Assessment Requirements for CUABRT402 Maintain broadcast equipment and facilities

Release: 1

Assessment Requirements for CUABRT402 Maintain broadcast equipment and facilities

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- diagnose faults, carry out repairs, and test broadcast equipment and systems according to enterprise and safety requirements
- carry out routine maintenance, equipment upgrades and system alignments, according to enterprise and safety requirements
- refer faults or repairs outside scope of own job role to appropriate personnel
- document maintenance requirements and actions according to industry and enterprise procedures
- provide clear information to personnel about correct usage and maintenance of facilities or equipment.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list and describe the features and operational standards for the enterprise-specific equipment and facilities
- describe features of common test measurement equipment used for maintaining broadcast equipment and facilities
- identify industry regulations and standards and certification requirements governing maintenance of broadcast equipment and facilities
- identify sources of advice, information, and specialist technical support
- outline typical faults that arise in maintaining broadcasting equipment and facilities and how to handle these
- describe procedures for disposing of obsolete equipment
- identify work health and safety (WHS) requirements as they relate to broadcast system maintenance.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- broadcasting equipment and facilities
- drawings, specifications, supplier manuals and other information relevant to broadcast equipment and systems
- industry and regulatory standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.
