DEFINT017 Analyse information for situational value

Release: 1

DEFINT017 Analyse information for situational value

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to organise and perform the rapid analysis of information in order to determine its situational value.

It includes organising and interpreting data into information to assess and report situational value outcomes in an intelligence environment.

This unit applies to Defence personnel working in electronic warfare and signals intelligence fields but may be applicable to any persons working in a similar role.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Typically, persons undertaking this unit work independently with indirect supervision, and perform complex tasks in unfamiliar contexts, with a high level of analysis and risk assessment required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Intelligence

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

- | | |
|--|--|
| 1 Organise information for analysis | 1.1 Clearly define objectives of analysis in accordance with organisational procedures

1.2 Collate situational data and prepare information in a format suitable for analysis in accordance with task requirements |
| 2 Analyse and interpret information | 2.1 Select reliable and suitable methods of information analysis to determine situational value
