Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to make artworks that combine the use of different media. It involves sourcing ideas and exploring the potential for different mixed media ideas, creating finished artworks and evaluating own work. Mixed media usually refers to a range of visual media, but it could also involve the integration of non-visual elements, such as sound.

The unit applies to those who work independently and have a well-developed command of techniques in a particular creative form. Individuals may be exploring mixed media for the first time as part of an emerging practice. Work would be undertaken independently with support available as required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector
