DEFSS00021 Intermediate Geospatial Skill Set

Release 1

DEFSS00021 Intermediate Geospatial Skill Set

Modification History

Release 1. New Skill Set

Description

This skill set is for individuals who perform the duties of providing intermediate geospatial support to Defence operations within the Australian geospatial workplace environments. It provides the skills and knowledge required to store and retrieve spatial data, source and assess spatial data, provide geospatial support to Defence operations and provide geospatial technical advice.

Pathways Information

The DEFSS00021 Intermediate Geospatial Skill Set is part of the Defence Training Package.

Licensing/Regulatory Information

Personnel seeking certification as intermediate geospatial technicians are to comply with the requirements of the Defence Training Package.

Skill Set Requirements

A total of **4 units** of competency must be attained.

CPPSIS4022	Store and retrieve spatial data
CPPSIS4024	Source and assess spatial data
DEFGEO003	Provide geospatial support to operations
DEFGEO004	Provide geospatial technical advice

Target Group

This is a Skill Set covering the role of the Intermediate Geospatial Technician within the Australian and New Zealand Standard Classification of Occupations (ANZSCO) 2322 Surveyors and Spatial Scientists. This Skill Set focusses on the operational application of Geospatial data.

Suggested words for Statement of Attainment

The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge required by persons performing the duties of Intermediate Geospatial Technician within the Australian Geospatial environment.
