CUABRT501 Collaborate on the design of broadcasting facilities

Release: 1

CUABRT501 Collaborate on the design of broadcasting facilities

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the performance outcomes, skills and knowledge needed to collaborate on the design of television or radio broadcasting facilities.

It applies to individuals responsible for working with clients to determine the best way of designing facilities that meets current needs and, wherever possible, anticipates future needs. They must have highly developed liaison and negotiation skills, and be good communicators. They generally work on a contract basis or with companies that specialise in the design and installation of broadcasting facilities.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Unit Sector

Media and Entertainment Production – Broadcast Technology

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Clarify design requirements	1.1 Confirm overall objectives for proposed broadcasting facilities in consultation with relevant personnel 1.2 Identify factors, including technological change, that may impact how facilities are designed, including for future needs 1.3 Research the market for complete solutions that could meet the design objectives 1.4 Research and assess the range of equipment available to meet facility requirements and check compatibility with existing systems or infrastructure if applicable

ELEMENT	PERFORMANCE CRITERIA
	1.5 Discuss the range of solutions with clients and other relevant personnel and reach agreement on preferred approach 1.6 Document agreed approach and obtain sign-off from relevant personnel to proceed with detailed design specifications
2. Collaborate on determining design approach	2.1 Generate and evaluate design options that are realistic in terms of budget, users, servicing, network integrity and timelines 2.2 Advise clients on capital equipment purchases that may influence choice of design option 2.3 Evaluate options and select the one that best meets project objectives, taking the budget into account 2.4 Discuss selected option with client and amend as required to incorporate their feedback 2.5 Prepare information, diagrams and equipment specifications to support agreed design option 2.6 Discuss design brief with personnel involved in implementation of design and incorporate their ideas into overall approach
3. Finalise designs	3.1 Check proposal complies with relevant industry regulations and standards, including work health and safety (WHS) and copyright 3.2 Prepare design plans that specify work, equipment, personnel and materials required, as well as arrangements for contractors and equipment purchase or hire 3.3 Prepare detailed drawings and specifications to support design plans, using a range of formats, design techniques and standard drawing notations 3.4 Prepare documentation relating to installation or modification, testing and ongoing operations and maintenance, and attach to design plans 3.5 Discuss and confirm additional requirements or modifications to design plans with relevant personnel 3.6 Discuss intellectual property and copyright protection with client and obtain final sign-off on design plans from client 3.7 Evaluate self and design process and note areas for improvement

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2-1.4, 2.1, 3.1	Researches, interprets and evaluates information
Writing	1.3, 1.4, 1.6, 2.5, 2.6, 3.2-3.5, 3.7	Completes relevant documentation using clear and technically specific language and diagrammatic information
Oral Communication	1.1, 1.5, 1.6, 2.2-2.4, 2.6, 3.5, 3.6	- Participates in verbal discussions using language and features appropriate to the audience - Uses well-developed questioning and listening techniques to confirm understanding
Numeracy	2.1, 2.3	Uses mathematical skills to interpret and record test data and interpret budget constraints
Navigate the world of work	3.1, 3.6	Follows enterprise procedures, regulatory requirements and industry standards when performing work duties
Interact with others	1.1, 1.5, 1.6, 2.2-2.4, 2.6, 3.5, 3.6	- Applies accepted communication practices and protocols to provide advice, discuss concerns and confirm requirements - Uses effective interpersonal skills to collaborate, negotiate and liaise with a range of people
Get the work done	1.1, 1.2, 1.4, 2.1-2.3, 2.6, 3.2, 3.5, 3.7	- Plans and manages tasks required to achieve goals, seeking input from others when required - Uses analytical skills to assess options, make decisions and identify improvement options

Unit Mapping Information
