Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to create and develop storyboards for a broad range of digital content, including video, film, animation and interactive media.

It applies to individuals who break down content, stories or scripts into discrete elements and visualise creative concepts in collaboration with a creative production team. Storyboard artists, designers, producers and information architects can create storyboards, depending on the type and scale of production. In the film and television industry, people creating storyboards work closely with directors.

No licensing, legislative or certification requirements apply to this unit at the time of publication.
