CPPCCL2002A Use bonnet cleaning

Release: 1

CPPCCL2002A Use bonnet cleaning

Modification History

Revised unit Unit updated and equivalent to PRMCC02A Use bonnet cleaning

Unit Descriptor

This unit of competency specifies the outcomes required to bonnet clean carpet to achieve a clean surface appearance. Bonnet cleaning is recommended as a maintenance cleaning procedure. Bonnet cleaning is not normally used to replace extraction cleaning. The unit requires the ability to assess the extent of the cleaning task through understanding client requirements and carpet characteristics, and to apply company policies and procedures in order to perform the task. The selection of appropriate equipment, chemicals and methods is essential for performing the task safely and efficiently.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. The work may be performed in teams or individually. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

	Assess area to be cleaned.	1.1	Area to be cleaned is assessed, <i>work order</i> is reviewed according to <i>company requirements</i> , and issues are clarified with <i>appropriate persons</i> .
		1.2	<i>Hazards</i> and risks in work site are identified and controlled according to company, <i>legislative</i> and <i>occupational health and safety</i> (OHS) <i>requirements</i> .
		1.3	Type, condition and colour-fastness of <i>carpet</i> are identified by observation and/or <i>testing</i> according to company requirements.
		1.4	<i>Soil type</i> is identified by observation according to work order and company requirements.
		1.5	<i>Cleaning techniques</i> for carpet are selected according to work order and company requirements.
		1.6	Size and usage pattern of work site are determined to ensure safety of <i>personnel</i> and efficient use of <i>equipment</i> and <i>chemicals</i> .
		1.7	Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment and chemicals.	2.1	<i>Personal protective equipment</i> (PPE) is selected and used according to <i>manufacturer specifications</i> , and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.

- 2.4 Equipment is adjusted to suit operator's requirements according to manufacturer specifications and OHS requirements.
- 2.5 Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
- 3 Prepare work site. 3.1 Hazards in work site are confirmed and risks controlled and reassessed according to legislative, OHS and company requirements.
 - 3.2 Furniture and fittings that impede cleaning operation are removed according to work order, and OHS and company requirements.
 - 3.3 *Signage and barriers* are installed as required to maximise public safety during the cleaning operation, according to work order and OHS and company requirements.
 - 3.4 *Work restrictions* affecting completion of the work order are identified and appropriate persons are promptly notified.
- 4 Clean work site 4.1 Soil is removed and carpet is cleaned using cleaning techniques, equipment, PPE and chemicals according to manufacturer specifications and legislative, OHS and company requirements.
 - 4.2 Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.
- 5 Tidy work site. 5.1 Collected soil and *waste* are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS and company *environmental requirements*.
 - 5.2 Furniture and fittings are replaced according to client requests, work order and OHS requirements.
 - 5.3 Signage and barriers are removed according to work order, and OHS and company requirements.

check eq and store equipme	Clean and safety check equipment, and store equipment and	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
	chemicals.	6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.
		6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.

6.4 Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
 - establish rapport with clients
 - gain clients' trust
- analytical skills to:
 - assess carpet suitability for bonnet cleaning
 - classify carpet type, soil and stains
 - select chemicals to suit carpet type
 - select appropriate cleaning strategies
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
 - communicate clearly and concisely verbally and in writing
 - explain carpet-cleaning processes and expected outcomes to clients
 - perform mathematical calculations required for diluting and mixing chemicals
 - read and interpret directions and safety instructions, including:
 - chemical labels
 - equipment manuals
 - material safety data sheets (MSDS)
 - request advice or further information
 - seek and receive feedback
 - source, organise and record information
- problem-solving skills to manage contingencies
- self-management skills to work alone and in a team
- skills to work safely when:
 - handling and disposing of chemicals
 - identifying hazards and controlling risks
 - manual handling
 - using transfer cleaning techniques

Required knowledge

- carpet characteristics, including:
 - carpet construction
 - features of fibres
- cleaning equipment and chemicals, including low environmental-impact chemicals

- cleaning methods for carpet, including:
 - bonnet cleaning
 - low-moisture
 - pre-spotting and stain removal
 - water-efficient
- company management structure and procedures, including:
 - biological and viral control
 - emergency response and evacuation procedures
 - environmental protection procedures
 - injury, dangerous occurrence and incident reporting
 - OHS procedures
 - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to carpet cleaning
- safe work practices for using chemicals and equipment, including PPE
- testing methods

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing a practical demonstration of bonnet cleaning on at least two different types of carpet.	
Critical aspects for assessment and evidence required to demonstrate	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit.	
competency in this unit	In particular the person should demonstrate the ability to:	
	• identify type and characteristics of carpets	
	select cleaning equipment and chemicals	
	apply safe and efficient cleaning methods	
	 achieve outcomes in relation to customer work order and company requirements 	
	• comply with company and legislative requirements.	
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context and must comply with relevant regulatory or Australian standards' requirements.	

	1
	Resource implications for assessment include access to:
	suitable work site or venue with carpetequipment operating manuals and MSDS
	 equipment operating manuals and WSDS PPE
	suitable equipment and chemicals
	 assessment instruments, including personal planner and assessment record book
	• work order instructions, work plans and schedules.
Method of assessment	Assessment methods must:
	satisfy the endorsed Assessment Guidelines of the Property Services Training Package
	• include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
	• reinforce the integration of employability skills with workplace tasks and job roles
	• confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.
	Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.
	This unit could be assessed on its own or in combination with other units relevant to the job function, such as:
	CPPCCL2007A Perform basic stain removal.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work order information	•	access to work site, including:
may include:		access and egress points

		timing of access
		budget allocations
		completion times and dates
		human resource requirements to complete the work tasks
		job requirements and tasks
		legislative and local government requirements, including
	ľ	environmental protection requirements
	•	OHS requirements and emergency response procedures
	•	requirements for working in isolated and remote locations
	•	resource requirements, such as equipment and materials
	•	specific client requirements, such as:
		dress and presentation requirements
		relationships with other activities
	•	use of signage and barriers
	•	work schedules
	•	work site contact persons.
Company requirements	•	business and performance plans
may include:	•	client communication procedures
	•	client confidentiality procedures
	•	client service standards
	•	communication channels and reporting procedures
	•	company goals, objectives, plans, systems and processes
	•	company issued identification badge, card or pass
	•	company policies and procedures, including:
		• access and equity policy, principles and practice
		• OHS policies and procedures, including control procedures
		• maintenance procedures for equipment and PPE
		 those relating to own role, responsibility and delegation
		 work site access security clearance procedures
		company service standards
	•	dress and presentation requirements
	•	duty of care, code of conduct, and code of ethics
		emergency response and evacuation procedures
	•	employer and employee rights and responsibilities
		environmental protection requirements
		personnel practices and guidelines
	•	quality and continuous improvement processes and standards
		records and information systems and processes
		training materials (induction, refresher and new skills)
		use of contractors.
		clients
Appropriate persons may	•	

include:	•	colleagues
	•	managers
	•	persons in control of work sites
	•	supervisors.
TT T 1 1 1	•	allergic reactions to chemicals and equipment, including latex
Hazards may include:	•	allergies
	•	biological and animal waste
	•	bites and stings
	•	blood and blood-stained products
	•	confined and restricted spaces
	•	contaminated clothing, materials and equipment
	•	damaged or inappropriate equipment
	•	dust and fibres
	•	electrical hazards arising from:
		• cables
		electrical fittings:
		• switches
		• lights
		untested electrical equipment
	•	fatigue
	•	fire
	•	gas
	•	heights
	•	inadequate lighting and ventilation
	•	infectious and zoonotic diseases, such as:
		• Q fever
		• scabies
	•	mobile equipment and vehicle hazards around plant and vehicles
	•	moving or unguarded machinery and parts
	•	noise
	•	occupational violence and bullying
	•	poor personal hygiene practices
	•	spill, splash and spray
	•	release of substances with negative environmental impact
	•	synergistic chemical reactions, such as:
		hazardous incompatibility
		• reactivity
	•	syringes or other sharps
	•	ultraviolet light
	•	unsafe manual-handling techniques, including awkward and
		repetitive postures

	where the set of the s
	 unsafe underfoot conditions, such as slippery, uneven and rough surfaces
	unrestricted people access
	waste and waste disposal
	• work in extremes of temperature
	• work in unfamiliar, isolated or remote environments.
<i>Legislative requirements</i> may include:	• Australian standards, quality assurance and certification requirements
may morado.	• award and enterprise agreements
	• industry advisory standards and codes:
	building codes
	dangerous goods codes
	 relevant commonwealth, state and territory legislation and local government regulations that affect company operation, including:
	• anti-discrimination and diversity policies
	chemical controls
	chemical registers and manifests
	consumer protection
	energy conservation
	environmental protection
	equal employment opportunity
	 freedom of information
	 industrial equipment certificates of competency or licences
	 industrial relations
	 OHS Acts and regulations
	 privacy
	 public health
	-
	trade practices
	• water conservation
	workplace consultative arrangements.
Occupational health and	allergic reactions, such as contact dermatitis
<i>safety</i> (also known as	• communication devices for remote and isolated locations, such
workplace health and	as:
safety) <i>requirements</i> may relate to:	• mobile phone
101110.	two-way radio
	 dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, inhalation and ingestion of toxic substances
	hazard identification and risk assessment mechanisms
	hazard reporting

	• health surveillance and monitoring, such as regular blood testing
	hierarchy of hazard control procedures
	injury and dangerous occurrence reporting
	maintaining clear access ways
	national and industry standards and codes of practice
	OHS control procedures, such as:
	health and safety plans
	• job plans
	• job safety analyses
	risk assessments
	safe operating practices and procedures
	safe system of work statements
	safe work instructions
	work method statements
	• routes of entry and potential symptoms of exposure to chemicals
	 safe work practices for equipment, PPE and chemical storage, including interpretation of:
	• MSDS
	 hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	 up-to-date electrical test and tag compliance
	• use of chemicals according to MSDS
	• use of residual current devices
	• use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.
<i>Carpet</i> may include	• mixed blends
carpet, mats and rugs	• natural fibres, such as:
made from:	• organic (plant) fibres, such as cotton and sisal
	• silk
	• wool
	 synthetic fibres, such as:
	 acrylic
	nylon
	-
	• polyester
	polypropylene.
Testing may include:	• burn test
	chemical test
	• sink and float test.

	1
Soil types may be wet or	• beverages
dry and include:	• candle wax
	chewing gum
	cigarette butts
	• dust
	• dye stuffs
	• food
	• grease
	heavy dirt build-up
	hospital waste
	hydrocarbons
	industrial and chemical waste
	• lipstick
	nail polish
	• oil
	• paper
	plant stains
	• rainwater
	shoe polish
	• tar.
Cleaning techniques may	• agitation
include:	assisted drying
	• dwell time
	• grooming
	• neutralisation
	pre-treatment chemical application
	removal by absorption
	vacuuming to prepare work site.
Personnel may include:	client's staff members
r ersonner may merade.	• colleagues
	• general public
	• venue, facility, or shopping centre staff and/or management.
<i>Equipment</i> may include:	carpet-cleaning bonnets and hand bonnets
Equipment may metude.	• carpet-drying equipment, such as:
	• air movers
	drying bonnets
	 carpet groomers
	 carpet ground's carpet spot-cleaning kits
	cloths, such as towelling
	 extraction units, such as:
	 extraction units, such as. self-contained
	• sen-contained

	vahiala mounted
	vehicle-mounted
	• garbage bins
	• measuring equipment, such as jugs and cups
	plastic coasters or polystyrene blocks
	respirators
	rotary or cylindrical scrubbing machines
	safety signage
	scrapers and spatulas
	selected tools and hand tools
	• sponges
	• spray equipment (pressurised or unpressurised)
	• steam irons
	trigger sprayers
	• vacuum cleaners, such as:
	• upright
	vehicle-mounted
	• waste recovery tank.
Chemicals may include:	acid cleaners
	alkaline cleaners
	low environmental-impact chemicals
	neutral cleaners
	• solvent cleaners.
Personal protective	• ear muffs and plugs
<i>equipment</i> may include:	• gloves, such as non-permeable
	high-visibility vests and clothing
	overalls and other protective clothing
	respirators
	safety glasses or goggles
	safety shoes
	splash-proof face masks
	• sun protection
	• tongs
	ultraviolet protection
	• wet-work clothing.
Manufacturer	equipment operating manuals
specifications may	instructional guides
include:	• MSDS
	• other resources supplied by the manufacturer, such as:
	laminated cards
	 notices
	wall posters

	product labels
	• safety instructions pre-printed on equipment.
Signage and barriers may	• physical barriers and restraints erected to restrict access to a site
include:	• signs complying with legislative requirements and Australian
	standards, warning of danger or adverse conditions, including:
	cleaning in progress
	 hazardous chemicals in use or present in work area.
Work restrictions may	amount of cleaning anticipated
include:	client activity
	employee level of literacy and communication skills
	faulty or inappropriate equipment
	• site accessibility
	• site hazards
	• skills of the work unit or team
	staffing resources
	• time limitations.
<i>Waste</i> may be either solid	chemicals past expiry date
or liquid and include:	• litter
	machine or vehicle exhaust emissions
	obsolete equipment
	• packaging
	• soil
	used containers
	used or contaminated PPE
	used or unused chemicals.
Environmental	clean-up, containment and isolation
<i>requirements</i> may	 company policies and guidelines
include:	emergency chemical spill control measures
	environmental protection agency and requirements of accurate auch age
	government departments, such as:agriculture
	emergency services
	national parks and wildlife
	hazardous materials handling
	local government regulations and by-laws
	low-energy carpet-cleaning methods
	low environmental-impact chemicals
	low-moisture cleaning methods
	 low water-use equipment and other water-efficient cleaning methods
	 non-chemical carpet-cleaning methods.
