Application

This unit describes the skills and knowledge required to create effective advertising using highly developed creative and technical graphic design expertise and an understanding of advertising and consumer behaviour. It involves the analysis and application of advertising concepts applied to visual arts.

The unit applies to those working in a range of industry contexts who are likely to be members of a collaborative team. Depending on the work context, they may or may not be responsible for integrating content such as text, sound or interactivity to produce completed advertisements. Although designers at this level work with a high degree of autonomy, they are still likely to be members of a collaborative creative team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Learning	Uses reflection to analyse own performance and determine effective strategies for further skill enhancement
Reading	Interprets and assesses complex textual and visual information to develop responses to advertising briefs
Writing	Composes and edits text to communicate effectively with project personnel selecting appropriate vocabulary, structure and format

SKILL	DESCRIPTION
	Develops detailed documentation to convey all production process requirements and outcomes
Oral Communication	- Participates in discussions with others to determine project objectives and related information using appropriate, detailed and clear language - Uses listening and questioning skills to clarify and confirm understanding - Presents detailed information using language, tone and pace appropriate to audience and purpose
Numeracy	Interprets numerical information and applies calculations to accommodate work within budgetary considerations and workplace deadlines
Self-management	- Takes responsibility for own workload, negotiating some key aspects with others - Evaluates the implications of legal, ethical and sustainability requirements when negotiating and planning work with assistance of expert opinion
Teamwork	Selects and uses appropriate communication practices to foster a collaborative approach to project work, clarifying objectives, negotiating shared outcomes, seeking feedback and specialist advice
Problem solving	- Critically analyses complex and varied information to determine the creative and technical direction of the project with consideration of budgetary and time constraints - Uses a combination of creative and analytical thinking, exploration, manipulation and refinement to resolve the concept and visual content that conveys the requirements of the brief - Evaluates work in a systemic manner for success in meeting project objectives, considering project parameters and feedback, and identifies improvement opportunities
Planning and organising	Plans sequential stages of production and applies creative and technical skills and judgment to execute designs that are refined and modified to convey key messages
