Modification History

Release	Comments
1	This qualification was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

Qualification Description

This qualification has been designed to provide a package of broad and flexible competencies reflecting the workplace responsibilities to conduct and manage a forensic investigation and to lawfully establish evidence that is often found in digital storage mediums and computers. It qualifies individuals who apply integrated technical and theoretical concepts in a broad range of contexts to undertake advanced skilled or paraprofessional work in electronic forensics.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

12 units of competency are required for this qualification:

- 5 core units
- 7 elective units

Choose a minimum of 5 elective units from the list below, of which at least 3 must be taken from Group A.

Choose the remaining 2 elective units from either the list below, or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level. Seek further advice on selecting imported units of competency in the DEF Implementation Guide.

Elective units selected must not duplicate content already covered by other units in this qualification.
