems.765  
 Assessment Requirements for CPPSEC3025 Diagnose faults in advanced technology  
 security equipment and systems.....768  
 CPPSEC3035 Recommend technical security requirements to meet client needs .....771  
 Assessment Requirements for CPPSEC3035 Recommend technical security requirements  
 to meet client needs .....774  
 CPPSEC3036 Program and configure security equipment and systems .....776  
 Assessment Requirements for CPPSEC3036 Program and configure security equipment  
 and systems.....779  
 CPPSEC3037 Test installed security equipment and systems .....782  
 Assessment Requirements for CPPSEC3037 Test installed security equipment and systems 785  
 CPPSEC3038 Commission and decommission security equipment and systems .....788  
 Assessment Requirements for CPPSEC3038 Commission and decommission security  
 equipment and systems .....792  
 CPPSEC3039 Diagnose faults in electronic security equipment and systems .....795  
 Assessment Requirements for CPPSEC3039 Diagnose faults in electronic security  
 equipment and systems .....798  
 CPPSEC3040 Coordinate installation of security equipment and systems .....801  
 Assessment Requirements for CPPSEC3040 Coordinate installation of security equipment  
 and systems.....804  
 CPPSEC3041 Conduct routine service of security equipment and systems.....806  
 Assessment Requirements for CPPSEC3041 Conduct routine service of security  
 equipment and systems .....809  
 CPPSEC3042 Diagnose faults in video surveillance systems and equipment.....812  
 Assessment Requirements for CPPSEC3042 Diagnose faults in video surveillance systems  
 and equipment.....815  
 CPPSEC3043 Establish and test electronic monitoring parameters for security equipment  
 and systems.....818  
 Assessment Requirements for CPPSEC3043 Establish and test electronic monitoring  
 parameters for security equipment and systems .....821  
 CPPSEC3044 Conduct routine service of electronic locks and locking systems .....823

**Assessment Requirements for CPPSEC3044 Conduct routine service of electronic locks and locking systems .....826**

**CPPSEC3045 Assess security equipment and systems to specify required modifications 828**

**Assessment Requirements for CPPSEC3045 Assess security equipment and systems to specify required modifications .....831**

**CPPSEC3046 Develop security system configurations and specifications for client sites 833**

**Assessment Requirements for CPPSEC3046 Develop security system configurations and specifications for client sites.....836**

**CPPSEC3047 Provide estimate and quote on security system installations.....838**

**Assessment Requirements for CPPSEC3047 Provide estimate and quote on security system installations .....841**

**CPPSEC3053 Implement measures to secure IP networked security equipment and systems.....843**

**Assessment Requirements for CPPSEC3053 Implement measures to secure IP networked security equipment and systems.....846**

**CPPSEC4001 Manage work health and safety in the security work environment .....848**

**Assessment Requirements for CPPSEC4001 Manage work health and safety in the security work environment .....851**

**CPPSEC4003 Assess and advise on client security needs .....853**

**Assessment Requirements for CPPSEC4003 Assess and advise on client security needs.856**

**CPPSEC4004 Supervise security operations .....858**

**Assessment Requirements for CPPSEC4004 Supervise security operations .....861**

**CPPSEC4005 Facilitate security operations briefing and debriefing processes.....863**

**Assessment Requirements for CPPSEC4005 Facilitate security operations briefing and debriefing processes.....866**

**CPPSEC4006 Conduct security risk assessment of client operations .....868**

**Assessment Requirements for CPPSEC4006 Conduct security risk assessment of client operations .....871**

**CPPSEC4007 Identify security threats and assess impact on client operations .....873**

**Assessment Requirements for CPPSEC4007 Identify security threats and assess impact on client operations.....876**

**CPPSEC4008 Assess and prepare security tender submissions.....878**

**Assessment Requirements for CPPSEC4008 Assess and prepare security tender submissions .....881**

**CPPSEC4009 Interpret electronic information from advanced technology security systems 883**

**Assessment Requirements for CPPSEC4009 Interpret electronic information from advanced technology security systems.....886**

**CPPSEC4010 Manage monitoring centre operations.....888**

**Assessment Requirements for CPPSEC4010 Manage monitoring centre operations .....891**

**CPPSEC4011 Manage field staff activity and incident response from control room .....893**

**Assessment Requirements for CPPSEC4011 Manage field staff activity and incident response from control room.....896**

**CPPSEC4012 Assess security vulnerabilities of assets .....899**

**Assessment Requirements for CPPSEC4012 Assess security vulnerabilities of assets ....902**

**CPPSEC4014 Commission and decommission networked security systems.....904**

**Assessment Requirements for CPPSEC4014 Commission and decommission networked security systems .....908**

**CPPSEC4015 Maintain networked security systems .....911**

**Assessment Requirements for CPPSEC4015 Maintain networked security systems .....915**

**CPPSEC4016 Install networked security systems .....918**

**Assessment Requirements for CPPSEC4016 Install networked security systems.....921**

**CPPSEC4017 Design security system configurations and specifications .....924**

**Assessment Requirements for CPPSEC4017 Design security system configurations and specifications.....927**

**CPPSEC4018 Program and configure networked security systems .....929**

**Assessment Requirements for CPPSEC4018 Program and configure networked security systems.....932**

**CPPSEC4019 Diagnose faults in networked security systems .....934**

**Assessment Requirements for CPPSEC4019 Diagnose faults in networked security systems 937**

**CPPSEC4020 Advise on advanced technology security systems to meet client needs .....940**

**Assessment Requirements for CPPSEC4020 Advise on advanced technology security systems to meet client needs .....943**

**CPPSEC4021 Develop standard operating procedures for advanced technology security systems.....945**

**Assessment Requirements for CPPSEC4021 Develop standard operating procedures for advanced technology security systems.....948**

**CPPSEC4022 Establish and implement ethics and governance arrangements for security businesses.....950**

**Assessment Requirements for CPPSEC4022 Establish and implement ethics and governance arrangements for security businesses .....953**

**CPPSEC4023 Implement contracting arrangements for security businesses .....956**

**Assessment Requirements for CPPSEC4023 Implement contracting arrangements for security businesses .....959**

**CPPSEC4024 Assess security of crowded places.....961**

**Assessment Requirements for CPPSEC4024 Assess security of crowded places .....964**

**CPPSEC4025 Advise on operational requirements to maintain crowded place security.967**

**Assessment Requirements for CPPSEC4025 Advise on operational requirements to maintain crowded place security.....970**

**CPPSEC5002 Coordinate security operations .....973**

**Assessment Requirements for CPPSEC5002 Coordinate security operations .....976**

**CPPSEC5003 Assess security risk management options .....978**

**Assessment Requirements for CPPSEC5003 Assess security risk management options..981**

**CPPSEC5004 Develop security risk management plans .....984**

**Assessment Requirements for CPPSEC5004 Develop security risk management plans ..988**

**CPPSEC5005 Implement security risk management plans .....991**

**Assessment Requirements for CPPSEC5005 Implement security risk management plans 994**

 CPPCLO4001 Induct cleaning staff .....2202  
 Assessment Requirements for CPPCLO4001 Induct cleaning staff .....2207  
 CPPCLO4002 Develop, implement and monitor new cleaning techniques.....2209  
 Assessment Requirements for CPPCLO4002 Develop, implement and monitor new cleaning techniques .....2213  
 CPPCLO4003 Manage cleaning equipment maintenance and supply .....2216  
 Assessment Requirements for CPPCLO4003 Manage cleaning equipment maintenance and supply .....2220  
 CPPCLO4022 Schedule and monitor cleaning tasks.....2222  
 Assessment Requirements for CPPCLO4022 Schedule and monitor cleaning tasks ....2227  
 CPPCLO4024 Manage the supply of cleaning stores to the work site .....2230  
 Assessment Requirements for CPPCLO4024 Manage the supply of cleaning stores to the work site .....2235  
 CPPCLO4025 Provide quotation for cleaning services .....2238  
 Assessment Requirements for CPPCLO4025 Provide quotation for cleaning services..2242  
 CPPCMN2002 Participate in workplace safety arrangements .....2245  
 Assessment Requirements for CPPCMN2002 Participate in workplace safety arrangements .....2248

**CPPCMN2004 Provide basic client services.....2250**  
**Assessment Requirements for CPPCMN2004 Provide basic client services .....2253**  
**CPPCMN3004 Respond to enquiries and complaints .....2255**  
**Assessment Requirements for CPPCMN3004 Respond to enquiries and complaints ....2261**  
**CPPCMN3005 Complete client documentation .....2264**  
**Assessment Requirements for CPPCMN3005 Complete client documentation.....2267**  
**CPPCMN3006 Provide effective client service.....2269**  
**Assessment Requirements for CPPCMN3006 Provide effective client service .....2273**  
**CPPCMN3007 Support leadership in the workplace .....2276**  
**Assessment Requirements for CPPCMN3007 Support leadership in the workplace ....2280**  
**CPPCMN4001 Develop workplace policies and procedures for sustainability .....2282**  
**Assessment Requirements for CPPCMN4001 Develop workplace policies and procedures**  
**for sustainability .....2286**  
**CPPCMN4002 Implement and monitor environmentally sustainable work practices...2288**  
**Assessment Requirements for CPPCMN4002 Implement and monitor environmentally**  
**sustainable work practices .....2293**  
**CPPCMN4003 Establish, develop and monitor teams .....2295**  
**Assessment Requirements for CPPCMN4003 Establish, develop and monitor teams ...2299**  
**CPPCMN4004 Develop and manage client relations.....2301**  
**Assessment Requirements for CPPCMN4004 Develop and manage client relations ....2306**  
**CPPCMN4007 Manage workplace safety arrangements.....2308**  
**Assessment Requirements for CPPCMN4007 Manage workplace safety arrangements 2315**  
**CPPCMN4008 Read plans, drawings and specifications for residential buildings .....2319**  
**Assessment Requirements for CPPCMN4008 Read plans, drawings and specifications for**  
**residential buildings.....2324**  
**CPPCMN4009 Develop team understanding of and commitment to sustainability .....2326**  
**Assessment Requirements for CPPCMN4009 Develop team understanding of and**  
**commitment to sustainability .....2331**  
**CPPCMN4012A Contribute to sustainable solutions throughout a building's life cycle 2333**  
**CPPCMN4013B Operate a sustainable business.....2340**  
**CPPCMN5001A Plan for a sustainable business.....2347**  
**CPPDSM3007 Identify risks and opportunities in the property industry .....2355**  
**Assessment Requirements for CPPDSM3007 Identify risks and opportunities in the**  
**property industry.....2359**  
**CPPDSM3017 Work in the strata community management sector.....2361**  
**Assessment Requirements for CPPDSM3017 Work in the strata community management**  
**sector .....2367**  
**CPPDSM3020 Source and extract information from strata plans.....2370**  
**Assessment Requirements for CPPDSM3020 Source and extract information from strata**  
**plans .....2374**  
**CPPDSM3021 Collect and process information relevant to strata communities .....2377**  
**Assessment Requirements for CPPDSM3021 Collect and process information relevant to**  
**strata communities.....2381**  
**CPPDSM4009 Interpret legislation to complete work in the property industry .....2384**  
**Assessment Requirements for CPPDSM4009 Interpret legislation to complete work in the**  
**property industry.....2390**  
**CPPDSM4027 Analyse resource use in building operations.....2392**  
**Assessment Requirements for CPPDSM4027 Analyse resource use in building operations 2396**  
**CPPDSM4028 Identify and analyse risks and opportunities in the property industry ..2398**  
**Assessment Requirements for CPPDSM4028 Identify and analyse risks and opportunities**  
**in the property industry .....2402**  
**CPPDSM4031 Arrange lease of space.....2404**  
**Assessment Requirements for CPPDSM4031 Arrange lease of space .....2408**

**CPPDSM4034 Negotiate and implement strata community management agreement ...2411**  
**Assessment Requirements for CPPDSM4034 Negotiate and implement strata community management agreement.....2416**  
**CPPDSM4040 Contribute to asset life cycle maintenance strategy .....2419**  
**Assessment Requirements for CPPDSM4040 Contribute to asset life cycle maintenance strategy.....2423**  
**CPPDSM4045 Facilitate meetings in the property industry.....2426**  
**Assessment Requirements for CPPDSM4045 Facilitate meetings in the property industry2430**  
**CPPDSM4047 Implement and monitor procurement process.....2433**  
**Assessment Requirements for CPPDSM4047 Implement and monitor procurement process .....2436**  
**CPPDSM4048 Implement customer service strategies in the property industry .....2439**  
**Assessment Requirements for CPPDSM4048 Implement customer service strategies in the property industry.....2443**  
**CPPDSM4055 Maintain asset management system .....2445**  
**Assessment Requirements for CPPDSM4055 Maintain asset management system.....2449**  
**CPPDSM4056 Manage conflicts and disputes in the property industry .....2451**  
**Assessment Requirements for CPPDSM4056 Manage conflicts and disputes in the property industry.....2455**  
**CPPDSM4066 Plan and coordinate property and facility inspection .....2458**  
**Assessment Requirements for CPPDSM4066 Plan and coordinate property and facility inspection.....2462**  
**CPPDSM4071 Promote process improvement in the property industry .....2465**  
**Assessment Requirements for CPPDSM4071 Promote process improvement in the property industry.....2469**  
**CPPDSM4072 Provide leadership in the property industry.....2472**  
**Assessment Requirements for CPPDSM4072 Provide leadership in the property industry2477**  
**CPPDSM4082 Monitor service requirements of owners and occupiers in strata communities.....2480**  
**Assessment Requirements for CPPDSM4082 Monitor service requirements of owners and occupiers in strata communities.....2484**  
**CPPDSM4083 Terminate strata community.....2486**  
**Assessment Requirements for CPPDSM4083 Terminate strata community .....2490**  
**CPPDSM4084 Administer insurance for strata communities .....2492**  
**Assessment Requirements for CPPDSM4084 Administer insurance for strata communities2497**  
**CPPDSM4085 Handle strata community funds held on trust .....2499**  
**Assessment Requirements for CPPDSM4085 Handle strata community funds held on trust2502**  
**CPPDSM4086 Oversee preparation of strata community budgets.....2504**  
**Assessment Requirements for CPPDSM4086 Oversee preparation of strata community budgets .....2508**  
**CPPDSM4087 Facilitate operation of owners committee.....2510**  
**Assessment Requirements for CPPDSM4087 Facilitate operation of owners committee2514**  
**CPPDSM5007 Coordinate construction or renovation of facilities .....2516**  
**Assessment Requirements for CPPDSM5007 Coordinate construction or renovation of facilities.....2520**  
**CPPDSM5025 Maintain public relations in the property industry .....2523**  
**Assessment Requirements for CPPDSM5025 Maintain public relations in the property industry .....2527**  
**CPPDSM5026 Manage a consultant property project team.....2529**  
**Assessment Requirements for CPPDSM5026 Manage a consultant property project team2533**  
**CPPDSM5027 Provide facilities and amenities for property users.....2535**  
**Assessment Requirements for CPPDSM5027 Provide facilities and amenities for property users .....2540**

**CPPDSM5029 Manage client relationships and networks in the property industry.....2543**  
**Assessment Requirements for CPPDSM5029 Manage client relationships and networks in the property industry.....2547**  
**CPPDSM5030 Manage projects in the property industry.....2549**  
**Assessment Requirements for CPPDSM5030 Manage projects in the property industry2554**  
**CPPDSM5039 Meet legal requirements in managing strata communities .....2556**  
**Assessment Requirements for CPPDSM5039 Meet legal requirements in managing strata communities.....2560**  
**CPPDSM5040 Meet ethical and professional standards in managing strata communities2562**  
**Assessment Requirements for CPPDSM5040 Meet ethical and professional standards in managing strata communities .....2566**  
**CPPDSM6007 Develop life cycle asset management plans.....2568**  
**Assessment Requirements for CPPDSM6007 Develop life cycle asset management plans2572**  
**CPPSEC2101 Apply effective communication skills to maintain security.....2574**  
**Assessment Requirements for CPPSEC2101 Apply effective communication skills to maintain security .....2577**  
**CPPSEC2103 Apply WHS, emergency response and evacuation procedures to maintain security .....2579**  
**Assessment Requirements for CPPSEC2103 Apply WHS, emergency response and evacuation procedures to maintain security .....2583**  
**CPPSEC2104 Apply risk assessment to select and carry out response to security risk situations.....2586**  
**Assessment Requirements for CPPSEC2104 Apply risk assessment to select and carry out response to security risk situations.....2589**  
**CPPSEC2105 Provide quality services to a range of security clients.....2592**  
**Assessment Requirements for CPPSEC2105 Provide quality services to a range of security clients.....2596**  
**CPPSEC2106 Protect self and others using basic defensive techniques.....2598**  
**Assessment Requirements for CPPSEC2106 Protect self and others using basic defensive techniques.....2601**  
**CPPSEC2107 Patrol premises to monitor property and maintain security .....2604**  
**Assessment Requirements for CPPSEC2107 Patrol premises to monitor property and maintain security .....2607**  
**CPPSEC2108 Screen people, personal effects and items to maintain security.....2610**  
**Assessment Requirements for CPPSEC2108 Screen people, personal effects and items to maintain security .....2613**  
**CPPSEC2109 Monitor and control access and exit of persons and vehicles from premises2616**  
**Assessment Requirements for CPPSEC2109 Monitor and control access and exit of persons and vehicles from premises .....2619**  
**CPPSEC2110 Monitor and control individual and crowd behaviour to maintain security2622**  
**Assessment Requirements for CPPSEC2110 Monitor and control individual and crowd behaviour to maintain security .....2625**  
**CPPSEC2111 Apply security procedures to manage intoxicated persons .....2628**  
**Assessment Requirements for CPPSEC2111 Apply security procedures to manage intoxicated persons .....2631**  
**CPPSEC2112 Apply security procedures to remove persons from premises.....2634**  
**Assessment Requirements for CPPSEC2112 Apply security procedures to remove persons from premises.....2637**  
**CPPSEC2113 Escort and protect persons and valuables .....2640**  
**Assessment Requirements for CPPSEC2113 Escort and protect persons and valuables2643**  
**CPPSEC2114 Monitor electronic security equipment and respond to alarm events .....2645**  
**Assessment Requirements for CPPSEC2114 Monitor electronic security equipment and respond to alarm events.....2648**

**CPPSEC3101 Manage conflict and security risks using negotiation .....2650**  
**Assessment Requirements for CPPSEC3101 Manage conflict and security risks using negotiation.....2653**  
**CPPSEC3102 Maintain operational safety and security of work environment .....2655**  
**Assessment Requirements for CPPSEC3102 Maintain operational safety and security of work environment.....2658**  
**CPPSEC3103 Determine and implement response to security risk situation .....2661**  
**Assessment Requirements for CPPSEC3103 Determine and implement response to security risk situation.....2664**  
**CPPSEC3104 Coordinate monitoring and control of individual and crowd behaviour.2667**  
**Assessment Requirements for CPPSEC3104 Coordinate monitoring and control of individual and crowd behaviour .....2670**  
**CPPSEC3105 Coordinate provision of quality security services to clients .....2673**  
**Assessment Requirements for CPPSEC3105 Coordinate provision of quality security services to clients.....2676**  
**CPPSEC3106 Gather, organise and present security information and documentation .2678**  
**Assessment Requirements for CPPSEC3106 Gather, organise and present security information and documentation.....2681**  
**CPPSEC3107 Monitor security and coordinate response from control rooms .....2683**  
**Assessment Requirements for CPPSEC3107 Monitor security and coordinate response from control rooms .....2686**  
**CPPSEC3108 Store, protect and dispose of security information .....2689**  
**Assessment Requirements for CPPSEC3108 Store, protect and dispose of security information.....2692**  
**CPPSEC3109 Use and maintain security databases and compile reports .....2695**  
**Assessment Requirements for CPPSEC3109 Use and maintain security databases and compile reports .....2698**  
**CPPSEC3110 Control persons using batons .....2700**  
**Assessment Requirements for CPPSEC3110 Control persons using batons.....2703**  
**CPPSEC3111 Restrain persons using handcuffs .....2706**  
**Assessment Requirements for CPPSEC3111 Restrain persons using handcuffs .....2709**  
**CPPSEC3112 Manage training and well-being of dogs for security functions .....2711**  
**Assessment Requirements for CPPSEC3112 Manage training and well-being of dogs for security functions .....2714**  
**CPPSEC3113 Handle dogs for security patrols.....2716**  
**Assessment Requirements for CPPSEC3113 Handle dogs for security patrols .....2719**  
**CPPSEC3114 Control security risk situations using fire arms.....2722**  
**Assessment Requirements for CPPSEC3114 Control security risk situations using fire arms .....2726**  
**CPPSEC3115 Carry, operate and maintain revolvers for security purposes.....2729**  
**Assessment Requirements for CPPSEC3115 Carry, operate and maintain revolvers for security purposes .....2733**  
**CPPSEC3116 Carry, operate and maintain semi-automatic pistols for security purposes2736**  
**Assessment Requirements for CPPSEC3116 Carry, operate and maintain semi-automatic pistols for security purposes.....2740**  
**CPPSEC3117 Carry, operate and maintain shotguns for security purposes .....2743**  
**Assessment Requirements for CPPSEC3117 Carry, operate and maintain shotguns for security purposes .....2747**  
**CPPSEC3118 Inspect and test cash-in-transit security equipment and rectify faults ....2750**  
**Assessment Requirements for CPPSEC3118 Inspect and test cash-in-transit security equipment and rectify faults .....2753**  
**CPPSEC3119 Implement cash-in-transit security procedures .....2756**

**Assessment Requirements for CPPSEC3119 Implement cash-in-transit security procedures .....2759**

**CPPSEC3120 Load and unload cash-in-transit in secured and unsecured environments2761**

**Assessment Requirements for CPPSEC3120 Load and unload cash-in-transit in secured and unsecured environments .....2764**

**CPPSEC3121 Control persons using empty hand techniques .....2766**

**Assessment Requirements for CPPSEC3121 Control persons using empty hand techniques2769**

**CPPSEC3122 Plan provision of close protection services.....2772**

**Assessment Requirements for CPPSEC3122 Plan provision of close protection services2776**

**CPPSEC3123 Implement close protection services .....2779**

**Assessment Requirements for CPPSEC3123 Implement close protection services.....2783**

**CPPSEC3124 Prepare and present evidence in court .....2786**

**Assessment Requirements for CPPSEC3124 Prepare and present evidence in court ....2789**

**CPPSEC3125 Implement security procedures to protect critical infrastructure and public assets.....2792**

**Assessment Requirements for CPPSEC3125 Implement security procedures to protect critical infrastructure and public assets .....2795**

**CPPSEC3126 Defend persons using spray .....2798**

**Assessment Requirements for CPPSEC3126 Defend persons using spray .....2801**

**CPPSEC3127 Conduct security screening using x-ray equipment.....2803**

**Assessment Requirements for CPPSEC3127 Conduct security screening using x-ray equipment.....2806**

**CPPSEC3128 Conduct security screening using walk-through metal detection equipment2809**

**Assessment Requirements for CPPSEC3128 Conduct security screening using walk-through metal detection equipment.....2812**

**CPPSEC3129 Conduct security screening using explosive trace detection equipment ..2815**

**Assessment Requirements for CPPSEC3129 Conduct security screening using explosive trace detection equipment.....2818**

**CPPSEC3130 Conduct security screening using hand-held metal detectors .....2821**

**Assessment Requirements for CPPSEC3130 Conduct security screening using hand-held metal detectors.....2824**

**CPPSEC3131 Select, use and maintain body armour for security purposes .....2827**

**Assessment Requirements for CPPSEC3131 Select, use and maintain body armour for security purposes .....2830**

**CPPSIS2012 Assist in collecting basic spatial data.....2833**

**Assessment Requirements for CPPSIS2012 Assist in collecting basic spatial data .....2836**

**CPPSIS2013 Store and retrieve basic spatial data .....2838**

**Assessment Requirements for CPPSIS2013 Store and retrieve basic spatial data .....2841**

**CPPSIS2015 Assist with surveying and spatial field activities .....2843**

**Assessment Requirements for CPPSIS2015 Assist with surveying and spatial field activities.....2846**

**CPPSIS2016 Assist with load transfers .....2848**

**Assessment Requirements for CPPSIS2016 Assist with load transfers .....2852**

**CPPSIS3011 Produce basic maps .....2854**

**Assessment Requirements for CPPSIS3011 Produce basic maps .....2857**

**CPPSIS3015 Collect basic surveying data.....2859**

**Assessment Requirements for CPPSIS3015 Collect basic surveying data .....2862**

**CPPSIS3016 Provide field support services for surveying and spatial projects.....2865**

**Assessment Requirements for CPPSIS3016 Provide field support services for surveying and spatial projects.....2869**

**CPPSIS3018 Transfer loads.....2871**

**Assessment Requirements for CPPSIS3018 Transfer loads .....2875**

**CPPSIS3019 Produce basic plans of surveys.....2878**

Assessment Requirements for CPPSIS3019 Produce basic plans of surveys .....2881

CPPSIS3020 Perform basic surveying computations .....2883

Assessment Requirements for CPPSIS3020 Perform basic surveying computations.....2886

CPPSIS3021 Visually interpret image data.....2888

Assessment Requirements for CPPSIS3021 Visually interpret image data .....2891

CPPSIS4022 Store and retrieve spatial data .....2894

Assessment Requirements for CPPSIS4022 Store and retrieve spatial data.....2897

CPPSIS4024 Source and assess spatial data.....2899

Assessment Requirements for CPPSIS4024 Source and assess spatial data .....2903

CPPSIS4025 Collect spatial data using GNSS.....2905

Assessment Requirements for CPPSIS4025 Collect spatial data using GNSS.....2909

CPPSIS4026 Digitally enhance and process image data.....2911

Assessment Requirements for CPPSIS4026 Digitally enhance and process image data 2914

CPPSIS4027 Organise surveying field services .....2917

Assessment Requirements for CPPSIS4027 Organise surveying field services.....2921

CPPSIS4030 Operate surveying equipment.....2923

Assessment Requirements for CPPSIS4030 Operate surveying equipment .....2927

CPPSIS4031 Perform surveying computations .....2930

Assessment Requirements for CPPSIS4031 Perform surveying computations .....2933

CPPSIS4032 Conduct field surveying operations.....2935

Assessment Requirements for CPPSIS4032 Conduct field surveying operations .....2939

CPPSIS4034 Maintain spatial data.....2941

Assessment Requirements for CPPSIS4034 Maintain spatial data .....2945

CPPSIS4035 Apply GIS software to solve spatial data problems .....2947

Assessment Requirements for CPPSIS4035 Apply GIS software to solve spatial data problems .....2952

CPPSIS4036 Operate spatial software applications .....2955

Assessment Requirements for CPPSIS4036 Operate spatial software applications.....2959

CPPSIS4037 Produce computer-aided drawings .....2962

Assessment Requirements for CPPSIS4037 Produce computer-aided drawings.....2966

CPPSIS4038 Prepare and present GIS data .....2969

Assessment Requirements for CPPSIS4038 Prepare and present GIS data.....2973

CPPSIS4039 Design and produce maps .....2976

Assessment Requirements for CPPSIS4039 Design and produce maps.....2980

CPPSIS4040 Collect spatial data using terrestrial technologies .....2982

Assessment Requirements for CPPSIS4040 Collect spatial data using terrestrial technologies .....2985

CPPSIS4041 Set out site and building works .....2987

Assessment Requirements for CPPSIS4041 Set out site and building works.....2991

CPPSIS5031 Plan spatial data collection .....2993

Assessment Requirements for CPPSIS5031 Plan spatial data collection .....2997

CPPSIS5032 Capture new spatial data .....3000

Assessment Requirements for CPPSIS5032 Capture new spatial data.....3005

CPPSIS5035 Obtain and validate spatial data .....3008

Assessment Requirements for CPPSIS5035 Obtain and validate spatial data.....3012

CPPSIS5036 Integrate spatial datasets .....3014

Assessment Requirements for CPPSIS5036 Integrate spatial datasets.....3019

CPPSIS5037 Maintain spatial data systems .....3022

Assessment Requirements for CPPSIS5037 Maintain spatial data systems.....3027

CPPSIS5038 Develop spatial databases .....3030

Assessment Requirements for CPPSIS5038 Develop spatial databases .....3035

CPPSIS5039 Plan and implement spatial projects .....3038

Assessment Requirements for CPPSIS5039 Plan and implement spatial projects.....3042

**CPPSIS5040 Interpret and collate spatial data.....3045**  
**Assessment Requirements for CPPSIS5040 Interpret and collate spatial data.....3049**  
**CPPSIS5043 Design spatial data storage systems .....3052**  
**Assessment Requirements for CPPSIS5043 Design spatial data storage systems .....3056**  
**CPPSIS5044 Develop subdivision survey designs for local government approval .....3058**  
**Assessment Requirements for CPPSIS5044 Develop subdivision survey designs for local government approval.....3063**  
**CPPSIS5046 Set out stormwater systems.....3067**  
**Assessment Requirements for CPPSIS5046 Set out stormwater systems .....3071**  
**CPPSIS5047 Conduct GNSS surveys.....3074**  
**Assessment Requirements for CPPSIS5047 Conduct GNSS surveys .....3078**  
**CPPSIS5048 Conduct engineering surveys .....3081**  
**Assessment Requirements for CPPSIS5048 Conduct engineering surveys.....3085**  
**CPPSIS5049 Plan and implement surveying projects .....3087**  
**Assessment Requirements for CPPSIS5049 Plan and implement surveying projects....3091**  
**CPPSIS5051 Apply land and planning law to surveying.....3093**  
**Assessment Requirements for CPPSIS5051 Apply land and planning law to surveying3098**  
**CPPSIS5052 Integrate surveying datasets .....3101**  
**Assessment Requirements for CPPSIS5052 Integrate surveying datasets .....3105**  
**CPPSIS5053 Perform advanced surveying computations .....3107**  
**Assessment Requirements for CPPSIS5053 Perform advanced surveying computations3111**  
**CPPSIS5054 Perform geodetic surveying computations .....3113**  
**Assessment Requirements for CPPSIS5054 Perform geodetic surveying computations 3117**  
**CPPSIS5057 Conduct precision surveys .....3120**  
**Assessment Requirements for CPPSIS5057 Conduct precision surveys.....3124**  
**CPPSIS5058 Conduct geodetic surveys.....3127**  
**Assessment Requirements for CPPSIS5058 Conduct geodetic surveys .....3131**  
**CPPSIS5060 Develop spreadsheets for spatial data .....3134**  
**Assessment Requirements for CPPSIS5060 Develop spreadsheets for spatial data.....3138**  
**CPPSIS5061 Locate underground services in surveying practice .....3141**  
**Assessment Requirements for CPPSIS5061 Locate underground services in surveying practice.....3145**  
**CPPSIS5062 Conduct photogrammetric mapping.....3148**  
**Assessment Requirements for CPPSIS5062 Conduct photogrammetric mapping .....3152**  
**CPPSIS5064 Coordinate GIS data manipulation and analysis.....3155**  
**Assessment Requirements for CPPSIS5064 Coordinate GIS data manipulation and analysis .....3159**  
**CPPSIS5065 Design basic engineering structures .....3162**  
**Assessment Requirements for CPPSIS5065 Design basic engineering structures.....3168**  
**CPPSIS6021 Conduct open pit mine surveys.....3172**  
**Assessment Requirements for CPPSIS6021 Conduct open pit mine surveys.....3177**  
**CPPSIS6022 Produce mine drawings .....3180**  
**Assessment Requirements for CPPSIS6022 Produce mine drawings .....3184**  
**CPPSIS6025 Apply quality control measures to spatial products and services .....3187**  
**Assessment Requirements for CPPSIS6025 Apply quality control measures to spatial products and services.....3191**  
**CPPSIS6031 Design basic mines .....3194**  
**Assessment Requirements for CPPSIS6031 Design basic mines.....3198**  
**CPPSIS6032 Conduct advanced GNSS control surveys .....3201**  
**Assessment Requirements for CPPSIS6032 Conduct advanced GNSS control surveys 3205**  
**CPPSIS6033 Conduct underground mine surveys.....3208**  
**Assessment Requirements for CPPSIS6033 Conduct underground mine surveys.....3213**  
**CPPSIS6034 Conduct mining geology operations .....3217**

Assessment Requirements for CPPSIS6034 Conduct mining geology operations .....	3222
CPPSIS6035 Conduct complex engineering set-out surveys.....	3225
Assessment Requirements for CPPSIS6035 Conduct complex engineering set-out surveys	3229
CPPSIS6036 Monitor engineering structures .....	3232
Assessment Requirements for CPPSIS6036 Monitor engineering structures .....	3237
CPPSIS6037 Conduct advanced remote sensing analysis.....	3240
Assessment Requirements for CPPSIS6037 Conduct advanced remote sensing analysis	3245
CPPSIS6040 Develop 2-D and 3-D terrain visualisations.....	3248
Assessment Requirements for CPPSIS6040 Develop 2-D and 3-D terrain visualisations	3252
CPPSIS6041 Compile mine survey plans.....	3255
Assessment Requirements for CPPSIS6041 Compile mine survey plans.....	3260
CPPSPS3001 Handle, transport and store swimming pool and spa chemicals safely .....	3263
Assessment Requirements for CPPSPS3001 Handle, transport and store swimming pool and spa chemicals safely .....	3266
CPPSPS3002 Perform basic swimming pool and spa measurements and calculations ..	3269
Assessment Requirements for CPPSPS3002 Perform basic swimming pool and spa measurements and calculations.....	3272
CPPSPS3003 Maintain swimming pools and spas.....	3275
Assessment Requirements for CPPSPS3003 Maintain swimming pools and spas .....	3278
CPPSPS3004 Maintain swimming pool and spa water circulation and filtration systems	3281

## CPP20116 Certificate II in Surveying and Spatial Information Services

### Modification History

Release 1.

Replaces superseded equivalent CPP20112 Certificate II in Surveying and Spatial Information Services.

This version first released with CPP Property Services Training Package Version 3.

Release 2.

Replace superseded core unit CPCCOHS1001A Work safely in the construction industry with core unit CPCCWHS1001 Prepare to work safely in the construction industry. This Version release with CPP Property Services Training Package Version 4.1

### Qualification Description

This qualification applies to those undertaking pre-vocational programs, or entering the workforce and working under close supervision and possibly assisting in simple surveying or spatial information services activities. They can operate in the field and may use a computer to assist in collecting, storing and retrieving basic spatial data.

No licensing, legislative, regulatory, or certification requirements apply to this qualification at the time of endorsement.

This qualification is suitable for an Australian apprenticeship pathway.

### Entry Requirements

There are no entry requirements for this qualification.

### Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 8 units of competency:
  - 4 core units
  - 4 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- all 4 units may be chosen from the elective units listed below
- up to 2 units may be chosen from other Certificate II or III qualifications in CPP, or another current Training Package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification.

### **Core units**

CPCCWHS1001	Prepare to work safely in the construction industry
CPPSIS2012	Assist in collecting basic spatial data
CPPSIS2013	Store and retrieve basic spatial data
CPPSIS3011	Produce basic maps

### **Elective units**

BSBSUS201	Participate in environmentally sustainable work practices
CPPCMN3006	Provide effective client service
CPPSIS2015	Assist with surveying and spatial field activities
CPPSIS2016	Assist with load transfers
ICTICT101	Operate a personal computer
ICTICT102	Operate word-processing applications
ICTICT105	Operate spreadsheet applications
ICTICT203	Operate application software packages
ICTICT210	Operate database applications
ICTICT211	Identify and use basic current industry-specific technologies
RIISTD201D	Read and interpret maps

# CPP20319 Certificate II in Technical Security

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPP20307 Certificate II in Technical Security. Changed packaging arrangements including increase in total number of units and changed core and elective requirements. Streams introduced to better align with industry requirements for a technical qualification.

## Qualification Description

This is a qualification for security technicians who sell, install, repair, service and maintain security equipment and systems that protect people and property and prevent or minimise loss and damage.

Technicians at this level operate under general supervision and interact with clients to perform installation, repair, service and maintenance tasks at client premises. Occupational titles may include:

- access control technician
- installation technician
- security salesperson
- service technician.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

All cabling work, including telephone, data, fire and security alarm systems cabling, that connects with the telecommunications network must be performed by a registered cabler or under the direct supervision of a registered cabler as required by the Australian Communications Media Authority (ACMA) cabling provider rules. For further information on cabling registration requirements, check with ACMA.

Some units within this qualification require open cabling registration under the ACMA cabling provider rules registration system. This qualification may result in open cabling registration for candidates who undertake:

- ICTCBL236 Install, maintain and modify customer premises communications cabling: ACMA Restricted Rule
- ICTCBL237 Install, maintain and modify customer premises communications cabling: ACMA Open Rule
- ICTWHS204 Follow work health and safety and environmental policies and procedures
- ICTTEN201 Use electrical skills in telecommunications work.

Structured cabling registration may also be achieved by undertaking the unit ICTCBL301 Install, terminate and certify structured cabling installation.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency
- 4 core units
- 8 elective units.

Electives must be chosen as follows:

- a minimum of 3 units from Group A
- up to 5 units from Groups A, B or C not already selected
- up to 1 unit may be selected from any Training Package, as long as it contributes to a valid, industry-supported vocational outcome and maintains the AQF level of this qualification.

An asterisk against a unit code listed below indicates that there are prerequisite requirements that must be met when packaging the qualification. Users are referred to the list of units with prerequisite unit requirements available for this purpose in the Training Package Implementation Guide.

### Core Units

CPCCWHS1001	Prepare to work safely in the construction industry
CPPSEC2101	Apply effective communication skills to maintain security
CPPSEC2105	Provide quality services to a range of security clients
ICTWHS204	Follow work health and safety and environmental policies and procedures

### Elective Units

#### Group A: Technical Field of Work

CPPSEC2021	Install security equipment and systems
CPPSEC2022	Install electronic locks and locking systems

- CPPSEC2023 Install video surveillance systems and equipment
- CPPSEC2025 Sell security products and services
- CPPSEC2026 Perform routine maintenance on security equipment and systems
- ICTTEN202 Use hand and power tools

**Group B: Cabling Field of Work**

- ICTCBL236 \* Install, maintain and modify customer premises communications cabling: ACMA Restricted Rule
- ICTCBL237 \* Install, maintain and modify customer premises communications cabling: ACMA Open Rule
- ICTCBL301 Install, terminate and certify structured cabling installation
- ICTTEN201 Use electrical skills in telecommunications work

**Group C: General**

- CPPSEC2024 Monitor and respond to electronic information from security equipment and systems
- CPPSEC3037 Test installed security equipment and systems
- CPPSEC3047 Provide estimate and quote on security system installations
- ICTTEN207 Install and test internet protocol devices in convergence networks

## CPP20617 Certificate II in Cleaning

### Modification History

Release	Comment
Release 1	This version first released with CPP Property Services Training Package Release 5.0.

### Qualification Description

This qualification reflects the role of individuals who have a defined and limited range of cleaning operational skills and basic industry knowledge. They are mainly involved in routine and repetitive tasks and work under supervision.

This qualification provides a pathway to further learning and work in various cleaning roles and settings including but not limited to:

- administration, support and correctional services;
- health care and social assistance;
- accommodation and food services, and
- education and training.

#### *Licensing/Regulatory Information*

No licensing, legislative, regulatory, or certification requirements apply to this qualification at the time of publication.

### Entry Requirements

Nil

### Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- **11 units of competency:**
  - **3 core units**
  - **8 elective units.**

The elective units are to be chosen as follows:

- a minimum of 6 units from the elective units listed below
- up to 2 units in CPP or another Training Package or accredited course, provided the integrity of the AQF alignment is ensured, and they contribute to a valid,

industry-supported vocational outcome.

### Core Units

- CPPCLO2032 Plan basic cleaning activities
- CPPCLO2034 Maintain storage area and cleaning equipment
- CPPCMN2002 Participate in workplace safety arrangements

### Electives Units

- CPPCCL2008 Clean carpeted floors
- CPPCCL2009 Perform basic stain removal from carpets
- CPPCLO2002 Clean hard floor surfaces
- CPPCLO2005 Maintain glass surfaces
- CPPCLO2011 Maintain ceiling surfaces and fittings
- CPPCLO2014 Clean and arrange furniture and fittings
- CPPCLO2016 Clean wet surfaces
- CPPCLO2018 Sort, remove and recycle waste material
- CPPCLO2036 Maintain external surfaces
- CPPCLO2042 Clean surfaces using microfibre equipment
- CPPCLO2045 Clean rooms for guests and residents
- CPPCMN2004 Provide basic client services
- HLTAID003 Provide first aid

# CPP20218 Certificate II in Security Operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 7.0.

Supersedes and is not equivalent to CPP20212 Certificate II in Security Operations.

Release 2 This version first released with CPP Property Services Training Package Release 7.1

Supersedes and is not equivalent to CPP10107 Certificate I in Security Operations

## Qualification Description

This qualification reflects the role of a security officer, responsible for maintaining safety and security by patrolling, protecting or guarding property while unarmed, and screening entry, monitoring behaviour and removing persons from premises.

This qualification is intended to align with the following occupational licencing outcomes:

- security officer – unarmed guard
- security officer – crowd controller.

Occupational titles could include:

- security officer
- unarmed guard
- crowd controller

It provides a pathway to further learning and work in various security roles and settings including, but not limited to:

- armed guarding
- cash-in-transit
- close protection
- control room operations
- guard dog handling.

Security officers may work alone or work in a team environment under general supervision, operating with limited autonomy and judgement to complete routine but variable tasks, with some accountability and responsibility for their own outputs, work and learning.

Occupational licensing, legislative, regulatory or certification requirements may apply at the time of publication. Please refer to the CPP Companion Volume Implementation Guide for information.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:
  - 14 core units of competency.

Core units	
CPPSEC2101	Apply effective communication skills to maintain security
CPPSEC2102	Apply legal and procedural requirements to work effectively within a security team
CPPSEC2103	Apply WHS, emergency response and evacuation procedures to maintain security
CPPSEC2104	Apply risk assessment to select and carry out response to security risk situations
CPPSEC2105	Provide quality services to a range of security clients
CPPSEC2106	Protect self and others using basic defensive techniques
CPPSEC2107	Patrol premises to monitor property and maintain security
CPPSEC2108	Screen people, personal effects and items to maintain security
CPPSEC2109	Monitor and control access and exit of persons and vehicles from premises
CPPSEC2110	Monitor and control individual and crowd behaviour to maintain security
CPPSEC2111	Apply security procedures to manage intoxicated persons
CPPSEC2112	Apply security procedures to remove persons from premises
CPPSEC2113	Escort and protect persons and valuables
HLTAID003	Provide first aid

# CPP30119 Certificate III in Urban Pest Management

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPP30115 Certificate III in Urban Pest Management. Changed packaging arrangements including a reduction in the total number of units and changed core and elective requirements.

## Qualification Description

This qualification reflects the role of pest management technicians who are required to identify common urban pests, assess pest problems, consider pest management options, develop pest management plans, liaise with customers and implement pest management strategies.

In most cases, technicians work alone with responsibility for managing chemicals and equipment used for pest management and stored in pest management vehicles.

Licensing, legislative, regulatory or certification requirements apply to pest management in some states and territories. For further information, check with the relevant regulatory authority.

## Entry Requirements

There are no entry requirements for the qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency
  - 5 core
  - 5 elective units.

Up to 2 elective units may be selected from any training package, as long as they contribute to a valid, industry-supported vocational outcome and maintain the AQF level of this qualification.

## Core Units

CPPCMN3004 Respond to enquiries and complaints

CPPUPM3005	Manage pests without applying pesticides
CPPUPM3006	Manage pests by applying pesticides
CPPUPM3017	Maintain, service and repair pest management equipment
CPPUPM3018	Maintain equipment and pesticide storage area in pest management vehicles

### **Elective Units**

AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCPMG312	Apply poison baits for vertebrate pest control in rural and environmental landscapes
CPCCCM2010B	Work safely at heights
CPCWHS1001	Prepare to work safely in the construction industry
CPPCMN4008	Read plans, drawings and specifications for residential buildings
CPPUPM3008	Inspect for and report on timber pests
CPPUPM3010	Control timber pests
CPPUPM3011	Manage organisms by applying fumigants to commodities and environments
CPPUPM3042	Install termite management systems
CPPUPM4003	Assess and advise on pest management options for sensitive operations
CPPUPM4004	Assess and advise on pest management options for complex operations
CPPUPM4005	Implement and monitor pest management plans for sensitive operations
CPPUPM4006	Implement and monitor pest management plans for complex operations
HLTAID003	Provide first aid
MSMSUP301	Apply HACCP to the workplace
TAEDEL404	Mentor in the workplace

# CPP30216 Certificate III in Surveying and Spatial Information Services

## Modification History

Version Comment

- 1 Replaces superseded equivalent CPP30112 Certificate III in Surveying and Spatial Information Services. This version first released with CPP Property Services Training Package Version 3.
- 2 Replaces superseded core unit CPCCOHS1001A Work safely in the construction industry with core unit CPCCWHS1001 Prepare to work safely in the construction industry. This version released with CPP Property Services Training Package Version 4.1.
- 3 Update to superseded imported elective unit TLIC2025A to equivalent unit TLIC2025.  
This version released with CPP Property Services Training Package Version 4.2.

## Qualification Description

This qualification reflects the role of surveying or spatial information services assistants. These people provide support under supervision to a surveying or spatial information services team. They perform a range of duties, from collecting basic spatial data and providing field support services, to simple drafting and map production.

Licensing, legislative, regulatory or certification requirements apply in some States where cadastral and mining surveying must be undertaken under the supervision of a registered surveyor. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

This qualification is suitable for an Australian apprenticeship pathway.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 11 units of competency:
  - 5 core units
  - 6 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- all 6 units may be chosen from the elective units listed below
- up to 2 units may be chosen from other Certificate II, III or IV qualifications in CPP, or another current Training Package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification.

### Core units

CPCCWHS1001	Prepare to work safely in the construction industry
CPPSIS3011	Produce basic maps
CPPSIS3015	Collect basic surveying data
CPPSIS3019	Produce basic plans of surveys
CPPSIS3020	Perform basic surveying computations

### Elective units

CPPSIS3016	Provide field support services for surveying and spatial projects
CPPSIS3018	Transfer loads
CPPSIS3021	Visually interpret image data
CPPSIS4022	Store and retrieve spatial data
CPPSIS4030	Operate surveying equipment
CPPSIS4039	Design and produce maps
HLTAID003	Provide first aid
ICTICT203	Operate application software packages

RIISTD201D	Read and interpret maps
TLIC2025	Operate four wheel drive vehicle

# CPP30316 Certificate III in Cleaning Operations

## Modification History

Release 1.

Replaces superseded equivalent CPP31011 Certificate III in Cleaning Operations.

This version first released with CPP Property Services Training Package Version 4.

## Qualification Description

This qualification reflects the role of cleaners responsible for undertaking a range of routine and non-routine tasks according to work schedules, liaising with clients and in some cases members of the public, and operating in a range of general residential and commercial settings as well as specialist cleaning environments. The cleaner may work alone, with or without supervision, and has responsibility for selecting, preparing and using appropriate cleaning methods for a range of cleaning situations while ensuring safe work practices.

No licensing, legislative, regulatory, or certification requirements apply to this qualification at the time of endorsement.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:
  - 5 core units
  - 9 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- all 9 units may be chosen from the elective units listed below
- up to 3 units may be chosen from other Certificate III or Certificate IV qualifications in CPP or another current Training Package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification.

**Core units**

CPPCLO3003	Clean using safe work practices
CPPCLO3005	Confirm and apply privacy and security requirements for cleaning work
CPPCLO3019	Remove waste and recyclable materials
CPPCLO3035	Maintain cleaning storage areas
CPPCMN3006	Provide effective client service

**Elective units**

CPPCLO3001	Maintain hard floor surfaces
CPPCLO3002	Restore hard floor surfaces
CPPCLO3004	Maintain carpeted floors
CPPCLO3006	Clean carpets
CPPCLO3007	Remove carpet stains
CPPCLO3008	Mitigate carpet water damage
CPPCLO3009	Clean glass surfaces
CPPCLO3010	Apply odour control to carpets
CPPCLO3011	Clean using environmentally sustainable work practices
CPPCLO3012	Repair and reinstall carpets
CPPCLO3013	Clean window coverings
CPPCLO3014	Maintain clean-room environments
CPPCLO3015	Treat complex carpet stains
CPPCLO3016	Apply topical treatments to carpets
CPPCLO3017	Clean wet areas
CPPCLO3018	Clean and maintain furniture and fittings
CPPCLO3020	Pressure wash and clean surfaces
CPPCLO3021	Clean industrial machinery
CPPCLO3024	Clean fabric upholstery

CPPCLO3029	Inspect sites prior to carpet cleaning
CPPCLO3030	Develop a plan to mitigate water damage and restore carpets
CPPCLO3036	Clean at heights
CPPCLO3037	Clean external surfaces
CPPCLO3038	Clean food-handling areas
CPPCLO3040	Clean ceiling surfaces and fittings
CPPCLO3043	Clean using microfibre and chemical-free techniques
CPPCLO3044	Prepare rooms for guests and residents
CPPCLO3045	Clean high-touch surfaces
CPPCMN3004	Respond to enquiries and complaints
CPPCMN3007	Support leadership in the workplace
HLTINF001	Comply with infection prevention and control policies and procedures

# CPP30416 Certificate III in Strata Community Management

## Modification History

Release 1.

New qualification.

This version first released with CPP Property Services Training Package Version 5.

## Qualification Description

This qualification reflects the role of those involved in working in administrative and support roles in the strata community management sector.

In most situations, the individual will work as part of a strata community management team and will assist with the administration of strata communities by facilitating meetings of strata community members, monitoring the condition of building facilities and maintaining financial records associated with the management of strata communities.

Licensing, legislative, regulatory or certification requirements apply to strata community management in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 11 units of competency:
  - 8 core units
  - 3 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- all 3 units may be chosen from the elective units listed below
- up to 1 of the units may be chosen from the Certificate IV in Strata Community

Management or other Certificate III or Certificate IV qualifications in CPP or another current Training Package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification.

### Core units

BSBFIA301	Maintain financial records
CPPDSM3009	Maintain workplace safety in the property industry
CPPDSM3011	Monitor building facilities
CPPDSM3016	Work in the property industry
CPPDSM3017	Work in the strata community management sector
CPPDSM3019	Communicate with clients in the property industry
CPPDSM3020	Source and extract information from strata plans
CPPDSM4045	Facilitate meetings in the property industry

### Elective units

BSBFLM303	Contribute to effective workplace relationships
BSBSUS201	Participate in environmentally sustainable work practices
CPPDSM3007	Identify risks and opportunities in the property industry
CPPDSM3010	Meet customer needs and expectations in the property industry
CPPDSM3021	Collect and process information relevant to strata communities

## Qualification Mapping Information

No equivalent qualification.

# CPP30519 Certificate III in Technical Security

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPP30507 Certificate III in Technical Security. Changed packaging arrangements. New entry requirements.

## Qualification Description

This is a qualification for experienced security technicians who sell, install, repair, service and maintain security equipment and systems that protect people and property, and prevent or minimise loss and damage.

Technicians at this level operate independently and use discretion and judgement to plan and implement client requirements for installation, repair, service and maintenance of security equipment and systems. Occupational titles may include:

- access security technician
- electronic security technician
- security equipment installer
- service technician.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

All cabling work, including telephone, data, fire and security alarm systems cabling, that connects with the telecommunications network must be performed by a registered cabler or under the direct supervision of a registered cabler as required by the Australian Communications Media Authority (ACMA) cabling provider rules. For further information on cabling registration requirements, check with ACMA.

## Entry Requirements

- CPP20307 Certificate II in Technical Security, or
- CPP20319 Certificate II in Technical Security
- 

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency

- 11 core units
- 3 elective units.

An elective unit may be selected from any Training Package, as long as it contributes to a valid, industry-supported vocational outcome and maintains the AQF level of this qualification.

### Core Units

CPPCMN3006	Provide effective client service
CPPSEC3035	Recommend technical security requirements to meet client needs
CPPSEC3036	Program and configure security equipment and systems
CPPSEC3037	Test installed security equipment and systems
CPPSEC3038	Commission and decommission security equipment and systems
CPPSEC3039	Diagnose faults in electronic security equipment and systems
CPPSEC3040	Coordinate installation of security equipment and systems
CPPSEC3041	Conduct routine service of security equipment and systems
CPPSEC3053	Implement measures to secure IP networked security equipment and systems
HLTWHS003	Maintain work health and safety
ICTTEN416	Install, configure and test an internet protocol network

### Elective Units

BSBFLM306	Provide workplace information and resourcing plans
BSBFLM312	Contribute to team effectiveness
CPPSEC3024	Install advanced technology security equipment and systems
CPPSEC3025	Diagnose faults in advanced technology security equipment and systems
CPPSEC3042	Diagnose faults in video surveillance systems and equipment
CPPSEC3043	Establish and test electronic monitoring parameters for security

- equipment and systems
- CPPSEC3044 Conduct routine service of electronic locks and locking systems
- CPPSEC3045 Assess security equipment and systems to specify required modifications
- CPPSEC3046 Develop security system configurations and specifications for client sites
- CPPSEC3047 Provide estimate and quote on security system installations
- CPPSEC3106 Gather, organise and present security information and documentation

# CPP30619 Certificate III in Investigative Services

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPP30607 Certificate III in Investigative Services. Changed packaging arrangements including an increase in the total number of units and changed core and elective requirements. Streaming introduced to align occupational specialisations with industry requirements.

## Qualification Description

This is a qualification for investigators, responsible for factual investigation and inquiry work or covert surveillance operations. Investigators operate under limited supervision and use discretion and judgement to search for information about a person's character, actions or work and gather evidence that may be used in court.

Occupational titles may include:

- inquiry agent
- private investigator.

This qualification provides occupational specialisations in factual investigation and surveillance, and a pathway to further learning and work in investigations management.

Investigators undertaking surveillance operations are required to operate a surveillance vehicle in compliance with road and traffic laws.

Legislative, regulatory or certification requirements apply to investigative services in some states and territories. For further information, check with the relevant regulatory authority.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency
  - 5 core units
  - 11 elective units.

Electives are to be chosen as follows:

- all 8 units in Group A plus 3 units from any other group not already selected, or

- all 7 units in Group B plus 4 units from any other group not already selected
- up to 1 unit may be selected from any Training Package, as long as it contributes to a valid, industry-supported vocational outcome and maintains the AQF level of this qualification.

### Core Units

CPPINV3026	Work effectively in investigative services
CPPINV3027	Develop investigation plans
CPPINV3028	Investigate and locate subjects
CPPINV3029	Provide quality investigative services to clients
CPPSEC3124	Prepare and present evidence in court

### Elective Units

#### Group A: Factual Investigation

BSBSMB305	Comply with regulatory, taxation and insurance requirements for the micro business
CPPINV3030	Conduct factual investigations
CPPINV3031	Conduct interviews and take statements to support investigations
CPPINV3032	Develop factual investigation reports
HLTWHS003	Maintain work health and safety
PSPCRT007	Compile and use official notes
PSPREG006	Produce formal record of interview
PSPSEC009	Handle sensitive information

#### Group B: Surveillance

BSBSMB305	Comply with regulatory, taxation and insurance requirements for the micro business
CPPINV3033	Conduct covert surveillance operations

CPPINV3034	Organise and operate surveillance vehicles
CPPINV3035	Develop surveillance investigation reports
HLTWHS003	Maintain work health and safety
PSPCRT007	Compile and use official notes
PSPSEC009	Handle sensitive information

**Group C: General electives**

AVIY3075	Control remote pilot aircraft systems in normal flight
BSBSMB301	Investigate micro business opportunities
BSBSMB401	Establish legal and risk management requirements of small business
BSBSMB404	Undertake small business planning
CPPSEC3101	Manage conflict and security risks using negotiation
FNSMCA303	Serve legal process

•

# CPP31218 Certificate III in Swimming Pool and Spa Service

## Modification History

- Release 1 This version first released with CPP Property Services Training Package Release 6.0.  
Supersedes and is equivalent to CPP31212
- Release 2 This version first released with CPP Property Services Training Package Release 7.0.  
Imported unit CPCCWHS2001 - Apply WHS requirements, policies and procedures in the construction industry, supersedes and is equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry

## Qualification Description

This is an entry level qualification that provides the competencies required by swimming pool and spa technicians to routinely maintain swimming pools and spas in domestic, commercial and public settings.

The qualification is suitable for an Australian Apprenticeship pathway.

Occupational titles include:

- Swimming pool and spa maintenance technician.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 18 units of competency:
  - 12 core units
  - 6 elective units.

The elective units must ensure the integrity of the AQF qualification level and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- all six elective units may be chosen from the elective units listed below

- up to three elective units may be chosen from other Certificate II or Certificate IV qualifications in the CPP Property Services Training Package, or another current Training Package or accredited course provided they do not duplicate the outcome of another unit already chosen for the qualification.

<b>Core units</b>	
BSBWOR301	Organise personal work priorities and development
CPPCMN3005	Complete client documentation
CPPDSM3009	Maintain workplace safety in the property industry
CPPSPS3001	Handle, transport and store swimming pool and spa chemicals safely
CPPSPS3002	Perform basic swimming pool and spa measurements and calculations
CPPSPS3003	Maintain swimming pools and spas
CPPSPS3004	Maintain swimming pool and spa water circulation and filtration systems
CPPSPS3005	Maintain swimming pool and spa dosing systems
CPPSPS3006	Maintain swimming pool and spa cleaning and vacuuming systems
CPPSPS3008	Work in the swimming pool and spa servicing industry
SISCAQU001	Test pool water quality
SISCAQU004	Develop and implement pool water maintenance procedures

<b>Elective Units</b>	
CPCCCM2010B	Work safely at heights
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPPDSM3010	Meet customer needs and expectations in the property industry
CPPSPS3007	Maintain swimming pool and spa heating systems
CPPSPS3009	Maintain swimming pool and spa stock
CPPSPS3010	Sell swimming pool and spa products and services

CPPSPS3011	Use and maintain business technology related to swimming pool and spa servicing
CPPSPS3012	Access and apply information from swimming pool and spa technical manuals
HLTAID003	Provide first aid

# CPP31318 Certificate III in Security Operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Version 7.0.

Supersedes and is not equivalent to CPP30411 Certificate III in Security Operations.

Release 2 This version first released with CPP Property Services Training Package Release 8.0.

Imported units updated to current releases.

## Qualification Description

This qualification reflects the role of a security officer, responsible for maintaining safety and security by patrolling, protecting and guarding property, and screening entry, monitoring behaviour and removing persons from premises.

Occupational titles could include:

- security officer
- unarmed guard
- crowd controller.

This qualification is suitable for individuals who wish to deepen and broaden their skills and knowledge in security operations and lead security teams in the field. It provides a pathway to further learning and work in various security roles and settings, including security risk management.

Security officers at this level provide leadership in a team environment, operate under limited supervision, and use discretion and judgement in known and unpredictable work contexts. They take responsibility for their own outputs in work and learning, and limited responsibility for the output of others in the work team.

### Licensing, legislative, regulatory or certification requirements

Occupational licensing, legislative, regulatory or certification requirements may apply at the time of publication. This qualification does not provide the required competencies for a security officer license. Learners who hold a security license may select units as part of this qualification required for additional license endorsements in;

- Batons and handcuffs
- Canine
- Cash-in-transit
- Control room operations
- Firearms.

Please refer to the CPP Companion Volume Implementation Guide for information.

## Entry Requirements

Must hold a current Security Officers licensing in the relevant jurisdiction.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:
  - 8 core units
  - 6 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- a minimum of 4 elective units must be chosen from the elective units listed below
- up to 2 units may be chosen from the elective units listed below, or elsewhere from the CPP Property Services Training Package or other current Training Packages.

Electives selected from outside this qualification must be relevant to the occupational outcome.

An asterisk against a unit code listed below indicates that there is a prerequisite.

<b>Core units</b>	
BSBFLM312	Contribute to team effectiveness
CPPSEC3101	Manage conflict and security risks through negotiation
CPPSEC3102	Maintain operational safety and security of work environment
CPPSEC3103	Determine and implement response to security risk situation
CPPSEC3104	Coordinate monitoring and control of individual and crowd behaviour
CPPSEC3105	Coordinate provision of quality security services to clients
CPPSEC3106	Gather, organise and present security information and documentation
HLTWHS003	Maintain work health and safety

### Elective units

CHCCCS020	Respond effectively to behaviours of concern
CPPSEC2114	Monitor electronic security equipment and respond to alarm events
CPPSEC3107	Monitor security and coordinate response from control rooms
CPPSEC3108	Store, protect and dispose of security information
CPPSEC3109	Use and maintain security databases and compile reports
CPPSEC3110	Control persons using batons
CPPSEC3111	Restrain persons using handcuffs
CPPSEC3112	Manage training and wellbeing of dogs for security functions
CPPSEC3113	Handle dogs for security patrols
CPPSEC3114 *	Control security risk situations using firearms
CPPSEC3115	Carry, operate and maintain revolvers for security purposes
CPPSEC3116	Carry, operate and maintain semi-automatic pistols for security purposes
CPPSEC3117	Carry, operate and maintain shotguns for security purposes
CPPSEC3118	Inspect and test cash-in-transit security equipment
CPPSEC3119	Implement cash-in-transit security procedures
CPPSEC3120	Load and unload cash-in-transit in secured and unsecured environments
CPPSEC3121	Control persons using empty hand techniques
CPPSEC3122	Plan provision of close protection services
CPPSEC3123	Implement close protection services
CPPSEC3124	Prepare and present evidence in court
CPPSEC3125	Implement security procedures to protect critical infrastructure and public assets
CPPSEC3126	Defend persons using spray
CPPSEC3127	Conduct security screening using x-ray equipment
CPPSEC3128	Conduct security screening using walk-through metal detection equipment

CPPSEC3129	Conduct security screening using explosive trace detection equipment
CPPSEC3130	Conduct security screening using hand-held metal detectors
CPPSEC3131	Select, use and maintain body armour for security purposes
HLTAID006	Provide advanced first aid
HLTAID007	Provide advanced resuscitation
PMAOMIR210	Control evacuation to muster point
TLIB0002	Carry out vehicle inspection
TLIC1051	Operate commercial vehicle

# CPP31418 Certificate III in Close Protection Operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Version 3.

New qualification.

Release 2 This version first released with CPP Property Services Training Package Release 8.0.

Imported units updated to current releases.

## Qualification Description

This qualification reflects the role of a close protection operative who is responsible for providing security services to protect the safety and security of principals who may be celebrities, political figures, very important persons (VIPs) or other persons requiring close protection services.

This qualification provides an occupational licence outcome of a close protection operative.

Occupational titles could include:

- close protection operative.

This qualification is suitable for people within or entering the security industry who wish to specialise in the provision of close protection services. It provides a pathway to further learning and work in various security roles and settings, including security risk management.

Close protection operatives work in a team environment under limited supervision and use discretion and judgement in known and unpredictable work contexts. They take responsibility for their own outputs in work and learning, and limited responsibility for the output of others in the work team.

### Licensing, legislative, regulatory or certification requirements

Occupational licensing, legislative, regulatory or certification requirements may apply at the time of publication.

Please refer to the CPP Companion Volume Implementation Guide for information.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:
  - 8 core units
  - 6 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- a minimum of 4 elective units must be chosen from the elective units listed below
- up to 2 units may be chosen from the elective units listed below, or elsewhere from the CPP Property Services Training Package or other current Training Packages.

Electives selected from outside this qualification must be relevant to the occupational outcome.

<b>Core units</b>	
CPPSEC3101	Manage conflict and security risks through negotiation
CPPSEC3103	Determine and implement response to security risk situation
CPPSEC3105	Coordinate provision of quality security services to clients
CPPSEC3121	Control persons using empty hand techniques
CPPSEC3122	Plan provision of close protection services
CPPSEC3123	Implement close protection services
HLTAID006	Provide advanced first aid
HLTWHS003	Maintain work health and safety

<b>Elective units</b>	
BSBFLM312	Contribute to team effectiveness
CHCCCS020	Respond effectively to behaviours of concern
CPPSEC3102	Maintain operational safety and security of work environment
CPPSEC3104	Coordinate monitoring and control of individual and crowd behaviour
CPPSEC3106	Gather, organise and present security information and documentation

CPPSEC3108	Store, protect and dispose of security information
CPPSEC3109	Use and maintain security databases and compile reports
CPPSEC3110	Control persons using batons
CPPSEC3111	Restrain persons using handcuffs
CPPSEC3124	Prepare and present evidence in court
CPPSEC3125	Implement security procedures to protect critical infrastructure and public assets
CPPSEC3126	Defend persons using spray
CPPSEC3131	Select, use and maintain body armour for security purposes
HLTAID007	Provide advanced resuscitation
PMAOMIR210	Control evacuation to muster point
TLIB0002	Carry out vehicle inspection
TLIC1051	Operate commercial vehicle
TLIC3036	Apply safe car driving behaviours

# CPP31519 Certificate III in Real Estate Practice

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to:

- CPP30211 Certificate III in Property Services (Agency)
- CPP30311 Certificate III in Property Services (Operations).

Qualifications were merged to reduce duplication. Updated to the Standards for Training Packages.

## Qualification Description

This qualification reflects the role of administration staff within the real estate sector of the property services industry who apply knowledge of real estate procedures, forms and documents; knowledge of customer service standards and customer expectations; and knowledge of real estate services and technical processes to support real estate agency operational functions.

This qualification applies to administration and support staff working in the real estate sector including residential, commercial, stock and station, auctioneering or buyer's agent operations.

Occupational titles may include:

- Real Estate Agent Office Assistant
- Real Estate Sales Assistant
- Assistant Property Manager
- Marketing and Administration Assistant.

Staff who hold this qualification are commonly engaged with:

- receiving, recording and following up enquiries with vendors or buyers, lessors or tenants, by phone, email and in person
- using forms and documents to assist in preparing contracts for sale or lease, correspondence with vendors, buyers, lessors or tenants
- scheduling and assisting with property inspections
- maintaining data relating to clients and prospects including vendors, buyers, lessors or tenants
- assisting with development of a client base through prospecting activities such as cold calls, door knocking, attendance at open homes
- conducting approved transactions through trust accounts
- receiving and processing payments and maintaining basic financial records

- applying ethical standards and practices
- conducting basic administration duties including using business technology, preparing documents, maintaining appointment schedules and providing customer service.

### **Licensing, legislative, regulatory or certification requirements**

Legislative, regulatory or certification requirements apply to real estate practices in all states and territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## **Entry Requirements**

There are no entry requirements for this qualification.

## **Packaging Rules**

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:
  - 5 core units
  - 9 elective units.

The elective units must ensure the integrity of the Australian Qualifications Framework (AQF) qualification alignment, contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- a minimum of 3 elective units must be chosen from the elective units listed below
- up to 4 elective units may be chosen from the elective units listed below or from other current Training Packages provided they do not duplicate the outcome of another unit chosen for the qualification.

### **Core units**

CPPREP3001	Comply with ethical practice in real estate
CPPREP3002	Communicate effectively to support customer service in real estate
CPPREP3003	Access and process property information in real estate
CPPREP4001	Prepare for professional practice in real estate
CPPREP4005	Prepare to work with real estate trust accounts

### **Elective units**

CPPREP3101	Assist in listing and marketing properties for lease
CPPREP3102	Assist in listing and marketing properties for sale

CPPREP3103	Assist with the sale of properties
CPPREP3104	Assist with maintaining and protecting condition of managed properties
CPPREP3105	Assist with property inspection
BSBDIV301	Work effectively with diversity
BSBFIA304	Maintain a general ledger
BSBITU309	Produce desktop published documents
BSBWHS302	Apply knowledge of WHS legislation in the workplace
BSBWOR301	Organise personal work priorities and development
SIRXCEG003	Build customer relationships and loyalty
SIRXCOM002	Work effectively in a team

# CPP40115 Certificate IV in Building Design Drafting

## Modification History

- Release 1 This version first released with CPP Property Services Training Package Release 1.0.  
New qualification.
- Release 2 This version first released with CPP Property Services Training Package Release 4.1.  
Imported unit CPCCWHS1001 Prepare to work safely in the construction industry supersedes and is equivalent to CPCCOHS1001A Work safely in the construction industry.
- Release 3 This version first released with CPP Property Services Training Package Release 7.0.  
Imported unit CPCCWHS2001 - Apply WHS requirements, policies and procedures in the construction industry, supersedes and is equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.
- Release 4 This version first released with CPP Property Services Training Package Release 8.0.  
Imported unit MSFID4014 Produce digital models and documentation for interior design projects supersedes and is equivalent to MSFID5014 Use CAD applications to complete models and documentation for interior design projects

## Qualification Description

This qualification provides building design drafters with the competencies required to support building designers and architects. The building design drafter may work on a wide range of building design projects, including high rise commercial projects, but always under the supervision and instruction of an appropriately licensed or accredited architect or building designer.

The role of the drafter includes using building information modelling (BIM)-capable current industry standard building design software to produce drawings and documentation required by clients and stakeholders, and for the planning and building authorisation processes. It also involves researching and applying relevant information, including drawings and reports from other construction professionals and compliance requirements relevant to specific projects. The drafter also provides administrative support to the design team, including data collection and storage, and file management.

## Licensing, legislative, regulatory or certification requirements

Licensing, legislative, regulatory or certification requirements apply to building design drafting in some states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:
  - 9 core units
  - 6 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- all 6 may be chosen from the elective units listed below
- up to 2 units may be chosen from other Certificate IV or Diploma qualifications in CPP07, or another current Training Package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification.

## Core units

CPPBDN4001	Research and evaluate construction materials and methods for building design projects
CPPBDN4002	Research and apply compliance requirements to technical construction documentation
CPPBDN4003	Collect, apply and store building design project information
CPPBDN4004	Set up BIM-capable software and files for building design drafting projects
CPPBDN4005	Review and report structural integrity of building designs
CPPBDN4006	Import and transpose information from external sources into digital building design drawings

CPPBDN4007	Store and retrieve building design documentation
CPPBDN4008	Produce digital building design concept drawings
CPPBDN5017A	Produce 2-D building design drawings using CAD software

### **Elective units**

CPCCWHS1001	Prepare to work safely in the construction industry
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPPBDN4009	Analyse building design drawings and review findings
CPPBDN4010	Prepare documentation for planning approval
CPPBDN4011	Prepare documentation for building approval
CPPBDN4012	Provide support to project building designers
CPPBDN4013	Produce construction detail drawings
CPPBDN5007A	Inspect and analyse sites and produce measured drawings for small-scale building design projects
MSFID4014	Produce digital models and documentation for interior design projects

## **Qualification Mapping Information**

No equivalent qualification.

# CPP40216 Certificate IV in Surveying

## Modification History

Release 1.

Replaces superseded equivalent CPP40112 Certificate IV in Surveying.

This version first released with CPP Property Services Training Package Version 3.

## Qualification Description

This qualification reflects the role of surveying technicians who work under supervision to support a surveying team. They perform a range of duties using surveying tools and equipment, including total stations and global navigation satellite systems (GNSS).

Licensing, legislative, regulatory or certification requirements apply in some States where cadastral and mining surveying must be undertaken under the supervision of a registered surveyor. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

This qualification is suitable for an Australian apprenticeship pathway.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:
  - 6 core units
  - 8 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- all 8 units may be chosen from the elective units listed below
- up to 2 units may be chosen from other Certificate III, Certificate IV or Diploma qualifications in CPP, or another current Training Package or accredited course,

provided they do not duplicate the outcome of another unit chosen for the qualification.

### **Core units**

CPPSIS4025	Collect spatial data using GNSS
CPPSIS4027	Organise surveying field services
CPPSIS4031	Perform surveying computations
CPPSIS4037	Produce computer-aided drawings
CPPSIS4040	Collect spatial data using terrestrial technologies
CPPSIS4041	Set out site and building works

### **Elective units**

CPPCMN4002	Implement and monitor environmentally sustainable work practices
CPPCMN4003	Establish, develop and monitor teams
CPPSIS4022	Store and retrieve spatial data
CPPSIS4026	Digitally enhance and process image data
CPPSIS4030	Operate surveying equipment
CPPSIS4032	Conduct field surveying operations
CPPSIS4036	Operate spatial software applications
CPPSIS4038	Prepare and present GIS data
CPPSIS4039	Design and produce maps
CPPSIS5060	Develop spreadsheets for spatial data

# CPP40316 Certificate IV in Spatial Information Services

## Modification History

Version Comment

- 1 Replaces superseded equivalent CPP40212 Certificate IV in Spatial Information Services. This version first released with CPP Property Services Training Package Version 3.
- 2 Update superseded imported elective unit CUVACD301A Produce drawings to communicate ideas to equivalent unit CUAACD301 Produce drawings to communicate ideas. This version first released with CPP Property Services Training Package Version 4.2.

## Qualification Description

This qualification reflects the role of geographic information system (GIS) technicians who work under supervision to support a spatial information services team. They perform a range of duties using various geospatial technologies, including global navigation satellite system (GNSS) and specialised geospatial software.

No licensing, legislative, regulatory, or certification requirements apply to this qualification at the time of endorsement.

This qualification is suitable for an Australian apprenticeship pathway.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:
  - 7 core units
  - 8 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid,

industry-supported vocational outcome and are to be chosen as follows:

- all 8 units may be chosen from the elective units listed below
- up to 2 units may be chosen from other Certificate III, Certificate IV or Diploma qualifications in CPP, or another current Training Package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification.

### **Core units**

CPPSIS4022	Store and retrieve spatial data
CPPSIS4024	Source and assess spatial data
CPPSIS4025	Collect spatial data using GNSS
CPPSIS4034	Maintain spatial data
CPPSIS4035	Apply GIS software to solve spatial data problems
CPPSIS4038	Prepare and present GIS data
CPPSIS5035	Obtain and validate spatial data

### **Elective units**

CPPCMN4002	Implement and monitor environmentally sustainable work practices
CPPCMN4003	Establish, develop and monitor teams
CPPSIS4026	Digitally enhance and process image data
CPPSIS4027	Organise surveying field services
CPPSIS4036	Operate spatial software applications
CPPSIS4037	Produce computer-aided drawings
CPPSIS4039	Design and produce maps
CPPSIS4040	Collect spatial data using terrestrial technologies
CPPSIS4041	Set out site and building works
CUAACD301	Produce drawings to communicate ideas
ICTDBS502	Design a database
ICTICT302	Install and optimise operating system software

ICTWEB401	Design a website to meet technical requirements
ICTWEB411	Produce basic client-side script for dynamic web pages
ICTWEB429	Create a markup language document to specification

# CPP40416 Certificate IV in Cleaning Management

## Modification History

Release 1.

Replaces superseded equivalent CPP41011 Certificate IV in Cleaning Management.

This version first released with CPP Property Services Training Package Version 4.

## Qualification Description

This qualification reflects the role of cleaning industry personnel who use well developed skills and a broad knowledge base in a wide variety of cleaning management contexts. They may be responsible for wide-ranging operational cleaning management activity and for managing staff, providing quotations, planning and overseeing work, and providing customer support.

No licensing, legislative, regulatory, or certification requirements apply to this qualification at the time of endorsement.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:
  - 7 core units
  - 7 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- all 7 units may be chosen from the elective units listed below
- up to 3 units may be chosen from Certificate IV qualifications in BSB Business Services Training Package
- up to 3 units may be chosen from other Certificate IV or Diploma qualifications in CPP or another current Training Package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification.

**Core units**

CPPCLO4001	Induct cleaning staff
CPPCLO4022	Schedule and monitor cleaning tasks
CPPCLO4024	Manage the supply of cleaning stores to the work site
CPPCMN4003	Establish, develop and monitor teams
CPPCMN4004	Develop and manage client relations
CPPCMN4007	Manage workplace safety arrangements
BSBR501	Manage risk

**Elective units**

CPPCLO3005	Confirm and apply privacy and security requirements for cleaning work
CPPCLO3029	Inspect sites prior to carpet cleaning
CPPCLO3030	Develop a plan to mitigate water damage and restore carpets
CPPCLO4002	Develop, implement and monitor new cleaning techniques
CPPCLO4003	Manage cleaning equipment maintenance and supply
CPPCLO4025	Provide quotation for cleaning services
CPPCMN4001	Develop workplace policies and procedures for sustainability
CPPCMN4002	Implement and monitor environmentally sustainable work practices
HLTINF003	Implement and monitor infection prevention and control policies and procedures

# CPP40516 Certificate IV in Strata Community Management

## Modification History

Version Comment

- 1 New qualification. This version first released with CPP Property Services Training Package Version 4.
- 2 Update to superseded imported equivalent elective unit BSBSUS301 to BSBSUS401.  
This version first released with CPP Property Services Training Package Version 4.2.

## Qualification Description

This qualification reflects the role of those involved in providing management services for strata communities.

In most situations, the individual will work independently but may operate as part of a strata community management team. In this role, the person will perform all functions associated with the administration of strata communities, including facilitating meetings of strata community members, administering insurance for strata communities, handling strata community funds, as well as maintaining business records and reporting on the financial activities of strata communities.

Licensing, legislative, regulatory or certification requirements apply to strata community management in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 18 units of competency:
  - 13 core units
  - 5 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- a minimum of two elective units must be chosen from the Group A Specialist elective units listed below
- the remaining 3 elective units may be chosen as follows:
- up to 3 units from both Group A Specialist elective units and Group B Common elective units
- up to 2 units from the Certificate III in Strata Community Management, the Diploma of Strata Community Management, or from other Certificate IV or Diploma qualification in CPP or another current endorsed Training Package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification.

### **Core units**

BSBFIA402	Report on financial activity
BSBRKG304	Maintain business records
CPPCMN4008	Read plans, drawings and specifications for residential buildings
CPPDSM3016	Work in the property industry
CPPDSM3017	Work in the strata community management sector
CPPDSM3019	Communicate with clients in the property industry
CPPDSM4009	Interpret legislation to complete work in the property industry
CPPDSM4044	Coordinate maintenance and repair of properties and facilities
CPPDSM4045	Facilitate meetings in the property industry
CPPDSM4056	Manage conflicts and disputes in the property industry
CPPDSM4057	Monitor a safe workplace in the property industry
CPPDSM4084	Administer insurance for strata communities
CPPDSM4085	Handle strata community funds held on trust

### **Elective units**

#### **Group A Specialist elective units**

CPPCMN4009	Develop team understanding of and commitment to sustainability
CPPCMN4012A	Contribute to sustainable solutions throughout building life cycle

CPPCMN4013B	Operate a sustainable business
CPPDSM4020	Present at tribunals
CPPDSM4026	Analyse property and facility information
CPPDSM4027	Analyse resource use in building operations
CPPDSM4028	Identify and analyse risks and opportunities in the property industry
CPPDSM4031	Arrange lease of space
CPPDSM4034	Negotiate and implement strata community management agreement
CPPDSM4040	Contribute to asset life cycle maintenance strategy
CPPDSM4042	Coordinate construction contract
CPPDSM4047	Implement and monitor procurement process
CPPDSM4048	Implement customer service strategies in the property industry
CPPDSM4055	Maintain asset management system
CPPDSM4063	Participate in developing and establishing property or facility contracts
CPPDSM4066	Plan and coordinate property and facility inspection
CPPDSM4071	Promote process improvement in the property industry
CPPDSM4072	Provide leadership in the property industry
CPPDSM4074	Select and appoint contractors in the property industry
CPPDSM4082	Monitor service requirements of owners and occupiers in strata communities
CPPDSM4083	Terminate strata community
CPPDSM4086	Oversee preparation of strata community budgets

### **Group B Common elective units**

BSBADM409	Coordinate business resources
BSBCMM401	Make a presentation
BSBHRM405	Support the recruitment, selection and induction of staff
BSBITS401	Maintain business technology

BSBLED401	Develop teams and individuals
BSBMGT402	Implement operational plan
BSBREL401	Establish networks
BSBSMB402	Plan small business finances
BSBSMB404	Undertake small business planning
BSBSUS401	Implement and monitor environmentally sustainable work practices
CPPDSM4087	Facilitate operation of owners committee

## Qualification Mapping Information

No equivalent qualification.

## Links

Companion Volume implementation guides are found in VETNet -

# CPP40719 Certificate IV in Security Management

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPP40707 Certificate IV in Security and Risk Management. Changed packaging arrangements including reduction in total number of units and changed core and elective requirements. Streaming introduced to align occupational specialisations with industry requirements.

## Qualification Description

This qualification is for security supervisors and security business managers who may engage in sub-contracting arrangements for personnel and clients. Security supervisors lead teams to coordinate and implement a range of security operations and functions such as control room, monitoring centre, electronic security and guarding. Security business managers coordinate security manpower and services to clients while operating under complex regulatory and contracting arrangements.

Occupational titles may include:

- control room manager
- event security supervisor
- monitoring centre manager
- security business manager
- security operations supervisor
- technical security manager.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency
  - 4 core units
  - 8 elective units.

Electives are to be chosen as follows:

- all units within Group A or all units within Group B
- up to 4 units within Groups A, B or C not already selected
- an elective unit may be selected from Group D or from any training package, as long as it contributes to a valid, industry-supported vocational outcome and maintains the AQF level of this qualification.

### **Core Units**

CPPSEC4001	Manage work health and safety in the security work environment
CPPSEC4003	Assess and advise on client security needs
CPPSEC4005	Facilitate security operations briefing and debriefing processes
CPPSEC4022	Establish and implement ethics and governance arrangements for security businesses

### **Elective Units**

#### **Group A: Business Management**

BSBADM409	Coordinate business resources
BSBHRM405	Support the recruitment, selection and induction of staff
BSBSMB401	Establish legal and risk management requirements of small business
CPPSEC4023	Implement contracting arrangements for security businesses

#### **Group B: Supervision**

BSBLDR402	Lead effective workplace relationships
BSBLDR403	Lead team effectiveness
BSBWOR404	Develop work priorities
CPPSEC4004	Supervise security operations

#### **Group C: Specialist**

CPPINV4013	Undertake case management of investigations
------------	---

CPPSEC4008	Assess and prepare security tender submissions
CPPSEC4009	Interpret electronic information from advanced technology security systems
CPPSEC4010	Manage monitoring centre operations
CPPSEC4011	Manage field staff activity and incident response from control room
CPPSEC4014	Commission and decommission networked security systems
CPPSEC4015	Maintain networked security systems
CPPSEC4016	Install networked security systems
CPPSEC4017	Design security system configurations and specifications
CPPSEC4018	Program and configure networked security systems
CPPSEC4019	Diagnose faults in networked security systems
CPPSEC4020	Advise on advanced technology security systems to meet client needs
CPPSEC4021	Develop standard operating procedures for advanced technology security systems

**Group D: General**

BSBCUS401	Coordinate implementation of customer service strategies
BSBFIA412	Report on financial activity
BSBINN301	Promote innovation in a team environment
BSBITS411	Maintain and implement digital technology
BSBMGT403	Implement continuous improvement
BSBSMB402	Plan small business finances
BSBWOR404	Develop work priorities
BSBWRK411	Support employee and industrial relations procedures
PSPREG017	Undertake compliance audits

# CPP41119 Certificate IV in Home Energy Efficiency and Sustainability

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

CPP41119 Certificate IV in Home Energy Efficiency and Sustainability supersedes and is equivalent to:

- CPP41110 Certificate IV in Home Sustainability Assessment
- CPP41212 Certificate IV in NatHERS Assessment.

## Qualification Description

This is a qualification for thermal performance assessors and home sustainability assessors.

Thermal performance assessors operate under the Nationwide House Energy Rating Scheme (NatHERS) to rate the energy efficiency of a home based on its design. They use government approved software and information obtained from residential building plans and drawings to model potential consumption of energy for heating and cooling purposes and assess and certify the thermal performance of homes based on a ten-star rating system.

Home sustainability assessors provide advice to homeowners seeking to improve the efficiency, cost to run, sustainability and comfort needs of their household. They conduct on-site assessments of residences and advise on opportunities to improve comfort and to save on energy and water costs, and ways to live more sustainably in a residential environment.

Licensing requirements apply to thermal performance assessments in some states and territories. For further information, check with the relevant regulatory authority.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:
  - 4 core units
  - 11 elective units.

Elective units can be selected to provide specialisations in thermal performance assessment or home sustainability assessment, or both.

For the award of the *CPP41119 Certificate IV in Home Energy Efficiency and Sustainability (Thermal Performance Assessment)* electives are to be selected as follows:

- all 4 units from Group A
- up to 7 units from Group B and/or Group C
- 1 unit may be selected from any current training package or accredited course as long as it contributes to a valid, industry-supported vocational outcome and maintains the AQF level of this qualification.

For the award of the *CPP41119 Certificate IV in Home Energy Efficiency and Sustainability (Home Sustainability Assessment)* electives are to be selected as follows:

- all 4 units from Group B
- up to 7 units from Group A and/or Group C
- 1 unit may be selected from any current training package or accredited course as long as it contributes to a valid, industry-supported vocational outcome and maintains the AQF level of this qualification.

For the award of the *CPP41119 Certificate IV in Home Energy Efficiency and Sustainability (HSA and Thermal Performance Assessment)* electives are to be selected as follows:

- all 4 units from Group A
- all 4 units from Group B
- up to 3 units from Group C
- 1 unit may be selected from any current training package or accredited course as long as it contributes to a valid, industry-supported vocational outcome and maintains the AQF level of this qualification.

### **Prerequisite units**

Units with asterisks have these prerequisites.

- \* CPPCMN4008 Read plans, drawings and specifications for residential buildings
- \* CPPHES4003 Operate and maintain computer system to support thermal performance assessments
- \*\* CPPHES4004 Conduct thermal performance assessment of residential buildings.

### **Core Units**

- BSBRISK401 Identify risk and apply risk management processes
- CPPCOM4001 Manage own work, professional development and ethical behaviour
- CPPHES4001 Research and assess impact of building elements on thermal performance of residential buildings

CPPHES4002 Advise clients on thermal performance of residential buildings

## Electives

### Group A: Thermal Performance Assessment Electives

CPPCMN4008 Read plans, drawings and specifications for residential buildings

CPPHES4003 Operate and maintain computer system to support thermal performance assessments

CPPHES4004\* Conduct thermal performance assessment of residential buildings

CPPHES5001\*\* Conduct thermal performance assessment of complex residential buildings

### Group B: Home Sustainability Assessment Electives

CPPCOM4002 Implement safe work practices in the property industry

CPPHES4005 Assess household energy use and efficiency improvements

CPPHES4006 Assess household water use and efficiency improvements

CPPHES4007 Assess thermal performance of existing residential buildings

### Group C: Additional Electives

BSBAUD402 Participate in a quality audit

BSBAUD501 Initiate a quality audit

BSBAUD503 Lead a quality audit

BSBAUD504 Report on a quality audit

BSBCUS402 Address customer needs

BSBSMB305 Comply with regulatory, taxation and insurance requirements for the micro business

BSBSMB401 Establish legal and risk management requirements of small business

BSBSMB405 Monitor and manage small business operations

BSBSUS401	Implement and monitor environmentally sustainable work practices
BSBSUS406	Identify and apply sustainability rating tools
BSBWRT401	Write complex documents
CPCCB4014A	Prepare simple building sketches and drawings
CPCCSV5011A	Apply building codes and standards to residential buildings
CPCCWHS1001	Prepare to work safely in the construction industry
CPPCMN3004	Respond to enquiries and complaints
CPPCMN4012A	Contribute to sustainable solutions throughout a building's life cycle
CPPHES4008	Assess household waste generation and waste management improvements
CPPHES4009	Promote the adoption of home sustainability practices

### Qualification Mapping Information

# CPP41319 Certificate IV in Swimming Pool and Spa Service

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPP41312 Certificate IV in Swimming Pool and Spa Service.

## Qualification Description

This is a qualification for people working in the swimming pool and spa service sector. It applies to technicians in the field who apply analytic and problem-solving skills to treat water quality problems, as well as install, service and repair the key systems and components of domestic, commercial and public swimming pools and spas.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

## Entry Requirements

Candidates are required to hold the CPP31218 Certificate III in Swimming Pool and Spa Service or CPP31212 Certificate III in Swimming Pool and Spa Service

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 20 units of competency
  - 8 core units
  - 12 elective units.

Electives are to be selected as follows:

- a minimum of 10 elective units must be selected from the electives listed below
- up to 2 elective units may be selected from those listed below or from any currently endorsed training package or accredited course provided they do not duplicate the outcome of another unit chosen for the qualification.

An asterisk against a unit code below indicates that there is a prerequisite requirement that must be met. This prerequisite unit must be assessed before assessment of any unit of competency with an asterisk. Check the unit of competency for information on specific prerequisite requirement. All prerequisite requirements are packaged in the qualification.

**Core Units**

BSBRSK401	Identify risk and apply risk management processes
CPPSPS4001	Assess and treat water problems in swimming pools and spas
CPPSPS4002	Install and repair swimming pool and spa circulation and filtration systems
CPPSPS4003	Install and repair swimming pool and spa dosing systems
CPPSPS4004	Install and repair swimming pool and spa cleaning and vacuuming systems
CPPSPS4005	Install, service and repair swimming pool and spa heating systems
CPPSPS4007	Inspect, service and repair aquatic facility plant and equipment
CPPSPS4013	Establish maintenance plans for swimming pools and spas

**Elective Units**

BSBCUE302	Deploy customer service field staff
BSBCUE304	Provide sales solutions to customers
BSBCUE309	Develop product and service knowledge for customer engagement operation
BSBCUS402	Address customer needs
BSBLDR402	Lead effective workplace relationships
BSBSMB401	Establish legal and risk management requirements of small business
BSBSMB403	Market the small business
BSBSMB407	Manage a small team
BSBSMB417	Recruit staff
BSBSMB420	Evaluate and develop small business operations
BSBSMB421	Manage small business finances
BSBSUS401	Implement and monitor environmentally sustainable work practices
CPCCCM2010B*	Work safely at heights

CPPCMN3004	Respond to enquiries and complaints
CPPCOM4001	Manage own work, professional development and ethical behaviour
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPPSPS4006	Install, service and repair low voltage swimming pool and spa lighting systems
CPPSPS4008	Install, service and repair spas
CPPSPS4009	Estimate cost of swimming pool and spa products and services
CPPSPS4012	Design, install and service automated systems for swimming pools and spas
CPPSPS4014	Drain and acid wash swimming pools and spas
CPPSPS4016	Advise on swimming pool and spa products and services
CPPSPS4017	Detect leaks in swimming pools and spas
HLTAID003	Apply first aid
RIIWHS202D	Enter and work in confined spaces
SIRRINV002	Control stock
SISCAQU001	Test pool water quality
SISCAQU003	Maintain aquatic facility plant and equipment
SISCAQU004	Develop and implement pool water maintenance procedures
SISCAQU005	Develop and implement aquatic facility maintenance procedures
SISCAQU014	Operate self-contained breathing apparatus in an aquatic facility
SISXEMR001	Respond to emergency situations
SISXEMR002	Coordinate emergency response
SISXRSK301A	Undertake risk analysis of activities
SISXWHS101	Follow work health and safety policies

# CPP41419 Certificate IV in Real Estate Practice

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is not equivalent to:

- CPP40307 Certificate IV in Property Services (Real Estate)
- CPP40407 Certificate IV in Property Services (Stock and Station Agency)
- CPP40507 Certificate IV in Property Services (Business Broking)
- CPP40611 Certificate IV in Property Services (Operations).

Qualifications were merged to reduce duplication and to provide clearer alignment with licensing outcomes.

## Qualification Description

This qualification reflects the role of real estate professionals who apply knowledge of real estate practice legal agency and compliance requirements, ethical standards and consumer preferences to conduct real estate functions.

This qualification applies to people working in both residential and commercial property, including business broking, and stock and station transactions.

Occupational titles may include:

- Auctioneer
- Stock and Station Agent
- Business Broker, Business Agent, Franchise Broker
- Property Manager, Body Corporate Manager
- Real Estate Agent
- Real Estate Representative, Real Estate Salesperson, Real Estate Sub-agent, Property Portfolio Officer, Buyer's Agent.

Staff who hold this qualification are commonly engaged with:

- analysing data, industry intelligence and leads to identify prospects
- developing, building and maintaining relationships with lessors, tenants, vendors and buyers
- providing advice to lessors, tenants, vendors and buyers on the sale, purchase or lease of commercial, residential, stock and station, and property real estate
- implementing systems, forms and documents to ensure real estate agency transactions are compliant with regulatory requirements; managing risk to agency and agent, and demonstrating high standards of ethical practice

- transacting, accessing, and preserving the integrity of trust accounts to minimise customer and agency risk
- establishing, maintaining, executing and concluding contracts with lessors, tenants, vendors and buyers, including by auction
- building and promoting the agency and individual brands.

### Licensing, legislative, regulatory or certification requirements

Licensing, legislative, regulatory or certification requirements apply to real estate practices in all states and territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Note: Occupational licensing outcomes are associated with some of the specialisations packaged in this qualification. The units packaged in the specialisations of this qualification have also been developed as Skill Sets: please note that not all Skill Sets are associated with licensing outcomes.

Code	Title
CPPSS00065	Residential Property Sales
CPPSS00066	Residential Property Management
CPPSS00067	Property Management Business Development
CPPSS00068	Auctioneering
CPPSS00069	Buyer's Agent
CPPSS00070	Onsite Property Management
CPPSS00071	Commercial Sales and Leasing
CPPSS00072	Commercial and Property Management
CPPSS00073	Business Broking
CPPSS00074	Stock and Station, Stock
CPPSS00075	Stock and Station, Station
CPPSS00076	Administration Management/Office Support

### Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 18 units of competency:
  - 5 core units
  - 13 elective units.

The elective units must ensure the integrity of the Australian Qualifications Framework (AQF) qualification alignment, contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- all the elective units in any two elective groups from Groups A–L listed below must be chosen
- the remaining elective units may be chosen from the general elective units listed below or the CPP Property Services Training Package.

### Core units

CPPREP4001	Prepare for professional practice in real estate
CPPREP4002	Access and interpret ethical practice in real estate
CPPREP4003	Access and interpret legislation in real estate
CPPREP4004	Establish marketing and communication profiles in real estate
CPPREP4005	Prepare to work with real estate trust accounts

### Elective units

#### Group A - Residential Property Sales

CPPREP4101	Appraise property for sale or lease
CPPREP4102	Market property
CPPREP4103	Establish vendor relationships
CPPREP4104	Establish buyer relationships
CPPREP4105	Sell property

#### Group B - Residential Property Management

CPPREP4101	Appraise property for sale or lease
CPPREP4102	Market property
CPPREP4121	Establish landlord relationships

CPPREP4122 Manage tenant relationships

CPPREP4123 Manage tenancy

CPPREP4124 End tenancy

CPPREP4125 Transact in trust accounts

### **Group C - Property Management Business Development**

CPPREP4101 Appraise property for sale or lease

CPPREP4141 Establish and maintain property management portfolio

CPPREP4142 Promote property management products and services

### **Group D - Auctioneering**

CPPREP4161 Undertake pre-auction processes

CPPREP4162 Conduct and complete sale by auction

CPPREP4163 Complete post-auction process and contract execution

### **Group E - Buyer's Agent**

CPPREP4101 Appraise property for sale or lease

CPPREP4171 Represent buyer in sales process

CPPREP4172 Develop and promote property industry knowledge - buyer's agent

CPPREP4173 Complete purchase of property as buyer's agent

### **Group F - Onsite Property Manager**

CPPREP4181 Manage onsite residential property

### **Group G - Commercial Sales and Leasing**

CPPREP4102 Market property

CPPREP4201 Appraise commercial property

CPPREP4202 Establish and maintain vendor and lessor relationships and networks

CPPREP4203 Complete commercial property sale

CPPREP4204 Establish commercial property lease

CPPREP5201 Develop and maintain commercial property market intelligence

**Group H - Commercial and Property Management**

- CPPREP4231 Manage commercial property maintenance
- CPPREP4232 Manage commercial property financial reports
- CPPREP4233 Manage lessee relationships - commercial
- CPPREP4234 Manage lessor relationships - commercial
- CPPREP4235 End commercial property lease

**Group I - Business Broking**

- CPPREP4261 Appraise business for sale
- CPPREP4262 Establish vendor relationships in business broking
- CPPREP4263 Manage buyer relationships in business broking
- CPPREP4264 Manage the sales process in business broking

**Group J - Stock and Station, Stock**

- CPPREP4301 Confirm and market livestock for sale
- CPPREP4302 Prepare livestock for sale
- CPPREP4303 Establish vendor and buyer relationships in livestock sale
- CPPREP4304 Complete the sales process - livestock

**Group K - Stock and Station, Station**

- CPPREP4101 Appraise property for sale or lease
- CPPREP4102 Market property
- CPPREP4103 Establish vendor relationships
- CPPREP4104 Establish buyer relationships
- CPPREP4105 Sell property
- CPPREP4123 Manage tenancy
- CPPREP4125 Transact in trust accounts
- CPPREP5311 Develop and maintain rural property market knowledge and intelligence

**Group L - Administration Management/Office Support**

BSBHRM405 Support the recruitment, selection and induction of staff

SIRXMGT001 Supervise and support frontline team members

**General Elective Units**

BSBDIV301 Work effectively with diversity

CPPREP4501 Prepare to complete the sales process - off the plan properties

CPPREP4502 Support providers of social and community housing

CPPREP4503 Present at hearings in real estate

CPPREP4504 Deliver presentations to clients in real estate

CPPREP4505 Value goods, chattels, plant and equipment

CPPREP4506 Manage offsite and lone worker safety in real estate

CPPREP4507 Provide property sustainability information in real estate

CPPREP4508 Conduct livestock auction

CPPREP4509 Auction goods, chattels or equipment

CPPREP4510 Manage short-term or holiday letting

# CPP41519 Certificate IV in Security Risk Analysis

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New qualification

## Qualification Description

This qualification is for security risk analysts who apply technical security and operations expertise in a risk management environment. Security risk analysts understand the current threat environment and assess risk and advise clients on strategies to ensure the protection of electronic security systems and people and property in crowded places, as defined by *Australia's Strategy for Protecting Crowded Places from Terrorism (2017)*.

Occupational titles may include:

- event security manager
- security risk adviser
- security risk analyst.

This qualification provides occupational specialisations in electronic security and crowded places, and a pathway to further learning and work in security risk management.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency
  - 5 core units
  - 7 elective units.

Electives are to be chosen as follows:

- all 3 units within Group A or all 3 units within Group B
- up to 4 units within Groups A, B or C not already selected
- up to 2 units may be selected from Group D

- an elective unit may be selected from any Training Package, as long as it contributes to a valid, industry-supported vocational outcome and maintains the AQF level of this qualification.

### **Core Units**

CPPSEC4003	Assess and advise on client security needs
CPPSEC4006	Conduct security risk assessment of client operations
CPPSEC4007	Identify security threats and assess impact on client operations
CPPSEC4012	Assess security vulnerabilities of assets
CPPSEC4022	Establish and implement ethics and governance arrangements for security businesses

### **Elective Units**

#### **Group A: Security Technology and Systems**

CPPSEC4009	Interpret electronic information from advanced technology security systems
CPPSEC4020	Advise on advanced technology security systems to meet client needs
CPPSEC4021	Develop standard operating procedures for advanced technology security systems

#### **Group B: Crowded Places**

CPPSEC4024	Assess security of crowded places
CPPSEC4025	Advise on operational requirements to maintain crowded place security
PSPSEC015	Communicate security awareness

#### **Group C: Specialist**

CPPINV4013	Undertake case management of investigations
CPPSEC3125	Implement security procedures to protect critical infrastructure and public assets

CPPSEC4008	Assess and prepare security tender submissions
CPPSEC4014	Commission and decommission networked security systems
CPPSEC4015	Maintain networked security systems
CPPSEC4016	Install networked security systems
CPPSEC4017	Design security system configurations and specifications
CPPSEC4018	Program and configure networked security systems
CPPSEC4019	Diagnose faults in networked security systems

**Group D: General**

BSBCOM406	Conduct work within a compliance framework
BSBCUS401	Coordinate implementation of customer service strategies
BSBPMG522	Undertake project work
BSBRES411	Analyse and present research information
BSBSMB401	Establish legal and risk management requirements of small business
BSBSMB402	Plan small business finances
PSPSEC009	Handle sensitive information
PSPSEC010	Provide government security briefings

# CPP41619 Certificate IV in Urban Pest Management

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New qualification.

## Qualification Description

This is a qualification for pest management technicians seeking deeper specialisation in the urban pest management sector. Specialist roles require planning, coordinating, managing and completing small to large scale pest management operations. The qualification applies to individuals who work in urban pest management in a range of challenging contexts.

Some job functions covered by this qualification require occupational licencing or certification. Specific determination should be sought through the relevant state or territory regulatory authority.

## Entry Requirements

CPP30115 Certificate III in Urban Pest Management, or

CPP30119 Certificate III in Urban Pest Management.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in 11 units of competency consisting of 6 core and 5 elective units. Electives are to be selected as follows:

- 3 units from Group A or 3 units from Group B, plus
  - up to 2 units from Groups A, B or C not already selected
  - 1 elective unit may be selected from any training package, as long as it contributes to a valid, industry-supported vocational outcome and maintains the AQF level of this qualification.

## Core Units

CPPUPM4001 Assess and select pest management vehicle and equipment

CPPUPM4002 Schedule, organise and monitor pest management operations

CPPUPM4003 Assess and advise on pest management options for sensitive operations

CPPUPM4004	Assess and advise on pest management options for complex operations
CPPUPM4005	Implement and monitor pest management plans for sensitive operations
CPPUPM4006	Implement and monitor pest management plans for complex operations

## **Elective Units**

### **Group A: Advanced Pest Management**

AHCPMG307	Apply animal trapping techniques
AHCPMG312	Apply poison baits for vertebrate pest control in rural and environmental landscapes
AHCPMG409	Implement a pest management plan
AHCPMG413	Define the pest problem
CPPUPM3008	Inspect for and report on timber pests
CPPUPM3010	Control timber pests
CPPUPM3011	Manage organisms by applying fumigants to commodities and environments
CPPUPM3042	Install termite management systems

### **Group B: Business Management**

AHCPMG413	Define the pest problem
BSBSMB407	Manage a small team
BSBSMB420	Evaluate and develop small business operations
BSBSMB421	Manage small business finances
BSBWRT401	Write complex documents
TAEASS301	Contribute to assessment
TAEDEL301	Provide work skill instruction
TAEDEL404	Mentor in the workplace

**Group C: General Electives**

AHCCHM404	Develop procedures to minimise risks in the use of chemicals
AHCCHM405	Plan and implement a chemical use program
FBPAUD4003	Conduct food safety audits
HLTAID003	Provide first aid
MSL934005	Contribute to the ongoing development of HACCP plans

# CPP50116 Diploma of Surveying

## Modification History

Version Comment

- 1 Replaces superseded equivalent CPP50112 Diploma of Surveying. This version first released with CPP Property Services Training Package Version 3.
- 2 Update superseded equivalent imported elective units:
  - AHCLPW404A to AHCLPW404
  - PSPLAND308A to PSPLND002
  - PSPLAND302A to PSPLND001This version first released with CPP Property Services Training Package 4.2.

## Qualification Description

This qualification reflects the role of skilled surveying technicians. These people hold advanced surveying skills, and perform duties involving the performance of precise measurements and setting out structures using specialised surveying equipment.

Licensing, legislative, regulatory or certification requirements apply in some States where cadastral and mining surveying must be undertaken under the supervision of a registered surveyor. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

This qualification is suitable for an Australian apprenticeship pathway.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
  - 7 core units
  - 9 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- all 9 units may be chosen from the elective units listed below
- up to 2 units may be chosen from other Certificate IV, Diploma or Advanced Diploma qualifications in CPP, or another current Training Package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification.

### **Core units**

CPPSIS5031	Plan spatial data collection
CPPSIS5047	Conduct GNSS surveys
CPPSIS5048	Conduct engineering surveys
CPPSIS5053	Perform advanced surveying computations
CPPSIS5054	Perform geodetic surveying computations
CPPSIS5058	Conduct geodetic surveys
CPPSIS5065	Design basic engineering structures

### **Elective units**

AHCLPW404	Produce maps for land management purposes
BSBPMG522	Undertake project work
CPPCMN4002	Implement and monitor environmentally sustainable work practices
CPPSIS4032	Conduct field surveying operations
CPPSIS4038	Prepare and present GIS data
CPPSIS5032	Capture new spatial data
CPPSIS5037	Maintain spatial data systems
CPPSIS5040	Interpret and collate spatial data
CPPSIS5043	Design spatial data storage systems
CPPSIS5044	Develop subdivision survey designs for local government approval

CPPSIS5046	Set out stormwater systems
CPPSIS5049	Plan and implement surveying projects
CPPSIS5051	Apply land and planning law to surveying
CPPSIS5052	Integrate surveying datasets
CPPSIS5057	Conduct precision surveys
CPPSIS5060	Develop spreadsheets for spatial data
CPPSIS5061	Locate underground services in surveying practice
CPPSIS5064	Coordinate GIS data manipulation and analysis
CPPSIS6021	Conduct open pit mine surveys
CPPSIS6022	Produce mine drawings
CPPSIS6033	Conduct underground mine surveys
PSPLND001	Investigate tenure and land use history
PSPLND002	Compile and check survey plans

# CPP50216 Diploma of Spatial Information Services

## Modification History

Version Comment

- 1 Replaces superseded equivalent CPP50212 Diploma of Spatial Information Services. This version first released with CPP Property Services Training Package Version 3.
- 2 Update to superseded equivalent imported elective units:
  - AHCLPW404A to AHCLPW404
  - ICPKNW315 to ICPKNW322
  - PSPLAND302A to PSPLND001
  - PSPLAND501A to PSPLND012This version first released with CPP Property Services Training Package Version 4.2.

## Qualification Description

This qualification reflects the role of skilled geographic information system (GIS) technicians. They perform advanced data manipulation, including spatial dataset updating and management, and use a range of technologies, such as global navigation satellite system (GNSS) and specialised geospatial software.

No licensing, legislative, regulatory, or certification requirements apply to this qualification at the time of endorsement.

This qualification is suitable for an Australian apprenticeship pathway.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:
  - 6 core units

- 9 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- all 9 units may be chosen from the elective units listed below
- up to 2 units may be chosen from other Certificate IV, Diploma or Advanced Diploma qualifications in CPP, or another current Training Package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification.

### **Core units**

CPPSIS5031	Plan spatial data collection
CPPSIS5032	Capture new spatial data
CPPSIS5035	Obtain and validate spatial data
CPPSIS5036	Integrate spatial datasets
CPPSIS5039	Plan and implement spatial projects
CPPSIS6040	Develop 2-D and 3-D terrain visualisations

### **Elective units**

AHCLPW404	Produce maps for land management purposes
BSBFIM501	Manage budgets and financial plans
BSBWOR502	Lead and manage team effectiveness
CPPCMN4002	Implement and monitor environmentally sustainable work practices
CPPSIS5037	Maintain spatial data systems
CPPSIS5038	Develop spatial databases
CPPSIS5040	Interpret and collate spatial data
CPPSIS5043	Design spatial data storage systems
CPPSIS5060	Develop spreadsheets for spatial data
CPPSIS5062	Conduct photogrammetric mapping
CPPSIS5064	Coordinate GIS data manipulation and analysis

ICTICT307	Customise packaged software applications for clients
ICTICT308	Use advanced features of computer applications
ICTICT409	Develop macros and templates for clients using standard products
ICPKNW322	Develop knowledge of the printing and graphic arts industry
PSPLND001	Investigate tenure and land use history
PSPLND012	Review planning documents and environmental assessments

# CPP50316 Diploma of Strata Community Management

## Modification History

Release 1.

New qualification.

This version first released with CPP Property Services Training Package Version 5.

## Qualification Description

This qualification reflects the role of those involved in managing strata communities.

In most situations, the individual will work independently but will usually also have responsibility for a strata community management team. In this role, the person will perform all functions associated with managing strata communities, including assessing and implementing strata community management agreements, analysing and commenting on management reports prepared for strata communities, developing life cycle asset management plans, and implementing maintenance programs for managed properties.

Licensing, legislative, regulatory or certification requirements apply to strata community management in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
  - 8 core units
  - 8 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- a minimum of 2 units must be chosen from Group A Specialist elective units listed

below

- a minimum of 2 units must be chosen from Group B Common elective units listed below
- up to 4 units may be chosen from any Certificate IV, Diploma or Advanced Diploma qualification in CPP, or another current Training Package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification.

### **Core units**

BSBR501	Manage risk
CPPDSM4034	Negotiate and implement strata community management agreement
CPPDSM4049	Implement maintenance program for managed properties
CPPDSM5039	Meet legal requirements in managing strata communities
CPPDSM5040	Meet ethical and professional standards in managing strata communities
CPPDSM6007	Develop life cycle asset management plans
FNSORG508	Analyse and comment on management reports
BSBLDR503	Communicate with influence

### **Elective units**

#### **Group A Specialist elective units**

CPCSUS5002A	Develop action plans to retrofit existing buildings for energy efficiency
CPPCMN5001A	Plan for a sustainable business
CPPDSM5006	Coordinate customer service activities in the property industry
CPPDSM5007	Coordinate construction or renovation of facilities
CPPDSM5009	Coordinate risk management systems in the property industry
CPPDSM5018	Ensure a safe work place in the property industry
CPPDSM5025	Maintain public relations in the property industry
CPPDSM5026	Manage a consultant property project team
CPPDSM5027	Provide facilities and amenities for property users
CPPDSM5029	Manage client relationships and networks in the property industry
CPPDSM5030	Manage projects in the property industry

#### **Group B Common elective units**

BSBADM502	Manage meetings
BSBFIM501	Manage budgets and financial plans
BSBHRM405	Support the recruitment, selection and induction of staff
BSBMGT502	Manage people performance
BSBMGT517	Manage operational plan
BSBMGT605	Provide leadership across the organisation
BSBMGT616	Develop and implement strategic plans
BSBWOR501	Manage personal work priorities and professional development
FNSORG601	Negotiate to achieve goals and manage disputes
LGACOMP008A	Apply conflict resolution strategies

## Qualification Mapping Information

No equivalent qualification.

# CPP50619 Diploma of Security Risk Management

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPP50611 Diploma of Security and Risk Management. Changed packaging arrangements including reduction in total number of units and changed core requirements. New entry requirements.

## Qualification Description

This is a qualification for security risk consultants who provide specialist advice on strategies to mitigate risk to people, property and assets including crowded places, as defined by *Australia's Strategy for Protecting Crowded Places from Terrorism (2017)*. Security risk consultants operating at this level work with a high level of autonomy to assess the current threat environment, assess risk management options, and prepare and implement security risk management plans and communication systems to respond to active threats.

Occupational titles may include:

- security risk specialist
- security consultant
- security policy analyst
- security strategist.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Entry Requirements

- CPP40707 Certificate IV in Security and Risk Management, or
- CPP40719 Certificate IV in Security Management, or
- CPP41519 Certificate IV in Security Risk Analysis

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency
  - 5 core units
  - 5 elective units.

An elective unit may be selected from any Training Package, as long as it contributes to a valid, industry-supported vocational outcome and maintains the AQF level of this qualification.

### Core Units

CPPSEC5003	Assess security risk management options
CPPSEC5004	Develop security risk management plans
CPPSEC5005	Implement security risk management plans
CPPSEC5008	Analyse threat environment and devise strategies to respond to active threats
CPPSEC5009	Implement communication systems to respond to active threats

### Elective Units

BSBCUS501	Manage quality customer service
BSBMGT502	Manage people performance
BSBWOR501	Manage personal work priorities and professional development
BSBWOR502	Lead and manage team effectiveness
CPPSEC4008	Assess and prepare security tender submissions
CPPSEC5002	Coordinate security operations
CPPSEC5006	Develop strategies to implement advanced technology security systems
HLTWHS004	Manage work health and safety

### Qualification Mapping Information

Code and title	CPP07 Property Services Training Package	Comments	E/ NE
CPP50619 Diploma of Security Risk Management	CPP50611 Diploma of Security and Risk	Supersedes and is not equivalent to CPP50611	N

# CPP51119 Diploma of Property (Agency Management)

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is not equivalent to:

- CPP50307 Diploma of Property Services (Agency Management)
- CPP50409 Diploma of Property Services (Business Broking)

Qualifications were merged to reduce duplication and to provide clearer alignment with licensing outcomes.

## Qualification Description

This qualification reflects the role of real estate principals who apply knowledge of property agency and compliance requirements, ethical standards and consumer preferences to establish and control real estate functions.

This qualification applies to residential or commercial practice in real estate sales, real estate property management, strata management, business broking, stock and station, or auctioneering.

Occupational titles may include:

- Real Estate Agency Principal
- Strata Management Principal
- Agency Manager
- Agency Director.

Staff who hold this qualification are responsible and accountable for the work of others and are engaged with:

- understanding business systems, structures, property agency practices and business entities
- understanding legal and ethical frameworks for property agency operations
- developing systems, procedures and protocols for managing property agency functions
- establishing and controlling trust accounts and property agency business finances
- coordinating ethics, risk and consumer protection systems to meet industry legal and customer expectations and requirements
- developing and maintaining knowledge of industry trends
- developing and maintaining relationships with lessors, tenants, vendors and buyers, buyers' agents
- establishing and implementing strategic business plans and operational plans
- establishing and implementing agency and individual branding

- leading and managing people, including recruitment, induction, coaching and mentoring for teams and individuals
- managing work health and safety (WHS) risk to ensure a safe working environment in the real estate industry.

### **Licensing, legislative, regulatory or certification requirements**

Licensing, legislative, regulatory or certification requirements apply to real estate practices in all states and territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## **Entry Requirements**

### **Packaging Rules**

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
  - 7 core units
  - 5 elective units.

The elective units must ensure the integrity of the Australian Qualifications Framework (AQF) qualification alignment, contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- a minimum of 3 elective units must be chosen from the elective units listed below
- up to 2 elective units may be chosen that are packaged in other current Diploma or Advanced Diploma Training Package qualifications provided they do not duplicate the outcome of another unit chosen for the qualification.

### **Core units**

CPPREP5001	Manage compliance in the property industry
CPPREP5002	Establish and monitor property industry trust account management practices
CPPREP5003	Manage ethical practice in the property industry
CPPREP5004	Manage a safe workplace in the property industry
CPPREP5005	Manage teams in the property industry
CPPREP5006	Manage operational finances in the property industry
CPPREP5007	Develop a strategic business plan in the property industry

**Elective units**

BSBADV507	Develop a media plan
BSBHRM505	Manage remuneration and employee benefits
BSBHRM513	Manage workforce planning
BSBHRM604	Manage employee relations
BSBMGT502	Manage people performance
BSBMGT517	Manage operational plan
BSBMGT605	Provide leadership across the organisation
BSBMKG507	Interpret market trends and developments
CPPREP4507	Provide property sustainability information in real estate
CPPREP5008	Market the property agency
CPPREP5009	Develop a marketing and service strategy in real estate
CPPREP5010	Manage customer service activities in the property industry

# CPP60116 Advanced Diploma of Surveying

## Modification History

Release 1.

Replaces superseded equivalent CPP60312 Advanced Diploma of Surveying.

This version first released with CPP Property Services Training Package Version 3.

## Qualification Description

This qualification reflects the role of surveyors. These people carry out highly specialised surveying functions in areas such as mining and engineering construction. Duties involve carrying out precise measurements and control surveys relating to engineering structures and mine sites using highly specialised surveying equipment.

Licensing, legislative, regulatory or certification requirements apply in some States where cadastral and mining surveying must be undertaken under the supervision of a registered surveyor. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

This qualification is suitable for an Australian apprenticeship pathway.

## Entry Requirements

The entry requirement to this qualification is CPP50116 Diploma of Surveying, or demonstrated equivalent competency.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 9 units of competency:
  - 4 core units
  - 5 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- all 5 units may be chosen from the elective units listed below

- up to 2 units may be chosen from other Diploma, Advanced Diploma, Graduate Certificate or Graduate Diploma qualifications in CPP, or another current Training Package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification.

**Core units**

BSBR501	Manage risk
CPPSIS6032	Conduct advanced GNSS control surveys
CPPSIS6035	Conduct complex engineering set-out surveys
CPPSIS6036	Monitor engineering structures

**Elective units**

CPPSIS5044	Develop subdivision survey designs for local government approval
CPPSIS5046	Set out stormwater systems
CPPSIS5051	Apply land and planning law to surveying
CPPSIS5057	Conduct precision surveys
CPPSIS6021	Conduct open pit mine surveys
CPPSIS6022	Produce mine drawings
CPPSIS6025	Apply quality control measures to spatial products and services
CPPSIS6031	Design basic mines
CPPSIS6033	Conduct underground mine surveys
CPPSIS6034	Conduct mining geology operations
CPPSIS6037	Conduct advanced remote sensing analysis
CPPSIS6041	Compile mine survey plans
FNSORG501	Develop and manage a budget

# CPPCOM4001 Manage own work, professional development and ethical behaviour

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4018A Manage own work, professional development and ethical behaviour. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to adhere to regulatory requirements, organise own work commitments, maintain professional competence and model ethical practice while working in the property industry.

This unit is for individuals who work independently using specialised knowledge and skills in a range of property services sectors and organisations. It involves completing routine and non-routine tasks and dealing with predictable and sometimes unpredictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Unit Sector

Common

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Adhere to regulatory requirements for work activities.

1.1 Confirm industry accreditation and licensing requirements for conducting work activities.

1.2 Confirm roles and responsibilities of relevant industry accrediting and licensing organisations associated with

- work activities.
- 1.3 Develop a compliance plan to ensure own work practices are consistent with regulatory requirements.
  - 1.4 Comply with quality assurance processes of regulatory organisations when conducting work activities.
- 2 Model high standards of professional practice.
    - 2.1 Establish and maintain standards of personal presentation and client service appropriate to work role.
    - 2.2 Maintain personal performance in varying work conditions and work contexts.
    - 2.3 Recognise conflict in the workplace and respond promptly and safely to address issues and reach a positive conclusion.
    - 2.4 Determine personal liability for breach of contract or negligence and maintain professional indemnity insurance in line with regulatory and professional requirements.
    - 2.5 Use oral and written communication strategies to establish rapport with clients and provide accurate advice and follow-up services.
  - 3 Set and meet own work priorities
    - 3.1 Assess competing work demands and organise own work activities to achieve required individual, team and organisational priorities and timelines.
    - 3.2 Devise strategies to effectively manage workload and minimise personal stress.
    - 3.3 Identify strategies to support own requirements for work-life balance while meeting work priorities.
  - 4 Develop and maintain professional competence.
    - 4.1 Use self-assessment, reflection and client feedback to identify areas for improvement in own professional practice.
    - 4.2 Participate in professional networks and associations to enhance skills, knowledge and work relationships.

- 4.3 Keep up to date with new product developments and findings of current research associated with work practices.
  - 4.4 Source and use opportunities to develop and maintain professional competence.
- 5 Model ethical practice.
- 5.1 Identify and uphold ethical standards and industry codes of conduct in providing client services.
  - 5.2 Consult with relevant persons to verify personal understanding of ethics and conduct standards and ensure compliance with regulatory requirements.
  - 5.3 Identify situations requiring guidance on ethical practice and source advice to ensure ethical conduct.
  - 5.4 Identify and manage potential conflicts of interest when conducting work activities and providing client advice to ensure compliance with regulatory and industry codes of practice.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to interact with clients from diverse social, economic and cultural backgrounds
- reading skills to interpret key requirements of a variety of texts including regulations, codes of practice and industry accreditation and licensing information relevant to own work.

## Unit Mapping Information

Supersedes and equivalent to CPPHSA4018A Manage own work, professional development and ethical behaviour.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPCOM4001 Manage own work, professional development and ethical behaviour

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4018A Manage own work, professional development and ethical behaviour. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by engaging in a structured process of critical analysis and professional reflection that includes:

- evidence-based analysis of own work, professional development and professional behaviour
- a documented regulatory compliance plan to ensure own work practices are consistent with industry accreditation and licensing requirements
- a documented professional development plan that includes:
  - at least three opportunities to develop and maintain professional practice
  - strategies to address at least three different professional practice issues/challenges.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- client service standards appropriate to work role
- contractual obligations associated with work role and professional indemnity insurance required to meet regulatory requirements
- ethical standards and industry codes of conduct associated with work activities and providing client services
- factors that contribute to professional personal presentation
- professional networks and associations available within the industry
- requirements of industry accrediting or licensing organisations and government bodies applicable to work activities
- self-assessment, reflection and feedback techniques that can be used to identify areas for improvement in professional practice
- sources of information about new product developments and research associated with work practices
- sources of professional advice

- techniques for conflict resolution and dealing with difficult situations in the workplace
- techniques for identifying own professional development needs and how these can be met
- time management and scheduling techniques
- types of issues that may impact the ethical conduct of work activities:
  - conflicts of interest
  - fraudulent behaviours
  - inappropriate relationships with providers associated with procurement of goods or services.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- industry codes, guidelines, standards and legislation to support achievement of the performance evidence
- information about professional networks, associations and industry accreditation requirements applicable to work role.

# CPPCOM4002 Implement safe work practices in the property industry

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4005A Minimise health, safety and security risks when assessing home sustainability. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to apply work health and safety (WHS) practices and measures to manage risks to self, others and property while working in the property industry.

This unit is for individuals who work independently using specialised knowledge and skills in a range of property services sectors and organisations and workplace contexts. Workplace contexts may include the office environment or client sites during inspections. It involves completing routine and non-routine tasks and dealing with predictable and sometimes unpredictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Unit Sector

Common

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |   |
|--|---|
| 1 Confirm and apply workplace WHS requirements | 1.1 Identify key requirements of WHS legislation, regulations and codes of practice applicable to work role and jurisdiction. |
|--|---|

- 1.2 Confirm own responsibilities to protect people and property in the workplace and implement actions necessary to comply with duty of care requirements.
  - 1.3 Review workplace WHS documentation to identify and assess hazards and risks and implement required control measures.
  - 1.4 Use personal protective equipment (PPE) and follow work practices required to prevent injury or impairment.
  - 1.5 Use tools, equipment and materials to complete work activities following safe work practices.
  - 1.6 Prepare an emergency action plan to protect self, others and property in the event of a workplace emergency.
- 2 Minimise risks to self, others and property.
    - 2.1 Identify and assess risks to self, others and property in the workplace.
    - 2.2 Identify and apply measures to control risks and client confidentiality according to workplace requirements and emergency action plan.
    - 2.3 Monitor and review the effectiveness of control measures and take further actions as required to mitigate risk.
- 3 Report risks and recommend improvements to WHS practices.
    - 3.1 Report identified WHS risks according to workplace requirements.
    - 3.2 Evaluate response to identified risks and identify improvements to WHS practices.
    - 3.3 Document recommendations for improving WHS practices and disseminate to relevant persons.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- writing skills to prepare succinct and logically structured documentation
- reading skills to interpret key requirements of WHS information and documentation including safe work method statements (SWMS) and job safety analysis (JSA).

## Unit Mapping Information

Supersedes and equivalent to CPPHSA4005A Minimise health, safety and security risks when assessing home sustainability.

# Assessment Requirements for CPPCOM4002 Implement safe work practices in the property industry

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4005A Minimise health, safety and security risks when assessing home sustainability. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by implementing safe work practices in two different property industry workplace contexts, involving for each workplace:

- identifying a minimum of five hazards and assessing and controlling the risks associated with those hazards
- identifying and controlling a minimum of one risk for each of the following:
  - property
  - personal safety
  - client confidentiality
- identifying a minimum of three recommendations to improve WHS practices.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- contents of, and techniques for developing emergency action plans
- insurance coverage requirements for safety associated with work tasks
- methods for identifying actual and potential hazards in the workplace
- methods for controlling risks using the hierarchy of controls
- organisational procedures for consulting with others on WHS issues associated with work tasks
- own responsibilities and general duty of care under work health and safety (WHS) legislation, regulations and codes of practice applicable to work role and jurisdiction
- purpose and content of safe work method statements (SWMS)
- purpose and content of job safety analysis (JSA) procedures
- risk assessment process and how it is applied to mitigate risk
- safe work practices to be followed in different property workplace contexts:
  - conducting property inspections and site visits

- working in an office using computing equipment
- types and uses of personal protective equipment (PPE) required for work tasks
- types of WHS risks associated with the workplace and work role and control measures for each
- types of risks to information, people and property associated with work tasks and control measures for each
- types of WHS documentation used to report WHS hazards and risks.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- WHS legislation, regulations and codes of practice including *How to Manage Work Health and Safety Risks Code of Practice*, Safe Work Australia Work for the relevant jurisdiction and to allow achievement of the performance evidence
- tools, equipment, materials and documentation to allow achievement of the performance evidence.

# CPPDSM3009 Maintain workplace safety in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM3009A Maintain workplace safety in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to follow defined work health and safety (WHS) policies and procedures to ensure own safety and that of others in a property industry workplace. It requires the ability to identify and control workplace hazards and risks, apply appropriate responses to emergency situations, and communicate workplace safety requirements.

The unit supports workers in the property industry who are required to follow WHS policies and procedures. It applies to real estate agents, property managers, strata managers, Nationwide House Energy Rating Scheme (NatHERS) assessors, home sustainability assessors and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

<p>Elements describe the essential outcomes.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</p>
<p>1. Assist in implementing safety policies and procedures in the workplace.</p>	<p>1.1. Workplace safety requirements relevant to own role and responsibilities are identified and implemented.</p> <p>1.2. Organisational information outlining <b><i>WHS policies and procedures</i></b> is identified and accessed.</p> <p>1.3. Information identifying and controlling workplace hazards and risks is reviewed in line with organisational procedures.</p> <p>1.4. Work is conducted using safe workplace practices and according to WHS policies and procedures.</p>
<p>2. Follow workplace procedures for identifying hazards and controlling risk.</p>	<p>2.1. Hazards in work area are identified and reported in line with organisational requirements.</p> <p>2.2. Workplace instructions and <b><i>procedures for controlling hazards and risks</i></b> are followed.</p> <p>2.3. Emergency procedures are followed in line with WHS and organisational requirements.</p>
<p>3. Contribute to participative arrangements for managing WHS.</p>	<p>3.1. WHS issues, including compliance with applicable WHS policies and procedures, are raised with required people.</p> <p>3.2. Colleague contributions to <b><i>participative arrangements</i></b> for managing WHS in the workplace are encouraged.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of WHS policies and procedures</li> <li>• identify and use reliable sources of information to confirm details of workplace hazards and risks.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret numerical and graphical information in safety information in the workplace.</li> </ul>

- Oral communication skills to:
- ask questions to clarify procedures to follow in identifying potential workplace hazards and safe work practices.
- Reading skills to:
- read and interpret information about safe work practices and hazards.
- Writing skills to:
- prepare routine correspondence, including emails, messaging and letters, to record and report details of safety-related incidents in the workplace.
- Technology skills to:
- access the internet and web pages
  - prepare and complete online forms
  - lodge electronic documents
  - search online databases in relation to workplace safety.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- WHS policies and procedures*** must include:
- consultative arrangements for employees
  - emergency and evacuation procedures
  - equipment maintenance and use
  - first aid
  - hazard and risk identification and reporting
  - hazard, accident and incident investigation
  - on-site contractors, visitors and members of the public
  - risk assessment and control measures
  - safe operating procedures and instructions
  - transport, use and storage of dangerous goods and hazardous materials
  - use and maintenance of personal protective clothing and equipment
  - WHS audits and safety inspections.

- Procedures for controlling hazards and risks*** must include:
- compliance with environmental requirements
  - compliance with ergonomic requirements, including safe lifting and manual handling procedures
  - correctly selecting, using, storing and maintaining personal protective clothing and equipment
  - following emergency, fire and accident procedures
  - following safe operating procedures

- reporting hazards, accidents and incidents
- regular WHS consultations.

***Participative arrangements*** must include:

- formal and informal meetings to discuss WHS matters
- mechanisms for conveying employee suggestions, requests and concerns to management
- WHS committees, such as consultative, planning and purchasing committees.

# Assessment Requirements for CPPDSM3009 Maintain workplace safety in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM3009A Maintain workplace safety in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also follow defined work health and safety (WHS) policies and procedures to ensure own safety and that of others in three different work environments in the property industry.

The person must demonstrate this performance by:

- identifying the workplace hazards and risks in each of the above work environments
- identifying how each of the identified hazards and risks may be controlled and the appropriate responses to apply in associated emergency situations
- contributing to participative arrangements aimed at managing the hazards and risks identified in each of the above environments.

In doing the above, the person must:

- carry out work activities in a safe manner using safe operating practices and procedures
- follow required WHS risk and hazard response procedures within scope of own role and responsibilities.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- workplace hazards and risks in the property industry
- ways of controlling hazards and risks in the property industry
- organisational communication channels and procedures

- federal, state or territory legislation, codes, standards and local government regulations relating to workplace safety in the property industry
- range and meaning of WHS safety signs and symbols
- rights and responsibilities of employers and employees with regard to workplace safety
- types and purposes of personal protective clothing and equipment in the workplace
- workplace WHS management processes and designated personnel.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system to access online information concerning workplace safety in the property industry
- specifications:
  - relevant legislation, codes, standards and local government regulations relating to workplace safety in the property industry
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPDSM3010 Meet customer needs and expectations in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM3010B Meet customer needs and expectations in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to identify, clarify and meet customer needs and expectations in the property industry in a single encounter or multiple encounters on a one-to-one basis with a customer.

The unit supports work situations involving a direct relationship with internal and external customers. It applies to those in the property industry involved in identifying and clarifying customer needs and expectations, exploring alternative ways of satisfying them, and selecting appropriate products or services to meet them.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Identify customer needs and expectations.
  - 1.1. *Customer* preferences, needs and expectations are identified and clarified.
  - 1.2. Customer special requirements are identified and where appropriate referred to specialist staff in the organisation.
  - 1.3. *Communication techniques* appropriate to relationship and purpose of interaction are used.
  - 1.4. Limitations in identifying customer preferences, needs and expectations are identified, and advice is sought from required people.
2. Respond to identified customer needs and expectations.
  - 2.1. *Product and service knowledge* is applied to provide assistance to customers consistent with scope of own work role and responsibilities, organisational policies, and legislative requirements.
  - 2.2. Customer is provided with options and alternatives where appropriate.
  - 2.3. Features and benefits of relevant products and services are explained to customers.
  - 2.4. Information on special promotions for products and services is provided to customer.
  - 2.5. Feedback is sought from customer whether needs and, where practical, expectations have been satisfied.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• identify and use reliable sources of information on organisation's products and services</li> <li>• maintain current knowledge of organisation's products and services.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret routine numerical and graphical information on organisation's products and services.</li> </ul>

- Oral communication skills to:
- ask questions to clarify customer needs and expectations.
- Reading skills to:
- read and interpret supplier information to determine benefits and features of products and services.
- Writing skills to:
- prepare notes and summaries of customer needs and preferences in relation to services offered.
- Technology skills to:
- use business technologies to conduct routine communication with customers and provide standard information on the organisation's products and services.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Customer*** must include:
- internal and external customers
  - people from a range of social, cultural or ethnic backgrounds
  - people with varying physical and mental abilities
  - regular and new customers
  - those with routine or special requests.
- Communication techniques*** must include:
- active listening
  - giving customers full attention
  - maintaining eye contact
  - non-verbal communication, such as body language and personal presentation
  - speaking clearly and concisely
  - using appropriate language and tone of voice
  - using open and closed questions
  - writing clearly and legibly.
- Product and service knowledge*** must include:
- cost of products and services
  - features and benefits of products and services
  - legislation impacting on products and services
  - limits of advice that may be provided on products and services
  - product and service disclosures
  - range of products and services
  - supplier product and service information
  - timeframe for provision of products and services.

# Assessment Requirements for CPPDSM3010 Meet customer needs and expectations in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM3010B Meet customer needs and expectations in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also clarify and meet customer needs and expectations in the property industry by responding to the following two different customer service situations:

- a single encounter on a one-to-one basis with one internal customer
- two or more encounters on a one-to-one basis with one external customer.

In doing the above, the person must:

- identify needs and expectations of each customer
- deliver a service to both customers in required timeframes
- apply knowledge of organisational practices, ethical standards, and legislative requirements associated with meeting customer needs and expectations
- locate, interpret and apply relevant product and service information
- recommend acceptable options or alternatives to customers, or explain to customers why their needs cannot be met
- use communication strategies suited to the customer and service situation.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- communication strategies to use when establishing and maintaining customer relationships
- organisation's product and service range, sufficient to make choices between different products and services based on identified customer needs and expectations
- key requirements of federal, state or territory legislation, codes, standards and local government regulations relating to:

- anti-discrimination
- consumer protection
- environmental issues
- financial probity
- work health and safety (WHS)
- property sales, leasing and management.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet access and printer
- specifications:
  - organisational policies and procedures for interacting and communicating with customers
  - details of services offered by organisation
  - relevant legislation, codes, standards and local government regulations relating to organisation's products and services
- relationship with team members and supervisor:
  - member of a work team in a property industry context under supervision of the manager or a workplace principal.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

## CPPDSM3011 Monitor building facilities

### Modification History

Release 1.

Replaces superseded equivalent CPPDSM3011B Monitor building facilities.

This version first released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to monitor building facilities to ensure that maintenance and service problems are identified and resolved, or reported where necessary. It requires the ability to identify and arrange necessary maintenance and service work and to check the results against work orders.

The unit supports workers in the property industry who are required to monitor building facilities. It applies to real estate agents, property managers, strata managers and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

### Pre-requisite Unit

Nil

### Competency Field

Strata community management

### Unit Sector

Property services

### Elements and Performance Criteria

Elements describe the      Performance criteria describe the performance needed to

- essential outcomes. demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Identify maintenance and service requirements.
    - 1.1. ***Maintenance and service requirements*** of building facilities are specified and confirmed against work order.
    - 1.2. Work practices and timelines are confirmed.
    - 1.3. Site access and specific site requirements are verified and appropriate arrangements are made.
    - 1.4. Communication channels and processes are confirmed.
  2. Monitor building facilities.
    - 2.1. Building facilities are monitored against work order to ensure that designated maintenance and service tasks are completed within required timeframes.
    - 2.2. Maintenance and service requirements are identified and noted according to work health and safety (WHS) and organisational requirements.
    - 2.3. Notified breaches of ***building controls*** are reported.
    - 2.4. Interpersonal techniques are used to discuss issues or concerns.
    - 2.5. Situations requiring specialist advice are identified and assistance is sought as required.
  3. Arrange for routine maintenance and service.
    - 3.1. Routine maintenance and service to building facilities are arranged.
    - 3.2. Notification of completed maintenance and service is confirmed on receipt.
    - 3.3. Accredited contractor inspections are arranged to confirm maintenance or service has been effectively carried out according to work order.
    - 3.4. Business equipment and technology are used to maintain relevant documentation.

## Foundation Skills

# Assessment Requirements for CPPDSM3011 Monitor building facilities

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM3011B Monitor building facilities.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also monitor building facilities to ensure that maintenance and service problems are identified and resolved, or reported where necessary.

The person must demonstrate this performance by identifying and arranging the maintenance and service requirements for two different buildings, and monitoring these arrangements to ensure that designated maintenance and service tasks are completed within required timeframes.

In doing the above, the person must:

- verify maintenance and service requirements for building facilities against work order and consult with relevant people to arrange access to building facilities
- monitor building facilities to ensure completion of designated maintenance and service tasks within required timeframes
- arrange accredited contractor inspection
- use business equipment and technology to maintain associated documentation.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- building facilities' maintenance and service requirements
- common hazards to public and personal safety associated with particular types of maintenance work in buildings
- key features of property contracts and administrative requirements

- key requirements of federal, state or territory legislation, codes, standards and local government regulations relating to monitoring building facilities, including:
  - building and construction
  - property leasing and management
  - work health and safety (WHS)
- limitations of own work role, responsibilities and professional abilities
- points of contact with emergency service agencies.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system to access online information concerning maintenance and service requirements for building facilities
- specifications:
  - building facilities' service and maintenance requirements and/or work order
  - procedures for building function checks
  - relevant legislation, codes, standards and local government regulations relating to workplace safety in the property industry
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM3016 Work in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM3016A Work in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to apply foundation knowledge to work effectively and efficiently in the property industry. It covers the basic entry-level functions to enable compliance with legislative, financial and procedural requirements. It requires the ability to identify potential risks associated with a range of activities in the property industry, and opportunities for improving own professional development.

The unit supports workers in the property industry who are required to apply foundation knowledge to work effectively and efficiently in the industry. It applies to real estate agents, property managers, strata managers and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |    |   |      |   |
|----|---|------|---|
| 1. | Interpret and comply with legislative, financial and procedural requirements. | 1.1. | <b><i>Legislative, financial and procedural requirements</i></b> relevant to organisation's services are identified.  |
|    |   | 1.2. | Key principles relating to consumer protection and trade practices within the context of own role are identified and interpreted.                                   |
|    |   | 1.3. | Own interpretation and application of legislative, financial and procedural requirements are confirmed to ensure consistent and accurate understanding.             |
|    |   | 1.4. | Situations requiring specialist advice are identified and assistance is sought as required.   |
| 2. | Interpret and comply with ethical practices and rules of conduct.             | 2.1. | Regulatory and industry standards, and codes of ethics and conduct are identified and interpreted.  |
|    |   | 2.2. | Key principles relating to organisation's ethical values are identified and interpreted in line with legislative and industry requirements.                         |
|    |   | 2.3. | Own interpretation and application of ethical and conduct requirements are confirmed to ensure consistent and accurate understanding.                               |
|    |   | 2.4. | Situations requiring specialist advice are identified and assistance is sought as required.   |
| 3. | Interpret work role and responsibilities.                                     | 3.1. | Own role and responsibilities are identified and confirmed with supervisor.   |
|    |   | 3.2. | Work tasks are identified, scheduled and completed within designated timeframes.  |
|    |   | 3.3. | Work practices are adapted to meet the specific needs of relevant people.   |
|    |   | 3.4. | Feedback from clients and colleagues is sought and used to determine professional competency and quality of performance, and to identify key areas for improvement. |
|    |   | 3.5. | Information regarding learning and professional   |

- development is recorded and maintained.
4. Identify risks.
    - 4.1. Potential and existing *risks* are identified and reported according to organisational procedures.
    - 4.2. Recommendations on appropriate strategies to minimise risks and complaints are discussed with supervisor.
    - 4.3. Limitations in identifying risks are identified and assistance is sought.
    - 4.4. Information collection techniques are used to access information from individuals and groups on identified potential and existing risks.
  5. Complete standard contractual documentation.
    - 5.1. Standard documentation for property operations is completed according to legislative and organisational requirements.
    - 5.2. Business equipment and technology are used as required to complete documentation.
    - 5.3. Written information is prepared that complies with organisational standards of language, accuracy and relevance; and is used in an ethically and legally appropriate manner.
    - 5.4. Property documentation and information systems are securely maintained.
  6. Access information on industry employment and professional development requirements.
    - 6.1. Industry employment and professional development requirements are accessed and interpreted to ensure own continuing professional development.
    - 6.2. Employee and employer rights and responsibilities, including remuneration and awards, are accessed and interpreted.
    - 6.3. Key industry and statutory organisations able to assist own professional development are identified and assistance is sought as required.
    - 6.4. Industry *competency standards and other relevant benchmarks* are identified and reviewed to establish future professional development needs and priorities.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of ethical and conduct standards for the property industry</li> <li>• identify and use reliable sources of information to confirm details of employment conditions in the property industry.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify procedures for sourcing expert advice and services relating to risk identification in the property industry.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• read and interpret standards documentation used routinely in property industry operations.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• complete forms and other types of standard documentation used routinely in the property industry.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• use business technologies to access information, complete standard forms, lodge electronic documents, and search online databases.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Legislative, financial and procedural requirements</i></b> must include two or more of the following:	<ul style="list-style-type: none"> <li>• Australian Securities and Investments Commission, Australian Competition and Consumer Commission, and Foreign Investment Review Board requirements</li> <li>• Australian standards relating to working in the property industry</li> <li>• federal and state taxation requirements</li> <li>• consumer protection laws and guidelines</li> <li>• court and tribunal precedents</li> <li>• environmental and zoning laws affecting access security, access and property use</li> <li>• freedom of information</li> <li>• home building requirements</li> <li>• licensing requirements</li> <li>• privacy and confidentiality requirements and laws applying to owners, contractors and tenants</li> <li>• public health requirements relating to working in the property</li> </ul>
---	---

industry

- quality assurance and certification requirements
- federal, and state or territory legislation and regulations affecting organisational operation, including:
  - anti-discrimination
  - environmental issues
  - equal employment opportunity (EEO)
  - industrial relations
  - work health and safety (WHS)
- industry codes of conduct relating to own role, which may cover areas including market sector, financial transactions, taxation, environment, construction, land use, native title, zoning, utility use (water, gas and electricity), and contract or common law
- local government policies and regulations relating to own role
- strata, community and company titles
- tenancy agreements.

**Risks** must include:

- changes to regulations and legislation
- client and staff satisfaction
- competition
- emergencies and disasters
- fire and security
- health and safety
- market influences
- physical, financial or human resources
- project control and cash flow
- suppliers and contractors
- time constraints.

**Competency standards and other relevant benchmarks** must include:

- benchmarks:
  - industry code of conduct and code of ethics
  - statutory and legislative requirements relating to working in the property sector
- personal and technical knowledge, skills and attitudinal aspects required to undertake day-to-day tasks and duties of the work function effectively and efficiently; specifically:
  - competency standards for the property industry
  - other relevant industry, cross-industry and organisational competency standards.

# Assessment Requirements for CPPDSM3016 Work in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM3016A Work in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also respond to six routine workplace situations, one relating to each of the following aspects of work in the property industry:

- interpreting and complying with legislative, financial and procedural requirements
- interpreting and complying with ethical practices and rules of conduct
- interpreting own work role and responsibilities
- identifying and reporting risks
- completing standard contractual documentation
- accessing information on industry employment requirements.

In each of the above, the person must respond to the situation, evaluate his or her personal performance in resolving it, and assess his or her personal competency development needs in relation to the way he or she responded.

In doing the above, the person must:

- interpret and comply with relevant legislative, financial and procedural requirements and confirm own understanding and application with relevant people
- interpret and comply with ethical practices and codes of conduct and check own understanding and application with relevant people
- identify a range of potential and existing risks using appropriate information collection techniques, and discuss recommendations on strategies to minimise risks with relevant people
- complete standard contractual documentation ensuring adherence to legislative and procedural requirements, and securely maintain property information

- interpret and use industry employment and professional development guidelines and benchmarks, and seek assistance from key industry and statutory organisations to ensure own continuing professional development
- interpret and verify own role and responsibilities, and carry out work tasks according to professional standards.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- limitations of own work role, responsibilities and professional abilities
- organisational and professional procedures relating to own work role
- key requirements of federal, state or territory legislation, codes, standards and local government regulations relating to own work role, including:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - equal employment opportunity (EEO)
  - financial probity
  - franchise and business structures
  - industrial relations
  - work health and safety (WHS)
  - property sales, leasing and management
  - risk factors relating to a variety of transactions
- routine knowledge of procedures for general office processes
- WHS issues and requirements relating to working in the property industry.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet access and printer to access legislation, ethical and conduct standards, and policies and procedures
- specifications:
  - workplace safety and risk identification procedures
  - relevant legislation, codes, standards and local government regulations relating to workplace safety in the property industry
- relationship with team members and supervisor:
  - member of a work team in a property industry context under supervision of the manager or workplace principal.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM3019 Communicate with clients in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM3019B Communicate with clients as part of agency operations.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to interact and build relationships with clients in the property industry. It includes developing rapport with clients, handling initial client enquiries, establishing and maintaining a client database, and dealing with client complaints and problems.

The unit supports the work of a range of property industry professionals, including licensed real estate agents, real estate representatives and support staff, stock and station agents, and strata managers, in interacting and building effective relationships with clients as part of agency or organisation operations.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

<p>Elements describe the essential outcomes.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</p>
<p>1. Establish contact with clients and determine their needs.</p>	<p>1.1. Contact with client is established and an interest in <b><i>client needs, preferences and requirements</i></b> is expressed to enhance client commitment and trust, and credibility of agency or organisation, and build return client base.</p> <p>1.2. <b><i>Professional ethics</i></b> are maintained with client to promote agency image and credibility.</p>
<p>2. Handle initial client enquiries.</p>	<p>2.1. Client needs, preferences and requirements are accurately clarified to maximise opportunities to promote agency or organisation services.</p> <p>2.2. Client is given space and time to evaluate agency or organisation services, while time is used to maximum advantage for client and agency or organisation.</p> <p>2.3. Client is provided with accurate initial information on agency or organisation services.</p> <p>2.4. Features and benefits of agency or organisation services are explained to client.</p> <p>2.5. Interview appointment time is arranged where necessary and interview preparations are completed.</p> <p>2.6. Formal and informal information is gathered and appropriate notes are taken for file.</p>
<p>3. Maintain and use client database.</p>	<p>3.1. Client database is accurately developed, regularly maintained and securely stored, while maintaining client confidentiality.</p> <p>3.2. Regular clients are accurately identified and followed up.</p> <p>3.3. Client records are accurately used to advise clients on agency or organisation services of possible interest.</p>
<p>4. Deal with client complaints and problems.</p>	<p>4.1. Client complaints and problems are acknowledged and client is supported to produce a positive outcome.</p> <p>4.2. Client is encouraged to verbalise issues and active</p>

listening is used to minimise client frustration.

- 4.3. Client's confidence in agency or organisation is developed to promote long-term commitment and trust.
- 4.4. Mutually acceptable resolution of complaint or problem is achieved by implementing agency or organisation's policies and procedures.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• identify and use reliable sources of information on ways of enhancing client service strategies.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret routine numerical and graphical client information derived from client database.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify procedures for dealing with client enquiries and complaints.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• read and interpret client profiles to gather routine information on client needs and previous use of agency or organisation's services.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare notes and summaries of client needs, preferences and requirements in relation to services offered by agency or organisation.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• use business technologies to access information from client databases and conduct online searches to gather routine information on clients while paying due regard to confidentiality and privacy.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Client needs, preferences and requirements</i></b> must	<ul style="list-style-type: none"> <li>• agency or organisation services in relation to specific property</li> <li>• contract administration</li> <li>• current and planned developments</li> </ul>
---	---

include:

- service, repair and maintenance of building facilities.

*Professional ethics*  
must include:

- acting in the interests of client
- code of conduct
- confidentiality
- disclosure of conflicts of interest
- due care
- honesty
- integrity
- privacy
- professional behaviour
- professional competence.

# Assessment Requirements for CPPDSM3019 Communicate with clients in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM3019B Communicate with clients as part of agency operations.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also interact and build relationships with clients as part of agency or organisation operations.

The person must demonstrate this performance by responding to each of the following routine workplace situations in the property industry:

- dealing with an initial enquiry from a potential new client about services offered by agency or organisation
- responding to a specific request from an existing client of agency or organisation
- responding to a customer complaint about the quality of service provided by agency or organisation.

In doing the above, the person must:

- apply agency or organisational policies and procedures, and relevant legislative requirements in regard to dealing with clients
- apply knowledge of agency or organisational services to enhance client support
- develop client commitment to agency or organisation and build return custom by establishing rapport and a relationship with client, maintaining professional ethics, and accurately discerning client needs, preferences and requirements
- establish and maintain client records and details, maintain client confidentiality, ensure secure storage of client records, and use client records to maximise client interest in agency or organisation's services
- resolve client complaints by acknowledging problems, supporting client in arriving at positive outcomes, and obtaining mutually acceptable complaint resolution

- use effective questioning, listening and observation skills to accurately determine client requirements.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- agency or organisation's record-keeping requirements
- client service goals and objectives
- services, including:
  - features and benefits
  - types
- client complaints and problems, including:
  - strategies for resolving conflicts
  - types
- client database with contact information
- client needs, preferences and requirements specific to own work role
- effective communication principles, including principles of and barriers to effective communication
- ethical standards, including:
  - acting in the interests of client
  - confidentiality
  - disclosure of conflict of interest
  - due care
  - honesty
  - integrity
  - privacy
  - professional behaviour
  - professional competence
- work organisation techniques and procedures, including:
  - prioritising workload to deal effectively with clients and enquiries
  - preparing timely and sufficient information
  - timing and scheduling of appointments.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet access and printer
- specifications:
  - agency or organisation policies and procedures for interacting and communicating with clients, including for resolving disputes

- client database
- details of services offered by agency or organisation
- codes, standards and regulations relating to client service in the property industry
- relationships with team members and supervisor:
  - member of a work team in a property industry context under supervision of the manager or workplace principal.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

## CPPDSM4020 Present at tribunals

### Modification History

Release 1.

Replaces superseded equivalent CPPDSM4020A Present at tribunals.

This version first released with CPP Property Services Training Package Version 5.

### Application

This unit of competency specifies the outcomes required to appear effectively before a tribunal. It includes preparing for tribunal hearings, using tribunal etiquette, acting as a witness, participating in conciliation hearings, and presenting a case.

The unit supports the work of property industry professionals, including licensed real estate agents, stock and station agents, strata managers and their authorised representatives involved in preparing and presenting cases at tribunals relating to property industry operations.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

### Pre-requisite Unit

Nil

### Competency Field

Strata community management

### Unit Sector

Property services

### Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

text is used, further information is detailed in the range of conditions.

1. Prepare for tribunal.
  - 1.1. Process for making an application to relevant tribunal is followed.
  - 1.2. Documentation required for application to relevant tribunal is accurately completed.
  - 1.3. Evidence and other documentation required for tribunal are prepared and reviewed.
  - 1.4. Advice from appropriate assisting professionals is sought in preparing for tribunal hearing, as required.
  - 1.5. Pre-tribunal hearing briefings are participated in as appropriate and required.
  - 1.6. Procedure to follow where a matter has been settled prior to hearing is implemented in line with organisational and legislative requirements.
2. Participate in conciliation processes for grievances and disputes.
  - 2.1. ***Purpose and role of conciliation*** are clarified within particular tribunal and case context.
  - 2.2. Opportunities are explored to resolve grievances and disputes through conciliation.
  - 2.3. Conciliators are provided with complete and accurate information regarding grievance or dispute.
  - 2.4. Clear and concise formal case statements are prepared and provided for conciliator.
  - 2.5. Opportunities are taken to obtain relevant information from other parties during conciliation process.
  - 2.6. Realistic assessments are made of conciliated offers against the likely outcome of continuing with conciliation process and any subsequent rulings from adjudicating body.
3. Use appropriate tribunal etiquette.
  - 3.1. Appropriate manner of entering and departing tribunal is used.
  - 3.2. Appropriate manner of addressing tribunal is used.
  - 3.3. Relevant legal and industry language is used where appropriate.

- |                                  |  |
|----------------------------------|--|
| 4. Present case before tribunal. | 4.1. Rules and procedures of tribunal are applied.   |
|                                  | 4.2. Case is outlined in a clear and concise manner.   |
|                                  | 4.3. <b>Evidence</b> is given and routine <b>examination of witnesses</b> is undertaken appropriately.   |
|                                  | 4.4. Relevant decisions and precedents are referred to appropriately.  |
|                                  | 4.5. Respondent submissions are responded to appropriately.  |
|                                  | 4.6. Questions and directions from tribunal are responded to appropriately.  |
|                                  | 4.7. Statement of reasons for tribunal decision is requested in line with tribunal and agency practice.  |
| 5. Act as a witness.             | 5.1. <b>Pre- and post-tribunal briefings and debriefings</b> are participated in as required.  |
|                                  | 5.2. Evidence is provided clearly and concisely using factual descriptions that reflect questions and directions asked by tribunal or legal representatives. |
|                                  | 5.3. Requirements of tribunal processes and proceedings are observed while acting as witness.  |
|                                  | 5.4. Liaison with appropriate legal representatives is maintained.   |
|                                  | 5.5. Appropriate and required documentation and reporting are completed and stored according to agency practice.   |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of tribunal procedures.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret graphical and statistical material that is provided as evidence.</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>• ask questions to clarify procedures used in conciliation and tribunal processes</li> </ul>

- skills to:
- provide verbal testimony and respond to questions in tribunal hearings; reiterating, summarising and clarifying as required.
- Reading skills to:
- access and interpret sometimes complex written text on tribunal rules and procedures.
- Writing skills to:
- prepare summaries and take notes on information presented in pre- and post-hearing tribunal briefings and debriefings.
- Technology skills to:
- access online information when preparing for tribunal hearings.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Purpose and role of conciliation*** must include:
- giving parties a chance to settle a matter on their terms
  - giving parties the opportunity to hold a frank discussion about the complaint in an attempt to resolve the matter through negotiation.

- Evidence*** must include information that:
- is descriptive
  - is devoid of assumptions or judgemental statements
  - represents details and facts of evidence pertinent to the case.

- Examination of witnesses*** must include:
- cross-examining respondent witnesses
  - questioning own witnesses
  - re-examining own or respondent witnesses.

- Pre- and post-tribunal briefings and debriefings*** must include:
- details of the case
  - outcomes and consequences of tribunal decisions
  - presentation of evidence
  - rules of evidence
  - tribunal protocol.

# Assessment Requirements for CPPDSM4020 Present at tribunals

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4020A Present at tribunals.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also appear effectively before a tribunal on three separate occasions as follows:

- prepare and present a case before a tribunal on a property-related matter
- participate in a conciliation process to resolve a property-related grievance or dispute
- act as a witness at a tribunal on a property-related matter.

In doing the above, the person must:

- apply knowledge of the role and jurisdiction of tribunals that hear matters relating to property operations
- prepare and lodge applications for a tribunal
- complete and store documentation relating to the above matters according to agency or organisation requirements.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- protocols to follow when acting as a witness
- purpose and role of conciliation in the property industry
- key requirements of federal, and state or territory legislation and local government regulations relating to:
  - anti-discrimination and equal employment opportunity
  - consumer protection and trade practices
  - employment and industrial relations
  - environmental issues

- financial services
- franchises and business structure
- leases
- privacy
- property sales and management
- work health and safety (WHS)
- role and jurisdiction of tribunal that hear matters relating to property operations
- key features of the rules of evidence
- powers and role of tribunals in property-related hearings
- tribunal procedures, including:
  - documentation required for applications to tribunal
  - procedure to be followed for presenting a case to a tribunal
  - procedure to be followed where a matter has been settled prior to hearing
  - process for making an application to a tribunal
  - role of witnesses
  - tribunal etiquette.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
  - tribunal environment
- specifications:
  - checklist for identifying tasks to be completed in preparing for a hearing
  - guides for acting as a witness, tribunal processes, and presenting a case at a tribunal
  - federal, and state or territory legislation and local government regulations relating to property operations
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4026 Analyse property and facility information

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4026A Analyse property and facility information.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to collect and analyse property and facility information. It requires the ability to obtain information from a variety of sources, review information, and use research and analysis techniques to enable recommendations to be made.

The unit supports workers in the property industry who are required to collect and analyse property information. It applies to real estate agents, property managers, strata managers, Nationwide House Energy Rating Scheme (NatHERS) assessors, home sustainability assessors and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

<p>Elements describe the essential outcomes.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</p>
<p>1. Organise property information.</p>	<p>1.1. <b><i>Property information</i></b> requirements are identified.</p> <p>1.2. <b><i>Sources of property information</i></b> relevant to identified requirements are accessed.</p> <p>1.3. Reliable methods of organising property information are used, making efficient use of business equipment and technology and available time and resources.</p>
<p>2. Analyse property information.</p>	<p>2.1. Property information is analysed for validity and reliability, using reliable and valid <b><i>data analysis methods</i></b> to identify facts, issues, patterns, interrelationships and trends.</p> <p>2.2. Assumptions used in analysis are clear, justified and consistent with evaluation objectives.</p> <p>2.3. Conclusions are supported by evidence and contribute to achieving client and organisational objectives.</p> <p>2.4. Limitations in analysing property information are identified and specialist advice is sought as required.</p>
<p>3. Present findings.</p>	<p>3.1. Outcomes of analysis are presented in required format, style and structure using clear and concise language.</p> <p>3.2. Analysis findings are reported and distributed to required people.</p> <p>3.3. Feedback on suitability and sufficiency of findings is obtained and reviewed for improved future processes.</p> <p>3.4. Property information is securely maintained with due regard to client privacy and confidentiality, and legislative and organisational requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of types of property data and data analysis methods.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret graphical and statistical data on properties and facilities.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to identify limitations of property and facility information.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• access and interpret complex written texts to gather property and facility information.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare summaries and take notes on outcomes of analysis of property and facility data.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• access online sources of property and facility information.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Property information</i></b> must include at least six of the following:	<ul style="list-style-type: none"> <li>• company services</li> <li>• construction costs</li> <li>• current and planned property or site developments</li> <li>• depreciation schedules</li> <li>• inventories</li> <li>• leasing rates</li> <li>• management policy and procedures</li> <li>• marketing services</li> <li>• occupancy rates</li> <li>• operating costs</li> <li>• purchasing information</li> <li>• sales information.</li> </ul>
<b><i>Sources of property information</i></b> must include:	<ul style="list-style-type: none"> <li>• internet, intranet and extranet</li> <li>• local, state and federal government documents and registers</li> <li>• newspapers and journals</li> <li>• policy statements</li> <li>• property reports</li> <li>• qualitative and quantitative data</li> <li>• television and radio.</li> </ul>
<b><i>Data analysis methods</i></b>	<ul style="list-style-type: none"> <li>• basic statistical analysis</li> </ul>

- must include:
- critical analysis
  - mathematical calculations
  - problem solving.

# Assessment Requirements for CPPDSM4026 Analyse property and facility information

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4026A Analyse property and facility information.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also collect and analyse property and facility information as follows:

- collect and analyse information on the physical condition of one property or facility and present findings, including recommendations for action to the owner
- collect and analyse information on the use of a property or facility and present findings, including recommendations for action to the manager
- collect and analyse information on the management policies for a property or facility and present findings, including recommendations for action to the owner and manager.

In doing the above, the person must:

- identify property information requirements
- apply knowledge of organisation's practices, ethical standards, and legislative requirements associated with collecting and analysing property and facility information
- obtain information from a range of sources
- identify gaps in information
- review and prepare findings in a format suitable for presentation
- use appropriate data analysis techniques
- use appropriate software to sort and analyse data.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- client and organisational privacy and confidentiality policies
- internal and external sources of property information

- methods of data analysis
- organisational policies and procedures relating to data collection
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - equal employment opportunity (EEO)
  - financial probity
  - franchise and business structures
  - industrial relations
  - property sales, leasing and management
  - work health and safety (WHS)
- security procedures and safe record-keeping practices
- software applications used to organise and analyse data
- types of data collection and management systems.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- materials:
  - property or facility
  - software applications used to organise and analyse data
- specifications:
  - client and organisational confidentiality policies
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4042 Coordinate construction contract

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4042A Coordinate construction contract.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to implement and monitor construction contracts. It requires the ability to effectively plan and document work activities, coordinate and monitor subcontractors, and check and report completed work.

The unit supports workers in the property industry who are involved in implementing and monitoring construction contracts. It applies to real estate agents, property managers, strata managers and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

text is used, further information is detailed in the range of conditions.

1. Determine construction contract requirements.
  - 1.1. Construction contract requirements are reviewed and confirmed with relevant people.
  - 1.2. *Consultative processes* are used to negotiate and confirm construction requirements with contracted parties.
  - 1.3. *Site access and specific site requirements* are identified and appropriate arrangements made as required according to client, legislative and organisational requirements.
  - 1.4. Construction plan is prepared and contingencies are planned to ensure contract and organisational requirements are met.
  - 1.5. Additional resource requirements are identified according to construction plan and budget.
  - 1.6. Draft documentation is reviewed to ensure accuracy and relevance of information.
2. Monitor construction contract.
  - 2.1. Construction plan is monitored against contract and work schedules to ensure completion within designated timeframes.
  - 2.2. Site inspections are made on a regular basis so progress can be assessed and reported.
  - 2.3. Factors affecting achievement of scheduled work are identified and required variations to schedules are negotiated and agreed.
  - 2.4. Established communication channels and processes are used to ensure accurate exchange of information throughout operation.
  - 2.5. Situations requiring specialist advice are identified and support is sought as required.
3. Check and record completed works according to contract conditions.
  - 3.1. Certificate of practical completion is received from contracted parties and checked against client and organisational requirements to finalise construction contract.
  - 3.2. Inspection is arranged to confirm that construction meets

contract requirements and industry standards.

- 3.3. Defects are identified and prompt remedial action is arranged.
- 3.4. Written reports and associated documentation are prepared using business equipment and technology.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of contents and procedures for preparing construction contracts.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• calculate and analyse costs associated with implementing construction contracts</li> <li>• interpret and convert measurements and scales used in constructions plans, drawings and specifications.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify information in construction contracts and work schedules.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• read and interpret complex information in site reports.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare written reports on defects identified through site inspections.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Consultative processes</i></b> must include:	<ul style="list-style-type: none"> <li>• face-to-face meetings</li> <li>• telephone, facsimile and written communication.</li> </ul>
<b><i>Site access and specific site requirements</i></b> must include:	<ul style="list-style-type: none"> <li>• access and egress points</li> <li>• access codes</li> <li>• building codes and regulations</li> </ul>

- heritage listings
- keys, passes and security clearances
- noise control
- time of access
- union requirements
- work health and safety (WHS) requirements.

# Assessment Requirements for CPPDSM4042 Coordinate construction contract

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4042A Coordinate construction contract.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also implement and monitor a construction contract for two of the following:

- new building construction
- renovation of existing building
- fitout of existing building
- new building facility installation
- upgrade or replacement of existing building
- equipment installation.

In doing the above, the person must:

- administer the contracts for the above construction work in normal industry conditions
- determine appropriate work schedules with contracted parties
- identify and organise appropriate documentation
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with implementing and monitoring the contracts
- negotiate variations and adjustments to construction schedules.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- building codes and Australian standards relating to construction contracts
- purpose, contents, and process for preparing building contracts
- building construction practices, principles and processes
- building control legislation

- common building defects
- key features of construction plans, drawings and specifications
- limitations of own work role, responsibilities and professional abilities
- local zoning requirements
- methods and techniques for monitoring project outcomes
- project planning methods and techniques
- range of contracted parties and their roles and capabilities
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - financial probity
  - franchise and business structures
  - industrial relations
  - privacy
  - property sales, leasing and management
  - work health and safety (WHS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - details of construction work to be undertaken
  - organisational policies and procedures for coordinating construction contracts
  - organisational template for construction contracts
  - source documentation or access to source documentation relating to construction work to be undertaken
- relationship with team members and supervisor:
  - member of a work team involved in implementing and monitoring construction contracts strategies.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations (RTOs)* current at the time of assessment.

# CPPDSM4044 Coordinate maintenance and repair of properties and facilities

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4044A Coordinate maintenance and repair of properties and facilities.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to plan and coordinate the repair, maintenance and modification of properties and facilities. It requires the ability to plan and document work activities effectively, coordinate and monitor subcontractors, and check and report the results of work performed.

The unit supports workers in the property industry who are involved in planning and coordinating the maintenance and repair of properties and facilities. It applies to real estate agents, property managers, strata managers and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |  |  |
|--|--|
| 1. Plan repair or maintenance operation.                       | 1.1. <b><i>Repair or maintenance requirements</i></b> are confirmed.   |
|  | 1.2. <b><i>Site access and specific site requirements</i></b> are identified and appropriate arrangements are made.                                      |
|  | 1.3. Work order is prepared and contingencies are planned to ensure client and organisational requirements are met in an efficient and effective manner. |
|  | 1.4. Safety and security requirements are recognised and implemented.  |
|  | 1.5. Communication channels and processes are established.   |
| 2. Coordinate repair or maintenance operation.                 | 2.1. Repair or maintenance operation is monitored against work schedules to ensure completion within designated timeframes.                              |
|  | 2.2. Factors affecting achievement of scheduled work are identified and required variations to schedules are negotiated and agreed.                      |
|  | 2.3. Established communication channels and processes are used to ensure accurate exchange of information throughout operation.                          |
|  | 2.4. Situations requiring specialist advice are identified and assistance is sought as required.   |
| 3. Check and record completed repair or maintenance operation. | 3.1. Notification of completed repair or maintenance is received and checked against client and organisational requirements.                             |
|  | 3.2. Inspection is arranged to confirm repair or maintenance is fully operational and meets performance specifications and industry standards.           |
|  | 3.3. Faults, errors or omissions are verified and prompt remedial action is determined and arranged.   |
|  | 3.4. Documentation of repair or maintenance is prepared using business equipment and technology.   |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of building regulations and building controls.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• determine quantities of resources and costs associated with repair, service and maintenance of buildings and facilities.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to gather complex information and clarify nature of building repair, service and modification requirements.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• read and assess the accuracy of work orders and building specifications.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare routine documentation associated with planning and coordinating repairs, maintenance and modifications to buildings and facilities, including agendas, minutes, meeting notes, and correspondence in the form of email and letters.</li> </ul>
Digital literacy skills to:	<ul style="list-style-type: none"> <li>• use complex project management software to plan and coordinate repairs, maintenance and modifications to buildings and facilities.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Repair or maintenance requirements</i></b> must include at least three of the following:	<ul style="list-style-type: none"> <li>• backups</li> <li>• changing user codes</li> <li>• confirming operational effectiveness</li> <li>• identifying and replacing worn parts</li> <li>• inspecting, lubricating, cleaning and adjusting parts</li> <li>• routine repairs.</li> </ul>
--	---

***Site access and specific site requirements***

must include at least four of the following:

- access and egress points
- access codes
- building codes and regulations
- heritage listings
- keys, passes and security clearance
- noise control
- time of access
- union requirements
- work health and safety (WHS) requirements.

## Unit Mapping Information

# Assessment Requirements for CPPDSM4044 Coordinate maintenance and repair of properties and facilities

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4044A Coordinate maintenance and repair of properties and facilities.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also plan and coordinate the following repair, maintenance and modification of properties and facilities:

- an immediate routine repair to an item of common property
- the longer-term maintenance of a shared facility
- a major modification to a common use facility.

In doing the above, the person must:

- inspect completed work against work order and ensure remedial action for faults, errors and omissions
- monitor maintenance and repair work, ensuring effective communication exchange and identifying factors requiring variations to work schedules
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with planning and coordinating the repair, maintenance and modification of properties and facilities
- plan maintenance and repair work ensuring:
  - client and tenant safety and security
  - resource requirements are according to budget parameters
- respond appropriately to requests for maintenance and repair work and maintain adequate records and reports.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- basic knowledge of property contracts and administrative requirements
- building codes and Australian standards relating to the maintenance and repair of properties and facilities
- building construction practice
- building control legislation relating to the maintenance and repair of properties and facilities
- common hazards to personal and public safety associated with particular types of maintenance work in buildings
- common building defects
- limitations of own work role, responsibilities and professional abilities
- maintenance and service intervals and requirements for building facilities
- organisational and professional procedures, ethical practices and business standards
- points of contact with emergency service agencies
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - consumer protection
  - environmental issues
  - industrial relations
  - property sales, leasing and management
  - strata community management
  - work health and safety (WHS)
- sources of information on maintaining and repairing property assets
- WHS issues and requirements, including risks with maintenance and repair activities and risk control measures.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- material:
  - project management software
- physical conditions:
  - technical expertise and relevant contractors
  - buildings
- specifications:
  - site plans and drawings
  - contract for provision of repair, service or modification works
  - relevant building regulations
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4049 Implement maintenance program for managed properties

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4049A Implement maintenance plan for managed properties.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to develop and implement a maintenance program for all types of managed properties. It includes determining property maintenance requirements, establishing a property maintenance program, establishing and maintaining a key register, monitoring the security of managed properties, and implementing and reviewing the property maintenance program.

The unit supports workers in the property industry who are involved in developing and implementing maintenance programs for all types of managed properties. It applies to real estate agents, property managers, strata managers and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Determine property maintenance requirements.
  - 1.1. Property reports, maintenance specifications, feedback from tenants, owner instructions and other relevant documentation are obtained and analysed to establish ***property maintenance requirements***.
  - 1.2. ***Industry benchmarks*** are reviewed to determine maintenance intervals and other requirements.
  - 1.3. Work health and safety (WHS) and other legislative requirements are interpreted and incorporated into maintenance requirements.
2. Develop property maintenance program.
  - 2.1. ***Property maintenance program*** is established in line with owner instructions, legislative requirements, and agency practice.
  - 2.2. Reliable and efficient maintenance methods are identified in line with agency practice.
  - 2.3. Maintenance costs are established.
  - 2.4. Contract specifications for maintenance services are developed and incorporated into tender documents, where appropriate.
  - 2.5. Safety and security requirements are incorporated into maintenance program.
  - 2.6. Criteria for selecting tradespeople and other service providers to provide repair and maintenance services are established.
  - 2.7. Register of tradespeople and other service providers is compiled and maintained.
  - 2.8. Property maintenance schedule is established.
  - 2.9. Systems for recording and implementing property maintenance requirements and reporting to owners are established.
  - 2.10. Aspects of maintenance program requiring specialist

- advice are identified and assistance is sought as required.
3. Establish key register.
    - 3.1. Key register system is established, administered and maintained.
    - 3.2. Security of register and keys is maintained.
  4. Implement property maintenance program.
    - 4.1. Property maintenance program, including agency fees, is presented to owners for discussion and approval.
    - 4.2. Property maintenance program is implemented in line with owner instructions, legislative requirements, and agency practice.
    - 4.3. Regular reports on property are provided to owners.
    - 4.4. Agency fees for property maintenance services are recorded and billed to owner.
  5. Monitor security of managed properties.
    - 5.1. Security risks associated with managed properties are identified and documented.
    - 5.2. Causes and potential impact of security risks on agency, clients and other stakeholders are determined.
    - 5.3. Property security measures are established in line with terms of the property management agreement, owner instructions, legislative requirements and agency practice.
  6. Review property maintenance program.
    - 6.1. Property maintenance program is reviewed in consultation with client.
    - 6.2. Outcomes of review are prepared in required format, style and structure and presented to owners within agreed timeframes.
    - 6.3. Recommendations for improving property maintenance program are presented to owners and other relevant people in line with agency practice.
    - 6.4. Documentation on property maintenance is produced and maintained using business equipment and technology.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"><li>• maintain current knowledge of property maintenance standards and industry benchmarks.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• calculate the cost of property maintenance activities</li><li>• monitor property maintenance costs against budget projections</li><li>• calculate and interpret data on property maintenance costs, such as the annual level of maintenance expenditure required to sustain a property at its current condition.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions to clarify owner's property maintenance requirements</li><li>• negotiate contracts with tradespeople and service providers for provision of property maintenance and repair services.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• read and review property maintenance programs</li><li>• extract information from complex documents, such as legislation, regulations, building programs, and property maintenance reports and specifications.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• prepare routine documentation, such as property maintenance reports.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Property</i></b> must include at least one of the following:	<ul style="list-style-type: none"><li>• business property</li><li>• commercial property</li><li>• development property, including subdivision and multi-unit sites</li><li>• holiday rental</li><li>• industrial property</li><li>• investment property</li><li>• periodic rental property</li><li>• residential property</li><li>• retail property</li><li>• rural property</li></ul>
--	--

- Property maintenance requirements*** must include:
- strata community.
  - confirmation of operational effectiveness
  - cyclical maintenance
  - emergency repairs
  - refurbishment
  - non-routine repairs
  - routine servicing and repairs.
- Industry benchmarks*** must include at least four of the following:
- age of the properties, with allowance for mid-life upgrades and refurbishments
  - annual level of maintenance expenditure required to sustain a property at its current condition
  - compliance with safety codes
  - expenditure on repairs and maintenance as a percentage of asset value
  - functionality and amenity of property
  - strategic importance of individual properties
  - structural soundness.
- Property maintenance program*** must include:
- cleaning
  - electrical
  - emergency lighting
  - evacuation
  - fencing and boundaries
  - fire lighting
  - garden
  - housekeeping
  - painting
  - pests
  - plant and equipment maintenance
  - plumbing
  - sanitary disposal
  - security
  - vertical movement
  - waste disposal
  - weather proofing.

# Assessment Requirements for CPPDSM4049 Implement maintenance program for managed properties

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4049A Implement maintenance plan for managed properties.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also develop and implement a maintenance program for one of the following managed properties:

- business property
- commercial property
- development property, including subdivision and multi-unit sites
- holiday rental
- industrial property
- investment property
- periodic rental property
- residential property
- retail property
- rural property
- strata community.

In doing the above, the person must:

- determine property maintenance requirements for managed properties
- develop a property maintenance program for managed properties that includes procedures for selecting maintenance contractors and maintaining safety and security of clients
- establish and maintain a key register for managed properties
- monitor security of managed properties
- apply knowledge of agency practice, ethical standards and legislative requirements associated with establishing, implementing and reviewing a maintenance program for managed properties

- review the property maintenance program for the above managed property.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- basic knowledge of property contracts and administrative requirements relating to implementing a property maintenance program
- building codes and Australian standards relating to implementing a property maintenance program
- building construction practices relating to implementing a property maintenance program
- common building styles
- common building faults
- common hazards to public and personal safety associated with particular types of maintenance work in buildings
- industry benchmarks and ethical standards for property maintenance procedures
- key register, including:
  - its purpose
  - operating procedures
  - risks associated with its inadequate management
- management strategies relating to different types of residential, industrial, commercial, rural and retail property
- work health and safety (WHS) issues and requirements relating to maintenance programs for managed properties
- property maintenance:
  - methods
  - programs
  - requirements
  - schedules
- property safety and security requirements
- key requirements of federal, and state or territory legislation and local government regulations relating to:
  - anti-discrimination and equal employment opportunity
  - consumer protection and trade practices
  - employment and industrial relations
  - environmental issues
  - financial services
  - industrial relations
  - leases and tenancy agreements
  - WHS
  - privacy
  - strata communities
  - taxation

- procedures for reporting repairs and maintenance to owners
- risks and risk management strategies associated with property maintenance
- register of tradespeople and service providers, including:
  - its location and procedures for accessing it
  - contact details of those on the register and the services they provide
  - procedures for selecting registered tradespeople and providers
- systems for implementing property maintenance requirements
- procedures for tendering repair and maintenance work to be undertaken at managed properties.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- physical conditions:
  - managed properties
  - specialist advice required to develop maintenance programs for managed properties
- specifications:
  - organisational policies and procedures relating to developing and implementing maintenance programs for managed properties
  - legislation and regulations impacting on maintenance programs for managed properties
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4057 Monitor a safe workplace in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4057A Monitor a safe workplace in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to follow and promote work health and safety (WHS) policies and procedures to ensure own safety and that of others in the workplace. It requires the ability to identify and control workplace hazards and risks, and communicate workplace safety requirements.

The unit supports the work of those involved in following and promoting WHS policies and procedures to ensure own safety and that of others in the workplace. It applies to real estate agents, property managers, strata managers, Nationwide House Energy Rating Scheme (NatHERS) assessors, home sustainability assessors and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

<p>Elements describe the essential outcomes.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</p>
<p>1. Provide information on safety policy and procedures in the workplace.</p>	<p>1.1. Relevant provisions of <b><i>WHS legislation and code of conduct</i></b> are accurately and clearly explained to team members.</p> <p>1.2. Documentation is developed and maintained to support implementation of <b><i>WHS policies and procedures</i></b>.</p> <p>1.3. Recommendations are made to improve effectiveness of WHS and workplace policies and procedures.</p>
<p>2. Implement and monitor participative arrangements.</p>	<p>2.1. <b><i>Consultative processes</i></b> are implemented and monitored to ensure all team members have an opportunity to contribute to management of WHS in the workplace.</p> <p>2.2. Health and safety issues raised through consultation are resolved, or referred to <b><i>relevant people</i></b> for resolution.</p> <p>2.3. Outcomes of consultation over WHS issues are reported to team members.</p>
<p>3. Implement and monitor hazard and risk control procedures.</p>	<p>3.1. Existing and potential <b><i>hazards and risks</i></b> in work area are identified and appropriate actions are implemented.</p> <p>3.2. Individual and team adherence to control hazards and risks in work area is maintained and monitored.</p> <p>3.3. Inadequacies in existing <b><i>procedures to control risks</i></b> are identified and appropriate actions are implemented.</p> <p>3.4. Cause of <b><i>hazardous events</i></b> is investigated according to legislative requirements and organisational policies and procedures.</p> <p>3.5. <b><i>Measures to minimise risk</i></b> and prevent recurrence of hazardous events are implemented based on hierarchy of control and own role.</p>
<p>4. Support WHS training.</p>	<p>4.1. WHS <b><i>training needs</i></b> of individuals and teams are identified and discussed with relevant people.</p> <p>4.2. Arrangements are made for addressing identified WHS training needs in consultation with relevant people.</p>

- 4.3. Coaching and mentoring assistance is provided to team members to support the effective development of their own WHS competencies.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of workplace safety policies and procedures.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret graphical and statistical material on safety-related incidents in the workplace.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• promote WHS policies and procedures to others in the workplace.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• access information in pamphlets, brochures and other general information on the management of workplace safety.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare routine documentation associated with promoting workplace safety, including agendas, minutes, meeting notes, and correspondence in the form of emails and letters.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• use business technology to produce reports on workplace safety and near misses.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>WHS legislation and code of conduct</i></b> must include:	<ul style="list-style-type: none"> <li>• Australian standards, and quality assurance and certification requirements</li> <li>• maintenance and confidentiality of records of occupational injury and disease</li> <li>• relevant federal, and state or territory legislation with regard to:               <ul style="list-style-type: none"> <li>• common law</li> <li>• general duty of care</li> <li>• issue resolution</li> </ul> </li> </ul>
---	---

***WHS policies and procedures*** must include:

- provisions relating to roles and responsibilities of WHS representatives and committees
- requirements of provision of WHS information and training.
- consultative arrangements for employees
- emergency and evacuation procedures
- equipment maintenance and use
- first aid
- hazard and risk identification and reporting
- hazard, accident and incident investigation
- WHS audits and safety inspections
- on-site contractors, visitors and members of the public
- risk assessment and control measures
- safe operating procedures and instructions
- transport, use and storage of dangerous goods and hazardous materials
- use and maintenance of personal protective clothing and equipment.

***Consultative processes*** must include at least two of the following:

- formal and informal meetings
- health and safety representatives
- WHS committees
- other committees, such as consultative, planning and purchasing
- suggestions, requests and concerns put forward by employees to management.

***Relevant people*** must include at least two of the following:

- clients
- colleagues
- designated WHS representatives
- emergency personnel
- supervisors.

***Hazards and risks*** must include:

- electrical
- environmental
- ergonomic
- hazardous materials
- loose objects and fixtures
- mechanical
- obstructions.

***Procedures to control risks*** must include:

- compliance with environmental requirements
- compliance with ergonomic requirements, including safe lifting and manual handling procedures
- correct selection, use, storage and maintenance procedures for personal protective clothing and equipment
- emergency, fire and accident procedures
- safe operating procedures

- hazard, accident and incident reporting procedures
  - regular WHS consultations.
- Hazardous events** must include:
- accidents
  - bomb scares
  - emergencies
  - fires and explosions
  - violent incidents.
- Measures to minimise risk** must include:
- application of the hierarchy of control:
    - elimination of the risk
    - substitution
    - engineering controls
    - administrative controls
    - personal protective equipment
  - consultation with workers and their representatives
  - measures to remove the cause of a risk at its source.
- Training needs** must include at least two of the following:
- coaching, mentoring and supervision
  - formal and informal learning programs
  - internal and external training provision
  - personal study
  - quality assurance assessments and recommendations
  - recognition of prior learning
  - seminars and conferences
  - work experience and exchange opportunities.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPDSM4057 Monitor a safe workplace in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4057A Monitor a safe workplace in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also follow and promote work health and safety (WHS) policies and procedures to ensure own safety and that of others in one property industry work environment.

In doing the above, the person must:

- assess and control risks according to the hierarchy of control
- comply with a range of WHS legislative and organisational procedures
- identify and address WHS training needs of team members
- provide clear and accurate information and advice to team members on workplace hazards and risks.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- consultative processes for improving workplace WHS culture
- legal responsibilities of employers, supervisors and employees in the workplace relating to workplace safety
- organisational communication channels and procedures
- organisational policies and procedures relating to hazard management, fire, emergency, evacuation, and incident or accident investigating and reporting
- range of hazards and associated risks that exist in the workplace and their control measures

- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - environmental issues
  - property sales, leasing and management
  - strata community management
  - WHS
- techniques to control risks, such as the hierarchy of control.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - checklist for identifying workplace hazards and risks
  - organisational templates for reporting hazards and risks
  - organisational WHS policies and procedures
  - guides for identifying and mitigating workplace hazards and risks
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4063 Participate in developing and establishing property or facility contracts

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4063A Participate in developing and establishing property or facilities contracts.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to participate in developing standard contracts for routine matters relating to property operations. It requires the ability to accurately determine and comply with contract specifications and guidelines, and to prepare and finalise contract documentation.

The unit supports the work of those involved in developing and establishing contracts relating to property operations. It applies to real estate agents, property managers, strata managers, Nationwide House Energy Rating Scheme (NatHERS) assessors, home sustainability assessors and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

<p>Elements describe the essential outcomes.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</p>
<p>1. Determine contract requirements.</p>	<p>1.1. <b><i>Contract requirements</i></b> are reviewed and agreed.</p> <p>1.2. Consultative processes are used to negotiate and confirm contract specifications.</p> <p>1.3. Information is sourced and assessed for currency, accuracy and relevance.</p> <p>1.4. Own limitations in assessing contract requirements are identified and assistance is sought as required.</p>
<p>2. Prepare contract for routine services.</p>	<p>2.1. Contract is prepared according to contract specifications and in required format, style and structure, using business equipment and technology.</p> <p>2.2. Advice is sought to confirm that contract captures and addresses identified <b><i>risks</i></b>, protects contracted parties, and provides basis for due performance.</p> <p>2.3. Contract is distributed to contract parties to check accuracy of information and that contract specifications and requirements are clearly addressed.</p> <p>2.4. Situations requiring specialist advice are identified and assistance is sought as required.</p>
<p>3. Finalise contract.</p>	<p>3.1. Feedback on suitability of contract is sought from contract parties and their advisers, and recommended improvements are incorporated into contract where appropriate.</p> <p>3.2. Gaps or deficiencies are identified and appropriate actions implemented.</p> <p>3.3. Contract is finalised.</p> <p>3.4. Information is securely maintained with due regard to client confidentiality.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of contracts relating to property operations.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret numerical information in property-related contracts.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions on technical matters to clarify meaning of provisions in contracts relating to property operations.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• access and interpret information in contracts relating to property operations.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare text associated with preparation of contracts relating to property operations.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• use business technology to produce contract documents.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Contract requirements</i></b> must include at least one of the following:	<ul style="list-style-type: none"> <li>• facility management</li> <li>• property management</li> <li>• property-related maintenance operations</li> <li>• strata community management.</li> </ul>
<b><i>Risks</i></b> must include at least four of the following:	<ul style="list-style-type: none"> <li>• changes to regulations and legislation</li> <li>• client and staff satisfaction</li> <li>• competition</li> <li>• emergencies and disasters</li> <li>• failure of a contracted party to comply with contract terms and conditions</li> <li>• fire and security</li> <li>• health and safety</li> <li>• loopholes in contracts</li> <li>• market influences</li> <li>• physical, financial or human resources</li> <li>• project control and cash flow</li> </ul>

- suppliers and contractors
- time constraints.

# Assessment Requirements for CPPDSM4063 Participate in developing and establishing property or facility contracts

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4063A Participate in developing and establishing property or facilities contracts.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also participate in developing two standard contracts relating to one of the following operations:

- routine property operation
- strata community or facility management operation
- property maintenance operation.

In doing the above, the person must:

- finalise contract within agreed timeframes using obtained feedback to rectify gaps or deficiencies
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with developing contract
- seek advice as required to confirm contract specifications have been addressed
- use business equipment and technology to prepare contract documentation
- use consultative processes to review and confirm contract requirements and specifications.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- contract layout, format and presentation methods
- limitations of own work role, responsibilities and professional abilities
- principles of contract law with regard to property use and management
- key requirements of federal, and state or territory legislation and local government regulations relating to contracts, including:

- anti-discrimination
- consumer protection
- privacy
- property sales, leasing and management
- strata community management
- work health and safety (WHS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - organisational policies and procedures relating to contract preparation and finalisation
  - organisational templates for contracts
- physical conditions:
  - sources of specialist advice on property-related contracts
- specifications:
  - specifications for standard contracts relating to property operations
- relationship with team members and supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM4074 Select and appoint contractors in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4074A Select and appoint contractors in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to coordinate contractor requirements for a variety of projects in the property industry. It requires the ability to administer contracts and coordinate the selection and monitoring of contractor arrangements.

The unit supports the work of those involved in coordinating contractor requirements for a variety of projects in the property industry. It applies to real estate agents, property managers, strata managers and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Determine selection requirements.	<ul style="list-style-type: none"><li>1.1. Selection purpose and context are identified to determine selection requirements.</li><li>1.2. Selection information is gathered to assist in identifying <b><i>selection process</i></b> and types of <b><i>contractors</i></b> required.</li><li>1.3. Draft selection documentation is prepared.</li><li>1.4. Selection processes and timelines are established that make efficient use of time and resources.</li></ul>
2. Arrange selection process.	<ul style="list-style-type: none"><li>2.1. Individuals involved in the selection process are nominated and organised.</li><li>2.2. Selection criteria are prepared.</li><li>2.3. Selection process and criteria are checked for compliance with organisational and legislative requirements.</li><li>2.4. Business equipment and technology are used to gather and organise evidence in a format suitable for analysis and interpretation.</li></ul>
3. Select contractors.	<ul style="list-style-type: none"><li>3.1. Selection process is conducted.</li><li>3.2. Information obtained from each contractor is judged against specified selection criteria.</li><li>3.3. Contractor preferences, needs and expectations are clarified and addressed using appropriate consultative processes.</li><li>3.4. Selection decision is made based on selection criteria and evaluation of sufficient evidence to enable a judgement of best candidate.</li><li>3.5. Own limitations in interpreting selection criteria or making selection decision are identified and appropriate support is sought as required.</li></ul>
4. Record and report	<ul style="list-style-type: none"><li>4.1. Selection decisions are recorded and reported.</li></ul>

- selection results.
- 4.2. Clear and constructive feedback is provided to candidates regarding outcomes of selection process, and guidance on future options.
  - 4.3. Relevant documentation is completed and processed.
  - 4.4. Selection process is reviewed against established criteria to improve and modify future assessment practices.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• maintain current knowledge of sources of contractors, services provided and fees.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to seek and clarify further information relating to previous work experience of contractors.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• access, interpret and evaluate tender documents submitted by contractors.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare terms of reference and selection criteria for contractors.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• use business technology to access online information on the type and quality of service provided by contractors.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

***Bold italicised wording, if used in the performance criteria, is detailed below.***

- Selection process*** must include at least two of the following:
- competitive tendering
  - direct order
  - request for proposal
  - request for quotation
  - restricted tendering
  - select tendering.
- Contractors*** must
- business advisers

- include at least three of the following:
- information technology
  - professional advisers
  - property advisers
  - technicians
  - tradespeople.

# Assessment Requirements for CPPDSM4074 Select and appoint contractors in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4074A Select and appoint contractors in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person also coordinate contractor requirements, including selecting and appointing the contractor, for two different tasks in a property industry context.

In doing the above, the person must:

- complete selection of contractors, including reviewing criteria and reporting recommendations
- evaluate and select contractors using appropriate selection criteria and communication techniques
- determine contractor requirements through research and consultation
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with coordinating contractor requirements for a variety of projects
- prepare selection schedule and criteria, and arrange people to be involved in the selection process.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- contract law relating to engaging contractors
- contractor fees and payments
- contractor types, roles and capabilities
- insurance requirements for contractors
- intellectual property rights and contractors

- limitations of own work role, responsibilities and professional abilities relating to engaging contractors
- professional indemnity for contractors
- key requirements of federal and state or territory legislation and local government regulations relating to engaging contractors
- selection processes and selection criteria for contractors
- techniques for monitoring contractor performance.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - organisational plans, policies and procedures for engaging contractors
  - organisational templates for use in selecting and appointing contractors
  - specifications for work to be performed or service to be provided by contractor
- supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM5006 Coordinate customer service activities in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM5006A Coordinate customer service activities in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to identify and implement customer service policies and procedures in the property industry. It includes contributing to quality customer standards, implementing customer service systems, and leading customer service teams.

The unit supports the work of those involved in understanding and implementing customer service policies and procedures. It applies to real estate agents, strata community managers, stock and station agents, Nationwide House Energy Rating Scheme (NatHERS) assessors, and home sustainability assessors.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |  |  |
|--|--|
| 1. Contribute to quality customer standards. | 1.1. <b><i>Customer</i></b> service standards are accessed, interpreted, applied and monitored in the workplace.<br>1.2. Contributions are made to developing, refining and improving customer service policies, standards and processes.  |
| 2. Implement customer service systems.       | 2.1. Personnel are encouraged to consistently implement customer service systems of organisation.<br>2.2. <b><i>Customer feedback</i></b> is reviewed and considered when improving work practices.<br>2.3. Customer service problems are identified and adjustments made to ensure continued service quality.<br>2.4. Adjustments are communicated to all those involved in service delivery within appropriate timeframes.<br>2.5. Services and products are delivered according to organisational quality standards.  |
| 3. Lead a customer service team.             | 3.1. Coaching and mentoring are used to assist colleagues to deal with customer service issues and achieve service potential.<br>3.2. Team is motivated to achieve high standard of service to customers.<br>3.3. Team is informed of changes in policies and procedures that affect relations with customers.<br>3.4. Team is provided with regular feedback in regard to achievement or non-achievement of organisational standards of customer service.<br>3.5. Team members are encouraged to contribute feedback in regard to achievement of customer service standards.<br>3.6. Training is undertaken as required to meet changing needs. |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	<ul style="list-style-type: none"><li>• evaluate information from a variety of sources to inform customer service strategies.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• interpret statistical and graphical data on customer satisfaction with organisation's products and services.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• discuss solutions to customer service problems with team members and professional advisors</li><li>• use language and concepts appropriate to cultural differences.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret documentation, including academic and technical reports, on building the capability of customer service teams.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• prepare guidance for team members and senior management on customer service strategies.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Customers*** must include:
- customers from a range of social, cultural and ethnic backgrounds
  - customers with routine and special requests
  - customers with varying physical and mental abilities
  - internal and external customers
  - regular and new customers.
- Customer feedback*** must include:
- analysis of quality assurance data
  - reports
  - feedback directly solicited from customers through different means, including:
    - questionnaires
    - telephone surveys
    - face-to-face surveys
    - online surveys.

# Assessment Requirements for CPPDSM5006 Coordinate customer service activities in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM5006A Coordinate customer service activities in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also lead the implementation of one customer service initiative in a property-related business designed to improve customer service in one of the following areas:

- business broking
- livestock sales and auctions
- property management
- property sales
- strata community management.

In doing the above, the person must:

- develop and implement improved customer service procedures
- ensure staff are adequately trained to deliver customer service to agreed organisational standards
- identify customer service requirements and ensure they are delivered to a professional standard in an appropriate timeframe
- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with implementing customer service policies and procedures
- obtain and give constructive feedback on customer service strategies.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- organisational quality and customer service standards
- organisational policies and procedures for customer service

- principles and techniques for managing customer behaviour, including:
  - customer relations
  - maintaining product and service quality
  - identifying and resolving problems
  - researching customer needs
- range of analysis techniques to interpret data on customer service
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - equal employment opportunity (EEO)
  - financial probity
  - franchise and business structures
  - industrial relations
  - privacy
  - property sales, leasing and management
  - strata community management
  - work health and safety (WHS).

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - workplace policies and procedures on customer service
  - reports and case studies from other parties involved in the process of identifying and implementing business processes designed to enhance customer service
  - information on current customer service performance
  - outline of initiatives for enhancing customer service
- physical conditions:
  - customer service team
- supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM5009 Coordinate risk management systems in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM5009A Coordinate risk management system in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to develop, implement and evaluate a risk management system to ensure effective operations in the property industry. It requires the ability to determine system requirements, and identify and organise appropriate support processes to implement, monitor, maintain and review the system.

The unit supports the work of those involved in developing, implementing and evaluating risk management systems in the property industry. It applies to real estate agents, strata community managers, stock and station agents, Nationwide House Energy Rating Scheme (NatHERS) assessors, and home sustainability assessors.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |   |   |
|---|---|
| 1. Determine risk management system requirements. | 1.1. <b><i>Risk management context</i></b> is determined.   |
|   | 1.2. Relevant documentation and legislative requirements are reviewed to identify critical requirements of risk management strategy.                            |
|   | 1.3. Resource requirements to facilitate achievement of risk management goals and objectives are identified and arranged.                                       |
|   | 1.4. Roles and responsibilities associated with implementing risk management activities are established according to risk management strategy.                  |
| 2. Organise support processes.                    | 2.1. Consultative processes are used to determine individual professional development requirements.   |
|   | 2.2. Risk management processes requiring specialist support are identified and personnel or finance support is sought as required.                              |
|   | 2.3. Systems to encourage communication flow and feedback are established and maintained to ensure an accurate exchange of information between relevant people. |
|   | 2.4. Administrative processes are analysed to ensure outcomes are accurately reported and recorded.   |
|   | 2.5. Assessment criteria for measuring level of potential or existing risk and assessment of consequences are developed.  |
| 3. Monitor and maintain system.                   | 3.1. Risk management system is systematically evaluated to maintain consistency and meet relevant legislative and organisational requirements.                  |
|   | 3.2. Factors affecting achievement of risk management strategies are identified and required variations are negotiated and agreed.                              |
|   | 3.3. Information, costs and statistics relating to risk management system are collected and analysed.   |

- 3.4. Audits of implementation of treatments of risks are arranged according to risk management system requirements.
- 3.5. Changes to operating environment and risk or threat to assets are monitored on an ongoing basis, and corrective measures are identified and implemented according to risk management plan.
4. Review and report on system.
  - 4.1. Risk management plan is reviewed against established criteria to improve and modify future risk assessment practices.
  - 4.2. Evaluation processes are implemented that incorporate strategies for review, evaluation and comparison of risk management strategies and processes, according to risk management plan.
  - 4.3. Feedback regarding satisfaction with risk assessment practices is collected, analysed and included in evaluation process.
  - 4.4. ***Business continuity plan*** covering all aspects of continuity cycle is developed.
  - 4.5. Findings of analysis of risk management system are incorporated into business continuity plan.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• evaluate information from a variety of sources to inform analysis of risk management system.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret statistical and graphical data to evaluate risks.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• discuss perceived and actual risks with team members and professional advisors</li> <li>• use language and concepts appropriate to cultural differences.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret and extract information from documentation, including risk assessments, to inform development of risk management strategy.</li> </ul>

- Writing skills to:
- prepare and document business continuity plans that cover emergency and disaster planning.
- Digital literacy skills to:
- communicate electronically with team members and professional advisors.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Risk management context*** must include at least one of the following:
- business operations
  - competitors
  - economic climate
  - human and physical assets of organisation
  - organisational strengths and weaknesses
  - previous history of organisational operations.
- Business continuity plan*** must include at least one of the following:
- full recovery
  - resilient design
  - resilient operations
  - salvage
  - service restoration.

# Assessment Requirements for CPPDSM5009 Coordinate risk management systems in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM5009A Coordinate risk management system in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also develop, implement and evaluate a risk management system for one aspect of a property-related organisation to ensure its effective operation.

In doing the above, the person must:

- determine system requirements
- maintain required physical and human resources to support the risk management system
- apply knowledge of organisation's practices, ethical standards, and legislative requirements associated with developing, implementing and evaluating a risk management system
- prepare a business continuity plan to cover emergency and disaster planning
- review the risk management system to identify and implement improvements
- support staff to manage risk, and implement recovery processes where projected risks have eventuated.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- auditing requirements for risk management systems
- client and organisational privacy and confidentiality requirements
- business continuity cycle and plans, including development process and required contents
- insurance policies, codes and operations
- mechanisms to obtain and analyse feedback on risk management system

- organisational goals and objectives, activities and systems relating to risk management system
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - equal employment opportunity (EEO)
  - financial probity
  - franchise and business structures
  - industrial relations
  - privacy
  - property sales, leasing and management
  - public safety
  - work health and safety (WHS)
- risks in property-related organisations, including:
  - assessment criteria for measuring level of potential or existing risk
  - risk assessment techniques and processes
  - risk management plans
- industry standards and code of conduct relating to coordinating risk management systems in the property industry.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - specialist advice on risks and risk management in the property industry
  - risk assessment reports
  - best practice case studies of risk management procedures in property and related industries
  - workplace policies and procedures relating to risk management and other key business processes
- supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

# CPPDSM5018 Ensure a safe workplace in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM5018A Ensure a safe workplace in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to establish, maintain and evaluate an organisation's work health and safety (WHS) system and procedures to ensure own safety and that of others in the workplace. It requires the ability to identify and control workplace hazards and risks, and communicate workplace safety requirements.

The unit supports the work of those involved in establishing, maintaining and evaluating a property industry organisation's risk management systems. It applies to those involved in working with WHS systems and procedures to ensure own safety and that of others in the workplace.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |  |   |
|--|---|
| 1. Establish and maintain WHS framework.   | <p>1.1. <b>WHS framework</b> is developed that clearly expresses the organisation's commitment to implementing relevant <b>WHS legislation</b> in the organisation.</p> <p>1.2. <b>WHS roles and responsibilities</b> for all workplace personnel are defined to allow implementation of <b>WHS policies, procedures and programs</b>.</p> <p>1.3. Financial and human resources for the effective operation of WHS system are identified, sought and provided in a timely manner.</p> <p>1.4. Information on WHS system and its operational procedures is provided and explained to employees in an accessible form.</p> |
| 2. Establish and maintain participative arrangements.  | <p>2.1. <b>Consultative processes</b> are established and maintained with employees and their representatives according to relevant WHS legislation.</p> <p>2.2. Issues arising from participation and consultation are resolved promptly and effectively according to procedures for issue resolution.</p> <p>2.3. Workplace safety information collected through participative arrangements is provided to employees in line with organisational procedures.</p>  |
| 3. Establish and maintain procedures for identifying hazards, and assessing and controlling risks. | <p>3.1. Procedures for ongoing <b>hazard identification</b> and assessment and control of associated risks are developed.</p> <p>3.2. Hazard identification is addressed at the planning, design and evaluation stages of change in the workplace to ensure that new hazards are not created by proposed changes.</p> <p>3.3. <b>Procedures for selecting and implementing risk control measures</b> according to the hierarchy of control are developed and maintained.</p> <p>3.4. Inadequacies in existing <b>risk control measures</b> are identified according to the hierarchy of control, and</p>                  |

resources enabling implementation of new measures are promptly provided.

4. Review system effectiveness.
- 4.1. WHS induction and *training program* is developed and provided for all employees as part of organisation's general training program.
  - 4.2. *WHS record-keeping system* is established and maintained to allow identification of patterns of occupational injury in the organisation.
  - 4.3. Measurement and evaluation of WHS system are undertaken in line with organisation's quality system framework.
  - 4.4. Improvements to WHS system are developed and implemented to achieve organisational WHS objectives.
  - 4.5. Compliance with WHS legislative framework is assessed to ensure that legal WHS standards are maintained as a minimum.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Learning skills to:	<ul style="list-style-type: none"> <li>• evaluate information from a variety of sources to inform development of WHS framework.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret statistical and graphical data to evaluate hazards and risks in the workplace.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• discuss financial and human resources required to support WHS system with team members and professional advisors</li> <li>• use language and concepts appropriate to cultural differences.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret and extract information from documentation, including WHS records, to inform development of WHS framework.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• prepare and document WHS policies and procedures.</li> </ul>
Digital literacy skills to:	<ul style="list-style-type: none"> <li>• communicate electronically with team members and professional advisors.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***WHS framework*** must include:

- counselling and disciplinary processes
- designing safe operations and systems of work
- determining ways WHS will be managed, for example:
  - designed operations, workflow and materials handling
  - maintaining plant and equipment
  - planning or implementing alterations to site, operations, plan or work systems
  - purchasing materials and equipment
- mechanisms for obtaining updated information on such things as health effects of hazards, technical developments in risk control, and changes to legislation
- obtaining expert WHS advice as required
- resolving WHS issues
- developing and updating policies
- providing training
- ensuring system for communicating information to employees, supervisors and managers within organisation.

***WHS legislation*** must include:

- Australian standards, and quality assurance and certification requirements
- issue resolution
- maintenance and confidentiality of records of occupational injury and disease
- provisions relating to roles and responsibilities of WHS representatives and committees
- relevant industry code of conduct
- requirements of provision of WHS information and training.

***Roles and responsibilities*** must include:

- advisory
- decision making
- duty of care
- WHS officer.

***WHS policies, procedures and programs*** must include:

- consultative arrangements for employees
- emergency and evacuation procedures
- equipment maintenance and use
- first aid
- hazard and risk identification and reporting
- hazard, accident and incident investigation

***Consultative processes*** must include at least two of the following:

- WHS audits and safety inspections
- on-site contractors, visitors and members of public
- risk assessment and control measures
- safe operating procedures and instructions
- transport, use and storage of dangerous goods and hazardous materials
- use and maintenance of personal protective equipment.
- formal and informal meetings, including WHS meetings
- health and safety representatives
- WHS committees
- other committees, for example, consultative, planning and purchasing
- suggestions, requests and concerns put forward by employees to management.

***Hazard identification*** must include:

- audits and review of audit reports
- checking work area and equipment before and during work
- consulting with work team members
- housekeeping
- job and work system assessment
- review of WHS records, including registers of hazardous materials and dangerous goods
- workplace inspections in area of responsibility.

***Procedures for selecting and implementing risk control measures*** must include:

- compliance with environmental requirements
- compliance with ergonomic requirements, including safe lifting and manual handling procedures
- correct selection, use, storage and maintenance procedures for personal protective clothing and equipment
- emergency, fire and accident procedures
- safe operating procedures
- hazard, accident and incident reporting procedures
- regular WHS consultations.

***Risk control measures*** must include:

- measures to remove cause of risk at its source
- application of the hierarchy of control:
  - elimination of risk
  - substitution
  - engineering controls
  - administrative controls
  - personal protective equipment
- consultation with workers and their representatives.

***Training program*** must include at least four of the following:

- allocation of resources for training, including purchasing training services and developing staff training skills
- group discussions and other consciousness-raising techniques

- handouts, including information sheets
- induction training
- ongoing assessment of training needs, relating to such things as:
  - emergencies and evacuations
  - new operations and materials
  - specific equipment use
  - specific hazards
  - specific tasks
  - specific courses.

**WHS record-keeping system** must include:

- audit and inspection reports
- hazardous materials registers
- manufacturer and supplier information
- meeting agendas, including items and actions relating to WHS
- plant and equipment maintenance and testing reports
- records of induction, instruction and training
- workers compensation and rehabilitation records
- workplace environmental monitoring records.

## Unit Mapping Information

CPPDSM5018A Ensure a safe workplace in the property industry

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPPDSM5018 Ensure a safe workplace in the property industry

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM5018A Ensure a safe workplace in the property industry.

This version first released with CPP Property Services Training Package Version 5.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also establish, maintain and evaluate the work health and safety (WHS) system and procedures of one property-related organisation to ensure own safety and that of others in the workplace.

In doing the above, the person must:

- apply knowledge of organisation's practices, ethical standards and legislative requirements associated with establishing, maintaining and evaluating organisation's WHS system and procedures
- apply knowledge of the principles and practices of effective WHS management
- establish and maintain:
  - WHS management system
  - participative arrangements
  - procedures for identifying hazards, and assessing and controlling risks
- maintain WHS framework
- identify when expert advice is needed, obtaining advice and acting on it promptly
- implement WHS Acts, regulations and code of conduct relevant to own area of responsibility
- review WHS system effectiveness.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- key components of the hierarchy of control

- procedures for identifying intervention points for expert WHS advice
- literacy levels and communication skills of work group members and consequent suitable communication techniques to use when discussing WHS matters
- principles and practices of effective WHS management in small, medium and large businesses
- principles and techniques associated with modelling safe work practices, hazard identification and risk management
- record-keeping systems, procedures and requirements relating to WHS
- regulatory compliance arrangements in relation to WHS
- key requirements of federal, state or territory legislation and local government regulations relating to:
  - anti-discrimination
  - consumer protection
  - environmental issues
  - equal employment opportunity (EEO)
  - financial probity
  - franchise and business structures
  - industrial relations
  - privacy
  - property sales, leasing and management
  - strata community management
  - WHS
- WHS roles and responsibilities for all workplace personnel, including legal responsibilities of employers, manufacturers, suppliers, employees and other parties in relation to WHS.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer system with internet, email and printing facilities
- specifications:
  - access to specialist advice on WHS in the property industry
  - best practice case studies of WHS, hazard identification and risk management procedures in the property and related industries
  - hazard identification and risk assessment reports
  - WHS legislation
  - workplace policies and procedures with regards to WHS
- supervisor:
  - member of a work team in a property industry context.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations* (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPHES4001 Research and assess impact of building elements on thermal performance of residential buildings

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4015A Assess impact of building elements on thermal performance of residential buildings. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to research and assess the impact of construction materials and methods, design elements and building condition on thermal performance of residential buildings.

This unit is for individuals who work independently as home sustainability or Nationwide House Energy Rating Scheme (NatHERS) assessors using specialised knowledge to complete thermal performance assessments of residential buildings. It involves completing routine and non-routine tasks and dealing with predictable and sometimes unpredictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

None.

## Unit Sector

Home Sustainability.

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |     |   |
|---|-----|---|
| 1 Assess impact of building design features on thermal performance of | 1.1 | Research building design features that influence thermal performance. |
|   | 1.2 | Determine potential impact of building design features                |

- building. on thermal performance.
- 1.3 Examine ways in which building design features can be altered to improve thermal performance.
- 2 Assess influence of common construction materials on thermal performance.
- 2.1 Research properties of construction materials that influence thermal performance.
- 2.2 Research properties of glazing units that influence thermal performance.
- 2.3 Determine impact of climate on choice of construction materials to improve thermal performance.
- 2.4 Examine ways in which cost, practicality, size or space constraints can influence choice of building materials when improving thermal performance.
- 2.5 Research construction materials that meet requirements for improving thermal performance.
- 2.6 Research ways that correct use and installation of materials can improve thermal performance.
- 2.7 Examine condition of materials and the effect that condition can have on degrading thermal performance.
- 3 Assess impact of construction methods on thermal performance.
- 3.1 Identify construction methods used in residential building.
- 3.2 Identify key components of the building envelope.
- 3.3 Identify methods of testing building envelope for efficiency.
- 3.4 Examine construction methods used on building envelope components and effect on thermal performance.
- 4 Identify impact of common building faults on thermal performance of building.
- 4.1 Evaluate influence of poor construction techniques and condition of building elements on thermal performance.
- 4.2 Research sources of professional advice on ways to respond to common building faults that may influence thermal performance.

- |  |     |   |
|--|-----|---|
|  | 4.3 | Examine potential impact of poorly designed or installed measures for improving thermal performance on other aspects of residential building. |
| 5 Document information and research findings | 5.1 | Collate information and research results and check to confirm accuracy.   |
|  | 5.2 | Identify impact of building elements on thermal performance of residential buildings.   |
|  | 5.3 | Identify benefits of efficient building techniques and an efficient building envelope on thermal performance of residential buildings.        |
|  | 5.4 | Document findings according to workplace requirements.  |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret and consolidate a wide range of information on thermal performance of buildings
- numeracy skills to interpret and calculate statistical data on the thermal performance of different construction materials and methods.

## Unit Mapping Information

Supersedes and equivalent to CPPHSA4015A Assess impact of building elements on thermal performance of residential buildings.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPHES4001 Research and assess impact of building elements on thermal performance of residential buildings

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4015A Assess impact of building elements on thermal performance of residential buildings. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by researching and documenting an assessment of the impact of building elements on thermal performance for three different residential buildings involving at least three of the following residential construction methods:

- structurally insulated panels
- pre-fabricated buildings
- brick veneer
- cavity brick
- concrete block masonry
- lightweight construction
- reverse brick veneer.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building design features that may influence the thermal performance of a building:
  - wall type
  - convection
  - eaves
  - floor types
  - glazing and windows
  - insulation
  - landscaping
  - materials
  - orientation

- shading
- siting
- thermal mass
- ventilation
- zoning and layout
- causes of and remedies for condensation
- energy efficiency provisions of building regulations and the National Construction Code (NCC)
- key components of the building envelope
- solar passive building design principles
- passive house building design principles
- properties of building materials that can influence thermal performance:
  - emissivity
  - R-value
  - reflectivity
  - solar absorptance
  - U-value
- properties of glazing units that can influence thermal performance:
  - solar heat gain coefficient
  - U-value
  - visible light transmission
- types of building construction materials used in residential buildings:
  - correct industry terminologies
  - sources of information on their thermal performance
- types of building defects, poor construction techniques and condition of building elements that can impact on the thermal performance of residential buildings:
  - condensation
- methods for testing building envelop efficiency:
  - blower door testing
  - thermal imaging
- types of residential building construction methods:
  - materials used
  - benefits and limitations
  - implications for thermal performance.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- documentation associated with residential buildings and building products and materials to allow achievement of the performance evidence
- building codes, standards and regulations including the NCC
- computer equipment and software suitable for accessing online catalogues and references to source information on the thermal performance of building products and materials
- reference materials and/or computer equipment to access current information on the thermal performance of building products and materials including:
  - solar passive building design
  - passive house building design
  - thermal performance of building materials and construction methods
  - building envelope thermal performance
  - common building defects including condensation
  - house energy rating schemes
  - blower door testing and thermal imaging
  - manufacturers' product information on building products and materials.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPHES4002 Advise clients on thermal performance of residential buildings

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4019A Inform clients about thermal performance of residential buildings. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to explain the factors that contribute to the thermal performance of residential buildings when providing advice to clients as part of a home sustainability or Nationwide House Energy Rating Scheme (NatHERS) assessment. It includes explaining the heat transfer process, factors that impact thermal comfort, how climatic conditions, building design and materials influence thermal performance, and the principles of passive design.

This unit is for individuals who work independently as home sustainability or NatHERS assessors who use specialised knowledge to assess and make recommendations for improving the thermal performance of residential buildings. It involves completing routine and non-routine tasks and dealing with predictable and sometimes unpredictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

None.

## Unit Sector

Home Sustainability.

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Advise client on	1.1 Explain the concept of building thermal performance.
--------------------	--

- relationship between building thermal performance and energy use.
- 1.2 Identify and communicate the impact of building materials on thermal performance of buildings.
  - 1.3 Explain the relationship between building thermal performance, heating and cooling and energy consumption.
  - 1.4 Explain the main uses of energy in buildings and the proportion attributed to heating and cooling.
  - 1.5 Explain the environmental and social impacts of energy use.
  - 1.6 Check client understanding of building thermal performance and energy use and respond to questions to clarify advice.
- 2 Advise client on the heat transfer process in residential buildings.
- 2.1 Explain the process of heat transfer in residential buildings.
  - 2.2 Explain the meanings of key terms used to describe heat transfer.
  - 2.3 Explain the ways in which residential buildings lose and gain heat.
  - 2.4 Check client understanding of the heat transfer process and respond to questions to clarify advice.
- 3 Advise client on factors that impact thermal comfort.
- 3.1 Explain thermal comfort and its use in building thermal performance assessments.
  - 3.2 Explain the physical factors that influence thermal comfort.
  - 3.3 Explain the methods for determining building occupant requirements for thermal comfort.
  - 3.4 Check client understanding of factors that impact on thermal comfort and respond to questions to clarify advice.
- 4 Advise client on the influence of climatic
- 4.1 Identify major Australian climate zones and explain their key characteristics associated with thermal performance.

conditions on building thermal performance.	4.2	Explain the types and uses of climate data in carrying out thermal performance assessments.
	4.3	Explain the impact of local climatic conditions on building thermal performance.
	4.4	Explain ways of improving thermal performance appropriate to the relevant climate zone.
	4.5	Check client understanding of how climatic conditions influence thermal performance of residential buildings and respond to questions to clarify advice.
5 Advise client on the principles of passive design.	5.1	Explain the principles of passive design.
	5.2	Explain the application of passive design principles to planned and existing residential buildings.
	5.3	Explain factors that diminish the thermal performance of buildings.
	5.4	Check client understanding of the principles of passive design and respond to questions to clarify advice.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey and clarify industry concepts and terminology
- numeracy skills to interpret climate data and apply correct units of measurement when describing power and energy to clients
- technology skills to access and transmit electronic information when providing client advice.

## Unit Mapping Information

Supersedes and equivalent to CPPHSA4019A Inform clients about thermal performance of residential buildings.

## Links

Companion volumes to this training package are available at the VETNet website -

# Assessment Requirements for CPPHES4002 Advise clients on thermal performance of residential buildings

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4019A Inform clients about thermal performance of residential buildings. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by providing accurate oral and written advice to three different clients on the thermal performance of residential buildings involving three different building designs and climate zones.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- Australian climate zones, characteristics and data used in thermal performance assessments:
  - diurnal temperature range
  - humidity
  - irradiance
  - minimum and maximum temperature
  - solar geometry
  - wind speed and direction
- building elements included in thermal performance assessments
- definition of thermal comfort:
  - factors influencing thermal comfort
  - models of thermal comfort
  - role of thermal comfort in building thermal performance assessments
  - thermal sensitivity of individuals
- environmental and social impacts of energy use:
  - climate change
  - energy cost

- energy security
- global warming
- greenhouse gas emissions
- operational costs
- resource depletion
- impact of climate on thermal performance of residential buildings
- industry terminology for energy use associated with thermal performance of buildings
- passive building design principles
- process of heat transfer in residential buildings:
  - key terms used to describe heat transfer
  - impact on heating and cooling
  - mechanisms: radiation, convection and conduction
  - modelling
  - U and R-values of building materials
  - R-values of wall constructions
- principles of thermal performance:
  - factors that diminish and enhance the thermal performance of residential buildings
  - impact of local climatic conditions on building thermal performance
  - relationship between building thermal performance, heating and cooling and energy consumption.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- relevant codes, standards and regulations associated with building thermal performance assessments
- computer equipment and software suitable for sourcing and transmitting information on the thermal performance of buildings to allow achievement of the performance evidence
- technical reference library and/or (online) access to current technical publications on:
  - passive building design
  - thermal performance of building materials
  - building thermal performance
  - manufacturers' product information on building products and materials.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPHES4003 Operate and maintain computer system to support thermal performance assessments

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4020A Operate computer systems to support NatHERS assessment. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to operate and maintain a computer system and software applications to support thermal performance assessments using accredited Nationwide House Energy Rating Scheme (NatHERS) software. It includes installing and updating software and hardware and performing computer configurations, routine data back-ups, troubleshooting and system maintenance.

This unit is for individuals who work independently as thermal performance assessors using specialised knowledge to complete thermal performance assessments of residential buildings. It involves completing routine and non-routine tasks and dealing with predictable and sometimes unpredictable problems.

This unit forms part of the licensing requirements NatHERS assessments. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Home Sustainability.

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to use computer system for

1.1 Make required ergonomic adjustments to personal computer furniture and fittings.

- |  |     |   |
|--|-----|---|
| thermal performance assessment.                                  | 1.2 | Check physical connectivity and follow computer and operating system start-up procedures.   |
|  | 1.3 | Confirm correct operation and performance of computer and hardware devices.   |
| 2 Configure computer system for thermal performance assessment.  | 2.1 | Adjust computer settings to suit user requirements.   |
|  | 2.2 | Configure power management settings to minimise power consumption.  |
|  | 2.3 | Identify operating system and application programs loaded onto computer and confirm computer capability and correct NatHERS software version.       |
|  | 2.4 | Conduct software installation and removal to improve computer capability and readiness for thermal performance assessment.                          |
|  | 2.5 | Create and customise desktop icons to access applications and NatHERS programs.   |
|  | 2.6 | Connect, disconnect and configure removable storage devices used to store, maintain and back-up data.   |
| 3 Access and manipulate data for thermal performance assessment. | 3.1 | Access and manipulate thermal performance data using objects, macros, shortcut features and templates to increase efficiency.                       |
|  | 3.2 | Convert and store data to suit operating system and applications to support thermal performance assessment.   |
|  | 3.3 | Employ advanced features of NatHERS software to prepare and present data.   |
|  | 3.4 | Link and embed files to transfer data between applications.   |
|  | 3.5 | Transmit data to support thermal performance assessment using electronic methods.   |
| 4 Perform routine system maintenance.                            | 4.1 | Perform regular system back-up to minimise risk of data loss, and label, store and retrieve back-up files according to organisational requirements. |

- 4.2 Use firewall, antivirus and malware scans to reduce security risks and threats in the computer system.
  - 4.3 Monitor and maintain correct functioning of automated processes.
  - 4.4 Update off-line record of maintenance procedures according to organisational requirements.
- 5 Solve routine problems with computer system.
- 5.1 Identify problem with computer system and apply basic information technology troubleshooting techniques to resolve problem.
  - 5.2 Access online assistance to overcome difficulties with computer system or NatHERS software.
  - 5.3 Recover damaged or corrupted files using appropriate software, equipment or technical support according to organisational requirements.
- 6 Upgrade and reconfigure personal computer and NatHERS software.
- 6.1 Install new and update existing computer hardware.
  - 6.2 Test new and updated computer hardware and confirm correct operation.
  - 6.3 Install new and update existing NatHERS software.
  - 6.4 Test and configure new and updated NatHERS software and confirm correct operation.
  - 6.5 Maintain records of installations, updates and configurations according to organisational requirements.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and equivalent to CPPHSA4020A Operate computer systems to support NatHERS assessment.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPHES4003 Operate and maintain computer system to support thermal performance assessments

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4020A Operate computer systems to support NatHERS assessment. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by operating and maintaining computer systems and the software to support at least two thermal performance assessments using accredited Nationwide House Energy Rating Scheme (NatHERS) software.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- basic operations of NatHERS software tools
- basic components, set up procedures and operation of personal computer systems that support thermal performance assessments
- basic information technology troubleshooting procedures
- common technologies and procedures that prevent data loss associated with thermal performance assessments
- ergonomic principles applicable to setting up and using a computer system and furniture
- methods for identifying and verifying software versions
- minimum software requirements of a software tool that must be met in order to receive accreditation
- modes of NatHERS software operation
- procedures for conducting routine back-ups of computer systems and files and for maintaining system security
- procedures for installing, removing and upgrading NatHERS software and other applications that support computer system functionality
- procedures for storing, converting, transmitting and retrieving data associated with thermal performance assessments
- purpose and types of virus protection for computer systems

- purpose, management and types of electronic data removal and storage devices
- sources of assistance to resolve problems with computer systems and software when conducting thermal performance assessments
- types and purpose of NatHERS software tools and associated licensing conditions.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- computer system, devices and software including current accredited NatHERS software to allow achievement of the performance evidence
- relevant hardware and software product information and operating manuals.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPHES4004 Conduct thermal performance assessment of residential buildings

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4012A Conduct NatHERS assessment of planned residential buildings. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to analyse information to assess the thermal potential of the building envelope of planned residential buildings, and the thermal performance of existing residential buildings, including alterations and additions.

Assessments involve a variety of building designs and materials across all jurisdictions using the regulatory mode of software accredited under the Nationwide House Energy Rating Scheme (NatHERS).

This unit is for individuals who work independently using specialised knowledge and skills to complete thermal performance assessments. It involves completing routine and non-routine tasks and dealing with predictable and sometimes unpredictable problems.

This unit forms part of the licensing requirements for thermal performance assessments. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

CPPCMN4008 Read plans, drawings and specifications for residential buildings

CPPHES4003 Operate and maintain computer system to support thermal performance assessments

## Unit Sector

Home Sustainability.

## Elements and Performance Criteria

Elements describe the Performance criteria describe what needs to be done to

- essential outcomes. demonstrate achievement of the element.
- 1 Prepare for thermal performance assessment.
    - 1.1 Consult with client to confirm scope and purpose of assessment and respond to questions to clarify issues and concerns.
    - 1.2 Research and apply jurisdictional regulatory and NatHERS requirements to planned thermal performance assessment.
    - 1.3 Obtain documentation and drawings for the assessment and review to verify consistency and sufficiency to meet software, NatHERS technical notes and regulatory requirements.
    - 1.4 Refer inconsistencies in documentation or drawings back to client for clarification and amendment.
    - 1.5 Request additional information required to conduct assessment to meet client and regulatory requirements.
    - 1.6 Check computer equipment to ensure correct operation and confirm that software version and libraries are up to date according to regulatory requirements.
  
  - 2 Collate and input information into NatHERS software tool.
    - 2.1 Extract information required for input into software tool from building documentation and NatHERS technical notes.
    - 2.2 Enter extracted information into software tool according to regulatory requirements for the building.
    - 2.3 Enter information on non-standard building materials and designs, alterations and additions correctly according to software and regulatory requirements.
    - 2.4 Check inputted data and make necessary adjustments to ensure accuracy and compliance with regulatory requirements.
  
  - 3 Model thermal performance of building.
    - 3.1 Apply software tool functions to model thermal performance of building.
    - 3.2 Run simulation to determine if the building's potential thermal performance complies with regulatory requirements.

- 3.3 Check simulation against latest documentation set and amend identified discrepancies.
  - 3.4 Analyse software tool outputs to clarify assumptions, identify limitations and correct errors in data entry.
  - 3.5 Interpret software tool outputs and profile building's thermal performance.
- 4 Identify options to improve thermal performance of building.
  - 4.1 Analyse strengths and weaknesses in thermal performance of building.
  - 4.2 Access technical advice and identify cost effective options for improving thermal performance considering outputs of thermal performance assessment, practicality and type of building.
  - 4.3 Identify interactions of identified improvements on other aspects of building performance.
  - 4.4 Use software tool to reassess building and impact of identified options on thermal performance.
- 5 Report and certify thermal performance assessment outcomes.
  - 5.1 Finalise thermal performance assessment and collate design and assessment documentation in line with regulatory requirements in relevant jurisdictions and for auditing and quality assurance.
  - 5.2 Write up options and recommendations for achieving required energy efficiency rating according to regulatory requirements.
  - 5.3 Discuss assessment outcomes with relevant persons and obtain approval to proceed with certification according to organisational requirements.
  - 5.4 Submit NatHERS report through required portal to generate universal certificate.
  - 5.5 Confirm stamping is complete and secure documentation according to regulatory requirements.
  - 5.6 Store assessment documentation in accordance with regulatory requirements to enable recovery for audit and quality assurance purposes.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- numeracy skills to interpret thermal performance outputs including U-values and R-values
- reading skills to interpret a variety of texts including regulations, codes, technical notes and building plans and specifications
- writing skills to complete standard forms and generate business correspondence and reports
- problem-solving skills to:
  - make recommendations based on the outputs of NatHERS software tools
  - determine optional improvements to thermal performance.

## Unit Mapping Information

Supersedes and equivalent to CPPHSA4012A Conduct NatHERS assessment of planned residential buildings.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPHES4004 Conduct thermal performance assessment of residential buildings

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4012A Conduct NatHERS assessment of planned residential buildings. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by using an accredited Nationwide House Energy Rating Scheme (NatHERS) software tool to conduct thermal performance assessments of six residential buildings.

The assessments must be conducted in accordance with the requirements of the software, technical notes and jurisdictional regulatory requirements.

The buildings assessed must include:

- different designs appropriate to a tropical, a temperate and a cold climate zone
- a variety of building materials and designs appropriate to the climate zone.

These buildings must incorporate the following:

- one single story dwelling (a minimum of three bedrooms)
- one double storey dwelling (a minimum of three bedrooms)
- an apartment unit (two bedrooms) in a Class 2 building modelled as:
  - a ground floor unit over a basement/carpark
  - a middle level unit with neighbouring units above and below
  - and a top floor unit with a roof over
- one alteration works that includes an addition to one of the above dwellings.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- Australian climate zones, characteristics and data used in thermal performance assessments
- design features that influence the thermal comfort of buildings
- energy units of measurement and terminology associated with thermal performance assessments:
  - energy efficiency

- heating and cooling loads
- solar heat gain coefficient (SHGC) and U-value
- R values
- options to improve the thermal performance of buildings:
  - construction materials
  - draughtproofing
  - floor coverings
  - insulation levels
  - landscaping and plantings
  - orientation
  - overshadowing
  - passive heating and cooling
  - shade
  - structural changes
  - thermal mass
  - ventilation
  - window size, location, type and coverings
- passive design and thermal performance principles:
  - glazing
  - insulation
  - orientation
  - passive cooling
  - passive solar heating
  - shading
  - skylights
  - thermal mass
  - building sealing
  - thermal bridging and breaks
- regulatory and jurisdictional requirements for thermal performance assessments of residential buildings categorised as Class 1, 2, 4 and 10a of the National Construction Code (NCC)
- thermal performance properties of common building materials:
  - solar absorptance
  - heat transfer coefficients and U-values
  - material thickness
  - reflectivity
  - resistance heat flow up and down
  - solar heat gain coefficient and emissivity
  - thermal bridging and breaks
  - thermal resistance and R-values

- types and operation of NatHERS accredited software tools:
  - assumptions and limitations as to what can be assessed which are inherent in NatHERS software protocols and accredited software
  - building and external elements included in NatHERS thermal performance assessments.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- current accredited NatHERS software tool and associated equipment and manuals
- the NCC and jurisdictional guidelines associated with conducting NatHERS assessments
- residential building design documentation and technical information to allow achievement of the performance evidence
- NatHERS technical notes and software accreditation protocol.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPHES4005 Assess household energy use and efficiency improvements

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4001A Assess household energy use.  
Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to source and analyse information on household energy use and to advise on ways to improve energy efficiency and reduce energy costs in the home.

This unit is for individuals who work independently as home sustainability assessors using specialised knowledge to complete household energy assessments. It involves completing routine and non-routine tasks and dealing with predictable and sometimes unpredictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

None.

## Unit Sector

Home Sustainability.

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Plan and organise energy assessment.

1.1 Consult with client to clarify purpose of energy use assessment and respond to questions and concerns.

1.2 Confirm assessment requirements in line with client needs, legislation, regulations, standards, codes and

- government incentive programs for energy efficiency.
- 1.3 Plan energy use assessment in consultation with client and according to work health and safety (WHS) procedures.
  - 1.4 Prepare energy use assessment documentation.
  - 1.5 Confirm that required tools and equipment are available and in working order.
- 2 Compile information on household energy generation, use, and costs.
- 2.1 Gather information on energy use, onsite energy production and storage and energy costs.
  - 2.2 Access and interpret energy bills and metering data.
  - 2.3 Identify main sources of energy use.
  - 2.4 Carry out measurements and observations safely during on-site inspection to estimate energy usage for key energy using appliances.
  - 2.5 Gather information on household occupant behaviours and preferences that impact energy use.
  - 2.6 Record gathered information using suitable data collection tool.
- 3 Analyse data on household energy use.
- 3.1 Identify key features of household energy usage and estimate costs and greenhouse gas emissions for key appliances.
  - 3.2 Reconcile energy use with energy billing data.
  - 3.3 Identify cost effective measures and behavioural opportunities for improving energy efficiency.
  - 3.4 Identify government rebates and other assistance programs for improving household energy efficiency.
  - 3.5 Estimate energy, emissions and cost savings to be gained by implementing measures for improving energy efficiency.

- |   |  |     |   |
|---|--|-----|---|
| 4 | Provide information on residential renewable energy. | 4.1 | Source technical information on renewal energy production and storage technologies and inform client.                                 |
|   |  | 4.2 | Evaluate suitability of using residential property for renewable energy systems and discuss with client.                              |
|   |  | 4.3 | Identify feed in tariffs, government rebates and other assistance programs for installing energy production and storage technologies. |
| 5 | Report findings of household energy assessment.      | 5.1 | Collate results, recommendations and supporting evidence of energy use assessment.  |
|   |  | 5.2 | Document options and potential savings and prioritise recommendations for energy efficiency measures in line with client needs.       |
|   |  | 5.3 | Explain report, indicative costs and improvements in household energy efficiency to client.   |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to interact with clients from diverse social, economic and cultural backgrounds
- numeracy skills to interpret data from gas and electricity meters and accounts and calculate costs and greenhouse gas emissions
- reading skills to interpret data from gas and electricity meters and the outputs of energy measuring tools, technical data from product specifications
- technology skills to use basic computer functions, calculators and measuring tools.

## Unit Mapping Information

Supersedes and equivalent to CPPHSA4001A Assess household energy use.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPHES4005 Assess household energy use and efficiency improvements

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4001A Assess household energy use.  
Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by safely conducting energy use assessments and identifying efficiency improvements for three different households.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- alternative energy production and storage technologies applicable to residential buildings
- energy ratings and power consumption of common household appliances
- energy types and units of measurement
- hazards and risks and types of personal protective equipment (PPE) to be used when conducting on-site assessments of household energy use
- key requirements of relevant codes, standards, regulations and government incentive programs for household energy efficiency
- major systems and other sources of household energy use:
  - cooking
  - refrigeration
  - washing and drying
  - home entertainment and home office equipment
  - heating and cooling
  - internal and external appliances
  - lighting
  - swimming pools and spas
  - water heating
  - water pumps
- methods for interpreting household energy bills:
  - actual and estimated bills

- plans
- tariffs
- strategies for improving household energy efficiency including impact of building shell on heating/cooling energy use, upgrade options and behavioural changes
- trends in energy use and emissions
- types and uses of energy measuring tools.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- residential buildings to allow achievement of the performance evidence
- codes, standards, legislation and government programs relevant to energy efficiency
- manufacturers' product information on domestic appliances, water heating systems, heating and cooling systems, lighting and electronic products
- technical information on energy production and storage technologies
- personal protective equipment and energy measurement and data collection tools and documentation.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPHES4006 Assess household water use and efficiency improvements

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4003A Assess household water use.  
Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to source and analyse information on household water use and to advise on ways to improve water efficiency and conservation in the home.

This unit is for individuals who work independently as home sustainability assessors using specialised knowledge to complete household water assessments. It involves completing routine and non-routine tasks and dealing with predictable and sometimes unpredictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

None.

## Unit Sector

Home Sustainability.

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Plan and organise water use assessment.

1.1 Consult with client to clarify purpose of water use assessment and respond to questions and concerns.

1.2 Confirm assessment requirements in line with client needs, water authorities, legislation, regulations, standards, codes and government incentive programs for

- water efficiency.
- 1.3 Plan water use assessment in consultation with client and according to work health and safety (WHS) requirements.
  - 1.4 Prepare documentation required to conduct energy use assessment.
  - 1.5 Confirm that required tools and equipment are available and in working order.
- 2 Compile information on household water use and costs.
- 2.1 Gather information from client to identify main systems and sources of water use including relevant water collection and reuse systems.
  - 2.2 Access and interpret water bills and seasonal usage.
  - 2.3 Carry out measurements and observations during on-site inspection to safely confirm main sources, systems and water usage.
  - 2.4 Gather information on household occupant behaviours and preferences that impact water use.
  - 2.5 Record gathered information using suitable data collection tool.
- 3 Analyse data on household water use and conservation.
- 3.1 Identify key features of household water use and calculate costs and greenhouse gas emissions.
  - 3.2 Reconcile calculated water use with water bill data.
  - 3.3 Identify cost effective measures and behavioural opportunities for improving water efficiency.
  - 3.4 Identify government rebates and other assistance programs for improving household water efficiency.
  - 3.5 Estimate water, emissions and cost savings to be gained by implementing measures for improving water efficiency.
- 4 Assess feasibility of
- 4.1 Identify regulatory and local government requirements

- using water collection and reuse measures on the property.
- 4.2 Source technical information on water harvesting, diversion and wastewater use technologies and evaluate suitability for the residential property in line with jurisdictional regulations.
  - 4.3 Calculate volume of potential water harvesting opportunity.
  - 4.4 Identify government rebates and other assistance programs for installing water harvesting and greywater use technologies.
  - 4.5 Estimate return on investment for the installation of water harvesting and greywater use technologies.
  - 4.6 Identify advantages and disadvantages of using property for water harvesting and greywater use technologies.
- 5 Report findings of household water use assessment.
- 5.1 Collate results, recommendations and supporting evidence of water use assessment.
  - 5.2 Document options, potential savings and prioritise recommendations for water efficiency measures.
  - 5.3 Explain report and indicative costs, potential savings and improvements in household water efficiency to client.
  - 5.4 Advise client of applicable regulatory or local government requirements impacting findings of household water use assessment.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use language and terminology suitable to the audience
- numeracy skills to apply mathematical concepts in calculating and comparing costs and water use
- reading skills to interpret data from water meters and the outputs of water measuring tools.

## Unit Mapping Information

Supersedes and equivalent to CPPHSA4003A Assess household water use.

## Links

Companion volumes to this training package are available at the VETNet website -

# Assessment Requirements for CPPHES4006 Assess household water use and efficiency improvements

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4003A Assess household water use.  
Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by safely conducting water use assessments and identifying efficiency improvements for three different households.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- alternative water harvesting, diversion and waste water (greywater, purple-water and blackwater) use technologies
- characteristics of external residential water services:
  - domestic irrigation and reticulation systems
  - evaporative coolers
  - greywater systems
  - recycled systems
  - swimming pools and spas
- characteristics of internal residential water services:
  - age
  - average daily use
  - capacity
  - condition
  - flow rate
  - leaks and drips
  - suitability for size of household
  - water efficiency rating
  - water saving features
- household water sources and water saving features
- impact of occupant behaviours on water consumption

- key requirements of relevant codes, standards, regulations and government incentive programs for water efficiency
- major indoor and outdoor services, systems, appliances, fittings contributing to household water use
- regulatory and jurisdictional requirements for water harvesting, recycled and greywater reuse
- relationship between greenhouse gas emissions and household water use
- safe work requirements for on-site assessments of household water use and potential hazards:
  - biological hazards associated with blackwater, purple-water and greywater
  - confined spaces
  - electricity
  - faulty appliances and electrocution
  - hazardous substances
  - types of personal protective equipment (PPE) to be used
- sources of data on domestic water use and costs:
  - water bills:
    - units of measurement and tariffs
  - water meters:
    - conventional and smart
- water efficiency and labelling standards (WELS) and strategies for improving household water efficiency
- water efficient gardening practices.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- residential buildings to allow achievement of the performance evidence
- codes, standards, legislation and government programs relevant to water efficiency
- major internal and external residential water services, systems, appliances and fittings
- technical information on:
  - wastewater (blackwater, purple-water and greywater) use technologies
  - water services, systems, appliances and fittings
  - water harvesting diversions
- PPE and water measurement and data collection tools and documentation.

# CPPHES4007 Assess thermal performance of existing residential buildings

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4004A Assess thermal performance of existing residences using non-rating tools and techniques. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to source and analyse information on the thermal performance of existing residences. It includes providing advice on ways to improve thermal performance accounting for ownership and type of building, costs and practicalities of implementing improvement recommendations.

This unit is for individuals who work independently as home sustainability assessors using specialised knowledge to complete thermal performance assessments. It involves completing routine and non-routine tasks and dealing with predictable and sometimes unpredictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

None.

## Unit Sector

Home Sustainability.

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Plan and organise thermal performance assessment.

1.1 Consult with client to clarify purpose of thermal performance assessment and respond to questions and concerns.

- 1.2 Confirm assessment requirements in line with client needs, legislation, regulations, standards, codes and government incentive programs for improving thermal performance of existing residential buildings.
  - 1.3 Plan thermal performance assessment in consultation with client and according to work health and safety (WHS) requirements.
  - 1.4 Prepare thermal performance assessment documentation and confirm that required tools and equipment are available and in working order.
- 2 Compile and analyse information on thermal performance of residence.
    - 2.1 Gather information from client to clarify building use and construction details.
    - 2.2 Select and fit required personal protective equipment (PPE).
    - 2.3 Carry out measurements and observations during on-site inspection to confirm factors impacting thermal performance.
    - 2.4 Record information using appropriate data collection tool.
    - 2.5 Analyse information to identify strengths and weaknesses in thermal performance of residence.
- 3 Analyse options for improving thermal performance of residence.
    - 3.1 Source technical information on building thermal performance and evaluate suitability for existing residence.
    - 3.2 Identify government rebates and other assistance programs for thermal performance of existing residential buildings.
    - 3.3 Evaluate options for improving thermal performance and reducing emissions of the residence.
    - 3.4 Identify cost effective measures for improving thermal performance of the residence according to organisational requirements.

- |  |     |   |
|--|-----|---|
| 4 Report findings of thermal performance assessment. | 4.1 | Collate results, recommendations and supporting evidence of thermal performance assessment. |
|  | 4.2 | Write up options and prioritise recommendations for thermal performance improvements.       |
|  | 4.3 | Discuss report and indicative costs and improvements in thermal performance with client.    |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to interact with clients from diverse social, economic and cultural backgrounds
- numeracy skills to interpret different units of measurement associated with existing residential buildings and their construction features.

## Unit Mapping Information

Supersedes and equivalent to CPPHSA4004A Assess thermal performance of existing residences using non-rating tools and techniques.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPHES4007 Assess thermal performance of existing residential buildings

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4004A Assess thermal performance of existing residences using non-rating tools and techniques. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting thermal performance assessments and identifying thermal performance improvements for a minimum of two different existing residential buildings.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- Australian climate zones, characteristics and data used in thermal performance assessments:
  - diurnal temperature range
  - humidity
  - irradiance
  - minimum and maximum temperature
  - solar geometry
  - wind speed and direction
- building thermal performance principles:
  - glazing, shading and insulation for controlling temperature
  - orientation impacts
  - thermal mass for storing
  - ventilation
- definition of thermal comfort and its role in thermal performance assessments
- hazards and risks and types of personal protective equipment (PPE) to be used when conducting on-site thermal performance assessments
- impact of building design and materials on thermal performance:
  - condensation
  - constraints on choice of building materials

- embodied energy and lifecycle properties of building materials
- thermal performance properties of common building materials
- key requirements of codes, standards, regulations and government incentive programs associated with improving the thermal performance of existing residences
- options for improving thermal performance of existing residences
- passive energy design principles
- physical factors that influence thermal comfort
- relationship between building design, energy consumption and greenhouse gas emissions
- relationship between building thermal performance and thermal comfort
- requirements, documentation and uses of thermal performance ratings
- safe work requirements for on-site thermal performance assessments
- types, advantages and disadvantages of non-rating tools and techniques used to assess thermal performance of residential buildings
- units of measurement for energy and power associated with thermal performance assessments.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- existing residential buildings to allow achievement of the performance evidence
- codes, standards, legislation and government programs relevant to thermal performance of buildings
- required tools and equipment including PPE
- technical reference library and/or (online) access to current technical publications on:
  - building design and materials
  - house energy rating schemes (HERS)
  - building thermal performance for existing buildings
  - Australian climate zones
  - manufacturers' product information on building products and materials.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPHES4008 Assess household waste generation and waste management improvements

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4002A Assess household waste generation and management. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to collect and analyse information on household waste and advise on ways to reduce waste and improve waste management in the home.

This unit is for individuals who work independently as home sustainability assessors using specialised knowledge to complete household waste assessments. It involves completing routine and non-routine tasks and dealing with predictable and sometimes unpredictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

None.

## Unit Sector

Home Sustainability.

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Plan and organise waste assessment.

1.1 Consult with client to clarify purpose of waste assessment and respond to questions to clarify issues and concerns.

- 1.2 Confirm assessment requirements in line with client needs, legislation, regulations, standards, codes and government incentive programs for household waste management.
  - 1.3 Plan waste assessment in consultation with client and according to work health and safety (WHS) procedures.
  - 1.4 Prepare waste assessment documentation and identify local waste collection methods and recycling centres.
  - 1.5 Confirm that required tools and equipment are available and in working order.
- 
- 2 Compile information on household waste generation and management.
    - 2.1 Gather information from client and onsite inspection to identify source, types and volume of waste generated by household and waste management practices.
    - 2.2 Identify current waste management practices.
    - 2.3 Select and fit required personal protective equipment (PPE).
    - 2.4 Carry out measurements and observations during on-site inspection to confirm characteristics and quantity of main types of household waste.
    - 2.5 Gather information on household occupant behaviours and preferences that impact waste generation and management.
    - 2.6 Record gathered information using suitable data collection tool.
- 
- 3 Analyse options for reducing household waste and improving waste management.
    - 3.1 Identify waste streams in household waste.
    - 3.2 Source information on household waste management strategies and evaluate suitability for use in residence.
    - 3.3 Identify government rebates and other assistance programs for household waste reduction and management.
    - 3.4 Evaluate options for improving waste management and potential impact on household.

- |   |  |   |
|---|--|---|
|   | 3.5  | Estimate waste volume and emission savings for reductions in waste generation and improvements in waste management. |
| 4 | Report findings of household waste assessment. |   |
|   | 4.1  | Collate results, recommendations and supporting evidence of waste assessment.                                       |
|   | 4.2  | Document options and prioritise recommendations for waste management improvements.                                  |
|   | 4.3  | Explain and discuss report and improvements in household waste management with client.                              |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to interact with clients from diverse social, economic and cultural backgrounds
- numeracy skills to calculate number, percentage, volume and weight of waste quantities and use measuring tools.

## Unit Mapping Information

Supersedes and equivalent to CPPHSA4002A Assess household waste generation and management.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPHES4008 Assess household waste generation and waste management improvements

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4002A Assess household waste generation and management. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by safely conducting waste assessments and identifying waste management improvements for three different households.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- forms of household waste:
  - landfill waste
  - recyclables
  - soft plastics
  - organics
  - e-waste
  - hard waste
  - hazardous waste
  - clothing
- hazards and risks and types of personal protective equipment (PPE) to be used when conducting on-site assessments of household waste
- impact of attitudes, behaviours and preferences of household members on waste generation and management
- municipal waste and recycling requirements
- options for reducing waste and improving household waste management:
  - behaviour change
  - recycling
  - reducing
  - reusing

- relationship between waste and greenhouse gas emissions
- relevant codes, standards, regulations and government rebates and incentive programs for household waste management
- sampling and recording techniques used when conducting household waste assessments
- safe work requirements for on-site assessments of household waste
- strategies for improving household waste management
- techniques for gathering information and measuring household waste
- trends in household waste and factors impacting on those trends
- types, streams and characteristics of household waste
- visual assessment and measurement techniques used when assessing household waste.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- residential buildings to allow achievement of the performance evidence
- codes, standards, legislation and government programs relevant to household waste management
- technical information on household waste reduction and management
- PPE and data collection tools and documentation.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPHES4009 Promote the adoption of home sustainability practices

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4007A Promote the adoption of home sustainability practices by residents. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to promote behaviour change and the adoption of home sustainability practices by residents.

This unit is for individuals who work independently using specialised knowledge to complete routine and non-routine tasks and deal with predictable and sometimes unpredictable problems in sustainability practices within the home.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

None.

## Unit Sector

Home Sustainability.

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |     |   |
|---|-----|---|
| 1 Assess readiness of residents to adopt home sustainability practices. | 1.1 | Establish rapport with residents and respond to resident questions and concerns about home sustainability issues. |
|   | 1.2 | Establish influences that impact on resident attitudes to home sustainability.                                    |
|   | 1.3 | Identify barriers to residents adopting home  |

- sustainability practices.
- 1.4 Identify factors and motivations of residents that impact willingness to change behaviour and adopt home sustainability practices.
  - 1.5 Address information needs of residents in relation to home sustainability practices.
  - 1.6 Reinforce positive attitudes and behaviours demonstrated by residents in relation to home sustainability practices.
- 2 Develop an implementation plan.
- 2.1 Assist residents to identify and prioritise their home sustainability needs.
  - 2.2 Support residents to identify home sustainability practices consistent with their priorities, motivation, budget, timeframes and confidence levels.
  - 2.3 Explain resources, rebates and other forms of assistance available to support implementation of identified home sustainability practices.
  - 2.4 Consult with residents to develop strategies to overcome barriers and maximise the adoption of improved sustainability practices.
  - 2.5 Consult with residents to identify measures to assess improvements in home sustainability practices.
  - 2.6 Consult with residents to document a plan to monitor and review progress in adopting home sustainability practices.
- 3 Provide follow-up services.
- 3.1 Collaborate with residents to review the process and outcomes of home sustainability practices.
  - 3.2 Identify further strategies and next steps according to resident needs.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to use general purpose software packages to collate information and produce written reports.

## **Unit Mapping Information**

Supersedes and equivalent to CPPHSA4007A Promote the adoption of home sustainability practices by residents.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPHES4009 Promote the adoption of home sustainability practices

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA4007A Promote the adoption of home sustainability practices by residents. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by assisting residents in three different households to establish a plan for adopting home sustainability practices, and to review their progress.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- barriers to adopting home sustainability practices
- behaviour change:
  - barriers to voluntary behaviour change
  - factors that increase likelihood of voluntary behaviour change
  - strategies to promote behaviour change
- communication strategies to establish rapport
- data, data collection methods and success measures related to resident adoption of home sustainability practices
- factors that increase the likelihood of voluntary adoption of home sustainability practices
- home sustainability practices:
  - energy use and management
  - refusing, reducing, reusing, recycling
  - thermal performance
  - waste minimisation and management
  - water use and management.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- data collection tools
- relevant codes, standards and government regulations
- access to residents participating in a home sustainability assessment
- technology suitable for generating reports
- technical reference library and/or (online) access to current technical publications on:
  - promotion of behaviour change
  - home sustainability practices.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPHES5001 Conduct thermal performance assessment of complex residential buildings

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA5001A Assess thermal performance of complex residential buildings. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to analyse information to assess the thermal potential of the building envelope of planned residential buildings and the thermal performance of existing residential buildings, including alterations and additions, involving complex construction methods and materials. Assessments are conducted using the regulatory mode of software accredited under the Nationwide House Energy Rating Scheme (NatHERS) and require client consultation to devise solutions to achieve required energy ratings.

This unit is suitable for those using a broad range of cognitive, technical and communication skills to select and apply methods and technologies to analyse information and provide solutions to sometimes complex problems.

This unit forms part of the licensing requirements for thermal performance assessments. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

CPPHES4004 Conduct thermal performance assessment of residential buildings.

## Unit Sector

Home Sustainability.

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- 1 Prepare for thermal performance assessment.
  - 1.1 Consult with client to confirm scope and purpose of assessment and respond to questions to clarify issues and concerns.
  - 1.2 Check and apply relevant jurisdictional requirements to planned thermal performance assessment.
  - 1.3 Obtain documentation and drawings required for the assessment and check to verify consistency and sufficiency to meet software and regulatory requirements.
  - 1.4 Refer inconsistencies in documentation back to client for clarification and amendment.
  - 1.5 Analyse complex features of building envelope and construction methods and materials, and source technical advice to clarify requirements for thermal performance assessment.
  - 1.6 Source additional information required to conduct assessment to meet client and regulatory requirements.
  - 1.7 Check computer equipment to ensure correct operation and confirm software version and libraries are current and meet regulatory requirements.
  
- 2 Collate and input information into NatHERS software tool.
  - 2.1 Extract information required for input into software tool from building documentation and NatHERS technical notes.
  - 2.2 Enter extracted information into software tool according to regulatory requirements for all relevant building zones.
  - 2.3 Source and enter information about non-standard building materials and designs, alterations and additions correctly according to software and regulatory requirements.
  - 2.4 Check inputted data and make necessary adjustments to ensure accuracy and compliance with regulatory requirements.
  
- 3 Model thermal performance of
  - 3.1 Apply software tool functions and modelling methods suitable for building type and construction methods and

- |  |     |  |
|--|-----|--|
| building.  |     | materials.   |
|  | 3.2 | Run simulation to determine if the potential thermal performance of the building complies with regulatory requirements.  |
|  | 3.3 | Check simulation against latest documentation and amend identified discrepancies.  |
|  | 3.4 | Analyse software tool outputs to clarify assumptions, identify limitations and correct errors in data entry.   |
|  | 3.5 | Interpret software tool outputs and profile thermal performance strengths and weaknesses of building.  |
| 4 Identify options to improve thermal performance of building. | 4.1 | Analyse profiled strengths and weaknesses in thermal performance of building.  |
|  | 4.2 | Access technical advice and identify cost effective options for improving thermal performance considering outputs of thermal performance assessment, client needs, practicality and building type. |
|  | 4.3 | Identify interactions of suggested improvements on other aspects of building performance.  |
|  | 4.4 | Use software tool to reassess building and impact of identified options on thermal performance.  |
| 5 Evaluate options to achieve required energy rating.          | 5.1 | Conduct further analysis to identify changes to building design features to achieve required energy rating.  |
|  | 5.2 | Consult with client to present options, discuss viability of changes and seek direction for building reassessment.   |
|  | 5.3 | Apply software tool functions and modelling methods to generate thermal performance simulations based on recommended changes to design features.   |
|  | 5.4 | Negotiate with client to agree on the use of alternative materials or features to achieve required energy rating.  |
| 6 Report and certify thermal performance                       | 6.1 | Finalise thermal performance assessment and collate design and assessment documentation in line with relevant jurisdictional regulatory requirements and for                                       |

- assessment outcomes.                      auditing and quality assurance.
- 6.2 Document options and recommendations for achieving required energy efficiency rating according to regulatory requirements.
  - 6.3 Discuss assessment outcomes with relevant persons and obtain approval to proceed with certification according to organisational requirements.
  - 6.4 Submit NatHERS report through required portal to generate universal certificate.
  - 6.5 Confirm stamping is complete and secure documentation according to regulatory requirements.
  - 6.6 Store assessment documentation according to regulatory requirements and to enable recovery for audit and quality assurance purposes.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to interact with clients from diverse social, economic and cultural backgrounds
- numeracy skills to interpret thermal performance outputs including U-values and R-values.

## Unit Mapping Information

Supersedes and equivalent to CPPHSA5001A Assess thermal performance of complex residential buildings.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPHES5001 Conduct thermal performance assessment of complex residential buildings

## Modification History

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and equivalent to CPPHSA5001A Assess thermal performance of complex residential buildings. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by using an accredited Nationwide House Energy Rating Scheme (NatHERS) software tool to conduct thermal performance assessments of three complex residential buildings. The buildings assessed must include different designs:

- appropriate to a tropical, a temperate and a cold climate zone
- to fit sites with different exposures, topography and a wide diurnal temperate range
- that use climate-appropriate construction methods and materials
- involve complex levels, built shading devices and void arrangements

and incorporate the following:

- one single storey dwelling with:
  - a minimum of three bedrooms
  - one ground floor split level
  - two different ground floor construction
  - three different roof constructions including raked ceilings, sloping walls and at least three clerestory windows, dormer construction, split style walls
- one triple storey dwelling (a minimum of four bedrooms) with:
  - an underground basement/garage with a different footprint
  - a ground floor and a first floor
  - a habitable attic space with at least two dormer windows
  - a lift from the basement to both the ground floor and first floor
- one open-plan studio apartment.

The assessments must be conducted according to the requirements of the software, technical notes and jurisdictional regulations.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- Australian climate zones, characteristics and data used in thermal performance assessments
- design features that influence the thermal comfort of buildings
- energy units of measurement and terminology associated with thermal performance assessments:
  - energy efficiency
  - heating and cooling loads
  - solar heat gain coefficient (SHGC) and U-value
  - R-values
- options to improve thermal performance of buildings:
  - construction materials
  - sealing the building envelope
  - floor coverings
  - insulation levels
  - orientation
  - overshadowing
  - passive heating and cooling
  - shade
  - structural changes
  - thermal mass
  - ventilation
  - window size, location, type and coverings
- principles of passive design:
  - glazing
  - insulation
  - orientation
  - passive cooling
  - passive solar heating
  - shading
  - thermal bridging and breaks
- regulatory requirements for thermal performance assessments of residential buildings categorised as Class 1, 2, 4 and 10a of the National Construction Code (NCC)
- thermal performance properties of a variety of building materials:
  - solar absorptance
  - heat transfer coefficients and U-values
  - material thickness
  - reflectivity
  - resistance heat flow up and down

- solar heat gain coefficient and emissivity
- thermal bridging and breaks
- thermal resistance and R-values
- thermal performance ratings:
  - current rating requirements
  - documentation of ratings
  - legal requirements
  - uses
- types and operation of NatHERS accredited software tools:
  - assumptions and limitations as to what can be assessed inherent in NatHERS software protocols and accredited software
  - building and external elements included in NatHERS thermal performance assessments
  - requirements for modelling complex buildings and non-standard materials.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- current accredited NatHERS software tool and associated equipment and manuals
- the NCC and jurisdictional guidelines associated with conducting NatHERS assessments
- residential building design documentation and technical information to allow achievement of the performance evidence
- NatHERS technical notes and software accreditation protocol.

## Links

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPINV3026 Work effectively in investigative services

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3026A Work effectively in the investigative services industry. Updated to meet the Standards for Training Packages

## Application

This unit specifies the skills and knowledge required to work effectively in investigative services. It includes interpreting and applying legal and procedural requirements governing investigative services, understanding regulatory powers provided under the legislation and acts and omissions that comprise non-compliance or offences. It also includes contributing to positive workplace relationships with colleagues and clients, modelling high standards of performance and developing and maintaining competence in investigative services.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in investigative services in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Investigative services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Interpret and apply legal and procedural requirements for

1.1 Identify and review legal and procedural requirements governing investigative services in the jurisdiction of operation.

- investigative services.
- 1.2 Clarify regulatory powers provided under the legislation and the boundaries of those powers in consultation with relevant persons.
  - 1.3 Identify and confirm acts and omissions that comprise non-compliance or offences under the legislation.
  - 1.4 Apply legal and procedural requirements to work instructions to ensure compliance.
- 2 Contribute to positive workplace relationships.
- 2.1 Identify and use workplace networks to build positive relationships with colleagues and clients.
  - 2.2 Support colleagues to resolve work difficulties.
  - 2.3 Deal constructively with workplace conflict within established organisational processes.
  - 2.4 Regularly review workplace outcomes and implement improvements in consultation with relevant persons.
- 3 Model high standards of investigative performance.
- 3.1 Organise, prioritise and sequence investigative services tasks to ensure completion within agreed timeframes according to work instructions.
  - 3.2 Promptly identify factors affecting the achievement of work tasks and implement corrective actions in consultation with relevant persons.
  - 3.3 Identify and uphold ethical standards and industry codes of conduct in providing investigative services.
  - 3.4 Recognise and report breaches of industry codes of practice.
- 4 Develop and maintain investigative competence.
- 4.1 Use self-assessment, reflection and feedback to identify areas for improvement in own professional competence.
  - 4.2 Source, evaluate, select and use opportunities to develop and maintain professional competence.
  - 4.3 Participate in professional networks to improve knowledge of investigative practices, technologies and trends.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to interact effectively with colleagues and clients from diverse social, economic and cultural backgrounds
- reading skills to interpret key requirements of policies, procedures and regulations.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3026A Work effectively in the investigative services industry.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPINV3026 Work effectively in investigative services

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3026A Work effectively in the investigative services industry. Updated to meet the Standards for Training Packages

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by working effectively in investigative services while completing work instructions for three different investigations:

- one general insurance investigation
- one compulsory third party liability investigation
- one workers compensation investigation.

For each investigation, the candidate must document a summary of legislative requirements in the jurisdiction of operation plus one other jurisdiction, and how these were applied to the investigation.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when working in investigative services:
  - regulatory powers provided to investigators under the legislation and acts and omissions that comprise non-compliance or offences
  - duties of investigators to follow instructions, act in person and act in the interests of the client
  - legislative requirements associated with:
    - operational transport
    - privacy
    - surveillance, listening and recording devices
    - taking statements from individuals
    - workers compensation
- licensing requirements for investigative services in Australia

- rights of investigative subjects including privacy and protection of reputation
- work health and safety including work-related compensation and transport accident requirements for investigators in each jurisdiction
- available workplace networks that can be used to build positive relationships
- evidence management principles
- factors that may affect the achievement of work tasks and types of corrective actions that can be taken
- limits of own responsibilities and authority to undertake investigations
- professional networks and associations available within investigative services
- purpose and application of industry and client codes of conduct and service agreements for investigative services
- self-assessment, reflection and feedback techniques that can be used to identify areas for improvement in professional practice
- sources of professional advice to maintain and develop professional competence
- techniques for conflict resolution and dealing with difficult situations in the workplace
- time management and scheduling techniques
- types of investigative behaviours that are unethical, illegal or represent misconduct.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by an RTO for investigations licensing purposes must hold the licence for performing the investigations activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- work instructions, documentation, legislation, regulations, codes of conduct, service agreements and information technologies required to achieve the performance evidence.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPINV3027 Develop investigation plans

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3027A Develop investigative plan.  
Updated to meet the Standards for Training Packages

## Application

This unit specifies the skills and knowledge required to develop and document an investigation plan. It includes scoping investigation parameters, selecting investigation methodologies based on factual and surveillance techniques, and ensuring legal compliance for investigative and evidence collection processes.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in investigative services in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Investigative services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |                                       |   |
|---------------------------------------|---|
| 1 Confirm investigation requirements. | 1.1 Review investigation brief and associated information to clarify investigation purpose, scope and timeframes. |
|                                       | 1.2 Source additional information in consultation with relevant persons to clarify investigation requirements.    |
|                                       | 1.3 Review legal rights and responsibilities and confirm  |

required authorisations to conduct investigation and collect evidence.

- |  |   |
|--|---|
| 2 Determine investigation methodology. | 2.1 Gather and assess information to support investigation and confirm validity of sources.   |
|  | 2.2 Select investigation methods that meet investigation brief and comply with legal requirements for collecting, preserving and presenting evidence. |
|  | 2.3 Identify required resources and equipment and confirm their availability and efficiency in meeting investigation brief and budget.                |
|  | 2.4 Assess risk associated with investigation methods and apply contingency measures to ensure safety and regulatory compliance.                      |
|  | 2.5 Identify limitations in conducting investigation and seek required assistance in consultation with relevant persons.                              |
| 3 Finalise investigation plan.         | 3.1 Write investigation plan in accordance with workplace standards for style, format and accuracy.   |
|  | 3.2 Review investigation plan to confirm completeness and accuracy to meet investigation brief and make required modifications.                       |
|  | 3.3 Securely store investigation information in a manner that facilitates future retrieval and maintains confidentiality.                             |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret diverse or conflicting pieces of information when clarifying investigation requirements.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3027A Develop investigative plan.

## Links

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPINV3027 Develop investigation plans

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3027A Develop investigative plan.  
Updated to meet the Standards for Training Packages

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by developing three different investigation plans:

- two factual investigation plans:
  - one for a general insurance investigation **or** one for a financial crime investigation
  - one for a workers compensation investigation **or** one internal discipline investigation
- one surveillance investigation plan.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when developing investigation plans:
  - authorities and legal rights of investigators
  - investigative actions that may result in breach of confidence, privacy or other offence under legislation
  - legislative restrictions on the use of recording devices
  - work health and safety requirements
- equipment and resources used to conduct investigations involving factual and surveillance investigative methods
- purpose, benefits and limitations of different investigation methods:
  - factual
  - surveillance
- sources of evidence and methods for:
  - collecting, preserving and presenting evidence during an investigation
  - ensuring continuity of evidence and chain of custody during investigations
- techniques for sourcing and validating information when planning investigations.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by an RTO for investigations licensing purposes must hold the licence for performing the investigations activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- investigation briefs and associated documentation, information technologies and materials required to achieve the performance evidence.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPINV3028 Investigate and locate subjects

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Application

This unit specifies the skills and knowledge required to locate subjects using investigative search techniques. It includes researching the subject's background information and possible whereabouts, searching open source intelligence, databases, public records and documentation, and identifying and following leads to trace and locate the subject.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in investigative services in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Investigative services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |   |
|---|---|
| 1 Plan investigation and profile subject. | 1.1 Review work instructions, procedures and workplace policies to ensure required authorisations and compliance with legal rights and responsibilities when investigating and locating subjects. |
|   | 1.2 Clarify investigation and client requirements in consultation with relevant persons.  |

- 1.3 Check validity of client intentions and information obtained as part of investigative brief to ensure compliance with ethical obligations.
  - 1.4 Conduct research to gather background information on subject and identify possible contacts and locations.
  - 1.5 Assess and verify the reliability of available data and plan investigation activities to meet required timeframes.
- 2 Conduct investigation to locate subject.
- 2.1 Make field calls to identify and follow leads to trace subject.
  - 2.2 Search open source intelligence and databases to identify and follow leads to trace subject.
  - 2.3 Examine public records and documentation to identify and follow leads to trace subject.
  - 2.4 Review search results to identify and follow alternative search avenues to locate subject.
- 3 Report investigation outcomes.
- 3.1 Document times, dates, occurrences, results and sources of investigation activities.
  - 3.2 Analyse investigation outcomes and recommend further actions to meet work instructions.
  - 3.3 Present report to relevant persons within agreed timeframes.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use questioning and active listening during field calls
- reading skills to interpret information in diagrammatic and numerical formats such as photographs, maps, addresses and phone numbers.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for CPPINV3028 Investigate and locate subjects

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by investigating and locating three different subjects.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when investigating and locating subjects:
  - authorities and legal rights of investigators
  - actions that may result in breach of confidence, privacy or other offence under legislation
  - duties of the investigator to follow instructions, act in person and act in the interests of the client
  - rights of subjects including privacy and protection of reputation
  - work health and safety requirements
- methods for verifying the validity and reliability of information gathered as part of an investigation
- search techniques used to locate subjects using:
  - internet browsers and search tools
  - investigator databases
  - open source intelligence including deep web research and social media analysis
  - public records including property documents, work and court records
  - interviews with known associates, colleagues and neighbours
- types of field calls used to investigate and locate subjects
- types of investigative behaviours that are unethical, illegal or represent misconduct.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations (RTO).

Assessors must hold the licence for performing the investigations activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- work instructions and associated documentation, office equipment, technologies and consumables required to achieve the performance evidence.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPINV3029 Provide quality investigative services to clients

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3029A Provide quality investigative services to clients. Updated to meet the Standards for Training Packages

## Application

This unit specifies the skills and knowledge required to provide quality investigative services to clients. It includes identifying client needs and preferences and negotiating to offer factual or surveillance investigation options to meet client requirements. It includes delivering and monitoring investigative services, gathering and organising investigative evidence, and implementing contingency measures to respond to problems and changing circumstances. The unit requires reviewing client satisfaction, handling complaints and using feedback as the basis for improved service delivery.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in investigative services in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Investigative services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Identify client needs and service preferences.

1.1 Review workplace policies and procedures to ensure compliance with legal rights and responsibilities when providing services to clients.

- 1.2 Use interpersonal techniques to clarify scope of investigation and client service preferences, needs and expectations.
  - 1.3 Discuss benefits and limitations of investigative options to meet client needs.
  - 1.4 Provide client with information about investigative services and methods to meet their specific needs, and assist client to select preferred option.
  - 1.5 Recognise personal limitations that may impede the provision of required client services and seek assistance from relevant persons.
- 2 Deliver quality client service.
- 2.1 Provide investigative services following work instructions and identified client needs.
  - 2.2 Identify client's special requirements and adjust investigative services to meet their needs.
  - 2.3 Anticipate service problems or delays and promptly implement contingency arrangements to maintain client satisfaction.
  - 2.4 Maintain communication with client and monitor service provision to provide up-to-date information and respond to changing circumstances.
  - 2.5 Use negotiation to resolve conflict and client complaints, and record details according to workplace requirements.
  - 2.6 Gather and organise investigative evidence that meets work and client instructions and complies with legislative requirements.
- 3 Review and improve client service.
- 3.1 Seek feedback from client to ascertain their satisfaction with service provision using interview and survey techniques.
  - 3.2 Analyse client feedback in consultation with relevant persons and identify improvements to future service provision.
  - 3.3 Record and implement agreed improvements to client

service procedures.

- 3.4 Securely maintain investigative and client records according to workplace and legislative requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to relate to people demonstrating sensitivity to individual social and cultural differences
- reading skills to interpret key requirements of policies, procedures and regulations.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3029A Provide quality investigative services to clients.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPINV3029 Provide quality investigative services to clients

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3029A Provide quality investigative services to clients. Updated to meet the Standards for Training Packages

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by providing factual or surveillance investigative services (or a combination of both) to three different clients involving each of the following types of investigative cases:

- a workers compensation investigation
- a general insurance investigation
- a compulsory third party liability investigation.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when providing investigative services to clients:
  - duties of investigators to follow instructions, act in person and act in the interests of the client
  - legislative requirements associated with:
    - duty of care
    - privacy and confidentiality
    - surveillance, listening and recording devices
    - taking statements from individuals and groups
    - workers compensation
  - licensing requirements for investigative services in Australia
  - rights of investigative subjects including privacy and protection of reputation
  - work health and safety including work-related compensation and transport accident requirements for investigators in each jurisdiction
  - workplace standards and procedures for client service
- how to read and use non-verbal communication to gain the confidence of others

- interpersonal techniques that promote positive interactions and communication with clients
- investigative methods using surveillance and factual investigation
- limits of own responsibilities and authority to undertake investigations
- methods for complying with privacy and confidential regulations when gathering, presenting and storing client information
- negotiation and conflict resolution techniques
- purpose and application of industry and client codes of conduct and service agreements for investigative services
- questioning techniques that can be used to elicit specific information on client needs and preferences
- requirements for collective, preserving and presenting evidence and continuity of evidence
- rights and responsibilities of different types of clients
- techniques for gathering and analysing client feedback using interviews and surveys
- types of investigative behaviours that are unethical, illegal or represent misconduct
- ways to engage people with individual social and cultural differences and strategies for overcoming language barriers.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by an RTO for investigations licensing purposes must hold the licence for performing the investigations activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- client briefs, work instructions, information, legislation, regulations and information technologies required to achieve the performance evidence.

# CPPINV3030 Conduct factual investigations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3032A Gather information by factual investigation. Updated to meet the Standards for Training Packages

## Application

This unit specifies the skills and knowledge required to conduct factual investigations. It includes conducting desk-based research and using communication skills to conduct interviews and meetings and take statements to record factual information. The unit requires evidence collection and compliance with evidence management principles.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in investigative services in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Investigative services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare for factual investigation.

1.1 Review work instructions, procedures and workplace policies to ensure required authorisations and compliance with legal rights and responsibilities when conducting factual investigation.

1.2 Conduct preliminary research and enquiries to clarify investigation and client requirements in consultation with

- relevant persons.
- 1.3 Identify possible information sources and select investigation methods that are valid, reliable and make efficient use of resources.
  - 1.4 Access required investigation equipment and resources and check to confirm correct operation.
  - 1.5 Plan and sequence factual investigation activities to meet work instructions and timeframes.
- 2 Undertake factual investigation and gather evidence.
- 2.1 Seek permission to record interviews and meetings in accordance with legislative requirements and codes of conduct.
  - 2.2 Conduct and record oral interviews and meetings to gather factual evidence.
  - 2.3 Take comprehensive statements and collect physical evidence to support available facts.
  - 2.4 Assess gathered evidence to check sufficiency and accuracy and source additional required information to meet work instructions.
  - 2.5 Collate factual evidence and check to confirm its relevance, validity and admissibility in court.
- 3 Finalise factual investigation.
- 3.1 Present factual information in a documented report that addresses work instructions and complies with workplace standards for style, format and accuracy.
  - 3.2 Present report to relevant persons within agreed timeframes.
  - 3.3 Securely store factual investigation records and evidence in accordance with evidence management principles.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to:
  - ask questions to clarify information and elicit facts
  - listen to oral responses to accurately comprehend spoken information
  - relate to people demonstrating sensitivity to individual social and cultural differences
- writing skills to:
  - accurately record factual details using plain English
  - record oral statements in the required legal format.

## **Unit Mapping Information**

Supersedes and equivalent to CPPSEC3032A Gather information by factual investigation.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPINV3030 Conduct factual investigations

## Modification History

# CPPINV3031 Conduct interviews and take statements to support investigations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3033A Conduct interviews and take statements. Updated to meet the Standards for Training Packages

## Application

This unit specifies the skills and knowledge required to acquire information by interview and take statements to support an investigation. It includes following plans, protocols and procedures to conduct interviews, questioning interviewees to obtain and record facts and details of physical evidence presented, and taking statements in the required legal format.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in investigative services in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Investigative services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to conduct interview.

1.1 Review work instructions, procedures and workplace policies to ensure required authorisations and compliance with legal rights and responsibilities when conducting interviews and taking statements.

- 1.2 Obtain, review and clarify background material and interview plan in consultation with relevant persons.
  - 1.3 Identify special needs of interviewee and organise resources and equipment required for interview.
  - 1.4 Check recording equipment to confirm correct operation in accordance with manufacturers' instructions.
  - 1.5 Arrange interview location that is accessible and encourages safety and confidentiality for interview participants.
  - 1.6 Arrange interviewee and other required participants to be present at interview in accordance with legislative requirements.
- 2 Conduct and record interview.
- 2.1 Seek consent to record interview and employ recording methods in accordance with legislative requirements and codes of conduct.
  - 2.2 Confirm interviewee identity and age and implement required legal procedures where interviewee is identified as a minor.
  - 2.3 Conduct oral interview following required protocols and procedures.
  - 2.4 Follow interview plan and make contingency adjustments required to address changing circumstances.
  - 2.5 Use questioning to clarify contradictions, ambiguities, uncertainties or misunderstandings during interview.
  - 2.6 Recognise physical evidence presented during interview and describe details in full.
- 3 Take statement.
- 3.1 Confirm and follow required format and procedures for taking statements.
  - 3.2 Take statement in first person and accurately reflect interviewee's knowledge of interview subject matter, with interpreter when required.
  - 3.3 Record written affirmation from interviewee as to their understanding of the contents of the statement and

- conditions under which it was made.
- 3.4 Arrange for statement to be signed, dated and witnessed in accordance with legislative requirements.
  - 3.5 Provide interviewee with a copy of the statement.
- 4 Finalise interview and secure evidence.
- 4.1 Terminate interview in a sincere, courteous and friendly manner and take required action to ensure safe exit of interviewee.
  - 4.2 Complete, retain and secure interview documentation and records with due regard to confidentiality and evidence management principles.
  - 4.3 Review and report interview results to relevant persons in accordance with work instructions.
  - 4.4 Provide interviewee with a receipted copy of interview records in accordance with legislative requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to:
  - ask questions to clarify and elicit information from interviewees
  - listen to oral responses to accurately comprehend spoken information
  - relate to people demonstrating sensitivity to individual social and cultural differences
- writing skills to:
  - accurately record factual details using plain English
  - record oral statements in the required legal format.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3033A Conduct interviews and take statements.

# Assessment Requirements for CPPINV3031 Conduct interviews and take statements to support investigations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3033A Conduct interviews and take statements. Updated to meet the Standards for Training Packages

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting three different interviews to support an investigation:

- statements must be taken from three different people involved in the investigation:
- the person who made the complaint (complainant or plaintiff)
- the person who caused the complaint (respondent, employer or negligent party)
- a witness.
- for one interview, an interpreter must be engaged, and the interview conducted with the interpreter.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when conducting interviews and taking statements:
  - codes of practice that ensure compliance with legislative responsibilities
  - legal and ethical obligations associated with conducting interviews and taking statements to support investigations
  - legislative restrictions on the use of recording devices
  - requirements for conducting interviews with, and taking statements from minors
  - work health and safety requirements
- difference between statements, affidavits and statutory declarations
- documentation required to be completed when conducting interviews and taking statements
- interview strategies and techniques used to gather information to support investigations
- legal format for taking statements including requirements for witnessing, signing and dating statements
- protocols and procedures to be followed when conducting interviews and taking statements

- signs and symptoms that a person may be considering suicide or self-harm and appropriate response actions
- sources of evidence when conducting interviews and taking statements and methods for:
  - collecting, preserving and presenting evidence
  - ensuring continuity of evidence
  - complying with evidence management principles
- types of recording equipment used to record interviews
- typical special needs of interviewees and requirements for conducting interviews and taking statements using interpreters
- ways that individual social and cultural differences may be expressed and methods for handling cultural sensitivities when conducting interviews and taking statements.
- 

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by an RTO for investigations licensing purposes must hold the licence for performing the investigations activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- work instructions and associated documentation, equipment and resources required to achieve the performance evidence.

# CPPINV3032 Develop factual investigation reports

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3028A Compile investigative report.  
Updated to meet the Standards for Training Packages

## Application

This unit specifies the skills and knowledge required to document and present comprehensive information gathered through factual investigation. It includes compiling and presenting information and evidence in the required format and verifying its accuracy and reliability according to chain of custody and rules of evidence requirements.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in investigative services in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Investigative services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Organise and assess factual investigation information.

1.1 Obtain and collate information gathered through factual investigation.

1.2 Assess gathered information for completeness in accordance with investigative brief and client requirements.

- 1.3 Assess gathered information to verify sources, validity and relevance, and compliance with chain of custody of evidence.
- 2 Document and review report contents.
  - 2.1 Use information technologies to write factual investigation report in accordance with workplace requirements for content, format and style.
  - 2.2 Identify in body of report, witnesses and sources of evidence that are relied upon.
  - 2.3 Identify and list enquiries that failed to gather evidence and stipulate reasons why.
  - 2.4 Edit report to ensure content is accurate and sufficient and source additional information to address identified omissions.
  - 2.5 Check report to ensure information is supported by verifiable evidence and make required redactions.
  - 2.6 Include required attachments and confirm these are referenced correctly in the report.
  - 2.7 Check citations and references are accurate and in the required format.
- 3 Finalise factual investigation report.
  - 3.1 Finalise report in the required format in accordance with workplace and client requirements.
  - 3.2 Forward report and attachments safely and securely to relevant persons in compliance with evidence management principles.
  - 3.3 Securely store investigation information in a manner that facilitates future retrieval and maintains confidentiality.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to edit text to identify inaccuracies and omissions
- writing skills to prepare reports using plain English and factual information.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3028A Compile investigative report.

## Links

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPINV3032 Develop factual investigation reports

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3028A Compile investigative report.  
Updated to meet the Standards for Training Packages

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by developing three reports presenting information gathered by different factual investigations:

- one workers compensation investigation
- one general insurance investigation
- one type of investigation selected from the following list:
  - a financial crime investigation
  - an internal discipline investigation
  - a compulsory third party liability investigation.

One report must detail enquiries conducted which failed to lead to evidence being gathered.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when developing factual investigation reports:
  - investigative reporting that may result in breach of confidence, privacy or other offence under legislation
  - legal and ethical obligations associated with gathering and distributing information gained through factual investigation
  - legislative restrictions on the use of recording devices
- chain of custody and rules of evidence requirements associated with factual investigations
- factual investigation techniques
- format, style and content requirements for factual investigation reports
- information technologies used to document and present factual investigation reports
- methods for accurately citing and referencing information contained in factual investigation reports including online sources
- methods for redacting unverified information from investigation reports

- methods for verifying the source, reliability and authenticity of information gathered through factual investigation
- types of evidence:
  - circumstantial
  - direct
  - documentary
  - hearsay
  - opinion
  - physical.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by an RTO for investigations licensing purposes must hold the licence for performing the investigations activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- information gathered through factual investigation and information technologies and materials required to achieve the performance evidence.

# CPPINV3033 Conduct covert surveillance operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3030A Conduct surveillance. Updated to meet the Standards for Training Packages

## Application

This unit specifies the skills and knowledge required to conduct covert surveillance operations using mobile or static surveillance techniques on foot and while operating a vehicle. It includes selecting surveillance methods, equipment, sites and routes, and applying contingency options where surveillance integrity is compromised. The unit requires evidence collection and compliance with evidence management principles.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in investigative services in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Investigative services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare for covert surveillance operation.

1.1 Review work instructions, procedures and workplace policies to ensure required authorisations and compliance with legal rights and responsibilities when conducting covert surveillance.

1.2 Check validity of client intentions and information

- obtained as part of investigative brief to ensure compliance with ethical obligations.
- 1.3 Conduct research to profile the subject and their possible whereabouts in consultation with relevant persons.
  - 1.4 Select surveillance methods and identify likely surveillance sites and routes.
  - 1.5 Inspect surveillance sites and routes to identify factors that may impact surveillance operation and possible contingency options.
  - 1.6 Organise surveillance equipment and check to confirm correct operation.
  - 1.7 Collate and document gathered information to support surveillance operation.
- 2 Undertake covert surveillance and gather evidence.
- 2.1 Notify relevant persons of intention to conduct surveillance operation.
  - 2.2 Position and operate surveillance equipment following manufacturers' specifications and work health and safety requirements.
  - 2.3 Undertake covert surveillance procedures to meet work instructions and comply with legal requirements.
  - 2.4 Implement contingency options where surveillance integrity is compromised and report status to relevant persons.
  - 2.5 Gather and record surveillance evidence and check to confirm its relevance, validity and admissibility in court.
- 3 Finalise covert surveillance operation.
- 3.1 Present facts and observations in a documented surveillance report that complies with workplace standards for style, format and accuracy.
  - 3.2 Present report to relevant persons within agreed timeframes.
  - 3.3 Check, clean and store surveillance equipment following manufacturers' instructions.

- 3.4 Securely store surveillance records and evidence in accordance with evidence management principles.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret information in diagrammatic formats, such as photographs maps when operating global positioning systems
- writing skills to describe surveillance observations using plain English and factual information.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3030A Conduct surveillance.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPINV3033 Conduct covert surveillance operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3030A Conduct surveillance. Updated to meet the Standards for Training Packages

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting three different covert surveillance operations, involving at least:

- one mobile or static surveillance operation using a vehicle
- one mobile or static surveillance operation on foot.

For each covert surveillance operation, the candidate must submit a daily observation sheet in the required format, and document details of:

- a circumstance where anti-surveillance techniques were identified and contingency action taken
- an unplanned contact that could have compromised the surveillance and how this was handled using previously planned pretext in accordance with legal requirements
- strategies implemented to gain and maintain personal endurance necessary for prolonged surveillance shift responsibilities to comply with work health and safety (WHS) requirements in two different operating environments while working alone
- two choices of observation posts selected to meet surveillance work instructions
- a description of the subject.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when conducting covert surveillance operations:
  - actions that may result in breach of confidence, privacy or other offence under legislation
  - authorities and legal rights of investigators
  - duties of the investigator to follow instructions, act in person and act in the interests of the client
  - legislative restrictions on the use of recording devices
  - requirements to notify authorities or property owners of surveillance operations

- rights of subjects including privacy and protection of reputation
- WHS requirements
- codes of conduct and types of investigative behaviours that are unethical, illegal or represent misconduct
- covert observation techniques
- methods for verifying the validity and reliability of information gathered by covert surveillance
- signs that surveillance operation has been compromised
- sources of surveillance evidence and methods for:
  - collecting, preserving and presenting evidence
  - ensuring continuity of evidence
  - complying with evidence management principles
- techniques for skip tracing and sourcing background information on subjects
- types and purpose of equipment used when conducting covert surveillance operations:
  - binoculars
  - cameras
  - communications equipment
  - global positioning system
  - laptop computers
  - listening devices
  - mirrors
  - monopods or tripods
  - personal protective equipment (PPE)
  - power inverters
  - recording devices
  - telephoto lenses
  - vehicles
  - video cameras
- types of evidence:
  - circumstantial
  - direct
  - documentary
  - hearsay
  - opinion
  - physical
- typical hazards associated with covert surveillance and WHS control measures for each:
  - prolonged static physical immobility: deep vein thrombosis, muscle strain, cramps, physical and mental fatigue and dehydration
  - hot and cold environments.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by an RTO for investigations licensing purposes must hold the licence for performing the investigations activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- work instructions and associated documentation, PPE and surveillance equipment required to achieve the performance evidence.

# CPPINV3034 Organise and operate surveillance vehicles

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3031A Organise and operate a surveillance vehicle. Updated to meet the Standards for Training Packages

## Application

This unit specifies the skills and knowledge required to conduct covert surveillance operations using mobile or static surveillance techniques that may include operating a surveillance vehicle. It includes selecting surveillance methods, equipment, sites and routes, and applying contingency options where surveillance integrity is compromised. The unit requires collection of evidence and compliance with admissibility rules.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in investigative services in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Investigative services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |  |
|---|--|
| 1 Organise and maintain surveillance vehicle. | 1.1 Review work instructions, procedures and workplace policies and obtain required authorisations to organise and operate a surveillance vehicle. |
|   | 1.2 Confirm legal rights and responsibilities and comply with regulatory requirements for organising and   |

- operating a surveillance vehicle.
- 1.3 Assess surveillance requirements, area and distance of operation and select suitable vehicle.
  - 1.4 Inspect vehicle and maintenance records and conduct pre-operational checks to verify correct and safe operation.
  - 1.5 Take required actions to rectify faults or malfunctions or seek replacement parts to ensure vehicle is operational in accordance with manufacturers' instructions.
  - 1.6 Obtain required vehicle consumables, spare parts and personal protective equipment to allow for contingencies during surveillance vehicle operation.
- 2 Equip surveillance vehicle.
- 2.1 Obtain surveillance equipment and stores to equip vehicle according to work instructions.
  - 2.2 Arrange internal layout of vehicle to support full use of surveillance equipment and stores.
  - 2.3 Safely secure surveillance equipment and stores to maximise accessibility and personal comfort and minimise risk in accordance with work health and safety requirements.
- 3 Safely operate vehicle for surveillance activities.
- 3.1 Follow road and traffic laws to navigate vehicle in front of, or behind another vehicle and anticipating its movement.
  - 3.2 Anticipate, identify and control driving hazards by applying safe and defensive driving techniques.
  - 3.3 Drive vehicle in a safe and controlled manner to avoid damage to persons, property and the environment.
  - 3.4 Position vehicle to enable surveillance of subject and evidence collection in accordance with work instructions.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret:
  - information in diagrammatic formats such as maps when operating global positioning systems
  - key requirements of manufacturers' instructions.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3031A Organise and operate a surveillance vehicle.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPINV3034 Organise and operate surveillance vehicles

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3031A Organise and operate a surveillance vehicle. Updated to meet the Standards for Training Packages

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by organising and operating a surveillance vehicle that is fit-for-purpose, to conduct three different surveillance operations.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when operating surveillance vehicles:
  - legislative requirements and authorisations required for organising and operating surveillance vehicles
  - legislative restrictions on the use of recording devices
  - road and traffic laws in jurisdiction of operation
  - work health and safety requirements
- codes of conduct and types of investigative behaviours that are unethical, illegal or represent misconduct
- factors impacting the selection and suitability of surveillance vehicles:
  - curtains
  - number plates
  - paint style and colour
  - radio antennas
  - roof racks
  - sporting and trades accessories
  - wheel covers
  - window tinting
- methods for conducting pre-operational checks to ensure surveillance vehicles are safe and roadworthy

- surveillance techniques using a vehicle:
  - in front of another vehicle
  - following from behind another vehicle
- vehicle consumables and spares and surveillance equipment and stores used when operating surveillance vehicles:
  - consumables and spares:
    - brake fluid
    - fuel
    - tyres
    - water
  - equipment:
    - binoculars
    - camera
    - communications equipment
    - global positioning system
    - infrared
    - laptop computer
    - mirrors
    - monopod or tripod
    - personal protective equipment
    - power inverter
    - recording devices
    - telephoto lens
    - vehicle
    - video camera
  - stores:
    - changes of clothing
    - disguises
    - food, water and toilet fittings
    - props.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by an RTO for investigations licensing purposes must hold the licence for performing the investigations activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- work instructions and associated documentation, surveillance vehicle and equipment, stores, parts and consumables required to achieve the performance evidence.

# CPPINV3035 Develop surveillance investigation reports

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3028A Compile investigative report.  
Updated to meet the Standards for Training Packages

## Application

This unit specifies the skills and knowledge required to document and present comprehensive information gathered through covert surveillance. It includes compiling and presenting information and evidence in the required format and verifying its accuracy and reliability according to continuity of evidence and rules of evidence requirements.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in investigative services in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil.

## Unit Sector

Investigative services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Organise and assess surveillance investigation information.

1.1 Obtain and collate information gathered through covert surveillance.

1.2 Assess surveillance information for completeness in accordance with investigative brief and client requirements.

- 1.3 Assess surveillance timeline of events and recorded observations to verify validity and relevance, and compliance with continuity of evidence requirements.
- 2 Document and review report contents.
  - 2.1 Use information technologies to write surveillance investigation report in accordance with workplace requirements for content, format and style.
  - 2.2 Edit report to ensure content is accurate and sufficient and source additional information to address identified omissions.
  - 2.3 Check that observations are chronologically sequenced and accurately described according to verifiable evidence.
  - 2.4 Include surveillance point locations and exhibits and ensure attachments are numbered and labelled and referenced in the body of the report.
  - 2.5 Check citations and references are accurate and in the required format.
  - 2.6 Include details of problems encountered or indications that the surveillance operation may be compromised.
- 3 Finalise surveillance investigation report.
  - 3.1 Finalise report in a format that is free from inconsistencies, and uses a standard of English expression and layout that meets client and workplace requirements.
  - 3.2 Forward report and attachments safely and securely to relevant persons in compliance with evidence management principles.
  - 3.3 Securely store investigation information in a manner that facilitates future retrieval and maintains confidentiality.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to edit text to identify inaccuracies and omissions

- writing skills to prepare reports using plain English and factual information.

## **Unit Mapping Information**

Supersedes and equivalent to CPPSEC3028A Compile investigative report.

## **Links**

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPPINV3035 Develop surveillance investigation reports

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3028A Compile investigative report.  
Updated to meet the Standards for Training Packages

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by developing three reports presenting information gathered by different covert surveillance investigations from the following list:

- a surveillance physical injury report
- a surveillance psychological injury report
- a profit protection, theft or misappropriation surveillance report
- a brand protection surveillance report
- a public liability physical injury surveillance report
- an income protection physical or psychological surveillance injury report
- a general insurance physical injury surveillance report
- an asset protection or critical infrastructure surveillance report.

Each report must be supported by daily observation sheets, notes, photographs, video receipts and a final itemised invoice.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when developing surveillance investigation reports:
  - investigative reporting that may result in breach of confidence, privacy or other offence under legislation
  - legal and ethical obligations associated with gathering and distributing information gained through covert surveillance
  - legislative restrictions on the use of recording devices
- continuity of evidence and rules of evidence requirements
- covert surveillance investigation techniques
- format, style and content requirements for surveillance investigation reports

- information technologies used to document and present surveillance investigation reports
- methods for accurately citing and referencing information contained in surveillance investigation reports
- methods for verifying the reliability and authenticity of information gathered through covert surveillance
- types of evidence:
  - circumstantial
  - direct
  - documentary
  - hearsay
  - opinion
  - physical.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by an RTO for investigations licensing purposes must hold the licence for performing the investigations activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- information gathered through covert surveillance investigation, information technologies and materials required to achieve the performance evidence.

## Links

# CPPINV4013 Undertake case management of investigations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4013A Undertake case management of investigations. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to case manage investigations. It includes developing case management plans, assessing and controlling anticipated investigation risks, monitoring investigations and implementing required contingencies. It also includes evaluating investigation outcomes and client satisfaction to identify and recommend improvements to future investigations and service delivery.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

This unit forms part of the licensing requirements for people engaged in investigative services in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Investigative services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Develop case management plan.

1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures, including work health and safety, and apply to case management to ensure compliance.

- 1.2 Obtain and review work instructions and consult with relevant persons to clarify investigation purpose, timeframes and budget.
  - 1.3 Source and analyse intelligence to support investigation and define investigation scope and resource requirements.
  - 1.4 Develop case management plan and schedule activities and resources to effectively conduct investigation to meet work instructions.
  - 1.5 Identify and assess anticipated risks associated with investigation and implement required risk control measures.
  - 1.6 Organise required investigation equipment, resources and technologies according to workplace requirements.
  - 1.7 Plan contingency measures to respond to changing circumstances during investigation.
  - 1.8 Brief relevant persons to explain investigation information and instructions and use questioning and active listening to respond to issues and concerns.
- 2 Monitor investigation progress.
- 2.1 Systematically monitor investigation progress against case management plan to ensure service delivery meets client requirements.
  - 2.2 Maintain communication with relevant persons to monitor investigation progress against agreed objectives and discuss and address issues as they arise.
  - 2.3 Monitor expenditure and resource use to ensure investigation objectives are achieved within budget parameters.
  - 2.4 Monitor evidence collection processes to ensure compliance with evidence management principles and requirements for admissible evidence.
  - 2.5 Identify contingencies affecting the investigation and vary the case management plan as required in consultation with relevant persons.
  - 2.6 Compile operational documentation chronologically to

provide an ongoing reference for operatives.

- |   |  |
|---|--|
| 3 Review and report investigation outcomes. | 3.1 Document and report investigation outcomes to relevant persons within agreed timeframes.   |
|   | 3.2 Seek client feedback on service delivery and review investigation outcomes against case management plan.   |
|   | 3.3 Identify areas for improving future client service and operational outcomes and present recommendations to relevant persons.   |
|   | 3.4 Collate and secure all investigation documentation in a manner that facilitates future retrieval, maintains client confidentiality and meets evidence management requirements. |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey and clarify investigations information
- writing skills to document succinct and logically structured case management plans and investigation outcomes using plain English and factual information.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4013A Undertake case management of investigations.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPINV4013 Undertake case management of investigations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4013A Undertake case management of investigations. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by undertaking case management of three different investigations involving:

- at least one covert surveillance operation
- at least one factual investigation
- identifying a minimum of two contingencies requiring the case management plan to be varied
- identifying at least one improvement to client service delivery and one improvement to future investigations.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when undertaking case management of investigations:
  - regulatory powers provided to investigators under the legislation and acts and omissions that comprise non-compliance or offences
  - duties of investigators to follow instructions, act in person and act in the interests of the client
  - key requirements of legislation and regulations associated with:
    - operational transport
    - privacy
    - surveillance, listening and recording devices
    - taking statements from individuals and groups
    - workers compensation
  - licensing requirements for investigative services in Australia
  - rights of investigative subjects including privacy and protection of reputation

- work health and safety including work-related compensation and transport accident requirements for investigators in each jurisdiction
- chain of command and communication processes used to monitor investigations
- key principles of team dynamics, team leadership and management
- investigative practices associated with covert surveillance and factual investigations
- methods for briefing investigations information and instructions to individuals and teams
- methods for reviewing investigations to identify operational and client service improvements
- process of dynamic risk assessment and application of risk management using the hierarchy of controls
- sources of evidence gathered through surveillance and factual investigation and methods for:
  - collecting, preserving and presenting evidence
  - ensuring continuity of evidence
  - ensuring chain of custody requirements
  - complying with evidence management principles
- techniques for case managing investigations
- typical investigation hazards, risks and emergency situations and the control measures for each
- ways that social and cultural differences may be expressed
- work scheduling methods.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by an RTO for investigations licensing purposes must hold the licence for performing the investigations activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations and codes of practice that apply to investigations case management in the jurisdiction of operation
- work instructions, investigations equipment, resources and information technologies required to achieve the performance evidence.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

## CPPREP3001 Comply with ethical practice in real estate

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM3018B Identify risks to agency operations.

Updated to the Standards for Training Packages.

### Application

This unit specifies the skills and knowledge required to comply with ethical practice in a real estate agency in order to contribute to the quality and effectiveness of agency activities.

The unit applies to support workers in the real estate industry undertaking tasks with at least a moderate degree of autonomy and performing routine activities without close supervision.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. <b>Examine ethical practice in work role.</b>	1.1 Identify ethical responsibilities and processes required for work role. 1.2 Identify risks related to not working ethically in the real estate industry. 1.3 Prepare ethical work plan for work role.
2. <b>Comply with</b>	2.1 Perform work role ethically.

<b>ethical practice.</b>	2.2 Contribute to workplace discussions on the application of ethical practice in the agency/business.
3. Respond to unethical practice.	3.1 Identify unethical behaviour and breaches of ethical practice. 3.2 Identify agency processes to report unethical behaviour and ethical practice breaches.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- reading skills to access and interpret a variety of policies and procedures
- organisational skills to incorporate requirements of ethical practice, policies and procedures into own work practices.

## Unit Mapping Information

No equivalent unit.

Supersedes but is not equivalent to CPPDSM3018B Identify risks to agency operations.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP3001 Comply with ethical practice in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM3018B Identify risks to agency operations.

Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must:

- prepare and apply a work plan that incorporates ethical practice
- participate in at least 2 workplace discussions related to ethical workplace behaviour
- identify and explain the processes to report breaches of ethical practice or unethical behaviour.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation, and local government regulations relevant to ethical practice in real estate
- ethical practice in real estate and how it is included in workplace policies and procedures
- risks of not complying with ethical practice, including risk to the:
  - business
  - client
  - individual worker
- processes for:
  - locating and accessing ethical practice requirements
  - identifying ethical practice relevant to a given role in the agency
  - preparing work plans to incorporate ethical practice into work practices
  - identifying and reporting breaches of ethical practice and unethical behaviour.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

For assessment conducted in the workplace:

- a real estate agency workplace, staff and relevant ethical practice documentation
- equipment, communication and data access and storage technology.

For assessment in a simulated workplace environment:

- materials and equipment meeting the operational requirements for a mid-size real estate practice, including:
  - ethical practice documentation
  - a documented breach of compliance or unethical practice
  - position description that includes detailed roles and responsibilities for a work role
  - role descriptions for people participating in role-play exercises
  - documented scenario/s to allow demonstration of incorporation of ethical practice into work practices
- equipment, communication and data access and storage technology.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

## CPPREP3002 Communicate effectively to support customer service in real estate

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM3010 Meet customer needs and expectations in the property industry and CPPDSM3019 Communicate with clients in the property industry.

Merged to reduce duplication. Updated to the Standards for Training Packages.

### Application

This unit specifies the skills and knowledge required to apply effective communication techniques in order to provide customer service as a real estate agency worker.

It includes identifying and confirming support needs, communication techniques, and expectations of internal and external clients; and applying communication techniques to assist with resolving client issues and complaints.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Establish the support needs of internal and external customers and clients.	1.1 Determine support needs of internal and external customers and clients. 1.2 Outline own role and confirm processes for referring clients to appropriate colleagues when support needs are not within scope

	<p>of own role.</p> <p>1.3 Maintain professional ethics and confidentiality according to agency policy and procedures.</p>
<p>2. Communicate with clients to support needs.</p>	<p>2.1 Apply techniques to create, build and maintain internal and external communication channels.</p> <p>2.2 Determine features and benefits of active listening and effective questioning.</p> <p>2.3 Respond to the preferences, needs and expectations of internal and external clients.</p> <p>2.4 Prepare written communication according to agency protocols.</p> <p>2.5 Select and apply communication techniques to seek feedback on sufficiency of information provided.</p>
<p>3. Assist with client issues and complaints.</p>	<p>3.1 Assist clients to fully describe issues and complaints according to agency policy and procedures.</p> <p>3.2 Resolve simple issues or complaints, or to refer to others, according to agency policy and procedures.</p> <p>3.3 Record issues, complaints and outcomes according to agency policy and procedures.</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

Supersedes but is not equivalent to:

- CPPDSM3010 Meet customer needs and expectations in the property industry
- CPPDSM3019 Communicate with clients in the property industry.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP3002 Communicate effectively to support customer service in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM3010 Meet customer needs and expectations in the property industry and CPPDSM3019 Communicate with clients in the property industry.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must use communication techniques to support two internal and two external clients **by**:

- identifying and confirming support needs
- applying communication techniques for meeting the needs and expectations of internal and external customers and clients
- confirming sufficiency of information given
- assisting in resolving customer and client issues and complaints.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation relating to supporting internal and external clients in real estate
- professional ethical standards in real estate relating to supporting internal and external clients in real estate
- importance of accurate and complete collection of information about client requirements
- techniques for:
  - creating, building and maintaining strong and effective communication channels with internal and external clients
  - identifying the preferences, needs and expectations of internal and external clients
  - explaining the features and benefits of real estate agency services to external clients
  - using paper-based and technology-based written communications effectively with internal and external clients

- recording external client contact details and encouraging commitment to further engagement with the agency
- working effectively independently and as a member of a team
- collecting comprehensive details of client needs and requirements
- collecting comprehensive details of client complaints
- referring clients to colleagues
- communication techniques:
  - active listening
  - using effective questioning and responding to establish rapport
  - providing opportunities to clarify understanding
  - questioning and seeking feedback
  - summarising and paraphrasing to check understanding
  - using appropriate body language
- processes for:
  - locating and accessing information for clients
  - collecting information from clients
  - selecting and using business equipment and technology to assist in supporting clients
  - ensuring security of information.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to the following:

For assessment conducted in the workplace:

- a real estate agency workplace, staff and business documentation relating to supporting internal and external clients
- equipment, communication and data access technology required to support internal and external customers.

For assessment in a simulated workplace environment:

- details of the support requirements of the internal and external clients specified in the Performance Evidence
- materials and equipment meeting the full industry standard for a mid-size real estate agency, including:
  - documentation relating to:
    - supporting internal and external clients
    - receiving complaints

- position description including detailed roles and responsibilities for the role to be assumed by the person undergoing assessment
- role descriptions for people participating in role-play exercises
- equipment, communication and data access technology required for supporting internal and external clients.
-

# CPPREP3003 Access and process property information in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM3006B Collect and process property information and CPPDSM3015B Use and maintain property and client information databases.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to access and process property information in a format that is suitable for day-to-day activities.

The unit applies to support workers in the real estate industry undertaking tasks with at least a moderate degree of autonomy and performing routine activities without close supervision.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Review property information requirements.	<p>1.1 Confirm and document task requirements in consultation with relevant people.</p> <p>1.2 Analyse information requirements and identify sources of information.</p>

2. Access and collate property information.	<p>2.1 Access databases using appropriate search techniques to locate and collect property information.</p> <p>2.2 Access, retrieve and store required information in compliance with agency processes.</p> <p>2.3 Collate and organise information according to agency requirements in a format suitable for analysis.</p> <p>2.4 Check information for clarity, accuracy, currency and relevance.</p>
3. Process information.	<p>3.1 Enter information into databases and check for accuracy.</p> <p>3.2 Prepare property information report according to agency reporting requirements and style guide.</p> <p>3.3 Handle and store property information and reports securely, confidentially and according to legislative and agency requirements.</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

Supersedes but is not equivalent to:

- CPPDSM3006B Collect and process property information
- CPPDSM3015B Use and maintain property and client information databases.

# Assessment Requirements for CPPREP3003 Access and process property information in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM3006B Collect and process property information and CPPDSM3015B Use and maintain property and client information databases.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must create a report of property information for three different types of property.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation relating to collecting and processing property information in real estate
- ethical standards in real estate relating to collecting and processing property information
- importance of accurate and complete property information and the implications of incorrect or incomplete property information
- types of property information
- processes for:
  - locating and accessing property information
  - selecting and using business equipment and technology to access, organise and enter information
  - ensuring security of information
- sources of property information:
  - internet and intranet
  - property and customer relationship management (CRM) databases
  - paper-based records.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- a real estate workplace or simulated workplace, staff and business documentation relating to collecting and processing property information
- equipment, communication and data access technology required for collecting and processing property information.
- details of three different types of property for which collecting, and processing property information is required
- materials and equipment meeting the operational requirements for a mid-size real estate agency, including:
  - policies and procedures relating to collecting and processing property information and preparing reports
  - position description including detailed roles and responsibilities for the role to be assumed by the person undergoing assessment
  - role descriptions for people participating in role-play exercises
- equipment, communication and data access technology required for collecting and processing property information.

# Assessment Requirements for CPPREP4001 Prepare for professional practice in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM3009 Maintain workplace safety in the property industry and CPPDSM3016 Work in the property industry.

Merged to reduce duplication.

## Performance Evidence

To demonstrate competency in this unit, a person must produce a report that covers:

- the real estate agency functions and business structure
- the regulatory framework, regulator and industry bodies in the state or territory of operation
- the licensing requirements and responsibilities of:
  - the real estate licensee in charge or person who has effective control of the office
  - two other agency roles (at least one is to be a regulated role)
- the terms and conditions of employment in real estate.
- details of at least 3 different employment opportunities in the real estate industry.
- details of at least 3 different communication strategies that can be used with clients.
- at least 2 professional development pathways within real estate.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- clients of real estate services
  - vendors/sellers
  - purchasers/buyers
  - landlords/rental provider/lessee
  - tenants/renter
  - other parties to the real estate transaction
- services provided as part of real estate activities
  - residential sales

- residential property management
- property management business development
- commercial/industrial/retail property management
- commercial/industrial/retail sales
- auctioneering
- buyer's agent
- stock and station agent
- business broker
- legislation applying to real estate activities in the state or territory of operation
  - real estate licensing and regulation in the state or territory of operation
  - role and function of the regulator in the state or territory of operation
  - ethical and conduct standards in the state or territory of operation
  - key principles and provisions of equal opportunity and anti-discrimination
- role and function of real estate professional and industry bodies
- real estate agency structure
  - forms of ownership
  - roles and responsibilities of agency personnel
- licensing and continuing professional development requirements for real estate agents in the state or territory of operation
  - residential sales
  - residential property management
  - property management business development
  - commercial/industrial/retail property management
  - commercial/industrial/retail sales
  - auctioneering
  - buyer's agent
  - stock and station agent
  - business broking
- licensing limitations
  - licensing lending
  - unlicensed trading
- arrangements for employment in real estate
  - terms and conditions
  - rights and responsibilities of employer
  - rights and responsibilities of employees
- communication skills required for professional practice in real estate
- communication strategies for responding to client complaints.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- regulator and licensing requirements for the state or territory of operation
- qualification and professional development requirements for real estate roles
- real estate employment terms and conditions
- real estate professional practice codes of conduct.

## CPPREP4002 Access and interpret ethical practice in real estate

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4007A Identify legal and ethical requirements of property management to complete agency work, CPPDSM4008A Identify legal and ethical requirements of property sales to complete agency work, CPPDSM4015B Minimise agency and consumer risk and CPPDSM4057 Monitor a safe workplace in the property industry.

Merged to reduce duplication. Updated to the Standards for Training Packages.

### Application

This unit specifies the skills and knowledge required to work ethically in real estate.

It includes expressing a thorough understanding of ethical standards in real estate.

This unit supports real estate professionals in reducing financial and reputational risks, in meeting consumer protection standards, and in dealing responsibly with ethical breaches and challenges.

This unit applies to people currently working in or seeking to work in real estate.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Analyse ethical practice in real estate.	1.1	Research and examine the foundation for ethical practice applicable to real estate and its relationship to ethical behaviour.
---	--	-----	---

- |   |  |     |   |
|---|--|-----|---|
|   |  | 1.2 | Explain ethical consideration in personal decision-making.  |
|   |  | 1.3 | Analyse and examine statutory and industry standards, codes of practice or codes of conduct in relation to ethical practice in real estate.   |
| 2 | Interpret consumer protection requirements in real estate. | 2.1 | Access, read and interpret consumer protection requirements in real estate to identify risks. <ul style="list-style-type: none"><li>• risks to consumer</li><li>• risk to agency</li><li>• risk to industry</li><li>• personal risk.</li></ul>                              |
|   |  | 2.2 | Explain the impact of fraudulent activities on consumer and agency.   |
| 3 | Source and review ethical practices in real estate.        | 3.1 | Source and review statutory and industry standards and codes of practice or codes of conduct for ethical practice in real estate.   |
|   |  | 3.2 | Describe ethical practice standards for privacy, confidentiality and security of customer information.  |
|   |  | 3.3 | Review and explain ethical standards for: <ul style="list-style-type: none"><li>• privacy, confidentiality and security of customer information</li><li>• disclosure of material facts, conflict of interest and referrals</li><li>• price guide recommendations.</li></ul> |
|   |  | 3.4 | Describe communication strategies for clear representations of consumer rights and responsibilities, and complaints resolution processes.   |
|   |  | 3.5 | Demonstrate appropriate communication strategies for ethical practice in relationships with customers, clients and external agencies.   |
| 4 | Examine strategies to resolve concerns                     | 4.1 | Research and record sources of specialist advice about ethical practice in real estate.   |

- 4.2 Explain strategies to respond to concerns about discrepancies between personal or agency practice and real estate ethical practice standards.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes but is not equivalent to:

- CPPDSM4007A Identify legal and ethical requirements of property management to complete agency work
- CPPDSM4008A Identify legal and ethical requirements of property sales to complete agency work
- CPPDSM4015B Minimise agency and consumer risk
- CPPDSM4057 Monitor a safe workplace in the property industry.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP4002 Access and interpret ethical practice in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4007A Identify legal and ethical requirements of property management to complete agency work, CPPDSM4008A Identify legal and ethical requirements of property sales to complete agency work, CPPDSM4015B Minimise agency and consumer risk and CPPDSM4057 Monitor a safe workplace in the property industry.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must access a published real estate industry prosecution where consumer protection requirements were breached and develop a report that includes:

- a description of the unethical practice
- an explanation of how the unethical practice relates to consumer protection requirements
- an explanation of real estate ethical standards and codes of conduct or codes of practice related to the prosecution, including those that could have been applied and would demonstrate ethical practice
- options available to respond to a discrepancy between unethical practice and ethical practice standards including sources of specialist advice.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- principles of ethical practice and their application in real estate:
  - client protection
  - client focus
  - fairness
  - honesty
  - respect
  - clear communication
  - professional courtesy

- confidentiality, security of information and privacy
- risks to clients, agency, industry, community and self, arising from real estate transactions and fraudulent activities
- legislation relevant to real estate agent practices and consumer protection in the state or territory:
  - real estate agents and licensing
  - property sales and management
  - privacy
  - fair trading and consumer protection
  - discrimination
  - work health and safety/occupational health and safety
  - environmental (sustainability)
  - employment and industrial relations
  - foreign investment
  - secret commissions
- codes and standards for ethical practice in real estate
- penalties for breaches of codes and standards for ethical practice in real estate
- ethical practice in real estate:
  - maintaining and developing industry qualifications, licences, competency and currency
  - maintaining knowledge of relevant legislation and truly demonstrating this knowledge in real estate activities and transactions
  - complying with fiduciary duty and obligations
  - acting with honesty, fairness and professionalism
  - exercising skill, care and diligence
  - acting in the best interest of clients
  - following principal's instructions unless unlawful
  - maintaining confidentiality and security of information
  - obtaining and acting according to client authority and instructions
  - maintaining independence and disclosing and managing potential conflicts of interest
  - disclosing real and potential conflicts of interest, including disclosing material particulars or material facts, beneficial interests, commission, rebates
  - making sure advertising and communications are not false or misleading
  - using clear communication in all dealings with all parties to the real estate transaction, including providing written documents and signed documents
- behaviours considered unethical
- strategies to respond to concerns and discrepancies between personal or agency practice and real estate standards for ethical practice
- role of procedures, forms and documents in managing risk of unethical practice
- sources of advice about ethical practices:
  - industry bodies
  - regulators

- technical experts
- communication strategies for responding to client complaints.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- case notes and details of prosecutions within real estate relating to unethical practices and breaches of consumer protection standards
- real estate, fair trading and consumer protection legislation in the state or territory of operation, including offences and penalties
- statutory and industry standards for ethical practice in real estate, including codes of conduct or codes of practice
- sample industry standard forms and documents that support ethical practice in real estate transactions.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPREP4003 Access and interpret legislation in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM4002A Apply knowledge of state or territory legislative and regulatory framework to complete agency work.

Updated to the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to identify, access and interpret legislation relevant to work in real estate.

It includes developing an understanding of the legislative framework, its structure and the impact of legislation on work in real estate.

This unit applies to people currently working in or seeking to work in real estate.

The unit is particularly relevant when people seek to relocate and resume practice in a different state or territory or to offer different real estate industry services.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Interpret legislation.	1.1	Identify and explain common problems with interpreting legislation and consequences for misinterpreting legislation.
---	------------------------	-----	--

- |   |  |     |   |
|---|--|-----|---|
|   |  | 1.2 | Identify and interpret guidance material to support interpretation of legislation.                                    |
|   |  | 1.3 | Identify and analyse legislation relevant to real estate activities.  |
|   |  | 1.4 | Explain the role of regulators in relation to the legislation.  |
| 2 | Maintain knowledge of current legislation. | 2.1 | Identify own responsibility to access, read, interpret and apply legislation to real estate operations.               |
|   |  | 2.2 | Identify and apply techniques to access current and point-in-time versions of legislation.                            |
|   |  | 2.3 | Identify and apply techniques for tracking changes and amendments to legislation.                                     |
| 3 | Identify processes to resolve concerns.    | 3.1 | Examine and record processes to investigate discrepancies in application of legislation.                              |
|   |  | 3.2 | Examine and record processes to respond to discrepancies between personal or agency practice and current legislation. |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to CPPDSM4002A Apply knowledge of state or territory legislative and regulatory framework to complete agency work.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP4003 Access and interpret legislation in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM4002A Apply knowledge of state or territory legislative and regulatory framework to complete agency work.

Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must:

- access and analyse at least two pieces of legislation that apply to real estate in the state or territory of operation and provide a report to include:
  - full titles of legislation
  - the purpose of each of the pieces of chosen legislation
  - the key components of the pieces of chosen legislation
  - two breaches specified within the legislation and the penalties for each breach
  - how to identify the currency of the chosen legislation
- explain the process for addressing discrepancies in the application of legislation for personal or agency practice.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- sources of legislation applying to real estate operations in the state or territory of operation
- legal framework in Australia and the state or territory of operation:
  - common law
  - contract law
  - equity law
  - statute law
- key components of legislation:
  - Acts
  - regulations
  - amendments

- mandatory codes of practice
- schedules
- appendices
- structure of legislation:
  - long title
  - short title
  - commencement
  - application
  - contents
  - definitions
  - headings
  - parts
  - divisions and subdivisions
  - clauses and subclauses
  - schedules and appendices
- legislation relevant to real estate in the state or territory of operation and roles, including Commonwealth and state or territory legislation:
  - real estate agents, licensing and conduct
  - property sales and management
  - privacy
  - fair trading and consumer protection
  - anti-discrimination and equal opportunity
  - work health and safety/occupational health and safety
  - environmental (sustainability)
  - employment and industrial relations
  - planning and zoning
  - foreign investment
  - secret commissions
- interrelationship between pieces of legislation
- key principles for reading and interpreting legislation:
  - aids to interpret legislation:
    - external: interpretations of legislation, Acts, Hansard/parliamentary papers, legal dictionaries and previous judicial interpretations
    - internal: objectives, legislation to be accessed as a whole, definitions and interpretation sections in legislation, headings and margin notes
  - language conventions and expressions:
    - and/or
    - gender
    - hierarchy
    - includes

- may, should and must
- reading rules:
  - context
  - golden
  - literal
  - mischief
  - purposive
- express mention of one thing to the exclusion of another
- words interpreted through their connection with other words
- words with the same meaning
- regulators relevant to real estate in the state or territory of operation and their role
- breaches of legislation and penalties in the state or territory of operation
- value of penalty units in the state or territory of operation
- relationship between real estate codes of practice and codes of conduct and legislation applying to real estate operations
- responsibility of persons working in real estate to maintain current knowledge of legislation
- techniques to identify and track changes to legislation, including point-in-time versions and current versions
- sources of advice about legislation applying to real estate in the state or territory of operation
- processes to respond to concerns, conflicts and discrepancies relating to applying legislation to real estate activities in the state or territory of operation
- communication strategies for responding to client complaints.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- online databases for legislation relevant to real estate in the state or territory of operation
- websites and online databases for regulators relevant to real estate activities in the state or territory of operation

current legislation and legislation guidance material relevant to real estate in the state or territory of operation, including legislation for consumer protection.

minimise the risks.

- 4.5 Identify and analyse community expectations for real estate marketing and communications.

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Unit Mapping Information**

Supersedes and is equivalent to CPPDSM4005A Establish and build client-agency relationships.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP4004 Establish marketing and communication profiles in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM4005A Establish and build client-agency relationships.

Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must develop 3 marketing and communication profiles. These profiles must include:

- 1 designed to engage the community for an agency
- 1 individual personal profile designed to attract potential clients
- 1 marketing profile for a property designed to engage clients.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- real estate services:
  - sales
  - property management
  - lease
  - auction
  - buyers' agent
  - stock and station agent
  - business broking
- general expectations of clients and community
- types of marketing and communication in real estate
- methods for marketing and communicating:
  - the agent to the client
  - the property to the client
  - the agency to the community
- ethical practice in marketing and communication in real estate

- legal obligations in marketing and communication in real estate
- marketing and communication techniques:
  - profiling of people and environment
  - target market analysis
  - analysis of factors, including location, competition, opportunities
- purposes of personal, property and agency profiles
- communication strategies for responding to client complaints.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- at least one example of a marketing and communication profile for a property
- at least one example of an agency marketing and communication document.

# Assessment Requirements for CPPREP4005 Prepare to work with real estate trust accounts

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4006A Establish and manage agency trust accounts and CPPDSM4080A Work in the real estate industry.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must:

- explain the purpose of trust accounts in real estate
- review at least 5 trust transactions, and for each transaction determine who, within established agency processes, has the scope of responsibility for executing the transaction
- review documents relating to end of month processing and identify key components that are required by legislation in the state or territory of operation.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- difference between trust money and general business trading money
- different types of trust money
- purpose of trust accounts in real estate
- types of real estate trust accounts in the state or territory of operation
- legal and regulatory framework for real estate trust accounts
- impact on client confidence and agency brand resulting from breaches to trust account transaction processes and fraudulent activities
- standard transactions made with trust accounts:
  - deposits, including cash, cheque, electronic funds transfer and direct deposits
  - withdrawals, including cheque and electronic funds transfer
  - entries to journals and ledgers
  - balances and reconciliations
  - reports and statements
- receiving, receipting and banking trust moneys

- actions required where a trust account is overdrawn or compromised, or discrepancies are identified
- established industry processes to maintain trust account integrity, security, confidentiality and privacy
- role and functions of trust accounting software packages
- purpose of internal and external audits
- scope and limitations of own role in working with real estate trust accounts.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- receipts
- banking processes and procedures
- client disbursements
- office expenses
- established industry procedures for trust account transactions
- regulator and licensing requirements for trust account transactions
- summary of offences and penalties for breaches of trust account requirements
- sources of further information about real estate trust accounts.

# Assessment Requirements for CPPREP4101 Appraise property for sale or lease

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4003A Appraise property, CPPDSM4012A List property for sale, CPPDSM4025A Advise on performance of asset, CPPDSM4030A Appraise rural property and CPPDSM4064A Participate in research of property investment.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must appraise two different types of properties in the same geographical area for two different appraisal purposes.

At least one property must be chosen from the type of property list below:

- rural
- residential
- commercial
- industrial
- retail.

At least one appraisal purpose must be chosen from the list below:

- sale
- lease
- development site
- transfer of title
- agistment
- investment.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- role of the agent and real estate personnel in providing property appraisal, price range and rental value recommendation
- professional and ethical practices associated with property appraisals

- property appraisal:
  - purpose of appraisal
  - appraisal methods
  - difference between appraisal and valuation
  - factors influencing comparison of properties
  - market value, including forces that impact on value
- risks and risk management strategies associated with property appraisal
- agency forms and documentation associated with property appraisal and reasons for maintaining documentation
- process to determine price range or rental value:
  - local market factors
  - return on property investment
  - economic, political and social factors
  - leasing or sales market conditions
  - supply and demand
  - future development
- property attributes:
  - building construction
  - aesthetic and design features
  - faults and hazards
  - building improvements and modifications
  - property condition and presentation
  - heating, cooling and ventilation systems
  - energy efficiency and building sustainability ratings
  - compliance with regulatory requirements
- sources of information:
  - specialist advice
  - market conditions
  - land and environmental protection plans
  - local and state regulations
  - property portals
- communication strategies for responding to client complaints.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- property records and portals
- market indicator information
- procedures and documents for property appraisals
- details of two properties for appraisal.

## CPPREP4102 Market property

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4014A Market property for sale, and CPPDSM4061A Obtain prospects for listing.

Merged to reduce duplication. Updated to the Standards for Training Packages.

### Application

This unit specifies the skills and knowledge required to market property for sale or lease.

It includes interpreting a property appraisal report, negotiating an agreed marketing plan for a property with clients, preparing marketing materials, securing marketing resources, implementing marketing activities, accessing and using agency data on target markets, reviewing effectiveness of the marketing plan and activities and reporting on the effectiveness of marketing activities.

This unit applies to people currently working in or seeking to work in real estate.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Establish marketing plan.

1.1 Reference property appraisal report to identify property attributes.

1.2 Reference property listing agreement to determine

- method of sale or lease.
- 1.3 Establish target market for potential buyer or tenant.
  - 1.4 Develop marketing plan for property.
  - 1.5 Explain agency marketing service options and costs to client and recommend marketing strategies.
  - 1.6 Document marketing plan in consultation with client.
  - 1.7 Obtain and document agreement to proceed with marketing plan for property.
- 2 Establish and access marketing resources.
- 2.1 Access and examine marketing resources to reflect property marketing plan.
  - 2.2 Confirm marketing resources are appropriate for agreed marketing plan and selected media.
  - 2.3 Modify marketing resources as required to meet marketing plan and budget.
  - 2.4 Confirm marketing resources are consistent with agency, statutory and ethical requirements.
- 3 Implement marketing plan.
- 3.1 Brief all persons with responsibilities under the marketing plan about roles and activities.
  - 3.2 Conduct marketing activities as set out in agreed marketing plan.
  - 3.3 Monitor marketing activity responses and document data generated to build agency records.
- 4 Review marketing activities.
- 4.1 Outline marketing activities and agreed performance indicators.
  - 4.2 Identify opportunities for changes or enhancements to marketing plan and negotiate with client to make adjustments as required.
  - 4.3 Report on effectiveness of marketing activities against marketing plan and budget.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

Supersedes but is not equivalent to:

- CPPDSM4014A Market property for sale
- CPPDSM4061A Obtain prospects for listing.

## Links

# Assessment Requirements for CPPREP4102 Market property

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4014A Market property for sale, and CPPDSM4061A Obtain prospects for listing.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must prepare and implement marketing plans for two different properties. Each marketing plan must include:

- details of the property
- property and locality features
- details of the target market
- marketing budget
- performance indicators for success
- nominated points when the marketing plan will be reviewed
- marketing resources for one of these two properties that include:
  - how the property is to be described for the market
  - performance indicators.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- role of the agent in providing property marketing advice and plans
- marketing strategies for at least one of the following:
  - residential property
  - rural property
  - commercial property
- factors affecting choice of marketing strategy
- relationship between marketing and communication, and agency brand
- ethical and regulatory standards associated with marketing property, including misleading and deceptive conduct, false representation, price advertising, and advice and disclosure of material facts
- agency, ethical and regulatory practices relating to marketing, including documentation

- agency and statutory marketing documentation and forms
- marketing budgets, agency fees and charges, and conditions
- strategies for building agency–client relationships
- techniques for identifying needs and motivation of vendors and buyers, landlords and tenants
- methods of sale or lease
- marketing activities:
  - advertising, including print and electronic media
  - agency property guides
  - brochures
  - direct marketing
  - inspections
  - mail-outs
  - networking
  - open house
  - signboards
  - electronic
- marketing resources
- principles underpinning effective marketing resources
- marketing plan
- review of effectiveness of marketing plan and materials
- communication strategies for responding to client complaints
- legislation relating to marketing of property in the state or territory of operation.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- resources and strategies for marketing property
- an appraisal report for a property
- legislation relating to marketing residential property in the state or territory of operation.

# Assessment Requirements for CPPREP4104 Establish buyer relationships

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must:

- document the process and actions to respond to two different methods of buyer enquiry
- demonstrate how the needs and expectations of two buyers are matched to properties from a selection of at least six different property profiles
- develop a communication strategy, including record keeping processes, to address buyer expectations.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- role of agent, agency and personal brand in establishing and managing buyer relationships including fees, charges and conditions
- methods of buyer enquiry, including two of the following:
  - open home
  - email
  - phone
  - website
  - walk-in
  - referral
- communication styles and techniques to:
  - identify and clarify preferences, expectations, needs and motivation of buyers
  - qualify buyers
  - present properties to buyers
- strategies to match properties to buyers
- methods of sale of property
- techniques for establishing and maintaining relationships

- techniques to identify and manage disputes and conflict:
  - conciliation and mediation
  - third-party managed processes
- legislation and ethical practice in buyer relationships:
  - disclosures
  - privacy
  - conflict of interest
  - complaint-handling
- record keeping relating to buyer relationship and interactions.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- records and databases for properties available for sale
- property profiles for at least six properties
- buyer profiles for two buyers
- procedures and forms for taking buyer enquiries and qualifying buyers
- legislation and standards applying to real estate transactions in the state or territory of operation.

## CPPREP4121 Establish landlord relationships

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4011A List property for lease, CPPDSM4013A Market property for lease, CPPDSM4016A Monitor and manage lease or tenancy agreement.

Merged to reduce duplication. Updated to the Standards for Training Packages.

### Application

This unit specifies the skills and knowledge required to establish landlord relationships to support property management.

It includes establishing an agreement with a landlord to provide residential property management services and maintaining the relationship including keeping records of interactions with landlords.

This unit applies to people currently working in or seeking to work in real estate.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Confirm scope of landlord requirements.	1.1	Identify ethical and conduct standards for listing properties for lease and/or management.
		1.2	Confirm landlord experience and expectations for

- property management.
- 1.3 Confirm scope of property management services.
  - 1.4 Review rental appraisal to confirm rental price range expectation with landlord.
  - 1.5 Record details of property inspection according to legislative requirements.
- 2 Complete property management agreement.
- 2.1 Prepare agreement for property leasing and/or management services.
  - 2.2 Document landlord acceptance of fees, charges and services to be provided.
  - 2.3 Complete agreement for property management according to agency practice and legislative requirements.
- 3 Establish framework for communication.
- 3.1 Develop landlord communication plan, including frequency of communication and details to be provided in the communication.
  - 3.2 Advise landlord about contact people within the property management team.
  - 3.3 Establish communication protocols for repairs and maintenance.
  - 3.4 Determine landlord expectations for tenant selection and ongoing tenancy management.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- technology skills to access information using the internet, databases and business records management systems.

## Unit Mapping Information

No equivalent unit.

Supersedes but is not equivalent to:

- CPPDSM4011A List property for lease
- CPPDSM4013A Market property for lease
- CPPDSM4016A Monitor and manage lease or tenancy agreement.

# Assessment Requirements for CPPREP4121 Establish landlord relationships

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4011A List property for lease, CPPDSM4013A Market property for lease, CPPDSM4016A Monitor and manage lease or tenancy agreement.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must establish and maintain a relationship with at least 2 landlords.

The person must:

- develop a schedule for communication with one landlord, including:
  - frequency of communication and details to be provided in the communication
  - communication protocols for repairs and maintenance
  - expectations for tenant selection and ongoing tenancy management
  - timeframe for conducting and reporting on routine inspections
- prepare an agreement for property management for at least one property according to legislative requirements
- analyse a circumstance where landlord expectations were not met and provide a report with recommended action to prevent this from reoccurring.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- scope of property management services:
  - marketing activities
  - services provided
  - landlord expectations of tenant
- agreements for property management services:
  - terms and conditions
  - fees and charges

- repairs and maintenance
- outgoings applicable to the property (such as rates, strata fees)
- terms and conditions relating to property inspections and repairs
- strategies for building agency-client relationships
- role of agent in providing property management
- risks and risk management strategies associated with property management
- ethical and regulatory standards associated with property management services
- privacy standards and confidentiality relating to landlord and tenant
- property management documentation and forms
- agency property records:
  - key features of a records management system
  - reasons for maintaining property records
  - types of property records
- key indicators of market conditions for property management
- sources of information about market conditions
- market conditions:
  - leasing market conditions
  - sales market conditions
- legislative requirements applying to listing agreements and documentation
- legislation relating to property management in the state or territory of operation:
  - real estate licensing and conduct
  - anti-discrimination and equal employment opportunity
  - consumer protection, fair trading and trade practices
  - financial services
  - work health and safety/occupational health and safety
  - privacy
  - property sales and management
  - residential tenancies
- communication strategies for responding to client complaints.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- agency procedures, forms and documents for property management
- legislation relating to lease and property management in the state or territory of operation

- case study where landlord expectations about property management were not met.

# CPPREP4122 Manage tenant relationships

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4046A Manage tenancy disputes.

Updated to the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to establish tenant relationships in property management.

It includes responding to enquiries from tenants, establishing details and profile of potential tenants, matching tenants with properties, aligning landlord and tenant expectations, managing relationships and maintaining records of interactions.

This unit applies to people currently working in or seeking to work in real estate.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |                            |     |   |
|---|----------------------------|-----|---|
| 1 | Respond to tenant enquiry. | 1.1 | Document source of tenant enquiry.                              |
|   |                            | 1.2 | Confirm tenant needs and expectations to create tenant profile. |
|   |                            | 1.3 | Determine suitability of property for tenant to inspect.        |

		1.4	Provide tenant with information about the property including application information.
		1.5	Conduct property inspection with tenant.
2	Select tenant for property.	2.1	Review tenant profile and assess it against selection criteria for suitability for property.
		2.2	Confirm tenant references and document outcomes.
		2.3	Make recommendations to landlord about tenant selection.
3	Provide tenancy documentation.	3.1	Prepare tenancy documentation, including agreement, condition report and documentation, according to requirements in the state or territory of operation.
		3.2	Explain conditions of tenancy agreement, condition report and other documents to tenant.
		3.3	Explain entry cost to tenant and requirements of payment.
4	Commence tenancy.	4.1	Complete tenancy documentation according to statutory and agency requirements and provide tenant with copies.
		4.2	Provide keys and security devices to tenant.
		4.3	Advise tenant about contact people within property management team for issues arising during tenancy.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- technology skills to access information using the internet, databases and business records management systems.

## Unit Mapping Information

No equivalent unit.

Supersedes but is not equivalent to CPPDSM4046A Manage tenancy disputes.

## **Links**

Companion volumes to this training package are available at the VETNet website -

# Assessment Requirements for CPPREP4122 Manage tenant relationships

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4046A Manage tenancy disputes.

Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must select and place tenants in two different properties, and for each property:

- prepare tenancy documentation
- provide information to tenants about rights and responsibilities.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- contact people in property management team
- tenant selection criteria:
  - legislation
  - suitability for property
  - tenant renting history
  - capacity to meet rental terms
- conditions of rental agreement:
  - format – written, oral, standard form
  - payment of rent
  - term of agreement
  - conditions of use
  - special conditions/additional terms
  - tenant entitlements
- entry costs:
  - bond
  - rent in advance
  - any other fees – allowable, not allowable and penalties

- disclosure and documentation requirements provided to tenants prior to entering tenancy agreement as required in state or territory of operation
- bond payment, lodgement legal requirements and agency procedures
- terms and conditions, and documentation relating to property inspections, maintenance and repairs
- roles and responsibilities of landlord and of agent to tenant during tenancy
- privacy standards and confidentiality in relation to landlord and tenant
- property management documentation and forms
- rights and responsibilities of tenants
- relevant legislation relating to property management in the state or territory of operation:
  - anti-discrimination and equal employment opportunity
  - consumer protection, fair trading and trade practices
  - work health and safety/occupational health and safety
  - privacy
  - property sales and management
  - ethical practice associated with tenancy agreements including disclosure
- rent:
  - payment
  - receipting and recording
  - rent arrears
- components of tenancy documentation:
  - condition report
  - disclosure requirements
  - fixed and periodic term
  - legal obligations of tenant, landlord and agent
  - rent, bonds or security deposits
- processes for tenant requests:
  - repairs
  - urgent repairs
  - issues affecting tenancy terms and conditions
- communication strategies for responding to client complaints.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- range of tenant profiles
- range of property profiles
- sample tenancy agreement for the state or territory of operation
- sample property condition report used in the state or territory of operation
- agency procedures, forms and documents.

# CPPREP4123 Manage tenancy

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4049 Implement maintenance program for managed properties.

Updated to the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to manage a tenancy.

It includes timely and effective communication with tenant, landlord and other stakeholders and the management of rent payments, arrears, routine inspections, repairs, maintenance, tenancy renewals, rent increases and tenancy agreement breaches.

This unit applies to people currently working in or seeking to work in real estate.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Implement routine property inspections.	1.1	Document agreed process for property inspection and for tenant notification.
		1.2	Arrange and conduct property inspection.
		1.3	Prepare routine property inspection report.

- 1.4 Document and respond to issues or discrepancies identified through property inspection.
    - 1.5 Communicate with tenant and landlord about property condition and document communication.
- 2 Manage request for repairs and maintenance.
  - 2.1 Analyse request for repairs or maintenance to determine priority and consult with landlord for instructions.
  - 2.2 Document request for repair or maintenance and action taken.
  - 2.3 Select and engage appropriate tradesperson to quote and undertake repairs or maintenance.
  - 2.4 Confirm repair or maintenance has been completed to specification and quote.
  - 2.5 Communicate with tenant and landlord about repair and maintenance activities and document outcomes.
- 3 Manage additional tenant requests.
  - 3.1 Analyse request from tenant against tenancy terms and conditions.
  - 3.2 Communicate tenant request to landlord and document landlord's instructions.
  - 3.3 Advise tenant of outcome and document communication.
  - 3.4 Monitor action, in response to tenant request, to completion and complete documentation.
- 4 Manage tenant compliance with tenancy agreement.
  - 4.1 Identify and manage rental arrears.
  - 4.2 Document and respond to identified breaches of tenancy agreement.
  - 4.3 Negotiate to resolve breach of tenancy agreement with landlord and tenant.
  - 4.4 Initiate appropriate actions when resolution of breach cannot be reached.
  - 4.5 Document communication undertaken with tenant and

landlord regarding compliance.

- |   |                                     |     |  |
|---|-------------------------------------|-----|--|
| 5 | Plan for tenancy agreement renewal. | 5.1 | Advise landlord of advantages and disadvantages of rent increase and/or tenancy renewal.                   |
|   |                                     | 5.2 | Identify expiry date of tenancy agreement and determine schedule for tenancy renewals.                     |
|   |                                     | 5.3 | Document communication and negotiations with tenant and landlord regarding renewal of tenancy agreement.   |
|   |                                     | 5.4 | Conduct and document rent review and apply procedures to amend rent according to legislative requirements. |
| 6 | Manage property condition.          | 6.1 | Prepare cyclic maintenance schedule for the property.  |
|   |                                     | 6.2 | Recommend and report on improvements to property to maximise rental return.                                |
|   |                                     | 6.3 | Prepare a plan to action landlord instructions including time line and budget.                             |
|   |                                     | 6.4 | Document communication with tenant and landlord regarding maintenance activities.                          |
|   |                                     | 6.5 | Monitor and document agreed maintenance activities.  |

## Foundation Skills

# Assessment Requirements for CPPREP4123 Manage tenancy

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4049 Implement maintenance program for managed properties.

Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must manage tenancy for two different properties and for each property:

- respond to one issue that may affect tenancy terms and conditions
- outline and complete processes for managing the ongoing tenancy agreement
- manage property inspections for routine maintenance.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- legislation relating to property management in the state or territory of operation
- role and responsibilities of landlord and agent in managing tenancy
- ethical practice associated with tenancy agreements, including disclosure
- inspection of tenanted premises:
  - notice periods
  - inspection reports
  - communication to landlord and tenant
  - authority of agent
- rent:
  - arrears
  - increases
  - reviews
- assigning or subletting and legislative requirements
- renewal of leases and tenancy agreements:
  - renewal strategies for different types of property
  - scheduling tenancy renewals

- strategies for gaining tenancy renewals
- tenancy lease and renewal patterns
- re-letting procedures and legislative requirements
- processes for receiving and responding to tenant requests
- criteria and processes for urgent and non-urgent repairs according to legislative requirements in the state or territory of operation
- purpose of cyclical or scheduled maintenance plans and asset life cycles
- budgets and financial reporting
- scope of authority and imitations of work role, responsibility and professional abilities
- relevant building service, trades and operation for maintenance requirements
- sources of advice about standards and specifications for repairs and maintenance
- advice that must be given to tenants in the state or territory of operation
- tenancy record keeping policies and procedures
- privacy standards and confidentiality in relation to tenant and landlord
- agency property records:
  - key features of a records management system
  - reasons for maintaining property records
  - types of property records.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- agency procedures, forms, documents and portfolios for rental properties
- legislation relating to property management, rights and obligations of tenants and landlords in the state or territory of operation.

# CPPREP4124 End tenancy

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Application

This unit specifies the skills and knowledge required to finalise a tenancy.

It includes determining circumstances in which tenancy agreements may be ended, processes and documentation to end tenancy agreements, processes to re-let property and issues that may arise from termination of tenancy agreements.

This unit applies to people currently working in or seeking to work in real estate.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Respond to landlord request to end tenancy.	1.1	Identify and record circumstances for ending tenancy.
	1.2	Notify landlord of responsibilities and obligations according to tenancy agreement and legislative requirements and record communication.
	1.3	Communicate request to end tenancy to tenant and identify options to provide additional services.

- 1.4 Prepare documentation to end tenancy and provide to tenant according to legislative requirements.
    - 1.5 Document termination date and the processes undertaken to end tenancy.
- 2 Respond to tenant request to end tenancy.
  - 2.1 Identify and record circumstances for ending tenancy.
  - 2.2 Notify tenant of responsibilities and obligations according to tenancy agreement and document communication.
  - 2.3 Communicate request to end tenancy to landlord and identify options to provide additional services.
  - 2.4 Prepare documentation to end tenancy and provide to tenant according to legislative requirements.
  - 2.5 Document termination date and the processes undertaken to end tenancy.
- 3 Terminate tenancy due to breach of conditions.
  - 3.1 Notify tenant of breach according to legislative requirements, discuss rectification and obligations according to tenancy agreement and record communication.
  - 3.2 Record communication with landlord about breach of tenancy including instructions for action.
  - 3.3 Action processes to terminate tenancy when resolution of issues cannot be reached.
  - 3.4 Collate evidence of breach of tenancy and prepare documentation to take legal possession of property according to legislative requirements.
- 4 Coordinate end of tenancy.
  - 4.1 Prepare outgoing property inspection report according to legislative requirements.
  - 4.2 Negotiate with tenant for rectification of issues with regard to property condition and refer unresolved issues for external review.
  - 4.3 Identify arrangements for bond release according to

legislative requirements.

4.4 Implement process to re-let property.

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for CPPREP4124 End tenancy

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must:

- prepare written advice for at least one tenant detailing requirements to successfully end tenancy
- document a process to negotiate with at least one tenant for rectification of any issues with property condition for release of bond
- prepare written advice to landlord in circumstances of breach of lease that includes actions to be taken
- prepare statutory notices to end at least one tenancy that complies with legislative requirements for each of the following circumstances:
  - breach of tenancy agreement
  - landlord personal reasons
  - possession of property.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- real estate tenancy management services
- legislation relating to property management in the state or territory of operation
- role of agent in managing tenancy
- rights and obligations of agent, landlord and tenant during tenancy
- ethical practice associated with tenancy agreements, including disclosure
- inspecting tenanted premises:
  - notice to tenant
  - reports
  - communication to landlord
- rent:
  - payment
  - receipting, banking and recording

- rent arrears
- rent increases
- rent reviews
- components of tenancy agreements:
  - condition report and disclosure statements
  - fixed and periodic terms
  - format of agreements
  - legal obligations of agent, landlord and tenant
  - rents, security deposits and bond moneys
- processes for receiving and responding to tenant requests to end tenancy
- processes for receiving and responding to landlord requests to end tenancy
- breaches of tenancy agreement or conditions
- termination of leases and tenancy agreements:
  - relevant documentation
  - rents, security deposits and bond moneys
  - rights of landlords and tenants
- bond claims and repayments, legal requirements and agency procedures
- tribunal orders and possession
- legislation relating to ending tenancies in the state or territory of operation
- scope of authority and imitations of work role, responsibility and professional abilities
- sources of advice about ending tenancy arrangements
- advice that must be given to tenants according to the state or territory of operation
- tenancy record keeping policies and procedures
- privacy standards and confidentiality in relation to tenant and landlord
- agency property records:
  - key features of a records management system
  - reasons for maintaining property records
  - types of property records

communication strategies for responding to client complaints.

# CPPREP4125 Transact in trust accounts

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Application

This unit specifies the skills and knowledge required to conduct transactions in real estate trust accounts.

It includes identifying the purpose and types of property trust accounts, applying agency controls to transactions in property trust accounts for specific purposes, balancing, reconciling and reporting on trust account transactions, and maintaining records of trust account transactions.

The unit applies to people currently working in or seeking to work in real estate in a capacity that requires them to transact in trust accounts.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Adhere to legislative requirements.

1.1 Outline the types and purpose of real estate trust accounts.

1.2 Outline the personal obligations, responsibilities and legislative requirements for administering real estate trust accounts.

- |   |   |     |  |
|---|---|-----|--|
| 2 | Process deposits.                           | 2.1 | Receive trust account payments.  |
|   |   | 2.2 | Provide receipts for payments received.  |
|   |   | 2.3 | Prepare banking documentation to deposit trust moneys.   |
|   |   | 2.4 | Record receipts in trust account cash journal and trust account ledger.                          |
| 3 | Process payment, fees and charges.          | 3.1 | Receive and validate requests for payment.   |
|   |   | 3.2 | Confirm authorisation for payment.   |
|   |   | 3.3 | Check trust account ledger to confirm adequate funds in trust account before processing payment. |
|   |   | 3.4 | Process payments from trust account.   |
|   |   | 3.5 | Process payment advice.  |
|   |   | 3.6 | Record payment from trust account in trust account cash journal and trust account ledger.        |
| 4 | Maintain and protect trust account records. | 4.1 | Balance and reconcile trust account.   |
|   |   | 4.2 | Apply agency contingency procedures to respond to discrepancies identified with trust account.   |
|   |   | 4.3 | Prepare records and statements of trust account transactions.                                    |
|   |   | 4.4 | Identify and explain the process for unclaimed trust money.                                      |
|   |   | 4.5 | Maintain security of trust account records.  |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- technology skills to access and use computerised systems for trust accounts, and access information via the internet, databases and business records management systems
- numeracy skills to estimate, calculate, validate, balance, reconcile and report on trust account transactions.

## Unit Mapping Information

No equivalent unit.

New unit of competency.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP4125 Transact in trust accounts

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must:

- conduct transactions in at least one trust account and:
  - receive, receipt and prepare deposits for trust money on three separate occasions
  - prepare payments from the trust account for authorisation on three separate occasions
- complete at least one entry in a cash receipt journal, cash payments journal and transfer journal
- complete three reconciliations for trust accounts and:
  - apply standard contingency procedures to resolve a discrepancy in the trust account.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- purpose and types of real estate trust accounts
- legal and regulatory framework for real estate trust accounts in the state or territory of operation
- consequences for agency brand and legal penalties for breaches of trust account practices or fraudulent activities in the state or territory of operation
- impact on consumer confidence and agency brand resulting from breaches to trust account practices and fraudulent activities
- agency forms and documentation to transact in trust accounts for integrity, security, confidentiality and privacy:
  - transaction documents and receipts
  - procedures to authorise payments and withdrawals from the account
  - account reconciliations and balances
  - journals and ledgers
  - internal and external audit schedules
  - password security and electronic tracking of transactions

- documents and records according to requirements in the state or territory of operation
- forms of payment made to authorised person/s or trust account:
  - cash
  - cheque
  - EFT
  - direct deposit
- processes to validate and authorise processing of payments of expenses, deductions, fees and commissions from trust accounts
- actions required when a trust account is overdrawn, compromised, has unclaimed money or a discrepancy is identified
- maintenance and retention of records for trust accounts.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- real estate trust account systems
- procedures, forms and documents for trust accounts transactions, including contingency procedures
- regulator and licensing requirements for trust account transactions in the state or territory of operation
- summary of offences and penalties for breaches of trust account requirements in the state or territory of operation
- sources of further information about real estate trust accounts.

# CPPREP4141 Establish and maintain property management portfolio

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Application

This unit specifies the skills and knowledge required to maximise a property management portfolio.

It includes analysing current and future property demands in a target area, analysing the current property management portfolio, identifying underperforming services and properties and developing strategies to consolidate a property management portfolio for increased opportunities.

This unit applies to people currently working in or seeking to work in real estate.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Analyse current portfolio.

1.1 Analyse existing property management portfolio to identify high-performing and underperforming properties.

1.2 Quantify property management opportunities to add to or

- rationalise portfolio.
- 1.3 Determine optimum property management portfolio mix.
- 2 Conduct rental property market analysis.
    - 2.1 Identify target areas for property management.
    - 2.2 Analyse demographics of the target area.
    - 2.3 Analyse current market trends for pricing.
    - 2.4 Identify market supply and demand for identified property types.
- 3 Develop strategies to identify potential clients.
    - 3.1 Profile potential client characteristics.
    - 3.2 Develop a range of activities to target profiled clients.
    - 3.3 Establish timeframes for activities to target profiled clients consistent with market trends.
    - 3.4 Develop prospecting methods to target profiled clients.
    - 3.5 Develop strategies to utilise networks to identify potential clients.
- 4 Consolidate property management portfolio.
    - 4.1 Identify property management services that are underperforming or inconsistent with target portfolio mix.
    - 4.2 Make recommendations to improve or remove underperforming or inconsistent properties or services.
    - 4.3 Make recommendations to increase property management portfolio opportunities.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

# CPPREP4161 Undertake pre-auction processes

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Application

This unit specifies the skills and knowledge required to undertake pre-auction processes.

It includes preparing a strategy for auctions, including liaising with the vendor or sales agent, confirming the details of the contract and confirming the details of the property.

This unit applies to auctioneers or people seeking to work as auctioneers.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Review contract details.	1.1	Access, read and interpret contract documentation.
		1.2	Determine currency of contract to identify any changes to contract.
		1.3	Confirm role of external parties.
		1.4	Interpret terms of contract and matters that affect the title.

- |   |   |     |   |
|---|---|-----|---|
| 2 | Identify and document property details. | 2.1 | Identify key features of property from property report, marketing plan and materials.   |
|   |   | 2.2 | Analyse features of location, facilities and aspect to ascertain selling features.  |
|   |   | 2.3 | Identify matters impacting on property for disclosure purposes.   |
| 3 | Confirm vendor expectations.            | 3.1 | Liaise with sales agent or vendor to confirm auction process.   |
|   |   | 3.2 | Confirm vendor's price expectations.  |
|   |   | 3.3 | Analyse market indicator data to identify likely interest levels and expected price range and compare to vendor expectations. |
|   |   | 3.4 | Identify and evaluate details of expressions of interest or offers made pre-auction.  |
| 4 | Prepare auction day strategy.           | 4.1 | Plan information for opening the auction adhering to legislative requirements.  |
|   |   | 4.2 | Collate information about the property.   |
|   |   | 4.3 | Prepare script to explain key features of the contract and role of external agencies.   |
|   |   | 4.4 | Develop contingency plans for matters that may arise during the auction.  |
|   |   | 4.5 | Prepare order of sale for multiple properties at an in-room auction.  |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

New unit of competency.

## Links

Companion volumes to this training package are available at the VETNet website -

# Assessment Requirements for CPPREP4161 Undertake pre-auction processes

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must develop strategies for auction of property, including scripts, checklist and supporting documentation, in the following situations:

- multiple properties at an in-room auction
- single auction on site.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- auctioneer role, responsibilities and risks
- reserve price:
  - definition
  - purpose
  - setting
- auction instructions and auction day procedures
- auction documentation
- auction aids and equipment
- preparation of auction area, including access, identification of hazards, assessment of risks and implementation of risk controls
- auction process:
  - stating rules and conditions of auction according to state or territory legislation
  - calling for bids
  - confirming or renegotiating reserve with vendor as appropriate
  - describing property benefits
  - identifying salient features of contract
  - knocking down or passing in property as appropriate

- using vendor bidding as appropriate according to state or territory legislation
- capacity of bidders, including impairment
- negotiation techniques
- legislation related to sale of property by auction in the state or territory of operation
- penalties for breach of auction legislation
- property information:
  - general and local market indicators and conditions
  - land characteristics
  - council zoning and allowable use
  - land titles and defects to title
  - specific environmental issues or features relating to the property
  - specific requirements relating to the type of property
- risks to the general public, clients, agency and self from auction activities
- ethical practice in auctioneering:
  - communication
  - neutrality in the auction process
  - ethical management of the bidding process.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- auction contract documentation, instructions and auction-day procedures
- property information and market or location profiles for two types of property sales by auction, including multiple properties at an in-room auction and single auction on site
- auction procedures and forms.

## Links

# CPPREP4162 Conduct and complete sale by auction

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4004A Conduct auction and CPPDSM4019A Prepare for auction and complete sale.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to conduct an auction of property.

It includes accessing, interpreting and applying written instructions for the auction, calling an auction and completing the auction process, including when a property is sold and when a property is passed in.

The unit applies to auctioneers or people seeking to work as auctioneers.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Confirm pre-auction terms, conditions and presentation.	1.1	Assess suitability of auction site and auction equipment and identify risks to self and others.
		1.2	Confirm required auction advice is displayed according legislative requirements.

- 1.3 Review auction documentation and examine major points including auction instructions, authorities, contracts, reserve price, co-owner and vendor bids.
    - 1.4 Confirm number of registered bidders, online bidding and bidding by authority according to legislative requirements.
    - 1.5 Liaise with vendor or sales agent for final instructions.
- 2 Open auction.
  - 2.1 Read out terms and conditions of sale by auction according to legislative requirements
  - 2.2 Identify property and vendor in relation to the contract.
  - 2.3 Respond to questions from potential bidders and other parties.
  - 2.4 Submit property for sale by auction and call for opening bids.
- 3 Manage auction to maintain flow.
  - 3.1 Conduct the auction according to legislative requirements.
  - 3.2 Manage bidding process and maintain auction process to achieve reserve price.
  - 3.3 Seek instructions from vendor or sales agent for vendor bids or to change reserve.
  - 3.4 Implement trial close strategy.
- 4 Complete auction.
  - 4.1 Signify close of auction using appropriate strategy such as final calls, fall of hammer and closing script.
  - 4.2 Knock down property to successful bidder once reserve price has been met and all other bids are exhausted.
  - 4.3 Pass in property if reserve price is not met and all bids are exhausted.
  - 4.4 Offer highest bidder opportunity to negotiate with vendor when property fails to reach reserve price.

- 4.5 Obtain feedback on auction from vendors and colleagues.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

Supersedes but is not equivalent to:

- CPPDSM4004A Conduct auction
- CPPDSM4019A Prepare for auction and complete sale.

## Links

# Assessment Requirements for CPPREP4162 Conduct and complete sale by auction

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4004A Conduct auction and CPPDSM4019A Prepare for auction and complete sale.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must:

- call at least one auction to conclusion where the property is sold
- call at least one auction to conclusion where the property is passed in
- review auction performance and identify and document personal strengths and opportunities for improvement.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- auctioneer role, responsibilities and risks
- reserve price
- auction documentation
- auction aids and equipment
- preparation of auction area, including access, identification of hazards, assessment of risks and implementation of risk controls
- auction rules and prescribed auction information in state or territory of operation
- auction process:
  - stating rules and conditions of auction according to state or territory legislation
  - managing the bidding process:
    - using appropriate bidding increments
    - maintaining bidding momentum
    - dealing with disruptive bidders
    - vendor and co-owner bids
    - collusive bidding practices

- disputed bidding
- bidding advances
- retracting bids
- restarting the bidding
- confirming or renegotiating reserve with seller as appropriate
- describing property benefits
- identifying key features of property and contract terms
- knocking down or passing in property as appropriate
- using vendor bidding as appropriate according to legislative requirements
- capacity of bidders, including impairment
- legislation related to sale of property by auction in the state or territory of operation
- penalties for breach of auction legislation

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPPREP4171 Represent buyer in sales process

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM4001A Act as a buyer's agent.

Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must, on each of two separate occasions, prepare a buyer brief and complete a short list of a minimum of two suitable properties based on the buyer brief and inspect the two properties and prepare a report for the buyer.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation and local government regulations relevant to operating as a buyers' agent
- disclosure requirements relevant to properties, including of material facts
- ethical standards and regulatory requirements relating to recommending properties for purchase
- protocols to follow when preparing recommendation for purchase of properties
- client expectations:
  - comprehensive information about recommended properties
  - method of sale and payments
  - time frame for sales
  - contract conditions
- content and purpose of different types of listing agreements
- legislative requirements applying to listing agreements.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- buyer's agency workplace and business documentation
- sufficient documentation for a range of properties to allow for creation of purchasing recommendations
- role description and information for a person participating in role-play exercises as the client for a buyers' agent
- equipment and information required to prepare documentation.

# CPPREP4173 Complete purchase of property as buyer's agent

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Application

This unit specifies the skills and knowledge required to negotiate and act on behalf of a buyer to complete a property purchase.

The unit applies to industry professionals acting on behalf of principals in real estate.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Confirm authority to purchase property.	1.1 Confirm and document buyer instructions to purchase property and negotiate terms of contract. 1.2 Arrange for inspections and reports required for completion of purchase. 1.3 Prepare formal authority to purchase property on behalf of buyer.
2. Negotiate to purchase by private treaty.	2.1 Establish and document maximum offer for property and process to be followed if offer is not accepted. 2.2 Apply negotiation techniques to achieve the lowest price for

	<p>property and terms of contract that are acceptable to both parties.</p> <p>2.3 Present negotiated offer and terms to buyer for approval or additional instructions.</p> <p>2.4 Finalise negotiations between all parties for exchange of contracts.</p> <p>2.5 Facilitate payment of deposit.</p>
3. Represent buyer at auction.	<p>3.1 Obtain written authority to bid on behalf of buyer according to legislative requirements.</p> <p>3.2 Establish and document maximum bid for property and process to be followed if bidding exceeds buyer limit.</p> <p>3.3 Apply negotiation techniques to purchase property if passed in at auction.</p> <p>3.3 Facilitate signing of contract on behalf of buyer.</p> <p>3.5 Facilitate payment of deposit.</p>
4. Complete purchase.	<p>4.1 Arrange for pre-settlement inspections of property.</p> <p>4.2 Manage contingencies if terms of contract cannot be met.</p> <p>4.3 Confirm completion of settlement and facilitate settlement procedures.</p> <p>4.4 Request feedback from buyer on agency services.</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

New unit of competency.

# Assessment Requirements for CPPREP4173 Complete purchase of property as buyer's agent

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must:

- prepare and complete a checklist for the inspection and report required for completion of purchase of one property
- document buyer instructions, negotiate and document the offer for the purchase of one property by private treaty
- document buyer instructions, negotiate and document an offer to purchase one property at auction
- document buyer instructions, negotiate and document an offer to purchase one property after it has been passed in at auction

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation and local government regulations relevant to completing purchase of property as a buyer's agent
- legislative requirements relating to the sale of land in the state or territory of operation
- auction rules and process
- requirements to bid at auction as a buyer's agent
- processes associated with purchasing property at auction and by private treaty
- ethical standards and regulatory requirements relevant to completing purchase of property as a buyer's agent
- protocols to follow when completing purchase of property as a buyer's agent.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- buyer's agency workplace, staff and business documentation for purchasing property as a buyer's agent
- sufficiently detailed documentation for a property to be sold by private treaty and for a property to be sold at auction that will allow for preparation of the required documents
- scenarios for negotiating offers for purchase of a property by private treaty and when property is passed in at auction
- role descriptions and information for people participating in role-play exercises
- equipment required to prepare documentation.

# Assessment Requirements for CPPREP4181 Manage onsite residential property

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must:

- schedule and manage maintenance of property grounds and building areas, including communicating with individual property owners and owners' corporations for two residential complexes
- market, let and manage two short-term stay properties.
- prepare financial reports for one individual owner and one owners' corporation.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation and local government regulations relevant to the onsite management of residential property
- roles and responsibilities in a residential complex:
  - caretaker
  - letting agent
- processes for managing financial reports in a residential complex:
  - individual owners
  - owners' corporation
  - trust account
- processes, in a residential complex, for managing:
  - maintenance and repairs in common property grounds and building areas
  - effective communication with property owners
  - compliance with by-laws
  - marketing of accommodation in the complex
  - reception, guest payment and support services for short-term stay guests
  - housekeeping services for short-term stays:

- inspections
- cleaning
- inventory maintenance
- repairs.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- sufficient residential complex documentation to prepare the documents required in the Performance Evidence
- role descriptions and information for people participating in role-play exercises
- equipment required to prepare documentation.

# Assessment Requirements for CPPREP4201 Appraise commercial property

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4026 Analyse property and facility information and CPPDSM4032A Arrange valuation of facilities and assets.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must appraise and report on the lease or sales price of two different commercial properties.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- legislation and regulations governing appraisal of commercial properties in the state or territory of operation
- agency documentation required to be completed and maintained when appraising commercial properties
- appraisal methodologies suitable for different types of commercial properties
- basic accounting principles and techniques for checking financial data and the status of commercial properties for lease or sale
- categories of commercial property:
  - industrial
  - retail
  - healthcare
  - leisure
  - warehouses
  - multi-family
- commercial property appraisal processes:
  - content and format of appraisal reports
  - factors that influence whether commercial properties are comparable for appraisal purposes
  - information required to be gathered and analysed for commercial property appraisals

- key sources of information required for appraisal of commercial properties
- industry benchmarks for the appraisal of different types of commercial properties
- land use controls for different types of commercial properties
- regulatory and ethical responsibilities and role of agents in appraising commercial properties for lease or sale:
  - duty of disclosure
  - maintaining client privacy and confidentiality
  - providing accurate information
- types and purpose of financial records to be analysed when appraising commercial properties for lease or sale
- types of leases used for commercial properties
- value factors for the commercial property market.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- materials and equipment that meet the operational requirements for a real estate agency, including:
  - policies, procedures and documentation relating to appraising commercial properties
  - relevant legislation in the state or territory of operation relating to appraising of commercial properties
  - equipment, communication and data access and storage technology required to conduct research and to prepare reports relating to appraising commercial properties for lease
- client briefs and financial and performance information to support the appraisal of two different commercial properties.

# Assessment Requirements for CPPREP4231 Manage commercial property maintenance

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4042 Coordinate construction contract, CPPDSM4043A Coordinate fit-out of property and facilities, CPPDSM4044 Coordinate maintenance and repair of properties and facilities, CPPDSM4058A Monitor service requirements in the property industry, CPPDSM4059A Monitor space use in the property industry and CPPDSM4074 Select and appoint contractors in the property industry.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must manage the maintenance of two commercial properties from two of the following categories:

- office
- industrial
- retail.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- legislation and regulations governing maintenance of commercial properties in the state or territory of operation:
  - Building Code of Australia (BCA) requirements for the property type and classification
  - compliance requirements associated with property maintenance
    - air conditioning
    - fire protection
    - lifts
- agency documentation required to be prepared and completed when managing the maintenance of commercial properties
- asset life cycles and implications for maintenance of commercial property
- criteria used to prioritise maintenance activities and urgent repairs

- maintenance activities typically covered by warranties and insurances
- methods for sequencing maintenance contractors and activities to achieve time and resource efficiencies
- methods for verifying maintenance activities are completed to specification
- notification requirements for scheduling and implementing maintenance for commercial property
- preventative and periodic maintenance requirements of commercial property
- processes used to schedule and implement property maintenance
- regulatory and ethical responsibilities and role of agents in managing commercial property maintenance
- requirements and processes for obtaining and accepting competitive quotes for maintenance of commercial property
- rights and obligations of lessors, lessees and property managers to maintain commercial properties
- risks associated with commercial property maintenance to:
  - lessors
  - lessees
  - property managers
  - the public
- types and purpose of property documentation that can inform maintenance requirements.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- materials and equipment meeting the operational requirements for a real estate agency:
  - policies, procedures and documentation relating to commercial property maintenance
  - legislation in the state or territory of operation relating to commercial property maintenance
  - equipment, communication and data access and storage technology required to maintain documentation associated with commercial property maintenance
- information to support the maintenance of two different types of commercial property.

# CPPREP4232 Manage commercial property financial reports

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Application

This unit specifies the skills and knowledge required to manage financial reporting for commercial property management.

It includes collating and analysing income, expenditure and cash flow to plan and budget for financial reporting.

It also includes preparing required financial reports and evaluating financial outcomes for the property in consultation with lessors to identify and recommend actions for improvement.

The unit applies to industry professionals in real estate.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Plan financial reporting for commercial property management.	1.1 Analyse property documentation to confirm financial reporting obligations according to client instructions or agreement. 1.2 Confirm types and purpose of required financial reports and reporting periods. 1.3 Schedule financial reporting activities to meet client

	requirements and accounting protocols.
2. Develop annual budget for commercial property.	<p>2.1 Collate financial data for commercial property.</p> <p>2.2 Analyse financial data to prepare forecasts for the financial year.</p> <p>2.3 Prepare and document budget and tenancy schedules to meet agency requirements for commercial property management.</p>
3. Coordinate financial reporting for commercial property.	<p>3.1 Prepare financial reports according to client instructions.</p> <p>3.2 Assess completed financial reports to verify sufficiency to meet reporting requirements and take required action to correct errors or omissions.</p> <p>3.3 Distribute financial reports to lessor to meet agreed reporting timeframes and agency requirements.</p>
4. Evaluate and improve financial outcomes for commercial property.	<p>4.1 Assess financial outcomes for property to identify areas requiring improvement.</p> <p>4.2 Recommend actions to improve financial outcomes in discussion with lessor and obtain feedback and further instruction from lessor.</p> <p>4.3 Facilitate implementation of processes to improve financial outcomes for property according to lessor instructions.</p> <p>4.4 Secure and maintain financial information and documentation according to agency requirements.</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

New unit of competency.

# Assessment Requirements for CPPREP4232 Manage commercial property financial reports

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must, for two separate commercial properties, develop financial reports for the lessor. These reports must include:

- income and expenditure report
- cashflow projection
- statutory reporting.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- legislation and regulations governing management of commercial property financial reports in the state or territory of operation
- arrears recovery procedures
- basic accounting techniques used to calculate income, expenditure and cash flow
- budgeting process for commercial property financial management
- information to be contained in financial reports for commercial property
- methods for collecting and recording income for commercial property
- methods for controlling and paying expenditure for commercial property
- methods for setting up and administering budgets for commercial property
- outgoings recovery and management processes for commercial property
- ethical standards, regulatory requirements and role of agents in managing commercial property financial reports
- types, purpose and reporting periods of commercial property financial reports.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- materials and equipment meeting the operational requirements for a real estate agency:
  - policies, procedures and documentation relating to managing commercial property financial reports
  - legislation in the state or territory of operation relating to managing commercial property financial reports
  - equipment, communication and data access and storage technology required to prepare a range of required commercial property financial reports
- accountant or other professional to assist in the preparation of commercial property financial reports.

## CPPREP4233 Manage lessee relationships - commercial

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4062A Occupy space.

Updated to the Standards for Training Packages.

### Application

This unit specifies the skills and knowledge required to manage lessee relationships for commercial property tenancies.

It includes supporting lessees to comply with the terms and conditions of the lease when occupying properties including managing contingency requests associated with subletting and assignment of commercial leases.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Confirm lease arrangements with lessee.	1.1 Consult with lessee to plan commercial property occupation and confirm rights and obligations under the lease. 1.2 Clarify lessee needs and expectations for property use and fit-out and provide advice to ensure compliance with lease and lessor instructions. 1.3 Schedule processes for collecting rent and outgoings according

	<p>to agency requirements.</p> <p>1.4 Verify acceptance of terms and conditions of lease and implement contingency processes as required in consultation with lessee.</p> <p>1.5 Document schedules and agreed actions according to agency requirements.</p>
2. Support lessee to comply with commercial lease.	<p>2.1 Coordinate collection of rent and outgoings according to agreed schedule and lease requirements.</p> <p>2.2 Conduct property inspection to confirm compliance with lease requirements.</p> <p>2.3 Seek feedback from lessee to monitor property condition and use and identify issues or concerns.</p> <p>2.4 Implement rent reviews and contributions to expenses.</p> <p>2.5 Implement required actions to resolve lessee issues or concerns within the constraints of the lease and lessor instructions.</p> <p>2.6 Seek specialist assistance and lessor instructions to resolve lessee issues or concerns outside the scope of the lease.</p> <p>2.7 Document property inspection results and actions taken according to agency requirements.</p>
3. Manage lessee contingency requests.	<p>3.1 Respond to request to sublet portion of commercial property.</p> <p>3.2 Gain lessor acceptance for subletting and implement required processes.</p> <p>3.3 Respond to request for assignment of lease.</p> <p>3.4 Gain lessor acceptance for assignment of lease and implement required processes.</p>
4. Facilitate lease renewal.	<p>4.1 Facilitate the exercise of options with lessee according to lease requirements.</p> <p>4.2 Coordinate negotiation for renewal of lease or new lease to meet lessee requirements.</p> <p>4.3 Secure and maintain lessee documentation to inform future negotiations according to agency requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- reading skills to interpret commercial property leases that contain legal terminology

- numeracy skills to calculate rent and outgoings
- technology skills to access and use agency databases to record lessee interactions.

## Unit Mapping Information

No equivalent unit.

Supersedes but is not equivalent to CPPDSM4062A Occupy space.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP4233 Manage lessee relationships - commercial

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4062A Occupy space.

Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must develop and manage two lessee relationships. These must include:

- completing at least one new lease agreement
- co-ordinating and undertaking at least one inspection
- organising the exercise of option or renewal of lease
- actioning at least 2 lessee contingency requests.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- agency documentation required to be completed when managing lessee relationships for commercial property
- fit-out, repair and make-good obligations of lessees of commercial property
- legislation relating to the lease of commercial property in the state or territory of operation
- methods for calculating and collecting rent and outgoings for commercial property
- methods for preparing a tenancy schedule
- needs of lessees in different types of commercial property:
  - industrial
  - retail
  - office
- purpose and types of option clauses in commercial leases
  - methods by which lessees can exercise their options
  - time limits for exercising options
- ethical standards, regulatory requirements and role of real estate agents when managing lessee relationships for commercial property

- requirements for subletting and assignment of a commercial lease
- types of outgoings required to be paid by lessees of a commercial property
- types of securities, guarantees and insurance required to protect lessors of commercial property.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- materials and equipment meeting the operational requirements for a real estate agency:
  - policies, procedures and documentation for managing lessee relationships for commercial property
  - legislation in the state or territory of operation relating to lease of commercial property
  - equipment, communication and data access and storage technology required to develop, manage and monitor lessee relationships
- two lessees and arrangements for the lease of two different types of commercial property.

## CPPREP4235 End commercial property lease

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

### Application

This unit specifies the skills and knowledge required to end a commercial property lease.

It includes analysing lease documentation to clarify the circumstances of termination and obligations of lessors and lessees, and monitoring and negotiating termination processes including make good, handover and financial settlement.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Respond to request to terminate commercial property lease.	1.1 Receive request to end lease and clarify circumstances requiring termination. 1.2 Analyse lease documentation to verify conditions of termination and confirm lessor and lessee responsibilities. 1.3 Clarify make-good obligations and property handover requirements. 1.4 Inform lessor and lessee of termination request according to agency requirements.

	<p>1.5 Document request to terminate lease according to legislative requirements.</p> <p>1.6 Seek specialist advice as required to clarify contractual obligations and inform lessor and lessee.</p>
2. Implement and monitor processes to terminate commercial property lease.	<p>2.1 Notify lessor and lessee of responsibilities and obligations associated with lease termination.</p> <p>2.2 Consult with lessee to monitor satisfactory completion of make-good requirements.</p> <p>2.3 Conduct and document property inspection to verify outgoing property condition according to terms and conditions of lease.</p> <p>2.4 Facilitate financial settlement according to terms and conditions of lease.</p> <p>2.5 Record financial transactions according to legislative requirements.</p>
3. Finalise termination of commercial property lease.	<p>3.1 Organise and monitor property handover procedure to lessor satisfaction.</p> <p>3.2 Negotiate with lessor and lessee to resolve areas of conflict.</p> <p>3.3 Identify breach of lease terms and conditions, and implement actions required for resolution according to agency requirements.</p> <p>3.4 Complete and secure end of lease documentation according to legislative requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- writing skills to record observations during property inspections
- reading skills to interpret lease documents that may include legal terminology
- speaking skills to negotiate and resolve conflict
- numeracy skills to calculate financial payments for lease settlement
- problem-solving skills to recognise breaches of lease and apply specific lease clauses to circumstances of termination.

## Unit Mapping Information

No equivalent unit.

New unit of competency.

# Assessment Requirements for CPPREP4235 End commercial property lease

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must document and action a plan for the termination of commercial leases in two of the following circumstances:

- expiry of term of lease
- frustration of lease
- breach of lease
- surrender of lease.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- legislation and regulations governing termination of commercial property leases
- required documentation to be completed and maintained when ending commercial property leases
- assignment and sub-leasing procedures
- circumstances that may lead to termination of a commercial lease:
  - breach of lease
  - frustration of lease
  - expiry of term of lease
  - surrender of lease
- fit-out, repair and make-good obligations
- lease breach or default notification procedures and consequences
- methods and considerations for financial settlement when terminating leases for commercial property:
  - arrears recovery
  - cash settlement in lieu of make-good
  - payment of monies owed

- return of bond
- ethical standards, regulatory requirements and role of real estate agents in terminating commercial property leases.
- 

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- materials and equipment meeting the operational requirements for a real estate agency:
- policies, procedures and documentation relating to ending commercial property leases
- legislation in the state or territory of operation relating to ending commercial property leases
- equipment, communication and data access and storage technology required to prepare documentation and maintain records for the termination of commercial property leases
- lessees, lessors and information to support the termination of commercial property leases.

## CPPREP4262 Establish vendor relationships in business broking

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

### Application

This unit specifies the skills and knowledge required to attract vendor-agency relationships and to work with vendors to provide business broking services to meet their specific needs and preferences.

It includes completing agency documentation for the listing and sale of businesses and setting up vendor communication processes to provide feedback on the sales process.

The unit applies to industry professionals in real estate.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Prospect to attract potential vendors.	1.1 Identify and plan suitable prospecting methods to attract business listings according to agency requirements. 1.2 Apply prospecting methods to create opportunities to establish vendor–agency relationships. 1.3 Explain agency business broking services that meet specific vendor preferences and requirements. 1.4 Address vendor questions or concerns and offer information or

	<p>services that attract relationships.</p> <p>1.5 Record communications with potential vendors according to agency requirements.</p>
2. Confirm sale context.	<p>2.1 Identify vendor needs and preferences.</p> <p>2.2 Determine business structure, ownership, scope of operation and contractual arrangements impacting sale.</p> <p>2.3 Determine business attributes, goodwill and financial position.</p> <p>2.4 Record vendor requirements and factors impacting sale according to agency requirements.</p>
3. Complete documentation for listing.	<p>3.1 Explain listing and sales process to vendor and seek additional information to ensure mutual and comprehensive understanding of vendor and agency requirements.</p> <p>3.2 Prepare and execute documentation for business listing according to legislative requirements.</p> <p>3.3 Retain vendor records and documentation according to agency requirements.</p>
4. Set up vendor communication processes.	<p>4.1 Plan communication methods and timeframes for providing feedback on sales process in consultation with vendor.</p> <p>4.2 Record and apply vendor communication processes according to agency requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- reading skills to interpret agency documents that include legal terminology
- numeracy skills to calculate the goodwill of businesses
- technology skills to access and use agency databases when prospecting for vendors.

## Unit Mapping Information

No equivalent unit.

New unit of competency.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP4262 Establish vendor relationships in business broking

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must:

- develop and implement one prospecting plan with timeframes and activities to attract potential vendors
- establish vendor relationships and complete documentation for two different business listings.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- required documentation to be prepared and executed for business listing and sale
- communication processes to provide vendors with feedback on the sales process
- factors that can impact the sale of a business and strategies for addressing each:
  - business structure
  - business ownership
  - contractual arrangements
  - attributes
  - goodwill
  - financial position
- legislation relating to the listing and sale of businesses in the state or territory of operation
- listing and sales processes used in business broking
- prospecting purpose and methods used in real estate to attract business listings
- ethical standards, regulatory requirements and role of agents when managing vendor–agency relationships
- scope of agency business broking services.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- materials and equipment meeting the operational requirements for a real estate agency:
  - policies, procedures and documentation for establishing vendor relationships in business broking including listing agreements
  - legislation in the state or territory of operation relating to the sale of businesses
  - equipment, communication and data access and storage technology required to develop, manage and monitor vendor relationships in business broking
- potential vendors for the sale of two different businesses.

# Assessment Requirements for CPPREP4263 Manage buyer relationships in business broking

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must identify and assist at least 2 buyers, in two separate occasions, in the purchase of a business.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- required documentation to be completed when interacting with buyers
- business structures and features that can impact sale
- legislation relating to the sale of businesses in the state or territory of operation
- legal and ethical responsibilities of real estate agents when managing buyer relationships in business broking
- methods for presenting businesses to potential buyers
- methods of buyer enquiry in business broking
- role of the real estate agent in establishing and maintaining buyer relationships for the sale of businesses
- strategies to match buyer needs and preferences to listed business
- techniques to manage conflict between buyers and vendors in business broking.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- materials and equipment meeting the operational requirements for a real estate agency:

- policies, procedures and documentation for managing buyer relationships in business broking
- legislation in the state or territory of operation relating to the sale of businesses
- equipment, communication and data access and storage technology required to develop, manage and monitor buyer relationships in business broking
- buyers for two different business listings.

## CPPREP4264 Manage the sales process in business broking

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4053A List business for sale and CPPDSM4069A Promote and market listed business.

Merged to reduce duplication. Updated to the Standards for Training Packages.

### Application

This unit specifies the skills and knowledge required to manage the business sales process while maintaining vendor privacy and confidentiality.

It includes negotiating the terms and conditions of sale, organising the execution of sales documentation, and monitoring contracts through to settlement.

It also involves administering and securing deposits and agreements and resolving issues to ensure the successful conclusion of the sale.

The unit applies to industry professionals in real estate.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Negotiate requirements and complete sale of business.	1.1 Maintain communication with vendor and during the sales process. 1.2 Identify and resolve issues that may impact the successful

	<p>conclusion of the sale.</p> <p>1.3 Negotiate price, terms and conditions of sale of business.</p> <p>1.4 Negotiate conflict or deadlocks and confirm terms with parties to the sale.</p> <p>1.5 Administer and secure deposit according to legislative requirements.</p>
2. Organise execution of documentation for sale of business.	<p>2.1 Provide disclosure documentation according legislative requirements.</p> <p>2.2 Prepare sales documentation according to agency requirements.</p> <p>2.3 Arrange completion of sales documentation by all parties to the sale.</p> <p>2.4 Facilitate engagement of legal advisor according to type of sale and complete pre-settlement processes according to legislative requirements.</p>
3. Monitor contract settlement.	<p>3.1 Monitor progress of contract and adherence to conditions of sale according to agency requirements.</p> <p>3.2 Maintain communication with all parties to the sale to facilitate contract settlement.</p> <p>3.3 Confirm settlement has concluded and complete post-settlement processes.</p>
4. Review and complete post-sale processes.	<p>4.1 Evaluate vendor and buyer satisfaction to establish future business opportunities.</p> <p>4.2 Update databases to inform future prospecting activities.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- writing skills to complete agency documentation for the sale of businesses
- reading skills to interpret agreements and contracts for the sale of businesses
- numeracy skills to calculate terms of sale and deposits.

## Unit Mapping Information

No equivalent unit.

Supersedes but is not equivalent to:

- CPPDSM4053A List business for sale

- CPPDSM4069A Promote and market listed business.

# Assessment Requirements for CPPREP4301 Confirm and market livestock for sale

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is not equivalent to CPPDSM4068A Prepare livestock for sale at saleyards and CPPDSM4075A Select livestock for sale.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must plan to and sell livestock on two different occasions using two of the methods below:

- private treaty
- auction
- sale yards
- on farm.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- livestock
  - breed, age, sex, condition, classes, weights, pregnancy status
- livestock selling methods:
  - private treaty
  - auction
  - sale yards
  - on farm
- sale price and conditions:
  - price per head
  - price per kilo dress weight
  - price per kilo live weight
  - sale to abattoir
  - live export
  - feedlots

- livestock transportation
- livestock welfare
- assessment of livestock
- quarantine
- curfews
- prescribed documentation in the state or territory of operation
- legislation and regulations in the state or territory of operation
- livestock inspection requirements
- procedures for identifying and verifying ownership of livestock
- encumbrances on livestock:
  - livestock mortgages
  - bills of sale
  - agent's fees
  - overdrafts
  - removal of encumbrances
- pre- and post-saleyard procedures
- role of the agent in providing livestock sale services
- risks and risk management strategies associated with sale of livestock
- ethical practices associated with sale of livestock
- agency forms and documentation required for sale of livestock
- agency livestock records
- processes to determine price range expectations for livestock
- market indicators for livestock value.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- livestock records and databases
- sources of information about livestock condition and ownership
- market indicator information
- procedures, forms and documents for sale of livestock
- details of at least two lots of livestock for sale by two different methods of sale

# Assessment Requirements for CPPREP4303 Establish vendor and buyer relationships in livestock sale

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4024A Advise clients on livestock sale and purchase options.

Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must:

- develop, document and implement a plan for prospecting for vendors and buyers including:
  - analysing prospecting methods for a target market
  - identifying methods that would incorporate establishing a relationship with vendors and buyers
- document buyer preferences for purchase of livestock
- prepare and complete livestock sale documentation according to legislative requirements.
- develop and implement a communication strategy for buyers and vendors to address client needs and expectations.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- prospecting purpose and methods
- agency and personal brand
- strategies for attracting vendors and buyers
- processes for livestock sales
- livestock selling methods
- techniques for establishing and maintaining agency–client relationships
- vendor and buyer expectations and preferences for:
  - method of sale
  - timeframe for sale
  - marketing

- communications
- role of the agent in selling livestock
- ethical standards and regulatory requirements associated with selling livestock including animal welfare
- privacy standards and confidentiality of client data
- agency practices in relation to marketing and communication
- documents and record keeping required as part selling livestock
- agency fees, charges, and conditions
- legislation and local government regulations relating to selling livestock in the state or territory of operation
- communication strategies for responding to client complaints.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- real estate livestock sales procedures, forms and documents
- legislation and local government regulations relating to selling livestock in the state or territory of operation.

# Assessment Requirements for CPPREP4304 Complete sales process - livestock

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must document and implement a strategy to negotiate and finalise the sale of livestock on two different occasions using two of the methods below:

- private treaty
- auction
- sale yards
- on farm.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- livestock:
  - breed, age, sex, condition, classes, weights, pregnancy status
- livestock selling methods:
  - private treaty
  - auction
  - sale yards
  - on farm
- sale price and conditions:
  - price per head
  - price per kilo dress weight
  - price per kilo live weight
  - sale to abattoir
  - live export
  - feedlots
- livestock transportation

- livestock welfare
- assessment of livestock
- quarantine
- curfews
- prescribed documentation in the state or territory of operation
- legislation and regulations in the state or territory of operation
- livestock inspection requirements
- procedures for identifying and verifying ownership of livestock
- encumbrances on livestock:
  - livestock mortgages
  - bills of sale
  - agent's fees
  - overdrafts
  - removal of encumbrances
- pre- and post-saleyard procedures
- role of the agent in providing livestock sale services
- ethical practices associated with the sale of livestock
- required forms and documentation for the sale of livestock
- agency livestock records
- processes to determine price range expectations for livestock
- market indicators for livestock value
- communication strategies for responding to client complaints.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- livestock records and databases
- sources of information about livestock condition and ownership
- procedures and forms/documents for sale of livestock
- details of at least two lots of livestock for sale by two different methods of sale.
-

# Assessment Requirements for CPPREP4501 Prepare to complete the sales process - off the plan properties

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must prepare information packs for two off the plan properties in different developments for use by an agency to facilitate sale of the properties.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation and local government regulations relevant to the sales process for off the plan properties in real estate
- disclosure requirements relevant to off the plan properties, including material facts
- ethical standards and regulatory requirements relating to off the plan properties
- unit entitlements and by-laws for strata property
- protocols to follow when preparing information for off the plan properties
- buyer expectations:
  - comprehensive information about proposed building
  - method of sale and payments
  - sales timeframe
  - contract conditions, including penalty clauses and input to finishes and appliances.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- full documentation for two off the plan properties in different developments to allow for creation of comprehensive information packs
- role descriptions and information for people participating in role-play exercises
- equipment and information required to prepare documentation in a real estate agency.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP4502 Support providers of social and community housing

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must prepare and implement a management strategy for a social housing property to support providers of social and community housing by:

- reviewing one agreement with a social or community housing provider
- developing and implementing one plan to manage social or community housing property and community housing tenancies
- developing and implementing one plan for maintaining relationships with housing provider and support agencies.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation and local government regulations relevant to management of property and tenancies in social and community housing, in particular legislation regarding smoke alarms in individual, group and shared housing contexts
- types of social and community housing providers
- types of social and community housing
- scope and processes for managing social and community housing properties
  - maintenance
  - repairs
  - security
- scope and processes for managing social and community tenancies
- processes for identifying and meeting the needs of tenants in social and community housing
- processes and techniques for working effectively and collaboratively with social or community housing providers and support workers.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- sufficient documentation of a social or community property and tenancies to allow for preparation of required documents
- role descriptions and information for people participating in role-play exercises
- equipment required to prepare documentation in a real estate agency.

## CPPREP4503 Present at hearings in real estate

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM4020 Present at tribunals.

Updated to meet industry currency.

### Application

This unit specifies the skills and knowledge required to appear effectively before a hearing.

It includes preparing for hearings, using hearing etiquette, participating in conciliation hearings and presenting a case to a hearing.

The unit applies to industry professionals acting on behalf of principals in real estate.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Prepare case for hearing.	1.1 Examine the process for making an application for a hearing. 1.2 Access and interpret decisions and precedents relevant to the matter to be heard. 1.3 Prepare and analyse evidence and other documentation required for the hearing. 1.4 Seek advice from appropriate professionals to assist in preparing for the hearing.

	<p>1.5 Determine the need for expert witnesses and explain their role in the hearing.</p> <p>1.6 Participate in pre-hearing briefings.</p>
2. Prepare documents and coordinate attendees for hearing.	<p>2.1 Complete documentation required for application accurately.</p> <p>2.2 Prepare documents for presentation to hearing.</p> <p>2.3 On receipt of hearing details, coordinate documents and attendees.</p>
3. Participate in conciliation process.	<p>3.1 Determine purpose and role of conciliation in the hearing process.</p> <p>3.2 Explore opportunities to resolve the matter through conciliation.</p> <p>3.3 Disclose documented evidence to be used in the hearing.</p> <p>3.4 Assess offers of conciliation against the likely outcome of continuing with the hearing.</p> <p>3.5 Record relevant information during the conciliation process.</p>
4. Use hearing etiquette.	<p>4.1 Use appropriate protocols for entering, participating in and leaving the hearing.</p> <p>4.2 Use appropriate manner and relevant language when addressing the hearing.</p>
5. Present case at hearing.	<p>5.1 Apply hearing rules and procedures.</p> <p>5.2 Outline the case clearly and concisely.</p> <p>5.3 Respond appropriately to submissions from respondents.</p> <p>5.4 Respond appropriately to hearing questions and directions.</p>
6. Complete hearing processes.	<p>6.1 Request statement of reasons for hearing decision.</p> <p>6.2 Notify and explain hearing outcome to interested parties.</p> <p>6.3 Complete documentation and reports, and store according to agency practise.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- planning, organising and scheduling skills to prepare for and participate in conciliation and hearings

- oral communication skills to clarify procedures and respond to questions in conciliation and hearing processes.

## **Unit Mapping Information**

Supersedes and is equivalent to CPPDSM4020 Present at tribunals.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP4503 Present at hearings in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM4020 Present at tribunals.

Updated to meet industry currency.

## Performance Evidence

To demonstrate competency in this unit, a person must prepare and present one case for a simulated conciliation session and one case for a simulated hearing in real estate.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation, and local government regulations relevant to presenting at hearings in real estate
- disclosure requirements relevant to presenting at hearings in real estate
- ethical standards relating to presenting at hearings in real estate
- protocols to follow when presenting at hearings in real estate
- purpose and role of conciliation in the real estate industry
- role and jurisdiction of hearings of matters relating to property operations
- key features of the rules of evidence
- powers and role of property-related hearings
- hearing procedures and requirements
  - documentation required for applications to hearings
  - procedure to be followed for presenting a case to a hearing
  - procedure to be followed where a matter has been settled prior to hearing
  - process for making an application to a hearing
  - role of expert witnesses
- hearing etiquette.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- detailed scenario and associated documentation for a complex real estate matter that is sufficient to provide a realistic simulation of a conciliation process and a hearing
- relevant policies, procedures and associated documentation meeting the full industry standard for a mid-size real estate agency
- role descriptions for people participating in role-play exercises
- equipment, communication and data access and storage technology required for research and documentation.
-

## CPPREP4504 Deliver presentations to clients in real estate

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4018A Prepare and present property reports.

Updated to the Standards for Training Packages.

### Application

This unit specifies the skills and knowledge required to present information to clients in real estate in a planned, structured and professional manner.

The unit applies to industry professionals acting on behalf of principals in real estate.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Prepare a presentation	1.1 Establish presentation purpose. 1.2 Identify audience characteristics for the presentation. 1.3 Select presentation techniques to match audience characteristics, presentation purpose and required outcomes. 1.4 Select format and equipment for presentation according to audience characteristics. 1.5 Research and prepare information and materials to support

	<p>presentation.</p> <p>1.6 Prepare presentation and plan timing to meet time constraints.</p> <p>1.7 Prepare strategy to collect client feedback and responses.</p>
2. Conduct presentation.	<p>2.1 Use techniques, materials and equipment to present information.</p> <p>2.2 Present information clearly and sequentially following planned timings.</p> <p>2.3 Respond to audience questions.</p> <p>2.4 Summarise key concepts and conclude presentation.</p>
3. Review presentation.	<p>3.1 Analyse and discuss feedback and responses to review effectiveness of presentation.</p> <p>3.2 Use review outcomes to make notes about improvements to presentation content, techniques and delivery.</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

Supersedes but is not equivalent to CPPDSM4018A Prepare and present property reports.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP4504 Deliver presentations to clients in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4018A Prepare and present property reports.

Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must prepare and deliver two separate presentations for real estate clients. They must also complete a review of their presentation to identify future areas of improvement.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation and local government regulations relevant to the content of delivering presentations to clients in real estate
- ethical practice in real estate
- techniques to:
  - profile potential audience characteristics
  - select presentation techniques and technology appropriate to audience characteristics
  - select content to address audience characteristics and requirements
  - plan timing of presentations
  - select and use equipment, graphics, audio and materials to support effective delivery of content
  - use effective communication to deliver the presentation
  - gather and collate feedback to support review and improvements to the presentation.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- information to be presented to a group of clients
- role descriptions and information for people participating in role-play exercises
- equipment required to prepare presentations.

## CPPREP4505 Value goods, chattels, plant and equipment

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM4033A Assess and value goods, chattels, plant and equipment.

Updated to the Standards for Training Packages.

### Application

This unit specifies the skills and knowledge required to value goods, chattels, plant and equipment.

It includes obtaining valuation instructions from the client, conducting research and inspection activities to support the valuation, applying appropriate methodologies to assess value, and presenting a documented valuation report to the client.

The unit applies to industry professionals in real estate.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Obtain, interpret and confirm instructions.	<p>1.1 Confirm client requirements and instructions for the valuation of goods, chattels, plant and equipment according to legislative requirements.</p> <p>1.2 Discuss agency requirements and processes for the valuation of goods, chattels, plant and equipment with client.</p>

	<p>1.3 Confirm status and ownership of goods, chattels, plant and equipment offered for valuation.</p> <p>1.4 Obtain written agreement to proceed with valuation according to legislation in the state or territory of operation.</p>
2. Conduct research to support valuation.	<p>2.1 Analyse documents, reports and historical financial records for goods, chattels, plant and equipment offered for valuation.</p> <p>2.2 Analyse information to confirm history of goods and chattels and maintenance history of plant and equipment.</p> <p>2.3 Analyse advice and preliminary market evidence of value and replacement costs of goods, chattels, plant and equipment.</p> <p>2.4 Confirm safety and legal compliance of goods, chattels, plant and equipment according to legislative requirements.</p>
3. Inspect goods, chattels, plant and equipment.	<p>3.1 Arrange inspection of goods, chattels, plant and equipment in consultation with client.</p> <p>3.2 Confirm identity of goods, chattels, plant and equipment offered for valuation according to with client instructions.</p> <p>3.3 Conduct visual inspection of goods, chattels, plant and equipment to gather additional information to support valuation.</p> <p>3.4 Record inspection details and compile field notes.</p>
4. Apply valuation methodology.	<p>4.1 Obtain and analyse cost and market information for goods, chattels, plant and equipment.</p> <p>4.2 Select and apply valuation methodology suitable to the types of goods, chattels, plant and equipment considering data compiled from research and inspection activities.</p> <p>4.3 Verify accuracy and reliability of collated data and seek additional information required to confirm valuation.</p> <p>4.4 Assess value of goods, chattels, plant and equipment according to client instructions.</p>
5. Complete valuation and present to client.	<p>5.1 Analyse valuation findings to ascertain final valuation, and record according to agency requirements and client instructions.</p> <p>5.2 Prepare valuation report in an acceptable format highlighting findings and rationale.</p> <p>5.3 Present report to client.</p> <p>5.4 Securely maintain records and documentation according to agency requirements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- numeracy skills to calculate market value of goods, chattels, plant and equipment
- technology skills to use the internet and databases to access market information.

## Unit Mapping Information

Supersedes and is equivalent to CPPDSM4033A Assess and value goods, chattels, plant and equipment.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP4505 Value goods, chattels, plant and equipment

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM4033A Assess and value goods, chattels, plant and equipment.

Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must prepare two valuation reports using different valuation methodologies.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- legislation and regulations governing the valuation of goods, chattels, plant and equipment in the state or territory of operation
- required documentation to be completed and maintained when valuing goods, chattels, plant and equipment
- valuation methodologies suitable for valuing goods, chattels, plant and equipment:
- basic accounting principles and techniques for checking historical accounting records, cost and market information for goods, chattels, plant and equipment
- ethical standards, regulatory requirements and role of agents in valuing goods, chattels, plant and equipment
- types of goods and chattels that may be offered for valuation
- types of plant and equipment that may be offered for valuation
- valuation processes for goods, chattels, plant and equipment:
  - content and format of valuation reports
  - information required to be gathered and analysed to support valuation
  - key sources of information for obtaining history and market evidence
  - risk management strategies.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- range of goods, chattels, plant and equipment for valuation
- materials and equipment that meet the operational requirements for a real estate agency and support the valuation of goods, chattels, plant and equipment:
  - policies, procedures and documentation
  - relevant legislation in the state or territory of operation
  - equipment, communication and data access and storage technology required to conduct research and prepare reports
- client briefs and financial and performance information to support the valuation of goods, chattels, plant and equipment.

## CPPREP4506 Manage offsite and lone worker safety in real estate

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

### Application

This unit specifies the skills and knowledge required to establish, maintain and evaluate real estate agency safety controls for offsite and lone workers.

The unit applies to industry professionals in real estate.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Develop safety controls.	1.1 Review existing safety controls for staff when travelling, working offsite and working alone in the agency. 1.2 Conduct safety risk assessments and develop safety controls for when travelling, working offsite and working alone in the agency. 1.3 Define the roles and responsibilities for all staff in maintaining their own safety and that of others. 1.4 Develop and document protocols for responding to safety incidents according to legislative requirements.

	1.5 Examine policies and procedures to control risks.
2. Implement safety controls.	2.1 Develop and document implementation strategy for safety controls. 2.2 Facilitate implementation of safety controls and explain roles and responsibilities of all staff.
3. Review safety controls.	3.1 Plan and implement processes for monitoring the effectiveness of safety controls. 3.2 Create and monitor staff feedback system for safety controls. 3.3 Analyse and implement existing processes for controlling emerging risks, or develop processes as required.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

New unit of competency.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP4506 Manage offsite and lone worker safety in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must develop, implement, monitor and review essential offsite and lone worker safety controls for a real estate agency.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation and local government regulations relevant to offsite and lone worker safety
- ethical standards in real estate relevant to offsite and lone worker safety
- application of the hierarchy of risk control for offsite and lone worker safety
- principles and techniques for:
  - applying the hierarchy of risk control
  - conducting safety risk assessments and developing safety controls
  - defining roles and responsibilities in implementing safety controls
  - developing policies and procedures to control risks to safety
  - developing implementation strategies for safety controls
  - developing and implementing a staff feedback system for safety controls
  - reviewing safety controls.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- documents for a real estate agency to allow risk assessment of working offsite and working alone
- role descriptions for people participating in role-play exercises
- equipment, communication and data access and storage technology.

# CPPREP4507 Provide property sustainability information in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Application

This unit specifies the skills and knowledge required to access, interpret, prepare and provide property sustainability information in the real estate industry.

The unit applies to industry professionals in real estate.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Collect property sustainability information.	<p>1.1 Analyse information about thermal performance, energy rating, energy efficiency and home sustainability requirements and assessments according to legislative requirements.</p> <p>1.2 Analyse thermal performance, energy rating, energy efficiency and home sustainability assessment reports relating to the property and list characteristics that enhance sustainability.</p> <p>1.3 Appraise property and consult with property owner to identify characteristics that enhance energy efficiency.</p>
2. Prepare sustainability	2.1 Collate characteristics that impact on sustainability for residents, property and the environment.

information.	2.2 Document sustainability features and benefits for inclusion in marketing materials according to legislative requirements.
3. Present property sustainability information.	3.1 Discuss features and benefits of property sustainability with clients. 3.2 Disclose all available information relating to property sustainability performance and refer to specialists for further advice.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

New unit of competency.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPPREP4507 Provide property sustainability information in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must research and prepare information on the sustainability features of two properties. This information must illustrate how each property's features benefit the client and the environment.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation and local government regulations relating to preparing and providing property sustainability information in real estate
- disclosure requirements relating to preparing and providing property sustainability information in real estate
- ethical standards relating to preparing and providing property sustainability information in real estate
- processes for:
  - analysing sustainability reports to list the characteristics of a building
  - appraising properties and consulting with the property owner to list property characteristics
  - collating lists of existing property characteristics and opportunities for enhancing thermal performance, energy efficiency, sustainability and lessening impacts on the environment
  - analysing property characteristics that enhance sustainability to document their features and benefits, and to select features and benefits that might enhance property marketability
  - researching and collating information about government sustainability support programs
  - documenting property sustainability information
  - disclosing all property sustainability information relating to performance and referring clients to specialists for further advice

- characteristics of buildings that enhance thermal performance
- jurisdictional energy rating programs and the characteristics of each of the ratings
- characteristics of properties that enhance thermal performance
- characteristics that impact on the energy efficiency of properties
- characteristics that impact on the sustainability and environmental impact of properties:
  - orientation and insulation of buildings
  - energy sources
  - energy generation
  - potable water, grey water and black water systems
  - waste disposal systems
- jurisdictional programs providing support for enhancing the sustainability and environmental impact of properties.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- business documentation relating to preparing and providing property sustainability information
- documentation relating to thermal performance, energy rating, energy efficiency and home sustainability assessment reports
- materials and equipment meeting the operational requirements for a mid-size real estate agency, including:
  - role descriptions for people participating in role-play exercises
  - equipment, communication and data access and storage technology required for researching and documenting property sustainability information.

# CPPREP4508 Conduct livestock auction

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM4039A Conduct livestock sale by auction.

Updated to the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to conduct an auction of livestock.

It includes accessing, interpreting and applying written instructions for the auction, calling an auction and completing the auction process.

This unit applies to people currently working in or seeking to work in the real estate stock and station sector.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Confirm auction terms, conditions and presentation.

1.1 Confirm suitability of auction site and display of required auction advice and documentation according to legislative requirements.

1.2 Confirm suitability and operation of auction equipment.

- 1.3 Confirm availability and suitability of auction documentation, including instructions, authorities, contracts, reserve price and vendor bids.
    - 1.4 Confirm number of registered bidders, online bidding and bidding by authority.
    - 1.5 Confirm staff are available to facilitate the conduct of the auction.
- 2 Open auction.
  - 2.1 Read out terms and conditions of sale by auction according to legislative requirements.
  - 2.2 Identify livestock and vendor for each sales lot.
  - 2.3 Describe livestock, consistent with description available to public.
  - 2.4 Respond to questions from potential bidders and other parties.
  - 2.5 Submit livestock for sale by auction and call for opening bids.
- 3 Manage auction to maintain flow.
  - 3.1 Monitor bids and maintain auction process to achieve reserve or best price for each lot, including bidding increments and maintaining bidding momentum.
  - 3.2 Manage bidding process, according to legislative requirements.
  - 3.3 Exercise trial close strategy for each lot.
- 4 Complete auction.
  - 4.1 Signify close of auction for each lot using appropriate methods.
  - 4.2 Knock down livestock lot to successful bidder once reserve price has been met and all other bids exhausted.
  - 4.3 Record sale details to maintain sales register and National Livestock Identification System (NLIS) details.
  - 4.4 Pass in livestock lot when reserve price is not met and all bids exhausted.

- 4.5 Deliver records of auction transactions to agency to support timely preparation of financial records and completion of livestock sale.
- 4.6 Obtain feedback on conduct and outcome of auction.

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Unit Mapping Information**

Supersedes and is equivalent to CPPDSM4039A Conduct livestock sale by auction.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP4508 Conduct livestock auction

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM4039A Conduct livestock sale by auction.

Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must:

- call one auction, including:
  - opening
  - managing bids
  - closing
- prepare two reports for the following auction scenarios:
  - livestock passed in
  - livestock sold
- develop a report assessing personal performance for the auction conducted; the report must identify personal strengths and opportunities for improvement.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- auctioneer role, responsibilities and risks
- reserve price:
  - definition
  - purpose
  - setting
- auction instructions and auction day procedures
- auction documentation
- auction aids and equipment
- staff required to support livestock auction
- preparation of auction area:

- access
- identification of hazards
- assessment of risks
- implementation of risk controls
- auction process:
  - stating rules and conditions of auction according to state or territory legislation
  - calling for bids:
    - disruptive bidders
    - potential collusive bidding practices
    - disputed bidding
    - retracted bids
  - closing bids including:
    - final call
    - fall of hammer
    - closing script
  - confirming or renegotiating reserve with seller as appropriate
  - describing livestock condition
  - identifying key features of contract
  - knocking down or passing in livestock as appropriate
  - use vendor bidding as appropriate according to legislative requirements.
- capacity of bidders
- negotiation techniques
- legislation related to sale of livestock by auction in the state or territory of operation
- penalties for breach of auction legislation
- risks to clients, agency and self from auction activities
- ethical practice in auctioneering including:
  - communication
  - neutrality in the auction process
  - ethical management of the bidding process
- livestock:
  - breed, age, sex, condition, classes, weights, pregnancy status
- sale price and conditions:
  - price per head
  - price per kilo dress weight
  - price per kilo live weight
  - sale to abattoir
  - live export
  - feedlots
- livestock transportation
- livestock welfare

- assessment of livestock
- quarantine
- curfews
- prescribed documentation in state or territory of operation including National Livestock Identification System (NLIS) and National Vendor Declaration (NVD)
- risks and risk management strategies associated with preparing for sale of livestock
- agency livestock records and processes to update details
- communication strategies for responding to client complaints.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- auction scenarios, auction advice, auction plan
- auction catalogue and description of livestock
- bidders for livestock
- sources of information about livestock condition and ownership
- sources of information on NLIS, NVD
- legislation relating to sale of livestock by auction in the state or territory of operation.

# CPPREP4509 Auction goods, chattels or equipment

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM4038A Conduct goods, chattels or equipment clearing sale or auction.

Updated to the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to prepare and conduct an auction of goods, chattels or equipment, including a clearing sale.

It includes preparing, conducting and completing the auction or clearing sale.

This unit applies to industry professionals in real estate.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare for auction.

1.1 Prepare auction and sale documentation according to agency practice and legislative requirements.

1.2 Prepare and communicate instructions to assisting professionals and ensure auction documentation is available prior to auction date.

- 1.3 Prepare inventory of reserve and non-reserve items, including pricing requirements, according to agency practice.
  - 1.4 Establish and document ownership of goods, chattels and equipment to be sold to enable clear title to be passed to buyers according to agency practice and legislative requirements.
  - 1.5 Present goods, chattels and equipment to public using marketing materials agreed by seller to create product image.
  - 1.6 Book and confirm staff and resources for auction day.
- 2 Implement auction day processes.
- 2.1 Confirm suitability of auction site and display of required auction advice and documentation according to legislative requirements.
  - 2.2 Confirm suitability and operation of auction equipment.
  - 2.3 Implement bidder security systems to eliminate theft and non-payment.
  - 2.4 Confirm availability and suitability of auction documentation, including instructions, authorities, contracts, reserve price and vendor bids.
  - 2.5 Confirm number of registered bidders, online bidding and bidding by authority.
  - 2.6 Confirm staff are available to support the auction.
  - 2.7 Present pre-auction offers from buyers to seller.
- 3 Open auction.
- 3.1 Read out terms and conditions of sale according to legislative requirements.
  - 3.2 Describe goods, chattels and equipment, consistent with description available to public.
  - 3.3 Respond to questions from potential bidders and other parties.
  - 3.4 Submit goods, chattels and equipment for sale to solicit bids.

- |   |                                  |     |  |
|---|----------------------------------|-----|--|
| 4 | Manage auction to maintain flow. | 4.1 | Monitor bids and maintain auction process to achieve reserve or best price for each lot.                                     |
|   |                                  | 4.2 | Manage bidding process according to legislative requirements.  |

## CPPREP4510 Manage short-term or holiday letting

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

### Application

This unit specifies the skills and knowledge required to manage short-term or holiday letting where a residential tenancy agreement is not required.

It includes managing bookings, maintaining premises and processing funds for deposit, accommodation, cancellations and miscellaneous charges, with a focus on providing professional guest service and satisfaction.

This unit applies to industry professionals in real estate.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Market property for short-term letting.	1.1	Identify and document property features.
		1.2	Identify and document rates for short-term letting based on seasonal factors, minimum stay and owner instructions.
		1.3	Prepare marketing and communication materials based on property features and owner instructions.

- 1.4 Confirm property marketing plan with owner, including budget, fees and charges.
    - 1.5 Implement property marketing activities.
    - 1.6 Monitor effectiveness of property marketing activities and communicate recommendations for changes to marketing plan to owner.
- 2 Manage bookings.
  - 2.1 Coordinate bookings via all booking platforms and record in booking system.
  - 2.2 Identify and resolve conflict of booking dates or double bookings.
  - 2.3 Manage deposits and provide cancellation and refund information.
  - 2.4 Provide accurate information to potential guests about property features, facilities and local area.
- 3 Manage guest stay.
  - 3.1 Manage reception, check in, property access and support services.
  - 3.2 Manage guest payments.
  - 3.3 Receive and respond to special requests from guests.
  - 3.4 Manage housekeeping services, cleaning and inventory maintenance.
  - 3.5 Manage resolution of complaints and guest dissatisfaction.
  - 3.6 Follow check out procedures.
  - 3.7 Survey guest experience.
  - 3.8 Monitor and respond to guest comments and feedback on property.
- 4 Manage property condition.
  - 4.1 Conduct and record property inspection.
  - 4.2 Respond to issues with property condition arising from

- guest stay.
- 4.3 Identify and document repairs required to property.
  - 4.4 Communicate repair requirements with owner and obtain instructions.
  - 4.5 Organise and manage repairs based on owner instructions, quotes obtained and specified standards.
- 5 Provide property reports.
- 5.1 Produce reports for owner including occupancy/vacancy rates, income and expenses.
  - 5.2 Identify opportunities for improvements to property or marketing to achieve optimum occupancy rates.
  - 5.3 Communicate reports, including opportunities for improvement, to owner and take instructions for additional agency services.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

New unit of competency.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP4510 Manage short-term or holiday letting

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must manage short-term and holiday letting of two properties.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- state or territory legislation and local government regulations relevant to the holiday letting of residential property
- roles and responsibilities of agency and of owner in providing property for holiday letting
- seasonal factors effecting property availability, occupancy and rates
- processes to:
  - market property
  - confirm bookings with guests
  - confirm deposit and payment terms and conditions including cancellations and refunds
  - check in and check out guests
  - coordinate property inspections, housekeeping and inventory maintenance
  - respond to guest feedback, including via online forums
  - report to owner about property occupancy and finances
- letting documentation
- staff or contractors required to support housekeeping and inventory maintenance
- ethical practice, including disclosure of property features
- property security features
- communication strategies for responding to client complaints.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- agreements between owner and agency for property short-term letting including agreed rates
- details of property for short-term letting including property features
- marketing and communication strategies for short-term property letting
- agency forms, procedures and documents for preparing reports about short-term letting performance
- legislation relating to short-term letting of residential property in the state or territory of operation.

## CPPREP5001 Manage compliance in the property industry

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM5009 Coordinate risk management systems in the property industry.

Updated to meet industry currency.

### Application

This unit specifies the skills and knowledge required to analyse, develop, implement, manage and evaluate compliance in the property industry.

The unit applies to industry professionals in property.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Determine compliance management requirements.	<p>1.1 Identify all jurisdictional legislation, regulations, codes of conduct and ethics to which the agency must comply.</p> <p>1.2 Analyse and document the requirements for the agency to meet compliance needs.</p> <p>1.3 Conduct risk analysis for compliance and best practice to determine risk ratings and risk mitigation.</p> <p>1.4 Determine and plan risk mitigation strategies through development of policies, procedures, work instructions, management</p>

	and supervisory structures.
2. Develop and risk control strategies that manage compliance.	<p>2.1 Develop strategies and associated policies, procedures and structures to support agency compliance.</p> <p>2.2 Develop processes and controls to maintain records that demonstrate compliance and best practice.</p> <p>2.3 Develop management structure and risk control strategies for monitoring and reviewing all compliance and best practice activities.</p>
3. Manage compliance systems.	<p>3.1 Clearly communicate to staff the best practice requirements for the agency.</p> <p>3.2 Facilitate continuous monitoring, reviewing and adjustment of agency compliance practices.</p> <p>3.3 Prepare periodic compliance reports to present a clear overview of compliance and agency best practice.</p>
4. Evaluate compliance systems.	<p>4.1 Analyse and review periodic compliance reports to evaluate agency overall compliance and best practice.</p> <p>4.2 Use evaluation data to determine, document and implement improvements to improve compliance systems.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- reading skills to interpret workplace documentation
- writing skills to accurately record information
- interpersonal and communication skills to collaborate with colleagues
- planning and organisational skills to set goals and evaluate options to inform decision making.

## Unit Mapping Information

No equivalent unit.

Supersedes but is not equivalent to CPPDSM5009 Coordinate risk management systems in the property industry.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP5001 Manage compliance in the property industry

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM5009 Coordinate risk management systems in the property industry.

Updated to meet industry currency.

## Performance Evidence

To demonstrate competency in this unit, a person must document a strategy to manage compliance in an agency by:

- analysing and determining compliance management for:
  - a minimum of two legislative requirements
  - two internal areas of best practice
- developing and implementing risk control strategies to manage compliance for each of the above legislative requirements and areas of best practice
- communicating ethics, standards, culture, compliance and best practice requirements to agency staff on two separate occasions
- managing the effectiveness and evaluation of compliance systems on two separate occasions, including continuous monitoring, reviewing and adjustment of agency and department compliance practices.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation and regulations relating to compliance in real estate
- property industry codes of conduct and ethics
- agency policies, procedures and standards
- industry and agency best practice and quality standards
- methods and tools for recording and reporting on compliance
- range of analysis techniques to interpret operational and feedback data relating to compliance

- compliance requirements relating to trust accounts
- processes for:
  - identifying financial, strategic, personal and reputational risks in the property industry
  - identifying risks to achieving best practice in the property industry
  - analysing and rating identified risks in terms of likelihood and consequences
  - preparing risk controls and risk mitigation strategies
  - incorporating risk controls and risk mitigation strategies in policies, procedures and business strategies in the property industry
- management and communication techniques for leading, mentoring and motivating teams in the property industry.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- materials and equipment meeting the operational requirements for a property agency:
  - business plans, strategies, policies and procedures relating to property industry compliance
  - records relating to all aspects of property industry compliance
  - position descriptions for employees, including detailed roles and responsibilities
  - legislation in the state or territory of operation relating to compliance
  - equipment required to prepare documentation and to manage processes and teams in a property agency.

# CPPREP5002 Establish and monitor property industry trust account management practices

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Application

This unit specifies the skills and knowledge required to establish and monitor management practices for property industry trust accounts.

It includes accessing, reading and interpreting regulatory controls for trust accounts in a property agency practice and establishing, monitoring and reviewing the application of agency controls for opening, operating, monitoring and closing trust accounts, including delegation of authority, security and data management.

The unit also includes the skills and knowledge to identify and control fraudulent practices that impact the trust account.

The unit applies to industry professionals in the property industry in control of an agency.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |   |     |  |
|---|---|-----|--|
| 1 | Interpret regulations for property agency trust accounts. | 1.1 | Identify property industry operations for which trust accounts are required. |
|   |   | 1.2 | Interpret relevant legislation regulating property agency trust accounts.    |

- 
- |   |  |     |  |
|---|--|-----|--|
|   |  | 1.3 | Identify and analyse suitable systems for property agency trust accounts to meet legislative requirements.                             |
|   |  | 1.4 | Identify and outline legislative requirements for opening and closing trust accounts.  |
| 2 | Develop risk management plans.                               | 2.1 | Identify and record risks associated with the operation of real estate trust accounts.   |
|   |  | 2.2 | Develop strategies to monitor and control risks associated with operating a trust account.   |
|   |  | 2.3 | Develop plan to evaluate effectiveness of controls.  |
|   |  | 2.4 | Identify and plan controls for fraudulent activities associated with real estate trust accounts.                                       |
| 3 | Implement systems to control property agency trust accounts. | 3.1 | Establish systems, policies, procedures, checklists and controls for property agency trust accounts.                                   |
|   |  | 3.2 | Establish documented systems for authorisation and delegation of trust account responsibilities according to legislative requirements. |
|   |  | 3.3 | Ensure trust account procedures and protocols are communicated to, and applied by, agency staff.                                       |
|   |  | 3.4 | Apply recognised bookkeeping principles to trust account management.   |
|   |  | 3.5 | Establish internal and external audit schedule.  |
|   |  | 3.6 | Review controls and security arrangements for trust accounts.  |
| 4 | Authorise and verify trust accounts.                         | 4.1 | Verify periodic reconciliation of compliance with legislative requirements.  |
|   |  | 4.2 | 4.2 Maintain records for convenience and proper auditing.  |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- technology skills to appraise computerised trust account systems and access information via the internet and databases within agency records management systems
- numeracy skills to calculate and confirm accuracy of trust account transactions, balances, reconciliations and records.

## Unit Mapping Information

No equivalent unit.

New unit of competency.

# Assessment Requirements for CPPREP5002 Establish and monitor property industry trust account management practices

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must research, develop, implement and document strategies to manage compliance of trust accounts including:

- research and analyse legislation and risks associated with property industry trust accounts.
- develop, implement and document a management plan to address risks associated with trust accounts
- develop, implement and document systems to establish, monitor and review trust account controls
- review one periodic reconciliation statement where the documentation falls short of procedural and legislative requirements and prepare a written report detailing:
  - each shortfall
  - relevant legislative requirement/s applying to each shortfall
  - how each shortfall should be remedied prior to the reconciliation statement being signed off.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- purpose and types of property industry trust accounts
- legislative and regulatory framework for real estate trust accounts in the state or territory of operation
- fiduciary duties and responsibilities for trust account management and associated legal compliance requirements
- risk management principles and application to property industry trust accounts including instances where account is overdrawn, compromised or discrepancies are identified.
- agency procedures to control integrity, security, confidentiality and privacy of trust accounts:
  - for both electronic and manual trust accounting systems

- protocols for authorisation of trust account transactions and delegation of authority
- account reconciliations and balances
- internal and external audit schedules
- procedures for access to trust account system
- recognised bookkeeping practices
- actions required when a trust account is overdrawn, compromised or a discrepancy is identified
- maintenance and retention of records for agency trust accounts, including data backup
- processes to open, close and amend property agency trust accounts.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- real estate trust account systems applicable to property agency transactions
- procedures and policies for property agency trust accounts
- legislation and standards applying to property agency trust accounts and transactions in the state or territory of operation.

## CPPREP5003 Manage ethical practice in the property industry

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

### Application

This unit specifies the skills and knowledge required to implement and manage ethical practice systems in a property agency.

The unit applies to industry professionals in the property industry.

State or territory licensing requirements may apply to this unit.

### Pre-requisite Unit

Nil

### Unit Sector

Real estate

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Determine ethical practice management requirements.	<p>1.1 Identify legislation, codes and principles relating to ethical practice in a property agency and their impact.</p> <p>1.2 Analyse and record ethical practice in interactions with clients.</p> <p>1.3 Conduct risk analysis of ethical practice requirements to determine risk ratings.</p>
2. Implement risk control strategies.	<p>2.1 Plan and implement policies, procedures, structures and risk mitigation strategies that enable an ethical practice culture.</p> <p>2.2 Implement processes to address breaches of ethical</p>

	<p>practice.</p> <p>2.3 Implement management structures to monitor ethical practice throughout the agency.</p>
3. Monitor ethical practice.	<p>3.1 Communicate clearly to staff, ethical best practice and consequences of unethical practice.</p> <p>3.2 Facilitate continuous monitoring, reviewing and adjustment of agency ethical practice.</p> <p>3.3 Collect and distribute information about ethical practice, breaches and impact on clients.</p>
4. Evaluate ethical practice systems.	<p>4.1 Analyse information about ethical practice and ethical breaches to evaluate agency achievement of ethical best practice.</p> <p>4.2 Use evaluation data to implement improvements to ethical best practice within the agency.</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

New unit of competency.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP5003 Manage ethical practice in the property industry

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must manage, monitor and evaluate ethical practices in a property agency. The person must analyse, determine and evaluate ethical practice management systems, including reporting processes, for a minimum of two areas of ethical best practice.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- impact of Commonwealth and state or territory legislation and regulations relating to ethical practice in the property industry
- property industry codes and principles of ethical practice
- property agency policies, procedures and standards
- industry best practice and quality standards
- methods and tools for recording and reporting on ethical practice in the property industry
- range of analysis techniques to interpret operational and feedback data relating to ethical practice
- processes for:
  - identifying personal and agency reputational risks in the property industry
  - identifying risks to achieving ethical best practice in the property industry
  - analysing and rating identified risks in terms of likelihood and consequences
  - preparing risk control and risk mitigation strategies
  - incorporating risk control and risk mitigation strategies into policies, procedures and business strategies in the property industry
- management and communication techniques for leading, mentoring and motivating teams in the property industry.
-

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- materials and equipment meeting the operational requirements for a property agency:
- policies, procedures and documentation relating to ethical practice in a property agency
- legislation in the state or territory of operation relating to ethical practice in the property industry
- equipment, communication and data access and storage technology required to prepare documentation and maintain records.

# Assessment Requirements for CPPREP5004 Manage a safe workplace in the property industry

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM5018 Ensure a safe workplace in the property industry.

Updated to meet industry currency.

## Performance Evidence

To demonstrate competency in this unit, a person must develop, implement and review a work health and safety (WHS) strategy in a property agency by.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation, and local government regulations related to managing a safe workplace in the property industry
- processes and content of WHS management systems in the property industry
- workforce characteristics and how they impact on the design and maintenance of WHS management systems
- hierarchy of control, that is, the preferred order of risk control measures from the most preferred to the least preferred:
  - eliminate hazards
  - substitute a hazard with something safer, isolate the hazard, reduce the risk through engineering controls
  - reduce hazard exposure using administrative actions, use personal protective equipment
- principles and practices of effective WHS management in a small, medium or large business
- principles and techniques associated with modelling safe work practices, hazard identification and risk management.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- materials and equipment meeting the operational requirements for a property agency, including:
  - business plans, strategies, policies, procedures and forms relating to WHS
  - comprehensive WHS information relating to the property industry
  - position descriptions for all employees, including detailed roles and responsibilities
  - equipment, communication and data access and storage technology required to develop, implement and review a WHS strategy in the property industry.

# Assessment Requirements for CPPREP5005 Manage teams in the property industry

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must identify and implement a range of strategies to manage at least two different types of departmental teams in a property agency.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation and local government regulations related to property agency operations
- agency policies and procedures
- agency quality standards
- range of analysis techniques to interpret operational and feedback data
- dynamics of effective teams
- management and communication techniques for leading, mentoring and motivating teams in the property industry
- processes for:
  - analysing, determining and documenting:
    - requirements for teams in real estate
    - key performance indicators (KPIs)
    - analysing, determining and documenting strategies for agency teams
  - establishing teams in the property industry
  - promoting effectiveness of teams in the property industry
  - directing teams in the property industry
- managing and evaluating performance of teams in the property industry.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- materials and equipment meeting the operational needs of an agency, including:
  - business plans, strategies, policies and procedures, forms and records
  - databases with records relating to team activities
  - position descriptions for employees, including detailed roles and responsibilities
  - equipment required to manage teams in a property agency.

# CPPREP5006 Manage operational finances in the property industry

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Application

This unit specifies the skills and knowledge required to manage and evaluate agency operational finances in the property industry.

The unit applies to industry professionals in the property industry.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Determine financial management requirements.	<p>1.1 Conduct risk analyses according to legislative requirements.</p> <p>1.2 Analyse and record processes for managing budgets, financial control systems and management requirements for the agency and departments.</p> <p>1.2 Analyse the standard financial records, reports and break-even analyses to develop key performance indicators (KPIs).</p> <p>1.3 Allocate resources to support attainment of department and agency KPIs.</p>

	<p>1.4 Interpret requirements and schedules for conducting financial reconciliations and producing formal reports for internal and external purposes.</p> <p>1.5 Determine legislative responsibilities and best practice of financial systems.</p>
2. Develop and implement strategies to manage operational finances.	<p>2.1 Design and implement strategies to establish and maintain link between individuals responsible for budgets and individuals operating financial control systems.</p> <p>2.2 Develop and implement financial controls and processes for preparation of valid records and reports.</p> <p>2.3 Implement strategies and adjust KPIs to ensure ongoing and accurate projections of income, expenditure and cash flow.</p>
3. Manage operational finance systems.	<p>3.1 Communicate to agency staff the standards, culture and business KPIs relating to financial management in the agency.</p> <p>3.2 Facilitate monitoring, reviewing and adjustment of agency and department financial practices.</p> <p>3.3 Manage and review allocation of resources.</p> <p>3.4 Manage the collation of periodic financial reports to provide a financial overview of the agency.</p>
4. Evaluate operational finance systems.	<p>4.1 Analyse periodic financial reports and use data to evaluate achievement of KPIs.</p> <p>4.2 Use evaluation data to determine, record and implement improvements.</p>

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- reading skills to interpret workplace documentation
- writing skills to accurately record information
- interpersonal and communication skills to collaborate with colleagues
- planning and organisational skills to set goals and evaluate options to inform decision making.

## Unit Mapping Information

No equivalent unit.

New unit of competency.

# Assessment Requirements for CPPREP5006 Manage operational finances in the property industry

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must develop, implement and evaluate a plan to manage the operational finances in a property agency.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation and local government regulations related to operational finances in the property industry
- legislative responsibilities related to operational finances in real estate:
  - Business Activity Reports
  - superannuation
  - taxation returns
  - records retention periods
  - reporting protocols
  - salaries and commissions
- agency policies, procedures and standards
- agency quality standards
- account-keeping practices
- methods and tools for recording and reporting on operational finances
- commission payment structures in the property industry
- range of analysis techniques to interpret operational and feedback data
- use of financial controls and reports in operational finances in real estate:
  - cash flow projections and forecasts
  - profit and loss reports
  - balance sheets (assets and liabilities)
  - break-even analyses

- fixed costs and variable costs analyses
- budgets
- cost controls
- reconciliation reports
- use of profit centres
- financial key performance indicators (KPIs)
- capital interest costs
- opportunity costs
- processes for:
  - managing risk
  - analysing, determining and documenting financial strategies for agency departments for inclusion in business planning
  - establishing financial control roles in the property industry
  - directing financial controls in the property industry
  - managing and evaluating financial performance in the property industry.
  -

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to materials and equipment meeting the operational requirements of a property agency, including:

- business plans, strategies, policies and procedures, forms and records
- financial records to enable realistic analysis and planning
- position descriptions for employees, including detailed roles and responsibilities
- equipment required to prepare documentation and to manage processes and teams in a property agency.

# Assessment Requirements for CPPREP5007 Develop a strategic business plan in the property industry

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM5012A Develop a strategic business plan in the real estate industry.

Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must develop and evaluate a three-year strategic business plan for a property agency.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation and local government regulations impacting on agency business planning
- reasons for, and benefits of, business planning
- ethical considerations in property agency business planning
- sources of information about the property market and business environment
- processes for:
  - collating and analysing information about the property market and business environment
  - determining the financial viability of opportunities
  - conducting and applying break-even analyses
  - estimating demand for services in:
    - property management
    - property sales
    - other services
  - developing and establishing agency marketing positioning strategies
  - developing strategic directions
  - preparing and documenting business plans
- determining and setting business goals and objectives:

- goals, objectives, plans, systems and processes
- short-, medium- and long-term goals
- client needs and marketing projections
- proposed size and scale of the business
- market focus of the business
- types of business planning:
  - feasibility studies
  - strategic
  - operational
  - financial planning
- content of business plans:
  - assumptions underlying the business plan
  - details of ownership and management
  - financial plan
  - organisational and operational arrangements
  - business opportunities
  - proposed size and scale of the agency
  - resources required and available
  - sources of funding
  - specialist services and sources of advice that may be required
  - staffing
  - market focus and marketing of the agency
- stages in business development
- principles of risk management relevant to business planning.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to materials and equipment meeting the operational requirements for a property agency, including:

- geographic location and detailed description of the property agency
- comprehensive property market and business environment information relating to the property agency
- comprehensive strategies, policies, procedures, forms and records
- equipment, communication and data access and storage technology required to develop a strategic business plan in the property industry.

# CPPREP5008 Market the property agency

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM5032A Market the agency.

Updated to the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to research, develop and implement a marketing strategy to market the agency in the property industry.

It does **not** include marketing required for individual properties.

The unit applies to industry professionals in the property industry.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Undertake property industry market research.	1.1 Develop market research methods to create a database for analysis of agency property markets. 1.2 Undertake property market research.
2. Develop property agency marketing strategy.	2.1 Analyse the agency's business plan, the needs of existing clients and future business opportunities. 2.2 Analyse the strengths and weaknesses of competitors and

	<p>identify opportunities for competitive advantage.</p> <p>2.3 Prepare marketing approaches to position the agency and minimise adverse effects of direct competition.</p> <p>2.4 Develop agency marketing strategy and targets.</p> <p>2.5 Develop corporate image and mission statement to promote positive public recognition of the agency and its services.</p>
3. Implement agency marketing strategy.	<p>3.1 Promote agency services to maximise competitive advantage and profitability.</p> <p>3.2 Use resources to support implementation of marketing strategy.</p> <p>3.3 Brief staff on marketing strategy and support them to action the strategy as required.</p>
4. Review and adjust marketing strategy.	<p>4.1 Monitor and review marketing activities and agency marketing strategy against targets.</p> <p>4.2 Collect and analyse feedback on outcomes of marketing activities.</p> <p>4.3 Assess costs and effectiveness of marketing activities to identify opportunities for improvements.</p> <p>4.4 Use evaluation data to review and modify marketing strategy.</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to CPPDSM5032A Market the agency.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP5008 Market the property agency

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM5032A Market the agency.

Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must develop, implement and review one marketing plan for a property agency.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation, and local government regulations relating to real estate agency marketing
- ethical considerations in marketing property agencies
- features of agency marketing strategies:
  - factors influencing choice of marketing strategy for agency
  - market opportunities
  - market research methods
- marketing activities and materials:
  - direct marketing
  - business-to-business marketing
  - networking
  - target markets
  - online and social media marketing
- aims of agency marketing strategies:
  - service range and mix
  - creating a 'point of difference' for the property agency
  - presentation and display of services
  - promotion and advertising
- processes for:

- developing, documenting, implementing and reviewing marketing of a property agency
- developing and documenting research methods for use in property
- analysing business requirements for marketing an agency
- assessing and documenting the strength and weaknesses of competitors
- conducting cost–benefit analyses services
- collecting and analysis of feedback.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to materials and equipment meeting the operational requirements for a property agency, including:

- geographic location and detailed description of the property agency
- comprehensive business plans, strategies, policies, procedures, forms and records
- position descriptions for all employees including detailed roles and responsibilities
- equipment, communication and data access and storage technology required for marketing a property agency.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPREP5009 Develop a marketing and service strategy in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM5014A Develop property marketing and sales strategy.

Updated to the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to develop a real estate marketing and service strategy for an agency.

It does **not** include marketing required for individual properties.

The unit applies to industry professionals in real estate.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Analyse information for marketing and service strategy.	1.1 Collate and analyse sources of real estate marketing information. 1.2 Determine marketing and service aims and objectives. 1.3 Analyse characteristics of client base and target markets. 1.4 Evaluate viability of marketing and service opportunities

	and contribution to achieving agency goals and objectives.
2. Create marketing and service strategy.	<p>2.1 Develop and select marketing and service methods and activities to ensure maximum impact.</p> <p>2.2 Obtain staff and resources for marketing and service strategy.</p> <p>2.3 Develop marketing and service strategy materials within budget and timeframes.</p>
3. Report on marketing and service activities.	<p>3.1 Analyse marketing and service activity outcomes against strategy aims and objectives.</p> <p>3.2 Use review findings to adjust strategy and provide recommendations for future marketing and service initiatives.</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to CPPDSM5014A Develop property marketing and sales strategy.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP5009 Develop a marketing and service strategy in real estate

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is equivalent to CPPDSM5014A Develop property marketing and sales strategy.

Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must develop, evaluate and report on a property marketing and service strategy for one target market.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation and local government regulations related to marketing and service strategies of real estate agencies
- ethical considerations in real estate agency marketing and service strategy planning
- sources of property marketing information
- processes for:
  - determining and evaluating characteristics of client base and target markets using available data and recognised research techniques
  - analysing marketing and service opportunities
  - determining and analysing marketing and service requirements
  - developing marketing and service objectives and approaches
  - gathering and analysing feedback on marketing and service strategy outcomes
- aspects of market competitors relating to marketing and service strategies of real estate agencies
- market conditions and forces relating to marketing and service strategies of real estate agencies
- marketing and service principles and practices relating to marketing and service strategies of real estate agencies.

## Assessment Conditions

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- comprehensive property market information relating to the real estate agency
- equipment, communication and data access and storage technology required for developing a marketing and service strategy in real estate.
- materials and equipment meeting the operational requirements of a real estate agency, including:
  - geographic location and detailed description of the real estate agency
  - comprehensive property market information relating to the real estate agency
  - real estate agency business plans, strategies, policies, procedures and forms
  - position descriptions for all employees, including detailed roles and responsibilities
  - equipment, communication and data access and storage technology required for developing a marketing and service strategy in real estate.

# CPPREP5010 Manage customer service activities in the property industry

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM5006 Coordinate customer service activities in the property industry and CPPDSM5020A Manage and monitor effective client service in the real estate industry.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to analyse, manage and evaluate customer service activities in the property industry.

The unit applies to industry professionals in the property industry.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Determine requirements for customer service systems.	<p>1.1 Conduct risk analyses according to legislative requirements.</p> <p>1.2 Analyse and record management requirements for customer service systems in the property industry.</p> <p>1.2 Analyse and record compliance requirements and best practice for customer service systems in the property industry.</p>

	<p>1.3 Determine and record the roles, responsibilities and processes for managing customer service systems.</p> <p>1.4 Determine service targets and develop key performance indicators.</p>
2. Manage customer service and complaints resolution systems.	<p>2.1 Develop and maintain effective customer service strategies.</p> <p>2.2 Develop and record resolution processes for complaints relating to service provision.</p> <p>2.3 Adjust performance standards to ensure effective customer service.</p>
3. Manage customer service performance.	<p>3.1 Communicate to staff the ethics, culture and performance standards for customer service.</p> <p>3.2 Facilitate monitoring, reviewing and adjustment of customer service practices.</p> <p>3.3 Provide regular feedback on achievement or non-achievement of customer service standards.</p> <p>3.4 Encourage staff to provide feedback on customer service.</p> <p>3.5 Manage coaching, training and mentoring to assist with changing needs and customer service issues.</p>
4. Manage evaluation of customer service systems.	<p>4.1 Analyse and use customer service feedback to evaluate achievement against performance standards.</p> <p>4.2 Use evaluation data to implement improvements in customer service.</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

Supersedes but is not equivalent to:

- CPPDSM5006 Coordinate customer service activities in the property industry
- CPPDSM5020A Manage and monitor effective client service in the real estate industry.

## Links

Companion volumes to this training package are available at the VETNet website -

# Assessment Requirements for CPPREP5010 Manage customer service activities in the property industry

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM5006 Coordinate customer service activities in the property industry and CPPDSM5020A Manage and monitor effective client service in the real estate industry.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must evaluate and provide feedback on the performance of two employees who are employed in the area of customer service.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- Commonwealth and state or territory legislation and local government regulations related to customer service in real estate
- organisational policies and procedures for dealing with clients
- organisational quality standards
- processes for:
  - risk management:
    - identification of hazards and assessment of risks relating to customer service in the property industry
    - analysis and rating of identified hazards and assessed risks in terms of likelihood and consequences
    - preparation of risk controls and risk mitigation strategies
  - analysing, determining, interpreting and documenting customer service system requirements in the property industry
  - managing and evaluating customer service performance in the property industry
  - complaint resolution strategies
- principles and techniques of client behaviour:
  - client relations
  - maintaining product and service quality

- problem identification and resolution
- researching client needs
- range of analysis techniques to interpret customer service and feedback data
- management and communication techniques for leading, mentoring and motivating teams in the property industry.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to materials and equipment meeting the operational requirements relating to the property industry, including:

- business plans, strategies, policies, procedures, forms and records, including:
  - agenda and notes of staff meetings relating to customer service
  - feedback and complaints registers, including resolutions of complaints about customer services and results from analysis of feedback
- database/s including simulated sets of records of current and recent listings, sales reports and comprehensive sales data
- position descriptions for all employees, including detailed roles and responsibilities
- position description, including detailed roles and responsibilities for the role to be assumed by the person undergoing assessment
- role descriptions for people participating in role-play exercises
- simulated realistic internet and social media presence
- equipment required to develop, implement and coordinate customer service activities.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP5201 Develop and maintain commercial property market intelligence

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

New unit of competency.

## Performance Evidence

To demonstrate competency in this unit, a person must develop and maintain commercial property market intelligence by completing market analysis for two different commercial property market sectors which highlight factors affecting commercial property market conditions.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- agency documentation required to be maintained when developing commercial property market intelligence
- sources of current and reliable commercial property market intelligence
- factors that can impact commercial property return on investment
- factors that can impact the sale or lease of commercial property and strategies for addressing each:
  - land use, zoning and approvals
  - contractual arrangements
  - property attributes
- industry-specific factors that influence market conditions and the sale and lease of commercial property:
  - rates per square metre
  - investment yields
  - availability of supply and demand
  - incentives
  - local government planning changes, restrictions and proposals
- legislation relating to the sale or lease of commercial property in the state or territory of operation
- property market for:

- commercial property
- industrial property
- retail property.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- materials and equipment meeting the operational requirements for a real estate agency:
- policies, procedures and documentation for developing and maintaining commercial property market intelligence
- legislation in the state or territory of operation relating to the commercial property market
- information management systems required to capture, maintain and recall market data
- information about commercial properties for sale and lease.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPREP5311 Develop and maintain rural property market knowledge and intelligence

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is not equivalent to CPPDSM4037A Conduct auction of rural property, CPPDSM4073A Provide rural property management services and CPPDSM4081A Work in the stock and station agency sector.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to develop and maintain the underpinning knowledge and skills required to sell or lease rural property and to provide advice on the rural property market.

It includes analysis of property market indicators and trends, factors affecting the value of rural property and identification of strategies that assist in maintaining rural property market knowledge.

This unit applies to people currently working in or seeking to work in the stock and station sector.

State or territory licensing requirements may apply to this unit.

## Pre-requisite Unit

Nil

## Unit Sector

Real estate

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Gather property	<ul style="list-style-type: none"><li>Identify and record networking opportunities which support the</li></ul>

market knowledge.	<p>development of rural property market intelligence.</p> <ul style="list-style-type: none"> <li>Analyse legislation and market information relating to rural property.</li> <li>Develop a database of contacts and sources of information.</li> <li>Identify and evaluate the effectiveness of strategies used to maintain rural property market knowledge.</li> </ul>
2. Analyse market influences.	<ul style="list-style-type: none"> <li>Identify and record key indicators of rural property market conditions.</li> <li>Analyse rural property market conditions using established methods.</li> <li>Document trends in the rural property market.</li> </ul>
3. Analyse market sector influences.	<ul style="list-style-type: none"> <li>Record and analyse geographical information.</li> <li>Record and analyse property usage information.</li> <li>Record and analyse factors that may affect return on rural property, including outbuildings and equipment.</li> <li>Record and analyse property production or agistment capacity and possible risks.</li> </ul>
4. Prepare market analysis.	<ul style="list-style-type: none"> <li>Apply rural property market analysis to an identified property.</li> <li>Prepare information for use in agent–client communication.</li> </ul>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

Supersedes but is not equivalent to:

- CPPDSM4037A Conduct auction of rural property
- CPPDSM4073A Provide rural property management services
- CPPDSM4081A Work in the stock and station agency sector.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPREP5311 Develop and maintain rural property market knowledge and intelligence

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is not equivalent to CPPDSM4037A Conduct auction of rural property, CPPDSM4073A Provide rural property management services and CPPDSM4081A Work in the stock and station agency sector.

Merged to reduce duplication. Updated to the Standards for Training Packages.

## Performance Evidence

To demonstrate competency in this unit, a person must apply market analysis strategies to research and analyse of two different rural property market sectors and highlight factors affecting the current market conditions.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- role of the agent in providing rural property market sales services
- types of rural property
- features of rural property impacting production or agistment capacity
- information sources for developing market knowledge and intelligence
- rural property market trends and indicators
- established methodologies to analyse:
  - rural property production capacity
  - rural property agistment capacity
  - rural property market indicators and market trends
  - factors that may affect return on rural property
  - factors that add value to rural property
- established formats for presenting rural property information
- legislation and local government regulations related to use of rural property in the state or territory of operation
- risks and ethical practices associated with use of rural property
- networking opportunities to support development of rural property knowledge.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- sources of information about rural property markets and market indicators
- established methods for analysing property production capacity and market conditions
- established formats for presenting rural property market information.

# CPPSEC2021 Install security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC2021A Install security equipment and systems. Updated to meet the Standards for Training Packages

## Application

This unit specifies the skills and knowledge required to install a range of security equipment and systems. It includes selecting and using materials, tools and equipment to install security equipment and systems using approved cable termination methods and procedures. This work applies in extra low voltage environments as defined in Australian Standard *AS/NZS 2201.1:2007 Intruder alarm systems - Client's premises - Design, installation, commissioning and maintenance* (AS/NZS 2201) and involves applying National Construction Code (NCC) requirements to the installation.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to install security equipment and systems.

1.1 Review work instructions to confirm installation timeframes, client needs, site location and equipment requirements and clarify issues with relevant persons.

- 1.2 Review AS/NZS 2201 and NCC to understand regulatory requirements for locating and installing security equipment and systems and apply to work instructions.
  - 1.3 Review and follow workplace policies and procedures including work health and safety (WHS) when carrying out work tasks.
  - 1.4 Identify and obtain security equipment and system to be installed following workplace procedures.
- 2 Plan and organise installation operation.
- 2.1 Plan and prioritise work tasks to allow sufficient time to meet work instructions.
  - 2.2 Select and organise required tools and equipment including personal protective equipment and check for safe and correct operation.
  - 2.3 Select and organise required materials and hardware for product installation suitable to the specific installation surface and installation procedures.
  - 2.4 Inspect installation area to identify and control or report risks and hazards.
- 3 Conduct installation procedures.
- 3.1 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
  - 3.2 Select installation position to comply with manufacturers' specifications and work instructions.
  - 3.3 Securely fix security equipment and system and terminate and connect cables, ensuring no damage or distortion is caused to the surrounding environment or services.
  - 3.4 Identify problems impacting the installation and obtain approval from relevant persons to vary the installation plan.
  - 3.5 Inspect installed security equipment and system to confirm correct operation.
  - 3.6 Check to confirm all terminations are electrically and mechanically sound according to WHS requirements.

- |  |     |  |
|--|-----|--|
| 4 Complete installation and documentation. | 4.1 | Notify installation completion to relevant persons.  |
|  | 4.2 | Complete installation documentation according to workplace and regulatory requirements.    |
|  | 4.3 | Check tools and equipment for faults, wear or damage and rectify or report problems.       |
|  | 4.4 | Restore work area to original condition and remove waste caused by installation operation. |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to understand key requirements of:
- plans when locating installation sites for security equipment and systems
- Australian standards, NCC and manufacturers' instructions
- numeracy skills to calculate measurements to accurately position and fix security equipment and systems.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC2021A Install security equipment and systems.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2021 Install security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC2021A Install security equipment and systems. Updated to meet the Standards for Training Packages

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by installing security equipment and systems at three different premises involving at least two types of systems listed below, one of which must be an internet protocol (IP) networked installation:

- access control system
- intruder alarm system
- audible and visual warning device
- electronic lock and locking system
- intercom and control panel.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when installing security equipment and systems:
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting and documentation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- application of *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) and the National Construction Code (NCC) to the installation of security equipment and systems
- basic carpentry techniques used when installing security equipment and systems
- cable identification, termination and connection procedures associated with installing security equipment and systems

- documentation to be completed when installing security equipment and systems to ensure compliance with licensing and warranty requirements
- materials, hardware, tools and equipment including personal protective equipment (PPE) used when installing security systems and equipment
- methods for ensuring IP networked systems and equipment are properly secured
- soldering and drilling techniques used when installing security equipment and systems
- techniques for sealing cable entries
- types and functions of security equipment and systems:
  - access control systems
  - audible and visual warning devices
  - cameras and monitors
  - commercial and residential alarm systems
  - detection devices
  - electronic and mechanical fire safety and fire locking systems
  - electronic locks and locking systems
  - electronic readers
  - electronic screen equipment
  - intercoms and control panels
  - security doors and door controls
- types of earthing systems used in electrical installations
- typical hazards encountered when installing security equipment and systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - hidden utilities
  - people in the work area
  - power tools
  - vermin.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, security equipment and systems, PPE, tools, materials and hardware required to achieve the performance evidence
- product information and manufacturers' instructions for equipment and systems being installed
- AS/NZS 2201
- NCC.

# CPPSEC2022 Install electronic locks and locking systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

CPPSEC2022A Install mechanical lock and locking system. Updated to meet the Standards for Training Packages

## Application

This unit specifies the skills and knowledge required to install a range of electronic locks and locking systems for door and window applications. It includes upgrading or strengthening hollow doors to increase security, and fitting door control devices and locks to windows, doors and jams.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

This unit may form part of the licensing requirements for people who sell, supply, advise on, install, maintain, monitor, repair or service security equipment and systems in those states and territories where these are regulated activities.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to install electronic lock and locking systems.

1.1 Review work instructions to confirm installation timeframes, client needs, site location and equipment requirements, and clarify issues with relevant persons.

1.2 Identify and obtain electronic lock and locking system to be installed following workplace procedures.

- 1.3 Review and follow workplace policies and procedures including work health and safety (WHS) when carrying out work tasks.
- 2 Plan and organise installation operation.
  - 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
  - 2.2 Select and organise required tools and equipment including personal protective equipment and check for safe and correct operation.
  - 2.3 Select and organise required materials and hardware for product installation suitable to the specific installation surfaces and procedures.
  - 2.4 Inspect installation area to identify and control or report risks and hazards.
- 3 Conduct installation procedures.
  - 3.1 Use safe work practices when carrying out installation procedures according to WHS requirements.
  - 3.2 Fit locks to windows, doors and jams in accordance with manufacturers' instructions.
  - 3.3 Fit door control devices to allow correct operation of doors in accordance with manufacturers' instructions.
  - 3.4 Upgrade or strengthen hollow doors to increase security.
  - 3.5 Identify problems impacting the installation and obtain approval from relevant persons to vary the installation plan if required.
  - 3.6 Inspect installed electronic locks and locking and system to confirm correct operation and ensure no damage or distortion to the surrounding environment or services.
- 4 Complete installation and documentation.
  - 4.1 Notify installation completion to relevant persons.
  - 4.2 Complete installation documentation according to workplace requirements.
  - 4.3 Check tools and equipment for faults, wear or damage and rectify or report problems.

- 4.4 Restore work area to original condition and remove waste caused by installation operation.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to understand key requirements of:
  - plans when locating installation sites for electronic locks and locking systems
  - Australian standards and manufacturers' instructions
- numeracy skills to calculate measurements to accurately position and fix door control devices and locks.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC2022A Install mechanical lock and locking system.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2022 Install electronic locks and locking systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

CPPSEC2022A Install mechanical lock and locking system. Updated to meet the Standards for Training Packages

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by installing electronic locks and locking systems involving:

- upgrading or strengthening two hollow doors
- fitting three door control devices
- fitting locks to three windows, doors and jams.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when installing electronic locks and locking systems:
  - licensing requirements and limits of own authority
  - reporting and documentation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- basic carpentry techniques used when installing electronic locks and locking systems
- documentation to be completed when installing electronic locks and locking systems to ensure compliance with licensing and warranty requirements
- general principles of locksmithing
- installation methods and procedures for electronic locks and locking systems
- materials, hardware, tools and equipment including personal protective equipment (PPE) used when installing electronic locks and locking systems
- types, functions and features of electronic locks and locking systems
- types of doors and windows suitable for electronic lock applications
- typical hazards encountered when installing electronic locks and locking systems and the control measures for each:
  - confined spaces

- electrical
  - ground glass
  - hazardous materials and chemicals
  - people in the work area
  - power tools
  - vermin
- welding and drilling techniques used when installing electronic locks and locking systems.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, electronic locks and locking systems, PPE, tools, materials and hardware required to achieve the performance evidence
- product information and manufacturers' instructions for locks and locking systems being installed.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC2023 Install video surveillance systems and equipment

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC2023A Install CCTV equipment and system. Updated to meet the Standards for Training Packages

## Application

This unit specifies the skills and knowledge required to install a range of video surveillance systems (VSS) and equipment. VSS is a surveillance system capable of capturing images and videos that can be compressed, stored or sent over communications networks, and includes closed circuit television (CCTV) and audio systems. The unit includes selecting and using materials, tools and equipment to install VSS and equipment using approved cable termination methods and procedures. This work applies in extra low voltage environments as defined in Australian Standard *AS/NZS 2201.1:2007 Intruder alarm systems— Client's premises - Design, installation, commissioning and maintenance (AS/NZS 2201)* and involves applying National Construction Code (NCC) requirements to the installation.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to install VSS	1.1	Review work instructions to confirm installation timeframes, client needs, site location and equipment
--------------------------	-----	--

- and equipment. requirements, and clarify issues with relevant persons.
- 1.2 Review AS/NZS 2201 and NCC to understand regulatory requirements associated with locating and installing VSS and equipment and apply to work instructions.
  - 1.3 Review and follow workplace policies and procedures including work health and safety (WHS) when carrying out work tasks.
  - 1.4 Identify and obtain VSS and equipment to be installed following workplace procedures.
- 2 Plan and organise installation operation.
- 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
  - 2.2 Select and organise required tools and equipment including personal protective equipment and check for safe and correct operation.
  - 2.3 Select and organise required materials and hardware for product installation suitable to the specific installation surface and installation procedures.
  - 2.4 Inspect installation area to identify and control or report risks and hazards.
- 3 Conduct installation procedures.
- 3.1 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
  - 3.2 Select installation position to comply with manufacturers' specifications and work instructions.
  - 3.3 Securely fix VSS and equipment and terminate and connect cables ensuring no damage or distortion is caused to the surrounding environment or services.
  - 3.4 Identify problems impacting the installation and obtain approval from relevant persons to vary the installation plan.
  - 3.5 Inspect installed VSS and equipment to confirm correct operation.
  - 3.6 Check to confirm all terminations are electrically and mechanically sound according to WHS requirements.

- |  |     |  |
|--|-----|--|
| 4 Complete installation and documentation. | 4.1 | Notify installation completion to relevant persons.  |
|  | 4.2 | Complete installation documentation according to workplace and regulatory requirements.    |
|  | 4.3 | Check tools and equipment for faults, wear or damage and rectify or report problems.       |
|  | 4.4 | Restore work area to original condition and remove waste caused by installation operation. |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to understand key requirements of:
  - plans when locating installation sites for VSS and equipment
  - Australian standards, NCC and manufacturers' instructions
- numeracy skills to calculate measurements to accurately position and fix VSS and equipment.

# Assessment Requirements for CPPSEC2023 Install video surveillance systems and equipment

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC2023A Install CCTV equipment and system. Updated to meet the Standards for Training Packages

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by installing video surveillance systems (VSS) and equipment at three different premises involving at least one internet protocol (IP) networked installation.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when installing VSS and equipment:
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting and documentation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- application of *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) and the National Construction Code (NCC) to the installation of VSS and equipment
- basic carpentry techniques used when installing VSS and equipment
- cable identification, termination and connection procedures associated with installing VSS and equipment
- documentation to be completed when installing VSS and equipment to ensure compliance with licensing and warranty requirements
- methods for ensuring IP networked systems and equipment are properly secured
- location requirements VSS to ensure optimal surveillance coverage
- materials, hardware, tools and equipment including personal protective equipment (PPE) used when installing VSS and equipment
- methods for fitting end-of-line devices

- soldering and drilling techniques used when installing VSS and equipment
- techniques for sealing cable entries
- types and functions of VSS and equipment and installation requirements associated with:
  - integration
- types of earthing systems used in electrical installations
- typical hazards encountered when installing VSS and equipment and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - hidden utilities
  - people in the work area
  - power tools
  - vermin.
  -

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, VSS and equipment, PPE, tools, materials and hardware required to achieve the performance evidence
- product information and manufacturers' instructions for VSS systems and equipment to be installed
- AS/NZS 2201
- NCC.

# CPPSEC2024 Monitor and respond to electronic information from security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC2024 Implement electronic monitoring procedures. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to monitor and respond to electronic information received from a range of security equipment and systems, including alarm monitoring management software. It includes accurately interpreting electronic information and applying correct response procedures to a range of security situations. Work is usually conducted from a secure electronic reporting facility, monitoring centre or control room.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Monitor electronic security information.

1.1 Review work instructions to confirm electronic monitoring requirements and timeframes and clarify issues with relevant persons.

- 1.2 Review and follow workplace policies and procedures including work health and safety when carrying out work tasks.
  - 1.3 Inspect security equipment and system and check to ensure correct operation and connections following manufacturers' instructions.
  - 1.4 Clarify and comply with monitoring parameters for security equipment and system in accordance with workplace requirements.
  - 1.5 Systematically monitor electronic information from security system and equipment according to work instructions.
  - 1.6 Routinely cross-check security system and equipment with companion monitoring systems to verify accurate and reliable information exchange according to workplace requirements.
  - 1.7 Identify, correct or report faults or malfunctions in security system or equipment operation.
- 2 Respond to electronic security information.
- 2.1 Clarify response procedures with relevant persons.
  - 2.2 Receive electronic security information and verify reliability and accuracy according to workplace requirements.
  - 2.3 Identify and prioritise response to comply with required monitoring parameters.
  - 2.4 Identify risks associated with changing circumstances and obtain approval from relevant persons to vary response.
  - 2.5 Action required response to electronic security information according to workplace requirements.
- 3 Finalise electronic monitoring and documentation.
- 3.1 Carry out back-up procedures to protect electronic security information.
  - 3.2 Carry out change of shift procedures that ensure monitoring continuity.

- 3.3 Complete monitoring documentation ensuring accurate response records responses are accurately recorded according to workplace requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to understand and follow written and diagrammatic instructions when operating electronic security equipment
- numeracy skills to calculate and enter numerical data into security systems.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC2024A Implement electronic monitoring procedures.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2024 Monitor and respond to electronic information from security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC2024 Implement electronic monitoring procedures. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by monitoring electronic information from security equipment and systems for three different shifts and actioning a minimum of six responses to electronic security information.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when monitoring and responding to electronic information from security equipment and systems:
  - licensing requirements and limits of own authority
  - privacy requirements
  - work health and safety
- change of shift procedures for workplace
- common electronic monitoring equipment and system configurations and programs
- common faults and malfunctions in security equipment and systems
- common keypad and control panel types and functions associated with electronic security systems and equipment
- computer software and software templates used for monitoring functions in security systems
- documentation to be completed when monitoring and responding to electronic security information
- methods for prioritising response options when monitoring and receiving electronic security information
- monitoring and response parameters for electronic security systems and equipment
- operating principles and functions of a range of electronic security systems and equipment
- procedures for verifying the authenticity of electronic information received from security equipment and systems

- procedures to back-up and protect electronic security information
- situations presenting risk and requiring approval to vary response
- types of alarm transmission technologies including wireless and internet protocol monitoring and dialler monitoring.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work task specifications for monitoring and responding to electronic information from security equipment and systems, and electronic security equipment and systems required to achieve the performance evidence.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC2025 Sell security products and services

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC2025A Sell security products and services. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to sell security products and services to clients. It includes engaging with clients to clarify their security needs, matching security products and services to client requirements, demonstrating and describing products, and assisting clients to make final purchase decisions to close sales. The unit includes handling client complaints and using client feedback to identify opportunities for repeat business and improved sales.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |     |  |
|---|-----|--|
| 1 Confirm client needs and legal compliance requirements. | 1.1 | Review and follow workplace policies and procedures and comply with legal rights and responsibilities when selling security products and services. |
|   | 1.2 | Approach client in a timely and professional manner.   |

- 1.3 Use oral communication skills to engage client and establish rapport.
  - 1.4 Use questioning and active listening to clarify security needs and preferences of client.
  - 1.5 Recognise own limitations in addressing client needs and seek required assistance from relevant persons.
- 2 Match client with security products and services and close sale.
- 2.1 Provide client with information about suitable available security products and services and assist them to select preferred options.
  - 2.2 Describe and demonstrate product features and benefits according to product information.
  - 2.3 Offer solutions to address specific client requirements or where dissatisfaction with products and services is identified.
  - 2.4 Confirm prices and quotations on preferred products and services in consultation with relevant persons.
  - 2.5 Encourage client to make purchase decision and close sale.
- 3 Finalise sale of security products and services.
- 3.1 Record sale and provide written follow-up information to client according to workplace requirements.
  - 3.2 Promptly communicate to client information about problems and delays associated with purchased product or service.
  - 3.3 Handle client complaints courteously and record and report details following workplace procedures.
  - 3.4 Obtain client feedback and identify opportunities for repeat business and improved sales in consultation with relevant persons.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to understand key requirements of product information that may be in written and diagrammatic formats
- numeracy skills to calculate service timeframes, costs and quotations for security products.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC2025A Sell security products and services.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2025 Sell security products and services

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC2025A Sell security products and services. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by selling security products and services to meet the needs of four different clients.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when selling security products and services:
  - client service standards
  - key requirements of Australian consumer law
  - licensing requirements
  - own professional and legal limitations and authority
  - privacy requirements
  - reporting and documentation
  - work health and safety
- common factors influencing client decisions to purchase security products and services
- difference between negative and positive language
- documentation to be completed when selling security products and services
- how to read and use body language to gain the confidence of clients
- how to safeguard confidential information associated with the sale of security products and services
- methods for handling client complaints to resolve issues and find alternative solutions
- methods for obtaining client feedback
- range of available security products and services and special features including warranties and after sales support
- rights and responsibilities of clients associated with the sale of security products and services

- sales techniques:
  - trade-up
  - trade-in
  - tie-ins
  - cut-ins
  - range-ins
- techniques for matching sales approaches to client behaviour
- typical buy signals and strategies for closing sales.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, security products and services for sale and clients required to achieve the performance evidence
- product sales documentation.

## Links

# CPPSEC2026 Perform routine maintenance on security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC2026A Perform routine maintenance on security equipment and system. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to perform routine maintenance, adjustments and permitted repairs on a range of security equipment and systems. It includes finding faults and using tools and equipment to maintain the correct operation of security equipment and systems.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Plan and prepare for routine maintenance.

1.1 Review work instructions to confirm routine maintenance timeframes, equipment location and required maintenance in consultation with relevant persons.

- 1.2 Review and follow workplace policies and procedures including work health and safety to comply with regulatory requirements when carrying out work tasks.
  - 1.3 Select and organise required tools and equipment including personal protective equipment and check for safe and correct operation.
  - 1.4 Discuss planned maintenance procedures with relevant persons to clarify needs and expectations.
  - 1.5 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
  - 1.6 Inspect work area to identify and control or report risks and hazards.
- 
- 2 Conduct routine maintenance procedures.
    - 2.1 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
    - 2.2 Access security equipment and system requiring maintenance with minimal disruption to services and others in the work area.
    - 2.3 Inspect and assess security equipment and system operation against normal operating criteria.
    - 2.4 Carry out routine maintenance procedures on security equipment and system according to manufacturers' instructions and WHS requirements.
    - 2.5 Identify faults and undertake permitted routine repairs according to manufacturers' instructions and WHS requirements.
    - 2.6 Identify and report complex faults or repair requirements to relevant persons.
- 
- 3 Complete routine maintenance and documentation.
    - 3.1 Reinstate serviced and repaired security equipment and system to operational condition.
    - 3.2 Notify completion of maintenance work to relevant persons.
    - 3.3 Complete service documentation according to workplace and regulatory requirements.

- 3.4 Check tools and equipment for faults, wear or damage and rectify or report problems.
- 3.5 Restore work area to original condition and remove waste caused by maintenance tasks.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to understand key requirements of:
  - plans and diagrams when locating installed security equipment and systems
  - manufacturers' instructions.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC2026A Perform routine maintenance on security equipment and systems.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2026 Perform routine maintenance on security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC2026A Perform routine maintenance on security equipment and system. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by performing routine maintenance on at minimum of three types of security equipment and systems listed below, one of which must be an internet protocol (IP) networked installation:

- access control system
- intruder alarm system
- audible and visual warning device
- electronic lock and locking system
- intercom and control panel.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when performing routine maintenance on security equipment and systems:
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting and documentation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- cable identification, termination and connection procedures associated with repairing installed security equipment and systems
- documentation to be completed when maintaining security equipment and systems to ensure compliance with licensing and warranty requirements
- methods for reinstating IP networked systems and equipment and ensuring they are properly secured
- methods for sealing cable entries

- tools and equipment including personal protective equipment (PPE) used when performing routine maintenance on security systems and equipment
- types, functions and purpose of security equipment and systems:
  - access control systems
  - audible and visual warning devices
  - cameras and monitors
  - commercial and residential alarm systems
  - detection devices
  - electronic and mechanical fire safety and fire locking systems
  - electronic locks and locking systems
  - electronic readers
  - electronic screen equipment
  - intercoms and control panels
  - security doors and door controls
- types, functions and purpose of end-of-line devices and resistors
- types of earthing systems used in electrical installations
- types of faults and maintenance procedures for a range of security equipment and systems and repairs permitted within scope of own role, authority and competence
- typical hazards encountered when performing routine maintenance on security equipment and systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - hidden utilities
  - people in the work area
  - power tools
  - vermin.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, security equipment and systems, PPE and tools required to achieve the performance evidence
- manufacturers' instructions for equipment and systems to be serviced.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC2102 Apply legal and procedural requirements to work effectively within a security team

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC2003B Work effectively in the security industry and CPPSEC2005A Work as part of a security team.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Application

This unit specifies the skills and knowledge required to apply legal and procedural regulations to working effectively within a security team.

It requires:

- clarifying and applying standard operating procedures, workplace policies, legislative requirements and professional standards to understand and comply with legal rights and responsibilities when performing security work
- understanding requirements for recording and presenting evidence in court and securing and preserving incident or crime scenes
- working individually and as part of a team to plan, organise and complete work tasks and improve performance.

It applies to people working under general supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil

## Unit Sector

Security operations

## Elements and Performance Criteria

Elements describe the	Performance criteria describe what needs to be done to
-----------------------	--

essential outcomes.	demonstrate achievement of the element.
1. Confirm and comply with legal and procedural requirements and professional standards.	<p>1.1 Read work instructions and clarify standard operating procedures and workplace policies governing work tasks.</p> <p>1.2 Apply policies and procedures to work tasks to comply with legal rights and responsibilities when performing security work.</p> <p>1.3 Locate and clarify professional standards for security officers to demonstrate compliance in own work performance and conduct with relevant persons.</p> <p>1.4 Identify requirements for recording and presenting evidence in court and preserving incident or crime scenes.</p> <p>1.5 Clarify legal and procedural requirements and professional standards with relevant persons.</p>
2. Plan, organise and complete daily work tasks.	<p>2.1 Check work instructions and confirm own role, responsibilities, authority and reporting requirements and timeframes.</p> <p>2.2 Organise equipment and plan work schedule to meet designated timeframes.</p> <p>2.3 Identify factors that may impede successful completion of work tasks and promptly notify relevant persons.</p> <p>2.4 Use information technology to organise and complete work tasks.</p>
3. Participate in team assignments.	<p>3.1 Read instructions for team assignment and identify own responsibilities.</p> <p>3.2 Discuss individual and team responsibilities with team members to clarify work objectives and assist in resolving areas of conflict.</p> <p>3.3 Encourage input of all team members to support decision-making that accounts for individual social and cultural differences.</p> <p>3.4 Maintain communication with team members during team assignment to share information and respond to instructions and requests for back-up assistance.</p> <p>3.5 Assist team members to complete individual and team objectives within designated timeframes.</p>
4. Identify and access opportunities for learning and improvement.	<p>4.1 Seek feedback on individual and team performance from team members and supervisors, and discuss opportunities to improve future collaborations.</p> <p>4.2 Seek feedback on own work performance and standards</p>

	from relevant persons, and identify areas for improvement and learning. 4.3 Identify opportunities for professional development and discuss opportunities with relevant persons.
--	---

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information or advice using approved security industry terminology and call signs
- writing skills to:
  - describe learning and skill development needs
  - record observations in a clear, succinct, accurate and factual manner
  - record and maintain learning and skill development information
- reading skills to understand and follow:
  - standard operating procedures and policies that clarify legal rights and responsibilities
  - industry codes of practice that clarify professional standards and conduct requirements
- speaking and listening skills to:
  - ask questions and listen to answers to gain information or confirm understanding when clarifying legal rights and responsibilities
  - give clear and accurate instructions and receive feedback from team members
  - use basic negotiation to resolve conflict when working with team members
  - communicate with emergency services
- numeracy skills to estimate time required to carry out work tasks
- problem solving skills to recognise factors that may impede completion of work tasks
- self-management skills to plan tasks to meet job requirements
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others

## Unit Mapping Information

Supersedes and is non-equivalent to CPPSEC2003B Work effectively in the security industry and CPPSEC2005A Work as part of a security team.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2102 Apply legal and procedural requirements to work effectively within a security team

## Modification History

Release 1.

Supersedes and is non-equivalent to CPPSEC2003B Work effectively in the security industry and CPPSEC2005A Work as part of a security team.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

## Performance Evidence

- To demonstrate competency in this unit, a person must apply legal and procedural regulations to:
- work individually to plan, organise and complete one set of work instructions
- work in partnership with at least one colleague to complete one team assignment
- identify and participate in one professional development opportunity to improve own performance.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- the legal and procedural framework for performing security work as set out in standard operating procedures and workplace policies associated with:
  - anti-discrimination
  - apprehension, arrest and restraint of persons
  - duty of care
  - licensing requirements and limits of own authority
  - privacy and confidentiality of information
  - records and reports that may be used for legal purposes
  - use of force and force model
  - use of self-defence techniques
  - workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- basic operational functions of mobile devices, radios and telephones used to transmit and receive security information

- basic principles of effective teamwork
- consequences of not complying with legal and procedural requirements when performing security work
- how to read and use body language to gain the confidence of others
- limits of own competence and authority
- methods and reasons for securing and preserving an incident or crime scene
- methods for giving and receiving constructive feedback
- methods for preserving, maintaining, storing and transporting evidence and exhibits that may be used in court
- procedures, protocols and rules to be followed when presenting evidence in court:
  - addressing court personnel
  - language
  - manner
  - participating and giving evidence
  - personal presentation
  - who's who in court
- professional standards and code of conduct for work in the security industry
- purpose of the Evidence Act
- requirements for recording and reporting incidents
- requirements for recording information that is factual and can be used as evidence in court including meaning of 'continuity of evidence'
- rules of evidence that can be presented in court:
  - contemporaneousness
  - must be relevant
  - must be admissible
  - must not be 'hearsay'
  - must not be opinion
- terms and conditions of own employment
- types of law:
  - civil
  - common
  - criminal
  - statute
- types of professional development opportunities that can assist own learning and improvement
- ways that individual social and cultural differences may be expressed.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to apply legal and procedural regulations to work effectively within a security team
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC3024 Install advanced technology security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPSEC3024A Install biometrics equipment and systems. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to install a range of security equipment and systems that employ advanced technologies including biometrics, artificial intelligence (AI), robotics, smart technologies and video integration. It includes positioning and installing equipment and systems and carrying out required programming, configurations, networking and integration to set up and connect security technologies. This work applies in extra low voltage environments as defined in Australian Standard *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) and involves applying National Construction Code (NCC) requirements to the installation.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- 1 Prepare to install advanced technology security system equipment.
  - 1.1 Review work instructions to confirm installation timeframes, client needs, site location and equipment requirements, and clarify issues with relevant persons.
  - 1.2 Review AS/NZS 2201 and NCC to understand regulatory requirements associated with locating and installing security systems and equipment and apply to work instructions.
  - 1.3 Identify and obtain advanced technology security equipment and system to be installed following workplace procedures.
  - 1.4 Review and follow workplace policies and procedures including work health and safety when carrying out work tasks.
- 2 Plan and organise installation operation.
  - 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
  - 2.2 Select and organise required tools and equipment including personal protective equipment and check for safe and correct operation.
  - 2.3 Select and organise required materials and hardware for product installation suitable to the specific installation surface and installation procedures.
  - 2.4 Inspect installation area to identify and control or report risks and hazards.
- 3 Conduct installation procedures and set up and connect technology.
  - 3.1 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
  - 3.2 Select installation positions to comply with manufacturers' specifications and work instructions.
  - 3.3 Securely fix advanced technology equipment and system and terminate and connect cables ensuring no damage or distortion is caused to the surrounding environment or services.
  - 3.4 Identify problems impacting the installation and obtain approval from relevant persons to vary the installation plan.

- 3.5 Conduct programming, configuration, networking or integration tasks to set up and connect system technology.
  - 3.6 Commission installed advanced technology security equipment and system and confirm correct operation to meet work instructions.
  - 3.7 Check to confirm all terminations are electrically and mechanically sound according to WHS requirements.
- 4 Complete installation and documentation.
- 4.1 Notify installation completion to relevant persons.
  - 4.2 Complete installation documentation according to workplace and regulatory requirements.
  - 4.3 Check tools and equipment for faults, wear or damage and rectify or report problems.
  - 4.4 Restore work area to original condition and remove waste caused by installation operation.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - plans and specifications when locating installation sites for advanced security equipment and systems
  - NCC, Australian standards and manufacturers' instructions
- numeracy skills to calculate measurements to accurately position and fix advanced security equipment and systems.

## Unit Mapping Information

Supersedes and non-equivalent to CPPSEC3024A Install biometrics equipment and systems.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3024 Install advanced technology security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPSEC3024A Install biometrics equipment and systems. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting three different installations of security equipment and systems which use at least two of the advanced technologies listed below:

- artificial intelligence (AI)
- biometrics
- robotics
- smart technologies
- video integration.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when installing advanced technology security equipment and systems:
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting and documentation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- application of *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) and the National Construction Code (NCC) when installing advanced technology security equipment and systems
- basic carpentry techniques used when installing advanced technology security equipment and systems
- basic electrical concepts associated with voltage, current, resistance and impedance

- cable identification, termination and connection procedures associated with installing advanced technology security equipment and systems
- documentation to be completed when installing advanced technology security equipment and systems to ensure compliance with licensing and warranty requirements
- established threshold levels and their impact on security
- materials, hardware, tools and equipment including personal protective equipment (PPE) used when installing advanced technology security equipment and systems
- methods for ensuring IP networked systems and equipment are properly secured
- location requirements advanced technology security equipment and systems to ensure optimal functioning
- programming, configuration, networking and integration requirements for setting up and connecting advanced technology security equipment and systems
- soldering and drilling techniques used when installing advanced technology security equipment and systems
- techniques for sealing cable entries
- types and functions of a range of advanced technology security systems and equipment:
  - AI
  - biometrics
  - robotics
  - smart technologies
  - video integration
- types of earthing systems used in electrical installations
- typical hazards encountered when installing advanced technology security equipment and systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - hidden utilities
  - people in the work area
  - power tools
  - vermin.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, advanced technology security equipment and systems, PPE, tools, materials and hardware required to achieve the performance evidence
- product information and manufacturers' instructions for equipment and systems to be installed
- AS/NZS 2201
- NCC.

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC3025 Diagnose faults in advanced technology security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC2025A Sell security products and services. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to diagnose faults in security equipment and systems that employ advanced technologies including biometrics, artificial intelligence (AI), robotics, smart technologies and video integration. It includes applying methodical diagnostic procedures, testing suspected fault scenarios, and assessing test results, historical information and operational data to diagnose faults and recommend options for rectification. This work applies in extra low voltage environments as defined in Australian Standard *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201).

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to diagnose	1.1 Review work instructions to confirm client requirements
-----------------------	---

- advanced technology security equipment and system faults.
- and diagnostic timeframes.
- 1.2 Review AS/NZS 2201 to understand regulatory requirements associated with diagnosing security equipment and system faults and apply to work instructions.
  - 1.3 Use questioning and active listening to gather information on type of security equipment and system, technologies involved and extent of fault.
  - 1.4 Review and follow workplace policies and procedures including work health and safety when carrying out work tasks.
- 2 Plan and organise work tasks.
- 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
  - 2.2 Select and organise required materials, tools and equipment including personal protective equipment and check for safe and correct operation.
  - 2.3 Arrange access to security equipment and system in consultation with relevant persons.
  - 2.4 Identify hazards in the work area and apply risk control measures.
- 3 Conduct advanced technology security equipment and system testing and diagnostic procedures.
- 3.1 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
  - 3.2 Isolate security equipment and system according to workplace requirements.
  - 3.3 Confirm normal performance of advanced technology security equipment and system against specification schedules.
  - 3.4 Inspect and check advanced technology security system components and test operation according to manufacturers' instructions.
  - 3.5 Methodically apply diagnostic methods using measurements and estimations of system operating parameters.

- 3.6 Check and test configurations and connections for equipment and system technologies following manufacturers' instructions.
  - 3.7 Test suspected fault scenarios to identify source of system problems.
  - 3.8 Assess test data, site variables, operational and historical information to support fault diagnosis.
  - 3.9 Diagnose fault or seek assistance from relevant persons to meet work instructions.
- 
- 4 Recommend options for fault rectification and complete documentation.
    - 4.1 Document diagnosed faults and options for fault rectification that are supported by verifiable data according to workplace and regulatory requirements.
    - 4.2 Check tools and equipment for faults, wear or damage and rectify or report problems.
    - 4.3 Clean and restore work area and remove waste caused by work tasks.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - plans and specifications when locating equipment and system components
  - Australian standards and manufacturers' instructions.

## Unit Mapping Information

Supersedes and not equivalent to CPPSEC3025A Identify and diagnose biometric system fault.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPPSEC3025 Diagnose faults in advanced technology security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC2025A Sell security products and services. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting testing and diagnostic procedures to identify a minimum of five faults on security equipment and systems which use at least two of the advanced technologies listed below:

- artificial intelligence (AI)
- biometrics
- robotics
- smart technologies
- video integration.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when diagnosing faults in advanced technology security equipment and systems:
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting and documentation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- application of *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) when diagnosing security equipment and system faults at client premises
- cable identification methods and techniques
- documentation to be completed when diagnosing faults in advanced technology security equipment and systems
- established threshold levels and their impact on security

- keypad and control panel types and functions for a range of advanced technology security equipment and systems
- materials, tools and equipment including personal protective equipment (PPE) used when diagnosing faults in advanced technology security equipment and systems
- methods for ensuring IP networked systems and equipment are properly secured
- operational parameters and diagnostic testing procedures for a range of advanced technology security equipment and systems:
  - AI
  - biometrics
  - robotics
  - smart technologies
  - video integration
- operational principles of data transmission networks
- types and functions of computer software associated with advanced technology security equipment and systems
- types of earthing systems used in electrical installations
- types of electrical connections and circuits encountered when diagnosing faults in advanced technology security equipment and systems, and circuit protection requirements
- typical hazards encountered when diagnosing faults in advanced technology security equipment and systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - people in the work area
  - power tools
  - vermin
  - work at heights.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, advanced technology security equipment and systems, PPE, tools and materials required to achieve the performance evidence
- security equipment and system information to support diagnostic activities

- AS/NZS 2201.

## Links

Companion volumes to this training package are available at the VETNet website -

# CPPSEC3035 Recommend technical security requirements to meet client needs

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3035A Identify technical security requirements. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to recommend technical security requirements to meet specific client needs. It includes conducting site assessments to identify security risk factors associated with the site such as access and egress points, occupant behaviours and building condition, and prioritising and documenting security recommendations.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |   |
|--|---|
| 1 Confirm compliance requirements and client security needs. | 1.1 Review work instructions to confirm client specifications and service timeframes.                           |
|  | 1.2 Review and follow workplace policies and procedures including work health and safety when carrying out work |

- tasks.
- 1.3 Consult with client to clarify security objectives, needs and expectations.
  - 1.4 Use questioning and active listening to define technical security options to meet their needs within the scope of own competence and authority.
  - 1.5 Recognise own limitations in addressing client needs and seek required assistance from relevant persons.
- 2 Assess client site and security risk factors.
- 2.1 Arrange access to site in consultation with relevant persons.
  - 2.2 Identify hazards in the work area and apply risk control measures.
  - 2.3 Inspect client site and surrounds to assess access and egress points, assets and existing security arrangements
  - 2.4 Consult with client to identify occupant behaviours and activities that may impact security requirements.
  - 2.5 Record details of discussions and observations and identified security risk factors.
- 3 Present technical security recommendation.
- 3.1 Select available security equipment, systems and services to meet client requirements.
  - 3.2 Summarise assessed client needs, prioritised security recommendations and alternative options, and check recommendations are supported by verifiable evidence.
  - 3.3 Use computer and software to document security recommendations in the required format, style and structure according to workplace requirements.
  - 3.4 Forward recommendations to relevant persons for review within agreed timeframes.
  - 3.5 Store client documentation in a manner that facilitates future retrieval and maintains confidentiality according to workplace and regulatory requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to relate to people demonstrating sensitivity to individual social and cultural differences
- reading skills to interpret key requirements of:
  - plans and drawings when assessing client sites
  - technical product specifications that may be in written or diagrammatic formats
- numeracy skills to measure and calculate area when assessing client sites

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3035A Identify technical security requirements.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3035 Recommend technical security requirements to meet client needs

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3035A Identify technical security requirements. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by recommending security equipment systems or services to meet the requirements of three different clients involving:

- all client sites having multiple access and egress points
- at least one commercial and one domestic property
- at least one client requiring multiple security solutions.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when recommending technical security requirements to meet client needs:
  - client service standards
  - licensing requirements and limits of own authority
  - own professional and legal limitations and authority
  - privacy requirements
  - reporting and documentation
  - work health and safety
- how to safeguard confidential client information
- methods for assessing client sites and surrounds to identify security risk factors and protection requirements
- methods for gaining permission to access client sites and persons authorised to grant permission
- reporting procedures and documentation requirements for recommending technical security requirements to clients
- types and functions of available technical security equipment, systems and services
- types of occupant behaviours that impact the security of client sites
- types of security risk factors that require technical security solutions

- ways that building condition can affect security requirements
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, client instructions and product information for technical security equipment, systems and services required to achieve the performance evidence.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC3036 Program and configure security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3036A Program security equipment and system. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to program and configure a range of security equipment and systems. It includes selecting and applying programming requirements and configuration parameters to installed security equipment and systems to meet client requirements. This work applies in extra low voltage environments as defined in Australian Standard *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201).

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |  |
|---|--|
| 1 Prepare to program and configure security | 1.1 Review work instructions to confirm client and site requirements and service timeframes. |
|---|--|

- equipment and system.
- 1.2 Review AS/NZS 2201 to understand regulatory requirements associated with programming and configuring installed equipment and systems and apply to work instructions.
  - 1.3 Confirm type of security equipment and system to be programmed and configured and clarify programming requirements and configuration parameters.
  - 1.4 Review and follow workplace policies and procedures including work health and safety when carrying out work tasks.
  - 1.5 Review work instructions to confirm client and site requirements and service timeframes.
- 2 Plan and organise work tasks.
- 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
  - 2.2 Select and organise required materials, tools and equipment including personal protective equipment and check for safe and correct operation.
  - 2.3 Arrange access to security equipment and system in consultation with relevant persons.
  - 2.4 Identify hazards in the work area and apply risk control measures.
- 3 Conduct system and equipment programming and configuration.
- 3.1 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
  - 3.2 Power security equipment and system following correct procedures and manufacturers' instructions.
  - 3.3 Program and configure security equipment and system according to work instructions.
  - 3.4 Test and check security equipment and system configuration to confirm correct operation.
  - 3.5 Identify and apply required adjustments to programming instructions in consultation with relevant persons.

- |   |  |     |  |
|---|--|-----|--|
| 4 | Finalise programming and configuration activities and documentation. | 4.1 | Inspect programmed and configured security equipment and system to confirm correct operation and conformance with work instructions. |
|   |  | 4.2 | Complete documentation detailing programming and configuration results according to workplace and regulatory requirements.           |
|   |  | 4.3 | Notify work completion to relevant persons.  |
|   |  | 4.4 | Check tools and equipment for faults, wear or damage and rectify or report problems.   |
|   |  | 4.5 | Restore work area to original condition and remove waste caused by work tasks.   |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - plans and specifications when locating security equipment and systems
  - Australian standards and manufacturers' instructions
- numeracy skills to interpret multimeter readings when testing security equipment and systems.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3036A Program security equipment and system.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3036 Program and configure security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3036A Program security equipment and system. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by programming and configuring three different security equipment and systems, one of which must be an internet protocol (IP) networked installation.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when programming and configuring security equipment and systems:
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting and documentation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- application of *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) when programming and configuring security equipment and systems at client premises
- basic programming and configuration methods for a range of security equipment and systems
- cable identification methods and techniques
- difference between programming and configuration of security equipment and systems
- documentation to be completed when programming and configuring security equipment and systems
- keypad and control panel types and functions for a range of security equipment and systems

- materials, tools and equipment including personal protective equipment (PPE) used when programming and configuring security equipment and systems
- methods for ensuring IP networked systems and equipment are properly secured
- types and functions of computer software associated with electronic security equipment and systems
- types and functions of computerised, electronic and manual security equipment and systems that require programming and configuration:
  - access control systems
  - audible and visual warning devices
  - cameras and monitors
  - commercial and residential alarm systems
  - detection devices
  - electronic and mechanical fire safety and fire locking systems
  - electronic locks and locking systems
  - electronic readers
  - electronic screen equipment
  - intercoms and control panels
  - security doors and door controls
- types of earthing systems used in electrical installations
- typical hazards encountered when programming and configuring security equipment and systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - people in the work area
  - power tools
  - vermin.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, security equipment and systems, PPE, tools and materials required to achieve the performance evidence

- security equipment and system information to support programming and configuration tasks
- AS/NZS 2201.

# CPPSEC3037 Test installed security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3037A Test installed security equipment and system. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to test a range of installed security equipment and systems including cable systems, equipment components and programming. It includes selecting and carrying out tests to confirm the integrity, security and safety of equipment and systems. This work applies in extra low voltage environments as defined in Australian Standard *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201).

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |   |
|--|---|
| 1 Prepare to test installed security equipment and system. | 1.1 Review work instructions to confirm client and site requirements and testing timeframes.            |
|  | 1.2 Review AS/NZS 2201 to understand regulatory requirements associated with testing installed security |

- equipment and systems and apply to work instructions.
- 1.3 Review and follow workplace policies and procedures including work health and safety when carrying out work tasks.
  - 1.4 Confirm type of security equipment and system to be tested and clarify testing parameters.
- 2 Plan and organise work tasks.
- 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
  - 2.2 Select and organise required materials, tools and equipment including personal protective equipment and check for safe and correct operation.
  - 2.3 Arrange access to installed security equipment and system in consultation with relevant persons.
  - 2.4 Identify hazards in the work area and apply risk control measures.
- 3 Conduct security equipment and system testing procedures.
- 3.1 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
  - 3.2 Identify, isolate, tag and test cables according to WHS requirements.
  - 3.3 Remove parts and connections of security equipment and system following approved procedures and store safely to protect against loss or damage.
  - 3.4 Carry out testing procedures following manufacturers' instructions.
  - 3.5 Check to confirm accuracy and reliability of test data and conduct additional required tests or seek assistance from relevant persons.
  - 3.6 Reassemble security equipment and system to pre-test condition following manufacturers' instructions.
- 4 Finalise testing activities and
- 4.1 Check security equipment and system to confirm correct operation and conformance with work instructions.

- documentation.
- 4.2 Complete documentation detailing testing results according to workplace and regulatory requirements.
  - 4.3 Notify work completion to relevant persons.
  - 4.4 Check tools and equipment for faults, wear or damage and rectify or report problems.
  - 4.5 Restore work area to original condition and remove waste caused by work tasks.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - plans and specifications when locating installed security equipment and systems
  - Australian standards and manufacturers' instructions
- numeracy skills to interpret multimeter readings when testing security equipment and systems.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3037A Test installed security equipment and system.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3037 Test installed security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3037A Test installed security equipment and system. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by testing security equipment and systems, including one internet protocol (IP) networked system, installed at three different locations.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when testing installed security equipment and systems:
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting and documentation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- application of *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) when testing security equipment and systems installed at client premises
- cable identification methods and techniques
- documentation to be completed when testing security equipment and systems
- keypad and control panel types and functions for a range of security equipment and systems
- materials, tools and equipment including personal protective equipment (PPE) used when testing security equipment and systems
- methods for ensuring IP networked systems and equipment are properly secured
- testing parameters and procedures for a range of security equipment and systems:
  - access control systems
  - audible and visual warning devices

- cameras and monitors
- commercial and residential alarm systems
- detection devices
- electronic and mechanical fire safety and fire locking systems
- electronic locks and locking systems
- electronic readers
- electronic screen equipment
- intercoms and control panels
- security doors and door controls
- types of earthing systems used in electrical installations
- types of electrical connections and circuits that may be encountered when testing installed security equipment and systems, and circuit protection requirements
- typical hazards encountered when testing security equipment and systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - people in the work area
  - power tools
  - vermin
  - work at heights.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, security equipment and systems, PPE, tools and materials required to achieve the performance evidence
- security equipment and system information to support testing activities
- AS/NZS 2201.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC3038 Commission and de commission security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3038A Commission and de commission security equipment and system. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to commission and de commission a range of security equipment and systems. Commissioning includes establishing equipment interconnections and parameters, installing software, setting configurations, loading hardware data and testing performance. Decommissioning includes isolating existing services and terminating energy sources. This work applies in extra low voltage environments as defined in Australian Standard *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201).

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to commission 1.1 Review work instructions to confirm client and site

- and decommission security equipment and system.
- 1.2 Review AS/NZS 2201 to understand regulatory requirements associated with commissioning and decommissioning security equipment and systems and apply to work instructions.
- 1.3 Confirm types of security equipment and system to be commissioned and decommissioned and source information to clarify procedures.
- 1.4 Review and follow workplace policies and procedures including work health and safety when carrying out work tasks.
- 2 Plan and organise work tasks.
- 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
- 2.2 Select and organise required materials, tools and equipment including personal protective equipment and check for safe and correct operation.
- 2.3 Arrange access to security equipment and systems for commissioning and decommissioning in consultation with relevant persons.
- 2.4 Identify hazards in the work area and apply risk control measures.
- 2.5 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
- 3 Commission security equipment and system.
- 3.1 Access security equipment and system and confirm equipment interconnections and parameters.
- 3.2 Customise security equipment and system to meet work instructions.
- 3.3 Set non-software configurations and confirm software is installed and hardware data loaded.
- 3.4 Conduct performance tests and confirm security equipment and system operation meets prescribed parameters and specifications.
- 3.5 Identify and document malfunctions or deviations from requirements and work timeframes.

- recommended specifications.
- 3.6 Conduct hand-over of commissioned security equipment and system.
- 4 Decommission security equipment and system.
- 4.1 Confirm security system and equipment for decommissioning.
- 4.2 Isolate existing services in consultation with relevant persons.
- 4.3 Safely terminate sources of energy according to manufacturers' instructions and WHS requirements.
- 4.4 Remove security equipment and system components in consultation with relevant persons.
- 5 Finalise commissioning and decommissioning activities and documentation.
- 5.1 Complete documentation detailing commissioning and decommissioning results according to workplace and regulatory requirements.
- 5.2 Notify work completion to relevant persons.
- 5.3 Check tools and equipment for faults, wear or damage and rectify or report problems.
- 5.4 Clean and restore work area, remove waste caused by work tasks and dispose of decommissioned security equipment and system according to workplace requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - plans and specifications when locating security equipment and systems for commissioning and decommissioning
  - Australian standards and manufacturers' instructions
- numeracy skills to interpret multimeter readings when testing commissioned security equipment and systems.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3038A Commission and decommission security equipment and system.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3038 Commission and decommission security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3038A Commission and decommission security equipment and system. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- commissioning two different types of security equipment and systems
- decommissioning two different types of security equipment and systems.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when commissioning and decommissioning security equipment and systems:
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting and documentation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- application of *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) when commissioning and decommissioning security equipment and systems installed at client premises
- basic carpentry techniques used when commissioning and decommissioning security equipment and systems
- cable identification methods and techniques
- documentation to be completed when commissioning and decommissioning security equipment and systems
- keypad and control panel types and functions for a range of security equipment and systems
- materials, tools and equipment including personal protective equipment (PPE) used when commissioning and decommissioning security equipment and systems

- methods for ensuring IP networked systems and equipment are properly secured
- methods for installing software, setting non-software configurations and confirming hardware data is loaded when commissioning security equipment and systems
- procedures for isolating existing services
- procedures for safely terminating sources of energy when decommissioning security equipment and systems
- soldering and drilling techniques used when commissioning and decommissioning security equipment and systems
- testing procedures for commissioning a range of security equipment and systems:
  - access control systems
  - audible and visual warning devices
  - cameras and monitors
  - commercial and residential alarm systems
  - detection devices
  - electronic and mechanical fire safety and fire locking systems
  - electronic locks and locking systems
  - electronic readers
  - electronic screen equipment
  - intercoms and control panels
  - security doors and door controls
- types and functions of computer software associated with security equipment and systems
- types of earthing systems used in electrical installations
- types of electrical connections and circuits encountered when commissioning and decommissioning security equipment and systems, and circuit protection requirements
- typical hazards encountered when commissioning and decommissioning security equipment and systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - people in the work area
  - power tools
  - vermin
  - work at heights.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, security equipment and systems, PPE, tools and materials required to achieve the performance evidence
- security equipment and system information to support commissioning and decommissioning activities
- AS/NZS 2201.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC3039 Diagnose faults in electronic security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3039A Identify and diagnose electronic security equipment and system fault. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to diagnose faults in electronic security equipment and systems. It includes applying methodical diagnostic procedures, testing suspected fault scenarios, and assessing test results, historical information and operational data to diagnose faults and recommend options for rectification. This work applies in extra low voltage environments as defined in Australian Standard *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201).

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to diagnose	1.1 Review work instructions to confirm client requirements
-----------------------	---

- electronic security equipment and system faults.
- and diagnostic timeframes.
- 1.2 Review AS/NZS 2201 to understand regulatory requirements associated with diagnosing security equipment and system faults and apply to work instructions.
  - 1.3 Use questioning and active listening to gather information on type of security equipment and system and extent of fault.
  - 1.4 Review and follow workplace policies and procedures including work health and safety when carrying out work tasks.
- 2 Plan and organise work tasks.
- 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
  - 2.2 Select and organise required materials, tools and equipment including personal protective equipment and check for safe and correct operation.
  - 2.3 Arrange access to security equipment and system in consultation with relevant persons.
  - 2.4 Identify hazards in the work area and apply risk control measures.
- 3 Conduct electronic security equipment and system testing and diagnostic procedures.
- 3.1 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
  - 3.2 Isolate security equipment and system according to WHS requirements.
  - 3.3 Confirm normal performance of security equipment and system against specification schedules.
  - 3.4 Inspect and check security system components and test operation according to manufacturers' instructions.
  - 3.5 Methodically apply diagnostic methods using measurements and estimations of system operating parameters.
  - 3.6 Test suspected fault scenarios to identify source of system problems.

- |   |   |   |
|---|---|---|
|   | 3.7   | Assess test data, site variables, operational and historical information to support fault diagnosis.  |
|   | 3.8   | Diagnose fault or seek assistance from relevant persons to meet work instructions.  |
| 4 | Recommend options for fault rectification and complete documentation. |   |
|   | 4.1   | Document diagnosed faults and options for fault rectification that are supported by verifiable data according to workplace and regulatory requirements. |
|   | 4.2   | Check tools and equipment for faults, wear or damage and rectify or report problems.  |
|   | 4.3   | Clean and restore work area and remove waste caused by work tasks.  |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - plans and specifications to locate equipment and system components
  - Australian standards and manufacturers' instructions.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3039A Identify and diagnose electronic security equipment and system fault.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3039 Diagnose faults in electronic security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3039A Identify and diagnose electronic security equipment and system fault. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting testing and diagnostic procedures on two different electronic security equipment and systems to diagnose a minimum of three faults.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when diagnosing faults in electronic security equipment and systems:
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting and documentation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- application of *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) when diagnosing security equipment and system faults at client premises
- cable identification methods and techniques
- documentation to be completed when diagnosing faults in electronic security equipment and systems
- keypad and control panel types and functions for a range of electronic security equipment and systems
- materials, tools and equipment including personal protective equipment (PPE) used when diagnosing faults in electronic security equipment and systems
- methods for ensuring IP networked systems and equipment are properly secured

- operational parameters and diagnostic testing procedures for a range of electronic security equipment and systems:
  - access control systems
  - audible and visual warning devices
  - cameras and monitors
  - commercial and residential alarm systems
  - detection devices
  - fire safety and fire locking systems
  - intercoms and control panels
  - locks and locking systems
  - readers
  - screen equipment
  - security doors and door controls
- operational principles of data transmission networks
- types and functions of computer software associated with electronic security equipment and systems
- types of earthing systems used in electrical installations
- types of electrical connections and circuits encountered when diagnosing faults in electronic security equipment and systems, and circuit protection requirements
- typical hazards encountered when diagnosing faults in electronic security equipment and systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - people in the work area
  - power tools
  - vermin
  - work at heights.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, electronic security equipment and systems, PPE, tools and materials required to achieve the performance evidence
- security equipment and system information to support diagnostic activities
- AS/NZS 2201.

# CPPSEC3040 Coordinate installation of security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3040A Plan and coordinate installation of security equipment and system. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to plan, schedule and supervise the installation of a range of security equipment and systems. It includes monitoring installation operations against work schedules, identifying and agreeing contingencies and variations to installation plans, and inspecting commissioning and test results to confirm equipment and systems are operational and comply with client requirements.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Plan and schedule installation of security

1.1 Review work instructions to confirm client requirements and installation timeframes.

- equipment and system.
- 1.2 Identify type of security equipment and system to be installed and organise resources needed to carry out installation.
  - 1.3 Confirm installation site access requirements in consultation with relevant persons.
  - 1.4 Schedule installation work within required timeframes and notify relevant persons.
  - 1.5 Review and follow workplace policies and procedures including work health and safety when carrying out work tasks.
- 2 Organise security equipment and system installation.
- 2.1 Authorise commencement of installation work according to workplace requirements.
  - 2.2 Monitor installation work against schedules and WHS requirements to ensure safe completion within agreed timeframes.
  - 2.3 Identify issues and contingency requirements and agree variations to installation in consultation with relevant persons.
  - 2.4 Adjust installation plan and communicate changes to relevant persons.
- 3 Check and document security equipment and system installation.
- 3.1 Receive notification of completed installation work and check activity against installation plan.
  - 3.2 Select, check and use required personal protective equipment according to workplace requirements.
  - 3.3 Visually inspect completed work to confirm installed equipment and system complies with client requirements and work instructions.
  - 3.4 Inspect commissioning and test results against system performance specifications and report identified performance faults, errors or omissions.
  - 3.5 Complete and securely store documentation associated with installation operation.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - plans and specifications when checking security equipment and system installations
  - manufacturers' instructions
- numeracy skills to schedule and sequence work completion within agreed timeframes.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3040A Plan and coordinate installation of security equipment and system.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3040 Coordinate installation of security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3040A Plan and coordinate installation of security equipment and system. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by coordinating the installation of three different security equipment and systems to meet client requirements.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when coordinating the installation of security equipment and systems:
  - health and safety including personal protective equipment (PPE)
- contingency factors that may arise when installing security equipment and systems
- documentation to be completed when coordinating security equipment and system installations
- functions and operational parameters for a range of security equipment and systems:
  - access control systems
  - audible and visual warning devices
  - cameras and monitors
  - commercial and residential alarm systems
  - detection devices
  - electronic and mechanical fire safety and fire locking systems
  - electronic locks and locking systems
  - electronic readers
  - electronic screen equipment
  - intercoms and control panels
  - security doors and door controls
- installation methods and procedures for a range of security equipment and systems

- methods for identifying performance faults, errors or omissions when comparing commissioning and test results against system performance specifications
- methods for supervising and checking work progress against installation plans and schedules
- resource requirements for the installation of security equipment and systems
- scheduling methods
- typical hazards encountered when installing and inspecting security equipment and systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - people in the work area
  - power tools
  - vermin
  - work at heights.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation and PPE for security equipment and system installations required to achieve the performance evidence.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC3041 Conduct routine service of security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3041A Maintain and service security equipment and system. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to conduct routine servicing to maintain a range of security equipment and systems. It includes identifying damage, obstructions or component wear, diagnosing common faults and making appropriate adjustments to ensure the correct operation of security equipment and systems. This work applies in extra low voltage environments as defined in Australian Standard *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201).

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to service security equipment

1.1 Review work instructions to confirm client and site requirements and routine service timeframes.

- and systems.
- 1.2 Review AS/NZS 2201 to understand regulatory requirements associated with servicing security equipment and systems and apply to work instructions.
  - 1.3 Confirm type of security equipment and system to be serviced in consultation with relevant persons.
  - 1.4 Review and follow workplace policies and procedures including work health and safety (WHS) when carrying out work tasks.
- 2 Plan and organise work tasks.
- 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
  - 2.2 Select and organise required materials, tools and equipment including personal protective equipment and check for safe and correct operation.
  - 2.3 Arrange access to security equipment and system in consultation with relevant persons.
  - 2.4 Identify hazards in the work area and apply risk control measures.
- 3 Carry out routine service procedures on security equipment and system.
- 3.1 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
  - 3.2 Access security equipment and system requiring servicing with minimal disruption to services and others in the work area.
  - 3.3 Inspect and check security equipment and system to identify damage, obstruction or component wear.
  - 3.4 Perform routine service procedures on security equipment and system following manufacturers' instructions.
  - 3.5 Conduct permitted repairs to ensure correct operation of security equipment and system following manufacturers' instructions.
  - 3.6 Identify complex fault or repair requirements and report to relevant persons for specialist attention.

- |  |   |
|--|---|
| 4 Finalise routine service and complete documentation. | 4.1 Reinststate security equipment and system and confirm correct operation and connections.  |
|  | 4.2 Notify completion of work to relevant persons.  |
|  | 4.3 Complete routine service documentation detailing service procedures, repairs undertaken and identified faults according to workplace and regulatory requirements. |
|  | 4.4 Check tools and equipment for faults, wear or damage and rectify or report problems.  |
|  | 4.5 Restore work area to original condition and remove waste caused by routine service tasks.   |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - plans and specifications when locating security equipment and systems requiring servicing
  - Australian standards and manufacturers' instructions
- numeracy skills to:
  - measure and calculate volumes, consumption and servicing requirements
  - read and interpret a multimeter.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3041A Maintain and service security equipment and system.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3041 Conduct routine service of security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3041A Maintain and service security equipment and system. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting routine servicing of three different types of security equipment and systems, one of which must be an internet protocol (IP) networked installation.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when conducting routine servicing of security equipment and systems:
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting and documentation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- application of *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) when servicing security equipment and systems
- cable identification, termination and connection procedures associated with repairing installed security equipment and systems
- documentation to be completed when conducting routine servicing of security equipment and systems to ensure compliance with licensing and warranty requirements
- maintenance schedule requirements for security equipment and systems
- methods for reinstating IP networked systems and equipment and ensuring they are properly secured
- routine service procedures for a range of security equipment and systems and repairs permitted within scope of own role, authority and competence
- security equipment calibration requirements

- techniques for recognising routine and complex faults in security equipment and systems
- tests to confirm security equipment and system functionality
- tools and equipment including personal protective equipment (PPE) used when routinely servicing security equipment and systems
- types, functions and features of a range of security equipment and systems:
  - access control systems
  - audible and visual warning devices
  - cameras and monitors
  - commercial and residential alarm systems
  - detection devices
  - electronic and mechanical fire safety and fire locking systems
  - electronic locks and locking systems
  - electronic readers
  - electronic screen equipment
  - intercoms and control panels
  - security doors and door controls
- types of earthing systems used in electrical installations
- typical hazards encountered when conducting routine servicing of security equipment and systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - hidden utilities
  - people in the work area
  - power tools
  - vermin.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, security equipment and systems, PPE and tools required to achieve the performance evidence
- manufacturers' instructions for equipment to be serviced

- AS/NZS 2201.

# CPPSEC3042 Diagnose faults in video surveillance systems and equipment

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3042A Identify and diagnose CCTV equipment and system fault. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to diagnose faults in video surveillance systems (VSS) and equipment. VSS is a surveillance system capable of capturing images and videos that can be compressed, stored or sent over communications networks, and includes closed circuit television (CCTV) and audio systems. The unit includes applying methodical diagnostic procedures, testing suspected fault scenarios, and assessing test results, historical information and operational data to diagnose faults and recommend options for rectification. This work applies in extra low voltage environments as defined in Australian Standard *AS/NZS 2201.1:2007 Intruder alarm systems - Client's premises - Design, installation, commissioning and maintenance (AS/NZS 2201)*.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- 1 Prepare to diagnose VSS and equipment faults.
  - 1.1 Review work instructions to confirm client requirements and diagnostic timeframes.
  - 1.2 Review AS/NZS 2201 to understand regulatory requirements associated with diagnosing VSS and equipment faults and apply to work instructions.
  - 1.3 Use questioning and active listening to gather information on type of VSS and equipment and extent of fault.
  - 1.4 Review and follow workplace policies and procedures including work health and safety (WHS) when carrying out work tasks.
  
- 2 Plan and organise work tasks.
  - 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
  - 2.2 Select and organise required materials, tools and equipment including personal protective equipment and check for safe and correct operation.
  - 2.3 Arrange access to VSS and equipment in consultation with relevant persons.
  - 2.4 Identify hazards in the work area and apply risk control measures.
  
- 3 Conduct VSS and equipment testing and diagnostic procedures.
  - 3.1 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
  - 3.2 Isolate VSS and equipment according to WHS requirements.
  - 3.3 Confirm normal performance of VSS and equipment against specification schedules.
  - 3.4 Inspect and check VSS and equipment components and test operation according to manufacturers' instructions.
  - 3.5 Methodically apply diagnostic methods using measurements and estimations of VSS and equipment operating parameters.
  - 3.6 Test suspected fault scenarios to identify source of system problems.

- |   |   |   |
|---|---|---|
|   | 3.7   | Assess test data, site variables, operational and historical information to support fault diagnosis.  |
|   | 3.8   | Diagnose fault or seek assistance from relevant persons to meet work instructions.  |
| 4 | Recommend options for fault rectification and complete documentation. |   |
|   | 4.1   | Document diagnosed faults and options for fault rectification that are supported by verifiable data according to workplace and regulatory requirements. |
|   | 4.2   | Check tools and equipment for faults, wear or damage and rectify or report problems.  |
|   | 4.3   | Clean and restore work area and remove waste caused by work tasks.  |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - circuit diagrams
  - plans and specifications when locating system and equipment components
  - Australian standards and manufacturers' instructions.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3042A Identify and diagnose CCTV equipment and system fault.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3042 Diagnose faults in video surveillance systems and equipment

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3042A Identify and diagnose CCTV equipment and system fault. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting testing and diagnostic procedures on two different video surveillance systems (VSS) and equipment to diagnose a minimum of three faults.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when diagnosing faults in VSS and equipment:
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting and documentation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- application of *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) when diagnosing security equipment and system faults at client premises
- cable identification methods and techniques
- documentation to be completed when diagnosing faults in VSS and equipment
- keypad and control panel types and functions for a range of VSS and equipment
- materials, tools and equipment including personal protective equipment (PPE) used when diagnosing faults in VSS and equipment
- methods for ensuring IP networked systems and equipment are properly secured
- operational parameters and diagnostic testing procedures for a range of VSS and equipment:
  - audio systems

- cameras:
  - pan-tilt-zoom and infra-red sensitive
- image presentation:
  - display type, real-time surveillance, resolution and number of images
- recording:
  - image compression, frame rates, resolution, storage capacity, basic metadata, playback and image export
- system integration
- operational principles of data transmission networks
- types and functions of computer software associated with VSS and equipment
- types of earthing systems used in electrical installations
- types of electrical connections and circuits encountered when diagnosing faults in VSS and equipment, and circuit protection requirements
- typical hazards encountered when diagnosing faults in VSS and equipment and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - people in the work area
  - power tools
  - vermin
  - work at heights.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, VSS and equipment, PPE, tools and materials required to achieve the performance evidence
- VSS and equipment information to support diagnostic activities
- AS/NZS 2201.

# CPPSEC3043 Establish and test electronic monitoring parameters for security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3043A Establish and set up electronic monitoring parameters. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to formulate, test and evaluate electronic monitoring parameters for a range of security equipment and systems. It includes designing templates to support monitoring parameters, and conducting tests to evaluate monitoring performance and functions, signals and data and identify errors or deviations in transmitted data.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |                                    |     |   |
|------------------------------------|-----|---|
| 1 Determine monitoring parameters. | 1.1 | Review work instructions to confirm electronic monitoring requirements and timeframes.                      |
|                                    | 1.2 | Review and follow workplace policies and procedures including work health and safety when carrying out work |

- tasks.
- 1.3 Inspect security equipment and system and confirm monitoring functions and capabilities.
  - 1.4 Formulate monitoring parameters to meet monitoring capabilities of security equipment and system and monitoring station.
  - 1.5 Obtain and review information required to establish monitoring parameters and clarify issues with relevant persons.
- 2 Test monitoring parameters.
- 2.1 Design template to support monitoring parameters and enter data in the correct format and style.
  - 2.2 Cross-check and verify entered data against established monitoring parameters.
  - 2.3 Identify testing procedures to evaluate monitoring performance and functions.
  - 2.4 Conduct required tests to check monitoring performance and functions, signals and data while maintaining communication with relevant persons.
- 3 Evaluate and document test results.
- 3.1 Accurately interpret transmitted test data and compare against test requirements to evaluate monitoring performance and functions.
  - 3.2 Identify errors or deviations from specifications and report to relevant persons.
  - 3.3 Accurately complete documentation incorporating details of established parameters, test results and identified errors or deviations according to workplace requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret written and diagrammatic technical instructions when testing equipment operation
- numeracy skills to interpret numerical codes and specifications when establishing system parameters.

## **Unit Mapping Information**

Supersedes and equivalent to CPPSEC3043A Establish and set up electronic monitoring parameters.

## **Links**

Companion volumes to this training package are available at the VETNet website -

# Assessment Requirements for CPPSEC3043 Establish and test electronic monitoring parameters for security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3043A Establish and set up electronic monitoring parameters. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by establishing and testing electronic monitoring parameters for two different security equipment and systems.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when establishing and testing monitoring parameters for security equipment and systems:
  - documentation and reporting
  - licensing requirements and limits of own authority
  - privacy requirements
  - work health and safety
- common electronic monitoring equipment and system configurations and programs
- common faults and malfunctions in security equipment and systems used for electronic monitoring
- common keypad and control panel types and functions associated with electronic security systems and equipment
- computer software and software templates used for monitoring functions in security systems
- key considerations when formulating monitoring parameters:
  - alarms
  - functions monitored
  - levels of access and access times
  - levels of integrity of systems

- passwords and codes
- recording functions
- response requirements
- documentation to be completed when establishing and testing monitoring parameters for security equipment and systems
- methods for interpreting transmitted test data and comparing against test requirements to evaluate monitoring performance and functions
- methods for testing and evaluating performance and functions of a range of electronic monitoring equipment and systems and identifying errors or deviations
- operating principles and functions of a range of electronic monitoring equipment and systems
- procedures for testing monitoring parameters
- software templates for electronic security equipment and systems
- types and operation of computer software used for monitoring functions.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Candidates must have access to:

- workplace policies and procedures, computer, software, electronic security equipment and systems and associated documentation required to achieve the performance evidence.

# CPPSEC3044 Conduct routine service of electronic locks and locking systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3044A Maintain and repair mechanical lock and locking system. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to conduct routine servicing to maintain a range of electronic locks and locking systems. It includes identifying damage, friction, sticking or component wear, and making required repairs to ensure the correct operation of electronic locks and locking systems.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to service electronic locks and locking systems.

1.1 Review work instructions to confirm client and site requirements and routine service timeframes.

1.2 Confirm type of electronic lock and locking system to be serviced and specific maintenance requirements in

- consultation with relevant persons.
- 1.3 Review and follow workplace policies and procedures including work health and safety (WHS) when carrying out work tasks.
- 2 Plan and organise work tasks.
- 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
- 2.2 Select and organise required materials, tools and equipment including personal protective equipment and check for safe and correct operation.
- 2.3 Arrange access to electronic lock and locking system in consultation with relevant persons.
- 2.4 Identify hazards in the work area and apply risk control measures.
- 3 Carry out routine service procedures on electronic lock and locking system.
- 3.1 Use safe work practices when conducting routine service procedures according to WHS requirements.
- 3.2 Access electronic lock and locking system requiring servicing with minimal disruption to services and others in the work area.
- 3.3 Inspect and check electronic lock and locking system to identify damage, friction, sticking or component wear.
- 3.4 Perform routine service procedures on electronic lock and locking system following manufacturers' instructions and WHS requirements.
- 3.5 Identify and adjust common faults and replace worn keys to ensure correct operation of electronic lock and locking system.
- 3.6 Identify complex fault or repair requirements and report to relevant persons for specialist attention.
- 4 Finalise routine service and complete documentation.
- 4.1 Check serviced lock and locking system and confirm correct operation.
- 4.2 Notify completion of work to relevant persons.

- 4.3 Complete routine service documentation detailing service procedures, repairs undertaken and identified faults according to workplace requirements.
- 4.4 Check tools and equipment for faults, wear or damage and rectify or report problems.
- 4.5 Restore work area to original condition and remove waste caused by routine service tasks.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - plans and specifications when locating electronic locks and locking systems requiring servicing
  - manufacturers' instructions
- numeracy skills to:
  - measure and calculate volumes, consumption and servicing requirements
  - read and interpret a multimeter.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3044A Maintain and repair mechanical lock and locking system.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3044 Conduct routine service of electronic locks and locking systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3044A Maintain and repair mechanical lock and locking system. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting routine servicing of three different electronic locks and locking systems and complete routine service documentation.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when conducting routine servicing of electronic locks and locking systems:
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting and documentation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- documentation to be completed when conducting routine servicing of electronic locks and locking systems to ensure compliance with licensing and warranty requirements
- maintenance procedures for a range of electronic locks and locking systems and repairs permitted within scope of own role, authority and competence
- procedures for disassembling and reassembling electronic locks and locking systems
- signs of damage, friction, sticking and component wear and worn keys associated with electronic locks and locking systems
- techniques for recognising routine and complex faults and malfunctions in a range of electronic locks and locking systems
- tools and equipment including personal protective equipment (PPE) used when conducting routine servicing of electronic locks and locking systems
- types, features and operating principles of a range of electronic locks and locking systems

- typical hazards encountered when conducting routine servicing of electronic locks and locking systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - hidden utilities
  - people in the work area
  - power tools
  - vermin.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, electronic locks and locking systems, PPE and tools required to achieve the performance evidence
- manufacturers' instructions for locks and locking systems to be serviced.

# CPPSEC3045 Assess security equipment and systems to specify required modifications

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3045A Determine security equipment and system modifications. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to assess security equipment and systems to specify modifications required to meet changed operational requirements. It includes assessing security equipment and system functions and capabilities, proposing feasible modifications and adjusting system schematics, specifications and configurations accordingly.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |     |   |
|--|-----|---|
| 1 Assess security equipment and system functions and capabilities. | 1.1 | Review work instructions to confirm client objectives, timeframes and budget constraints for security equipment and system modifications. |
|  | 1.2 | Review and follow workplace policies and procedures including work health and safety (WHS) when carrying                                  |

- out work tasks.
- 1.3 Review security equipment and system specifications and standards to clarify normal operational functions and performance parameters.
  - 1.4 Review historical information and operational data for security equipment and system to clarify current operational functions and capabilities.
  - 1.5 Review security equipment and system specifications to identify modification capabilities according to manufacturers' instructions.
- 2 Formulate security equipment and system modifications.
- 2.1 Conduct research to identify design concepts and options for security equipment and system to meet changed operational requirements.
  - 2.2 Evaluate identified options and select preferred modifications to satisfy client requirements.
  - 2.3 Adjust security equipment and system schematics, specifications and configurations to clearly and accurately detail planned modifications.
  - 2.4 Check proposed modifications and confirm compliance with legislative requirements.
- 3 Document recommended security equipment and system modifications.
- 3.1 Use information technology to clearly and accurately document recommended security equipment and system modifications within agreed timeframes.
  - 3.2 Seek feedback on recommendations and make required adjustments to obtain client acceptance of proposed modifications.
  - 3.3 Complete and securely store documentation in a manner that facilitates future retrieval and maintains confidentiality according to workplace and regulatory requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use questioning and active listening when seeking feedback from clients
- reading skills to interpret key requirements of:
  - drawing and drafting symbols
  - plans, drawings and specifications in diagrammatic and schematic formats
  - Australian standards and manufacturers' instructions
- writing skills to draw plans and schematics when adjusting specifications and configurations.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3045A Determine security equipment and system modifications.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3045 Assess security equipment and systems to specify required modifications

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3045A Determine security equipment and system modifications. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by specifying required modifications to meet changed operational requirements of three different types of security equipment and systems.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when specifying modifications to security equipment and systems:
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting
  - work health and safety
- configuration options for a range of security equipment and systems
- considerations to ensure protection of IP networked security systems and equipment when specifying modifications
- documentation to be completed when specifying modifications to security equipment and systems
- materials, tools and equipment used when specifying modifications to security equipment and systems
- methods for evaluating design options when selecting preferred modifications
- principles of security system design, specifications and configurations
- principles of security system programming and configuration
- sources of historical information and operational data used when assessing functions and capabilities of security equipment and systems
- techniques for drawing and drafting used when specifying modifications to security equipment and systems

- types and functions of a range of security equipment and systems.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, equipment, tools and materials and security equipment and system information required to achieve the performance evidence
- information technologies to source and present information to support work tasks.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC3046 Develop security system configurations and specifications for client sites

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3046A Configure a security system.  
Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to develop security system specifications and configurations to meet the requirements of different client sites. It includes assessing sites and security risk factors to select security system design options and develop specifications for equipment configurations and placement. This work applies in extra low voltage environments as defined in Australian Standard *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201).

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |                              |   |
|------------------------------|---|
| 1 Plan and prepare for work. | 1.1 Review work instructions to confirm client requirements, site location and work timeframes. |
|------------------------------|---|

- 1.2 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
  - 1.3 Review AS/NZS 2201 to understand regulatory requirements associated with installing security equipment and systems and apply to work instructions.
  - 1.4 Arrange access to work site in consultation with relevant persons.
  - 1.5 Select and organise required materials, tools and equipment including personal protective equipment and check for safe and correct operation.
  - 1.6 Review and follow workplace policies and procedures including work health and safety (WHS) when carrying out work tasks.
- 2 Assess client and site requirements.
- 2.1 Identify hazards in the work area and apply risk control measures.
  - 2.2 Conduct a detailed site assessment.
  - 2.3 Identify and assess site security risk factors.
  - 2.4 Record results of site assessment and identified security risk factors.
- 3 Formulate security system specifications and configurations.
- 3.1 Evaluate design options and select preferred security system configurations to meet site and client requirements.
  - 3.2 Prepare schematics and specifications that accurately detail installation requirements to enable accurate costings to be calculated.
  - 3.3 Select and calculate security equipment and material types and quantities to best meet system specifications.
  - 3.4 Check to verify security system specifications, configurations, placement and positioning comply with legal requirements.
  - 3.5 Seek information and assistance from relevant persons to finalise security system specifications and configurations within agreed timeframes.

- |  |     |   |
|--|-----|---|
| 4 Document and finalise security system specifications and configurations. | 4.1 | Use information technology to clearly and accurately document security system specifications and configuration recommendations according to workplace requirements.       |
|  | 4.2 | Seek feedback on recommendations and make required adjustments to obtain client acceptance of proposed security system specifications and configurations.                 |
|  | 4.3 | Complete and securely store documentation in a manner that facilitates future retrieval and maintains confidentiality according to workplace and regulatory requirements. |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use questioning and active listening when seeking feedback from clients
- reading skills to interpret key requirements of:
  - drawing and drafting symbols
  - plans, drawings and specifications in diagrammatic and schematic formats
  - Australian standards and manufacturers' instructions
- writing skills to draw plans and schematics when configuring security systems.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC3046A Configure a security system.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3046 Develop security system configurations and specifications for client sites

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3046A Configure a security system.  
Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by developing security system configurations and specifications to meet the requirements of three different client sites.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when developing security system specifications and configurations:
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- application of *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) when programming and configuring security equipment and systems at client premises
- configuration options for a range of security equipment and systems
- documentation to be completed when developing security system specifications and configurations
- installation considerations to ensure protection of IP networked security systems and equipment
- materials, tools and equipment including personal protective equipment (PPE) used when specifying and configuring security systems and assessing client sites
- principles of security system design, specifications and configurations
- principles of security system programming and configuring

- requirements for installing different security equipment and systems at client sites
- techniques for drawing and drafting used when specifying and configuring security system installations
- types and functions of a range of security equipment and systems
- types of security risk factors associated with client sites
- typical hazards encountered when assessing client sites and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - people in the work area
  - vermin.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, PPE, equipment and technologies, tools and materials required to achieve the performance evidence
- security equipment and system and client site information required to achieve the performance evidence
- AS/NZS 2201.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC3047 Provide estimate and quote on security system installations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3047A Provide estimate and quote on security system. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to provide written estimates and quotes on security system installations. It includes assessing client security requirements and specifications, inspecting installation sites to identify problems impacting the installation, obtaining quotes from suppliers, and sourcing and costing equipment, labour and materials.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |   |
|--|---|
| 1 Confirm compliance requirements and client security needs. | 1.1 Review work instructions and documentation to confirm client requirements, security system installation specifications and timeframes for estimate and quote. |
|  | 1.2 Review and comply with workplace policies and procedures and relevant regulatory requirements when  |

- providing estimate and quote for security system installation.
- 1.3 Consult with client to confirm security needs and expectations.
  - 1.4 Identify security system type and requirements for installation to meet client needs.
  - 1.5 Confirm capacity to provide required security system according to workplace requirements.
- 2 Obtain quotations and source installation resources.
- 2.1 Review workplace rate schedules to establish pricing information for security system installation.
  - 2.2 Source quotations for installation equipment, labour and materials ensuring fair comparisons between suppliers.
  - 2.3 Consult with preferred supplier to confirm resource availability and delivery date to meet client requirements.
  - 2.4 Inspect installation site to identify factors impacting installation and apply contingencies to address problems and meet client requirements.
  - 2.5 Calculate cost of security system installation and check to confirm accuracy.
- 3 Finalise quotation for security system installation.
- 3.1 Prepare and present written quotation to client within agreed timeframes.
  - 3.2 Negotiate with client to agree required changes or variations and finalise quotation.
  - 3.3 Create client file and store documentation in a manner that facilitates future retrieval and maintains confidentiality according to workplace and regulatory requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - plans and drawings when assessing equipment specifications
  - technical product specifications in written and diagrammatic formats
- numeracy skills to:
  - accurately calculate estimates and quotations to return a profit where possible
  - compare prices obtained from different suppliers.

## **Unit Mapping Information**

Supersedes and equivalent to CPPSEC3047A Provide estimate and quote on security system.

## **Links**

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3047 Provide estimate and quote on security system installations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3047A Provide estimate and quote on security system. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by documenting written quotations for the supply and installation of security systems to meet the differing needs of three clients.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when providing estimates and quotes on security system installations:
  - client service standards
  - legislative, regulatory and contractual obligations associated with providing quotes for the supply and installation of security equipment and systems
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting and documentation
  - work health and safety
- calculation methods used to compare prices and estimate costs and return a profit on supply and installation of security systems
- content and format requirements for preparing written estimates and quotes
- how to safeguard confidential client information
- methods for assessing client sites and surrounds to identify problems impacting the installation of security systems
- methods for ensuring fair supplier comparisons
- methods for gaining permission to access client sites and persons authorised to grant permission
- potential suppliers of equipment, labour and materials for security systems installations
- types and functions of a range of security equipment and systems

- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Candidates must have access to:

- workplace policies and procedures, equipment and technologies, client instructions and documentation, and supplier and product information required to achieve the performance evidence.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC3053 Implement measures to secure IP networked security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Application

This unit specifies the skills and knowledge required to implement measures to secure internet protocol (IP) networked security equipment and systems to protect physical security systems from cyber threats. It includes confirming existing network arrangements, checking firewalls, network controls and protection levels, identifying vulnerabilities to cyber threats and implementing required controls to secure IP networked systems.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Confirm security equipment and system network arrangements.

1.1 Review work instructions to confirm client requirements and equipment location and clarify issues with relevant persons.

1.2 Review and comply with workplace policies and procedures and key regulatory requirements when

- carrying out work tasks.
- 1.3 Inspect security equipment and system to clarify operational parameters and locate control panels and software.
  - 1.4 Obtain authorisations and information required to access IP network and system configurations.
- 2 Identify vulnerabilities and secure IP networked equipment and system.
- 2.1 Access IP network and system configurations for security equipment and system.
  - 2.2 Use network testing and monitoring tools and commands to check network connectivity and continuity and identify anomalies.
  - 2.3 Check firewalls and network controls and make required updates.
  - 2.4 Assess system protection levels to identify vulnerabilities to cyber threat.
  - 2.5 Check authentications, encryptions and supervision levels and make required changes to improve system protections.
  - 2.6 Perform software upgrades to install latest definitions.
  - 2.7 Complete work tasks and check to ensure IP networked security equipment and system is operating correctly.
- 3 Report results and complete documentation.
- 3.1 Notify work completion to relevant persons.
  - 3.2 Complete documentation detailing actions taken to secure IP networked security equipment and system according to workplace and regulatory requirements.
  - 3.3 Report identified cyber vulnerabilities and required remedial actions for specialist attention.
  - 3.4 Restore work area to original condition and remove waste caused by work tasks.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of schematics and manufacturers' instructions for security equipment, systems and software
- numeracy skills to perform calculations in binary and hexadecimal number systems.

## Unit Mapping Information

No equivalent unit.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC3053 Implement measures to secure IP networked security equipment and systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by implementing measures to secure two different types of internet protocol (IP) networked security equipment and systems and identifying at least two vulnerabilities to cyber threat for each system.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when implementing measures to secure IP networked security equipment and systems:
  - licensing requirements and limits of own authority
  - privacy requirements
  - reporting
  - requirements for complying with Australian Communications Authority cabling standards
  - work health and safety
- common computer commands used to verify and manage IP and network performance
- common cyber threats attributed to IP networked security equipment and systems and solutions
- common ways that physical security systems can be breached by hackers:
  - monitoring protected areas and information through video surveillance systems
  - removing records from the security management system
  - taking control of locking and monitoring systems
  - turning off security systems
- documentation to be completed when implementing measures to secure IP networked security equipment and systems
- fundamentals of routers, switches, firewalls and wireless access points

- fundamentals of scripting language
- internet of things (IOT) devices and common security issues relating to IOT devices
- meaning of multiple form factor authentication
- principles of security system networking and integration including IP addresses and devices
- physical security system designs and configurations that offer security from cyber threats including multiple levels of protection:
  - authentication
  - encryption
  - supervision
- techniques for ensuring IP networked systems and equipment are properly secured
- types of network testing and monitoring tools and commands used to check network connectivity and continuity
- ways that physical security systems become vulnerable to cyber threats
- wireless technologies commonly found in modern security systems.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, IP networked security equipment, tools and software required to achieve the performance evidence.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC4001 Manage work health and safety in the security work environment

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4001A Manage a safe workplace in the security industry. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to manage work health and safety in the security work environment. It includes facilitating WHS awareness, legislative compliance and consultation, monitoring compliance with risk control procedures, and planning and implementing WHS training for individuals and teams.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Facilitate WHS awareness and compliance.

1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures, including work health and safety (WHS), and apply to security operations to ensure compliance.

- 1.2 Access security industry networks to source WHS information and maintain awareness of current WHS practices and changed regulatory requirements.
  - 1.3 Disseminate WHS policies, procedures and information throughout the workplace to facilitate WHS awareness and compliance with legal rights and responsibilities.
  - 1.4 Explain WHS policies and procedures to the work group to support compliance with legislative and regulatory requirements.
- 2 Facilitate WHS consultation, cooperation and communication.
    - 2.1 Arrange WHS consultation activities to exchange information on WHS issues and compliance.
    - 2.2 Monitor WHS activities to ensure work group members cooperate in WHS management.
    - 2.3 Consult with work group members to identify WHS issues and implement prompt response actions.
    - 2.4 Update policies and procedures to address WHS issues raised through consultation and promptly disseminate revised information.
- 3 Monitor compliance with risk control processes.
    - 3.1 Implement hazard identification procedures in the security work environment and monitor reporting processes to confirm compliance.
    - 3.2 Implement procedures to control security risks and monitor correct use of the hierarchy of controls by individuals and teams.
    - 3.3 Identify and address procedural inadequacies associated with hazard identification and risk control.
- 4 Implement WHS training.
    - 4.1 Develop and document a WHS training plan to meet individual and team training needs in consultation with relevant persons.
    - 4.2 Review WHS training processes and materials and make required adjustments to ensure relevance and capacity to meet individual and team WHS learning needs.

- 4.3 Source and implement WHS training opportunities and monitor achievement against the plan.
- 4.4 Update the training plan to respond to changes in the work group or WHS policies, procedures or legislative requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey and clarify WHS information
- writing skills to prepare succinct and logically structured policies, procedures and training plans.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4001A Manage a safe workplace in the security industry.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4001 Manage work health and safety in the security work environment

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4001A Manage a safe workplace in the security industry. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by managing work health and safety (WHS) in the security work environment including:

- developing WHS policies and procedures associated with:
  - security at a mass gathering
  - security response in the event of an active threat
- arrange a minimum of two WHS consultation activities with at least two participants at each
- develop and document a training plan that meets the WHS training needs of two individuals and one security team.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when managing WHS in the security work environment:
  - anti-discrimination and diversity
  - counter terrorism
  - legal rights and responsibilities of employers, supervisors and employees associated with WHS and duty of care
  - licensing requirements in the security industry
  - reporting and documentation
  - use of force
  - WHS legislation, regulations and codes of conduct in the jurisdiction of operation
- consultative processes that can facilitate WHS awareness and information exchange
- procedures for communicating and collaborating with emergency services
- process of dynamic risk assessment and application of risk management using the hierarchy of controls

- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommend response
  - general features of improvised explosive devices and recommended incident response
- typical security workplace hazards, risks and emergency situations and the control measures for each
- ways that social and cultural differences may be expressed
- WHS implications for workgroup arising from the *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- WHS training opportunities and basics of adult learning styles.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations and codes of practice that apply to WHS management in the security industry and jurisdiction of operation
- information technologies and resources required to achieve the performance evidence
- *Australia's Strategy for Protecting Crowded Places from Terrorism*
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism.*

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC4003 Assess and advise on client security needs

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent CPPSEC4003A Advise on security needs. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to assess the security needs of clients and provide documented advice on products and services to meet those needs. It includes conducting a security risk assessment of the client's specific circumstances and operating environment and evaluating client satisfaction to improve service provision.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |                                 |  |
|---------------------------------|--|
| 1 Assess client security needs. | 1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures and apply to work instructions to ensure compliance. |
|                                 | 1.2 Consult with client to confirm their immediate, short, and long-term security needs, expectations and budget.  |

- 1.3 Obtain and analyse valid and relevant information to clarify client circumstances and operating environment.
  - 1.4 Assess security risk associated with client circumstances and operating environment based on analysis conducted.
  - 1.5 Identify and assess existing and potential security issues to determine their impact on client requirements.
  - 1.6 Recognise own limitations in assessing client requirements and access specialist resources or advice to meet client requirements.
- 2 Advise on security options to meet client needs.
- 2.1 Identify available security products and services to meet client needs and budget and select recommended security solutions.
  - 2.2 Source comprehensive information to support recommended products and services and alternative options to meet client requirements.
  - 2.3 Prioritise recommendations and alternative options and collate evidence of their suitability to meet client requirements.
  - 2.4 Use information technologies to document and present client advice in a format and style to meet workplace requirements.
  - 2.5 Explain features and benefits of recommended products and services to client and obtain feedback on suitability and sufficiency of advice.
- 3 Evaluate advice provision to improve client service.
- 3.1 Evaluate client feedback to ascertain effectiveness of advice and satisfaction with service provision.
  - 3.2 Identify and action changes necessary to improve advice to meet client needs and comply with workplace requirements for client service.
  - 3.3 Complete and secure client documentation in a manner that facilitates future retrieval and maintains confidentiality.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey and clarify information to match security services and products to client needs
- writing skills to document succinct and logically structured client advice.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4003A Advise on security needs.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4003 Assess and advise on client security needs

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent CPPSEC4003A Advise on security needs. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by assessing and advising on security products and services to meet the different security needs of three clients.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when advising clients on security needs:
  - client service standards
  - licensing requirements in the security industry
  - regulatory requirements associated with providing advice about security products and services
  - reporting and documentation
- application of *ISO 31000:2018 Risk management – Guidelines* when advising clients on security needs
- basic requirements for the installation of a range of security equipment and systems
- changing risk context of client operations
- how and where security manpower can be effectively used
- methods for comparing and contrasting security product and service information
- operational principles of, and information technologies used in internet protocol networked security equipment and systems
- process of dynamic risk assessment and application of risk management using the hierarchy of controls
- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places

- objectives, characteristics and identification of active armed offenders
- definition of hostile vehicles and methods of attack
- signs of chemical weapons attack and recommend response
- general features of improvised explosive devices and recommended incident response
- type and nature of a range of security risks and measures for controlling these using security products and services
- types, functions, advantages and disadvantages of common security products and services
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations, codes of practice and policies and procedures that apply to the provision of security advice and services in the jurisdiction of operation
- client information and specifications, information technologies and resources required to achieve the performance evidence
- *ISO 31000:2018 Risk management – Guidelines*
- *Australia's Strategy for Protecting Crowded Places from Terrorism.*

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC4004 Supervise security operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4004A Monitor and review security operations. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to supervise security operations. It includes developing operational plans, assessing and controlling anticipated security risks, monitoring operations and implementing required contingencies. It also includes evaluating the results based on debriefing sessions and incident observations to recommend improvements to future operations.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Plan and organise security operation.

1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures, including work health and safety (WHS), and apply to work instructions to ensure compliance.

- 1.2 Obtain and review work instructions to clarify security operation timeframes and resource requirements.
  - 1.3 Develop and document operational plan and schedule activities and resources to effectively conduct security operation to meet work instructions.
  - 1.4 Identify and assess anticipated risks associated with security operation and implement risk control measures in accordance with WHS requirements.
  - 1.5 Organise required equipment, resources and technologies following workplace procedures.
  - 1.6 Establish communication processes and chain of command requirements.
  - 1.7 Brief relevant persons to explain operational information and instructions and use questioning and active listening to respond to issues and concerns.
- 2 Monitor security operation.
- 2.1 Systematically monitor security operation progress against operational plan.
  - 2.2 Use security equipment, resources and technologies to support monitoring tasks following manufacturers' instructions.
  - 2.3 Maintain communication with team members and receive, confirm and organise requested assistance.
  - 2.4 Identify contingencies affecting the security operation and vary the operational plan in consultation with relevant persons.
  - 2.5 Record and report operational information according to workplace requirements.
- 3 Review security operation.
- 3.1 Evaluate effectiveness of security operations in consultation with relevant persons.
  - 3.2 Plan, schedule and conduct debriefing sessions for individuals involved in the operation.
  - 3.3 Review incident observations to identify opportunities for improvement to future security operations.

- 3.4 Document review findings and recommendations and present to relevant persons according to workplace requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey and clarify operational information
- writing skills to prepare succinct and logically structured operational plans.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4004A Monitor and review security operations.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4004 Supervise security operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4004A Monitor and review security operations. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by supervising three different security operations including for each operation:

- receiving a minimum of two requests for assistance during the operation
- identifying a minimum of two contingencies requiring the operational plan to be varied
- planning and conducting debriefing sessions involving a minimum of two participants.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when supervising security operations:
  - anti-discrimination and diversity
  - apprehension, arrest and restraint of persons
  - key requirements of legislation, regulations and codes of conduct for security operations in the jurisdiction of operation
  - legal rights and responsibilities of employers, supervisors and employees associated with work health and safety and duty of care
  - licensing requirements in the security industry
  - personal protective equipment
  - trespass and removal of persons
  - use of force
- chain of command and communication processes used to monitor security operations
- implications for security operations arising from the *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- key principles of team dynamics, team leadership and management
- methods for briefing security operations information and instructions to individuals and teams

- methods for debriefing security operations with individuals and teams
- methods for reviewing security operations to identify procedural improvements
- procedures for communicating and collaborating with emergency services
- process of dynamic risk assessment and application of risk management using the hierarchy of controls
- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommend response
  - general features of improvised explosive devices and recommended incident response
- typical security workplace hazards, risks and emergency situations and the control measures for each
- ways that social and cultural differences may be expressed
- work scheduling procedures.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations and codes of practice that apply to security operations in the jurisdiction of operation
- work instructions, security equipment, resources and information technologies required to achieve the performance evidence
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- *Australia's Strategy for Protecting Crowded Places from Terrorism*.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC4005 Facilitate security operations briefing and debriefing processes

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4005A Facilitate workplace briefing and debriefing processes. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to facilitate security operations briefing and debriefing processes. It includes scheduling and conducting briefings to provide operational information and instructions, and debriefings to review operational outcomes including incident observations and lessons learned. It requires identifying areas of concern associated with the wellbeing of individuals and implementing suitable support strategies and recommending procedural improvements to future operations.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Plan and prepare for briefing and

1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures, including work health and safety (WHS), and apply to

- debriefing. work instructions to ensure compliance.
- 1.2 Obtain and assess operational information to clarify and inform briefing and debriefing objectives.
  - 1.3 Plan and schedule briefing and debriefing processes in consultation with relevant persons.
  - 1.4 Identify and confirm location for briefing and debriefing processes.
  - 1.5 Notify relevant persons of requirements to attend briefing and debriefing processes.
- 2 Conduct security briefing.
- 2.1 Select and use briefing method to suit briefing objectives, number of participants and complexity of information to be shared.
  - 2.2 Conduct briefing to provide concise and clear operational information and instructions in accordance with briefing objectives.
  - 2.3 Use questioning and active listening to elicit contributions and seek feedback from relevant persons to confirm operational information and instructions have been understood.
- 3 Conduct security debriefing.
- 3.1 Select and use debriefing method to suit debriefing objectives and individual and team requirements.
  - 3.2 Conduct debriefing to review operational outcomes and analyse incident observations and lessons learned.
  - 3.3 Use questioning and active listening to elicit contributions and seek feedback from relevant persons and recommend procedural improvements for future security operations.
  - 3.4 Identify areas of concern associated with the wellbeing of relevant persons and implement suitable support strategies to meet individual needs.
- 4 Finalise and report security briefing and
- 4.1 Record and document outcomes of briefing and debriefing according to workplace requirements.

- debriefing outcomes.
- 4.2 Schedule follow-up actions arising from briefing and debriefing in consultation with relevant persons.
  - 4.3 Complete and secure briefing and debriefing documentation in a manner that facilitate future retrieval and maintains confidentiality.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of incident reports and security intelligence when preparing for briefing and debriefing processes
- writing skills to prepare succinct and logically structured briefing and debriefing documentation.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4005A Facilitate workplace briefing and debriefing processes.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4005 Facilitate security operations briefing and debriefing processes

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4005A Facilitate workplace briefing and debriefing processes. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting briefing and debriefing processes for three different security operations involving:

- at least two briefing processes and two debriefing processes including face-to-face group discussions with a minimum of three participants
- identifying support strategies to support the specific wellbeing needs of two individuals arising from debriefing of each security operation
- reviewing incident observations representing different types of incident scenarios for each security operation.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when facilitating security operations briefing and debriefing:
  - anti-discrimination and diversity
  - key requirements of legislation, regulations and codes of conduct governing security operations in the jurisdiction of operation
  - legal rights and responsibilities of employers, supervisors and employees associated with work health and safety and duty of care
  - licensing requirements in the security industry
- implications for security operations arising from the *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- methods used to brief individuals and teams in preparation for security operations
- methods used to debrief security operations to identify issues and concerns and procedural improvements
- persons required to be involved in the briefing and debriefing of security operations
- signs and symptoms of work-related stress and associated support strategies
- techniques for facilitating group discussions and encouraging input from individuals

- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommend response
  - general features of improvised explosive devices and recommended incident response
- typical security workplace hazards, risks and emergency situations and the control measures for each
- ways that social and cultural differences may be expressed
- work scheduling procedures.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations and codes of practice that apply to briefing and debriefing of security operations in the jurisdiction of operation
- work instructions and operational information, security equipment, resources and information technologies required to achieve the performance evidence
- *Australia's Strategy for Protecting Crowded Places from Terrorism*
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*.

# CPPSEC4006 Conduct security risk assessment of client operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4006A Assess risks. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to conduct a security risk assessment of client operations. It includes analysing client operations and associated information and intelligence to develop a risk assessment register, develop and apply risk assessment criteria to measure risks and consequences to client operations and recommend appropriate countermeasures. This unit of competency does not cover development of risk management plans.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Analyse client operations and risk

1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures and

- environment.
- apply to work instructions to ensure compliance.
- 1.2 Consult with relevant persons to confirm risk assessment terms of reference, costs and timeframes.
  - 1.3 Develop and document a structured risk assessment register that includes an agreed methodology and allows for possible changes to client operations.
  - 1.4 Consult with client to confirm their core business, operating environment, goals and objectives.
  - 1.5 Source valid and reliable information and intelligence to clarify client assets and analyse potential and actual security risks.
  - 1.6 Recognise own limitations in assessing security risks and access specialist resources or advice to meet client requirements.
- 2 Assess security risks and consequences to operations.
- 2.1 Develop risk assessment criteria comprising qualitative and quantitative measures.
  - 2.2 Apply risk assessment criteria to measure level of potential or existing security risk and associated consequences to client operations.
  - 2.3 Identify gaps in predetermined methodology to respond to changing risk context of client operations and modify risk assessment in consultation with relevant persons.
  - 2.4 Source additional required information to assess and confirm client security risk potential.
  - 2.5 Use information technologies to document and present security risk assessment in a format and style to meet workplace requirements.
- 3 Finalise risk assessment and present findings.
- 3.1 Identify countermeasures to overcome security risks associated with client operations and incorporate recommended strategies into final risk assessment.
  - 3.2 Finalise security risk assessment and check to ensure findings and recommendations are supported by verifiable information.

- 3.3 Present final security risk assessment to relevant persons for feedback within agreed timeframes.
- 3.4 Use questioning and active listening to explain identified security risks and countermeasures to mitigate risk to client operations.
- 3.5 Complete and secure risk assessment documentation in a manner that facilitates future retrieval and maintains confidentiality.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey and clarify information when assessing risks to client operations
- writing skills to document succinct and logically structured security risk assessments.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4006A Assess risks.

## Links

# Assessment Requirements for CPPSEC4006 Conduct security risk assessment of client operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4006A Assess risks. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by documenting and presenting comprehensive risk assessments of client operations for three different clients.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when conducting security risk assessments of client operations:
  - client service standards
  - licensing requirements in the security industry
  - regulatory requirements in the jurisdiction of operation
- application of *ISO 31000:2018 Risk management – Guidelines* when conducting security risk assessments of client operations
- changing risk context of client operations
- difference between information and intelligence in the context of security risk assessments
- methods for developing risk assessment criteria comprising qualitative and quantitative measures
- process of dynamic risk assessment and application of risk management using the hierarchy of controls
- type and nature of a range of security risks and countermeasures associated with workplace operations
- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack

- signs of chemical weapons attack and recommend response
- general features of improvised explosive devices and recommended incident response
- ways that social and cultural differences may be expressed during client consultations.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations, policies and procedures that apply to conducting security risk assessments in the jurisdiction of operation
- client specifications, information and intelligence, information technologies and resources required to achieve the performance evidence
- *ISO 31000:2018 Risk management – Guidelines*
- *Australia's Strategy for Protecting Crowded Places from Terrorism.*

# CPPSEC4007 Identify security threats and assess impact on client operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4007A Assess threat. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to identify security threats and assess their impact on client operations. It includes analysing client operations and existing security arrangements, assessing assets and activities to determine their criticality to client operations, and conducting a consequence analysis to measure the impact of identified threats.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Analyse client operations and security arrangements.

1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures and apply to work instructions to ensure compliance.

- 1.2 Consult with relevant persons to confirm threat assessment terms of reference, costs and timeframes.
  - 1.3 Consult with client to confirm their core business, operating environment, goals and objectives.
  - 1.4 Source valid and reliable information to clarify client assets and analyse existing security arrangements.
  - 1.5 Recognise own limitations in assessing security threats and access specialist resources or advice to meet client requirements.
- 2 Identify, assess and monitor security threats.
- 2.1 Develop threat assessment criteria comprising qualitative and quantitative measures.
  - 2.2 Evaluate gathered information and source additional required intelligence or information to ensure all relevant information is included in threat assessment.
  - 2.3 Apply threat assessment criteria to identify possible causes and sources of potential and existing security threats to client operations.
  - 2.4 Assess likelihood and realisation of identified threats to client operations.
  - 2.5 Systematically monitor identified threats and modify threat assessment to respond to changing roles, locations and operational stability.
- 3 Undertake threat consequence analysis.
- 3.1 Assess assets and activities to determine criticality to client operations.
  - 3.2 Assess reliability, availability and capacity of operational back-up systems for assets and activities.
  - 3.3 Assess threat impact on client operations to measure and analyse consequences.
  - 3.4 Confirm potential consequences of security threats in consultation with relevant persons.
- 4 Finalise threat
- 4.1 Identify contingency arrangements to protect client

assessment and present findings.

operations and incorporate recommended strategies into final threat assessment.

- 4.2 Finalise security threat assessment and check to ensure findings and recommendations are supported by verifiable information.
- 4.3 Use information technologies to document and present security threat assessment in a format and style to meet workplace requirements.
- 4.4 Present final security threat assessment to relevant persons for feedback within agreed timeframes.
- 4.5 Use questioning and active listening to explain identified security threats and consequences and recommended contingency arrangements.
- 4.6 Complete and secure threat assessment documentation in a manner that facilitates future retrieval and maintains confidentiality.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey and clarify information when assessing client operations
- writing skills to document succinct and logically structured security threat assessments.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4007A Assess threat.

# CPPSEC4008 Assess and prepare security tender submissions

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4008A Prepare a detailed tender.  
Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to assess and prepare security tender submissions. It includes assessing security tender documentation to clarify specifications, timeframes and submission requirements, defining and costing tender content and finalising and submitting tenders within required timeframes.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |                                      |     |   |
|---|--------------------------------------|-----|---|
| 1 | Assess security tender requirements. | 1.1 | Source and assess tender documentation to clarify specifications, timeframes and submission requirements.   |
|   |                                      | 1.2 | Interpret key requirements of legislation, regulations and workplace policies and procedures and apply to tender specifications to ensure compliance when preparing |

- submission.
- 1.3 Evaluate viability of providing security requirements against tender specifications and workplace priorities.
  - 1.4 Assess risk associated with tender specifications and plan risk management strategies according to workplace requirements.
  - 1.5 Discuss security tender specifications with relevant persons to identify and clarify issues associated with tender submission.
- 2 Define, document and cost tender deliverables.
- 2.1 Define and document project timelines, stages, activities and deliverables to meet tender specifications.
  - 2.2 Assess specific resources required to meet tender specifications against capacity to deliver.
  - 2.3 Apply workplace rate schedules to cost tender requirements.
  - 2.4 Identify assistance required to meet tender specifications and plan contingency arrangements in consultation with relevant persons.
- 3 Finalise security tender submission.
- 3.1 Use technology to prepare tender submission in the required style and format.
  - 3.2 Check to ensure tender submission content is accurate and meets all tender specifications.
  - 3.3 Forward tender submission to relevant persons for feedback and make required edits.
  - 3.4 Lodge tender submission within required timeframes.
  - 3.5 Complete and secure tender documentation in a manner that facilitates future retrieval and maintains confidentiality.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to accurately interpret key requirements of security tender criteria and conditions
- writing skills to prepare succinct tender submissions that accurately respond to tender specifications
- numeracy skills to calculate and cost provision of security products and services against workplace rate schedules.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4008A Prepare a detailed tender.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4008 Assess and prepare security tender submissions

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4008A Prepare a detailed tender.  
Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by assessing and preparing three security tender submissions that respond to specifications for the provision of different products or services.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when assessing and preparing security tender submissions:
  - client service standards
  - licensing requirements in the security industry
  - regulatory requirements associated with tendering for security products and services
- content, format and presentation requirements for security tender submissions
- financial and legal requirements for assessing and preparing security tender submissions
- tender management, assessment, preparation, submission and review processes
- tender specifications and confidentiality requirements applicable to security tendering
- workplace products and services provided through employee and subcontractor arrangements
- workplace rate schedules for providing security products and services
- workplace resources, capacities and capabilities.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations, policies and procedures that apply to assessing and preparing security tender submissions in the jurisdiction of operation
- tender information and specifications, information technologies and resources required to achieve the performance evidence.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC4009 Interpret electronic information from advanced technology security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4009A Interpret information from advanced security equipment. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to interpret electronic information while operating advanced technology security systems. It includes identifying and responding to security risk situations, maintaining operational performance of systems and backing-up systems and data.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |  |
|--|--|
| 1 Evaluate electronic information from advanced technology | 1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures and apply to work instructions to ensure compliance. |
|--|--|

- security system.
  - 1.2 Operate and monitor security system in accordance with manufacturers' instructions.
  - 1.3 Receive electronic data and verify source and authenticity.
  - 1.4 Cross-check security system with companion monitoring systems to ensure accurate and consistent information exchange.
  - 1.5 Interpret and evaluate received electronic security information in accordance with workplace requirements.
  
- 2 Respond to security risk situations.
  - 2.1 Identify and assess potential security risk situation from received electronic information.
  - 2.2 Accurately input data to implement a prompt and effective security response.
  - 2.3 Vary security response to respond to changing circumstances and request additional support or specialist advice required to ensure safety and security of people and property.
  - 2.4 Monitor security response while maintaining continual information exchange with relevant persons.
  - 2.5 Record and report security response information to relevant persons.
  
- 3 Maintain advanced technology security system.
  - 3.1 Monitor and test security system to confirm performance is within defined operating guidelines.
  - 3.2 Implement preventative or breakdown maintenance procedures following manufacturers' instructions.
  - 3.3 Identify and report actual or suspected faults or deficiencies in security system.
  - 3.4 Implement back-up procedures to maintain integrity of security system and data.
  - 3.5 Complete and secure security response and system maintenance documentation in accordance with workplace and regulatory requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey and clarify instructions when monitoring security response.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4009A Interpret information from advanced security equipment.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4009 Interpret electronic information from advanced technology security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4009A Interpret information from advanced security equipment. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by interpret electronic information from three different types of advanced technology security systems.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when interpreting electronic information from advanced technology security systems:
  - duty of care
  - information privacy and confidentiality
  - licensing requirements in the security industry
  - regulatory requirements in the jurisdiction of operation
  - workplace health and safety
- back-up procedures for a range of advanced technology security systems
- common faults and malfunctions in advanced technology security systems
- common keypad and control panel types and functions associated with a range of advanced technology security systems
- documentation to be completed when interpreting electronic information from advanced technology security systems and responding to security risk situations
- methods for cross-checking advanced technology security systems with companion monitoring systems to ensure accurate and consistent information exchange
- operating principles and functions of a range of common advanced technology security systems
- procedures for communicating and collaborating with emergency services

- procedures for finding faults, maintaining and repairing advanced technology security systems
- procedures for inputting data into a range of advanced technology security systems
- procedures for testing monitoring parameters
- procedures for verifying authenticity and consistency of received electronic information
- process of dynamic risk assessment and risk management using the hierarchy of controls
- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommend response
  - general features of improvised explosive devices and recommended incident response
- types of situations requiring security response when interpreting electronic information from security systems.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations and codes of practice that apply to operating and controlling advanced technology security systems in the jurisdiction of operation
- work instructions, documentation and advanced technology security systems required to achieve the performance evidence
- *Australia's Strategy for Protecting Crowded Places from Terrorism*.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC4010 Manage monitoring centre operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4010A Manage monitoring centres.  
Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to manage monitoring centre operations. It includes managing operations and resources within budget parameters, supervising electronic security data monitoring and alarm response activities to ensure compliance with client instructions, and reviewing operational outcomes to identify procedural improvements.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |  |
|---|--|
| 1 Prepare for monitoring centre operations. | 1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures and apply to work instructions to ensure compliance. |
|   | 1.2 Review <i>AS 2201.2-2004 Intruder alarm systems, Part 2: Monitoring centres</i> to understand requirements for   |

- operating electronic security systems and apply to monitoring centre operations to ensure compliance.
- 1.3 Obtain and review work instructions and operational documentation to clarify monitoring centre systems, technologies and staffing requirements.
  - 1.4 Confirm operational budget and delegations and clarify agreed limits and allocations.
  - 1.5 Check and confirm correct operation and connection of security systems, equipment and technologies and record and report faults or required maintenance.
  - 1.6 Confirm roles and responsibilities of monitoring centre personnel and clarify client instructions for security monitoring in consultation with relevant persons.
  - 1.7 Instruct relevant persons on procedures for identifying faults or deficiencies in security equipment, backing up systems and data, and arranging preventative and breakdown maintenance.
- 2 Supervise monitoring and alarm response.
- 2.1 Systematically monitor correct operation and performance of security systems, equipment and technologies.
  - 2.2 Monitor receipt, interpretation and transmission of electronic security data to verify compliance with client instructions and workplace procedures.
  - 2.3 Identify processing or transmission errors and implement required remedial actions.
  - 2.4 Recognise alarm event and consult with relevant persons to provide instructions and ensure response and security status meets client requirements.
  - 2.5 Identify factors impacting alarm response and implement contingency actions to resolve alarm event and maintain security to meet client instructions.
  - 2.6 Organise security data backup to meet legislative and workplace requirements.
- 3 Review and complete
- 3.1 Supervise change of shift procedures ensuring

monitoring centre operations.

monitoring and system continuity.

- 3.2 Review monitoring centre operations to identify procedural improvements for future operations.
- 3.3 Complete and secure monitoring centre documentation in accordance with workplace and regulatory requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey and clarify operational information.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4010A Manage monitoring centres.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4010 Manage monitoring centre operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4010A Manage monitoring centres.  
Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by managing monitoring centre operations involving responses to at least 30 alarm events.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when managing monitoring centre operations:
  - duty of care
  - information privacy and confidentiality
  - licensing requirements in the security industry
  - regulatory requirements in the jurisdiction of operation
  - workplace health and safety (WHS)
- application of *AS 2201.2-2004 Intruder alarm systems, Part 2: Monitoring centres* when operating electronic security systems
- approved communication terminology, call signs and radio channels used in the security industry
- categories of alarm events and procedures for responding to each category
- customer service standards
- key principles of team dynamics, team leadership and management
- methods for operating monitoring centres within budgetary and resource parameters
- methods for verifying polling connections
- monitoring centre grading and certification requirements in Australia
- operational functions of a range of electronic security equipment and operating systems used in monitoring centres
- procedures for allocating and replacing security systems and equipment used in monitoring centres
- procedures for change of shift

- procedures for door, alarms, time clock, subsequent and further alarms and monitoring
- procedures to back-up and protect security data
- purpose and objectives of *National Police Alarm Activation Response Guideline*
- roles and responsibilities of monitoring centre personnel
- types of alarm events that may require response such as duress alarms, intrusion alarms, air conditioning alarms, smoke alarms, vehicle global positioning system and satellite tracking
- types of alarm transmission technologies including wireless and internet protocol monitoring and dialler monitoring
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations and codes of practice that apply to monitoring centres in the jurisdiction of operation
- work instructions, security systems, equipment, technologies and staff required to achieve the performance evidence
- *AS 2201.2-2004 Intruder alarm systems, Part 2: Monitoring centres*
- *National Police Alarm Activation Response Guideline*.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC4011 Manage field staff activity and incident response from control room

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4011A Coordinate field staff activity from control room. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to manage field staff activity and incident response from a control room. It includes using security systems and technologies to monitor security operations, control field staff activity and coordinate security responses to incidents while maintaining continual exchange of information with field staff and others involved in the response. It includes reporting and reviewing operational outcomes to identify procedural improvements.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |   |
|--|---|
| 1 Prepare for control room operations. | 1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures, including work health and safety (WHS), and apply to |
|--|---|

control room operations to ensure compliance.

- 1.2 Obtain and review shift and operational documentation to clarify work instructions and security operations.
  - 1.3 Check and confirm correct operation of security systems and technologies and record and report faults or maintenance requirements.
  - 1.4 Cross-check systems and equipment with companion monitoring systems and confirm accurate and consistent information exchange.
  - 1.5 Confirm roles and responsibilities of control room and field staff and consult with relevant persons to explain operational information and instructions.
  - 1.6 Establish control room communication processes and chain of command in consultation with relevant persons.
  - 1.7 Identify and assess anticipated risks associated with security operations and deployed field staff and implement required risk control measures.
- 
- 2 Control field staff activity.
    - 2.1 Operate security systems and technologies to systematically monitor security operations and field staff activity.
    - 2.2 Receive and interpret security information and alarm and assess incident nature and risk.
    - 2.3 Deploy field staff to carry out security response proportionate to the nature of incident and risk.
    - 2.4 Conduct regular and systematic checks with field staff to provide information and directions and to maintain security.
    - 2.5 Respond promptly to irregular or non-responses from field staff to maintain safety and security of people, property and premises.
    - 2.6 Receive, confirm and respond to requests for assistance in accordance with workplace requirements.
    - 2.7 Identify factors affecting achievement of security operations and vary operational plans in consultation with relevant persons.

- |  |   |
|--|---|
| 3 Coordinate security response to incident.    | 3.1 Identify incident and formulate security response in accordance with workplace and regulatory requirements.   |
|  | 3.2 Promptly implement security response and allocate required resources while maintaining continual exchange of information with field staff and relevant persons. |
|  | 3.3 Anticipate contingency requirements and vary response to maximise safety and security of people and property.   |
| 4 Review and complete control room operations. | 4.1 Supervise change of shift procedures ensuring monitoring and system continuity.   |
|  | 4.2 Develop operational report including detailed incident and response observations.   |
|  | 4.3 Review control room operations to identify procedural improvements for future operations.   |
|  | 4.4 Complete and secure operational documentation in accordance with workplace and regulatory requirements.   |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to give clear instructions, active listening and questioning skills to convey and clarify operational information when deploying field staff.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4011A Coordinate field staff activity from control room.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4011 Manage field staff activity and incident response from control room

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4011A Coordinate field staff activity from control room. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by managing field staff activity and incident response from a control room to respond to six different incidents:

- different security risk scenarios must be covered in each incident
- at least three incident responses must require assistance from emergency services personnel
- at least one procedural improvement must be identified with each security response.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when managing field staff activity and incident response from a control room:
  - casinos and gaming
  - counter terrorism
  - duty of care
  - information privacy and confidentiality
  - licensing requirements in the security industry
  - regulatory requirements in the jurisdiction of operation
  - surveillance
  - workplace health and safety
- approved communication terminology, call signs and radio channels used in the security industry
- chain of command associated with control room operation
- communication formats relating to security systems including high speed and contact ID
- crowd behaviour, dynamics and movement patterns that can threaten security

- current national terrorism threat level and context
- difference between local and monitored alarms
- factors that may indicate escalation of conflict or risk and situations requiring specialist assistance
- key principles of team dynamics, team leadership and management
- operational principles of a range of security systems, equipment and software used in control rooms
- procedures for change of shift
- procedures for communicating and collaborating with emergency services
- procedures for deploying field staff to respond to security risks and incidents
- procedures for preparing, storing and retrieving surveillance footage
- process of dynamic risk assessment and how it is applied
- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommended response
  - general features of improvised explosive devices and recommended incident response
- range of typical security risk or incident situations and appropriate response procedures implemented from a control room
- roles and responsibilities of field staff
- signs of possible harassment or assault
- surveillance recording systems (digital and analogue) and interfaces
- the phonetic alphabet and how it is used when managing field staff from a control room
- types of computer operating systems used in a control room
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- types of detectors monitored from a control room including passive infrared sensor and dual tech
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment.  
Candidates must have access to:

- legislation, regulations and codes of practice that apply to control room operations in the jurisdiction of operation
- work instructions, security equipment, technologies and field staff required to achieve the performance evidence
- *Australia's Strategy for Protecting Crowded Places from Terrorism.*

## Links

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

## CPPSEC4012 Assess security vulnerabilities of assets

### Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4012A Identify and assess security of assets. Updated to meet the Standards for Training Packages.

### Application

This unit specifies the skills and knowledge required to assess the security vulnerabilities of client assets based on an analysis of asset types, use, ownership and value. It includes auditing security risk control mechanisms and incident reporting measures and testing their operational effectiveness to identify failures and recommend treatment options.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

### Pre-requisite Unit

None.

### Unit Sector

Security/Risk management

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |  |
|--|--|
| 1 List client assets and confirm status. | 1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures and apply to work instructions to ensure compliance. |
|  | 1.2 Consult with relevant persons to confirm the location and nature of all assets and clarify client security objectives  |

- in relation to each asset.
- 1.3 Source valid and reliable information to confirm the value of all client assets in consultation with relevant persons.
  - 1.4 Document listing of client assets and valuations in a format suitable for analysis.
  - 1.5 Conduct analysis to confirm asset types, use, ownership and value.
  - 1.6 Recognise own limitations in assessing asset security vulnerabilities of client and access specialist resources or advice to meet client requirements.
- 2 Assess security risk control mechanisms to identify asset vulnerabilities.
- 2.1 Identify and assess methods for accessing client assets.
  - 2.2 Conduct audit of existing and planned security risk control mechanisms and incident reporting measures.
  - 2.3 Obtain and review operating parameters for identified risk control mechanisms to plan testing methods.
  - 2.4 Test operational effectiveness of risk control mechanisms to identify actual and potential failures and report the results to relevant persons.
- 3 Finalise and present asset security vulnerability assessment.
- 3.1 Finalise asset security vulnerability assessment including recommendations to treat identified security risks, and check to ensure findings and recommendations are supported by verifiable information.
  - 3.2 Use information technologies to document and present asset security vulnerability assessment in a format and style to meet workplace requirements.
  - 3.3 Present final asset security vulnerability assessment to relevant persons for feedback within agreed timeframes.
  - 3.4 Use questioning and active listening to explain identified security vulnerabilities and recommended treatments.
  - 3.5 Complete and secure asset assessment documentation in a manner that facilitates future retrieval and maintains confidentiality according to workplace and regulatory

requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey and clarify information when assessing asset vulnerabilities
- writing skills to document succinct and logically structured client advice.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4012A Identify and assess security of assets.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4012 Assess security vulnerabilities of assets

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4012A Identify and assess security of assets. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by documenting and presenting comprehensive assessments of the security vulnerabilities of assets for three different clients involving at least three of the following types of assets:

- buildings
- critical infrastructure
- equipment
- information systems
- people.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when assessing the security vulnerabilities of assets:
  - client service standards
  - licensing requirements in the security industry
  - regulatory requirements in the jurisdiction of operation
- application of *ISO 31000:2018 Risk management – Guidelines* when assessing security vulnerabilities of assets
- audit techniques used when assessing existing and planned security risk control and reporting mechanisms for client assets
- difference between crowded places and critical infrastructure
- factors that may influence value of client assets
- methods for testing operational effectiveness of assets and risk control mechanisms
- methods for validating the reliability of information used to assess security vulnerabilities of assets
- risk assessment techniques
- sources and types of information used to confirm asset status and values

- type and nature of a range of security risks to client assets and control measures for each
- types of client assets that may require protection from security risks
- understanding of ways that assets are valued:
  - criticality to operations
  - depreciated value
  - formal valuation
  - personal value to client
  - purchase price
  - replace cost
- ways that social and cultural differences may be expressed during client consultations.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations, policies and procedures that apply to assessing the security vulnerabilities of client assets in the jurisdiction of operation
- client information and specifications, information technologies and resources required to achieve the performance evidence
- *ISO 31000:2018 Risk management – Guidelines.*

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC4014 Commission and decommission networked security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4014A Commission and decommission networked security system. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to commission and decommission a range of networked security systems. Commissioning includes establishing equipment interconnections and parameters, installing software, setting configurations, loading hardware data, testing performance and securing systems over internet protocol (IP) networks. Decommissioning includes isolating existing services and terminating energy sources.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |   |
|--|---|
| 1 Prepare to commission and decommission | 1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures and |
|--|---|

- networked security system.
- 1.2 Review work instructions to confirm client and site requirements and work timeframes.
  - 1.3 Review *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) and National Construction Code (NCC) to understand and apply requirements associated with commissioning and decommissioning networked security systems.
  - 1.4 Review networked security system architecture and configuration documentation and source information to clarify commissioning and decommissioning requirements.
  - 1.5 Review and comply with work health and safety (WHS) requirements when carrying out work instructions.
- 2 Plan and organise work tasks.
- 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
  - 2.2 Select and organise required materials, tools, testing devices and equipment including personal protective equipment and check for safe and correct operation.
  - 2.3 Arrange access to networked security systems for commissioning and decommissioning in consultation with relevant persons.
  - 2.4 Identify hazards in the work area and apply risk control measures.
  - 2.5 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
- 3 Commission networked security system.
- 3.1 Access networked security system and confirm equipment interconnections and parameters.
  - 3.2 Review system specifications and confirm equipment interconnections and parameters.
  - 3.3 Set up non-software configurations and confirm software is installed and hardware data loaded.

- 3.4 Conduct performance tests to ensure operation meets prescribed parameters and specifications.
    - 3.5 Conduct procedures to ensure security of system connections over IP network.
    - 3.6 Identify, document and report malfunctions or deviations from recommended specifications.
    - 3.7 Conduct hand-over of commissioned networked security system.
- 4 Decommission networked security system.
  - 4.1 Confirm networked security system for decommissioning.
  - 4.2 Isolate existing services to protect operation of existing structures in consultation with relevant persons.
  - 4.3 Safely terminate sources of energy according to manufacturers' instructions and WHS requirements.
  - 4.4 Remove networked security system and components according to work instructions.
- 5 Finalise commissioning and decommissioning activities and documentation.
  - 5.1 Complete and secure commissioning and decommissioning documentation to maintain client confidentiality according to workplace and regulatory requirements.
  - 5.2 Notify work completion to relevant persons.
  - 5.3 Check tools and equipment for faults, wear or damage and rectify or report problems.
  - 5.4 Clean and restore work area, remove waste caused by work tasks and dispose of decommissioned security system and components according to workplace requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - specifications for networked system architecture and configuration
  - plans and specifications when locating networked security system and components for commissioning and decommissioning
  - Australian standards, NCC and manufacturers' instructions
- numeracy skills to interpret multimeter readings when testing commissioned networked security system.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4014A Commission and decommission networked security system.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4014 Commission and decommission networked security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4014A Commission and decommission networked security system. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by commissioning and decommissioning two different types of networked security systems.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when commissioning and decommissioning networked security systems:
  - licensing requirements and limits of own authority
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - regulatory requirements in the jurisdiction of operation
  - work health and safety
- application of *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) and National Construction Code (NCC) when commissioning and decommissioning of security equipment and systems installed at clients’ premises
- basic carpentry techniques used when commissioning and decommissioning security equipment and systems
- cable identification and termination methods and techniques
- common computer commands used to verify and manage internet protocol and network performance
- documentation to be completed when commissioning and decommissioning security equipment and systems
- fundamentals of routers, switches, firewalls and wireless access points
- fundamentals of scripting language

- keypad and control panel types and functions for a range of security equipment and systems
- local area network and wide area network capabilities
- meaning of multiple form factor authentication
- principles of security system networking and integration including IP addresses and devices
- methods for ensuring IP networked systems and equipment are properly secured
- methods for installing software, setting non-software configurations and confirming hardware data is loaded when commissioning networked security systems
- procedures for isolating existing services
- procedures for safely terminating sources of energy when decommissioning networked security systems
- soldering and drilling techniques used when commissioning and decommissioning networked security systems
- testing procedures for commissioning a range of networked security systems:
  - access control systems
  - audible and visual warning devices
  - cameras and monitors
  - commercial and residential alarm systems
  - detection devices
  - electronic and mechanical fire safety and fire locking systems
  - electronic locks and locking systems
  - electronic readers
  - electronic screen equipment
  - intercoms and control panels
  - security doors and door controls
- materials, tools, testing devices and equipment including personal protective equipment (PPE) used when commissioning and decommissioning networked security systems
- network testing and monitoring tools and commands used to check network connectivity and continuity
- types and functions of computer software associated with networked security systems
- types of earthing systems used in electrical installations
- types of electrical connections and circuits encountered when commissioning and decommissioning networked security systems, and circuit protection requirements
- typical hazards encountered when commissioning and decommissioning networked security systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - people in the work area
  - power tools
  - vermin

- work at heights.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation and licensing requirements that apply to commissioning and decommissioning networked security systems in the jurisdiction of operation
- work instructions, documentation, networked security equipment and systems, PPE, tools and materials required to achieve the performance evidence
- AS/NZS 2201
- NCC.

# CPPSEC4015 Maintain networked security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4015A Maintain networked security system. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to maintain a range of networked security systems. It includes assessing system architecture and configurations and formulating suitable maintenance strategies against budgetary constraints and risks to continuity of client operations. It also includes monitoring system performance, performing back-ups and hardware and software updates, identifying operational irregularities and faults, and implementing required repairs and maintenance.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Formulate maintenance strategy for networked security system.

1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures, including work health and safety (WHS), and apply to work instructions to ensure compliance.

- 1.2 Review work instructions to confirm client and site requirements and work timeframes.
  - 1.3 Review *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) to understand requirements associated with maintaining networked security systems and apply to work instructions.
  - 1.4 Review networked security system architecture and configuration documentation to confirm requirements to maintain operational effectiveness.
  - 1.5 Confirm warranty status of networked security system components, software and hardware.
  - 1.6 Assess maintenance options against budgetary constraints and risk to continuity of client operations.
  - 1.7 Finalise and schedule maintenance strategy that ensures optimal operational performance of networked security system and software.
- 2 Plan and organise work tasks.
    - 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
    - 2.2 Select and organise required materials, tools, testing devices and equipment including personal protective equipment and check for safe and correct operation.
    - 2.3 Arrange access to networked security system in consultation with relevant persons.
    - 2.4 Identify hazards in the work area and apply risk control measures.
    - 2.5 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
- 3 Monitor effectiveness of networked security system.
    - 3.1 Access networked security system with minimal disruption to services and others in the work area.
    - 3.2 Systematically monitor and assess networked security system operation against performance indicators to determine hardware and software performance and

- reliability.
- 3.3 Monitor security and access features of networked security system to confirm information security and integrity.
  - 3.4 Review and maintain system performance and audit reports according to workplace requirements.
- 4 Implement preventative maintenance procedures.
    - 4.1 Routinely implement networked security system back-up procedures.
    - 4.2 Routinely update and maintain anti-virus software and mechanisms to secure internet protocol networks.
    - 4.3 Carry out repairs or adjustments to networked security system within scope of own competence and according to maintenance strategy and manufacturers' instructions.
    - 4.4 Identify, diagnose and rectify system irregularities or faults and refer complex faults for specialist attention according to manufacturers' instructions.
  - 5 Finalise maintenance and complete documentation.
    - 5.1 Reinststate networked security system and confirm correct operation and connections.
    - 5.2 Notify completion of work to relevant persons.
    - 5.3 Complete maintenance documentation detailing repairs undertaken and identified faults according to workplace and regulatory requirements.
    - 5.4 Check tools and equipment for faults, wear or damage and rectify or report problems.
    - 5.5 Restore work area to original condition and remove waste caused by maintenance tasks.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:

- specifications for networked system architecture and configuration
- plans and specifications when locating networked security system and components for maintenance
- Australian standards and manufacturers' instructions
- numeracy skills to interpret multimeter readings when maintaining networked systems.

## **Unit Mapping Information**

Supersedes and is equivalent to CPPSEC4015A Maintain networked security system.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4015 Maintain networked security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4015A Maintain networked security system. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by maintaining three different networked security systems.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when maintaining security systems:
  - licensing requirements and limits of own authority
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - regulatory requirements in the jurisdiction of operation
  - work health and safety
- cable identification, termination and connection procedures associated with repairing networked security systems
- common computer commands used to verify and manage internet protocol and network performance
- documentation to be completed when maintaining security systems to ensure compliance with licensing and warranty requirements
- fundamentals of routers, switches, firewalls and wireless access points
- fundamentals of scripting language
- keypad and control panel types and functions for a range of security equipment and systems
- local area network and wide area network capabilities
- meaning of multiple form factor authentication
- principles of security system networking and integration including IP addresses and devices
- methods for ensuring IP networked systems and equipment are properly secured

- maintenance procedures for a range of networked security systems and repairs permitted within scope of own role, authority and competence
- maintenance strategies for networked security systems
- methods for reinstating networked systems and equipment and ensuring they are properly secured over IP networks
- security equipment calibration requirements
- techniques for recognising routine and complex faults in networked security systems
- tests to confirm security system functionality
- tools and equipment including personal protective equipment (PPE) used when maintaining networked security systems
- types, functions and features of a range of networked security systems and components:
  - access control systems
  - audible and visual warning devices
  - cameras and monitors
  - commercial and residential alarm systems
  - detection devices
  - electronic and mechanical fire safety and fire locking systems
  - electronic locks and locking systems
  - electronic readers
  - electronic screen equipment
  - intercoms and control panels
  - security doors and door controls
- types of earthing systems used in electrical installations
- typical hazards encountered when maintaining networked security systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - hidden utilities
  - people in the work area
  - power tools
  - vermin.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment.  
Candidates must have access to:

- legislation and licensing requirements that apply to maintaining networked security systems in the jurisdiction of operation
- work instructions, documentation, networked security equipment and systems, manufacturers' instructions, PPE and tools required to achieve the performance evidence.

## **Links**

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC4016 Install networked security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4016A Install networked security system. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to install a range of networked security systems. It includes installing and configuring a range of software, hardware and new components in a network and performing tests to determine operational effectiveness.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to install networked security system.

- 1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures, including work health and safety (WHS), and apply to work instructions to ensure compliance.
- 1.2 Review work instructions to confirm client and site requirements and work timeframes.

- 1.3 Review *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) and National Construction Code (NCC) to understand and apply requirements associated with installing networked security systems.
  - 1.4 Review security system architecture and configuration documentation and source information to clarify installation requirements.
  - 1.5 Confirm location and availability of networked security system components.
- 2 Plan and organise work tasks.
    - 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
    - 2.2 Select and organise required materials, tools, testing devices and equipment including personal protective equipment and check for safe and correct operation.
    - 2.3 Arrange access to installation site in consultation with relevant persons.
    - 2.4 Identify hazards in the work area and apply risk control measures.
    - 2.5 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
- 3 Perform installation of networked security system.
    - 3.1 Obtain authorisation to install networked security system according to workplace requirements.
    - 3.2 Isolate circuits according to WHS requirements.
    - 3.3 Install cabling and check to ensure compliance with regulatory requirements.
    - 3.4 Install networked security system hardware, software and components according to manufacturers’ instructions.
    - 3.5 Configure system hardware and software according to manufacturers’ instructions and work instructions.
    - 3.6 Conduct procedures to ensure security of system connections over internet protocol network.

- |  |     |  |
|--|-----|--|
|  | 3.7 | Conduct performance tests to ensure system operation meets prescribed parameters and specifications. |
| 4 Finalise installation and documentation. | 4.1 | Complete and secure installation documentation to maintain client confidentiality.                   |
|  | 4.2 | Notify work completion to relevant persons.  |
|  | 4.3 | Check tools and equipment for faults, wear or damage and rectify or report problems.                 |
|  | 4.4 | Clean and restore work area and remove waste caused by installation tasks.                           |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - specifications for networked system architecture and configuration
  - plans and specifications when locating networked security system and components for installation
  - Australian standards, NCC and manufacturers' instructions
- numeracy skills to interpret multimeter readings when testing installed networked security system.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4016A Install networked security system.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4016 Install networked security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4016A Install networked security system. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by installing three different networked security systems.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when installing networked security systems:
  - licensing requirements and limits of own authority
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - regulatory requirements in the jurisdiction of operation
  - work health and safety
- application of *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) and National Construction Code (NCC) when installing networked security systems
- basic carpentry techniques used when installing networked security systems
- cable identification and termination methods and techniques
- common computer commands used to verify and manage internet protocol and network performance
- documentation to be completed when installing networked security systems
- fundamentals of routers, switches, firewalls and wireless access points
- fundamentals of scripting language
- keypad and control panel types and functions for a range of security equipment and systems
- local area network and wide area network capabilities
- materials, tools, testing devices and equipment including personal protective equipment (PPE) used when installing networked security systems

- meaning of multiple form factor authentication
- methods for ensuring IP networked systems and equipment are properly secured
- methods for installing software, setting non-software configurations and confirming hardware data is loaded when installing networked security systems
- network testing and monitoring tools and commands used to check network connectivity and continuity
- principles of security system networking and integration including IP addresses and devices
- procedures for isolating existing services
- soldering and drilling techniques used when installing networked security systems
- testing procedures for checking the correct operation of a range of networked security systems:
  - access control systems
  - audible and visual warning devices
  - cameras and monitors
  - commercial and residential alarm systems
  - detection devices
  - electronic and mechanical fire safety and fire locking systems
  - electronic locks and locking systems
  - electronic readers
  - electronic screen equipment
  - intercoms and control panels
  - security doors and door controls
- types and functions of computer software associated with networked security systems
- types of earthing systems used in electrical installations
- types of electrical connections and circuits that may be encountered when installing networked security systems, and circuit protection requirements
- typical hazards encountered when installing networked security systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - people in the work area
  - power tools
  - vermin
  - work at heights.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation and licensing requirements that apply to networked security system installations in the jurisdiction of operation
- work instructions, documentation, networked security equipment and systems, PPE, tools and materials required to achieve the performance evidence
- AS/NZS 2201
- NCC.

# CPPSEC4017 Design security system configurations and specifications

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4017A Determine security system configurations. Updated to meet the Standards for Training Packages

## Application

This unit specifies the skills and knowledge required to design security system configurations and specifications. It includes researching system requirements and formulating viable design solutions that meet client requirements within budget and quality constraints. It also includes validating the quality and suitability of the design to meet the intended purpose and preparing detailed and accurate security system schematics and specifications.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Research security system requirements.

1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures and apply to work instructions to ensure compliance.

- 1.2 Review work instructions to confirm client and site requirements and work timeframes.
  - 1.3 Consult with relevant persons to determine security system performance requirements, budget and quality constraints.
  - 1.4 Review *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) and National Construction Code (NCC) to understand and apply requirements for designing security system configurations and specifications.
  - 1.5 Assess client documentation to identify actual and potential security risks to client operations.
  - 1.6 Conduct research and formulate security system design options to meet client requirements and control identified security risks.
- 2 Validate security system design.
    - 2.1 Evaluate design options and select preferred security system configurations to meet site and client requirements.
    - 2.2 Prepare system architectural and service specifications that address performance, maintenance and fault tolerance parameters.
    - 2.3 Check and confirm compatibility of existing and proposed systems and equipment against plans and technical specifications.
    - 2.4 Specify equipment and materials that best meet design specifications and client requirements.
    - 2.5 Finalise security system design and check to ensure schematics and specifications provide sufficient detail to enable accurate costings to be calculated.
  - 3 Finalise and report security system configurations and specifications.
    - 3.1 Use information technology to clearly and accurately document security system design within required timeframes, budget and quality constraints.
    - 3.2 Seek feedback on recommendations and make required adjustments to obtain client acceptance of proposed

security system design.

- 3.3 Complete and securely store documentation in a manner that facilitates future retrieval and maintains confidentiality.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - drawing and drafting symbols
  - plans, drawings and specifications in diagrammatic and schematic formats
  - Australian standards, NCC and manufacturers' instructions
- writing skills to draw accurate plans and schematics when configuring security systems.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4017A Determine security system configurations.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPPSEC4017 Design security system configurations and specifications

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4017A Determine security system configurations. Updated to meet the Standards for Training Packages

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by designing security system configurations and specifications to meet the differing requirements of three clients.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when designing security system configurations and specifications:
  - licensing requirements
  - regulatory requirements in the jurisdiction of operation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- application of *AS/NZS 2201.1:2007 Intruder alarm systems – Client’s premises – Design, installation, commissioning and maintenance* (AS/NZS 2201) and National Construction Code (NCC) when designing security systems for installation at client premises
- building construction methods and types
- configuration options for a range of security equipment and systems
- design considerations for security system installations at different client sites
- documentation to be completed when designing security system configurations and specifications
- materials, tools and equipment used when designing security system configurations and specifications
- principles of security system design, specifications and configurations
- principles of security system programming and configuring
- techniques for drawing and drafting used when specifying and configuring security system installations

- types and functions of a range of security equipment and systems
- types of budget and quality constraints that can impact design of security systems
- types of security risk factors associated with client sites.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Candidates must have access to:

- legislation and licensing requirements that apply to security system design in the jurisdiction of operation
- work instructions and documentation, client information, security equipment and system, tools and materials required to achieve the performance evidence
- AS/NZS 2201
- NCC.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPPSEC4018 Program and configure networked security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4018A Configure security devices on IT networks. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to program and configure a range of security systems and networks. It includes identifying configuration requirements and parameters for the type of security system and network, and conducting programming, configurations and testing to ensure the system operates correctly and meets client requirements.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Confirm security system and network requirements.

1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures, including work health and safety (WHS), and apply to work instructions to ensure compliance.

- 1.2 Review work instructions to confirm client requirements and work timeframes.
  - 1.3 Obtain and confirm security system installation specifications and network configurations.
  - 1.4 Review installation documentation to confirm equipment, cabling and connection requirements.
  - 1.5 Check proposed configurations against operational parameters and specifications for security system and type of network.
- 2 Plan and organise work tasks.
- 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
  - 2.2 Select and organise required materials, tools, testing devices and equipment including personal protective equipment and check for safe and correct operation.
  - 2.3 Arrange access to security system and network in consultation with relevant persons.
  - 2.4 Identify hazards in the work area and apply risk control measures.
- 3 Conduct system and network programming and configuration.
- 3.1 Access networked security system with minimal disruption to services and others in the work area.
  - 3.2 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
  - 3.3 Assess security system design and existing infrastructure to identify and verify program parameters.
  - 3.4 Install and program system software according to manufacturers' instructions.
  - 3.5 Configure and secure networked security system according to work instructions.
- 4 Inspect and test network
- 4.1 Test networked security system to confirm correct configuration, operation and connections.

configurations.	4.2	Inspect networked security system configuration and confirm compliance with regulatory and client requirements.
	4.3	Identify and rectify or report configuration faults or deficiencies.
5 Finalise work tasks and complete documentation.	5.1	Notify completion of work to relevant persons.
	5.2	Complete documentation detailing work undertaken and identified faults or deficiencies according to workplace and regulatory requirements.
	5.3	Check tools and equipment for faults, wear or damage and rectify or report problems.
	5.4	Restore work area to original condition and remove waste caused by work tasks.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - specifications for networked system architecture and configuration
  - system installation plans and specifications
  - manufacturers' instructions
- numeracy skills to interpret multimeter readings when installing and programming networked security system.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4018A Configure security devices on IT networks.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPPSEC4018 Program and configure networked security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4018A Configure security devices on IT networks. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by programming and configuring three different internet protocol (IP) networked security systems.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when programming and configuring networked security systems:
  - licensing requirements and limits of own authority
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- cable identification methods and techniques
- common computer commands used to verify and manage internet protocol and network performance
- difference between programming and configuration of security equipment and systems
- documentation to be completed when programming and configuring networked security systems to ensure compliance with licensing and warranty requirements
- fundamentals of routers, switches, firewalls and wireless access points
- fundamentals of scripting language
- keypad and control panel types and functions for a range of security equipment and systems
- local area network and wide area network capabilities
- meaning of multiple form factor authentication
- methods for ensuring IP networked systems and equipment are properly secured
- principles of security system networking and integration including IP addresses and devices

- tests to confirm correct configurations, operation and connections for networked security systems
- tools and equipment including personal protective equipment (PPE) used when programming and configuring networked security systems at client sites
- types, functions and features of computerised, electronic and manual security equipment and systems that require programming and configuration:
  - access control systems
  - audible and visual warning devices
  - cameras and monitors
  - commercial and residential alarm systems
  - detection devices
  - electronic and mechanical fire safety and fire locking systems
  - electronic locks and locking systems
  - electronic readers
  - electronic screen equipment
  - intercoms and control panels
  - security doors and door controls
- types of earthing systems used in electrical installations
- typical hazards encountered when programming and configuring networked security systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - hidden utilities
  - people in the work area
  - power tools
  - vermin.

## Assessment Conditions

# CPPSEC4019 Diagnose faults in networked security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4019A Identify and diagnose security systems or network fault. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to diagnose faults in a range of security systems and networks. It includes applying methodical diagnostic procedures, testing suspected fault scenarios, and assessing test results, historical information and operational data to diagnose system and network faults and recommend options for rectification.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

This unit may form part of the licensing requirements for people engaged in security risk management in those states and territories where these are regulated activities.

## Pre-requisite Unit

Nil.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to diagnose security system or network faults.

1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures, including work health and safety (WHS), and apply to work instructions to ensure compliance.

1.2 Review work instructions to confirm client requirements and work timeframes.

- 1.3 Obtain and assess security system reports and clarify extent of faults in consultation with relevant persons.
  - 1.4 Review security system specifications and network configurations to confirm normal operational functions and performance parameters.
- 2 Plan and organise work tasks.
    - 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
    - 2.2 Select and organise required materials, tools, testing devices and equipment including personal protective equipment and check for safe and correct operation.
    - 2.3 Arrange access to security system and network in consultation with relevant persons.
    - 2.4 Identify hazards in the work area and apply risk control measures.
- 3 Conduct system and network testing and diagnostic procedures.
    - 3.1 Use safe work practices when working with electronic equipment and cables according to WHS requirements.
    - 3.2 Isolate security equipment and system according to WHS requirements.
    - 3.3 Confirm normal performance of security equipment and system against specification schedules.
    - 3.4 Inspect and check security system components and test operation according to manufacturers' instructions.
    - 3.5 Methodically apply diagnostic methods using measurements and estimations of system operating parameters and network configurations.
    - 3.6 Test suspected fault scenarios to identify source of system or network problems.
    - 3.7 Assess test data, site variables, operational and historical information to support fault diagnosis.
    - 3.8 Diagnose fault or seek assistance from relevant persons to meet work instructions.

- |   |     |  |
|---|-----|--|
| 4 Recommend options for fault rectification and complete documentation. | 4.1 | Complete documentation detailing diagnosed faults and options for fault rectification supported by verifiable data according to workplace and regulatory requirements. |
|   | 4.2 | Check tools and equipment for faults, wear or damage and rectify or report problems.   |
|   | 4.3 | Clean and restore work area and remove waste caused by work tasks.   |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret key requirements of:
  - system installation plans and specifications
  - manufacturers' instructions.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC4019A Identify and diagnose security system or network fault.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPPSEC4019 Diagnose faults in networked security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC4019A Identify and diagnose security systems or network fault. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting testing and diagnostic procedures on three different networked security systems to diagnose:

- a minimum of two system faults
- a minimum of two network faults.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when diagnosing faults in networked security systems:
  - licensing requirements and limits of own authority
  - regulatory requirements in the jurisdiction of operation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- cable identification methods and techniques
- common computer commands used to verify and manage internet protocol (IP) and network performance
- difference between programming and configuration of security equipment and systems
- documentation to be completed when diagnosing faults in networked security systems to ensure compliance with licensing and warranty requirements
- fundamentals of routers, switches, firewalls and wireless access points
- fundamentals of scripting language
- keypad and control panel types and functions for a range of security equipment and systems
- local area network and wide area network capabilities
- meaning of multiple form factor authentication

- methods for ensuring IP networked systems and equipment are properly secured
- operational parameters and diagnostic testing procedures for a range of networked security systems:
  - access control systems
  - audible and visual warning devices
  - cameras and monitors
  - commercial and residential alarm systems
  - detection devices
  - electronic and mechanical fire safety and fire locking systems
  - electronic locks and locking systems
  - electronic readers
  - electronic screen equipment
  - intercoms and control panels
  - security doors and door controls
- principles of security system networking and integration including IP addresses and devices
- tests to confirm correct configurations, operation and connections for networked security systems
- tools and equipment used when diagnosing faults in networked security systems
- types of earthing systems used in electrical installations
- typical hazards encountered when diagnosing faults in networked security systems and the control measures for each:
  - confined spaces
  - electrical
  - hazardous materials and chemicals
  - hidden utilities
  - people in the work area
  - power tools
  - vermin.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation and licensing requirements that apply to diagnosing faults in networked security systems in the jurisdiction of operation
- work instructions, specifications, documentation, networked security systems and tools required to achieve the performance evidence.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPPSEC4020 Advise on advanced technology security systems to meet client needs

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPSEC4020A Advise on the application of biometrics. Unit has been broadened to cover other advanced technologies in addition to biometrics. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to assess the security needs of clients and provide documented advice on security systems that employ advanced technologies including biometrics, artificial intelligence (AI), robotics, smart technologies and video integration. It includes conducting research to maintain knowledge of existing and emerging security technologies, assessing risks associated with the client's specific circumstances and operating environment, and evaluating client satisfaction to improve service provision.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

This unit may form part of the licensing requirements for people engaged in security risk management in those states and territories where these are regulated activities.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |                                       |  |
|---------------------------------------|--|
| 1 Research purpose and application of | 1.1 Research and interpret current information on developments and availability of advanced technologies |
|---------------------------------------|--|

- advanced technologies used by security systems.
- 1.2 Discuss with relevant persons the purpose and application of advanced technologies in security systems.
- 1.3 Document research findings in a format suitable for reference when providing client advice.
- 1.4 Plan and implement strategies to regularly update own knowledge of developments in advanced technologies used by security systems.
- 2 Assess client security needs.
- 2.1 Access and interpret legislation, regulations and workplace policies and procedures and apply to work instructions to ensure compliance.
- 2.2 Consult with client to confirm their immediate, short, and long-term security needs, expectations and budget.
- 2.3 Obtain and analyse valid and relevant information to clarify client circumstances and operating environment.
- 2.4 Assess security risk associated with client circumstances and operating environment based on analysis conducted.
- 2.5 Identify and assess existing and potential security issues to determine their impact on client requirements.
- 2.6 Consult with client to confirm purpose and parameters of advanced technology security systems to meet their needs.
- 2.7 Recognise own limitations in assessing client requirements and access specialist resources or advice to meet client requirements.
- 3 Advise on security options to meet client needs.
- 3.1 Identify available advanced technology security systems to meet client needs and budget and select recommended security solutions.
- 3.2 Source comprehensive information to support recommended advanced technology security systems and alternative options to meet client requirements.
- 3.3 Prioritise recommendations and alternative options and collate evidence of their suitability to meet client

- requirements.
- 3.4 Use information technologies to document and present client advice in a format and style to meet workplace requirements.
- 3.5 Explain features and benefits of recommended systems to client and obtain feedback on suitability and sufficiency of advice.
- 4 Evaluate advice provision to improve client service.
- 4.1 Evaluate client feedback to ascertain effectiveness of advice and satisfaction with service provision.
- 4.2 Identify and action changes necessary to improve advice to meet client needs and comply with workplace requirements for client service.
- 4.3 Complete and secure client documentation in a manner that facilitates future retrieval and maintains confidentiality according to workplace and regulatory requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey and clarify information to match security systems to client needs
- writing skills to document succinct and logically structured client advice.

## Unit Mapping Information

Supersedes and non-equivalent to CPPSEC4020A Advise on the application of biometrics.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4020 Advise on advanced technology security systems to meet client needs

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPSEC4020A Advise on the application of biometrics. Unit has been broadened to cover other advanced technologies in addition to biometrics. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by advising on security systems to meet differing individual requirements of three clients and involving systems that employ at least three of the advanced technologies listed below:

- artificial intelligence (AI)
- biometrics
- robotics
- smart technologies
- video integration.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when advising clients on advanced technology security systems:
  - client service standards
  - licensing requirements in the security industry
  - regulatory requirements associated with providing advice on security products and services
- application of *ISO 31000:2018 Risk management – Guidelines* (ISO 31000) when advising clients on security systems
- basic requirements for the installation of a range of advanced technology security systems
- changing risk context of client operations
- established threshold levels and their impact on security
- methods for comparing and contrasting advanced technology security system information
- operational principles of, and information technologies used in internet protocol networked security systems

- process of dynamic risk assessment and application of risk management using the hierarchy of controls
- sources of reliable information on the purpose and application of existing and emerging technologies used by security systems
- type and nature of a range of security risks and measures for controlling these using advanced technology security systems
- types, functions, advantages and disadvantages of a range of advanced technologies used by security systems:
  - AI
  - biometrics
  - robotics
  - smart technologies
  - video integration
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations, policies and procedures that apply to advising clients on advanced technology security systems in the jurisdiction of operation
- client specifications and information, information technologies and resources required to achieve the performance evidence
- ISO 31000.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC4021 Develop standard operating procedures for advanced technology security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPSEC4021A Prepare standard operating procedures for the use of biometrics technology. Unit has been broadened to cover other advanced technologies in addition to biometrics. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to develop standard operating procedures (SOPs) for security systems that employ advanced technologies including biometrics, artificial intelligence (AI), robotics, smart technologies and video integration. It includes conducting research to confirm system operating parameters and writing procedures that ensure safe and effective operation of systems to meet workplace requirements. It also includes reviewing and improving SOPs to maintain compliance with regulatory requirements and respond to changing technologies.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- 1 Confirm operating parameters of advanced technology security system.
  - 1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures and apply to work instructions to ensure compliance.
  - 1.2 Source, collate and interpret information to clarify type, modes, functions and operating parameters of advanced technology security system.
  - 1.3 Research security industry issues and trends impacting use of advanced technology security system.
  - 1.4 Identify security and safety issues associated with advanced technology security system to confirm correct and incorrect operating procedures.
  - 1.5 Discuss with relevant persons the purpose and application of advanced technology security system to clarify operating parameters.
  - 1.6 Record findings in a format suitable for further analysis when developing SOPs.
  
- 2 Prepare and present SOPs for advanced technology security system.
  - 2.1 Prepare SOPs to meet operational and workplace requirements for the specific type of security system and technologies involved.
  - 2.2 Clearly and concisely detail pre-operational instructions for system access, authorisation and licensing.
  - 2.3 Clearly and concisely detail information and instructions for safe operation of system and technologies to meet workplace requirements.
  - 2.4 Clearly and concisely detail location and conditions for correct system operation to meet workplace requirements.
  - 2.5 Clearly and concisely detail procedures to carry out and complete individual activities for correct system operation to meet workplace requirements.
  - 2.6 Clearly and concisely detail procedures for correctly operating tools, equipment and technologies employed by security system to meet workplace requirements.
  - 2.7 Use information technologies to finalise and present SOPs in the required format and style according to

workplace requirements.

- |   |     |   |
|---|-----|---|
| 3 Review and improve standard operating procedures for advanced technology security system. | 3.1 | Distribute SOPs to relevant persons for review within agreed timeframes.  |
|   | 3.2 | Obtain feedback and action changes necessary to improve SOPs to meet workplace requirements.  |
|   | 3.3 | Schedule regular reviews and updates to SOPs to maintain compliance with regulatory requirements and to incorporate changes in system technologies. |
|   | 3.4 | File SOPs and associated documentation according to workplace requirements.   |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use active listening and questioning skills to clarify system operating parameters
- reading skills to interpret key requirements of manufacturers' instructions for operating advanced technology security systems
- writing skills to prepare succinct and logically structured procedures using language that is accessible to a wide audience.

## Unit Mapping Information

Supersedes and non-equivalent to CPPSEC4021A Prepare standard operating procedures for the use of biometrics technology.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4021 Develop standard operating procedures for advanced technology security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPSEC4021A Prepare standard operating procedures for the use of biometrics technology. Unit has been broadened to cover other advanced technologies in addition to biometrics. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by develop standard operating procedures (SOPs) for three different security systems that employ at least three of the advanced technologies listed below:

- artificial intelligence
- biometrics
- robotics
- smart technologies
- video integration.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when developing SOPs for advanced technology security systems:
  - licensing requirements in the security industry
  - regulatory requirements in the jurisdiction of operation
- operating parameters for a range of advanced technology security systems
- operational principles of, and technologies used in internet protocol networked security systems
- pre-operational requirements for accessing, authorising and licensing the operation of advanced technology security systems
- procedural writing techniques
- requirements for operating a range of advanced technology security systems
- sources of reliable information on:
  - security industry issues and trends impacting use of advanced technology security systems

- the purpose and application of existing and emerging technologies used by security systems
- the types, modes, functions and operating parameters of a range of advanced technology security systems
- type and nature of a range of security risks and measures for controlling these using advanced technology security systems
- ways that social and cultural differences may be expressed.

## Assessment Conditions

# CPPSEC4022 Establish and implement ethics and governance arrangements for security businesses

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Application

This unit specifies the skills and knowledge required to establish and implement ethical and governance arrangements to comply with legislative and regulatory responsibilities associated with managing a security business. It includes establishing, monitoring and communicating policies and procedures that ensure compliance with governance arrangements. It also includes understanding the ethical principles and security industry practices that guide professional conduct when performing security work, developing and implementing a code of conduct and taking necessary disciplinary actions for breaches of the code.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Comply with governance

1.1 Clarify governance requirements to comply with legislative and regulatory responsibilities associated with

- |   |   |
|---|---|
| requirements for security business.                           | managing a security business in the jurisdiction of operation.  |
|   | 1.2 Establish or review required governance arrangements and associated policies and procedures in line with business plan.   |
|   | 1.3 Confirm roles and responsibilities of all staff including accountabilities associated with business governance.   |
|   | 1.4 Check to confirm required risk management processes, indemnities and insurances are in place and take corrective action where necessary to comply with legislative and regulatory responsibilities. |
|   | 1.5 Implement reporting systems to monitor business accountabilities and maintain records to comply with legislative and regulatory responsibilities.   |
|   | 1.6 Communicate policies and procedures to relevant persons to ensure compliance with governance requirements.  |
| 2 Develop and implement code of conduct for ethical practice. | 2.1 Source and review industry standards, codes and guidelines to understand the ethical principles that guide professional conduct in the security industry.   |
|   | 2.2 Develop and document or review code of conduct linked to business mission, values and ethical principles.   |
|   | 2.3 Describe and communicate to relevant persons ethical practice standards for privacy, confidentiality and information security associated with security work and equipment.                          |
|   | 2.4 Establish or review processes to handle complaints, monitor ethical practice and implement disciplinary actions for breaches of the code of conduct.  |
| 3 Monitor and review governance and ethical practices.        | 3.1 Schedule regular activities to monitor business and staff compliance against governance arrangements and code of conduct.   |
|   | 3.2 Monitor ethical practice in the security industry and identify strategies to resolve discrepancies between business practice and security industry ethical standards.                               |

- 3.3 Audit internal governance arrangements and update policies and procedures as required to maintain currency and comply with legislative and regulatory requirements.
- 3.4 Monitor security work practices and complaints to resolve conflict, improve ethical practice and implement disciplinary actions for identified breaches of the code of conduct.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use negotiation to resolve conflict
- writing skills to prepare succinct and logically structured governance documentation.

## Unit Mapping Information

No equivalent unit.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4022 Establish and implement ethics and governance arrangements for security businesses

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by establishing and implementing ethics and governance arrangements for a security business, involving:

- establish or review roles, responsibilities and governance accountabilities for:
  - one manager
  - two operational staff
  - one sub-contractor
- develop or review policies and procedures to ensure compliance with governance arrangements in the following areas:
  - indemnity, insurance and risk management
  - reporting and records maintenance
  - complaints and grievances
  - staff conduct, behaviour and disciplinary action
- develop or review a formal code of conduct that references current security industry standards, codes and guidelines, and through a review of security work practices and complaints, identify a minimum of two breaches of the code and suitable disciplinary actions for each breach.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory requirements associated with operating a security business in the jurisdiction of operation:
  - client service standards
  - key requirements of Corporations Act 2001 and actions by business owners and directors that may constitute a breach of duties
  - fair trading and consumer protection

- licensing in the security industry
- privacy
- indicators of ethical practice in the security industry:
  - acting in the best interests of clients and workers
  - acting with honesty, fairness and professionalism
  - complying with fiduciary duties and obligations
  - demonstrating ethical practice when using surveillance equipment
  - engaging in fair and legal contracting practices and paying workers correct entitlements
  - maintaining client privacy and confidentiality and information security
  - maintaining independence and disclosing and managing potential conflicts of interest
  - maintaining and applying knowledge of legislative and regulatory responsibilities
  - using clear communication in all dealings with all parties to security business transactions including providing written and signed documents
- legal rights and obligations of different business ownership structures
- principles of ethical practice and their application in the security industry:
  - clear communication
  - client focus
  - client protection
  - confidentiality, privacy and information security
  - fairness
  - honesty
  - professional courtesy
  - respect
- purpose and application of Australian Security Industry Association Limited (ASIAL) standards, codes and guidelines:
  - cash-in-transit code of practice
  - code of ethics for the use and installation of closed circuit television (CCTV) equipment
  - codes and guidelines for best practice, including National Police Alarm Response Guideline, Electronic Home Security, AML/CTF compliance and the Care and Use of Security Dogs
- security industry standards, codes and guidelines that guide professional conduct
- types of behaviours considered unethical
- types of governance arrangements required to be implemented to ensure security businesses meet legislative and regulatory responsibilities
- workplace relations requirements associated with staff disciplinary actions.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- security industry legislation, regulations, codes, standards and guidelines that apply to security business operation and governance in the jurisdiction of operation
- information technologies, resources and documentation required to achieve the performance evidence.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC4023 Implement contracting arrangements for security businesses

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Application

This unit specifies the skills and knowledge required to implement contracting arrangements to supply and obtain security services. It includes understanding the difference between direct employees and independent contractors and complying with fair work legislation when developing and implementing contractor agreements that ensure contractors receive correct and fair pay and conditions and security services contract terms specify sub-contractor approvals, costs, indemnities, supervision, management, reporting and record-keeping accountabilities.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Confirm security contractor employment

1.1 Clarify requirements to comply with fair work legislation when employing workers for a security business.

- requirements.
- 1.2 Conduct research to clarify the difference between direct employees and independent contractors and Australian Business Number holders under common law.
  - 1.3 Source and confirm current pay rates, allowances, penalty and overtime rates for security workers.
  - 1.4 Collate and summarise findings in a format suitable for use as a reference tool.
- 2 Engage in contracting to supply and obtain security services.
- 2.1 Clarify nature, scope and regulatory requirements for security services to be contracted.
  - 2.2 Source potential contractors and check to confirm they meet security licencing requirements for specified security services.
  - 2.3 Conduct due diligence and background checks to identify and select quality contractors and mitigate risk to security business.
  - 2.4 Analyse proposal and contract documentation to clarify employment relationship with contractors.
  - 2.5 Consult with relevant persons to agree employment terms that ensure contractors receive correct and fair pay and conditions in accordance with fair work legislation.
  - 2.6 Confirm security services contract terms and include clauses that clearly specify sub-contractor approvals, costs, indemnities, supervision, management, reporting and record-keeping accountabilities.
  - 2.7 Arrange signing and exchange of security service contract between parties to the agreement.
- 3 Monitor and review security contracting practices.
- 3.1 Regularly monitor security contractor arrangements to ensure compliance with terms of security services contract and regulatory requirements.
  - 3.2 Monitor contractor records to promptly identify changes to services or contractor arrangements that represent potential breaches of contract or regulatory compliance.
  - 3.3 Consult with relevant persons to clarify security services and contracting arrangements and take required actions

to maintain compliance with regulatory requirements.

- 3.4 Complete and secure all contracting documentation and records in a manner that facilitates future retrieval, compliance audits and ensures confidentiality and privacy.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to negotiate employment terms and conditions
- numeracy skills to calculate pay rates and allowances based on work classifications, shifts and hours of work.

## Unit Mapping Information

No equivalent unit.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4023 Implement contracting arrangements for security businesses

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by implementing contracting arrangements for a security business, involving:

- develop and present a labour hire agreement to contract security services to a client
- develop and present an agreement to employ a minimum of two independent contractors, one of which will perform a multishift roster involving seven days and weekend and night work.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory requirements associated with operating security businesses:
  - client service standards
  - Fair Work Act 2009 (FW Act) and Fair Work Regulations 2009
  - licensing in the security industry
  - privacy
  - superannuation guarantee
  - taxation
- compliance audit requirements for the jurisdiction of operation
- current security services industry award pay rates, classifications and allowances
- definition of 'sham contracting' and legal ramifications of participating knowingly or unknowingly in illegal contracting arrangements when engaging independent contractors for security services
- elements of a contract:
  - offer and acceptance
  - intention to create legal relations
  - consideration
  - legal capacity

- general taxation and superannuation obligations of Australian Business Number (ABN) holders who are contracted to provide security services
- methods for determining whether an employed person is an employee or a contractor
- negotiation techniques
- potential risks to security businesses who engage in contracting arrangements for security services
- purpose and techniques for conducting due diligence and background checks of contractors providing security services
- requirements of the FW Act associated with contracting arrangements for security services:
  - section 550 and accessorial liability for underpayments
  - employment records required to be kept
  - employment conditions for direct employees and independent contractors or ABN holders
  - factors that are indicative of an employee
  - factors that are indicative of an independent contractor
- sub-contractor approval requirements for multi-level contracting of security services
- types of behaviours considered unethical when engaging in contracting arrangements for security work.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- security industry and fair work legislation and regulations that apply to contracting arrangements for security businesses in the jurisdiction of operation
- documentation, information technologies and resources required to achieve the performance evidence.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC4024 Assess security of crowded places

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Application

This unit specifies the skills and knowledge required to assess the nature and use of crowded places and existing security arrangements to identify report security vulnerabilities. Crowded places are sites and events open to use by large numbers of people on a predictable basis as defined in *Australia's Strategy for Protecting Crowded Places from Terrorism 2017* (Crowded Places Strategy). The unit includes conducting security audits following processes outlined in the Crowded Places Strategy.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |  |
|--|--|
| 1 Assess crowded place nature and use, and existing security arrangements. | 1.1 Access and interpret key requirements of the Crowded Places Strategy to understand national strategic objectives associated with protecting crowded places from terrorism. |
|--|--|

- 1.2 Access and interpret work instructions to confirm client, legislative and regulatory requirements and assessment timeframes.
  - 1.3 Consult with relevant persons to clarify crowded place owners and operators.
  - 1.4 Source information to clarify crowded place nature and use, and potential volume and concentration of people.
  - 1.5 Source intelligence to verify current national terrorism threat level and context.
  - 1.6 Clarify existing security arrangements in discussion with relevant persons.
  - 1.7 Recognise own limitations in assessing security of crowded place and access specialist resources or advice to meet client requirements.
- 2 Conduct crowded place security audit.
- 2.1 Assess crowded place characteristics to determine level of attractiveness to potential attack.
  - 2.2 Access and interpret security plans, policies and procedures for crowded place.
  - 2.3 Assess all physical security arrangements for crowded place.
  - 2.4 Assess information security measures for crowded place.
  - 2.5 Assess personnel security measures for crowded place.
  - 2.6 Analyse assessment and audit findings to identify security vulnerabilities for crowded place.
- 3 Complete assessment and report security vulnerabilities.
- 3.1 Use technology to finalise and document crowded place security assessment detailing identified security vulnerabilities and recommended risk mitigation strategies.
  - 3.2 Check to ensure security assessment is supported by verifiable information and make required adjustments.
  - 3.3 Present security assessment to relevant persons for feedback within agreed timeframes.

- 3.4 Use questioning and active listening to explain identified security vulnerabilities and recommendations to mitigate risks to crowded place.
- 3.5 Secure crowded place assessment documentation in a manner that facilitates future retrieval and maintains confidentiality.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to relate to people demonstrating sensitivity to individual social and cultural differences
- writing skills to prepare succinct and logically structured crowded place assessment report.

## Unit Mapping Information

No equivalent unit.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4024 Assess security of crowded places

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by documenting and presenting security assessments for two different crowded places:

- one involving buildings with multiple access points such as a stadium or shopping centre
- one involving open spaces and large volumes of people such as a shopping mall or place of mass gathering.

*Crowded Places Security Audit* documentation outlined in *Australia's Strategy for Protecting Crowded Places from Terrorism* (Crowded Places Strategy) must be completed for each security assessment.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- characteristics of crowded places that make them attractive to an attack:
  - crowded place is symbolic
  - crowded place attracts a large number of people at any one time
  - people gather at the crowded place on a predictable basis
  - density of people is high
  - crowded place has significant social importance to nation, state or territory
  - interruption to functioning of crowded place would have significant economic impact to nation, state or territory
  - offenders could enter, attack and leave crowded place without detection
  - offenders can easily access information about the crowded place when planning an attack
- crowd behaviour, dynamics and movement patterns that can threaten security in a crowded place
- difference between information and intelligence in the context of security assessments
- legislative and regulatory requirements for assessing security of crowded places in the jurisdiction of operation

- licensing requirements in the security industry
- purpose of Crowded Places Strategy and understanding of:
  - concept of layered security and how it is applied to protect crowded places
  - definition of crowded places
  - definition of hostile vehicles and methods of attack
  - general features of improvised explosive devices and recommended incident response
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - signs of chemical weapons attack and recommend response
  - those with a role in protecting the security of crowded places including roles and responsibilities of owners and operators and private security providers
- security issues to be assessed when conducting security audits of crowded places:
  - security plans, policies and procedures
  - physical security including:
    - access control
    - perimeter security
    - hostile vehicle mitigation
    - closed circuit television or video surveillance systems
    - improvised explosive devices blast mitigation
    - hostile reconnaissance detection and detecting suspicious behaviour
  - information security
  - personnel security
- security vulnerabilities of crowded places and risk mitigation strategies for each
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation and regulations that apply to assessing security of crowded places in the jurisdiction of operation
- plans, policies and procedures, information technologies and resources required to achieve the performance evidence
- Crowded Places Strategy documentation including Crowded Places Security Audit and Crowded Places Self-Assessment Tool.

## Links

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC4025 Advise on operational requirements to maintain crowded place security

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Application

This unit specifies the skills and knowledge required to advise on operational requirements to maintain security of crowded places. Crowded places are sites and events open to use by large numbers of people on a predictable basis as defined in *Australia's Strategy for Protecting Crowded Places from Terrorism 2017* (Crowded Places Strategy). The unit includes identifying risk mitigation strategies based on security vulnerabilities and planning feasible operational security measures to provide protective security and mitigate risks to people and property

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |  |
|---|--|
| 1 Identify risk mitigation strategies for crowded | 1.1 Access and interpret work instructions to confirm client, legislative and regulatory requirements and timeframes |
|---|--|

- place.
- for advice provision.
- 1.2 Consult with relevant persons to clarify crowded place security requirements and obtain information to support operational objectives.
  - 1.3 Source intelligence to verify current national terrorism threat level and context.
  - 1.4 Source and interpret information to clarify existing security arrangements and identified security vulnerabilities for crowded place.
  - 1.5 Formulate risk mitigation strategies proportionate to security vulnerabilities and level of threat.
  - 1.6 Recognise own limitations in advising on operational requirements to maintain security of crowded place and access specialist resources or advice to meet client requirements.
- 2 Determine operational security requirements for crowded place.
- 2.1 Interpret crowded place documentation and maps to gain full understanding of operational parameters.
  - 2.2 Inspect crowded place to identify and assess access and exit points, thoroughfares and movement patterns that could threaten security.
  - 2.3 Plan operational security measures to provide protective security for crowded place in accordance with risk mitigation strategies and client requirements.
  - 2.4 Verify feasibility of operational security measures to ensure implementation is feasible and complies with client, legislative and regulatory requirements.
  - 2.5 Plan contingency measures that respond to changing operational circumstances and risk levels.
  - 2.6 Estimate and document the types and numbers of resources required to apply layered security for crowded place.
- 3 Finalise and present operational security recommendations for
- 3.1 Use technology to finalise and document operational security recommendations to maintain crowded place security.

- crowded place.
- 3.2 Check to ensure operational security recommendations address identified risks and contingency requirements and are supported by verifiable information.
  - 3.3 Present operational security recommendations to relevant persons for feedback within agreed timeframes.
  - 3.4 Use questioning and active listening to explain operational measures and implementation requirements.
  - 3.5 Secure crowded place and operational security documentation in a manner that facilitates future retrieval and maintains confidentiality.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey and clarify operational information
- reading skills to analyse and evaluate key requirements of crowded place documentation including plans, procedures and schematics
- writing skills to prepare succinct and logically structured advice on operational requirements to maintain crowded place security.

## Unit Mapping Information

No equivalent unit.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC4025 Advise on operational requirements to maintain crowded place security

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by documenting and presenting advice on operational requirements to maintain security for two different crowded places:

- one involving buildings with multiple access points such as a stadium or shopping centre:
  - anticipated security risks must include active armed offender and an improvised explosive device
- one involving open spaces and large volumes of people such as a shopping mall or place of mass gathering:
  - risks must include active armed offender and hostile vehicle.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- characteristics of crowded places that make them attractive to an attack:
  - crowded place is symbolic
  - crowded place attracts a large number of people at any one time
  - people gather at the crowded place on a predictable basis
  - density of people is high
  - crowded place has significant social importance to nation, state or territory
  - interruption to functioning of crowded place would have significant economic impact to nation, state or territory
  - offenders could enter, attack and leave crowded place without detection
  - offenders can easily access information about the crowded place when planning an attack
- crowd behaviour, dynamics and movement patterns that can threaten security in a crowded place
- crowded place plans, policies and procedures including those covering emergency and evacuation

- crowded place layout, including entrances, exits, first-aid points, thoroughfares and potential hazards
- legislative and regulatory requirements for advising on operational requirements to maintain crowded place security in the jurisdiction of operation
- licensing requirements in the security industry
- operational security measures that provide protective security for crowded places against:
  - active armed offenders
  - improvised explosive devices
  - chemical weapons
  - hostile vehicles
- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - concept of layered security and how it is applied to protect crowded places
  - definition of crowded places
  - definition of hostile vehicles and methods of attack
  - general features of improvised explosive devices and recommended incident response
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - signs of chemical weapons attack and recommend response
  - those with a role in protecting the security of crowded places including roles and responsibilities of owners and operators and private security providers
- security vulnerabilities of crowded places and risk mitigation strategies for each
- types and purpose of resources that may be deployed as part of a layered security approach when protecting crowded places:
  - access control systems and equipment
  - manpower
  - physical barriers
  - surveillance equipment
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation and regulations that apply to providing advice on operational requirements to maintain crowded place security in the jurisdiction of operation
- plans, policies and procedures, information technologies and resources required to achieve the performance evidence
- *Australia's Strategy for Protecting Crowded Places from Terrorism*
- *Active Armed Offender Guidelines for Crowded Places*
- *Improvised Explosive Device Guidelines for Crowded Places*
- *Chemical Weapon Guidelines for Crowded Places*
- *Hostile Vehicle Guidelines for Crowded Places.*

## **Links**

# CPPSEC5002 Coordinate security operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC5002A Coordinate security operations.  
Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to coordinate security operations. It includes confirming performance targets, resources and constraints against operational plans, implementing and monitoring security operations, and reviewing and improving operational outcomes.

This unit is suitable for those using a broad range of cognitive, technical and communication skills to select and apply methods and technologies to analyse information and provide solutions to sometimes complex problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Confirm operational requirements.

1.1 Access and interpret key requirements of legislation, regulations and workplace policies and procedures, including work health and safety (WHS), and apply to security operation to ensure compliance.

1.2 Obtain and review work instructions to clarify security

- operation objectives, timeframes and budget requirements.
- 1.3 Assess performance targets, resource availability and constraints against operational plan and discuss issues with relevant persons.
  - 1.4 Conduct team briefing to exchange operational information and confirm roles responsibilities and operational objectives.
- 2 Implement and monitor security operation.
- 2.1 Implement security operation in accordance with operational plan and designated timeframes and budget.
  - 2.2 Use chain of command processes to ensure an accurate and ongoing exchange of information during security operation.
  - 2.3 Monitor security operation to ensure outcomes comply with operational objectives, WHS and regulatory requirements.
  - 2.4 Identify necessity to deviate from operational plan and implement remedial actions in consultation with relevant persons.
  - 2.5 Use communication systems and equipment to exchange operational information and negotiate successful conclusion to security operation.
- 3 Review and report on security operation.
- 3.1 Evaluate effectiveness of security operation in consultation with relevant persons and document the results.
  - 3.2 Develop security operations report detailing operational outcomes and identifying recommended improvements to future operations.
  - 3.3 Maintain security operations documentation in accordance with workplace and regulatory requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey and clarify operational information
- writing skills to prepare succinct and logically structured reports
- numeracy skills to calculate operational resources and costings.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC5002A Coordinate security operations.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC5002 Coordinate security operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC5002A Coordinate security operations.  
Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by coordinating two different security operations.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory requirements that apply to security operations:
  - anti-discrimination and diversity
  - apprehension, arrest and restraint of persons
  - key requirements of legislation, regulations and codes of conduct for security operations in the jurisdiction of operation
  - legal rights and responsibilities of employers, supervisors and employees associated with work health and safety and duty of care
  - licensing requirements in the security industry
  - trespass and removal of persons
  - use of force
- application of integrated security measures including physical security, manpower, security technologies and security of personnel and information
- chain of command and communication processes used when coordinating security operations
- implications for security operations arising from:
  - *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
  - *Active Armed Offender Guidelines for Crowded Places*
  - *Improvised Explosive Device Guidelines for Crowded Places*
  - *Chemical Weapon Guidelines for Crowded Places*
  - *Hostile Vehicle Guidelines for Crowded Places*
- intervention points for expert advice associated with security operations

- key principles of team dynamics, team leadership and management
- methods for briefing security operations information and instructions to individuals and teams
- methods for reviewing security operations to identify procedural improvements
- negotiation techniques used during security operations
- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommend response
  - general features of improvised explosive devices and recommended incident response
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations and codes of practice that apply to security operations in the jurisdiction of operation
- work instructions, security equipment, resources and information technologies required to achieve the performance evidence
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- *Australia's Strategy for Protecting Crowded Places from Terrorism*
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- *Active Armed Offender Guidelines for Crowded Places*
- *Improvised Explosive Device Guidelines for Crowded Places*
- *Chemical Weapon Guidelines for Crowded Places*
- *Hostile Vehicle Guidelines for Crowded Places.*

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC5003 Assess security risk management options

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC5003A Assess security risk management options. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to assess security risks associated with client operations and formulate suitable treatment options as part of a risk management strategy. It includes analysing the client's security objectives and operating environment and establishing criteria to select and prioritise risk treatment options consistent with recognised industry practice and guidelines provided by *ISO 31000:2018 Risk management – Guidelines* (ISO 31000). The unit requires preparing formal reports detailing risk management options and possible consequences of not implementing recommended treatments.

This unit is suitable for those using a broad range of cognitive, technical and communication skills to select and apply methods and technologies to analyse information and provide solutions to sometimes complex problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Assess client's security requirements

1.1 Access and interpret key requirements of legislation, regulations and Australian standard ISO 31000 to understand and comply with requirements for assessing

- and risk environment. security risk management options.
- 1.2 Clarify client security objectives and risk assessment terms of reference in consultation with relevant persons.
  - 1.3 Source and review information to identify and assess risks associated with operating environment of client.
  - 1.4 Analyse type, nature and cause of identified security risks and prioritise based on severity and likelihood of occurrence.
  - 1.5 Document risk assessment outcomes and check to ensure data currency and reliability.
- 2 Formulate security risk management options.
- 2.1 Identify security risk treatment options commensurate with risk assessment and client requirements.
  - 2.2 Research the application of identified treatment options in similar contexts to assess their effectiveness in mitigating risks to client's operating environment.
  - 2.3 Establish criteria to assess effectiveness of treatment options consistent with recognised industry practice and guidelines provided by ISO 31000.
  - 2.4 Apply criteria to select and prioritise recommended treatment options.
- 3 Finalise and present security risk management options.
- 3.1 Finalise and document security risk assessment detailing recommended risk management options and possible consequences of not implementing recommended treatments.
  - 3.2 Check report to ensure analysis and recommendations are clear, coherent and consistent with terms of reference, and supported by verifiable information.
  - 3.3 Present report to relevant persons within agreed timeframes and explain identified security risks and treatment options to enhance understanding and acceptance of recommendations.
  - 3.4 Complete and secure risk assessment documentation in a manner that facilitates future retrieval and maintains client confidentiality according to workplace and

regulatory requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to negotiate client agreement
- writing skills to prepare succinct and logically structured assessment reports
- numeracy skills to apply basic probability statistics when assessing security risks.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC5003A Assess security risk management options.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC5003 Assess security risk management options

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC5003A Assess security risk management options. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by assessing security risks and formulating risk management options associated with two of the following scenarios:

- security of a mass gathering
- security of a crowded place
- asset security.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory requirements that apply when assessing security risk management options:
  - key requirements of legislation, regulations and codes of conduct governing security risk management in the jurisdiction of operation
  - legal rights and responsibilities of employers, supervisors and employees associated with work health and safety and duty of care
  - licensing requirements in the security industry
  - trespass and removal of persons
  - use of force
- application of integrated security measures including physical security, manpower, security technologies and security of personnel and information
- distinction between information and intelligence and methods for validating information sources
- implications for security risk management arising from:
  - *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
  - *Active Armed Offender Guidelines for Crowded Places*
  - *Improvised Explosive Device Guidelines for Crowded Places*
  - *Chemical Weapon Guidelines for Crowded Places*

- *Hostile Vehicle Guidelines for Crowded Places*
- methods for determining the type, nature and causes of potential and actual security risks
- methods for prioritising security risks and treatment options based on degree of risk
- process and application of dynamic risk assessment and risk management methods
- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommend response
  - general features of improvised explosive devices and recommended incident response
- recognised industry practice and application of *ISO 31000:2018 Risk management – Guidelines* (ISO 31000) when establishing criteria to assess risks and treatment options
- types of treatment options appropriate to the range of security risks and threats to various client operating environments:
  - assets
  - buildings
  - crowded places
  - mass gatherings.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations and codes of practice that apply to assessing security risk management options in the jurisdiction of operation
- client instructions and operating environment information, resources and information technologies required to achieve the performance evidence
- ISO 31000
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- *Australia's Strategy for Protecting Crowded Places from Terrorism*
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- *Active Armed Offender Guidelines for Crowded Places*
- *Improvised Explosive Device Guidelines for Crowded Places*

- *Chemical Weapon Guidelines for Crowded Places*
- *Hostile Vehicle Guidelines for Crowded Places.*

## **Links**

Companion volumes to this training package are available at the VETNet website -

# CPPSEC5004 Develop security risk management plans

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC5004A Prepare security risk management plan. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to develop comprehensive security risk management plans based on the principles of *ISO 31000:2018 Risk management – Guidelines* (ISO 31000). It includes identifying and evaluating security risks and existing control measures, developing action plans to identify and manage risks, designing risk treatment options and testing them in the field as part of a security risk management strategy.

This unit is suitable for those using a broad range of cognitive, technical and communication skills to select and apply methods and technologies to analyse information and provide solutions to sometimes complex problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |   |
|---|---|
| 1 Evaluate security risks and controls. | 1.1 Access and interpret key requirements of legislation, regulations and Australian standard ISO 31000 to understand and comply with requirements for developing security risk management plans. |
|---|---|

- 1.2 Clarify client security requirements and operating environment in consultation with relevant persons.
  - 1.3 Source and review information to identify security risks.
  - 1.4 Clearly distinguish and confirm acceptable and unacceptable security risks.
  - 1.5 Set priorities for risk treatment and assurance of controls.
  - 1.6 Highlight and specify risks that are high priority to ensure appropriate controls are developed.
  - 1.7 Evaluate existing controls to determine impact on risk occurrence and implement required modifications.
- 2 Plan risk management strategies.
- 2.1 Develop and document action plans that identify tasks, activities and resources required to achieve security risk management objectives.
  - 2.2 Select security risk control measures based on assessed type, nature, cause and degree of risk associated with identified security risks.
  - 2.3 Incorporate actions to respond to contingencies when planning risk management strategies.
  - 2.4 Establish communication and reporting arrangements to maintain currency of action plans in consultation with relevant persons.
- 3 Design security risk treatment options.
- 3.1 Assess client's operating environment to confirm potential and real security risks.
  - 3.2 Select feasible risk treatment options and conduct research to confirm implications for controlling whole or part of security risks.
  - 3.3 Document and cost recommended risk treatment options to ensure compatibility with nature of risk and client requirements.
  - 3.4 Consult with relevant persons to verify suitability of recommended risk treatment options and obtain required approvals.

- |   |   |  |
|---|---|--|
|   | 3.5   | Test risk treatment options in the field and analyse results to verify effectiveness of treatments in the security context.  |
| 4 | Finalise and present security risk management plan. |  |
|   | 4.1   | Finalise and document comprehensive security risk management plan in the required format according to workplace requirements.  |
|   | 4.2   | Check security risk management plan to ensure analysis and recommendations are clear, coherent and consistent with client requirements, and based on the principles of ISO 31000.          |
|   | 4.3   | Present risk management plan to relevant persons within agreed timeframes and explain identified security risks and treatments to enhance understanding and acceptance of recommendations. |
|   | 4.4   | Implement procedures to monitor and review security risk management activities to ensure continuous improvement.   |
|   | 4.5   | Complete and secure risk management plan in a manner that facilitates future retrieval and maintains client confidentiality according to workplace and regulatory requirements.            |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to negotiate client agreement
- writing skills to prepare succinct and logically structured security risk management plans
- numeracy skills to apply statistical methods and present statistical data.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC5004A Prepare security risk management plan.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC5004 Develop security risk management plans

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC5004A Prepare security risk management plan. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by developing and documenting two security risk management plans that meet the requirements of clients with different risk management requirements.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory requirements that apply when developing security risk management plans:
  - key requirements of legislation, regulations and codes of conduct for security risk management in the jurisdiction of operation
  - legal rights and responsibilities of employers, supervisors and employees associated with work health and safety and duty of care
  - licensing requirements in the security industry
  - trespass and removal of persons
  - use of force
- application of integrated security measures including physical security, manpower, security technologies and security of personnel and information
- distinction between information and intelligence and methods for validating information sources
- activities to be included in action plans for security risk management
- implications for security risk management arising from:
  - *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
  - *Active Armed Offender Guidelines for Crowded Places*
  - *Improvised Explosive Device Guidelines for Crowded Places*
  - *Chemical Weapon Guidelines for Crowded Places*
  - *Hostile Vehicle Guidelines for Crowded Places*

- methods for determining the type, nature and causes of potential and actual security risks
- methods for distinguishing between acceptable and unacceptable security risks
- methods for prioritising security risks and treatment options based on degree of risk
- methods for testing treatment options in the field
- process and application of dynamic risk assessment and risk management methods
- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommend response
  - general features of improvised explosive devices and recommended incident response
- recognised industry practice and application of *ISO 31000:2018 Risk management – Guidelines* (ISO 31000) when designing security risk management strategies and treatment options
- types of treatment options appropriate to the range of security risks and threats to various client operating environments:
  - assets
  - buildings
  - crowded places
  - mass gatherings.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations and codes of practice that apply to developing security risk management plans in the jurisdiction of operation
- client instructions and operating environment information, resources and information technologies required to achieve the performance evidence
- ISO 31000
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- *Australia's Strategy for Protecting Crowded Places from Terrorism*
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*

- *Active Armed Offender Guidelines for Crowded Places*
- *Improvised Explosive Device Guidelines for Crowded Places*
- *Chemical Weapon Guidelines for Crowded Places*
- *Hostile Vehicle Guidelines for Crowded Places.*

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC5005 Implement security risk management plans

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPSEC5005A Implement security risk assessment plan. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to implement security risk management plans. It includes organising, costing and allocating resources, monitoring emerging security risks and changes in the operating environment against activities and targets in action plans, and reviewing treatment options to update security risk management plans. Risk management plans are implemented based on the principles of *ISO 31000:2018 Risk management – Guidelines* (ISO 31000).

This unit is suitable for those using a broad range of cognitive, technical and communication skills to select and apply methods and technologies to analyse information and provide solutions to sometimes complex problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |  |
|--|--|
| <p>1 Organise and allocate resources to support security risk management plan.</p> | <p>1.1 Access and interpret key requirements of legislation, regulations and Australian standard ISO 31000 to understand and comply with requirements for implementing security risk management plans.</p> |
|--|--|

- 1.2 Review security risk management plan to clarify and cost resource requirements.
  - 1.3 Plan and schedule activities and targets to meet requirements of risk management action plans.
  - 1.4 Define roles, responsibilities and work schedules for implementing security risk management plan and communicate to relevant persons.
  - 1.5 Organise efficient allocations of resources, equipment and materials required to implement risk management action plans.
  - 1.6 Disseminate information to support security risk management plan information according to workplace and regulatory requirements.
- 2 Monitor emerging security risks and operating environment.
    - 2.1 Monitor emerging risks and assess ongoing suitability of implemented security risk treatment options based on ISO 31000 principles.
    - 2.2 Monitor changes to operating environment and identify and incorporate corrective contingency measures into security risk management plan.
    - 2.3 Regularly review risk management targets and outcomes against action plans to confirm aims and objectives are achieved.
    - 2.4 Prepare documentation and guidelines explaining incidence, nature and causes of emerging security risks and contingencies implemented.
- 3 Review treatment options and update security risk management plan.
    - 3.1 Systematically review effectiveness of security risk treatment options in meeting risk management objectives.
    - 3.2 Identify and test required corrective measures to confirm suitability to meet risk management objectives.
    - 3.3 Modify security risk management plan to incorporate corrective measures and address discrepancies between treatment options and risk incidence.

- 3.4 Seek feedback from relevant persons on effectiveness of treatment options and make required adjustments to incorporate feedback.
- 3.5 Cost long and short-term options to accurately estimate resource allocations to support security risk management plan.
- 3.6 Confirm stages of implementation for security risk management plan and coordinate required resources to ensure availability.
- 3.7 Finalise updated security risk management plan according to workplace and regulatory requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to negotiate agreements
- writing skills to prepare succinct and logically structured security risk management documents and guidelines
- numeracy skills to apply statistical methods and present statistical data.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC5005A Implement security risk management plan.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC5005 Implement security risk management plans

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPSEC5005A Implement security risk assessment plan. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by implementing two different security risk management plans.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory requirements that apply when implementing security risk management plans:
  - key requirements of legislation, regulations and codes of conduct for security risk management in the jurisdiction of operation
  - legal rights and responsibilities of employers, supervisors and employees associated with work health and safety and duty of care
  - licensing requirements in the security industry
  - trespass and removal of persons
  - use of force
- application of integrated security measures including physical security, manpower, security technologies and security of personnel and information
- distinction between information and intelligence and methods for validating information sources
- work scheduling methods
- activities and targets contained in risk management action plans
- methods for achieving efficiencies when allocating resources, equipment and materials to the implementation of security risk management plans
- implications for security risk management arising from:
  - *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
  - *Active Armed Offender Guidelines for Crowded Places*
  - *Improvised Explosive Device Guidelines for Crowded Places*
  - *Chemical Weapon Guidelines for Crowded Places*

- *Hostile Vehicle Guidelines for Crowded Places*
- methods for determining the type, nature and causes of potential and actual security risks
- methods for distinguishing between acceptable and unacceptable security risks
- methods for prioritising security risks and treatment options based on degree of risk
- methods for testing treatment options in the field
- process and application of dynamic risk assessment and risk management methods
- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommend response
  - general features of improvised explosive devices and recommended incident response
- recognised industry practice and application of *ISO 31000:2018 Risk management – Guidelines* (ISO 31000) when implementing and updating security risk management plans
- types of treatment options appropriate to the range of security risks and threats to various client operating environments:
  - assets
  - buildings
  - crowded places
  - mass gatherings.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations and codes of practice that apply when implementing security risk management plans in the jurisdiction of operation
- risk management plans including action plans, resources and information technologies required to achieve the performance evidence
- ISO 31000
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- *Australia's Strategy for Protecting Crowded Places from Terrorism*
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*

- *Active Armed Offender Guidelines for Crowded Places*
- *Improvised Explosive Device Guidelines for Crowded Places*
- *Chemical Weapon Guidelines for Crowded Places*
- *Hostile Vehicle Guidelines for Crowded Places.*

# CPPSEC5006 Develop strategies to implement advanced technology security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPSEC5006A Determine strategy for the implementation of biometrics technology. Unit has been broadened to cover other advanced technologies in addition to biometrics. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to develop strategies to implement security systems that employ advanced technologies including biometrics, artificial intelligence (AI), robotics, smart technologies and video integration. It includes assessing risks and threats to client assets, evaluating existing security measures, and devising feasible implementation options that integrate advanced technology security systems within existing security architectures.

This unit is suitable for those using a broad range of cognitive, technical and communication skills to select and apply methods and technologies to analyse information and provide solutions to sometimes complex problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- 1 Assess client's security requirements.
  - 1.1 Access and interpret key requirements of legislation and regulations to understand and comply with requirements for implementing advanced technology security systems.
  - 1.2 Clarify client assets, security requirements, budget and timeframes for implementing advanced technology security system in consultation with relevant persons.
  - 1.3 Identify and assess threats to physical and technical security of client.
  - 1.4 Identify and assess security risks to client assets and prioritise risk levels.
  - 1.5 Evaluate reliability and effectiveness of existing security measures against identified threats and risks.
  - 1.6 Document findings and seek specialist assistance as required to assess security requirements of client.
- 2 Identify requirements for implementing advanced technology security system.
  - 2.1 Assess advanced technology security system options to meet security threats and risks and client requirements.
  - 2.2 Analyse and confirm physical and technical specifications for advanced technology security system to be installed.
  - 2.3 Assess existing security architecture to identify requirements for effectively integrating advanced technology security system.
  - 2.4 Identify resources, skills and training required to implement advanced technology security system.
  - 2.5 Summarise implementation requirements in a format suitable for further analysis.
- 3 Design and verify implementation options for advanced technology security system.
  - 3.1 Design system implementation options based on analysis of implementation requirements.
  - 3.2 Conduct checks to verify implementation options are feasible and comply with time schedules, available resources and budget.
  - 3.3 Confirm implementation options will effectively control assessed risks and threats to client assets.

- |   |   |     |  |
|---|---|-----|--|
| 4 | Finalise strategy for implementing advanced technology security system. | 4.1 | Finalise and document strategy to implement advanced technology security system.   |
|   |   | 4.2 | Check strategy to ensure analysis recommendations are clear, coherent and consistent with client requirements, include contingency measures, and are supported by verifiable information.        |
|   |   | 4.3 | Present strategy to relevant persons within agreed timeframes and explain system design and implementation requirements to enhance understanding and acceptance of recommendations.              |
|   |   | 4.4 | Complete and secure implementation strategy documentation in a manner that facilitates future retrieval and maintains client confidentiality according to workplace and regulatory requirements. |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to negotiate client agreements
- writing skills to prepare logical and sequenced technical specifications for implementing advanced technology security systems
- reading skills to interpret key requirements of technical specifications, plans and designs for security systems.

## Unit Mapping Information

Supersedes and non-equivalent to CPPSEC5006A Determine strategy for the implementation of biometric technology.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC5006 Develop strategies to implement advanced technology security systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPSEC5006A Determine strategy for the implementation of biometrics technology. Unit has been broadened to cover other advanced technologies in addition to biometrics. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by developing and documenting two strategies to implement security systems that employ at least two types of advanced technologies from the list below:

- artificial intelligence (AI)
- biometrics
- robotics
- smart technologies
- video integration.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory requirements that apply to the implementation of advanced technology security systems:
  - client service standards
  - licensing requirements in the security industry
  - regulatory requirements associated with providing advice on implementing security systems
  - application of *ISO 31000:2018 Risk management – Guidelines* (ISO 31000) when developing strategies to implement advanced technology security systems
- methods for achieving efficiencies when allocating resources, equipment and materials to the implementation of advanced technology security systems
- methods for assessing security risks and threats and determining the type, nature and causes of potential and actual security risks
- methods for comparing and contrasting advanced technology security system information

- methods for determining security system requirements including single and multiple applications of advanced technologies
- operational principles of, and information technologies used in internet protocol networked security systems
- process and application of dynamic risk assessment and risk management methods
- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommend response
  - general features of improvised explosive devices and recommended incident response
- requirements for integrating a range of advanced technology security systems within existing security architecture across local area networks and wide area networks
- types, functions and parameters of a range of advanced technology security systems involving:
  - AI
  - biometrics
  - robotics
  - smart technologies
  - video integration
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations and codes of practice that apply to the implementation of advanced technology security systems in the jurisdiction of operation
- client specifications and information, resources and information technologies required to achieve the performance evidence
- ISO 31000
- *Australia's Strategy for Protecting Crowded Places from Terrorism*.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC5008 Analyse threat environment and devise strategies to respond to active threats

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Application

This unit specifies the skills and knowledge required to analyse the threat level and context, and risks of active threats to sites. It includes identifying plausible threat scenarios and evaluating impact of loss and vulnerability ratings to identify potential risks from an active threat and devise required mitigation strategies. The unit supports Australian national security initiatives for counter-terrorism.

This unit is suitable for those using a broad range of cognitive, technical and communication skills to select and apply methods and technologies to analyse information and provide solutions to sometimes complex problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Analyse threat level and context.

1.1 Access national terrorism threat advisory system and networks to interpret latest security threat intelligence.

1.2 Assess site to ascertain attractiveness to terrorist threat

- and formulate potential active threat scenarios.
- 1.3 Source and interpret information to clarify nature and use of site and evaluate likelihood of threat occurrence.
  - 1.4 Establish criteria to quantify threat levels for each identified threat to identify plausible threat scenarios.
  - 1.5 Document results of threat analysis and provide evidence to support plausibility of threat scenarios.
- 2 Analyse risk of active threat.
- 2.1 Interpret security and risk management plans and information to identify assessed security risks and treatments implemented to protect site.
  - 2.2 Assess plausible threat scenarios to clarify vulnerability to attack and impact of loss from a successful attack.
  - 2.3 Define and apply ratings for impact of loss and vulnerability to identify additional required security protections.
  - 2.4 Document results of risk analysis and provide evidence to support recommended additional security protections.
- 3 Devise strategies to identify and respond to active threat.
- 3.1 Evaluate combination of impact of loss and vulnerability ratings to identify potential risks from an active threat.
  - 3.2 Identify and recommend strategies to mitigate specific threats and risks to the site in the event of an active threat.
  - 3.3 Use technology and analytical reporting programs to document strategies, analysis findings and supporting evidence in the required format and style.
  - 3.4 Present report to relevant persons within agreed timeframes and explain threats, risks and strategies to enhance understanding and acceptance of recommendations.
  - 3.5 Complete and secure client documentation in a manner that facilitates future retrieval and maintains confidentiality.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey and clarify information about active threats
- reading skills to analyse, compare and contrast information when analysing security threats and risks
- writing skills to prepare succinct and logically structured reports and analysis outcomes.

## Unit Mapping Information

No equivalent unit.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC5008 Analyse threat environment and devise strategies to respond to active threats

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by analysing the threat environment and devising strategies to respond to active threats for two different sites.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory requirements that apply when analysing threat environments and devising strategies to respond to active threats:
  - key requirements of legislation, regulations and codes of conduct for security response in the jurisdiction of operation
  - licensing requirements in the security industry
  - use of force
  - work health and safety and duty of care
- application of integrated security measures including physical security, manpower, security technologies and security of personnel and information
- critical infrastructure and key service providers including electricity, gas, water and transport in the jurisdiction of operation
- implications for private security arising from:
  - *National Counter-Terrorism Plan*
  - *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
  - *Active Armed Offender Guidelines for Crowded Places*
  - *Improvised Explosive Device Guidelines for Crowded Places*
  - *Chemical Weapon Guidelines for Crowded Places*
  - *Hostile Vehicle Guidelines for Crowded Places*
- national security hotline contact information
- national terrorism threat advisory system

- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommend response
  - general features of improvised explosive devices and recommended incident response
- techniques for conducting site threat assessments and ratings that can be used to determine attractiveness of site to attack
- techniques for conducting site vulnerability assessments and ratings that can be used to determine impact of loss and vulnerability to attack
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations and codes of practice that apply when analysing threat environments and devising strategies to respond to active threats in the jurisdiction of operation
- plans and documentation, resources and information technologies required to achieve the performance evidence
- *National Counter-Terrorism Plan*
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- *Australia's Strategy for Protecting Crowded Places from Terrorism*
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- *Active Armed Offender Guidelines for Crowded Places*
- *Improvised Explosive Device Guidelines for Crowded Places*
- *Chemical Weapon Guidelines for Crowded Places*
- *Hostile Vehicle Guidelines for Crowded Places.*

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC5009 Implement communication systems to respond to active threats

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Application

This unit specifies the skills and knowledge required to develop and implement communication plans in response to active threats. It includes defining and accessing national, state and terror counter-terrorism communication pathways, establishing a communication model and strategies for multi-agency and stakeholder engagement and employing electronic warning systems during active threat response. The unit supports Australian national security initiatives for counter-terrorism.

This unit is suitable for those using a broad range of cognitive, technical and communication skills to select and apply methods and technologies to analyse information and provide solutions to sometimes complex problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

None.

## Unit Sector

Security/Risk management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Define and access counter-terrorism communication

1.1 Clarify commonwealth, state and territory organisations and agencies with roles and responsibilities for national and jurisdictional counter-terrorism offences.

- pathways.
- 1.2 Source and engage with national security organisations, networks and forums to gather latest intelligence to support counter-terrorism preparedness.
  - 1.3 Confirm processes for initiating and establishing communications with police agency and other relevant persons during active threat response.
- 2 Develop communication plan to respond to active threat.
- 2.1 Access and interpret security and risk management plans and information to clarify assessed security risks and threat environment associated with client operations.
  - 2.2 Establish communication model and strategies for multi-agency and stakeholder engagement and employs electronic warning systems during active threat response.
  - 2.3 Conduct briefing session with relevant persons to explain roles and responsibilities of parties to the communication model and strategies.
  - 2.4 Use technology and analytical reporting programs to document and present communication plan in accordance with client, legislative and regulatory requirements.
- 3 Apply communication plan in response to active threat.
- 3.1 Receive active threat intelligence and verify reliability and details in consultation with relevant persons.
  - 3.2 Immediately communicate active threat information to police and other relevant persons in accordance with communication plan.
  - 3.3 Maintain communications with relevant persons to receive instructions and provide advice to facilitate emergency response procedures.
  - 3.4 Maintain situational awareness to apply contingency measures in response to changing threat situations and adjust communications accordingly.
  - 3.5 Complete and secure incident records and documentation to support post-threat investigation.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey and clarify information about active threats
- reading skills to analyse, compare and contrast information when analysing security intelligence
- writing skills to prepare succinct and logically structured communication plans.

## Unit Mapping Information

No equivalent unit.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC5009 Implement communication systems to respond to active threats

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by developing and implementing communication plans to respond to two different types of active threat.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory requirements that apply when implementing communication systems to respond to active threats:
  - key requirements of legislation, regulations and codes of conduct for security response in the jurisdiction of operation
  - licensing requirements in the security industry
  - use of force
  - work health and safety and duty of care
- application and types of emergency warning technologies
- Australia's emergency warning arrangements and emergency warning mechanisms used by emergency services organisations
- counter-terrorism groups and forums that can share security intelligence and advice:
  - ASIO's Business and Government Liaison Unit
  - national terrorism threat advisory system
  - state and territory crowded places forums
- implications for communicating active threat information arising from:
  - *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
  - *Active Armed Offender Guidelines for Crowded Places*
  - *Improvised Explosive Device Guidelines for Crowded Places*
  - *Chemical Weapon Guidelines for Crowded Places*
  - *Hostile Vehicle Guidelines for Crowded Places*

- national organisations and networks responsible for counter-terrorism in Australia and sources of intelligence to support counter-terrorism preparedness:
  - Australian Government National Security
  - Australian Security Intelligence Organisation (ASIO)
  - Trusted Information Sharing Network
  - Australian Government Cyber Security
  - Australian Government Identity Security
  - Australian Government Computer Emergency Response Team (CERT)
  - Chemicals of Security Concern
  - Security Sensitive Biological Agents
  - Australian Radiation Protection and Nuclear Safety Agency
  - Defence Science and Technology Organisation
  - Defence Signals Directorate
  - Office of State Security and Emergency Coordination
- national security hotline information
- purpose and objectives of the *National Police Alarm Activation Response Guideline*
- purpose and objectives of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
  - definition of crowded places
  - key security issues for crowded places
  - objectives, characteristics and identification of active armed offenders
  - definition of hostile vehicles and methods of attack
  - signs of chemical weapons attack and recommend response
  - general features of improvised explosive devices and recommended incident response
- techniques for collaborating with emergency services when responding to active threats
- ways that social and cultural differences may be expressed.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Candidates must have access to:

- legislation, regulations and codes of practice that apply when implementing communication systems to respond to active threats in the jurisdiction of operation
- documentation, resources and information technologies required to achieve the performance evidence

- *National Police Alarm Activation Response Guideline*
- *National Counter-Terrorism Plan*
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- *Australia's Strategy for Protecting Crowded Places from Terrorism*

# CPPSPS4001 Assess and treat water problems in swimming pools and spas

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4001A Assess and treat water problems in swimming pools and spas.

Incorporated content from CPPSPS4015A Maintain spa water quality, and CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to assess water quality, treat water problems and document water-treatment activities.

This unit is suitable for swimming pool and spa technicians who work independently using specialised knowledge and skills to solve water problems in accordance with regulatory requirements in:

- private and public swimming pools and spas, including:
  - hydrotherapy and therapeutic exercise pools
  - wading and receiving pools associated with water slides
  - wave pools.

All work must be carried out to comply with workplace procedures, in accordance with state/territory work health and safety (WHS), regulations and legislation that applies to the workplace. Legislative and regulatory requirements apply to swimming pool and spa technicians but vary according to state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Service technicians are not permitted to undertake installation, replacement, maintenance and repair functions that are restricted to licensed trades or occupations.

## Pre-requisite Unit

None.

## Unit Sector

Swimming pool and spa service

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |  |
|--|--|
| 1 Assess water quality.                    | 1.1 Interpret and comply with relevant regulatory and procedural requirements for water assessment and treatment.                        |
|  | 1.2 Test water quality using compliant equipment and procedures in accordance with water quality parameters and regulatory requirements. |
|  | 1.3 Review need for external analysis of samples and arrange as required.  |
|  | 1.4 Analyse and record test results in accordance with requirements.   |
|  | 1.5 Record and report water problems and test results accurately.  |
| 2 Treat water problems.                    | 2.1 Determine appropriate methods to treat identified water problems.  |
|  | 2.2 Apply corrective measures to water problems promptly and safely.   |
|  | 2.3 Monitor the effectiveness of water treatments and adjust as necessary in accordance with regulatory and manufacturer requirements.   |
| 3 Develop a water quality maintenance plan | 3.1 Develop schedules and procedures for microbiological and chemical testing in line with regulatory and enterprise requirements.       |
|  | 3.2 Recommend methods to document and monitor test results.  |
|  | 3.3 Recommend maintenance and procedures to maintain water quality.  |
| 4 Complete water                           | 4.1 Reinstate work area and treated swimming pool or spa to operational condition in accordance with WHS,                                |

treatment procedures.

enterprise and regulatory requirements.

- 4.2 Document and report procedures undertaken, and system and/or component malfunctions, faults, wear or damage identified during water treatment.
- 4.3 Advise appropriate person of maintenance measures to mitigate water quality problems and ensure compliance with regulatory requirements.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to source and interpret technical information, regulations, standards and codes of practice
- oral communication skills to interact with clients from diverse social, economic and cultural backgrounds
- numeracy skills to perform calculations related to water treatment.

## Unit Mapping Information

Supersedes and is equivalent to CPPSPS4001A Assess and treat water problems in swimming pools and spas.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSPS4001 Assess and treat water problems in swimming pools and spas

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4001A Assess and treat water problems in swimming pools and spas.

Incorporated content from CPPSPS4015A Maintain spa water quality, and CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- sampling and testing water quality in different swimming pools and spas on five occasions
- taking corrective action to treat identified water quality problems in different swimming pools and spas on five occasions.

At least two of the swimming pools and two of the spas must be used by the public.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- key requirements of relevant commonwealth, state or territory, and local government regulations and Australian standards related to swimming pool and spa servicing:
  - work health and safety
  - public health
  - dangerous goods
  - environment and waste disposal
  - Australian Competition and Consumer Commission product safety guidelines
  - electrical and plumbing regulations related to own work
- enterprise policies and procedures related to:
  - compliance with regulations
  - maintenance of knowledge of regulations
  - roles, responsibilities and limitations of own role
- work instructions:
  - site requirements, including access

- personal protective clothing and equipment requirements
- equipment and systems location information
- system information
- warranties and guarantees
- pool and spa water:
  - mineral
  - ozone
  - ultra violet (UV) systems
  - indoor and outdoor
- hazards and risks associated with water quality
- indicators of common swimming pool and spa water problems
- disinfection principles, systems, chemistry and by-products
- water balancing principles and procedures
- water testing methods and procedures
- microbial contamination:
  - bacteria
  - algae
  - protozoa
  - virus
  - parasites
- effectiveness of circulation and filtration system including bather load
- treatments for water problems:
  - contamination response
  - chemical dosing.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be undertaken in the workplace or in a simulated workplace environment.

Candidates must be provided with:

- relevant manufacturer instructions, regulations, codes, standards and enterprise policies and procedures
- relevant tools and equipment, personal protection equipment (PPE)
- technical references with current information on:
  - water quality parameters
  - water contamination
  - treatment processes for water problems in swimming pools and spas.

# CPPSPS4002 Install and repair swimming pool and spa circulation and filtration systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4002A Install, service and repair swimming pool and spa circulation and filtration systems. Minor title changed. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to install, test and repair swimming pool and spa circulation and filtration systems.

This unit is suitable for swimming pool and spa technicians who work independently using specialised knowledge and skills to solve predictable and unpredictable problems in swimming pool and spa circulation and filtration systems in accordance with regulatory requirements in:

- private swimming pools and spas
- public swimming pools and spas, including:
  - hydrotherapy and therapeutic exercise pools
  - wading and receiving pools associated with water slides
  - wave pools.

All work must be carried out to comply with workplace procedures, in accordance with state/territory work health and safety (WHS), regulations and legislation that applies to the workplace. Legislative and regulatory requirements apply to swimming pool and spa technicians but vary according to state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Service technicians are not permitted to undertake any installation, replacement, maintenance and repair functions that are restricted to licensed trades or occupations.

## Pre-requisite Unit

None.

## Unit Sector

Swimming pool and spa service

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |  |
|---|--|
| 1 Assess job requirements.  | 1.1 Identify relevant Australian standards and regulatory, manufacturer and enterprise requirements related to circulation and filtration systems.   |
|   | 1.2 Review work instructions and confirm installation or repair activities required  |
|   | 1.3 Identify hazards and assess and control risks in the work area in line with WHS and enterprise requirements.   |
| 2 Install and test swimming pool or spa circulation and filtration system and components. | 2.1 Apply relevant regulations, Australian standards and manufacturer, client and enterprise requirements throughout swimming pool or spa circulation and filtration system or component installation. |
|   | 2.2 Coordinate work with relevant licensed personnel.  |
|   | 2.3 Install circulation and filtration system or component to swimming pool or spa.  |
|   | 2.4 Test and commission swimming pool or spa circulation and filtration system or component.   |
|   | 2.10   |
| 3 Resolve faults in swimming pool or spa circulation and filtration systems.              | 3.1 Apply system knowledge and technical resources to analyse faults and defects efficiently and accurately.   |
|   | 3.2 Diagnose faults that are not covered fully by maintenance manual fault diagnosis guides.   |
|   | 3.3 Seek advice and repair work assistance from relevant personnel for activities outside scope of own expertise or licensing.   |
|   | 3.4 Apply WHS and sustainability practices related to materials, equipment, and the surrounding environment  |

- during fault finding and repair or replacement activities.
- 3.5 Repair or replace components in line with manufacturer instructions, and regulatory, client and enterprise requirements.
- 3.6 Test and commission swimming pool or spa circulation and filtration system in line with manufacturer instructions.
- 4 Complete installation and repair.
- 4.1 Reinststate work area and swimming pool or spa circulation and filtration system to operational condition.
- 4.2 Document and report procedures undertaken, and system and/or component malfunctions, faults, wear or damage.
- 4.3 Advise client of operational and maintenance requirements of the circulation and filtration system in line with enterprise requirements.
- 4.4 Advise appropriate persons of non-compliance of swimming pool or spa and environs with safety and regulations.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to source and interpret technical information, regulations, standards and codes of practice
- oral communication skills to interact with clients from diverse social, economic and cultural backgrounds.

## Unit Mapping Information

Supersedes and equivalent to CPPSPS4002A Install, service and repair swimming pool and spa circulation and filtration system.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSPS4002 Install and repair swimming pool and spa circulation and filtration systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4002A Install, service and repair swimming pool and spa circulation and filtration systems. Minor title changed. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- installing and testing a water circulation system and a component in one swimming pool and one spa
- installing and testing a filtration system or component in one swimming pool and one spa
- applying technical knowledge and advanced diagnostic skills to identify and repair one fault in a swimming pool and one fault in a spa circulation and filtration system, in line with regulatory requirements.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- key requirements of relevant commonwealth, state or territory, and local government regulations and Australian standards related to swimming pool and spa servicing:
  - work health and safety
  - public health
  - dangerous goods
  - environment and waste disposal
  - Australian Competition and Consumer Commission product safety guidelines
  - electrical and plumbing regulations related to own work
- enterprise policies and procedures related to:
  - compliance with regulations
  - maintenance of knowledge of regulations
  - roles, responsibilities and limitations of own role
- work instructions:

- site requirements, including access
- personal protective clothing and equipment requirements
- equipment and systems location information
- circulation and filtration system information
- warranties and guarantees
- hazards and risks associated with installation and repair of circulation and filtration systems
- water quality problems, identification, causes and solutions
- swimming pool and spa circulation system:
  - purpose and operating principles
  - types of circulation systems
  - components
  - pressure side elements
  - suction side elements
  - common faults
- swimming pool and spa filtration system:
  - purpose and operating principles
  - types of filtration systems
  - components
  - common faults
  - filter media changeover, rate and disposal.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be undertaken in the workplace or in a simulated workplace environment.

Candidates must be provided with:

- relevant manufacturer instructions, regulations, codes, standards and enterprise policies and procedures
- relevant tools and equipment, personal protection equipment (PPE)
- technical references with current information on swimming pool and spa circulation and filtration systems:
  - operating principles
  - components
  - faults and troubleshooting.

# Assessment Requirements for CPPSPS4003 Install and repair swimming pool and spa dosing systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4003A Install, service and repair swimming pool and spa dosing systems. Minor title changed. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- installing and testing a swimming pool or spa dosing system in at least two swimming pools and one spa
- applying technical knowledge and advanced fault diagnostic skills to identify and repair two faults in different dosing systems, in line with regulatory requirements.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- key requirements of relevant commonwealth, state or territory, and local government regulations and Australian standards related to swimming pool and spa servicing:
  - work health and safety
  - public health
  - dangerous goods
  - environment and waste disposal
  - Australian Competition and Consumer Commission product safety guidelines
  - electrical and plumbing regulations related to own work
- enterprise policies and procedures related to:
  - compliance with regulations
  - maintenance of knowledge of regulations
  - roles, responsibilities and limitations of own role
- work instructions
  - site requirements, including access
  - personal protective clothing and equipment requirements

- equipment and systems location information
- system information
- warranties and guarantees
- hazards and risks associated with installation and repair of dosing systems including electrical safety
- purpose and operating principles of swimming pool and spa dosing systems
- common faults of swimming pool and spa dosing systems
- maintenance procedures for electrically interlocking chemical feeder and pool pump systems
- types, components, operation, installation, commissioning and servicing:
  - dosing control systems
  - erosion feeders or flow-through chemical feed systems:
    - pressure differential feeders
    - pressure erosion dry chemical feeders
    - pressure to vacuum feeders
    - spray erosion dry chemical feeders
- water testing:
  - equipment
  - parameters
  - techniques
  - test results and records.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be undertaken in the workplace or in a simulated workplace environment.

Candidates must be provided with:

- relevant manufacturer instructions, regulations, codes, standards and enterprise policies and procedures
- relevant tools and equipment, personal protection equipment (PPE)
- technical references with current information on swimming pool and spa dosing systems:
  - operating principles
  - components
  - faults and troubleshooting.

# Assessment Requirements for CPPSPS4004 Install and repair swimming pool and spa cleaning and vacuuming systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4004A Install, service and repair swimming pool and spa cleaning and vacuuming systems. Minor title change. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Element 3 changed from Service to Maintain. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- installing and testing different types cleaning and vacuuming systems or components in two swimming pools and one spa
- applying technical knowledge and advanced diagnostic skills to identify and repair two faults in different swimming pool cleaning and vacuuming systems in line with regulatory requirements.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- key requirements of relevant Commonwealth, state or territory, and local government regulations and Australian standards related to swimming pool and spa servicing:
  - work health and safety
  - public health
  - dangerous goods
  - environment and waste disposal
  - Australian Competition and Consumer Commission product safety guidelines
  - electrical and plumbing regulations related to own work
- enterprise policies and procedures related to:
  - compliance with regulations
  - maintenance of knowledge of regulations
  - roles, responsibilities and limitations of own role
- work instructions:
  - site requirements, including access

- personal protective clothing and equipment requirements
- equipment and systems location information
- system information
- warranties and guarantees
- hazards and risks associated with installation and repair of cleaning and vacuuming systems
- types of swimming pool and spa cleaning and vacuuming systems:
  - built-in floor systems
  - pressure cleaners
  - suction cleaners
  - manual vacuum systems
  - sweepers
  - Venturi vacuum type cleaners
  - robotic pool cleaners
  - deck suction vacuum systems in commercial swimming pools
- purpose and operating principles of cleaning and vacuum systems
- components of cleaning and vacuum systems
- common faults of cleaning and vacuum systems
- maintenance procedures:
  - cleaning
  - inspection
  - bleeding air from hose line.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be undertaken in the workplace or in a simulated workplace environment.

Candidates must be provided with:

- relevant manufacturer instructions, regulations, codes, standards and enterprise policies and procedures
- relevant tools and equipment, personal protection equipment (PPE)
- technical references with current information on swimming pool and spa cleaning and vacuuming systems:
  - operating principles
  - components
  - faults and troubleshooting.

# CPPSPS4005 Install, service and repair swimming pool and spa heating systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4005A Install, service and repair swimming pool and spa heating systems. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Element 3 changed from Service to Maintain. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to install, service, test and repair swimming pool and spa heating systems.

This unit is suitable for swimming pool and spa technicians who work independently using specialised knowledge and skills to solve predictable and unpredictable problems in swimming pool and spa heating systems in accordance with regulatory requirements in:

- private swimming pools and spas
- public swimming pools and spas, including:
  - hydrotherapy and therapeutic exercise pools
  - wading and receiving pools associated with water slides
  - wave pools.

All work must be carried out to comply with workplace procedures, in accordance with state/territory work health and safety (WHS), regulations and legislation that applies to the workplace. Legislative and regulatory requirements apply to swimming pool and spa technicians but vary according to state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Service technicians are not permitted to undertake any installation, replacement, maintenance and repair functions that are restricted to licensed trades or occupations.

## Pre-requisite Unit

None.

## Unit Sector

Swimming pool and spa service

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1 Assess job requirements.	1.1 Identify relevant Australian standards and regulatory, manufacturer and enterprise requirements related to heating systems.  1.2 Review work instructions and confirm installation or repair activities required.  1.3 Determine heating type according to client and site requirements.  1.4 Identify hazards and assess and control risks in the work area in line with WHS and enterprise requirements.  1.10
2 Install and test swimming pool or spa heating system and components.	2.1 Apply relevant regulations, Australian standards and manufacturer, client and enterprise requirements throughout swimming pool or spa heating system or component installation.  2.2 Fit heating system or component to swimming pool or spa.  2.3 Coordinate installation work with relevant licensed personnel.  2.4 Test and commission swimming pool or spa heating system or component.
3 Maintain swimming pool or spa heating systems.	3.1 Identify service and maintenance requirements from manufacturer instructions in line with enterprise requirements.  3.2 Check and fit replacement components in line with manufacturer specifications.  3.3 Service swimming pool or spa heating system in line with WHS, manufacturer instructions and enterprise procedures.

- |   |   |     |  |
|---|---|-----|--|
| 4 | Resolve faults in swimming pool or spa heating systems. | 4.1 | Apply system knowledge and technical resources to analyse faults and defects.  |
|   |   | 4.2 | Diagnose faults that are not covered fully by maintenance manual fault diagnosis guides.   |
|   |   | 4.3 | Seek advice and repair work assistance from relevant personnel for activities outside scope of own expertise or licensing.   |
|   |   | 4.4 | Apply WHS and sustainability practices related to materials, equipment, and the surrounding environment during fault finding and repair or replacement activities. |
|   |   | 4.5 | Repair or replace components in line with manufacturer instructions, and regulatory, client and enterprise requirements.   |
|   |   | 4.6 | Test and commission swimming pool or spa heating system in line with specifications.   |
| 5 | Complete installation and repair.                       | 5.1 | Reinstate work area and swimming pool or spa heating system to operational condition.  |
|   |   | 5.2 | Document and report procedures undertaken, and system or component malfunctions, faults, wear or damage.   |
|   |   | 5.3 | Advise client of operational and maintenance requirements of the heating system in line with enterprise requirements.  |
|   |   | 5.4 | Advise appropriate persons of non-compliance of swimming pool or spa and environs with safety and regulations.   |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to source and interpret technical information, regulations, standards and codes of practice

- oral communication skills to interact with clients from diverse social, economic and cultural backgrounds
- numeracy skills to perform calculations related to troubleshooting faults.

## **Unit Mapping Information**

Supersedes and equivalent to CPPSPS4005A Install, service and repair swimming pool and spa heating systems.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSPS4005 Install, service and repair swimming pool and spa heating systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4005A Install, service and repair swimming pool and spa heating systems. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Element 3 changed from Service to Maintain. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by safely:

- installing and testing a swimming pool or spa water heating system and a component in a minimum of two swimming pools and one spa in line with regulatory requirements
- applying technical knowledge and advanced diagnostic skills to identify and repair one heating fault in a swimming pool and one fault in a spa in line with regulatory requirements.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- key requirements of relevant commonwealth, state or territory, and local government regulations and Australian standards related to swimming pool and spa servicing:
  - work health and safety
  - public health
  - dangerous goods
  - environment and waste disposal
  - Australian Competition and Consumer Commission product safety guidelines
  - electrical and plumbing regulations related to own work
- enterprise policies and procedures:
  - compliance with regulations
  - maintenance of knowledge of regulations
  - roles, responsibilities and limitations of own role
- work instructions:
  - site requirements, including access

- personal protective clothing and equipment requirements
- equipment and systems location information
- system information
- warranties and guarantees
- hazards associated with heated water in swimming pools and spas
- energy efficiency:
  - energy consumption of different heating systems
  - ways of maximising energy efficiency of swimming pool and spa heating systems
- swimming pool and spa heating system:
  - purpose and operating principles
  - types and components:
    - heat pump or exchanger
    - gas (fossil fuel)
    - solar
    - electric
  - determining heating requirements:
    - sizing
    - temperature needed
    - time of year pool or spa used
    - pool or spa measurements
    - solar roof space availability and access
    - gas fitting regulations
    - heat pump electrical needs
    - impact of heat blanket
    - purchase, installation and running costs
    - Coefficient of Performance (COP)
  - installation requirements:
    - venting and air circulation
    - installation before chemical or salt chlorination equipment
    - correct pipework and flow rates
    - bypass valves for servicing and water flow adjustments
    - available support staff to safely install heater
  - operation, maintenance and servicing of heating systems:
    - common faults
    - inspection and cleaning
    - manufacturer requirements.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be undertaken in the workplace or in a simulated workplace environment.

Candidates must be provided with:

- relevant manufacturer instructions, regulations, codes, standards and enterprise policies and procedures
- relevant tools and equipment, personal protection equipment (PPE)
- technical references with current information on swimming pool and spa heating systems:
  - operating principles
  - components
  - faults and troubleshooting.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSPS4006 Install, service and repair swimming pool and spa low voltage lighting systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4006A Install, service and repair low voltage swimming pool and spa lighting systems. Minor title change. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Element 3 changed from Service to Maintain. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to install, service and repair swimming pool and spa lighting systems. The unit is restricted to low voltage lighting systems only.

This unit is suitable for swimming pool and spa technicians who work independently using specialised knowledge and skills to solve predictable and unpredictable problems in swimming pool and spa lighting systems in accordance with regulatory requirements in:

- private swimming pools and spas
- public swimming pools and spas, including:
  - hydrotherapy and therapeutic exercise pools
  - wading and receiving pools associated with water slides
  - wave pools.

All work must be carried out to comply with workplace procedures, in accordance with state/territory work health and safety (WHS), regulations and legislation that applies to the workplace. Legislative and regulatory requirements apply to swimming pool and spa technicians but vary according to state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Service technicians are not permitted to undertake any installation, replacement, maintenance and repair functions that are restricted to licensed trades or occupations.

## Pre-requisite Unit

None.

## Unit Sector

Swimming pool and spa service

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1 Assess job requirements.	1.1 Identify relevant Australian standards and regulatory, manufacturer and enterprise requirements related to swimming pool and spa lighting systems.
	1.2 Review work instructions and confirm system, installation, service or repair activities required.
	1.3 Identify hazards and assess and control risks in the work area in line with WHS and enterprise requirements.
	1.10
2 Install and test swimming pool or spa lighting system and components.	2.1 Apply relevant regulations, Australian standards and manufacturer, client and enterprise requirements throughout lighting system or component installation.
	2.2 Coordinate installation work with relevant licensed personnel.
	2.3 Install lighting system or component to swimming pool or spa.
	2.4 Test and commission swimming pool or spa lighting system or component.
3 Maintain swimming pool or spa lighting systems.	3.1 Identify service and maintenance requirements from manufacturer instructions in line with enterprise requirements.
	3.2 Check and fit replacement components in line with manufacturer instructions.
	3.3 Service swimming pool or spa lighting system in line with WHS, manufacturer instructions and enterprise procedures.
4 Resolve faults in swimming pool or spa	4.1 Apply system knowledge and technical resources to analyse faults and defects efficiently and accurately.

- lighting systems.
- 4.2 Diagnose faults that are not covered fully by maintenance manual fault diagnosis guides.
  - 4.3 Seek advice and repair work assistance from relevant personnel for activities outside scope of own expertise or licensing.
  - 4.4 Apply WHS and sustainability practices related to materials, equipment, and the surrounding environment during fault finding and repair or replacement activities.
  - 4.5 Repair or replace components in line with manufacturer instructions, and regulatory, client and enterprise requirements.
  - 4.6 Test and commission swimming pool or spa lighting system in line with manufacturer instructions.
- 5 Complete installation, repair and service.
- 5.1 Reinstatement work area and swimming pool or spa lighting system to operational condition.
  - 5.2 Document and report procedures undertaken, and system and/or component malfunctions, faults, wear or damage.
  - 5.3 Advise client of operational and maintenance requirements of the lighting system in line with enterprise requirements.
  - 5.4 Advise appropriate persons of non-compliance of swimming pool or spa and environs with safety and regulations.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to source and interpret technical information, regulations, standards and codes of practice
- oral communication skills to interact with clients from diverse social, economic and cultural backgrounds
- numeracy skills to perform calculations related to troubleshooting faults.

## Unit Mapping Information

Supersedes and equivalent to CPPSPS4006A Install, service and repair low voltage swimming pool and spa lighting systems.

Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- installing, servicing and testing a swimming pool or spa lighting system and a component in a minimum of two swimming pools and one spa
- applying technical knowledge and advanced diagnostic skills to identify and repair one lighting fault in a swimming pool and one lighting fault in a spa, in line with regulatory requirements.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- key requirements of relevant commonwealth, state or territory, and local government regulations and Australian standards related to swimming pool and spa servicing:
  - work health and safety
  - public health
  - dangerous goods
  - environment and waste disposal
  - Australian Competition and Consumer Commission product safety guidelines
  - electrical and plumbing regulations related to own work
- enterprise policies and procedures related to:
  - compliance with regulations
  - maintenance of knowledge of regulations
  - roles, responsibilities and limitations of own role
- work instructions:
  - site requirements, including access

- personal protective clothing and equipment requirements
- equipment and systems location information
- system information
- warranties and guarantees
- hazards and risks associated with swimming pool and spa lighting systems and underwater lighting systems
- swimming pool and spa low voltage lighting system:
  - common faults
  - components including power, transformer, light, light cable
  - maintenance, including multi-meter
  - operating principles of different lighting systems
  - procedures for replacement of bulbs and fuses
  - purpose of lighting system
  - types, operation and servicing of lighting systems:
    - fibre-optic
    - halogen
    - LED
  - retrofitting
- energy efficiency:
  - energy consumption of different lighting systems
  - energy ratings
  - ways of maximising energy efficiency of swimming pool and spa lighting systems.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be undertaken in the workplace or in a simulated workplace environment.

Candidates must be provided with:

- relevant manufacturer instructions, regulations, codes, standards and enterprise policies and procedures
- relevant tools and equipment, personal protection equipment (PPE)
- technical references with current information on swimming pool and spa lighting systems:
  - operating principles
  - components
  - faults and troubleshooting.

# CPPSPS4007 Inspect, service and repair aquatic facility plant and equipment

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4007A Inspect, service and repair aquatic facility plant and equipment. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Element 3 changed from Service to Maintain. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to inspect, service and repair aquatic facility plant and equipment.

This unit is suitable for swimming pool and spa technicians who work independently using specialised knowledge and skills to solve predictable and unpredictable problems in aquatic facility plant and equipment in accordance with regulatory requirements in:

- commercial and public swimming pools and spas
- hydrotherapy and therapeutic exercise pools
- wading and receiving pools associated with water slides
- wave pools.

All work must be carried out to comply with workplace procedures, in accordance with state/territory work health and safety (WHS), regulations and legislation that applies to the workplace. Legislative and regulatory requirements apply to swimming pool and spa technicians but vary according to state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Service technicians are not permitted to undertake any installation, replacement, maintenance and repair functions that are restricted to licensed trades or occupations.

## Pre-requisite Unit

None.

## Unit Sector

Swimming pool and spa service

## Elements and Performance Criteria

# Assessment Requirements for CPPSPS4007 Inspect, service and repair aquatic facility plant and equipment

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4007A Inspect, service and repair aquatic facility plant and equipment. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Element 3 changed from Service to Maintain. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- inspecting and servicing aquatic plant, equipment and components in commercial and public swimming pools and spas on three occasions
- applying technical knowledge and advanced diagnostic skills to identify and repair two faults in line with regulatory requirements and which are not restricted to licensed trades or occupations.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- key requirements of relevant commonwealth, state or territory, and local government regulations and Australian standards related to swimming pool and spa servicing:
  - work health and safety
  - public health
  - dangerous goods
  - environment and waste disposal
  - Australian Competition and Consumer Commission product safety guidelines
  - electrical and plumbing regulations related to own work
- enterprise policies and procedures related to:
  - compliance with regulations
  - maintenance of knowledge of regulations
  - roles, responsibilities and limitations of own role
- work instructions:

# CPPSPS4008 Install, service and repair spas

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4008A Install, service and repair spas.  
Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Element 3 changed from Service to Maintain. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to install, service and repair spas.

This unit is suitable for swimming pool and spa technicians who work independently using specialised knowledge and skills to solve predictable and unpredictable problems in spas in accordance with regulatory requirements in indoor and outdoor, private and public spas including:

- hydrotherapy pools
- hot tubs
- swim spas
- spa baths and pools.

All work must be carried out to comply with workplace procedures, in accordance with state/territory work health and safety (WHS), regulations and legislation that applies to the workplace. Legislative and regulatory requirements apply to swimming pool and spa technicians but vary according to state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Service technicians are not permitted to undertake any installation, replacement, maintenance and repair functions that are restricted to licensed trades or occupations.

## Pre-requisite Unit

None.

## Unit Sector

Swimming pool and spa service

## Elements and Performance Criteria

Elements describe the essential outcomes.

# Assessment Requirements for CPPSPS4008 Install, service and repair spas

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4008A Install, service and repair spas. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Element 3 changed from Service to Maintain. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- installing one spa and a component in a minimum of two spas
- servicing a spa or component in a minimum of two spas
- applying technical knowledge and advanced diagnostic skills to identify and repair two faults in line with regulatory requirements.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- key requirements of relevant commonwealth, state or territory, and local government regulations and Australian standards related to swimming pool and spa servicing:
  - work health and safety
  - public health
  - dangerous goods
  - environment and waste disposal
  - Australian Competition and Consumer Commission product safety guidelines
  - electrical and plumbing regulations related to own work
- enterprise policies and procedures related to:
  - compliance with regulations
  - maintenance of knowledge of regulations
  - roles, responsibilities and limitations of own role
- work instructions:
  - site requirements, including access
  - personal protective clothing and equipment requirements
  - equipment and systems location information

- system information
- warranties and guarantees
- hazards and risks associated with spas
- operating principles
- types, operation, installation, commissioning and servicing of spas
- maintenance of spas
- repair of small cracks and scratches, including use of acrylic repair kit or car scratch repair kit
- common faults, including foaming
- spa components
- construction material:
  - concrete
  - fibreglass
  - thermoplastic
  - stainless steel
- design features:
  - steps, seating areas, hand/support rails
  - dehumidification
  - bathing loads
  - water replacement
  - hot water circulation
  - plant space and location
- disinfection:
  - hazards
  - purpose
  - procedures
- chemistry testing and parameters
- water testing:
  - equipment
  - parameters
  - techniques
  - test results.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be undertaken in the workplace or in a simulated workplace environment.

Candidates must be provided with:

- relevant manufacturer instructions, regulations, codes, standards and enterprise policies and procedures

- relevant tools and equipment, personal protection equipment (PPE)
- technical references with current information on spas:
  - operating principles
  - components
  - faults and troubleshooting.

# CPPSPS4009 Estimate cost of swimming pool and spa products and services

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4009A Estimate cost of swimming pool and spa products and services. Updated to meet the Standards for Training Packages.

## Application

This unit of competency specifies the outcomes required to estimate the cost of swimming pool and spa products and services. It includes confirming customer requirements, sourcing and analysing information on swimming pool and spa products and services and presenting costs to clients.

This unit of competency supports the work of swimming pool and spa technicians servicing:

- private swimming pools and spas
- public swimming pools and spas, including:
  - hydrotherapy and therapeutic exercise pools
  - wading and receiving pools associated with water slides
  - wave pools.

All work must be carried out to comply with workplace procedures, in accordance with state/territory work health and safety (WHS), regulations and legislation that applies to the workplace. Legislative and regulatory requirements apply to swimming pool and spa technicians but vary according to state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

## Pre-requisite Unit

None.

## Unit Sector

Swimming pool and spa service

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |   |
|--|---|
| 1 Assess client requirements.                                    | 1.1 Identify client requirements in line with enterprise procedures.  |
|  | 1.2 Confirm specifications for product and/or service with client in line with enterprise procedures and manufacturer instructions.                                       |
| 2 Research costs of swimming pool and spa products and services. | 2.1 Determine and interpret relevant Australian standards and regulatory, manufacturer and enterprise requirements related to swimming pool or spa products and services. |
|  | 2.2 Obtain information on products, services and potential suppliers to meet client requirements.   |
|  | 2.3 Establish availability and supply time of products and services.  |
|  | 2.4 Identify and uphold ethical standards and industry codes of conduct when identifying suppliers and gathering product and service information.                         |
|  | 2.5 Ascertain factors that may influence estimated cost of products and services.   |
|  | 2.6 Record information obtained on suppliers, products and service for easy retrieval.  |
| 3 Present costs to client.                                       | 3.1 Prepare estimate of cost of products and/or services in line with enterprise policy and procedures.   |
|  | 3.2 Explain estimated cost of products and/or services and limitations of cost estimates to client.   |
|  | 3.3 Provide information to client on compliance of swimming pool or spa products and services with safety, regulatory and manufacturer requirements.                      |
|  | 3.4 Respond to client questions and concerns.   |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to source and interpret technical information, regulations, standards, codes of practice, product reviews, trade publications, and supplier information
- writing skills to prepare written information and cost estimates
- oral communication skills to interact with clients from diverse social, economic and cultural backgrounds
- numeracy skills to calculate and compare price and technical features of swimming pool and spa products and services

## Unit Mapping Information

Supersedes and equivalent to CPPSPS4009A Estimate cost of swimming pool and spa products and services.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSPS4009 Estimate cost of swimming pool and spa products and services

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4009A Estimate cost of swimming pool and spa products and services. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- preparing and presenting three written estimates of the cost for the supply of swimming pool and spa products and services. Different products and services must be used for each estimate.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- key requirements of relevant commonwealth, state or territory, and local government regulations and Australian standards related to swimming pool and spa servicing:
  - consumer protection
  - work health and safety
  - public health
  - dangerous goods
  - environment and waste disposal
  - Australian Competition and Consumer Commission product safety guidelines
  - electrical and plumbing regulations related to own work
- enterprise policies and procedures related to:
  - compliance with regulations
  - maintenance of knowledge of regulations
  - roles, responsibilities and limitations of own role
- work instructions:
  - site requirements, including access
  - personal protective clothing and equipment requirements
  - warranties and guarantees
- customer service principles

- enterprise policies and procedures:
  - dealing with client complaints
  - developing product and service knowledge
- factors involved in estimating costs:
  - cost range
  - ethical practices in identifying suppliers and product and service information
  - product and service specifications
  - inclusions, exclusions and limitations
- sources of information on products and services relevant to swimming pools and spas
- swimming pool and spa products and services:
  - accessories
  - chemicals
  - maintenance and servicing.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be undertaken in the workplace or in a simulated workplace environment.

Candidates must be provided with:

- relevant regulations, codes, standards, enterprise policies and procedures
- technical and commercial references with current information on swimming pool and spa products and services and procedures for determining cost of swimming pool and spa products and services.

## Links

Companion volumes to this training package are available at the VETNet website -

# CPPSPS4012 Design, install and service automated systems for swimming pools and spas

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4012A Design, install and service automated systems for swimming pools and spas. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Element 3 changed from Service to Maintain. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to design, install, program, test and service automated systems in swimming pools and spas.

This unit is suitable for swimming pool and spa technicians who work independently using specialised knowledge and skills to solve predictable and unpredictable problems in swimming pool and spa automated systems in accordance with regulatory requirements in:

- private swimming pools and spas
- public swimming pools and spas, including:
  - hydrotherapy and therapeutic exercise pools
  - wading and receiving pools associated with water slides
  - wave pools.

All work must be carried out to comply with workplace procedures, in accordance with state/territory work health and safety (WHS), regulations and legislation that applies to the workplace. Legislative and regulatory requirements apply to swimming pool and spa technicians but vary according to state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Service technicians are not permitted to undertake any installation, replacement, maintenance and repair functions that are restricted to licensed trades or occupations.

## Pre-requisite Unit

None.

## Unit Sector

Swimming pool and spa service

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1 Assess job requirements.	1.1 Identify relevant Australian standards and regulatory, manufacturer and enterprise requirements related to automated swimming pool and spa systems.
	1.2 Review work instructions and confirm installation, service and/or repair activities required.
	1.3 Identify hazards and assess and control risks in the work area in line with WHS and enterprise requirements.
2 Install and test automated systems and components for swimming pools or spas.	2.1 Apply relevant regulations, Australian standards and manufacturer, client and enterprise requirements throughout swimming pool or spa circulation automated system or component design and installation.
	2.2 Coordinate installation work with relevant licensed personnel.
	2.3 Fit and program automated system.
	2.4 Test and validate automated system or component.
3 Maintain automated systems for swimming pools or spas.	3.1 Identify service and maintenance requirements from manufacturer instructions in line with enterprise requirements.
	3.2 Check and fit replacement components in line with manufacturer instructions.
	3.3 Service automated system in line with WHS, manufacturer instructions and enterprise procedures.
4 Resolve faults in automated systems for swimming pools or spas.	4.1 Apply system knowledge and technical resources to analyse faults and defects efficiently and accurately.
	4.2 Diagnose faults that are not covered fully by maintenance manual fault diagnosis guides.

- 4.3 Seek advice and repair work assistance from relevant personnel for activities outside scope of own expertise or licensing.
  - 4.4 Apply WHS and sustainability practices related to materials, equipment, and the surrounding environment during fault finding and repair or replacement activities.
  - 4.5 Repair or replace components in line with manufacturer instructions, and regulatory, client and enterprise requirements.
  - 4.6 Test and commission automated system in line with manufacturer instructions.
- 5 Complete installation, repair and service.
- 5.1 Install or reinstate work area and automated system to operational condition.
  - 5.2 Document and report procedures undertaken, and system and/or component malfunctions, faults, wear or damage identified.
  - 5.3 Advise client of operational and maintenance requirements of the automated system in line with enterprise requirements.
  - 5.4 Advise appropriate persons of non-compliance of swimming pool or spa and environs with safety and regulations.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to source and interpret technical information, regulations, standards and codes of practice
- oral communication skills to interact with clients from diverse social, economic and cultural backgrounds
- numeracy skills to perform calculations related to troubleshooting faults.

## Unit Mapping Information

Supersedes and equivalent to CPPSPS4012A Design, install and service automated systems for swimming pools and spas.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSPS4012 Design, install and service automated systems for swimming pools and spas

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4012A Design, install and service automated systems for swimming pools and spas. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Element 3 changed from Service to Maintain. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- designing, installing and testing a swimming pool and spa automated system and components in a minimum of two swimming pools and one spa
- Applying technical knowledge and advanced diagnostic skills to identify and repair two faults with automated systems, in line with regulatory requirements.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- key requirements of relevant commonwealth, state or territory, and local government regulations and Australian standards related to swimming pool and spa servicing:
  - work health and safety
  - public health
  - dangerous goods
  - environment and waste disposal
  - Australian Competition and Consumer Commission product safety guidelines
  - electrical and plumbing regulations related to own work
- enterprise policies and procedures related to:
  - compliance with regulations
  - maintenance of knowledge of regulations
  - roles, responsibilities and limitations of own role
- work instructions:
  - site requirements, including access
  - personal protective clothing and equipment requirements

- equipment and systems location information
- system information
- warranties and guarantees
- hazards and risks associated with automated systems for swimming pools and spas:
  - explosions and implosions
  - skimmer and suction entrapment
  - electrocution, fire, poisoning
- automated systems:
  - purpose and operating principles
  - maintenance procedures, scheduling and run times
  - types:
    - dosing
    - heating
    - lighting
    - pool and spa controllers
    - pool cleaning
    - valving
    - water treatment
  - common faults
- components:
  - electronics:
    - circuits
    - diagrams
    - safety
- testing and test equipment
  - peristaltic pumps
  - programmable controllers
  - sensors
  - connectivity
  - functions of actuator valves.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be undertaken in the workplace or in a simulated workplace environment.

Candidates must be provided with:

- relevant manufacturer instructions, regulations, codes, standards and enterprise policies and procedures
- relevant tools and equipment, personal protection equipment (PPE)

- technical references with current information on automated swimming pool and spa systems:
  - operating principles
  - components
  - faults and troubleshooting.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSPS4013 Establish maintenance plans for swimming pools and spas

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4013A Establish maintenance plans for swimming pools and spas. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Updated to meet the Standards for Training Packages.

## Application

This unit of competency specifies the skills and knowledge required to establish maintenance plans for swimming pools and spas.

This unit is suitable for swimming pool and spa technicians who work independently using specialised knowledge and skills to develop, implement and review maintenance plans in:

- private swimming pools and spas
- public swimming pools and spas, including:
  - hydrotherapy and therapeutic exercise pools
  - wading and receiving pools associated with water slides
  - wave pools.

All work must be carried out to comply with workplace procedures, in accordance with state/territory work health and safety (WHS), regulations and legislation that applies to the workplace. Legislative and regulatory requirements apply to swimming pool and spa technicians but vary according to state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Service technicians are not permitted to undertake any installation, replacement, maintenance and repair functions that are restricted to licensed trades or occupations.

## Pre-requisite Unit

None.

## Unit Sector

Swimming pool and spa service

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1 Assess maintenance requirements.	<p>1.1 Identify relevant Australian standards and regulatory, manufacturer and enterprise requirements related to swimming pool and spa maintenance.</p> <p>1.2 Identify requirements for routine, seasonal and preventative maintenance</p> <p>1.3 Review work instructions and factors impacting on required maintenance activities and schedules.</p> <p>1.4 Identify hazards and assess risks to be addressed in the maintenance plan in line with WHS and enterprise requirements.</p>
2 Develop swimming pool or spa maintenance plan.	<p>2.1 Establish maintenance plan in line with owner instructions, regulatory, manufacturer and enterprise requirements and procedures.</p> <p>2.2 Determine maintenance costs and recommended schedule.</p> <p>2.3 Develop contract specifications for maintenance services where appropriate.</p> <p>2.4 Identify aspects of maintenance plan requiring specialist services and seek assistance as required.</p> <p>2.5 Establish criteria and develop register of specialist service providers to support maintenance activities.</p> <p>2.6 Establish systems for implementing and reporting maintenance requirements.</p>
3 Implement maintenance plan.	<p>3.1 Seek approval of maintenance plan in line with enterprise procedures.</p> <p>3.2 Carry out maintenance in line with agreed plan, owner or operator instructions, legislative requirements and enterprise procedures.</p> <p>3.3 Document and report procedures undertaken, and system</p>

- and/or component malfunctions, faults, wear or damage identified.
- 3.4 Advise appropriate persons of non-compliance of swimming pool or spa and environs with safety and regulations.
- 4 Evaluate maintenance plan.
- 4.1 Assess maintenance plan using relevant resources and consultation with relevant persons.
- 4.2 Present assessment of maintenance plan to relevant people in required format and timeframes.
- 4.3 Recommend improvements to maintenance plan to relevant people in line with enterprise procedures.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to source and interpret technical information, regulations, standards and codes of practice
- oral communication skills to:
  - interact with clients from diverse social, economic and cultural backgrounds
  - negotiate contracts with tradespeople and service providers
- numeracy skills to calculate and interpret data and maintenance costs.

## Unit Mapping Information

Supersedes and equivalent to CPPSPS4013A Establish maintenance plans for swimming pools and spas.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSPS4013 Establish maintenance plans for swimming pools and spas

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4013A Establish maintenance plans for swimming pools and spas. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- developing a maintenance plan for one private swimming pool and one private spa
- developing a maintenance plan for one swimming pool and one spa both of which are used by the public.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- key requirements of relevant commonwealth, state or territory, and local government regulations and Australian standards related to swimming pool and spa servicing:
  - work health and safety
  - public health
  - dangerous goods
  - environment and waste disposal
  - Australian Competition and Consumer Commission product safety guidelines
  - electrical and plumbing regulations related to own work
- enterprise policies and procedures related to:
  - compliance with regulations
  - maintenance of knowledge of regulations
  - roles, responsibilities and limitations of own role
- work instructions:
  - site requirements, including access
  - personal protective clothing and equipment requirements
  - equipment and systems location information
  - maintenance information

- warranties and guarantees
- hazards and risks associated with swimming pool and spa maintenance, including chemical safety
- features of business equipment, resources and procedures
- maintenance plan design factors:
  - design and type of facility
  - length of the operating season
  - need to generate revenue
  - number and age of the pools and spas
  - size and capabilities of the staff
- contents of maintenance plans for swimming pools and spas:
  - advantages
  - costs
  - procedures
  - maintenance intervals
  - preventative maintenance
  - routine maintenance
  - seasonal maintenance
  - procedures for selecting specialist service providers including tradespeople
  - specialist services.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be undertaken in the workplace or in a simulated workplace environment.

Candidates must be provided with:

- relevant manufacturer instructions, regulations, codes, standards and enterprise policies and procedures
- relevant tools and equipment, personal protection equipment (PPE)
- technical references with current information on swimming pool and spa maintenance including:
  - requirements
  - procedures
  - preventative, seasonal and routine maintenance.

# CPPSPS4014 Drain and acid wash swimming pools and spas

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4014A Drain and acid wash swimming pools and spas. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the skills and knowledge required to drain and acid wash swimming pools and spas.

This unit is suitable for swimming pool and spa technicians who work independently using specialised knowledge and skills to solve predictable and unpredictable problems when draining and acid washing swimming pools and spas in accordance with regulatory requirements in:

- private swimming pools and spas
- public swimming pools and spas, including:
  - hydrotherapy and therapeutic exercise pools
  - wading and receiving pools associated with water slides
  - wave pools.

All work must be carried out to comply with workplace procedures, in accordance with state/territory work health and safety (WHS), regulations and legislation that applies to the workplace. Legislative and regulatory requirements apply to swimming pool and spa technicians but vary according to state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Service technicians are not permitted to undertake any installation, replacement, maintenance and repair functions that are restricted to licensed trades or occupations.

## Pre-requisite Unit

None.

## Unit Sector

Swimming pool and spa service

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1 Assess job requirements.	<p>1.1 Identify relevant Australian standards and regulatory, manufacturer and enterprise requirements related to draining and acid washing swimming pools and spas.</p> <p>1.2 Determine suitability of swimming pool or spa for acid washing.</p> <p>1.3 Review work instructions and confirm activities required.</p> <p>1.4 Identify hazards and assess and control risks in the work area in line with WHS and enterprise requirements</p>
2 Acid wash pool or spa.	<p>2.1 Explain enterprise disclosure, disclaimer and acknowledgement documentation to client.</p> <p>2.2 Apply relevant regulations, Australian standards and manufacturer, client and enterprise requirements throughout swimming pool or spa draining and acid washing.</p> <p>2.3 Apply WHS and sustainability practices related to materials, equipment, and the surrounding environment during draining and acid washing.</p> <p>2.4 Handle, transport and store chemicals and dispose of waste safely in line with enterprise, manufacturer and regulatory requirements.</p> <p>2.5 Respond to accident and emergency situations in line with WHS, legislative and enterprise requirements.</p>
3 Complete work activities.	<p>3.1 Reinstate work area and swimming pool or spa to operational condition.</p> <p>3.2 Document and report procedures undertaken, and system and/or component malfunctions, faults, wear or damage identified.</p> <p>3.3 Advise relevant persons of work completion in line with enterprise procedures.</p>

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to interact with clients from diverse social, economic and cultural backgrounds
- reading skills to source and interpret technical information, regulations, standards and codes of practice related to draining and acid washing swimming pools and spas
- numeracy skills to calculate quantities, volumes and ratios of acid and chemicals for acid washing of swimming pool or spa

## Unit Mapping Information

Supersedes and equivalent to CPPSPS4014A Drain and acid wash swimming pools and spas.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSPS4014 Drain and acid wash swimming pools and spas

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4014A Drain and acid wash swimming pools and spas. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- draining and acid washing one concrete swimming pool
- draining and acid washing one concrete spa.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- key requirements of relevant commonwealth, state or territory, and local government regulations and Australian standards related to swimming pool and spa servicing:
  - work health and safety
  - public health
  - dangerous goods, including chemicals
  - environment and waste disposal
  - Australian Competition and Consumer Commission product safety guidelines
  - electrical and plumbing regulations related to own work
- enterprise policies and procedures related to:
  - compliance with regulations (including building and chemical safety)
  - maintenance of knowledge of regulations
  - roles, responsibilities and limitations of own role
  - purpose and content of client disclosure and acknowledgement documentation
- work instructions:
  - site requirements, including access
  - personal protective clothing and equipment requirements
  - equipment and systems location information
  - warranties and guarantees

- purpose of acid washing:
  - suitability of swimming pools and spas
  - frequency
  - causes of stain and mineral build-up on pool and spa surfaces
- impact and risks of draining and acid washing on swimming pool or spa surface and structure
- acid washing procedures including waste disposal
- acids:
  - types and properties
  - safety including handling, transportation and storage
- tools, materials and equipment
- hazards and risks associated with draining and acid washing swimming pools and spas:
  - inadequate ventilation
  - natural and other gas build-up
  - atmospheric hazards when incompatible chemicals are stored or mixed together
  - chemical hazards
  - confined spaces and entrapment
  - working at heights
  - exposure to:
    - asbestos
    - contaminated surfaces
    - debris
    - dust and fibres
    - glass
    - live power
- water testing techniques and results.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be undertaken in the workplace or in a simulated workplace environment.

Candidates must be provided with:

- relevant manufacturer instructions, regulations, codes, standards and enterprise policies and procedures
- relevant tools and equipment, personal protection equipment (PPE)
- technical references with current information on draining and acid washing swimming pool and spas:
  - chemical safety
  - acids
  - problems associated with acid washing swimming pools and spas.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSPS4016 Advise on swimming pool and spa products and services

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4016A Advise on swimming pool and spa products and services. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing and WHS. Updated to meet the Standards for Training Packages.

## Application

This unit of competency specifies the skills and knowledge required to provide clients with specialist advice on swimming pool and spa products and services. It involves developing product and service knowledge to advise colleagues and clients on the features and benefits of swimming pool and spa products and services.

This unit of competency supports the work of swimming pool and spa technicians servicing:

- private swimming pools and spas
- public swimming pools and spas, including:
  - hydrotherapy and therapeutic exercise pools
  - wading and receiving pools associated with water slides
  - wave pools.

All work must be carried out to comply with workplace procedures, in accordance with state/territory work health and safety (WHS), regulations and legislation that applies to the workplace. Legislative and regulatory requirements apply to swimming pool and spa technicians but vary according to state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

## Pre-requisite Unit

None.

## Unit Sector

Swimming pool and spa service

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |   |
|---|---|
| 1 Develop knowledge of swimming pool and spa products and services. | 1.1 Determine and interpret relevant Australian standards and regulatory, manufacturer and enterprise requirements related to swimming pool or spa products and services. |
|   | 1.2 Source and review industry resources on swimming pool and spa products and services.  |
|   | 1.3 Research competitor products, service range and pricing.  |
|   | 1.4 Collaborate with colleagues to share swimming pool and spa product and service knowledge.   |
| 2 Recommend swimming pool and spa products and services.            | 2.1 Apply enterprise procedures and industry codes of conduct when advising clients about swimming pool and spa products and services.                                    |
|   | 2.2 Evaluate swimming pool and spa products and services against client requirements.   |
|   | 2.3 Advise clients of the features and benefits of swimming pool and spa products or services.  |
|   | 2.4 Identify complementary swimming pool and spa products or services to meet client requirements.  |
|   | 2.5 Respond to client questions regarding swimming pool and spa products and services.  |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to interact with clients from diverse social, economic and cultural backgrounds
- numeracy skills to calculate and compare price and technical features of swimming pool and spa products and services.

## **Unit Mapping Information**

Supersedes and equivalent to CPPSPS4016A Advise on swimming pool and spa products and services.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSPS4016 Advise on swimming pool and spa products and services

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4016A Advise on swimming pool and spa products and services. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing and WHS. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- providing advice about swimming pool and spa products on at least three occasions
- providing advice about swimming pool and spa services on at least three occasions.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- key requirements of relevant commonwealth, state or territory, and local government regulations and Australian standards related to swimming pool and spa servicing:
  - consumer protection
  - work health and safety
  - public health
  - dangerous goods
  - environment and waste disposal
  - Australian Competition and Consumer Commission product safety guidelines
  - electrical and plumbing regulations related to own work
- enterprise policies and procedures related to:
  - compliance with regulations
  - maintenance of knowledge of regulations
  - roles, responsibilities and limitations of own role
  - customer service including dealing with complaints and feedback
  - developing product and service knowledge
  - recommending products and services
- work instructions:
  - site requirements, including access

- personal protective clothing and equipment requirements
- equipment and systems location information
- maintenance information
- warranties and guarantees
- enterprise swimming pool and spa product and service range, features and benefits:
  - maintenance, service and repair
  - equipment and accessories
  - chemicals
  - technical advice, including water hydraulics
- components, spare parts and consumable items for swimming pool and spa systems:
  - automation
  - lighting
  - heating
  - circulation and filtration
  - chlorination
  - cleaning and vacuuming
  - swimming pool and spa toys
  - water testing and kits
- swimming pool and spa chemical safety
- sources of product and services knowledge
- terminology and technical terms for swimming pool and spa products and services.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be undertaken in the workplace or in a simulated workplace environment.

Candidates must be provided with:

- relevant regulations, codes, standards, enterprise policies and procedures
- technical and commercial references with current information on swimming pool and spa products and services.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSPS4017 Detect leaks in swimming pools and spas

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4017A Detect leaks in swimming pools and spas. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing and WHS. Updated to meet the Standards for Training Packages.

## Application

This unit specifies the outcomes required to detect leaks in swimming pools and spas. It includes operating leak-detection equipment and reporting on leak-detection activities.

This unit is suitable for swimming pool and spa technicians who work independently using specialised knowledge and skills to solve predictable and unpredictable problems in:

- private swimming pools and spas
- public swimming pools and spas, including:
  - hydrotherapy and therapeutic exercise pools
  - wading and receiving pools associated with water slides
  - wave pools.

All work must be carried out to comply with workplace procedures, in accordance with state/territory work health and safety (WHS), regulations and legislation that applies to the workplace. Legislative and regulatory requirements apply to swimming pool and spa technicians but vary according to state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Service technicians are not permitted to undertake any installation, replacement, maintenance and repair functions that are restricted to licensed trades or occupations.

## Pre-requisite Unit

Nil.

## Unit Sector

Swimming pool and spa service

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

|---------------------------------------|--|
| 1 Assess job requirements.            | <p>1.1 Identify relevant Australian standards and regulatory, manufacturer and enterprise requirements related to leak detection.</p> <p>1.2 Review work instructions and test to confirm that swimming pool and/or spa is leaking in line with enterprise procedures.</p> <p>1.3 Confirm location of related services in line with enterprise procedures.</p> <p>1.4 Identify hazards and assess and control risks in the work area in line with WHS and enterprise requirements.</p> |
| 2 Detect leaks.                       | <p>2.1 Apply relevant regulations, Australian standards and manufacturer, client and enterprise requirements throughout leak detection.</p> <p>2.2 Implement leak detection process using appropriate leak-detection equipment.</p> <p>2.3 Seek advice from relevant personnel for activities outside scope of own expertise or licensing.</p> <p>2.4 Arrange leak repair in line with testing outcomes and enterprise and statutory requirements.</p>                                 |
| 3 Complete leak detection activities. | <p>3.1 Clean and store leak-detection equipment in line with enterprise and manufacturer requirements</p> <p>3.2 Review and report on work in line with enterprise procedures.</p>   |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to source and interpret technical information, regulations, standards and codes of practice
- oral communication skills to interact with clients from diverse social, economic and cultural backgrounds
- numeracy skills to:
  - perform calculations related to water loss in swimming pools and spas
  - interpret data output from electronic leak-detection equipment.

## **Unit Mapping Information**

Supersedes and equivalent to CPPSPS4017A Detect leaks in swimming pools and spas.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPPSPS4017 Detect leaks in swimming pools and spas

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSPS4017A Detect leaks in swimming pools and spas. Added in content from CPPSPS4011A Comply with regulatory requirements for swimming pool and spa servicing and WHS. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- Determine job requirements, detect leak and organise repair of leaks in:
  - one swimming pool and one spa made from fibreglass
  - one swimming pool and one spa made from concrete.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- key requirements of relevant commonwealth, state or territory, and local government regulations and Australian standards related to swimming pool and spa servicing:
  - work health and safety
  - public health
  - dangerous goods
  - environment and waste disposal
  - Australian Competition and Consumer Commission product safety guidelines
  - electrical and plumbing regulations related to own work
- enterprise policies and procedures related to:
  - compliance with regulations
  - maintenance of knowledge of regulations
  - roles, responsibilities and limitations of own role
- work instructions:
  - site requirements, including access
  - personal protective clothing and equipment requirements
  - equipment and systems location information
  - warranties and guarantees

- hazards and risks associated with swimming pool and spa leak detection
- common structural leak areas:
  - cracks
  - lights
  - main drain and hydrostatic valve
  - pipe openings into pool
  - skimmer bond to pool
  - skimmer throat
  - tile line
  - vinyl liners
- leak-detection equipment:
  - types
  - operating principles
  - safety
  - maintenance procedures
- leak-detection procedures
- signs of potential pool and spa leaks:
  - algae growth or discoloration of water
  - cracks
  - equipment loses prime
  - excess chemical usage
  - excessive water loss
  - pool deck is sinking or lifting
  - pool has air in the system
  - soggy spots around the pool
  - visible equipment leaks
- types of leaks in swimming pools and spas:
  - plumbing leaks
  - pressure leaks
  - static leaks.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be undertaken in the workplace or in a simulated workplace environment.

Candidates must be provided with:

- relevant manufacturer instructions, regulations, codes, standards and enterprise policies and procedures
- relevant tools and equipment, personal protection equipment (PPE)

- technical references with current information on leak detection techniques for swimming pools and spas.

# CPPUPM3005 Manage pests without applying pesticides

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3005 Manage pest without applying pesticides.

## Application

This unit specifies the skills and knowledge required to adapt or create physical conditions in premises to manage a range of non-timber pests including ants, cockroaches, rodents and spiders. The unit includes gaining a thorough understanding of client requirements and factors contributing to the pest problem and assessing the nature and extent of pest activity at the site. It requires selecting appropriate equipment and pest management methods to eliminate food, water and harbourages and block pest ingress.

The unit does not apply to inspecting for, or managing termites or other timber pests, or applying chemical or fumigation pest management methods.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in pest management in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil

## Unit Sector

Urban Pest Management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Confirm client and compliance

1.1 Review work instructions to confirm client requirements, site location and pest management timeframes and

- requirements. clarify issues with relevant persons.
- 1.2 Review workplace policies and procedures and regulatory and industry requirements for managing pests without pesticides and apply to work instructions to ensure compliance.
- 2 Inspect work site and identify pests or pest activity.
- 2.1 Establish contact with relevant persons and access work site according to client and workplace requirements.
  - 2.2 Determine inspection method and select and use required inspection tools and equipment, including personal protective equipment (PPE).
  - 2.3 Identify hazards associated with inspection tasks and assess and control risks at the site according to workplace requirements.
  - 2.4 Examine site buildings and surrounds to identify pest entry points, evidence of activity and risk factors according to work instructions.
  - 2.5 Assess evidence to identify pest types and extent and potential for pest activity and record findings.
- 3 Plan pest management methods and activities.
- 3.1 Select cultural and physical pest management methods to manage identified pest types and extent and potential of pest activity.
  - 3.2 Conduct risk assessment and plan risk management strategies to ensure safety and regulatory compliance when implementing pest management methods.
  - 3.3 Identify factors affecting completion of pest management activities or compliance and obtain required information or assistance.
  - 3.4 Prepare and document a pest management plan that addresses the client's pest problem and meets workplace and compliance requirements.
  - 3.5 Discuss proposed pest management methods with client to clarify issues and concerns and obtain approval to implement pest management plan.
  - 3.6 Calculate work site size and usage pattern to plan work

activities to ensure safety of personnel and efficient use of tools and building components when installing physical controls.

- |   |   |     |   |
|---|---|-----|---|
| 4 | Adapt or create physical conditions in work site to manage pests. | 4.1 | Install signs or barriers to protect public health and safety during pest management activities and implement other risk control measures required to manage hazards identified at the work site. |
|   |   | 4.2 | Select and check pest management tools and equipment and PPE and confirm correct and safe operation according to manufacturers' instructions and workplace requirements.                          |
|   |   | 4.3 | Select, locate and prepare pest management materials according to manufacturers' instructions and pest management plan.   |
|   |   | 4.4 | Use tools, equipment and materials to modify physical conditions at work site to manage pests according to pest management plan.  |
|   |   | 4.5 | Check site modifications to verify effectiveness of pest management methods and make required adjustments to meet work instructions and client requirements.                                      |
|   |   | 4.6 | Recognise and promptly respond to emergency situation according to workplace requirements.  |
| 5 | Finalise work and complete documentation.                         | 5.1 | Remove tools, equipment, materials and waste from pest management activities and restore work site to meet client and compliance requirements.  |
|   |   | 5.2 | Remove signage or barriers and notify relevant persons when site is available for re-use.   |
|   |   | 5.3 | Clean and decontaminate pest management tools and equipment according to manufacturers' instructions and workplace requirements.  |
|   |   | 5.4 | Check tools, equipment and PPE to confirm safe and correct operation, record required maintenance and store to allow ready access and re-use.   |
|   |   | 5.5 | Treat exposed skin to remove any contamination according to product manufacturers' instructions and   |

workplace requirements.

- 5.6 Complete and distribute pest management documentation in compliance with workplace and compliance requirements.

## Foundation Skills

Candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey, clarify and confirm information provided to clients
- reading skills to interpret key requirements of manufacturers' instructions for equipment and materials
- numeracy skills to calculate area and volume when applying physical pest management controls.

## Unit Mapping Information

Supersedes and equivalent to CPPPMT3005 Manage pests without applying pesticides.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPUPM3005 Manage pests without applying pesticides

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3005 Manage pest without applying pesticides.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by managing pests without applying pesticides in ten different residential and/or commercial premises.

The following different types of pests must be managed during work across the ten premises:

- ants
- cockroaches
- rodents
- spiders
- a minimum of four of the following:
  - bed bugs
  - bees and wasps
  - birds
  - fabric pests
  - fleas
  - flies
  - mites
  - occasional invaders: amphipods, millipedes, springtails, thrips
  - paperlice
  - stored product pests.

Pest management plans for each premises must detail:

- identified pest types and potential for pest activity
- extent of pest activity or infestation including the source, scope and degree of pest activity and contributing risk factors
- recommended pest management methods that do not involve pesticide use
- risk management plan
- advice on health, safety, environmental protection and other compliance requirements

- advice on pest prevention strategies
- follow-up pest management advice, monitoring and call-back schedule.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements associated with managing pests without applying pesticides:
  - Australian standards, quality assurance and certification requirements
  - industry guides, advisory standards and relevant industry codes of practice
  - key requirements of commonwealth, state and territory legislation and local government regulations:
    - environmental protection
    - licensing for pest management
    - mandatory notifications
    - privacy
    - public health and safety
- ecology, biology, lifecycles, habits and harbourages of urban pests:
  - ants
  - bed bugs
  - bees and wasps
  - birds
  - cockroaches
  - fabric pests (at least three different species in the geographical area)
  - fleas
  - flies (at least three different species in the geographical area)
  - mites
  - occasional invaders: springtails, thrips, amphipods and millipedes
  - paperlice
  - rodents
  - spiders
  - stored product pests (at least three different species in the geographical area)
- information and industry terminology typically contained in pest management work instructions
- meaning of integrated pest management
- methods used to manage non-timber pests without applying pesticides:
  - cultural controls
  - physical controls
- signs of termite activity and implications of not reporting suspected termite activity for follow-up action
  - tools, equipment and materials used when managing pests without applying pesticides:

- building components, tools and equipment required to modify sites or install physical controls
- inspection tools and equipment:
  - camera
  - ladder
  - magnifying glass
  - mirror
  - portable lighting or torch
  - probe
  - specimen bottles
- personal protective equipment (PPE):
  - eye, ear and respiratory protection
  - first aid kit
  - site-specific PPE and clothing
  - soap and towel
  - sun protection
- typical hazards encountered when managing pests without applying pesticides, and risk control measures for each:
  - animal bites and stings
  - audible alarms
  - confined or restricted spaces
  - electrical
  - environmental contamination
  - fire
  - guard dogs
  - hazards affecting native species
  - ladder use
  - lighting
  - manual handling
  - moving vehicles and machinery
  - noise
  - remote locations
  - residual pesticides and other chemicals
  - respiratory
  - slips and trips
  - temperature
  - ultraviolet (UV) radiation
  - work at heights
- workplace policies and procedures that apply to managing pests without applying pesticides:

- documentation and reporting
- equipment maintenance and servicing
- format and content requirements for pest management plans
- site arrival, sign-in and pre-work preparations and authorities
- work health and safety:
  - emergency response procedures
  - hazard identification, risk assessment and control using the hierarchy of control
  - injury, dangerous occurrence and incident reporting
  - safe work practices including manual handling and ladder use
  - signs and barriers required to be installed to protect public health and safety during pest management work.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Evidence of assessment for pest management activities in seven of the ten premises as specified in the performance evidence, must be based on documentation and photographic evidence that has been validated by a workplace supervisor. A workplace supervisor is a person duly authorised to perform and validate the work being undertaken.

Evidence of assessment for pest management activities in three of the ten premises as specified in the performance evidence:

- must be based on direct observation and assessment of the candidate by an assessor, physically or via audio and visual media
- must involve managing ants, cockroaches, rodents and spiders
- must be in a real workplace for a minimum of two premises
- may be simulated for one premises provided the simulation allows demonstration of all performance criteria.

Candidates must have access to premises and associated work instructions, information, materials, tools, equipment and PPE required to achieve the performance evidence, including relevant industry codes of practice.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPUPM3006 Manage pests by applying pesticides

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3006 Manage pests by applying pesticides

## Application

This unit specifies the skills and knowledge required to apply pesticides to manage a range of non-timber pests such as ants, cockroaches, rodents and spiders in premises where public health and safety and the amenity of the community and environment may be affected. The unit includes gaining a thorough understanding of client requirements and factors contributing to the pest problem and assessing the nature and extent of pest activity at the site. It requires selecting appropriate equipment, pesticides and application methods to safely and efficiently manage pests.

The unit does not apply to inspecting for, or managing termites or other timber pests, or non-chemical pest management where the environment is modified to manage pests.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in pest management in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil

## Unit Sector

Urban Pest Management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Confirm client and compliance

1.1 Review work instructions to confirm client requirements, site location and pest management timeframes and

- requirements. clarify issues with relevant persons.
- 1.2 Review workplace policies and procedures and regulatory and industry requirements for managing pests using pesticides and apply to work instructions to ensure compliance.
- 2 Inspect work site and identify pests or pest activity.
- 2.1 Establish contact with relevant persons and access work site according to client and workplace requirements.
  - 2.2 Determine inspection method and select and use required inspection tools and equipment including personal protective equipment (PPE).
  - 2.3 Identify hazards associated with inspection tasks and assess and control risks at the site according to workplace requirements.
  - 2.4 Examine site buildings and surrounds to identify pest entry points, evidence of activity and risk factors according to work instructions.
  - 2.5 Assess evidence to identify pest types and extent and potential for pest activity and record findings.
- 3 Plan pest management activities.
- 3.1 Select pesticide and application methods to manage identified pest types and extent and potential of pest activity.
  - 3.2 Conduct risk assessment and plan risk management strategies to ensure safety and regulatory compliance when managing pests using pesticides.
  - 3.3 Identify factors affecting completion of pest management activities or compliance and obtain required information or assistance.
  - 3.4 Prepare and document a pest management plan that addresses the client's pest problem and meets workplace and compliance requirements.
  - 3.5 Discuss proposed pest management methods with client to clarify issues and concerns and confirm understanding of chemical control aspects of pest management plan and obtain approval to proceed.

- 3.6 Calculate work site size and usage pattern to plan work activities to ensure safety of personnel and efficient use of equipment and pesticides.
- 4 Prepare equipment and pesticides and treat work site.
- 4.1 Install signs or barriers to maximise protection of public health and safety during site treatment, notify occupants, and implement other risk control measures required to manage hazards identified at the work site.
- 4.2 Read and follow manufacturers' instructions and safety data sheets (SDS) for selected pesticides and application methods.
- 4.3 Select and use PPE for pesticide application according to manufacturers' instructions and SDS.
- 4.4 Select pesticides according to risk assessment and pest management plan.
- 4.5 Select, check and adjust application equipment and confirm correct and safe operation according to manufacturers' instructions and workplace requirements.
- 4.6 Calculate application area, estimate required quantities of pesticides, and prepare pesticides for application following manufacturers' instructions and directions on product labels.
- 4.7 Calibrate pump sprayer and check nozzles and flow rate to ensure correct application for surface being treated according to manufacturers' instructions.
- 4.8 Apply pesticides at work site and check to ensure correct application according to pest management plan and compliance requirements.
- 4.9 Recognise and promptly respond to emergency situation according to workplace requirements.
- 5 Finalise work and complete documentation.
- 5.1 Remove equipment, pesticides and waste from pest management activities and restore work site to meet client and compliance requirements.
- 5.2 Transport and store pesticides and dispose of waste removed from work site according to manufacturers'

- instructions, workplace and compliance requirements.
- 5.3 Eliminate hazards prior to site handover and remove signage or barriers according to workplace and compliance requirements.
  - 5.4 Notify relevant persons of residual hazards, necessary hazard reduction measures and site re-entry periods.
  - 5.5 Clean and decontaminate equipment and PPE according to manufacturers' instructions and workplace requirements.
  - 5.6 Check equipment and PPE to confirm safe and correct operation, record required maintenance and store to allow ready access and re-use.
  - 5.7 Treat exposed skin to remove any contamination according to product manufacturers' instructions and workplace requirements.
  - 5.8 Complete and distribute pest management documentation to meet workplace and compliance requirements.

## Foundation Skills

Candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey, clarify and confirm information provided to clients
- reading skills to interpret key requirements of manufacturers' instructions and SDS
- numeracy skills to dilute and mix pesticides in the correct ratios.

## Unit Mapping Information

Supersedes and equivalent to CPPPMT3006 Manage pests by applying pesticides.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPUPM3006 Manage pests by applying pesticides

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3006 Manage pests by applying pesticides

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by selecting and applying pesticides internally, and externally as required, in order to manage non-timber pests in ten different residential and/or commercial premises.

The following different types of pests must be managed during work across the ten premises:

- ants
- cockroaches
- rodents
- spiders
- a minimum of four of the following:
  - bed bugs
  - bees and wasps
  - fabric pests
  - fleas
  - flies
  - mites
  - occasional invaders: amphipods, millipedes, springtails, thrips
  - paperlice
  - stored product pests.

Work across the ten premises must involve using:

- bait stations
- electrical dust applicator
- hand puffer
- pump up sprayer
- insecticides and rodenticides, with application methods involving:
  - applying pesticide liquids, powders, gels and granules
  - installing and securing baits

- space treatments that involve preparation, no-entry notification, using a fogger or mister, ventilation and re-entry processes.

Pest management plans for each premises must detail:

- identified pest types and potential for pest activity
- extent of pest activity or infestation including the source, scope and degree of pest activity and contributing risk factors
- pest management options
- types and quantities of chemicals to be used
- chemical application methods
- risk management plan
- advice on health, safety, environmental protection and other compliance and mandatory notification requirements
- advice on pest prevention strategies
- follow-up pest management advice, monitoring and call-back schedule.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- chemicals' routes of entry into the human body and potential symptoms of exposure
- compliance requirements associated with managing pests by applying pesticides:
  - Australian standards, quality assurance and certification requirements
  - industry guides, advisory standards and relevant industry codes of practice including *A Code of Practice for the Control of Bed Bug Infestations in Australia*
  - environmental requirements:
    - clean up, containment or isolation of hazards
    - emergency chemical spill control measures
    - hazardous materials handling
    - waste handling and disposal
  - key requirements of commonwealth, state and territory legislation and local government regulations:
    - chemical use, registers and manifests
    - dangerous goods
    - environmental protection
    - licensing for pest management
    - mandatory notifications
    - privacy
  - public health and safety:
    - licence endorsements and conditions or limitations
    - occupant notifications
    - record of site conditions
    - warning signs

- ecology, biology, lifecycles, habits and harbourages of the following types of pests:
  - ants
  - bed bugs
  - bees and wasps
  - cockroaches
  - fabric pests (at least three different species in the geographical area)
  - fleas
  - flies (at least three different species in the geographical area)
  - mites
  - occasional invaders: springtails, thrips, amphipods and millipedes
  - paperlice
  - rodents
  - spiders
  - stored product pests (at least three different species in the geographical area)
- humane euthanasia procedures used in pest management
- information and industry terminology typically contained in pest management work instructions
- meaning of integrated pest management
- pesticide controls for managing pests in a range of environments, conditions, industries and premises
- potential effects of pesticides on public health and the environment and the difference between primary and secondary poisoning associated with rodent baits
- purpose of, and information typically contained in safety data sheets (SDS)
- signs of termite activity and implications of not reporting suspected termite activity for follow-up action
- tools, equipment and materials used when managing pests by applying pesticides:
  - inspection tools and equipment:
    - camera
    - ladder
    - magnifying glass
    - mirror
    - portable lighting or torch
    - probe
    - specimen bottles
  - personal protective equipment (PPE):
    - eye, ear and respiratory protection
    - first aid kit
    - site-specific PPE and clothing
    - soap and towel
    - sun protection
  - pesticide application:

- bait stations
- dust applicators
- hand puffers
- hot and cold foggers for space spraying
- misters for surface spraying
- pump up, hand-held and backpack sprayers
- truck-mounted pump and hose rigs
- types of pesticides used to manage non-timber pests and methods for safe handling and application:
  - chemical group, target site and mode of action
  - surfaces, substrates and suitable formulation types
  - application and spray patterns
- typical hazards encountered when managing pests by applying pesticides, and risk control measures for each:
  - animal bites and stings
  - chemicals and residual pesticides
  - confined or restricted spaces
  - electrical
  - environmental contamination
  - fire
  - guard dogs
  - hazards affecting native species
  - ladder use
  - lighting
  - manual handling
  - moving vehicles and machinery
  - noise
  - remote locations
  - respiratory
  - slips and trips
  - temperature
  - ultraviolet radiation
  - work at heights
- workplace policies and procedures that apply to managing pests by applying pesticides:
  - documentation and reporting
  - equipment maintenance and servicing
  - format and content requirements for pest management plans
  - site arrival, sign-in and pre-work preparations and authorities
  - work health and safety:
    - emergency response procedures

- hazard identification, risk assessment and control using the hierarchy of control
- injury, dangerous occurrence and incident reporting
- safe work practices including manual handling and ladder use
- signs and barriers required to be installed to protect public health and safety during pest management work.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Evidence of assessment for pest management activities in seven of the ten premises as specified in the performance evidence, must be based on documentation and photographic evidence that has been validated by a workplace supervisor. A workplace supervisor is a person duly authorised to perform and validate the work being undertaken.

Evidence of assessment for pest management activities in three of the ten premises as specified in the performance evidence:

- must be based on direct observation and assessment of the candidate by an assessor, physically or via audio and visual media
- must involve managing ants, cockroaches, rodents and spiders
- must be in a real workplace for a minimum of two premises
- may be simulated for one premises provided the simulation allows demonstration of all performance criteria.

Candidates must have access to premises and associated work instructions, information, SDS, materials, tools, equipment and PPE required to achieve the performance evidence, including relevant industry codes of practice including *A Code of Practice for the Control of Bed Bug Infestations in Australia*.

# CPPUPM3008 Inspect for and report on timber pests

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3008 Inspect for and report on timber pests.

## Application

This unit specifies the skills and knowledge required to inspect premises and surrounding areas for timber pests. It includes collecting and testing evidence from the site, assessing the type of timber pest, nature of activity and extent of damage, and preparing an inspection report with recommendations for timber pest management.

Types of timber pests vary in different geographic regions. This unit applies to those timber pests found in the local geographic area.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in pest management in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil

## Unit Sector

Urban Pest Management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Confirm work and compliance requirements and

1.1 Review work instructions to confirm client requirements, site location and inspection timeframes, and clarify expectations with relevant persons.

- assess work site.
- 1.2 Review workplace policies and procedures and regulatory and industry requirements for timber pest inspections and reports and apply to work instructions to ensure compliance.
  - 1.3 Access and review documentation for the work site to establish a history of previous building or pest inspections, treatments or safety issues.
  - 1.4 Access work site and assess physical characteristics and surrounding environment according to workplace requirements.
  - 1.5 Assess type and nature of structures and construction methods at the work site according to workplace requirements.
  - 1.6 Locate typical timber pest pressure areas to ensure inspection targets probable timber pest activity.
  - 1.7 Record assessment results and obtain verbal agreement from client to proceed with general timber pest inspection or written agreement for pre-purchase inspection.
- 2 Plan and prepare for site inspection.
- 2.1 Identify hazards associated with inspection tasks and assess and control risks at the site according to workplace requirements.
  - 2.2 Select inspection tools and equipment and fit required personal protective equipment according to workplace requirements.
  - 2.3 Plan systematic and comprehensive inspection and recording methods based on work site assessment and work instructions.
- 3 Inspect for timber pests.
- 3.1 Inspect premises and surrounds using predetermined methods and record results according to workplace and compliance requirements.
  - 3.2 Inspect and collect evidence of timber pest activity at the work site.
  - 3.3 Identify timber pest risk factors and requirements for further inspections and discuss recommendations with

client.

- |   |  |     |   |
|---|--|-----|---|
| 4 | Confirm pest type, activity and extent of damage | 4.1 | Analyse and test collected evidence to clarify type of timber pest and timber pest activity.  |
|   |  | 4.2 | Analyse inspection records and test results to identify previous or current types of timber pests and to confirm infestation locations and extent of damage.                                    |
|   |  | 4.3 | Locate timber pest source and site conditions conducive to infestation.   |
|   |  | 4.4 | Estimate previous, current and potential impacts of timber pest activity on the work site and record findings.  |
| 5 | Prepare and distribute inspection report.        | 5.1 | Document inspection report detailing inspection outcomes, evidence and risk analysis and pest management recommendations according to work instructions, workplace and compliance requirements. |
|   |  | 5.2 | Distribute inspection report to relevant persons according to work instructions, workplace and compliance requirements.   |
|   |  | 5.3 | Securely maintain all inspection documentation, evidence and client records according to workplace requirements.  |

## Foundation Skills

Candidates require:

- oral communication skills to use questioning and active listening to clarify client expectations
- reading skills to interpret key requirements of Australian standards and industry codes of practice
- numeracy skills to measure dimensions and calculate area and volume of premises
- writing skills to accurately and legibly record findings when undertaking site inspections.

## Unit Mapping Information

Supersedes and equivalent to CPPPMT3008 Inspect for and report on timber pests.

## Links

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPUPM3008 Inspect for and report on timber pests

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3008 Inspect for and report on timber pests.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by inspecting for and reporting on timber pests at ten different premises involving:

- inspection for evidence of activity from subterranean termites at a minimum of five premises
- identification of evidence of subterranean termites at one premises
- inspection for evidence of activity from two other types of timber pests from the list below:
  - borers
  - damp wood termites
  - dry wood termites
  - wood decay fungi.

At each premises:

- the following evidence must be inspected for:
  - chambers
  - damp swell (bulging walls)
  - discolouration of timber or plaster
  - evidence of feeding
  - holes
  - mud tracks and leads
  - nests and nest materials
  - specimens
  - timber damage, timber shavings and sawdust
- inspection areas must include four or more of the following:
  - external areas of property including trees and fences
  - external surfaces
  - floor areas
  - interiors

- timber areas including trims and mouldings
- outbuildings
- roof voids
- subfloors
- site assessment must include five or more of the following:
  - age of structures
  - associated building or land use
  - dark and humid areas
  - drainage
  - evidence of previous treatments
  - level of moisture
  - risk factors encouraging timber pest activity
  - soil types
  - timber types
  - ventilation.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- climatic and geographic impact on timber pest activities
- compliance requirements associated with inspecting for and reporting on timber pests:
  - Australian standards, quality assurance and certification requirements including:
    - *AS/NZS 3660 Termite Management Set (AS/NZS 3660)*
    - *AS 4349.2 Inspection of buildings Group titled properties*
    - *AS 4349.3 Inspection of buildings Timber pest inspections*
  - industry guides, advisory standards and relevant industry codes of practice
  - key requirements of commonwealth, state and territory legislation and local government regulations:
    - consumer protection
    - legal implications of timber pest management work
    - licensing requirements for timber pest management
    - privacy
    - public health and safety
- construction terminology used to describe building structures and construction methods in relation to timber pest activity
- difference between general timber inspections and pre-purchase inspections
- information and industry terminology typically contained in pest management work instructions
- soil and timber types in relation to timber pest activity
- tools and equipment used when inspecting for timber pests:
  - inspection tools and equipment:

- camera
- hand lens
- ladder
- measuring tape
- mirror
- moisture meter
- pliers
- probes or knife
- report check sheet or notepad
- sounding tools
- specimen bottle
- torch
- personal protective equipment (PPE):
  - eye, ear and respiratory protection
  - site-specific PPE and clothing
  - soap and towel
  - sun protection
- types of timber pests and their ecology, biology, lifecycles, habits and harbourages:
  - borers
  - damp wood termites
  - dry wood termites
  - subterranean termites
  - wood decay fungi
- types of further inspections that may be recommended to clients:
  - detailed inspections including thermal inspections
  - inspections by other personnel including builders, electricians and plumbers
  - invasive inspections including those using a bore-scope
- typical hazards encountered when inspecting for timber pests, and risk control measures for each:
  - animal bites and stings
  - confined or restricted spaces
  - electrical
  - environmental contamination
  - fire
  - ladder use
  - lighting
  - manual handling
  - moving vehicles and machinery
  - noise
  - remote locations

- residual pesticides and other chemicals
- respiratory
- slips and trips
- temperature
- ultraviolet radiation
- work at heights
- typical timber pest pressure areas
- workplace policies and procedures that apply to inspecting for and reporting on timber pests:
  - documentation and reporting
  - format and content of inspection plans
  - work health and safety:
    - emergency response procedures
    - hazard identification, risk assessment and control using the hierarchy of control
    - injury, dangerous occurrence and incident reporting
    - safe work methods including ladder use.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Evidence of assessment for pest management activities in seven of the ten premises as specified in the performance evidence, must be based on documentation and photographic evidence that has been validated by a workplace supervisor. A workplace supervisor is a person duly authorised to perform and validate the work being undertaken.

Evidence of assessment for pest management activities in three of the ten premises as specified in the performance evidence:

- must be based on direct observation and assessment of the candidate by an assessor:
  - physically, or
  - via audio and visual media provided the candidate is physically accompanied by a person who is licensed or holds the required competency to inspect for timber pests
- must involve subterranean termites for a minimum of one premises
- must be in a real workplace for a minimum of two premises
- may be simulated for one premises provided the simulation allows demonstration of all performance criteria.

Candidates must have access to premises and associated work instructions, information, tools, equipment and PPE required to achieve the performance evidence including:

- previous inspection reports or pest treatment records if available
- Australian standards: AS/NZS 3660 and AS 4349.2
- relevant industry codes of practice including:
  - *A Code of Practice for Prior to Purchase Specialist Timber Pest Inspections*

- *Code of Best Practice for Termite Management*
- *Code of Best Practice for Termite Management During Construction*
- *Industry Code of Practice for Training in the Pest Management Industry.*

# CPPUPM3010 Control timber pests

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3010 Control timber pests

## Application

This unit specifies the skills and knowledge required to prepare and implement a plan to manage timber pests. It includes reviewing existing reports relating to timber pest activity at the premises and planning, implementing and monitoring strategies to control timber pests. The unit requires selecting equipment, chemicals, materials and methods to effectively manage the timber pest problem.

Types of timber pests vary in different geographic regions. This unit applies to those timber pests found in the local geographic area.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in pest management in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil

## Unit Sector

Urban Pest Management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Confirm work and compliance requirements.

1.1 Review work instructions and inspection report to confirm client and site requirements and clarify issues with relevant persons.

- 1.2 Review workplace policies and procedures and regulatory and industry requirements for timber pest management and apply to work instructions to ensure compliance.
- 2 Develop timber pest management plan.
  - 2.1 Select methods to control timber pests based on inspection report, work site environment and client, workplace and compliance requirements.
  - 2.2 Identify and organise equipment required to control timber pests according to workplace requirements.
  - 2.3 Calculate quantities of materials necessary to manage timber pests according to workplace requirements.
  - 2.4 Document timber pest management plan for work site that meets client and workplace requirements.
  - 2.5 Discuss proposed timber pest management plan with client, respond to issues and concerns and obtain approval to proceed with implementation.
- 3 Prepare to control timber pests.
  - 3.1 Install signs or barriers to maximise protection of public health and safety during treatment operation, notify occupants, and implement other risk control measures required to manage hazards identified at the work site.
  - 3.2 Identify factors affecting completion of timber pest control activities or compliance and obtain required information or assistance.
  - 3.3 Select and fit required personal protective equipment (PPE) according to workplace requirements.
  - 3.4 Select, check and prepare equipment and materials required for timber pest control activities according to manufacturers' instructions, safety data sheets (SDS), workplace and compliance requirements.
- 4 Implement timber pest management plan.
  - 4.1 Install or apply pest control materials identified in pest management plan according to manufacturers' instructions, workplace and compliance requirements.
  - 4.2 Carry out timber pest control procedures according to

- pest management plan, workplace and compliance requirements.
- 4.3 Check effectiveness of pest control measures against timber pest management plan and take required remedial actions to ensure optimal results.
- 4.4 Recognise and promptly respond to emergency situation according to workplace requirements.
- 5 Finalise work and complete documentation.
- 5.1 Remove tools, equipment, materials and waste from pest management activities and restore work site to meet client and compliance requirements.
- 5.2 Eliminate hazards prior to site handover and remove signage or barriers according to workplace and compliance requirements.
- 5.3 Notify relevant persons of residual hazards, necessary hazard reduction measures and site re-entry periods.
- 5.4 Clean and decontaminate equipment and PPE according to manufacturers' instructions and workplace requirements.
- 5.5 Check equipment and PPE to confirm safe and correct operation, record required maintenance and store to allow ready access and re-use.
- 5.6 Treat exposed skin to remove any contamination according to product manufacturers' instructions and workplace requirements.
- 5.7 Prepare and issue required certificates and notices according to compliance requirements.
- 5.8 Complete and distribute pest management documentation to meet workplace and compliance requirements.
- 6 Monitor effectiveness of timber pest treatment.
- 6.1 Establish periodic contact schedule with client according to workplace requirements.
- 6.2 Maintain regular liaison with client to monitor effectiveness of timber pest treatment according to workplace requirements.

## Foundation Skills

Candidates require:

- oral communication skills to use questioning and active listening when responding to client issues and concerns
- reading skills to interpret key requirements of Australian standards, SDS and industry codes of practice
- numeracy skills to:
  - calculate flow rates and pressures when using termiticide application equipment
  - calculate required termiticide volume and bait and dust quantities
  - measure dimensions and calculate area and volume of treatment site
  - prepare and mix chemicals in the correct quantities and ratios
- writing skills to accurately and legibly prepare certificates and notices and complete documentation.

## Unit Mapping Information

Supersedes and equivalent to CPPPMT3010 Control timber pests.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPUPM3010 Control timber pests

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3010 Control timber pests

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by controlling timber pests at ten different premises involving:

- different construction methods including slab-on-ground and suspended floor
- controls for subterranean termites at a minimum of five premises
- controls for two other types of timber pests from the list below:
  - borers
  - damp wood termites
  - dry wood termites
  - wood decay fungi
- eradication and exclusion using five or more of the following:
  - bait box
  - concrete drill
  - dust applicator
  - foaming applicator
  - liquid injection nozzle
  - monitoring station
  - slab injector
  - soil injector
  - soil spray nozzle
  - termiticide station
- using termiticides and one or more of the following:
  - physical termite management system
  - sealing components.
- Timber pest management plans for each premises must detail:
  - identified timber pest types and potential for timber pest activity
  - extent of timber pest activity or infestation including the source, scope and degree of timber pest activity and contributing risk factors
  - timber pest management methods

- types and quantities of chemicals to be used and chemical application methods
- risk management plan
- record keeping mandated by licensing or regulatory requirements
- advice on health, safety, environmental protection and other compliance and mandatory notification requirements
- advice on timber pest prevention strategies
- follow-up timber pest management advice, monitoring and call-back schedule.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building structures and construction methods relevant to work sites described in the performance evidence and control of timber pests at those sites
- chemicals' routes of entry into the human body and potential symptoms of exposure
- climatic and geographic impact on timber pest activities
- compliance requirements associated with controlling timber pests:
  - Australian standards, quality assurance and certification requirements:
    - AS/NZS 3660 Termite Management Set (AS/NZS 3660)
    - AS 4349.2 *Inspection of buildings Group titled properties*
    - AS 4349.3 *Inspection of buildings Timber pest inspections*
  - environmental requirements:
    - clean up, containment or isolation of hazards
    - emergency chemical spill control measures
    - hazardous materials handling
    - waste handling and disposal
  - industry guides, advisory standards and relevant industry codes of practice
  - key requirements of commonwealth, state and territory legislation and local government regulations:
    - chemical use, registers and manifests
    - consumer protection
    - environmental protection
    - legal implications of timber pest management work
    - licensing requirements for timber pest management
    - mandatory notifications
    - privacy
  - public health and safety:
    - licence endorsements and conditions or limitations
    - occupant notifications
    - record of site conditions
    - warning signs

- information and industry terminology typically contained in pest management work instructions
- meaning of integrated pest management
- pest management methods used to control timber pests:
  - chemical, cultural and physical controls in a range of environments and conditions
  - difference in action and application of termiticides
  - product knowledge and manufacturers' specifications for equipment and products used to control timber pests
- purpose of, and information typically contained in safety data sheets (SDS)
- soil types in relation to timber pest activities
- tools, equipment and materials used to control timber pests:
  - access and inspection tools equipment:
    - camera
    - hand lens
    - ladder
    - measuring tape
    - mirror
    - moisture meter
    - pliers
    - probes or knife
    - sounding tools
    - specimen bottle
    - torch
  - application and installation equipment:
    - bait box or station
    - concrete drill
    - dust applicator
    - foaming applicator
    - liquid injection nozzle
    - monitoring station
    - slab injector
    - soil injector
    - soil spray nozzle
    - termiticide station
  - materials:
    - physical termite management systems
    - sealing components
    - termiticides
  - personal protective equipment (PPE):
    - eye, ear and respiratory protection

- first aid kit
- site-specific PPE and clothing
- soap and towel
- sun protection
- types of timber pests and their ecology, biology, lifecycles, habits and harbourages:
  - borers
  - damp wood termites
  - dry wood termites
  - subterranean termites
  - wood decay fungi
- typical hazards encountered when controlling timber pests, and risk control measures for each:
  - animal bites and stings
  - asbestos
  - chemical
  - confined or restricted spaces
  - electrical
  - environmental contamination
  - fire
  - ladder use
  - lighting
  - manual handling
  - moving vehicles and machinery
  - noise
  - remote locations
  - respiratory
  - slips and trips
  - temperature
  - ultraviolet radiation
  - underground services
  - work at heights
- workplace policies and procedures that apply to controlling timber pests:
  - documentation and reporting
  - format and content requirements for timber pest management plans
  - work health and safety:
    - emergency response procedures
    - hazard identification, risk assessment and control using the hierarchy of control
    - injury, dangerous occurrence and incident reporting
    - safe work methods including manual handling and ladder use.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Evidence of assessment for pest management activities in seven of the ten premises as specified in the performance evidence, must be based on documentation and photographic evidence that has been validated by a workplace supervisor. A workplace supervisor is a person duly authorised to perform and validate the work being undertaken.

Evidence of assessment for pest management activities in three of the ten premises as specified in the performance evidence:

- must be based on direct observation and assessment of the candidate by an assessor:
- physically, or
- via audio and visual media provided the candidate is physically accompanied by a person who is licensed or holds the required competency to control timber pests
- must involve subterranean termites for a minimum of one premises
- must be in a real workplace for a minimum of two premises
- may be simulated for one premises provided the simulation allows demonstration of all performance criteria.

Candidates must have access to premises and associated work instructions, information, materials, tools, equipment and PPE required to achieve the performance evidence including:

- inspection reports for premises
- Australian standards: AS/NZS 3660 and AS 4349.2
- relevant industry codes of practice including:
- *A Code of Practice for Prior to Purchase Specialist Timber Pest Inspections*
- *Code of Best Practice for Termite Management*
- *Code of Best Practice for Termite Management During Construction*
- *Industry Code of Practice for Training in the Pest Management Industry.*

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPUPM3011 Manage organisms by applying fumigants to commodities and environments

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3011 Manage organisms by applying fumigants to commodities and environments

## Application

This unit specifies the skills and knowledge required to apply fumigants to control organisms and organism activity that affect the health, safety or amenity of persons, commodities or environments in domestic, commercial, industrial and maritime situations. The unit requires understanding client requirements, assessing the site, and selecting and using equipment, fumigants and application methods to effectively manage organisms.

Work is conducted by teams of at least two people in compliance with state and territory health and safety legislation. A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Fumigants are most frequently applied by pest technicians to meet quarantine conditions for exported or imported goods but are also applied in commercial grain handling and storage environments.

This unit does not apply to horticultural or agricultural situations involving crop growing.

This unit forms part of the licensing requirements for people engaged in pest management in some states and territories. For further information, check with the relevant regulatory authority. Where required, the fumigator must meet the licensing requirements of the relevant Australian or international quarantine authority.

## Pre-requisite Unit

Nil

## Unit Sector

Urban Pest Management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |  |
|---|--|
| 1 Confirm work and compliance requirements.       | 1.1 Review work instructions or quarantine order to confirm fumigation requirements and discuss client needs and expectations with relevant persons.   |
|   | 1.2 Confirm authority of client requesting fumigation services and clarify fumigation site and target in consultation with relevant persons.   |
|   | 1.3 Review workplace policies and procedures and regulatory and industry requirements for organism fumigation and apply to work instructions to ensure compliance.                                   |
| 2 Access and assess work site.                    | 2.1 Select and fit required personal protective equipment (PPE) according to workplace requirements.   |
|   | 2.2 Access work site, identify hazards and control risks according to workplace requirements.  |
|   | 2.3 Assess work site to identify access points and security arrangements and characteristics impacting fumigation according to workplace requirements.   |
|   | 2.4 Determine site size and usage patterns to ensure safety of personnel and efficient use of fumigants and equipment during fumigation.   |
| 3 Determine organism types and fumigation method. | 3.1 Confirm types of organisms and commodities present at the work site according to workplace requirements.   |
|   | 3.2 Select fumigation method and fumigant to suit types of organisms, work site environment and commodities present according to manufacturers' instructions, workplace and compliance requirements. |
|   | 3.3 Establish capacity to create fumigation conditions at work site and promptly report factors affecting completion of work instructions or quarantine order to relevant persons.                   |
|   | 3.4 Advise relevant persons of risks associated with   |

fumigation including non-target contamination and damage

- 4 Prepare for fumigation.
  - 4.1 Install signs or barriers to maximise protection of public health and safety during fumigation and implement other risk control measures required to manage hazards at the work site.
  - 4.2 Notify personnel in adjoining properties and required authorities of proposed fumigation according to workplace and compliance requirements.
  - 4.3 Implement security measures to control unauthorised access to work site during fumigation and prescribed non-re-entry periods according to manufacturers' instructions, workplace and compliance requirements.
  - 4.4 Create conditions to ensure that essential fumigant concentrations are retained for required period within fumigation enclosure according to manufacturers' instructions.
  - 4.5 Select and use PPE for fumigant application according to manufacturers' instructions and safety data sheet (SDS) for fumigant type and workplace requirements.
  - 4.6 Select and calibrate application equipment and confirm correct and safe operation according to manufacturers' instructions and workplace requirements.
  - 4.7 Access fumigant and transport to application site according to manufacturers' instructions, workplace and compliance requirements.
  - 4.8 Calculate and prepare fumigant dosages according to fumigant type, fumigation target and enclosure volume and temperature following manufacturers' instructions and compliance requirements.
- 5 Apply fumigant and monitor fumigation.
  - 5.1 Treat fumigation enclosure using equipment, fumigant and fumigation methods according to manufacturers' instructions, workplace and compliance requirements.
  - 5.2 Check and adjust fumigation enclosure seal to ensure optimal application according to manufacturers' instructions, workplace and compliance requirements.

- 5.3 Assess fumigant escape throughout fumigation exposure period to control impact on public health and safety according to workplace and compliance requirements.
  - 5.4 Secure and continuously monitor fumigation site to prevent unauthorised access and maintain safe conditions according to workplace and compliance requirements.
  - 5.5 Monitor and maintain integrity of enclosure seal and fumigant concentrations over fumigation exposure period according to manufacturers' instructions.
  - 5.6 Recognise and promptly respond to emergency situation according to workplace requirements.
- 6 Ventilate fumigation enclosure.
- 6.1 Establish suitable conditions for enclosure ventilation to control risks to public health and safety according to manufacturers' instructions, workplace and compliance requirements.
  - 6.2 Apply approved method to safely release fumigant and ventilate enclosure to remove fumigant in a safe and controlled manner according to manufacturers' instructions, workplace and compliance requirements.
  - 6.3 Aerate fumigation enclosure and commodities present according to manufacturers' instructions, workplace and compliance requirements.
  - 6.4 Test fumigation enclosure and commodities present for evidence of residual fumigant according to manufacturers' instructions, workplace and compliance requirements.
- 7 Finalise work and complete documentation.
- 7.1 Remove equipment, fumigant and waste and restore work site to meet work instructions or quarantine order and compliance requirements.
  - 7.2 Eliminate hazards prior to site handover and remove signage or barriers according to workplace and compliance requirements.
  - 7.3 Notify relevant persons of residual hazards, necessary risk control measures and site re-entry periods.

- 7.4 Clean and decontaminate equipment and PPE according to manufacturers' instructions and workplace requirements.
- 7.5 Check equipment and PPE to confirm safe and correct operation, record required maintenance and store to allow ready access and re-use.
- 7.6 Transport and store fumigant according to manufacturers' instructions, workplace and compliance requirements.
- 7.7 Dispose of waste from fumigation activities according to work instructions or quarantine order, workplace and compliance requirements.
- 7.8 Treat exposed skin to remove any contamination according to SDS and workplace requirements.
- 7.9 Complete and distribute required documentation and update client records according to workplace and compliance requirements.

## Foundation Skills

Candidates require:

- oral communication skills to use questioning and active listening when discussing client needs and expectations
- reading skills to interpret key requirements of work instructions, manufacturers' instructions and SDS
- numeracy skills to:
  - calculate required fumigant concentrations at various stages of the fumigation period
  - calculate percentage variations in fumigant concentrations
- writing skills to accurately and legibly complete workplace and compliance documentation.

## Unit Mapping Information

Supersedes and equivalent to CPPPMT3011 Manage organisms by applying fumigants to commodities and environments.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPUPM3011 Manage organisms by applying fumigants to commodities and environments

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3011 Manage organisms by applying fumigants to commodities and environments

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by fumigating five different sites from the types listed below, according to the type of licence held:

- aircraft
- building
- burrow
- chamber
- container
- sheeted stack
- ship
- silo
- soil.

Fumigation must target one or more of the following organisms:

- arachnids
- bacteria
- fungi
- insects
- molluscs
- moulds
- plants
- rabbits
- rodents
- seeds.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- chemicals' routes of entry into the human body and potential symptoms of exposure
- commodity absorption and desorption rates
- compliance requirements associated with managing organisms by applying fumigants to commodities and environments in domestic, commercial, industrial and maritime situations:
  - Australian and international standards, quality assurance and certification requirements including *AS 2476 General fumigation procedures (AS 2476)*
  - environmental requirements:
    - clean up, containment or isolation of hazards
    - emergency chemical spill control measures
    - hazardous materials handling
    - regulations, by-laws and guidelines of environmental protection agencies and government departments
    - waste handling and disposal
  - industry guides, advisory standards and relevant industry codes of practice
  - key requirements of commonwealth, state and territory legislation and local government regulations:
    - chemical use, registers and manifests
    - consumer protection
    - dangerous goods
    - fumigation regulations and licence requirements
    - mandatory notifications
    - privacy
    - public health and safety
    - quarantine requirements
    - work health and safety (WHS)
  - public health and safety:
    - licence endorsements and conditions or limitations
    - occupant notifications
    - record of site conditions
    - warning signs
- equipment used when applying fumigants:
  - fumigant application equipment and calibration methods
  - personal protective equipment (PPE):
    - eye, ear and respiratory protection
    - first aid kit
    - site-specific PPE and clothing
    - soap and towel
    - sun protection
- fumigation methods and associated:
  - fumigation conditions, site and enclosure requirements

- organisms eradicated through fumigation
- product knowledge including manufacturers' instructions for equipment and products being used
- risks of effect of fumigant on public health and environment
- information and industry terminology typically contained in work instructions and quarantine orders
- purpose of, and information typically contained in safety data sheets (SDS)
- test methods and readings for monitoring fumigant concentrations
- types of fumigants used to manage organisms in commodities and environments:
  - application methods
  - environmental conditions such as withholding periods
  - preparation requirements
  - safety requirements for handling, use and decontamination
  - types of organisms treated
- typical hazards encountered when managing organisms by applying fumigants to commodities and environments, and risk control measures for each:
  - animal bites and stings
  - chemicals
  - confined or restricted spaces
  - electrical
  - environmental contamination
  - fire
  - lighting
  - manual handling
  - moving vehicles and machinery
  - noise
  - remote locations
  - respiratory
  - slips and trips
  - temperature
  - ultraviolet radiation
  - work at heights
- workplace policies and procedures that apply to managing organisms by applying fumigants:
  - documentation and reporting
  - WHS:
    - emergency response procedures
    - hazard identification, risk assessment and control using the hierarchy of control
    - injury, dangerous occurrence and incident reporting
    - safe work methods.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Fumigations must be conducted with at least one other person and supervised by a licensed fumigator. Of the five required simulations, two must be conducted in a real workplace and three may be simulated

Candidates must have access to fumigation sites and associated work instructions, information, SDS, fumigants, tools, equipment and PPE required to achieve the performance evidence including AS 2476 and relevant industry codes of practice.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPUPM3017 Maintain, service and repair pest management equipment

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3017 Maintain, service and repair pest management equipment

## Application

This unit specifies the skills and knowledge required to plan and conduct regular maintenance, servicing and repair of pest management equipment to ensure equipment is fit for purpose, ready for use and complies with regulatory requirements. It includes preparing and implementing an equipment maintenance plan, regularly inspecting and monitoring equipment use and condition, organising parts and labour, and carrying out servicing and repairs ensuring minimal disruption to pest management operations.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in pest management in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil

## Unit Sector

Urban Pest Management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Confirm workplace and compliance

1.1 Review workplace policies and procedures and regulatory and industry requirements for maintaining, servicing and repairing pest management equipment and

- requirements. apply to maintenance planning to ensure compliance.
- 1.2 Access and review manufacturers' specifications for pest management equipment to confirm recommended maintenance timeframes and procedures and apply to maintenance planning.
- 2 Prepare and implement equipment maintenance plan.
- 2.1 Document a maintenance plan incorporating scheduled equipment inspections, monitoring, maintenance, service and repair.
- 2.2 Check that maintenance plan meets workplace and compliance requirements, maximises equipment effectiveness and minimises disruption to pest management operations.
- 2.3 Establish program of periodic equipment inspections and ongoing monitoring according to maintenance plan.
- 2.4 Conduct periodic equipment inspections according to maintenance plan and update inspection records.
- 2.5 Check equipment user reports to identify and diagnose required equipment maintenance and emergency repairs and update maintenance plan accordingly.
- 2.6 Establish arrangements for maintenance, service and repair of equipment requiring specialist services in consultation with relevant persons.
- 3 Prepare for equipment servicing and repair.
- 3.1 Inform management and operators of scheduled equipment servicing and repair activities in line with maintenance plan.
- 3.2 Identify and organise required parts and labour to meet servicing and repair needs according to manufacturers' instructions and workplace requirements.
- 3.3 Prepare required tools, equipment, parts and materials in readiness for servicing and repair tasks according to manufacturers' instructions.
- 3.4 Identify hazards and control risks associated with maintenance, servicing and repair activities according to workplace requirements.

- |  |     |   |
|--|-----|---|
| 4 Service and repair equipment and complete documentation. | 4.1 | Select, check for correct operation, and use personal protective equipment according to workplace requirements.   |
|  | 4.2 | Identify and clean pest management equipment requiring service and repair according to manufacturers' instructions.   |
|  | 4.3 | Carry out equipment service and repair tasks according to equipment maintenance plan, manufacturers' instructions and workplace requirements.                     |
|  | 4.4 | Check serviced and repaired equipment to confirm correct operation and make required adjustments where problems are identified.                                   |
|  | 4.5 | Arrange required compliance inspections and approvals for serviced and repaired equipment and promptly return serviced and repaired equipment to operational use. |
|  | 4.6 | Dispose of unserviceable equipment and clean and maintain work area according to workplace and compliance requirements.   |
|  | 4.7 | Update equipment maintenance plan and complete and distribute workplace and compliance documentation.   |

## Foundation Skills

Candidates require:

- reading skills to interpret key requirements of manufacturers' instructions and equipment manuals and labels
- numeracy skills to:
  - calculate quantities of parts and materials to meet servicing and repair needs
  - estimate and schedule service and repair timeframes.

## Unit Mapping Information

Supersedes and equivalent to CPPPMT3017 Maintain, service and repair pest management equipment.

## Links

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPUPM3017 Maintain, service and repair pest management equipment

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3017 Maintain, service and repair pest management equipment

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by preparing and implementing an equipment maintenance plan for pest management equipment involving:

- conducting daily, weekly or monthly maintenance tasks for:
  - first aid kit: check and replenish
  - two nozzle: clean
  - pneumatic hand sprayer: clean and lubricate
  - respirator: clean face mask body, remove used filter cartridge and replace filter
  - spill kit: check and replenish
  - spray gun: clean and lubricate
- conducting the following servicing and repair tasks:
  - nozzle: replace 'O' ring (cone jet)
  - pneumatic hand sprayer: fit repair kit
  - respirator: inspect, remove and replace inhalation and exhalation valve(s) and head strap
  - simple centrifugal pump: fit seal kit
  - spray gun: fit seal kit.

The equipment maintenance plan must detail:

- arrangements for maintenance and periodic service and repair of equipment requiring specialist services, such as elevated work platforms and generators
- equipment inspection, monitoring, maintenance, service and repair schedules
- emergency procedures
- replacement procedures
- routine maintenance procedures.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- chemicals' routes of entry into the human body and potential symptoms of exposure
- compliance requirements associated with maintaining, servicing and repairing pest management equipment:
  - Australian standards, quality assurance and certification requirements
  - industry guides, advisory standards and codes of practice
  - key requirements of commonwealth, state and territory legislation and local government regulations:
    - consumer protection
    - dangerous goods
    - environmental protection
    - pesticide registers and manifests
    - pesticide use
    - public health and safety
- hazards and risks associated with maintaining, servicing and repairing pest management equipment
- information typically contained in equipment maintenance plans
- operation, maintenance, service and repair procedures and schedules for common pest management plant and equipment:
  - elevated work platforms
  - first aid kits
  - generators
  - hot and cold foggers for space spraying
  - misters for surface spraying
  - nozzles
  - pneumatic hand sprayers
  - respirators
  - simple centrifugal pump
  - spill kits
  - spray guns
- required compliance inspections and approvals for serviced equipment
- scheduling methods
- sources of reliable information about spare parts availability and supply
- workplace policies and procedures that apply to maintaining, servicing and repairing pest management equipment:
  - disposal of waste and obsolete equipment
  - equipment maintenance, service and repair schedules
  - records and documentation
  - work health and safety:

- emergency response procedures
- hazard identification, risk assessment and control using the hierarchy of control
- injury, dangerous occurrence and incident reporting
- personal protective equipment (PPE)
- safe work practices including hazardous materials and manual handling.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Evidence of assessment for the maintenance and repair of respirators, pneumatic hand sprayers and one other type of equipment, as specified in the performance evidence, must be based on direct observation and assessment of the candidate by an assessor, physically or via audio and visual media.

Evidence of remaining maintenance, service and repair activities as specified in the performance evidence must be based on documentation and photographic evidence that has been validated by a workplace supervisor. A workplace supervisor is a person duly authorised to perform and validate the work being undertaken. The assessor must be satisfied that the candidate has demonstrated knowledge of spill kit and first aid kit contents and other types of equipment submitted in documentary and photographic evidence.

Candidates must have access to workplace policies and procedures, manufacturers' instructions, information, materials, tools, equipment and PPE required to achieve the performance evidence including:

- pest management equipment requiring maintenance, repair and service, and spare parts and consumables.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPUPM3018 Maintain equipment and pesticide storage area in pest management vehicles

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3018 Maintain equipment and pesticide storage area in pest management vehicles

## Application

This unit specifies the skills and knowledge required to set up, stock and control a storage area for equipment and pesticides within a pest management vehicle. It includes monitoring and controlling the security, labelling, movement and storage of equipment and pesticides and ensuring strict compliance with workplace and regulatory requirements. The unit requires maintaining the pest management vehicle to ensure it is clean, safe and roadworthy in readiness for pest management work.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in pest management in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil

## Unit Sector

Urban Pest Management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Confirm compliance requirements and set up vehicle storage

1.1 Review workplace policies and procedures and regulatory and industry requirements for equipment and pesticide storage in pest management vehicles and apply

- area. to work instructions to ensure compliance.
- 1.2 Check pest management vehicle capacities against intended use and verify compliance with regulatory requirements.
  - 1.3 Secure storage area from unauthorised access according to regulatory requirements.
  - 1.4 Identify existing hazards associated with vehicle and pesticides and implement required risk control measures.
  - 1.5 Organise storage area and separate equipment and passenger compartments to minimise transportation risks.
  - 1.6 Equip vehicle to enable emergency response to be implemented according to workplace and compliance requirements.
- 2 Equip vehicle storage area.
- 2.1 Select, check for correct operation, and use personal protective equipment (PPE) according to safety data sheets (SDS) and manufacturers' instructions for chemicals to be stored.
  - 2.2 Check chemical containers to verify suitable condition for storage and transport according to compliance requirements.
  - 2.3 Identify chemical storage specifications and store chemicals in vehicle according to manufacturers' instructions, SDS and workplace requirements.
  - 2.4 Clean, safety-check and store vehicle equipment to enable ready access and re-use and record identified maintenance requirements.
  - 2.5 Maintain storage area free from obstacles and collect and dispose of waste according to workplace and compliance requirements.
- 3 Control and maintain stocks of equipment and chemicals.
- 3.1 Operate and maintain inventory system with maximum and minimum holding levels of equipment and chemicals according to workplace requirements.
  - 3.2 Monitor equipment and chemical use patterns and reorder stock to maintain required levels.

- 3.3 Prepare accurate and legible chemical labels with essential safety information for containers holding decanted and diluted pesticides.
  - 3.4 Maintain an accurate labelling system for all containers according to workplace and compliance requirements.
  - 3.5 Monitor chemical expiration dates and use chemicals on an oldest-manufactured, first-out basis.
  - 3.6 Dispose of obsolete chemicals and equipment according to manufacturers' instructions and compliance requirements.
  - 3.7 Systematically complete stock control records and chemical register or manifest according to workplace and compliance requirements.
- 4 Control storage area during provision of pest management services.
- 4.1 Secure chemicals to prevent accidental spillage according to manufacturers' instructions and compliance requirements.
  - 4.2 Estimate, store and transport quantities of chemicals required for immediate pest management work according to manufacturers' instructions and compliance requirements.
  - 4.3 Store PPE separately to chemicals and vehicle occupants.
  - 4.4 Secure, use and maintain vehicle equipment and PPE during pest management service provision.
  - 4.5 Monitor pest management vehicle during service provision to restrict access and operation to authorised personnel according to workplace requirements
- 5 Maintain pest management vehicle.
- 5.1 Safety-check vehicle and organise regular servicing to ensure roadworthiness according to manufacturers' instructions, workplace and compliance requirements.
  - 5.2 Clean vehicle to remove chemical contaminants and dispose of waste according to workplace and compliance requirements.
  - 5.3 Maintain vehicle to meet workplace presentation

requirements.

- |                                    |     |  |
|------------------------------------|-----|--|
| 6 Respond to emergency situations. | 6.1 | Identify accidental spillage or other emergency situation and promptly implement emergency response procedures according to workplace and compliance requirements. |
|                                    | 6.2 | Complete required compliance and workplace documentation detailing emergency situation and response.   |

## Foundation Skills

Candidates require:

- reading skills to interpret key requirements of equipment manuals, safety warning signs and symbols, pesticide labels and SDS
- numeracy skills to:
  - calculate maximum and minimum holding levels of equipment and chemicals
  - interpret numerical information from SDS, manufacturers' instructions and pesticide labels
- writing skills to legibly and accurately complete chemical labels, stock control records and chemical registers or manifests.

## Unit Mapping Information

Supersedes and equivalent to CPPPMT3018 Maintain equipment and pesticide storage area in pest management vehicles.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPUPM3018 Maintain equipment and pesticide storage area in pest management vehicles

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3018 Maintain equipment and pesticide storage area in pest management vehicles

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by setting up, stocking and controlling a storage area for equipment and pesticides within a pest management vehicle to ensure the vehicle is fit for purpose.

Equipment in the pest management vehicle must include:

- bunding and spill kit
- inspection equipment
- lockable storage areas
- pesticide application equipment
- pesticide measuring and mixing equipment
- spare parts and consumables
- waste disposal containers
  - personal protective equipment (PPE):
    - eye, ear and respiratory protection
    - first aid kit appropriate for a range of tasks and locations
    - personal protective clothing
    - soap and towel
    - sun protection.

Pesticides and chemicals in the vehicle storage area must include:

- cleaning agents
- dangerous goods
- flammable products
- insecticides and rodenticides.
- Safety information stored in the pest management vehicle must include:
  - chemical co-location, separation and segregation information
  - chemical manifests and registers
  - dangerous goods diamonds

- emergency management plan
- manufacturers' instructions for stored equipment
- product labels for stored chemicals
- safety data sheets (SDS) for stored chemicals.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- chemicals' routes of entry into the human body and potential symptoms of exposure
- areas from which pest management vehicles are prohibited
- chemical storage, container and labelling requirements
- compliance requirements associated with maintaining pest management vehicle storage areas:
  - Australian standards, quality assurance and certification requirements
  - industry guides, advisory standards and codes of practice
  - environmental requirements:
    - clean up, containment or isolation of hazards
    - emergency chemical spill control measures
    - hazardous materials handling
    - waste handling and disposal
  - key requirements of commonwealth, state and territory legislation and local government regulations:
    - chemical use, registers and manifests
    - dangerous goods
    - environmental protection
    - licensing for pest management
    - licensing for vehicle operation and chemical transport
    - mandatory notifications
    - public health and safety
- equipment stored within pest management vehicles:
  - inspection tools and equipment:
    - camera
    - hand lens
    - ladder
    - measuring tape
    - mirror
    - moisture meter
    - pliers
    - probes or knife
    - report check sheet or notepad

- sounding tools
- specimen bottle
- torch
- PPE:
  - eye, ear and respiratory protection
  - personal protective clothing
  - soap and towel
  - sun protection
- vehicle equipment:
  - bunding and spill kit
  - first aid kit
  - lockable storage areas
  - pesticide application equipment
  - pesticide measuring and mixing equipment
  - spare parts and consumables
  - waste disposal containers
- methods for maintaining stock inventories and rotating stock in pest management vehicles
- pest management vehicle cleaning locations that comply with environmental requirements
- potential effects of pesticides on public health and the environment
- product knowledge and manufacturers' specifications for products stored and transported in pest management vehicle
- purpose of, and information typically contained in SDS
- types of pesticides commonly stored in pest management vehicles, and methods for their safe handling and transport
- typical hazards encountered when maintaining pest management vehicle storage areas, and risk control measures for each:
  - chemical preparation, use, storage and disposal
  - electrical
  - environmental contamination
  - fire
  - lighting
  - manual handling
  - moving vehicles and machinery
  - noise
  - residual pesticides
  - respiratory
  - slips and trips
  - temperature
  - ultraviolet radiation
- vehicle types and specifications suitable to pest management operations
- workplace policies and procedures that apply to pest management vehicles:

- equipment cleaning and maintenance
- records and documentation
- security of equipment, chemicals and vehicle
- vehicle servicing and presentation
- work health and safety:
  - emergency response procedures
  - hazard identification, risk assessment and control using the hierarchy of control
  - injury, dangerous occurrence and incident reporting
  - safe work practices including manual handling.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Evidence of assessment for pest management activities as specified in the performance evidence must be based on documentation and photographic evidence that has been validated by a workplace supervisor. A workplace supervisor is a person duly authorised to perform and validate the work being undertaken. The assessor must be satisfied that the candidate has demonstrated knowledge of spill kit contents and other types of equipment submitted in documentary and photographic evidence.

Candidates must have access to workplace policies and procedures, manufacturers' instructions, information, materials, tools, equipment and PPE required to achieve the performance evidence including:

- a suitable pest management vehicle, spare parts, pesticides and consumables
- SDS, equipment manuals and vehicle safety information, signage and documentation.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPUPM3042 Install termite management systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3042 Install physical termite management systems

## Application

This unit specifies the skills and knowledge required to install termite management systems to manage subterranean termites in premises at the pre-construction stage. It includes assessing methods of construction of different premises as well as applying techniques required to prevent termites gaining concealed access to a completed construction. The unit requires selecting equipment, materials and methods suitable to the type of termite management system and construction.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

This unit forms part of the licensing requirements for people engaged in pest management in some states and territories, and licensing is required to install termite management systems that are impregnated with chemicals. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil

## Unit Sector

Urban Pest Management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Confirm work and compliance requirements.

1.1 Review work instructions and drawings to confirm client and premises requirements for termite management and clarify issues with relevant persons.

- 1.2 Review workplace policies and procedures, codes, standards and regulatory requirements for installing termite management systems and apply to work instructions to ensure compliance.
- 2 Plan to install termite management system.
  - 2.1 Review work site plan and identify areas requiring protection according to client, workplace and compliance requirements.
  - 2.2 Select termite management system to meet work instructions and review manufacturers' instructions to confirm installation specifications.
  - 2.3 Check that termite management system and installation methods meet quality standards according to workplace and compliance requirements.
  - 2.4 Discuss installation methods with relevant persons, respond to issues and concerns and obtain approval to proceed.
- 3 Assess work site and prepare for installation.
  - 3.1 Select and fit required personal protective equipment (PPE) according to workplace requirements.
  - 3.2 Access and assess work site and construction methods and confirm installation specifications according to work instructions and manufacturers' instructions for termite management system.
  - 3.3 Determine site usage patterns to ensure safety of personnel and efficient use of tools and equipment during installation work.
  - 3.4 Conduct site measurements and calculations to confirm length and area of installation and check against installation specifications.
  - 3.5 Check previous trades work to identify possible effects on proposed installation and report issues to relevant persons.
  - 3.6 Select tools and equipment required for installation, check for serviceability and report faults according to workplace requirements.

- |  |     |  |
|--|-----|--|
|  | 3.7 | Select required materials to meet manufacturers' instructions and installation specifications and locate at the work site in readiness for installation. |
| 4 Install and check termite management system. | 4.1 | Identify hazards and control risks at the work site according to workplace requirements.   |
|  | 4.2 | Identify factors affecting completion of work instructions and advise relevant persons.  |
|  | 4.3 | Install termite management system to termite access points according to work instructions, manufacturers' instructions and workplace requirements.       |
|  | 4.4 | Check installation to confirm it meets manufacturers' instructions, workplace and compliance requirements.   |
| 5 Finalise work and complete documentation.    | 5.1 | Identify hazards and control risks at the work site according to workplace requirements.   |
|  | 5.2 | Identify factors affecting completion of work instructions and advise relevant persons.  |
|  | 5.3 | Install termite management system to termite access points according to work instructions, manufacturers' instructions and workplace requirements.       |
|  | 5.4 | Check installation to confirm it meets manufacturers' instructions, workplace and compliance requirements.   |
|  | 5.5 | Identify hazards and control risks at the work site according to workplace requirements.   |

## Foundation Skills

Candidates require:

- oral communication skills to use questioning and active listening when discussing implementation methods and site usage patterns with clients
- reading skills to interpret key requirements of:
  - building, construction or site plans and drawings for the installation site
  - the National Construction Code
- writing skills to accurately and legibly complete records and documentation.

## Unit Mapping Information

Supersedes and equivalent to CPPPMT3042 Install physical termite management systems.

## Links

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPUPM3042 Install termite management systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3042 Install physical termite management systems

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by installing a termite management system to manage subterranean termites at ten different premises involving:

- different construction methods including slab-on-ground and suspended floor
- pre-construction installations.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building structures and construction methods and materials relevant to premises described in the performance evidence and management of subterranean termites at those sites:
  - concrete slabs
  - footings
  - wall frames
- compliance requirements associated with installing termite management systems:
  - Australian standards, quality assurance and certification requirements including the National Construction Code (NCC) and *AS/NZS 3660 Termite Management Set* (AS/NZS 3660)
  - industry guides, advisory standards and relevant industry codes of practice
  - key requirements of commonwealth, state and territory legislation and local government regulations:
    - consumer protection
    - environmental protection
    - legal implications of installing termite management systems
    - licensing requirements for installing termite management systems that are impregnated with chemicals
    - licensing requirements for installing termite management systems

- mandatory notifications
- pesticide use
- privacy
- public health and safety:
  - licence endorsements and conditions or limitations
  - occupant notifications
  - record of site conditions
  - warning signs
- information and industry terminology typically contained in pest management work instructions
- soil and timber types in relation to termite activities
- termite management systems and methods for their installation pre-construction:
- proprietary products that provide a barrier at termite access points
- proprietary products used in combination that provide a comprehensive termite management system and associated regulatory requirements
- tools, equipment and materials used to install termite management systems:
  - hand and power tools
  - measuring tools
  - personal protective equipment (PPE):
    - eye, ear and respiratory protection
    - first aid kit
    - site-specific PPE and clothing
    - soap and towel
    - sun protection
- types of subterranean termites and their ecology, biology, lifecycles, habits and harbourages
- typical hazards encountered when installing termite management systems, and risk control measures for each:
  - animal bites and stings
  - confined or restricted spaces
  - electrical
  - environmental contamination
  - fire
  - lighting
  - manual handling
  - moving vehicles and machinery
  - noise
  - pesticides and other chemicals
  - remote locations
  - respiratory
  - slips and trips

- temperature
- ultraviolet radiation
- underground services
- workplace policies and procedures that apply to installing termite management systems:
- documentation and reporting
  - work health and safety:
    - emergency response procedures
    - hazard identification, risk assessment and control using the hierarchy of control
    - injury, dangerous occurrence and incident reporting
    - safe work methods including manual handling and using hand and power tools.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Evidence of assessment for installing termite management systems at seven of the ten premises as specified in the performance evidence, must be based on documentation and photographic evidence that has been validated by a workplace supervisor. A workplace supervisor is a person duly authorised to perform and validate the work being undertaken.

Evidence of assessment for installing termite management systems at three of the ten premises as specified in the performance evidence:

- must be based on direct observation and assessment of the candidate by an assessor:
- physically, or
- via audio and visual media provided the candidate is physically accompanied by a person who is licensed or holds the required competency to install termite management systems
- must be in a real workplace for a minimum of two premises
- may be simulated for one premises provided the simulation allows demonstration of all performance criteria.

Candidates must have access to premises and associated work instructions, plans, drawings, information, materials, tools, equipment and PPE required to achieve the performance evidence including:

- NCC, AS/NZS 3660
- termite management systems for installation
- relevant industry codes of practice including:
  - *A Code of Practice for Prior to Purchase Specialist Timber Pest Inspections*
  - *Code of Best Practice for Termite Management*
  - *Code of Best Practice for Termite Management During Construction*
  - *Industry Code of Practice for Training in the Pest Management Industry.*

## Links

Companion volumes to this training package are available at the VETNet website -

# CPPUPM4001 Assess and select pest management vehicle and equipment

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPPMT3026 Select pest management vehicle and equipment

## Application

This unit specifies the skills and knowledge required to assess and select a pest management vehicle and equipment necessary to deliver pest management services to clients. It requires an understanding of the services to be delivered and involves specifying equipment that can support those services and which complies with strict legislative and public health and safety requirements. The unit includes reviewing product specifications and marketing materials for pest management equipment, and establishing hiring, leasing or purchasing arrangements for acquisition.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

This unit forms part of the licensing requirements for people engaged in pest management in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil

## Unit Sector

Urban Pest Management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- 1 Confirm services to be provided and compliance requirements.
  - 1.1 Review and confirm regulatory and industry requirements for use and selection of pest management vehicle.
  - 1.2 Review workplace documentation to clarify equipment budget, usage patterns and acquisition requirements.
  - 1.3 Identify types of pests to be treated, pest management methods and target client groups for service delivery.
  - 1.4 Select equipment required to implement pest management services.
  - 1.5 Assess hazards and risks associated with vehicle and equipment use and document risk management strategy that ensures regulatory compliance.
  
- 2 Select pest management vehicle.
  - 2.1 Determine vehicle type required for pest management service delivery and assess vehicle capacities against intended use according to manufacturers' specifications, workplace and regulatory requirements.
  - 2.2 Question manufacturers and suppliers to assess vehicle specifications and negotiate costs.
  - 2.3 Identify suitable pest management vehicle and verify it is roadworthy and complies with regulatory requirements for transporting pest management equipment and chemicals by road.
  
- 3 Assess performance and select equipment.
  - 3.1 Access and review marketing materials and product specifications for pest management equipment including personal protective equipment (PPE).
  - 3.2 Review manufacturers' instructions and regulatory requirements to clarify performance capabilities and characteristics of equipment, including PPE required for pest management service delivery.
  - 3.3 Select equipment for service delivery considering durability in normal working conditions, ease of cleaning and use, maintenance and repair costs and safety to meet workplace and regulatory requirements.
  - 3.4 Estimate use and life expectancy of equipment to meet

- workplace requirements.
- 3.5 Select weather-resistant equipment for external use to meet workplace and regulatory requirements.
  - 3.6 Select equipment manufactured from non-absorbent substances to minimise chemical build-up and other contamination to meet workplace and regulatory requirements.
  - 3.7 Select pumps, hoses, fittings and tanks to meet anticipated volume or pressure delivery to meet workplace and regulatory requirements.
  - 3.8 Document equipment specifications and performance characteristics to meet service delivery according to workplace requirements.
- 4 Establish equipment supply agreements.
    - 4.1 Examine and select purchase, hiring and leasing options for equipment to suit budget and usage patterns.
    - 4.2 Build and maintain relationships with equipment suppliers on trading terms that comply with workplace requirements.
- 5 Maintain current information about equipment.
    - 5.1 Use technologies to maintain business network and access regular and current information about new and improved equipment.
    - 5.2 Access latest information and publications from regulatory authorities, industry sources and suppliers to maintain current equipment knowledge.
    - 5.3 Use supplier offers to test new products according to workplace requirements.

## Foundation Skills

Candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills when negotiating costs with suppliers
- reading skills to interpret key requirements of:
  - equipment manuals and manufacturers' specifications

- purchase documents and financing contracts
- numeracy skills to:
  - calculate and compare costs of purchasing, hiring or leasing equipment
  - interpret mathematical data relating to equipment performance capacities.

## Unit Mapping Information

Supersedes and not equivalent to CPPPMT3026 Select pest management vehicle and equipment.

# Assessment Requirements for CPPUPM4001 Assess and select pest management vehicle and equipment

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPPMT3026 Select pest management vehicle and equipment

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by selecting a vehicle and the following types of equipment to ensure the vehicle is fit-for-purpose to deliver pest management services:

- bunding and spill kit
- inspection equipment
- lockable storage cupboard
- pesticide application equipment
- pesticide measuring and mixing equipment
- waste disposal containers
- personal protective equipment (PPE):
  - eye, ear and respiratory protection
  - first aid kit appropriate for a range of tasks and locations
  - personal protective clothing
  - soap and towel
  - sun protection.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- chemicals' routes of entry into the human body and potential symptoms of exposure
- chemical storage, container and labelling requirements
- compliance requirements associated with pest management services to be delivered and the types of vehicles and equipment required to deliver those services:
  - Australian standards, quality assurance and certification requirements
  - industry guides, advisory standards and relevant industry codes of practice
  - key requirements of commonwealth, state and territory legislation and local government regulations:

- chemical use, registers and manifests
- consumer protection
- dangerous goods
- environmental protection
- licensing for pest management
- licensing for vehicle operation and chemical transport
- mandatory notifications
- public health and safety
- financing options for obtaining equipment including leasing, hiring and purchasing
- product knowledge and manufacturers' specifications for pest management equipment required to deliver pest management services
- purpose of, and information typically contained in SDS
- risk management strategies associated with use of pest management vehicles and equipment
- sources of industry and product information relating to vehicles and equipment required to deliver pest management services
- types of chemicals and equipment required to deliver pest management services:
  - inspection tools and equipment:
    - camera
    - hand lens
    - ladder
    - measuring tape
    - mirror
    - moisture meter
    - pliers
    - probes or knife
    - report check sheet or notepad
    - sounding tools
    - specimen bottle
    - torch
  - PPE:
    - eye, ear and respiratory protection
    - personal protective clothing
    - soap and towel
    - sun protection
  - vehicle equipment:
    - bunding and spill kit
    - first aid kit
    - lockable storage areas
    - pesticide application equipment

- pesticide measuring and mixing equipment
- waste disposal containers
- typical hazards associated with pest management vehicles and equipment, and risk control measures for each:
  - chemical preparation, use, storage and disposal
  - electrical
  - environmental contamination
  - fire
  - lighting
  - manual handling
  - moving vehicles and machinery
  - noise
  - residual pesticides
  - respiratory
  - road and traffic
  - slips and trips
  - temperature
  - ultraviolet radiation
- vehicle types and specifications suitable for pest management operations
- workplace policies and procedures that apply to pest management services and use of vehicles and equipment:
  - equipment cleaning and maintenance
  - maintenance and servicing procedures
  - purchasing, hiring and leasing requirements
  - records and documentation
  - work health and safety:
    - emergency response procedures
    - hazard identification, risk assessment and control using the hierarchy of control
    - injury, dangerous occurrence and incident reporting
    - safe work practices including manual handling.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- workplace policies and procedures, compliance information, manufacturers' instructions, manuals and marketing materials for pest management vehicles and equipment required to achieve the performance evidence
- telephone and computer with internet access.

## Links

Companion volumes to this training package are available at the VETNet website -

# CPPUPM4002 Schedule, organise and monitor pest management operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPPMT3029 Plan and schedule pest management operations. Incorporates content from CPPPMT3019 Organise and monitor pest management operations

## Application

This unit specifies the skills and knowledge required to schedule, organise and monitor major pest management contracts to ensure performance meets client expectations, business objectives and compliance requirements. It includes scheduling and allocating work and organising equipment and materials within budget and staffing constraints and facilitating training and assessment opportunities for staff to address skill gaps and training needs.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

This unit forms part of the licensing requirements for people engaged in pest management in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil

## Unit Sector

Urban Pest Management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |                               |   |
|-------------------------------|---|
| 1 Confirm work and compliance | 1.1 Review work instructions and associated documentation to clarify pest management service requirements and |
|-------------------------------|---|

- requirements. timeframes, and work site location and characteristics.
- 1.2 Clarify client needs and expectations in consultation with relevant persons and apply client instructions to work planning.
  - 1.3 Confirm budget and staff availability for pest management service delivery according to workplace requirements.
  - 1.4 Review and confirm regulatory and industry requirements associated with pest management services and apply to work plan to ensure compliance.
  - 1.5 Assess hazards and risks associated with work site and pest management services and apply risk management strategies to work planning.
- 2 Organise equipment and materials.
- 2.1 Estimate required types and amounts of equipment, personal protective equipment (PPE) and material quantities based on work instructions and past work orders.
  - 2.2 Access required equipment, PPE and materials and check to confirm operational effectiveness according to manufacturers' instructions.
- 3 Schedule and allocate work instructions.
- 3.1 Prepare work schedule that maximises productivity and efficiency, minimises travel and staff downtime and achieves client instructions and business targets.
  - 3.2 Plan treatment time to minimise disruption and discomfort to client and persons at work site.
  - 3.3 Make provisions in work schedule for weather and emergency and priority work orders.
  - 3.4 Allocate work accounting for staff availability, capabilities, licenses and preferences to meet service requirements and timeframes.
  - 3.5 Communicate work schedule to relevant persons and clarify pest management work instructions with staff.

- |  |  |
|--|--|
| 4 Monitor work performance.                | 4.1 Systematically monitor work performance to ensure compliance with client, workplace and regulatory requirements.                             |
|  | 4.2 Adjust work schedule to meet changing work priorities or respond to contingencies in consultation with relevant persons.                     |
|  | 4.3 Identify problems with work performance and promptly implement solutions to meet client, workplace and regulatory requirements.              |
|  | 4.4 Complete and maintain pest management documentation and client records to meet workplace and compliance requirements.                        |
| 5 Provide staff development opportunities. | 5.1 Monitor staff performance to identify skill gaps and training needs aligned with business objectives.  |
|  | 5.2 Encourage staff members to seek feedback on work performance and hold individual discussions to clarify training needs and resolve conflict. |
|  | 5.3 Facilitate training opportunities to meet identified skill gaps and training needs according to workplace requirements.                      |
|  | 5.4 Facilitate assessment opportunities to enable staff to gain formal recognition of skills according to workplace requirements.                |
|  | 5.5 Complete and maintain staff performance records according to workplace requirements.   |

## Foundation Skills

Candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey, clarify and confirm information provided to clients
- reading skills to interpret key requirements of contracts and agreements for different types of pest management work
- numeracy skills to:
  - apply mathematical methods for budgeting and estimating workloads and equipment and material quantities

- calculate distances and travel times between work sites specified in work instructions.

## **Unit Mapping Information**

Supersedes and not equivalent to CPPPMT3029 Plan and schedule pest management operations.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPUPM4002 Schedule, organise and monitor pest management operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPPMT3029 Plan and schedule pest management operations. Incorporates content from CPPPMT3019 Organise and monitor pest management operations

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by scheduling, organising and monitoring pest management operations at:

- three residential premises with different types of construction, or
- three different commercial premises with different uses, or
- a mix of three different residential and commercial premises.

The candidate must also allocate work, monitor performance, identify skill gaps and arrange training opportunities for two different staff members.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- basic adult learning styles and principles
- compliance requirements associated with scheduling, organising and monitoring pest management operations:
  - Australian standards, quality assurance and certification requirements
  - industry guides, advisory standards and relevant industry codes of practice
  - key requirements of commonwealth, state and territory legislation and local government regulations:
    - chemical use, registers and manifests
    - consumer protection
    - dangerous goods
    - employment and industrial relations
    - environmental protection
    - licensing for pest management
    - privacy
    - public health and safety

- factors to be taken into account when allocating work to staff:
  - capabilities
  - licences
  - preferences
  - skills
- mathematical methods used for budgeting and estimating workloads
- methods for identifying skill gaps when monitoring work performance
- scheduling methods and systems
- types and functions of chemicals and equipment including personal protective equipment used in pest management operations
- types of staff development activities:
  - demonstrations
  - formal training sessions
  - on-the-job instruction and mentoring
  - self-paced learning strategies
  - structured feedback
- typical content of, and industry terms used in pest management work orders
- typical hazards associated with pest management operations, and risk control measures for each:
  - animal bites and stings
  - chemical preparation, use, storage and disposal
  - confined or restricted spaces
  - electrical
  - environmental contamination
  - fire
  - lighting
  - manual handling
  - moving vehicles and machinery
  - noise
  - remote locations
  - respiratory
  - slips and trips
  - temperature
  - ultraviolet radiation
  - work at heights
- workplace policies and procedures that apply to scheduling, organising and monitoring pest management operations:
  - business plans and objectives
  - client service
  - equipment use and maintenance

- performance reviews
- records, documentation and reporting
- work health and safety:
  - emergency response procedures
  - hazard identification, risk assessment and control using the hierarchy of control
  - injury, dangerous occurrence and incident reporting
  - safe work practices including manual handling
- work scheduling and allocation.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- workplace policies and procedures, compliance information, documentation and client information required to achieve the performance evidence
- computer and other technologies required to achieve the performance evidence
- access to staff and sites where work is conducted

## Links

# CPPUPM4003 Assess and advise on pest management options for sensitive

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPPMT3002 Assess, advise on options, and develop pest management plans for complex or high risk operations

## Application

This unit specifies the skills and knowledge required to assess and advise on integrated pest management options to manage cockroaches, rodents and other common pests in high risk environments where people may be more sensitive to pesticides than the general population, for example schools, kindergartens, childcare centres, hospitals, community health centres and aged care facilities. The unit includes client consultation, site inspection to gather evidence and identify the nature and extent of pests and pest activity and developing a comprehensive pest management plan and written proposal with cost estimate.

This unit does not apply to sites where food, beverages or pharmaceuticals are handled, manufactured, produced or packaged under an external food safety management system and audit regime.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

This unit requires the candidate to be a licensed pest management technician in order to undertake pest management work at sensitive sites. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil

## Unit Sector

Urban Pest Management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |   |      |  |
|---|---|------|--|
| 1 | Confirm nature of pest problem and compliance requirements. | 1.1  | Review work instructions and associated documentation to confirm client requirements and location and nature of work site.   |
|   |   | 1.2  | Review client records to clarify perception of pest problem, needs and expectations, and confirm client authority to request pest management services.                                     |
|   |   | 1.3  | Review and confirm regulatory and industry requirements associated with pest management for sensitive environments and apply to work plan to ensure compliance.                            |
|   |   | 1.4  | Conduct initial work site scan to confirm perceived pest problem according to workplace and regulatory requirements.   |
| 2 | Plan site inspection.                                       | 2.1  | Select cost-effective, practical and safe inspection method that minimises disruption to client and site activities according to work instructions, workplace and regulatory requirements. |
|   |   | 2.2  | Identify hazards associated with site inspection and plan risk control measures to meet workplace and regulatory requirements.   |
|   |   | 2.3  | Select and access required inspection equipment according to workplace requirements.   |
|   |   | 2.4  | Obtain client agreement to inspection method according to workplace requirements.  |
|   |   | 2.10 |  |
| 3 | Inspect work site.  | 3.1  | Select and fit required personal protective equipment according to workplace requirements.   |
|   |   | 3.2  | Access work site, identify hazards and control risks according to workplace requirements.  |
|   |   | 3.3  | Determine type and condition of buildings and  |

- surrounds, site usage patterns and pest ingress and hot spots according to work instructions.
- 3.4 Inspect work site using agreed method and inspection equipment according to client, workplace and regulatory requirements.
  - 3.5 Locate pests and evidence of pest activity and identify pest types, accessing expert advice as required to confirm pest types.
  - 3.6 Assess pest density and level of activity from available evidence and locate harbourages.
  - 3.7 Conduct measurements and calculate area of buildings and surrounds requiring treatment.
  - 3.8 Record evidence of pest activity and document inspection results according to workplace requirements.
- 4 Assess, select and cost pest management options.
- 4.1 Identify integrated pest management methods suitable to the pest problem and sensitive environment according to client, workplace and regulatory requirements.
  - 4.2 Assess pest management options and confirm service inclusions, exclusions and limitations, and suitability to site conditions and usage patterns according to workplace and regulatory requirements.
  - 4.3 Calculate quantities and costs of equipment, materials and labour required to implement pest management options allowing for taxes and profit margin according to workplace requirements.
  - 4.4 Check calculations to confirm accuracy and keep legible records of calculation methods according to workplace requirements.
  - 4.5 Check recommendations to confirm compliance with requirements for sensitive environments and cost-effectiveness to client and workplace requirements.
  - 4.6 Collate evidence and accurate information to support pest management recommendations in a format suitable for presentation and discussion with client.

- 5 Advise client on pest management options.
- 5.1 Explain site inspection findings to client, demonstrate evidence of pest activity and respond to issues and concerns to ensure understanding of pest problem.
  - 5.2 Discuss pest management options and considerations for sensitive environments with client and provide accurate supporting information and evidence.
  - 5.3 Inform client of service inclusions, exclusions and limitations associated with pest management options according to workplace and regulatory requirements.
  - 5.4 Provide client with advice on organisational services and information sources to enhance their understanding of proposed treatments and services.
- 6 Prepare and deliver pest management plan and proposal.
- 6.1 Document pest management plan incorporating inspection findings, pest management options and advice to meet work instructions and client, workplace and regulatory requirements.
  - 6.2 Document pest management proposal incorporating cost estimate, terms and conditions to meet work instructions, workplace and regulatory requirements.
  - 6.3 Present pest management plan and proposal to client for consideration.
  - 6.4 Discuss issues associated with pest management plan or proposal with client and negotiate agreed revisions to achieve client acceptance according to workplace requirements.
  - 6.5 Maintain client records and pest management documentation in a manner that ensures confidentiality and future retrieval according to workplace and regulatory requirements.
  - 6.6 Document pest management plan incorporating inspection findings, pest management options and advice to meet work instructions and client, workplace and regulatory requirements.

## Foundation Skills

Candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey, clarify and confirm information provided to clients
- numeracy skills to calculate:
  - tax and profit margins associated with service provision
  - volume and area to estimate pesticide quantities.

## Unit Mapping Information

Supersedes and is not -equivalent to CPPPMT3002 Assess, advise on options, and develop pest management plans for complex or high risk operations.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPUPM4003 Assess and advise on pest management options for sensitive

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPPMT3002 Assess, advise on options, and develop pest management plans for complex or high risk operations

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- assessing and advising on two pest management options each for two different operations involving sensitive sites selected from the following:
  - aged care facility
  - childcare facility
  - construction site
  - education facility
  - hospital
  - motel
  - recreational club
  - residential hotel
- for each pest management option, combine two methods below, ensuring all methods listed are used:
  - chemical control method
  - cultural control method
  - physical control method.

In doing the above, the candidate must identify pest types and pest activity and options to manage a minimum of four different pests consisting of cockroaches, rodents and two of the following:

- ants
- bed bugs
- bees and wasps
- birds
- fabric pests
- fleas
- flies
- mites

- occasional invaders: arthropods, millipedes, springtails and thrips
- paperlice
- spiders
- stored product pests.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements associated with assessing and advising on pest management options for sensitive operations:
  - Australian standards, quality assurance and certification requirements
  - industry guides, advisory standards and relevant industry codes of practice including *A Code of Practice for the Control of Bed Bug Infestations in Australia*
  - environmental requirements:
    - clean up, containment or isolation of hazards
    - emergency chemical spill control measures
    - hazardous materials handling
    - waste handling and disposal
  - key requirements of commonwealth, state and territory legislation and local government regulations:
    - chemical use, registers and manifests
    - consumer protection
    - dangerous goods
    - environmental protection
    - licensing for pest management
    - pesticide use
    - privacy
    - public health and safety
  - public health and safety:
    - licence endorsements and conditions or limitations
    - occupant notifications
    - record of site conditions
    - warning signs
- content and format requirements for pest management plans:
  - advice on health, safety, environmental and other legislative matters
  - advice on pest prevention strategies
  - details of pests and pest activity
  - follow-up pest management advice, monitoring and call-back schedule
  - mandatory notification requirements
  - pest management options and methods
  - pesticide application methods

- record keeping mandated by licensing or regulatory requirements
- types and quantities of chemicals to be used
- content and format requirements for pest management proposals:
  - benefits and rationale of selected options
  - conditions and limitations of proposal
  - description of client requirements
  - evidence of pest activity and location
  - pest management methods and plan
  - recommended maintenance programs
  - warranties or guarantees
  - cost estimates:
    - acceptance of offer provisions
    - company identification information
    - costs associated with all aspects of the proposal
    - liability terms and conditions
    - limitations of pest treatment
    - terms of trade
- ecology, biology, lifecycles, habits and harbourages of the following types of pests:
  - ants
  - bed bugs
  - bees and wasps
  - birds
  - cockroaches
  - fabric pests
  - fleas
  - flies
  - mites
  - occasional invaders: arthropods, millipedes, springtails, thrips
  - paperlice
  - rodents
  - spiders
  - stored product pests
- equipment and materials used for pest management in sensitive operations including inspection and personal protective equipment (PPE)
- mathematical methods used for budgeting and estimating equipment, material and labour quantities and costs
- meaning and application of integrated pest management
- potential effects of pesticides on public health and the environment
- types of evidence of pests and pest activity:
  - droppings

- evidence of feeding
- harbourages
- pest damage
- specimens
- tracks
- types of work sites considered sensitive and associated issues for pest management and using pesticides in places where people may be more sensitive to pesticides than the general population
- typical hazards associated with pest management in sensitive operations, and risk control measures for each:
  - animal bites and stings
  - chemical preparation, use, storage and disposal
  - confined or restricted spaces
  - electrical
  - environmental contamination
  - fire
  - lighting
  - manual handling
  - moving vehicles and machinery
  - noise
  - remote locations
  - respiratory
  - slips and trips
  - temperature
  - ultraviolet radiation
  - work at heights
- workplace policies and procedures that apply to assessing and advising on pest management options for sensitive operations:
  - client service
  - equipment use and maintenance
  - records, documentation and reporting
  - work health and safety:
    - emergency response procedures
    - hazard identification, risk assessment and control using the hierarchy of control
    - injury, dangerous occurrence and incident reporting
    - safe work practices including manual handling.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Evidence of assessment for pest management activities specified in the performance evidence:

- must involve sensitive sites that do not handle, manufacture, produce or package food, beverages or pharmaceuticals under an external food safety management system and audit regime
- must be based on direct observation and assessment of the candidate by an assessor
- must be in a real workplace for one site and may be simulated for one site provided the simulation allows demonstration of all performance criteria.

Candidates must have access to:

- workplace policies and procedures, compliance information, documentation, records and client information required to achieve the performance evidence
- computer and other technologies required to develop and produce pest management plans and proposals
- access to sensitive work sites and pest problems required to achieve the performance evidence
- PPE:
  - eye, ear and respiratory protection
  - site-specific PPE and clothing
  - soap and towel
  - sun protection
- inspection equipment:
  - camera
  - hand lens
  - ladder
  - magnifying glass
  - measuring tape
  - mirror
  - probe
  - specimen bottle
  - torch
- relevant industry codes of practice including *A Code of Practice for the Control of Bed Bug Infestations in Australia*.
-

# CPPUPM4004 Assess and advise on pest management options for complex operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Application

This unit specifies the skills and knowledge required to assess and advise on integrated pest management options to prevent and manage cockroaches, rodents and other common pests in complex operations at sites where food, beverages or pharmaceuticals are handled, manufactured, produced or packaged under an external food safety and audit regime. The unit includes client consultation, site inspection to gather evidence and identify the nature and extent of pests and pest activity and developing a comprehensive pest management plan and cost proposal.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

This unit requires the candidate to be a licensed pest management technician in order to undertake pest management work at sites where food, beverages or pharmaceuticals are handled, produced or packaged. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil

## Unit Sector

Urban Pest Management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |                                    |     |   |
|---|------------------------------------|-----|---|
| 1 | Confirm nature of pest problem and | 1.1 | Review work instructions and associated documentation to confirm client requirements and location and nature of |
|---|------------------------------------|-----|---|

- compliance requirements.
- work site.
- 1.2 Review client records to clarify perception of pest problem, needs and expectations, and confirm client authority to request pest management services.
  - 1.3 Review and confirm auditing and regulatory requirements for site and apply to work plan to ensure compliance.
  - 1.4 Conduct initial work site scan to confirm perceived pest problem according to workplace and regulatory requirements.
- 2 Plan site inspection.
- 2.1 Consult with relevant persons to identify and control risks to food, beverage or pharmaceutical production, manufacturing or handling associated with pests and pest control.
  - 2.2 Select cost-effective, practical and safe inspection method that minimises disruption to client and site operations and meets sanitation and regulatory requirements.
  - 2.3 Identify hazards associated with site inspection and plan risk control measures to meet workplace and regulatory requirements.
  - 2.4 Select and access required inspection equipment according to workplace requirements.
  - 2.5 Obtain client agreement to inspection method according to workplace and regulatory requirements.
- 3 Inspect work site.
- 3.1 Select and fit required personal protective equipment and comply with hygiene, sanitation and bio-security measures according to site and workplace requirements.
  - 3.2 Access work site, identify hazards and control risks according to workplace requirements.
  - 3.3 Participate in site induction and comply with client and site requirements to maintain hygiene during site inspection.
  - 3.4 Determine type and condition of buildings and

- surrounds, site usage patterns and pest ingress and hot spots in consultation with relevant persons.
- 3.5 Inspect work site using agreed method and inspection equipment according to client, workplace and regulatory requirements.
  - 3.6 Locate pests and evidence of pest activity and identify pest types, accessing expert advice as required to confirm pest types.
  - 3.7 Assess pest density and level of activity from available evidence and locate harbourages.
  - 3.8 Conduct measurements and calculate area of buildings and surrounds requiring treatment.
  - 3.9 Record evidence of pest activity and document inspection results according to workplace and regulatory requirements.
- 4 Assess, select and cost pest management options.
- 4.1 Identify integrated pest management methods to prevent and manage pests according to client, workplace and regulatory requirements.
  - 4.2 Assess pest management options and confirm service inclusions, exclusions and limitations, and suitability to site operations, audit specifications and usage patterns according to workplace and regulatory requirements.
  - 4.3 Calculate quantities and costs of equipment, materials and labour required to implement pest management options allowing for taxes and profit margin according to workplace requirements.
  - 4.4 Check calculations to confirm accuracy and keep legible records of calculation methods according to workplace requirements.
  - 4.5 Check recommendations to confirm compliance with audit specifications and cost-effectiveness to client and workplace requirements.
  - 4.6 Collate evidence and accurate information to support pest management recommendations in a format suitable for presentation and discussion with client.

- |  |   |
|--|---|
| 5 Advise client on pest management options.              | 5.1 Explain site inspection findings to client, demonstrate evidence of pest activity and respond to issues and concerns to ensure understanding of pest problem and prevention strategies. |
|  | 5.2 Discuss pest management options and considerations for site operations with client and provide accurate supporting information and evidence.  |
|  | 5.3 Inform client of service inclusions, exclusions and limitations associated with pest management options according to workplace and regulatory requirements.                             |
|  | 5.4 Provide client with advice on organisational services and information sources to enhance their understanding of proposed treatments and services.                                       |
| 6 Prepare and deliver pest management plan and proposal. | 6.1 Document pest management plan incorporating inspection findings, pest management options and advice to meet work instructions and client, workplace and regulatory requirements.        |
|  | 6.2 Document pest management proposal incorporating cost estimate, terms and conditions to meet work instructions, workplace and regulatory requirements.                                   |
|  | 6.3 Present pest management plan and proposal to client for consideration.  |
|  | 6.4 Discuss issues associated with pest management plan or proposal with client and negotiate agreed revisions to achieve client acceptance according to workplace requirements.            |
|  | 6.5 Maintain client records and pest management documentation in a manner that ensures confidentiality and future retrieval according to workplace and regulatory requirements.             |

## Foundation Skills

- Candidates require:
- oral communication skills to use clear explanations, active listening and questioning skills to convey, clarify and confirm information provided to clients
- numeracy skills to calculate:

- tax and profit margins associated with service provision
- volume and area to estimate pesticide quantities.

## Unit Mapping Information

No equivalent unit.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPUPM4004 Assess and advise on pest management options for complex operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New unit.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- assessing and advising on two pest management options each for two different sites involving complex operations selected from the following:
  - dry food facility
  - wet or liquid food facility
  - food retail facility
  - food service facility
  - pharmaceutical facility
- for each pest management option, combine two methods below, ensuring all methods listed are used:
  - chemical control method
  - cultural control method
  - physical control method.

In doing the above, the candidate must identify pest types and pest activity and options to manage a minimum of four different pests consisting of cockroaches, rodents and two of the following:

- ants
- bed bugs
- bees and wasps
- birds
- fabric pests
- fleas
- flies
- mites
- occasional invaders: arthropods, millipedes, springtails, thrips
- paperlice
- spiders
- stored product pests.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements associated with assessing and advising on pest management options for complex operations:
  - Australian standards, quality assurance and certification requirements
  - industry guides, advisory standards and relevant industry codes of practice including *A Code of Practice for Pest Management in the Food Industry*
  - environmental requirements:
    - clean up, containment or isolation of hazards
    - emergency chemical spill control measures
    - hazardous materials handling
    - waste handling and disposal
  - key requirements of commonwealth, state and territory legislation and local government regulations:
    - chemical use, registers and manifests
    - consumer protection
    - dangerous goods
    - environmental protection
    - Food Standards Australia New Zealand and five food safety standards in Australia
    - licensing for pest management
    - pesticide use and chemicals approved for use in food facilities
    - privacy
    - public health and safety
  - public health and safety:
    - licence endorsements and conditions or limitations
    - occupant notifications
    - record of site conditions
    - warning signs
- content and format requirements for pest management plans:
- advice on health, safety, environmental and other legislative matters
  - advice on pest prevention strategies and strategies to maintain audit compliance
  - details of pests and pest activity
  - follow-up pest management advice, monitoring and call-back schedule
  - mandatory notification requirements
  - pest management options and methods
  - pesticide application methods
  - record keeping mandated by audit, licensing or regulatory requirements
  - types and quantities of chemicals to be used

- content and format requirements for pest management proposals:
  - benefits and rationale of selected options
  - conditions and limitations of proposal
  - description of client requirements
  - evidence of pest activity and location
  - pest management methods and plan
  - recommended maintenance programs
  - warranties or guarantees
  - cost estimates:
    - acceptance of offer provisions
    - company identification information
    - costs associated with all aspects of the proposal
    - liability terms and conditions
    - limitations of pest treatment
    - terms of trade
- ecology, biology, lifecycles, habits and harbourages of the following types of pests and risks to food, beverage or pharmaceutical businesses:
  - ants
  - bed bugs
  - bees and wasps
  - birds
  - cockroaches
  - fabric pests
  - fleas
  - flies
  - mites
  - occasional invaders: arthropods, millipedes, springtails and thrips
  - paperlice
  - rodents
  - spiders
  - stored product pests
- equipment and materials used for pest management in complex operations including inspection and personal protective equipment (PPE)
- mathematical methods used for budgeting and estimating equipment, material and labour quantities and costs
- meaning and application of integrated pest management
- pest management considerations for organic food business sites
- potential effects of pesticides on public health and the environment and types of pesticides suitable for use in food handling facilities
- risks to food production, manufacturing or handling associated with pest control and chemical use

- types of evidence of pests and pest activity:
  - droppings
  - evidence of feeding
  - harbourages
  - pest damage
  - specimens
  - tracks
- types of food, beverage or pharmaceutical handling or manufacturing sites which are audited for food safety and associated issues for pest management and using pesticides
- typical hazards associated with pest management in complex operations, and risk control measures for each:
  - animal bites and stings
  - chemical preparation, use, storage and disposal
  - confined or restricted spaces
  - electrical
  - environmental contamination
  - fire
  - lighting
  - manual handling
  - moving vehicles and machinery
  - noise
  - remote locations
  - respiratory
  - slips and trips
  - temperature
  - ultraviolet radiation
  - work at heights
- workplace policies and procedures that apply to assessing and advising on pest management options for complex operations:
  - client service
  - equipment use and maintenance
  - personal hygiene and sanitation
  - records, documentation and reporting
  - work health and safety:
    - emergency response procedures
    - hazard identification, risk assessment and control using the hierarchy of control
    - injury, dangerous occurrence and incident reporting
    - safe work practices including manual handling.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Evidence of assessment for pest management activities specified in the performance evidence:

- must be based on direct observation and assessment of the candidate by an assessor
- must be in a real workplace for one site and may be simulated for one site provided the simulation allows demonstration of all performance criteria.

Candidates must have access to:

- workplace policies and procedures, audit specifications, compliance information, documentation, records and client information required to achieve the performance evidence
- computer and other technologies required to develop and produce pest management plans and proposals
- access to work sites and pest problems required to achieve the performance evidence
- PPE:
  - eye, ear and respiratory protection
  - site-specific PPE and clothing
  - soap and towel
  - sun protection
- inspection equipment:
  - camera
  - hand lens
  - ladder
  - magnifying glass
  - measuring tape
  - mirror
  - probe
  - specimen bottle
  - torch
- relevant industry codes of practice including *A Code of Practice for Pest Management in the Food Industry*.

# CPPUPM4005 Implement and monitor pest management plans for sensitive operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPPMT3007 Implement pest management plans for complex or high risk operations.

## Application

This unit specifies the skills and knowledge required to implement and monitor plans to manage cockroaches, rodents and other common pests in places where people may be more sensitive to pesticides than the general population, for example schools, kindergartens, childcare centres, hospitals, community health centres and aged care facilities. The unit includes preparing work orders and schedules and allocating work to staff, applying pest management methods to treat the work site, and monitoring pest management reports to respond to issues and negotiate modifications to plans.

This unit does not apply to sites where food, beverages or pharmaceuticals are handled, manufactured, produced or packaged under an external food safety management system and audit regime.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

This unit requires the candidate to be a licensed pest management technician in order to undertake pest management work at sensitive sites. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

Nil

## Unit Sector

Urban Pest Management

## Elements and Performance Criteria

Elements describe the Performance criteria describe what needs to be done to

essential outcomes.	demonstrate achievement of the element.
1 Confirm work and compliance requirements.	<p>1.1 Review pest management plan to confirm work and resource requirements for sensitive operation.</p> <p>1.2 Review and confirm regulatory and industry requirements associated with pest management for sensitive environments and apply to work activities to ensure compliance.</p> <p>1.3 Consult with relevant persons to clarify specific requirements of sensitive work site and obtain approval to implement pest management plan.</p>
2 Prepare to implement pest management plan.	<p>2.1 Organise equipment and materials specified in pest management plan according to workplace requirements.</p> <p>2.2 Develop documented work orders and schedules and allocate work to team members according to pest management plan and workplace requirements.</p> <p>2.3 Develop reports, records and systems incorporating established performance indicators and benchmarks to support pest management plan monitoring.</p> <p>2.4 Notify client of intention to commence pest management work according to workplace and regulatory requirements.</p>
3 Apply pest management methods in sensitive environment.	<p>3.1 Install signs or barriers to maximise protection of public health and safety during treatment of sensitive site, notify occupants, and implement other risk control measures required to manage site hazards.</p> <p>3.2 Select and fit required personal protective equipment according to workplace requirements.</p> <p>3.3 Follow safety data sheets and manufacturers' instructions to prepare pesticides and equipment for chemical controls outlined in pest management plan.</p> <p>3.4 Follow manufacturers' instructions to prepare equipment and materials for biological, cultural or physical controls outlined in pest management plan.</p> <p>3.5 Treat work site using pest management methods detailed</p>

- in pest management plan and according to workplace and regulatory requirements.
- 3.6 Remove equipment, materials and waste from pest management activities and restore work site to meet client and regulatory requirements.
- 4 Monitor pest management operation.
- 4.1 Obtain and review pest management records and reports to monitor pest management plan implementation and identify issues.
- 4.2 Consult with relevant persons to discuss issues, implement corrective actions and identify changes to pest management plan according to workplace and regulatory requirements.
- 4.3 Record details of issues and negotiated changes to pest management plan according to workplace requirements.
- 5 Review and revise pest management plan.
- 5.1 Review pest management plan implementation in consultation with client at agreed intervals according to contract and workplace requirements.
- 5.2 Negotiate and implement agreed changes to pest management plan in consultation with relevant persons.
- 5.3 Update client records and document details of pest management operations according to workplace and regulatory requirements.

## Foundation Skills

Candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey, clarify and confirm information provided to clients
- numeracy skills to:
  - estimate scope of work involved in implementing pest management plans
  - dilute and mix pesticides accurately for the required quantities and applications.

## Unit Mapping Information

Supersedes and is not-equivalent to CPPPMT3007 Implement pest management plans for complex or high risk operations.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPUPM4005 Implement and monitor pest management plans for sensitive operations

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPPMT3007 Implement pest management plans for complex or high risk operations.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by implementing and monitoring pest management plans for two different operations involving sensitive environments selected from the following:

- aged care facility
- childcare facility
- construction site
- education facility
- hospital
- motel
- recreational club
- residential hotel.

In doing the above, the candidate must manage a minimum of four different pests consisting of cockroaches, rodents and two of the following:

- ants
- bed bugs
- bees and wasps
- birds
- fabric pests
- fleas
- flies
- mites
- occasional invaders: arthropods, millipedes, springtails and thrips
- paperlice
- spiders
- stored product pests.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- chemicals' routes of entry into the human body and potential symptoms of exposure
- compliance requirements associated with implementing pest management plans for sensitive operations:
  - Australian standards, quality assurance and certification requirements
  - industry guides, advisory standards and relevant industry codes of practice including *A Code of Practice for the Control of Bed Bug Infestations in Australia*
  - environmental requirements:
    - clean up, containment or isolation of hazards
    - emergency chemical spill control measures
    - hazardous materials handling
    - waste handling and disposal
  - key requirements of commonwealth, state and territory legislation and local government regulations:
    - chemical use, registers and manifests
    - consumer protection
    - contractual requirements
    - dangerous goods
    - environmental protection
    - licensing for pest management
    - occupant and mandatory notifications
    - pesticide use
    - privacy
    - public health and safety
  - public health and safety:
    - licence endorsements and conditions or limitations
    - occupant notifications
    - record of site conditions
    - warning signs
- content and format requirements for pest management plans:
  - advice on health, safety, environmental and other legislative matters
  - advice on pest prevention strategies
  - details of pests and pest activity
  - follow-up pest management advice, monitoring and call-back schedule
  - mandatory notification requirements
  - pest management options and methods
  - pesticide application methods
  - record keeping mandated by licensing or regulatory requirements
  - types and quantities of chemicals to be used

- ecology, biology, lifecycles, habits and harbourages of the following types of pests:
  - ants
  - bed bugs
  - bees and wasps
  - birds
  - cockroaches
  - fabric pests
  - fleas
  - flies
  - mites
  - occasional invaders: arthropods, millipedes, springtails, thrips
  - paperlice
  - rodents
  - spiders
  - stored product pests
- equipment and materials used for pest management in sensitive operations including personal protective equipment (PPE)
- meaning and application of integrated pest management
- reports, records and systems incorporating established performance indicators and benchmarks that support pest management plan monitoring:
  - pest activity reports
  - pest management system problem or action reports
  - record keeping mandated by licensing or regulatory requirements
  - service logbooks
  - site visit reports
- types of work sites considered sensitive and associated issues for pest management and using pesticides in places where people may be more sensitive to pesticides than the general population
- typical hazards associated with pest management in sensitive operations, and risk control measures for each:
  - animal bites and stings
  - chemical preparation, use, storage and disposal
  - confined or restricted spaces
  - electrical
  - environmental contamination
  - fire
  - lighting
  - manual handling
  - moving vehicles and machinery
  - noise
  - remote locations

- respiratory
- slips and trips
- temperature
- ultraviolet radiation
- work at heights
- workplace policies and procedures that apply to implementing pest management plans for sensitive operations:
  - client service
  - equipment use and maintenance
  - records, documentation and reporting
  - scheduling and work allocation
  - work health and safety:
    - emergency response procedures
    - hazard identification, risk assessment and control using the hierarchy of control
    - injury, dangerous occurrence and incident reporting
    - safety data sheets (SDS) for pesticides and chemicals being used
    - safe work practices including manual handling.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Evidence of assessment for pest management activities specified in the performance evidence:

- must involve sensitive sites that do not handle, manufacture, produce or package food, beverages or pharmaceuticals under an external food safety management system and audit regime
- must be based on direct observation and assessment of the candidate by an assessor
- must be in a real workplace for one site and may be simulated for one site provided the simulation allows demonstration of all performance criteria.

Candidates must have access to:

- workplace policies and procedures, pest management plan, compliance information, documentation, SDS and client information required to achieve the performance evidence
- access to sensitive work sites and pest problems required to achieve the performance evidence
- equipment and materials required for pest management plan implementation and to achieve the performance evidence
- PPE:
  - eye, ear and respiratory protection
  - site-specific PPE and clothing
  - soap and towel
  - sun protection

- relevant industry codes of practice including *A Code of Practice for the Control of Bed Bug Infestations in Australia*.

## Pre-requisite Unit

Nil

## Unit Sector

Urban Pest Management

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- 1 Confirm work and compliance requirements.
  - 1.1 Review pest management plan to confirm work and resource requirements for complex operation.
  - 1.2 Review and confirm auditing and regulatory requirements for site and apply to work plan to ensure compliance.
  - 1.3 Consult with relevant persons to clarify specific requirements of work site and obtain approval to implement pest management plan.
  
- 2 Prepare to implement pest management plan.
  - 2.1 Organise equipment and materials specified in pest management plan according to workplace and regulatory requirements.
  - 2.2 Develop documented work orders and schedules and allocate work to team members according to pest management plan and workplace requirements.
  - 2.3 Develop reports, records and systems incorporating established performance indicators and benchmarks to support pest management plan monitoring.
  - 2.4 Notify client of intention to commence pest management work according to workplace and regulatory requirements.
  - 2.5 Consult with relevant persons to identify and control risks to food production, manufacturing or handling associated with pest management.
  
- 3 Apply pest management methods in complex operation.
  - 3.1 Install signs and barriers to maximise protection of public health and safety during treatment of site, notify occupants, and implement other risk control measures required to manage site hazards.
  - 3.2 Select and fit required personal protective equipment and comply with hygiene, sanitation and bio-security measures according to site and workplace requirements.
  - 3.3 Follow safety data sheets and manufacturers' instructions to prepare pesticides and equipment for chemical controls outlined in pest management plan.
  - 3.4 Follow manufacturers' instructions to prepare equipment and materials for biological, cultural or physical controls

- outlined in pest management plan.
- 3.5 Treat work site using pest management methods detailed in pest management plan and according to audit, workplace and regulatory requirements.
  - 3.6 Remove equipment, materials and waste from pest management activities and restore work site to meet client and regulatory requirements.
- 4 Monitor pest management operation.
- 4.1 Obtain and review pest management records and reports to monitor pest management plan implementation and identify issues and escalation trigger points.
  - 4.2 Constantly monitor risks to protect food, beverage or pharmaceutical production, manufacturing or handling operations and respond immediately where risk escalation is identified.
  - 4.3 Consult with relevant persons promptly to discuss issues, implement corrective actions and identify changes to pest management plan according to workplace and regulatory requirements.
  - 4.4 Record details of issues and negotiated changes to pest management plan according to workplace requirements.
- 5 Review and revise pest management plan.
- 5.1 Review pest management plan implementation in consultation with client at agreed intervals according to contract, audit and workplace requirements.
  - 5.2 Negotiate and implement agreed changes to pest management plan to maintain audit compliance and pest prevention in consultation with relevant persons.
  - 5.3 Schedule follow-up activities to monitor pest prevention to meet client and audit requirements.
  - 5.4 Update client records and document details of pest management operations according to audit, workplace and regulatory requirements.

## Foundation Skills

Candidates require:

- oral communication skills to use clear explanations, active listening and questioning skills to convey, clarify and confirm information provided to clients
- numeracy skills to:
  - estimate scope of work involved in implementing pest management plans
  - dilute and mix pesticides accurately for the required quantities and applications.

## AHCCHM304 Transport and store chemicals

### Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

### Application

This unit of competency describes the skills and knowledge required to safely handle, transport and store chemicals.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

### Pre-requisite Unit

Nil

### Unit Sector

Chemicals (CHM)

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to handle and	1.1 Identify health and safety hazards, assess risks and implement

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
transport chemicals	<p>controls according to workplace procedures</p> <p>1.2 Ensure contact details for emergency services are available in transport vehicle according to workplace procedures and transport regulations</p> <p>1.3 Ensure transport vehicle complies with transport regulations</p> <p>1.4 Ensure containers are secured, protected and in a condition to be safely transported according to workplace procedures, manufacturer instructions, legislative and regulatory requirements</p> <p>1.5 Ensure emergency equipment and procedures are available in the vehicle according to workplace safety procedures and regulations</p> <p>1.6 Ensure transport arrangements comply with legislative and regulatory requirements for the transport of hazardous substances and dangerous goods</p> <p>1.7 Obtain and use safety data sheets (SDS) for chemicals to be transported according to health and safety in the workplace procedures and legislative and regulatory requirements</p>
2. Handle and transport chemicals	<p>2.1 Handle, transport and load chemicals according to chemical safety data information, chemical label, legislative and regulatory requirements</p> <p>2.2 Carry out emergency procedures according to chemical label, SDS and workplace procedures</p> <p>2.3 Report transport incidents according to workplace procedures and health and safety in the workplace regulations</p>
3. Store chemicals in the workplace	<p>3.1 Select, ensure serviceability, fit and use personal protective equipment according to SDS and chemical label instructions</p> <p>3.2 Identify chemical storage requirements and store chemicals according to chemical label, safety data information and health and safety in the workplace procedures</p> <p>3.3 Maintain storage area according to legislative and regulatory requirements, health and safety in the workplace and environmental procedures.</p> <p>3.4 Dispose of chemicals and chemical waste according to chemical label instructions and environmental regulations</p> <p>3.5 Monitor chemical expiration dates and dispose of expired chemicals according to chemical label instructions, workplace and legislative and regulatory requirements</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
4. Record storage details	4.1 Maintain register of stored chemicals and SDS according to workplace procedures and legislative and regulatory requirements 4.2 Report storage incidents according to legislative and regulatory requirements and workplace procedures

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

<b>Skill</b>	<b>Description</b>
Reading	<ul style="list-style-type: none"> <li>Read and interpret SDS, chemical labels, manufacturer instructions, operating instruction and other workplace documentation and consolidates information to safely transport and store chemicals</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Accurately record and complete organisational records using clear language, correct spelling and terminology when completing transport and storage records</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Perform mathematical calculations to determine chemical weights, volumes and quantities to determine handling and storage requirements</li> </ul>
Navigate the world of work	<ul style="list-style-type: none"> <li>Take responsibility for following workplace policies, procedures and legislative and regulatory requirements</li> <li>Identify and implement chemical label requirements for handling and storage</li> </ul>

# Assessment Requirements for AHCCHM304 Transport and store chemicals

## Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

## Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have safely transported and stored chemicals, including:

- identified health and safety hazards, assessed risks and implemented controls
- ensured emergency services contact details are available
- ensured transport vehicle meets regulations and that chemicals were loaded, secured and protected according to regulations and procedures
- ensured emergency equipment and procedures were available
- handled, transported and stored chemicals safely
- carried out emergency procedures safely and according to procedures
- maintained a chemical storage manifest and safety data sheets (SDS) according to legislative and regulatory requirements
- complied with chemical label instructions and SDS for transporting and storage of chemicals and legislative and regulatory requirements
- maintained inventory and records according to workplace procedures and legislative and regulatory requirements
- monitored chemical expiration and disposed of chemicals and waste according to workplace procedures and legislative and regulatory requirements.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- chemical labels and SDS their purpose, use and terminology, including:

- chemical signs, symbols and coding
- basic chemical properties and reactivity related to SDS and labels
- legislation and regulations that apply to transporting and storing chemicals, including:
  - transport vehicle requirements
  - information and documentation
  - dangerous and hazardous chemicals
  - placarding requirements
- risk factors including human and animal health and environmental
- processes and procedures for the disposal of excess, unwanted, expired chemicals and chemical waste including industry disposal programs
- health and safety in the workplace requirements including personal protective equipment (PPE) and manual handling
- emergency procedures for spills and accidents
- recording and monitoring of chemical stores including, expiration and disposal procedures.

## Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
  - access to storage facility for chemicals
  - access to vehicle for transporting chemicals
- resources, equipment and materials:
  - chemicals
  - PPE
  - materials and equipment to handle, secure and protect chemical loads
- specifications:
  - specific workplace documents, including work instructions and procedures for chemical handling, storage and transport
  - chemical labels and safety data
  - legislation and regulations about handling, storage and transport of chemicals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases

## Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

## Application

This unit of competency describes the skills and knowledge required to safely prepare and apply chemicals for the control of pests, weeds and diseases, using general application equipment.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

## Pre-requisite Unit

Nil

## Unit Sector

Chemicals (CHM)

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the need for chemical use and prepare an application plan	1.1 Identify the pest, weed or disease, and assess the need for control 1.2 Assess the requirement for chemical use 1.3 Assess health and safety hazard, risks and controls for different chemicals

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Confirm requirement for chemical application according to workplace procedures 1.5 Assess off target risk of each application method 1.6 Assess the environmental risk for application method 1.7 Notify stakeholders of intended chemical application according to workplace procedures and legislative and regulatory requirements 1.8 Prepare application plan according to workplace procedures
2. Prepare chemical mixes	2.1 Identify and select chemical required for target according to application plan 2.2 Calculate the volume, rate or dose according to chemical label instructions 2.3 Identify and select application equipment and set-up requirements according to application plan and operator instructions 2.4 Identify hazards, assess risks and implement control measures for application method according to chemical label and health and safety in the workplace procedures 2.5 Identify, select, fit and use personal protective equipment (PPE) according to workplace procedures 2.6 Select appropriate mixing equipment and suitable location to prepare and load chemicals according to workplace procedures 2.7 Prepare chemicals according to chemical label instructions 2.8 Return unused chemical to store and clean preparation equipment and work site of residues and spillage according to chemical label instructions and workplace procedures
3. Calibrate application equipment	3.1 Select application equipment for chemical according to application plan, off target risks and workplace procedures 3.2 Conduct pre-operational checks of application equipment according to operator and maintenance manual 3.3 Calibrate equipment according to operating instructions and application plan 3.4 Load equipment with chemical according to operating instructions and workplace safety procedures
4. Apply chemicals	4.1 Monitor and assess weather conditions and forecasts to ensure effective chemical application according to application plan

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.2 Select, ensure serviceability, fit and use PPE according to chemical label instructions and workplace procedures</p> <p>4.3 Apply chemical according to label directions and application plan relating to the control of the pest, weed or disease</p> <p>4.4 Monitor application equipment for correct performance and ensure effective chemicals application according to operating instructions</p> <p>4.5 Identify health and safety in the workplace hazards and risks and implement controls</p> <p>4.6 Clean up spills during application according to chemical label instructions and workplace procedures</p>
5. Clean up equipment and complete records	<p>5.1 Clean and decontaminate application equipment according to operator instructions, safety data sheets (SDS) and legislative requirements</p> <p>5.2 Dispose of chemicals and used containers according to chemical label instructions, SDS and legislative requirements</p> <p>5.3 Clean and store PPE according to workplace procedures</p> <p>5.4 Record and report safety and environmental incidents according to workplace procedures and regulatory requirements</p> <p>5.5 Record details of chemical application according to workplace procedures and legislative requirements</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Read and interpret SDS, chemical labels, operating instruction and other documentation and consolidates information to determine chemical application actions and activity</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Accurately record and complete organisational records using clear language and terminology</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Perform mathematical calculations to determine rates of application chemical mixtures and calibration of equipment</li> </ul>

Skill	Description
Navigate the world of work	<ul style="list-style-type: none"> <li>Take responsibility for following policies, procedures and regulations</li> <li>Identify and implement chemical label requirements</li> </ul>
Get the work done	<ul style="list-style-type: none"> <li>Take responsibility for planning, sequencing and prioritising tasks required for chemical application activities</li> </ul>

# Assessment Requirements for AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases

## Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

## Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to safely prepare and apply chemicals ensuring they have:

- determined and confirmed the need for chemical application by assessing the infestation, off target risk, and environmental risks
- developed an application plan for chemical application
- identified health and safety hazards, risk and implemented control procedures according to chemical label
- notified stakeholders of planned chemical application
- used personal protective equipment (PPE) according to workplace procedures
- interpreted chemical labels and applied chemical according to safety data sheets (SDS) and application plan
- identified and selected the chemical required for the target and calculated the amount and rates required according to chemical label
- identified and selected application equipment and suitable location, and determined the set up parameters according to application plan and operator instructions
- monitored and assessed weather conditions and equipment performance to ensure effective chemical application
- selected, conducted pre-operational checks according to operator and maintenance manual
- completed at least one calibration activity for application equipment
- prepared and loaded chemicals and returned unused chemicals to store in accordance with label, application plan and workplace procedures
- applied chemicals safely according to chemical labels, regulations and workplace procedures
- complied with chemical labels, SDS, regulations, maintenance manual, environmental procedures, operator instructions and application plan
- cleaned equipment and spills, and disposed of waste according to workplace and environmental procedures

- maintained records and reported incidents according to workplace procedures and regulatory requirements.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- control options when selecting chemicals for pests, diseases and weeds infestations, including:
  - chemical
  - mechanical
  - cultural
  - biological
  - integrated pest management including resistance management principles
- types of pest, diseases and weed their treatment and resistance
- legal implications and requirements of chemical labels and SDS
- stakeholders and required notifications including, neighbours, staff and statutory notifications
- impact of weather factors on the safe and effective application of chemicals
- characteristics of chemicals, their mode of action and relevance to chemical selection and use, including:
  - translocated/systemic
  - contact
  - ingested poison
  - protectant
  - eradicant
  - knock-down
  - residual
  - selective/non selective
- factors that contribute to off target damage, including:
  - physical movement of chemicals (e.g. animals moving baits or soil movement)
  - chemical formulation
  - wind speed and direction
  - temperature and relative humidity
  - temperature inversions
  - controlling off target damage
  - rainfall
  - buffer zones and barriers
- hazards of chemical application, including:
  - human and animal health
  - environmental contamination

- residues in environment, plants and animals
- withholding/re-entry periods
- safety requirements when applying chemicals, including:
  - procedures
  - PPE
  - signage
- safe handling, transporting and storage of chemicals
- preparing chemicals including preparation, compatibility, adjuvants and water quality
- requirements for disposal of excess chemicals, clearing spillages and equipment clean up
- selecting and operating suitable application equipment
- features, functions and calibration techniques for powered and hand held application equipment, including:
  - pressure and volume of chemical
  - travel speed
  - nozzle identification, selection, operation
- legislation, regulations and licensing requirements in relation to chemical use.

## Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - chemicals
  - PPE
  - application equipment
  - chemical measuring and mixing equipment
- specifications:
  - specific workplace documents, including work instructions and procedures for chemical application
  - chemical labels and SDS
  - regulations about use of chemicals
  - manufacturers' operation and maintenance instructions for equipment
  - access to weather forecasts or means to measure local weather.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Companion Volumes, including Implementation Guides, are available at VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

# AHCCHM404 Develop procedures to minimise risks in the use of chemicals

## Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

## Application

This unit of competency describes the skills and knowledge required to assess hazards and risks and determine controls and develop procedures to mitigate risks when using chemicals.

The unit applies to individuals who take responsibility for their own work and may provide direction to others. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Unit Sector

Chemicals (CHM)

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify chemical use hazards and risks	1.1 Identify, source and analyse information relating to safe use of chemicals in industry 1.2 Identify steps for the process of using chemicals 1.3 Identify hazards and risks for the process of using chemicals

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Assess risks associated with chemical use and develop control procedures	<p>2.1 Assess risks associated with using chemicals in the workplace</p> <p>2.2 Develop control measures and emergency action plans to mitigate risk according to workplace procedures and industry best practice</p> <p>2.3 Develop procedures for risk control for operational activities using chemicals according to industry best practice</p> <p>2.4 Develop a continuous improvement strategy to address identified deficiencies in risk control procedures</p>
3. Monitor and assess adherence to chemical risk procedures	<p>3.1 Provide personnel with chemical use procedures, instruction and safety equipment, including personal protective equipment, for using chemical control strategies</p> <p>3.2 Monitor and assess personnel performance against procedures for selecting equipment for chemical use</p> <p>3.3 Monitor and assess personnel performance against procedures for operational activities of chemical use</p> <p>3.4 Measure the performance of personnel for following risk control procedures according to industry practice</p>
4. Evaluate risk control measures and maintain records	<p>4.1 Develop procedures for evaluating the effectiveness of risk control measures</p> <p>4.2 Identify shortfalls in procedures and document changes required</p> <p>4.3 Update procedures to reflect required changes according to industry best practice</p> <p>4.4 Develop and maintain record systems for risk assessment according to industry best practice and legislative and regulatory requirements</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

<b>Skill</b>	<b>Description</b>
Reading	<ul style="list-style-type: none"> <li>Critical analysis information and consolidate to determine risks in chemical control procedures</li> </ul>

Skill	Description
Writing	<ul style="list-style-type: none"> <li>Develop procedural material using clear and detailed language in order to convey explicit risk control information</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Present complex information using clear and convincing language, tone and pace appropriate when briefing personnel on procedures</li> </ul>
Navigate the world of work	<ul style="list-style-type: none"> <li>Work independently or with others in making decisions to achieve organisation outcomes</li> <li>Contribute to roles and responsibilities of others</li> <li>Take full responsibility for following policies, procedures and legislative requirements</li> </ul>
Interact with others	<ul style="list-style-type: none"> <li>Implement strategies for a diverse range of colleagues in order to build rapport and foster strong relationships when instructing and monitoring performance</li> <li>Elicit feedback and provide feedback to others in order to improve workgroup behaviours and update procedures</li> </ul>
Get the work done	<ul style="list-style-type: none"> <li>Accept responsibility for planning and sequencing complex tasks and workload</li> <li>Monitor progress of procedures and reviews and amends them to meet demands and priorities</li> <li>Apply systematic and analytical decision making processes for complex and non-routine situations</li> </ul>

# Assessment Requirements for AHCCHM404 Develop procedures to minimise risks in the use of chemicals

## Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

## Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have developed procedures to minimise risks in the use of chemicals, including:

- sourced information and analysed its content for safe chemical use
- identified steps in the chemical use process and identified hazards and risks
- assessed the risks and developed risk control procedures to mitigate the risk for chemical use
- implemented procedures, monitored and evaluated personnel using procedures
- developed a continuous improvement strategy for risk control procedures
- implemented, monitored and evaluated a chemical risk control procedure
- developed and maintained records for risk assessment.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- sources of chemical safety information, including:
  - codes of practice
  - legislation and regulations
  - chemical manufacturer labels
  - safety data sheets (SDS)
- industry best practice requirements relating to chemical use
- strategies for identifying hazards, risks and controls
- risk factors, including:
  - human
  - animal health
  - product integrity

- weather
- residues and maximum residue levels
- spray drift, spillage and environment
- requirements for the disposal of excess chemicals, clearing spillages and equipment clean up
- chemical application equipment capabilities and limitations
- principles and practices of chemical handling, transporting and storage of chemicals and fumigants
- principles and practices of chemical application strategies and equipment including integrated pest management
- operational factors to consider in procedures, including:
  - transport, handling and storage
  - application methods, equipment and personal protective equipment (PPE)
  - cleaning and decontamination
  - disposal of waste
- strategies for instructing personnel, and monitoring and assessing personnel performance
- mandatory and workplace record keeping requirements for chemical storage, disposal, application and safety.

## Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - tools and equipment required to implement the chemical use procedure
  - PPE
- specifications:
  - specific workplace documents including policies and processes
  - manufacturers' operating instructions for equipment and machinery
  - SDS
  - workplace instructions and job specifications
  - chemical information including legislation, codes of practice, manufacturer instructions
- relationships:
  - team member(s).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## AHCCHM405 Plan and implement a chemical use program

### Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

### Application

This unit of competency describes the skills and knowledge required to assess and control the risks associated with chemical use and to plan and implement a program for chemical use.

The unit applies to individuals who take responsibility for their own work and provide direction to others. All work must be carried out to comply with workplace procedures, in accordance with applicable state/territory health and safety in the workplace, pesticide and environmental legislation and codes of practice.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Unit Sector

Chemicals (CHM)

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify requirements for chemical use	1.1 Identify, source and interpret information required for planning and implementing a chemical use program 1.2 Assess the need for chemical use as an option 1.3 Ensure that personnel are adequately trained in chemical use according to workplace procedures

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Assess risks and develop control procedures	2.1 Identify hazards, assess risks and develop control measures and emergency action plans for chemical use operational activities 2.2 Assess weather conditions and forecasts to determine implications for off target contamination 2.3 Assess the sensitivity of target area and impact of chemical on the environment according to chemical label instructions and safety data sheets (SDS) 2.4 Assess the risk to human and animal health according to chemical label instructions and SDS 2.5 Analyse assessments and document risk control procedures for the chemical application plan according to workplace procedures
3. Develop an operational and maintenance program for chemical use	3.1 Determine chemicals to be used according to workplace pest management strategy 3.2 Calculate mixing requirements for chemicals according to chemical label instructions and workplace procedures 3.3 Document operational checks and calibration requirements of equipment according to operators instructions and manufacturer specifications 3.4 Develop and implement an operational and maintenance strategy for application equipment and personal protective equipment according to health and safety practices 3.5 Document operational and maintenance procedures for chemical application plan according to workplace protocols
4. Implement and monitor chemical application plan	4.1 Provide personnel with chemical use procedures, and instruction on safety equipment for chemical application plan 4.2 Monitor adherence with safe practice for preparation and application of chemicals according to chemical application plan 4.3 Monitor adherence to procedures for handling, transport, storage, decontamination and disposal of chemicals according to chemical application plan 4.4 Monitor adherence to maintenance procedures according to chemical application plan 4.5 Monitor adherence to residue procedures for product and environment according to chemical application plan
5. Finalise work	5.1 Ensure excess chemicals are disposed of according to waste

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
activities in accordance with chemical application plan	management and environment procedures 5.2 Ensure required records are completed according to operational and workplace, health and safety procedures
6. Evaluate chemical application plan and records for continuous improvement	6.1 Develop procedures for evaluating the effectiveness of chemical application plan 6.2 Identify and document shortfalls in chemical application plan 6.3 Develop a continuous improvement strategy to rectify the chemical application plan

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

<b>Skill</b>	<b>Description</b>

# Assessment Requirements for AHCCHM405 Plan and implement a chemical use program

## Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

## Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have planned and implemented a chemical use program, including:

- sourced information and analysed its content for chemical application
- assessed the need for chemical use and ensured personnel are adequately trained in chemical use according to workplace procedures
- identified hazards, risks and provided controls, including personal protective equipment (PPE) for chemical application and off target impact
- assessed weather conditions and environmental sensitivity of the site
- documented chemical application and maintenance procedures according to workplace protocols
- determined chemicals required and mixing requirements according to workplace procedures and chemical label instructions
- develop a continuous improvement strategy to minimise risk
- communicated chemical application plan to personnel
- implemented procedures and monitored and evaluated personnel according to chemical application plan
- developed a continuous improvement strategy for chemical application plan
- implemented, monitored and evaluated a chemical application plan.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- source of information for developing plans, including:
  - legislation and regulations
  - codes of practice
  - chemical labels

- safety data sheets (SDS)
- industry requirements relating to chemical use
- strategies for identifying hazard, risks and controls
- risk factors, including:
  - human
  - animal health
  - product integrity
  - weather
  - residues and maximum residue levels
  - off target damage, spillage and environment
- principles of transport, handling and storing chemicals
- requirements for the disposal of excess chemicals, clearing spillages and equipment clean up
- chemical application equipment capabilities, limitations and calibration
- mixing chemicals, including:
  - rates
  - mixing order if more than one chemical
  - adjuvants
  - water quality
- life cycle of a variety of pests and the target stages
- implications of pest resistance to chemicals
- principles and practices of chemical application strategies and equipment including, integrated pest management and animal health strategies
- preparation and documentation of strategic plans and procedures
- signs of pest damage and signs of beneficial organisms
- operational factors to consider in a procedures, including:
  - transport, handling and storage
  - application methods, equipment and PPE
  - cleaning and decontamination
  - disposal of waste
- emergency procedures including first aid
- strategies for instructing personnel, and monitoring and assessing personnel performance
- mandatory and workplace record keeping requirements for chemical storage, disposal, application and safety.

## Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

Assessment of skills must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - tools and equipment required to implement the chemical application program
  - PPE
  - chemicals and relevant weighing and mixing equipment
- specifications:
  - specific workplace documents including policies and processes
  - manufacturers' operating instructions for chemicals, equipment and machinery
  - SDS
  - workplace instructions and job specifications
  - chemical information including legislation, codes of practice, chemical label instructions
- relationships:
  - team member(s) or work crew
- timeframes:
  - schedules and planned completion dates for a chemical application plan.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## Links

Companion Volumes, including Implementation Guides, are available at VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

## AHCLPW404 Produce maps for land management purposes

### Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

### Application

This unit of competency describes the skills and knowledge required to access geographical information and incorporate it onto maps for use in land management.

This unit applies to those whose job role includes preparing maps by hand or by using geographical information systems (GIS) for land management purposes.

This unit applies to individuals who have limited responsibilities for others in known and changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

### Pre-requisite Unit

Nil.

### Unit Sector

Lands, Parks and Wildlife (LPW)

### Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Obtain information for a specific land management purpose	1.1 Define information required from data sets 1.2 Collect and present information from stakeholders on land management and production systems consistent with the local

Element	Performance criteria
	area management strategy 1.3 Collect information to include temporal and spatial data 1.4 Review information for relevance and accuracy
2. Assess data availability	2.1 Ascertain availability of required data sets from internal and external sources 2.2 Confirm ownership of data and determine access and pricing 2.3 Obtain data in accordance with industry standards, statutory requirements and enterprise policy 2.4 Develop procedures to capture data
3. Assess data quality	3.1 Assess data for integrity and to determine suitability for task 3.2 Investigate and resolve disparities between data sets
4. Format and present data	4.1 Identify compatible formats for data 4.2 Assemble relevant data elements 4.3 Select data formats to meet user's requirements 4.4 Present information using suitable media 4.5 Present information in accordance with appropriate enterprise requirements and Australian standards
5. Incorporate data onto maps	5.1 Use range of computer applications to transfer information from various data sources onto maps 5.2 Produce draft maps showing spatial and temporal data consistent with development and implementation of the land management strategy 5.3 Review and edit maps to confirm accuracy and develop a map key to identify natural resource features, structures and land uses 5.4 Analyse maps for data to assist in development or implementation of land management plan
6. Review customer satisfaction	6.1 Seek feedback from users regarding satisfaction with information and presentation 6.2 Resolve any areas of dissatisfaction 6.3 Analyse and use customer feedback as a quality improvement tool

## Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Range of Conditions**

## **Unit Mapping Information**

This unit is equivalent to AHCLPW404A Produce maps for land management purposes.

## **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

# Assessment Requirements for AHCLPW404 Produce maps for land management purposes

## Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

## Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- source data sets that provide the required information
- validate the data for currency and compare to ground observations
- present data to workplace requirements
- incorporate data onto a map
- use drafting and editing processes to ensure accuracy of data and maps and to ensure reports and maps meet organisational standards
- provide a map key and any supporting information required
- evaluate maps for suitability for purpose and value in making land management decisions

## Knowledge Evidence

The candidate must demonstrate knowledge of:

- land management processes relevant to map being prepared
- mapping principles and conventions including layout, legends, scale, media, printing and presentation styles
- use of software and hardware such as GIS, computer-aided design (CAD), desktop publishing, desktop mapping, multimedia, graphic animation, plotters and printers

## Assessment Conditions

Assessors must satisfy current standards for RTOs.

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

## AHCPMG307 Apply animal trapping techniques

### Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

### Application

This unit of competency describes the skills and knowledge required to trap and hold live animals for release, transportation or destruction. Trapped animals can be native animals, domestic animals, animals determined to be pests or feral animals.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

### Pre-requisite Unit

Nil

### Unit Sector

Pest Management (PMG)

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for trapping	1.1 Identify purpose of animal capture and set objectives 1.2 Confirm the location and size of the area designated for trapping activities

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Confirm target animal movement patterns, behaviour and lifecycles to determine trapping location and placement of equipment and appropriate timing of trapping activity</p> <p>1.4 Identify potential non-target animals</p> <p>1.5 Estimate time required to complete trapping activities</p> <p>1.6 Identify and check method of transport, materials and equipment required for trapping</p> <p>1.7 Select appropriate traps for target animal and the environment</p> <p>1.8 Clean, maintain and prepare trapping equipment according to manufacturer specifications</p> <p>1.9 Identify hazards, risks and controls for trapping and select appropriate personal protective equipment</p> <p>1.10 Identify and manage environmental risks associated with trapping animals</p> <p>1.11 Obtain relevant approvals, permits and permission to carry out trapping activities</p> <p>1.12 Determine precautions for minimising trapping of non-target animals</p>
2. Place and set traps	<p>2.1 Undertake site surveillance prior to setting traps</p> <p>2.2 Select and prepare site to maximise opportunity for trapping target animals and minimise the chance of trapping non-target animals</p> <p>2.3 Position, set and calibrate trapping equipment and check it for operation and safety</p> <p>2.4 Apply lures, decoys, baits or toxins according to workplace procedures and permits</p> <p>2.5 Camouflage traps according to workplace procedures</p> <p>2.6 Apply precautions to prevent trapping of non-target animals</p> <p>2.7 Set traps according to legislative requirements and animal welfare codes of practice</p>
3. Check and remove traps	<p>3.1 Inspect traps at the required frequency</p> <p>3.2 Identify trapped animals then release, humanely destroy or prepare for transport according to trapping objectives and permits</p> <p>3.3 Handle captured animals humanely according to animal welfare codes of practice</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.4 Transport animals from site according to trapping objectives and animal welfare codes of practice 3.5 Observe health and safety in the workplace procedures and public safety requirements during trapping activities 3.6 Operate trap release mechanism safely and remove trap 3.7 Restore trap-site to its prior condition
4. Record data	4.1 Use global positioning system (GPS) loggers to record locations of trapped animals 4.2 Use recording instruments to record details of trapping activities according to trapping plan and workplace procedures
5. Clean and store equipment and material	5.1 Clean and store carcasses for research or other purposes 5.2 Clean and store equipment and materials according to safety data sheets, workplace and biosecurity procedures 5.3 Record target and non-target kills
6. Report completion of work	6.1 Report results of trapping activities and incidents according to workplace procedures

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

<b>Skill</b>	<b>Description</b>
Writing	<ul style="list-style-type: none"> <li>Accurately record and complete organisational documentation using clear language, and terminology when reporting and maintaining animal trapping records</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Perform basic mathematical calculations to determine and record trapping data and GPS locations</li> </ul>
Navigate the world of work	<ul style="list-style-type: none"> <li>Take responsibility for following explicit and implicit policies, procedures and legislative requirements</li> </ul>
Get the work done	<ul style="list-style-type: none"> <li>Take responsibility for planning, sequencing and prioritising tasks and workload for efficiency and effective trapping outcomes</li> </ul>

# Assessment Requirements for AHCPMG307 Apply animal trapping techniques

## Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

## Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have applied animal trapping techniques, including:

- determined objectives for trapping and confirmed target animal characteristics and trapping location and size
- estimated trapping period and identified, selected and prepared baits, equipment, traps and transport for trapping activities
- set and trapped animals humanely and released or destroyed animals according to workplace procedures and animal welfare code of practice
- identified presence of target and non-target animals
- identified environmental, health and safety in the workplace hazards, risks and applied controls according to workplace and environmental procedures
- checked method of transport, equipment and materials for serviceability and cleaned equipment before and after trapping activities
- selected, prepared and restored trapping site during trapping activities
- positioned, set, calibrated and checking trapping equipment according to workplace procedures
- applied lures or baits according to trapping plan
- selected, used and stored baits or toxins according to workplace procedures
- inspected traps in a timely manner and handled and euthanised captured animals in accordance with workplace procedures and animal welfare practices
- maintained records using global positioning system data
- summarised and presented trapping data and reports according to workplace procedures
- cleaned and stored equipment and carcasses using approved chemicals according to safety data sheets (SDS) and workplace procedures to minimise biosecurity risks.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- purpose for trapping the animal
- target animals and non-target animals
- target animal's range, movement patterns and behaviour and how to apply knowledge of these to selecting trapping location and equipment
- reproductive cycle of the target animal to determine appropriate timing of trapping activities
- food preferences, both general and local, of target animals
- capture and kill points for target animals
- traps and techniques for target animals
- permissions that may be required to undertake trapping
- principles relating to property, stock and duty of care when trapping
- precautions that need to be taken to minimise trapping of non-target animals
- trap camouflage materials and techniques
- trap types, setting and operating release to render them inactive
- health and safety in the workplace procedures that relate to trapping animals
- recording and reporting requirements
- use of decoys and lures
- baits or toxins types and preparation
- applicable state or territory legislation on the use and storage of baits or toxins
- applicable legislation on the capture and handling of animals
- suitable personal protective equipment
- transportation methods for captured animals.

## Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - live animals in the field
  - traps appropriate to trapping technique required
  - baits, lures or poisons relevant to trapping context
  - methods of transport relevant to trapping context
  - cleaning products
- specifications:

- workplace documents including plans, procedures, records and forms
- workplace instructions or briefs
- specific regulations and animal welfare codes of practice
- technical information and resources applicable to pest
- specific SDS
- relationships:
  - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

In addition, the following specific assessor requirements apply to this unit if firearms are used to destroy animals:

- must possess firearms licences
- appropriate experience in using firearms for pest control.

## **Links**

Companion Volumes, including Implementation Guides, are available at VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

## AHCPMG312 Apply poison baits for vertebrate pest control in rural and environmental landscapes

### Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

### Application

This unit of competency describes the skills and knowledge required to prepare pest animal baiting programs. This includes the safe preparation and distribution of poison baits for the control of vertebrate pest animals affecting the rural and natural environment according to legislative and regulatory requirements.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

### Pre-requisite Unit

Nil

### Unit Sector

Pest Management (PMG)

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify vertebrate pests' species and prepare a poison baiting program	1.1 Identify the pest animal species and abundance in target area 1.2 Assess the type, availability and mode of action of poison for control of pest animal species in target area

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Identify key aspects of pest animal species ecology, habitat use and control program objectives to determine the timing and extent of baiting program</p> <p>1.4 Assess public health, safety hazards, risks and regulatory restrictions for control options</p> <p>1.5 Assess environmental conditions and off target risk for control options</p> <p>1.6 Select appropriate control option, baiting technique, poison and delivery method appropriate for target pest species, location and landscape</p> <p>1.7 Prepare baiting program to maximise pest animal control objectives according to legislative and regulatory requirements</p> <p>1.8 Determine monitoring and reporting protocols to evaluate effectiveness of baiting program according to legislative and regulatory requirements</p>
2. Obtain and confirm approvals for accessing and using poison baits	<p>2.1 Identify necessary approvals and notification requirements for the location of the baiting program and poison use according to legislative and regulatory requirements and toxin/poison label requirements</p> <p>2.2 Access and complete documentation to gain approvals for use of poisons and baits according to workplace procedures and legislative and regulatory requirements</p> <p>2.3 Ensure approvals have been granted, received and filed according to workplace procedures and legislative and regulatory requirements</p> <p>2.4 Notify stakeholders of intended baiting program according to workplace procedures and legislative and regulatory requirements</p>
3. Prepare, transport and store baits	<p>3.1 Determine the type of bait, quantity and dose rate of poison for the pest control program according to poison label and legislative and regulatory requirements</p> <p>3.2 Select, ensure serviceability, fit and use personal protective equipment for baits according to chemical label and safety data sheets (SDS)</p> <p>3.3 Select suitable location to prepare poison bait according to workplace procedures and legislative and regulatory requirements, codes of practice or guidelines</p> <p>3.4 Prepare bait for the target species, bait substrate/material and poison according to label and legislative and regulatory requirements</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>3.5 Transport poisons and prepared baits according to legislative and regulatory requirements</p> <p>3.6 Prepare baits for storage according to baiting program requirements, type of bait and legislative and regulatory requirements</p> <p>3.7 Store the treated baits safely according to workplace procedures, legislative and regulatory requirements and poison label directions</p> <p>3.8 Clean and decontaminate bait preparation and distribution equipment according to operator instructions, SDS and legislative and regulatory requirements</p>
4. Distribute and monitor baits in target area	<p>4.1 Monitor and assess weather conditions and forecasts to ensure effective conditions for baiting to proceed</p> <p>4.2 Ensure notifications have been communicated and signage installed prior to baiting program according to legislative and regulatory requirements</p> <p>4.3 Identify health and safety hazards and risks and implement controls when handling and distributing baits according to workplace procedures, poison label directions and SDS</p> <p>4.4 Distribute baits in target area to maximise target pest access and minimise off target risk according to label directions and baiting program</p> <p>4.5 Monitor bait uptake and control outcomes in a timely manner according to baiting program requirements, poison label directions and legislative and regulatory requirements</p> <p>4.6 Clean up and dispose of baits according to poison label instructions, workplace procedures and legislative and regulatory requirements</p>
5. Recording and reporting on outcomes of baiting program	<p>5.1 Record and report safety and environmental incidents according to workplace procedures and legislative and regulatory requirements</p> <p>5.2 Record details of poison bait application and outcomes according to workplace procedures and legislative and regulatory requirements</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Read and interpret SDS, poison labels, operating instruction, applicable legislation and regulations and other documentation and consolidates information to determine baiting requirements</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Complete regulatory applications and forms for permissions according to legislation and regulations</li> <li>Accurately record and complete organisational and legislative records using clear language and terminology</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Perform mathematical calculations to determine bait size and quantity relevant to the vertebrate animal population and scale of the program</li> </ul>
Navigate the world of work	<ul style="list-style-type: none"> <li>Take responsibility for following policies, procedures and regulations</li> <li>Identify and implement poison label requirements</li> </ul>
Get the work done	<ul style="list-style-type: none"> <li>Take responsibility for planning, sequencing and prioritising tasks required for baiting activities</li> </ul>

# Assessment Requirements for AHCPMG312 Apply poison baits for vertebrate pest control in rural and environmental landscapes

## Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

## Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to apply poison baits for vertebrate pest animals in a rural or natural environmental landscape ensuring they have:

- identified pest animal species and abundance
- identified and assessed the availability, mode of action of poison and their application for control of vertebrate pest animal species
- identified and selected the poison and baits required for the target pest and calculated the requirements for bait size according to poison label and regulatory requirements
- determined the timing for undertaking a baiting program in consideration of target animal ecology, behaviour, location and landscape
- identified the various approaches to baiting for pest animal species and selects most appropriate form of baiting for target pest animal species and environment
- assessed environmental and off target hazards and risks
- developed a poison baiting program and monitoring protocol suitable for pest control objectives for target vertebrate pest and location
- identified and accessed legislative and regulatory forms and made application for approvals to access and implement a poison baiting program
- confirmed approvals and notified stakeholders of poison baiting program
- assessed health and safety in the workplace hazards, risks and implemented control procedures for applying and handling poison baits according to poison label, safety data sheets (SDS), legislative and regulatory requirements, and workplace procedures
- used personal protective equipment for all poison bait activities
- prepared baits for target species in a suitable location
- prepared bait for storage and stored the bait safely ready for distribution according to poison label and workplace procedures
- monitored and assessed weather to ensure effective baiting conditions according to workplace procedures and poison label
- transported baits according to legislative requirements

- installed signage and distributed baits ensuring effective target access and minimising off target risks according to baiting program
- monitored bait stations in a timely manner according to poison label and baiting program
- cleaned equipment, spills, and disposed of waste and baits according to workplace and environmental procedures, SDS and poison labels
- maintained records and reported incidents according to workplace procedures and legislative and regulatory requirements.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- vertebrate pests and their impact on the rural and environmental landscape
- vertebrate pesticides, toxins or poisons to control and manage pest animal species, including:
  - types
  - origin
  - mode of action
  - application
- application and use of pesticides in vertebrate animal baiting program
- baiting techniques for the delivery of vertebrate pesticide toxins or poisons to target species in a baiting program
- regulatory conditions for the use of vertebrate pesticides in pest animal baiting programs, including:
  - legal implications
  - requirements of poisons labels
  - role of SDS
  - regulated poisons including Schedule 7
- federal, state or territory guidelines and codes of practice for the preparation and use of poison baits for pest animals
- types and characteristics of vertebrate pests and their impact on the human and natural environment, including:
  - life cycle
  - effect on farms and farmland
  - effect on natural ecosystem and landscape
  - effect on the urban environment
- options for controlling vertebrate pests for a control program, including:
  - poison baiting
  - fumigation
  - habitat destruction
  - concussive (explosive) force
  - trapping

- shooting
- fencing
- Integrated Pest Management
- guard animals
- aversions
- bait techniques and technologies, including:
  - grains
  - meat
  - fruits and vegetables
  - bait stations
  - baiting trails
  - replacement baiting programs
  - canid pest ejectors
  - aerial baiting
- legislation, regulations and licensing requirements in relation to access and use of poisons and poison baits, including:
  - application process for permits and licencing
  - roles and responsibilities of land owners, pest controllers and government agencies for using poison baits
- stakeholders and required notifications including, neighbours, staff and statutory notifications
- bait distribution techniques and considerations, including:
  - impact of weather
  - pest species and their habits
  - breeding cycle
  - feeding and caching (storing) behaviours
  - watering behaviours
- predation risk to rural and environmental assets being protected
- building baiting program into farm or park management activities
- factors that contribute to off target risks, including:
  - proximity to urban and peri urban environment
  - domestic animal behaviours
  - pest animal interactions
  - native birds and animal activities
- hazards of poisons and their application, including:
  - human and animal health
  - environmental contamination
  - residues in environment, plants and animals
  - timing for checking bait stations/sites
- safety requirements when handling, treating and distributing poisonous baits, including:

- procedures
- personal protective equipment
- signage
- preparing poisonous baits, including:
  - bait types
  - sizes
  - preparation before and after treatment
  - equipment and methods of treating baits
- safe handling, transport and storage of treated baits and poison concentrates
- requirements for disposal of waste poison and baits, clearing spillages and equipment clean up.

## Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - poison baits
  - personal protective equipment
- specifications:
  - workplace documents including work instructions and procedures for bait distribution and planning
  - poison labels and SDS
  - legislation and regulations relevant to the use of poisons and poison baits
  - access to weather forecasts or means to measure local weather.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## Links

Companion Volumes, including Implementation Guides, are available at VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

# AHCPMG409 Implement a pest management plan

## Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

## Application

This unit of competency describes the skills and knowledge required to implement pest management plans for weeds, vertebrate or invertebrate pests.

The unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgment in the selection, allocation and use of available resources.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

## Pre-requisite Unit

Nil

## Unit Sector

Pest Management (PMG)

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify and allocate resources for the pest management plan	1.1 Determine operational parameters and objectives in consultation with management 1.2 Determine site operational parameters through site inspection 1.3 Consult stakeholders to provide advice and secure support on pest

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>management activities</p> <p>1.4 Identify budgetary allocations and determine the effect on resources and activities</p> <p>1.5 Identify health and safety, environmental and biosecurity hazards and risks and determine controls</p> <p>1.6 Select and allocate pest management activities to personnel according to planned health and safety in the workplace standards, legislation</p> <p>1.7 Procure machinery, equipment, tools and materials identified in the plan according to health and safety in the workplace standards and legislation</p>
2. Brief personnel on pest management plan activities	<p>2.1 Inform personnel of the requirements and expectations of the pest management plan according to workplace procedures</p> <p>2.2 Advise personnel of health and safety in the workplace standards and legislative and regulatory requirements to be applied when carrying out required activities</p>
3. Implement the pest management plan	<p>3.1 Ensure machinery, equipment, tools and materials are checked and serviceable</p> <p>3.2 Ensure personal protective equipment is serviceable, fitted and used by personnel according to health and safety in the workplace procedures</p> <p>3.3 Manage pest control techniques according to pest management plan</p> <p>3.4 Monitor procedures and processes employed by personnel for compliance with health and safety in the workplace procedures, animal welfare and environmental guidelines</p> <p>3.5 Provide feedback, advice and coaching to personnel according to workplace procedures</p>
4. Coordinate contingency management activities	<p>4.1 Review and reschedule activities not completed according to workplace procedures</p> <p>4.2 Notify personnel and stakeholders of changes to the schedule according to workplace procedures</p>
5. Report progress in relation to pest management plan	<p>5.1 Review reports and records supplied by personnel and assess performance against pest management plan</p> <p>5.2 Document and compile reports and records according to workplace</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	procedures 5.3 Provide regular progress reports to stakeholders according to workplace procedures and reporting schedule

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

<b>Skill</b>	<b>Description</b>
Reading	<ul style="list-style-type: none"> <li>Critically analyse plans, reports and records and consolidate information to determine pest control actions</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Document outcomes and changes to plans and generates reports using industry relevant and recognised terminology</li> </ul>

# Assessment Requirements for AHCPMG409 Implement a pest management plan

## Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

## Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they can implement a pest management plan, including:

- determined all operational parameters and objectives and identified the budgetary allocations, health and safety in the workplace, biosecurity, human and operational resources required for the pest management plan
- supervised others to meet health and safety in the workplace, legislative and regulatory requirements in their work
- procured and ensured machinery, equipment tools and materials met operational and statutory requirements
- communicated with stakeholders and personnel on pest management activities
- supervised others to carry out pest management work according to the pest management plan and provided feedback, advice and coaching
- informed and advise personnel on duties and expected standards
- reviewed and rescheduled works and notified stakeholders of changed schedules
- reviewed and compiled outcomes of pest management plan and prepared reports to stakeholders on progress.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pest management plans their structure and implementation
- factors affecting the selection of pest control methods and techniques, including:
  - pest biology and lifecycle
  - potential diseases and toxicity

- principles of sustainability
- herbicide resistance and the alternatives that are available
- pest status in the context of location, land use, benefits and damage caused
- pest management control programs and how to use them in an integrated manner, including:
  - key concepts of integrated pest management as a strategy
- contingency management principles
- risk assessment and management processes
- legal responsibilities of stakeholders including landowners
- local, regional, state and national pest management strategies
- federal, state or territory legislation and regulations relating to pest management activities
- the basic concepts and underpinning principles of the strategic approach to invasive pest management and how to manage damage caused by pests
- the basic principles and importance of monitoring and evaluating the effectiveness of invasive pest management and how to plan and implement an appropriate monitoring program for a pest management plan
- common causes of failure in pest management
- requirements for ensuring the welfare of animals described in relevant codes of practice
- relevant environmental and pesticides legislation as they apply to the workplace
- developing operational parameters and objectives, timelines and milestones
- reporting and recording requirements for the various stakeholders
- scheduling workload and developing work plans.

## Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - live pest animals
  - tools and equipment required to implement the plan
  - personal protective equipment
  - baits and poisons
- specifications:
  - workplace documents including policies, procedures, processes
  - pest management plan
  - manufacturers' operating instructions for specific equipment and machinery
  - specific safety data sheets
  - workplace instructions and job specifications
  - specific legislation/codes of practice
- relationships:

- clients
- team member(s)/work crew
- supervisors/management
- timeframes:
  - schedules and planned completion dates for a pest management plan.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## Links

Companion Volumes, including Implementation Guides, are available at VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

## AHCPMG413 Define the pest problem

### Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

### Application

This unit of competency describes the skills and knowledge required to apply a strategic pest management approach to define a weed, vertebrate or invertebrate pest problem for a target area.

The unit applies to individuals who use consultation and analysis to define the pest problem. They exercise autonomy in undertaking complex work and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Unit Sector

Pest Management (PMG)

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish the background to the target pest problem	1.1 Determine landscape and land use within target area 1.2 Consult with stakeholders to identify and record views and issues for target pest

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Define desired environmental management and production outcomes</p> <p>1.4 Collect and record information about management or production processes relating to pest problem</p> <p>1.5 Determine non-target species populations in target area according to ecological data</p>
2. Analyse the target pest problem in the area	<p>2.1 Establish and document stakeholder views on the distribution of target pest within affected area</p> <p>2.2 Source and analyse information to validate stakeholder views for target pest population, damage, and distribution</p> <p>2.3 Identify environmental and pest biology factors which influence the target pest population and distribution</p> <p>2.4 Document the target pest lifecycle, optimum times, locations and behaviours that impact program effectiveness</p> <p>2.5 Identify non-target species populations and distribution</p> <p>2.6 Identify hazards, risks and controls for non-target species, environment, ecology and production in target area</p> <p>2.7 Identify potential ecological role of target pest</p>
3. Determine critical control points for management of the target pest problem	<p>3.1 Determine timing of control activities for periods of least risk to off target activities and conditions</p> <p>3.2 Identify periods of significant vulnerability during target pest lifecycle</p> <p>3.3 Determine appropriate time period for pest management activity</p>
4. Define and document the impacts of the target pest	<p>4.1 Estimate economic losses and environmental impacts of the pest presence</p> <p>4.2 Conduct a cost-benefit analysis of managing pest in accordance with workplace plans</p> <p>4.3 Prepare a report on outcomes of investigation for stakeholders according to workplace procedures</p> <p>4.4 Assess whether the pest problem warrants the need for a pest management plan</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Critically analyse documents and data from a variety of sources and consolidates information to determine requirements for management plans</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Document outcomes of consultations and incorporates details into report</li> <li>Document report using industry relevant terminology, structure and format</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Perform mathematical calculations to analyse costs and values to accurately create a cost benefit analysis</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Determine and confirm client views and opinion using collaborative and inclusive techniques including active listening and questioning and reading of verbal and non-verbal signals to convey and clarify information and to confirm understanding</li> </ul>
Navigate the world of work	<ul style="list-style-type: none"> <li>Work independently or with others in making decisions to achieve organisation outcomes</li> <li>Take full responsibility for following, procedures and legislative requirements</li> </ul>
Get the work done	<ul style="list-style-type: none"> <li>Accept responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others taking into account capabilities, efficiencies and effectiveness</li> <li>Apply systematic and analytical decision-making processes for complex and non-routine situations</li> </ul>

## Assessment Requirements for AHCPMG413 Define the pest problem

### Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

### Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have produced a written report that details the pest problem in a target area, including:

- identified and consulted with stakeholders
- collected information on pest impact and defined the pest problem in consultation with stakeholders
- determined the target pest population and distribution and factors impacting population and distribution
- determined non-target species populations and distribution in area
- accessed and analysed information to validate pest impact
- identified appropriate times for pest control activities and identified and documented pests' characteristics that impact on program effectiveness
- conducted a cost-benefit analysis for managing target pest
- prepared a report and assessed the viability for a pest management plan for pest population
- identified environmental impact of pest presence and pest management activity.

### Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- impact of pests on environment, land use, land management and production processes
- behaviour of target pests, particularly those behaviours that impact pest susceptibility to being effectively managed
- animal welfare and related codes of practice and workplace procedures

- pest biology and lifecycles of target pests
- principles that underpin the strategic approach to managing pests
- land management and production processes of targeted area
- ecology of targeted area
- performance criteria for measuring land management and production outcomes
- techniques used to validate the target pest population and distribution data supplied by stakeholders and sources of relevant data
- measuring or estimating economic implication and environmental impacts of pests
- potential ecological role some pests provide
- potential disease or toxicity risks
- relevant parts of local, regional, state or territory and national pest management strategies
- factors that influence pest population and distribution
- periods of vulnerability in the lifecycle of pests
- critical control points for management of pest problem
- range of pests, non-target species, plant pests and diseases.

## Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - site with pests to evaluate
  - technology and resources for documenting reports and cost benefit analysis
- specifications:
  - workplace documents including policies, procedures, processes
  - research materials and data for pests
  - workplace instructions and job specifications
  - specific legislation and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## Links

Companion Volumes, including Implementation Guides, are available at VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

# AVIY3075 Control remote pilot aircraft systems in normal flight

## Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

## Application

This unit involves the skills and knowledge required to control remote pilot aircraft systems (RPAS) in normal flight, in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority and national operating standards.

It includes climbing the RPAS, maintaining straight and level flight and turning the RPAS in flight. It also includes controlling RPAS speed in flight, descending the RPAS, performing RPAS landing approaches, and complying with airspace requirements.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and ground personnel, and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew RPAS environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Use for Defence Aviation is to be in accordance with relevant Defence Orders, Instructions, Publications and Regulations.

## Pre-requisite Unit

Not applicable.

## Competency Field

Y – Aircraft Operation and Traffic Management

## Unit Sector

Not applicable.

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### 1 Climb RPAS

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Clarity of flight path is observed and risks are mitigated in accordance with workplace procedures
- 1.2 RPAS climb checks are completed in accordance with workplace policies and procedures
- 1.3 Adjustments are made to attitude and power to achieve an increase of altitude at shallow, normal and steep rates and cruise conditions of flight, during straight and turning manoeuvres as required
- 1.4 RPAS is maintained in trim condition as required
- 1.5 RPAS is levelled off at or below 400 feet above ground level (AGL)
- 1.6 Situational awareness, lookout and air traffic separation are maintained in accordance with workplace procedures and regulatory requirements

#### 2 Maintain straight and level flight

- 2.1 Power, altitude and configuration are set to achieve straight and level flight as required
- 2.2 RPAS is maintained in trim condition as required
- 2.3 Visible signs or electronic indications of height change are identified and responded to appropriately
- 2.4 Visible signs or electronic indications of heading change are identified and responded to appropriately
- 2.5 Clarity of flight path is observed and risks are mitigated in accordance with workplace procedures
- 2.6 Situational awareness, lookout and air traffic separation are maintained in accordance with workplace procedures and regulatory requirements

- 3 Turn RPAS in flight**
- 3.1 RPAS operating limits are maintained during turns in accordance with workplace procedures and manufacturer instructions
  - 3.2 Situational awareness, lookout and air traffic separation are maintained during turns
  - 3.3 Potential hazards are identified and controlled during turns
- 4 Control RPAS speed in flight**
- 4.1 Height awareness is maintained during slow speed flight
  - 4.2 Recovery to cruise speed is achieved while maintaining height during flight
- 5 Descend RPAS**
- 5.1 Adjustments are made to altitude and power to achieve a decrease of altitude at shallow, normal and steep rates as required
  - 5.2 RPAS is maintained in trim condition as required
  - 5.3 RPAS is levelled from a descent position at a nominated altitude in accordance with workplace policies and procedures, and manufacturer instructions
  - 5.4 Clarity of flight path is observed during RPAS descent and risks are mitigated in accordance with workplace procedures
  - 5.5 RPAS operating limits are controlled during descent in accordance with workplace procedures and manufacturer instructions
  - 5.6 Descent checks are completed in accordance with workplace procedures and regulatory requirements
  - 5.7 Situational awareness, lookout and air traffic separation are maintained in accordance with regulatory requirements and workplace procedures
- 6 Perform RPAS landing approaches**
- 6.1 Approaches are conducted in accordance with operations manual procedures appropriate to the RPAS type, with allowance for wind velocity
  - 6.2 All mandated checklists are completed and communications procedures are followed
  - 6.3 Traffic conflict or adverse flight conditions are recognised and a go-around/position–hold is performed from any position in the approach and landing pattern

- 6.4 Radio listening watch is maintained in accordance with established procedures and regulatory requirements
- 6.5 RPAS is configured for landing in accordance with workplace procedures and manufacturer instructions
- 7 Comply with airspace requirements**
- 7.1 Compliance is maintained at all times with air traffic requirements and controlled or restricted airspace conditions or limitations
- 7.2 Safe progress of flight is ensured at all times
- 7.3 Awareness of RPAS position is maintained at all times
- 7.4 Radio listening watch is maintained in accordance with established procedures and regulatory requirements
- 7.5 Weather conditions are monitored and responded to appropriately accordance with regulatory requirements, and workplace policies and procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Procedures for maintaining airspace compliance requirements must include:

- determining geographical limits of flight area on a chart or electronic display
- identifying prominent geographical features using a chart
- determining position of controlled airspace using a chart and geographical features
- identifying restricted areas using a chart and geographical features

## Unit Mapping Information

This unit replaces and is equivalent to AVIY3075A Control remote pilot aircraft (RPA) in normal flight.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for AVIY3075 Control remote pilot aircraft systems in normal flight

## Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- applying the techniques of straight and level, climbing and descending flight
- communicating effectively with others when controlling the remote pilot aircraft systems (RPAS) in normal flight, including using a radio
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS)/occupational health and safety (OHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- maintaining compliance with regulatory requirements
- maintaining separation between air traffic
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing various functions simultaneously as required
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- remaining within a designated area while complying with airspace and air traffic requirements
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace
- responding appropriately to cultural differences
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards

- using instruments to monitor RPAS performance
- working collaboratively with others when controlling the RPAS in normal flight, including when using a radio
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- aeronautical decision-making processes
- effect of angle of bank and load factor on stall speeds as applicable
- effect of wind on RPAS flight path
- effective communications
- error management, including error types, causes and consequences
- fatigue risk management
- functions and effects of all RPAS controls
- go-around/position hold procedures
- human performance and its limitations, including the senses, memory and situational awareness
- in a Defence context, relevant Defence Orders and Instructions
- post launch checks
- pre-recovery checks
- principles of aerodynamics
- procedures for setting power in engines
- relevant sections of Civil Aviation Regulations and Orders
- RPAS circuit patterns and procedures
- stress, workload and time pressure management
- use of autopilot/flight director functions
- use of instruments to monitor RPAS performance
- use of navigation sensors and equipment
- use of trim controls
- WHS/OHS and environmental procedures and regulations.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include

requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

## BSBADM409 Coordinate business resources

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to determine and analyse existing and required resources, their effective application and the accountability for their use.

It applies to individuals with a broad knowledge of business resources who contribute well developed skills and knowledge to ensure adequate resources are available to perform the work of the organisation. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Administration – General Administration

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Determine resource requirements	1.1 Determine resource requirements in accordance with business and operational plans and organisational requirements 1.2 Provide opportunities to individuals and workgroups to contribute to the identification of resource requirements 1.3 Ensure resource expenditure is realistic and makes efficient use of available budget resources 1.4 Present recommendations on resource requirements in the

ELEMENT	PERFORMANCE CRITERIA
	required format, style and structure using relevant business equipment and technology
2 Acquire and allocate resources	<p>2.1 Acquire physical resources and services in accordance with organisational requirements</p> <p>2.2 Check resources to ensure quality and quantity are in line with service agreements</p> <p>2.3 Allocate resources promptly to enable achievement of workgroup objectives</p> <p>2.4 Ensure consultation with individuals and teams on allocation of resources is participative and is conducted using appropriate interpersonal skills</p>
3 Monitor and report on resource allocation and usage	<p>3.1 Measure effectiveness of resource planning and assess against actual costs, identified shortfalls and surpluses</p> <p>3.2 Develop and implement methods of monitoring resource use to enable timely and accurate reporting against business and operational plans</p> <p>3.3 Identify improvements in resource planning through consultation and feedback, and implement in accordance with organisational requirements</p> <p>3.4 Maintain records concerning equipment and resource purchases in accordance with organisational requirements</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 2.2, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> <li>Identifies and interprets information from organisational plans, policies and procedures</li> </ul>
Writing	1.4, 2.1, 3.1-3.4	<ul style="list-style-type: none"> <li>Develops a range of documents using structure and vocabulary appropriate to audience, context and purpose</li> </ul>
Oral Communication	1.2, 2.4, 3.3	<ul style="list-style-type: none"> <li>Participates effectively in spoken interactions using active listening and questioning to confirm and clarify understanding</li> </ul>

Numeracy	1.3, 2.2, 3.1, 3.2	<ul style="list-style-type: none"> <li>Interprets and comprehends a range of mathematical information that is embedded in familiar texts</li> <li>Calculates and compares numeric data to track expenditure</li> </ul>
Navigate the world of work	1.1, 2.1, 3.3, 3.4	<ul style="list-style-type: none"> <li>Recognises and responds to explicit and implicit organisational procedures and protocols and legislative/regulatory requirements</li> </ul>
Interact with others	1.2, 1.4, 2.4, 3.3	<ul style="list-style-type: none"> <li>Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role</li> <li>Cooperates with others as part of familiar routine activities playing an active role in facilitating group interaction</li> </ul>
Get the work done	1.1, 1.3, 1.4, 2.1, 2.2, 2.3, 3.1, 3.2	<ul style="list-style-type: none"> <li>Applies formal processes when planning complex tasks, producing plans with logically sequenced steps, reflecting an awareness of time constraints</li> <li>Recognises and takes responsibility for addressing predictable problems in familiar work contexts</li> <li>Utilises a range of features within digital applications to access, store and share information</li> <li>Reflects on the ways in which variables impact on decision outcomes to identify improvement opportunities</li> </ul>

# Assessment Requirements for BSBADM409 Coordinate business resources

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- monitor resource usage
- maintain records of resource requirements and usage
- calculate costs and expenditures in relation to use and maintenance of business resources
- acquire and allocate physical resources and services to team members
- consult and communicate with individuals and teams about acquiring and using resources
- monitor, review and report on resource use acquisition, allocation, use and procedures
- follow organisational policies and procedures in relation to business resource acquisition and monitoring.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the functions of business equipment used in an organisation and identify common faults
- identify organisational policies, plans and procedures in relation to business resource acquisition and monitoring.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to:

- records relating to business resources
- policies and procedures relating to resources

- case studies, and where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBADM502 Manage meetings

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to manage a range of meetings including overseeing the meeting preparation processes, chairing meetings, organising the minutes and reporting meeting outcomes.

It applies to individuals employed in a range of work environments who are required to organise and manage meetings within their workplace, including conducting or managing administrative tasks in providing agendas and meeting material. They may work as senior administrative staff or may be individuals with responsibility for conducting and chairing meetings in the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Administration – General Administration

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Prepare for meetings	1.1 Develop agenda in line with stated meeting purpose 1.2 Ensure style and structure of meeting are appropriate to its purpose 1.3 Identify meeting participants and notify them in accordance with organisational procedures

ELEMENT	PERFORMANCE CRITERIA
	1.4 Confirm meeting arrangements in accordance with requirements of meeting 1.5 Despatch meeting papers to participants within designated timelines
2 Conduct meetings	2.1 Chair meetings in accordance with organisational requirements, agreed conventions for type of meeting and legal and ethical requirements 2.2 Conduct meetings to ensure they are focused, time efficient and achieve the required outcomes 2.3 Ensure meeting facilitation enables participation, discussion, problem-solving and resolution of issues 2.4 Brief minute-taker on method for recording meeting notes in accordance with organisational requirements and conventions for type of meeting
3 Follow up meetings	3.1 Check transcribed meeting notes to ensure they reflect a true and accurate record of the meeting and are formatted in accordance with organisational procedures and meeting conventions 3.2 Distribute and store minutes and other follow-up documentation within designated timelines, and according to organisational requirements 3.3 Report outcomes of meetings as required, within designated timelines

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 3.1, 3.2	<ul style="list-style-type: none"> <li>Identifies and interprets information from complex texts including legislation, organisational policies and procedures</li> <li>Compares final output with original notes to check for accuracy</li> </ul>
Writing	1.1-1.5, 3.2, 3.3	<ul style="list-style-type: none"> <li>Addresses the context, purpose and audience when generating a range of texts</li> <li>Prepares complex texts from notes using appropriate</li> </ul>

		<p>structure, and accurate spelling, grammar and punctuation</p> <ul style="list-style-type: none"> <li>Records notes of meeting proceedings according to organisational requirements</li> <li>Edits and corrects own work to ensure accuracy</li> </ul>
Oral Communication	2.1-2.4	<ul style="list-style-type: none"> <li>Participates in verbal exchanges using appropriate style, tone and vocabulary for audience, context and purpose</li> <li>Listens for specific information during meetings</li> <li>Asks questions and listens to responses to clarify understanding</li> </ul>
Numeracy	1.4, 1.5, 3.2, 3.3	<ul style="list-style-type: none"> <li>Recognises and interprets numerical information related to timeframes and budgets</li> </ul>
Navigate the world of work	1.3, 2.1, 2.4, 3.1, 3.2	<ul style="list-style-type: none"> <li>Recognises and responds to both explicit and implicit organisational procedures and protocols and legislative/regulatory requirements</li> </ul>
Interact with others	1.3, 1.5, 2.3, 3.2	<ul style="list-style-type: none"> <li>Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role</li> <li>Cooperates with others as part of familiar activities, playing an active role in facilitating group interaction</li> </ul>
Get the work done	1.1, 1.3, 1.4, 1.5, 2.1, 2.2, 2.4, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> <li>Applies formal processes when planning complex tasks, producing plans with logically sequenced steps, reflecting an awareness of time constraints</li> <li>Recognises and takes responsibility for addressing predictable problems in familiar work contexts</li> </ul>

## Assessment Requirements for BSBADM502 Manage meetings

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- apply conventions and procedures for formal and informal meetings including:
  - developing and distributing agendas and papers
  - identifying and inviting meeting participants
  - organising and confirming meeting arrangements
  - running the meeting and following up
- organise, take part in and chair a meeting
- record and store meeting documentation
- follow organisational policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline meeting terminology, structures, arrangements
- outline responsibilities of the chairperson and explain group dynamics in relation to managing meetings
- describe options for meetings including face-to-face, teleconferencing, web-conferencing and using webcams
- identify the relevant organisational procedures and policies regarding meetings, chairing and minutes including identifying organisational formats for minutes and agendas.

### Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to:

- reference material in regard to meeting venues and technology, catering and transport suppliers
- organisational policies and procedures for managing meetings
- office supplies and equipment
- computers and relevant software
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to develop a media plan within a given budget, by defining requirements, selecting media vehicles and determining a schedule.

It applies to individuals working in a supervisory or management advertising role within an advertising team or media organisation. It may also apply to someone working within a direct marketing role, who is responsible for planning media requirements for direct marketing campaigns or offers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Business Development – Advertising

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Define media requirements	1.1 Identify target audience characteristics from advertising brief and prepare a detailed consumer profile which uses the same terms as those used to describe media audiences  1.2 Analyse product market factors to determine reach and frequency requirements of advertising media selected  1.3 Analyse creative requirements of advertising message and determine media implications

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Identify media merchandising requirements from the advertising brief</p> <p>1.5 Confirm media budget and identify legal and voluntary constraints</p>
2 Select media vehicles	<p>2.1 Weigh up relative merits of identified media vehicle alternatives, taking past media performance into account</p> <p>2.2 Evaluate and test new or alternative media vehicles with other advertisers and against proven vehicles</p> <p>2.3 Select media vehicles that target the required audience, meet media requirements and fulfil merchandising requirements within budget</p> <p>2.4 Select media vehicles that meet creative, reach and frequency requirements of the advertising message to be achieved within budget</p> <p>2.5 Ensure selected media vehicles meet legal and ethical requirements</p>
3 Determine media schedule	<p>3.1 Ensure duration and timing of media schedule meet requirements of the advertising brief</p> <p>3.2 Determine distribution of messages over duration of schedule to meet requirements of the advertising brief</p> <p>3.3 Create a media schedule to satisfy advertiser</p> <p>3.4 Develop alternative media schedules for advertiser within budget</p> <p>3.5 Determine testing schedule for the media plan and continually modify media plan in accordance with results obtained</p>
4 Produce media plan	<p>4.1 Create media plan which defines media requirements of the advertising brief and provides evidence supporting each requirement</p> <p>4.2 Specify recommended media and vehicle/s, and rationale for their selection in the media plan</p> <p>4.3 Ensure media plan contains a budget allocation per medium per advertising period</p> <p>4.4 Identify anticipated impact of advertising and measures to assess its effectiveness in the media plan</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.5, 3.1, 3.2	<ul style="list-style-type: none"> <li>Identifies, analyses and evaluates complex texts to determine requirements of advertising brief, and legislative, regulatory and business requirements</li> </ul>
Writing	1.1, 3.1, 3.3-3.5, 4.1, 4.2	<ul style="list-style-type: none"> <li>Writes in a range of styles to suit job requirements and different audiences</li> </ul>
Oral Communication	3.3	<ul style="list-style-type: none"> <li>Uses appropriate techniques, including active listening and questioning, to convey and clarify information</li> </ul>
Numeracy	1.1, 1.5, 2.3, 4.3, 4.4	<ul style="list-style-type: none"> <li>Analyses and processes complex data to determine schedules and budget</li> </ul>
Navigate the world of work	1.5, 2.5	<ul style="list-style-type: none"> <li>Takes full responsibility for following implicit and explicit voluntary constraints related to budget, legal and ethical requirements in selection of media vehicles</li> </ul>
Get the work done	1.1-1.4, 2.1-2.4, 3.1-3.5, 4.1, 4.4	<ul style="list-style-type: none"> <li>Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes</li> <li>Analyses relevant information to inform decisions about media requirements to conform to the brief</li> <li>Utilises continuous improvement and testing strategies to ensure effectiveness of final media plan</li> <li>Uses familiar digital technologies and systems to enter data, organise and present information</li> </ul>

## Assessment Requirements for BSBADV507 Develop a media plan

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- produce a media plan for an advertisement which:
  - defines media requirements of an advertising brief
  - specifies rationales for media vehicles chosen
  - ensures media schedule meets requirements of the brief
  - contains budgetary allocation for each advertising medium
- develop measures to assess effectiveness of media vehicles selected.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline and explain data analysis and matching techniques
- list organisational products and services offered
- identify organisational budget and resource constraints
- identify principles and characteristics of advertising media, types of media and advertising strategies
- identify and explain key provisions of relevant legislation, codes of practice and national standards affecting business operations
- identify and explain ethical principles relating to advertising industry
- define terms for describing media audiences.

### Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – advertising field of work and include access to:

- relevant legislation and codes of practice
- organisational policies and procedures
- industry software
- office equipment
- business technology.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBAUD402 Participate in a quality audit

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to prepare for and participate in a quality audit as a member of a quality audit team. The types of audits may include external or internal systems audits or process or product/service audits.

The process includes reviewing designated documentation; identifying and developing checklists and audit related documentation; preparing audit schedules; gathering, analysing and evaluating information; and reporting findings to the lead auditor.

It applies to individuals with a broad knowledge of the quality auditing environment who analyse and evaluate information from a variety of sources to provide solutions to auditing issues, including unpredictable quality auditing problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Regulation, Licensing and Risk – Quality Auditing

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Review auditee documentation	1.1 Where applicable, review auditee's previous quality audits to establish possible impact on the conduct of the current audit 1.2 Request relevant organisational documents from auditee, and

ELEMENT	PERFORMANCE CRITERIA
	review and check the adequacy of these documents 1.3 Amend reviewed documents, and determine and source any further documentation required 1.4 Resolve issues which arise with auditee and relevant parties
2 Participate in developing audit schedules	2.1 Access or prepare appropriate checklists/tools and audit related documentation 2.2 Confirm schedules and required resources with auditee before beginning auditing activities 2.3 Anticipate possible issues and outline strategies to address these issues, should they arise 2.4 Ensure preparation activities and documentation correspond to the audit plan 2.5 In consultation with auditing team, determine appropriate methods and techniques 2.6 Assist lead auditor in creating entry and exit meeting agendas
3 Gather and analyse information	3.1 Access a range of potential sources of information 3.2 Collect and make an initial assessment of sample documentation 3.3 Interview appropriate persons in relation to relevant documentation 3.4 Identify and report patterns, trends, interrelationships and areas of risk 3.5 Identify aspects of the audit that require the use of specialists and request appropriate assistance
4 Evaluate information	4.1 Evaluate information against prescribed benchmarks 4.2 Form a defensible opinion as to the meeting of these benchmarks by the auditee 4.3 Ensure opinions are formed from and supported by available information
5 Report findings	5.1 Formulate findings and prepare a corrective action report if discrepancies or non-compliances are detected 5.2 Examine results/findings against audit objectives and present to lead auditor 5.3 Report recommendations for improvements as applicable
6 Participate in exit	6.1 Prepare for exit meeting

ELEMENT	PERFORMANCE CRITERIA
meeting	<p>6.2 Ensure reporting arrangements are agreed upon and documented during the meeting</p> <p>6.3 Ensure context and consequences of audit are explained, and follow-up is discussed</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1, 2.2, 2.4, 2.6, 3.1-3.5, 4.1, 4.3, 5.1, 5.2	<ul style="list-style-type: none"> <li>Identifies and interprets information from organisational documentation and workplace procedures</li> </ul>
Writing	1.2, 1.3, 2.1, 2.2, 2.4, 2.6, 3.2-3.5, 4.1, 4.3, 5.1-5.3, 6.2	<ul style="list-style-type: none"> <li>Records or amends information and conveys details in accordance with audit objectives</li> </ul>
Oral Communication	1.2, 1.4, 2.2, 2.5, 2.6, 3.3, 3.5, 5.2, 5.3, 6.2, 6.3	<ul style="list-style-type: none"> <li>Participates in spoken exchanges using structure and language to suit the audience</li> <li>Listens for required information and asks clarifying questions</li> </ul>
Numeracy	2.5, 3.1, 3.2, 3.4, 4.1-4.3, 5.1, 5.2	<ul style="list-style-type: none"> <li>Uses a wide range of mathematical calculations to analyse and arrange numeric information</li> </ul>
Navigate the world of work	1.1, 1.2	<ul style="list-style-type: none"> <li>Adheres to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment</li> </ul>

# Assessment Requirements for BSBAUD402 Participate in a quality audit

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- review and amend all relevant documentation
- develop an audit schedule using relevant tools and strategies
- use various methods to gather data and information to complete an audit, seeking specialist advice where appropriate
- use predetermined benchmarks to evaluate findings and formulate well-founded opinions
- develop a comprehensive report for the exit meeting, which analyses both context and consequences of the completed audit
- use terminology relating to quality auditing in written or oral communications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe relevant auditing codes of practice or ethics
- outline auditing methods and techniques
- summarise current audit practices
- identify current industry products and/or services to assist in the auditing process.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk – quality auditing field of work and include access to:

- workplace documentation including previous quality audit reports, checklists, risk management plans and audit plans.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBAUD501 Initiate a quality audit

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to initiate and organise a quality audit with an auditee. It covers assessing the scope and objectives of a quality audit; communicating with the auditee regarding the proposed quality audit; identifying resources required to conduct the audit; and developing and submitting a quality audit plan. The types of audits may include external or internal systems audits or process or product/service audits.

It applies to individuals with a well-established theoretical knowledge base in quality auditing who are proficient in using a wide range of specialised, quality auditing and managerial techniques to plan, carry out and evaluate a quality audit. Individuals also supervise and monitor the processes and outcomes of others working in a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Regulation, Licensing and Risk – Quality Auditing

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Assess quality audit scope and objectives	1.1 Determine and discuss audit objectives with the auditee, client and all other relevant parties  1.2 Determine and discuss scope of the quality audit with the auditee, client and all other relevant parties

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Identify relevant standards that impact the environment in which the audit operates</p> <p>1.4 Determine scope commensurate with identified risks</p>
2 Communicate with auditee regarding proposed quality audit	<p>2.1 Determine audit history, organisational structure and culture through consultation with the auditee</p> <p>2.2 Negotiate and ensure agreement with auditee, the proposed audit methods and techniques to be applied</p> <p>2.3 Outline audit processes to establish sequence of audit activities, and the roles of the auditors and auditees in the process</p>
3 Identify resources required to conduct quality audit	<p>3.1 Identify resources required to perform the quality audit efficiently and effectively</p> <p>3.2 Select audit team members on the basis of relevant expertise</p> <p>3.3 Confirm availability of resources required to conduct the audit with auditee</p> <p>3.4 Assign roles and responsibilities to audit team members</p>
4 Develop and submit quality audit plan	<p>4.1 Develop quality audit plan according to established scope and objectives</p> <p>4.2 Assign timing, schedules and responsibilities for implementation of the audit plan</p> <p>4.3 Develop audit priorities and ensure agreement with auditees and audit team members</p> <p>4.4 Document and submit audit plan to auditee</p>
5 Prepare audit team	<p>5.1 Inform audit team members of their responsibilities, audit objectives and scope</p> <p>5.2 Communicate audit plan and schedules to all audit team members</p> <p>5.3 Discuss and clarify audit methods and techniques with audit team members</p>
6 Review auditee documentation	<p>6.1 Review auditee's previous audits to establish possible impact on the conduct of the current audit</p> <p>6.2 Review and check relevant organisational documents for accuracy</p> <p>6.3 Resolve arising problems with auditee and relevant parties</p>
7 Identify and prepare checklists and audit	<p>7.1 Develop checklists to reflect audit scope and objectives</p>

ELEMENT	PERFORMANCE CRITERIA
related documentation	7.2 Develop or obtain documentation required for the audit 7.3 Prepare agenda for entry meeting 7.4 Include value-adding activities in audit related documentation where required

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.3, 4.1, 6.1, 6.2, 7.1	<ul style="list-style-type: none"> <li>Interprets and analyses information from organisational documentation</li> </ul>
Writing	4.1-4.4, 6.2, 7.1-7.4	<ul style="list-style-type: none"> <li>Develops a range of documents using structure, tone and vocabulary appropriate to audience, context and purpose</li> <li>Records or amends information and conveys details in accordance with audit objectives</li> </ul>
Oral Communication	1.1, 1.2, 2.1-2.3, 4.3, 5.1-5.3, 6.3	<ul style="list-style-type: none"> <li>Participates in spoken exchanges using structure and language to suit the audience</li> <li>Uses questioning and listening techniques to clarify requirements</li> </ul>
Numeracy	4.2	<ul style="list-style-type: none"> <li>Uses mathematical calculations for project scheduling</li> </ul>
Navigate the world of work	1.3	<ul style="list-style-type: none"> <li>Monitors adherence to organisational policies and relevant standards and considers own role in terms of its contribution to broader goals of the work environment</li> </ul>
Interact with others	1.1, 1.2, 2.1, 2.2, 3.4, 4.4, 5.1, 5.2	<ul style="list-style-type: none"> <li>Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role</li> <li>Recognises the importance of building rapport and building effective working relationships</li> <li>Collaborates with others to negotiate acceptable outcomes, playing an active role in facilitating effective group interaction</li> </ul>
Get the work done	1.1, 1.2, 1.4, 2.1, 2.3, 3.1, 3.2, 4.1,	<ul style="list-style-type: none"> <li>Organises, plans and sequences own workload and schedules work activities of others</li> <li>Uses analytical processes to decide on a course of</li> </ul>

	4.2, 4.3, 6.1, 6.3	<p>action, establishing criteria for deciding between options and seeking advice from others before taking action when necessary</p> <ul style="list-style-type: none"> <li>Addresses some unfamiliar problems of increasing complexity within own scope, recognising when to seek the expertise of others</li> </ul>

## Assessment Requirements for BSBAUD501 Initiate a quality audit

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- produce documented audit plans for auditees across a variety of contexts including:
  - the scope and objectives of the audit
  - proposed audit methods and techniques to be used
  - required resources and schedules
  - allocation of individual audit team member responsibilities for conducting the proposed audit.
- use terminology relating to quality auditing in written or oral communications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the relevant auditing codes of practice or ethics
- describe auditing methods and techniques
- outline the requirements of auditing regulations and standards
- identify current audit practices
- outline quality auditing principles, techniques and systems
- describe the requirements of house or other style manual protocols for written communications
- identify software applications relevant to quality auditing activities.

### Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk – quality auditing field of work and include access to:

- workplace documentation including previous quality audit reports, checklists, risk management plans and audit plans.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBAUD503 Lead a quality audit

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to lead an audit team as it runs a quality audit. It covers conducting entry and exit meetings; identifying and gathering relevant information; managing audit team resources; and providing feedback to audit team members on their performance. The types of quality audit that may be covered by this unit include an external or internal systems audit or process or product/service audit.

It applies to individuals with a well-established theoretical knowledge base of quality auditing, who are proficient in using a wide range of specialised quality auditing and managerial techniques to carry out their own work and to supervise the quality audit team. It is relevant to audits where a lead auditor is responsible for a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Regulation, Licensing and Risk – Quality Auditing

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Conduct entry meeting	1.1 Organise entry meeting in advance at a mutually agreed time 1.2 Prepare agenda for audit 1.3 Confirm objectives and scope of audit at entry meeting 1.4 Confirm schedules and logistical arrangements at entry

ELEMENT	PERFORMANCE CRITERIA
	meeting 1.5 Make changes to plan, schedules and arrangements where required
2 Identify and gather information	2.1 Identify a range of potential sources of information 2.2 Interview appropriate persons 2.3 Gather relevant information and sample documentation
3 Manage audit team resources	3.1 Supervise activities of audit team members 3.2 Assess and review audit team findings in line with audit scope 3.3 Re-assign team members as required 3.4 Instigate contingency actions as required 3.5 Seek and reach agreement on corrective action reports
4 Conduct exit meeting	4.1 Make preparations for exit meeting 4.2 Examine results and findings against audit objectives and present to auditee 4.3 Ensure reporting arrangements are agreed on 4.4 Explain context and consequences of audit and discuss during follow-up
5 Guide team members in continuously improving their performance	5.1 Provide feedback on performance to audit team members 5.2 Encourage and support audit team members to critique their own work 5.3 Provide and document advice for individual improvement

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	3.2, 4.2	<ul style="list-style-type: none"> <li>Interprets and analyses information from audit scoping materials</li> </ul>
Writing	1.2, 1.5, 5.3	<ul style="list-style-type: none"> <li>Develops a range of documents using relevant structure, tone and vocabulary appropriate to audience,</li> </ul>

		<p>context and purpose</p> <ul style="list-style-type: none"> <li>Records or amends information and conveys details in accordance with audit objectives</li> </ul>
Oral Communication	1.3, 1.4, 2.2, 3.5, 4.2-4.4, 5.1, 5.2, 5.3	<ul style="list-style-type: none"> <li>Participates in spoken exchanges using clear language, tone and pace</li> <li>Uses questioning and listening techniques to clarify requirements</li> </ul>

## BSBAUD504 Report on a quality audit

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to report on the outcomes of a quality audit and to take appropriate follow up action. It covers compiling audit results; preparing a report for the auditee/client; negotiating follow up action with the auditee/client; and monitoring and reviewing the auditing system and activities. The types of quality audit that may be covered by this unit include an external or internal systems audit or process or product/service audit.

It applies to individuals with a well-established theoretical knowledge base in quality auditing who are proficient in using a wide range of specialised quality auditing and managerial techniques to carry out their own work and to supervise the quality audit team. It addresses the function performed by either an auditor having sole responsibility for the audit or a lead auditor of a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Regulation, Licensing and Risk – Quality Auditing

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Compile audit results	1.1 Compare results of the audit evaluation against audit objectives and criteria plan

ELEMENT	PERFORMANCE CRITERIA
	1.2 Analyse audit results
2 Prepare report	2.1 Provide objective evidence relating to the need for reduction, elimination and prevention of non-conformance as the basis for the audit report 2.2 Produce audit report according to specified audit requirements 2.3 Present audit report to auditee and other stakeholders
3 Negotiate follow up process with auditee	3.1 Determine and initiate any corrective action required to deal with non-conformance, in consultation with auditee 3.2 Provide suggestions for improvements where applicable 3.3 Ensure timelines are agreed on for completion of corrective action activities 3.4 Ensure corrective action follow-up procedures are agreed with auditee
4 Monitor and review audit system and activities	4.1 Evaluate effectiveness and suitability in achieving audit objectives 4.2 Investigate possible improvements in audit methods, economy and efficiency

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 4.1	<ul style="list-style-type: none"> <li>Interprets and analyses information from a complex range of organisational documentation</li> </ul>
Writing	2.1, 2.2, 4.1	<ul style="list-style-type: none"> <li>Develops a variety of complex documents using relevant structure, tone and vocabulary appropriate to audience, context and purpose</li> </ul>
Oral Communication	2.3, 3.1-3.4	<ul style="list-style-type: none"> <li>Participates in spoken exchanges using clear language, tone and pace</li> <li>Uses questioning and listening techniques to clarify understanding</li> </ul>
Numeracy	1.1, 1.2, 3.3, 4.2	<ul style="list-style-type: none"> <li>Collects, represents, summarises and interprets a range of statistical data</li> </ul>

# Assessment Requirements for BSBAUD504 Report on a quality audit

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- interpret audit results and produce a detailed audit report containing detailed analysis according to specified requirements
- negotiate follow-up actions with auditees/clients
- determine future improvements in auditing methods
- use terminology relating to quality auditing in written or oral communications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe quality auditing principles, methods and techniques
- outline the requirements of auditing regulations and standards
- identify current audit practices
- identify software applications relevant to conducting quality auditing activities.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk – quality auditing field of work and include access to:

- workplace documentation including quality audit reports, checklists, risk management plans and audit plans.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBCMM401 Make a presentation

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0

### Application

This unit covers the skills and knowledge required to prepare, deliver and review a presentation to a target audience.

This unit applies to individuals who may be expected to make presentations for a range of purposes, such as marketing, training and promotions. They contribute well developed communication skills in presenting a range of concepts and ideas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Communication – Interpersonal Communication

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Prepare a presentation	<p>1.1 Plan and document presentation approach and intended outcomes</p> <p>1.2 Choose presentation strategies, format and delivery methods that match the characteristics of the target audience, location, resources and personnel needed</p> <p>1.3 Select presentation aids, materials and techniques that suit the format and purpose of the presentation, and will enhance audience understanding of key concepts and central ideas</p>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	<p>1.4 Brief others involved in the presentation on their roles/responsibilities within the presentation</p> <p>1.5 Select techniques to evaluate presentation effectiveness</p>
2 Deliver a presentation	<p>2.1 Explain and discuss desired outcomes of the presentation with the target audience</p> <p>2.2 Use presentation aids, materials and examples to support target audience understanding of key concepts and central ideas</p> <p>2.3 Monitor non-verbal and verbal communication of participants to promote attainment of presentation outcomes</p> <p>2.4 Use persuasive communication techniques to secure audience interest</p> <p>2.5 Provide opportunities for participants to seek clarification on central ideas and concepts, and adjust the presentation to meet participant needs and preferences</p> <p>2.6 Summarise key concepts and ideas at strategic points to facilitate participant understanding</p>
3 Review the presentation	<p>3.1 Implement techniques to review the effectiveness of the presentation</p> <p>3.2 Seek and discuss reactions to the presentation from participants or from key personnel involved in the presentation</p> <p>3.3 Utilise feedback from the audience or from key personnel involved in the presentation to make changes to central ideas presented</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Reading	1.1, 1.2, 1.3, 2.2	<ul style="list-style-type: none"> <li>Reviews and analyses documents to identify information relevant to a specific presentation</li> </ul>
Writing	1.1, 3.3	<ul style="list-style-type: none"> <li>Develops material to convey ideas and information to target audience in an engaging way</li> </ul>
Oral	1.4, 2.1, 2.2, 2.3,	<ul style="list-style-type: none"> <li>Presents information using words and non-verbal features appropriate to the audience and context</li> </ul>

Communication	2.4, 2.5, 2.6, 3.2	<ul style="list-style-type: none"> <li>• Uses listening and questioning techniques to gather information required to develop or modify presentations</li> <li>• Interprets audience reactions and changes words or non-verbal features accordingly</li> </ul>
Interact with others	1.4, 2.1, 2.2, 2.4, 2.5, 2.6, 3.2	<ul style="list-style-type: none"> <li>• Selects and uses appropriate conventions and protocols to encourage interaction or to present information</li> <li>• Demonstrates sophisticated control over oral, visual and written formats, drawing on a range of communication practices to achieve goals</li> <li>• Recognises the need to alter personal communication style in response to the needs or expectations of others</li> </ul>
Get the work done	1.1-1.5, 2.2, 2.5, 3.1-3.3	<ul style="list-style-type: none"> <li>• Takes responsibility for planning, sequencing and prioritising tasks and own workload to achieve outcomes</li> <li>• Uses feedback from others, analytical and lateral thinking to review current practices and develop new ideas</li> <li>• Uses the main features and functions of digital tools to complete work tasks</li> </ul>

# Assessment Requirements for BSBCUE309 Develop product and service knowledge for customer engagement operation

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- use a range of sources to identify key features and benefits of products and services within area of business
- prepare information for customer engagement in compliance with legal and organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe features, benefits, strengths and weaknesses of a range products or services available in the organisation
- outline organisational policies and procedures relevant to customer engagement activities
- identify processes used to describe products or services
- describe ethical principles and key provisions of relevant legislation, codes of practice and national standards affecting customer engagement operations.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations – customer engagement field of work and include access to:

- relevant legislation, codes of practice and national standards
- information sources about an organisation’s products, services or ideas
- office equipment and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

## Assessment Requirements for BSBCUS401 Coordinate implementation of customer service strategies

### Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0.  Version created to clarify assessment conditions
Release 1	This version first released with Business Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- identify the needs and priorities of the organisation in delivering services to customers
- diagnose problems in delivery of customer service
- respond to and report on customer feedback and complaints
- review client satisfaction using verifiable data
- consult and communicate effectively with relevant people
- develop and implement strategies and methods to improve customer service delivery including:
  - budgeting
  - promotion to staff
  - documentation and follow up.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the principles of customer service
- explain sources of information and techniques for identifying customer needs and reviewing customer satisfaction
- explain the organisational business structure, products and services related to customer service
- describe product and service standards and best practice models.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment
- business technology
- organisational policies and procedures for customer service
- examples of customer complaints and feedback
- client satisfaction data
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBCUS402 Address customer needs

### Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0  Version created to clarify assessment conditions
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to manage an ongoing relationship with a customer over a period of time. This includes helping customers articulate their needs and managing networks to ensure customer needs are addressed.

It applies to individuals who are expected to have detailed product knowledge in order to recommend customised solutions. In this role, individuals would be expected to apply organisational procedures and be aware of, and apply as appropriate, broader factors involving ethics, industry practice and relevant government policies and regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Stakeholder Relations – Customer Service

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Assist customer to articulate needs	1.1 Ensure customer needs are fully explored, understood and agreed 1.2 Explain and match available services and products to customer

ELEMENT	PERFORMANCE CRITERIA
	needs 1.3 Identify and communicate rights and responsibilities of customers to the customer as appropriate
2 Satisfy complex customer needs	2.1 Explain possibilities for meeting customer needs 2.2 Assist customers to evaluate service and/or product options to satisfy their needs 2.3 Determine and prioritise preferred actions 2.4 Identify potential areas of difficulty in customer service delivery and take appropriate actions in a positive manner
3 Manage networks to ensure customer needs are addressed	3.1 Establish effective regular communication with customers 3.2 Establish, maintain and expand relevant networks to ensure appropriate referral of customers to products and services from within and outside the organisation 3.3 Ensure procedures are in place to ensure that decisions about targeting of customer services are based on up-to-date information about the customer and the products and services available 3.4 Ensure procedures are put in place to ensure that referrals are based on the matching of the assessment of customer needs and availability of products and services 3.5 Maintain records of customer interaction in accordance with organisational procedures

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.3, 2.2, 2.3, 2.4, 3.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> <li>Interprets textual information obtained from a range of sources and determines how content may be applied to individuals and to organisational requirements</li> </ul>
Writing	1.1, 3.1, 3.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> <li>Prepares written reports, up-to-date procedures and other workplace documentation that communicate complex information clearly and effectively</li> </ul>
Oral	1.1, 1.2, 1.3, 2.1,	<ul style="list-style-type: none"> <li>Clearly articulates customer's needs using language suitable to diverse audiences and employs listening</li> </ul>

Communication	2.2, 3.1, 3.2	and questioning techniques to confirm understanding
Navigate the world of work	3.5	<ul style="list-style-type: none"> <li>Recognises and applies organisational protocols and meets expectations associated with own work</li> </ul>
Interact with others	1.1-1.3, 2.1, 2.2, 3.1, 3.2	<ul style="list-style-type: none"> <li>Selects and uses appropriate communication techniques to establish and maintain positive working relationships</li> <li>Establishes connections and shares information with others who can contribute to effective work outcomes</li> </ul>
Get the work done	2.3, 2.4, 3.3-3.5	<ul style="list-style-type: none"> <li>Develops and implements plans for routine and non-routine tasks recognising the importance of aligning goals and expectations to achieve outcomes</li> <li>Recognises and takes responsibility for addressing predictable and non-predictable problems in own work context</li> <li>Uses digital systems to organise and store information relevant to own work</li> </ul>

# Assessment Requirements for BSBCUS402 Address customer needs

## Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0  Version created to clarify assessment conditions
Release 1	This version first released with Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- communicate effectively with customers including
  - helping customers to articulate their needs and evaluate options
  - explaining products/services and how they match customer needs
  - establishing regular communication
  - explaining customer rights and responsibilities
- address customer's needs
- use organisational procedures to document customer satisfaction
- develop and maintain networks to support meeting customer needs
- identify potential difficulties in meeting customer needs and taking appropriate action.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain organisational procedures and standards for establishing and maintaining customer service relationships

- describe informed consent
- explain consumer rights and responsibilities
- describe ways to establish effective regular communication with customers
- outline details of products or services including with reference to:
  - possible alternative products and services
  - variations within a limited product and service range.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment and resources
- business technology
- organisational policies, procedures, quality systems, manuals and guidelines for customer management
- examples of products/services and promotional strategies
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBFIA301 Maintain financial records

## Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- maintain daily transactions and identify and respond to discrepancies and errors
- transfer and record financial data accurately
- reconcile expenditures and revenue in a timely manner.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the key provisions of relevant legislation, codes of practice and national standards that may affect financial record keeping
- discuss organisational policies and procedures relating to maintaining financial records
- define credits/creditors and debits/debtors
- describe principles of double entry bookkeeping and accrual accounting
- identify methods of presenting financial data.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial administration field of work and include access to:

- office equipment and resources
- computer equipment and relevant software
- examples of source documents relating to financial record keeping
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBFIA304 Maintain a general ledger

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to maintain a computerised or manual general ledger system within an organisation, including processing journal entries and preparing a trial balance.

It applies to individuals employed in a range of work environments with responsibility for simple accounting functions within an organisation. They may work as individuals providing administrative support within an enterprise, or may be other members of staff with delegated responsibilities relating to general ledger maintenance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Finance – Financial Administration

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Process journal entries	1.1 Prepare general journal entries from source journals in accordance with accounting requirements, organisational policy, procedures and legislative accounting standards 1.2 Post journal entries into general ledger system in accordance with organisational policy, procedures and accounting standards 1.3 Reconcile accounts payable and accounts receivable subsidiary

ELEMENT	PERFORMANCE CRITERIA
	ledger systems with general ledger 1.4 Ensure processing maintains the accounting equation and is completed within designated timelines
2 Prepare a trial balance	2.1 Prepare trial balance of general ledger system in accordance with organisational requirements and accounting standards, and ensure it is checked for accuracy 2.2 Identify and rectify irregularities or refer them for resolution when trial balance does not balance, in accordance with organisational policy and procedures

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1, 2.2	<ul style="list-style-type: none"> <li>Interprets a range of textual information to determine all job requirements</li> </ul>
Writing	1.1-1.3, 2.1, 2.2	<ul style="list-style-type: none"> <li>Integrates data from different sources and records numerical information in a suitable format for context and purpose of material</li> <li>Uses factual and suitable financial language to refer issues and inconsistencies in data</li> </ul>
Oral Communication	2.2	<ul style="list-style-type: none"> <li>Explains issues clearly using industry-specific and factual vocabulary</li> </ul>
Numeracy	1.1-1.3, 2.1, 2.2	<ul style="list-style-type: none"> <li>Uses a limited range of mathematical calculations to reconcile amounts and arrange/compare numerical information</li> </ul>
Navigate the world of work	1.1, 1.2, 2.1, 2.2	<ul style="list-style-type: none"> <li>Recognises, understands and applies applicable industry standards and organisational policies and procedures in the conduct of own work</li> </ul>
Interact with others	2.2	<ul style="list-style-type: none"> <li>Recognises the strengths and expertise of others and seeks their assistance as required</li> </ul>

# Assessment Requirements for BSBFIA304 Maintain a general ledger

## Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- accurately enter data
- reconcile subsidiary ledger systems with general ledger and prepare a trial balance
- implement double-entry principles
- systematically trace errors or refer them to appropriate people
- complete all tasks in accordance with accounting principles, legal and organisational responsibilities, and within scope of own responsibility.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list key provisions of relevant legislation and regulations, standards and codes of practice that may affect aspects of financial operations
- briefly describe the organisational accounting systems and procedures
- explain how to check for errors or discrepancies
- list and describe tasks that are outside own scope of responsibility.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial administration field of work and include access to:

- office equipment and resources
- computer equipment and relevant software

- examples of source journals
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBFIA402 Report on financial activity

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to report financial activity for business both in response to client requests and to meet statutory requirements such as the completion of financial reports.

This unit applies to individuals with a broad knowledge of financial activities who contribute financial skills and knowledge to address reporting requirements of clients and legal authorities. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Finance – Financial Administration

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Compile financial information and data	1.1 Collect, evaluate and code current financial data to ensure consistency, quality and accuracy in accordance with organisational requirements 1.2 Use conversion and consolidation procedures to compile analysis in accordance with organisational requirements 1.3 Make, record and disclose asset and liability valuations in

ELEMENT	PERFORMANCE CRITERIA
	<p>accordance with organisational requirements</p> <p>1.4 Ensure that discrepancies, unusual features or queries are identified, resolved or referred to the appropriate authority</p>
2 Prepare statutory requirement reports	<p>2.1 Correctly record income and expenditure to ensure compliance with statutory requirements</p> <p>2.2 Calculate liabilities for tax in accordance with current legislation and revenue gathering practices</p> <p>2.3 Correctly identify relevant receipts, revenue documentation and payments</p> <p>2.4 Ensure that statements and claims take full advantage of available benefits and allowances in accordance with statutory requirements</p> <p>2.5 Submit statutory requirement reports to appropriate authorities within stated deadlines</p>
3 Provide financial business recommendations	<p>3.1 Ensure that recommendations are logically derived and supported by evidence in report</p> <p>3.2 Provide recommendations to propose constructive actions to enhance the effectiveness and efficacy of functions and services</p> <p>3.3 Ensure recommendations are concise and facilitate direction and control of organisation's operations</p> <p>3.4 Identify and prioritise significant issues in statements including comparative financial performances for review and decision making</p> <p>3.5 Ensure structure and format of reports are clear and conform to organisational and statutory requirements</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1-2.5, 3.1-3.5	<ul style="list-style-type: none"> <li>Compares and analyses information from a range of sources varying in complexity to determine and complete financial requirements</li> </ul>
Writing	1.1-1.4, 2.1, 2.2, 2.4,	<ul style="list-style-type: none"> <li>Records numerical and textual information incorporating required financial language organising</li> </ul>

	2.5, 3.1-3.5	data in a manner that supports the format and purpose of the document
Oral Communication	1.4, 3.2, 3.3	<ul style="list-style-type: none"> <li>• Presents financial issues and requirements clearly, succinctly and based on own findings using language appropriate to audience and environment</li> <li>• Exchanges and obtains information from others by listening and questioning</li> </ul>

## BSBFIA412 Report on financial activity

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

### Application

This unit describes the skills and knowledge required to prepare financial reports in line with statutory reporting requirements. It encompasses compiling and analysing data.

This unit applies to individuals that are required to apply specialised knowledge and analytical skills to prepare financial reports as part of their job role.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the BSB Business Services Training Package Companion Volume Implementation Guide or the relevant regulator for specific guidance on regulatory requirements.

### Unit Sector

Finance – Financial Administration

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Compile and analyse financial data	1.1 Collect, evaluate and code current financial data to ensure consistency, quality and accuracy in accordance with organisational requirements 1.2 Use conversion and consolidation procedures to compile data in accordance with organisational requirements 1.3 Make, record and disclose asset and liability valuations in compliance with accounting standards

ELEMENT	PERFORMANCE CRITERIA
	1.4 Ensure that discrepancies, unusual features or queries are identified, resolved or referred to the appropriate authority 1.5 Identify and record effects of taxation
2. Prepare reports	2.1 Correctly record income and expenditure to ensure compliance with statutory requirements 2.2 Correctly identify relevant receipts, revenue documentation and payments 2.3 Prepare reports according to statutory and ethical requirements, and organisational procedures relating to conflict of interest, confidentiality, and disclosure statements 2.4 Present charts, diagrams, tables and supporting data in required format 2.5 Review statements and data for errors and compliance with statutory requirements and organisational procedures, and amend as required 2.6 Submit statutory requirement reports to appropriate authorities within stated deadlines
3. Provide financial business recommendations	3.1 Review recommendations and ensure they are logically derived and supported by evidence 3.2 Provide recommendations to enhance the effectiveness of functions and services 3.3 Ensure recommendations are concise and relevant to the direction and control of organisational operations 3.4 Identify and prioritise significant issues in statements including comparative financial performances for review and decision making 3.5 Ensure structure and format of reports are clear and conform to organisational and statutory requirements

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Compares and analyses information from a range of sources varying in complexity to determine and complete financial requirements</li> </ul>

Writing	<ul style="list-style-type: none"> <li>Records numerical and textual information incorporating required financial language organising data in a manner that supports the format and purpose of the document</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Presents financial issues and requirements clearly, succinctly and based on own findings using language appropriate to audience and environment</li> <li>Exchanges and obtains information from others by listening and questioning</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Establishes criteria and categories for financial management purposes and monitors activities on a regular basis</li> <li>Uses a wide range of mathematical calculations to interpret and arrange/compare numerical information in order to comply with requirements</li> </ul>

# Assessment Requirements for BSBFIA412 Report on financial activity

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

## Performance Evidence

Evidence of the ability to:

- organise and present financial data to highlight relevant features and meet workplace requirements including:
  - budget variances
  - budgets and forecasts
  - cash flow/profit reports
  - balance sheets
  - financial year reports
  - operating statements
  - expenditure and receipts
  - profit and loss statements
- use conversion and consolidation procedures such as moving averages, standardised variables, trend analysis and unit costs
- identify, resolve or refer discrepancies such as:
  - absence of auditable trail
  - expenditure report mismatches
  - incorrect payments and unreconciled cash flows
- record income and expenditure to meet statutory requirements
- calculate liabilities for tax including completing Business Activity Statements, where applicable
- provide financial business recommendations
- apply knowledge of relevant legislation and regulations
- perform double entry bookkeeping and accrual accounting.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- key provisions of legislation, regulation and codes of practice relevant to financial operations
- key techniques used for forecasting and analysis
- key features of the options, methods and practices for deductions, benefits and depreciations
- current business taxation requirements for preparing corporate accounting reports
- current financial legislation and statutory requirements relating to taxable transactions and reporting requirements
- ethical requirements associated with preparing financial reports for corporate entities, including conflict of interest, confidentiality, and disclosure requirements
- industry-standard methods and formats used to present financial data.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial administration field of work and include access to:

- office equipment and resources
- computer with relevant software
- examples of financial data, reports and documents
- workplace financial policies and procedures
- case studies and, where possible, real situations in the workplace.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBFIM501 Manage budgets and financial plans

## Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- use financial skills to work with and interpret budgets, ageing summaries, cash flow, petty cash, Goods and Services Tax (GST), and profit and loss statements
- communicate with relevant people to clarify budget/financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record keeping requirements for the Australian Taxation Office (ATO) and for auditing purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic accounting principles
- identify and explain the relevant legislation and current requirements of the Australian Taxation Office, including the Goods and Services Tax (GST)
- explain the key requirements for financial record keeping and auditing
- describe the principles and techniques involved in managing:
  - budgeting
  - cash flows
  - electronic spreadsheets

- GST
- ledgers and financial statements
- profit and loss statements.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- resources and documentation used in the workplace
- workplace policies and procedures
- workplace budgets and financial plans
- business technology
- case studies and, where available, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

## Assessment Requirements for BSBFLM303 Contribute to effective workplace relationships

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Performance Evidence

Evidence of the ability to:

- access and analyse information to achieve planned outcomes
- apply techniques for resolving problems and conflicts and dealing with poor performance within organisational and legislative requirements
- review and improve workplace outcomes in consultation with relevant personnel
- adjust interpersonal style and communications to respond to cultural and social diversity
- apply relationship management and communication skills with a range of people that:
  - demonstrate integrity, respect, empathy and cultural sensitivity and promote trust
  - forge effective relationships with internal and/or external people and help to maintain these networks
  - encourage participation and foster contribution of and respect for ideas and feedback
  - provide support to colleagues to resolve difficulties.
- communicate ideas and information to diverse audiences
- develop networks and build team relationships.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of how work relationships and the cultural and social environment can support or hinder achieving planned outcomes
- explain techniques for developing positive work relationships and building trust and confidence in a team
- identify relevant legislation from all levels of government that affects business operation

- describe a range of methods and techniques for communicating information and ideas to a range of stakeholders
- outline problem solving methods
- explain methods to resolve workplace conflict
- explain methods to manage poor work performance
- explain how to monitor, analyse and introduce ways to improve work relationships.
