CSCSAS302A Control incidents using defensive tactics
CSCSAS302A Control incidents using defensive tactics

Modification History
Not applicable.

Unit Descriptor
Unit descriptor
This unit of competency describes the outcomes required to evaluate an incident and select and use appropriate defensive equipment and tactics to minimise risk to self and others.

This unit replaces CSCSAS010A Control incidents using defensive equipment.

Application of the Unit
Application of the unit
This unit applies to all people working in detention centres, correctional centres and prisons. The unit may also be demonstrated in a community-based alternative custodial environment such as home detention. Variables will determine different applications of the standards, depending on the nature and complexity of security requirements and defined work role and responsibilities.

Licensing/Regulatory Information
Not applicable.
Pre-Requisites

Prerequisite units Not applicable

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit of competency is packaged, will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT | PERFORMANCE CRITERIA
---|---
4 Evaluate response. | 4.1 Evaluate and review the effectiveness of responses according to legal requirements and organisational procedures.
 | 4.2 Provide accurate and constructive observations of incidents as part of the review and debriefing process.
 | 4.3 Complete records and reports that comply with organisational procedures, requirements and formats.
 | 4.4 Recognise and manage the effects of stress on self using recognised stress management techniques.
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- interpreting and estimating level of conflict and degree of risk
- using effective communication and negotiation skills, especially under pressure, to calm, distract or change focus
- providing warnings and clear directions and instructions
- using communication systems to request assistance if needed
- using appropriate reasonable force options to minimise threat to self and others
- using defensive equipment for the purpose and in the manner intended and authorised
- applying handcuffs and other restraint equipment
- applying first aid.

Required knowledge:

- organisation's policies and procedures, and legal requirements related to use of force, use of restraint, use of specific defensive equipment and techniques, misuse of force, and duty of care under criminal and civil law
- tactical response within specified legal and strategic limits
- response options that are most effective for the degree and nature of risk
- principles of communication to reduce the level of threat or conflict
- principles of communication to give clear, accurate and concise information
- risk factors and their impact on incidents and situations
- conflict management strategies and techniques
- stress management strategies and techniques.
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Overview of assessment

Assessment of this unit can be applied using a combination of training outcomes and performance in the workplace, with the principal evidence developed through performance in routine work functions in the workplace.

Where this unit specifies performance in areas with unpredictable and risk implications, assessment in simulations should be used as well as retrospective documentation and observation of performance working with high risk offenders and in a range of different environments where incidents occur.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of employability skills as they relate to this unit
- ability to control incidents using defensive equipment and tactics in a range of (two or more) contexts or occasions, over time.
EVIDENCE GUIDE

Context of and specific resources for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when controlling incidents using defensive equipment and tactics, including coping with difficulties, irregularities and breakdowns in routine

- copies of legislation, policies, procedures and guidelines relating to the use of force and the use of defensive equipment and tactics

- access to appropriate learning and assessment support when required.

Method of assessment

Evidence must include observation and information generated in the workplace as well as observation of performance in routine work functions or, where this is not possible, in a simulated exercise to confirm the transferability of the competencies.

The following assessment methods are suggested:

- observation of performance in routine workplace activities within a range of agreed responsibilities and in various work locations

- written and/or oral questioning to assess knowledge and understanding

- completion of workplace documents and reports produced as part of routine work activities

- third-party reports from experienced practitioners

- completion of performance feedback from supervisors and colleagues

- scenarios

- simulations or role plays.

Guidance information for assessment

Assessment methods should reflect workplace demands, and any identified special needs of the candidate, including language and literacy implications and cultural factors that may affect responses to the questions.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge.
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the performance criteria is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

**Assessment of level and nature of risk** should include analysis of the following:

- known information about circumstances of incident
- known information about people involved in incident
- observation of the environment and physical conditions
- nature of the incident
- available resources and team backup
- communication channels
- range or response options available
- potential and triggers for escalation or defusing.

**Identified opportunities** may include:

- lapses in concentration
- distractions
- opportunities for escape
- access to weapons
- presence of support.

**Defensive techniques** may include:

- avoidance techniques and withdrawal
- self-defence
- empty hand techniques
- stunning techniques
- take-downs
- use of defensive equipment
- use of chemical agents
- containment and isolation
- canine deployment.
RANGE STATEMENT

Legal requirements include:
- applicable Crimes Acts and regulations
- duty of care under criminal and civil law
- use of force guidelines
- licensing arrangements
- relevant federal, and state or territory legislation.

Alternative actions may include:
- tactical withdrawal
- use of negotiation techniques
- request and wait for assistance.

Defensive equipment may include:
- batons
- handcuffs and restraint equipment
- individual aerosol chemical agent
- body belt
- hobbles
- security chain link
- restraining mattress
- temporary plastic handcuffs (flexicuffs).

Effects of stress can include:
- inability to concentrate
- uncoordinated movements
- over-talking
- frustration
- increasing aggression
- tiredness.

Stress management techniques may include:
- critical incident debriefing
- informal exploration of incidents with team members and supporters
- counselling
- review of practice and resources.
