Assessment Requirements for CUACER402 Experiment with throwing techniques

Release: 1

Assessment Requirements for CUACER402 Experiment with throwing techniques

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- use a process of thorough research and experimentation and practice at the wheel to confirm ideas for own work
- identify and acquire resources required to complete chosen work
- adapt and use a range of throwing techniques to create a single major work or multiple ceramic pieces that:
 - shows technical proficiency in chosen techniques
 - reflects understanding of elements and principles of design
 - demonstrates innovation and the emergence of an individual style
- review and document the research and development process.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe intellectual property requirements relevant to producing ceramic works
- summarise methods used to research creative and technical approaches to ceramic work
- explain how the works of other practitioners may be used to inform individual practice
- describe the role of experimentation in developing and refining ideas for thrown ceramic work and how it relates to the development of an individual style
- explain ways to adapt, extend and combine the capabilities of a wide range of throwing techniques
- describe, for the elements and principles of design, the detailed characteristics, key interrelationships, use in thrown ceramic work and how they may be challenged
- summarise, for a wide range of tools and equipment used to produce thrown ceramic work, key physical features and uses

- list and describe the physical properties and capabilities of a wide range of materials used to produce ceramic work
- list suppliers of resources for professional ceramic practice with particular emphasis on raw, part-processed and processed ceramics materials
- describe practices and procedures for working safely and sustainably with materials, tools and equipment for producing ceramics.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- equipment, tools and materials used to produce thrown ceramic work
- relevant information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.
