Application

This unit describes the skills required to select a work site in a threat environment through an independent reconnaissance to determine the most suitable location for deployment.

This unit applies to combat arms personnel required to select sites for deployment in an operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would normally work within a team providing protection from possible threats, but also must be prepared to act independently. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.
