DEFWHS012 Test confined space environment

Release: 2

DEFWHS012 Test confined space environment

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Foundation Skills and Assessment Conditions.

Release 1.0. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFOH014B Test confined space environment.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- PC 2.4 removed
- PC 2.2 and 2.3 merged.

Application

This unit involves the skills and knowledge required to test confined space environment to ensure safe entry and egress.

In the context of this unit, a confined space is any compartment or area that has the capability of accumulating a toxic, flammable or explosive atmosphere, or of being flooded, in addition to one of the following characteristics:

- limited opening for access
- no escape route or very restricted means of escape
- limited natural ventilation
- atmosphere containing more than 23.5% or less than 19.5% oxygen

It includes the skills required to prepare for and conduct test procedures, and all post test procedures.

This unit applies to Defence personnel involved in the testing of confined space environments as a workplace responsibility but is applicable to all individuals who work in this field. Those undertaking this unit must demonstrate the ability to work independently or as part of a team under indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Work Health & Safety

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare for environmental testing

2 Test confined space for contaminants/ threats

3 Finalise test/s

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Identify confined space potential contaminants

1.2 Identify organisational restrictions or requirements pertinent to the confined space

1.3 Identify, acquire and prepare equipment and resources required for testing

2.1 Obtain testing sample and conduct tests in accordance with testing protocols

2.2 Record and analyse test results in accordance with testing protocols

3.1 Complete documentation and reports

3.2 Clean and refurbish testing equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit supersedes and is equivalent to DEFOH014B Test confined space environment.
