**Assessment Requirements for DEFCPL009
Apply knowledge of work health and safety
legislation for safety cases**

Release: 1

Assessment Requirements for DEFCPL009 Apply knowledge of work health and safety legislation for safety cases

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying organisational requirements relevant to regulatory systems
- applying statutory requirements relevant to regulatory systems
- identifying, interpreting and analysing regulatory system requirements relevant to work being performed
- using appropriate information technology and software.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- configuration management
- organisational requirements relevant to regulatory systems
- regulatory systems relevant to safety cases and safety systems
- regulatory systems relevant to work being performed
- safety case process
- statutory requirements relevant to safety case, safety and regulatory systems.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, computer, software, legislation, guidelines, procedures and protocols relating to safety case processes, relevant plans and workplace documentation currently used in industry
- applicable documentation, including operational procedures, regulations, codes of practice and operation manuals.
