Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- explore at least two different lighting techniques and apply technique to photo imaging work.

In the course of the above, the candidate must:

- research and apply the theory of light to experiments with lighting techniques and technology
- experiment with lighting a subject in different locations, including:
  - artificial light
  - natural light
- achieve a range of different lighting effects on photo imaging work
- prepare and organise shoot list requirements for lighting experiments and productions
- document lighting experiments and store research materials and work samples appropriately.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- theories of light relevant to photo imaging
- uses and capabilities of photographic lighting equipment and accessories
- technology used to generate, harness and use lighting in photo imaging work
- lighting processes that create emotive and descriptive effects.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- locations and studios for photo imaging shoots
- photo imaging production equipment
- credible sources of information on lighting techniques and technology.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
