DEFWDV013 Employ air-lift devices underwater

Release: 1

DEFWDV013 Employ air-lift devices underwater

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to move submerged objects using air-lift devices.

It includes preparing, selecting and inspecting air-lift bags appropriate to the lift, securing bags to the object and inflating bags to required buoyancy to manoeuvre object under control.

This unit relates, in part, to existing standards in the Australian Diver Accreditation Scheme (ADAS).

This unit applies to persons working as Defence Work Divers, but may apply to others working in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Work Diving

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--|---|
| 1 Prepare for underwater air-lift operation | <p>1.1 Identify and analyse load metrics and worksite data to determine specific requirements for air-lift bags</p> <p>1.2 Develop a work plan consistent with dive plan</p> <p>1.3 Select, inspect and prepare air-lift bags in accordance with manufacturer specifications and safe weight limits</p> <p>1.4 Secure air-lift bags to/from dive site</p> <p>1.5 Assess obstructions and other underwater hazards to determine risks and manage risk control measures in accordance with dive plan</p> |
| 2 Operate air-lift devices | <p>2.1 Secure air-lift bags to object's lift point/s</p> <p>2.2 Determine a safe work area, confirm location of other divers and nearby vessels and/or structures prior to commencing and during air-lift operation, in accordance with work plan</p> <p>2.3 Inflate air-lift bags in accordance with work plan</p> <p>2.4 Control buoyancy and movement in accordance with work plan</p> |
| 3 Complete air-lift operations | <p>3.1 Minimise environmental impact arising from work task and recover waste products</p> <p>3.2 Carry out de-servicing and storage requirements for air-lift bags</p> |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces but is not equivalent to DEFVDV013B Employ air-lift devices underwater.
