Application

This unit describes the skills required to operate night fighting equipment in a threat environment. Night fighting equipment:

- is a collective term that refers to image intensification equipment
- is normally used in conjunction with weapons in low light conditions
- improves natural vision when other forms of illumination may not be suitable

This unit was developed for military personnel within a combat zone in Defence but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks, in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.
