Assessment Requirements for CUADES601 Design innovative products

Release: 1

Assessment Requirements for CUADES601 Design innovative products

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- develop a product concept that considers target market, purpose, technical feasibility, cost, timeframes and legislative requirements
- generate options and ideas and select a design solution, in collaboration with others
- develop a plan to realise a design solution
- implement, monitor and evaluate design realisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline commonly used research methodologies for market analysis in the relevant area of practice
- outline production processes as they apply to designs in particular industry contexts
- describe quality assurance processes for product design and development applicable to specific industry contexts and art and design disciplines
- explain the design features of completed work and the potential market
- outline legislation relevant to product design concepts in the specific industry context.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- resources, tools, materials and equipment for realisation of a design in a specific context
- interaction with others to support design development and realisation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.
