New unit, superseding MSACMT631A Undertake value analysis of product costs in terms of customer requirements* - Not equivalent

* Prerequisite *MSACMT230A Apply cost factors to work practices* - removed

Unit Descriptor

This unit of competency covers the skills and knowledge required by an employee who is required to analyse products and processes to determine the value-adding factors, including design and processing costs that most impact on meeting customer requirements and which may also include competitor benchmarking. The unit also includes implementing identified changes that increase cost-efficiency. The unit may be applied individually or in a team environment.

In this unit an employee uses an analysis of the benefits/features which a customer perceives to be in a product or service as a basis for determining appropriate or unnecessary cost and so identifying and reducing waste.

Application of the Unit

This unit applies to an individual who undertakes the value analysis of a product or service, establishing the features/benefits obtained by customers from the cost components relating to those benefits. From this appropriate or waste cost will be determined and actions taken to either reduce waste or improve saleability.

This unit differs from *MSS405030A Optimise cost of a product or service*, in that it requires costs to be measured against customer features/benefits and is designed to contribute to value stream costing. *MSS405030A Optimise cost of a product or service* complements this unit by allowing detailed analysis of all costs, including overheads.

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information. Problem solving, initiative and enterprise, and planning and organising are required to determine cost-efficiencies. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into costing methods.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Analyse customer benefits to determine appropriate or waste costs	1.1	Analyse product or service to determine features/benefits perceived by customer in product
		1.2	Analyse cost components of product or service and determine those which deliver customer features/benefits and those which are either appropriate or waste
		1.3	Determine any additional features that may be added to improve saleability
		1.4	Analyse waste cost components and allocate to direct and indirect cost categories
		1.5	Determine options for reducing direct and indirect waste costs
		1.6	Select cost-related actions which maximise customer benefits and minimise costs
		1.7	Where required, undertake competitor benchmarking to provide reference points

- | | | | |
|---|------------------------------|-----|---|
| 2 | Analyse performance variance | 2.1 | Identify waste processing or operational steps for product or service following completion of customer benefit analysis |
| | | 2.2 | Analyse all costs and determine methods of reducing costs/waste |
| | | 2.3 | Develop plan and recommendations for actions required to achieve cost improvement or added customer benefits to improve saleability |
| | | 2.4 | Submit plan and recommendations to stakeholders |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- undertaking self-directed problem solving and decision-making on issues of a broad and/or highly specialised nature and in a wide variety of contexts
- communicating at all levels in the organisation and value chain and to audiences of different levels of literacy and numeracy
- determining customer features/benefits added to products at each operational step
- relating cost components to customer features/benefits
- distinguishing between direct and indirect costs
- identifying relevant cost component categories for product
- determining application scope of cost reduction plan, including products, areas, employees and suppliers included in plan
- undertaking competitor benchmarking for reference in cost analysis

Required knowledge

Required knowledge includes:

- customer features/benefits from products
- impact of customer features/benefits on sales, market share and firms profitability
- performance and cycle times for products made or service provided
- major costs which are controllable (and how to control them)
- types of waste (muda)
- methods of reducing waste

- methods of reducing cycle time
- desirability of improving performance and methods of reducing cycle time

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • identify customer features/benefits for a product and their impact on market share or saleability of the product • determine direct/indirect costs in a product • determine which costs are waste • analyse cycle times and make suggestions for reduction in cycle time • develop a cost/waste reduction plan.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation

	<ul style="list-style-type: none"> • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and
---	--

	<p>analysis</p> <ul style="list-style-type: none"> • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Waste</p>	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product.</p> <p>Within operations, categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items • activities which do not yield any benefit to the organisation or any benefit to the organisations customers
<p>Cost</p>	<p>Cost includes:</p> <ul style="list-style-type: none"> • the monetary value of expenditures able to be directly identified for supplies, services, direct labour, components, cost of inventory, faults and reworks, rejects/scrap, equipment and other items used in the production of the product • allocations and estimates for indirect costs (e.g. indirect labour, rent, power and water) where a direct

	monetary value cannot be identified
Determine customer feature/benefits	This unit does not require that customer features/benefits must be obtained by the person undertaking the unit directly contacting customers. The features/benefits may have already been determined by sales and marketing personnel and passed on to operations. However, the unit requires that the product or process must be analysed to determine how the product or process supplies the features/benefits and by which step/feature of the product or process
Performance	Performance is may be thought of as the rate of output or delivery of the performance or service compared to the rate required to meet demand for the product or service
Cycle time	Cycle time includes: <ul style="list-style-type: none"> the normal time to complete an operation on a product
Pull	Pull is the concept of producing to demand, rather than for stock or some forecast

MSS405040A Manage 5S system in an organisation

Modification History

New unit, superseding MSACMT640A Manage 5S system in a manufacturing environment - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required for the overall management of the 5S system in an organisation.

Application of the Unit

This unit applies to an individual who is responsible for ensuring the smooth operation and continuous improvement of the 5S system in an organisation. This may be for an initial introduction of, or for the ongoing implementation and continuous improvement resulting from, 5S.

This unit requires the application of skills associated with problem solving, planning, communication and teamwork.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|--|--|
| 1 | Organise an appropriate environment for 5S | 1.1 Ensure managers and other key stakeholders support and understand 5S |
| | | 1.2 Arrange for team leaders to develop/maintain skills required for 5S |
| | | 1.3 Ensure team leaders are developing/maintaining skills required in their team members |
| | | 1.4 Ensure procedures and work practices reflect 5S needs and regulatory requirements |
| | | 1.5 Practise 5S in own work |
| | | 1.6 Eliminate roadblocks to 5S |
| 2 | Audit 5S implementation | 2.1 Undertake spot checks of compliance |
| | | 2.2 Review workplace and records for indicators of compliance/non-compliance |
| | | 2.3 Encourage all levels of the workforce to routinely suggest areas for improvement |
| | | 2.4 Discuss 5S routinely with team leaders to seek ideas for implementation of improvement suggestions and encourage identification of non-conformance |
| 3 | Improve 5S | 3.1 Negotiate solutions to non-conformances |
| | | 3.2 Implement agreed solutions |
| | | 3.3 Work with team leaders to develop opportunities for improvements |
| | | 3.4 Provide necessary resources for improvements |
| | | 3.5 Ensure procedures and practices change to reflect |

improvements

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with stakeholders on aims and objectives of 5S program in the organisation
- mentoring and monitoring team leaders in their skills and knowledge of 5S and the organisations objectives for 5S
- conducting formal and informal meetings and explaining 5S and related concepts
- reviewing regulatory requirements for implications for 5S implementation
- facilitating team goals, activities and communications and accessing resources
- problem solving 5S poor performance and problems to root cause
- identifying requirements and negotiating resources for 5S implementation across the organisation
- planning and prioritising activities of teams
- identifying problems in 5S implementation caused by gaps in skills and/or knowledge and developing options to address them

Required knowledge

Required knowledge includes:

- organisation operations and structure
- principles of efficient workplace organisation
- purposes and methodology of 5S
- operation procedures relevant to jobs in the organisation
- relevant regulatory requirements
- processes for identification of skill gaps
- methods of addressing skill gaps
- ways of encouraging team leaders and operators to find and suggest areas for improvement
- methods of making/recommending improvements
- methods of accessing required resources
- non-conformance, what they are, assessment of severity and action to be taken

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • encourage and monitor a systematic approach to implementing 5S • analyse areas and records for evidence of 5S conformance/non-conformances • manage non-conformances in implementation of 5S • lead and motivate others in achieving 5S outcomes and making improvements to the 5S systems.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads, hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence.

	<p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE)
--	---

	<ul style="list-style-type: none"> • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other format
Roadblocks	<p>Roadblocks include:</p> <ul style="list-style-type: none"> • all factors which are inhibiting the smooth implementation of 5S
5S	<p>5S is a system of work organisation originally developed in Japan based around housekeeping principles. A close translation of the five stages in the housekeeping approach is:</p> <ul style="list-style-type: none"> • sort • set in order • shine • standardise • sustain
Sort	<p>Sort involves keeping only what is absolutely necessary</p>

	<p>for the processes in the work area. Sort includes:</p> <ul style="list-style-type: none"> clearing the work area of all non-essential equipment and materials <p>Non-essential items include:</p> <ul style="list-style-type: none"> those not required to either produce product, conduct process or operations or make required adjustments to equipment during process or operations
Set in order	<p>Set in order includes:</p> <ul style="list-style-type: none"> assigning required equipment and materials appropriate locations in the work area (locations should be clearly marked and labelled to show the item and proper location)
Shine	<p>Shine includes:</p> <ul style="list-style-type: none"> keeping the work area clean at all times. This should be carried out to a regular daily schedule against allowed time and, on most occasions, at the end of a job
Standardise	<p>Standardising includes:</p> <ul style="list-style-type: none"> activities that help maintain the order and the housekeeping standards using procedures and checklists developed from a procedure
Sustain	<p>Sustain includes:</p> <ul style="list-style-type: none"> making sure that daily activities are completed every day regardless of circumstance undertaking inspections, including: <ul style="list-style-type: none"> informal inspections carried out often, at least weekly formal inspections carried out at least monthly <p>Specific actions should be followed up to generate continuous improvement</p>
Items in work area	<p>Items in work area may include:</p> <ul style="list-style-type: none"> tools jigs/fixtures materials/components plant and equipment manuals personal items (e.g., lunch boxes and posters) safety equipment and personal protective equipment

	<ul style="list-style-type: none">• other items which happens to be in the work area

MSS405050A Determine and improve process capability

Modification History

New unit, superseding MSACMT650A Determine and improve process capability* - Equivalent

* New prerequisite *MSS404052A Apply statistics to operational processes* superseding MSACMT452A Apply statistics to processes in manufacturing

Unit Descriptor

This unit of competency covers the skills and knowledge required to determine the actual (as distinct from design) capability of a process and then to analyse that process to remove assignable causes and reduce random causes. This would typically be done by a manager or technical expert support person either working in a team, or in close liaison with key stakeholders. Process capability is typically calculated using standard deviations.

Application of the Unit

This unit applies to an individual (who may be a production manager, plant/process engineer, technical specialist or similar) who is responsible for developing plans to stabilise and then improve process capability and following agreement the implementation of the plans to improve process capability. The organisation may use either a six sigma or three sigma process.

This unit primarily requires the application of skills associated with communication in gathering and analysing data and consulting with relevant personnel. Teamwork, problem solving, initiative and enterprise, and planning and organising are required to determine causes to variations and implement solutions. This is done in an environment using computer technology and also requires aspects of self-management and learning to ensure feedback and new learning is integrated into process improvements and operations management control systems.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

MSS404052A Apply statistics to operational processes

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Obtain data for process capability study	1.1	Identify the process requiring capability analysis including relevant procedures
		1.2	Identify customer specifications for product or service
		1.3	Obtain process capability data
2	Analyse data	2.1	Identify assignable causes of variation in liaison with relevant personnel
		2.2	Develop solutions to eliminate variation due to assignable causes in liaison with relevant personnel
		2.3	Analyse random variations for possible causes in liaison with relevant personnel
		2.4	Confirm causes of random variation
		2.5	Develop solutions to reduce random variations in liaison with relevant personnel
3	Take action to improve process	3.1	Develop plans to implement solutions
		3.2	Liaise with relevant personnel to implement solutions

capability	3.3	Gain necessary approvals, as required
	3.4	Monitor implementation and make adjustments, as required
	3.5	Determine new/revised process capability
	3.6	Implement revised process capability regime

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using a variety of statistical methods and calculations
- communicating and negotiating at all levels in the organisation and value stream and with individuals of different levels of literacy and numeracy
- negotiating with employees, suppliers and customers, where necessary, to achieve access to, or collection of, data
- planning process and data collection changes required for process improvement, including:
 - objectives
 - performance indicators to be monitored to indicate success of change
 - resources required
 - training required
 - communication and liaison required with employees, suppliers and customers
 - implementation period required
- analysing variations and categorising into assignable and random cause
- undertaking self-directed problem solving and decision-making on issues of a broad and/or highly specialised nature and in a wide variety of contexts
- working in and leading teams for data collection and process improvement
- using software computers and terminals, as required, to collect and analyse data

Required knowledge

Required knowledge includes:

- data collection methods
- data processing techniques required to establish variability and normal distribution
- calculate three sigma or six sigma processes, as relevant

- random and non-random results and processes for recognition of assignable causes
- causes of different types of non-random results
- causes of random variation
- process understanding sufficient to translate the data into variations in the process and determine methods of controlling them

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • collect or obtain data relevant process capability data from a variety of sources data • work with people and analyse data to determine assignable causes • plan and prepare improvement proposals • monitor implementation of improvement proposals.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects

MSS405060A Develop the application of enterprise control systems in an organisation

Modification History

New unit, superseding MSACMT660A Develop the application of enterprise systems in manufacturing - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to continuously modify and improve or develop new enterprise-wide information technology (IT) based control systems, such as Supervisory Control and Data Acquisition (SCADA), Enterprise Resource Planning (ERP), Materials Resource Planning (MRPII) and similar. Typically the development of such a system will be in liaison with an appropriate technical expert who may be an internal expert or an external consultant.

Application of the Unit

This unit applies to an individual responsible for the development and implementation of new systems or modifications/changes to the current system. While the individual might generate the ideas for change themselves and also undertake a significant part of the final implementation, they may also be working closely with an appropriate technical expert (such as the software system supplier) who may actually make the modifications.

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Teamwork, problem solving, initiative and enterprise, and planning and organising skills are required to determine and implement effective enterprise systems and modifications. This unit also requires computer skills and aspects of self-management and learning to ensure feedback and new learning is integrated into system planning.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Monitor information and control needs of organisation	1.1	Check the use of current information
		1.2	Check the operation of current control systems
		1.3	Communicate regularly with key information users regarding any new or changed information control needs, including information needs from and to value stream
		1.4	Identify short comings in information and control provision
		1.5	Take appropriate action on information and control needs to meet organisational needs
2	Check the current system against organisation needs	2.1	Check the routine use of the system
		2.2	Check any system alarm or non-conformance notification and control operation
		2.3	Communicate regularly with key stakeholders about current system use and application
		2.4	Determine effect of non-conformance on enterprise system

- 2.5 Identify problems/issues
 - 2.6 Take appropriate action on problems and issues

- 3 Determine developments needed in a new or significantly modified system
 - 3.1 Identify needs requiring a new system or development of modifications to the current system
 - 3.2 Draft scope, specifications and outcomes required
 - 3.3 Liaise with key stakeholders and relevant technical experts to refine scope, specifications and outcomes needed in new or modified system
 - 3.4 Agree final scope, specifications and outcomes

- 4 Develop system
 - 4.1 Develop project plan
 - 4.2 Ensure ongoing consultation with all relevant stakeholders
 - 4.3 Manage development project
 - 4.4 Manage trialling of modified system
 - 4.5 Ensure modified system meets organisational requirements

- 5 Implement modified system
 - 5.1 Liaise with all affected personnel
 - 5.2 Develop and agree an implementation strategy
 - 5.3 Ensure all personnel have required skills
 - 5.4 Implement modified system
 - 5.5 Monitor implementation and modify, as required

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying organisation needs from enterprise control system, including:
 - critical features (e.g. occupational health and safety (OHS), regulatory compliance and emergency shutdown)
 - essential features and operation controls
 - access levels and access security
 - cost of installation and operation
 - interfaces (e.g. human-machine, machine-machine, and system-system, e.g. SCADA with financial control systems)
- correctly accessing and inputting information
- communicating with stakeholders on information and control requirements
- matching monitoring, control and reporting capability of system to organisation requirements
- analysing features of enterprise system and determining training needs
- solving problems to root cause
- monitoring trials and initial implementation of enterprise control system

Required knowledge

Required knowledge includes:

- capability of resource planning/SCADA systems, as appropriate
- information and control needs of organisation/process
- project management
- support/training/skill development mechanisms available for access by personnel

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • analyse organisation needs and match to enterprise control system features • determine critical features required in enterprise control system • modify system as a result of trials or changing needs.
--	--

<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as SCADA software, ERP systems, MRP and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>SCADA</p>	<p>SCADA refers to:</p> <ul style="list-style-type: none"> • a number of systems which automatically collect critical process data, perform required mathematical

	<p>manipulations on it and then make control decisions and/or give required information personnel for action</p> <p>In the continuous operations sector, the SCADA system is sometimes integrated into other sophisticated computer control systems, such as distributed control system (DCS) and indeed these systems do merge in advanced systems. These organisations may simply refer to their SCADA as the DCS or other similar term (such as the proprietary name of the computer system)</p>
<p>Resource planning</p>	<p>Planning software is a general term applied to a number of software systems which integrate a range of business information, such as:</p> <ul style="list-style-type: none"> • finance • logistics maintenance and production <p>It is frequently referred to by names, such as ERP and MRP/MRP II</p>
<p>Value stream</p>	<p>The value stream begins with the customer and includes all actions (both value adding and non value added) by both internal sections/departments and external organisations to meet a customer requirement.</p> <p>Depending on the operations and the customer requirement stages where value stream actions may occur include:</p> <ul style="list-style-type: none"> • sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support

MSS405061A Determine and establish information collection requirements and processes

Modification History

New unit, superseding MSACMT661A Determine and establish information collection requirements and processes - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to determine what information is needed to support decision-making in a competitive systems and practices environment and then to set about establishing required information collection systems. This would usually be done as part of a team and would require consultation with all key stakeholders.

Application of the Unit

This unit covers the determination of data needs and collection methods for an organisation or specific plant or process. This will typically be done in liaison with a wide range of people, each of whom will have their own specific information requirements. There will need to be balanced and interpreted into a workable set of data to be collected.

This unit is primarily focused on those decisions which are non-routine and so need specific collection of data, or for those decisions which are routine, the establishment of a routine data collection protocol to allow for the decisions to be made based on appropriate, reliable data.

This unit primarily requires the application of communication and problem solving skills associated with determining information requirements and processes of information collection. Initiative and enterprise, and planning and organising are also required to ensure information targets specific factors. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into the development of processes.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|--|-----|--|
| 1 | Analyse decisions to be made | 1.1 | Identify personnel to be included in the analysis process |
| | | 1.2 | Determine the consequences of the decisions in liaison with relevant personnel |
| | | 1.3 | Determine the variables which can be controlled |
| | | 1.4 | Determine the variables which cannot be controlled |
| | | 1.5 | Determine the consequences of a change in these variables in liaison with affected personnel |
| 2 | Define factors which cause variables to change | 2.1 | Identify factors which are able to be controlled |
| | | 2.2 | Identify factors which are not able to be controlled |
| | | 2.3 | Identify means of measuring these factors, or indicators for the values of these factors |
| | | 2.4 | Compile a list of measurements/indicators required. |
| | | 2.5 | Communicate with team members and involve them in development of factors and changes to ensure awareness and facilitate learning |

3	Develop data collection protocols	3.1	Determine methods of making measurements
		3.2	Determine methods of quantifying indicators
		3.3	Determine the benefit/cost of automated (or other) collection of data
4	Develop systems to produce required information	4.1	Identify user of information and their needs and abilities
		4.2	Determine data processing needs to produce required information
		4.3	Determine information distribution channels
		4.4	Determine skill development need for recipients of information
		4.5	Implement systems to produce information
		4.6	Monitor implementation and make adjustments, as required

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating and negotiating at all levels in the organisation and value stream and with individuals of different levels of literacy and numeracy
- negotiating with employees, suppliers and customers, where necessary, to achieve access to, or collection of, data
- undertaking self-directed problem solving and decision-making on issues of a broad and/or highly specialised nature and in a wide variety of contexts
- developing or sourcing indicators for factors not easily measured
- liaising with stakeholders on acceptable limits for benefits and costs in data collection procedures

Required knowledge

Required knowledge includes:

- business needs of the organisation/section
- information needs of individuals within the organisation
- possible data available/potentially available to the organisation
- methods of collecting available data
- relationship between data available and information required
- methods of converting data into useful information
- methods of developing indicators for factors resistant to measurement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • determine relevant data, including variables for decisions • determine factors and variables subject to control • develop strategies for data collection that deliver the greatest overall benefit • implement data collection systems.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p>

	<p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and
---	--

	<p>proprietary systems</p> <ul style="list-style-type: none"> • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Variables	<p>Variables for this unit are:</p> <ul style="list-style-type: none"> • measurable inputs, outputs or characteristic of processes or operations that have no fixed quantitative value.
Factors	<p>Factors include:</p> <ul style="list-style-type: none"> • any variable that is a part of, contributes to, or leads to the quantum of another variable. Ideally factors themselves should be able to be measured. However, in some operations there may be factors that are resistant to objective measurement (e.g. creativity in design, customer colour preferences and life cycles for new products). In these cases indicators for the value of these factors may need to be developed (e.g. through surveys, approximations or experiments)
Decision	<p>A decision may include:</p> <ul style="list-style-type: none"> • a change, improvement, new/altered process or system which requires data in order to monitor it or

	where data is required to make a decision regarding the selection of alternatives

MSS405070A Develop and manage sustainable energy practices

Modification History

New unit, superseding MSACMT670A Develop and manage sustainable energy practices - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to identify opportunities for, and make improvements in, sustainable energy practices in an organisation. Areas covered include efficient use of raw materials, management of waste, electricity conservation, heat conservation and management, water management, environment protection and environment obligations of enterprises.

Application of the Unit

This unit applies to an individual who is required to establish systems for improved energy practices in an organisation. The unit involves analysis of energy used in processes and operations and categorising the energy use according to lean principles. The unit covers categorising energy into necessary use and waste with the waste being further categorised into necessary waste and unnecessary waste. Strategies for eliminating or minimising energy waste are covered with benefit/cost analyses being required for strategies.

This unit primarily requires the application of communication and problem solving skills associated with collecting and analysing information. An ability to analyse energy use of technology or processes will be applied. Initiative and enterprise, and planning and organising are also required to develop plans for efficient energy use. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into the development of processes.

Where the quantum of energy used is not easily available or a formal calculation of energy use is required through an energy balancing calculation (e.g. for regulatory purposes) the unit *MSS015011A Conduct a sustainability energy audit* may also be required.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Analyse energy use	1.1	Identify all energy consuming processes
		1.2	Determine quantity and nature of energy consumed
		1.3	Analyse energy consumed and generated in different parts of the process
		1.4	Determine source of energy consumed in process
2	Develop energy conservation plans	2.1	Determine the efficiency of use of energy by all energy consuming processes
		2.2	Determine causes of low efficiency of use
		2.3	Develop plans for increasing the efficiency of energy use
		2.4	Determine benefit/cost of plans
3	Develop energy trading plans	3.1	Compare energy generating activities with energy consuming activities
		3.2	Determine feasibility of energy consuming activities using energy generated by other activities

		3.3	Develop plans for energy trading
		3.4	Determine benefit/cost of plans
4	Investigate alternative sources of energy	4.1	Develop a specification for energy required
		4.2	Identify a range of sources for that energy
		4.3	Determine benefit/cost for alternative energy sources
5	Develop plans for more efficient energy use	5.1	Compare benefit/costs for different alternatives developed
		5.2	Rank proposals based on benefit/cost compare to limited resources
		5.3	Check proposals meet regulatory requirements
		5.4	Recommend proposals for improving energy efficiency
6	Implement selected plans	6.1	Liaise with relevant people to implement energy efficiency plans
		6.2	Follow through to ensure implementation occurs
		6.3	Monitor implementation and make adjustments, as required
		6.4	Check new energy usage to ensure improvements have occurred

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using common units, symbols and formulae common in energy-related calculations
- applying mathematics

- communicating with a variety of groups and individuals using different media
- solving complex problems individually and as part of a team
- reviewing range of existing data for suitability and determining where new data gathering is required
- planning and organising complex whole of organisation activities relating to energy use, including objectives, timelines, implementation procedures and monitoring strategy
- determining where energy balancing techniques are required
- accessing manufacturers' data and other sources of energy consumption for individual equipment and processes
- mapping processes and energy flows
- calculating, manipulating and interpreting numerical data
- ranking energy consumption and waste for area, sites or processes
- calculating the efficiency of use of energy by equipment and processes
- consulting with technical and operative staff on possible non-obvious energy wastes
- consulting and negotiating with stakeholders on implementation process for sustainability improvement

Required knowledge

Required knowledge includes:

- types and sources of energy
- methods of analysing energy efficiency for different types of energy
- methods of converting energy values from one form to another
- alternative sources of energy
- principles of energy efficiency
- relevant regulatory/legislative requirements
- energy trading schemes and procedures
- organisation and process needs for energy

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • gather appropriate data to allow energy analyses • categorise energy use into necessary use and waste • develop options for energy reduction including

Modification History

Release 2 - Content error in Range and Evidence Guide corrected. Prerequisite unit code corrected - MSS404052A

Release 1 - New unit, superseding MSACMT675A Facilitate the development of a new product* - Equivalent

* New prerequisite *MSS404052A Apply statistics to operational processes* superseding MSACMT452A Apply statistics to processes in manufacturing

Unit Descriptor

This unit of competency covers the skills and knowledge required to facilitate the development of a new or evolutionary product within an existing range of products and encompasses design for manufacture, determining the process capability and the facilitation of its initial production.

Application of the Unit

This competency applies to an individual responsible for the development of a new product. The unit assumes an initial product design has been prepared by a designer and also assumes a working knowledge of all main processes and materials so that an informed choice can be made between them. The person will normally be a manager or technical expert and be required to work closely with a range of other management and operations personnel.

The unit requires balancing the business and technical sides of the new product and would typically be done as part of a cross-functional team. This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Teamwork, problem solving, initiative and enterprise, and planning and organising are required to facilitate the development of a new product. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Confirm design brief of new product in consultation with relevant people	1.1	Review product design with customer and other key stakeholders and agree on technical specification, aesthetic requirements, timelines, cost and other market requirements
		1.2	Determine any regulatory, industry code/intellectual property requirements for product
		1.3	Identify any required tooling, process or equipment needs
		1.4	Confirm design brief, including relevant drawings, to meet needs
		1.5	Determine design brief conforms to organisation objectives and capability
		1.6	Obtain approval on total design brief from all relevant personnel
2	Determine material requirements for product	2.1	Select appropriate materials or combination of materials/components in liaison with key stakeholders
		2.2	Determine material/component testing and evaluation regime required to meet product end use requirements,

- including regulatory/industry code requirements
- 2.3 Arrange for testing and evaluation of trial materials/components
 - 2.4 Guide material trial process and interpret material trial results
 - 2.5 Determine final materials/components specifications and details of value chain
- 3 Determine process requirements for product
 - 3.1 Select appropriate process to make product in liaison with key stakeholders and based on relevant factors
 - 3.2 Determine any special process/equipment requirements for this product
 - 3.3 Communicate with production personnel to determine any concerns and/or training or other needs
 - 3.4 Adjust the design, as required, to satisfy customer and production needs
- 4 Ensure process needs for new product have been met
 - 4.1 Liaise with equipment design/procurement personnel
 - 4.2 Interpret hardware specifications and ensure they are appropriate for the job required
 - 4.3 Liaise with process personnel to ensure appropriate draft procedures for new product have been developed
 - 4.4 Validate product cost and design meets organisation requirements and capability
- 5 Trial new product through the process
 - 5.1 Design trialing procedure to deliver required information
 - 5.2 Liaise with relevant stakeholders
 - 5.3 Ensure health safety and environment (HSE) requirements are observed
 - 5.4 Coordinate the trialling of the new product
 - 5.5 Interpret product trial results and guide product trial

- process
- 5.6 Tune process to optimise production of new product
- 6 Determine process capability
- 6.1 Plot appropriate statistical process control charts
- 6.2 Determine confidence limits
- 6.3 Compare confidence limits with product specification
- 7 Coordinate product trials
- 7.1 Determine product testing and evaluation regime required to meet end use requirements, including regulatory/industry code requirements
- 7.2 Arrange for testing and evaluation of trial product/prototype
- 7.3 Interpret product trial results and guide product trial process
- 7.4 Determine final product specification in liaison with key stakeholders
- 7.5 Make required changes to materials, process and equipment
- 8 Implement standard procedures for new product
- 8.1 Monitor initial production and, in liaison with appropriate team members, adjust process, conditions and materials to ensure the product and process outcomes conform to customer, regulatory and organisation requirements
- 8.2 Ensure process specifications are updated and reflect the optimised operation developed
- 8.3 Ensure standard operating procedures are correct for the new product
- 8.4 Ensure equipment and other hardware records are updated to reflect additions/changes
- 8.5 Ensure project records are complete and all required reports have been completed and submitted

8.6 Archive records according to company procedure

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- selecting and justifying the selection of:
 - type of material/material specification
 - appropriate process for a range of product/market applications
 - material and product testing procedures
- applying theoretical principles to predict:
 - properties of product based on materials selected
- identifying effects of processes and processing on the final properties of the product mathematically determine:
 - product cost estimates
 - process time
 - cost/benefit to organisation of new product
- communicating at all levels in the organisation and value stream and to audiences of different levels of literacy and numeracy
- interpreting and making recommendations based on:
 - field test results
 - market analysis data
 - trialling data
 - organisation objectives and business plan
 - equipment and operations capacity

Required knowledge

Required knowledge includes:

- materials, equipment and process sufficient to choose an appropriate combination of materials and process to achieve the end use function of the product
- enterprise procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • ensure the development of a new product meets general organisation guidelines and objectives • liaise with the required people • optimise the process for the new product at the completion of the development phase • assess materials and components characteristics required in a design including material grades and properties and the effects of processing on materials and components • use trial outcomes to determine standard procedures for manufacture and/or operation of new product.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of

	<p>contingencies, improvement scenarios, and so on)</p> <ul style="list-style-type: none"> • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S
--	---

	<ul style="list-style-type: none"> • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Organisation objectives and requirements	<p>Organisation objectives and requirements may include:</p> <ul style="list-style-type: none"> • Board or management guidelines on: <ul style="list-style-type: none"> • cost/profit requirements for new products (e.g. minimum return and capital expenditure limits) • encouragement/discouragement of different types of products (e.g. on sustainability, ethical or other non-individual customer related criteria) • potential or actual capacity conflicts with other customers or product/process activities • activities that require/may require community consultation (e.g. on noise or other environmental grounds)
Tools and equipment	<p>Tools and equipment may include:</p> <ul style="list-style-type: none"> • understanding of use of all standard processing equipment • relevant personal protective equipment
Typical regulatory requirements	<p>Typical regulatory requirements may include:</p> <ul style="list-style-type: none"> • occupational health and safety (OHS) • environmental regulations • structural codes • product/industry specific requirements

MSS405081A Develop a proactive maintenance strategy

Modification History

New unit, superseding MSACMT681A Develop a proactive maintenance strategy - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to develop and implement a proactive maintenance strategy for an organisation. The unit recognises that there are a number of predictive or proactive maintenance strategies, such as total productive maintenance (TPM) and reliability centred maintenance (RCM).

Application of the Unit

This unit applies to an individual responsible for developing a proactive maintenance strategy for an organisation. Typically the organisation will also be implementing other competitive systems and practices. The unit applies to the selection of appropriate strategies, initial development and implementation as well as application of the strategies to new areas and the improvement of operation in existing areas. This would typically be done in a team environment and in consultation with all key stakeholders.

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Teamwork, problem solving, initiative and enterprise, and planning and organising are required to develop and implement a predictive maintenance strategy. Strategies will incorporate the maintenance requirements of relevant technologies. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into maintenance strategies.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Determine appropriate analytical techniques	1.1	Liaise with key stakeholders to determine objectives of maintenance strategy
		1.2	Examine current maintenance situation to determine major areas requiring improvement
		1.3	Compare possible strategies, techniques and tools against organisation needs
		1.4	Select possible strategies, techniques and tools
		1.5	Confirm selected strategies, techniques and tools with key stakeholders
2	Develop reliability strategies	2.1	Select preferred maintenance strategy
		2.2	Examine and adapt strategy to organisation needs and priorities
		2.3	Examine and adapt techniques and tools required to implement strategy
		2.4	Liaise with key stakeholders to develop an implementation plan
		2.5	Identify key information and performance indicators required
3	Implement strategy	3.1	Identify data collection required
		3.2	Identify hardware and other resources required

- | | | |
|---|------------------------------------|---|
| | 3.3 | Identify skill needs required in consultation with key stakeholders |
| | 3.4 | Ensure all resources/training are available |
| | 3.5 | Implement strategy |
| 4 | Monitor implementation of strategy | |
| | 4.1 | Compare information/performance indicators with desired levels |
| | 4.2 | Liaise with key stakeholders regarding strategy issues |
| | 4.3 | Identify areas requiring adjustment |
| | 4.4 | Make required adjustments |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others using a variety of media and techniques
- adapting personal communication strategy to different levels of literacy and numeracy in target individuals and groups
- working in a team
- analysing quantitative and qualitative information to determine proactive maintenance strategy options
- solving problems to root cause
- applying basic arithmetic and statistical techniques
- planning complex strategies, including consideration of timelines, resources, benefit/cost, implementation requirements, and monitoring and adjustment considerations
- reading and interpreting engineering specifications, drawings and charts
- using information system terminals and computers
- prioritising options, including reasons and recommendations
- recording data

Required knowledge

Required knowledge includes:

- characteristics and strengths of different types of strategies, techniques and tools, such as:
 - TPM
 - RCM
 - mean time between failure (MTBF)
 - failure mode effects analysis (FMEA)
 - condition monitoring
 - root cause analysis (RCA)
- holistic costs of different strategies combining cost of maintenance with costs of lost production, sales, and so on, as relevant to the organisation
- business goals sufficient to match the strategy to the business needs
- strategic thinking and its application to proactive maintenance
- principles of process equipment and how to improve its reliability
- resources required and how to obtain them

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • consider a variety of proactive maintenance strategies for suitability to an organisation • consult operators, maintenance, management and other stakeholders in decisions on proactive maintenance strategies • implement selected strategies • monitor performance to selected indicators and make improvements to selected proactive maintenance strategies.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented

	<p>changes to work processes and procedures relevant to the assessee</p> <ul style="list-style-type: none"> • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning for appropriate portions • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>OEE</p>	<p>OEE is the combination of the main factors causing loss of productive capacity from equipment/plant and is:</p> $OEE = \text{availability} \times \text{performance} \times \text{quality rate}$ <p>where:</p> <ul style="list-style-type: none"> • availability takes into account losses due to breakdown, set-up and adjustments • performance takes into account losses due to minor

	<p>stoppages, reduced speed and idling</p> <ul style="list-style-type: none"> quality rate takes into account losses due to rejects, reworks and start-up waste
MTBF	<p>MTBF is one key measure of the effectiveness of a maintenance procedure, and is an indicator as to whether root causes are being found and resolved. If MTBF is reducing, then it is an indicator that the maintenance regime is failing.</p> <p>There are many possible causes of any problem. Eliminating some will have no impact, others will ameliorate the problem. However, elimination of the root cause will eliminate the problem. There should only be one root cause for any problem and so the analysis should continue until this one cause is found. Elimination of the root cause permanently eliminates the problem.</p> <p>Depending on the equipment, operations and procedures of the organisation, alternative statistical records of maintenance and maintenance-related events may be substituted for MTBF providing they relate strategies for improving OEE.</p>
FMEA	<p>FMEA is a systematic approach that identifies potential failure modes in a system, product, or operations/assembly operation caused by either design or operations/assembly process deficiencies. It also identifies critical or significant design or process characteristics that require special controls to prevent or detect failure modes. FMEA is a tool used to prevent problems from occurring.</p> <p>Some industry sectors have highly adapted forms of FMEA and may practice traditional FMEA in say their routine maintenance while using another technique, such as Hazard and Operability Studies (HAZOP) for design and modification.</p> <p>HAZOP is a form of FMEA which has been practiced by the process industries for over 30 years and examines the implications of changes in process conditions to process stability.</p>
Condition monitoring	<p>Condition monitoring is used to describe the process of analysing the implications of condition monitoring data for proactive maintenance whether it be obtained from non destructive testing (NDT) reports, visual assessment by experts, diagnostic reports obtained from SCADA or other enterprise or equipment software and product or process quality analyses. It does not require the actual</p>

	undertaking of the NDT or condition monitoring assessment or test. If this is required appropriate units from other Training Packages will be required.

MSS407003A Analyse process changes

Modification History

New unit, superseding MSACMG703A Analyse process changes - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to quantitatively analyse past changes made in an organisation's the operations, systems, process or environment to ensure the quantum of expected change has been achieved and that gains are maintained and are used as a basis for further gains.

The unit includes statistical and other mathematical analysis of data, methods for capturing data on implemented changes (quantitative and qualitative) and producing useful information from this data. It includes consultation with stakeholders both for data validation and consensus decision-making for future improvements.

Application of the Unit

This unit applies to team leaders, technical experts and people with a similar sphere of influence/scope of authority and responsibility who are already have a knowledge of statistics used in managing operations and of process capability improvement and some knowledge of factorial design, the selection and analysis of appropriate metrics, and the discrimination between valid and invalid interpretations of data. Where this is not the case *MSS404050A Undertake process capability improvements* and *MSS404052A Apply statistics to operational processes* may be completed to supply the necessary statistical skills.

If this unit is being applied to a complex change process or a complex operations process, it may be an advantage to have completed *MSS405052A Design an experiment* before completing this unit. Where this unit is being applied in a six sigma environment then knowledge and skill in six sigma techniques may also be an advantage. *MSS405053A Manage application of six sigma for process control and improvement* can be completed to supply these skills.

The unit applies to reviews of both intended and unintended consequences of change and the effectiveness of the implementation of the change. This unit is not intended to be applied to a technical or engineering review of a major capital expenditure or similar.

This unit takes a largely quantitative approach to the review. For skills associated with a more qualitative review refer to *MSS407005A Undertake a qualitative review of a process change*.

This unit may also be applied to service organisations applying competitive systems and practices principles.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|------------------|-----|---|
| 1 | Analyse a change | 1.1 | Identify changes which have occurred |
| | | 1.2 | Select a change or group of related changes to analyse |
| | | 1.3 | Determine the initiation of the selected change |
| | | 1.4 | Identify relevant metrics and predicted values for these metrics |
| | | 1.5 | Gather data for these metrics prior to the change |
| | | 1.6 | Gather data and information on the implementation of the change |
| | | 1.7 | Gather data for these metrics after the change |
| | | 1.8 | Survey all key metrics and identify any where variations may correlate with the change being analysed |
| | | 1.9 | Discuss results of change with key stakeholders and |

- identify other possible (qualitative or quantitative) results of the change
- 1.10 Analyse this data to determine the results of the change
- 2 Review results of change with stakeholders
- 2.1 Identify trends over time in all relevant metrics
- 2.2 Analyse correlated metrics to determine causal relationship
- 2.3 Audit health, safety and environment (HSE) impacts as a result of the change
- 2.4 Present information in a form understandable by stakeholders
- 2.5 Discuss analysed information with relevant stakeholders
- 2.6 Modify information based on stakeholder input, as required
- 2.7 Develop a consensus view of the result of the change which is supported by the information available
- 2.8 Validate the consensus view with stakeholders
- 3 Identify future improvements
- 3.1 Discuss lessons learned from the change with stakeholders
- 3.2 Capture key knowledge in accordance with systems and procedures
- 3.3 Identify future improvements in collaboration with team members
- 3.4 Validate identified changes with stakeholders
- 3.5 Obtain sign off from process/system owner
- 3.6 Start the process for implementing future improvements
- 3.7 Check that the planned improvements are occurring
- 3.8 Take action to sustain improvement by standardising

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- researching past performance of plant, operations, products and procedures, including metrics used
- identifying trends, causal relationships and correlations in metrics
- communicating and explaining quantitative data with others across a range of numeracy and literacy levels
- analysing views and reasons put forward by others on past performance and relating to evidence
- analysing views and reasons put forward by others for future changes and improvements and form recommendations
- identifying key HSE strategies and risks for area of responsibility and identifying sources of expert assistance
- preparing submissions and presenting case for future changes

Required knowledge

Required knowledge includes:

- competitive systems and practices principles, processes and techniques
- organisational goals, products and processes
- processes and procedures for continuous improvement in the workplace
- statistical process control (SPC) and principles
- methods of determining the impact of a change using quantitative analysis of process data, including advanced statistical/mathematical analysis and basic qualitative techniques
- organisation metrics
- sources of data (actual and possible) within the organisation and the value stream
- range of typical metrics, their applications and limitations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • analyse process changes • identify changes • gather data and information over a period and range that will provide a valid basis for analysis • select and use appropriate data analysis tools • present information in a suitable form • obtain a consensus view of the results of the change • determine the lessons to be learned and future improvements to be undertaken.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess</p>

	<p>underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving
--	--

	<ul style="list-style-type: none"> • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Codes of practice/standards	Where changes include areas covered by industry codes of practice, and/or Australian/international standards, the latest version must be used
Gather prior data	Where all suitable data was not collected prior to the change a suitable proxy for the data will be needed
HSE	All changes implemented are expected to be at least neutral, or preferably beneficial, in their impact on HSE
Change	<p>Changes may:</p> <ul style="list-style-type: none"> • be to plant, operations, products, procedures or practice • arise from continuous improvement (or an improvement event/project) or implementing new products, technology or systems • may have been intended to make an improvement or to implement new products, technology or systems • include the implementation of a change <p>Changes do not include an engineering review of a major capital expenditure or similar review</p>
Initiation of change	Changes need to be identified as either deliberately or not deliberately initiated. Where a change was not deliberately initiated then the causal factors for the change need to be identified
Correlated metrics	<p>Correlated metrics include:</p> <ul style="list-style-type: none"> • any metric which appears to show a chronological correlation with the change being analysed. These metrics need to be examined to determine if the change has a causal relationship or is simply coincidental
Presentation of information	Information may be presented:

	<ul style="list-style-type: none"> • in appropriate visual forms (e.g. graphs, charts and noticeboards) • verbally or other forms able to be understood and used by stakeholders
Stakeholders	<p>Stakeholders may include:</p> <ul style="list-style-type: none"> • work team members • value stream members • managers
Results of change	<p>The change results may include:</p> <ul style="list-style-type: none"> • an initial improvement followed by a return to previous performance • continued improvement • continued detriment or other variations over time
Improvements	<p>Improvements may:</p> <ul style="list-style-type: none"> • be to operations, process, plant, procedures or practice • include changes to ensure positive benefits are maintained
Sustaining improvement	<p>Improvement may be sustained by including it in:</p> <ul style="list-style-type: none"> • standard procedures and work instructions • standard practice • other relevant documents and practices
Team leader	<p>Team leader may include:</p> <ul style="list-style-type: none"> • any person who may have either a permanent or an ad hoc role in facilitating the function of a team in a workplace

MSS407012A Lead a problem solving process to determine and solve root cause

Modification History

New unit, superseding MSACMG712A Lead a problem solving process to determine and solve root cause - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to guide or lead a problem solving process to solve complex and/or unusual problems. The problem solving process will usually involve the use of either real or nominal groups to determine the root cause and propose the solution.

Application of the Unit

This unit will typically be undertaken by managers and/or technical experts who are confronted by a complex problem to which they need to develop a solution. The problem may be related to any area or process within the organisation or in the value stream and may have been formally presented to the individual for consideration or arise as part of other work.

The person may or may not have the required technical expertise for the particular problem, although the problem will require technical expertise to be solved. The problem may be capable of being adequately defined at the beginning of the problem solving activity, or may be progressively defined through continued iterations of the problem solving activity.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Recognise complex problem	1.1	Identify a complex issue which needs to be addressed
		1.2	Undertake an initial investigation of the issue
		1.3	Determine initial areas of expertise and data which may be required to analyse the problem
		1.4	Develop an initial definition of the problem
2	Develop problem solving methodology	2.1	Draft a problem solving methodology
		2.2	Develop required approaches and protocols for obtaining required data and information
		2.3	Establish group to assist with problem solving
		2.4	Allocate tasks, responsibilities and reporting arrangements to group
		2.5	Develop arrangements for consultation with required people outside of group
3	Analyse problem	3.1	Apply methodology
		3.2	Obtain data/information
		3.3	Review problem definition
		3.4	Review methodology
		3.5	Obtain additional data/information as required

4	Identify root cause	4.1	Map causal links for the problem
		4.2	Determine indicators of the problem or the problem precursors
		4.3	Identify causes which can be controlled/brought under control
5	Develop a solution	5.1	Develop solutions for controllable causes
		5.2	Determine benefit/cost for proposed solutions
		5.3	Investigate proposed solutions for efficacy
		5.4	Select the best available solution
		5.5	Obtain necessary support and authorisations for proposed solution
6	Check problem is solved and standardised	6.1	Monitor indicators of problem/problem precursor
		6.2	Review problem solution/implementation as required
		6.3	Ensure appropriate solution is standardised

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- cooperating and working with others, both internally and externally to the work group
- researching and collating information from a variety of sources, including non-obvious sources
- analysing and planning in highly varied and/or highly specialised contexts
- quantitative and qualitative data interpretation and application skills
- communicating effectively (both receiving and sending communications)
- applying problem solving methodology, including:

- cross-functional problem solving team
- cross-functional nominal group (virtual team)
- consulting and or brainstorming with members from outside the organisation on some basis
- input from other members of the value stream
- the use of known/proprietary problem solving approaches or some synthesis of methods
- own or commissioned research either in whole or in part
- prioritising possible solutions on benefit/cost basis and value to the customer
- selecting solution and checking efficacy, including checking:
 - the solution breaks the causal tree
 - other causes are not able to cause the problem
 - benefit/cost ratio is acceptable
 - solution can be implemented
 - permanence of solution
- standardising solutions by:
 - checking that implemented solution solves the problem
 - solution can be applied to all relevant standards within the organisation, including:
 - standard operating procedures/work instructions
 - actual work practice
 - maintenance manuals and similar
 - product and/or process specifications

Required knowledge

Required knowledge includes:

- organisational goals, products and processes
- sources of data (actual and possible) within the organisation and the value stream
- understanding of the techniques and methodologies of formal problem solving
- data required for problem solving and alternative/proxy data sources
- benefit/cost analysis

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

MSS408005A Develop the learning processes of the operations organisation

Modification History

New unit, superseding MSACMG805A Develop the learning processes of the manufacturing organisation - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to ensure that knowledge relevant to performance improvement and the meeting of customer requirements is gathered, applied and retained by the organisation and individuals. This unit focuses on the processes in an organisation for extracting learning as it appears, capturing it in a manner which makes it available for future use and applying it to work.

Application of the Unit

The unit is intended for managers and people with a similar sphere of influence and scope of authority and responsibility who are familiar with competitive systems and practices and workplace learning. Where this is not the case *MSS405012A Manage workplace learning* may be completed to supply the necessary skills.

The equivalent team leader unit is *MSS407008A Capture learning from daily activities in a organisation*.

This unit may also be applied to service organisations applying competitive systems and practices principles.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|---|-----|--|
| 1 | Identify processes generating new knowledge | 1.1 | Identify any existing systems for organisational learning |
| | | 1.2 | Encourage the open discussion of current performance and problems |
| | | 1.3 | Facilitate consensus problem solving |
| | | 1.4 | Ensure both qualitative and quantitative knowledge are captured |
| | | 1.5 | Validate findings with relevant managers |
| 2 | Develop knowledge capture and retrieval systems | 2.1 | Obtain required approvals |
| | | 2.2 | Provide useable systems for recording of problems, causes and solutions |
| | | 2.3 | Facilitate the extraction of knowledge from records |
| | | 2.4 | Ensure all project work captures generated knowledge |
| | | 2.5 | Ensure knowledge is in a form able to be applied by the organisation and its personnel |
| | | 2.6 | Develop knowledge storage and retrieval systems |
| | | 2.7 | Monitor knowledge capture system use and suitability |
| 3 | Improve the application of | 3.1 | Ensure knowledge is distributed to and available where needed |

organisational knowledge	3.2	Ensure knowledge system is part of standard procedures and practices
	3.3	Encourage the routine use of the knowledge system
	3.4	Facilitate open discussion of knowledge and knowledge system
	3.5	Identify inhibitors to greater use of knowledge
	3.6	Take actions to improve application of organisational knowledge
	4 Evaluate and improve learning processes	4.1
4.2		Evaluate benefits obtained from knowledge system
4.3		Identify areas where the knowledge system is not being fully utilised
4.4		Identify areas where greater benefits could be obtained from the knowledge system
4.5		Discuss areas of possible improvements with relevant managers and other stakeholders
4.6		Develop consensus improvement plans for the knowledge system
4.7		Obtain required approvals
4.8		Train personnel, as required, to improve use
4.9		Implement improvement plans

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- undertaking self-directed problem solving and decision-making

- communicating across all levels in an organisation
- preparing reports and recommendations
- implementing knowledge capture systems that cover:
 - existing plant and equipment modifications
 - changes to procedures and operations for information technology (IT) related systems and equipment
 - operations procedure and practice changes
 - new plant, equipment and processes
 - daily problem solving and continuous improvement activities
 - specific improvement events (e.g. kaizen blitz)
 - incident reports
 - reliability/maintenance reports
 - customer feedback
 - feedback from value stream members
- accessing and analysing current performance, including:
 - output indicators
 - input indicators
 - health, safety and environment (HSE) indicators
 - reliability/maintenance indicators
 - continuous improvement indicators
- implementing, monitoring and adjusting improvements to the knowledge system, including:
 - improving integration of knowledge system with other organisation and value stream development processes
 - improving identification of new knowledge
 - improving capture ease and efficiency
 - improving search and application functionality
- analysing performance outside the normal range (good or bad) and assignable cause

Required knowledge

Required knowledge includes:

- competitive systems and practices principles and tools, including:
 - value stream mapping
 - 5S
 - Just in Time (JIT)
 - mistake proofing
 - process mapping
 - establishing customer pull
 - incremental and breakthrough improvement

- setting of key performance indicators (KPIs)/metrics
- identification and elimination of waste (muda)
- organisational goals strategies, operations and processes
- approval processes within organisation
- cost/benefit analysis methods
- methods of determining the impact of a change
- communication methods and media for a range of audiences
- customer perception of value
- reward systems
- learning and knowledge management systems

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • review learning process across the organisation • relate learning processes to implementation of competitive systems and practices • identify components of current system that require improvement • develop improvements to current learning system, including setting of system metrics • manage implementation of improvements.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers

	<ul style="list-style-type: none"> case studies and scenarios to assess responses to contingencies.
Method of assessment	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> demonstration in the workplace workplace projects suitable simulation case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) targeted questioning reports from supervisors, peers and colleagues (third-party reports) portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> lean operations agile operations preventative and predictive maintenance approaches monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA)
--	--

	<p>software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems</p> <ul style="list-style-type: none"> • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Codes of practice/standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used
HSE	All changes implemented are expected to be at least neutral, or preferably beneficial, in their impact on HSE
Problems	Problems may include: <ul style="list-style-type: none"> • non-conformances and other opportunities for improvement
Develop	Develop includes: <ul style="list-style-type: none"> • establishing and improving
Organisational learning	Organisational learning refers to learning intended to be applied across the whole organisation or by specific teams, work areas or individuals

Knowledge forms	<p>Knowledge may be:</p> <ul style="list-style-type: none"> quantified or otherwise modified to make its outcomes measurable or observable as appropriate to the knowledge and its application
Improvements	<p>Improvements may:</p> <ul style="list-style-type: none"> be to process, plant, service, procedures or practice include changes to ensure positive benefits are maintained
Manager	<p>Manager may include:</p> <ul style="list-style-type: none"> any person who may have either a permanent or an ad hoc role in facilitating the function of multiple teams in a workplace, departments or entire organisations

MSS408006A Develop and refine systems for continuous improvement in operations

Modification History

New unit, superseding MSACMG806A Develop and refine systems for continuous improvement in manufacturing organisations - Equivalent

Unit Descriptor

This unit of competency covers the skills, knowledge and processes required to ensure that continuous improvement systems do not stultify and continue to improve along with other operational systems in an organisation.

This unit is about improving the process yield/unit of effort or cost, reducing process variation and increasing process reliability, upgrading, enhancing or refining process outputs, and includes developing a culture of reviewing and sustaining change ensuring improvements are maintained and built on.

Application of the Unit

This unit applies to managers and people with a similar sphere of influence and scope of authority and responsibility and who are familiar with competitive systems and practices, continuous improvement and locking in improvements. Where this is not the case the following units may be completed to supply the necessary skills:

MSS405001A Develop competitive systems and practices for an organisation

MSS405013A Facilitate holistic culture improvement in a operations organisation.

The equivalent team leader level unit is MSS407013A Review continuous improvement processes.

This unit may also be applied to service organisations applying competitive systems and practices principles.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Establish parameters of current internal improvement systems	1.1	Describe organisation systems that impact on continuous improvement
		1.2	Identify current relevant metrics and their values
		1.3	Check that metrics are collected for all improvements
		1.4	Determine yield of current improvement processes
		1.5	Review results of improvements
2	Distinguish breakthrough improvement processes	2.1	Identify all improvements which have occurred over an agreed period of time
		2.2	Distinguish between breakthrough improvements and continuous improvements
		2.3	Determine the timing of breakthrough improvement processes
		2.4	Analyse factors controlling the timing and selection of breakthrough improvements
		2.5	Analyse continuous improvements to identify cases where breakthrough improvements were required
		2.6	Validate findings with process/system owners and obtain

- required approvals
- 2.7 Improve timing/selection of breakthrough improvements
- 2.8 Improve other factors limiting the gains from breakthrough improvements
- 3 Develop continuous improvement practice
 - 3.1 Check that levels of delegated authority and responsibility are appropriate for continuous improvement from the shop floor
 - 3.2 Ensure all personnel have appropriate capabilities for continuous improvement processes
 - 3.3 Ensure personnel and systems recognise potential breakthrough improvement projects
 - 3.4 Ensure sufficient resources are available for the operation of continuous and breakthrough improvement processes
 - 3.5 Check that relevant information flows from improvement changes to all required areas and stakeholders
 - 3.6 Check data collection and metrics analysis capture changes which result from improvement actions
 - 3.7 Check that improvement changes are standardised and sustained
 - 3.8 Check review processes for routine continuous improvements
 - 3.9 Remove or change factors limiting gains from improvements
 - 3.10 Modify systems to ensure appropriate possible changes are referred to other improvement processes
 - 3.11 Institutionalise breakthrough
- 4 Establish parameters of current external improvement
 - 4.1 Review value stream systems that impact on improvement
 - 4.2 Review procedures for deciding improvement

	systems		methodologies
		4.3	Identify current relevant metrics and their values, as appropriate
		4.4	Determine yield of current improvement processes
		4.5	Review results of improvements
5	Explore opportunities for further development of value stream improvement processes	5.1	Review mechanisms for consultation with value stream members
		5.2	Develop mechanisms for further improving joint problem solving
		5.3	Develop mechanisms for increased sharing of organisational knowledge
		5.4	Obtain support and necessary authorisations from process/system owners
		5.5	Capture and standardise improvements
		5.6	Improve factors limiting gains from continuous improvements
6	Review systems for compatibility with improvement strategy	6.1	Review all systems which impact or are impacted on improvements and the improvement system
		6.2	Analyse relationships between improvement systems and other relevant systems
		6.3	Analyse practices caused by and results from the systems
		6.4	Negotiate changes to the systems to improve the outcomes from improvement systems
		6.5	Obtain necessary approvals to implement changes
		6.6	Monitor the implementation of the changes

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- undertaking self-directed problem solving and decision-making on issues of a broad and/or highly specialised nature and in highly varied and/or highly specialised contexts
- communicating at all levels in the organisation and value stream and to audiences of different levels of literacy and numeracy
- analysing current state/situation of the organisation and value stream
- determining and implementing the most appropriate method for capturing value stream improvements
- collecting and interpreting data and qualitative information from a variety of sources
- analysing individually and collectively the implementation of competitive systems and practices tools in the organisation and determining strategies for improved implementation
- relating implementation and use of competitive systems and practices and continuous improvement to customer benefit
- solving highly varied and highly specialised problems related to competitive systems and practices implementation and continuous improvement to root cause
- negotiating with stakeholders, where required, to obtain information required for implementation and refinement of continuous improvements, including management, unions, value stream members, employees and members of the community
- reviewing relevant metrics, including all those measures which might be used to determine the performance of the improvement system, including:
 - key performance indicators (KPIs) for existing processes
 - quality statistics
 - delivery timing and quantity statistics
 - process/equipment reliability ('uptime')
 - incident and non-conformance reports
- implementing continuous improvement to support systems and areas, including maintenance, office, training and human resources

Required knowledge

Required knowledge includes:

- competitive systems and practices tools, including:
 - value stream mapping
 - 5S
 - Just in Time (JIT)
 - mistake proofing

- process mapping
- establishing customer pull
- kaizen and kaizen blitz
- setting of KPIs/metrics
- identification and elimination of waste (muda)
- continuous improvement processes including implementation, monitoring and evaluation strategies for a whole organisation and its value stream
- difference between breakthrough improvement and continuous improvement
- organisational goals, processes and structure
- approval processes within organisation
- cost/benefit analysis methods
- methods of determining the impact of a change
- advantages and disadvantages of communication media, methods and formats for different messages and audiences
- customer perception of value
- define, measure, analyse, improve, and control and sustain (DMAIC) process

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • critically review current continuous improvement processes • establish ongoing review of continuous improvement processes • implement improvements in the practice of continuous improvement • better align internal and external systems • gather data through interviews with stakeholders • review existing data • obtain additional data through a variety of techniques • communicate and negotiate at all levels within the organisation
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p>

	<p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning for appropriate portions • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised wording, if used in the***

performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Codes of practice/standards</p>	<p>Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used</p>
<p>Health, safety and environment</p>	<p>All changes implemented are expected to be at least</p>

(HSE)	neutral, or preferably beneficial, in their impact on HSE
Organisation systems	<p>Organisation systems may include:</p> <ul style="list-style-type: none"> • problem recognition and solving • operational/process improvement • improvement projects • product/process design and development • processes for making incremental improvements
Relevant metrics	<p>Relevant metrics include all those measures which might be used to determine the performance of the improvement system and may include:</p> <ul style="list-style-type: none"> • hurdle rates for new investments • KPIs for existing processes • quality statistics • delivery timing and quantity statistics • process/equipment reliability ('uptime') • incident and non-conformance reports • complaints, returns and rejects
Improvement process yield	<p>Improvement process yield may be regarded as:</p> <ul style="list-style-type: none"> • the benefit achieved for the effort invested
Breakthrough improvements	<p>Breakthrough improvements include:</p> <ul style="list-style-type: none"> • those which result from a kaizen blitz or other improvement project or event and are a subset of all improvements
Timing of breakthrough improvements	<p>Timing of breakthrough improvements includes:</p> <ul style="list-style-type: none"> • frequency (which should be maximised) and duration (which should be minimised) of events/projects
Continuous improvement	<p>Continuous improvement is part of normal work and does not require a special event to occur (although may still require authorisations) and contrasts with breakthrough improvement/kaizen blitz which occurs by way of an event or project</p>
Resources for improvement	<p>Resources for improvements include:</p> <ul style="list-style-type: none"> • improvement budget • guidelines for trialling of possible improvements • mechanism for approvals for possible improvements • business case guidelines for proposed improvements • indicators of success of proposed improvement • mechanisms for tracking and evaluation of changes

	<ul style="list-style-type: none"> • forum for the open discussion of the results of the implementation • mechanisms for the examination of the improvement for additional improvements • organisation systems to sustain beneficial changes
Capturing value stream improvements	<p>Capturing value stream improvements includes:</p> <ul style="list-style-type: none"> • revised contractual arrangements • revised specifications • signed agreements • other documented arrangements which formalise the raised base line
Systems impacting improvements	<p>Systems which impact/are impacted on improvements and the improvement system include:</p> <ul style="list-style-type: none"> • office • purchasing • rewards (individual or team at all levels) • sales • marketing • maintenance • process/product • transport and logistics
Organisational knowledge	<p>Organisational knowledge should:</p> <ul style="list-style-type: none"> • be able to be quantified or otherwise modified to make its outcomes measurable or observable • be able to be expressed in an accessible and distributable form appropriate to the organisation operations and stakeholders
Improvements	<p>Improvements may:</p> <ul style="list-style-type: none"> • be to process, plant, procedures or practice • include changes to ensure positive benefits to stakeholders are maintained
Manager	<p>Manager may include:</p> <ul style="list-style-type: none"> • any person who may have either a permanent or an ad hoc role in facilitating the function of multiple teams in a workplace, departments or entire organisations

MSS408007A Develop problem solving capability of an organisation

Modification History

New unit, superseding MSACMG807A Develop problem solving capability of a manufacturing organisation - Not equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to develop problem solving skills of individuals within an organisation and as a consequence the problem solving capability of the organisation as a whole. The unit does not supply the skills to undertake formal problem solving on individual problems.

Application of the Unit

This unit is intended for organisation leaders/managers and people with a similar sphere of influence and scope of authority and responsibility. It applies where problem solving is already routine in the organisation and improving individual and organisational problem solving capability has been accepted as part of the organisation's improvement processes.

The unit applies to individuals who are already familiar with formal problem solving processes. Where this is not the case the following units may be completed to supply the necessary skills:

- *MSS402080A Undertake root cause analysis*
- *MSAPMSUP390A Use structured problem solving tools.*

For high level complex problem solving skills refer to *MSS407012A Lead a problem solving process to determine and solve root cause.*

This unit may also be applied to service organisations applying competitive systems and practices principles.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Develop an appropriate organisational framework	1.1	Determine or review available problem finding strategies in the organisation
		1.2	Analyse the current selection and application of problem solving tools and gauge effectiveness
		1.3	Determine preferred problem solving strategies for the organisation
		1.4	Determine or review the desired outcomes from use of selected problem solving strategies
		1.5	Review organisational structure to facilitate improvement in problem solving
		1.6	Develop a training strategy to improve problem solving ability
		1.7	Develop reporting framework and guidelines
		1.8	Develop corrective action identification and tracking systems
		1.9	Obtain support from relevant process/system owners for proposed changes
2	Improve problem	2.1	Implement training strategy

solving ability	2.2	Ensure problem solving occurs using groups or teams
	2.3	Provide resources to ensure problem solving occurs
	2.4	Confirm with teams and groups that training and resources deliver capability to solve complex problems
	2.5	Monitor problem solving to determine if improvement in developing problem solving solutions is achieved
	2.6	Provide resources to ensure solutions are implemented
	2.7	Ensure reporting and corrective action tracking occurs
	3 Review problem solving effectiveness	3.1
3.2		Determine benefit/cost from solutions
3.3		Analyse interactions of multiple problems with each other and the organisation
3.4		Review problem solving strategy
3.5		Make improvements to problem solving strategy and approach

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- reviewing current operations and procedures to determine if problems are being identified as early as possible
- reviewing current operations and procedures to determine if problems are being defined appropriately
- identifying and quantifying desired outcome from improved problem solving capability, such as:
 - improved customer service and delivery
 - defect elimination
 - capacity improvement

- cost reduction
- safety improvement
- improved complaint resolution
- establishing appropriate reporting arrangements for formal problem solving, including:
 - appropriate metrics (e.g. incident frequency and incident consequences)
 - trigger criteria for conducting problem solving activity
 - problem definition and quantification
 - cause and effect diagrams (or similar)
- solutions identified
- reviewing organisational structure, value stream and customer alignment in order to set performance indicators for organisation problem solving capability

Required knowledge

Required knowledge includes:

- competitive systems and practices principles
- competitive systems and practices at both a strategic and tools level, including:
 - value stream mapping
 - 5S
 - Just in Time (JIT)
 - mistake proofing
 - process mapping
 - establishing customer pull
 - breakthrough improvement and continuous improvement (kaizen and kaizen blitz)
 - setting of key performance indicators (KPIs)/metrics
 - identification and elimination of waste (muda)
 - six sigma and lean six sigma
- a range of problem solving methodologies, including:
 - cross-functional problem solving team
 - cross-functional nominal group (virtual team)
 - consulting and or brainstorming with members from outside the organisation on some basis
 - input from other members of the value stream
 - the use of known/proprietary problem solving approaches or some synthesis of methods
 - own or commissioned research either in whole or in part
- organisation strategy and vision, value stream and value as defined by the organisation's customers
- corrective action tracking methods

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • analyse and improve problem finding capabilities of the organisation • improve the problem solving capability of the organisation • set KPIs for organisation problem solving • ongoing review of systems and processes relevant to problem solving • increasing problem solving capability through identification of appropriate strategies, including where required, identifying: <ul style="list-style-type: none"> • training needs in problem finding and solving • changes in organisational structure, decision making and processes • appropriate metrics • need for outside assistance.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a</p>

	<p>combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six
---	--

	<p>sigma and three sigma</p> <ul style="list-style-type: none"> • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Codes of practice/standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used
Health, safety and environment (HSE)	All changes implemented are expected to be at least neutral, or preferably beneficial, in their impact on HSE
Organisational structure	<p>A review of organisational structure may include:</p> <ul style="list-style-type: none"> • operational and support functions and departments • links with value stream members • super-users and facilitators • roles and responsibilities with regard to problem solving • plans to broaden the users of problem solving approach • plans to improve the problem solving performance of personnel
Problem finding strategies	Problem finding strategies are the strategies used to identify:

	<ul style="list-style-type: none"> • problems before they become obvious or cause significant non-conformance or risk • situations not initially considered a problem but which may be hindering greater performance • strategies for finding opportunities for improvement
Complex problem	<p>A complex problem may be described as one which has several of the following characteristics:</p> <ul style="list-style-type: none"> • requires going into the extended value stream for data/information • is wider than just applying to a single job • applies to less common solutions or problems • requires a higher level of knowledge and skill (which may or may not be possessed directly by the person solving the problem), such as: <ul style="list-style-type: none"> • significant specialist knowledge • significant specialist skill • more theory/understanding of technology or process • data is not easily available and may need particular strategies to obtain, such as: <ul style="list-style-type: none"> • overcoming resistance from people, including employees, customers or suppliers • extracting data not regularly reported from SCADA or similar systems • the problem and/or proposed solutions require reporting or authorisations from a Board or external authorities, such as licensing or regulatory bodies
Effective solutions	<p>Effective solutions will:</p> <ul style="list-style-type: none"> • prevent recurrence • be within the control/ability of the organisation to implement • meet organisation goals and objectives
Required resources	<p>Required resources may include:</p> <ul style="list-style-type: none"> • plant • data processing equipment • measuring and diagnostic equipment • materials (e.g. raw materials, components, work in progress, other consumables, paper and forms in electronic or hard format) • energy (e.g. heating, cooling, fuel and power) • appropriately skilled people as employees and in the

	value stream <ul style="list-style-type: none">• finances• feedback/visual operations resources• measuring equipment
Manager	Manager may include: <ul style="list-style-type: none">• any person who may have either a permanent or an ad hoc role in facilitating the function of multiple teams in a workplace, departments or entire organisations

PMAOHS310B Investigate incidents

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This competency unit refers to the investigation of incidents that occurred at the workplace. These incidents can vary from large to small, completely internal or partially externally coordinated. They include, but are not limited to, all types of emergencies, fires, OHS and/or environmental incidents.
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario, minor incidents which are subject to internal investigation will be conducted by the plant operator/technician, and for a more major investigation, or one subject to external investigation, he/she will assist with the investigation and/or undertake identified parts of the investigation.</p> <p>The exact definition of the scope of responsibility will depend on company policy, as will the level of the person undertaking these investigations. These investigations will be in accordance with company procedures for such investigations which will be consistent with any relevant regulations.</p>
--------------------------------	--

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor and review emergency situation	1.1.Undertake site inspections of incident scene 1.2.Communicate with relevant personnel regarding specific aspects of the emergency situation 1.3.Monitor corrective action procedures 1.4.Communicate changes to the situation to appropriate personnel.
2. Record investigation process and results as appropriate	2.1.Establish and secure boundaries of the incident scene to prevent contamination of prospective evidence/exhibits 2.2.Identify and interview persons relevant to the incident 2.3.Identify and record evidence/exhibits at the scene prior to examination to ensure continuity 2.4.Assess relevant information, documentation and evidence/exhibits 2.5.Determine point of origin and most likely cause of incident of the emergency 2.6.Determine risk factors affecting the emergency 2.7.Identify and analyse a range of other possible causes 2.8.Identify and utilise support services to investigate the incident scene 2.9.Process, record and communicate information/evidence/exhibits, forms and documents to appropriate personnel following enterprise policies and procedures.
3. Make suggestions to	3.1.Identify and assess tactical factors and resulting priorities

ELEMENT	PERFORMANCE CRITERIA
improve handling of emergency situation	<p>occurring during the emergency</p> <p>3.2. Formulate appropriate suggestions to improve handling of similar emergency situation based upon information available</p> <p>3.3. Identify obvious problems in related plant area and make an appropriate contribution to their solution.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills

Competence includes the ability to apply and describe or explain:

- factors affecting fire behaviour
- characteristics of fire and fuel types
- security of an incident scene
- examination of an incident scene
- collection of physical evidence
- workplace documentation and recording systems
- use of personal protective equipment
- liaison techniques with third parties
- workplace procedures and work instructions
- company policies regarding health and safety and environment
- hazard identification, assessment and control of risk
- basic risk assessment of workplace jobs/tasks
- environmental impacts likely to arise from activities
- measures for eliminating and/or reducing impacts on the environment.

Required knowledge

Knowledge and underpinning skills are required in:

- communication (listening, questioning) and negotiation in questioning witnesses
- analytical and decision making skills
- problem solving skills in responding to a range of emergency situations
- exhibit handling and preserving continuity of evidence
- witness management, in particular demonstration of ethical behaviour and cultural awareness.

REQUIRED SKILLS AND KNOWLEDGE

Knowledge and understanding of the investigation of incidents sufficient to recognise and assess causes of emergency situations and then to determine improvements to the actual response within the scope and level of the IR responsibilities and competencies.

A demonstrated working knowledge and application of the company-specific work organisations and workflow would be highly regarded. An ability to coordinate own work and the work of other team members is also regarded as a component of this unit of competency.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation.

Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays.

This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk throughs of abnormal operations) and off the plant.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action within the scope and level of their

EVIDENCE GUIDE	
	<p>responsibilities and competencies.</p> <p>Consistent performance should be demonstrated. In particular look to see that wherever possible:</p> <ul style="list-style-type: none"> • the scene is secure and evidence is preserved • evidence is collected in accordance with legislative requirements • point of origin and most likely cause of incident is determined • a range of other possible causes can be identified and analysed • obvious problems in related plant areas are recognised and an appropriate contribution made to their solution • emergency reporting procedures are understood and followed. <p>These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk-through forming part of the response. These assessment activities should include a range of problems, including new, unusual and extreme situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities (eg HAZOP) and similar sources.</p>
Context of and specific resources for assessment	<p>Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.</p>
Method of assessment	<p>In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.</p>

Range Statement

RANGE STATEMENT	
<p>The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.</p>	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	<p>Job safety and environment analysis will be conducted in accordance with required company procedures and policies.</p> <p>This competency covers process manufacturing plants which may involve workplace hazards such as:</p> <ul style="list-style-type: none"> • chemicals and hazardous materials • gases and liquids under pressure • moving machinery • materials handling • working at heights, in restricted or confined spaces, or environments subjected to heat, noise, dusts or vapours.
Incidents/emergencies	<p>Incidents/emergencies may include, but are not limited to:</p> <ul style="list-style-type: none"> • accidents • fire • chemical or oil spills • gas leak or vapour emission • utilities failure • bomb scares • OHS incidents • environmental incidents.
Enterprise policies and procedures	<p>Enterprise policies and procedures include those which directly or indirectly cover emergency situations, such as:</p> <ul style="list-style-type: none"> • emergency, fire and accident procedures • hazard policies and procedures • standard operating procedures (SOPs) • safety procedures • work instructions • personal protective clothing and equipment procedures.
Evidence gained	<p>Evidence gained as a result of investigations may include:</p> <ul style="list-style-type: none"> • video tapes

RANGE STATEMENT	
	<ul style="list-style-type: none"> • audio tapes • drawings • photographs • plans • manifests • relevant documents • personal notes • physical evidence/materials • debris • soil.
Support services	<p>Support services may include incident scene specialists:</p> <ul style="list-style-type: none"> • pathologists • forensic investigators • coroner • government medical officers • interpreters • technical services • legal officers • undertakers • forensic accountants • information technology consultants • document examiners • handwriting experts • financial organisations • external law enforcement agencies.
Interview strategies	<p>Interview strategies may vary but require consideration of:</p> <ul style="list-style-type: none"> • location • timing • method (direct questioning, empathetic questioning) • strategies for developing rapport • who is being interviewed • exclusion of leading questions • avoidance of cross-examination.
Legal and policy requirements	<p>Legal and policy requirements differ according to the status of the person being interviewed. Such requirements may include:</p> <ul style="list-style-type: none"> • the presence of a solicitor, independent person, family member or interpreter • special consideration that applies disabled, child, parent, age, gender, ethnicity and race.

RANGE STATEMENT	
Post investigation documentation	<p>Post investigation documentation may include:</p> <ul style="list-style-type: none"> • statements • proformas • photographs • tape recordings.
Designated personnel	<p>Designated personnel for incident investigation referrals may include:</p> <ul style="list-style-type: none"> • employer • personnel directly involved in responding to the incident, including: <ul style="list-style-type: none"> • first response personnel • emergency response team members • emergency team leader(s) • First Aid officers • other personnel with emergency team leader responsibilities.
Health, safety and environment (HSE)	<p>All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.</p>

PMAOPS101C Read dials and indicators

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This competency covers making (or taking) readings/measurements in a variety of sites and locations, using common types of plant instrumentation. It also covers recording measurement results in a prescribed format, according to procedures and with the appropriate level of detail included in all reports.
------------------------	--

Application of the Unit

Application of the unit	In a typical scenario an operator patrols the plant taking a range of readings to complete logs and check on the operation of the plant. The operator needs to interpret the display on the instrument and record the appropriate reading. As part of this process, they check that the instrument is within calibration (where appropriate) and make a judgement as to whether the reading is 'reasonable' or whether some action needs to be taken.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to controlling hazards in work area.	1.1. Identify hazards in work area 1.2. Take appropriate action to control risks according to procedures.
2. Identify appropriate measuring device readings.	2.1. Explain the need for calibration and where appropriate, confirm the calibration of the measuring device 2.2. Select appropriate units on the measuring device 2.3. Select appropriate scale(s) on the measuring device.
3. Perform measurements.	3.1. Identify the range of results that could be obtained 3.2. Identify and take account of relevant external factors 3.3. Perform measurements using appropriate techniques 3.4. Identify measurements outside the range of expected results 3.5. Take action on measurements outside expected range according to procedures.
4. Record results	4.1. Record readings accurately in the appropriate format 4.2. Record the results to the appropriate level of detail.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
<ul style="list-style-type: none"> efficient and effective operation of plant/equipment

REQUIRED SKILLS AND KNOWLEDGE

- hazard analysis
- completing plant records
- communication
- problem solving.

Required knowledge

- basic units of measurement
- measuring devices, including gauges, dip-sticks, thermometers and the like
- graphs and scales
- workplace Standard Operating Procedures (SOPs) related to this competency
- typical problems with measuring equipment applicable to this competency
- procedures for reporting or dealing with typical equipment problems and threats to safety.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation.

Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competence must be demonstrated in the ability to recognise situations requiring action and then in implementing appropriate corrective action. While it is not expected that the operator will understand the full implications of readings outside the normal range, there should be awareness of the safety implications

EVIDENCE GUIDE	
	<p>and the appropriate priority for response for such readings.</p> <p>Consistent performance should be demonstrated. In particular look to see that:</p> <ul style="list-style-type: none"> • readings which are out of range or unusual/unexpected signs of problems or potential problems with the equipment/processes are recognised • appropriate action is taken in a timely manner • hazards are recognised and appropriate action is taken to control risks arising from such hazards. <p>These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus, with a walk-through forming part of the response. The assessment activities should include responding to a range of problems.</p>
Context of and specific resources for assessment	<p>Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.</p>
Method of assessment	<p>In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.</p> <p>It may be appropriate to assess this unit concurrently with units related to HSE.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.</p>

Range Statement

RANGE STATEMENT
<p>The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in</p>

RANGE STATEMENT	
the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	This unit applies to reading process instrumentation in any plant or related situation. Readings may need to be made at heights, in wet or restricted conditions, or close to hot or moving equipment.
Dials and indicators	Typical dials and indicators include (select relevant items): <ul style="list-style-type: none"> • analogue dials, such as: <ul style="list-style-type: none"> • pressure gauge • rev counter • temperature dial • digital readouts, such as: <ul style="list-style-type: none"> • pH meter • temperature probe • ammeter • flow meter • weigh scales.
Calibration checks	Calibration checks could include: <ul style="list-style-type: none"> • checking the date that the next calibration is required, eg weigh scale, pressure gauge • using a calibration button on the instrument, eg zero button on an ammeter, calibration button on an electronic meter.
Appropriate action	Appropriate action includes: <ul style="list-style-type: none"> • determining problems needing action • determining possible fault causes • rectifying problem using appropriate solution within area of responsibility • following through items initiated until final resolution has occurred • reporting problems outside area of responsibility to designated person.
Health, safety and environment (HSE)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria

RANGE STATEMENT

	and HSE requirements, the HSE requirements take precedence.

PMAOPS105C Select and prepare materials

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This competency covers the selection and preparation of materials for use in production processes. The focus of this unit is finding and delivering the right materials to the process in the right condition. Along the way, some minor preparation may be required.
------------------------	---

Application of the Unit

Application of the unit	<p>A typical application of this competency could be an operator preparing a range of chemicals or other substances for use in a batch process. The operator would visually inspect each item for deterioration or damage, and follow procedures to prepare materials. Once prepared, the operator would then assemble the materials for supply to production areas.</p> <p>This unit only covers those situations where mixing, grinding, testing, etc, are an incidental part of the process of preparing materials for use in production. It does not cover those situations where the primary function is mixing, grinding, testing, etc. Instead see:</p> <ul style="list-style-type: none"> • <i>PMAOPS202A Operate fluid mixing equipment</i> • <i>PMCOPS203A Operate grinding equipment</i> <p>The operator requires a knowledge of classes of compatible and incompatible chemicals, as well as an understanding of HAZCHEM symbols and codes, and hazardous substances regulations. This includes the procedures for safe handling and storage of chemicals and hazardous substances. The operator also needs to be able to follow procedures for disposal of chemicals and other hazardous substances, and for dealing with spills or other containment issues.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and locate materials.	1.1. Identify material requirements correctly from documentation 1.2. Identify type, quantity and quality of materials 1.3. Identify material hazards and handling procedures 1.4. Locate and check materials to procedures 1.5. Confirm availability of required quantity of materials 1.6. Record and report material shortages.
2. Contribute to controlling hazards.	2.1. Identify other hazards in work area 2.2. Take action to control material hazards as per documentation 2.3. Take appropriate action to control other hazards in the workplace.
3. Measure quantity of materials	3.1. Identify types of measuring equipment and their purpose, and select according to requirements 3.2. Measure and assemble required quantities 3.3. Check material quantities against documentation 3.4. Document and label materials

ELEMENT	PERFORMANCE CRITERIA
	3.5. Deliver materials to correct location.
4. Prepare materials as required.	4.1. Check that hoppers, bins and holding tanks are free from contamination 4.2. Identify classes of compatible and incompatible chemicals 4.3. Prepare materials to procedures.
5. Store assembled materials.	5.1. Identify the storage conditions required for the main classes of chemicals 5.2. Identify materials that have special storage requirements 5.3. Store and supply materials.
6. Dispose of waste materials.	6.1. Correctly identify waste materials 6.2. Dispose of materials to procedures and OHS and environmental requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
<ul style="list-style-type: none"> • efficient and effective operation of plant/equipment • hazard analysis • completing plant records • communication • problem solving.
Required knowledge
<ul style="list-style-type: none"> • classes of compatible and incompatible chemicals • types of materials in plant and their storage requirements • other special storage requirements • basic measurement procedures • routes of entry of chemicals to the body (basic only) • procedures for safe handling and storage of chemicals and hazardous substances • correct selection, use and maintenance of required PPE • labeling requirements (dangerous goods codes, classification numbers, packaging group numbers) • HAZCHEM symbols and codes • hazardous substances regulations

REQUIRED SKILLS AND KNOWLEDGE

- spill containment and disposal procedures
- workplace Standard Operating Procedures (SOPs) related to this competency
- environmental requirements related to waste disposal
- workplace processes sufficient to recognise non-standard situations
- workplace hazards and methods of controlling hazards according to procedures
- procedures for reporting or dealing with non-standard or hazardous situations
- materials safety data sheets (MSDSs).

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

<p>Overview of assessment</p>	<p>Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. for assessment	of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units. It may be appropriate to assess this unit concurrently with HSE units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Tasks	This competency is typically performed by operators, weighers, mixers or stores personnel, and includes the following tasks (select relevant items): <ul style="list-style-type: none"> • handling raw chemicals • storing raw chemicals • pre-production assembling and labelling of materials • pre-production inspection of materials, usually involving visual inspections only for identification of deterioration or damage • pre-production measuring of materials, by weight, volume or density • disposal of waste materials • identifying and reporting hazards, safety and other issues that could

RANGE STATEMENT	
	affect the operation of the plant.
Materials preparation	<p>Typical examples of preparation required might include (select relevant items):</p> <ul style="list-style-type: none"> • warming to melt waxy materials • breaking up solid materials into pieces or smaller lumps • passing materials through an in-line delumper • blending a powder or liquid into a solution prior to use in the process • blending powders prior to production • dilution of solutions • preparation of a solution for dosing into a process.
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • buckets • stirring paddle • propeller or drum mixers • delumpers • hammers or axes • measuring equipment including scales, flow meters and graduated vessels • personal protective equipment
Documentation	<p>Documentation may include:</p> <ul style="list-style-type: none"> • materials safety data sheets (MSDSs) • enterprise procedures • labelling requirements (dangerous goods codes, classification numbers, packaging group numbers) • HAZCHEM symbols and codes • spill containment and disposal procedures.
Materials	<p>Materials may include:</p> <ul style="list-style-type: none"> • raw materials • packaging materials • consumables.
Problems	<ul style="list-style-type: none"> • Typical problems are restricted to responding in a routine, predetermined manner as specified in the procedures. • All operations are performed to procedures.
Procedures	<p>Procedures may be written, verbal, computer-based or in some other form. They include:</p> <ul style="list-style-type: none"> • all work instructions

RANGE STATEMENT	
	<ul style="list-style-type: none"> • standard operating procedures • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant. <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Responsible Care) and government regulations.</p>
MSDS	An operator is expected to be aware of an MSDS, its general structure and where to find the methods of use, cautions and actions in an emergency. They are not expected to understand the full text of an MSDS.
Material hazards and handling procedures	<p>Material hazards and handling procedures may be identified from label</p> <ul style="list-style-type: none"> • HAZCHEM symbol • MSDS • other relevant source.
Health, safety and environment (HSE)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

PMAOPS201B Operate fluid flow equipment

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This competency covers the operation of the range of pumps and valves typically encountered in the fluid flow system of a processing plant. It includes identifying, operating, monitoring and troubleshooting these items.
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario, an operator uses a number of general purpose pumps, piping and valves to move liquids from a storage tank area into the processing plant and products to the finished goods tanks. The operator utilises in-line mixers, strainers and filters, valves, controls and meters to complete this work.</p> <p>The operator would:</p> <ul style="list-style-type: none"> • identify and report operational problems • be aware of and contribute to a safe working environment • contribute to the safe and productive operation of the equipment • operate, monitor and maintain equipment using relevant procedures. <p>Generally the operator would be part of a team during start up and shut down procedures and would be expected to be capable of demonstrating competence in all parts of this unit. At all times they would be liaising and cooperating with other members of the team.</p> <p>This unit does not require the operation of a central control panel.</p> <p>This competency covers all general duty pumps, their associated drivers (motors) and valves. It does not cover special duty pumps (eg hydrocarbon transmission pumps), drivers which incorporate ancillaries and valves which are used for high pressure/flow situations (see <i>PMAOPS221 Operate and monitor prime movers</i>, <i>PMAOPS222B Operate and monitor pumping systems and equipment</i> and <i>PMAOPS223B Operate and monitor valve systems</i>).</p> <p>Competence in this unit (<i>PMAOPS201B Operate fluid flow equipment</i>) would preclude counting <i>PMAOPS223B Operate and monitor valve systems</i> towards a qualification.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work.	1.1. Identify work requirements 1.2. Identify and control hazards 1.3. Coordinate with appropriate personnel
2. Operate pumps.	2.1. Identify the type of pump 2.2. Start up and shut down pump as required 2.3. Adjust flow and head/pressure as appropriate to type of pump 2.4. Complete routine checks and reports taking action as required 2.5. Change over pumps as required.
3. Operate pump drivers.	3.1. Monitor critical variables such as amps, temperature and vibration

ELEMENT	PERFORMANCE CRITERIA
	3.2.Keep critical variables in range 3.3.Recognise trends/patterns which indicate a potential or actual problem with the pump driver 3.4.Take action to ensure driver as required.
4. Operate valves.	4.1.Identify the type of valve 4.2.Operate valve in a manner appropriate to the valve type 4.3.Complete routine checks and reports, taking action as required.
5. Respond to fluid system problems.	5.1.Monitor fluid flow system frequently and critically throughout shift using measured/indicated data and senses (sight, hearing, etc) as appropriate 5.2.Recognise issues requiring action 5.3.Take appropriate action.
6. Isolate and de-isolate pump.	6.1.Isolate equipment 6.2.Make safe for required work 6.3.Check plant is ready to be returned to service 6.4.Prepare plant for return to service .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
<ul style="list-style-type: none"> • efficient and effective operation of plant/equipment • hazard analysis • completing plant records • communication • problem solving.
Required knowledge
<p>Competence includes an understanding of the fluid flow system and its integral equipment to a level needed to control the system, and recognise and resolve operational problems. In particular it includes a knowledge of:</p> <ul style="list-style-type: none"> • principles of operation of plant/equipment • physics and chemistry relevant to the process unit • process parameters and limits eg temperature, pressure, flow, pH

REQUIRED SKILLS AND KNOWLEDGE

- duty of care obligations
- hierarchy of control
- communication protocols eg radio, phone, computer, paper, permissions/authorities
- routine problems, faults and their resolution
- relevant alarms and actions
- plant process idiosyncrasies
- all items on a schematic of the fluid flow system and the function of each
- correct methods of starting, stopping, operating and controlling flow
- causes of head loss in piping systems (including comparison of fittings using Le/d concept, fluid and pipe material properties, flow geometry, etc)
- corrective action appropriate to the problem cause
- function and troubleshooting of major internal components and their problems (such as impellers, seals or bearings)
- types and causes of fluid flow problems within operator's scope of skill level and responsibility.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation. Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays. This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what-if scenarios both on the plant

EVIDENCE GUIDE	
	(during demonstration of normal operations and walk throughs of abnormal operations) and off the plant.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster.</p> <p>Consistent performance should be demonstrated. In particular look to see that:</p> <ul style="list-style-type: none"> • early warning signs of equipment/processes needing attention or with potential problems are recognised • the range of possible causes can be identified and analysed and the most likely cause determined • appropriate action is taken to ensure a timely return to full performance • obvious problems in related plant areas are recognised and an appropriate contribution made to their solution. <p>These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.</p>
Context of and specific resources for assessment	Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	<p>In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units. Consider co-assessment with units covering:</p> <ul style="list-style-type: none"> • measurements and readings • housekeeping • communication.

EVIDENCE GUIDE	
	<p>In a major hazard facility, it may be appropriate to assess this unit concurrently with:</p> <ul style="list-style-type: none"> • <i>MSAPMOHS200A Work safely.</i> <p>The assessment should cover at least one type of centrifugal pump and one type of positive displacement pump, as well as at least two different types of valves for the operator to be regarded as competent.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.</p>

Range Statement

RANGE STATEMENT	
<p>The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.</p>	
Codes of practice/ standards	<p>Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.</p>
Context	<p>This competency is typically performed by all operators. It includes items of equipment such as:</p> <ul style="list-style-type: none"> • pumps, including various types of centrifugal, positive displacement, acid egg • valves, such as globe, needle, gate, butterfly, plug cock, wedge plug, ball cock, non-return, diaphragm, pneumatic globe, pneumatic butterfly • piping systems and components, including bends and elbows, tee pieces, expansion mechanisms, pipe joints, reducers, nipples, orifices, in-line mixers, filters and strainers, flexible hoses and couplings • shaft seals, such as stuffing boxes, mechanical seals, fluid seals, labyrinth seals. <p>The effect of pipe fittings on pump performance and problems/problem analysis is also included.</p>

RANGE STATEMENT	
	All operations are performed to procedures.
Problems	<p>Typical problems include:</p> <ul style="list-style-type: none"> • cavitation • seal leaks • head loss/low flow • bearing problems.
Appropriate action	<p>Appropriate action includes:</p> <ul style="list-style-type: none"> • determining problems needing action • determining possible fault causes • rectifying problem using appropriate solution within area of responsibility • following through items initiated until final resolution has occurred • reporting problems outside area of responsibility to designated person.
Procedures	<p>Procedures may be written, verbal, computer-based or in some other form. They include:</p> <ul style="list-style-type: none"> • all work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant. <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Responsible Care) and government regulations.</p>
Start up shut down as required	<p>Start up shut down as required includes:</p> <ul style="list-style-type: none"> • start up and shut down to/from normal operating conditions • start up and shut down to/from isolated, cold, empty • all other conditions experienced on the plant. • ie from any condition to any condition experienced on the plant.
Health, safety and environment (HSE)	<p>All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.</p>

PMAOPS204B Use utilities and services

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the use of a range of utilities and services in the plant. It includes the selection of the appropriate utility/service from those provided to the plant and recognizing and responding to operational problems as required.
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario an operator will be able to identify and select utilities and services used on a day to day basis. These will be provided to a process plant and will consist of instrument and plant air, nitrogen, plant water, steam, flushing oil and other utilities/ services required for a particular process. The operator uses these utilities/services as required. The correct use and application of these substances is essential to plant and operator safety and the continued performance of the process.</p> <p>Generally the operations technician would be part of a team during start-up and shutdown procedures and may be expected to be capable of performing all parts of this unit, but only for those utilities/services required by their plant. At all times they would be liaising and cooperating with other members of the team.</p> <p>This unit does not cover the provision or generation of utilities or services which are covered by:</p> <ul style="list-style-type: none"> • <i>PMAOPS224B Provide fluids for utilities and support, OR</i> • <i>UTPNEG162A Operate and monitor boiler steam/water cycle.</i>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work.	1.1. Identify work requirements 1.2. Identify and control hazards 1.3. Coordinate with appropriate personnel
2. Select and use utilities and services.	2.1. Identify utilities and services available in the plant 2.2. Identify key properties, applications and limitations of each utility and service 2.3. Select appropriate utility/service for the required duty 2.4. Use selected utility/service to procedures.
3. Respond to problems.	3.1. Monitor use of utility/service frequently and critically throughout shift using measured/indicated data and senses (sight, hearing, etc) as appropriate. 3.2. Recognise operational problems 3.3. Analyse cause of operational problems within scope of skill level 3.4. Take timely and appropriate action to solve operational problems.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills

- efficient and effective operation of plant/equipment
- hazard analysis
- completing plant records
- communication
- problem solving.

Ability to isolate the causes of problems to an item of equipment within the production system and to distinguish between causes of problems/alarm/fault indications such as:

- instrument failure/malfunction
- electrical failure/malfunction
- mechanical failure/malfunction
- variations in product parameters (temperature, flows, pressure and levels).

Required knowledge

Understanding of service utilities which form part of the utilities system. In particular it includes a knowledge of:

- names and functions of all items on a schematic of the utilities system
- differences in use and methods between each service and utility
- hazards in operation of services
- differences between grades/types of services, eg grades of steam, air and nitrogen
- physics and chemistry relevant to the utility and its use
- process parameters and limits, eg temperature, pressure, flow, pH
- duty of care obligations
- hierarchy of control
- communication protocols, eg radio, phone, computer, paper, permissions/authorities
- routine problems, faults and their resolution
- relevant alarms and actions
- plant process idiosyncrasies
- all items on a schematic of the plant item and the function of each
- correct methods of starting, stopping, operating and controlling utility
- corrective action appropriate to the problem cause
- function and troubleshooting of major components and their problems, such as steam traps, lubricators, moisture pots
- types and causes of utility problems within operator's scope of skill level and responsibility.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations, which will include disruptions to normal, smooth operation.</p> <p>Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios, role plays and 3D virtual reality interactive systems. In the case of evacuation training or training for competencies practised in life-threatening situations, simulation may be used for the bulk of the training.</p> <p>This unit of competency requires an application of the knowledge contained in the use of the equipment, to the level needed to maintain control and recognise and resolve problems. This can be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk throughs of abnormal operations) and off the plant.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action. Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work.	1.1. Identify work requirements 1.2. Identify and control hazards 1.3. Coordinate with appropriate personnel
2. Operate heat exchangers.	2.1. Identify the type of heat exchanger 2.2. Start up and shut down heat exchanger according to the heat exchanger type and duty 2.3. Adjust flow rates, temperatures and pressure as appropriate to type of heat exchanger 2.4. Complete routine checks, logs and paperwork, taking action on unexpected readings and trends.
3. Isolate and de-isolate plant.	3.1. Isolate plant 3.2. Make safe for required work 3.3. Check plant is ready to be returned to service 3.4. Prepare plant for return to service.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
<ul style="list-style-type: none"> efficient and effective operation of plant/equipment hazard analysis completing plant records

REQUIRED SKILLS AND KNOWLEDGE

- communication
- problem solving.

Operation of heat exchanger and the ability to recognise and resolve operational problems. This could include any of the following remedial actions:

- making adjustments
- carrying out minor maintenance
- identifying and reporting problems outside operator's scope of responsibility
- identifying and controlling hazards related to heat exchangers and their integral equipment, including pressure vessels.

Required knowledge

Comprehensive understanding of heat exchanger principles to a level needed to control the operation. In particular, the operator needs to understand the factors affecting efficient operation of a heat exchanger in order to make appropriate adjustments or recognise when maintenance is required. These also includes a knowledge of:

- all items on a schematic of the heat exchanger system and the function of each
- principles of operation of heat exchangers
- correct methods of starting, operating and shutting down heat exchangers
- issues related to pressure vessels (regulations, requirements)
- physics and chemistry relevant to the process unit
- process parameters and limits, eg temperature, pressure, flow, pH
- duty of care obligations
- hierarchy of control
- communication protocols, eg radio, phone, computer, paper, permissions/authorities
- routine problems, faults and their resolution
- relevant alarms and actions
- plant process idiosyncrasies
- causes of head loss and change in heat transfer coefficient/rates
- corrective action appropriate to the problem cause
- function and troubleshooting of major internal components and their problems, such as tubes and baffles.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

EVIDENCE GUIDE	
Overview of assessment	<p>Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation.</p> <p>Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays.</p> <p>This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster.</p> <p>Consistent performance should be demonstrated. In particular look to see that:</p> <ul style="list-style-type: none"> • early warning signs of equipment/processes needing attention or with potential problems are recognised • the range of possible causes can be identified and analysed and the most likely cause determined • appropriate action is taken to ensure a timely return to full performance • obvious problems in related plant areas are recognised and an appropriate contribution made to their solution. <p>These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk-through forming part of the response. PMAOPS216B Operate local control system

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the operation of a local control panel. These controllers use simple control algorithms and only a limited number of control loops. Typically it will be located on the plant, but may also be located off plant and include simple panels in a control room which are not part of the main control panel.
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario, the operator will use the local control panel to monitor and control process variables such as temperature or pressure and the operation of valves and pumps to add raw materials, additives, and discharge product. Routine start up and shut down of the equipment using the local control system is expected, as is emergency response and shut down. This includes but is not restricted to PLC control.</p> <p>This includes an understanding of the process and all OHS requirements including emergency situations.</p> <p>The unit does not apply to operating a control panel for an integrated plant, where the control is from a separate control room or control system, which is covered by PMAOPS305B Operate process control systems. The plant technician would:</p> <ul style="list-style-type: none"> • be aware of and contribute to a safe working environment • identify and report operational problems to their supervisor / control room operator • execute all routine activities, including process monitoring, start up, shut down and adjustments, in accordance with position description. <p>Generally the operator would operate independently in the plant. The operator would be expected to be capable of performing all parts of this unit. At all times they would be liaising and cooperating with other members of the team.</p>

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	1.1. Identify work requirements 1.2. Identify and control hazards 1.3. Coordinate with appropriate personnel
2. Interface with the control panel	2.1. Monitor the process using the operator interfaces and keep appropriate personnel informed on developments 2.2. Select appropriate controller modes to ensure the effective control of the process 2.3. Undertake required set point/output changes to optimise plant and process requirements 2.4. Access historical data and information 2.5. Acknowledge messages and alarms.
3. Control the process using the local control system	3.1. Obtain relevant data and information from the control system by applying systems knowledge

ELEMENT	PERFORMANCE CRITERIA
	<p>3.2. Identify the status of individual pieces of equipment from the control panel and use information to identify potential faults</p> <p>3.3. Interpret alarms and prioritise steps to ensure control of system is maintained</p> <p>3.4. Minimise fluctuations and variations in process through the interpretation of existing trends and control schematics</p> <p>3.5. Make required set point/output changes to meet plant and process requirements</p> <p>3.6. Take other appropriate action as required</p> <p>3.7. Record process variations/irregularities in accordance with procedures.</p>
<p>4. Facilitate planned and unplanned process start-ups and shutdowns</p>	<p>4.1. Respond to all alarms and take appropriate action</p> <p>4.2. Maintain coordination with all outside services and operations in order to assist in the correct identification and reporting of faults</p> <p>4.3. Conduct planned start-up and shutdown processes to procedures</p> <p>4.4. Conduct unplanned start-up and shutdown processes to procedures</p> <p>4.5. Communicate with all operational areas and personnel affected by unplanned events to ensure safety is maintained during the process</p> <p>4.6. Implement all required and stated emergency responses and ensure the outcomes of these responses are communicated to all affected areas</p> <p>4.7. Log all required information for further action to provide a historical record of all events.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills

Competence includes the ability to distinguish between causes of problems/alarms/fault indications such as:

REQUIRED SKILLS AND KNOWLEDGE

- instrument failure/malfunction
- electrical failure/malfunction
- mechanical failure/malfunction
- equipment design deficiencies
- product parameters (temperature, flows, pressure and levels).
- An ability to communicate with other work groups and personnel during the operation and monitoring of this equipment is considered an essential element of this unit of competency.

Required knowledge

Competence includes an understanding of underpinning knowledge. Demonstration of competence in this unit must include knowledge of:

- all items on a schematic of the controller and the function of each
- principles of operation and location of the process/production equipment
- specific plant process operations
- product specifications and tolerances
- systems operating parameters
- basis of control for the process
- emergency shutdown procedures
- process specific physics, chemistry and mathematics
- process drawings, eg P&ID, PFD, cause and effect
- instrumentation and control systems, eg relevant primary sensing devices, final control elements, transducers/transmitters
- simple control loops, including PID control, set points, controlled variable, indicated variable
- effective communication techniques.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment for this unit of competency will be on a local control system. Assessment of this unit should demonstrate competence on actual plant and equipment in a work environment. The unit will be assessed in as

EVIDENCE GUIDE	
	<p>holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations, which will include disruptions to normal, smooth operation.</p> <p>Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual process control system and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios, role plays and 3D virtual reality interactive systems.</p> <p>This unit of competency requires a significant body of knowledge, which will be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate responses. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster.</p> <p>Consistent performance should be demonstrated. In particular look to see that:</p> <ul style="list-style-type: none"> • early warning signs of equipment/processes needing attention or with potential problems are recognised • the range of possible causes can be identified and analysed and the most likely cause determined • appropriate action is taken to ensure a timely return to full performance • obvious problems in related plant areas are recognised and an appropriate contribution made to their solution. <p>These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk-through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations, which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and</p>

EVIDENCE GUIDE	
	similar sources.
Context of and specific resources for assessment	Assessment will require access to a process control system over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions, which will be used to probe the reasoning behind the observable actions.
Method of assessment	<p>In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units. Consider co-assessment with appropriate operations competencies for the unit of plant.</p> <p>In a major hazard facility, it may be appropriate to assess this unit concurrently with:</p> <ul style="list-style-type: none"> • <i>MSAOHS200A Work safely</i>
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
<p>The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.</p>	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	<p>This unit of competency includes all such items of equipment and unit operations, which form part of the production/processing system. For your local control system this may include (select relevant items):</p> <ul style="list-style-type: none"> • plant items requiring only simple control

RANGE STATEMENT	
	<ul style="list-style-type: none"> • programmable logic controllers (PLCs) • hard wired control and alarm panels • analogue control systems • personal computers • printers • fire and gas detection/protection systems • emergency shutdown systems • communications systems. <p>Typical problems for your plant may include:</p> <ul style="list-style-type: none"> • variation/loss of feed • unstable control of pressure, temperature level and flows • control equipment failure • process plant trips • change in atmospheric conditions (rain, temperature, wind, lightning) • emergency situations • loss of power/utilities.
Appropriate action	<p>Appropriate action includes:</p> <ul style="list-style-type: none"> • determining problems needing action • determining possible fault causes • rectifying problem using appropriate solution within area of responsibility • following through items initiated until final resolution has occurred • reporting problems outside area of responsibility to designated person.
Health, safety and environment (HSE)	<p>All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work.	1.1. Identify work requirements 1.2. Identify and control hazards 1.3. Coordinate with appropriate personnel
2. Prepare equipment for operation	2.1. Check operation and function of pump and driver by applying principles of operation and procedures 2.2. Check the operational area to ensure that any potential hazards which may affect the operation of the equipment are removed 2.3. Conduct pre-start-up checks on the driver and pump to ensure that all nominated operational valves are correctly sequenced before commencing pumping operations, and that all safety requirements are met.
3. Start up/shut down pump.	3.1. Commission pump protection devices and ancillary equipment in accordance with procedures. 3.2. Start up prime mover to procedures 3.3. Bring pump on line

ELEMENT	PERFORMANCE CRITERIA
	<p>3.4. Shut down pump as required</p> <p>3.5. Perform emergency shut down when required.</p>
<p>4. Monitor and assess pumping systems and equipment.</p>	<p>4.1. Verify the operational condition of all flanges, gaskets and seals to ensure that the operational integrity of these components is maintained within stated operational tolerances and to avoid any environmental damage</p> <p>4.2. Monitor pumping installations/equipment to determine if the correct pump pressures, temperatures and flows conform to their required application</p> <p>4.3. Monitor and regularly check pumping systems/ equipment performance and all components to identify any signs of excessive wear and diminution of performance</p> <p>4.4. Check operational valves and valve assemblies for possible leakages</p> <p>4.5. Monitor and identify variations in the operating conditions of the pumping systems/equipment through the interpretation of amperage operating data and equipment</p> <p>4.6. Periodically check and clean filter systems to remove any potential blockages or impurities entering the pumping system/equipment and causing it to cavitate or malfunction during operation</p> <p>4.7. Inspect and sample lubrication oil to check that operating levels are correct and to determine if any contamination has taken place which may affect the operational capacity of the pumping system/equipment.</p> <p>4.8. Take appropriate action resulting from checks and monitoring.</p>
<p>5. Identify maintenance requirements.</p>	<p>5.1. Conduct routine inspections and checks to ensure normal or stated pump operation is maintained</p> <p>5.2. Identify equipment faults through observation of the operational equipment and periodic sampling and testing</p> <p>5.3. Take appropriate action</p> <p>5.4. Record operational data as required by procedures.</p>
<p>6. Isolate and de-isolate plant.</p>	<p>6.1. Isolate plant</p> <p>6.2. Make safe for required work</p> <p>6.3. Check plant is ready to be returned to service</p> <p>6.4. Prepare plant for return to service.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills

Competence includes the ability to and be able to distinguish between causes of problems/alarms/fault indications such as:

- instrument failure malfunction
- electrical failure malfunction
- mechanical failure malfunction
- equipment design deficiencies
- product parameters (temperature, viscosity, purity)
- fouling or contamination, eg filters, exchangers, seal system, lubrication
- cavitation
- overheating (bearings, casing etc)
- overload.

Required knowledge

The knowledge referred to in the Evidence Guide for this unit includes:

- all items on a schematic of the pump system and the function of each
- pumping system/equipment operating parameters
- sampling and testing techniques
- equipment terminology
- plant or field layout or geography
- safety systems and procedures
- fault finding and troubleshooting techniques
- job hazard analysis.
- principles of operation of pump, ancillaries and components
- physics and chemistry relevant to the pump, ancillaries and the materials processed
- process parameters and limits, eg temperature, pressure, flow, pH
- duty of care obligations
- hierarchy of control
- communication protocols, eg radio, phone, computer, paper, permissions/authorities
- relevant alarms and actions
- plant process idiosyncrasies
- correct methods of starting, stopping, operating and controlling process
- corrective action appropriate to the problem cause
- function and troubleshooting of major components and their problems
- types and causes of problems within operator's scope of skill level and responsibility.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations, which will include disruptions to normal, smooth operation.

Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios, role plays and 3D virtual reality interactive systems. In the case of evacuation training or training for competencies practised in life threatening situations, simulation may be used for the bulk of the training.

This unit of competency requires an application of the knowledge contained in the use of pumps and their integral equipment, to the level needed to maintain control and recognise and resolve problems. This can be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster.

Consistent performance should be demonstrated. In particular look to see that:

- early warning signs of equipment/processes needing attention or with potential problems are

EVIDENCE GUIDE	
	<p>recognised</p> <ul style="list-style-type: none"> the range of possible causes can be identified and analysed and the most likely cause determined appropriate action is taken to ensure a timely return to full performance obvious problems in related plant areas are recognised and an appropriate contribution made to their solution. <p>These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations, which may have been generated from the past incident history of pump, incidents on similar pumps around the world, hazard analysis activities and similar sources.</p>
Context of and specific resources for assessment	As a general rule assessment will require access to an operating an operating pump system over an extended period of time, or a suitable method of gathering evidence of operating competence over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may

RANGE STATEMENT	
be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	<p>This unit of competency includes all such items of equipment and unit operations which form part of the pumping system. For your plant this may include (select relevant items):</p> <ul style="list-style-type: none"> • beam pumps • electrical submersible pumps • jet pumps • centrifugal pumps • positive displacement pumps, eg reciprocating pumps • various drivers (diesel engine, electric motor, steam turbine etc) • instrumentation • filters.
Typical problems	<p>Typical problems for your plant may include:</p> <ul style="list-style-type: none"> • variation in feed • vibration • control of level, temperature, pressure and flow • blockages • overheating • overloading.
Health, safety and environment (HSE)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

PMAOPS300B Operate a production unit

Modification History

Release 2 – Minor clarification to descriptor, minor changes to Skills and Knowledge and Range, and editorial corrections.

Unit Descriptor

This competency covers the operation of an enterprise specific unit of a production plant, which is not otherwise described by other units in this Training Package. The operations technician is expected to demonstrate a significant understanding of the process and the equipment operation. The plant unit includes the operation of other plant items which are integral to the operation of the plant unit.

Application of the Unit

This unit applies where the plant technician operates a unit of plant which is not otherwise described. The other 300 series process competencies should be used as an indicative guide as to the coverage and complexity of the operation.

The operations technician would:

- identify and rectify operational problems
- predict the potential impact of the production unit output on the operation of the whole plant
- facilitate output changes.

Generally the operations technician would operate independently in a plant with local control or in liaison with the control room operator in a plant with Distributed Control System (DCS) type controls. In the case of large complex plant, the operations technician would be part of a team during startup and shutdown procedures. The operations technician would be expected to be capable of performing all parts of this unit. At all times they would be liaising and cooperating with other members of the team.

This unit does not include the operation of any packaged unit (regardless of its engineering complexity) which is covered by *MSAPMOPS100A Use equipment*.

This unit does not require the operation of a central control panel.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|------------------------------|-----|---|
| 1 | Prepare for work | 1.1 | Identify work requirements |
| | | 1.2 | Identify and control hazards |
| | | 1.3 | Coordinate with appropriate personnel |
| 2 | Start up unit | 2.1 | Perform pre-start-up checks |
| | | 2.2 | Start up individual items of equipment and the entire unit |
| | | 2.3 | Start up normally and after maintenance |
| | | 2.4 | Build rate steadily |
| | | 2.5 | Stabilise operation to produce specified rate and quality within minimum time |
| 3 | Monitor and control the unit | 3.1 | Complete routine checks, logs and paperwork |
| | | 3.2 | Frequently and critically monitor all plant throughout shift |
| | | 3.3 | Recognise the signs of potential and actual problems |

- 3.4 Take appropriate action
 - 3.5 Trim plant to achieve required output rate and quality while maximising plant efficiency
- 4 Change unit output rate, grade or specification
 - 4.1 Predict the need to make a change to meet process requirements
 - 4.2 Trim unit in preparation of changes
 - 4.3 Make changes as required
 - 4.4 Manage changes smoothly and in a timely manner
 - 4.5 Minimise out of specification product/process disruptions as a result of the change
- 5 Maintain plant effectiveness
 - 5.1 Use measured/indicated data and smell, sight, sound and feel as appropriate to monitor plant
 - 5.2 Identify critical equipment/processes and tune their performance
 - 5.3 Identify issues likely to impact on plant performance and take appropriate action
 - 5.4 Predict impact of a change in one unit/area on other plant units/areas and communicate this to relevant people
 - 5.5 Test trips and alarms as required
 - 5.6 Complete minor maintenance according to procedures
- 6 Shut down unit
 - 6.1 Determine type of shut down required
 - 6.2 Give advance warning of shut down where possible
 - 6.3 Change over individual items of equipment
 - 6.4 Shut down individual items of equipment and the entire unit
 - 6.5 Shut down to a standby condition if appropriate

- | | | |
|---|------------------------------|---|
| | 6.6 | Shut down in an emergency and otherwise when required |
| | 6.7 | Reset trips and alarms after a shutdown |
| 7 | Isolate and de-isolate plant | |
| | 7.1 | Isolate plant |
| | 7.2 | Make safe for required work |
| | 7.3 | Check plant is ready to be returned to service |
| | 7.4 | Prepare plant for return to service |

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills

For the plant system:

- efficient and effective operation of plant/equipment
- hazard analysis
- completing plant records
- communication
- problem solving

Also ability to:

- identify all items on a schematic of the production unit and describe the function of each
- describe the nature/condition of materials entering and leaving each stage of the process, the changes which have occurred in that stage and why they have occurred
- describe the basis of the process used in the production unit to transform the feed materials into the product, including the basic science of the process (where relevant)
- describe the causes and remedies of common problems, such as those selected in the Range Statement
- describe methods of changing rate/grade/specification or feed and the advantages and disadvantages of each

Ability to isolate the causes of problems to an item of equipment within the production unit and to be able to distinguish between causes of problems/alarm/fault indications, such as:

- process materials variations
- instrument failure/wrong reading
- electrical failure

- mechanical failure
- operational problem,

as is relevant to the practical operation of equipment at that job level

Required knowledge

An understanding of the production unit/system and its integral equipment, to the level needed to control the system and recognise and resolve problems. In particular it includes:

- principles of operation of plant/equipment
- physics and chemistry relevant to the process unit
- process parameters and limits (e.g. temperature, pressure, flow, pH and amps)
- duty of care obligations
- hierarchy of control
- communication protocols (e.g. radio, phone, computer, paper and permissions/authorities)
- routine problems, faults and their resolution
- relevant alarms and actions
- plant process idiosyncrasies
- all items on a schematic of the plant item and the function of each
- correct methods of starting, stopping, operating and controlling
- corrective action appropriate to the problem cause
- function and troubleshooting of major components and their problems
- types and causes of problems within operator's scope of skill level and responsibility

This knowledge is required of all major items of equipment which comprise the production unit/system.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation.

Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components.

Simulations may also include the use of case studies/scenarios and role plays.

This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster.

Consistent performance should be demonstrated. In particular look to see that:

- early warning signs of equipment/processes needing attention or with potential problems are recognised
- the range of possible causes can be identified and analysed and the most likely cause determined
- appropriate action is taken to ensure a timely return to full performance
- obvious problems in related plant areas are recognised and an appropriate contribution made to their solution.

These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk-through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.

Context of and specific resources for assessment

Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.

Method of assessment

In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.

In a major hazard facility, it may be appropriate to assess this unit concurrently with:

- *MSAPMOHS200A Work safely.*

Guidance information

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy

for assessment capacity of the assessee and the work being performed.

Range Statement

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Codes of practice/ standards

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency covers the operation of a unit of equipment and includes the operation of equipment ancillary to the main production unit. It includes all items of equipment and unit operations which form part of the operation of the unit.

Problems

Typical problems include:

- recognising and acting on unstable/sub-optimal operation
- control of critical variables and outputs
- variations in feed rates, quality, and so on

Start up shut down as required

Start up shut down as required includes:

- start up and shut down to/from normal operating conditions
- start up and shut down to/from isolated, cold or empty
- all other conditions experienced on the plant (i.e. from any condition to any condition experienced on the plant)

Appropriate action

Appropriate action includes:

- determining problems needing action
- determining possible fault causes
- rectifying problem using appropriate solution within area of responsibility
- following through items initiated until final resolution has occurred
- reporting problems outside area of responsibility to designated person

Procedures

Procedures may be written, verbal, computer-based or in some other form. They include:

- all work instructions

- standard operating procedures
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (e.g. Responsible Care) and government regulations.

Health, safety and environment (HSE)

All operations to which this unit applies are subject to stringent HSE requirements, which may be imposed through state or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

Product

Product includes anything produced by a process step and so includes intermediate products, such as the product from one process step which then becomes the feed for another'.

Competency field

Not applicable

Co-requisite units

Not applicable

PMAOPS305B Operate process control systems

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the operation of a centralised control panel. These controllers use a range of control algorithms and multiple control loops. The panel will control multiple vessels/plant items and or products. It will typically be located off plant in a control room.
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario an operations technician uses a centralised process control system to operate and monitor the plant. This control system would typically be a distributed control system (DCS) and may include other local controllers which are integral to its operation (stand alone local controllers are covered by <i>PMAOPS216B Operate local control system</i>). This panel technician/central control room operator has an overall responsibility for the operation of all units of equipment covered by the control system. As such they often also take a lead role as part of the operating team. Competencies required by this role other than panel competencies as such are not covered by this unit.</p> <p>The operations technician would:</p> <ul style="list-style-type: none"> • identify, correct and report operational problems • be aware of and contribute to a safe working environment • contribute to the safe and productive operation of the system • operate, monitor and maintain equipment using relevant procedures • take appropriate action following an alarm or out of specification condition developing <p>Generally the operations technician would be part of a team during start up, shut down and normal operating conditions and would be expected to be capable of demonstrating competence in all parts of this unit. He/she would be taking a leading role in liaising and cooperating with other members of the team. Typically the panel operator will liaise with other 'outside operators', however this unit does not preclude the situation where the panel operator may also undertake 'outside' functions.</p>

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work.	1.1. Identify work requirements 1.2. Identify and control hazards 1.3. Coordinate with appropriate personnel
2. Use operator interface.	2.1. Use keyboards, track ball and monitor and/or stand alone controllers to access control system/panel 2.2. Monitor the process using the operator interfaces 2.3. Select appropriate controller modes 2.4. Access historical data and information 2.5. Acknowledge messages and alarms.
3. Access control information.	3.1. Obtain relevant data and information from the control

ELEMENT	PERFORMANCE CRITERIA
	<p>system by applying systems knowledge</p> <p>3.2. Identify the status of individual pieces of equipment from the control panel and use information to identify potential faults</p> <p>3.3. Minimise fluctuations and variations in process through the interpretation of existing trends and control schematics</p> <p>3.4. Record process variations/irregularities to procedures.</p>
<p>4. Control process variations and monitor operations.</p>	<p>4.1. Use historical data to assist the identification of problems</p> <p>4.2. Process available information to identify potential faults</p> <p>4.3. Undertake required set point/output changes to meet plant and process requirements</p> <p>4.4. Optimise plant operating conditions in accordance with guidelines</p> <p>4.5. Adjust production in response to test results and control panel information</p> <p>4.6. Monitor key process and environmental variables and take appropriate action</p> <p>4.7. Adjust controller settings in accordance with procedures</p> <p>4.8. Use fine tuning software as appropriate</p> <p>4.9. Coordinate with up stream and downstream units as appropriate</p> <p>4.10. Record adjustments and variations to specifications/schedules</p> <p>4.11. Communicate to appropriate personnel as required.</p>
<p>5. Facilitate planned and unplanned process start-ups and shut-downs.</p>	<p>5.1. Select and apply procedures to planned startup and shutdown processes</p> <p>5.2. Select and apply procedures to unplanned shutdown processes</p> <p>5.3. Implement all required emergency responses</p> <p>5.4. Communicate necessary information to all personnel affected by events</p> <p>5.5. Log all required information.</p>
<p>6. Respond to alarms or out of specification conditions.</p>	<p>6.1. Identify system(s) affected by the alarm or condition</p> <p>6.2. Interpret alarms and prioritise actions to be taken</p> <p>6.3. Take appropriate action to respond to the alarm or</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>incident</p> <p>6.4. Deal with any out of specification material in accordance with procedures</p> <p>6.5. Communicate the problem/solution to appropriate personnel</p> <p>6.6. Record the information as required</p> <p>6.7. Provide details of the alarm and action taken to the next shift at change over</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
<p>This describes the essential skills and knowledge and their level, required for this unit.</p>
<p>Required skills</p>
<p>Competence includes the ability to distinguish between causes of problems/alarms/fault indications such as:</p> <ul style="list-style-type: none"> • instrument failure/malfunction • electrical failure/malfunction • mechanical failure/malfunction • equipment design deficiencies • product parameters (temperature, flows, pressure and levels) • process control system malfunction • power/utility failures. <p>An ability to communicate with other work groups and personnel during the operation and monitoring of this panel is considered an essential Element of this unit of competency.</p>
<p>Required knowledge</p>
<p>The knowledge referred to in the Evidence Guide for this unit includes:</p> <ul style="list-style-type: none"> • the architecture and location of the process/production equipment • specific plant process operations • interactions between plant items/processes • product specifications and tolerances • systems operating parameters • system integrity limits • process control philosophies and strategies • emergency shutdown procedures

REQUIRED SKILLS AND KNOWLEDGE

- process specific physics, chemistry and mathematics
- basic science of upstream and downstream processes
- relevant chemistry of the process to the level of interpreting chemical equations and manipulating factors controlling rate of reaction and yield (or equivalent physics for a physical process/biochemistry for a biochemical process) - chemistry to include both intended products and interfering reactions, eg salts, hydrates
- impact of external factors, eg variations in weather, feed etc
- process drawings, eg P&ID, PFD
- cause and effect
- basis of control for the plant/s
- instrumentation and control systems, including feed forward, feed back and open control
- instrumentation and control system components, eg relevant primary sensing devices, final control elements, transducers/transmitters
- control loops, including PID control, set points, controlled variable, indicated variable
- interaction between multiple control loops, including cascade control
- impacts of changing controller settings and the limits within which changes can be made
- effective communication techniques
- organisation procedures
- UPS and its applications and use.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations, which will include disruptions to normal, smooth operation.

Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may

EVIDENCE GUIDE	
	<p>also include the use of case studies/scenarios, role plays and 3D virtual reality interactive systems. In the case of evacuation training or of training for competencies practiced in life threatening situations, simulation may be used for the bulk of the training.</p> <p>This unit of competency requires an application of the knowledge contained in the use of the process control system and its integral equipment, to the level needed to maintain control and recognise and resolve problems. This can be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate responses. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster.</p> <p>Consistent performance should be demonstrated. In particular look to see that:</p> <ul style="list-style-type: none"> • early warning signs of equipment/processes needing attention or with potential problems are recognised • the range of possible causes can be identified and analysed and the most likely cause determined • appropriate action is taken to ensure a timely return to full performance • obvious problems in related plant areas are recognised and an appropriate contribution made to their solution. <p>These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk-through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations, which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment will require access to a process control system over an extended period of time, or a suitable</p>

EVIDENCE GUIDE	
	method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with relevant teamwork, communication and leadership units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
<p>The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicized wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.</p>	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	<p>This unit of competency includes all such items of equipment and unit operations which form part of the control system. For your control room this may include (select relevant items):</p> <ul style="list-style-type: none"> • process control systems, eg Distributed Control Systems • personal computers • printers • fire and gas detection/protection systems • emergency shutdown systems • communications systems. <p>Typical problems for your plant may include:</p> <ul style="list-style-type: none"> • loss of power/utilities • analysing failure modes

RANGE STATEMENT	
	<ul style="list-style-type: none"> • variation/loss of feed • unstable control of pressure, temperature level and flows • control equipment failure • process plant trips • change in atmospheric conditions (rain, temperature, wind, lightning) • emergency situations.
Alarms or abnormal conditions	<p>Alarms or other abnormal conditions includes:</p> <ul style="list-style-type: none"> • emergency, including emergency shut down • partial or complete controller failure.
Other problems	<p>Other problems includes:</p> <ul style="list-style-type: none"> • problem solving control functions
Appropriate action	<p>Appropriate action includes:</p> <ul style="list-style-type: none"> • determining problems needing action • determining possible fault causes • rectifying problem using appropriate solution within area of responsibility • following through items initiated until final resolution has occurred • reporting problems outside area of responsibility to designated person.
Health, safety and environment (HSE)	<p>All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.</p>

PMAOPS307B Transfer bulk fluids into/out of storage facility

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	In a typical scenario involving land based tank farms or tankers at sea, the control room operator, from the main panel, will monitor and control the transfer of product into storage facilities including controlling product levels, flows, temperatures and pressures. The operations technician will also prepare and complete all necessary documentation for the control, transfer and calculation of product volumes.
------------------------	---

Application of the Unit

Application of the unit	<p>The storage facility or vessel will be monitored through the use of gas and fire detection equipment. Automatic sprinkler systems or deluges will be activated in the event of fire detection and emergency shutdown systems will operate.</p> <p>The equipment to be used in the transfer of product will be checked and tested before use. In some cases, before transferring, the circulation of product through pipelines, will commence. This is usually for the purpose of pipeline chardown, and is required to minimise vapour pressure build-up in warm pipework.</p> <p>A comprehensive fire water supply main may encompass the facility and/or be located on the vessel, and a suitable fire pump would be able to provide fire water requirements in emergencies.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work.	1.1. Identify work requirements 1.2. Identify and control hazards 1.3. Coordinate with appropriate personnel
2. Prepare storage/transfer facilities	2.1. Manage products within the tank farm or at the platform in accordance with the site/enterprise's storage types, products and locations 2.2. Inspect storage or docking facilities for leaks or damage 2.3. Check and test safety systems to verify their operational condition and status, and report on all equipment faults 2.4. Conduct critical inspections of storage and tank farms (and ascertain seaworthiness of vessels at sea if required) ensuring areas are safe, clean and equipment can't be compromised by debris 2.5. Identify and report all equipment requiring maintenance, follow up to satisfactory conclusion.
3. Monitor storage facilities.	3.1. Confirm tank mixes, capacities and quality, and determine if these are being maintained within the agreed product requirements prior to transfer 3.2. Monitor gas detection/environmental/safety systems to ensure the storage area is a safe environment and that the safety of the area or vessel is not compromised 3.3. Communicate storage conditions to transfer or other personnel to inform them of the operational condition and status of the storage facilities or vessel.

ELEMENT	PERFORMANCE CRITERIA
4. Monitor load-out/transfer platform or facility as required.	4.1. Monitor load-out/transfer systems on the platform or in the terminal load-out/transfer area 4.2. Monitor gas detection/environmental/safety systems to ensure the load-out/transfer area is a safe environment 4.3. Inform appropriate personnel of the load-out/transfer area status, and conditions of the storage facilities.
5. Conduct load-out/transfer.	5.1. Communicate operational status to required personnel prior to loading 5.2. Ensure that all start-up permissives have been satisfied and product is ready for transfer 5.3. Set and adjust pump flow rates to keep within agreed capacities 5.4. Monitor loading pump performance to keep within stated operational ranges and vibration is in limits 5.5. Take and record product shipping/transfer samples as required.
6. Isolate and de-isolate plant.	6.1. Isolate plant 6.2. Make safe for required work 6.3. Check plant is ready to be returned to service 6.4. Prepare plant for return to service.
7. Resolve problems	7.1. Identify possible problems in equipment and process. 7.2. Determine problems needing action 7.3. Determine possible fault causes 7.4. Rectify problem using appropriate solution within area of responsibility 7.5. Follow up items until resolved 7.6. Report problems outside area of responsibility to designated person.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills

For the plant system/unit:

REQUIRED SKILLS AND KNOWLEDGE

- efficient and effective operation of plant/equipment
- hazard analysis
- completing plant records
- communication
- problem solving

Required knowledge

Demonstration of competence in this unit must include knowledge of the following:

- principles of operation of plant/equipment
- physics and chemistry relevant to the process unit
- process parameters and limits, eg temperature, pressure, flow, pH
- duty of care obligations
- hierarchy of control
- communication protocols, eg radio, phone, computer, paper, permissions/authorities
- routine problems, faults and their resolution
- relevant alarms and actions
- plant process idiosyncrasies
- all items on a schematic of the plant item and the function of each
- correct methods of starting, stopping, operating and controlling flow
- causes of head loss in piping systems, including comparison of fittings using Le/d concept, fluid and pipe material properties, flow geometry etc
- corrective action appropriate to the problem cause
- function and troubleshooting of major internal components and their problems, such as impellers, seals or bearings
- types and causes of problems within operator's scope of skill level and responsibility.
- testing techniques
- equipment isolation and purging
- use and operation of safety equipment, including breathing apparatus
- tank and product mixes
- flow rates and measures
- tank capacities and percentages
- static electricity principles.

Sound knowledge of storage and transfer techniques required to transport oil, gas or water is expected.

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation.

Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant or platform and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays.

This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster.

Consistent performance should be demonstrated. In particular look to see that:

- early warning signs of equipment/processes needing attention or with potential problems are recognised
- the range of possible causes can be identified and analysed and the most likely cause determined
- appropriate action is taken to ensure a timely return to full performance
- obvious problems in related plant areas are recognised and an appropriate contribution made to their solution.

These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk-through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.

EVIDENCE GUIDE	
Context of and specific resources for assessment	Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units. In a major hazard facility, it may be appropriate to assess this unit concurrently with: <ul style="list-style-type: none"> • <i>MSAPMOHS200A Work safely.</i>
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	This unit of competency includes all items of equipment and unit operations which form part of the load-out and storage system. For your facility this may include (select relevant items): <ul style="list-style-type: none"> • tanks, such as concrete bunded storage tanks, atmospheric pressure tanks, floating roof tanks, temperature controlled tanks (heated, chilled, refrigerated) • vessels, eg pressure storage vessels • pumps, eg transfer and circulation pumps, stripping pumps • compressors, eg boil-off gas compressors • gauges

RANGE STATEMENT	
	<ul style="list-style-type: none"> • fire protection and deluge systems, eg flare system • gas detection systems and equipment • tank dipping and measurement equipment. • instrumentation.
Safety equipment	<p>Safety equipment on site may include:</p> <ul style="list-style-type: none"> • main fire pumps • jockey pumps • fire monitors • deluge systems • sub-surface foam injection • gas detection and reporting systems • fire detection and reporting systems • emergency shutdown systems
Products	Products may include hydrocarbons, oil, gas or bulk liquid chemicals/petrochemicals.
Problems	<p>Typical problems for your facility may include:</p> <ul style="list-style-type: none"> • insufficient/inappropriate storage for product/material • interruptions to loading through adverse weather conditions • product surging • control of temperature and pressure • variations in feed • vibration • tank capacities and space.
Start up shut down as required	<p>Start up shut down as required includes:</p> <ul style="list-style-type: none"> • start up and shut down to/from normal operating conditions • start up and shut down to/from isolated, cold, empty • all other conditions experienced on the plant. <p>ie from any condition to any condition experienced on the plant.</p>
Appropriate action	<p>Appropriate action includes:</p> <ul style="list-style-type: none"> • determining problems needing action • determining possible fault causes • rectifying problem using appropriate solution within area of responsibility • following through items initiated until final resolution has occurred • reporting problems outside area of responsibility to designated person.
Procedures	Procedures may be written, verbal, computer-based or in some other form.

RANGE STATEMENT

	<p>They include:</p> <ul style="list-style-type: none"> • all work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant. <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Responsible Care) and government regulations.</p>
Health, safety and environment (HSE)	<p>All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work.	1.1. Identify work requirements 1.2. Identify and control hazards 1.3. Coordinate with appropriate personnel
2. Conduct product separation.	2.1. Centralise and prepare well products for initial multi-phase separation, storage and distribution as determined by the required production targets and objectives 2.2. Use multi-phase high and low pressure separation, utilising heat and chemical treatments, to effectively separate the product 2.3. Monitor the separation process via control room operation to ensure all product flows, pressures and temperatures are maintained within correct operating parameters 2.4. Operate and monitor all required utility services to assist in the separation process.
3. Recover and measure product.	3.1. Transfer treated waste water from the separation process for further treatment as required prior to re-injection or disposal 3.2. Ensure that all available product is recovered and all waste water

ELEMENT	PERFORMANCE CRITERIA
	<p>is made safe for further use or disposal within environmental limits</p> <p>3.3.Measure and sample produced gas as required</p> <p>3.4.Measure collected product to determine the level of available stocks for further transfer and for accounting purposes</p> <p>3.5.Take appropriate action.</p>
4. Transfer product.	<p>4.1.Check transfer process equipment required to ensure it is working within agreed operating parameters</p> <p>4.2.Transfer product to a processing facility for further treatment and enhancement</p> <p>4.3.Monitor transfers and take appropriate action</p> <p>4.4.Log and record all product transfers and communicate as required</p> <p>4.5.Distribute data collected to appropriate personnel.</p>
5. Isolate and de-isolate plant.	<p>5.1.Isolate plant</p> <p>5.2.Make safe for required work</p> <p>5.3.Check plant is ready to be returned to service</p> <p>5.4.Prepare plant for return to service.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
<p>Competence includes the ability to isolate the causes of problems to an item of equipment within the compressor system and to be able to distinguish between causes of problems/alarm/fault indications such as:</p> <ul style="list-style-type: none"> • product contamination • instrument failure/wrong reading • electrical failure • mechanical failure • operational problems • pressure losses and leakage.
Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

The knowledge referred to in the Evidence Guide for this unit includes:

- all items on a schematic of the remote system and the function of each
- nature/condition of materials entering and leaving each stage of the process
- changes which have occurred in that stage and why they have occurred
- methods of changing production rates and the advantages and disadvantages of each
- effect of specific climatic and environmental factors
- water testing and gas break through testing techniques
- storage and transfer techniques related to the transport of oil, gas or water.
- principles of operation of plant/equipment
- physics and chemistry relevant to the process unit and the fluids involved
- process parameters and limits, eg temperature, pressure, flow, pH
- duty of care obligations
- hierarchy of control
- communication protocols, eg radio, phone, computer, paper, permissions/authorities
- routine problems, faults and their resolution
- relevant alarms and actions
- plant process idiosyncrasies
- correct methods of starting, stopping, operating and controlling plant
- corrective action appropriate to the problem cause
- function and troubleshooting of major components and their problems
- types and causes of problems within operator's scope of skill level and responsibility.

Unit Descriptor

Unit descriptor	<p>This unit covers the co-ordination of the shutdown and restarting of a production process in a safe and efficient manner due to a planned or an unplanned shutdown or emergency situation.</p> <p>It does not apply to individual plant operators shutting down individual production units or following directions during a shutdown, as this is included in the normal unit of competency for operating that production unit.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, a complex and integrated plant (usually but not necessarily large and continuous) needs to be shut down for some reason. Shutting down is a complex process and is more than the simple turning off of a switch.</p> <p>This competency would typically be exercised by the leading plant technician on a shift.</p> <p>This unit requires the exercise of discretion as the plant technician's responses are governed by the cause of the shutdown and the plant's responses to that. They are required to adapt normal practice, within the overall guidelines, to the current situation to obtain the best outcome.</p> <p>This competency requires the coordination of all personnel involved in the shutdown to ensure it happens in as orderly a fashion as possible and that the plant is left in the best condition possible for a quick restart. The person exercising this competency needs to balance the varying requirements to ensure the shutdown occurs with maximum safety to personnel, plant, the environment and the business's productivity (in that order).</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manage shutdown sequence.	1.1. Check and verify safety systems to ensure that the unit has been made safe 1.2. Identify the reason for, or cause of the shutdown by troubleshooting the system and by utilising all available data and information systems 1.3. Obtain confirmation of the identified shutdown from field based operators to verify both the nature and the reliability of the shutdown 1.4. Rectify or initiate procedures to rectify the fault or shutdown cause through either repair of the operational fault or readjustment before returning the system to start-up status.
2. Conduct start-up process.	2.1. Satisfy all start-up permissives prior to start-up process being commenced 2.2. Conduct start-up according to procedures and in a safe and efficient manner, ensuring a return to steady state operation is achieved.
3. Document shutdown and	3.1. Complete all logs and workplace documentation relating to the shutdown/start-up process, ensuring all details, actions and

ELEMENT	PERFORMANCE CRITERIA
start-up process.	<p>responses are accurately recorded</p> <p>3.2. Record any further ongoing production problems and report to appropriate persons or authority.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills

Competence includes:

- efficient and effective planning of shut down/start up
- hazard analysis
- completing plant records
- communication
- problem solving

Required knowledge

Demonstration of competence in this unit must include knowledge of the following:

- principles of operation of plant/equipment
- physics and chemistry relevant to the process unit and the materials processed
- process parameters and limits, eg temperature, pressure, flow, pH
- duty of care obligations
- hierarchy of control
- communication protocols, eg radio, phone, computer, paper, permissions/authorities
- routine problems, faults and their resolution
- relevant alarms and actions
- plant process idiosyncrasies
- all items on a schematic of the plant item and the function of each
- correct methods of starting, stopping, operating and controlling process
- corrective action appropriate to the problem cause
- function and troubleshooting of major components and their problems
- types and causes of problems within operator's scope of skill level and responsibility.
- architecture of the process/production systems
- the plant
- product specifications and tolerances
- systems operating parameters

REQUIRED SKILLS AND KNOWLEDGE

- process control philosophies and strategies
 - the process
 - emergency shutdown procedures
 - physics, chemistry and mathematics relevant to the process
 - outside process knowledge and equipment operation
- as is relevant to the practical operation of equipment at that job level.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency.

Assessment will occur over a range of situations which will include disruptions to normal, smooth operation.

Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays.

This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster.

Consistent performance should be demonstrated. In particular look to see that:

- early warning signs of equipment/processes needing attention or with potential problems are recognised
- the range of possible causes can be identified and analysed and the most likely cause determined

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • appropriate action is taken to ensure a timely return to full performance • obvious problems in related plant areas are recognised and an appropriate contribution made to their solution. <p>These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk-through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.</p>
Context of and specific resources for assessment	Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	<p>In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.</p> <p>In a major hazard facility, it may be appropriate to assess this unit concurrently with:</p> <ul style="list-style-type: none"> • <i>MSAPMOHS200A Work safely.</i> <p>The person undertaking this competency is expected to be able to work under and manage situations of high pressure, in order to ensure the safe and efficient management of the control room production process and the safety of plant employees.</p>
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT
<p>The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.</p>

RANGE STATEMENT	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	<p>Causes of shutdown may be:</p> <ul style="list-style-type: none"> planned, eg for maintenance or other planned work unplanned, eg in response to a plant upset or equipment failure emergency, eg in response to an automatic shutdown sequence or plant trip. <p>The shutdown may be:</p> <ul style="list-style-type: none"> shutdown 'to cold', eg complete plant shutdown and purging of all process materials from equipment short shutdown to allow minor work 'warm shutdown', eg partial shutdown, with retention of some or all of process materials managing a plant trip and restart 'hot shutdown', eg short duration shutdown in response to a plant upset or trip <p>This competency also includes:</p> <ul style="list-style-type: none"> coordinating the shift team implementing emergency procedures using the permit to work system (for repairs required). This competency may apply to: <ul style="list-style-type: none"> panel technicians outside technicians technicians seconded to a shut down role other relevant personnel <p>All operations are performed according to procedures.</p>
Appropriate action	<p>Appropriate action includes:</p> <ul style="list-style-type: none"> determining problems needing action determining possible fault causes rectifying problem using appropriate solution within area of responsibility following through items initiated until final resolution has occurred reporting problems outside area of responsibility to designated person.
Procedures	<p>Procedures may be written, verbal, computer-based or in some other form. They include:</p> <ul style="list-style-type: none"> all work instructions standard operating procedures formulas/recipes

RANGE STATEMENT

	<ul style="list-style-type: none"> • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant. <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Responsible Care) and government regulations.</p>
Health, safety and environment (HSE)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

PMASUP440B Commission/recommission plant

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the commissioning of new plant/pipeline or the re-commissioning of significantly modified plant/pipeline. This unit does not cover startup of a plant/ pipeline after a shutdown, unless there have been major changes to the plant during the shutdown. For a normal startup use <i>PMAOPS411B Manage plant shutdown and restart.</i>
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario, a new plant/pipeline or a major plant/pipeline upgrade is to be commissioned/recommissioned with a leading plant technician taking a significant role.</p> <p>The technician is involved in the design of the plant/plant modifications and the planning of the startup. Being 'involved in' could mean participating in design meetings or HAZOPS or reviewing/checking the design for operability issues or checking the HAZOP outcomes. This does not preclude the inclusion of 'turnkey' type projects, provided the technician has had a role in the plant design, eg checking operability, suitability for local conditions.</p> <p>This competency includes all equipment associated with the new/modified plant. The technician would not normally have a 'hands on' operating role for all items of equipment, but may have a 'hands on' role for major items of equipment. More importantly, the technician will have an overall role and would be expected to have an understanding of the function of all items of equipment in the plant so that detailed directions can be given plant operators who are performing the 'hands on' role during the commissioning/recommissioning.</p> <p>This competency is typically performed by experienced technicians, likely to be the leaders of an operational team. This may include working in conjunction with a design team, or reviewing final design to ensure plant/pipeline meets operational requirements and for the purpose of commissioning or recommissioning plant/pipelines. As commissioning is usually a team activity, the technician will take a lead technical role, rather than undertake all aspects on an individual basis.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to/review the design of plant/ equipment.	1.1. Apply process understanding to the design process 1.2. Identify the role and purpose of the plant and equipment 1.3. Ensure design meets the identified need 1.4. Identify process conditions and apply to hazard and operability studies 1.5. Undertake investigations following hazard studies 1.6. Record and report findings.
2. Take part in commissioning planning.	2.1. Ensure the work is coordinated effectively with others involved on the work site 2.2. Obtain materials necessary to complete the work and check against job requirements

ELEMENT	PERFORMANCE CRITERIA
	2.3. Obtain tools and equipment necessary to carry out the work and check for correct operation and safety 2.4. Prepare plans to ensure that procedures are performed in the correct sequence 2.5. Obtain approvals where necessary from appropriate authorities.
3. Participate in acceptance of plant/ equipment.	3.1. Undertake pre-commissioning activities 3.2. Complete safety acceptance documentation 3.3. Identify, record and report problems or non-conformance 3.4. Conduct trials/test runs 3.5. Record and report performance data.
4. Commission system.	4.1. Bring the plant/plant systems/pipeline on line 4.2. Make and report adjustments 4.3. Prepare reports in accordance with legislative and company requirements to maintain the historical record.
5. Evaluate results and identify modifications.	5.1. Identify modifications and improvements required 5.2. Check specifications, procedures and training material match the final system/procedures 5.3. Complete documentation and report to appropriate personnel.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
<ul style="list-style-type: none"> • hazard analysis • completing plant records • communication • problem solving.
Required knowledge
Competence to include the ability to apply and explain: <ul style="list-style-type: none"> • HAZOP (or similar) study process and the interpretation of findings

REQUIRED SKILLS AND KNOWLEDGE

- results and impact of a HAZAN (or similar) study
- the process of hazard identification, risk assessment and control
- hierarchy of control
- sources of hazard information (such as Material Safety Data Sheets)
- principles of operation of equipment
- interpretation of design drawings, schematics and manuals
- physics and chemistry relevant to the plant and the materials processed or produced
- process parameters and limits, eg temperature, pressure, flow, pH
- duty of care obligations
- expected problems, faults and their resolution
- possible alarms and actions
- any known or expected plant process idiosyncrasies
- all items on a schematic of the plant and the function of each
- correct methods of starting, stopping, operating and controlling process
- corrective action appropriate to the problem cause
- function and troubleshooting of major components and their problems
- types and causes of problems to be expected
- principles of operation of instrumentation
- principles of basic control systems
- distinguish between the following problem sources, and their avoidance:
 - chemical
 - instrument
 - equipment (electrical/mechanical)
 - maintenance.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency.

Simulation may be required to allow for assessment

EVIDENCE GUIDE

	<p>of parts of this unit. It is possible that a simulation will be required to ensure that the technician is competent before taking a significant role in a commissioning activity. Commissioning is an infrequent and often frenetic activity and so it may not be practical or equitable to wait for an actual commissioning to occur to use this as the basis for assessment. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/ scenarios and role plays.</p> <p>This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster.</p> <p>Consistent performance should be demonstrated. In particular look to see that:</p> <ul style="list-style-type: none"> • potential problems are recognised • the range of possible causes can be identified and analysed and the most likely cause determined • appropriate action is taken to ensure commissioning stays on schedule • obvious problems in related plant areas are recognised and an appropriate contribution made to their solution. <p>These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk-through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.</p>

EVIDENCE GUIDE	
Context of and specific resources for assessment	Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units. In a major hazard facility, it may be appropriate to assess this unit concurrently with relevant OHS units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.	
Appropriate authorities	Appropriate authorities may include: <ul style="list-style-type: none"> • local councils • road authority • sewerage and stormwater authorities • providers of services such as electricity, water and telephones.
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Plant	Plant covers on or off shore plant, well heads and also transmission pipelines or similar.

RANGE STATEMENT	
Commissioning	Commissioning refers to the start-up of a new plant or plant unit and the associated equipment for the first time.
Commissioning/re-commissioning activities	Commissioning/recommissioning activities may include: <ul style="list-style-type: none"> • trial running of equipment • use of trial materials in plant • safe introduction of process materials to plant • producing product within specification • bringing plant to design rates • solving operational problems • disposal of waste generated in the start-up.
Documentation	Documentation may include: <ul style="list-style-type: none"> • operating procedures • OHS and environmental legislative requirements • manufacturer specifications • appropriate authority approvals • quality assurance inspection and test reports.
Health, safety and environment (HSE)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.
Plant/pipeline systems	Plant/pipeline systems may include: <ul style="list-style-type: none"> • pipes • valves • operating units • electrical and electronic components • PLCs/DCS control (programmable logic controllers, distributed control systems) or other plant controls • cathodic protection • pressure/flow/temperature etc regulation and meters.
Pre-commissioning	Pre-commissioning activities may include: <ul style="list-style-type: none"> • checking plant is built to design • ensuring plant is safe to operate

RANGE STATEMENT	
	<ul style="list-style-type: none"> • ensuring plant area is clean and clear of debris • ensuring the plant internals are clean and clear of debris • functional checking of equipment and ancillaries.
Procedures	<p>All operations are performed in accordance with standard operating procedures.</p> <p>Procedures may be written, verbal, computer-based or in some other form. They include:</p> <ul style="list-style-type: none"> • all work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant. <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Responsible Care) and government regulations.</p>
Recommissioning	<p>Recommissioning refers to the start-up of an existing plant following major modifications, rebuild or reconfiguration.</p> <p>This competency unit includes functions such as :</p> <ul style="list-style-type: none"> • liaison with relevant personnel such as manufacturers, engineering personnel, designers, contractors and maintenance and other company personnel • participation in/reviewing of hazard studies, which may include: <ul style="list-style-type: none"> • hazard and operability studies (HAZOP) • hazard analysis studies (HAZAN) • participation in/reviewing of design or modification plans
Tools, materials and equipment	<p>Tools, materials and equipment may include:</p> <ul style="list-style-type: none"> • hand tools, including power operated • other power operated tools • plant • emergency equipment • electrical and electronic test equipment

RANGE STATEMENT

	<ul style="list-style-type: none">• gas detectors• air compressor• water pump.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine theoretical performance.	1.1. Identify item of plant or equipment to be analysed 1.2. Locate and interpret design specification 1.3. Identify process materials being processes/to be processed during verification trial 1.4. Determine process material properties under process conditions 1.5. Calculate theoretical performance of component(s) with that material under those conditions.
2. Conduct trial.	2.1. Design verification trial to be compatible with theoretical analysis 2.2. Determine measurements needed from trial to yield required data 2.3. Select equipment suitable to give required measurements 2.4. Arrange for verification trial with relevant process personnel 2.5. Set up required measurement equipment 2.6. Supervise trial and ensure trial conditions are appropriate 2.7. Collect trial data for analysis.
3. Verify performance of plant/equipment.	3.1. Compare theoretical with actual performance 3.2. Determine significance of variation between

ELEMENT	PERFORMANCE CRITERIA
	<p>theoretical and actual performance</p> <p>3.3. Investigate any suspicious results and take appropriate action.</p>
4. Recommend required action.	<p>4.1. Determine appropriate action to bring performance to desired level</p> <p>4.2. Initiate the corrective action in accordance with company procedures.</p> <p>4.3. Determine measures to increase equipment productivity</p> <p>4.4. Re-check performance after corrective action is implemented.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills

Competence, for the practical completion of the job, includes the ability to:

- calculate equipment and component performance from the design specification
- determine equipment and design performance from practical trials
- determine the 'limiting component' in the performance of an item of equipment or a process
- determine possible performance of an item of equipment/process if practical improvements were made to the 'limiting item'.

Required knowledge

Knowledge and understanding of the materials, equipment and process sufficient to predict their interactions and their impacts on performance.

Knowledge of the enterprise procedures and policies along with the ability to implement them within appropriate time constraints and in a manner relevant to the job.

Knowledge of:

- methods of identifying and calculating theoretical performance
- ways of trialling, trial design and implementation
- methods of data analysis to determine trial outcomes
- methods of interpreting information deduced from trial data.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation.

Assessment might typically be by an analysis project.

This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what-if scenarios both on the plant and off the plant.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competence must be demonstrated in the ability to carry out the analysis without undue disruption to the process.

Consistent performance should be demonstrated. In particular look to see that:

- trial design is appropriate
- data taken during trial matches that required for the analysis
- the analysis is carried out in a structured manner
- recommended changes can be justified based on the comparison of trial and theoretical data.

Context of and specific resources for assessment

Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of projects will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.

Method of assessment

In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.

EVIDENCE GUIDE	
	In a major hazard facility, it may be appropriate to assess this unit concurrently with relevant OHS units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
<p>The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.</p>	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	<p>This competency unit includes the analysis of plant, equipment and equipment components. This competency applies to all work environments and sectors within the chemical, hydrocarbons and oil refining industry, but does require both a theoretical/ mathematical and a practical analysis of the process.</p> <p>The competency does not require a knowledge of industry sectors and materials other than that in which the technician works. It assumes an understanding of the operation of all relevant equipment and processes but does not necessarily require them to be used personally.</p> <p>Typical problems include:</p> <ul style="list-style-type: none"> • worn equipment/components • validation of new equipment/components to design specification • performance analysis in order to upgrade process performance.
Health, safety and environment (HSE)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

PSPGOV201B Work in a public sector environment

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the requirements for entry into/working as a trainee in the public sector. It includes compliance with the principles of public sector legislation and guidelines, the use of public sector and organisational procedures when dealing with others at work, respect for individual differences and career planning.

In practice, working in a public sector environment may overlap with other generalist or specialist public sector work activities such as communicating with others, delivering client service, using resources, handling information.

The unit serves as the introductory unit of competency in the *Working in Government* competency themes of *Effective Work* and *Diversity*, and in the Competency Fields of *Ethics&Accountability*, and *Legislation&Compliance*, so provides the introductory unit for:

- PSPGOV301B Work effectively in the organisation
- PSPGOV308B Work effectively with diversity
- PSPGOV310A Work in and with small, regional and remote organisations
- PSPETHC301B Uphold the values and principles of public service
- PSPLEGN301B Comply with legislation in the public sector
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Access and use legislation and guidelines	<p>1.1 The range of <i>legislation</i> and <i>guidelines</i> common to employment in a public sector organisation is accessed.</p> <p>1.2 The <i>key principles</i> contained in the legislation and guidelines are identified.</p> <p>1.3 Information is clarified in order to confirm own understanding.</p> <p>1.4 Work is undertaken in accordance with the principles contained in legislation and guidelines.</p>
2. Access and use organisational information	<p>2.1 The staffing and organisational structure is identified.</p> <p>2.2 Procedures for dealing with staff at all levels of the organisation are identified and clarified.</p> <p>2.3 Procedures for dealing with <i>clients</i> are identified.</p> <p>2.4 <i>Sources of assistance</i> are identified, and types of assistance available from each source are identified.</p> <p>2.5 Work is carried out within <i>organisational procedures</i>.</p>
3. Work with diversity	<p>3.1 Appreciation of the <i>differences</i> between <i>colleagues</i> is demonstrated through workplace behaviour.</p> <p>3.2 Communication styles are used to take account of workplace diversity and reflect the principles of <i>emotional intelligence</i>.</p> <p>3.3 Contribution to the workgroup is made to utilise personal</p>

ELEMENT	PERFORMANCE CRITERIA
4. Investigate career options	<p>strengths and take any opportunities provided to develop new competencies.</p> <p>3.4 The requirements of multicultural awareness and anti-discrimination legislation are met.</p> <p>4.1 Personal working and learning styles, values and attitudes are identified and weighed against the requirements of current and potential work opportunities.</p> <p>4.2 Personal work goals are identified and prioritised.</p> <p>4.3 <i>Advice</i> is obtained on future work/career options.</p> <p>4.4 A range of possible career paths is identified and initial planning undertaken to map out broad competency areas and experiences required to pursue them.</p> <p>4.5 Personal development is planned to prepare for career options.</p> <p>4.6 Learning opportunities are sought and accessed in line with personal work goals.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- accessing and identifying information
- scanning techniques to locate main ideas
- reading written materials such as manuals and codes of practice
- responding to diversity, including gender and disability
- using interpersonal communication including negotiating strategies to clarify understanding
- recognising own and others' emotions in the workplace
- using information technology and the Internet
- applying public sector legislation such as occupational health and safety and environmental procedures in the workplace

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- public sector legislation, regulations and guidelines
- organisation guidelines and procedures
- principles of cultural awareness, workplace diversity and emotional intelligence

- and their application in the workplace
- codes of conduct
 - equal employment opportunity, equity and diversity principles
 - principles of personal career planning

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPGOV202B Use routine workplace communication techniques
 - PSPGOV203B Deliver a service to clients
 - PSPGOV204B Access and use resources
 - PSPGOV205B Participate in workplace change
 - PSPGOV206B Handle workplace information
 - PSPGOV208A Write routine workplace materials
 - PSPOHS201B Follow workplace safety procedures

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- completing work in a range of (3 or more) public sector contexts, such as different work functions or roles (or 3 or more occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to work in the public sector
- case studies and workplace scenarios to capture the range of situations likely to be encountered when working in a public sector environment

Where and how to

Valid assessment of this unit requires:

assess evidence

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when working in a public sector environment, including coping with difficulties, irregularities and breakdowns in routine
- completing work in a range of (3 or more) public sector contexts, such as different work functions or roles (or 3 or more occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Legislation may include:

- anti-discrimination

	<ul style="list-style-type: none"> • duty of care • employee relations • employment • equal employment opportunity • fraud control • freedom of information • government security management • occupational health and safety • privacy • public sector management • whistleblowers protection • workplace diversity • workplace harassment • international legislation/codes of practice
Guidelines may include:	<ul style="list-style-type: none"> • public sector standards • relevant public sector code of ethics • organisational code of conduct • organisational mission and values statements • organisational procedures/guidelines • government policy • Ministerial directions • directives from head of organisation • standard operational procedures
Key principles may include:	<ul style="list-style-type: none"> • honesty and integrity • confidentiality and non-disclosure of official information • security of information, resources, facilities and people • due care and diligence • avoiding conflicts of interest • obeying lawful and reasonable direction • compliance with the law
Clients may include:	<ul style="list-style-type: none"> • the public • private enterprise • other public sector organisations • internal clients • the Minister
Sources of assistance may include:	<ul style="list-style-type: none"> • colleagues • immediate supervisor • line management • human resources personnel • workplace representatives/union personnel
Organisational	<ul style="list-style-type: none"> • mission and values statements

<i>procedures</i> may include:	<ul style="list-style-type: none"> • organisational charts • strategic plans • business unit and work area plans • customer service charters • induction materials • standard operating procedures • relevant workplace agreements • disciplinary processes • grievance procedures • advertising materials • Internet and/or intranet web pages
<i>Individual differences</i> may include:	<ul style="list-style-type: none"> • age • cultural background • disability • educational level • ethnicity • expertise • family responsibilities • gender • interests • interpersonal approach • language • life experience • marital status • personality • physical ability • political orientation • religious belief • sexual orientation • socio-economic background • thinking/learning styles • work experience • working styles
<i>Colleagues</i> may include:	<ul style="list-style-type: none"> • peers • junior staff • internal stakeholders • external stakeholders/clients/customers • supervisors and senior management

<i>Emotional intelligence</i> is:	<ul style="list-style-type: none"> • widely recognised as the ability of an individual to monitor their own and others' emotions in a social or work environment, to discriminate among the emotions and to use the information to guide their thinking and actions • characterised by self-awareness (personal), self-management (personal), social awareness (social) and relationship management (social)
<i>Advice</i> may include:	<ul style="list-style-type: none"> • formal/informal performance appraisals • feedback from supervisors and colleagues • reflection/comment on personal goals • vocational/career counselling

Unit Descriptor

This unit covers the use of resources required to achieve work objectives. It includes accessing and using resources and administering physical resource usage.

In practice, accessing and using resources may overlap with other generalist or specialist public sector work activities such as communicating in the workplace, delivering client service, using technology, handling information, etc.

This is one of 5 units of competency in the *Working in Government and Management* Competency Fields that deal with resources. Related units are:

- PSPGOV305B Access and use resources and financial systems
- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV503B Coordinate resource allocation and usage
- PSPMNGT602B Manage resources
-

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|--|
| 1. Access and use resources | 1.1 <i>Resources</i> required to achieve work outcomes are identified and accessed in accordance with <i>legislation and organisational policy and procedures</i> .
1.2 Resources are used efficiently and effectively and in accordance with legislation, organisational policy and procedures. |
| 2. Administer physical resources | 2.1 Supplies and materials required to support the operation of the workgroup are obtained and maintained.
2.2 <i>Records</i> of resource usage are maintained as required by the organisation/work unit.
2.3 Orders are processed in a timely manner and in accordance with defined organisational procedures.
2.4 Supplies and materials are stored in accordance with organisational procedures and to reduce theft and fraudulent activity. |

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- recordkeeping
- reading materials such as legislation and operational procedures related to resources and finances
- completing and processing orders requiring both literacy and numeracy
- securing information and resources
- responding to diversity, including gender and disability
- applying public sector legislation such as occupational health and safety and environment in the context of resource use

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- public sector legislation and operational procedures relating to accessing and using resources
- security requirements for resources, facilities, people and information
- principles of fraud control in the public sector
- principles of financial management and stock handling
- occupational health and safety requirements
- environmental and sustainability requirements
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Select and use technology

- 1.1 The technology requirements of tasks are assessed and *technology* and/or *software applications* are selected in accordance with task requirements and available workplace resources.
- 1.2 Work area, furniture and equipment are adjusted and used in accordance with ergonomic requirements.
- 1.3 Technology/software is *used* to achieve work outcomes in accordance with organisational *guidelines* and occupational health and safety requirements.
- 1.4 Manuals, training booklets, online/telephone assistance or help-desks are used to overcome basic difficulties with technology, and more complex problems are referred for assistance in accordance with organisational policy and procedures.
- 1.5 Technology and data are secured in accordance with legislation, policy and procedures.

2. Maintain technology

- 2.1 *Routine maintenance* is carried out and/or arranged to ensure that technology is maintained in accordance with manufacturers' instructions and organisational requirements.
- 2.2 *Equipment faults* are corrected or reported in accordance with manufacturers' instructions and service agreements.
- 2.3 Technology consumables are replaced as they are used in accordance with manufacturers' instructions and organisational requirements.
- 2.4 Use of technology and disposal of *used consumables* meets government and organisational *environmental policies*.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for

this unit.

Skill requirements

Look for evidence that confirms skills in:

- planning technology use
- identifying work requirements and selecting the equipment and software application of best fit in terms of timeliness, cost effectiveness, occupational health and safety conditions
- using a keyboard
- using a range of technology applications
- using communication to request advice, receive feedback and work with others
- applying problem solving in relation to routine problems
- following manufacturers' instructions
- responding to diversity, including gender and disability
- applying public sector legislation such as occupational health and safety and environment in the context of using workplace technology

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, procedures and guidelines relating to the use of technology in the workplace
- occupational health and safety procedures and regulations
- logon, backup, virus protection and shutdown procedures for computer equipment
- basic technical terminology in relation to reading manuals and help files
- methods of detecting faults in and solving problems with business technology
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to any of the generalist public sector specific units at Certificate II or above, particularly:
 - PSPGOV201B Work in a public sector environment
 - PSPGOV202B Use routine workplace communication

techniques

- PSPGOV203B Deliver a service to clients
- PSPGOV204B Access and use resources
- PSPGOV205B Participate in workplace change
- PSPGOV206B Handle workplace information
- PSPGOV208A Write routine workplace materials

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- use of equipment and application of software in a range of (3 or more) contexts (or occasions, over time).

The unit relates to the application of technology as a transferable competency. It is not necessary to assess (or address) an exhaustive range of equipment, rather attention should be given to the different kinds of technology that can be used and the selection of the 'technology of best fit' for the task. (Is it better/more economical to print one master copy, and photocopy multiples, or print multiple copies direct from the computer? I need a graph - do I use a word processing or spreadsheet application?)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the use of technology in the workplace
- case studies and workplace scenarios to capture the range of situations likely to be encountered when using technology in the workplace

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when using technology in the workplace, including coping with difficulties, irregularities and breakdowns in routine
- correct use of equipment and application of software in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women

- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from workplace training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

<p>The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in <i>bold italics</i> in the Performance Criteria is explained here.</p>	
<p><i>Technology</i> covers all equipment used in the workplace and may include:</p>	<ul style="list-style-type: none"> • computer facsimiles • computer technology, such as laptops, notebooks, palm pilots and personal computers • datashow projectors • digital cameras • electronic whiteboards • facsimile machines • keyboards • modems • mouses • multifunction scanners/faxes/printers • pagers • photocopiers • printers

	<ul style="list-style-type: none"> • routers • scanners • tape/MD recorders • telephones/mobiles/wireless telephones • video cameras • wireless technology equipment • zip drives
Software applications may include:	<ul style="list-style-type: none"> • email • Internet • instant messages • word processing • spreadsheets • databases • accounting • presentation packages
Use of technology may include:	<ul style="list-style-type: none"> • information searches • data storage, retrieval and analysis • numerical calculations • presentation of information • copying information • communication • Internet • Email
Guidelines may include:	<ul style="list-style-type: none"> • work unit and organisation standards • occupational health and safety policies and procedures • environmental procedures • manufacturers' operating instructions • ethical considerations
Routine maintenance may include:	<ul style="list-style-type: none"> • regular checking of equipment • replacing consumables • 'in-house' cleaning and servicing of equipment according to manufacturers' guidelines • periodic servicing by qualified or manufacturer-approved technician
Equipment faults may be identified or countered by:	<ul style="list-style-type: none"> • routine checking of equipment • preparation of a maintenance program • encouraging feedback from work colleagues • regular back-ups of data • keeping a log book of detected faults • regular occupational health and safety inspections • checking that repairs have been carried out

<i>Used consumables</i> may include:	<ul style="list-style-type: none">• ink cartridges• toner cartridges• print heads• CD-ROMs• zip disks• floppy disks• backup tapes
<i>Environmental policies</i> may cover:	<ul style="list-style-type: none">• type of paper• recycling requirements

PSPGOV315A Give and receive workplace feedback

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers feedback in the workplace, both giving and receiving. It includes seeking and acting on workplace feedback, and providing informal as well as formal feedback in the workplace.

In practice, giving and receiving feedback may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, working effectively, working with diversity, contributing to the workgroup, building networks, etc.

This is one of 4 units in the *Working in Government* and *Management* Competency Fields that deal with performance. Related units are:

- PSPGOV416A Monitor performance and provide feedback
- PSPGOV519A Manage performance
- PSPMNGT603B Facilitate people management
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Seek and act on workplace feedback

- 1.1 *Feedback* on performance and *other workplace issues* is sought from *others* in accordance with organisational policy and procedures.
- 1.2 Feedback is discussed, questions asked to clarify understanding, and active listening used to ensure understanding of the issues and any constructive suggestions.
- 1.3 *Diversity issues* are considered when evaluating feedback to ensure correct interpretation.
- 1.4 Suggestions for improvements made by other workgroup members are considered objectively and implemented where appropriate.

2. Provide informal feedback in the workplace

- 2.1 Informal feedback is given regularly, in a timely manner, in accordance with workplace procedures and protocols.
- 2.2 Evidence from a range of sources is considered in providing feedback in the workplace.
- 2.3 The opinions of others are considered when providing informal feedback.
- 2.4 Performance of self and others is evaluated and confirmed with workgroup members.
- 2.5 *Strategies/opportunities for continuous improvement* are planned and implemented in consultation with the workgroup, and notable performance is recognised in accordance with organisational policy and procedures.

3. Provide formal

- 3.1 Where they exist, processes/*guidelines* for providing *formal*

ELEMENT	PERFORMANCE CRITERIA
feedback in the workplace	<p><i>feedback</i> are used to ensure feedback meets purpose/s for which it is required.</p> <p>3.2 <i>Standards/criteria</i> for feedback are identified and clarified.</p> <p>3.3 Written or verbal feedback is prepared to address required criteria and purpose in accordance with <i>legislation, policy and procedures</i>.</p> <p>3.4 Where others disagree with feedback provided, their opinions and ideas are considered objectively and the feedback is amended or supported in line with organisational procedures.</p> <p>3.5 Agreement with those seeking formal feedback is negotiated and documented regarding any actions/follow-up as a result of feedback.</p> <p>3.6 Where agreement cannot be reached, reports are prepared and further action is taken if necessary, in accordance with organisational policy and procedures.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- using techniques for maintaining objectivity while giving and receiving feedback
- using a range of communication techniques with members of a diverse workforce, including negotiating, questioning, clarifying, understanding, active listening, evaluating the ideas and opinions of others
- evaluating workplace performance and issues affecting clients and others
- responding to diversity, including gender and disability
- applying legislation such as occupational health and safety and environment in the context of giving and receiving feedback

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- public sector legislation, regulations, policies, procedures and guidelines relating to giving and receiving feedback
- organisation policies, practices and procedures relating to feedback
- workplace performance requirements and issues
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC301B Uphold the values and principles of public service
 - PSPGOV301B Work effectively in the organisation
 - PSPGOV302B Contribute to workgroup activities
 - PSPGOV303B Build and maintain internal networks
 - PSPGOV307B Organise workplace information
 - PSPGOV308B Work effectively with diversity
 - PSPGOV312A Use workplace communication strategies
 - PSPGOV313A Compose workplace documents
 - PSPGOV314A Contribute to conflict management
 - PSPLEGN301B Comply with legislation in the public sector
 - PSPOHS301A Contribute to workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- feedback given and received in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to feedback in the workplace
- case studies and workplace scenarios to capture the range of situations likely to be encountered when giving and receiving workplace feedback

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when giving and receiving workplace feedback, including coping with difficulties, irregularities and

breakdowns in routine

- feedback given and received in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

<p>The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in <i>bold italics</i> in the Performance Criteria is explained here.</p>	
<p><i>Feedback on performance</i> may include:</p>	<ul style="list-style-type: none"> • client feedback • 360° feedback • feedback from assessors • performance feedback

	<ul style="list-style-type: none"> • feedback on a job application
<i>Other workplace issues</i> may include:	<ul style="list-style-type: none"> • personal presentation • attitude • style, tone and form of language used • body language • cultural interactions • equity and diversity • telephone manner • client service manner
<i>Others</i> may include:	<ul style="list-style-type: none"> • team members • colleagues • superiors • subordinates • clients • assessors • performance appraisers • referees • interview panels • validators
<i>Diversity issues</i> may include:	<ul style="list-style-type: none"> • accepting that different ways of working and communicating are valid • focus on outcomes rather than process so that different ways of reaching the same end are not raised as negative feedback • interpreting feedback in light of diversity considerations • using culturally appropriate verbal and non-verbal language
<i>Strategies/opportunities for continuous improvement</i> may include:	<ul style="list-style-type: none"> • coaching, mentoring and/or supervision • formal/informal learning programs • internal/external training provision • work experience/exchange/opportunities • personal study • career planning/development • learning pathways.
<i>Guidelines</i> may include:	<ul style="list-style-type: none"> • sources of evidence • feedback methods/decisions • how to provide feedback • who gets feedback • appeal processes • grievance processes • dispute resolution processes • confidentiality • privacy

	<ul style="list-style-type: none"> • freedom of information requirements
<i>Formal feedback</i> may be required by:	<ul style="list-style-type: none"> • peers • managers/supervisors/team leaders • employees • teams and team members • clients/customers • job applicants (360° feedback)
<i>Standards/criteria</i> may include:	<ul style="list-style-type: none"> • selection criteria • best practice standards • organisational practice standards • competencies • service level standards • codes of ethics/conduct • legislation/regulations

1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers organisation of available resources at a senior operative rather than managerial level to facilitate achievement of work unit objectives. It includes acquiring and applying available resources, monitoring and reporting on resource usage and maintaining resources.

In practice, using resources to achieve work unit goals may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government processes, gathering and analysing information, etc.

This is one of 5 units of competency in the *Working in Government and Management* Competency Fields that deal with resources. Related units are:

- PSPGOV204B Access and use resources
- PSPGOV305B Access and use resources and financial systems
- PSPGOV503B Coordinate resource allocation and usage
- PSPMNGT602B Manage resources

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Acquire and apply available resources

1.1 Available *resources* are identified and gaps filled in accordance with *work unit plans*.

1.2 *Procedures* are applied that promote efficient, economical and effective allocation and distribution of resources.

1.3 Acquisition and storage of resources is carried out in accordance with *legislation, organisational policy and procedures*.

1.4 Resource handling is undertaken in accordance with established work practices and guidelines, including occupational health and safety and security requirements.

2. Monitor and report on resource usage

2.1 Trends on resource usage are monitored and reported in accordance with organisational requirements.

2.2 Records of resource usage are maintained in accordance with relevant legislation and guidance.

2.3 Relevant financial and resource management systems are operated in accordance with organisational policy and procedures.

2.4 Resource shortfalls are identified and recommendations made to address these.

3. Maintain resources

3.1 Resources are maintained in accordance with manufacturers'

ELEMENT

PERFORMANCE CRITERIA

- and organisational guidelines and service contracts.
- 3.2 Maintenance of resources is organised to facilitate work practices and outcomes.
- 3.3 Contingency plans are developed to ensure operational continuity.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, policy and guidelines relating to resource usage, storage and maintenance
- using a range of communication methods with a diverse range of people including maintenance contractors, work unit members, managers etc on a range of resource related matters
- responding to diversity, including gender and disability
- monitoring outcomes
- applying public sector legislation, including occupational health and safety and environmental requirements in the context of resource usage, storage and maintenance

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to resource usage
- operational procedures for accessing, storing, maintaining and using resources
- security and fraud control guidelines
- stock handling procedures
- occupational health, safety and environmental and sustainability requirements in the context of resource usage, storage and maintenance
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance

Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC401A Uphold and support the values and principles of public service
 - PSPGOV402B Deliver and monitor service to clients
 - PSPGOV404B Develop and implement work unit plans
 - PSPGOV406B Gather and analyse information
 - PSPGOV408A Value diversity
 - PSPGOV412A Use advanced workplace communication strategies
 - PSPGOV413A Compose complex workplace documents
 - PSPGOV422A Apply government processes
 - PSPLEGN401A Encourage compliance with legislation in the public sector
 - PSPOHS401B Implement workplace safety procedures and programs

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- use and maintenance of resources in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and guidelines relating to resource usage, storage and maintenance
- workplace technology for resource ordering, managing and financial requirements
- case studies and workplace scenarios to capture the range of situations likely to be encountered when using resources to achieve work unit goals

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when using resources to achieve work unit goals, including coping with difficulties, irregularities and

breakdowns in routine

- use and maintenance of resources in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- demonstration
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

<p>The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in <i>bold italics</i> in the Performance Criteria is explained here.</p>	
<p><i>Resources</i> may include:</p>	<ul style="list-style-type: none"> • knowledge, information and other intellectual resources • human resources • finances • facilities • equipment

	<ul style="list-style-type: none"> • stock and supplies
<i>Work unit plans</i> may include:	<ul style="list-style-type: none"> • resource plans • project plans • daily plans • budgets • business plans
<i>Procedures</i> may include:	<ul style="list-style-type: none"> • occupational health and safety • financial and accounting procedures and reporting requirements • audit and legislative requirements
<i>Legislation, organisational policy and procedures</i> may include:	<ul style="list-style-type: none"> • State/Territory and Commonwealth legislation and regulations such as: <ul style="list-style-type: none"> • public sector management acts • financial management acts • privacy legislation • freedom of information • copyright • equal employment opportunity, anti-discrimination and harassment legislation • occupational health and safety legislation • consumer legislation • environment and sustainability legislation. • risk management guidelines • ethics and accountability standards • public sector standards • fraud control standards • government security standards • organisational policy, procedures and protocols

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|--|
| <p>1. Participate in planning activities</p> | <p>1.1 Contributions are made to planning that reflect a knowledge of corporate goals and their relationship to work unit and individual plans.</p> <p>1.2 Consideration of <i>workplace requirements</i> is reflected in contributions to <i>work unit plans</i>.</p> <p>1.3 Planning activities are completed as requested within the defined timeframe and meet the organisation's requirements.</p> <p>1.4 Feedback is sought and acted on in relation to effectiveness of input to planning activities.</p> |
| <p>2. Prepare individual work plans</p> | <p>2.1 Work plan objectives are linked to and consistent with organisational and work unit aims.</p> <p>2.2 Objectives are stated as measurable targets with clear performance indicators.</p> <p>2.3 Innovative and cost-effective options for achieving objectives are explored and aligned to organisational aims.</p> <p>2.4 Individual work plans are used to promote the achievement of work unit objectives and to reflect personal and organisational accountability to all clients.</p> <p>2.5 Collaborative planning with other workgroup members is used to integrate individual plans and build working relationships.</p> |

ELEMENT	PERFORMANCE CRITERIA
3. Implement and evaluate work plans	<p>3.1 Work methods and practices to implement plans are identified in consultation with others.</p> <p>3.2 Workload and work flows are monitored and balanced.</p> <p>3.3 Work is completed in accordance with work plans and meets time and workplace requirements, <i>legislation, policies and procedures</i>.</p> <p>3.4 Problems in implementing work plans are monitored and solutions are proposed within area of responsibility.</p> <p>3.5 Work plans are revised according to changes in work priorities and organisational needs.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- planning own work to achieve goals
- engaging in collaborative planning with other workgroup members
- applying problem solving
- monitoring and evaluation of progress towards work unit goals
- negotiating goals and outcomes
- responding to diversity, including gender and disability
- applying public sector legislation such as occupational health and safety and environment in the context of work planning

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to work planning in the public sector
- effective planning processes
- policies and procedures on sustainable practice
- corporate goals or aims
- organisational procedures
- importance of aligning work unit plans with organisational goals
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of work planning

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPBORD401A Create and maintain profiles
 - PSPETHC401A Uphold and support the values and principles of public service
 - PSPGOV403B Use resources to achieve work unit goals
 - PSPGOV405B Provide input to change processes
 - PSPGOV406B Gather and analyse information
 - PSPGOV408A Value diversity
 - PSPGOV411A Deal with conflict
 - PSPGOV412A Use advanced workplace communication strategies
 - PSPGOV413A Compose complex workplace documents
 - PSPGOV417A Identify and treat risks
 - PSPGOV422A Apply government processes
 - PSPLEGN401A Encourage compliance with legislation in the public sector
 - PSPOHS401B Implement workplace safety procedures and programs
 - PSPPM401B Design simple projects
 - PSPPM402B Manage simple projects
 - PSPPROC410A Administer contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- work unit plans developed and implemented in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to work planning in the public sector

Where and how to assess evidence

- case studies and workplace scenarios to capture the range of situations likely to be encountered when developing and implementing work unit plans

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing and implementing work unit plans, including coping with difficulties, irregularities and breakdowns in routine
- work unit plans developed and implemented in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the

Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

<p><i>Workplace requirements</i> may relate to:</p>	<ul style="list-style-type: none"> • staffing procedures • resourcing allocations and requirements • identified timeframes • relevant legislation affecting organisational administration • organisation, corporate and strategic plans and activity calendars • relevant industrial awards • financial circulars (or equivalent) • organisation financial and personnel management guidelines • technology and data associated with work • environmental and sustainability practices
<p><i>Work unit plans</i> may include:</p>	<ul style="list-style-type: none"> • daily/weekly/monthly work unit plans • project plans • specific purpose plans including equal employment opportunity, industrial democracy and occupational health and safety • resource plans
<p><i>Legislation, policy and procedures</i> may include:</p>	<ul style="list-style-type: none"> • State/Territory and Commonwealth legislation and regulations such as: <ul style="list-style-type: none"> • public sector management acts • financial management acts • privacy legislation • equal employment opportunity, anti-discrimination and harassment legislation • occupational health and safety legislation • consumer legislation • environmental and sustainability legislation • risk management guidelines. • ethics and accountability standards • public sector standards • fraud control standards • government security standards • organisational policy, procedures and protocols

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| 1. Suggest options and opportunities for change | 1.1 The need for change in work practice within the work unit is identified, suggestions sought and options devised.
1.2 Options and opportunities for change are suggested to improve efficiency and effectiveness of the workgroup and the work environment.
1.3 The broader workplace context, including future trends, is taken into account in suggestions for change.
1.4 <i>Risk factors</i> affecting change are analysed to identify possible constraints. |
| 2. Encourage commitment to workplace change | 2.1 Positive encouragement is provided to implement workplace change.
2.2 The needs and viewpoints of individuals are identified and considered when implementing change.
2.3 Communication strategies are developed and support is provided to colleagues on adjusting to change.
2.4 Issues requiring further action are identified and dealt with in accordance with <i>legislation, policy and procedures</i> . |
| 3. Monitor and evaluate change | 3.1 Implementation of change is monitored and feedback on individual and group work practices is prompt and constructive.
3.2 Suggestions for improvements made by workgroup members |

ELEMENT	PERFORMANCE CRITERIA
	are positively received and acted on where appropriate.
	3.3 Work activities are evaluated based on feedback from workgroup members and other <i>stakeholders</i> .
	3.4 <i>Evidence and information</i> is collected on the impact of change, is accurate, relevant and reported according to organisational requirements.
	3.5 Recommendations for improving methods or techniques to manage change are <i>negotiated</i> in accordance with organisational policy and procedures.
	3.6 Learning from the implementation of change are identified, shared with others and transferred to other change initiatives.
4. Deal with ambiguities in the change process	4.1 The need to operate within constraints beyond one's own control is recognised and accepted.
	4.2 Areas of ambiguity in proposed change are identified.
	4.3 Options for dealing with ambiguity and criteria for assessing those options are developed and communicated to the workgroup.
	4.4 Best option is selected, work is undertaken and ambiguity handled in accordance with option determined.
	4.5 The impact of change and identified related issues are communicated to management as required.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- communicating with a diverse range of individuals at different levels in the organisation
- applying problem solving strategies in the context of managing ambiguity and change
- working in teams
- applying monitoring and observation methods
- giving and receiving feedback, including 'managing upwards'
- responding to diversity, including gender and disability

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, policy and procedures relating to public sector workplaces
- a range of change management models and their application to the work environment
- organisational structure and culture
- the nature of change and its effects in the workplace, including occupational health and safety issues such as workplace stress
- group dynamics
- emotional intelligence
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite units that must be achieved **prior** to this unit: Nil*
- *Co-requisite units that must be assessed **with** this unit: Nil*
- *Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:*
 - PSPETHC401A Uphold and support the values and principles of public service
 - PSPGOV406B Gather and analyse information
 - PSPGOV408A Value diversity
 - PSPGOV411A Deal with conflict
 - PSPGOV412A Use advanced workplace communication strategies
 - PSPGOV414A Provide workplace mentoring
 - PSPGOV416A Monitor performance and provide feedback
 - PSPGOV418A Develop internal and external networks
 - PSPGOV422A Apply government processes
 - PSPLEGN401A Encourage compliance with legislation in the public sector

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- provision of input to change in a range of (3 or more) contexts

(or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the public sector environment
- a range of change management models and their application
- case studies and workplace scenarios to capture the range of situations likely to be encountered when providing input to change processes

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when providing input to change processes, including coping with difficulties, irregularities and breakdowns in routine
- provision of input to change in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

<i>Risk factors</i> may include:	<ul style="list-style-type: none"> • disturbances to workflow • confusion/loss of confidence • budget constraints • supplier problems • product/service delivery problems • time delays • ineffective communication • lack of participation/buy in of staff in workplace change leading to resistance and conflict
<i>Change</i> may include:	<ul style="list-style-type: none"> • imposed change • self-initiated change • implementation of new work practices • legislative change • changes in the machinery of government • organisational restructuring • technology transfer to the workplace • changing work practices and procedures • staffing changes • shared services environment
<i>Legislation, policy and procedures</i> may include:	<ul style="list-style-type: none"> • Commonwealth and State/Territory legislation • government policy • public sector code of ethics • national standards • the organisation's policies and practices • environmental or sustainability practices • organisational code of conduct
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> • all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services, including: • employees at all levels of the organisation • clients • other public sector organisations • community organisations • private sector organisations

	<ul style="list-style-type: none"> • union and association representatives • boards of management • government • Ministers
<i>Evidence and information</i> may include:	<ul style="list-style-type: none"> • client surveys • employee satisfaction feedback • industrial disputes • supplier feedback • productivity/efficiency measures • cost savings
<i>Negotiation</i> may include:	<ul style="list-style-type: none"> • assertiveness • collaboration • solution designing • confidence building • conflict reduction • stress management • empathising • techniques such as: <ul style="list-style-type: none"> • speaking skills • presentation techniques • effective listening • questioning techniques • verbal and non-verbal communication • using personal attributes • culturally appropriate strategies • constructive feedback • issues identification • exploring options • identifying areas of agreement • recording agreements. • clarifying • restating position • summarising progress • deferring decision • preparing a compromise • using a mediator/third party

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|---|
| 1. Identify and collect information | <p>1.1 Nature, extent and purpose of required <i>information</i> is identified.</p> <p>1.2 Internal and external <i>sources</i> are identified and accessed to produce required information in accordance with <i>legislation, policy and procedures</i>.</p> <p>1.3 Information is collected, organised, recorded and reported in accordance with organisational procedures and defined guidelines.</p> <p>1.4 Information collected is organised in a way which enables easy access and retrieval by other staff.</p> |
| 2. Analyse and interpret information | <p>2.1 Information and its sources are critically evaluated for relevance and validity to business/client requirements.</p> <p>2.2 Basic <i>analysis of information</i> is undertaken as required to identify key issues.</p> <p>2.3 More detailed analysis of information is carried out as required using relevant techniques including mathematical calculations and methods for numerical/graphical information.</p> |
| 3. Develop and apply workable solutions | <p>3.1 Workable solutions to business/client requirements are developed on consideration of analysed information.</p> <p>3.2 Proposed solutions are communicated or implemented as</p> |

ELEMENT	PERFORMANCE CRITERIA
4. Present information	<p>required.</p> <p>4.1 Information is reported in the required format, style, structure and timeframe.</p> <p>4.2 <i>Information is presented</i> in required medium in accordance with organisational requirements using relevant technology.</p>
5. Maintain information	<p>5.1 A range of standard and complex <i>information systems</i> and operations is used in accordance with organisational policy and procedures.</p> <p>5.2 Information and records are maintained in accordance with organisational procedures to ensure data and system integrity.</p> <p>5.3 Routine data and records are reconciled as required.</p> <p>5.4 Inadequacies in system/s relating to information retrieval are identified and corrected or reported to relevant staff as required.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying public sector legislation such as occupational health and safety and environment in the context of information management
- accessing and using information ethically and legally
- using manual and computerised techniques for information management
- applying computer technology to data storage, security, retrieval and presentation
- using basic statistical and numerical manipulation
- using critical analysis techniques
- communicating with colleagues and supervisors
- presenting information in a range of ways such as report format, numerically, in tables, with graphs, spatially
- responding to diversity, including gender and disability
- using problem solving and referring problems as required
- applying equal employment opportunity, equity and diversity principles

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, policies, procedures and guidelines relating to information handling in the public sector, such as confidentiality, privacy, security, freedom of information

- data collection and management procedures
- organisational information handling and storage procedures
- cultural aspects of information and meaning
- sources of public sector work-related information
- economic, legal, security and social issues surrounding the use of information
- public sector standards
- electronic and manual filing systems
- databases and data storage systems
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of information management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPCRT407A Undertake court listings
 - PSPETHC401A Uphold and support the values and principles of public service
 - PSPFIN401A Use public sector financial processes
 - PSPFRAU401B Monitor data for indicators of fraud
 - PSPGOV402B Deliver and monitor service to clients
 - PSPGOV403B Use resources to achieve work unit goals
 - PSPGOV404B Develop and implement work unit plans
 - PSPGOV405B Provide input to change processes
 - PSPGOV407B Provide a quotation
 - PSPGOV417A Identify and treat risks
 - PSPGOV422A Apply government processes
 - PSPIM401A Conduct initial claim assessments
 - PSPLEGN401A Encourage compliance with legislation in the public sector
 - PSPPM404A Carry out simple project activities
 - PSPREG411A Gather information through interviews

- PSPREG412A Gather and manage evidence
- PSPSEC405A Handle security classified information

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- information gathered and analysed in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to information research, presentation and management
- access to electronic information/records management systems
- Case studies and workplace scenarios to capture the range of situations likely to be encountered when gathering and analysing information

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when gathering and analysing information, including coping with difficulties, irregularities and breakdowns in routine
- information gathered and analysed in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios

- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

Information may include:

- legislation, guidelines and awards
- organisation, legal and policy materials
- client information
- market trends
- media reports
- registries and file records
- library materials
- financial records
- basic statistical information
- human resources/personnel records
- asset records
- meta-data

Sources of information may include:

- those internal to the organisation such as:
 - intranet
 - databases/files
 - library collections
 - internal publications
 - annual reports
 - newsletters
 - other staff
- those external to the organisation such as:
 - Internet
 - local, state, national and international libraries and archives
 - other organisations' publications

	<ul style="list-style-type: none"> • staff in external organisations
Legislation, policy and procedures may include:	<ul style="list-style-type: none"> • Commonwealth and State/Territory legislation, standards and guidelines especially relating to privacy, confidentiality, freedom of information, security, fraud control, copyright, intellectual property • government policy • public sector code of ethics • national standards • Australian standards such as records management, knowledge management, risk management • the organisation's policies/practices/code of conduct
Analysis of information may include:	<ul style="list-style-type: none"> • qualitative analysis • quantitative analysis • critical analysis • problem solving • matching • statistical analysis • mathematical calculations • forecasting
Presentation of information may include:	<ul style="list-style-type: none"> • routine reports and submissions • briefing notes, Ministerials • proposals, project plans • articles and promotional material • tabular or graphical presentation • overhead transparencies • slideshow data presentation • face-to-face • telephone
Information systems may include:	<ul style="list-style-type: none"> • file/records management systems • personnel/human resources systems • specific purpose databases • library systems • data warehouse systems • web sites • financial information systems • workplace communication systems

PSPGOV417A Identify and treat risks

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the identification and treatment of risk using the organisation's risk management procedures and treatments. It applies to the risks inherent in all aspects of everyday work in the public sector as well as to specific functional activities and projects related to the particular mandate of the organisation. The unit covers establishment of the risk context, identification, analysis and evaluation of risks, risks treatment, and monitoring and review of risk treatment plan.

In practice, identifying and treating risk occurs in the context of other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government processes, handling classified information, using resources, administering projects, providing parliamentary support, making arrests, using financial processes, undertaking scientific research, awarding contracts, undertaking native title assessments, assessing compensation claims, road transport compliance, etc.

This is one of 4 units of competency in the *Working in Government and Management* Competency Fields that deal with risk. Related units are:

- PSPGOV517A Coordinate risk management
- PSPMNGT608B Manage risk
- PSPMNGT704A Undertake enterprise risk management
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication
-

Application of the Unit

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish the risk context	1.1 The nature and extent of the work activity are established within the broader <i>organisational context</i> .
	1.2 The outcomes to be achieved are identified and documented as required.
	1.3 The relationship between the activity and its environment is analysed and critical <i>factors</i> in the environment that may impact on the achievement of outcomes are identified.
	1.4 <i>Stakeholders</i> are identified and consulted to identify their opinions, concerns and needs related to the activity and the management of risks related to it.
	1.5 <i>Risk evaluation criteria</i> are determined for the activity in accordance with <i>legislation, policy and procedures</i> related to <i>risk management</i> in the organisation.
2. Identify risks	2.1 <i>Method/s for identifying risks</i> are selected in accordance with risk management policy and procedures, budgetary and time constraints relative to the type of activity to be undertaken.

ELEMENT**PERFORMANCE CRITERIA**

- 2.2 *Sources of risk* are identified and documented as required.
- 2.3 *Risk events* related to each source of risk are identified and recorded in accordance with risk management policy and procedures.
- 2.4 Consultation and communication is undertaken to ensure all possible risks are identified.
- 3. Analyse risks**
- 3.1 The *probability of identified risks* occurring is analysed and rated in accordance with risk management policy and procedures.
- 3.2 The *consequences of identified risks* occurring are analysed and rated according to organisational procedures.
- 3.3 Current *control measures* for any of the identified risks are considered in the risk analysis, and residual risks are analysed and included if necessary.
- 3.4 *Levels of risk* are determined in accordance with risk matrix used by the organisation.
- 3.5 Consultation/communication is undertaken as required to confirm risk levels, and *analysis is documented* in accordance with organisational risk management procedures.
- 4. Evaluate risks**
- 4.1 Risks are evaluated by comparing the level of risk with risk evaluation criteria established at the beginning of the risk management process.
- 4.2 The importance of the activity, its outcomes and the degree of control over the risks are considered.
- 4.3 Potential and actual losses which may arise from the risk are considered.
- 4.4 Benefits and opportunities presented by the risk are taken into account.
- 4.5 Risks are identified as *acceptable* or *unacceptable* in accordance with risk evaluation criteria, and confirmation/approval is obtained in accordance with risk management policy and procedures.
- 4.6 Unacceptable risks are prioritised and the reason/s for acceptance of risks is documented.
- 5. Treat risks**
- 5.1 *Options for treating risks* are determined in accordance with risk management policy and procedures.
- 5.2 The best treatment option is selected and a cost-benefit analysis is undertaken to compare the cost of implementing the treatment with the benefits.
- 5.3 A *risk treatment plan* is prepared, approved and communicated to those who will be involved in implementation.

ELEMENT	PERFORMANCE CRITERIA
6. Monitor and review risk treatment plan	<p>5.4 Changes required to operational structure, procedures or staffing in order to implement risk treatments are negotiated in accordance with organisational policy and procedures.</p> <p>5.5 <i>Resources</i> are arranged and risk treatment plan is implemented in accordance with risk management policy and procedures.</p> <p>6.1 <i>Changes</i> in the organisational environment and factors impacting on the organisation are monitored for their impact on risks and existing risk treatments.</p> <p>6.2 Risk treatments for unacceptable risks are monitored and adjusted as required to ensure they remain effective.</p> <p>6.3 Acceptable risks are monitored to ensure these risk levels do not increase over time.</p> <p>6.4 Consultations are conducted and data relating to risks and risk treatments are collected, analysed and used to improve risk management in own area of operation.</p> <p>6.5 Risk treatment plan is reviewed in accordance with timetable for review of plan and updated as required.</p> <p>6.6 Input is provided into formal reviews/audits of risk in the organisation to improve risk management outcomes.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to risk management
- researching and analysing the wider context affecting the organisation
- assessing and evaluating risks
- monitoring and reviewing risks and risk treatments
- communicating and consulting with a diverse range of stakeholders
- estimating and arranging resources needed for implementation of risk treatments
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of risk management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to risk

management

- AS/NZS ISO31000:2009 Risk management - Principles and Guidelines
- HB 436:2004 (Guidelines to AS/NZS 4360:2004) Risk Management Guidelines Companion to AS/NZS 4360:2004
- the organisation's risk management framework
- the relationship of risk to context - how the context may define the risks
- the importance of consultation and communication at every stage of the risk management cycle
- risk management as a core activity of everyday work in the public sector
- the diversity of risks in the public sector
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of risk management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC401A Uphold and support the values and principles of public service
 - PSPFIN401A Use public sector financial processes
 - PSPGOV402B Deliver and monitor service to clients
 - PSPGOV405B Provide input to change processes
 - PSPGOV406B Gather and analyse information
 - PSPGOV409A Provide support to Parliament
 - PSPGOV422A Apply government processes
 - PSPGOV419A Work with interpreters
 - PSPLAND402A Undertake native title assessments
 - PSPPM405A Administer simple projects
 - PSPPROC410A Administer contracts
 - PSPREG406C Make arrests
 - PSPSEC405A Handle security classified information

Overview of evidence

In addition to integrated demonstration of the elements and their

requirements

related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- identification and treatment of risks in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to risk management
- AS/NZS ISO 31000:2009 Risk management - Principles and Guidelines
- HB 436:2004 (Guidelines to AS/NZS 4360:2004) Risk Management Guidelines Companion to AS/NZS 4360:2004
- other national and international risk management standards
- case studies and workplace scenarios to capture the range of risk management situations likely to be encountered

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when identifying and treating risks, including coping with difficulties, irregularities and breakdowns in routine
- identification and treatment of risks in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios

- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

<p><i>Organisational context</i> may include:</p>	<ul style="list-style-type: none"> • the organisation, how it is organised, and its capabilities • the organisation's functions: <ul style="list-style-type: none"> • political • operational • financial • social • legal • commercial • the various stakeholders and clients • any official resources, including physical areas and assets, that are vital to the operation of the organisation • key operational elements and services of the organisation • any major projects • the relationship between the organisation and the environment in which it operates
<p><i>Environmental factors</i> may be:</p>	<ul style="list-style-type: none"> • social • economic • legal • technological • environmental
<p><i>Stakeholders</i> may include:</p>	<ul style="list-style-type: none"> • employees • managers • volunteers • unions • financial managers • self-insurers

	<ul style="list-style-type: none"> • clients • suppliers • contractors • service providers • community organisations • the public
Risk evaluation criteria are:	<ul style="list-style-type: none"> • used to rank risks and decide whether they are acceptable or not • affected by: <ul style="list-style-type: none"> • legal requirements • perceptions of internal/external stakeholders • cost-benefit analysis, for example, cost of risk management being less than financial cost if the risk occurred
Legislation, policy and procedures may include:	<ul style="list-style-type: none"> • Commonwealth and State/Territory legislation relating to risk management • national and international codes of practice and standards, such as SIRCA 8001:2003 • the organisation's risk management policies and practices • codes of conduct/codes of ethics • AS/NZS ISO 31000:2009 Risk management - Principles and Guidelines • HB 436:2004 (Guidelines to AS/NZS 4360:2004) Risk Management Guidelines Companion to AS/NZS 4360:2004 • ISO Guide 73:2009 Risk Management, Vocabulary • professional standards for risk management, for example certified practising risk manager (CPRM) • jurisdictional policies, guidelines and web sites, for example www.riskmanagement.qld.gov.au
Risk management:	<ul style="list-style-type: none"> • is a logical and systematic process of identifying, analysing, evaluating, treating and monitoring risks related to any strategy, plan, process, program or procedure that will enable the organisation to minimise losses and maximise opportunities. • may be considered in relation to an organisation's: <ul style="list-style-type: none"> • people • assets and physical environment • reputation and image • legal issues • business continuity • finances • may include written procedures to ensure staff know: <ul style="list-style-type: none"> • what • how • when, and

	<ul style="list-style-type: none"> • by whom, action is to be taken to treat risks in the organisation
Methods for identifying risks may include:	<ul style="list-style-type: none"> • analysis of past records • personal, local or overseas experience • interviews/discussions with stakeholders • surveys/questionnaires • audits and physical inspections • observation of activity • analysis of scenarios • research of external sources • using industry experts/consultants
Risks may include:	<ul style="list-style-type: none"> • physical injury or death • failure of machinery or equipment • breaches of security • fraud • litigation • client dissatisfaction • unfavourable publicity
Risks may be:	<ul style="list-style-type: none"> • internal • external • random • real • perceived
Sources of risk may include:	<ul style="list-style-type: none"> • human behaviour • technology/technical issues • occupational health and safety • legal • political • property/equipment • environmental • financial/market • natural events
Risk events are:	<ul style="list-style-type: none"> • what can happen, as opposed to the source (how a risk may arise) and the impact (what is the implication if it happens)
Probability of identified risk may be:	<ul style="list-style-type: none"> • almost certain • likely • possible • unlikely • rare
Consequences of	<ul style="list-style-type: none"> • insignificant • minor

<i>identified risk</i> may be:	<ul style="list-style-type: none"> • moderate • major • catastrophic
<i>Control measures</i> may:	<ul style="list-style-type: none"> • reduce the probability of the risk occurring, the consequences of the risk, or both • include: <ul style="list-style-type: none"> • training • supervision • minimising/restricting exposure • physical barriers • relocation
<i>Level of risk</i> may be:	<ul style="list-style-type: none"> • low - treated with routine procedures • moderate - with specific responsibility allocated for the risk, and monitoring and response procedures implemented • high - requiring action, as it has potential to be damaging to the organisation • extreme - requiring immediate action, as the potential could be devastating to the organisation
<i>Documentation of analysis</i> may include:	<ul style="list-style-type: none"> • table showing all risks, any existing controls, probability of occurring, consequences and subsequent level of risk
<i>Acceptable risks</i> are:	<ul style="list-style-type: none"> • those which an organisation has determined have the least potential for harm • not necessarily insignificant
<i>Risks may be acceptable</i> because:	<ul style="list-style-type: none"> • the risk level is so low that it does not warrant spending time and money to treat it • the risk is low and the benefits outweigh the cost of treating it • the opportunities presented are much greater than the threat
<i>Unacceptable risks</i> are:	<ul style="list-style-type: none"> • those which an organisation has determined have the most potential for harm
<i>Options for treating risks</i> may include:	<ul style="list-style-type: none"> • avoiding the risk, for example, by terminating the activity or conducting it in another way (these actions may have different risks attached) • controlling the risk, by reducing the probability of the risk occurring, the consequences of the risk, or both • transferring the risk, for example, by arranging insurance, contracting some or all of the activity to another organisation or person, etc • retaining the risk, and making contingency plans/funds allocation for covering any loss or other negative effect from the risk
<i>Risk treatment plan</i> may	<ul style="list-style-type: none"> • sources of risk and risk events • analysis of risks - probability, consequences and risk levels

include:	<ul style="list-style-type: none"> • prioritised list of unacceptable risks • treatment options selected • person/s responsible for implementing treatment options • resources required • performance measures • timeframe for implementation • timetable for review of plan
<i>Resources</i> may include:	<ul style="list-style-type: none"> • physical - equipment, motor vehicles, furniture • human - management, employees, volunteers • financial - funding, budget allocation, sponsorship • resources that are part of the risk treatment, not just implementation of the treatment plan • training and briefing sessions • changes to the organisation's operating structure
<i>Changes</i> may mean that:	<ul style="list-style-type: none"> • new risks are created • existing risks are increased or decreased • risks no longer exist • the priority order of risks changes • risk treatment strategies are no longer effective

PSPGOV509A Conduct evaluations

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers evaluation relevant to the full range of processes and outcomes in the public sector such as policy, procedures, processes, structures, service delivery, projects etc. It includes identifying the purpose of the evaluation, identifying the evaluation process and tools, carrying out the evaluation, analysing results, reporting outcomes and recommending action.

In practice, conducting evaluations may overlap with other generalist or specialist public sector workplace activities such as acting ethically, complying with legislation, providing client service, developing policy etc.

This is one of two competencies in the *Working in Government and Management*. Competency Fields that deal with evaluation in the public sector. The related unit is:

- PSPMNGT611A Manage evaluations
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Identify the purpose of the evaluation

- 1.1 The *purpose, scope* and terms of reference of the evaluation are confirmed with key *stakeholders* and approvals are gained in accordance with organisational requirement.
- 1.2 The range of documentary evidence, individuals and organisations who can provide specialist input are identified and commitment is gained for their contribution to the evaluation.
- 1.3 Information critical to the evaluation is determined to inform the selection of the evaluation methodology and tools.
- 1.4 Ownership of the evaluation data/outcomes and right of access to the reported results are determined in accordance with organisational policy and procedures.

2. Identify evaluation methodology and tools

- 2.1 *Criteria* for the evaluation and the audience for evaluation results are identified and communicated to stakeholders.
- 2.2 *Evaluation methods* are selected from a range of alternatives to suit the scope, purpose and outcome requirements of the evaluation.
- 2.3 *Measuring tools* and *media* are selected/developed to ensure valid and reliable evaluation results.
- 2.4 An evaluation strategy is formulated in consultation with key stakeholders to ensure acceptance and commitment.
- 2.5 Resource needs are determined in accordance with budgetary constraints and obtained in accordance with organisational policy and procedures.
- 2.6 *Evaluation infrastructure* is established in accordance with

ELEMENT	PERFORMANCE CRITERIA
3. Implement evaluation	<p>evaluation requirements and resource constraints.</p> <p>3.1 Implementation tasks are defined and clarified with stakeholders in accordance with the evaluation methodology.</p> <p>3.2 Evaluation strategy is implemented and data collected, collated and recorded against evaluation criteria in accordance with planned methodology.</p> <p>3.3 Expectations are managed and barriers to the evaluation are identified and addressed or referred in accordance with organisational policy and procedures.</p> <p>3.4 Progress of the evaluation is monitored and changes are negotiated as needed to timeframes, methodology or tools in accordance with organisational policy and procedures.</p> <p>3.5 Data is analysed/referred for specialist analysis, and results are compared with evaluation criteria.</p> <p>3.6 Preliminary results are <i>presented</i> for stakeholder feedback in accordance with organisational policy and procedures.</p> <p>3.7 The evaluation is conducted in accordance with <i>legislative and organisational requirements</i>.</p>
4. Report outcomes	<p>4.1 An evaluation report is prepared that compares outcomes to the evaluation criteria established at the outset, and provides supporting evidence in accordance with legislative and organisational requirements.</p> <p>4.2 <i>Recommendations for action</i> are made in accordance with the terms of reference and supported by the evaluation outcomes.</p> <p>4.3 Unbiased and objective evaluation outcomes are reported in a form and language to suit the intended audience of the report.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- implementing planning, research and analysis
- using negotiation and problem solving
- undertaking project management
- applying statistical analysis of evaluation data
- using a range of communication styles to communicate with different audiences and purposes

- responding to diversity, including gender and disability
- explaining complex and formal documents such as legislation and codes of conduct and applying them to work practices
- developing objectives and evaluation criteria
- accessing legislation and codes of conduct electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- evaluation principles - time, cost, quality, quantity, efficiency
- qualitative and quantitative evaluation methodologies and data analysis
- reporting requirements of a range of audiences
- legislation, policy and procedures relating to the conduct of evaluations in the public sector
- public sector values and codes of conduct
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC501B Promote the values and ethos of public service
 - PSPFIN501A Apply public sector financial policies and processes
 - PSPGOV502B Develop client services
 - PSPGOV503B Coordinate resource allocation and usage
 - PSPGOV504B Undertake research and analysis
 - PSPGOV505A Promote diversity
 - PSPGOV507A Undertake negotiations
 - PSPGOV508A Manage conflict
 - PSPGOV511A Provide leadership
 - PSPGOV512A Use complex workplace communication strategies
 - PSPLEGN501B Promote compliance with legislation in the

public sector

- PSPPM502B Manage complex projects
- PSPPOL501A Develop organisation policy
- PSPPROC504A Finalise contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- conduct of a range of (3 or more) evaluations in different contexts

Resources required to carry out assessment

These resources include:

- legislation, policies, procedures and protocols
- access to an evaluation target
- case studies and workplace scenarios

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when conducting evaluations, including coping with difficulties, irregularities and breakdowns in routine
- conduct of a range of (3 or more) evaluations in different contexts

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training

courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

<p><i>Purpose</i> of evaluation may include:</p>	<ul style="list-style-type: none"> • measuring merit/quality • measuring worth or value for a particular purpose • measuring results, outputs or outcomes • decision making • unintentional negatives
<p><i>Scope</i> may include evaluation of:</p>	<ul style="list-style-type: none"> • planning • delivery • results • needs • objectives • design • processes • inputs • outputs • outcomes • impact
<p><i>Stakeholders</i> may include:</p>	<ul style="list-style-type: none"> • all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services such as: <ul style="list-style-type: none"> • the owner/organisation that commissioned the evaluation • those subject to the evaluation process • research staff who conduct evaluation • contractors/consultants contracted to conduct evaluation • employees at all levels of the organisation • community • clients

	<ul style="list-style-type: none"> • other public sector organisations • private sector • non-government organisations • union and association representatives • boards of management • government • Ministers
Criteria for evaluation may include:	<ul style="list-style-type: none"> • whether objectives have been met • standards against which to compare quality • baseline studies for comparison • performance measures • key success areas • key performance indicators • results/outputs/outcomes • value for money • public interest
Evaluation methods may be:	<ul style="list-style-type: none"> • qualitative • quantitative • anonymous
Measuring tools may include:	<ul style="list-style-type: none"> • surveys • interviews • questionnaires • focus groups • semi-structured interview techniques • document analysis • process analysis • observation • tests
Media for measuring tools may include:	<ul style="list-style-type: none"> • paper-based • Internet-based • email • electronic • face-to-face • telephone.
Evaluation infrastructure may include:	<ul style="list-style-type: none"> • steering committee • manager • internal/external research staff • internal/external administrative staff • office • telephone • technology

	<ul style="list-style-type: none"> • email • web site • equipment • consumables • resources including budget • internal/external specialist or technical support • contractors • consultants
<i>Presentation of information</i> may include:	<ul style="list-style-type: none"> • interim reports • progress reports • draft reports • executive summaries • to meetings, groups, seminars • Internet or email

Unit Descriptor

This unit covers complex workplace communication for working at middle management level with internal and external clients, colleagues and other staff. It includes preparing for complex communication, analysing and responding to opinions, presenting a convincing argument, and developing a range of communication strategies.

In practice, using complex workplace communication strategies may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing change, managing diversity, etc.

This is one of 5 units of competency in the *Working in Government* Competency Field that deal with communication. Related units are:

- PSPGOV202B Use routine workplace communication techniques
- PSPGOV312A Use workplace communication strategies
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV605A Persuade and influence opinion
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| <p>1. Prepare for complex communication</p> | <p>1.1 <i>Communication objectives</i> are clarified, those to be <i>present</i> are confirmed and <i>communication mode</i> is identified.</p> <p>1.2 Analysis is undertaken to anticipate the likely positions to be taken by those present on the matters under discussion.</p> <p>1.3 Subject matter is researched/<i>organised</i>, key points to be conveyed are identified and recorded, and information to counter other positions is summarised.</p> <p>1.4 Requirements of <i>legislation, policy and guidelines</i> relevant to the discussion are identified and incorporated.</p> |
| <p>2. Analyse and respond to opinions</p> | <p>2.1 Discussion is evaluated to identify impartiality, bias or unsupported argument.</p> <p>2.2 Points of view of other speakers are noted and information to counter opposing views is presented objectively in accordance with required position.</p> <p>2.3 <i>Reaction to speakers</i> and their point of view is analysed to identify and manage emotional reactions and maintain objectivity.</p> <p>2.4 Opposing/challenging views are examined for their value in achieving the same ends.</p> <p>2.5 Active listening and questioning are used to clarify own</p> |

ELEMENT	PERFORMANCE CRITERIA
	understanding, challenge or justify other points of view.
3. Present a convincing argument	<p>3.1 <i>Communication approach</i> is chosen and used to suit the given audience.</p> <p>3.2 Prepared position is asserted with conviction and purpose.</p> <p>3.3 <i>Verbal and non-verbal behaviour</i> are adjusted to maintain listener interest if the audience is unresponsive.</p> <p>3.4 Questions are used to elicit feedback and check audience understanding.</p> <p>3.5 Audience questions and argument are responded to objectively, and answers are backed by reasoned explanation.</p> <p>3.6 Agreement is negotiated where possible, concluding with a summary of agreed items.</p>
4. Develop a range of communication strategies	<p>4.1 Feedback from others is obtained and the outcomes of communication are assessed.</p> <p>4.2 Lessons learnt are recorded and used to underpin future interactions.</p> <p>4.3 <i>Language structures and features</i> that influence audiences to a preferred point of view are developed and practised.</p> <p>4.4 Communication strategies are explored and practised for a range of workplace applications in accordance with organisational requirements.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to communication in the public sector
- analysing and using language structures and features that influence the interpretation of spoken communication
- interacting confidently with groups on familiar topics in formal and informal workplace situations
- speaking with confidence and listening critically
- clarifying meaning, exploring issues and problem solving
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in

the context of high-level communication

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to communication in the public sector
- the power and effect of spoken language
- knowledge of organisation processes and hierarchy
- techniques to deal with opposing views and positions
- emotional intelligence techniques
- organisational protocols and etiquette for communication in meetings
- communication strategies to suit different audiences, such as workgroup, organisational, inter-agency
- ways to influence the interpretation of spoken communication
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of high-level communication

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC501B Promote the values and ethos of public service
 - PSPGOV504B Undertake research and analysis
 - PSPGOV505A Promote diversity
 - PSPGOV507A Undertake negotiations
 - PSPGOV508A Manage conflict
 - PSPGOV511A Provide leadership
 - PSPGOV514A Facilitate change
 - PSPGOV515A Develop and use political nous
 - PSPGOV516A Develop and use emotional intelligence
 - PSPLEGN501B Promote compliance with legislation in the public sector

- PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- use of complex communication strategies in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to public sector communication
- current theory and practice on influencing skills for the public sector
- case studies and workplace scenarios to capture the range of situations likely to be encountered when using complex communication strategies

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when using complex communication strategies, including coping with difficulties, irregularities and breakdowns in routine
- complex communications strategies used in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- questioning

- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

<p>The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in <i>bold italics</i> in the Performance Criteria is explained here.</p>	
<p><i>Communication objectives</i> may be to:</p>	<ul style="list-style-type: none"> • share information • reach consensus • contribute to policy • represent the business unit's position/interests in internal negotiations • resolve differences • negotiate a joint position/compromise • build reputation (of self and organisation/business unit) • market services
<p><i>Those to be present</i> may include:</p>	<ul style="list-style-type: none"> • peers • colleagues • those senior or junior to the position • staff from other agencies
<p><i>Mode of communication</i> may include:</p>	<ul style="list-style-type: none"> • telephone • teleconference • video conference • Internet (online forums) • face-to-face • one-on-one, or in a group • forum, seminar or conference
<p><i>Organisation</i> of subject matter may include:</p>	<ul style="list-style-type: none"> • identifying features, advantages and benefits and aligning evidence/examples • anticipating likely disagreements and structuring material to address these

<p><i>Legislation, policy and guidelines</i> may include:</p>	<ul style="list-style-type: none"> • State/Territory and Commonwealth legislation, regulations, policies, guidelines and standards relating to exchange of information in the public sector, such as: <ul style="list-style-type: none"> • ethics and accountability guidelines/codes of practice • information security standards • principles of equal employment opportunity, equity and diversity • freedom of information and privacy. • intellectual property • fraud standards • professional liability
<p><i>Reaction to speakers</i> may include:</p>	<ul style="list-style-type: none"> • own reaction • others present
<p><i>Communication approach</i> may include:</p>	<ul style="list-style-type: none"> • catering to political sensitivities • working within government processes and operational frameworks • balancing debate and action • consideration of wider organisational/public sector issues • speaking with confidence • cultural, ethnic, diversity or equity considerations • consultative • collaborative • assertive • reasonable • humorous
<p><i>Verbal and non-verbal behaviour</i> may include:</p>	<ul style="list-style-type: none"> • inclusive language, ideas and information • congruent speech and body language • speaking with confidence • impartiality • responsiveness • drawing on different sources of information
<p><i>Language structures and features</i> may include:</p>	<ul style="list-style-type: none"> • use of metaphors and similes • use of analogy, imagery and other comparisons • use of passive voice • using personal names repeatedly to convey intimacy or sincerity • tone, style and point of view

Unit Descriptor

This unit covers written workplace communication at a level where preliminary research or documents may have been prepared by others as input, and final documents are being prepared. It includes critical analysis of workplace information, composition, revision and refinement to meet workplace requirements.

In practice, refinement of complex workplace documents may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, providing client service, leading a group, developing policy, undertaking research and analysis, etc.

This is one of 5 units of competency in the *Working in Government* Competency Field that deal with written communication. Related units are:

- PSPGOV208A Write routine workplace materials
- PSPGOV313A Compose workplace documents
- PSPGOV413A Compose complex workplace documents
- PSPGOV606A Prepare high-level/sensitive written materials

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|--|
| <p>1. Critically analyse information</p> | <p>1.1 <i>Information</i> is tested for relevance, reliability, consistency and usefulness to the task/organisation.</p> <p>1.2 Fact is separated from opinion and underlying values and beliefs are identified.</p> <p>1.3 Cultural context of the information is taken into account in the analysis.</p> <p>1.4 Stereotypes, bias, prejudice and motive are recognised.</p> <p>1.5 Conclusions are drawn and a critical analysis with supporting evidence is prepared and submitted in accordance with organisational requirements.</p> |
| <p>2. Compose/refine complex documents</p> | <p>2.1 The <i>purpose</i>, audience and objectives of <i>complex documents</i> are confirmed in accordance with organisational requirements.</p> <p>2.2 <i>Structure and content</i> of document is approved in line with the purpose and intended audience.</p> <p>2.3 Risk assessment is undertaken and risk management is implemented in relation to document preparation and content, in accordance with the nature and classification of the material.</p> <p>2.4 Information/documents provided by others are analysed for bias, gaps, the influence of values, attitudes and context, conflicting advice/evidence and political implications.</p> <p>2.5 Information is synthesised and complex documents are prepared and <i>submitted</i> in accordance with <i>organisational requirements, legislation, policy and procedures</i>.</p> <p>2.6 Feedback is provided to contributors of information/documents</p> |

ELEMENT

PERFORMANCE CRITERIA

to improve future input in a manner that provides learning opportunities for the researchers/authors.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading and writing at a level to cope with a range of complex and sensitive workplace materials
- critically analysing and synthesising information to compose complex written documents
- refining content, structure and sequence according to the required purpose of written material
- using spelling, punctuation and grammar for workplace documents at an experienced level
- providing feedback on other people's work in ways suited to the diversity of the workplace, including creation of learning opportunities to improve research/document input
- responding to diversity, including gender and disability
- implementing ergonomic requirements for office work
- complying with environmental policies such as those relating to paper use/wastage/recycling

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to written communication in the public sector such as privacy, freedom of information, information security, confidentiality, copyright, intellectual property
- critical analysis of complex information
- politically and culturally sensitive documents
- organisational requirements for complex written documents
- government style manual requirements
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of preparing written materials

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC501B Promote the values and ethos of public service
 - PSPGOV504B Undertake research and analysis
 - PSPGOV505A Promote diversity
 - PSPGOV515A Develop and use political nous
 - PSPLEGN501B Promote compliance with legislation in the public sector
 - PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- complex workplace documents composed/refined in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to written communication in the public sector
- examples of complex workplace documents
- government style guide
- case studies and workplace scenarios to capture the range of situations likely to be encountered when composing/refining complex workplace documents

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when refining complex workplace documents, including coping with difficulties, irregularities and breakdowns in routine
- complex workplace documents composed/refined in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

<p>The Range Statement provides information about the context in which the unit of competency is carried out. Unit Descriptor

This unit covers the competency to encourage others (colleagues or those supervised) in the workplace to comply with legislation. It includes assisting others to comply with legislative requirements, and taking action on non-compliance.

In practice, encouraging compliance with legislation is demonstrated in the context of other generalist or specialist work activities such as using government processes, delivering and monitoring client services, using resources, preparing quotations, conducting interviews, awarding contracts etc.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assist others to comply with legislative requirements	1.1 Knowledge of the range of <i>legislation and guidelines</i> relating to the public sector workplace is regularly updated to ensure currency.
	1.2 The way various pieces of legislation are integrated to provide a legislative framework for public sector work and the key requirements of each piece of legislation are confirmed and conveyed to <i>others</i> using language and examples suited to their individual needs.
	1.3 Own work practices and procedures are used to provide a consistent model of compliance with legislative requirements relating to the public sector work environment.
	1.4 The <i>consequences of non-compliance</i> with public sector legislation are identified and conveyed to others using language and examples suited to individual needs.
	1.5 Others are assisted to locate and access current information on legislation and guidelines.
	1.6 Others are encouraged to identify and obtain advice on apparently <i>conflicting legislative requirements</i> in accordance with organisational policy and procedures.
2. Act on non-compliance	2.1 Actions that might constitute breaches of legislation are identified and discussed with others in accordance with organisational requirements.
	2.2 Possible breaches of legislation are acted upon or referred promptly to an authorised person/body in accordance with organisational procedures.
	2.3 <i>Inadequacies in workplace procedures</i> which may contribute to non-compliance are reported and addressed in accordance with organisational procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- accessing and reading complex and formal documents such as legislation and related materials
- assisting others to apply legislation to work practices and to identify inappropriate conduct
- using guidelines to effectively administer legislative requirements
- exercising discretion in accordance with legislation and guidelines
- communicating with others involving exchanges of complex oral/written information
- using technology to access legislative requirements
- responding to diversity, including gender and disability
- applying environmental and occupational health and safety procedures and encouraging others in their application

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- the range of legislation relating to the public sector (including occupational health and safety, and specific enabling legislation relating to the business) and the key requirements of each
- public sector codes of ethics/conduct
- consequences of non-compliance
- procedures for acting on and reporting possible breaches of legislation
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to

increase the efficiency and realism of the assessment process include, but are not limited to:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV402B Deliver and monitor service to clients
- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV407B Provide a quotation
- PSPGOV422A Apply government processes
- PSPPROC409A Receive and select offers
- PSPREG407B Produce formal record of interview

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- compliance with legislation encouraged in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- public sector legislation, regulations and guidelines
- procedures and protocols
- scenarios and case studies to capture the range of situations likely to be encountered when assisting others to comply with legislation

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when encouraging compliance with legislation in the public sector, including coping with difficulties, irregularities and apparently conflicting legislative requirements
- compliance with legislation encouraged in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people

- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

Legislation and guidelines may relate to:

- public sector standards:
 - codes of conduct/ethics
 - guarantee of service
 - legislated standards
 - State/Territory/Commonwealth/organisational standards
 - technical/industrial standards
 - professional standards
 - industry competency standards
 - anti-corruption legislation
 - whistleblowers' protection
- public sector employment:
 - employee relations
 - chief executive officer's instructions
 - Commissioner's instructions
 - public sector notices

- workplace environment:
 - equal employment opportunity
 - affirmative action
 - workplace diversity
 - anti-discrimination
 - workplace harassment
 - occupational health and safety
 - duty of care
 - security, storage, handling and classification of documents
- financial management and accountability:
 - Treasurer's instructions
 - contractual obligations
- transparency:
 - freedom of information
 - professional reporting
 - accountability
 - fair trading
- business and community:
 - privacy
 - trade practices
 - competition
 - road transport legislation
- information and records management standards and legislation
- the organisation's enabling legislation, regulations
- aspects of common law, criminal law, contract law, employment law and administrative law, including judges' rules
- international legislation/codes of behaviour
- colleagues
- supervised staff
- contractors
- for individuals:
 - counselling
 - disciplinary action
 - transfer, demotion, dismissal
 - legal liability
 - fine
- external consequences, for example:

Others may include:

Consequences of non-compliance may include:

Conflicting legislative requirements may include:

- to clients
- to the organisation's reputation
- apparent contradiction between statutes
- apparent conflict between statutes and policy requirements
- contradictions between different policy requirements
- contradictions within a single piece of legislation

Inadequacies in workplace procedures may include:

- insufficient financial/other controls
- insecure Internet/fax access
- non-auditable records processes
- ambiguous guidelines
- no guidelines
- unnecessary complexity
- use of non-current legislation

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Model and encourage compliance with legislative requirements	1.1 Personal work practices are used to provide a consistent model of compliance with current public sector <i>legislation and guidelines</i> .
	1.2 Responses to staff enquiries about the legislative requirements of the workplace are provided in a timely, consistent and constructive manner.
	1.3 The <i>consequences of non-compliance</i> relating to a range of legislation are explained to staff using language and materials suited to their levels of experience, learning styles and individual needs.
	1.4 <i>Compliance strategies</i> are used to encourage compliance with legislation, policies and guidelines in accordance with the situation at hand.
2. Monitor compliance with legislative requirements	2.1 Compliance with legislative requirements is monitored in accordance with organisational procedures.
	2.2 Compliance issues are resolved or referred in accordance with organisational policy and procedures.
	2.3 <i>Inadequacies in workplace procedures</i> which may contribute to non-compliance are raised promptly and addressed in accordance with organisational procedures.
	2.4 Compliance with legislative requirements is reported on, in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying research and evaluation
- assisting other people in areas such as conflict resolution, coaching, problem solving
- reading and explaining complex and formal documents such as legislation and codes of ethics and applying them to work practices
- communicating with others involving exchanges of complex oral and written information
- responding to diversity, including gender and disability
- using technology skills to access legislation and guidelines electronically
- applying environmental and occupational health and safety procedures and promoting their use by others

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation relating to the public sector (including occupational health and safety and environment)
- regulations, guidelines, policy, practices
- public sector codes of ethics/conduct
- government processes
- governance practices
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC501B Promote the values and ethos of public service
 - PSPGOV502B Develop client services
 - PSPGOV503B Coordinate resource allocation and usage

- PSPGOV507A Undertake negotiations
- PSPGOV511A Provide leadership
- PSPGOV519A Manage performance
- PSPPM502B Manage complex projects
- PSPPROC502A Establish contract management arrangements

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- compliance with legislation promoted in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- public sector legislation, regulations and guidelines
- procedures and protocols
- scenarios and case studies to capture the range of situations likely to be encountered when promoting compliance with legislation

Where and how to assess evidence

Valid assessment of this unit requires:

- an environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered when promoting compliance with legislation, including coping with difficulties, irregularities and apparently conflicting requirements
- compliance with legislation promoted in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

Legislation and guidelines may include:

- public sector standards:
 - codes of conduct/ethics
 - guarantee of service
 - legislated standards
 - State/Territory/Commonwealth/organisational standards
 - technical/industrial standards
 - professional standards
 - industry competency standards
 - anti-corruption legislation
 - whistleblowers' protection
- public sector employment:
 - employee relations
 - chief executive officer's instructions
 - Commissioner's instructions
 - public sector notices
- workplace environment:
 - equal employment opportunity
 - affirmative action
 - workplace diversity
 - anti-discrimination

- workplace harassment
- occupational health and safety
- duty of care
- security, storage, handling and classification of documents
- financial management and accountability:
 - Treasurer's instructions
 - contractual obligations
- transparency:
 - freedom of information
 - professional reporting
 - accountability
 - fair trading
- business and community:
 - privacy
 - trade practices
 - competition
 - road transport legislation
- information and records management standards and legislation
- the organisation's enabling legislation, regulations
- aspects of common law, criminal law, contract law, employment law and administrative law, including judges' rules
- international legislation/codes of behaviour
- for individuals:
 - counselling
 - disciplinary action
 - transfer
 - demotion
 - dismissal
 - legal liability
 - fine
- external consequences, for example:
 - to clients
 - customer service
 - to the organisation's reputation
- education
- mentoring
- coaching

Consequences of non-compliance may include:

Compliance strategies may include:

Inadequacies in workplace procedures may include:

- shadowing
- supervision
- taking disciplinary or legal action
- insufficient financial/other controls
- insecure Internet/fax access
- non-auditable records processes
- ambiguous guidelines
- no guidelines
- unnecessary complexity
- use of non-current legislation

Unit Descriptor

This unit covers managing evaluations relevant to the full range of processes and outcomes in the public sector such as policy, procedures, processes, structures, service delivery, projects etc. It includes initiating and managing the implementation of evaluations and utilising evaluation findings.

In practice, managing evaluations may overlap with other generalist or specialist public sector workplace activities such as managing people, performance and client service, acting ethically etc.

This unit is one of 2 competencies relating to evaluation in the public sector, located in the Competency fields of *Working in Government* and *Management*. Related unit of competency is:

- PSPGOV509A Conduct evaluations

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills..

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Initiate evaluation

- 1.1 A critical analysis of the need for evaluation is conducted that includes a scan of the internal and external environment, political imperatives, related activities and evaluations.
- 1.2 The ***scope*** of the evaluation and the terms of reference are determined in accordance with organisational policy and procedures, and a rationale, ***purpose***, outcomes and ***evaluation criteria*** are identified.
- 1.3 ***Stakeholders*** are identified and canvassed to ensure that their requirements are addressed in the planning stage of the evaluation.
- 1.4 Ownership of the evaluation data/outcomes and right of access to the reported results is secured in accordance with organisational policy and procedures.
- 1.5 A ***risk management*** strategy is developed and applied to ensure evaluation objectives will be met.
- 1.6 ***Infrastructure*** for the evaluation is approved in accordance with ***legislation, policy and procedures***.

2. Manage implementation of evaluation

- 2.1 Evaluation strategy is approved and a work plan for checking progress, reading reports and providing feedback and interim approvals is developed in accordance with requirements.
- 2.2 Processes identified for monitoring, evaluating and reporting progress of the evaluation against objectives and timelines are established in accordance with organisational requirements.
- 2.3 The political context and stakeholder expectations are managed in accordance with organisational policy and procedures, to

ELEMENT	PERFORMANCE CRITERIA
3. Utilise evaluation findings	<p>overcome barriers and ensure ongoing commitment/input to the evaluation.</p> <p>2.4 Progress of evaluation is monitored and changes are negotiated as needed to timeframes, methodology or tools in accordance with organisational policy and procedures.</p> <p>2.5 Interim and final evaluation <i>reports</i> are analysed, outcomes are compared to the evaluation criteria established at the outset and <i>recommendations for action</i> are analysed to ensure they are compatible with the organisation's strategic requirements.</p> <p>2.6 Evaluation findings are reported to stakeholders in accordance with organisational policy and procedures.</p> <p>3.1 An implementation strategy is developed to action approved recommendations and facilitate transition from current to future position.</p> <p>3.2 Evaluation findings are <i>disseminated</i> and <i>applied</i> in accordance with organisational policy and procedures.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- researching information
- developing objectives and evaluation criteria
- data gathering/management/measurement
- planning and analysis
- negotiating and problem solving
- applying project management in the context of managing an evaluation
- using a range of communication styles for communicating with different audiences and purposes
- responding to diversity, including gender and disability
- applying sustainability principles

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- evaluation principles - time, cost, quality, quantity, efficiency
- reporting requirements to a range of audiences

- legislation, policy and procedures relating to the conduct of evaluations in the public sector
- public sector values, ethics and codes of conduct
- equal employment opportunity, equity and diversity principles
- environmental/sustainability standards

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPMNGT604B Manage change
 - PSPMNGT605B Manage diversity
 - PSPMNGT606B Manage quality client service
 - PSPMNGT608B Manage risk
 - PSPMNGT609B Formulate business strategies
 - PSPMNGT610A Manage public sector financial resources
 - PSPMNGT612A Review and improve business performance
 - PSPMNGT613A Develop partnering arrangements
 - PSPMNGT614A Facilitate knowledge management
 - PSPPOL601A Develop public policy

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of evaluations in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policies, procedures and protocols
- evaluation models/types
- access to evaluation targets/objectives
- case studies and workplace scenarios to capture the range of evaluation situations likely to be encountered in the public sector

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing evaluations, including coping with difficulties, irregularities and breakdowns in routine
- management of evaluations in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

Scope may include evaluation of

- planning
- delivery
- results
- needs
- objectives
- design
- outputs
- outcomes

Purpose of evaluation may include:

- measuring merit/quality
- measuring worth or value for a particular purpose
- measuring results, outputs or outcomes
- decision making
- unintentional negatives

Evaluation criteria may include:

- whether objectives have been met
- standards against which to compare quality
- baseline studies for comparison
- performance measures
- key success areas
- key performance indicators
- results/outputs/outcomes
- value for money
- public interest
- those identified for a project prior to its implementation

Stakeholders may include:

- all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services such as:
 - employees at all levels of the organisation
 - community
 - clients
 - students, parents/guardians
 - other public sector organisations

- private sector
- non-government organisations
- union and association representatives
- boards of management
- government
- Ministers

Risk management may include:

- identification of risks
- acceptance of risks
- avoidance of risks
- minimisation of risks

Evaluation infrastructure may include:

- steering committee
- manager
- research staff
- administration staff
- office
- telephone
- technology
- email
- web site
- equipment
- consumables
- resources including time, staffing, budget
- specialist or technical support
- contractors

Legislation, policy and procedures may include:

- Commonwealth and State/Territory legislation including equal employment opportunity and anti-discrimination law
- national and international codes of practice and standards
- the organisation's policies and practices
- government policy
- codes of conduct
- confidentiality
- privacy
- ethical practices and procedures
- intellectual property
- copyright
- freedom of information
- environmental/sustainability policies

Reports may include:

- interim reports
- progress reports

Recommendations for action may include:

- draft reports
- executive summaries
- presentations to meetings, groups, seminars
- Internet or email presentations
- new goals
- improvement strategies
- changes to services, products
- change management strategies
- termination
- replacement
- compliance with standards
- further review

Dissemination of findings may be affected by:

- privacy requirements
- security requirements

Application of evaluation findings may include:

- informing other projects
- organisational development
- contributing to knowledge management

Unit Descriptor

This unit covers management of knowledge and information in the business unit to improve productivity and organisational efficiency, promote innovation and meet business unit goals. It includes establishing the organisational context for knowledge management, developing capability, facilitating knowledge management, and integrating aspects of knowledge management with information/records management.

In practice, facilitation of knowledge management may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing change, managing diversity, facilitating workforce effectiveness, etc.

Related units in the Information competency theme in the *Working in Government* Competency field are:

- PSPGOV206B Handle workplace information
- PSPGOV307B Organise workplace information
- PSPGOV406B Gather and analyse information
- PSPGOV504B Undertake research and analysis

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Establish the organisational context for knowledge management

- 1.1 The organisation's history, culture, functions, strategic direction, performance and *knowledge* resources are identified.
- 1.2 Organisational strategies and goals that may be assisted by the development of organisational capability in *knowledge management* are identified.
- 1.3 The current *knowledge management position* of the organisation is assessed and the *strengths and weaknesses* of its knowledge resources and activities are determined.
- 1.4 Consultation with *stakeholders* is undertaken to raise knowledge and awareness of knowledge management and to establish knowledge management *goals* for the business unit and/or the organisation.
- 1.5 The cultural aspects of knowledge and knowledge management are identified and explored in the context of the organisational environment.

2. Develop capability in knowledge management

- 2.1 The *benefits* of knowledge management are identified and promoted to build an environment where these benefits may be realised.
- 2.2 Knowledge management *initiatives* are developed and aligned with the overall organisational strategy and contribute to

ELEMENT**PERFORMANCE CRITERIA**

- business unit goals.
- 2.3 Initiatives are developed to build long-term capability in knowledge management and a culture of sharing knowledge and creating new knowledge in the organisation.
- 2.4 Knowledge management initiatives are focused on the management and use of tacit knowledge in the business unit and creating new knowledge, as well as the capture and sharing of explicit knowledge.
- 2.5 Management and stakeholder support is built throughout knowledge management initiatives to ensure immediate successes are transformed into ongoing benefits.
- 3. Facilitate knowledge management**
- 3.1 Strategies are implemented to facilitate the development of strong and trusting culturally diverse networks where knowledge can be created and shared.
- 3.2 *Methods for creating, discovering and acquiring* knowledge are facilitated in the business unit.
- 3.3 *Methods and systems for capturing and storing* knowledge are promoted in accordance with *legislation, policy and procedures*.
- 3.4 *Methods and systems for presenting, distributing and sharing* knowledge are promoted.
- 3.5 *Activities for revising and disposing of* knowledge are facilitated in accordance with legislation, policy and procedures.
- 4. Integrate aspects of knowledge management with information management**
- 4.1 Processes for the management of explicit knowledge are integrated with the organisation's information management processes/systems to ensure efficiency and to provide wide access to explicit knowledge.
- 4.2 Explicit knowledge is recorded and stored in accordance with organisational and public sector standards for information/records management.
- 4.3 Structuring, maintaining and linking of explicit knowledge to related organisational *information* is facilitated in accordance with organisational requirements.
- 4.4 Knowledge and information are managed to improve their integration and use to meet business unit goals.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to knowledge management and information management
- showing leadership and taking risks in the context of knowledge management
- applying organisation and resource management techniques and methods
- building strong and trusting networks
- facilitating groups and learning
- communicating with a diverse range of stakeholders to build knowledge management capacity
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of knowledge and information management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to knowledge management and information management, such as privacy, freedom of information
- principles of knowledge management
- Australian Standard AS 5037(Int)-2003 Knowledge management
- tools and techniques related to introduction of knowledge management initiatives
- intersection of knowledge management with other disciplines, such as organisational learning, information management/technology, human resources management, communications
- cultural aspects of knowledge and knowledge management
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of knowledge and information management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*

- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC601B Maintain and enhance confidence in public service
 - PSPGOV601B Apply government systems
 - PSPGOV602B Establish and maintain strategic networks
 - PSPLEGN601B Manage compliance with legislation in the public sector
 - PSPMNGT615A Influence workforce effectiveness
 - PSPMNGT602B Manage resources
 - PSPMNGT604B Manage change
 - PSPMNGT605B Manage diversity
 - PSPMNGT608B Manage risk

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of knowledge and information in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to knowledge management and information management
- current theory and practice in knowledge management
- Australian Standard AS 5037(Int)-2003 Knowledge management
- case studies and workplace scenarios to capture the range of situations likely to be encountered when managing knowledge and information

Valid assessment of this unit requires:

Where and how to assess evidence

- an environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing knowledge and information, including coping with difficulties, irregularities and breakdowns in routine
- management of knowledge and information in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as

literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Knowledge is:

- a body of understanding and skills that is constructed by people
- increased through interaction with information (typically from other people)
- tacit - residing in the mind and may include aspects of culture or 'ways of doing things'
- explicit - when recorded as information in a document, image, film clip or some other medium AS 5037(Int)-2003
- also sometimes identified as 'expert' knowledge, or

Knowledge management
is:

- 'entrepreneurial' knowledge
- affected by experience
- a multi-disciplined approach to achieving organisational objectives by making best use of knowledge
- involves the design, review and implementation of both social and technological processes to improve the application of knowledge in the collective interest of stakeholders AS 5037(Int)-2003

The organisation's current position in relation to knowledge management may include:

- low literacy in knowledge management and no trust or networks developed (new organisation)
- low literacy in knowledge management but well-networked staff (existing organisation)
- high literacy in knowledge management but no trust or networks developed (new organisation)
- high literacy in knowledge management and well-networked staff (existing organisation)

Strengths and weaknesses may relate to:

- people
- process
- technology
- content

Stakeholders may include:

- all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services, including:
 - boards of management
 - clients
 - community organisations
 - contractors
 - employees at all levels of the organisation
 - government
 - Ministers
 - other public sector organisations
 - service providers
 - suppliers
 - the public
 - union and association representatives
 - volunteers

Knowledge management goals may include:

- new knowledge creation
- improving knowledge utilisation
- developing a community of practice in knowledge management with strong social networks

Benefits of knowledge management may include:

- improved decision making
- improved performance
- improved productivity and organisational efficiency
- retaining corporate knowledge and organisational learning
- improving networking, trust and morale
- increased innovation
- increased motivation

Knowledge management initiatives may include:

- development of knowledge management policy/strategy
- knowledge management projects
- mentoring in knowledge management
- electronic collaboration
- tools and approaches to remedy weaknesses in knowledge management or build on strengths

Methods for creating, discovering and acquiring knowledge may include:

- meetings to foster innovation
- employing staff or consultants with knowledge/skills not currently in the organisation for the purpose of knowledge transfer
- research outside the organisation
- through publications
- analysis of existing and archived information
- auditing/mapping of information
- consulting staff in similar organisations

Methods and systems for capturing and storing knowledge may include:

- traditional information management systems, such as:
 - files
 - books
 - journals
 - documentation and archives
 - intranets
 - portals
 - web sites
 - databases
 - electronic documents
- ways of making tacit knowledge visible and available (without making it explicit and storing as above), such as advertising available expertise, providing help desk facilities
- capturing learning from past activities
- openness to change
- drive for continual improvement

Legislation, policy and

- State/Territory and Commonwealth legislation, regulations and guidelines relating to knowledge management and

procedures may include:

information management, such as privacy, freedom of information, confidentiality, security, etc

- public sector management acts
- codes of ethics
- codes of conduct
- public sector standards, such as fraud control, security management, risk control
- disaster recovery

Methods and systems for presenting, distributing and sharing knowledge may include:

- information management systems
- intranets
- files
- databases
- work processes where explicit knowledge is formally distributed
- face-to-face meetings
- providing leadership to encourage risk taking
- development of trusted social networks for knowledge exchange

Activities for revising and disposing of knowledge may include:

- processes to authenticate and update knowledge
- processes to ensure that out-of-date or incorrect knowledge (especially tacit knowledge) is not used
- processes for destruction of explicit knowledge that follow records management standards for destruction of records and public sector/legal requirements

Information is:

- data in a context to which meaning has been attributed AS 5037(Int)-2003

Unit Descriptor

This unit covers the competency to ensure the effectiveness of the workforce, whether staff or contractors, in promoting the attainment of strategic objectives. It includes providing leadership to individuals and work teams, creating a cooperative work environment, capitalising on workplace emotions, motivating the workforce to achieve quality results, and delegating work to achieve strategic objectives, and managing up.

In practice influencing workforce effectiveness occurs in the context of other generalist or specialist work functions such as managing performance, managing diversity, managing change, managing client service.

This unit is one of a series of 4 units of competency relating to working with others, located in the Competency fields of *Working in Government* and *Management*. Related units are:

- PSPGOV302B Contribute to workgroup activities
- PSPGOV404B Develop and implement work unit plans
- PSPGOV511A Provide leadership

This unit replaces *PSPMNGT601A Facilitate workforce effectiveness*. The units are not equivalent as elements dealing with emotional intelligence and managing up have been added.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|---|
| 1. Provide leadership to individuals and work teams | 1.1 The vision and strategic goals of the organisation that impact on the work area are identified and promoted.
1.2 <i>Workforce members</i> are regularly consulted on business objectives, plans and operational issues to minimise role ambiguity and uncertainty.
1.3 Roles, functions, responsibilities and work goals are defined in accordance with organisational requirements, and are communicated and agreed.
1.4 Opportunities are provided for workforce members to clarify aspects of particular tasks, resolve issues and seek feedback or further direction.
1.5 Encouragement is provided to develop new and innovative practices, procedures, processes, technologies and strategies in line with corporate values, vision and goals.
1.6 <i>Leadership</i> is provided appropriate to changing priorities and situations and takes account of the specific needs of a diverse workforce. |
| 2. Create a cooperative work environment | 2.1 Cooperation in the work environment is actively facilitated through balanced and fair work allocation and recognition of all contributions. |

ELEMENT**PERFORMANCE CRITERIA**

- 2.2 Teams and individuals are encouraged to find styles of working which are consistent both with team and individual competencies, preferences and *business unit* objectives.
- 2.3 Conflict management strategies are used to facilitate a cooperative work environment.
- 2.4 Cooperative and productive relationships with individuals and teams are established.
- 2.5 Leadership style and guidance that take into account the differing needs and background of a diverse workforce are used.
- 3. Monitor and respond to workplace emotions**
- 3.1 Emotional *strengths* and triggers are *identified* for self and *others in the workplace*, and communication, client service or work allocations are tailored to take account of these.
- 3.2 Self-reflection and feedback is used to identify the effect on others of own emotions, and emotional control is exerted to model positive workplace behaviour.
- 3.3 Opportunities are provided for others to express their thoughts and feelings, and *emotions* are taken into account in decision making to maintain a positive emotional climate in the workplace.
- 3.4 Assistance is provided to others to identify the effect of emotions in the workplace and to *develop* and use their own *emotional intelligence* to build productive relationships and maximise workplace outcomes.
- 4. Motivate the workforce to achieve quality results**
- 4.1 Ways to motivate a diverse workforce are explored and matched to individual needs.
- 4.2 Opportunities are identified for individuals to develop competencies required to meet work objectives.
- 4.3 Individuals' career development requirements are recognised and balanced with team objectives.
- 4.4 Feedback that is prompt, consistent and constructive and ongoing is provided on performance.
- 4.5 Achievements are promoted and rewarded in a way which openly acknowledges the contribution of individuals and teams.
- 4.6 *Team building strategies* are applied to strengthen individual and team commitment to organisational vision and work unit goals.
- 5. Delegate work to achieve business unit strategic objectives**
- 5.1 Work is delegated in accordance with individual competencies or as development opportunities arise, and sufficient information is communicated, resources allocated and support provided to enable tasks to be completed successfully.
- 5.2 Responsibilities are delegated while still accepting accountability for their success/failure.

ELEMENT**PERFORMANCE CRITERIA**

- 5.3 Mechanisms for monitoring progress in achieving work goals are established and implemented in accordance with organisational policy and practices.
- 5.4 Areas for improvement are determined collaboratively and improved processes/strategies are implemented.
- 5.5 Tasks are delegated effectively to facilitate the attainment of business unit objectives and the continuous improvement of business processes.
- 5.6 Up-to-date and accessible record of delegations is maintained in accordance with organisational policy and procedures.
- 6. Manage up**
- 6.1 People and influences outside the immediate work environment with the potential to affect work priorities, outcomes and resources are identified.
- 6.2 Role relationships and responsibilities for managing up are analysed.
- 6.3 Strategies are developed and implemented to ensure executives consider the operational consequences of policy changes.
- 6.4 Strategies are used to engage support for public sector activities and ensure sufficient resources are provided to implement initiatives.
- 6.5 Self-evaluation and feedback from *others* on own performance is used to continuously improve performance and outcomes.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- delegating work to others
- counselling and resolving conflict in teams
- using team building strategies
- using facilitation, negotiation and consultation requiring exchanges of complex oral information
- using consensual decision making skills
- keeping check of emotions when challenges arise, maintaining composure, perceiving the emotional motivators that drive individuals and groups in the workplace and engaging those motivators, where appropriate, to optimize organisational performance

- using a variety of words and language structures to explain complex ideas to different audiences
- interpreting and explaining complex, formal documents and assisting others to apply them in the workplace
- responding to diversity, including gender and disability
- applying occupational health and safety strategies relevant to managing and working with others in a public sector workplace

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- organisational goals, policies and procedures
- equal employment opportunity, equity and diversity principles
- the relationship between effective human resource functions and the attainment of business unit objectives
- human resource policies and practices
- emotional intelligence principles and strategies
- group processes and facilitation techniques
- team building strategies
- the organisation's career and human resource development strategies, programs and plans
- conflict resolution strategies
- jurisdictional legislation applicable to management and human resource management functions
- occupational health and safety issues relevant to managing and working with others in a public sector workplace
- environmental and sustainability issues relevant to managing and working in a public sector environment

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC601B Maintain and enhance confidence in

public service

- PSPGOV601B Apply government systems
- PSPGOV602B Establish and maintain strategic networks
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPPOL603A Manage policy implementation

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- workforce effectiveness influenced in a range of (3 or more) contexts (or occasions, over time) such as working with staff, clients and contractors

Resources required to carry out assessment

These resources include:

- procedures and protocols
- public sector policies and legislation such as those dealing with:
- human resource management and development
- workforce capability
- case studies and workplace scenarios to capture the range of situations likely to be encountered when influencing workforce effectiveness

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when facilitating workforce effectiveness, including coping with difficulties, irregularities and breakdowns in routine
- workforce effectiveness influenced in a range of (3 or more) contexts (or occasions, over time) such as working with staff, clients and contractors

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women

- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

Workforce members may include:

- employees
- consultants
- external contractors
- job rotation staff
- trainees

Leadership refers to:

- the process of influencing others to engage in work behaviours that facilitate the attainment of the business unit's strategic objectives

Business unit may refer to:

- a program
- sub-program
- cost centre
- area
- division

- branch
 - production unit or section located within the organisation
- Emotional strengths*** may include ability to:
- monitor and control negative emotions
 - recognise and respond to others' emotional states
 - see beyond an immediate emotional reaction to the real cause, rather than responding to the emotions on face value
- Identification of emotions*** may need to take account of:
- the varying cultural expressions of emotion
- Others*** in the workplace may include:
- management
 - staff
 - clients
 - contractors
- Emotions*** may include:
- anger
 - anxiety
 - apprehension
 - caring
 - confidence
 - depression
 - elation
 - enthusiasm
 - excitement
 - fear
 - happiness
 - inadequacy
 - joy
 - nervousness
 - over-confidence
 - pride
 - stress
 - under-confidence
 - unhappiness
- Development of emotional intelligence*** may occur through:
- mentoring
 - shadowing
 - coaching
 - training
 - simulation

Emotional intelligence

is:

- widely recognised as the ability of an individual to monitor their own and others' emotions in a social or work environment, to discriminate among the emotions and to use the information to guide their thinking and actions
- characterised by self-awareness (personal), self-management (personal), social awareness (social) and relationship management (social)

Team building

strategies may include:

- defining and clarifying objectives/work area plans
- strengthening communication processes
- clarifying ground rules and behavioural expectations
- fostering creativity
- offering constructive feedback
- providing facilitated meetings
- recognising achievements

Others may include:

- superiors
- reportees

PSPOHS301A Contribute to workplace safety

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the competency to contribute to a safe workplace for self and others. It includes contributing to workplace safety arrangements, identifying hazards and controlling risks.

In practice, workplace safety may be demonstrated in the context of other work activities such as contributing to workplace activities, organising workplace information, implementing change, giving and receiving feedback.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to participative workplace safety arrangements	<p>1.1 Occupational health and safety <i>issues</i> are addressed/reported to <i>designated personnel</i> in accordance with workplace procedures and <i>occupational health and safety legislation</i>.</p> <p>1.2 <i>Contributions</i> are made to <i>participative workplace safety arrangements</i> within organisational procedures and scope of responsibilities and competencies.</p>
2. Identify hazards and control risks	<p>2.1 Existing and potential <i>hazards</i> in the work area are identified, dealt with and/or reported to designated personnel according to workplace procedures.</p> <p>2.2 <i>Workplace procedures</i> and work instructions for <i>controlling risks</i> are identified and implemented.</p> <p>2.3 Workplace procedures for dealing with accidents and <i>other hazardous events</i> are followed whenever necessary within scope of responsibilities and competencies.</p> <p>2.4 Feedback on the effectiveness of safety procedures and risk control measures is provided to enable improvements to be made where necessary.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying objective identification of workplace safety issues

- documenting hazards in clear language according to organisational guidelines
- accessing workplace safety legislation, policies and procedures electronically or in hard copy
- reading documentation such as workplace safety legislation, policies and procedures and applying them to work practices
- tailoring communication to suit different audiences, such as colleagues, management, safety representatives, inspectors
- responding to diversity, including gender and disability

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legal rights and responsibilities of the workplace parties
- the ways in which occupational health and safety is managed in the workplace, and legal requirements
- participative arrangements for workplace safety
- workplace hazards and associated risks
- preferred order of ways to control risks
- occupational health and safety procedures
- the meaning of workplace occupational health and safety symbols and signs
- designated workplace personnel responsible for occupational health and safety

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPGOV301B Work effectively in the organisation
 - PSPGOV302B Contribute to workgroup activities
 - PSPGOV303B Build and maintain internal networks
 - PSPGOV306B Implement change
 - PSPGOV307B Organise workplace information
 - PSPGOV308B Work effectively with diversity
 - PSPGOV312A Use workplace communication strategies

- PSPGOV313A Compose workplace documents

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- contribution to workplace safety in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- organisational occupational health and safety legislation, policies and procedures
- details of the organisation's occupational health and safety system
- information on hazards and risks relevant to the workplace
- personal protective equipment
- relevant work areas for identification of hazards and control measures

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when contributing to workplace safety, including coping with difficulties, irregularities and breakdowns in routine
- the applicant to contribute to workplace safety in a range of (3 or more) contexts (or occasions, over time)
- the assessor to have recognised expertise in managing occupational health and safety in the industry, or work in an assessment team with such a person.

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination

of 2 or more of:

- case studies
- demonstration
- observation
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Occupational health and safety issues may include:

- hazards relating to the physical environment
- workplace stress
- conflict
- bullying
- harassment

Designated personnel may include:

- supervisors
- managers
- team leaders
- designated occupational health and safety officers
- health and safety representatives
- other persons authorised or nominated by the enterprise or industry to:
 - perform specified work
 - approve specified work
 - inspect specified work
 - direct specified work

Occupational health and safety legislation may

- State/Territory/Commonwealth occupational health and safety acts, regulations and codes of practice including, but

include:

not limited to:

- regulations and codes of practice relating to hazards present in the workplace or industry
- general duty of care under occupational health and safety legislation and common law
- provisions relating to roles and responsibilities of health and safety representatives and/or occupational health and safety committees
- provisions relating to occupational health and safety issue resolution

Contributions may include:

- identifying and reporting hazards and their associated risks
- identifying safety issues and hazards that can be addressed immediately and taking action in accordance with safety procedures
- reporting on effectiveness of safety procedures and risk controls
- suggesting improvements to procedures and controls
- listening to the ideas and opinions of others in the workplace
- sharing opinions, views, knowledge and skills

Participative workplace safety arrangements may include:

- formal and informal health and safety meetings
- health and safety committees
- other committees, for example, consultative, planning and purchasing
- meetings called by health and safety representatives
- suggestions, requests, reports and concerns put forward to management

Hazard identification may include:

- checking equipment or the work station and work area before work commences and during work
- workplace inspections
- responding to physical cues that ergonomics are ineffective and need adjustment
- on-the-job housekeeping checks (spills, furniture out of place, loose hand rails, curling mats, frayed cords, etc)
- anticipation of potential hazards

Workplace procedures may include:

- complying with workplace occupational health and safety symbols and signs
- hazard reporting procedures
- job procedures, safe work instructions and allocation of responsibilities
- emergency procedures
- incident and near miss reporting and recording procedures

Controlling risks may include actions such as:

- consultation on occupational health and safety issues
- correct selection, use, storage and maintenance procedures for use of personal protective equipment
- risk control procedures
- consultation with others
- measures to remove the cause of the risk at its source
- application of the hierarchy of control, namely:
 - elimination
 - substitution
 - engineering controls
 - administrative controls
 - personal protective equipment

Other hazardous events may include:

- fires
- bomb threats
- chemical spills
- occupational violence
- natural disasters/events
- terrorist attacks

PSPPM401B Design simple projects

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the planning and development of simple, generally low risk projects that may be small scale and managed by one person or by a person with a small team. It includes identifying project requirements, preparing a business case, preparing the project plan and establishing project infrastructure. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, project planning and development overlaps with other generalist and specialist work activities such as applying government processes, using resources, developing work plans, gathering information.

This unit, and unit *PSPPM405A Administer simple projects*, are mutually exclusive. One or the other, but not both, may contribute to a qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Identify project requirements

- 1.1 A rationale for the project is outlined that identifies the purpose, outcomes and likely benefits for the user/s.
- 1.2 *Stakeholders* are identified and their input is obtained at the planning stage to ensure the project proposal and its objectives are required and achievable.
- 1.3 The project environment is assessed and environmental issues are addressed in the project proposal.
- 1.4 *Project parameters* are determined and a project proposal is completed to organisational standards and within guidelines.
- 1.5 The project proposal is structured so it is compatible with organisational objectives and other organisational projects, and is designed in accordance with the organisation's *policies and procedures* and in consultation with *specialists* to meet user/client requirements.

2. Prepare business case

- 2.1 Research and analysis is undertaken to identify impacts and risks, *constraining factors* and alternate options.
- 2.2 Options and solutions are identified, advice is obtained and recommendations are made in accordance with the strategic direction of the organisation/work unit.
- 2.3 A *report* is prepared that demonstrates a business case for the project in accordance with organisational requirements.
- 2.4 *Approvals* for the project proposal are obtained in accordance with organisational policy and procedures.

3. Prepare project plan

- 3.1 *Project scope* is determined in terms of objectives, outcomes

ELEMENT**PERFORMANCE CRITERIA**

- and project deliverables.
- 3.2 Specialists are consulted where necessary, to advise on potential risks, and *options to manage risks* are investigated and recorded in the *project plan*.
- 3.3 Each of the *parameters* identified in the proposal are addressed in the project plan in consultation with relevant parties and appropriate approvals are sought and recorded.
- 3.4 *Project management tools* are utilised for planning in accordance with project requirements.
- 3.5 Project outputs are determined that are measurable and achievable and indicators to monitor the performance of the project are developed, under guidance, and agreed by relevant parties in accordance with organisational policy and procedures.
- 4. Establish project infrastructure**
- 4.1 An implementation strategy is developed in accordance with the project plan and organisational guidelines, and presented to stakeholders to gain project support.
- 4.2 Terms of reference and *project infrastructure* requirements for set-up and implementation of the project are clarified in the implementation strategy in accordance with the project plan.
- 4.3 Resources are obtained to set up the project office, and roles and responsibilities are assigned to team members and stakeholders as agreed in the project plan.
- 4.4 Processes identified for monitoring, evaluating and reporting performance against project objectives are established in accordance with the project plan.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- detailing requirements, writing recommendations and preparing plans requiring precision of expression
- negotiating timelines, roles and responsibilities with stakeholders or team members
- communicating with stakeholders or team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability

- using project management tools
- applying workplace safety procedures in line with project planning requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on the project and management of the project, for example:
 - public sector codes of ethics/conduct
 - occupational health and safety and environment requirements
 - quality standards
 - risk management
 - financial management
 - procurement
 - human resources
 - equal employment opportunity, equity and diversity principles
 - organisational project approval processes
 - scheduling
 - change management
- project planning methods for small scale or low risk projects
- project management tools to suit the projects planned
- principles relating to the planning phase of project management for small scale or low risk projects

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC401A Uphold and support the values and principles of public service
 - PSPGOV402B Deliver and monitor service to clients

- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV405B Provide input to change processes
- PSPGOV408A Value diversity
- PSPGOV411A Deal with conflict
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV416A Monitor performance and provide feedback
- PSPGOV422A Apply government processes
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPOHS401B Implement workplace safety procedures and programs
- PSPPROC409A Receive and select offers
- PSPPROC410A Administer contracts
- PSPPM402B Manage simple projects
- PSPPM403B Close simple projects
- *Excluded units that may not contribute to the same qualification as this unit:*
 - PSPPM405A Administer simple projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- design of simple projects in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- documented information and/or examples of the assessee's personal work
- project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions

likely to be encountered when planning projects, including coping with difficulties, irregularities and breakdowns in routine

- design of simple projects in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Stakeholders may

- project sponsor/funding bodies

include:

- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee
- end user
- supplier/service provider

Project parameters

include:

- project scope - outcomes, objectives, project deliverables
- feasibility
- skills required for project team
- people required for project including specialist expertise
- communications including reporting requirements
- risks associated with project including people, environment, resources, technology change during the life of the project, if applicable
- steering committee arrangements
- timeframe and milestones
- cost
- resources for project
- acquisition/procurement
- organisational structure for project
- project quality control and operational flexibility
- project governance structure
- monitoring through staged rollout
- project delivery requirements
- pilot outcomes
- intellectual property
- integration of project within organisation
- transition arrangements
- change management
- project evaluation

Policies and procedures

may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
 - public sector management acts

- financial management and accounting legislation and regulations
- privacy legislation
- government and organisational guidelines and procedures relating to:
 - project governance
 - resourcing
 - security
 - strategic plans
 - recruitment
 - risk management
 - procurement guidelines
 - designation approvals
 - industrial agreements

Specialists may include:

- legal
- technical
- financial
- other functional areas
- other relevant agencies
- logistics

Constraining factors may include:

- political
- industrial
- legislative
- technical
- financial
- resourcing
- social and cultural considerations
- cultural change management (internal)
- security/privacy
- environmental
- logistic support

Analysis report will contain:

- cost-benefit analysis

Approval may be required from:

- project sponsor/funding body
- business owner of the project
- program manager
- line manager
- project governance office/personnel in the organisation
- chief executive officer, manager or management

- Project scope*** is defined by:
- representative
 - customer or client
 - objectives - aims/goals for doing the project
 - outcomes - measurable benefit achieved from the utilisation of the outputs delivered by the project
 - outputs/project deliverables - the services/products delivered by the project
- Options to manage risks*** may include:
- acceptance
 - avoidance
 - minimisation
 - transfer
 - strategies
 - flexibility
 - empathy
 - emotional intelligence
- Project plan*** will include some or all of:
- acquisition strategies
 - budget and financial management strategy
 - contract management
 - cost estimates
 - evaluation criteria
 - expected outcomes/measurable benefits of the project
 - facilities
 - inclusions and exclusions from project
 - information/communication strategy
 - intellectual property strategies
 - milestones
 - objectives
 - outputs/project deliverables and their acceptance criteria
 - people plan including human resource management and human resource development
 - performance criteria/indicators
 - project control mechanisms
 - project implementation strategy
 - project governance strategy
 - purpose
 - quality assurance
 - quality control
 - quality standards for project
 - rationale

Project parameters
include:

- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

Project management tools may include:

- risk management
- schedule management
- financial management
- communication, including reporting
- resources management
- logistics management
- scope management
- change management
- quality management
- people management
- occupational health and safety management
- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
 - Gantt and bar charts
 - Program Evaluation and Review Technique (PERT) charts
 - Critical Path Method
- cost schedule control system
- logistics support analysis
- life cycle cost analysis
- spreadsheets
- recording systems - electronic and manual

Project infrastructure
may include:

- staffing levels/need for recruitment action and training
- equipment and technical support
- resource requirements including travel, finance etc
- project office accommodation
- management infrastructure

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Implement start-up activities

- 1.1 The ***project plan*** is updated with confirmed information for key dates and activities, resources and project governance details in accordance with the project implementation strategy.
- 1.2 Project ***stakeholders'*** understanding of and agreement to fulfil the project requirements and their roles and responsibilities are confirmed.
- 1.3 ***Required systems*** are established and maintained throughout the project in accordance with the project plan.
- 1.4 A working knowledge of ***project management tools*** is used to facilitate integration of project activities and achievement of project outcomes.

2. Coordinate project implementation

- 2.1 ***Integration*** and ***management*** of project activities are handled in accordance with the project plan.
- 2.2 Stakeholder input and expectations are managed and their commitment is maintained throughout the life of the project in accordance with organisational policy and procedures and the project plan.
- 2.3 Disagreements and disputes are resolved or referred to a higher authority in accordance with organisational policy and procedures.
- 2.4 Project ***change proposals*** are received and changes are recommended/made in accordance with the project plan, and documented in accordance with ***policy and procedures***.

3. Monitor project

- 3.1 All aspects of the project are continually monitored and

ELEMENT**PERFORMANCE CRITERIA**

<p>corrective action is taken as necessary to maintain progress in accordance with the project plan.</p> <p>3.2 Consultation and reporting mechanisms are applied in accordance with the communication plan when dealing with management, staff and/or contractors, steering committee members or other stakeholders.</p> <p>3.3 Project governance plans and any related contracts are monitored, reviewed and amended as appropriate, and results are reported in accordance with the communication plan.</p> <p>3.4 Project progress is monitored against agreed milestones in accordance with the project plan to provide a measure of performance throughout the life of the contract.</p> <p>3.5 Programmed review of objectives and achievement is implemented in accordance with the project plan.</p> <p>4. Arrange project follow-up activities</p>	<p>4.1 Project deliverables are analysed against <i>specifications</i>, performance standards and project objectives, under broad guidance, and the results are reported to stakeholders.</p> <p>4.2 An initial support package or product manual is produced, if required, to provide guidance for stakeholders who will be required to apply the project results.</p> <p>4.3 The support package includes options for stakeholders to take account of environmental and cultural factors in applying project results.</p> <p>4.4 Operational and support authorities are consulted to research any testing/trialling/building requirements resulting from the project, and evaluation of any recommendations are included in the project report.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- leading and mentoring people to achieve project deliverables
- maintaining agreement of stakeholders and team members to timelines, roles and responsibilities
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes

- responding to diversity, including gender and disability
- using project management tools applicable to small scale or low risk projects
- applying ethical decision making and problem solving related to project management of small scale or low risk projects
- writing recommendations and preparing implementation support packages requiring precision of expression
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project management, for example:
 - public sector codes of ethics/conduct
 - occupational health and safety and environment requirements
 - project governance requirements
 - quality standards
- risk management
- procurement guidelines
- human resources
- equal employment opportunity, equity and diversity principles
- project management tools to suit a range of small scale or low risk projects
- project management principles
- organisational and political context

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC401A Uphold and support the values and principles of public service
 - PSPGOV402B Deliver and monitor service to clients

- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV411A Deal with conflict
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV422A Apply government processes
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC410A Administer contracts
- PSPPM401B Design simple projects
- PSPPM403B Close simple projects
- *Excluded units* that may not contribute to the same qualification as this unit:
 - PSPPM405A Administer simple projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when implementing projects, including coping with difficulties, irregularities and breakdowns in routine
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse

backgrounds

- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

Project plan will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones

- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)
- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider
- planning and monitoring system
- financial management including:
 - budget allocation/funding
 - income generated
 - expenditure
- recordkeeping for documented information such as:

Stakeholders may include:

Required systems for project management may include:

Project management tools may include:

- correspondence
- quality data including survey, needs, test results
- contracts
- time allocated and spent on each aspect of the project
- progress reports
- performance reports against milestones
- project outcomes
- samples, prototypes, models
- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
 - Gantt and bar charts
 - Program Evaluation and Review Technique (PERT) charts
 - Critical Path Method
 - cost schedule control system
 - logistics support analysis
 - life cycle cost analysis
 - spreadsheets
 - recording systems - electronic and manual

Integration of project activities may include:

- scope
- time
- cost
- quality
- human resources
- communications
- risk
- procurement

Management may include:

- scope management
- communication and reporting
- schedule management
- financial management
- quality management
- resources management
- people management
- logistics management
- risk management

Change proposals may include:

- contract management
- change management
- scope
- administration
- engineering, technical, technology changes
- time
- cost
- resources

Policy and procedures may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
 - public sector management acts
 - financial management and accounting legislation and regulations
 - privacy legislation
- government and organisational guidelines and procedures relating to:
 - project governance
 - resourcing
 - security
 - strategic plans
 - recruitment
 - risk management
 - procurement guidelines
 - designation approvals
 - industrial agreements

Specifications may include:

- functional
- technical
- performance
- material

Unit Descriptor

This unit covers project evaluation and reporting for generally low risk projects that may be small scale and managed by one person or a person with a small team. It includes implementing project review activities and finalising projects. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, closing simple projects may overlap with other generalist and specialist work activities such as applying government processes, using resources, gathering information, providing input to change, managing contracts etc.

This unit, and unit *PSPPM405A Administer simple projects*, are mutually exclusive. One or the other, but not both, may contribute to a qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Implement project review activities

- 1.1 Evaluation of project process and achievement against objectives is undertaken in consultation with *stakeholders* and results are reported in accordance with the *project plan* and organisational *policy and procedures*.
- 1.2 Action to rectify problems in meeting client needs is recommended and documented.
- 1.3 Implications of project results for policies and operating procedures are identified and recommendations are made for their amendment.
- 1.4 Information obtained from the evaluation of the project is structured so it may be used to improve relevant policy and practice in accordance with organisational requirements.

2. Finalise project

- 2.1 Contracts are finalised and financial records are checked for accuracy and completed in accordance with organisational procedures.
- 2.2 Project wind-down is *managed, documentation* is completed, records are archived and *approvals* are obtained in accordance with the project plan and organisational policy and procedures.
- 2.3 Project stakeholders are debriefed, and recommendations are made for redeployment of infrastructure/resources in accordance with organisational policy and procedures.
- 2.4 Project hand-over to user/s is completed in accordance with organisational procedures and lessons learnt are documented and reported to stakeholders to assist in continuous improvement.

ELEMENT

PERFORMANCE CRITERIA

2.5 Stakeholders are advised of procedures and authorities for initial support to implement project deliverables where relevant, and strategies are devised to manage long-term project momentum in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- analysing results and evaluating results against objectives
- writing recommendations and preparing reports requiring precision of expression
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- debriefing project team members
- reporting on resource expenditure including time and costs
- using project management tools suited to small scale or low risk projects
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project finalisation, for example:
 - public sector codes of ethics/conduct
 - occupational health and safety and environment requirements
 - project governance requirements
 - quality standards
- risk management
- procurement guidelines
- human resource management and development
- equal employment opportunity, equity and diversity principles
- project management tools to suit a range of small scale or low risk projects
- project management principles

- organisational and political environment

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC401A Uphold and support the values and principles of public service
 - PSPGOV402B Deliver and monitor service to clients
 - PSPGOV403B Use resources to achieve work unit goals
 - PSPGOV411A Deal with conflict
 - PSPGOV412A Use advanced workplace communication strategies
 - PSPGOV422A Apply government processes
 - PSPLEGN401A Encourage compliance with legislation in the public sector
 - PSPPROC410A Administer contracts
 - PSPPM401B Design simple projects
 - PSPPM402B Manage simple projects
- *Excluded units* that may not contribute to the same qualification as this unit:
 - PSPPM405A Administer simple projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- closure of simple projects in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project close-out
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when closing projects, including coping with difficulties, irregularities and breakdowns in routine
- closure of simple projects in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

Stakeholders may include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

Project plan will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates

- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)
- government legislation (Federal, State and Local) affecting organisation's administration such as:
 - public sector management acts
 - financial management and accounting legislation and regulations
 - privacy legislation
- government and organisational guidelines and procedures relating to:
 - project governance
 - resourcing
 - security
 - strategic plans
 - recruitment
 - risk management
 - procurement guidelines
 - designation approvals
 - industrial agreements

Policy and procedures
may include:

***Management of project
wind-down*** may include:

- risks
- issues
- assets
- consultants
- project team
- support staff

Documentation may
include:

- project completion report
- supplier performance reports
- whole-of-life support plans
- transfer documents

- financial reports and acquittals

Approvals may be required from:

- project sponsor/funding body
- business owner of the project
- program manager
- line manager
- project governance office/personnel in the organisation
- chief executive officer, manager or management representative
- customer or client

Unit Descriptor

This unit covers the activities required to carry out simple projects, working on one project at a time. This work is typically undertaken by a project officer working individually or as part of a project team. It includes reviewing and confirming the project brief, carrying out project activities, monitoring and maintaining progress and completing the project. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, carrying out project work overlaps with other generalist and specialist work activities such as acting ethically, applying government processes, using resources, developing work plans, gathering information.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Review and confirm project brief	1.1 Project information and supporting materials are obtained and the individual <i>project brief</i> is clarified in accordance with the <i>project plan</i> and organisational <i>policy and procedures</i> .
	1.2 Project plan is analysed and requirements, timeframes, roles, responsibilities and <i>stakeholder</i> involvement are confirmed.
	1.3 Project management procedures and controls are confirmed in accordance with the project plan, and any required changes are negotiated according to the project plan change management strategy.
	1.4 The project plan is updated with confirmed information for milestones, resources, other team members and steering committee details.
2. Undertake project activities	2.1 Professional or technical skills are provided to accomplish project tasks in accordance with the project requirements.
	2.2 <i>Project data</i> is captured and recorded in accordance with project requirements.
	2.3 Specialist advice and support are provided to the project manager, steering committee and stakeholders as required to achieve project objectives.
3. Monitor and maintain progress of project	3.1 <i>Project management tools</i> are used for integration and timing of project activities and achievement of project deliverables.
	3.2 Risks to progress and achievement of project objectives are anticipated and related to the project manager for action in accordance with the <i>risk management</i> plan.
	3.3 Completion of project activities and progress against targets and milestones are monitored and corrective action is taken if needed, in accordance with project plans and in <i>consultation</i>

ELEMENT**PERFORMANCE CRITERIA**

with management/governance personnel.

- 3.4 Problem solving to find innovative *solutions* to project problems or unplanned-for contingencies is undertaken in consultation with project management.
- 3.5 Progress reports are provided as required by the project communication plan.
- 4. Complete project**
- 4.1 Project deliverables are completed to the required standard in the required timeframe.
- 4.2 Recordkeeping associated with the project is completed and archived as required by the project plan.
- 4.3 Project process is evaluated, issues identified and recommendations made for continuous improvement.
- 4.4 Project reports are completed to the required standard, containing required information and using agreed style, voice and format.
- 4.5 Project hand-over of deliverables and return of borrowed/unused materials are completed in accordance with the project plan and organisational procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- recording information, writing recommendations and preparing reports requiring complex language structures and precision of expression
- negotiating changes to timelines, roles and responsibilities
- communicating with stakeholders, managers and other team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- managing self, time and costs
- using project management tools
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on the project and management of the project, for example:
 - public sector codes of ethics/conduct
 - occupational health and safety and environment
 - project governance requirements
 - quality standards
- risk management
- procurement
- human resources
- equal employment opportunity, equity and diversity principles
- principles of project management
- project management tools to suit the projects carried out
- risk management strategies for carrying out single projects

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC401A Uphold and support the values and principles of public service
 - PSPGOV402B Deliver and monitor service to clients
 - PSPGOV403B Use resources to achieve work unit goals
 - PSPGOV404B Develop and implement work unit plans
 - PSPGOV406B Gather and analyse information
 - PSPGOV411A Deal with conflict
 - PSPGOV412A Use advanced workplace communication strategies
 - PSPGOV422A Apply government processes
 - PSPLEGN401A Encourage compliance with legislation in the public sector
 - PSPPM401B Design simple projects
 - PSPPROC410A Administer contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- activities for simple projects carried out in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when carrying out projects, including coping with difficulties, irregularities and breakdowns in routine
- activities for simple projects carried out in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning

- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

Project brief is:

- outline of expectations, tasks, deliverables, etc that are to be achieved by the project officer

Project plan will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives
- occupational health and safety plan
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance

Policy and procedures
may include:

- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)
- government legislation (Federal, State and Local) affecting organisation's administration such as:
 - public sector management acts
 - financial management and accounting legislation and regulations
 - privacy legislation
- government and organisational guidelines and procedures relating to:
 - project governance
 - resourcing
 - security
 - strategic plans
 - recruitment
 - risk management
 - procurement guidelines
 - designation approvals
 - industrial agreements

Stakeholders may
include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

Project data may include:

- financial data including costs, expenditure, income generated, purchases
- quality data including any test results
- record of time spent on project and progress in completing project
- correspondence
- samples, prototypes, models
- project outcomes

Project management tools may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
- Gantt and bar charts
- Program Evaluation and Review Technique (PERT) charts
- Critical Path Method
- cost schedule control system
- logistics support analysis
- life cycle cost analysis
- spreadsheets
- recording systems - electronic and manual

Risk management may include:

- removing the risk
- transferring the risk
- minimising the risk
- accepting the risk
- preparing a contingency plan
- keeping reserves

Consultation with management may include:

- project manager
- steering committee
- project sponsor
- business owner of the project
- program manager
- specialist project management office
- chief executive officer, manager or management representative
- funding body representative
- customer or client

Solutions to problems may include:

- reducing costs
- researching and applying more efficient methods of

completing project tasks

- seeking further resources to meet deadline
- negotiating an extension of deadline or redefining completion or quantities or quality of outcomes
- sharing of ideas to gain improvements to work undertaken within the project
- outsourcing aspects of the project
- changing roles and responsibilities within project team

1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the administration of a straightforward project or a discrete component of a larger project by staff who are not specialists in project management. The unit focuses on the application of project management skills and the requirement to meet timelines, quality standards, budgetary limits and other requirements set for the project. It includes defining the project, developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learnt for application to future projects. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

Units of competency for specialist project managers at this level include *PSPPM401B Design simple projects*, *PSPPM402B Manage simple projects* and *PSPPM403B Close simple projects*. The unit of competency for specialist project officers is *PSPPM404A Carry out simple project activities*.

This unit and the 3 project management competencies for specialist project managers (PSPPM401B - PSPPM403B) are mutually exclusive and may not contribute to the same qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills..

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Define project

- 1.1 *Project scope* and other relevant documentation are accessed in accordance with organisational *policy and procedures*.
- 1.2 Project *stakeholders* are identified and their interest in or relationship to the project is established.
- 1.3 Clarification is sought from *delegating authority* of any issues related to the project and *project parameters*.
- 1.4 Limits of own responsibility and reporting requirements are confirmed.
- 1.5 Relationship of the project to other projects and to the organisation's objectives is clarified.
- 1.6 Available resources to undertake the project are determined and accessed in accordance with organisational requirements.

2. Develop detailed project plan

- 2.1 A *project plan* is developed that identifies in detail how the project will be executed and managed in relation to the project parameters.
- 2.2 *Project management tools* are identified and accessed in accordance with project requirements.
- 2.3 A communication strategy and risk management plan that address the project, organisational and legislative requirements are contained within the project plan.

ELEMENT**PERFORMANCE CRITERIA**

- 2.4 A timeline for completion of activities and a budget, developed and approved in accordance with organisational procedures, are included within the project plan.
- 2.5 Stakeholders' understanding of and agreement to fulfil the project requirements and their roles and responsibilities are confirmed.
- 2.6 Project plan is finalised and any necessary approvals are gained to commence the project according to the documented plan.
- 3. Administer and monitor project**
- 3.1 *Support* is provided to ensure that the quality of the expected deliverables of the project and documented timelines are met.
- 3.2 Required *recordkeeping* systems are established and maintained throughout the project.
- 3.3 *Component plans* that identify how key aspects of the project will be managed are implemented and monitored in accordance with set requirements.
- 3.4 Project reports are completed and forwarded as required in accordance with the project communication strategy.
- 3.5 *Risk management* is undertaken in accordance with the project plan to ensure project requirements are achieved in accordance with the project plan.
- 3.6 Project deliverables are completed to the required standard, in the required timeframe and within budget.
- 4. Finalise project**
- 4.1 Any financial recordkeeping associated with the project is completed and checked for accuracy.
- 4.2 Staff involved in the project are de-briefed before assignment to new or previous roles.
- 4.3 Project documentation is completed and *signed off* in accordance with organisational procedures.
- 5. Review project**
- 5.1 Project deliverables and processes are reviewed against the project scope and plan.
- 5.2 Stakeholders are involved in the review of the project.
- 5.3 Lessons learnt from the project are documented and reported in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- detailing requirements, writing recommendations and preparing reports requiring complex language structures and precision of expression
- negotiating timelines, roles and responsibilities with team members
- communicating with stakeholders using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- leading and managing a project team
- managing time and costs
- using project management tools
- applying quality management techniques including testing and auditing as appropriate
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on the project and management of the project, for example:
 - public sector codes of ethics/conduct
 - occupational health and safety and environment and sustainability
- project governance requirements
- quality standards
- risk management
- procurement
- human resources
- equal employment opportunity, equity and diversity principles
- organisational structure and lines of authority within organisation
- project management tools to suit the projects administered
- evaluation techniques for projects

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*

- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC401A Uphold and support the values and principles of public service
 - PSPGOV402B Deliver and monitor service to clients
 - PSPGOV403B Use resources to achieve work unit goals
 - PSPGOV404B Develop and implement work unit plans
 - PSPGOV411A Deal with conflict
 - PSPGOV412A Use advanced workplace communication strategies
 - PSPGOV422A Apply government processes
 - PSPLEGN401A Encourage compliance with legislation in the public sector
 - PSPOHS401B Implement workplace safety procedures and programs
 - PSPPROC410A Administer contracts
- *Excluded units* that may not contribute to the same qualification as this unit:
 - PSPPM401B Design simple projects
 - PSPPM402B Manage simple projects
 - PSPPM403B Close simple projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- administration of simple projects in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles

normal work practice and replicates the range of conditions likely to be encountered when administering projects, including coping with difficulties, irregularities and breakdowns in routine

- evidence of administration of simple projects in a range of (3 or more) contexts (or occasions over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

Project scope and other relevant documentation

- project proposal

refers to:

- tender documents
- contract or other agreement
- project plan or summary
- other documents outlining:
 - expected outcomes of the project
 - inclusions and exclusions from project
 - timeframes for project
 - quality standards for project
 - project resources

Policy and procedures
may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
 - public sector management acts
 - financial management and accounting legislation and regulations
 - privacy legislation
 - environmental/sustainability legislation
- government and organisational guidelines and procedures relating to:
 - project governance
 - resourcing
 - security
 - strategic plans
 - recruitment
 - risk management
 - procurement guidelines
 - designation approvals
 - industrial agreements

Stakeholders may
include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee
- end user

Delegating authority may include:

- supplier/service provider
- project sponsor
- business owner of the project
- program manager
- specialist project management office
- CEO, manager or management representative
- funding body
- customer or client

Project parameters may include:

- scope of project
- quality standards
- timelines
- finances for project
- integration of project within organisation
- risks associated with project
- reporting requirements
- procurement requirements associated with project
- physical and human resources available or required for project

Project plan will include some or all of:

- acquisition strategies
- budget and financial management strategy
- continuous improvement process established for the project
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose

Project management tools may include:

- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)
- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
 - Gantt and bar charts
 - Program Evaluation and Review Technique (PERT) charts
 - Critical Path Method
 - cost schedule control system
 - logistics support analysis
 - life cycle cost analysis
 - spreadsheets
 - recording systems - electronic and manual

Support may include:

- mentoring and coaching
- feedback
- encouragement
- additional physical and human resources (within allocated budget) if and as required
- regular meetings

Recordkeeping may include systems for:

- financial data including costs, expenditure, income generated, purchases, contracts
- quality data including survey, needs, test results
- recording of time spent on project and progress in completing project
- progress reports
- performance reports against milestones
- correspondence
- samples, prototypes, models
- project deliverables/outputs and outcomes

Component plans may relate to:

- risk management
- schedule management
- financial management
- communication, including reporting
- resources management
- logistics management
- scope management
- change management
- quality management
- people management

Risk management may include:

- removing the risk
- minimising the risk
- accepting the risk
- preparing a contingency plan
- allocation of reserves
- reducing costs
- researching and applying more efficient methods of completing project tasks
- seeking further resources to meet deadline
- negotiating an extension of deadline or redefining completion or quantities or quality of deliverables
- sharing of ideas to gain improvements to work undertaken within the project
- outsourcing some aspects of the project
- changing roles and responsibilities within project team

Sign-offs may be required by:

- project sponsor
- business owner of the project
- program manager
- specialist project management office
- chief executive officer, manager or management representative
- funding body
- customer or client

Unit Descriptor

This unit covers planning and development of projects which may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects. It includes identifying project opportunities, undertaking scoping, analysing the feasibility of projects, developing project plans and managing the establishment of projects. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, designing complex projects overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify project opportunities and undertake scoping	1.1 A <i>critical analysis</i> of the need for a project is conducted in accordance with organisational <i>policy and procedures</i> .
	1.2 A project definition study is undertaken, where necessary, to determine the scope of the project.
	1.3 Project scoping is completed in accordance with organisational policy and procedures and identifies a rationale for the project that includes the purpose, outcomes/expected benefits.
	1.4 <i>Stakeholders</i> are identified and canvassed to ensure that their requirements are addressed in project planning.
2. Analyse project feasibility	2.1 Research and analysis is undertaken to identify impacts and risks, <i>constraining factors</i> and alternate options.
	2.2 Technical feasibility, supportability and cost effectiveness of the project are analysed and the outcome is reported to key stakeholders.
	2.3 Alternatives for project design are assessed and a preferred option that fits the strategic direction of the organisation/work unit is identified and reported.
	2.4 Relevant specialists are consulted to determine the extent of financial, technical, security, scheduling, <i>whole-of-life support</i> and probity, and other risks.
	2.5 A business case is prepared and <i>approvals</i> to proceed with project development are obtained in accordance with organisational policy, procedures and guidelines.
3. Develop project	3.1 Project aims, objectives and impacts are defined in the <i>project</i>

ELEMENT**PERFORMANCE CRITERIA****plans**

plan, and timeframes and resources to complete quality deliverables on time and within budget are identified.

- 3.2 Projected outcomes are recorded in measurable and achievable forms and indicators to monitor the performance of the project are developed and agreed by relevant parties.
- 3.3 Potential risks are investigated and identified in the project plan and a risk management process is established to analyse information and options to *manage risks*.
- 3.4 Skills, roles and responsibilities of team members and stakeholders are clarified and agreed, and reporting requirements are identified.
- 3.5 *Management* of *project parameters* is addressed in the project plan and evaluation criteria are designed in accordance with organisational policy and practice.
- 3.6 *Project management tools* are utilised for planning in accordance with project requirements and the project is designed and *documented* in consultation with *specialists* to meet user requirements.

4. Manage establishment of project

- 4.1 If required, stakeholders are lobbied in accordance with organisational policy and procedures, to negotiate endorsement for the project.
- 4.2 Terms of reference are written and agreed to by stakeholders and resources are obtained in accordance with organisational procedures to establish the project.
- 4.3 Project scope and objectives are reviewed and analysed, and a strategy is developed to establish *work breakdown structures* to implement the project.
- 4.4 Project *infrastructure* is identified and established in accordance with organisational policy and procedures.
- 4.5 Specialist and technical support relevant to the project is obtained in accordance with the project plan.
- 4.6 Project governance structure and processes are established as detailed in the project plan.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- using project planning techniques related to projects that may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects
- detailing requirements, writing recommendations and preparing plans requiring precision of expression
- negotiating timelines, roles and responsibilities with stakeholders and team members
- scheduling project activities
- communicating with stakeholders using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- using project management tools suited to planning reasonably complex projects
- applying risk management techniques in project establishment including risk sharing and transfer
- using public relations strategies to promote and gain endorsement for projects
- including workplace safety issues in project planning requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on the project and management of the project, for example:
 - public sector codes of ethics/conduct
 - occupational health and safety and environmental and sustainability requirements
- project governance requirements
- financial management requirements
- quality standards
- risk management
- procurement
- human resources
- equal employment opportunity, equity and diversity principles
- project planning methods which may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects
- project management tools suited to planning reasonably complex projects
- principles relating to the planning phase of project management
- the project specifications
- market capability
- resource plans

- project approval processes
- scheduling packages
- cost schedule control systems
- integrated logistics support
- work breakdown structures
- change management in the context of designing complex projects

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC501B Promote the values and ethos of public service
 - PSPGOV502B Develop client services
 - PSPGOV503B Coordinate resource allocation and usage
 - PSPGOV504B Undertake research and analysis
 - PSPGOV505A Promote diversity
 - PSPGOV507A Undertake negotiations
 - PSPGOV512A Use complex workplace communication strategies
 - PSPPM502B Manage complex projects
 - PSPPM503B Close complex projects
 - PSPPROC502A Establish contract management arrangements

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see table Following for examples)
- complex projects designed in a range of (3 or more)

contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project planning and management
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when initiating projects, including coping with difficulties, irregularities and breakdowns in routine
- complex projects designed in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the

assessment competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Critical analysis may include:

- internal and external environment scan
- political imperatives
- previous and current related projects
- policies likely to be impacted
- cost-benefit analysis

Policy and procedures may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
 - public sector management acts
 - financial management and accounting legislation and regulations
 - privacy legislation
 - environmental/sustainability legislation
- government and organisational guidelines and procedures relating to:
 - project governance
 - resourcing
 - security
 - strategic plans
 - recruitment
 - risk management
 - procurement guidelines
 - designation approvals
 - industrial agreements

Stakeholders may include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups

- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

Constraining factors may include:

- political
- industrial
- legislative
- technical
- financial
- social
- cultural
- security/privacy
- environmental
- logistical support
- resources

Whole-of-life support may include:

- maintenance
- supply
- technical data
- personnel
- training
- facilities
- packaging, handling
- storage and transportation
- support and test equipment
- computing support

Approval may be required from:

- project sponsor
- business owner of the project
- program manager
- line manager
- specialist project management office
- chief executive officer, manager or management representative
- funding body
- customer or client

Project plan will include

- acquisition strategies

some or all of:

- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

Risk management may include:

- acceptance
- avoidance
- minimisation
- transfer

Management may include:

- risk management
- schedule management
- financial management
- communication, including reporting
- resources management
- logistics management

Project parameters
include:

- scope management
- change management
- quality management
- people management
- procurement management
- occupational health and safety management
- project scope - outcomes, objectives, project deliverables
- feasibility
- skills required for project team
- people required for project including specialist expertise
- communications including reporting requirements
- risks associated with project including people, environment, resources, technology change during the life of the project, if applicable
- steering committee arrangements
- timeframe and milestones
- cost
- resources for project
- acquisition/procurement
- organisational structure for project
- project quality control and operational flexibility
- project governance structure
- monitoring through staged rollout
- project delivery requirements
- pilot outcomes
- intellectual property
- integration of project within organisation
- transition arrangements
- change management
- project evaluation

Project management
tools may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
 - Gantt and bar charts
 - Program Evaluation and Review Technique (PERT) charts
 - Critical Path Method
 - cost schedule control system

- logistics support analysis
 - life cycle cost analysis
 - spreadsheets
 - recording systems - electronic and manual
- Documented information*** may include:
- reports detailing strategy
 - statement of requirement/work
 - industry development proposals
 - project plans
 - resource plans
 - project team work plans
 - risk and issues plan and log
 - performance evaluation criteria
 - reports to industry
 - whole-of-life support proposals
 - project definition study
- Relevant specialists*** may include:
- legal
 - technical
 - financial
 - other functional areas
 - other relevant agencies
 - logistics
- Work breakdown structures*** may include:
- how the work is to be performed and how cost and schedule data are to be tracked and reported
 - identification of the project tasks (deliverables)
 - identification of specific management responsibilities for tasks
- Project infrastructure*** may include:
- staffing levels/need for recruitment action and training
 - equipment and technical support
 - resource requirements including travel, finance etc
 - project office accommodation
 - management infrastructure

Unit Descriptor

This unit covers management of projects that may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects. It includes managing start-up, project implementation, project integration and follow-up activities. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, managing complex projects overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manage start-up activities	<p>1.1 <i>Project plans</i> are refined in consultation with steering committee and team members, and precise details are included for schedules of activities, milestones and resources.</p> <p>1.2 <i>Required systems</i> are established and maintained throughout the project in accordance with the complexity of the project and in line with the project plan.</p> <p>1.3 Project team members' understanding of and commitment to fulfilling the project requirements and their roles and responsibilities for the duration of the project are confirmed.</p> <p>1.4 <i>Project management tools</i> are selected and applied effectively to achieve project outcomes.</p>
2. Manage project implementation	<p>2.1 <i>Integration</i> and <i>management</i> of complex project activities are handled in accordance with the project plan.</p> <p>2.2 Leadership and required <i>development</i> are provided to the project team, and morale, stress levels and triggers are managed throughout the life of the project in accordance with organisational <i>policy and procedures</i>.</p> <p>2.3 <i>Stakeholder</i> input and expectations are managed throughout the project in accordance with the communication plan.</p> <p>2.4 Disagreements and disputes are resolved to the satisfaction of stakeholders or referred to a higher authority in accordance with organisational policy and procedures.</p> <p>2.5 Project <i>change proposals</i> are negotiated, agreed and documented in accordance with policy and procedures.</p>
3. Manage project integration	<p>3.1 All aspects of the project and related projects are integrated and links are established to ensure objectives are met in accordance with the project plan.</p>

ELEMENT**PERFORMANCE CRITERIA**

- 3.2 Consultation and reporting mechanisms are applied in accordance with the communication plan and staff and contractors are regularly consulted to discuss progress and ensure effective results.
- 3.3 Project integration is monitored, and management plans and any related contracts are reviewed and amended as appropriate, with results reported in accordance with mechanisms identified in the communication plan.
- 3.4 Ongoing progress is monitored against agreed milestones in accordance with the project plan to provide a measure of performance throughout the life of the project.
- 3.5 Programmed review of objectives and achievement is planned and implemented in accordance with the project plan.
- 4. Coordinate project follow-up activities**
- 4.1 Significant judgment is applied in the analysis of project deliverables against *specifications*, performance standards and project objectives, and the results are reported to stakeholders.
- 4.2 Support package arrangements are identified and offered to stakeholders who will be required to apply the project results.
- 4.3 Options for stakeholders to take account of environmental and cultural factors in applying the project results are included in the support package.
- 4.4 Operational and support authorities are consulted to investigate any testing/trialling/building and evaluation requirements resulting from the project, and funding implications estimated in project report.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- leading and mentoring people to achieve project outcomes
- maintaining agreement of stakeholders and team members to timelines, roles and responsibilities
- negotiating with stakeholders and team members using communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- using project management tools applicable to reasonably complex projects

- applying ethical decision making and problem solving related to project management of reasonably complex projects
- writing recommendations and preparing project reports requiring precision of expression
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project implementation, for example:
 - public sector codes of ethics/conduct
 - occupational health and safety and environmental and sustainability requirements
- project governance requirements
- quality standards
- risk management
- procurement guidelines
- financial management and budgetary framework
- human resources
- equal employment opportunity, equity and diversity principles
- project management tools to suit a range of reasonably complex projects in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the project
- project management systems
- organisational and political context
- critical analysis in a project management context
- business and commercial issues related to the projects managed

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment

process include, but are not limited to:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV502B Develop client services
- PSPGOV503B Coordinate resource allocation and usage
- PSPGOV504B Undertake research and analysis
- PSPGOV505A Promote diversity
- PSPPM501B Design complex projects
- PSPPM503B Close complex projects
- PSPPROC501A Manage contract risk
- PSPPROC503A Manage contract performance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of complex projects in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management in the organisation and the public sector
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing complete projects, including coping with difficulties, irregularities and breakdowns in routine
- management of complex projects in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds

- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

Project plans will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives

- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

Required systems for project management may include:

- planning and monitoring system
- financial management including:
 - budget allocation/funding
 - income generated
 - expenditure
- recordkeeping for documented information such as:
 - correspondence
 - quality data including survey, needs, test results
 - contracts
- time allocated and spent on each aspect of the project
- progress reports
- performance reports against milestones
- project outcomes
- samples, prototypes, models

Project management tools may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
 - Gantt and bar charts
 - Program Evaluation and Review Technique (PERT) charts

Integration of project activities may include:

- Critical Path Method
- cost schedule control system
- logistics support analysis
- life cycle cost analysis
- spreadsheets
- recording systems - electronic and manual
- scope
- time
- cost
- quality
- human resources
- communications
- risk
- procurement

Management may include:

- scope management
- communication and reporting
- schedule management
- financial management
- fraud control
- quality management
- resources management
- people management
- logistics management
- risk management
- contract management
- project implementation
- transition
- change management

Development may include:

- regular meetings
- feedback
- encouragement
- mentoring and coaching
- additional physical and human resources (within allocated budget) if and as required

Policy and procedures may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
 - public sector management acts
 - financial management and accounting legislation and regulations

- privacy legislation
- government and organisational guidelines and procedures relating to:
 - project governance
 - resourcing
 - security
 - strategic plans
 - recruitment
 - risk management
 - procurement guidelines
 - designation approvals
 - industrial agreements
 - environment and sustainability

Stakeholders may include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee
- end user
- supplier/service provider

Contract change proposals may include:

- administration
- cost
- engineering, technical, technology changes
- resources
- scope
- specifications
- time

Specifications may include:

- functional
- technical
- performance
- material

Unit Descriptor

This unit covers closure of projects that may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects. It includes reviewing project activity and managing project closure. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, closing complex projects overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Review project activity	1.1 Evaluation of project process, supplier performance and achievement against objectives is undertaken in consultation with <i>stakeholders</i> and results are reported in accordance with the <i>project plan</i> evaluation framework and organisational <i>policy and procedures</i> .
	1.2 The extent to which clients needs were met is evaluated and action to rectify problems is identified and documented.
	1.3 Implications of project outputs/outcomes for policies and operating procedures are identified and recommendations are made for their amendment.
	1.4 Information obtained from the evaluation of the project is provided in accordance with organisational requirements so it may be used to improve relevant policy and practice .
2. Manage project closure	2.1 Any funding associated with the project is acquitted against project budget items, and financial records are checked for accuracy and completed in accordance with organisational procedures.
	2.2 Project wind-down is <i>managed</i> and <i>documentation</i> , records and <i>approvals</i> are handled in accordance with project plan and organisational policy and procedures.
	2.3 Project stakeholders are debriefed, and infrastructure and resources are redeployed in accordance with organisational policy and procedures.
	2.4 Project hand-over to user/s is completed in accordance with organisational procedures, and lessons learnt are documented and reported to stakeholders to assist in continuous improvement.
	2.5 Stakeholders are advised of procedures and authorities for initial support to apply project results where relevant, and strategies

ELEMENT

PERFORMANCE CRITERIA

are provided to manage long-term project momentum in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- analysing results and evaluating outcomes against objectives
- writing recommendations and preparing reports requiring precision of expression
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- debriefing stakeholders and redeploying resources and infrastructure
- acquitting and reporting on resource expenditure including time and costs
- using project management tools applicable to reasonably complex projects
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project finalisation, for example:
 - public sector codes of ethics/conduct
 - occupational health and safety and environmental and sustainability requirements
 - project governance requirements
 - quality standards
 - risk management
 - procurement guidelines
 - financial management
 - human resource management and development
 - equal employment opportunity, equity and diversity principles
 - project specifications and objectives
- project management tools to suit a range of reasonably complex projects in

terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the project

- project management principles and systems
- critical analysis in a project management context
- business and commercial issues related to the projects managed
- organisational and political environment

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC501B Promote the values and ethos of public service
 - PSPGOV502B Develop client services
 - PSPGOV503B Coordinate resource allocation and usage
 - PSPGOV504B Undertake research and analysis
 - PSPGOV505A Promote diversity
 - PSPGOV507A Undertake negotiations
 - PSPGOV512A Use complex workplace communication strategies
 - PSPGOV517A Coordinate risk management
 - PSPPM501B Design complex projects
 - PSPPM502B Manage complex projects
 - PSPPROC504A Finalise contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- reviewing and closing complex projects in a range of (3 or

more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project close-out
- workplace project documentation
- scenarios and case studies
- examples of project management tools suited to reasonably complex projects

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when reviewing and closing complex projects, including coping with difficulties, irregularities and breakdowns in routine
- reviewing and closing complex projects in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of

Evidence must be gathered over time in a range of contexts to

assessment ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Stakeholders may include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

Project plan will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and

human resource development

- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)
- government legislation (Federal, State and Local) affecting organisation's administration such as:
 - public sector management acts
 - financial management and accounting legislation and regulations
 - privacy legislation
- government and organisational guidelines and procedures relating to:
 - project governance
 - resourcing
 - security
 - strategic plans
 - recruitment
 - risk management
 - procurement guidelines
 - designation approvals
 - industrial agreements
 - environment and sustainability

Policy and procedures may include:

Management of project wind-down may include:

- risks
- issues
- assets
- consultants
- project team
- support staff

Documentation may include:

- project completion report
- supplier performance reports
- whole-of-life support plans
- transfer documents
- financial reports and acquittals
- evaluation reports
- transition plans

Approvals may be required from:

- project sponsor/funding body
- business owner of the project
- program manager
- line manager
- project governance office/personnel in the organisation
- chief executive officer, manager or management representative
- customer or client

Unit Descriptor

This unit covers the work activities required to carry out complex project activities or multiple projects simultaneously. Typically this work is undertaken by project officers who are required to work on projects for multiple clients, or all aspects of larger projects. They are sometimes responsible for all the project deliverables, and at other times they work in teams on aspects of a number of projects. Contract management requirements are not included, as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

The unit includes reviewing and confirming requirements of each project/activity, organising and undertaking project activities, managing the progress of multiple projects/activities and finalising projects/activities.

In practice, conducting complex project activities overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Review and confirm project requirements

- 1.1 Limits of own responsibility and reporting requirements are confirmed for each of the projects/project activities assigned.
- 1.2 Information and supporting materials for each project/project activity are obtained in accordance with project requirements, organisational *policy and procedures*.
- 1.3 *Project plans* are analysed and requirements, timeframes, roles, responsibilities and *stakeholder* involvement are confirmed for each.
- 1.4 Project management procedures and controls are confirmed in accordance with each project plan, and any required changes are negotiated according to the project plan change management strategy.
- 1.5 Project plans are updated with confirmed information for milestones, resources, team members and steering committee details.

2. Organise and undertake project activities

- 2.1 Personal work plans are prepared to assign activities, timeframes and milestones for all projects/project activities to a single planning management framework to meet the progress requirements for each project/project activity.
- 2.2 Where project requirements cannot be accommodated and clashes occur, negotiations are conducted with project managers and/or supervisory staff to find a compromise satisfactory to all stakeholders.
- 2.3 Project tasks are accomplished in accordance with project plans

ELEMENT**PERFORMANCE CRITERIA**

- and any changes are managed in accordance with the approved project change strategy.
- 2.4 *Project data* is captured and recorded in accordance with project requirements.
- 2.5 Specialist advice and support are provided to project managers, steering committees and stakeholders as required to achieve project objectives.
- 3. Manage progress of multiple projects/activities**
- 3.1 *Project management tools* are used for integration and timing of project activities and achievement of project outcomes.
- 3.2 Risks to progress and achievement of project objectives are anticipated and reported to project management for action in accordance with *risk management* plans.
- 3.3 Completion of project activities and progress against targets and milestones are monitored and corrective action is taken if needed, in accordance with project plans and in *consultation with project managers*.
- 3.4 Problem solving to find innovative *solutions* to project problems or unplanned-for contingencies is undertaken in consultation with project management.
- 3.5 Progress reports are provided as required by project communication plans.
- 4. Finalise project activities**
- 4.1 Project deliverables for each project/activity are completed to the required standard in the required timeframes.
- 4.2 Recordkeeping associated with each project is completed as required by project plans.
- 4.3 Project processes are evaluated, issues identified and recommendations made for continuous improvement of projects/activities.
- 4.4 Project reports are prepared containing required information completed to the required standard using agreed style, voice and formats.
- 4.5 Project hand-overs of deliverables and return of borrowed/unused materials are completed in accordance with project plans and organisational procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- managing the logistics of dealing with multiple projects/activities, masters and milestones
- managing self, time and costs
- using project management tools
- negotiating changes to timelines, roles and responsibilities
- communicating with project managers and other stakeholders using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- recording information, writing recommendations and preparing reports requiring complex language structures and precision of expression
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on projects and management of the projects, for example:
 - public sector codes of ethics/conduct
 - occupational health and safety and environmental and sustainability standards
- project governance requirements
- quality standards
- risk management
- procurement
- financial management
- human resources
- equal employment opportunity, equity and diversity principles
- principles of project management
- project management tools to suit the combination of projects/activities carried out
- risk management strategies for carrying out multiple projects

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training

Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC501B Promote the values and ethos of public service
 - PSPGOV502B Develop client services
 - PSPGOV503B Coordinate resource allocation and usage
 - PSPGOV504B Undertake research and analysis
 - PSPGOV505A Promote diversity
 - PSPGOV507A Undertake negotiations
 - PSPGOV512A Use complex workplace communication strategies
 - PSPPROC501A Manage contract risk
 - PSPPROC502A Establish contract management arrangements
 - PSPPROC503A Manage contract performance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- complex project activities carried out in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when conducting multiple project activities, including coping with difficulties, irregularities

and breakdowns in routine

- complex project activities carried out in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Policy and procedures may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
 - public sector management acts
 - financial management and accounting legislation and

regulations

- privacy legislation
- government and organisational guidelines and procedures relating to:
 - project governance
 - resourcing
 - security
 - strategic plans
 - recruitment
 - risk management
 - procurement guidelines
 - designation approvals
 - industrial agreements
 - environmental and sustainability standards

Project plans will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy

- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources

Stakeholders may include

- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)
- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

Project data may include

- research data
- quality data including trials or test results
- draft materials
- samples, prototypes, models
- project outcomes
- record of time spent on project and progress in completing project
- correspondence
- financial data including costs, expenditure, income generated, purchases

Project management tools may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
 - Gantt and bar charts
 - Program Evaluation and Review Technique (PERT) charts
 - Critical Path Method
 - cost schedule control system

- logistics support analysis
 - life cycle cost analysis
 - spreadsheets
 - recording systems - electronic and manual
- Risk management*** may include:
- removing the risk
 - transferring the risk
 - minimising the risk
 - accepting the risk
 - preparing a contingency plan
 - keeping reserves
- Consultation with project managers*** may also include:
- steering committees
 - project sponsors
 - business owners of the projects
 - program managers
 - specialist project management office
 - chief executive officer, manager or management representative
 - funding body representatives
 - customers or clients
- Solutions to problems*** may include:
- reducing costs
 - researching and applying more efficient methods of completing project tasks
 - seeking further resources to meet deadline
 - negotiating an extension of deadline or redefining completion or quantities or quality of outcomes
 - sharing of ideas to gain improvements to work undertaken within the project
 - outsourcing aspects of the project
 - changing roles and responsibilities within project team

Unit Descriptor

This unit covers the development or review of 'in house' policy in an organisation, formulated to facilitate the implementation of government or board directives. It includes anticipating and confirming the need for policy development or review; planning the policy development process; gathering and analysing information; determining policy direction; and drafting, releasing and promoting policy.

In practice, developing organisation policy may overlap with other generalist or specialist work activities such as developing client services, complying with public sector legislation, acting ethically, engaging the community, coordinating research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Anticipate and confirm the need for policy development or review	1.1 <i>Internal and external factors</i> , issues, <i>events</i> , directions or government/board policies likely to cause changes to <i>organisation policy</i> are identified.
	1.2 The likely implications and impact of these factors that might require policy development are identified in consultation with <i>stakeholders</i> .
	1.3 A critical analysis of the need for new or revised policy is conducted that includes a scan of the wider internal and external environment, that checks related policies for context and identifies other policies likely to be impacted.
	1.4 Priority areas for policy development/review are recommended in accordance with organisational procedures.
	1.5 Confirmation of the need for policy development/review and supporting evidence is detailed in accordance with organisational procedures.
2. Plan the policy development process	2.1 The <i>approving authority</i> is confirmed and organisational procedures and protocols for policy development are confirmed and applied.
	2.2 <i>Issues</i> likely to impact on the policy development process are identified, analysed (in terms of risk) and addressed in policy development planning.
	2.3 <i>Policy requirements</i> are outlined in a <i>policy development plan</i> in accordance with organisational procedures.
3. Gather and analyse information for policy development	3.1 Stakeholders are identified and engaged through the establishment and maintenance of a representative and relevant <i>policy network</i> .
	3.2 <i>Information</i> required to support the policy development process is identified, gathered, analysed and interpreted.
	3.3 An <i>analytical framework</i> for the development of the policy is

ELEMENT	PERFORMANCE CRITERIA
4. Determine policy direction	<p>determined and applied.</p> <p>4.1 A range of policy options and <i>criteria for choice</i> are developed and communicated in a timely and understandable way to those responsible for selecting the policy direction.</p> <p>4.2 Where appropriate, specific policy options are promoted to executive within the organisation.</p> <p>4.3 Preferred policy option is recommended and risk treatments are determined in accordance with the policy development plan.</p> <p>4.4 Approvals/endorsements are obtained in accordance with the policy development plan and organisational procedures.</p>
5. Draft policy	<p>5.1 Policy is drafted and a cyclical process of consultation, feedback, identification of changes and re-drafting is implemented in accordance with the policy development plan.</p> <p>5.2 Risk management processes are implemented in accordance with the policy development plan to ensure progress of the process against the timeframe and milestones.</p> <p>5.3 An implementation plan is included in the policy that details responsibilities for implementation and strategies for transition, change management, initial and ongoing training and maintenance of the policy.</p> <p>5.4 Mechanisms for monitoring compliance with the policy, quality assurance of the policy, and evaluation of the policy are included within the policy.</p> <p>5.5 The policy is developed in accordance with <i>organisational requirements for style, format and contents</i>.</p>
6. Release and promote policy	<p>6.1 Policy is cleared through organisational channels, and agreement of critical stakeholders is gained in accordance with organisational procedures.</p> <p>6.2 All stakeholders, particularly those who will be responsible for implementing the new or revised policy, are fully informed of the <i>outcomes</i>, and fallout from dissenting stakeholders is managed in accordance with the policy development plan.</p> <p>6.3 The policy is released and <i>promoted</i> in accordance with organisational requirements.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading and evaluating complex and formal documents such as policy and legislation
- researching, analysing and presenting information
- preparing written reports requiring precision of expression and language and structures suited to the intended audience
- working as a member of a team to consult on and validate policy
- adjusting communication to suit different audiences
- responding to diversity, including gender and disability
- dealing with different points of view and dissenting stakeholders
- accessing policies and legislation electronically or in hard copy
- identifying and addressing the environmental, sustainability and occupational health and safety implications of policy/s being developed

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- policy development processes and practices in the public sector
- policy cycles
- analytical policy development frameworks
- current policies underpinning the work area
- organisation and government procedures and protocols
- public sector code/s of ethics and code/s of conduct
- equal employment opportunity, equity and diversity principles
- environmental, sustainability and occupational health and safety implications of policy/s being developed

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

- PSPCOM502A Develop and implement community engagement strategies
- PSPETHC501B Promote the values and ethos of public service
- PSPGOV502B Develop client services
- PSPGOV503B Coordinate resource allocation and usage
- PSPGOV504B Undertake research and analysis
- PSPGOV505A Promote diversity
- PSPLEGN501B Promote compliance with legislation in the public sector

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- development of organisation policy in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- public sector policy and legislation
- public sector standards, procedures and protocols
- policy development guidelines

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing policy, including coping with difficulties, irregularities and breakdowns in routine
- development of organisation policy in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people

- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

Internal and external factors may include:

- internal:
 - restructuring
 - new service models
 - amalgamation with other departments/agencies
 - new work practices
- external:
 - legislative changes
 - changing social trends
 - economic/technological change

Events may include:

- restructure
- amalgamation
- changes to legal risks
- changes in strategic direction
- changes to legislation and whole of government policies
- pilots or trials of policy

Organisation policy may include:

- any aspect of an organisation's business, such as policies relating to:
 - core business
 - client services
 - business structure
 - human resources
 - administration
 - financial management
 - work practices
 - training
 - information technology
 - technical/professional requirements
 - legal requirements
 - environmental and sustainability practices

Stakeholders may include:

- all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's conduct, actions, products and services, including:
 - employees at all levels of the organisation
 - other public sector organisations
 - private sector organisations
 - non-government organisations
 - other jurisdictions
 - union and association representatives
 - boards of management
 - government
 - Ministers
 - clients
 - the public
 - special interest groups

Approving authority may include:

- chief executive officer
- delegated officer, such as policy manager
- senior management
- board of management
- managing director

Issues may include:

- political sensitivities
- social and cultural sensitivities/factors
- equity in service delivery and employment practice
- resource implications (of policy implementation)

- technological influences/implications
 - jurisdictional boundaries/crossovers
 - ‘sunk cost’ restrictions
 - non-consenting stakeholders at the end of the policy development process
 - existing awards or agreements impacting on staff, including enterprise bargaining agreements
- Policy requirements*** may be defined in terms of:
- context
 - rationale
 - issues to be addressed
 - expected outcomes
 - timeframe
 - research methods
 - resource requirements for development
 - key stakeholders
 - communication strategy
 - feedback mechanisms for review
 - milestones
 - precedents
 - risk analysis
 - possible complications
 - success measures
 - impact on equity
 - possible resource implications for implementation
- Policy development plan*** may include:
- policy objectives/outcomes
 - timelines
 - methodology – a cyclical process of consultation, feedback, identification of changes, and re-drafting
 - stakeholders
 - risks/risk management
 - performance criteria to inform review and evaluation
 - dissemination and promotion activities
 - implementation issues
- Establishment and maintenance of a ***policy network*** may include:
- communication and information strategy to capture required range of opinions
 - range of communication channels for providing information
 - range of input strategies for obtaining information
- Information gathering*** may include:
- consulting with stakeholders, including specialists in relevant issues
 - focus groups

- developments in other public sector or private sector organisations
 - evaluation of similar policies
 - benchmarking against other organisations/work functions
 - accessing information in current and closed files
 - surveys
 - literature reviews
 - Internet
- Analytical frameworks*** may include:
- logical/rational (including best practice)
 - incremental
 - radical transformation
- Criteria for choice of preferred policy option*** may include:
- likely effectiveness in terms of:
 - meeting policy objectives
 - minimising risks
 - impact on day-to-day implementation throughout the organisation
 - practicality at the coal-face
 - competing priorities in the workplace
 - constraints
 - structure and culture of the organisation
 - implementation timeframe and costs (including infrastructure)
 - interaction with other policies (existing or being developed)
 - consistency with broader government agendas
- Organisational requirements for style, format and contents*** may require policies to be:
- forward-looking
 - outward-looking
 - principles-based
 - innovative, creative, flexible
 - evidence-based
 - inclusive
 - consistent
 - self-contained, with adequate coverage of the subject matter
 - accessible to the intended audience/understandable to all users
 - gender-neutral and written in non-discriminatory language
 - version-controlled to support evaluation and revision
- Outcomes*** of the policy development process may include:
- nature of the policy change
 - the outcomes expected by stakeholders
 - issues

Promotion of policy may include:

- expected costs
- timelines
- contextual factors (including any impact on other related policies)
- formal launch
- information sessions
- presentations
- ongoing advice
- intranet
- web site
- advertising where policy is located and how to access it

Unit Descriptor

This unit covers the development or review of public policy, to enable the implementation of government objectives. For the purposes of this unit, public policy includes government policy affecting all Australians and public sector policy that is not restricted to a particular organisational structure or individual organisation. The unit includes anticipating and confirming the need for public policy development or review; planning the policy development process; gathering and analysing information; determining policy direction; and drafting, gaining agreement for, and disseminating public policy.

In practice, developing public policy may overlap with other generalist or specialist work activities such as managing change, managing diversity, managing workplace safety, managing the delivery of client services, managing risk, directing the management of contracts.

This unit replaces and, for qualification purposes, is equivalent to *PSPPOLD601A Develop public policy*. Policy evaluation is no longer part of the unit. Evaluation is addressed in *PSPMNGT611A Manage evaluations*.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Anticipate and confirm the need for public policy development or review	1.1 <i>Events</i> , issues or government policies likely to cause changes to <i>public policy</i> are identified.
	1.2 The likely implications and impact of these factors that might require public policy development are identified and prioritised in consultation with <i>stakeholders</i> .
	1.3 A critical analysis of the need for new or revised public policy is conducted that includes a scan of both internal and external environments, that checks related policies for context and identifies other public policy likely to be impacted.
	1.4 Priority areas for public policy development/review are recommended in accordance with government directions.
	1.5 Confirmation of the need for public policy development/review and supporting evidence is detailed in accordance with policy and procedures.
2. Plan public policy development process	2.1 The <i>approving authority</i> is confirmed and procedures and protocols for public policy development are confirmed and applied.
	2.2 <i>Issues</i> likely to impact on the policy development process are identified, analysed (in terms of risk) and addressed in policy development planning.

ELEMENT	PERFORMANCE CRITERIA
	2.3 Public <i>policy requirements</i> are outlined in a policy development plan in accordance with organisational procedures.
3. Gather and analyse information for public policy development	<p>3.1 Stakeholders are identified and engaged through the establishment and maintenance of a public policy network.</p> <p>3.2 Information required to support the policy development process is <i>gathered</i>, analysed and interpreted.</p> <p>3.3 An <i>analytical framework</i> for the development of public policy is determined and applied.</p>
4. Determine public policy direction	<p>4.1 Strategic input is obtained from high-level staff in accordance with organisational/public sector protocols.</p> <p>4.2 A range of policy options and <i>criteria for choice</i> are developed and communicated in a timely and understandable way to those responsible for selecting the policy direction.</p> <p>4.3 Where appropriate, specific policy options are promoted to key individuals, organisations and groups.</p> <p>4.4 A preferred public policy option is identified and risk treatments are determined in accordance with the policy development plan.</p> <p>4.5 Approvals/endorsements are obtained in accordance with the policy development plan and public sector procedures and protocols.</p>
5. Draft public policy	<p>5.1 Public policy is drafted using a cyclical process of consultation, feedback, identification of changes and re-drafting implemented in accordance with the policy development plan.</p> <p>5.2 Risk management processes are implemented in accordance with the policy development plan to ensure progress of the process against the timeframe and milestones.</p> <p>5.3 An implementation plan that details responsibilities for implementation and strategies for transition, change management, and initial and ongoing training and maintenance of the policy, is included within the policy.</p> <p>5.4 Mechanisms for monitoring compliance with the policy, quality assurance of the policy, and for evaluation of the policy are included within the policy.</p> <p>5.5 The policy is developed in accordance with <i>organisational requirements for style, format and contents</i>.</p>
6. Release and promote public policy	<p>6.1 Public policy is cleared through required channels, and agreement of critical stakeholders is gained in accordance with the policy development plan.</p> <p>6.2 All stakeholders, particularly those who will be responsible for implementing the new or revised policy, are fully informed of the <i>outcomes</i>, and fallout from dissenting stakeholders is managed in accordance with the policy development plan.</p>

ELEMENT

PERFORMANCE CRITERIA

6.3 The policy is released and *promoted* in accordance with government requirements.

6.4 Advice is provided to those affected by policy changes in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading and evaluating complex and formal documents such as policy and legislation
- researching, analysing and presenting information
- preparing written reports requiring precision of expression and language and structures suited to the intended audience
- working as a member of an inter-agency team to consult on and validate policy
- adjusting communication to suit different audiences
- responding to diversity, including gender and disability
- dealing with different points of view and dissenting stakeholders
- accessing policies and legislation electronically or in hard copy
- identifying and addressing the environmental, sustainability and occupational health and safety implications of policy/s being developed

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- policy development processes and practices in the public sector
- current policies underpinning the work area
- government procedures and protocols
- public sector code/s of ethics and code/s of conduct
- principles of community engagement in policy development
- equal employment opportunity, equity and diversity principles
- environmental, sustainability and occupational health and safety implications of policy/s being developed

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPMNGT604B Manage change
 - PSPMNGT605B Manage diversity
 - PSPMNGT606B Manage quality client service
 - PSPMNGT608B Manage risk
 - PSPOHS602A Manage workplace safety
 - PSPPROC602B Direct the management of contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- development of public policy in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- public sector policy and legislation
- public sector standards, procedures and protocols
- policy development guidelines

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing public policy, including coping with difficulties, irregularities and breakdowns in routine
- development of public policy in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as

literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

Events may include:

- Machinery of Government changes
- a shift to designing policy around a set of government priorities not organisational structures/individual agencies
- a focus on whole of government policies
- changes to legal risks
- emphasis on policy research focused on the mid to long term, as well as that developed to meet immediate needs of government

- national or international events such as:
 - change in government
 - changes in government policy
 - changes in strategic direction
 - changes in legislation
 - changes in the policies of other governments
 - changing social trends
 - economic/technological change
- Public policy*** may include:
- ongoing policy formulation to meet the immediate needs of government
 - evidence-based policy
 - policy focused on the medium to long term
 - any aspect of Australian life or public sector services or practices for which government considers policy development is required
- Stakeholders*** may include:
- all those individuals and groups both inside and outside the government that have some direct interest in government conduct, actions, products and services, including:
 - employees at all levels of the public sector
 - government
 - Ministers
 - clients
 - the public
 - other public sector organisations
 - other jurisdictions
 - union and association representatives
 - boards of management
 - international governments
 - international bodies
 - community groups
 - non-government organisations
 - special interest groups
 - key individuals of influence
- Approving authority*** may include:
- chief executive officer
 - delegated officer, such as policy manager
 - senior management
 - board of management
 - managing director
- Issues*** may include:
- political sensitivities
 - social and cultural sensitivities/factors

Policy requirements may be defined in terms of:

- resource implications (of policy implementation)
- technological influences/implications
- jurisdictional issues
- 'sunk cost' restrictions
- non-consenting stakeholders at the end of the policy development process
- refusal to be involved, blocking, hampering process
- context
- rationale
- issues to be addressed
- expected outcomes
- timeframe
- business/government cycles
- research methods
- resource requirements for development
- key stakeholders
- communication strategy
- feedback mechanisms for review
- milestones
- precedents
- risk analysis
- possible complications
- success measures/learning from failure or previous problems
- possible resource implications for implementation

Information gathering may include:

- stakeholder consultation
- developments across the public sector or in private sector organisations
- evaluation of similar policies
- benchmarking (including international benchmarking)
- current and closed files
- surveys
- literature reviews
- Internet
- comparing with approaches in other countries

Analytical frameworks may include:

- logical/rational (including best practice)
- incremental
- radical transformation

Criteria for choice of

- likely effectiveness

preferred policy option
may include:

- implementation timeframe and costs (including infrastructure)
- interaction with other policies (existing or being developed)
- consistency with broader government and community agendas

Organisational requirements for style, format and contents may require policies to be:

- forward-looking
- outward-looking
- principles-based
- innovative, creative, flexible
- evidence-based
- inclusive
- consistent
- self-contained, with adequate coverage of the subject matter
- accessible to the intended audience/understandable to all users
- gender-neutral and written in non-discriminatory language

Outcomes of the policy development process may include:

- nature of the policy change
- the outcomes expected by stakeholders
- issues
- expected costs
- timelines
- contextual factors (including any impact on other related policies)

Promotion of policy may include:

- formal launch
- national campaign
- information sessions
- presentations
- media campaign
- ongoing advice

Unit Descriptor

This unit covers the expenditure of public monies for simple purchasing that requires simple and routine purchasing tasks to be undertaken under supervision. Goods and services are of low value or low risk, and purchasing is in accordance with government policy, public accountability requirements and organisational procedures. The unit includes planning for and undertaking procurement, and receiving goods and services.

In practice, undertaking basic procurement may overlap with other generalist or specialist work activities, such as working effectively in the organisation, upholding the values of public service or local government, complying with legislation, and using resources and financial systems.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to those who undertake purchasing as part of their role, whether as an initiator of a purchase or as an approver. This unit may not be appropriate for those who have a significant role in procurement.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Plan for basic procurement of goods or services

- 1.1. ***Delegation/limit of authority*** for basic procurement of goods or services is confirmed.
- 1.2. Procurement requirements are researched, confirmed and clarified as necessary with ***relevant personnel***.
- 1.3. Most suitable ***option for acquiring goods or services*** is determined in accordance with legislation, policy and procedures, and value for money considerations.
- 1.4. Approval processes for procurement options are identified.
- 1.5. ***Risk planning*** is conducted for the procurement activity in accordance with procedures, delegation and guidelines.

2. Undertake procurement

- 2.1. Approvals are obtained as necessary for procurement of goods or services in accordance with organisational policy and procedures.
- 2.2. Quotations are obtained if necessary in accordance with legislation, policy and procedures, and any conflict of interest is declared and resolved in accordance with organisational policy and procedures.
- 2.3. Suppliers or service providers are assessed and selected on the basis of ***best value for money***.
- 2.4. Procurement is initiated or orders are placed in

accordance with selected procurement option.

2.5. Procurement is conducted in accordance with the organisation's probity and governance requirements.

2.6. Procurement is conducted in line with the organisation's *financial management system*.

3. Receive goods or services

3.1. Goods are received or provision of services is accepted in accordance with procurement requirements.

3.2. Quality assurance processes are implemented to ensure goods or services meet procurement specifications and outcomes required.

3.3. Action is taken to resolve non-compliance with specifications within limits of own authority, or is referred according to organisational policy and procedures.

3.4. Receipt of goods or services is *confirmed* and accounts are processed for payment according to organisational procedures.

3.5. *Records* are maintained and reporting obligations are met according to organisational and legal requirements to provide an audit trail and for other organisational purposes.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - write and communicate procurement requirements in unambiguous terms
 - consult and negotiate with providers
 - provide feedback
- teamwork skills to:
 - work independently or under direction as appropriate to the situation
 - respond to diversity
 - refer issues to the correct person
- problem-solving skills to:
 - assess procurement options and select the most suitable option
 - assess goods and services against specifications
- initiative and enterprise skills to apply OHS and environmental requirements to basic procurement requirements
- planning and organising skills to apply risk-management processes

- self-management skills to apply codes of conduct, codes of practice and standards of individual behaviour
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures
- technology skills to:
 - operate organisational IT systems
 - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government procurement guidelines, including environmental purchasing guidelines
- organisation's code of conduct, codes of practice and standards of individual behaviour relating to procurement of goods and services, in particular identifying and managing conflict of interest, gifts and inappropriate relationships with providers
- procurement options and methods
- probity and ethical issues
- procedures for receipt and payment of goods or services, including credit card procedures
- procurement approval procedures
- financial and government accountability requirements
- equal employment opportunity, equity and diversity principles
- public sector legislation and guidelines, including OHS and environment

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment Competency must be demonstrated by undertaking basic procurement of goods or services consistently in accordance with legislative and organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- produce a procurement plan appropriate to the scale, complexity and risk of the procurement
- implement the procurement plan in a way that reflects organisational policies and approaches
- use relevant template documents
- accept delivered goods and services into use
- operate within own delegations and seek advice when

appropriate

- keep records of procurement activities.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least three separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to basic procurement of goods and services
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of basic procurement activities
- case studies that incorporate dilemmas, and probity requirements relating to basic procurement of goods and services.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies selected for basic procurement
- review of basic procurement plans, requests for quotation, quotation evaluation plans, selection reports, credit card purchase documents, approvals obtained, simple budgets, invoices paid, other financial documents and other documentation prepared by the candidate in a range of contexts
- feedback from peers or supervisors on actions taken to monitor and review contract performance

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC301B Uphold the values and principles of

- public service
- PSPGOV301B Work effectively in the organisation
- PSPGOV305B Access and use resources and financial systems
- PSPGOV309A Address client needs
- PSPGOV312A Use workplace communication strategies
- PSPLEGN301B Comply with legislation in the public sector

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

- | | |
|--|---|
| <i>Delegation/limit of authority</i> may include: | <ul style="list-style-type: none"> • low value or low risk procurement • one-off purchases • expenditure approval limits • approval processes • procurement decision making |
| <i>Relevant personnel</i> may include: | <ul style="list-style-type: none"> • internal user of procured goods or services • supervisor • specialist procurement personnel • supplier |
| <i>Options for acquiring goods or services</i> may include: | <ul style="list-style-type: none"> • purchasing off an existing contract, standing offer or multi-use list • government credit card transactions • direct purchase from retail or wholesale outlets • petty cash • standard electronic commerce or online transactions |
| <i>Risk planning</i> may include: | <ul style="list-style-type: none"> • stakeholder consultation • confirmation that a procurement process is necessary • confirmation that funds are available • confirmation that required approvals have been obtained |
| <i>Best value for money</i> | <ul style="list-style-type: none"> • availability |

includes:

- ease of disposal
- price
- through life support
- warranty
- quality and suitability of product

Financial management system may include:

- procurement and contracts' register
- delegations and authorities
- reporting requirements
- record keeping
- receiving and accepting deliverables
- payment approval process
- credit card process

Confirmation may include:

- verbal and written
- internal and external
- to users
- to management.

Records may include:

- purchase requests and orders
- invoices and payment requests
- statements and petty cash vouchers
- records of authorised decisions
- corporate credit card transaction statements
- records of supplier performance
- financial statements
- asset registers
- actions taken to manage identified conflict of interest
- records of conversation
- procurement reporting

Unit Descriptor

This unit covers the expenditure of public monies for simple procurement of low value/low risk goods and services using contractual arrangements that include simple tendering and requests for quotation. The unit requires analysis and decision making in the procurement process, which is undertaken under limited supervision. It includes planning and undertaking procurement, managing contractors and completing contractual arrangements.

In practice, procuring goods and services overlaps with other generalist and specialist public sector or local government work activities, such as upholding and supporting the values and principles of public service, identifying and treating risks, exercising delegations, applying government processes, encouraging compliance with legislation in the public sector or local government, planning procurement, developing and distributing requests for offers, selecting providers and managing contracts.

This unit is not recommended for those who specialise in procurement. It cannot be included in the Certificate IV in Government (Procurement and Contracting).

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to those who enter into contracts or go out to tender or manage the procurement but are not procurement professionals. Those undertaking this unit may be developing a request for tender but procurement is not a major part of their role.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Plan for procurement of goods or services.

- 1.1. ***Market assessment*** is used to identify and select options for procuring goods or services in accordance with business plan requirements, legislation, policy and procedures, and ***probity requirements***.
- 1.2. ***Commercial strategy*** is identified to achieve the procurement outcome set out in the business plan, achieve value for money, and meet legal and probity requirements.
- 1.3. Risk planning is conducted for the procurement activity according to procedures, delegations and guidelines.
- 1.4. Process and criteria for evaluation of offers from suppliers or service providers are identified to meet public sector probity requirements, and are recorded in a tender evaluation plan.
- 1.5. Procurement plan is developed to manage procurement process and ***contractual arrangements*** in accordance with ***legislation, policy and procedures, and probity requirements***.

- 1.6. *Stakeholders* are consulted about the planned procurement and their feedback is incorporated into the procurement process.
2. **Undertake procurement.**
- 2.1. *Method for requesting and receiving offers* is chosen to suit the procurement activity and comply with organisational policy and procedures and probity requirements.
- 2.2. Specialist expertise is used to assist in evaluation of offers as required.
- 2.3. Evaluation and selection of the offer are made according to tender evaluation plan, and organisational policy and procedures.
- 2.4. Notification of successful and unsuccessful suppliers/providers is undertaken according to procurement plan, and organisational policy and procedures.
- 2.5. Work does not commence and payment is not made until contractual arrangements are formalised.
- 2.6. Contractual arrangements that are legally binding to all parties and suitable to the procurement activity are negotiated, formalised and *reported* according to organisational policy and procedures.
3. **Manage contractors.**
- 3.1. Communication strategies are established to build and maintain relationships with contractors.
- 3.2. Performance is monitored against contract performance indicators for quality assurance of the goods or services and to ensure compliance with contract specifications.
- 3.3. Contract performance indicators are regularly reviewed to ensure relevance.
- 3.4. Approvals are obtained for contract variations according to organisational and contractual requirements.
- 3.5. Disputes or complaints are investigated, documented and resolved or referred according to contractual provisions.
- 3.6. Contractual obligations to contractors are met.
- 3.7. *Records* are maintained according to organisational and legal requirements to provide an audit trail and for other *organisational purposes*.
4. **Complete contractual arrangements.**
- 4.1. Goods and services received are confirmed as meeting contractual specification and required outcome, and accounts are processed for payment according to organisational procedures.

- 4.2. Contracts are finalised, cancelled or terminated according to contractual arrangements.
- 4.3. Contract performance, outcomes and management processes are evaluated, and lessons learnt are recorded and used to inform ongoing contract management practices.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - write procurement specifications in unambiguous terms
 - consult and negotiate with providers
 - write, read and/or sign contractual agreements that may include complexity of language and style, using templates where appropriate
 - engage in ongoing communication with contractors that may involve explaining or clarifying written and oral information, note-taking at meetings, active listening, and checking for understanding
 - provide feedback
- teamwork skills to:
 - work independently or under direction as appropriate to the situation
 - model team leadership approaches if appropriate
 - respond to diversity
 - refer issues to the correct person
- problem-solving skills to:
 - evaluate procurement options and select the most suitable option
 - assess goods or services provided against specifications
- initiative and enterprise skills to apply OHS, environmental, sustainability and corporate social responsibility practices in the context of government procurement activities
- planning and organising skills to:
 - manage contractor performance against contract requirements
 - make payments and manage financial arrangements
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures
- technology skills to:
 - operate organisational IT systems
 - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
 - relating to contract management, including environmental purchasing and corporate social responsibility guidance
 - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- organisation's code of conduct and code of ethics
- procurement options and methods
- probity and ethical issues
- codes of conduct, codes of practice and standards of individual behaviour relating to procuring goods and services, in particular identifying and managing conflict of interest, gifts and inappropriate relationships with providers
- procedures for receipt and payment of goods or services
- common use arrangements
- procurement approval procedures
- financial accountability requirements
- aspects of contract law, laws of tort, trade practices law, commercial law and other legislation relating to receipt and evaluation of offers, negotiation and award of contracts

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment Competency must be demonstrated in the ability to procure goods and services consistently in accordance with legislative and organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit Assessment must confirm the ability to:

- plan a procurement activity, using templates where these are available, to a level of detail commensurate with the complexity and risk profile of the procurement
- implement the procurement plan in a way that reflects the legislative and policy environment applicable to the organisation
- develop a suitable contract management plan, using templates if available
- manage the performance of contractors to ensure that the

goods or services are delivered in accordance with the contract

- act within own delegations and refer issues to higher authority when necessary.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to procuring goods and services
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of procurement activities
- case studies that incorporate dilemmas, and probity requirements relating to procurement of goods and services.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies selected for procurement
- review of procurement plans, requests for quotation/tender, tender evaluation plans, selection reports, contracts, contract management plans and reports, and other documentation prepared by the candidate in a range of contexts
- feedback from peers or supervisors on actions taken to monitor and review contract performance.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV417A Identify and treat risks
- PSPGOV421A Exercise delegations
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC411A Plan procurement
- PSPPROC412A Develop and distribute requests for offers
- PSPPROC413A Select providers and develop contracts
- PSPPROC414A Manage contracts.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Market assessment

may include:

- structure of the market
- number and quality of providers
- factors and conditions which may affect supply of goods or provision of services
- potential impact of intended procurement activity

Evaluation of options

may include:

- stakeholder consultation
- confirmation that procurement is necessary
- development of a business case
- comparison of internal and outsourced provision

Probity requirements:

- may include:
 - accountability
 - transparency
 - confidentiality
 - managing conflict of interest
 - impartiality
- are maintained to:
 - encourage conformity to processes
 - facilitate accountability
 - ensure proponents are treated in a fair and equitable manner

Key elements of a *commercial strategy* may include:

- encourage commercial completion
- preserve public and private sector confidence in government processes
- consultation with key stakeholders
- expenditure budget meets organisational requirements for probity and accountability
- procurement process agreed by users and documented, and meets legal and probity requirements
- approvals obtained
- contractual arrangements that capture and address identified risks, protection of all parties, and include performance indicators that provide the basis for due performance

Contractual arrangements may include:

- verbal and written orders
- purchase order
- government credit cards
- petty cash
- memoranda of understanding/memoranda of agreement
- in-house service level agreements
- contracts
- standing offers
- inter and intra-government agreements

Legislation, policy and procedures and probity requirements may include:

- commonwealth or state and territory legislation
- council rules and by-laws
- equal employment opportunity and anti-discrimination law
- commonwealth, and state or territory government procurement guidelines, including environmental purchasing guidelines
- organisational policies and practices
- probity guidelines
- financial management requirements

Stakeholders may include:

- end users, customers or clients, and sponsors
- current or potential providers or suppliers
- technical or functional experts or advisers
- commonwealth, state or territory, and local government
- the organisation
- other public sector organisations
- employees, unions and staff associations

- industry bodies
 - local communities
 - lobby groups and special user groups
- Methods for requesting and receiving offers*** may include:
- requests for quotation
 - direct purchases using existing supply agreements, such as standing offers
 - oral quotations
 - written quotations
 - direct purchases from retail or wholesale outlets
 - electronic commerce
- Reporting*** may include:
- gazettal notices
 - public notification
 - Gazette Publishing System (GaPS)
 - electronic
 - verbal
 - annual reports
 - internal and/or external
 - statistical reports
- Records*** may include:
- purchase requests and orders
 - simple procurement submissions and proposals
 - invoices and payment requests
 - statements and petty cash vouchers
 - offer and contract documents
 - evaluation process documentation
 - records of authorised decisions
 - corporate credit card transaction statements
 - records of supplier performance
 - gazettal notices
 - financial statements
 - asset registers
 - records of conversation
 - actions taken to manage identified conflict of interest
- Organisational purposes*** may include:
- reports and other documents
 - future procurement planning and contract management
 - accountability requirements
 - Ministerials

PSPSEC405A Handle security classified information

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the requirements related to handling security classified information. It includes receiving, dealing with and maintaining security classified information.

In practice, handling security classified information may overlap with other generalist or specialist public sector work activities such as working ethically, complying with legislation, applying government processes, gathering and analysing information, exercising regulatory powers.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive security classified information	1.1 <i>Security classified information</i> is <i>received</i> and checked to ensure transmission protocols have been adhered to.
	1.2 Action is taken in accordance with security policy and procedures where protocols have not been adhered to.
	1.3 Security classified information is recorded in accordance with organisational policy and procedures.
2. Deal with security classified information	2.1 Security classified information is <i>reviewed</i> to ensure classification meets the organisation's security policy for protection of information.
	2.2 Aggregated security classified information is reviewed to ensure that it is classified in accordance with security requirements.
	2.3 Classification requirement is checked to ensure it is warranted, and the level of protection is assigned in accordance with the consequences that might result from the compromise of the information's confidentiality, integrity and availability.
	2.4 Originators of information who classify documents are contacted to discuss re-classification or de-classification where necessary.
	2.5 Security classified information is <i>transmitted</i> in accordance with organisational security policy and procedures.
	2.6 <i>Expert advice</i> is obtained as required in accordance with organisational policy and procedures.
3. Maintain security classified information	3.1 Security classified information is <i>secured</i> in accordance with organisational policy and procedures.
	3.2 Security classified information is <i>accounted for</i> in accordance with organisational policy and procedures.
	3.3 Security classified information is <i>disposed of</i> in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to government security management
- applying security classification systems
- using analysis and problem solving
- tailoring communication to the needs of a diverse range of people inside and outside the organisation who classify, transmit or advise on security classified information
- responding to diversity, including gender and disability
- undertaking recordkeeping requiring attention to detail, and adherence to standards
- applying procedures relating to occupational health and safety and environment in the context of government security management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to government security management
- standards for management of security classified information
- classification system for national security and non-national security information
- procedures for confirming initial security classifications
- international protocols and treaties impacting on government security management
- available sources of expert advice
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of government security management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training

Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC401A Uphold and support the values and principles of public service
 - PSPGOV406B Gather and analyse information
 - PSPGOV422A Apply government processes
 - PSPLEGN401A Encourage compliance with legislation in the public sector
 - PSPREG401C Exercise regulatory powers

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- security classified information handled in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to handling security classified information
- case studies and workplace scenarios to capture the range of situations likely to be encountered when handling security classified information

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when handling security classified information, including coping with difficulties, irregularities and breakdowns in routine
- security classified information handled in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse

backgrounds

- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Security classified information may include:

- hard copy
- electronic
- audio-visual
- photographic
- encrypted
- national security classified
- non-national security classified
- classified by third parties

Security classified information may be *received* by:

- hand
- mail
- safe hand mail
- courier
- electronic means
- single or aggregated information

Reviewed information may include:

Transmission may be by:

- hand
- mail
- courier
- electronic means

Expert advice may include:

- agency security adviser/s
- specialist agencies such as:
 - Australian Security Intelligence Organisation
 - Department of Foreign Affairs and Trade
 - Australian Public Service Commission
 - Defence Signals Directorate
 - Australian Federal Police
 - Attorney-General's Department
 - Australian National Audit Office
 - Office of the Australian Information Commissioner

Securing practices may include:

- correct filing
- clean desk
- quitting all electronic systems and networks
- checking environment including:
 - desks
 - whiteboards
 - waste bins
 - computer drives
 - containers
 - cabinets
 - safes
 - vaults
 - windows
 - doors
- safe carriage of keys

Accounting for security classified information

- audit
- spot checks

may include:

- correct notation or markings
- file records
- transmission records
- receipts

Methods of *disposal* may include:

- pulping
- burning
- pulverisation
- shredding
- overwriting
- degaussing
- destruction
- archiving

PSPSOHS402A Contribute to the implementation of the OHS consultation process

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the outcomes required to effectively contribute to the promotion of consultative arrangements in the workplace by communicating, influencing and consulting as part of a systematic approach to managing OHS. The unit addresses the formal and informal processes of ensuring people in the organisation are informed about OHS and have opportunities to effectively participate in OHS processes.

In practice, contributing to the implementation of the OHS consultation process may overlap with other generalist or specialist public sector work activities such as acting ethically, using communication strategies, delivering client services, supporting policy implementation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to individuals with supervisory responsibilities for implementing and monitoring the organisation's OHS policies, procedures, programs in a work area. It addresses the formal and informal processes of ensuring people in the organisation are informed about OHS and have opportunities to effectively participate in OHS processes.

This unit will involve working with individuals and working with groups.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Contribute to procedures as individuals or as part of a group to raise OHS issues or request information and data	<p>1.1 <i>Strategies and tools</i> for individuals or groups to raise OHS issues or request information and data are identified.</p> <p>1.2 Procedures for individuals and groups to raise OHS issues or request information and data are implemented and communicated to <i>stakeholders</i> and <i>interested parties</i>.</p> <p>1.3 <i>Barriers</i> to individuals or groups seeking OHS information and data or raising issues are identified.</p> <p>1.4 Recommendations are made to address any identified barriers.</p>
2 Contribute to procedures for communicating OHS information and data	<p>2.1 Needs for <i>OHS information and data</i>, communication and consultation, including relevant <i>legislative requirements</i>, are identified with stakeholders.</p> <p>2.2 Information and data about OHS is provided to key personnel on a regular basis, in a readily accessible manner and appropriate to the target group.</p> <p>2.3 Formal and informal <i>communication processes</i> are used to provide information and data about OHS.</p> <p>2.4 Any barriers to individuals or groups gaining information and data about OHS are identified.</p> <p>2.5 Recommendations are made to address any identified barriers.</p>
3 Communicate OHS information, data and advice	<p>3.1 Timely and appropriate OHS information and data and advice are provided to stakeholder groups and individuals.</p> <p>3.2 OHS-related contributions in the form of ideas, information and</p>

ELEMENT	PERFORMANCE CRITERIA
<p>effectively to influence management decision making and action</p>	<p>solutions are made to influence management decision making and action.</p> <p>3.3 Awareness of the organisation's cultural and industrial environment is used when dealing with OHS issues.</p>
<p>4 Contribute to maintaining consultative arrangements</p>	<p>4.1 Support and advice are provided to those involved in <i>OHS consultative arrangements</i>.</p> <p>4.2 The OHS issue resolution process is supported to facilitate timely and equitable resolution of OHS issues.</p> <p>4.3 OHS consultative processes are facilitated to meet legislative and workplace requirements.</p> <p>4.4 The effectiveness of OHS consultation and participative arrangements is monitored.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of the organisation, OHS specialists and, as required, emergency service personnel
- preparing brief summary reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors
- managing own tasks within a time frame
- employing consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and where appropriate access resources
- analysing relevant workplace information and data, making observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- using a range of communication media
- conducting effective formal and informal meetings
- using language and literacy skills appropriate to the workgroup and the task
- dealing with conflict and contestability
- identifying and developing links between different activity areas in the

workplace.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- legislative requirements for OHS information and data and consultation
- roles and responsibilities in relation to communication and consultation for OHS committees, OHS representatives, line management, employees and inspectors
- requirements for record keeping that addresses OHS, privacy and other relevant legislation
- requirements for reporting under OHS and other relevant legislation including obligations for notification and reporting of incidents
- State/Territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- internal and external sources of OHS information and data
- benefits and limitations and use a range of communication strategies and tools appropriate to the workplace
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS e.g.
 - labour market changes
 - structure and organisation of workforce - part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
- principles of effective meetings including agendas, action planning, chair/secretarial duties, minutes and action items
- knowledge of organisational OHS policies and procedures
- key personnel, including identifying 'change agents', within workplace management structure
- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the work group
- organisational culture as it impacts on the workgroup
- public policy basis of OHS

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together	<p>Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:</p> <ul style="list-style-type: none"> • PSPETHC401A Uphold and support the values and principles of public service • PSPGOV402B Deliver and monitor service to clients • PSPGOV412A Use advanced workplace communication strategies • PSPGOV422A Apply government processes • PSPPOL404A Support policy implementation • PSPSOHS401A Contribute to the implementation of a systematic approach to managing OHS • PSPSOHS404A Contribute to the implementation of strategies to control OHS risk • PSPSOHS407A Ensure compliance with OHS and other relevant laws.
Overview of evidence requirements	<p>In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:</p> <ul style="list-style-type: none"> • knowledge requirements of this unit • skill requirements of this unit • application of employability skills as they relate to this unit.
Resources required to carry out assessment	<p>Resources essential for assessment include:</p> <ul style="list-style-type: none"> • legislation, policy, procedures and protocols relating to OHS consultation processes • case studies and workplace scenarios to capture the range of situations likely to be encountered when contributing to the implementation of OHS consultation processes.
Where and how to assess evidence	<p>Valid assessment of this unit requires:</p> <ul style="list-style-type: none"> • a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when contributing to the implementation of OHS consultation processes, including coping with difficulties, irregularities and breakdowns in routine • contribution to the implementation of OHS consultation in a range of three or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance criteria is explained here.

Strategies and tools may include:

- OHS committees
- meetings with health and safety and employee representatives
- employee meetings
- input to safety audits, hazard identification and risk assessment processes
- hazard alerts
- surveys, checklists
- tool box meetings
- intranet or email systems
- suggestion boxes and processes
- informal discussions with team members
- managers

Stakeholders may

- include:
- supervisors
 - health and safety and other employee representatives
 - OHS committees
 - employees
- Interested parties*** may include:
- contractors
 - visitors
 - clients
 - community
- Barriers*** may include:
- language
 - literacy and numeracy
 - special needs of employees
 - shift work and rostering arrangements
 - contractual arrangements
 - timing of information provision
 - workplace organisational structures (eg geographic, hierarchical)
 - workplace culture related to OHS
- Information and data*** about OHS may include:
- OHS legislation, codes of practice and guidelines
 - OHS consultation and participation processes
 - rights and responsibilities
 - hazards that exist in the workplace
 - risk assessments
 - risk control strategies
 - workplace OHS policies and procedures
 - safe work procedures
 - access to training information and data
 - manufacturers' manuals and specifications
- Legislative requirements*** may include:
- OHS legislation, regulations and codes of practice
 - workplace equity, diversity and privacy legislation
 - freedom of information (FOI) legislation
- Communication processes*** may include:
- group and individual meetings
 - interviews
 - notice boards
 - signs, posters and brochures
 - emails, letters, minutes, memos, reports
 - photographs, maps and plans
 - audio-visual media eg video
 - newsletters
- OHS consultative***
- OHS and other consultative and planning committees

arrangements may include:

- health and safety representatives and other employee representatives
- employee and supervisor involvement in OHS activities such as inspections and audits
- procedures for reporting hazards, and raising and addressing OHS issues
- employee and workgroup meetings

Modification History

PUACOM002B Release 2: Layout adjusted. Application added.

PUACOM002B Release 1: Primary release.

Unit Descriptor

This unit covers the competency to interact with internal and external clients.

Application of the Unit

This unit applies to all workers who have a requirement to communicate with clients as part of their public safety role. This may include both those workers who have a specific client contact role, as well as operational workers who come in to contact with members of the public as part of their duties.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify client needs and expectations	<p>1.1 Current and potential <i>clients</i> are identified.</p> <p>1.2 Needs and expectations are discussed and clarified with clients.</p>
2. Determine and implement response to client needs	<p>2.1 Appropriate decision making processes are established with client and relevant stakeholders.</p> <p>2.2 Options are identified.</p> <p>2.3 Decision making criteria are identified taking account of client needs and organisational context.</p> <p>2.4 Decision making criteria are applied to options in order to identify range of relevant outcomes.</p> <p>2.5 <i>Appropriate response</i> are selected and implemented.</p> <p>2.6 Client needs are recognised and taken into consideration in accordance with anti discrimination and other organisation policy and procedures.</p>
3. Manage client expectations	<p>3.1 Range of possible organisational responses are communicated to the client in a timely manner.</p> <p>3.2 Client is informed of options for further action.</p> <p>3.3 Courtesy, consideration and sensitivity are exercised at all times with the client.</p> <p>3.4 All <i>necessary documentation</i> is obtained, completed and processed according to organisation's policy and procedures.</p> <p>3.5 <i>Organisation's policy and procedures</i> relating to confidentiality are implemented.</p> <p>3.6 Assistance is sought to manage clients' expectations when necessary.</p> <p>3.7 Clients are referred to other personnel where necessary to ensure their needs are managed efficiently.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- interpersonal skills
- locating information
- reading selectively and summarising information

Required Knowledge

- major regulatory functions of organisation
- organisation and structure
- organisation services, facilities and activities
- organisation's anti-discrimination procedures
- organisation's policies and procedures relevant to client service and information provision

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in:

- locating, interpreting and providing relevant information to requests
- seeking assistance when necessary
- completing appropriate workplace records
- working in accordance with organisation's policies and procedures

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

A combination of oral or written presentation, observation on the job and/or in a simulated workplace environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Communication with clients*** may include:
- spoken
 - face-to-face
 - telephone

- written
- electronic
- forms
- letters
- non verbal
- gestures
- body language
- displays of information
- photographs
- interpreters

Clients may include:

- colleagues
- community
- contractors
- personnel from other organisations

Other organisations may include:

- government departments
- community services
- community groups
- public safety organisations
- non government organisations

Effective (spoken) communication may include:

- clear
- sequenced explanations
- instructions
- paraphrasing
- negotiating meaning
- checking back on details
- summarising
- using another language

Appropriate response may include:

- written response involving reading
- selecting and extracting relevant information
- spoken response involving questioning appropriate personnel and relaying information to the client

Completion of necessary documentation may include:

- independent or assisted form filling
- recording events in the sequence they happened

Organisation's policy and procedures may include:

- as documented in procedures manual
- standardised operations
- conveyed through spoken language

Procedures for dealing with difficult clients may include:

- seeking assistance
- referring to other personnel

Opportunities for feedback may include:

- client satisfaction forms
- telephone survey
- follow up contact

- suggestion box
- verbal

Unit Sector(s)

Not applicable.

PUACOM003B Manage information

Modification History

PUACOM003B Release 2: Layout adjusted. Application added.

PUACOM003B Release 1: Primary release.

Unit Descriptor

This unit covers the competency to manage information to support the achievement of the organisation's objectives.

Application of the Unit

This unit applies to workers who have the delegated responsibility to ensure that information is collected and disseminated to team members and also that data and information is stored in organisational information systems. This unit is relevant at both local public safety group level and organisation wide. While written specifically for the public safety industry, it may have application in other industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify information needs and sources	<p>1.1 The <i>information</i> needs of individuals/teams are determined and the sources are identified.</p> <p>1.2 Information held by the organisation is reviewed to determine suitability and accessibility.</p> <p>1.3 Plans are prepared to obtain information which is not available or accessible within the organisation.</p>
2. Collect and analyse information	<p>2.1 <i>Collection</i> of information is timely and relevant to the needs of individuals/teams.</p> <p>2.2 Information is in a formal suitable for <i>analysis</i>, interpretation and dissemination.</p> <p>2.3 Information is analysed to identify relevant trends and developments in terms of the needs for which it was acquired.</p>
3. Use management information systems	<p>3.1 <i>Management information systems</i> are used to store and retrieve data for decision making.</p> <p>3.2 Technology available in the work area/organisation is used to manage information.</p> <p>3.3 Recommendations for improving the information system are submitted to designated persons/groups.</p>
4. Record and support information	<p>4.1 The results of information gathering, analysis and synthesis are reported within specified time frames and to the standard defined by the organisation.</p> <p>4.2 The results of information gathering, analysis and synthesis are reported so they can be inputs to policy development and organisation decision making.</p> <p>4.3 Information which is gathered is disseminated to appropriate personnel within the specified timeframe.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse record information

- collect and collate information
- communicate effectively
- disseminate information
- present information
- use management information systems to store and retrieve data

Required Knowledge

- analysis and display techniques
- information collection, collation
- information evaluation issues
- information storage requirements and methods
- reporting procedures of the organisation

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Establish an effective information system which facilitates achievement of organisational objectives.

Consistency in performance

Evidence will need to be collected over time in a range of actual and/or simulated management contexts.

Context of and specific resources for assessment

Context of assessment

Evidence will need to be collected over time in a range of actual and/or simulated information management contexts.

Specific resources for assessment

Evidence of competent performance should be obtained by observing an individual in an information management role within the workplace or operational or simulated environment.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Presentation of information*** may include:
- routine and complex reports and submissions
 - briefing notes
 - ministerials

- proposals
 - project plans
 - articles and promotional material
- Management information systems*** may include:
- computers

PUACOM004B Manage organisational communication strategies

Modification History

PUACOM004B Release 2: Layout adjusted. Application added.

PUACOM004B Release 1: Primary release.

Unit Descriptor

This unit covers competency in developing, implementing, reviewing and evaluating communication strategies and promoting effective communication techniques in the workplace.

Application of the Unit

This unit applies to workers who have an organisation wide role in the development and management of communication strategies. It has no explicit people management requirements however it does require high level skills around interpersonal relationships and communication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop communication strategies	<p>1.1 Strategies for effective internal and external dissemination of information are developed to meet the organisation's requirements.</p> <p>1.2 <i>Special communication needs</i> are considered in developing <i>strategies to avoid discrimination</i> in the workplace.</p> <p>1.3 <i>Communication strategies</i> are analysed, evaluated and revised where necessary to make sure they are effective.</p>
2. Establish and maintain communication pathways	<p>2.1 Pathways of communication are established to meet requirements of organisation and workforce.</p> <p>2.2 Pathways are maintained and reviewed to ensure personnel are informed of relevant information.</p>
3. Promote the use of communication strategies	<p>3.1 Information is provided to all areas of the organisation to facilitate implementation of the strategy.</p> <p>3.2 Effective communication techniques are articulated and modelled to the workforce.</p> <p>3.3 Personnel are given guidance about adapting communication strategies to suit a range of contexts.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- building relationships
- coaching
- conflict resolution
- listening
- negotiation
- networking
- verbal communication

Required Knowledge

- conflict resolution strategies and techniques

- language and literacy levels of personnel
- negotiation strategies and techniques
- possible communication difficulties
- range of communication strategies
- special communication needs of personnel
- techniques for improving communication and listening skills

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in:

- Strategies developed suit organisation's core business and different audiences

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Special communication needs may include:

- persons from culturally and linguistically diverse backgrounds

- people with a disability

Strategies to avoid discrimination may include:

- emphasis on verbal rather than written communication

- simple proformas
- plain English documents
- provision of individual assistance with reading/writing

Communication strategies

- internal and external information requirements

- may include:
- range of content areas
 - dissemination of organisational information
 - evaluation and effectiveness

PUACOM007B Liaise with other organisations

Modification History

Release	TP Version	Comments
3	PUA12 V2.1	Editorial changes.
2	PUA12 V2	Layout adjusted. Application added.
1	PUA00 V8.1	Primary release.

Unit Descriptor

This unit covers the competency to develop networks and relationships and liaise effectively with other organisations.

Application of the Unit

This unit applies to workers who have a role that includes formally liaising with other organisations in order to increase response effectiveness and community safety. While all workers should engage in networking opportunities with like-minded organisations in order to increase the effective of response in incidents, this unit is focussed at a more strategic liaisons, from local public safety group level to organisation wide.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUACOM005B Foster a positive organisational image in the community (Fire sector specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance Criteria describe the required performance

essential outcomes of a Unit of Competency.

needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish networks and relationships	<p>1.1 Formal and informal networks are established to support ongoing and future liaisons and collaboration.</p> <p>1.2 Relationships are developed and used in a way which provides identifiable benefits to the organisation from shared expertise, information and/or resources.</p> <p>1.3 Participation in regular meetings and forums supports mutual cooperation.</p> <p>1.4 Consultation with <i>affected and interested parties</i> is undertaken to support the <i>organisational goals and objectives</i>.</p>
2. Communicate and interact with other organisations	<p>2.1 Information is provided to other <i>organisations</i> in a clear, concise and comprehensive manner.</p> <p>2.2 Communication with other organisations is conducted in accordance with organisational policy and procedures.</p> <p>2.3 Information from other organisations is gathered to inform the improvement of services and to avoid duplication of effort.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- chairing meetings
- networking and developing relationships
- public speaking
- using networks effectively

Required Knowledge

- awareness of role and responsibilities of other organisations
- chairing meetings
- knowledge of current practices and procedures for communicating in the workplace
- meeting protocols and procedures
- organisation's confidentiality requirements
- organisational policy and procedures relating to liaison with other organisations
- role

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated as follows:

- Networks and relationships developed and used effectively
- All information provided is accurate and clear

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Affected and interested parties may include:

- local community
- business community
- commonwealth
- state and territory and local governments

Organisational goals and objectives may vary between

- organisational performance standards
- organisational personnel practices and guidelines

- sectors and organisations and • organisational quality standards
may include: • customer focussed service delivery
- community awareness of public safety issues
 - effective response to incidents/operations/emergencies
 - community participation in public safety activities
 - inter-organisation cooperation and collaboration
 - organisational goals and objectives may vary between sectors and organisations

- Organisations** may include:
- public safety organisations
 - government organisations
 - emergency response organisations
 - local
 - state/territory and commonwealth
 - government
 - suppliers
 - non-government organisations e.g. Red Cross
 - Salvation Army
 - volunteers
 - rescue etc

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Build networks and develop working relationships

- 1.1 Formal and informal networks are established at the local, regional and national levels to support ongoing and future liaison and collaboration.
- 1.2 The roles and responsibilities of *stakeholders* are recognised and taken account of in interactions.
- 1.3 Working relationships are developed with stakeholders and used in a way which provides identifiable benefits to the organisation and the community from shared expertise and resources.
- 1.4 Dealings with stakeholders are conducted in line with ethical and professional standards to develop a relationship of trust and mutual understanding.
- 1.5 Feedback is obtained from other organisations and governments to inform and improve service delivery.

2. Represent the organisation

- 2.1 The organisation's message is imparted accurately and in a clear, concise and confident manner to gain stakeholder's understanding and commitment.
- 2.2 The organisation's representation is sought and promoted on external bodies.
- 2.3 Opportunities to promote the organisation through media, government and the community are utilised in a positive and constructive manner, in line with organisational requirements.
- 2.4 Advice to stakeholders is provided consistent with organisation policy, needs, quality standards and legislative responsibilities.
- 2.5 Advice is provided in the context of strategic planning for the organisation.
- 2.6 Advice is provided confidentially on matters sensitive to governments and the organisation, in line with privacy and confidentiality legislation and guidelines.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- building networks and relationships
- gaining cooperation of others
- speaking publicly

Required Knowledge

- confidentiality requirements
- goals and objectives of the organisation
- legislation
- organisation policies
- regulation
- responsibilities of three levels of government relevant to the organisation
- roles and responsibilities of other agencies and relevant organisations
- statutes impacting on the organisation

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in establishment and maintenance of networks which will promote the organisation and achieve the organisation's outcomes.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment.

PUAEMR009B Facilitate emergency risk assessment

Modification History

PUAEMR009B Release 2: Layout adjusted. Minor edits to unit wording.

PUAEMR009B Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to facilitate development of an agreed list of prioritised risks using an emergency risk management process developed in close cooperation with the community and consistent with the Australian Standard AS/NZS ISO 31000:2009.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to workers who undertake emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

This unit is relevant to individuals whose role is to act as the project manager or facilitator for working groups used to conduct an emergency risk assessment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit

Performance Criteria describe the required performance needed to demonstrate achievement of the element.

of Competency.

Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

- | | |
|---|---|
| <p>1 Identify, define and engage the community</p> | <p>1.1 A community profile is developed to identify broad characteristics and special needs.</p> <p>1.2 Known risks, <i>stakeholder</i> analysis, community and agency <i>sources of information</i> are used to identify communication and consultation networks that may be useful.</p> <p>1.3 A working group is established with an appropriate balance of expertise, representation and authority.</p> <p>1.4 Group's knowledge of emergency risk management principles, terminology and processes is developed.</p> <p>1.5 Means of implementing the emergency risk management process are negotiated with stakeholders.</p> <p>1.6 <i>Communication options</i> are selected to develop a communication plan.</p> <p>1.7 Need for specialised information, additional skills and expertise is identified.</p> |
| <p>2 Establish context and risk criteria</p> | <p>2.1 Community concerns, <i>drivers/triggers</i>; applicable <i>legislative, regulatory and organisational requirements; policies, procedures</i> and desired outcomes are identified.</p> <p>2.2 Objectives and scope are identified using emergency risk management <i>standards and guidelines</i>.</p> <p>2.3 <i>Information on community characteristics</i>, safety expectations, risk perceptions and the roles and requirements of stakeholders is collected.</p> <p>2.4 <i>Practical constraints</i>, existing treatment strategies and community expectations are considered when developing relevant <i>risk criteria</i>.</p> <p>2.5 Draft criteria and supporting explanations are circulated widely for comment.</p> |
| <p>3 Identify and analyse risks</p> | <p>3.1 <i>Sources of risk</i> are identified by considering the interaction of hazards, communities and <i>the environment</i>.</p> |

- 3.2 Elements at risk are identified.
- 3.3 Vulnerability of communities and/or the environment is determined by considering their susceptibility and resilience to sources of risk.
- 3.4 Risk statements describing consequences are generated.
- 3.5 Risks are analysed by considering the likelihood of particular consequences occurring.
- 3.6 Risks are rated in accordance with agreed risk criteria.
- 3.7 Stakeholders are consulted throughout the process.
- 4 Evaluate risks**
 - 4.1 Risks requiring additional analysis or treatment are determined.
 - 4.2 Tolerability and acceptability of risks are agreed with stakeholders.
 - 4.3 Risk treatments are prioritised using agreed risk criteria.
- 5 Promote ongoing commitment and ownership for the process and outcomes**
 - 5.1 Consultation is undertaken at all stages of the process using a wide range of networks and individuals.
 - 5.2 A variety of communication strategies is used.
 - 5.3 All stages of the process, decisions taken and outcomes are documented accurately in accordance with accountability and audit requirements.
 - 5.4 Information is provided to the community in ways that suit their language, literacy and cultural needs.
- 6 Monitor and review the process and outcomes**
 - 6.1 Emergency risk assessment is completed efficiently.
 - 6.2 All relevant data and contact information for key individuals and organisations is regularly reviewed for currency and updated.
 - 6.3 Risk register is reviewed in accordance with the review schedule or in response to drivers/triggers.
 - 6.4 Opportunities for improving emergency management processes are reported.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- define and solve problems

- demonstrate effective interpersonal interactions
- gain cooperation of stakeholders
- listen actively
- locate and interpret community information
- manage projects
- maximise the participation of committee members
- monitor and enhance team work
- negotiate agreed outcomes despite incomplete and/or uncertain information
- recognise the relevance and significance of information for the emergency risk management process
- resolve conflicts between participants constructively
- summarise and explain key information clearly
- value diversity of views and perceptions of risks

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines
- risk management process included in the current Australian Standard (AS/NZS ISO 31000:2009 *Risk management—Principles and guidelines*, and companion handbook HB 327:2010 *Communicating and consulting about risk*)
- risk identification tools, such as bow-tie diagram
- format of risk statements and risk register
- structure of risk criteria and the application of scenario dynamics (how a hazard creates consequences)
- concepts of ‘credible consequence level’, likelihood rating, confidence rating, ‘as low as reasonably practicable’ principle
- application of spatial analysis techniques
- jurisdiction or organisational emergency risk management principles and guidelines
- problem solving and decision making techniques
- research, demographic and economic analysis techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- explain emergency risk management concepts, the process and how to promote its benefits to a wide range of audiences
- apply the emergency risk assessment process (National Emergency Risk Assessment Guidelines)
- facilitate the development of an appropriate and sustainable emergency risk assessment in cooperation with the community and stakeholders

- work with committee members to translate a wide range of risk perceptions, issues of concern and risk evaluation criteria into an agreed set of prioritised risks
- promote community cooperation, input and ownership for the emergency risk management process used and the outcomes
- produce an agreed risk register for a community
- obtain feedback, monitor and review the process and outcomes
- maintain momentum and achieve the project outcomes within available resources
- establish a project and see it through to produce a risk register that has broad community and stakeholder support

Consistency in performance

Competency should be demonstrated in at least two different contexts throughout the life of a community emergency risk management project, or during components of a number of projects.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed facilitating a group emergency risk management process in the workplace or in a simulated workplace environment

Specific resources for assessment

For the demonstration of competence in this unit it will be necessary to participate in a real-world project

Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments

Guidance information for assessment

This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context.

Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning project.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Stakeholders*** may include:
- staff
 - client groups
 - decision makers
 - members of the public
 - community groups
 - industry groups
 - public and private sector organisations
 - non-government organisations
 - elected officials

- Sources of information*** may include:
- community information booklets
 - credible individuals, group and community leaders
 - documented risk assessments by companies, organisations
 - family and historical records
 - libraries, research reports, Australian Bureau of Statistics data
 - special needs groups, significant cultural organisations
 - media, council and emergency service personnel and records

- Communication options*** may include:
- community meetings
 - pamphlets/flyers/brochures
 - print newsletters
 - noticeboards
 - word of mouth
 - posters/billboards
 - face-to-face
 - email newsletters
 - websites
 - local newspapers
 - text messaging
 - social media
 - radio and television
 - video communication

- blogs
- Drivers/triggers** may include:
- changes in community characteristics
 - changes in legislation, policies and disaster/emergency management plans
 - changes in insurance policies and premiums
 - new sources of risk or changed perception of risk
 - planning deficiencies
 - recent emergency incident reports/debriefs, safety issues
 - recent judicial decisions
 - strategic and corporate plans
- Legislative, regulatory and organisational requirements** may include:
- arrangements specified in emergency management, land-use, environmental or other legislation
 - organisational or jurisdictional emergency risk management policies or procedures
 - existing disaster plans, agreements or memoranda of understanding
 - local planning regulations, development controls and environmental plans
- Standards and guidelines** include:
- AS/NZS ISO 31000:2009, *Risk management—Principles and Guidelines*
 - HB 327:2010, *Communicating and consulting about risk*
 - ISO Guide 73:2009, *Risk management—Vocabulary*
 - National Emergency, Management Committee (2010), *National Emergency Risk Assessment Guidelines* or updates thereof.
 - jurisdictional or organisational emergency risk management policies and procedures
- Information on community characteristics** may include:
- characteristics of natural, local and built environments
 - demographics (population distribution, social, cultural, health status and education data)
 - details of key infrastructure and emergency/support services
 - economic activity reports (employment, products, services, revenue)
 - government reports e.g. environmental impacts
- Practical constraints** may include:
- arrangements, roles and responsibilities set down in existing emergency management plans
 - availability of technical expertise, technology, equipment
 - budgets, time, availability and capability of people
 - land use planning

- legislation covering emergency management, environmental management, safety standards, local government regulations
 - limited community knowledge of emergency risk management processes and benefits
 - political, social and cultural considerations
- Risk criteria** may include:
- the nature and types of causes and consequences that can occur and how they will be measured
 - how likelihood will be defined
 - the timeframe(s) of the likelihood and/or consequence(s)
 - how the level of risk is to be determined
 - the views of stakeholders
 - the level at which risk becomes acceptable or tolerable
 - whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered

- Sources of risk** may include:
- commercial and legal relationships
 - economic systems and relationships
 - human behaviour
 - natural events
 - built environment failures
 - disease (plant, animal or human)
 - political circumstances
 - technology/technical issues
 - management activities and controls

- The environment** may include:
- social environment (individuals, families and common interest groups that form whole communities),
 - built environment (human-made assets that underpin the functioning of a community),
 - economic environment, and/or
 - natural environment

PUAEMR012B Determine treatment options

Modification History

PUAEMR012B Release 2: Layout adjusted. Content reviewed.

PUAEMR012B Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to determine a range of treatment options to treat emergency risks.

Application of the Unit

This unit is for people who are part of a working group that develops treatment options during an emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

The emergency risk management process used will be developed in close cooperation with the community and consistent with the National Emergency Risk Assessment Guidelines and AS/NZS ISO 31000:2009 *Risk management—Principles and guidelines*.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAEMR008B Contribute to an emergency risk management process

OR

PUAEMR009B Facilitate emergency risk assessment

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

- | | |
|---|---|
| <p>1 Establish the project and working group</p> | <p>1.1 Applicable <i>policies and procedures</i>, reports, records and emergency risk assessments are located and analysed.</p> <p>1.2 A working group is established with an appropriate balance of expertise, representation and authority.</p> <p>1.3 Group's knowledge of emergency risk management principles, terminology and processes is confirmed.</p> <p>1.4 A sustainable emergency risk management process is negotiated that suits the <i>community context</i> and capability, <i>stakeholder</i> needs and <i>practical constraints</i>.</p> <p>1.5 Project management and consultation plans are developed with stakeholders.</p> <p>1.6 Need for <i>specialised information</i>, additional skills and expertise is identified.</p> |
| <p>2 Confirm risks to be considered</p> | <p>2.1 Existing risk assessment is reviewed for continuing relevance.</p> <p>2.2 <i>Sources of risk</i> are identified.</p> <p>2.3 Responsibility for single agency or multi-agency management of risks is identified.</p> <p>2.4 Risk treatment objectives are identified in consultation with stakeholders.</p> |
| <p>3 Identify treatment options</p> | <p>3.1 Effectiveness of existing risk treatments is established through research and stakeholder consultation.</p> <p>3.2 Community vulnerability is reconsidered as a basis for identifying treatment options.</p> <p>3.3 A range of potential risk treatment options is identified through research and stakeholder consultation.</p> |
| <p>4 Evaluate treatment</p> | <p>4.1 <i>Evaluation methods</i> are agreed with stakeholders.</p> |

- options**
- 4.2 Treatment options are assessed and the risks and implications for stakeholders are identified for each option.
- 4.3 Treatment options are documented so that they are understandable by a wide range of audiences.
- 4.4 Feedback on likely implications and impacts of treatment options is obtained from stakeholders.
- 4.5 Residual risks are assessed for tolerability or acceptance.
- 4.6 Cost-benefit analysis is completed for each risk treatment option.
- 5 Recommend treatment options for each risk**
- 5.1 Recommended options, including implementation responsibilities, are agreed in consultation with stakeholders.
- 5.2 Recommended options and residual risk are documented according to organisational policies and procedures.
- 5.3 Recommendations are submitted for approval in accordance with applicable policies and procedures.
- 6 Promote ongoing commitment and ownership for the process and outcomes**
- 6.1 Communication and consultation is undertaken, using a range of options throughout the process.
- 6.2 A range of communication strategies is used.
- 6.3 All stages of the process, decisions taken and outcomes are documented accurately in accordance with relevant policy and procedures.
- 6.4 Information is provided to the community in ways that suit their language, literacy and cultural needs.
- 7 Monitor and review the process**
- 7.1 All relevant data and contact information for key individuals and organisations is regularly reviewed for currency and updated.
- 7.2 Treatment options are reviewed for continuing relevance.
- 7.3 Opportunities for improving emergency risk management processes are reported.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- research and analysis skills to determine potential treatment options

- ability to negotiate and work effectively with stakeholder groups
- ability to lead workgroups
- ability to work effectively in small groups
- analytical techniques to determine residual risk
- analytical techniques to conduct benefit: cost analysis at an appropriate level
- facilitation and team leadership
- managing meetings
- negotiation and communication
- progress management and monitoring skills

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines and AS/NZS ISO 31000:2009 *Risk management—Principles and guidelines*
- legislative and regulatory requirements relevant to emergency risk management
- jurisdiction and organisational documentation and submission procedures
- analytical, problem solving and decision making techniques to facilitate evaluating residual risk and cost-benefit analysis
- concepts of ‘credible consequence level’, likelihood rating, confidence rating, ‘as low as reasonably practicable’ principle
- sources of demographic, geographic and economic information
- geospatial databases and presentation options
- range of options for treating emergency risk

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- establish a project and see it through to produce a set of recommended treatment options that has broad community and stakeholder support
- work with committee members to develop feasible and effective treatment options for a given set of risks
- promote community cooperation, input and ownership for the emergency risk management process used and the recommended treatment options
- obtain feedback, monitor and review the process and outcomes
- maintain momentum and achieve the project outcomes within available resources

Consistency in performance

Competency should be demonstrated in a range of contexts throughout the life of a community emergency risk management project, or during components of a number of projects.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed facilitating a group emergency risk management process where an agreed set of treatment options is produced for a given set of risks in the workplace or in a simulated workplace environment.

Specific resources for assessment

For the demonstration of competence in this unit it will be necessary to participate in a real-world project.

Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.

Guidance information for assessment

This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning project.

This unit may be assessed with other units that address other parts of the emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Policies and procedures*** may include:
- arrangements specified in legislation
 - organisational or jurisdictional emergency risk management policies or procedures
 - existing disaster plans, agreements or memoranda of understanding

- Community context*** may include:
- characteristics of social, built, natural and economic

environments

- demographics (population distribution, social, cultural, health status and education data)
- details of key infrastructure and emergency/support services
- economic activity reports (employment, products, services, revenue)
- government reports e.g. environmental impacts

Stakeholders may include:

- staff
- client groups
- decision makers
- members of the public
- community groups
- industry groups
- public and private sector organisations
- non-government organisations
- elected officials

Practical constraints may include:

- arrangements, roles and responsibilities set down in existing emergency management plans
- availability of technical expertise, technology, equipment
- budgets, time, availability and capability of people
- land use planning policy, authority and regulation
- legislation covering emergency management, environmental management, safety standards, local government regulations
- limited community knowledge of emergency risk management processes and benefits
- political, social and cultural considerations

Risk treatment options may include:

- avoidance of the risk
- removing a risk source
- changing the likelihood of
- an initiating event or source of risk occurring
- a hazard impacting on elements at risk
- changing the consequences of an identified hazard impact
- sharing the risk
- retaining the risk based on an informed decision

Specialised information may include:

- community information booklets
- documented risk assessments by companies, organisations
- family and historical records
- research reports, Australian Bureau of Statistics data

- Sources of risk* may include:
- media, council, and emergency service records
 - spatial information data
 - commercial and legal relationships
 - economic systems and relationships
 - human behaviour
 - natural events
 - built environment failures
 - disease (plant, animal or human);
 - political circumstances; and
 - technology/technical issues, management activities and controls.
- Evaluation methods* may include:
- first-pass cost-benefit analysis
 - analysis of treatment effectiveness
 - potential to create new or secondary risks
 - stakeholder acceptability
 - legal, regulatory and compliance impact

Unit Descriptor

Unit Descriptor

This unit covers the competency required to facilitate the identification, evaluation and implementation of complex treatment strategies in cooperation with major stakeholders such as governments, agencies, organisations and service providers.

Application of the Unit

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Confirm project context

- 1.1 Project *drivers/triggers*, risks, risk management context, treatment options and priorities and *practical constraints* are clarified
- 1.2 Applicable *legislative/regulatory and organisational requirements, policies, procedures* and relevant emergency management arrangements are identified
- 1.3 Key *stakeholders* are identified along with their potential interests, sensitivities, roles and responsibilities
- 1.4 Project brief is developed and refined with key stakeholders

2. Establish project process

- 2.1 Working group is established with an appropriate balance of expertise, representation and authority for the project brief
- 2.2 Purpose, scope and desired outcomes outlined in the project brief are confirmed with group members
- 2.3 Project management plan is developed in consultation with the group
- 2.4 Processes for negotiating outcomes and making decisions are developed within existing

ELEMENT**PERFORMANCE CRITERIA****3. Assess and select treatment strategies**

- accountabilities
- 2.5 *Consultation strategies* are developed for effective stakeholder input, commitment and ongoing ownership of outcomes
- 2.6 Information management, reporting and accountability strategies are developed and agreed
- 3.1 Existing risk assessments, current treatment programs and other *plans* that may impact on the project are identified by group members and analysed for relevance
- 3.2 Items from the risk register are selected for consideration
- 3.3 A wide range of alternatives are considered when canvassing possible treatment strategies
- 3.4 Input from relevant specialists and stakeholders is sought and analysed
- 3.5 Each *treatment strategy* is assessed for the ability to reduce risk
- 3.6 Preferred treatment strategy is selected and the reasons documented
- 3.7 Broad tactics, roles, tasks, responsibilities, resource implications and timeframe for implementing the selected strategy are documented
- 3.8 Support is developed by validating the strategy with agency/service providers and other stakeholders

4. Plan implementation of agreed strategy

- 4.1 Treatment strategy is broken down into a logical sequence of manageable and time-related activities
- 4.2 Ability and responsibility of agencies and service providers to undertake specific activities is jointly assessed
- 4.3 Accountability for components of the strategy is negotiated and confirmed with the appropriate agency/service provider
- 4.4 Project risks are assessed and contingencies developed for all key components of the strategy
- 4.5 Performance criteria are established for monitoring and reviewing the effectiveness of the treatment strategy

ELEMENT	PERFORMANCE CRITERIA
5. Facilitate treatment strategy implementation	<p>4.6 An overall implementation plan that identifies key activities, roles and responsibilities, resource requirements, management arrangements and timetable is developed and validated</p> <p>4.7 Agency implementation strategies are reviewed and refined as necessary</p> <p>5.1 Treatment tasks/activities are allocated in accordance with the implementation plan</p> <p>5.2 Effectiveness of treatment activities, adequacy of resources, project progress and expenditure is monitored against plans and recorded</p> <p>5.3 Effective communication between working group members is maintained</p> <p>5.4 Stakeholders are kept fully informed of progress, performance and any proposed variations in strategy or implementation</p> <p>5.5 Agreed variations to the treatment plan are introduced to accommodate changed circumstances or to achieve more effective outcomes</p> <p>5.6 Treatment tasks/activities are completed on time and within budget</p>
6. Establish and maintain productive working relationships	<p>6.1 Influence and support for the treatment strategy is built by cultivating relationships with key stakeholders</p> <p>6.2 Clear and accurate information is provided</p> <p>6.3 Differences of opinion and the views of others are respected</p> <p>6.4 Negotiations are kept focussed on key issues and moving forward towards resolution</p> <p>6.5 Conflict is resolved in a timely, constructive manner</p> <p>6.6 Agreements are adhered to and commitments met</p>
7. Review treatment strategy implementation	<p>7.1 Effectiveness of the treatment strategy is evaluated using agreed performance criteria</p> <p>7.2 Residual risk is identified and decisions made to accept this risk or re-examine treatment strategies</p> <p>7.3 Planning processes are reviewed to identify opportunities for improvement</p> <p>7.4 Project reporting requirements are completed</p> <p>7.5 Outcomes are disseminated to relevant stakeholders</p>

ELEMENT	PERFORMANCE CRITERIA
---------	----------------------

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- assess a range of alternatives, develop solutions and practical strategies that are 'outside the box'
- communicate clearly with a range of audiences
- compromise to achieve realistic/achievable outcomes
- enhance input/feedback through active listening and effective questioning
- harness cooperation, motivation and diversity of others
- interpret and critically analyse complex information
- liaise with key individuals, organisations, agencies
- manage projects
- negotiate and lobby persuasively
- prepare for, participate in and lead meetings to achieve effective outcomes
- resolve conflicts constructively
- think strategically

Required Knowledge

- Australian Standard AS/NZS 4360
- cost benefit analysis
- emergency management agencies, organisations, service providers and other key stakeholders
- emergency management best practice models for benchmarking during implementation and review
- emergency risk management guidelines (1999)
- evaluation methods
- government and budget processes, relevant public policy/programs
- ISO 9000 and 14000 series quality standards
- legislation, policy, budget development processes
- political context (parties, platforms, processes)
- problem solving and decision making techniques
- project budgeting
- project management techniques

REQUIRED SKILLS AND KNOWLEDGE

- protocols for the release of information and communicating with the media and public principles of negotiation, mediation, conflict resolution, incident de-escalation
- relevant legislative and regulatory framework and emergency management arrangements
- risk analysis and management
- state/territory emergency risk management guidelines
- strategic planning approaches
- structured and inclusive meeting procedures

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- establish/maintain a network of key contacts
- work collaboratively to secure stakeholder input, support and commitment
- develop effective processes for cooperative planning and implementation of complex treatment strategies
- develop and evaluate strategic options
- develop feasible and effective plans, tactics and activities to achieve treatment objectives
- coordinate and monitor multi-agency/service provider inputs to implementation of strategies
- address the need to vary plans
- address residual risk
- maintain records of progress, decisions, stakeholder input and audit trail
- manage project within resource allocation
- establish a project and see it through to produce treatment outcomes that have broad community and stakeholder support

Consistency in performance

Competency should be demonstrated in a range of

EVIDENCE GUIDE

Context of and specific resources for assessment

contexts throughout the life of a significant project, or during components of a number of projects

Context of assessment

Competency should be assessed facilitating the development and implementation of a treatment strategy plan that involves the cooperation of multi-agencies, organisations and/or service providers in the workplace or in a simulated workplace environment

Specific resources for assessment

Access to complex emergency risk management treatment strategy or strategies

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Drivers/triggers may include

Changes in community characteristics
 Changes in legislation, policies and disaster/emergency management plans
 Changes in insurance policies and premiums
 New sources of risk or changed perception of risk
 Planning deficiencies
 Recent emergency incident reports/debriefs, safety issues
 Recent judicial decisions
 Strategic and corporate plans

Practical constraints may include

Arrangements, roles and responsibilities set down in existing emergency management plans
 Availability of technical expertise, technology,

RANGE STATEMENT

	<p>equipment</p> <p>Budgets, time, availability and capability of people</p> <p>Land use planning</p> <p>Legislation covering emergency management, environmental management, safety standards, local government regulations</p> <p>Limited community knowledge of emergency risk management processes and benefits</p> <p>Political, social and cultural considerations</p>
Legislative, regulatory and organisational requirements may include	<p>Acts dealing with disasters, emergencies, occupational health and safety and the environment</p> <p>Land use planning</p> <p>Local government regulations</p> <p>Privacy</p> <p>Regulations for handling and transport of dangerous goods</p> <p>Safety standards</p>
Policies and procedures may include	<p>Agreements between agencies and/or organisations</p> <p>Emergency management arrangements specified in legislation or policies</p> <p>Existing disaster or emergency management plans</p> <p>Standard operating procedures, operational manuals</p>
Stakeholders may include	<p>Emergency services (eg. fire, police, SES, ambulance, recovery agencies)</p> <p>Event organisers (eg. concerts, car rallies, sport)</p> <p>Hospital/medical personnel and care givers</p> <p>Interest, community, professional and industry groups</p> <p>Local business people</p> <p>Local government (eg. elected representatives, shire engineers, community development officers)</p> <p>Managers of critical infrastructure (eg. telecommunications, mining, petrochemical and gas)</p> <p>Managers of high occupancy facilities (eg. shopping centres, high rise apartment/office blocks)</p>

RANGE STATEMENT

<p>Consultation strategies may include</p>	<p>Members of parliament and/or their advisers Providers of utilities (power, water, radio/TV) School staff State/territory/commonwealth agencies (eg. public works, human services, health, transport, natural resources, primary industry, environmental protection, emergency management) Tourist operators Venue operators Advertising in local media Broadcast facsimile and email messages, web sites Contacting individual organisations, professional bodies, unions and recreational/sport associations Distributing pamphlets Focus groups, workshops, surveys Initiating media interviews Letters and articles written for specific audiences Meetings with groups, key individuals and leaders of minority/ethnic/cultural groups Presentations to a variety of community groups; speaking at community functions Preparing media releases</p>
<p>Possible treatment strategies may include</p>	<p>All aspects of emergency management practices arising from considering prevention/mitigation, preparedness, response and recovery including:</p> <ul style="list-style-type: none"> • building codes • community education • community restoration, reconstruction • critical incident stress management, personal support and counselling • emergency management planning • financial support • land use management • legislation and regulation • mutual aid agreements • safety standards

RANGE STATEMENT**Assessment criteria for selecting treatment strategies may include**

- training and exercises
 - warning systems
- Avoidance, transfer and acceptance of risk
- Administrative efficiency
- Compatibility with other treatment options
- Continuity of effects
- Cost
- Creation of new risks
- Economic and environmental impacts
- Equity
- Impact on individual's rights
- Jurisdictional authority
- Leverage
- Political acceptability
- Potential to reduce risk
- Public and pressure group reaction
- Timing

Plans may include

- Aims and objectives of treatment strategies
- Constraints, contingencies and alternatives
- Monitoring and review procedures
- Multi agency framework for planning, communication, consultation, decision making, accountability, information management, project management
- Reporting requirements
- Resources required including their availability
- Roles, responsibilities of parties involved
- Strategies to achieve objectives (communication, consultation, marketing, training)
- Tactics to implement strategies
- Treatment activities, key tasks, timeframe

detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

- | | |
|---|--|
| <p>1. Identify objectives and scope by research and consultation</p> | <p>1.1 Objectives and scope are identified using emergency risk management <i>standards and guidelines</i>.</p> <p>1.2 <i>Stakeholder</i> roles and required inputs are determined in accordance with <i>policies and procedures</i>.</p> <p>1.3 Budget, timeframe and schedule for research and consultation are determined.</p> <p>1.4 Information about communities is obtained.</p> |
| <p>2. Identify and consult with stakeholders</p> | <p>2.1 Stakeholders are identified.</p> <p>2.2 Existing and potential liaison networks are identified and evaluated for relevance.</p> <p>2.3 Stakeholder networks are developed using a range of strategies.</p> <p>2.4 Communication and consultation are established.</p> <p>2.5 Communication options are selected to develop a communication plan.</p> |
| <p>3. Clarify roles and requirements with stakeholders</p> | <p>3.1 Stakeholders' roles and the need for their input are clearly defined and emphasised in seeking their cooperation.</p> <p>3.2 Stakeholders are informed of the aims, objectives, risk management context and structure within which they must operate.</p> <p>3.3 Stakeholders' needs are determined and conflicting needs identified and noted.</p> |
| <p>4. Develop risk criteria with stakeholders</p> | <p>4.1 Social, environmental, financial and timeframe needs are identified in consultation with stakeholders.</p> <p>4.2 Legal, technical and political considerations are identified in consultation with stakeholders.</p> <p>4.3 Reasons for, and selection of, criteria are negotiated with stakeholders and agreed upon.</p> <p>4.4 <i>Risk criteria</i> are recommended which take into account <i>practical constraints</i> and the community's</p> |

acceptance of risk.

4.5 Community expectations of acceptable risk are established.

5. Monitor and review

5.1 Context and evaluation criteria are monitored in accordance with policies and procedures.

5.2 Context and evaluation criteria are reviewed in accordance with standards and guidelines.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- stakeholder analysis
- communication and consultation in a group context
- facilitation of group processes
- negotiation
- problem solving
- project management
- research skills to conduct geographic, demographic and socio-economic analysis

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines
- legislative and regulatory requirements relevant to emergency risk management
- problem solving and decision making techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Stakeholders are comprehensively identified and consulted to establish a clear context, which includes objectives, scope and risk criteria.

Consistency in performance

Candidates should be expected to present evidence from at least two different contexts, one of which may be simulated.

Context of and specific

Context of assessment

resources for assessment

Evidence of competence in this unit may be collected in a simulated environment and a real environment, often as part of a larger project with concurrent assessment of other emergency risk management competencies.

Specific resources for assessment

For the demonstration of competence in this unit it will be necessary to participate in a real-world project.

Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.

Guidance information for assessment

This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning context.

This unit may be assessed with other units that address other parts of the emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Standards and guidelines may include:

- AS/NZS ISO 31000:2009, Risk management—Principles and Guidelines
- HB 327:2010, Communicating and consulting about risk
- ISO Guide 73:2009, Risk management—Vocabulary
- National Emergency, Management Committee (2010), National Emergency Risk Assessment Guidelines
- jurisdictional or organisational emergency risk management policies and procedures

Stakeholders may include:

- staff
- client groups
- decision makers
- members of the public

- community groups
 - industry groups
 - public and private sector organisations
 - non-government organisations
 - elected officials
- Policies and procedures*** may include:
- arrangements specified in legislation
 - organisational or jurisdictional emergency risk management policies or procedures
 - existing disaster plans, agreements or memoranda of understanding
- Information about communities*** may include:
- demographic measures
 - socio-economic measures
 - local economy and industry makeup and interdependencies
 - cultural makeup and mix
- Risk criteria*** may include:
- the nature and types of causes and consequences that can occur and how they will be measured
 - how likelihood will be defined
 - the timeframe(s) of the likelihood and/or consequence(s)
 - how the level of risk is to be determined
 - the views of stakeholders
 - the level at which risk becomes acceptable or tolerable
 - whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered
- Practical constraints*** may include:
- arrangements, roles and responsibilities set down in existing emergency management plans
 - availability of technical expertise, technology, equipment
 - budgets, time, availability and capability of people
 - land use planning policy, authority and regulation
 - legislation covering emergency management, environmental management, safety standards, local government regulations
 - limited community knowledge of emergency risk management processes and benefits
 - political, social and cultural considerations

Unit Sector(s)

Not applicable.

PUAEMR023 Assess emergency risk

Modification History

Release	TP version	Comments
1	PUA12 V1	First release.

Unit Descriptor

This unit describes the outcomes required to identify, analyse and evaluate risk to determine which risks need treatment and the treatment priorities.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to workers undertaking an emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAEMR022 Establish context for emergency risk assessment

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify risk	<p>1.1 <i>Sources of risk</i> are identified by considering the interaction of hazards, communities and <i>the environment</i>.</p> <p>1.2 <i>Elements at risk</i> are identified.</p> <p>1.3 <i>Stakeholders</i> are consulted throughout the risk assessment process.</p> <p>1.4 Risk statements describing consequences are generated.</p>
2. Analyse risk	<p>2.1 Risks are analysed by considering the likelihood of particular consequences occurring.</p> <p>2.2 The vulnerability of communities and/or environments is determined by analysing their susceptibility and resilience to risks.</p> <p>2.3 Risks are rated in accordance with agreed <i>risk criteria</i>.</p>
3. Evaluate risk	<p>3.1 Risks requiring additional analysis or treatment are determined.</p> <p>3.2 Tolerability and acceptability of risks are agreed with stakeholders.</p> <p>3.3 Risk treatments are prioritised using agreed risk criteria.</p>
4. Monitor and review	<p>4.1 Evaluated risks are monitored in accordance with <i>standards and guidelines</i>.</p> <p>4.2 Evaluated risks are reviewed in accordance with standards and guidelines.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- research skills to identify sources of risk to the social, built, economic and natural

environments

- analysis skills for qualitative and quantitative risk analysis
- workshop facilitation skills
- identification of stakeholders
- negotiation with stakeholders
- problem definition
- risk analysis
- use emergency risk modelling processes to estimate risk

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines
- risk identification tools
- format of risk statements and risk register
- structure of risk criteria and the application of scenario dynamics (how a hazard creates consequences)
- concepts of ‘credible consequence level’, likelihood rating, confidence rating, ‘as low as reasonably practicable’ principle
- application of spatial analysis techniques
- jurisdiction or organisational emergency risk management principles and guidelines
- problem solving and decision making techniques
- research, demographic and economic analysis techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Learners must demonstrate that they can apply an appropriate method to identify risk, produce meaningful risk statements and apply risk criteria in consultation with stakeholders.

Consistency in performance

Candidates should be expected to present evidence from at least two different contexts, one of which may be simulated.

Context of and specific resources for assessment

Context of assessment

Evidence of competence in this unit may be collected in a simulated environment and real environment, often as part of a larger project with concurrent assessment of other emergency risk management competencies.

Specific resources for assessment

For the demonstration of competence in this unit it will

be necessary to participate a real life project.

Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.

Guidance information for assessment

This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-life project, often in an action-learning context.

This unit may be assessed with other units that address the whole emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Sources of risk may include

- commercial and legal relationships
- economic systems and relationships
- human behaviour
- natural events
- built environment failures
- disease (plant, animal or human)
- political circumstances
- technology/technical issues, management activities and controls

The environment may include

- social environment (individuals, families and common interest groups that form whole communities)
- built environment (human-made assets that underpin the functioning of a community)
- economic environment
- natural environment

Elements at risk may include

- people
- buildings and civil engineering works
- infrastructure
- economic activities

- Stakeholders* may include
- public services
 - natural environment
 - staff
 - client groups
 - decision makers
 - members of the public
 - community groups
 - industry groups
 - public and private sector organisations
 - non-government organisations
 - elected officials
- Risk criteria* may include
- the nature and types of causes and consequences that can occur and how they will be measured
 - how likelihood will be defined
 - the timeframe(s) of the likelihood and/or consequence(s)
 - how the level of risk is to be determined
 - the views of stakeholders
 - the level at which risk becomes acceptable or tolerable
 - whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered
- Standards and guidelines* may include
- AS/NZS ISO 31000:2009, Risk management—Principles and Guidelines
 - HB 327:2010, Communicating and consulting about risk
 - ISO Guide 73:2009, Risk management—Vocabulary
 - National Emergency, Management Committee (2010), *National Emergency Risk Assessment Guidelines*
 - jurisdictional or organisational emergency risk management policies and procedures

PUAEMR024 Develop treatment options for emergency risk

Modification History

Release	TP version	Comments
1	PUA12 V1	First release.

Unit Descriptor

This unit describes the outcomes required to determine a range of treatment options which can be used to reduce emergency risk.

Application of the Unit

This unit applies to people who are part of a working group that develops treatment options during an emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

1. Identify treatment options

- 1.1 Risk treatment objectives are identified in consultation with ***stakeholders***.
- 1.2 Existing ***risk treatment options*** are identified through research and stakeholder consultation.
- 1.3 A range of potential risk treatment options are identified through research and stakeholder consultation.

2. Evaluate options

- 2.1 ***Evaluation methods*** are agreed with stakeholders.
- 2.2 Feedback on likely implications and impacts of treatment options is obtained from stakeholders.
- 2.3 Residual risks are assessed for tolerability or acceptance
- 2.4 Cost-benefit analysis is completed for each risk treatment option.

3. Recommend treatment options

- 3.1 Recommended options, including implementation responsibilities, are agreed in consultation with stakeholders.
- 3.2 Recommended options and residual risk are documented according to organisational ***policies and procedures***.
- 3.3 Recommended options are submitted for approval in line with organisational policies and procedures.

4. Develop treatment plan

- 4.1 Treatment options, resources required, milestones, budget, reporting procedures and roles and responsibilities for implementation are identified.
- 4.2 Communication and project management strategies are developed with stakeholders.
- 4.3 Implementation issues are identified and

contingencies developed where necessary.

- 4.4 An agreed treatment plan is documented and submitted for approval in accordance with organisational policies procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- Research and analysis skills to determine potential treatment options
- ability to negotiate and work effectively with stakeholder groups
- analytical techniques to determine residual risk
- analytical techniques to conduct benefit:cost analysis at an appropriate level

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines and AS/NZS ISO 31000:2009 *Risk management—Principles and Guidelines*
- legislative and regulatory requirements relevant to emergency risk management
- jurisdiction and organisational documentation and submission procedures
- analytical, problem solving and decision making techniques to facilitate evaluating residual risk and cost-benefit analysis
- geospatial databases and presentation options
- range of options for treating emergency risk

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Candidates must demonstrate an ability to work with stakeholders and generate an agreed list of recommended treatment options in an appropriate format.

Consistency in performance

Candidates should be expected to present evidence from at least two different contexts, one of which may be simulated.

Context of and specific

Context of assessment

resources for assessment

Evidence of competence in this unit may be collected in a simulated environment and real environment, often as part of a larger project with concurrent assessment of other emergency risk management competencies.

Specific resources for assessment

For the demonstration of competence in this unit it will be necessary to participate in a real-world project.

Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.

Guidance information for assessment

This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning project.

This unit may be assessed with other units that address other parts of the emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Stakeholders may include:

- staff
- client groups
- decision makers
- members of the public
- community groups
- industry groups
- public and private sector organisations
- non-government organisations
- elected officials

Risk treatment options may include:

- avoidance of the risk
- removing a risk source
- changing the likelihood of

- Evaluation methods* may include:
- an initiating event or source of risk occurring
 - a hazard impacting on elements at risk
 - changing the consequences of an identified hazard impact
 - sharing the risk
 - retaining the risk based on an informed decision
 - first-pass cost-benefit analysis
 - analysis of treatment effectiveness
 - potential to create new or secondary risks
 - stakeholder acceptability
 - legal, regulatory and compliance impact
- Policies and procedures* may include:
- arrangements specified in legislation
 - organisational or jurisdictional emergency risk management policies or procedures
 - existing disaster plans, agreements or memoranda of understanding

PUAEMR025 Manage risk treatment implementation

Modification History

PUAEMR025 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to communicate, facilitate and review implementation of selected risk treatments.

Application of the Unit

This unit applies to managers or members of project teams responsible for implementing all or part of a risk treatment plan. It recognises that the manager or project team will commonly not have direct responsibility for implementing parts of the risk treatment plan. Such managers or teams may be working at local, regional or state level within local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm implementation context	<p>1.1 Project <i>drivers/triggers</i>, risks, risk management context, treatment options, priorities and <i>practical constraints</i> are clarified.</p> <p>1.2 Applicable <i>policies and procedures</i> are identified.</p> <p>1.3 Key <i>stakeholders</i> are identified along with their potential interests, sensitivities, roles and responsibilities.</p>
2. Develop implementation plan	<p>2.1 Risk(s) to be treated and current relevance of treatment option(s) confirmed.</p> <p>2.2 Performance criteria for assessing the effectiveness of treatment implementation are established in consultation with stakeholders.</p> <p>2.3 Treatment actions, resources required, milestones, budget, reporting procedures and roles and responsibilities of project team members are identified.</p> <p>2.4 Implementation issues are identified and contingencies developed where necessary.</p> <p>2.5 An agreed treatment plan is documented and submitted for approval in accordance with organisational policies and procedures.</p>
3. Communicate the treatment plan	<p>3.1 Processes to effectively consult and communicate about implementation are selected.</p> <p>3.2 A consultation plan is developed and implemented.</p>
4. Facilitate treatment plan implementation	<p>4.1 Treatment tasks/activities are allocated in accordance with the implementation plan.</p> <p>4.2 Effective communication between working group members is maintained.</p> <p>4.3 Stakeholders are kept fully informed of progress, performance and any proposed variations in strategy or implementation.</p> <p>4.4 Agreed variations to the treatment plan are introduced to accommodate changed circumstances or to achieve more effective outcomes.</p>
5. Monitor and review treatment plan implementation	<p>5.1 A review process is established in consultation with stakeholders.</p> <p>5.2 Effectiveness of treatment activities, adequacy of</p>

resources, project progress and expenditure is monitored against plans, recorded and reported.

5.3 Implementation plans are adjusted as required following the review process.

5.4 Adjustments to implementation plans are communicated to stakeholders.

5.5 Residual risk is re-evaluated and a decision made whether to accept this risk or to re-visit the risk assessment.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- networking and relationship building
- ability to work effectively with stakeholder groups
- ability to apply a range of communication media and methods to communicate with stakeholders
- project planning and oversight
- budgeting and phasing to measure progress against targets

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines
- jurisdictional, organisational and operational responsibilities for implementing risk treatment options
- legislative and regulatory requirements relevant to implementing risk treatments
- jurisdiction and organisational documentation and reporting procedures
- project management techniques
- options for communicating with stakeholders
- analytical, problem solving and decision making techniques to facilitate monitoring progress against targets

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate

Candidates must demonstrate that they have developed criteria to monitor implementation progress, actually monitored and reported on progress, and communicated

competency in this unit

and consulted with stakeholders.

Consistency in performance

Candidates should be expected to present evidence from at least two different contexts, one of which may be simulated.

Context of and specific resources for assessment**Context of assessment**

Evidence of competence in this unit may be collected in a simulated environment and real environment, often as part of a larger project with concurrent assessment of other emergency risk management competencies.

Specific resources for assessment

For the demonstration of competence in this unit it will be necessary to participate in a real-world project.

Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.

Guidance information for assessment

This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning context.

This unit may be assessed with other units that address the whole emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Drivers/triggers*** may include:
- changes in community characteristics
 - changes in legislation, policies and disaster/emergency management plans
 - changes in insurance policies and premiums
 - new sources of risk or changed perception of risk
 - planning deficiencies

- Practical constraints*** may include:
- recent emergency incident reports/debriefs, safety issues
 - recent judicial decisions
 - strategic and corporate plans
 - arrangements, roles and responsibilities set down in existing emergency management plans
 - availability of technical expertise, technology, equipment
 - budgets, time, availability and capability of people
 - land use planning
 - legislation covering emergency management, environmental management, safety standards, local government regulations
 - limited community knowledge of emergency risk management processes and benefits
 - political, social and cultural considerations
- Policies and procedures*** may include:
- arrangements specified in legislation
 - organisational or jurisdictional emergency risk management policies or procedures
 - existing disaster plans, agreements or memoranda of understanding
 - local planning regulations, development controls and environmental plans
- Stakeholders*** may include:
- staff
 - client groups
 - decision makers
 - members of the public
 - community groups
 - industry groups
 - public and private sector organisations
 - non-government organisations
 - elected officials
- Performance criteria for assessing the effectiveness of treatment implementation*** may include:
- continuous monitoring of the maintenance of equity
 - continued involvement of stakeholders
 - cost effectiveness of treatment
 - evaluation of effectiveness in terms of actual risk reduction
 - the evaluation of the need for the redefinition of policy
 - a feedback mechanism
 - consideration of change that takes place over time

Unit Sector(s)

Not applicable.

PUAEMR026 Treat operational risk

Modification History

Release	TP Version	Comments
2	PUA12 V2.1	Editorial changes.
1	PUA12 V2	New unit.

Unit Descriptor

This unit describes the outcomes required to identify, plan and implement treatment options in order to reduce risk.

Application of the Unit

This unit applies to people working in a relatively simple and routine workplace in which they use the organisation's policy and procedures. They would normally have local supervisory/management responsibility and will apply known solutions to a variety of predictable problems.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAEMR027 Assess operational risk

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance Criteria describe the required performance

essential outcomes of a Unit of Competency.

needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Make risk decision	<p>1.1 Calculated level of risk is compared to the established <i>risk criteria</i> and determined to be acceptable or unacceptable in consultation with the supervisor.</p> <p>1.2 Risk that is determined as unacceptable is documented and noted for treatment.</p>
2. Identify and select treatment options	<p>2.1 <i>Treatment options</i> of known risks are identified and confirmed as contained in <i>organisational standards and guidelines</i> or supervisor's guidance.</p> <p>2.2 Treatment options under consideration are evaluated for <i>effectiveness</i> within the given context.</p> <p>2.3 Selected treatment options are documented and communicated in accordance with organisational policies and procedures.</p>
3. Implement treatment options	<p>3.1 <i>Treatment plans</i> incorporating selected options are implemented in accordance with organisational policies and procedures.</p> <p>3.2 Treatment plans are communicated in the workplace in accordance with organisational policies and procedures.</p>
4. Monitor and review risk and the process	<p>4.1 Effectiveness and efficiency of the treatment plan is <i>monitored</i>, reviewed and recorded in accordance with organisational policies and procedures to ensure compliance and validity.</p> <p>4.2 Residual risk is calculated and communicated to supervisors so that a decision can be made whether to accept this risk or to re-establish the risk management process.</p> <p>4.3 Treatments are adjusted and communicated following the review process.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicating effectively with personnel at all levels of organisation and risk management specialists
- preparing more detailed reports for a range of target groups including OHS or risk committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically treat risks and, where appropriate, access resources
- manage simple project implementation
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on risk
- undertaking basic research to access relevant information and data
- paying attention to detail when making observations and recording outcomes

Required Knowledge

- organisational policies, procedures and guidelines relevant to risk
- risk management terminology and language in accordance with relevant standards (risk, hazard, risk assessment, risk management and risk treatment)
- specified methods or tools endorsed by an organisation and provided for use in the identification and analysis of risk
- treatment options for risks relevant in the workplace
- team work principles and strategies
- basic project management strategies
- techniques for giving and receiving feedback in a constructive manner
- concept of common law duty of care
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- techniques/methods used to identify or analyse information
- verbal and non-verbal communication techniques including language style, active listening

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholders' involvement throughout the treatment process and that an informed analysis and selection of treatment options has been undertaken using the methodology and procedures approved by the organisation.

Consistency in performance

Competency should be demonstrated by gathering evidence over a range of workplace scenarios, using a variety of tools and methodology and should include the assessment of a variety of risks that may adversely impact on the organisation.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or under conditions that closely simulate the workplace.

Specific resources for assessment

Access to:

- organisational documentation
- relevant organisational standards
- appropriate tools and methods used within the organisation
- simulated or real-world workplace

Guidance information for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying the principles of treating operational risk, including coping with difficulties, irregularities and breakdowns in routine
- application of the principles of treating operational risk in a range of 3 or more contexts or occasions, over time

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and should include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Risk criteria*** may include:
- the nature and types of causes and consequences that can occur and how they will be measured
 - how likelihood will be defined
 - the timeframe(s) of the likelihood and/or consequence(s)
 - how the level of risk is to be determined
 - the views of stakeholders
 - the level at which risk becomes acceptable or tolerable
 - whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered
- Treatment options*** may include:
- avoidance of the risk
 - removing a risk source
 - changing the likelihood of
 - an initiating event or source of risk occurring
 - a hazard impacting on elements at risk
 - changing the consequences of an identified hazard impact
 - sharing the risk
 - retaining the risk based on an informed decision
- Organisational standards and guidelines*** may include:
- AS/NZS ISO 31000:2009 Risk management—Principles and guidelines
 - regulatory or legislative requirements
 - environmental protection and sustainability regulations
 - industry standards and codes of practice
 - organisational charter/business plan
 - organisational OHS, risk management or resilience

- policies or operating procedures
- Effectiveness** may include:
- benefits to the individual
 - benefits to the organisation
 - cost benefits resulting from the implementation of the treatment
 - cost of implementing the treatment option
- Treatment plans** may include:
- budgeting
 - expected outcome of treatments
 - performance measures
 - responsibilities
 - review process to be set in place
 - schedules
- Monitored** may include:
- critical observation
 - identification of changes over time
 - regular checking
 - regular recording

PUAEMR027 Assess operational risk

Modification History

PUAEMR027 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to identify and assess risk in an operational environment.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This competency applies to workers at a relatively simple and routine level, in which they use established organisational policy and procedures. Workers would normally have local supervisory or management responsibility and apply known solutions to a variety of predictable problems.

The unit covers the first four steps of the risk management process and provides the skills and knowledge required to conduct a risk assessment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish the risk context	<p>1.1 Objectives and scope are identified using organisational risk management standards and guidelines.</p> <p>1.2 Risk criteria are identified and confirmed as contained in organisational policies, procedures or supervisor guidance.</p> <p>1.3 Structure for the planning required to conduct a risk assessment is determined.</p> <p>1.4 Stakeholder aims and objectives are identified and recorded in accordance with workplace procedures and guidelines.</p>
2. Identify risk	<p>2.1 All possible sources of risk which may affect the situation or objectives are identified and recorded in consultation with stakeholders.</p> <p>2.2 Risks are identified using a specified methodology or tool in accordance with workplace procedures and guidelines.</p> <p>2.3 Risk statements describing consequences are generated.</p>
3. Analyse risk	<p>3.1 Risks are analysed by estimating the likelihood of particular consequences occurring.</p> <p>3.2 Levels of risk are determined, documented and communicated in accordance with organisational policies and procedures.</p>
4. Evaluate risk	<p>4.1 Levels of risk are prioritised for treatment.</p> <p>4.2 Calculated level of risk is compared to the established risk evaluation criteria, and communicated to supervisors.</p> <p>4.3 Risks are monitored and reviewed until appropriate treatment measures have been implemented.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicating effectively with risk management specialists and people at all organisational levels
- preparing more detailed reports for a range of target groups including OHS or risk committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically assess risks and, where appropriate, access resources
- analysing relevant workplace information and data, and make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (e.g. % change), and produce graphs of workplace information and data to identify trends and recognise limitations
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on risk
- undertaking basic research to access relevant information and data
- paying attention to detail when making observations and recording outcomes.

Required Knowledge

- organisational policies, procedures and guidelines relevant to risk
- risk management terminology and language in accordance with relevant standards
- specified methods or tools endorsed by an organisation and provided for use in the identification and analysis of risk
- team work principles and strategies
- techniques for giving and receiving feedback in a constructive manner
- concept of common law duty of care as applies in emergency risk management context
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- roles and responsibilities under OHS legislation of employees, including supervisors and contractors
- techniques/methods used to identify or analyse information
- verbal and non-verbal communication techniques including language style, active listening

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholder's involvement throughout the process and that an informed analysis of the risks has been undertaken using tools and methodology approved by the organisation.

Consistency in performance

Competency should be demonstrated by gathering evidence over a range of workplace scenarios, using a variety of tools and methodology and should include the assessment of a variety of risks that may adversely impact on the organisation.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or under conditions that closely simulate the workplace

Specific resources for assessment

Access to:

- organisational documentation
- relevant organisational standards
- appropriate tools and methods used within the organisation
- simulated or real-world workplaces

Guidance information for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying the principles of operational risk assessment, including coping with difficulties, irregularities and breakdowns in routine
- application of the principles of operational risk assessment in a range of 3 or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- observation
- portfolios

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisational risk management standards and guidelines may include:

- Standard AS/NZS/ISO 31000:2009 Risk Management—Principles and Guidelines
- regulatory or legislative requirements e.g. ohs act
- environmental protection and sustainability regulations
- industry standards and codes of practice
- organisational charter/business plan
- organisational ohs, risk management or resilience policies or operating procedures

Risk criteria may include:

- the nature and types of causes and consequences that can occur and how they will be measured
- how likelihood will be defined
- the timeframe(s) of the likelihood and/or consequence(s)
- how the level of risk is to be determined
- the views of stakeholders
- the level at which risk becomes acceptable or tolerable
- whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered

Structure for the planning may include:

- documentation required
- analysis tools which are required to conduct the assessment
- approach taken to conduct the assessment
- depth of assessment

Specified methodology or tools may include:

- a risk matrix
- analysis of risk registers
- brainstorming
- business continuity planning
- examining any available data e.g. audit

results/incident reports

- expert judgement
- focus groups
- nomogram
- scenario analysis

PUAEMR030 Manage and evaluate emergency management exercises

Modification History

PUAEMR030 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to manage and evaluate activities which exercise elements of emergency management arrangements.

Application of the Unit

This unit applies to people who are responsible for implementing and evaluating pre-designed emergency management exercises. Emergency management exercises may be used in any context where there is a requirement to plan for, or manage an emergency. The exercise scale can range from a small activity in a volunteer emergency response unit to a major evacuation exercise for an industrial plant. The skills in this unit can be applied to any context in which an emergency management exercise is appropriate.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not applicable. Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to manage the exercise	1.1 Exercise <i>documentation</i> reviewed to confirm governance and <i>stakeholder</i> requirements. 1.2 Exercise aim, objectives, activities and evaluation plan are confirmed. 1.3 Relevant permissions, authorities, clearances and approvals are identified and confirmed. 1.4 <i>Logistic requirements</i> are identified and organised. 1.5 Communication plan is designed and implemented in consultation with stakeholders.
2. Manage exercise activities	2.1 Exercise management team is formed where required. 2.2 Communication and consultation is established with <i>activity personnel</i> and maintained throughout the conduct of the exercise. 2.3 Exercise site preparation and familiarisation are ensured in accordance with the exercise plan. 2.4 Briefings are prepared and delivered to stakeholders reflecting exercise objectives and activities. 2.5 Confirmation and management of logistic requirements required to conduct exercise activities is ensured. 2.6 The exercise plan is used to initiate and facilitate the conduct and direction of the exercise. 2.7 Risk is managed throughout the exercise.
3. Evaluate outcomes against exercise objectives	3.1 Post-exercise debriefings are conducted and feedback is gathered. 3.2 Exercise feedback is collated, recorded, analysed and issues identified. 3.3 An <i>exercise report</i> , including recommendations, is prepared to organisational standards and distributed to stakeholders.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- manage small-group activities
- build effective networks and relationships
- work effectively in a group setting
- consult with stakeholders
- manage and direct activity personnel
- plan and deliver briefings and debriefings
- manage the pace and intensity of the exercise
- manage risk and safety
- gather and analyse feedback

Required Knowledge

- exercise management concepts and principles
- educational principles underpinning the design of objectives and linking those to activities
- legislative, regulatory and insurance arrangements relevant to using resources, such as land, buildings, equipment, staff and volunteers
- relevant organisational policies and procedures (such as legislation relevant to the operation/ incident/response; legislation relevant to the organisation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- problem solving and decision making techniques
- project management principles
- project management principles
- risk and safety management principles
- budgeting and logistic management principles

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- ensure all permissions, authorities, clearances and approvals are obtained,

- ensure all resources are available for the exercise, and
- the pace of the exercise proceeds appropriately to achieve the objectives

Consistency in performance

Candidates should be expected to present evidence of managing two different types of exercise, including at least one exercise that requires multi-agency or organisation input.

Context of and specific resources for assessment

Context of assessment

This competency cannot be assessed in a simulated environment.

Specific resources for assessment

- Access is required to real-life exercises, including supporting resources.

Method of assessment

This unit contains transferable skills, such as communication, consultation, and logistic management skills that can be applied to managing an emergency management exercise. Assessors may use formative assessment strategies in a simulated environment to contextualise underpinning knowledge.

Summative assessment requires application of the unit to manage exercises in the workplace. Evidence of performance can be gathered by:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Documentation may include:

- activity inputs (general and special ideas)
- activity notification
- activity management checklists
- assessor documentation

- evaluation checklist
- evidence collection templates
- exercise injects
- general instruction
- incident action plans
- permissions and approvals risk assessments
- risk action plans
- safety instructions
- specific inputs
- timetable/schedule of events
- umpire documentation

Stakeholder may include:

- staff
- client groups
- decision makers
- members of the public
- community groups
- industry groups
- public and private sector organisations
- non-government organisations
- elected officials

Logistic requirements may include:

- catering
- equipment
- facilities
- finance and accounting procedures
- transport
- accommodation
- guest or specialist speaker(s) or presenters
- first aid and medical supplies and personnel
- exercise management personnel
- role players
- participants

Activity personnel may include:

- exercise management staff
- exercise evaluation staff
- casualty simulation staff
- role players
- public information staff
- participants' management

Exercise report may include:

- executive summary
- acknowledgements
- exercise aim and objectives
- introduction

- exercise scenario
- sequence of events
- exercise critique (relating observations and feedback to the objectives)
- summary
- recommendations
- attachments (exercise management team, participating organisations and volunteers, referee reports, debrief notes)

Unit Sector(s)

Not applicable.

PUAEMR031 Design emergency management exercises

Modification History

PUAEMR031 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to design, develop or modify activities that exercise elements of emergency management arrangements.

Emergency management exercises are used to test emergency plans, practise responding to an emergency, develop and/or practise emergency management skills, build motivation for emergency management personnel, and/or measure an organisation's ability to manage an emergency.

Application of the Unit

This unit applies to workers with the responsibility for designing emergency management exercises. It does not cover the skills and knowledge for implementing those designs.

Emergency management exercises can be used in any context where there is a requirement to plan for, or manage an emergency. The exercise scale can range from a small activity in a volunteer emergency response unit to a major evacuation exercise for an industrial plant. The design skills in this unit can be applied to any context in which an emergency management exercise is appropriate.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance Criteria describe the required performance

essential outcomes of a Unit of Competency.

needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine exercise purpose	<p>1.1 Exercise <i>stakeholders</i> are identified and engaged.</p> <p>1.2 Exercise governance arrangements are confirmed.</p> <p>1.3 Exercise aim is identified in consultation with stakeholders.</p> <p>1.4 <i>Exercise objectives</i> that meet the identified aim are determined.</p> <p>1.5 <i>Exercise focus</i> is determined, based on operational outcomes, results of training needs analysis, previous exercises and evaluation reports.</p>
2. Design and plan exercise activities	<p>2.1 Planning team is established where required.</p> <p>2.2 Governance and planning meetings are held, agreements and decisions are made, and outcomes are communicated to stakeholders.</p> <p>2.3 <i>Components of the exercise program</i> are identified, developed and documented in the exercise plan.</p> <p>2.4 <i>Exercise style</i> and activities consistent with exercise objectives are selected in consultation with stakeholders.</p> <p>2.5 <i>Design planning processes</i> are undertaken with stakeholders to meet exercise objectives and components.</p> <p>2.6 Exercise documentation is prepared.</p>
3. Assess exercise risks	<p>3.1 Risk and safety considerations are included in planning process.</p> <p>3.2 Activities which mitigate/reduce risks associated with conducting exercise activities are designed and included.</p> <p>3.3 Exercise risk and safety management plan is prepared.</p>
4. Plan resource allocation	<p>4.1 <i>Resources</i> to support the exercise are identified and secured.</p> <p>4.2 Exercise host is identified and commitment to</p>

- achieving exercise objectives is secured.
- 4.3 Appropriate authorisation(s) to use resources are obtained and documented.
- 4.4 Availability and timeframes for use of resources is agreed by appropriate authorities.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- manage small-group workshops and activities
- build effective networks and relationships
- work effectively in a group setting
- liaise and communicate with other agencies
- plan and deliver briefings and debriefings
- prepare exercise documentation
- interpret organisational needs to develop measurable, achievable objectives
- research skills to build scenarios and exercise inputs

Required Knowledge

- exercise management concepts and principles
- educational principles underpinning the design of objectives and linking those to activities
- incident management principles
- legislative and regulatory arrangements relevant to using resources, such as land, buildings, equipment and volunteers
- problem solving and decision making techniques
- project management principles
- risk and safety management principles
- budgeting and logistic management principles
- jurisdictional emergency management arrangements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for Assessment must confirm the ability to:

assessment and evidence required to demonstrate competency in this unit

- bring together an effective exercise design and planning team
- facilitate the construction of realistic, meaningful and safe activities that address the exercise aim and objectives

Consistency in performance

Candidates should be expected to present evidence from at least two different contexts or exercise styles, including at least one exercise that requires multi-agency or organisation input and of which one may be simulated

Context of and specific resources for assessment**Context of assessment**

Competency should be assessed on-the-job or in a simulated workplace environment.

Specific resources for assessment

Access is required to a real-life exercise design project.

Method of assessment

Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-life project, often in an action-learning context.

Assessment may occur in a work environment or in a simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Stakeholders may include:

- staff
- client groups
- decision makers
- members of the public

- Exercise objectives* may include:
- community groups
 - industry groups
 - public and private sector organisations
 - non-government organisations
 - elected officials
 - assessing and/or demonstrating the capability of individuals, teams, systems and/or arrangements
 - assessing or auditing system(s) performance
 - developing new skills
 - evaluating emergency management plans
 - evaluating individuals/teams/facilities/systems
 - evaluating risk treatment strategies
 - exploring issues
 - improving team cohesion
 - meeting legislative or regulatory requirements
 - practising skills, systems or procedures
 - promoting awareness
 - sharing information
 - validating training objectives or learning outcomes
- Exercise focus* may include:
- improving systems, plans or arrangements
 - developing/training participants
 - sharing information
 - testing or auditing systems, plans, arrangements, facilities, and/or individual or team competencies
- Components of the exercise program* may include:
- exercise name
 - authorities, permissions and governance
 - scope or purpose statement
 - aim and objectives
 - activity plan
 - detailed schedule of activities
 - location (s)
 - risk and safety management plan
 - budget and logistics plan
 - evaluation/assessment plan
 - evidence collection tools/templates
 - debrief plan
- Exercise style* may include:
- case study
 - discussion/desktop exercises
 - hypothetical exercise/scenario analysis
 - distributed interactive exercise
 - field exercise
 - functional centre exercises

Design planning processes may include:

- role play
- Determining assessment and performance criteria
- planning briefings and debriefings
- developing contingency plans
- scenario and activity design
- developing background information and exercise inputs
- determination of activity management structure
- developing documentation
- issuing notifications to affected stakeholders
- identifying and managing risks
- identifying and securing resources
- meetings
- developing and reviewing key performance indicators
- scoping of agencies participating and the level at which they are participating
- seasonal weather considerations
- agreeing on duration of exercise activities

Exercise documentation may include:

- Activity inputs (general and special ideas)
- activity notification
- activity management checklists
- assessor documentation
- evaluation checklist
- evidence collection templates
- exercise injects
- general instruction
- incident action plans
- meeting details
- permissions and approvals
- risk assessments
- risk action plans
- safety instructions
- specific inputs
- timetable/schedule of events
- umpire documentation

Resources may include:

- agency guidelines/instructions
- catering
- equipment
- exercise staff
- facilities
- finance

- first aid personnel
- guest/specialist speaker
- medical supplies and personnel
- personnel
- presenter
- responders or victims with experience of an emergency
- response guide
- safety advisor
- transport
- volunteers
- welfare support

PUAOHS002B Maintain safety at an incident scene

Modification History

Release	TP version	Comments
3	PUA12 V2.1	Editorial changes.
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency to recognise potential health and safety risks and take action to eliminate or control those risks at incident scenes, to prevent injury to self, other personnel or members of the public.

Application of the Unit

This unit applies to all public safety workers attending an incident scene, and links to the individual's responsibility to maintain personal safety and to be aware of how actions affect the safety of others, including team members, other agency workers, and general public.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR215 Prevent Injury (Fire sector specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance Criteria describe the required performance

essential outcomes of a Unit of Competency.

needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine hazards at incident site	<p>1.1 Issues affecting safety of self and other personnel are established by identification of <i>hazards</i> and assessment of <i>risks</i>, and by liaison with others at the scene.</p> <p>1.2 Relevant operational safety procedures are implemented in accordance with organisation's policies.</p> <p>1.3 Duties are undertaken in line with organisational health and safety codes of practice and <i>relevant legislation</i>.</p>
2. Implement hazard controls at incident scene	<p>2.1 Hazards are identified and mitigation procedures are selected in line with work instructions and procedures.</p> <p>2.2 Hazardous situations rectified where possible and reported and/or recorded according to organisation's policies and procedures.</p> <p>2.3 Changes in situation and/or conditions are reported immediately to <i>designated person</i>.</p> <p>2.4 <i>Hazard controls</i> are monitored and communicated to relevant personnel to ensure continuing effectiveness.</p> <p>2.5 Hazard control and mitigation measures are implemented with minimum damage to the environment, while maintaining safety of self and others.</p> <p>2.6 Incident/accident scene is effectively secured to preserve the scene and maintain <i>public safety</i> in line with legislative requirements.</p>
3. Maintain personal safety	<p>3.1 <i>Personal protective clothing and equipment</i> is selected and checked according to organisational procedures to ensure it is operational prior to entry into incident situation.</p> <p>3.2 Personal protective clothing and equipment</p>

ELEMENT	PERFORMANCE CRITERIA
	appropriate to dealing with the hazard is worn/fitted and used in accordance with organisation's policies and procedures and manufacturer's guidelines.
	3.3 Water and food intake, rest breaks and shelter requirements are maintained.
	3.4 <i>Survival technique strategies</i> are implemented in accordance with organisation's policies and guidelines.
4. Contribute to maintaining safety of other work group members	4.1 Impact of own actions on safety of others is recognised.
	4.2 Contact is maintained at all times with other work group members.
	4.3 Signals are correctly used, interpreted, confirmed and acted upon in a timely manner.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate non-verbally and verbally
- follow procedures and instructions
- record information
- use communication equipment
- work with others in a team situation

Required Knowledge

- accidents and incidents
- commonly encountered hazards and procedures and safety precautions to prevent injury on encountering various hazards
- employee responsibilities and obligations
- food intake
- hazards
- heat induced illness - factors leading to prevention
- injuries
- labelling and storage of hazardous substances
- manual handling hazards
- means of relaying warnings to other personnel
- methods of hazard control and reporting
- organisation's occupational health and safety policy

- problems associated with insufficient water intake
- procedures for investigating injuries
- procedures for participating in occupational health and safety arrangements
- procedures for reporting hazards
- protection
- relevant standard operating procedures
- respiratory system - functions
- rest breaks
- State and Territory occupational health and safety requirements
- survival techniques for various situations
- symptoms and treatment
- techniques and aids
- use and limitations of relevant protective clothing and equipment

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in maintaining personal safety and safety of others.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

A real life incident, exercise or simulation, or series of tasks are required to demonstrate competence in this unit. This may involve setting scenarios to be completed either individually or as a member of a team. Written or verbal questions may be used as supporting evidence.

Specific resources for assessment

A range of protective clothing and equipment may be required.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Working environment** may be:
- hazardous
 - unpredictable
 - subject to time pressure
 - chaotic and expose responders to risk
- Public Safety workplaces** include:
- any location where a Public Safety incident occurs
- Response situation** include:
- single and multi agency response situations
- Hazards** include:
- all potential sources of injury or damage to property or the environment including identified and potential hazards to persons
 - equipment or the environment
- Risk** is:
- the likelihood of injury or damage occurring and the potential consequences of any injury or damage
- Incidents** may include:
- a variety of natural or man made events including but not limited to rescues and extrications
 - flood
 - storm
 - tempest
 - natural disaster
 - vehicle
 - aircraft
 - rail
 - industrial
 - civil defence
 - fires:
 - structural
 - wild
 - prescribed burning
 - search and rescue :
 - urban
 - rural
 - sea
 - hazardous materials and dangerous goods
- Hazards** may be identified by:
- scene assessment
 - visual inspections
 - plan reviews
 - recognising hazard warnings
 - accessing data bases
 - interviewing others at scene
 - seeking expert advice

- Others at scene*** may include:
- organisational personnel
 - personnel from other organisations
 - general public
- Hazardous materials*** may include:
- thermal
 - mechanical
 - explosives
 - toxic
 - corrosive
 - asphyxiant
 - radiation
 - etiological hazards
 - mutagenic materials
- Biological hazards*** may include:
- bacteria
 - viruses
 - fungi and yeasts
 - including exotic organisms
- Physical hazards*** may include:
- noise
 - slippery surfaces
 - poor visibility
 - smoky environments
 - fallen/falling objects
 - fatigue
- Electrical hazards*** may include:
- pole fires
 - electrical fires
 - electricity in damaged/burning structures
 - energised vehicles/structures due to downed wires
 - photovoltaic generation systems
- Manual handling hazards*** may include:
- heavy objects
 - content and shape of containers
- Environmental hazards*** may include:
- temperature
 - darkness
 - fire
 - snow
 - floods
 - winds
 - rain
 - hail
 - flora
 - fauna
 - postural restrictions and access
 - terrain

Hazard control measures
may include:

- traffic
- erection of barriers
- establishment of control zone
- use of spill clean up kits
- use of electrically insulated tools and equipment
- vehicle protection hoses and devices
- life support equipment (heat radiation shielded crew cabin
- vehicle cabins with/without sprays)
- entry control procedures to hazardous areas
- decontamination
- isolation of electricity supply
- state or territory occupational health and safety acts and regulations

Relevant legislation may include:

Personal protective clothing and equipment may include:

- breathing apparatus
- personal lines
- air lines
- personal distress units
- respiratory protection
- protective hoods
- goggles
- hearing protectors
- sunscreen
- chemical protective clothing
- personal flotation devices
- wet suits
- turnout uniform
- gloves
- hard hat
- safety boots
- overalls
- chainsaw chaps
- bullet proof vests
- firearms
- batons
- handcuffs
- atmospheric monitoring equipment
- meteorological equipment
- radiation monitoring equipment
- oxygen meters
- flammable gas detectors

Hazard control equipment
may include:

Reporting may include:

- verbal
- written reports
- completing standard forms
- logs
- sitreps
- note taking
- logging entry to hazardous areas

Designated person may include:

- supervisor
- team leader
- workplace occupational health and safety representative
- officer in charge

Survival strategies which may be applied in:

- buildings
- wildfire situations
- water
- extreme heat or cold

Factors which may require monitoring may include:

- traffic
- weather conditions
- vegetation type
- spectators
- temperature
- structural integrity
- relative humidity
- slope
- terrain
- water supply/pressure
- fire development
- stream flows
- suspect atmospheres

Contact with other personnel may include:

- visual
- vocal
- touch
- radio
- audible warnings
- signalling

PUAOPE013A Operate communications systems and equipment

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to transmit and receive communications in routine and operational situations using the organisation's communications systems and equipment.

Application of the Unit

This unit applies to a person who is required to operate an organisation's communications systems and equipment in support of the tasks they are undertaking. This work may occur either in the field or from a facility.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit

Performance Criteria describe the required performance needed to demonstrate achievement of the element.
Where ***bold italicised*** text is used, further information is

of Competency.

detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use communications systems and equipment	1.1 <i>Communications equipment</i> and techniques including <i>verbal communications</i> and <i>voice procedures</i> , are selected to best meet the task, context and needs of the situation 1.2 Equipment is operated safely to support communications consistent with organisational policies and procedures 1.3 <i>Communications system</i> is correctly utilised to facilitate transmission and reception
2. Transmit and receive communications	2.1 Information is transmitted concisely and clearly to facilitate accurate reception of the message in accordance with organisational policies and procedures 2.2 Contact is acknowledged, communication is confirmed and action is initiated 2.3 Communication faults and deficiencies are reported according to organisational policies and procedures 2.4 Alternative communications strategies are employed according to organisational procedures to address identified faults and deficiencies in communication 2.5 Communication is processed and recorded in accordance with organisational policies and procedures
3. Maintain communications equipment	3.1 Communications equipment is inspected to ensure operational readiness 3.2 Fault finding techniques are applied and basic maintenance is conducted according to organisational policies and procedures 3.3 Faulty equipment is identified and noted for repair, and documentation is completed in accordance with organisational procedures

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- maintain communications equipment according to organisational procedures
- operate the different communications equipment required by the organisation
- report communication faults and deficiencies according to organisational procedures
- use verbal communication procedures consistent with the organisation's communications system
- utilise the organisation's communications processes and systems

Required Knowledge

- organisational policies and procedures relevant to the operation of communications equipment (such as relevant legislation; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- organisation's communications system
- range of communications equipment available to the organisation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- use communications equipment under non-operational and operational conditions
- accurately transmit and receive communications using the organisation's communications systems and equipment.

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in an operational environment in an industry-approved multi-agency simulated workplace environment.

Specific resources for assessment

Method of assessment

Access is required to:

- relevant communications equipment.

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment.

Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Communications equipment
may include:

- Computers
- Facsimiles
- Pagers
- Radio
- Signalling devices
- Telephones (mobile, landline and satellite)

Verbal communications procedures
may include:

- Call signs
- Coded messages
- Emergency procedures
- Phonetic alphabet
- Pro-words
- Use of abbreviations

Voice procedures
may include:

- Corrections
- Pitch
- Repetitions
- Rhythm

Communications systems
may include:

- Sentences
- Speed
- Volume
- Communication protocols
- Communications software
- Organisation's networks
- Verbal communication procedures

Unit Sector(s)

Not applicable.

PUAOPE015A Conduct briefings and debriefings

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to lead and manage a briefing and a debriefing.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to people who are required to conduct briefings and debriefings in operational and non-operational situations in a range of environments.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit

Performance Criteria describe the required performance needed to demonstrate achievement of the element.

of Competency.

Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare for the briefing and debriefing	<p>1.1 <i>Content and format</i> for briefing and debriefing are determined.</p> <p>1.2 Briefing and debriefing plan is prepared in accordance with organisational policies and procedures.</p> <p>1.3 <i>Relevant personnel</i> involved in the <i>activity</i> are identified and informed of briefing and debriefing requirements.</p> <p>1.4 <i>Safe and appropriate location</i> for the briefing and debriefing is selected.</p>
2. Conduct the briefing and debriefing	<p>2.1 Purpose and structure of the briefing and debriefing is outlined to incident personnel.</p> <p>2.2 Understanding is sought and clarifications are provided, where required.</p> <p>2.3 Contributions from personnel during the debriefing and evaluation by personnel of their anticipated or actual roles in the activity is encouraged.</p> <p>2.4 Briefing and debriefing is <i>conducted</i> in accordance with organisational policies and procedures.</p> <p>2.5 Briefing and debriefing <i>checklist</i> is used as appropriate.</p>
3. Conclude the briefing and debriefing	<p>3.1 Contributions of personnel are acknowledged in a positive way.</p> <p>3.2 <i>Briefing and debriefing follow-up action</i> is identified and acted upon in a timely manner.</p> <p>3.3 Debriefing activity is reviewed against the policies, practices and training of the organisation to identify opportunities for continuous improvement and to identify lessons learnt.</p> <p>3.4 Briefing and debriefing findings are summarised and recorded, if appropriate, in a format suitable for <i>subsequent action</i> by appropriate personnel.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate clearly in a group setting
- lead and manage group processes
- prepare briefing and debriefing plans
- provide feedback and encourage contributions from group members

Required Knowledge

- organisational policies
- organisational procedures for activity briefing and debriefing
- practices and training processes in relation to activity

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- communicate effectively with personnel
- elicit and encourage contributions to the briefings and debriefings in a constructive and positive way

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed conducting briefings and debriefings in a variety of actual and/or simulated workplace contexts.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified

assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment.

Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Content and format for briefing and debriefing may include:

- Collaborative
- Descriptive illustrative
- Facilitator led
- Level of language used
- Predetermined (SMEAC)
- Problem based

Briefing and debriefing plan may include:

- Appropriate incident information collected prior to undertaking operational activities
- Location
- Methodology
- Participants
- Purpose
- Subject matter
- Timing

Organisational policies and procedures may include:

- Briefing and debriefing formats
- Legislation relevant to the operation/incident/response
- Legislation relevant to the organisation
- Operational, corporate and strategic plans
- Operational performance standards
- Operational policies and procedures
- Organisational personnel and occupational health and safety practices and guidelines
- Organisational quality standards

- Organisation's approach to environmental management and sustainability
 - Contractors
 - Local, state/territory and federal government employees
 - Operations personnel
 - Support personnel
 - Volunteers
 - Other agency personnel
 - Incidents
 - Meetings
 - Public safety campaigns
 - Ambient conditions (noise, light, smell)
 - Distractions
 - Timing of the briefing and debriefing which may be before, during or following an activity
 - Weather
 - Whether briefing and debriefing is under operational or non-operational conditions
 - After a meeting/event
 - As soon as possible following an incident
 - At convenient time after the incident
 - At regular intervals
 - At shift change over
 - Immediately after the incident
 - Prior to undertaking training
 - Prior to undertaking workplace projects and other work related activities
 - When incident personnel have been relieved
 - When personnel return to their home base
 - When significant changes are anticipated at an incident
 - Control and command
 - Communications
 - Damage
 - Equipment and plant
 - Fatalities
 - First aid and medical
 - Incident background
 - Incident response
 - Injuries
 - Loss
- Relevant personnel** may include:
- Activity** may include:
- Safe and appropriate locations** may vary according to:
- Briefing and debriefing** may be conducted:
- Briefing and debriefing checklist** may include:

- Resources committed to the incident
 - Strategies to improve response
 - Stress
 - Supporting organisations
 - Welfare
- Briefing and debriefing follow-up action* may include
- Action taken to address issues identified
 - Informing participants on the outcomes of the debriefing
- Subsequent action* may include
- Reporting to appropriate supervisor or agency
 - Reviewing procedures

PUAPOLFC003B Detect, record and collect physical evidence

Modification History

Release	TP version	Comments
3	PUA12 V1.1	Unit Descriptor revised.
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to process activities involved in recording and collecting physical evidence during *incident/crime scenes* and *laboratory examinations*.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Detecting, recording and collecting physical evidence is of the utmost importance and can be applied in various contexts within incident/crime scenes and laboratory examinations.

This unit is relevant for all aspects of handling physical evidence.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Detect and record physical evidence

- 1.1 ***Physical evidence is detected*** using observation techniques and appropriate technological methods.
- 1.2 Physical evidence is collected to prevent contamination or loss.
- 1.3 Samples collected are sufficient in quantity, where possible, to allow all potential examinations/analysis to be carried out.
- 1.4 Samples collected are sufficient to represent the ***natural variation*** that occurs in the physical evidence.
- 1.5 ***Control reference samples*** are collected, where available and appropriate.
- 1.6 Documented record of the physical evidence is produced in line with agreed agency procedures.

2. Collect physical evidence

- 2.1 Physical evidence is recorded prior to examination to ensure continuity and accuracy.
- 2.2 ***Recording methods*** are identified to document the physical evidence in accordance with quality system requirements and within resource limitations.
- 2.3 Latent evidence is ***collected***/detected by physical or chemical means.

3. Package physical evidence

- 3.1 Items are ***packaged and stored*** to maintain continuity and prevent degradation or contamination.
- 3.2 Physical evidence is packaged in accordance with occupational health and safety (OH&S) guidelines.
- 3.3 Details of evidence collected are entered in case notes and where appropriate in the exhibit register to maintain continuity.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse, make decisions and solve problems in responding to a range of physical evidence contexts including the systematic examination of items of physical evidence
- collect, package and preserve specific evidence types
- communicate in writing clearly and unambiguously
- handle exhibits and preserve continuity of evidence
- maintain operational safety
- manage resources and time effectively
- use specialised evidence recording equipment as required

Required Knowledge

- application and potential limitations of forensic investigative techniques
- legislative, policy, and quality system context in which forensic examinations are conducted
- legislative, policy, and quality system requirements for search and the seizure of physical evidence
- legislative, policy, and quality system requirements for collecting, preserving continuity and disposing of exhibits
- legislative, policy and quality system requirements for the security, protection and preservation of the evidence
- OH&S practices to be followed when recording, collecting and packaging physical evidence
- range of techniques available for the recording, collecting, packaging and preserving physical evidence
- required forensic documentation for the recording and collection of physical evidence
- role and functions of other forensic discipline specialists in the recording, collection, preservation and continuity of physical evidence

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate

Assessment must confirm the ability to:

- maximise the potential evidentiary value of the exhibit

competency in this unit

Consistency in performance

Competency should be demonstrated over time and across a range of workplace or simulated situations.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job or in a simulated work environment.

This unit must be assessed against the relevant discipline such as Crime Scenes, Fingerprints, Documents, Firearms, Toolmarks, Fire and Explosion, Criminalistics or Biology.

Competency in this unit in one particular discipline does not imply competence in any other forensic discipline in this same unit.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Incident/crime scenes may

- Civil investigations

include:

- Controlled drug deliveries
- Criminal investigations
- Disasters
- Drug substitutions
- Fire and explosions
- Industrial accidents
- Search of persons/evidence
- Searches and evidence collection
- Sudden deaths
- Special events
- Vehicle collisions
- Vehicle identification

Laboratory examinations
may include:

- Document examination
- Fingerprint development/enhancement/examination
- Firearm examinations
- Motor vehicle examinations
- Shoeprint development/enhancement/examination
- Toolmark examinations
- Trace evidence examinations

Physical evidence may
include:

- Any and all objects
- Liquid or gas including the relationship between all such objects
- Living or inanimate objects
- Objects gross or microscopic in size
- Solid
- Tyremarks, shoemarks, toolmarks, fingerprints, fibres, biological tissue, blood stain analysis, vehicle examinations, paint, clothing, fire debris and documents

Detection methods may
include:

- Chemical
- Optical
- Physical

Natural variation refers to:

- Diversity of characteristics that occurs in all items of physical evidence

Control/reference samples
refers to:

- Control samples which represent background contaminants
- Samples collected from a known source (such as elimination fingerprints, hairs from the victim and suspect)

Recording methods can be:

- Audio recording
- Computer generated data
- Digital imaging

- Hand written notes
 - Global positioning system (GPS)
 - Photographic
 - Physical capture
 - Sketch plan
 - Video recording
- Evidence collection methods*** may include:
- Hand picking (including use of forceps, gloves)
 - Swabbing
 - Sweeping
 - Tape lifting
 - Vacuuming
- Packaging and storing to maintain continuity and prevent degradation or contamination*** may include consideration of:
- Drying of wet exhibits
 - Exhibit labels
 - Packaging medium
 - Physical nature of exhibit
 - Storage temperature
 - Tamper evident seals

PUAPRO001B Promote a learning environment in the workplace

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency to promote a workplace learning environment in which work and learning are integrated to support the achievement of individual and organisation objectives.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to all Public Safety workers who have leadership roles in their organisation, but is particularly relevant to those workers with supervisory or managerial responsibilities for teams.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Create learning opportunities

- 1.1 Workplace environments which facilitate learning are developed and supported.
- 1.2 Learning plans are developed as an integral part of individual/team performance plans.
- 1.3 Learning plans reflect the diversity of learning styles, development needs and ***learning opportunities***.
- 1.4 Individual/team access to, and participation in, learning opportunities is facilitated.
- 1.5 Consultation with training and development specialists results in the planning and provision of learning which enhances individual, team and organisation performance.

2. Facilitate and promote learning

- 2.1 Workplace activities are used as opportunities for learning.
- 2.2 Coaching and mentoring is used to develop workplace knowledge, skills and attitudes.
- 2.3 The benefits of learning are shared with others in the team/organisation.
- 2.4 Workplace achievement is recognised by timely and appropriate recognition, feedback and rewards.

3. Monitor and improve learning effectiveness

- 3.1 Performance of individuals/teams is monitored to determine the type and extent of additional work based support.
- 3.2 Feedback from individuals/teams is used to identify and introduce improvements in future learning arrangements.
- 3.3 Change in the workplace environment is facilitated to promote learning.
- 3.4 Records and reports of competency are documented

ELEMENT**PERFORMANCE CRITERIA**

and maintained within the organisation's systems and procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- develop learning plans
- develop links between work and learning
- promote collaborative processes in developing a learning environment
- promote the achievement of competencies in the workplace
- provide leadership and support to individuals and teams to develop and maintain a flexible learning environment
- provide or arrange support for those who have learning difficulties
- support and encourage learning by individuals and teams

Required Knowledge

- group dynamics
- learning strategies
- organisation records and reports of competency procedures
- principles of adult learning

Evidence Guide**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Knowledge and application of strategies which facilitate and promote an effective workplace learning environment.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment**Context of assessment**

Evidence in facilitating and promoting a learning environment in the workplace Knowledge may be assessed through:

- written assignment
- debriefings and action learning projects.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Learning opportunities arise from organisation*** may include:
- objectives
 - plans
 - systems
 - processes
 - performance plans
 - quality and continuous improvement processes and standards
 - resources
 - participation in committees
 - managing projects
 - developing plans
 - analysis of incidents/response/emergency
 - organisation's approach to environmental management and sustainability
- Learning strategies*** may include:
- coaching
 - mentoring
 - exchange/rotation
 - action learning
 - structured training programs

Unit Descriptor

This unit covers competency in achieving organisational objectives and effective working relationships through managing and developing individuals and teams.

Application of the Unit

This unit applies to Public Safety workers who have a management/leadership role that includes basic HR functions and responsibility for ongoing development of the team.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUATEA002B Work autonomously (Fire sector specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where *bold italicised* text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop and maintain a team	<p>1.1 Work contributions or suggestions from staff are continually sought and encouraged.</p> <p>1.2 Contributions to team operations are acknowledged and suggestions are dealt with constructively.</p> <p>1.3 Team members' skills are used and developed according to work requirements.</p> <p>1.4 Team members are consulted about implementing new work practices.</p>
2. Communicate objectives and required standards	<p>2.1 Team members are provided with up-to-date information concerning the objectives and standards required by the organisation.</p> <p>2.2 Team members' understanding of objectives and standards is checked.</p> <p>2.3 Organisational standards and values relating to equal employment opportunity, anti discrimination and workplace harassment are modelled and promoted to team members.</p>
3. Manage and improve performance of teams and individuals	<p>3.1 Relevant and realistic team development plans are based on identified strengths and weaknesses of all team members.</p> <p>3.2 Regular constructive feedback on all aspects of work performance is provided to individuals and the team.</p> <p>3.3 Performance is assessed and addressed in a fair and timely manner in accordance with organisational guidelines and procedures.</p>
4. Support and participate in development activities	<p>4.1 Training needs of individuals and the team are identified and assessed on a regular basis in line with organisational guidelines and procedures.</p> <p>4.2 An action plan to meet individual and team training and development needs is developed, agreed and</p>

ELEMENT	PERFORMANCE CRITERIA
<p>5. Provide leadership to individuals and teams</p>	<p>implemented.</p> <p>4.3 On the job training is provided to the required organisational standard and to meet team needs.</p> <p>4.4 Team members are encouraged and supported to attend <i>training</i> and to undertake other <i>development opportunities</i>.</p> <p>4.5 Coaching and mentoring are utilised as development tools.</p> <p>5.1 The link between the function of the team and the goals of the organisation is understood and communicated to the team.</p> <p>5.2 Participative decision making is used to develop, implement and review work of the team and allocate responsibilities where appropriate.</p> <p>5.3 Opportunities are given to individuals and teams to develop new and innovative work practices and strategies.</p> <p>5.4 Delegation to individuals and team members is appropriate and relevant to team objectives and goals in accordance with organisational policy and procedures.</p> <p>5.5 Allocated tasks are within the competence of team members and supported with appropriate authority, autonomy and training.</p>
<p>6. Manage difficulties to achieve positive outcomes</p>	<p>6.1 Potential or actual conflict between team members or between self and other individuals is recognised and addressed.</p> <p>6.2 Difficulties in achieving required outcomes are identified, analysed and solutions developed and communicated to appropriate personnel.</p> <p>6.3 Individuals experiencing difficulties which cannot be addressed within the team are referred to <i>appropriate personnel</i> according to organisational policies and procedures.</p>
<p>7. Create and maintain conditions for productive work</p>	<p>7.1 Work environment is monitored to ensure it is maintained in line with organisational standards.</p> <p>7.2 Improvements to working environment are recommended and implemented where possible.</p> <p>7.3 Workplace hazards are identified or anticipated and managed to maintain safe working conditions.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- assessing training needs
- conflict resolution and negotiation
- consulting team members
- interpersonal skills
- leading and supervising individuals and teams
- problem solving
- providing constructive feedback

Required Knowledge

- all organisational policies
- anti discrimination and harassment
- industrial awards and agreements
- legislation relevant to work group activities
- occupational health and safety requirements
- organisational personnel practices and guidelines
- organisational policy relating to equal employment opportunity
- organisational quality standards and values
- principles of effective team operation and leadership
- principles of human resource management
- principles of leadership
- procedures
- protocols and standards affecting work group activities
- relevant training courses and development opportunities

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated by team leader meeting objectives and performance requirements.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

A combination of oral or written presentations on the job and/or in a simulated scenario.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Training and development opportunities may include:

- formal course participation
- on the job training
- work experience
- external study
- conference and seminar attendance
- induction
- job rotation

Training standards may include:

- industry best practice
- legislative requirements
- organisational standards
- Australian standards
- manufacturers' specifications
- endorsed competencies

Appropriate personnel may include:

- human resource manager
- counsellors
- supervisors
- team members
- managers

Organisational policy procedures requirements and guidelines may vary between sectors and organisations and may include:

- legislation relevant to the organisation
- operational
- corporate and strategic plans
- organisational performance standards
- organisational personnel practices and guidelines
- organisational quality standards
- protocols
- standard operating procedures
- equal employment opportunity policies
- occupational health and safety and welfare policy
- learning strategies
- codes of conduct
- Civil Aviation Orders

- requirements of regulatory authorities
- search and rescue time/procedures/action
- organisation's approach to environmental management and sustainability

PUAWER004B Respond to workplace emergencies

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to recognise emergencies in the workplace, to report emergencies and to take appropriate action.

For this unit workplace is defined as the area encompassed by an individual's responsibilities.

This unit has been developed to cover the broad range of emergencies and workplaces as considered in Australian Standard 3745—2010.

Application of the Unit

This unit applies to all personnel within an organisation, within all industries and in all contexts.

This unit places responsibility on individual employees in the workplace to recognise, report and take action during workplace emergency situations. This requirement is consistent with the legislative obligations of employees as prescribed in OHS legislation.

The knowledge and skills gained through the completion of this unit may be applied by all employees across all industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for emergency situations	<p>1.1 Current workplace emergency procedures to be used by employees and other workplace occupants are identified and followed.</p> <p>1.2 Emergency resources in the workplace are identified and located.</p> <p>1.3 <i>Emergency response exercises</i> are participated in according to workplace emergency procedures.</p>
2. Report emergencies and potential emergencies	<p>2.1 Emergencies and potential emergencies are identified and reported according to workplace emergency procedures.</p> <p>2.2 People in any immediate danger from the emergency or potential emergency are alerted according to workplace emergency procedures.</p>
3. Respond to emergency warnings and advice	<p>3.1 <i>Emergency warnings</i> and advice are responded to according to workplace emergency procedures.</p> <p>3.2 <i>Instructions</i> from emergency control response personnel are complied with during an emergency.</p> <p>3.3 Sources of additional information are identified and information is sought from relevant people if the situation is not clear.</p>
4. Evacuate from the work area	<p>4.1 Need to evacuate from the work area is determined according to the level of immediate danger or instruction issued under the workplace emergency procedures.</p> <p>4.2 Work area is prepared for evacuation according to workplace emergency procedures and the nature of</p>

ELEMENT**PERFORMANCE CRITERIA**

- the emergency.
- 4.3 Area of danger is evacuated according to workplace emergency procedures.
- 4.4 Where it is safe to do so, assistance is provided to *people who may require assistance*.
- 4.5 Evacuation procedures and instructions from emergency control organisation or *emergency response personnel* are followed.
- 4.6 Alternative pathways or methods of evacuation are identified, assessed and chosen according to workplace emergency procedures if usual means of evacuation are blocked or endangered.
- 4.7 Communication systems are used according to workplace procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively in an emergency situation as outlined in the workplace emergency procedures
- identify an emergency/potential emergency
- adhere to documented workplace emergency procedures

Required Knowledge

- circumstances where evacuation may need to be modified
- emergency reporting systems and procedures used on site
- emergency warning system, signals and instructions used on site
- evacuation alarms and workplace emergency procedures used at the workplace
- location of assembly areas and post-evacuation actions
- location of emergency equipment in the workplace
- procedures for reporting emergencies
- roles, responsibilities and authority of emergency personnel, emergency control organisation and emergency response team
- types of emergencies, the hazards and the evacuation actions associated with each one

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to apply workplace procedures; to maintain own safety and the safety of others in emergency situations; and to follow workplace emergency procedures and the advice of emergency control organisation members.

Consistency in performance

Competency should be demonstrated over time with a range of emergencies that could be expected in the workplace including assisting people who may need assistance.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or in a simulated workplace.

Specific resources for assessment

Access to:

- scenarios that reflect a range of emergency situations that may be expected in the workplace
- appropriate emergency resources
- range of communication equipment relevant to the workplace
- workplace emergency procedures and documentation

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Emergency response exercises may include

- briefings
- debriefings
- emergency exercises, simulations and reviews
- table/desk top exercises

Emergency warnings may include

- audible/visual alarms
- audible or vibrating pagers
- coded or uncoded public address announcements
- e-mail
- screen alerts
- stench alarms

People who may require assistance may include

- verbal alert
- babies and children
- people with a mobility, intellectual, visual, auditory or sensory impairment, either temporary or permanent, who require assistance during an emergency response
- people from diverse cultural and linguistic backgrounds
- people who are injured
- people who are not able to comprehend the instructions given
- pregnant women
- the elderly
- emergency control organisation members
- counsellors
- emergency response team members
- police, fire and emergency services
- peer support
- recovery team

Emergency response personnel may include

Unit Sector(s)

SISONAV201A Demonstrate navigation skills in a controlled environment

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to navigate in controlled environments where there are significant landmarks.

Application of the Unit

This unit applies to those working as assistant outdoor recreation guides, such as bushwalking or skiing, under supervision, in controlled environments that are reliably marked on maps and are obvious on the ground, snow or in the water.

This unit may also apply to outdoor recreation leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Identify unknown features in the field using map and compass.</p> <p>2.6. Select a route or course for the surroundings and conditions.</p> |
| 3. Evaluate navigations. | <p>3.1. Evaluate <i>relevant aspects</i>.</p> <p>3.2. Identify improvements for future navigations.</p> |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to:
 - read and interpret maps
 - follow instructions and procedures
- planning and organising skills to:
 - obtain navigation equipment
 - plan a route or course
- communication skills to interact with group leader and other participants to maintain a positive and safe environment while navigating
- numeracy skills to navigate and calculate grid and magnetic bearings and distances using a map and compass.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of all activities
- different types of maps, and their advantages and disadvantages to enable appropriate map selection
- map features, including symbols, contour lines, scales, grid lines and legends to enable effective map reading
- features of a compass, their use and factors that affect compass accuracy
- route planning and factors that should be considered, such as weather and type of terrain
- navigation techniques in controlled environments to determine distance, location, direction and potential hazards.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies relevant process to plan a route in controlled environments and demonstrates navigation techniques to orientate and follow directions
- seeks advice and feedback from leader to improve skills and ensure safety of self and group
- evaluates and reflects on own navigation performance to identify strengths, weaknesses and areas that need improvement.

Context of and specific resources for assessment Assessment must ensure participation in navigation activities in controlled environments that are of sufficient breadth and duration to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- a suitable outdoor location, with tracks that are reliably marked on maps, are obvious on the ground and are inspected on a regular basis that align with Class 4 Tracks within the Australian Standard for Walking Tracks
- navigation equipment such as map or maps, compass and activity specific equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the planning and review process with evidence of reference to resources and aids
- oral or written questioning to assess knowledge of navigation techniques
- observation of safe participation and demonstration of navigation skills, such as maintaining a compass course while bypassing an obstacle
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOBWG201A Bushwalk in controlled environments

or

- SISOSKT201A Demonstrate basic cross country skiing skills

or

- SISORAF201A Demonstrate rafting skills on moving water.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Italicised**

wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

- Map or maps** may include:
- cadastral and topographic maps
 - charts
 - guide books and diagrams.
- Symbols and information** may include:
- grid lines and numbers
 - contour lines
 - scale
 - map legend
 - topographic features
 - markers and beacons
 - water depth.
- Relevant factors** may include:
- type of terrain and gradient
 - weather conditions
 - experience
 - hazards
 - access to required resources and facilities.
- Additional information** may include:
- altitude gain or loss
 - distance
 - gradient
 - travelling time
 - magnetic bearings
 - water depth.
- Surroundings** may include:
- ground or terrain
 - snow conditions
 - bodies of water
 - beacons and markers
 - natural formations
 - landmarks
 - man-made features.
- Controlled environments** may include:
- areas reliably marked on maps
 - areas obvious on the ground or snow or water
 - tracks align with Class 4 Tracks within the Australian Standard for Walking Tracks.
- Navigation aids** may include:
- track and creek junctions and crossings
 - survey markers
 - beacons
 - track markers
 - cairns

- paths
- lines
- signs
- arrows
- compass
- man-made objects or features
- transits.

Relevant legislation may include:

- occupational health and safety
- permits or permission for access
- environmental regulations.

Organisational policies and procedures may include:

- occupational health and safety
- use and maintenance of equipment
- communication protocols
- code of ethics.

Techniques for estimating distance may include:

- time
- observation of surroundings
- pacing.

Obstacles may include:

- rivers
- logs
- rocks
- gullies
- trees
- snow conditions
- exposed areas.

Relevant aspects may include:

- objectives
- planning process
- activity site
- weather
- equipment selection
- clothing selection
- food selection
- instructional content
- instructional technique
- assessment technique
- group feedback
- directing techniques
- rescue techniques employed.

Competency Field

Navigation

SISONAV302A Apply navigation skills in an intermediate environment

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to navigate in uncontrolled environments within an activity-specific context. This includes areas with few obvious visible landmarks, minimal clearance and limited modifications made to the natural surface and where the changes in weather and visibility may occur.

Application of the Unit

This unit applies to outdoor recreation guides or instructors working for private outdoor adventure companies and or school based outdoor education programs, such as holiday programs and camps. Activities requiring navigation may include bushwalking, skiing, snowboarding, off - highway motorcycling or mountain biking in uncontrolled environments with few obvious visible landmarks, minimal clearance and signage, limited modifications made to the natural surface and may include terrain and man-made hazards, such as cliff lines or dense forests.

This unit may also apply to navigation on difficult or trackless waterways where there are few obvious visible waterway landmarks and the craft may be affected by wind and or currents and tides.

This unit also applies to outdoor recreation leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the Evidence Guide.

1. Plan for navigation.

- 1.1. Obtain and become familiar with appropriate *map or maps* for the activity.
- 1.2. Identify *symbols and information* contained on the map that may be used in navigation.
- 1.3. Apply information contained on the map to plan an efficient route or course according to specific activity requirements, *contextual issues, relevant legislation and organisational policies and procedures*.
- 1.4. Obtain and identify essential features of a compass and how it is used to maintain a designated course.
- 1.5. Calculate grid and magnetic bearings using a map and compass.
- 1.6. Prepare a *navigation data sheet*, and identify emergency or contingency escape routes.

2. Navigate in uncontrolled environments.

- 2.1. Apply *navigation techniques* to orientate map to *surroundings* with a compass and identify factors that affect accuracy.
- 2.2. Follow a route in remote, *uncontrolled environments*, demonstrating use of *navigation aids* according to relevant legislation and organisational policies and procedures.
- 2.3. Apply *techniques for estimating distance* travelled.
- 2.4. Maintain, where necessary, a compass course while bypassing an *obstacle*.
- 2.5. Identify unknown features in the field using map and compass.
- 2.6. Demonstrate technique to fix position and identify unknown features when lost.

ELEMENT	PERFORMANCE CRITERIA
3. Evaluate navigations	3.1. Evaluate <i>relevant aspects</i> of navigation. 3.2. Identify improvements or modifications for future navigations in uncontrolled environments.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to:
 - read and interpret maps
 - follow instructions and procedures
 - develop a navigation data sheet
- planning and organising skills to:
 - obtain navigation equipment
 - plan and follow routes and courses
- numeracy skills to navigate and calculate grid and magnetic bearings and distances using a map and compass
- problem-solving skills to:
 - maintain a compass course while bypassing an obstacle
 - fix position and determine current location when lost in uncontrolled environments.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of all activities
- different types of maps, sources of error and accuracy, and their advantages and disadvantages to enable selection of appropriate maps
- map features, including symbols, contour lines, scales, grid lines and legends to enable effective map reading
- features of a compass, their use and factors that affect compass accuracy
- route planning and factors that should be considered, such as weather and type of terrain
- navigation techniques in uncontrolled environments to determine distance, location, direction and potential obstacles
- techniques for estimating distance travelled, determining position when lost and navigating around obstacles.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies relevant process to plan a route in uncontrolled environments and demonstrates navigation techniques to orientate and follow directions
- navigates around obstacles in uncontrolled environments while maintaining a compass course
- evaluates and reflects on own navigation performance to identify strengths, weaknesses and areas that need improvement.

Context of and specific resources for assessment

Assessment must ensure participation in navigation activities in uncontrolled environments that are of sufficient breadth and duration to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- a suitable outdoor location with uncontrolled environments within an activity-specific context that align with Class 5 Tracks within the Australian Standards for Walking Tracks
- navigation equipment such as map or maps, compass, GPS and activity-specific equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- oral or written questioning to assess knowledge of navigation techniques used to maintain a course in uncontrolled environments
- observation of safe participation and demonstration of navigation skills, such as maintaining a compass course while bypassing an obstacle and identifying unknown features when lost
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOBWG302A Apply intermediate bushwalking skills.

or

- SISOMBK302A Apply advanced off-road cycling skills.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Map or maps may include:

- cadastral and topographic maps
- charts
- hydrographic
- aerial photographs
- guide books and diagrams
- satellite imagery
- digital map
- sketch maps.

Symbols and information may include:

- grid lines and numbers
- contour lines
- magnetic variation
- scale
- map legend
- topographic features
- markers and beacons
- water depth.

Contextual issues may include:

- weather conditions, including times
- season
- transport
- location
- trip distance and duration
- group objectives
- group size.

Relevant legislation may include:

- occupational health and safety
- permits or permission for access
- environmental regulations.

Organisational policies and procedures may include:

- occupational health and safety
- communication protocols
- use and maintenance of equipment
- code of ethics.

Navigation data sheet may include:

- grid reference points
- grid and magnetic bearings
- distances
- estimated travelling times
- height gain or loss
- gradient
- identifiable features
- escape routes.

Navigation techniques may include:

- use of compass
- linear features
- point features
- attack points
- aiming off
- collecting features
- spiral search
- sweep search
- backbearings and resections
- use of Global Positioning Systems (GPS).

Surroundings may include:

- ground or terrain
- snow conditions
- bodies of water
- beacons and markers
- natural formations
- landmarks
- man-made features.

Uncontrolled environments may include:

- limited modifications to the natural surface
- minimal clearance along the track and signage
- terrain and man-made hazards
- tracks align with Class 5 Tracks within the Australian Standards for Walking Tracks
- areas of water where there are few obvious visible landmarks.

Navigation aids may include:

- track and creek junctions and crossings
- survey markers
- beacons
- track markers
- cairns

- paths
- lines
- signs
- arrows
- watch
- weather charts
- man-made objects or features
- transits.

Techniques for estimating distance may include:

- time
- observation of surroundings
- relation to features
- pacing.

Obstacles may include:

- logs
- rocks
- gullies
- trees
- varying snow conditions
- exposed areas
- thick vegetation
- drops and climbs
- marshes and bogs
- fog
- rivers, lakes and dams.

Relevant aspects may include:

- objectives
- planning process
- activity site
- weather
- equipment selection
- clothing selection
- food selection
- instructional content
- instructional technique
- assessment technique
- group feedback
- directing techniques
- rescue techniques employed.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to contribute to the assessment process.

Application of the Unit

This unit typically applies to a person with technical or vocational expertise who is in a supervisory or mentoring/coaching work role and for whom collecting evidence for assessment is an adjunct to principal work responsibilities.

This unit is performed under the following conditions:

- the necessary assessment tools and assessment resources to guide the evidence collection process have been provided
- any adjustments to tools are determined by the qualified assessor (as defined by the Australian Quality Training Framework and the assessor requirements of the relevant training package), who provides guidance and supervision.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
---------	----------------------

ELEMENT

Elements describe the essential outcomes of a unit of competency .

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Clarify role and responsibilities in the assessment process	<p>1.1 Discuss and confirm <i>purpose of assessment</i> with <i>relevant people</i></p> <p>1.2 Discuss and confirm <i>benchmarks for assessment</i> with qualified assessor</p> <p>1.3 Access, read and clarify <i>assessment plan</i> with qualified assessor</p> <p>1.4 Discuss and agree with qualified assessor the specific responsibilities in gathering evidence and types of evidence to be gathered</p>
2. Confirm organisational arrangements for evidence gathering	<p>2.1 Access and confirm relevant <i>assessment system policies and procedures</i>; organisational, legal and ethical requirements; and other relevant advice on assessment</p> <p>2.2 Clarify nominated <i>assessment tools</i> and methods for collecting evidence with qualified assessor, to ensure that procedures to be followed and instruments to be used are clear</p> <p>2.3 Discuss and confirm with relevant people <i>assessment context</i>, including candidate's characteristics and any need for <i>reasonable adjustments</i></p> <p>2.4 Confirm and arrange <i>resource requirements</i> in consultation with relevant people</p>
3. Collect evidence in accordance with the assessment plan	<p>3.1 Explain assessment process to candidate, including the different responsibilities of the parties involved, and refer any candidate issues or concerns to qualified assessor prior to undertaking assessment activities</p> <p>3.2 Use <i>assessment instruments</i> to gather quality evidence within available time and resources, according to organisational, legal and ethical requirements</p>
4. Record and report findings	4.1 Organise and provide evidence to the qualified assessor in a format suitable for analysis according to assessment system policies and procedures

	<p>4.2 Actively seek feedback from the qualified assessor on whether evidence-gathering activities meet the principles of assessment and whether evidence collected meets the rules of evidence</p> <p>4.3 Document areas for improvement in collecting evidence, for future assessment activities</p>
--	--

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- observation skills to observe candidate performance
- cognitive and interpretation skills to ensure collection of valid and reliable evidence
- organisational skills to collect evidence
- time-management skills to schedule assessment events and activities
- literacy skills to:
 - read and interpret relevant information
 - prepare required documentation and collate evidence in required format
- communication skills to:
 - discuss evidence-gathering processes with practitioners and candidates
 - provide constructive and supportive feedback
 - ask appropriate questions to clarify and confirm instructions for evidence gathering
 - provide clear and concrete options and advice.

Required knowledge

- competency-based assessment, including:
 - criterion referenced
 - competency standards as the benchmarks for assessment
 - competency-based reporting
- principles of assessment
- rules of quality evidence
- different purposes of assessment
- diversity of assessment contexts
- evidence, including different types of evidence
- evidence-gathering methods – what are assessment methods and different types of methods
- purpose and features of assessment tools and assessment plans
- potential barriers and processes relating to evidence-gathering procedures and assessment processes
- organisational assessment system policies and procedures relevant to this unit of competency

- technical or subject area being assessed
- cultural sensitivity and equity considerations
- relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation, that may affect training and assessment in the vocational education and training sector
- OHS relating to the work role, and OHS considerations to be included in collecting evidence, including:
 - hazard identification and risk control measures
 - requirements for reporting hazards and incidents
 - emergency procedures
 - procedures for use of relevant personal protective equipment
 - safe use of relevant equipment
 - sources of OHS information
 - role of key workplace personnel
 - responsibilities of learners.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • carry out a minimum of three evidence-gathering activities, with different candidates for each activity • present documentation of the evidence in a clear and concise manner • present documented feedback from others involved in the assessment.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p>
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Purpose of assessment</i> may be:</p>	<ul style="list-style-type: none"> • recognise current existing competency of candidates • determine if competency has been achieved following learning • establish candidate progress towards achievement of competence • determine language, literacy and numeracy needs of candidate • certify competence through a Statement of Attainment • establish progress towards a qualification • determine training gaps of candidate • measure work performance • classify employee and support career progression • meet organisational requirements for work, such as operating equipment or developing new skills • satisfy licensing or regulatory requirements.
<p><i>Relevant people</i> must include:</p>	<ul style="list-style-type: none"> • qualified assessors • candidates.
<p><i>Benchmarks for assessment:</i></p>	<ul style="list-style-type: none"> • refer to criteria against which candidate is assessed • may be a competency standard/unit of competency, assessment criteria of course curricula, performance specifications, or product specifications.
<p><i>Assessment plan</i> must include:</p>	<ul style="list-style-type: none"> • purpose and aims of assessment • context of assessment • relevant benchmarks for assessment • other assessment information and documentation identified as relevant.
<p><i>Assessment system policies and procedures</i> may include:</p>	<ul style="list-style-type: none"> • candidate selection • rationale and purpose of competency-based assessment • assessment records, data management and information management • recognition of current competency, recognition of prior learning and credit arrangements.
<p><i>Assessment tools</i> include:</p>	<ul style="list-style-type: none"> • the learning or competency unit(s) to be assessed • the target group, context and conditions for the assessment • the tasks to be administered to the candidate • an outline of the evidence to be gathered from the candidate • the evidence criteria used to judge the quality of performance

	<p>(i.e. the assessment decision-making rules)</p> <ul style="list-style-type: none"> • the administration, recording and reporting requirements • the evidence of how validity and reliability have been tested and built into the design and use of the tool.
Assessment context may include:	<ul style="list-style-type: none"> • environment in which assessment will be carried out • relationship between units of competency and candidate's workplace • time period over which assessment takes place.
Reasonable adjustments may include:	<ul style="list-style-type: none"> • taking into account candidate's language, literacy and numeracy requirements • providing personal support services, such as arranging for: <ul style="list-style-type: none"> • member of the community to accompany the candidate • reader • interpreter • attendant carer • scribe • using adaptive technology or special equipment • providing flexible assessment sessions to allow for such things as fatigue or administering of medication • format of assessment materials, such as: <ul style="list-style-type: none"> • in Braille • in first language • use of audiotape or videotape • making adjustments to the physical environment • revising proposed assessment methods and instruments • considering age and gender • considering cultural beliefs, traditional practices and religious observances.
Resource requirements may include:	<ul style="list-style-type: none"> • resources specific to evidence-gathering activities • access to assessors • access to policy and procedures • access to subject and technical experts • OHS requirements • plant, equipment and technology.
Assessment instruments may include:	<ul style="list-style-type: none"> • instruments developed by an assessor as part of formative or summative assessment activities, including: <ul style="list-style-type: none"> • profiles of acceptable performance measures • templates and proformas • specific questions or activities • evidence and observation checklists • checklists for the evaluation of work samples

	<ul style="list-style-type: none">• recognition portfolios• candidate self-assessment materials• instruments developed elsewhere that have been modified by the assessor for use with a particular client group.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and organise the assessment process, including recognition of prior learning (RPL), in a competency-based assessment system. It also includes the development of simple assessment instruments.

Application of the Unit

This unit typically applies to assessors and workplace supervisors with assessment planning responsibilities; and trainers or other assessors responsible for planning assessment, including RPL.

The unit is suitable for those with an existing assessment strategy which documents the overall framework for assessment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT

unit of competency.

PERFORMANCE CRITERIA

is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Determine assessment approach	<p>1.1 Identify candidate and confirm <i>purposes and context of assessment/RPL</i> with relevant people according to <i>legal, organisational and ethical requirements</i></p> <p>1.2 Identify and access <i>benchmarks for assessment/RPL</i> and any specific assessment guidelines</p>
2. Prepare the assessment plan	<p>2.1 Determine evidence and <i>types of evidence</i> needed to demonstrate competence, according to the <i>rules of evidence</i></p> <p>2.2 Select <i>assessment methods</i> which will support the collection of defined evidence, taking into account the context in which the assessment will take place</p> <p>2.3 Document all aspects of the <i>assessment plan</i> and confirm with relevant personnel</p>
3. Develop assessment instruments	<p>3.1 Develop <i>simple assessment instruments</i> to meet target group needs</p> <p>3.2 Analyse <i>available assessment instruments</i> for their suitability for use and modify as required</p> <p>3.3 <i>Map assessment</i> instruments against unit or course requirements</p> <p>3.4 Write clear instructions for candidate about the use of the instruments</p> <p>3.5 Trial draft assessment instruments to validate content and applicability, and record outcomes</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- cognitive interpretation skills to:
 - interpret competency standards and other assessment documentation, including material

- relating to reasonable adjustment
- identify opportunities for integrated competency assessment
- contextualise competency standards to the operating assessment environment, including RPL
- consider access and equity needs of diverse candidates
- technology skills to use appropriate equipment and software to communicate effectively with others
- research and evaluation skills to:
 - obtain competency standards, assessment tools and other relevant assessment resources
 - research candidate characteristics and any reasonable adjustment needs
 - evaluate feedback, and determine and implement improvements to processes
- literacy skills to read and interpret relevant information to design and facilitate assessment and recognition processes
- communication skills to discuss assessment, including RPL processes with clients and other assessors
- interpersonal skills to:
 - demonstrate sensitivity to access and equity considerations and candidate diversity
 - promote and implement equity, fairness, validity, reliability and flexibility in planning an assessment processes.
- **Required knowledge**
- ethical and legal requirements of an assessor
- competency-based assessment, including:
 - work focused
 - criterion referenced
 - standards based
 - evidence based
- different purposes of assessment and different assessment contexts, including RPL
- how to read and interpret the identified competency standards as the benchmarks for assessment
- how to contextualise competency standards within relevant guidelines
- four principles of assessment and how they guide the assessment process
- purpose and features of evidence, and different types of evidence used in competency-based assessments, including RPL
- rules of evidence and how they guide evidence collection
- different types of assessment methods, including suitability for collecting various types of evidence
- assessment instruments and their purpose; different types of instruments; relevance of different instruments for specific evidence-gathering opportunities.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<ul style="list-style-type: none"> • Evidence of the ability to: • plan and organise the assessment process on a minimum of two occasions • collect evidence that demonstrates: <ul style="list-style-type: none"> • documented assessment plans • having covered a range of assessment events • catering for a number of candidates • different competency standards or accredited curricula • an RPL assessment • contextualisation of competency standards and the selected assessment tools, where required • incorporation of reasonable adjustment strategies • development of simple assessment instruments for use in the process • organisational arrangements.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to training products, such as training packages and accredited course documentation.</p>
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Purposes of assessment/ RPL</i> may include:</p>	<ul style="list-style-type: none"> • recognising current existing competence of candidates • determining if competence has been achieved following learning • establishing candidate progress towards achievement of competence • determining language, literacy and numeracy needs of candidates • certifying competence through a qualification or Statement of Attainment • licensing or regulatory requirements.
<p><i>Context of assessment/ RPL</i> may include:</p>	<ul style="list-style-type: none"> • environment in which the assessment/RPL will be carried out, including real or simulated workplace • opportunities for collecting evidence in a number of situations • relationships between competency standards and: <ul style="list-style-type: none"> • evidence to support RPL • work activities in the candidate's workplace • learning activities • who carries out the assessment/RPL.
<p><i>Organisational, legal and ethical requirements</i> may include:</p>	<ul style="list-style-type: none"> • assessment system policies and procedures • assessment strategy requirements • reporting, recording and retrieval systems for assessment, including RPL • quality assurance systems • business and performance plans • access and equity policies and procedures • collaborative and partnership arrangements • defined resource parameters • mutual recognition arrangements • industrial relations systems and processes, awards, and enterprise agreements • Australian Quality Training Framework • registration scope • human resources policies and procedures • legal requirements, including: <ul style="list-style-type: none"> • anti-discrimination • equal employment opportunity • job role, responsibilities and conditions • relevant industry codes of practice • confidentiality and privacy requirements • OHS considerations, including: <ul style="list-style-type: none"> • ensuring OHS requirements are adhered to during the

	<p>assessment process</p> <ul style="list-style-type: none"> identifying and reporting OHS hazards and concerns to relevant personnel.
Benchmarks for assessment/RPL may include:	<ul style="list-style-type: none"> criterion against which the candidate is assessed or prior learning recognised, which may be: <ul style="list-style-type: none"> competency standard/unit of competency assessment criteria of course curricula performance specifications of an enterprise or industry product specifications.
Types of evidence may include:	<ul style="list-style-type: none"> direct indirect supplementary.
Rules of evidence ensure that evidence collected is:	<ul style="list-style-type: none"> valid sufficient authentic current.
Assessment methods are the particular techniques used to gather evidence and may include:	<ul style="list-style-type: none"> direct observation, for example: <ul style="list-style-type: none"> real work/real time activities at the workplace work activities in a simulated workplace environment structured activities, for example: <ul style="list-style-type: none"> simulation exercises and role-plays projects presentations activity sheets questioning, for example: <ul style="list-style-type: none"> written questions, e.g. on a computer interviews self-assessment verbal questioning questionnaires oral or written examinations (applicable at higher AQF levels) portfolios of evidence, for example: <ul style="list-style-type: none"> collection of work samples compiled by candidate product with supporting documentation historical evidence journal or log book information about life experience review of products, for example: <ul style="list-style-type: none"> testimonials and reports from employers and supervisors

	<ul style="list-style-type: none"> evidence of training authenticated prior achievements interview with employer, supervisor, or peer.
<i>Assessment plan</i> may include:	<ul style="list-style-type: none"> overall planning document describing: <ul style="list-style-type: none"> what is to be assessed when assessment is to take place where assessment is to take place how assessment is to take place.
<i>Simple assessment instruments</i> may include:	<ul style="list-style-type: none"> instruments developed by an assessor as part of formative or summative assessment activities, including: <ul style="list-style-type: none"> profiles of acceptable performance measures templates and proformas specific questions or activities evidence and observation checklists checklists for the evaluation of work samples recognition portfolios candidate self-assessment materials instruments developed elsewhere that have been modified by the assessor for use with a particular client group.
<i>Available assessment instruments</i> may include:	<ul style="list-style-type: none"> commercially available instruments those created by others inside the registered training organisation.
<i>Map assessment</i> means:	<ul style="list-style-type: none"> showing a clear relationship between the evidence and the requirements of the unit.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for assessment	<p>1.1. Interpret <i>assessment plan</i> and confirm organisational, legal and ethical requirements for conducting assessment with relevant people</p> <p>1.2. Access and interpret relevant <i>benchmarks for assessment</i> and nominated <i>assessment tools</i> to confirm the requirements for evidence to be collected</p> <p>1.3. Arrange identified material and physical resource requirements according to assessment system policies and procedures</p> <p>1.4. Organise <i>specialist support</i> required for assessment</p> <p>1.5. Explain, discuss and agree details of the assessment plan with candidate</p>
2. Gather quality evidence	<p>2.1. Use agreed <i>assessment methods</i> and tools to gather, organise and document evidence in a format suitable for determining competence</p> <p>2.2. Apply the principles of assessment and rules of evidence in gathering quality evidence</p> <p>2.3. Determine opportunities for evidence gathering in actual or simulated activities through consultation with the candidate and relevant personnel</p> <p>2.4. Determine opportunities for integrated assessment activities and document any changes to assessment instruments where required</p>
3. Support the candidate	<p>3.1. Guide candidates in gathering their own evidence to support recognition of prior learning (RPL)</p> <p>3.2. Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to <i>individual differences</i> and enables two-way <i>feedback</i></p> <p>3.3. Make decisions on reasonable adjustments with the</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>candidate, based on candidate's needs and characteristics</p> <p>3.4. Access required specialist support in accordance with the assessment plan</p> <p>3.5. Address any OHS risk to person or equipment immediately</p>
4. Make the assessment decision	<p>4.1. Examine collected evidence and evaluate it to ensure that it reflects the evidence required to demonstrate competence</p> <p>4.2. Use judgement to infer whether competence has been demonstrated, based on the available evidence</p> <p>4.3. Make assessment decision in line with agreed assessment procedures and according to agreed assessment plan</p> <p>4.4. Provide clear and constructive feedback to candidate regarding the assessment decision and develop any follow-up action plan required</p>
5. Record and report the assessment decision	<p>5.1. Record assessment outcomes promptly and accurately</p> <p>5.2. Complete and process an assessment report according to agreed assessment procedures</p> <p>5.3. Inform other relevant parties of the assessment decision according to confidentiality conventions</p>
6. Review the assessment process	<p>6.1. Review the assessment process in <i>consultation</i> with relevant people to improve own future practice</p> <p>6.2. Document and record the review according to relevant assessment system policies and procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analysis and interpretation skills to:
 - break down competency standards
 - interpret assessment tools and other assessment information, including those used in RPL

REQUIRED SKILLS AND KNOWLEDGE

- identify candidate needs
- make judgements based on assessment of available evidence
- observation skills to:
 - recognise candidate's prior learning
 - determine candidate's performance
 - identify when candidate may need assistance during the assessment processes
- research and evaluation skills to:
 - access required human and material resources for assessment
 - access assessment system policies and procedures
 - access RPL policies and procedures
 - evaluate evidence
 - evaluate assessment process
- cognitive skills to:
 - weigh up the evidence and make a judgement
 - consider and recommend reasonable adjustments
- decision-making skills to:
 - recognise a candidate's prior learning
 - make a decision on a candidate's competence
- literacy skills to:
 - read and interpret relevant information to conduct assessment
 - prepare required documentation and records or reports of assessment outcomes in required format
- communication and interpersonal skills to:
 - explain the assessment, including RPL process
 - give clear and precise instructions
 - ask effective questions
 - provide clarification
 - discuss process with other relevant people
 - give appropriate feedback
 - discuss assessment outcome
 - use language appropriate to candidate and assessment environment
 - establish a working relationship with candidate

Required knowledge

- competency-based assessment, including:
 - vocational education and training as a competency-based system
 - criterion-referenced assessment as distinct from norm-referenced assessment
 - competency standards as the basis of qualifications

REQUIRED SKILLS AND KNOWLEDGE

- structure and application of competency standards
- principles of assessment and how they are applied
- rules of evidence and how they are applied
- range of assessment purposes and assessment contexts, including RPL
- different assessment methods, including suitability for gathering various types of evidence, suitability for content of units, and resource requirements and associated costs
- reasonable adjustments and when they are applicable
- types and forms of evidence, including assessment tools that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
- potential barriers and processes relating to assessment tools and methods
- assessment system, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations
- relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector, such as:
 - copyright and privacy laws in terms of electronic technology
 - security of information
 - plagiarism
 - training packages and competency standards
 - licensing requirements
 - industry and workplace requirements
 - duty of care under common law
 - recording information and confidentiality requirements
 - anti-discrimination, including equal employment opportunity, racial vilification and disability discrimination
 - workplace relations
 - industrial awards and enterprise agreements
- OHS responsibilities associated with assessing competence, such as:
 - requirements for reporting hazards and incidents
 - emergency procedures
 - procedures for use of relevant personal protective equipment
 - safe use and maintenance of relevant equipment
 - sources of OHS information

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • assess competence of a number of candidates within the vocational education and training context against different units of competency or accredited curricula, following the relevant assessment plan • assess at least one candidate for RPL • consider reasonable adjustment and the reasons for decisions in at least one assessment • cover an entire unit of competency and show: <ul style="list-style-type: none"> • the application of different assessment methods and tools involving a range of assessment activities and events • two-way communication and feedback • how judgement was exercised in making the assessment decision • how and when assessment outcomes were recorded and reported • assessment records and reports completed in accordance with assessment system and organisational, legal and ethical requirements • how the assessment process was reviewed.
<p>Context of and specific resources for assessment</p>	<p>Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided.</p>
<p>Method of assessment</p>	
<p>Guidance information for assessment</p>	<p>For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Assessment plan</i> may include:</p>	<ul style="list-style-type: none"> • overall planning, describing: <ul style="list-style-type: none"> • what is to be assessed • when assessment is to take place • where assessment is to take place • how assessment is to take place.
<p><i>Benchmarks for assessment:</i></p>	<ul style="list-style-type: none"> • refer to a criterion against which the candidate is assessed • may be a competency standard/unit of competency, assessment criteria of course curricula, performance specifications, or product specifications.
<p><i>Assessment tools</i> may include:</p>	<ul style="list-style-type: none"> • both the instrument and the procedures for gathering and interpreting evidence in accordance with designated assessment methods • instruments to be used for gathering evidence, such as: <ul style="list-style-type: none"> • profile of acceptable performance measures • templates and proformas • specific questions or activities • evidence and observation checklists • checklists for evaluating work samples • candidate self-assessment materials • procedures, information and instructions for the assessor and candidate relating to the use of assessment instruments and assessment conditions.
<p><i>Specialist support</i> may include:</p>	<ul style="list-style-type: none"> • assistance by third party, such as carer or interpreter • support from specialist educator • provision of developed online assessment activities • support for remote or isolated candidates and assessors • support from subject matter or safety experts • advice from regulatory authorities • assessment teams and panels

RANGE STATEMENT	
	<ul style="list-style-type: none"> • support from lead assessors • advice from policy development experts.
<i>Assessment methods</i> include:	<ul style="list-style-type: none"> • particular techniques used to gather different types of evidence, such as: <ul style="list-style-type: none"> • direct observation • structured activities • oral or written questioning • portfolios of evidence • review of products • third-party feedback.
<i>Individual differences</i> may include:	<ul style="list-style-type: none"> • English language, literacy and numeracy barriers • physical impairment or disability • intellectual impairment or disability • medical condition that may impact on assessment, such as arthritis, epilepsy, diabetes and asthma • learning difficulties • mental or psychological disability • religious and spiritual observances • cultural images and perceptions • age • gender.
<i>Feedback</i> may include:	<ul style="list-style-type: none"> • ensuring assessment/RPL process is understood • ensuring candidate concerns are addressed • enabling questions and answers • confirming outcomes • identifying further evidence to be provided • discussing action plans • confirming gap training needed • providing information regarding available appeal processes • suggesting improvements in evidence gathering and presentation.
<i>Consultation</i> may involve:	<ul style="list-style-type: none"> • moderation with other assessors, or training and assessment coordinators • discussions with client, team leaders, managers, RPL coordinators, supervisors, coaches and mentors • technical and subject experts • English language, literacy and numeracy experts.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design and develop assessment tools, including tools used in formative, summative and recognition of prior learning (RPL) assessment.

Application of the Unit

An assessment tool is used to guide the collection of quality evidence in the assessment process. It includes the specific instruments for collecting evidence, as well as information about assessment methods and the procedures to be followed in conducting the assessment.

This unit typically applies to those involved in training and assessment or in the development of learning resources or products, assessors, learning resource or product developers, and training and assessment consultants.

ELEMENT

unit of competency.

PERFORMANCE CRITERIA

is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Determine focus of the assessment tool	<p>1.1 Identify target group of candidates, purposes of <i>assessment tool</i>, and <i>contexts</i> in which the tool will be used</p> <p>1.2 Access relevant <i>benchmarks for assessment</i> and interpret them to establish evidence required to demonstrate competence</p> <p>1.3 Identify, access and interpret <i>organisational, legal and ethical requirements</i> and relevant <i>contextualisation guidelines</i></p> <p>1.4 Identify other <i>related documentation</i> to inform assessment tool development</p>
2. Design assessment tool	<p>2.1 Select assessment methods that support the collection of defined evidence, taking into account the context in which the assessment will take place and meeting the principles of assessment</p> <p>2.2 Enable candidates to show or support their claim for recognition of current competency through selected assessment methods</p> <p>2.3 Consider different <i>assessment instruments</i> for the selected assessment methods to generate options for collection of evidence</p> <p>2.4 Consider how the assessment instruments will be administered</p>
3. Develop assessment tool	<p>3.1 Develop specific assessment instruments that address the evidence to be collected</p> <p>3.2 Define and document clear and specific <i>procedures</i> instructing assessor and candidate on the administration and use of the instruments</p> <p>3.3 Consider requirements of <i>assessment system policies and procedures</i> and address storage and retrieval needs, and review, evaluation and version control procedures as part of this process</p>
4. Review and trial assessment tool	<p>4.1 Check draft assessment tools against <i>evaluation criteria</i> and amend as required</p> <p>4.2 Trial assessment tools to validate content and applicability</p> <p>4.3 Collect and document feedback from relevant people involved in trialling</p> <p>4.4 Make amendments to final tool based on analysis of feedback</p>

	4.5 Appropriately format and file finalised assessment tool according to assessment system policies and procedures and organisational, legal and ethical requirements

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analysis and interpretation skills to review and evaluate assessment tools
- critical thinking skills to translate the interpreted competency standards and other relevant assessment information into meaningful assessment instruments
- design skills to develop different assessment tool designs
- research and evaluation skills to evaluate assessment tools on the basis of trials and feedback.

Required knowledge

- principles of assessment and how they are applied when developing assessment tools
- different types and rules of evidence
- different assessment contexts and relationship to developing assessment tools
- components of competency and dimensions of competency
- contextualisation of competency standards and contextualisation guidelines
- Assessment Guidelines of training packages as relevant to developing assessment tools
- different assessment methods, their purposes and uses
- evaluation methodologies appropriate to the trial and review of assessment tools
- principles of reasonable adjustment
- relevant workplace information, including:
 - organisational policies and procedures
 - workplace tasks and activities
 - standard operating procedures
 - procedures for use of relevant personal protective equipment.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
-------------------------------	--

Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • develop assessment tools that support different assessment methods and address at least three units of competency packaged at different Australian Qualifications Framework (AQF) levels • develop assessment tools that: <ul style="list-style-type: none"> • include the instruments for collecting evidence, reflecting the principles of assessment and the rules of evidence, and the related instructions to assessor/s and candidates • show how the contextual needs of different environments are addressed • report on the trial and review of the assessment tools, including proposed changes.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • training products, such as training packages and accredited course documentation.
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Assessment tool</i> includes:</p>	<ul style="list-style-type: none"> • the learning or competency unit(s) to be assessed • the target group, context and conditions for the assessment • the tasks to be administered to the candidate • an outline of the evidence to be gathered from the candidate • the evidence criteria used to judge the quality of performance (i.e. the assessment decision-making rules) • the administration, recording and reporting requirements • the evidence of how validity and reliability have been tested and built into the design and use of the tool.
<p><i>Contexts</i> of assessment/RPL may include:</p>	<ul style="list-style-type: none"> • environment in which the assessment/RPL will be carried out, including real or simulated workplace • opportunities for collecting evidence in a number of situations • relationships between competency standards and evidence to support RPL • who carries out the assessment/RPL • relationships between competency standards and work activities in the candidate's workplace • relationships between competency standards and learning activities.
<p><i>Benchmarks for assessment:</i></p>	<ul style="list-style-type: none"> • refer to criteria against which the candidate is assessed which may be a unit of competency, assessment criteria of course curricula, performance specifications, or product specifications • where the benchmark is one or more units of competency the standards may be contextualised to reflect the immediate operating environment.
<p><i>Organisational, legal and ethical requirements</i> may include:</p>	<ul style="list-style-type: none"> • assessment system policies and procedures • industrial relations systems and processes, awards and enterprise agreements • licensing and legal ramifications of assessing competence • reporting, recording and retrieval systems for assessment • requirements of training, assessment and validation, including the AQTF Standards for Registered Training Organisations • human resource policies, procedures and legal requirements, including: <ul style="list-style-type: none"> • anti-discrimination • equal employment opportunity • job role, responsibilities and conditions • relevant industry codes of practice • confidentiality and privacy requirements of information relating to completed assessments

	<ul style="list-style-type: none"> • OHS considerations, including: <ul style="list-style-type: none"> • ensuring assessment methods and tools incorporate appropriate measures to maintain the health, safety and welfare of candidates • ensuring OHS requirements and specified benchmarks are accounted for within evidence requirements and assessment materials • identifying hazards and relevant risk control procedures associated with the assessment environment.
<i>Contextualisation guidelines</i> relate to:	<ul style="list-style-type: none"> • relevant training package or accredited course contextualisation guidelines.
<i>Related documentation</i> may include:	<ul style="list-style-type: none"> • requirements set out in the Assessment Guidelines of the relevant training packages • information from the competency standards about: <ul style="list-style-type: none"> • resources required for assessment • assessment context • appropriate assessment methods • assessment activities identified in accredited modules derived from the relevant competency standards • assessment activities in support materials related to the relevant competency standards • any requirements of OHS, legislation, codes of practice, standards and guidelines • indicators and levels of competence of the Australian Core Skills Framework • organisational requirements for demonstration of work performance • product specifications.
<i>Assessment instrument</i> may be:	<ul style="list-style-type: none"> • profiles of acceptable performance measures • templates and proformas • specific questions or activities • evidence and observation checklists • checklists for the evaluation of work samples • recognition portfolios • candidate self-assessment materials.

<i>Procedures</i> may include:	<ul style="list-style-type: none"> • those that guide the application of the instruments, such as: <ul style="list-style-type: none"> • instructions for the candidates • instructions for administering the assessment tool, including resources needed to conduct assessment and the context for the use of tools • guidance for development or review of decision-making process • guidance on reasonable adjustments • specified variations or restrictions on the tools • rules for verifying assessment decisions • OHS requirements, for example, identified hazards in the assessment environment and appropriate controls and reporting mechanisms • information on access and equity considerations.
<i>Assessment system policies and procedures</i> may include:	<ul style="list-style-type: none"> • assessment records, and data and information management • recognition of current competency, RPL and credit arrangements • assessor needs, qualifications and maintenance of currency • assessment reporting procedures • assessment appeals • candidate grievances and complaints • validation • evaluation and internal audit • costs and resourcing • access and equity, and reasonable adjustment • partnership arrangements • links with human resource or industrial relations systems • links with overall quality management system.
<i>Evaluation criteria</i> may include:	<ul style="list-style-type: none"> • effectiveness and relevance to the competency standards • whether assessment tool is appropriate to selected assessment methods • whether assessment tool is appropriate to target group and assessment context • appropriateness of language and literacy for intended audience.

TAEDEL301A Provide work skill instruction

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to conduct individual and group instruction and demonstrate work skills, using existing learning resources in a safe and comfortable learning environment. The unit covers the skills and knowledge required to determine the success of both the training provided and one's own personal training performance. It emphasises the training as being driven by the work process and context.
------------------------	--

Application of the Unit

Application of the unit	This unit supports a wide range of applications across any workplace setting and so can be used by any organisation. Its use is not restricted to training organisations.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise instruction and demonstration	1.1. Gather information about <i>learner characteristics</i> and learning needs 1.2. Confirm a <i>safe learning environment</i> 1.3. Gather and check <i>instruction and demonstration objectives</i> and seek assistance if required 1.4. Access and review relevant <i>learning resources</i> and <i>learning materials</i> for suitability and relevance, and seek assistance to interpret the contextual application 1.5. Organise access to necessary equipment or physical resources required for instruction and demonstration 1.6. Notify learners of <i>details</i> regarding the implementation of the learning program and/or delivery plan
2. Conduct instruction and demonstration	2.1. Use interpersonal skills with learners to establish a safe and comfortable learning environment 2.2. Follow the learning program and/or delivery plan to cover all learning objectives 2.3. Brief learners on any <i>OHS procedures</i> and requirements prior to and during training 2.4. Use <i>delivery techniques</i> to structure, pace and enhance learning 2.5. Apply <i>coaching</i> techniques to assist learning 2.6. Use communication skills to provide information,

ELEMENT	PERFORMANCE CRITERIA
	instruct learners and demonstrate relevant work skills 2.7. Provide opportunities for practice during instruction and through work activities 2.8. Provide and discuss feedback on learner performance to support learning
3. Check training performance	3.1. Use <i>measures</i> to ensure learners are acquiring and can use new technical and generic skills and knowledge 3.2. Monitor learner progress and outcomes in consultation with learner 3.3. Review relationship between the trainer/coach and the learner and adjust to suit learner needs
4. Review personal training performance and finalise documentation	4.1. Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement 4.2. Maintain, store and secure learner records according to organisational and legal requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- verbal and non-verbal communication techniques, such as:
 - asking relevant and appropriate questions
 - providing explanations
 - demonstrating
 - using listening skills
 - providing information clearly
- safety skills to implement OHS requirements, by acting and responding safely in order to:
 - identify hazards
 - conduct prestart-up checks if required
 - observe and interpret learner behaviour that may put people at risk
- time-management, skills to:

REQUIRED SKILLS AND KNOWLEDGE

- ensure all learning objectives are covered
- pace learning
- reflection skills in order to:
 - identify areas for improvement
 - maintain personal skill development
- literacy skills to:
 - complete and maintain documentation
 - read and follow learning programs and plans
 - read and analyse learner information
- technology skills to operate audio-visual and technical equipment
- interpersonal skills to:
 - engage, motivate and connect with learners
 - provide constructive feedback
 - maintain appropriate relationships
 - establish trust
 - use appropriate body language
 - maintain humour
 - demonstrate tolerance
 - manage a group
 - recognise and be sensitive to individual difference and diversity
- observation skills to:
 - monitor learner acquisition of new skills, knowledge and competency requirements
 - assess learner communication and skills in interacting with others
 - identify learner concerns
 - recognise learner readiness to take on new skills and tasks

Required knowledge

- learner characteristics and needs
- content and requirements of the relevant learning program and/or delivery plan
- sources and availability of relevant learning resources and learning materials
- content of learning resources and learning materials
- training techniques that enhance learning and when to use them
- introductory knowledge of learning principles and learning styles
- key OHS issues in the learning environment, including:
 - roles and responsibilities of key personnel
 - responsibilities of learners
 - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency

REQUIRED SKILLS AND KNOWLEDGE

procedures

- risk controls for the specific learning environment

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- carry out a minimum of three training sessions, involving demonstrating and instructing particular work skills for different groups; with each session addressing:
 - different learning objectives
 - a range of techniques and effective communication skills appropriate to the audience.

Context of and specific resources for assessment

Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.

Method of assessment**Guidance information for assessment**

For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement**RANGE STATEMENT**

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Learner characteristics</i> may include:	<ul style="list-style-type: none"> • language, literacy and numeracy levels • learning styles • past learning and work experiences • specific needs • workplace culture.
<i>Safe learning environment</i> may include:	<ul style="list-style-type: none"> • exit requirements • personal protective equipment • safe access • safe use of equipment.
<i>Instruction and demonstration objectives</i> may include:	<ul style="list-style-type: none"> • competencies to be achieved • generic and technical skills, which may be: <ul style="list-style-type: none"> • provided by the organisation • developed by a colleague • individual or group objectives • learning outcomes.
<i>Learning resources</i> may include:	<ul style="list-style-type: none"> • any material used to support learning, such as: <ul style="list-style-type: none"> • learner and user guides • trainer and facilitator guides • example training programs • specific case studies • professional development materials • assessment materials • a variety of formats • those produced locally • those acquired from other sources.
<i>Learning materials</i> may include:	<ul style="list-style-type: none"> • handouts for learners • materials sourced from the workplace, e.g. workplace documentation, operating procedures, and specifications.
<i>Details</i> may include:	<ul style="list-style-type: none"> • location and time • outcomes of instruction or demonstration • reason for instruction or demonstration • who will be attending instruction session.

RANGE STATEMENT	
<i>OHS procedures</i> may include:	<ul style="list-style-type: none"> • emergency procedures • hazards and their means of control • incident reporting • use of personal protective equipment • safe work practices • safety briefings • site-specific safety rules.
<i>Delivery techniques</i> may include:	<ul style="list-style-type: none"> • coaching • demonstration • explanation • group or pair work • providing opportunities to practise skills and solve problems • questions and answers.
<i>Coaching</i> may include:	<ul style="list-style-type: none"> • learning arrangements requiring immediate interaction and feedback • on-the-job instruction and 'buddy' systems • relationships targeting enhanced performance • short-term learning arrangements • working on a one-to-one basis.
<i>Measures</i> may include:	<ul style="list-style-type: none"> • informal review or discussion • learner survey • on-the-job observation • review of peer coaching arrangements.

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret learning environment and delivery requirements	1.1. Access, read and interpret <i>learning program documentation</i> to determine delivery requirements 1.2. Use available information and documentation to identify group and individual learner needs and learner characteristics 1.3. Identify and assess constraints and risks to delivery 1.4. Confirm personal role and responsibilities in planning and delivering training with relevant personnel
2. Prepare session plans	2.1. Refine existing learning objectives according to program requirements and specific needs of individual learners 2.2. Develop <i>session plans</i> and document these for each segment of the learning program 2.3. Use knowledge of learning principles and theories to generate ideas for managing session delivery
3. Prepare resources for delivery	3.1. Contextualise existing learning materials to meet the needs of the specific learner group 3.2. Finalise learning materials and organise facility, technology and equipment needs in time for delivery of learning sessions 3.3. Confirm overall delivery arrangements with relevant personnel
4. Deliver and facilitate training sessions	4.1. Conduct each session according to session plan, modified where appropriate to meet learner needs 4.2. Use the diversity of the group as another resource to

ELEMENT	PERFORMANCE CRITERIA
	support learning 4.3. Employ a range of delivery methods as training aids to optimise learner experiences 4.4. Demonstrate effective facilitation skills to ensure effective participation and group management
5. Support and monitor learning	5.1. Monitor and document learner progress to ensure outcomes are being achieved and individual learner needs are being met 5.2. Make adjustments to the delivery sessions to reflect specific needs and circumstances 5.3. Manage <i>inappropriate behaviour</i> to ensure learning can take place 5.4. Maintain and store learner records according to organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- presentation skills to ensure delivery is engaging and relevant, including:
 - synthesising information and ideas
 - preparing equipment, such as data projectors and computer presentation applications
 - speaking with appropriate tone and pitch
 - using language appropriate to audience
 - encouraging and dealing appropriately with questions
- group facilitation skills to ensure that:
 - every individual has an opportunity for participation and input
 - group cohesion is maintained
 - behaviour that puts others at risk is observed, interpreted and addressed
 - discussion and group interaction are enhanced
- conflict resolution and negotiation skills to:
 - identify critical points, issues, concerns and problems
 - identify options for changing behaviours
- oral communication and language skills to:

REQUIRED SKILLS AND KNOWLEDGE

- motivate learners to transfer skills and knowledge
- engage with the learner
- interpersonal skills to maintain appropriate relationships and ensure inclusivity
- observation skills to monitor individual and group progress

Required knowledge

- introductory knowledge of learning theories
- sound knowledge of learning principles
- sound knowledge of learner styles
- industry area and subject matter of the delivery
- learner group profile, including characteristics and needs of individual learners in the group
- content and requirements of the learning program and/or delivery plan
- different delivery methods and techniques appropriate to face-to-face group delivery
- techniques for the recognition and resolution of inappropriate behaviours
- behaviours in learners that may indicate learner difficulties
- organisational record-management systems and reporting requirements
- evaluation and revision techniques
- specific resources, equipment and support services available for learners with special needs
- relevant policy, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector
- OHS relating to the facilitation of group-based learning, including:
 - assessment and risk control measures
 - reporting requirements for hazards
 - safe use and maintenance of relevant equipment
 - emergency procedures
 - sources of OHS information
 - role of key workplace persons
- policies and procedures relevant to the learning environment

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none"> • facilitate group-based learning by preparing and delivering a series of training sessions, including: <ul style="list-style-type: none"> • at least two consecutive sessions, of a duration commensurate with a substantive training session (e.g. 40-60 minutes), that follow one of the learning program designs • at least one session delivered to a different learner group, with evidence of how the characteristics and needs of this group were addressed • identify and respond to diversity and individual needs • access and use documented resources and support personnel to guide inclusive practices.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided. Assessment must ensure access to: <ul style="list-style-type: none"> • training products, such as training packages and accredited course documentation.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different

RANGE STATEMENT	
work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<i>Learning program documentation</i> may include:	<ul style="list-style-type: none"> • competencies or other benchmarks to be achieved • for each chunk or segment of the learning program: <ul style="list-style-type: none"> • specific learning outcomes derived from the benchmarks • overview of content to be covered • learning resources, learning materials and activities • delivery methods • number and duration of training sessions or classes required, and overall timelines • OHS issues to be addressed in delivery • identification of assessment points to measure learner progress • assessment methods and tools to be used to collect evidence of competency, where assessment is required.
<i>Session plans</i> may include:	<ul style="list-style-type: none"> • outline of objectives and content to be addressed • plan of delivery methods and learning activities to be used within the session • timelines and duration for each learning activity • formative assessment points and opportunities • learning materials required.
<i>Inappropriate behaviour</i> may include:	<ul style="list-style-type: none"> • violent or inappropriate language • verbal or physical abuse or bullying • insensitive verbal or physical behaviour towards other learners or the trainer/facilitator, including cultural, racial, disability or gender-based insensitivities • dominant or overbearing behaviour • disruptive behaviour • non-compliance with safety instructions.

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish effective work environment for learning	1.1. Establish and agree upon objectives and scope of the work-based learning 1.2. Analyse work practices and routines to determine their effectiveness in meeting established learning objectives 1.3. Identify and address <i>OHS implications</i> of using work as the basis for learning
2. Develop a work-based learning pathway	2.1. Address <i>contractual requirements</i> and responsibilities for learning at work 2.2. Arrange for integration and monitoring of external learning activities with the <i>work-based learning pathway</i> 2.3. Obtain agreement from relevant personnel to implement the work-based learning pathway
3. Establish the learning-facilitation relationship	3.1. Identify context for learning and individual's learning style 3.2. Select appropriate technique or process to facilitate learning and explain the basis of the technique to learner 3.3. Develop, document and discuss <i>individualised learning plan</i> with learner 3.4. Access, read and interpret documentation outlining the OHS responsibilities of the various parties in the

ELEMENT	PERFORMANCE CRITERIA
	<p>learning environment</p> <p>3.5. Monitor supervisory arrangements appropriate to learner's levels of knowledge, skill and experience to provide support and encouragement and ensure learner's health and safety</p>
<p>4. Implement work-based learning pathway</p>	<p>4.1. Sequence introduction of workplace tasks, activities and processes to reflect the agreed work-based learning pathway</p> <p>4.2. Explain objectives of work-based learning and the processes involved to learner</p> <p>4.3. Encourage learner to take responsibility for learning and to self-reflect</p> <p>4.4. Develop techniques that facilitate learner's transfer of skills and knowledge</p>
<p>5. Maintain and develop the learning/facilitation relationship</p>	<p>5.1. Prepare for each session</p> <p>5.2. Structure learning activities to support and reinforce new learning, build on strengths, and identify areas for further development</p> <p>5.3. Observe learner cues and change approaches where necessary to maintain momentum</p> <p>5.4. Practise <i>ethical behaviour</i> at all times</p> <p>5.5. Monitor effectiveness of the learning/facilitation relationship through regular meetings between the parties</p>
<p>6. Close and evaluate the learning/facilitation relationship</p>	<p>6.1. Carry out the closure smoothly, using appropriate interpersonal and communication skills</p> <p>6.2. Seek feedback from learner on the outcomes achieved and value of the relationship</p> <p>6.3. Evaluate and document process, including <i>impact, self evaluation and reflection</i>, and file according to legal and organisational requirements</p>
<p>7. Monitor and review the effectiveness of the work-based learning pathway</p>	<p>7.1. Document work performance and learning achievement and keep records according to organisational requirements</p> <p>7.2. Evaluate effectiveness of the work-based pathway against the objectives, processes and techniques used</p> <p>7.3. Recommend improvements to work-based practice in light of the review process</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- oral communication and language skills to:
 - motivate the learner
 - transfer skills and knowledge
- interpersonal skills to maintain appropriate relationships
- observation skills to monitor individual progress
- literacy skills to:
 - read and interpret organisational documents, legal documents and contracts
 - complete and maintain documentation
- organisational skills to provide guidance and feedback to individuals
- communication skills, including:
 - using effective verbal and non-verbal language
 - using critical listening and questioning techniques
 - giving constructive and supportive feedback
 - assisting learners to paraphrase advice or instructions back to the trainer/facilitator
 - providing clear and concrete options and advice
 - using appropriate industry/profession terminology and language
 - ensuring language, literacy and numeracy used is appropriate to learners

Required knowledge

- systems, processes and practices within the organisation where work-based learning is taking place
- operational demands of the work and impact of changes on work roles
- organisational work culture, including industrial relations environment
- systems for identifying skill needs
- introductory knowledge of different learning styles and how to encourage learning in each, for example:
 - visual learners
 - audio learners
 - kinaesthetic learners
 - theoretical learners
- relevant policy, legislation, codes of practice and national standards that may affect training and assessment in the vocational education and training sector
- OHS relating to the work role, including:
 - hazards relating to the industry and specific workplace

REQUIRED SKILLS AND KNOWLEDGE

- reporting requirements for hazards and incidents
- specific procedures for work tasks
- safe use and maintenance of relevant equipment
- emergency procedures
- sources of OHS information

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- prepare and facilitate work-based learning
- provide evidence of a minimum of two examples of developing work-based learning pathways, that include:
 - identifying needs for learning
 - analysing work practices, work environment and work activities
 - organising and allocating work in a way that reflects learning needs and provides effective learning opportunities through work processes
- provide a minimum of two examples of a learning facilitation relationship being conducted:
 - with different individuals
 - demonstrating communication skills and flexibility
 - demonstrating one or more of the processes or techniques identified.

Context of and specific resources for assessment

Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be

EVIDENCE GUIDE	
	provided. Assessment must ensure access to information about work activities.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>OHS implications</i> may include:	<ul style="list-style-type: none"> • OHS obligations • workplace OHS policies and procedures • ensuring work practices, routines and proposed changes do not pose a risk to learners and others.
<i>Contractual requirements</i> may include:	<ul style="list-style-type: none"> • training plans under apprenticeships/traineeships • requirements of government-funded training programs, such as Workplace English Language and Literacy (WELL).
<i>Work-based learning pathway</i> may include:	<ul style="list-style-type: none"> • identifying specific goals for work-based learning • identifying job tasks or activities to be included in learning process • appropriate sequencing of job tasks/activities to reflect learner incremental development • direct guidance and modelling from experienced co-workers and experts • opportunities for practice.
<i>Individualised learning plan</i> may include:	<ul style="list-style-type: none"> • information about individual's learning style, learner characteristics, and the context for learning • clear boundaries and expectations of the learning/facilitation relationship • documented equity or additional support needs for the

RANGE STATEMENT	
	learner <ul style="list-style-type: none"> • performance benchmarks to be achieved • activities and processes which together will achieve the benchmarks.
<i>Ethical behaviour</i> includes:	<ul style="list-style-type: none"> • trust • integrity • privacy and confidentiality of the session • following organisational policies • knowing own limitations • having a range of other intervention referrals ready when needed • honesty • fairness to others.
<i>Impact</i> may be:	<ul style="list-style-type: none"> • successful achievement, rate of achievement, or lack of achievement of identified goals • achievement of other outcomes as a result of the relationship • development of new goals • new or increased motivation to learn • greater capacity to learn • increase in learner's self-confidence.
<i>Self-evaluation and reflection</i> may include:	<ul style="list-style-type: none"> • asking critical questions about: <ul style="list-style-type: none"> • own ability • what worked or didn't work • how the relationship building process could be improved • reviewing records and journals on sessions and critically evaluating own performance • reviewing feedback from learner and identifying critical aspects and areas for improvement.

TAEDEL404A Mentor in the workplace

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to establish and develop a professional mentoring relationship with a learner, in particular an apprentice or trainee employed by, or undertaking work placement in, a workplace. It includes establishing the need for mentoring, developing a mentoring plan/framework, facilitating and monitoring the mentoring relationship, and evaluating the effectiveness of mentoring.
------------------------	--

Application of the Unit

Application of the unit	This unit typically applies to workplace supervisors or other work colleague with responsibility for mentoring in the workplace.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop a mentoring plan	1.1. Identify scope and boundaries of the <i>mentoring</i> relationship according to organisational procedures 1.2. Establish <i>ground rules</i> and negotiate realistic expectations 1.3. Establish and maintain confidentiality of the relationship in accordance with <i>legislation, policy and procedures</i>
2. Facilitate mentoring relationship	2.1. Develop learner's confidence, self-esteem, respect and trust in the mentoring relationship 2.2. Share personal experiences and knowledge with the person being mentored according to agreed objectives 2.3. Support the person being mentored to develop and use skills in problem solving and decision making 2.4. Use personal and professional networks to assist the person being mentored 2.5. Provide information, guidance and constructive guidance to enhance engagement in the workplace 2.6. Use <i>techniques for resolving differences</i> without damaging the relationship, and obtain assistance according to organisational policy and procedures
3. Monitor mentoring relationship	3.1. Provide planning assistance and guidance as requested by the person being mentored in a form

ELEMENT	PERFORMANCE CRITERIA
	<p>and style to suit their requirements</p> <p>3.2. Provide feedback to the person being mentored on progress towards achieving the expectations and goals of the mentoring process</p> <p>3.3. Recognise and discuss changes in the <i>mentoring relationship</i> with appropriate <i>stakeholders</i></p> <p>3.4. Negotiate and manage closure of the mentoring arrangement once objectives have been met</p>
4. Evaluate effectiveness of mentoring	<p>4.1. Establish and discuss <i>benefits</i> gained from the mentoring process</p> <p>4.2. Reflect on and articulate the personal benefits gained from providing mentoring</p> <p>4.3. Identify and report the outcomes of the mentoring arrangement and the <i>benefits to the organisation</i> according to organisational policy and procedures to improve the mentoring system or program</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- planning and time-management skills to mentor in a workplace
- oral communication and language skills to motivate learners
- organisational skills to provide guidance and feedback to individuals
- interpersonal skills to:
 - engage in relationship building, including building trust and maintaining confidentiality
 - respond to diversity, including gender and disability
- communication skills to use a range of communication strategies, including listening, questioning, and giving and receiving feedback
- initiative and enterprise skills to apply procedures relating to OHS and environmental legislation in the context of workplace mentoring

Required knowledge

- relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring
- training contracts and responsibilities of employer, registered training organisation

REQUIRED SKILLS AND KNOWLEDGE

- (RTO) and funding body
- training plans and responsibilities
 - training products and strategies for learning
 - mentoring methodologies and strategies
 - acceptable behaviour in the mentoring relationship
 - equal employment opportunity, equity and diversity principles
 - OHS relating to the work role, including:
 - hazards relating to the industry and specific workplace
 - reporting requirements for hazards and incidents
 - specific procedures for work tasks
 - safe use and maintenance of relevant equipment
 - emergency procedures
 - sources of OHS information

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- prepare a mentoring plan between the mentor and learner that reflects the scope and substance expected within a plan prepared for a learner undertaking a contracted apprenticeship or traineeship
- facilitate at least three mentoring sessions
- provide information on sessions, including comments and notes from both mentor and learner.

Context of and specific resources for assessment

Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be

EVIDENCE GUIDE	
	provided.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Mentoring</i> may include:	<ul style="list-style-type: none"> • long-term focus on personal growth and learning • wide range of learning oriented to: <ul style="list-style-type: none"> • support • guidance in personal or career growth • relationship, not just a procedure or activity • one person professionally assisting the career development of another.
<i>Ground rules</i> may include:	<ul style="list-style-type: none"> • training for mentoring partners • mentoring agreement • active involvement of both partners in the mentoring process.
<i>Legislation, policy and procedures</i> may include:	<ul style="list-style-type: none"> • commonwealth and state or territory legislation and regulations, such as: <ul style="list-style-type: none"> • privacy legislation • equal employment opportunity, anti-discrimination and harassment legislation • OHS legislation • user choice • organisational policy, procedures and protocols.
<i>Techniques for resolving differences</i>	<ul style="list-style-type: none"> • finding a mutually beneficial solution • self-disclosure

RANGE STATEMENT	
may include:	<ul style="list-style-type: none"> • inviting discussion • providing explanations • accessing assistance.
<i>Mentoring relationship</i> may include:	<ul style="list-style-type: none"> • informal workplace development program • formal mentoring process associated with a contracted apprenticeship or traineeship, involving a formal training plan.
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> • trainee or apprentice • manager or supervisor • RTO • learning support services, including assistive technology and diagnostic testing • funding organisation • supplier of learning resources.
<i>Benefits</i> may include:	<ul style="list-style-type: none"> • insights into organisational culture, attitudes and expected behaviours • supportive environment in which successes and failures can be evaluated • networking opportunities • development of workplace competence and self-confidence • recognition and job satisfaction • mutual respect.
<i>Benefits to the organisation</i> may include:	<ul style="list-style-type: none"> • increased productivity • new competencies in the person being mentored • staff motivation • more committed, involved and responsible learners.

--	--

ELEMENT**PERFORMANCE CRITERIA**

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Plan and prepare evaluation	<p>1.1 Document the <i>aim and scope of the evaluation</i> study</p> <p>1.2 Identify the <i>data and information</i> required and access sources of information</p> <p>1.3 Establish a project plan and timelines which identify tasks and <i>stakeholders in the evaluation process</i></p> <p>1.4 Select and brief staff to be involved</p> <p>1.5 Establish constructive relationships with the stakeholders identified in the evaluation plan</p>
2. Collect and collate evaluation data and information for a training program	<p>2.1 Identify the most appropriate <i>technique(s) for gathering quantitative and qualitative data and information</i></p> <p>2.2 Develop <i>evaluation instruments</i> to gather data and information</p> <p>2.3 Arrange workplace visits and meetings, and access to data and information</p> <p>2.4 Collect data and information and store in compliance with the record keeping and privacy policies and procedures of the organisation</p> <p>2.5 Identify and record potentially useful information which is not identified in the evaluation plan</p> <p>2.6 Collate and process data relevant to the evaluation</p>
3. Analyse evaluation data and information and make conclusions	<p>3.1 Analyse the data and information to identify the outcomes of training and their impact on workforce capability</p> <p>3.2 Cross-check findings where possible by comparing with the results from different evaluation instruments</p> <p>3.3 Develop conclusions about the effectiveness and efficiency of the training program, as per the evaluation aim and scope</p> <p>3.4 Document areas of training that are satisfactory and those requiring improvement</p> <p>3.5 Identify factors affecting performance and suggest possible enhancements or <i>alternatives to the training program</i></p>
4. Report on the conclusions and	<p>4.1 Document issues and conclusions arising from the analysis conducted</p>

recommendations of the evaluation	<p>4.2 Make recommendations to stakeholders on <i>areas of possible improvement</i></p> <p>4.3 Discuss preliminary findings with stakeholders</p> <p>4.4 Produce an evaluation report and distribute to all stakeholders</p>
-----------------------------------	--

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analysis and interpretation skills to:
 - evaluate information management systems, policies and procedures of an organisation
 - select relevant evaluation information and documentation
 - access and interpret the organisation's standards and values
 - analyse records/notes of the evaluation process
- communication skills to:
 - explain the evaluation process
 - give clear and precise instructions and advice
 - discuss the evaluation process with other relevant people
 - seek information relevant to the evaluation
 - discuss the evaluation outcome with the stakeholders
- language and literacy skills to:
 - interpret training program requirements (including, where appropriate AQTF requirements)
 - develop resources to support the evaluation process
 - communicate with key stakeholders
 - produce and maintain documentation
- planning and organising skills to:
 - plan projects
 - plan and sequence work programs
 - coordinate the work of self and others
- research and evaluation skills to investigate training and workforce data, and determine and implement appropriate improvement.

Required knowledge

- Commonwealth and state/territory legislation, codes of practice and standards, for example:
 - Training Packages and accredited courses, and what comprises quality training and assessment services
 - how training and/or assessment organisations operate

- terminology relating to quality evaluation processes
- evaluation models/methods, including the Kirkpatrick Model
- records management systems of the organisation
- other relevant policy, legislation, codes of practice and national standards, including Commonwealth and state/territory legislation, for example:
 - plagiarism
 - copyright and privacy laws
 - security of information and confidentiality requirements
 - duty of care, as it relates to coordinating personnel and learning
 - the industrial relations system, industry/workplace relations and industrial awards/enterprise agreements
 - anti-discrimination legislation, including equal opportunity, racial vilification and disability discrimination
 - vocational education and training systems
 - OHS relating to planning and conducting an evaluation.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • evaluate a training program against workforce performance needs and capability requirements • produce an evaluation report that addresses all phases of the evaluation process including recommendations on areas for improvement • critically review the evaluation process and approaches taken and propose changes to improve the process.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Aim of the evaluation study</i> may include:</p>	<ul style="list-style-type: none"> • evaluating the effectiveness of the training in meeting workforce needs • estimating the cost effectiveness of the training provided • evaluating outcomes of a learning or assessment process or product • determining or trialling new processes/products • establishing client satisfaction • ensuring learning/assessment strategies and programs are relevant to client needs and capability requirements • determining resource requirements • providing solutions to organisational performance problems.
<p><i>Scope of the evaluation study</i> may include:</p>	<ul style="list-style-type: none"> • whole of training and/or assessment of the RTO • specific training and/or assessment services • specific training and/or assessment products • specific aspects of training and/or assessment systems • partner organisation arrangements • workforce training needs.
<p><i>Data and information to be gathered</i> may include:</p>	<ul style="list-style-type: none"> • work performance • workplace productivity • employer feedback • trainee feedback.
<p><i>Stakeholders in the evaluation process</i> may include:</p>	<ul style="list-style-type: none"> • employer organisations • training graduates • workplace supervisors and managers • trainers and assessors • training designers • HR managers.
<p><i>Technique(s) for gathering data/information</i> may include:</p>	<ul style="list-style-type: none"> • surveys • group discussion sessions • researching of organisational performance data

	<ul style="list-style-type: none"> • conducting interviews with course graduates, their supervisors and managers, trainers/ facilitators and assessors • examining the organisations documents and systems, such as: <ul style="list-style-type: none"> • policies and procedures • learning and assessment strategies • training/assessment records • course evaluation questionnaires • resources for delivery and assessment including assessment tools.
<i>Evaluation instruments</i> may include:	<ul style="list-style-type: none"> • surveys • feedback forms • work performance specifications • questionnaires • diaries • logs • discussion group questions.
<i>Alternatives to the training program</i> may include:	<ul style="list-style-type: none"> • job redesign • change in supervision arrangements or work support • individual mentoring • communication and information campaign, e.g. posters, brochures • job aids, e.g. manuals • standard operating procedures (SOPs).
<i>Areas of possible improvement</i> may include:	<ul style="list-style-type: none"> • analysis of skills requirements and training needs • design of training and assessment strategies • training materials development • training delivery methods and resources • assessment methods and tools • employer and trainee liaison and management.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to package goods in accordance with regulatory and workplace requirements including selecting materials, packing and unwrapping products, and labelling packaged products/loads to the required labelling standards. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the packaging of goods.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the packaging of goods as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Select materials and pack and unwrap products

- 1.1 Packaging specifications and order packaging documentation are correctly interpreted
- 1.2 Appropriate packaging technology suitable for the goods to be packed is selected
- 1.3 Packaging materials are identified and matched to specifications
- 1.4 Work plan ensures materials are used economically and that appropriate packaging is used that minimises loss and damage in transit or storage
- 1.5 Work is planned in accordance with OH&S requirements
- 1.6 Completed packed goods are stacked to minimise damage from within and outside

2 Label packaged products/loads

- 2.1 Workplace labelling standards are identified
- 2.2 Appropriate goods handling, labelling and other identification symbols are utilised
- 2.3 Invoices and picking slips are attached (where required)
- 2.4 Workplace documentation is completed

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to the packaging of goods including the Australian Dangerous Goods Code (ADG Code)

REQUIRED KNOWLEDGE AND SKILLS

- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the packaging of goods
- Focus of operation of work systems, equipment, management and site operating systems for the packaging of goods
- Problems that may occur when packaging goods and appropriate action that can be taken to resolve the problems
- Documentation requirements for the packaging of goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when packaging goods
- Read and interpret instructions, procedures and labels relevant to the packaging of goods
- Complete documentation related to work activities when packaging goods
- Work collaboratively with others when packaging goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when packaging goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events that may occur when packaging goods
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of equipment when packaging goods
- Check operation of packaging equipment in terms of service schedule and standard operating procedures
- Select and use relevant communications, computing equipment and materials when packaging goods
- Estimate the size, shape and special requirements of goods and loads

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Goods may involve:
- special handling, storage and/or packaging requirements, including temperature controlled goods and dangerous goods
- Hazards in the work area may include exposure to:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
 - oil or water on floor
 - a fire or explosion
 - damaged packaging or pallets
 - debris on floor
 - faulty racking
 - poorly stacked pallets
 - faulty equipment
- Consultative processes may involve:
- other employees and supervisors
 - suppliers, customers and clients
 - relevant authorities and institutions
 - management and union representatives
 - industrial relations and OH&S specialists
 - other maintenance, professional or technical staff
- Communication in the work area may include:
- phone
 - electronic data interchange (EDI)
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the
- company procedures
 - enterprise procedures

RANGE STATEMENT

local terminology used, workplace procedures may include:

- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Information/documents may include:

- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes
- codes of practice and regulations relevant to the packaging of goods
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- dangerous goods declarations and material safety data sheets (where applicable)
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- relevant codes and regulations for the packaging of goods
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian and International Explosives Codes
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- marine orders
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations

| 3 Record stock levels | <ul style="list-style-type: none"> 3.1 Storage areas are checked and stocks are noted for replenishment in accordance with workplace procedures 3.2 Workplace records are completed in accordance with workplace requirements |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to the picking and processing of orders, including relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the picking and processing of orders
- Focus of operation of work systems, equipment, management and site operating systems for the picking and processing of orders
- Problems that may occur when picking and processing an order and appropriate action that can be taken to resolve the problems
- Documentation and record requirements when picking and processing an order
- Equipment used during picking and processing operations and the precautions and procedures that should be followed in its use
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when picking and processing orders
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures, signs and labels relevant to the picking and processing of orders
- Complete documentation related to picking and processing orders
- Identify relevant stock and goods coding and labelling, including ADG and IMDG markings
- Work collaboratively with others when picking and processing orders
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when picking and processing orders in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when picking and processing orders
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when picking and processing orders
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Required skills:

- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use relevant equipment and communications technology when picking and processing orders
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Estimate the size, shape and special requirements of goods/loads

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation

EVIDENCE GUIDE

- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:

- by day or night
- in a range of work environments

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites

Work may be conducted in:

- limited or restricted spaces
- exposed conditions
- controlled or open environments

Problems that may occur when picking and processing an order include:

- wrong stock is picked
- wrong carton for order
- incorrect location
- damaged stock
- no stock at location
- incorrect quantity
- failing to meet a special order requirement

Special order requirements may include:

- pricing
- special packing
- specific size of carton
- special categories of stock

Hazards in the work area may include exposure to:

- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials
- oil or water on floor
- a fire or explosion

RANGE STATEMENT

- Consultative processes may involve:
- damaged packaging or pallets
 - debris on floor
 - faulty racking
 - poorly stacked pallets

- Communication in the work area may include:
- phone
 - electronic data interchange (EDI)
 - fax
 - email
 - internet
 - RF communications
 - barcode readers
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Information/documents may include:
- goods identification numbers and codes
 - manifests, picking slips, merchandise transfers, stock requisitions and bar codes
 - manufacturers specifications for equipment/tools
 - workplace procedures and policies
 - supplier and/or client instructions
 - material safety data sheets
 - codes of practice including the National Standards for Manual Handling and the Industry Safety Code
 - relevant legislation, regulations and related documentation
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements

RANGE STATEMENT

Applicable regulations and legislation may include:

- quality assurance procedures
- emergency procedures
- relevant codes and regulations pertaining to the picking and processing of orders
- Australian Dangerous Goods Code
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- workplace relations regulations
- workers compensation regulations

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to receive goods in accordance with regulatory and workplace requirements, including identifying workplace procedures and documentation requirements for the receipt of goods; checking and inspecting goods on arrival and completing workplace documentation; and unloading, packing and storing stock. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the receiving of goods.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the receiving of goods as part of work activities in the warehousing, distribution and/or storage industries.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|---|
| 1 Identify workplace procedures and documentation requirements for the receipt of goods | <p>1.1 Workplace procedures for receipt of goods are identified</p> <p>1.2 Purpose of documents associated with the receipt of goods is interpreted</p> <p>1.3 Workplace documentation requirements for the receipt of goods and reporting of damage are identified</p> |
| 2 Check and inspect goods on arrival and complete workplace documentation | <p>2.1 Procedures for checking of goods in comparison with orders or manifests are identified and followed</p> <p>2.2 Discrepancies and/or damaged goods are reported</p> <p>2.3 Non-conforming goods are appropriately documented and despatched or stored in accordance with company procedures</p> |
| 3 Unload, unpack and store stock | <p>3.1 Appropriate manual handling techniques and equipment are identified</p> <p>3.2 Safe work procedures are used when unloading, unpacking and storing stock</p> <p>3.3 Advice on appropriate storage locations and requirements for particular products is sought</p> <p>3.4 Goods are unloaded and unpacked in accordance with workplace procedures</p> <p>3.5 Assistance from others is sought when required to maintain safe and effective work</p> <p>3.6 Directions are followed to store stock in appropriate areas</p> |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to the receiving of goods including the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the receiving of goods
- Focus of operation of work systems, equipment, management and site operating systems for the receiving of goods
- Problems that may occur when receiving goods and appropriate action that can be taken to resolve the problems
- Specifications and standards for the checking and inspection of received goods
- Documentation requirements for the receiving of goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when receiving goods
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures, information, labels and signs relevant to receiving goods
- Complete documentation related to the receipt of goods
- Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels
- Work collaboratively with others when receiving goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when receiving goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when receiving goods
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when receiving goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or

Required skills:

- damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use relevant load handling equipment when receiving goods
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Estimate the size, shape and special requirements of goods and loads

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation

EVIDENCE GUIDE

- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|--|--|
| Work may be conducted: | <ul style="list-style-type: none">• in a range of work environments• by day or night |
| Customers may be: | <ul style="list-style-type: none">• internal or external |
| Workplaces may comprise: | <ul style="list-style-type: none">• large, medium or small worksites |
| Work may be conducted in: | <ul style="list-style-type: none">• limited or restricted spaces• exposed conditions• controlled or open environments |
| Received goods may involve: | <ul style="list-style-type: none">• special handling and storage requirements, including temperature controlled goods and dangerous goods |
| Problems that may occur when receiving goods may include: | <ul style="list-style-type: none">• damaged stock• damaged pallets or packaging• wrong stock• error in paperwork• poorly stacked stock• incorrect quantity |
| Aspects of goods to be checked when receiving goods may include: | <ul style="list-style-type: none">• correct type• number• condition• quality• packaging• labelling• dangerous goods declarations and markings (where applicable) |

RANGE STATEMENT

Hazards in the work area may include exposure to:

- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials
- oil or water on floor
- fire or explosion
- damaged packaging or pallets
- debris on floor
- poorly stacked pallets
- faulty equipment

Consultative processes may involve:

- other employees and supervisors
- suppliers, customers and clients
- drivers and agents
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Communication in the work area may include:

- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- RF systems
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Information/documents may include:

- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes
- codes of practice and regulations relevant to the receiving of goods
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances

RANGE STATEMENT

Applicable regulations and legislation may include:

- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- dangerous goods declarations and material safety data sheets (where applicable)
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant codes and regulations for the receiving of goods
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - IATA Dangerous Goods by Air Regulations
 - Australian and international explosives codes
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- marine orders
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse order to identify work requirements	1.1 Order request and consignment note documentation is interpreted 1.2 Required schedules for despatch are identified 1.3 Product(s) in order are identified 1.4 Workplace and product knowledge is used to plan sequence of work 1.5 Appropriate materials handling equipment is selected within required OH&S regulations and timeframe for the despatch
2 Follow workplace order picking processes to prepare goods for despatch	2.1 Goods for despatch are selected, checking against product knowledge, labels and other identification systems 2.2 Products are sorted, assembled and consolidated 2.3 Orders are secured and placed in storage/despatch zones, in accordance with schedule 2.4 Order is checked against despatch schedule and order form
3 Complete despatch following workplace procedures and schedules	3.1 Workplace records are completed, and labels and appropriate documentation attached 3.2 Load labels and documentation are checked and loading is organised in accordance with workplace procedures and ADG Code (where applicable) 3.3 Final check of load labels and documentation is completed in accordance with requirements 3.4 Transportation requirements are described to driver where appropriate

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to despatch operations, including the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the organising of despatch operations
- Focus of operation of work systems, equipment, management and site operating systems for despatching goods
- Problems that may occur when despatching goods and appropriate action that can be taken to resolve the problems
- Documentation and record requirements for despatch operations
- Equipment used during despatch operations and the precautions and procedures that should be followed in its use
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when organising despatch operations
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the organising of despatch operations
- Complete documentation related to the organising of despatch operations
- Work collaboratively with others when organising despatch operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when organising despatch operations in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in goods and equipment in accordance with standard

Required skills:

operating procedures

- Select and use relevant equipment and communications technology when organising despatch operations
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Estimate the size, shape and special requirements of goods and loads

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---------------------------------------|---|
| 1 Prepare for stocktake | 1.1 Goods to be counted and appropriate inventory systems are identified
1.2 Required resources including equipment and record keeping systems are identified
1.3 Allocated tasks, zones and work requirements are identified
1.4 Sequence work role is planned in a time effective manner |
| 2 Stocktake and count stock | 2.1 Stocktaking and cyclical counts are undertaken in accordance with enterprise policies and procedures
2.2 Inventory data is interpreted
2.3 Inventory data is confirmed to match stock
2.4 Stock levels are accurately counted and documented |
| 3 Identify stock discrepancies | 3.1 Discrepancies in type, number and quality of stock are accurately recorded and documented
3.2 Products stored in inappropriate storage locations are relocated and stock records adjusted |
| 4 Complete documentation | 4.1 Inventory data is reconciled to match warehouse stock in accordance with company procedures
4.2 Workplace documentation is completed |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

REQUIRED KNOWLEDGE AND SKILLS

- Australian codes and regulations relevant to the conduct of stocktakes
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the conduct of stocktakes
- Focus of operation of work systems, equipment, management and site operating systems for the conduct of stocktakes
- Workplace processes for records management and the production of stocktake reports
- Principles of operation and functions of stocktake systems
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when conducting stocktakes
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the conduct of stocktakes
- Complete documentation related to the conduct of stocktakes
- Work collaboratively with others when conducting stocktakes
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when conducting stocktakes in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use relevant communication, computing and office equipment when conducting stocktakes
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to the completion of receipt/despatch documentation, including the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the completion of receipt/despatch documentation
- Focus of operation of work systems, equipment, management and site operating systems for the receiving and despatch of goods
- Problems that may occur when completing receipt and despatch documentation and appropriate action that can be taken to resolve the problems
- Specifications and standards for the checking and inspection of received and despatched goods
- Documentation requirements for the receipt and despatch of goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when completing receipt and despatch documentation
- Read and interpret instructions, procedures and labels relevant to the completion of receipt and despatch documentation
- Complete receipt and despatch documentation
- Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels
- Work collaboratively with others when completing receipt and despatch documentation
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when completing receipt and despatch documentation in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use relevant computer, communication and office equipment when completing receipt and despatch documentation

Required skills:

- Estimate the size, shape and special requirements of goods and loads

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills

RANGE STATEMENT

Consultative processes may involve:

- damaged packaging or pallets
- debris on floor
- poorly stacked pallets
- faulty equipment
- other employees and supervisors
- suppliers, customers and clients
- drivers and agents
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Communication in the work area may include:

- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- RF systems
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Information/documents may include:

- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes
- codes of practice and regulations relevant to the receiving of goods
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions

RANGE STATEMENT

Applicable regulations and legislation may include:

- dangerous goods declarations and material safety data sheets (where applicable)
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant codes and regulations for the receiving of goods
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - IATA Dangerous Goods by Air Regulations
 - Australian and international explosives codes
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- marine orders
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to coordinate stocktakes in accordance with workplace requirements including planning stocktakes, coordinating stocktake activities, identifying stock discrepancies, and adjusting documentation in accordance with workplace procedures and relevant regulatory requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements when coordinating stocktakes.

Work is performed under some supervision generally within a team environment. It involves the application of product knowledge and an understanding of relevant workplace procedures and regulatory requirements when coordinating stocktakes as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Plan stocktake

- 1.1 Goods to be counted and appropriate inventory systems are identified
- 1.2 Required resources including equipment, record keeping systems and personnel are identified
- 1.3 Members of the team are instructed and assisted
- 1.4 Team members are allocated to particular tasks and zones and given clear directions for work requirements
- 1.5 Sequence and operations of the stocktake are planned in a time effective manner

2 Coordinate stocktake

- 2.1 Stocktaking and cyclical counts are coordinated in accordance with workplace policies and procedures
- 2.2 Inventory data is interpreted
- 2.3 Inventory data is confirmed to match stock
- 2.4 Stock levels are accurately counted and documented

3 Identify stock discrepancies

- 3.1 Discrepancies in type, number and quality of stock are accurately recorded and documented
- 3.2 Possible reasons for discrepancies are identified
- 3.3 Products stored in inappropriate storage locations are relocated and stock records are adjusted in accordance with workplace procedures

4 Adjust documentation

- 4.1 Inventory data is reconciled to match warehouse stock in accordance with regulations, workplace practices, policies and procedures
- 4.2 Information is reconciled with audit requirements
- 4.3 Workplace documentation is completed

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian codes and regulations relevant to the coordination of stocktakes
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the coordination of stocktakes
- Focus of operation of work systems, equipment, management and site operating systems for the conduct of stocktakes
- Workplace processes for records management and the production of stocktake reports
- Principles and functions of stocktakes
- Problems that may occur when coordinating a stocktake and appropriate action that can be taken
- Computer records and documentation requirements for the coordination of stocktakes
- Housekeeping standards procedures required in the workplace
- Site layout

Required skills:

- Communicate effectively with others when coordinating stocktakes
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the coordination of stocktakes
- Complete documentation related to the coordination of stocktakes
- Work collaboratively with others when coordinating stocktakes
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when coordinating stocktakes in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or

Required skills:

- damage to goods or equipment
- Operate and adapt to differences in stock and equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant communications, computing and office equipment when coordinating stocktakes

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation

EVIDENCE GUIDE

- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:

- in a range of work environments
- by day or night

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites

Work may be conducted in:

- restricted spaces
- exposed conditions
- controlled or open environments

Equipment used in stocktaking may include:

- calculators
- scanners
- hand-held computers

Inventory systems may be:

- automated
- manual
- paper-based
- computerised
- microfiche

Categories or groups of products/stock may include:

- small parts
- perishable goods
- overseas export
- dangerous goods
- refrigerated products
- temperature controlled stock
- fragile goods

RANGE STATEMENT

The characteristics of products/stock may include:

- small parts
- toxicity
- flammability
- form
- weight
- size
- state
- perishability
- fragility
- security risk

Labelling systems may include:

- batch code
- bar code
- identification numbering systems
- serial numbers
- symbols for safe handling
- ADG and HAZCHEM Codes

Hazards in the work area may include:

- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials
- oil or water on floor
- a fire or explosion
- damaged packaging or pallets
- debris on floor
- faulty racking
- poorly stacked pallets
- faulty equipment

Communication in the work area may include:

- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- RF systems
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves
- safety headwear and footwear

RANGE STATEMENT

Consultative processes may involve:

- safety glasses
- two-way radios
- high visibility clothing
- other employees and supervisors
- suppliers, customers and clients
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Information/documents may include:

- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes
- codes of practice and regulations relevant to the identification, handling and stacking of goods
- Australian and international regulations and codes of practice for the handling, stacking and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- dangerous goods declarations and material safety data sheets (where applicable)
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant codes and regulations for the packaging of goods
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian and International Explosives Codes
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- relevant state/territory OH&S and environmental protection legislation

Applicable regulations and legislation may include:

RANGE STATEMENT

- workplace relations regulations
- workers compensation regulations

TLIA5029A Plan and manage storage of dangerous goods and hazardous substances

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to plan and manage the storage of dangerous goods and hazardous substances in accordance with all relevant regulatory requirements and workplace procedures including the current ADG Code. This includes defining the objectives of the required handling and storage operations; specifying equipment and system performance requirements; evaluating and selecting bulk handling and storage resources; and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with all the relevant regulations, standards and codes of practice, including the current ADG Code.

Work is under general guidance on progress and outcomes of work. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within workplace policy and procedures.

A range of opportunities may be used to develop the work area and to support the development of work systems, innovative strategies to deal with contingencies and to encourage the achievement of the workplace's goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource coordination and allocation and provides leadership of others individually or in teams.

Licensing/Regulatory Information

4 Complete documentation	4.1 Workplace documentation is completed as appropriate 4.2 Handling and storage requirements are documented and communicated to relevant personnel 4.3 Reports are compiled and forwarded to appropriate personnel

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant regulations, codes of practice and legislative requirements including local and international regulations relevant to handling and storage
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- Relevant OH&S and environmental protection procedures and regulations
- Workplace procedures for the planning and management of the storage of dangerous goods and hazardous substances
- Problems that may occur during the planning and management of the storage of dangerous goods and hazardous substances and action that can be taken to resolve or report the problems
- Hierarchy of risks and hazards related to the storage of dangerous goods and hazardous substances and ways of controlling the risks involved
- Focus of operation of work systems, resources, management and workplace operating systems
- Equipment applications, capacities, configurations, safety hazards and control mechanisms
- Relevant permit and licence requirements
- Application of all relevant Australian and International Standards
- Operational procedures for safe transfer and storage of dangerous goods and hazardous materials
- Resource availability including the competencies of individuals in the team and group
- Understanding and knowledge of the application of current competencies within functional activity

REQUIRED KNOWLEDGE AND SKILLS

- Coaching and mentoring approaches to support team members to share knowledge and skills
- Relevant workplace documentation procedures

Required skills:

- Communicate effectively with others when planning and managing the storage of dangerous goods and hazardous substances
- Read and interpret instructions, procedures, technical data, drawings, instructions and manuals relevant to the planning and management of storage of dangerous goods and hazardous substances
- Complete documentation related to the planning and management of the storage of dangerous goods and hazardous substances
- Provide leadership to others when planning and managing the storage of dangerous goods and hazardous substances
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise during the planning and management of the storage of dangerous goods and hazardous substances in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when planning and managing the storage of dangerous goods and hazardous substances
- Prioritise work and coordinate self and others in relation to activities
- Recognise hazards and apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Modify activities depending on differing operational contingencies, risk situations and environments
- Select and apply appropriate technology, information systems and procedures when planning and managing the storage of dangerous goods and hazardous substances

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

- Critical aspects for assessment and evidence required to**
- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the

EVIDENCE GUIDE

demonstrate competency in this unit

requirements of the elements and performance criteria of this unit and include demonstration of:

- planning and assessing options for the safe and efficient storage of dangerous goods and hazardous substances to regulatory requirements as a minimum
- identifying container markings and HAZCHEM codes
- completing documentation as required for the storage of dangerous goods and hazardous goods
- identifying potential hazards and planning work to minimise risks when storing dangerous goods and hazardous goods
- determining (any) required permits/licensing
- estimating weight and volume of goods to be stored and any special requirements
- undertaking a hazard analysis

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|--|---|
| Work may be undertaken in: | <ul style="list-style-type: none"> • various work environments in the bulk handling, dangerous goods and freight forwarding sections of the warehousing, storage, transport and distribution industries |
| Customers may be: | <ul style="list-style-type: none"> • internal or external |
| Operations may be conducted: | <ul style="list-style-type: none"> • by day or night |
| The workplace environment may involve: | <ul style="list-style-type: none"> • twenty-four hour operation • single and multi site location • large, medium and small workplaces |
| Work may involve: | <ul style="list-style-type: none"> • exposure to corrosive chemicals, solvents and adhesives, carcinogenic and other harmful substances • movement of equipment, goods, and vehicular traffic |
| Regulatory controls and workplace procedures: | <ul style="list-style-type: none"> • govern requirements for co-storage, volume, mass and required controls |
| Requirements for bulk handling and storage activities may include: | <ul style="list-style-type: none"> • types of bulk materials • quantities • handling requirements including any special equipment or operating procedures required • storage requirements • stock control methods • negating contaminant sources • controlling pest infestation |
| Requirements for work may include: | <ul style="list-style-type: none"> • site restrictions and procedures • use of safety and personal protective equipment • communications equipment • specialised lifting and/or handling equipment • incident/accident breakdown procedures • additional gear and equipment • noise restrictions • hours of operations • authorities and permits |
| Hazards may include: | <ul style="list-style-type: none"> • hazardous or dangerous materials • contamination of, or from, materials being handled |

RANGE STATEMENT

- fire/explosions
 - noise, light, energy sources
 - stationary and moving machinery, parts or components
 - radioactive goods
 - dust/vapours
 - service lines
 - spills, leakages, ruptures
- Hazard management is consistent with:
- the principle of hierarchy or control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
 - Personal protective equipment may include: gloves, safety headwear and footwear, safety glasses, mask and respirator, protective clothing, breathing apparatus
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - mask and respirator
 - protective clothing
 - breathing apparatus
- Consultative processes may involve:
- other employees and supervisors
 - relevant authorities and institutions
 - suppliers, potential customers and existing clients
 - government instrumentalities
 - emergency services
 - management and union representatives
 - industrial relations and OH&S specialists
 - other maintenance, professional or technical staff
- Communication in the work area may include:
- phone
 - electronic data interchange (EDI)
 - fax
 - email
 - internet
 - RF communications
 - barcode readers
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures

RANGE STATEMENT

Information/documentation may include:

- Australian and international codes of practice and regulations relevant to bulk handling and storage
- Australian and international regulations and codes of practice for the handling, storage and transport of dangerous goods and hazardous substances, including the current ADG Code
- workplace operating procedures and policies
- supplier and/or client instructions
- operations manuals, job specifications and procedures and induction documentation
- manufacturers specifications and/or suppliers handling and storage advice
- material safety data sheets
- Safe Working Limits (SWL) and Working Load Limits (WLL) of load shifting equipment and storage facilities
- Australian and International standards, criteria and certification requirements
- communications technology equipment, oral, aural or signed communications
- quality assurance standards and procedures
- emergency procedures
- relevant competency standards and training materials
- QA plans, data and document control
- conditions of service, legislation and industrial agreements including workplace agreements and awards

Applicable procedures and codes may include:

- relevant codes and regulations for bulk handling and storage
- Australian and international regulations and codes of practice for the handling, storage and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian and International Explosives Codes
- all relevant Australian and international standards and certification requirements,
- relevant state/territory OH&S and environmental protection legislation in terms of duties of employers, employees, suppliers and contractors
- licence, patent or copyright arrangements
- relevant workplace relations legislation
- relevant workers compensation legislation
- equal opportunity legislation
- equal employment opportunity and affirmative action

Competency Field

Competency Field A - Handling Cargo/Stock

TLIB3006A Carry out inspection of vehicles designed to carry special loads

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to carry out an inspection of a commercial vehicle designed to carry a special load, including action to implement manufacturers specifications for routine checks of the vehicle and its associated equipment, to clean the vehicle and its associated equipment, and to ensure that all specified safety requirements are met and that the vehicle and equipment are operational to the requirements of both the workplace and the relevant state/territory roads and traffic authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the regulations of the relevant roads and traffic authority and workplace procedures and policy concerning vehicle inspection.

Work is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine vehicle checking and maintenance principles and procedures to inspect a commercial vehicle designed to carry special loads across a variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

1 Check vehicle

PERFORMANCE CRITERIA

- 1.1 A visual check of the internal and external condition of the vehicle is carried out in accordance with workplace procedures
- 1.2 Pre-operational inspections and checks of the vehicle's tyres, suspension, fluid levels and other critical features are carried out to ensure conformance with road safety standards
- 1.3 Associated equipment is tested to ensure it functions correctly to manufacturers specifications
- 1.4 Post start-up and shut-down checks are carried out after engine is started to identify possible engine or electrical problems
- 1.5 Warning systems (instruments and gauges) are checked to ensure they are operational
- 1.6 Where relevant, vehicle-monitoring device is logged on/off in accordance with manufacturers instructions and workplace policy

2 Clean vehicle and ancillary equipment

- 2.1 Vehicle and associated equipment is cleaned in accordance with workplace procedures and legislation
- 2.2 Special purpose ancillary equipment is cleaned in accordance with any relevant government regulations and workplace procedures

3 Complete documentation

- 3.1 Basic faults are identified and/or diagnosed and appropriate action taken to report or remedy them as required by workplace procedures and legislation

ELEMENT**PERFORMANCE CRITERIA**

3.2 Records of inspection are updated and recommended repairs documented in accordance with workplace policies

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant duty of care requirements for the routine inspection of vehicles designed to carry special loads
- Relevant OH&S and environmental procedures and regulations
- Procedures for the checking and routine inspection of a commercial vehicle designed to carry special loads in accordance with workplace and manufacturers requirements and established safety rules and regulations including visual inspection procedures, pre-operational checking procedures and warning systems checking procedures
- Problems that may occur during the routine inspection of a vehicle and its associated ancillary equipment, and appropriate actions and solutions
- Techniques for the recognition of faults and vehicle/ancillary system irregularities
- Basic principles of operation of systems on commercial vehicles, including electrical systems, fuel systems, cooling systems, steering systems, exhaust systems, tyres, brakes, and relevant ancillary systems
- Relevant recording and documentation procedures

Required skills:

- Communicate effectively with others when carrying out the routine inspection of a vehicle and its associated ancillary equipment
- Read and interpret instructions, procedures, information, technical data and drawings relevant to the routine inspection of a vehicle and its associated ancillary equipment
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the routine inspection of a vehicle and its associated ancillary equipment
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when carrying out the routine inspection of a vehicle and its associated ancillary equipment
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and

Required skills:

interactions with others

- Promptly report and/or rectify any identified problems, faults or malfunctions that may be identified when carrying out the routine inspection of a vehicle and its associated ancillary equipment in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when carrying out the routine inspection of a vehicle and its associated ancillary equipment
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational

EVIDENCE GUIDE

situations in the workplace

- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle may include all vehicles designed to carry special loads, for example:

- concrete agitator
- livestock transporter
- armoured car
- tanker
- refrigerated vehicle
- waste vehicle
- fresh produce vehicle
- car carrier
- container carrier
- recovery vehicle

Inspection may be carried out in typical road transport situations, including:

- at day or night
- typical weather conditions
- in confined spaces, exposed conditions and controlled or open environment
- while in a workplace, depot, base or warehouse

RANGE STATEMENT

Ancillary equipment will be dependent on type of special load carried and may include:

- while in the vehicle on the road
- while at a client's worksite
- refrigeration systems
- concrete agitation systems
- car transporter systems
- livestock transporter systems
- waste loading/discharge systems
- recovery systems
- tanker pumping and related systems
- on-board cranes and hoists
- armoured car systems

Inspection may include:

- visual checks of vehicle
- routine checks of vehicle systems
- checks in accordance with a detailed inspection schedule

Routine checks may include:

- water levels
- oil levels
- air pressure in tyres
- brakes
- lights
- condition of tyres
- battery
- exhaust system
- suspension
- functions of associated ancillary equipment

Environmental hazards may include:

- leaking oil and fuel
- defective or inappropriately adjusted exhaust systems
- inappropriate disposal of vehicle fluids in drains or sewerage systems

Dependent of the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/records may include:

- workplace routine inspection procedures, checklists and instructions for both the vehicle and associated ancillary equipment
- relevant state/territory roads and traffic authority vehicle maintenance regulations
- inspection checklists and records
- manufacturers instructions, specifications and recommended procedures for both the vehicle and any

RANGE STATEMENT

- Applicable regulations and legislation may include:
- associated ancillary equipment
 - precautions and procedures to be adopted to protect the environment when inspecting and servicing vehicles designed to carry special loads
 - OH&S procedures to be followed when inspecting and servicing vehicles designed to carry special loads
 - relevant state/territory roads and traffic authority regulations and requirements pertaining to the inspection of vehicles designed to carry special loads
 - relevant state/territory OH&S legislation
 - relevant state/territory environmental protection legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to plan and implement maintenance schedules in accordance with relevant regulatory requirements and workplace procedures. This includes establishing maintenance requirements, organising maintenance activities, organising resources, and completing all required procedures and documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant Australian regulations, standards and codes of practice, including the ADG Code.

Work is under general guidance on progress and outcomes of work. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within workplace policy and procedures.

A range of opportunities may be used to develop the work area and to support the development of work systems, innovative strategies to deal with contingencies and to encourage the achievement of the workplace's goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource co-ordination and allocation and provides leadership of others individually or in teams.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Establish maintenance requirements

- 1.1 Equipment specifications, service requirements and workplace procedures are checked for recommended maintenance intervals and processes
- 1.2 Special requirements for maintenance of storage zones are identified
- 1.3 Comparisons with previous experience, future equipment use, work requirements and standard operating procedures are made to inform the planning process
- 1.4 Work plan and work schedule are developed
- 1.5 Contractors and/or maintenance providers (internal/external) are identified
- 1.6 Costings for process are identified based on work schedule (equipment/staff off-line), equipment manufacturers recommendations, charges for materials, equipment and consumables and external/internal labour charges
- 1.7 Required interruptions, processes and procedures are documented and recorded
- 1.8 Clearances for any required costs for maintenance are obtained

2 Organise maintenance activities

- 2.1 Work schedules and staff rosters are checked to identify times when the maintenance process may be scheduled including optimum timing for any shut down
- 2.2 Permission from supervisory personnel is obtained for timing of

ELEMENT	PERFORMANCE CRITERIA
	<p>maintenance to optimise the maintenance process and work</p> <p>2.3 Detailed work plans are developed to accord with work schedules, availability of expertise and the resource availability</p> <p>2.4 Employees with the required competencies are identified and where necessary appropriate training and assessment is facilitated</p> <p>2.5 Approvals for work schedule, employee work pattern and maintenance schedule adjustments are obtained and work plan is refined to ensure the maintenance program will maintain workplace outputs in terms of workplace policy</p>
3 Organise resources	<p>3.1 Required equipment, personnel and consumables are allocated in accordance with workplace procedures</p> <p>3.2 Consumables, equipment and expertise are located and coordinated to meet maintenance work schedule</p> <p>3.3 Externally sourced equipment, consumables and expertise are identified and appropriate arrangements made for procurement</p>
4 Complete maintenance procedures	<p>4.1 Completed work is checked against the maintenance schedule and the work plan</p> <p>4.2 Records of work are completed and forwarded to appropriate personnel noting areas where additional maintenance is required to maintain optimum work output and equipment life</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant Australian and international regulations, codes of practice and legislative requirements including local and international freight regulations
- Relevant OH&S and environmental procedures and regulations
- Procedures for identification and interpretation of maintenance requirements
- Procedures for identification and evaluation of information needed to plan and implement maintenance schedules
- Procedures for reviewing system options for maintenance operations including appropriate risk analysis
- Procedures for liaising with manufacturers and suppliers
- Procedures establishing and/or monitoring suitable maintenance systems

REQUIRED KNOWLEDGE AND SKILLS

- Focus of operation of maintenance systems, resources, management and workplace operating systems
- Characteristics and capabilities of equipment, materials and processes used
- Relative features and risks of various maintenance systems, their applications and processes, and issues involved in their use
- Quality and customer service standards, policies and procedures
- Application of relevant Australian and international standards and associated certification requirements
- Resource availability including the competencies of individuals in the team/group
- The application of current competencies within functional activity
- Coaching and mentoring approaches to support team members to share knowledge and skills
- Relevant workplace documentation procedures
- Contacts and sources of information/documentation needed when planning and implementing maintenance systems
- Procedures for operating electronic communications equipment

Required skills:

- Communicate effectively with others when planning and implementing maintenance schedules
- Read and interpret instructions, procedures, information and signs relevant to the planning and implementing of maintenance schedules
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the planning and implementing of maintenance schedules
- Work collaboratively with others in the planning and implementing of maintenance schedules
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Adapt to differences in equipment in accordance with standard operating procedures
- Ensure the servicing of equipment in terms of maintenance schedule and standard operating

Required skills:

procedures

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or

EVIDENCE GUIDE

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|---|---|
| Work may be undertaken in: | <ul style="list-style-type: none"> • various work environments in the warehousing, storage, transport and distribution industries |

Competency Field

Competency Field B - Equipment Checking and Maintenance

TLIC3063A Operate vehicle carrying special loads

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to drive a vehicle carrying a special load safely including compliance with road traffic authority and other relevant government regulations and company policies; and effective management of hazardous situations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence and permit requirements and regulations of the relevant state/territory roads and traffic authority as well as the specific regulatory and permit requirements pertaining to the special load being carried.

Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial vehicle carrying a special load across a variety of driving contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Carry out pre-operational checks

- 1.1 The pre-operational checks for the special purpose vehicle and its associated ancillary equipment are carried out in accordance with manufacturers requirements, government regulations and workplace policies and procedures
- 1.2 All faults and defects identified during checks are repaired or reported in accordance with workplace procedures

2 Drive a vehicle carrying special loads

- 2.1 The vehicle is manoeuvred in accordance with the regulations/permit requirements for the class of vehicle involved and the load being carried
- 2.2 Vehicles carrying explosives or dangerous goods are driven along designated routes in accordance with the relevant codes, relevant government regulations and workplace policies
- 2.3 The load is transported and the vehicle manoeuvred in accordance with any required precautions relating to unusual/special characteristics of the load and/or relevant government regulations pertaining to the special load including the Australian Dangerous Goods Code and the Australian Explosives Code
- 2.4 Signs or indicators are fixed to the vehicle if required
- 2.5 Appropriate procedures are followed for the load concerned in the event of a driving emergency

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Where applicable, Australian regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including the Australian Dangerous Goods Code and the Australian Explosives Code
- Relevant OH&S and environmental procedures and regulations
- Vehicle controls, instruments and indicators and their use
- Workplace driving and operational instructions
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on vehicle and related action
- Differences between transmission types
- Map reading and road navigation techniques
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a vehicle designed to carry special loads
- Read and interpret instructions, procedures, information and signs relevant to the driving of a vehicle designed to carry special loads
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a vehicle designed to carry special loads
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a vehicle designed to carry special loads
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Required skills:

- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when driving a vehicle designed to carry special loads in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when driving a vehicle designed to carry special loads
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the driving of a vehicle designed to carry special loads
- Monitor and anticipate traffic hazards and take appropriate action
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of vehicle and its equipment and load and take appropriate action if required
- Service vehicle and its equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources

- Performance is demonstrated consistently over a period

EVIDENCE GUIDE

for assessment

of time and in a suitable range of contexts

- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:

- all vehicles designed to carry special loads, for example concrete agitator, livestock transporter, armoured car, tanker, refrigerated vehicle, waste vehicle, fresh produce vehicle, car carrier, container carrier, recovery vehicle

Driving may be carried out in typical road transport situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road
- while at a depot, base or warehouse

RANGE STATEMENT

- Vehicle handling procedures may include:
- while at a client's workplace or work site
 - starting a vehicle
 - steering and manoeuvring a vehicle
 - accelerating and braking
 - positioning and stopping a vehicle
 - reversing a vehicle
 - operating vehicle controls, instruments and indicators
 - using defensive driving techniques
 - managing engine performance
- Pre-operational checks may include:
- visual check of vehicle
 - checking and topping up of fluid levels
 - checks of tyre pressures
 - checks of operation of vehicle lights and indicators
 - checks of brakes
- Minor routine repairs may include:
- replacement of blown globes in vehicle lights
 - replacement of broken fan belt
 - replacement of blown fuse
 - replacement of door mirrors
 - repairs to rear tail-light lens
 - changing of tyres
 - repair of tyre punctures
 - replacement of broken coolant hose
- Designated routes are:
- those that are determined by permit/regulatory requirements for a specific class of load such as explosives or dangerous goods
- Driving hazards may include (examples only):
- wet and iced roads
 - oil on road
 - animals and objects on road
 - fire in vehicle
 - leaking fuel
 - faulty brakes
 - parked vehicles on the road
 - faulty steering mechanism on vehicle
 - pedestrians crossing the road
 - flooded sections of road
 - windy sections of road
 - foggy conditions
- Factors that can cause traffic delays and diversions may include (examples only):
- traffic accidents
 - flooded sections of road
 - road damage

RANGE STATEMENT

- bridge/tunnel damage
 - road works
 - building construction
 - emergency situations such as bushfires, building fires, etc
 - road closures for special events such as marches, parades, etc
 - holiday traffic
 - road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Documentation/records may include:
- state/territory driving licence requirements
 - state/territory road rules
 - workplace driving instructions and procedures for drivers of vehicles carrying the specific load concerned
 - vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle
 - procedures/designated routes prescribed by the relevant authority for vehicles carrying the specific loads concerned
- Applicable procedures and codes may include:
- relevant state/territory roads and traffic authority driving regulations and licence/permit requirements pertaining to the class of vehicle
 - relevant regulations/permit requirements specific to the load being carried
 - Australian regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including the Australian Dangerous Goods Code and the Australian Explosives Code
 - relevant state/territory road rules
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant State/Territory environmental protection legislation

Competency Field

Competency Field C - Vehicle Operation

TLID1001A Shift materials safely using manual handling methods

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to shift loads using manual handling methods, including assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the manual handling and movement of loads.

Work is performed under some supervision generally within a team environment.

Work involves the application of the basic principles for the safe manual handling techniques and movement of loads when shifting materials using manual handling methods as part of day-to-day work.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Assess risks associated with the relocation of the load

- 1.1 Products, goods or materials to be relocated are identified and assessed for the appropriate method of relocation
- 1.2 Locations for storage are determined and potential routes to be followed are identified
- 1.3 Effect of load relocation on original load base is predicted
- 1.4 Points of balance are estimated
- 1.5 Required clearances are compared to available space and adjustments are made
- 1.6 Effects of moving contents which may be loose, liquid, dangerous or hazardous are considered
- 1.7 Potential risks in route(s) which may be followed are considered
- 1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods
- 1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified
- 1.10 Team lifting processes are considered for application
- 1.11 Appropriate personal protective equipment is worn
- 1.12 Size to weight ratio of items to be manually handled are identified

2 Plan load relocation

- 2.1 Relocation of the load is planned consistent with the code of practice for manual handling
- 2.2 Process for relocating load is proposed including predicting and planning for potential difficulties
- 2.3 Proposed process is checked against code of practice and workplace procedures for compliance

ELEMENT	PERFORMANCE CRITERIA
3 Relocate load	<p>3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and OH&S requirements</p> <p>3.2 Applications appropriate for team relocation of load are identified</p> <p>3.3 Team lifting tasks are coordinated</p> <p>3.4 Planned process and route are followed</p> <p>3.5 Relocated materials are set down without damage to goods, personnel or equipment and checked for stability</p> <p>3.6 Relocation is checked to see that it meets work requirements, with any variance(s) reported</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S procedures and guidelines concerning the manual lifting and movement of loads
- Risks when manually lifting and handling materials and goods and related precautions to control the risk, including: the load on the spine during lifting; controlled actions on a movement during lifting; rotation and side movement of the spine during lifting; postures and positions during lifting; work layout; the type, weight and position of the load; frequency of shifting operations; distance over which load is to be shifted; and time allowed for the shifting of the load
- Workplace procedures and policies for manual handling
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when manually lifting and handling materials and goods
- Read and interpret instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- Interpret and follow operational instructions and prioritise work
- Work collaboratively with others when manually lifting and handling materials and goods

Required skills:

- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when manually lifting and handling materials and goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected situations that may occur when manually lifting and handling materials and goods
- Apply precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in loads and materials in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - interpreting manual handling risks
 - using correct manual handling practices
 - applying relevant legislation and workplace procedures

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts

EVIDENCE GUIDE

- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
- Practical assessment must occur:
 - through activities in an appropriately simulated environment, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The shifting operations may be conducted:

- in a range of work environments
- by day or night

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites

Work may be conducted in:

- restricted spaces
- exposed conditions
- controlled or open environments

Materials to be shifted may include:

- goods
- large luggage items
- baggage items

RANGE STATEMENT

- equipment and tools
 - cleaning materials
 - components and parts of vehicles and equipment such as tyres, batteries, lifting gear, etc.
 - materials used in the course of work such as drums of fuel, raw materials, packaging, etc.
- Loads to be shifted may be:
- irregularly shaped
 - packaged or unpackaged
 - labelled or unlabelled
- Hazards in the work area may include exposure to:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
 - weight of items being handled
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Information/documents may include:
- goods identification numbers and codes
 - manifests, bar codes, goods and container identification
 - manufacturers specifications for equipment/tools
 - workplace procedures and policies
 - supplier and/or client instructions
 - material safety data sheets
 - codes of practice including the National Standards for

RANGE STATEMENT

Applicable regulations and legislation may include:

- Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
 - relevant state/territory OH&S legislation
 - relevant state/territory environmental protection legislation
 - workplace relations regulations
 - workers compensation regulations
 - licence, patent or copyright arrangements
 - dangerous goods and air freight regulations
 - export/import/quarantine/bond requirements
 - marine orders

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|--|
| 1 Check forklift condition | <p>1.1 Condition of forklift is checked for compliance with OH&S and workplace requirements for warning devices, manufacturers specifications and the nature of the load shifting task</p> <p>1.2 Attachments are checked to ensure appropriate adjustment and operation</p> <p>1.3 Mirrors and seats are adjusted for safe operation by the driver</p> <p>1.4 Log books are checked and appropriate workplace documentation is completed in accordance with workplace requirements</p> |
| 2 Drive the forklift | <p>2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturers instructions</p> <p>2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage</p> <p>2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques</p> <p>2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning</p> <p>2.5 The forklift is parked, shut down and secured in accordance with manufacturers specifications, regulations and workplace procedures</p> |
| 3 Operate a forklift to handle loads | <p>3.1 The lifting task to be undertaken is appropriately planned and the correct lifting truck and attachments are selected</p> <p>3.2 The load is lifted, carried, lowered and set down in accordance with OH&S legislation, manufacturers specifications and company procedures</p> |

ELEMENT	PERFORMANCE CRITERIA
4 Monitor site conditions	4.1 When selecting the most efficient route, hazards and traffic flow are identified and appropriate adjustments are made 4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs
5 Monitor and maintain forklift performance	5.1 Performance and efficiency of vehicle operation is monitored during use 5.2 Defective/irregular performance and malfunctions reported to relevant personnel 5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant duty of care requirements pertaining to the operation of a forklift
- Relevant OH&S and environmental procedures and regulations
- Workplace operating procedures
- Forklift controls, instruments and indicators and their use
- Forklift handling procedures
- Procedures to be followed in the event of an operational emergency
- Engine power management and safe operating strategies
- Efficient driving techniques
- Operating hazards and related defensive driving and hazard control techniques
- Pre-operational checks carried out on forklift and related action
- Principles of stress management when driving a forklift
- Site layout and obstacles

Required skills:

- Communicate effectively with others when operating a forklift
- Read and interpret instructions, procedures, information and signs relevant to the operation of a forklift

Required skills:

- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the operation of a forklift
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a forklift
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when operating a forklift
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a forklift
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- Monitor performance of forklift and its equipment and take appropriate action where required
- Ensure that a forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

EVIDENCE GUIDE

demonstrate competency in this unit

requirements of the elements and performance criteria of this unit and include demonstration of applying:

- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Types of forklift may include:

- counterbalance trucks
- reach trucks
- pallet trucks

RANGE STATEMENT

- Operations may be carried out in typical forklift operational situations, including:
- operations conducted at day or night
 - typical weather conditions
 - on the open road
 - on a private road or worksite
 - while at a workplace
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Loads to be shifted may require:
- special precautions
- Loads to be shifted may be:
- irregularly shaped
 - packaged or unpackaged
 - labelled or unlabelled
 - palleted or unpalleted
 - chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
- Hazards in the work area may include exposure to:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Forklift handling procedures may include:
- starting a forklift
 - steering and manoeuvring a forklift
 - accelerating and braking
 - positioning and stopping a forklift
 - reversing a forklift
 - operating forklift controls, instruments and indicators
 - using defensive driving techniques
 - managing engine performance
- Pre-operational checks may include:
- visual check of forklift
 - checking and topping up of fluid levels
 - checks of tyres
 - checks of operation of forklift lights and indicators
 - checks of brakes
- Hazards may include (examples only):
- wet and iced operating surfaces
 - oil on operating surface

RANGE STATEMENT

- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- faulty brakes
 - workplace obstacles and other operational equipment and vehicles
 - damaged loads and pallets
 - other personnel in work area
 - company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protection equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Information/documents may include:
- goods identification numbers and codes, including IMDG markings and HAZCHEM signs
 - manifests, bar codes, picking slips, merchandise transfers, stock requisitions, goods and container identification
 - Australian Standard 2359 - Industrial Truck Code
 - manufacturers specifications for forklift and associated equipment
 - operations and service record book or log
 - workplace procedures and policies for the operation of forklifts
 - supplier and/or client instructions
 - ADG Code and material safety data sheets
 - regulatory requirements concerning the use of forklifts
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable procedures and codes may include:
- relevant state/territory regulations pertaining to the operation of forklifts
 - relevant codes and standards, including Australian Standard 2359 - Industrial Truck Code
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant state/territory environmental protection legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate specialised load shifting equipment in accordance with workplace requirements and relevant regulatory requirements, including planning work for the current working conditions; using controls and equipment operating systems to manage movement of the unit and accessory operations; locating load and identifying load characteristics; moving materials and loads; monitoring and operating controls; and stopping, parking and securing equipment after operation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in accordance with codes, regulations, licence and/or permit and workplace requirements relevant to operation of the specialised load shifting equipment concerned.

Safety checks and equipment tests are performed under limited supervision.

Work involves the application of regulatory requirements and workplace procedures to the operation of specialised load shifting equipment in the stevedoring, transport, warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Plan work for the current working conditions

- 1.1 Traffic flow and work area conditions are constantly assessed and anticipated to allow safe operation to ensure no injury to people, or damage to equipment, loads or facilities
- 1.2 Characteristics of the load are taken into account to ensure that, where applicable, appropriate attachments are used to transport the load
- 1.3 Any occurrences in the work area that may affect the safety and efficiency of operations are reported to the appropriate personnel

2 Use controls and equipment operating systems to manage movement of the unit and accessory operations

- 2.1 Equipment is prepared and any appropriate attachment fitted
- 2.2 Gear and operational levers are checked to ensure that they are in the neutral position prior to inserting ignition key and starting engine
- 2.3 Engine is started in accordance with manufacturers guidelines to bring the engine to speed
- 2.4 Instruments and gauges are monitored during start-up and operations to ensure that operation is within manufacturers specifications and enterprise safety requirements
- 2.5 Engine power is managed for efficiency of equipment movement and economy of equipment operations
- 2.6 Equipment operations are conducted within the manufacturer's specified torque range
- 2.7 Any faults or damage to equipment are immediately reported to the appropriate personnel

ELEMENT	PERFORMANCE CRITERIA
3 Locate load and identify load characteristics	3.1 Load is located and identified according to instructions 3.2 Loading and unloading plans are followed to ensure efficiency and safety of operations 3.3 Characteristics of the load are taken into account to ensure that appropriate loading and unloading procedures are followed 3.4 Hazardous goods are identified and relevant procedures are taken into account when planning and conducting the work 3.5 Load weight and dimensions are within the capacity of the equipment
4 Move materials and loads	4.1 Equipment is manoeuvred and positioned using smooth and controlled movements 4.2 Manoeuvres are within the limits of the equipment and in line with manufacturers specifications 4.3 Materials are moved ensuring no injury to personnel or damage to equipment or goods
5 Monitor and operate controls	5.1 Equipment controls are monitored and operated in accordance with manufacturers operating instructions 5.2 Control systems are understood and acted upon in accordance with statutory authority regulations, manufacturers guidelines and site operating procedures 5.3 Control faults are identified and reported in accordance with manufacturers instructions and workplace guidelines
6 Stop, park and secure equipment	6.1 Equipment is brought to a controlled halt within manufacturers guidelines 6.2 Equipment is parked without injury to personnel or damage to equipment, loads or facilities in accordance with company procedures 6.3 Equipment is secured on a flat, even surface and not close to doorways, aisles, access-ways or blind corners and in accordance with securing procedures for the appropriate equipment

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

REQUIRED KNOWLEDGE AND SKILLS

- Regulations relevant to the operation of specialised load shifting equipment, including, where relevant, the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the operation of the specialised load shifting equipment
- Focus of operation of work systems, equipment, management and site operating systems for the operation of the specialised load shifting equipment
- The purpose, characteristics, capabilities, requirements and limitations of the specialised load shifting equipment
- Conveyed materials' potential for toxicity, reactivity, material grade, type and purpose including information from relevant material safety data sheets and ADG Code documentation (where applicable)
- Problems that may occur when operating specialised load shifting equipment and appropriate action that can be taken to resolve the problems
- Operational safety requirements and precautions for the specialised load shifting equipment concerned
- Documentation and record requirements
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles
- Relevant permit and licence requirements

Required skills:

- Communicate effectively with others when operating specialised load shifting equipment
- Read and interpret instructions, procedures, information and signs relevant to work activities
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the operation of specialised load shifting equipment
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating specialised load shifting equipment
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when operating specialised load shifting equipment in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when operating specialised load shifting equipment
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of specialised load shifting equipment
- Plan own work including predicting consequences and identifying improvements
- Monitor work activities in terms of planned schedule

Required skills:

- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use relevant gear and accessories when operating specialised load shifting equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of specialised load shifting equipment and take appropriate action where required
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace

EVIDENCE GUIDE

- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- limited or restricted spaces
 - holds on ships
 - exposed conditions
 - controlled or open environments
 - even or uneven surfaces
 - wet or dry surfaces
- Equipment may include:
- reach stackers
 - straddle trucks
 - excavators
 - front-end loaders (over 10 tonne)

RANGE STATEMENT

- Requirements for work may include:
- bulldozers (both in transport and shipping terminals and in the holds of ships)
 - straddle carriers
 - site restrictions and procedures
 - use of safety and personal protective equipment
 - communications equipment
 - specialised lifting and/or handling equipment
 - additional gear and equipment
 - noise restrictions
 - hours of operations
 - authorities and permits
- Hazards in the work area may include exposure to:
- chemicals and fumes
 - dangerous or hazardous substances
 - stationary and moving machinery, goods, materials and vehicular traffic
 - contamination of, or from, materials being handled
 - service lines
 - spills, leakages and ruptures
 - dust/vapours
 - faulty gear/equipment/tools
- Consultative processes may involve:
- workplace personnel including supervisors and managers
 - equipment manufacturers and suppliers
 - site visitors and contractors
 - union representatives, industrial relations and OH&S specialists
 - other professional or technical staff
- Communication in the work area may include:
- phone
 - fax
 - email
 - internet
 - electronic data interchange (EDI)
 - RF communications
 - bar code readers
 - oral, aural or signed communications
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - respirators and fume masks
 - protective clothing

RANGE STATEMENT

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

Information/documents may include:

Applicable regulations and legislation may include:

- high visibility clothing
- company procedures
- enterprise procedures
- organisational procedures
- established procedures
- workplace procedures and policies for the operation of the specialised load shifting equipment concerned
- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes
- manufacturers specifications for equipment/tools
- equipment identification labels, bar codes and serial numbers
- supplier and/or client instructions
- relevant OH&S requirements and policies
- relevant Australian standards and certification requirements
- material safety data sheets where applicable
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation including the ADG Code
- award, enterprise bargaining agreement and other industrial arrangements
- quality assurance procedures
- emergency procedures
- relevant codes, regulations and licence/permit requirements pertaining to the operation of the specialised load shifting equipment concerned including the ADG Code (where applicable)
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant Australian standards and certification requirements
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- workplace relations regulations including equal opportunity, equal employment opportunity and affirmative action legislation
- workers compensation regulations

Unit Sector(s)

Competency Field

Competency Field D - Load Handling

TLID2013A Move materials mechanically using automated equipment

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to move materials mechanically using automated equipment such as automatic guided vehicles, tow motors, high level order pickers, conveyor systems, and mechanised pallet movers. This includes selecting appropriate mechanical moving equipment (where relevant), moving materials/goods in accordance with operational requirements, checking condition of materials/goods and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the movement of materials mechanically using automated equipment.

Work is performed under limited or minimum supervision. It involves the application of the basic principles and routine procedures for the safe movement of materials mechanically using automated equipment.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Select load moving equipment

1.1 The mechanised handling equipment, the route to be taken and procedures to be used are selected appropriate to the characteristics of the goods

1.2 Dangerous goods and hazardous materials are identified and handled in accordance with codes of practice, OH&S requirements and workplace procedures

2 Move goods

2.1 Goods are moved using the selected materials handling equipment in accordance with occupational health and safety regulations, manufacturers instructions and company procedures

2.2 Problems in the movement of goods and materials using the automated equipment are identified and are reported in accordance with workplace procedures

3 Check goods and complete documentation

3.1 Moved goods are inspected for possible damage during transit/movement and appropriate action is taken

3.2 All required documentation is completed for the tracking of the moved goods in accordance with company requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

REQUIRED KNOWLEDGE AND SKILLS

Required knowledge:

- Regulations relevant to the use of automated equipment to move materials mechanically
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the use of automated equipment to move materials mechanically
- Focus of operation of work systems, equipment, management and site operating systems for the use of automated equipment to move materials mechanically
- The purpose, characteristics, capabilities, requirements and limitations of the automated materials moving equipment
- Problems that may occur during the use of automated equipment to move materials mechanically and appropriate action that can be taken to resolve the problems
- Risks when using automated equipment to move materials and related precautions to control the risks
- Documentation and record requirements
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when using automated equipment to move materials mechanically
- Read and interpret instructions, procedures, information and signs relevant to the use of automated equipment to move materials mechanically
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the use of automated equipment to move materials mechanically
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when using automated equipment to move materials mechanically
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when using automated equipment to move materials mechanically in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule

Required skills:

- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of automated equipment and take appropriate action where required
- Ensure servicing of automated equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids (where applicable) and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment,

EVIDENCE GUIDE

- and
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- The operations may be conducted:
- in a range of work environments
 - by day or night
 - in a range of typical weather conditions
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Mechanised equipment may include a range of goods and materials handling equipment such as:
- automatic guided vehicle
 - tow motors
 - high level order picker
 - conveyor system
 - mechanised pallet mover
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios

RANGE STATEMENT

- Hazards in the work area may include exposure to:
- high visibility clothing
 - chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
 - moving and rotating equipment and vehicles
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Information/documents may include:
- goods identification numbers and codes
 - manifests, bar codes, goods and container identification
 - manufacturers instructions concerning the use and servicing of automated mechanical equipment
 - workplace procedures and policies
 - supplier and/or client instructions
 - material safety data sheets
 - codes of practice including the National Standards for Manual Handling and the Industry Safety Code
 - relevant legislation, regulations and related documentation
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable regulations and legislation may include:
- relevant state/territory OH&S legislation
 - relevant state/territory environmental protection legislation
 - workplace relations regulations
 - workers compensation regulations
 - ADG Code and regulations

Unit Sector(s)

Competency Field

Competency Field D - Load Handling

TLID2016A Load and unload explosives and dangerous goods

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to load and unload explosives and dangerous goods, including identifying explosives/dangerous goods; loading and unloading explosives/dangerous goods using appropriate equipment; securing and protecting the vehicle load; and checking the vehicle to ensure the load is secure and the vehicle is marked in accordance with regulatory requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant Australian and state/territory regulations including the current Australian Dangerous Goods (ADG) Code, the current Australian Explosives Code, and mass and loading regulations.

Work is performed under limited or minimum supervision. It involves the application of the basic principles, routine procedures and specific regulatory requirements to the loading and unloading of explosives and dangerous goods in a range of operational situations.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Prepare to load and unload vehicle

- 1.1 Explosives and/or dangerous goods are identified and their characteristics taken into account when determining appropriate handling, loading and storage procedures including confirmation that the relevant emergency procedures are being carried out
- 1.2 Compatibility of explosives and/or dangerous goods is taken into account when assembling and segregating cargo for loading
- 1.3 Vehicle and/or loading equipment is checked to ensure it is suitable to handle/carry load

2 Load/unload vehicle

- 2.1 Vehicle is loaded/unloaded in accordance with workplace procedures and the current ADG/Australian Explosives Code as applicable
- 2.2 The load is segregated according to class and subsidiary risk, and the distribution of the load is checked in accordance with workplace procedures, relevant mass and loading regulations and the current ADG/Australian Explosives Code as applicable
- 2.3 Personal protective equipment is used during the loading/unloading operations as required for the type of dangerous goods/explosive concerned
- 2.4 Emergency procedures are followed in the event of an incident or accident when loading or unloading explosives and/or dangerous goods

3 Secure and protect vehicle load

- 3.1 The vehicle load is secured using the correct load restraint and protection equipment for different loads, vehicles and carriage conditions concerned
- 3.2 The load is protected in accordance with legal and workplace

ELEMENT	PERFORMANCE CRITERIA
	safety requirements
	3.3 The distribution of the load is checked to ensure that it is even, legal and within the safe working capacity of the vehicle
	3.4 Vehicle is clearly marked/placarded to indicate the carriage of explosives and/or dangerous goods, in accordance with government regulations and company procedures
4 Check the vehicle	4.1 The loaded vehicle is inspected and checked to ensure that it is suitable to carry explosives and/or dangerous goods and the load weight and dimensions are within the vehicle's safe carrying capacity and equipment capability
	4.2 The loaded vehicle is checked to ensure that it can be safely parked and secured
	4.3 Dangerous goods declaration and all required transportation documentation for the cargo is completed in accordance with workplace requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant Australian and state/territory regulations and codes pertaining to the identification, handling and marking of explosives and dangerous goods
- Relevant state/territory mass and loading regulations
- OH&S procedures and guidelines concerning the lifting and movement of loads
- Risks and hazards when loading, unloading and handling explosives and dangerous goods, and related precautions to control the risk
- Workplace procedures and policies for the loading and unloading of explosives and dangerous goods
- Characteristics of various classes of explosives and dangerous goods relevant to handling and transport
- Compatibility of various types of explosives and dangerous goods
- Housekeeping standards procedures required in the workplace
- Manual handling techniques and manually-operated load shifting equipment required for the loading, unloading and handling of explosives and dangerous goods
- Methods of securing a load on a vehicle
- Methods of placarding or marking a vehicle carrying explosives/dangerous goods

Required skills:

- Communicate effectively with others when loading, unloading and handling explosives and dangerous goods
- Read and interpret instructions, procedures, information and signs relevant to the loading, unloading and handling of explosives and dangerous goods
- Identify and interpret containers and goods coding, markings and, where applicable, emergency information panels for the mode of transport/storage selected
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Operate electronic communication equipment to required protocol
- Estimate the size, shape and special requirements of loads
- Work collaboratively with others when loading, unloading and handling explosives and dangerous goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when loading, unloading and handling explosives and dangerous goods
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the loading, unloading and handling of explosives and dangerous goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Use manual handling techniques and operate manually-operated load shifting equipment when loading, unloading and handling explosives and dangerous goods
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the

EVIDENCE GUIDE

performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - identifying load characteristics, loading equipment and related practices
 - identifying load label in accordance with identified classification and subsidiary risk information
 - identifying markings/placards for vehicle in accordance with relevant regulatory requirements
 - segregating, distributing and securing load for safe transport in accordance with regulations and current ADG/AEG Code requirements
 - safely loading and unloading explosives and dangerous goods in accordance with workplace procedures and current ADG/AEG Code requirements

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or

EVIDENCE GUIDE

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Operations may be conducted:
- in a range of work environments and weather conditions
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- limited and restricted spaces
 - exposed conditions
 - controlled or open environments
 - a workplace, warehouse or depot
 - in a vehicle on the road
 - at a client's workplace
 - special precautions for handling and stacking
- Goods/cargo to be loaded and unloaded may require:
- as defined in the respective Australian codes
- Classes of dangerous goods and explosives are:
- as defined in the respective Australian codes
- Standard placarding, marking and signage for identified explosives and dangerous goods are:
- as required in the respective Australian codes, including HAZCHEM Codes
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange
 - fax
 - email
 - internet
 - radio

RANGE STATEMENT

- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- oral, aural or signed communications
 - company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Loading operations may be carried out:
- manually
 - with the aid of lifting equipment and/or appliances
- Load restraint procedures and equipment are:
- as specified in mass and loading regulations and guidelines and current ADG Code/Australian Explosives Code as applicable
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Information/documents may include:
- goods identification numbers and codes, including current ADG Code and IMDG markings and HAZCHEM signs
 - relevant codes of practice, including the Australian Dangerous Goods Code, the Australian Explosives Code, the Industry Safety Code, and National Standards for Manual Handling
 - manifests, bar codes, goods and container identification/serial number
 - material safety data sheets
 - manufacturers specifications for equipment/tools
 - workplace procedures and policies for the loading and unloading of vehicles
 - supplier and/or client instructions
 - National Load Restraint Guide
 - Australian Truck Drivers Manual
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable regulations and legislation may include:
- Australian and state/territory mass and loading regulations
 - Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes

RANGE STATEMENT

- Australian Marine Orders and the International Maritime Dangerous Goods Code
- IATA Dangerous Goods by Air regulations
- Australian and International Explosives Codes
- Code of Practice for the Safe Transport of Radioactive Substances
- state/territory legislation covering the safe handling of infectious substances
- relevant state/territory environmental protection legislation
- workplace relations regulations
- equal opportunity legislation
- equal employment opportunity and affirmative action legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to identify and label explosives and dangerous goods, including assessing explosives/dangerous goods; handling explosives/dangerous goods in accordance with regulatory requirements; labelling explosives/dangerous goods in accordance with regulatory requirements; and complying with all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the regulatory requirements of the relevant Australian state/territory authorities concerned with the carriage of explosives and dangerous goods including the current Australian Dangerous Goods and Australian Explosives Codes.

Work is performed under limited or minimum supervision. It involves the application of standard procedures and regulatory requirements for the identification and labelling of explosives and dangerous goods.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Assess explosives/dangerous goods

- 1.1 Load is checked for explosives/dangerous goods in accordance with the relevant codes and government regulations
- 1.2 Types of explosives/dangerous goods are identified from labels, DG declarations and placarding in accordance with workplace procedures, and all required action is taken to ensure compliance with relevant government regulations and ADG/Australian Explosives Codes as applicable
- 1.3 Hazards posed by load are identified from labels and material safety data sheets (MSDS)

2 Handle explosives/dangerous goods

- 2.1 Identified explosives/dangerous goods are handled and loaded/unloaded in accordance with regulatory requirements, codes, National Load Restraint Guide, and employer policy
- 2.2 Appropriate personal protective equipment is used when handling explosives/dangerous goods in accordance with class, subsidiary risk and MSDS information
- 2.3 Handling of different types of load takes into account the identified hazards posed by the explosives/dangerous goods concerned
- 2.4 When loading/storing explosives/dangerous goods, segregation procedures are followed according to the class and subsidiary risk information

3 Label explosives/dangerous goods

- 3.1 All packages/containers are labelled with the class and subsidiary risk in accordance with current ADG/Australian Explosives Codes as applicable
- 3.2 A dangerous goods declaration is included with manifest and other shipping documents

ELEMENT**PERFORMANCE CRITERIA**

- | | |
|---------------------------------|--|
| 4 Complete documentation | 3.3 Vehicles carrying explosives and/or dangerous goods are placarded in accordance with current ADG/Australian Explosives Codes as applicable |
| | 4.1 All required transport documents are completed in accordance with current ADG/Australian Explosives Codes as applicable |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant Australian and state/territory regulations and codes pertaining to the identification and labelling of explosives and dangerous goods including the current ADG and Australian Explosives Codes
- OH&S procedures and guidelines concerning the lifting and movement of loads
- Risks and hazards when loading, unloading and handling explosives and dangerous goods, and related precautions to control the risk
- Workplace procedures and policies for the identification and labelling of explosives and dangerous goods
- Characteristics of explosives and dangerous goods relevant to handling and transport
- Compatibility of various types of explosives and dangerous goods
- Site layout and obstacles
- Housekeeping standards procedures required in the workplace

Required skills:

- Communicate effectively with others when loading, unloading and handling explosives and dangerous goods
- Read and interpret instructions, procedures, information and signs relevant to the loading, unloading and handling of explosives and dangerous goods
- Interpret material safety data sheets, containers and goods coding, markings and other information describing explosives and dangerous goods including, where applicable, emergency information panels for the mode of transport/storage selected
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the loading, unloading and handling of explosives and dangerous goods

Required skills:

- Correctly mark/label explosives and dangerous goods
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when loading, unloading and handling explosives and dangerous goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when loading, unloading and handling explosives and dangerous goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when loading, unloading and handling explosives and dangerous goods
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the loading, unloading and handling of explosives and dangerous goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - identifying explosives and dangerous goods from labels in accordance with regulatory requirements and practices

EVIDENCE GUIDE

- handling explosives and dangerous goods according to regulatory requirements, codes, National Load Restraint Guide and employer policy as appropriate
 - locating, interpreting and applying relevant codes and regulations
 - identifying the hazards from labels of explosives and dangerous goods
 - identifying the personal protective equipment required when handling explosives and dangerous goods
 - maintaining workplace records for the explosives and dangerous goods
- Context of and specific resources for assessment**
- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
 - Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Operations may be conducted:
- in a range of work environments and weather conditions
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
 - a workplace, warehouse or depot
 - in a vehicle on the road
 - at a client's workplace
- Goods/cargo to be identified and classified may:
- require special precautions for handling and storage
- Classes of dangerous goods and explosives are:
- as defined in the respective Australian codes
- Standard marking and signage for identified explosives and dangerous goods is:
- as required in the respective Australian codes
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment
- gloves

RANGE STATEMENT

may include:

- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Information/documents may include:

- goods identification numbers, codes, markings and signs
- codes of practice including the Australian/International Dangerous Goods Codes and the Australian/International Explosives Codes
- manifests, bar codes, goods and container identification
- manufacturers specifications for equipment/tools
- workplace procedures and policies for the loading and unloading of vehicles
- supplier and/or client instructions
- material safety data sheets
- award, enterprise bargaining agreement, other industrial arrangements
- standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- current Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - IATA Dangerous Goods by Air regulations
 - Australian and International Explosives Codes
- relevant state/territory environmental protection legislation
- equal opportunity legislation
- workplace relations regulations
- equal employment and affirmative action legislation
- relevant state/territory OH&S legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to prepare for the transport of dangerous goods, including checking the dangerous goods load; assessing vehicle suitability to transport the intended load; checking emergency procedures and equipment; evaluating documented route plan; and completing required assessment process. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant state/territory regulations concerning the transport of dangerous goods, including the current ADG Code.

Work is performed under general supervision. It involves the application of basic principles, routine procedures and regulatory requirements to the preparation of dangerous goods for transport.

Licensing/Regulatory Information

Refer to Unit Descriptor

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| 1 Check dangerous goods load | <p>1.1 Load is compared against transport documentation and discrepancies are noted</p> <p>1.2 Load is checked to ensure that dangerous goods labels are clearly visible and legible, and that packaged goods are correctly labelled</p> <p>1.3 Load is checked to ensure containers are not damaged</p> <p>1.4 Vehicle load is checked for compatibility or, where not compatible, is checked for appropriate segregation in accordance with regulatory requirements</p> <p>1.5 Load is assessed to ensure that it is stowed and secured in or on vehicles in accordance with the current ADG Code and the National Load Restraint Guide</p> <p>1.6 Shipping documentation and other relevant documents are located in the cabin in accordance with regulatory requirements</p> |
| 2 Assess vehicle suitability to transport intended load | <p>2.1 Vehicle is assessed for suitability and appropriateness to carry designated dangerous goods including classification, mass and configuration</p> <p>2.2 Licence and insurance requirements (where relevant) are checked for conformity with the current Australian Code for the Transport of Dangerous Goods by Road and Rail and/or other applicable regulatory requirements</p> <p>2.3 Load restraint system(s) is/are checked for serviceability and appropriateness to secure intended load</p> <p>2.4 Vehicle is checked to ensure that it is correctly and clearly marked/placarded for the load being carried</p> |
| 3 Check emergency procedures and equipment | <p>3.1 Emergency information for each type of transported dangerous good is noted</p> <p>3.2 Regulatory and workplace procedures for an incident are noted including notification of relevant personnel and authorities and, where appropriate, use of equipment for containment, clean up</p> |

ELEMENT	PERFORMANCE CRITERIA
	or recovery
	3.3 Personal protective equipment and safety equipment are checked for operational capability and appropriateness to the proposed load
	3.4 Emergency information is located in the cabin in accordance with current ADG Code requirements
4 Evaluate documented route plan	4.1 Selected route plan and potential difficulties including regulatory restrictions, traffic flow and conditions, obstacles, road standards and construction activities are assessed
	4.2 Regulatory and workplace procedures for driving, parking, loading and unloading are identified including actions for disengaging and/or securing the vehicle
5 Complete documentation	5.1 The load is inspected and checked for security to travel in accordance with relevant regulations/permit requirements and the current ADG Code
	5.2 All required documentation for the dangerous goods is completed in accordance with regulatory and workplace requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Current Australian Dangerous Goods Code and relevant state/territory mass and loading regulations as they apply to vehicles transporting dangerous goods
- OH&S procedures and guidelines concerning the transport of dangerous goods
- Risks when transporting dangerous goods and related precautions to control the risk
- Workplace procedures and policies for the preparation of dangerous goods
- Problems that may occur when preparing for the transport of dangerous goods and action that should be taken to prevent or solve them
- Housekeeping standards procedures required in the workplace
- Methods of securing a vehicle following loading of dangerous goods
- Relevant permit and licence requirements

Required skills:

- Communicate effectively with others when preparing for the transport dangerous goods
- Read and interpret instructions, procedures, information and signs relevant to the preparation of dangerous goods for transport
- Identify goods coding, markings and, where applicable, emergency information panels for the mode of transport/storage selected
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the preparation of dangerous goods for transport
- Operate electronic communication equipment to required protocol
- Estimate the mass, volume and special requirements of a load
- Work collaboratively with others when preparing for the transport of dangerous goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when preparing for the transport of dangerous goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when preparing for the transport of dangerous goods
- Recognise the hazards and apply precautions and required action to minimise, control or eliminate hazards that may exist during the preparation of dangerous goods for transport
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Identify and correctly use equipment required to load dangerous goods
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment

EVIDENCE GUIDE

guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - assessing operational suitability of equipment and vehicles pertinent to dangerous goods transportation
 - estimating weight and dimensions of load and any special requirements
 - applying hierarchy of hazard control
 - maintaining workplace records and documentation including completion of dangerous goods declaration
 - determining (any) required permits
 - identifying hazards and planning work to minimise risks when transporting dangerous goods
 - selecting appropriate equipment and work systems to enable safe, efficient work

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Operations may be conducted:
- in a range of work environments and weather conditions
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
 - all applicable transportation modes
- Vehicle refers to:
- hazardous or dangerous materials
 - contamination of, or from, materials being handled
 - noise, light, energy sources
 - stationary and moving machinery, parts or components
 - service lines
 - spills, leakages, ruptures
 - dust/vapours
- Hazard management is:
- consistent with the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - mask or respirator
 - breathing apparatus
 - high visibility clothing
- Load restraint systems are:
- as detailed in the National Load Restraint Guide
- Preparation of packaged dangerous goods for transport may:
- require special precautions as specified by the manufacturer
- Transport documentation may
- Initial Emergency Response Guide

RANGE STATEMENT

include:

- Emergency Procedure Guide
- Material Safety Data Sheet (MSDS)
- descriptions for dangerous goods (i.e. proper shipping name, class and division number, packing group, subsidiary risk(s) if any)
- UN or ID number

Requirements for work may include:

- site restrictions and procedures
- use of safety and personal protective equipment
- communications equipment
- specialised lifting and/or handling equipment
- incident breakdown procedures
- additional gear and equipment
- noise restrictions
- hours of operation
- authorities and permits

Consultative processes may involve:

- other employees and supervisors
- suppliers, potential customers and existing clients
- management and union representatives
- industrial relations, OH&S specialists, and other maintenance, professional or technical staff

Communication in the work area may include:

- phone
- electronic data interchange
- fax
- email
- internet
- radio
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures
- site procedures

Safety equipment on vehicle may include:

- fire extinguishers
- portable warning devices
- eye wash kit

Information/documents may include:

- current Australian Dangerous Goods Code, relevant Australian Standards and International Standards
- Safe Working Load (SWL) and Working Load Limit (WLL)
- manifests, bar codes, goods and product identification

RANGE STATEMENT

- Applicable regulations and legislation may include:
- manufacturers specifications for equipment/tools
 - workplace procedures and policies for the transfer of product
 - goods identification numbers, codes and signs
 - supplier and/or client instructions
 - award, enterprise bargaining agreement, other industrial arrangements
 - relevant standards and certification requirements
 - quality assurance procedures
 - emergency procedures
 - manufacturers specifications, instructions and labelling advice for the packaged dangerous goods, including material safety data sheets
 - state/territory mass and loading regulations
 - current Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - International Air Transport Association (IATA) Dangerous Goods by Air regulations
 - Australian and state/territory regulations related to the carriage of dangerous goods
 - workplace relations regulations
 - equal opportunity legislation
 - equal employment opportunity and affirmative action legislation
 - relevant Australian and International Standards
 - relevant state/territory environmental protection legislation
 - relevant state/territory OH&S legislation

Unit Sector(s)

Competency Field

Competency Field

D - Load Handling

TLID3043A Shift loads using gantry equipment

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to shift loads using gantry equipment in accordance with workplace and regulatory requirements, including planning the work for the prevailing working conditions; using the controls and operating systems to manage the operation of the equipment; locating the load and identifying the load characteristics; safely moving the load; monitoring the controls; and stopping, shutting down and securing the equipment after the completion of operations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the shifting of loads using gantry equipment.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements when shifting loads using gantry equipment as part of work activities in the stevedoring, transport, distribution and allied industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Plan work for the prevailing working conditions

- 1.1 Traffic flow, weather and work area conditions are constantly assessed and anticipated to allow safe operation to ensure no injury to people, or damage to equipment, loads or facilities
- 1.2 Characteristics of the load are taken into account to ensure that, where applicable, appropriate attachments/gear are used to move the load
- 1.3 Any occurrences in the work area that may affect the safety and efficiency of operations are reported to the appropriate personnel

2 Use controls and operating systems to manage the operation of the equipment

- 2.1 Equipment is prepared and appropriate attachments fitted (where applicable)
- 2.2 Gear and operational levers are checked to ensure that they are in the neutral position prior to inserting ignition key and starting engine
- 2.3 Engine is started in accordance with manufacturers guidelines to bring the engine to speed
- 2.4 Instruments and gauges are monitored during start-up and operations to ensure that operation is within manufacturers specifications and workplace and regulatory safety requirements
- 2.5 Engine power is managed for efficiency of equipment movement and economy of equipment operations
- 2.6 Equipment operations are conducted within manufacturers specified torque range
- 2.7 Any faults or damage to equipment are immediately reported to the appropriate personnel

3 Locate load and identify

- 3.1 Load is located and identified according to instructions

ELEMENT	PERFORMANCE CRITERIA
load characteristics	<p>3.2 Requirements for Safe Working Load (SWL) and Working Load Limit (WLL) of the gantry equipment are identified</p> <p>3.3 Load weight and dimensions are checked to ensure they fall within the capacity of the equipment</p> <p>3.4 Loading and unloading plans are followed to ensure efficiency and safety of operations</p> <p>3.5 Characteristics of the load are taken into account to ensure that appropriate loading and unloading procedures are followed</p> <p>3.6 Hazardous cargo is identified and relevant procedures are taken into account when planning and conducting the work</p>
4 Safely move load	<p>4.1 Equipment is operated and positioned using smooth and controlled movements</p> <p>4.2 Manoeuvres are within the limits of the equipment and in line with manufacturers specifications</p> <p>4.3 Load is moved ensuring no injury to personnel or damage to equipment or cargo</p> <p>4.4 Continuous communication is maintained with personnel assisting the operator in the load movement operations using appropriate communications technology and procedures</p> <p>4.5 In the event of a safety incident or emergency, the equipment is immediately stopped and workplace emergency procedures followed</p> <p>4.6 Safety incidents and emergencies are reported in accordance with workplace procedures and regulatory requirements</p>
5 Monitor and operate controls	<p>5.1 Equipment controls are monitored and operated in accordance with manufacturers operating instructions</p> <p>5.2 Control systems are understood and acted upon in accordance with regulatory requirements, manufacturers guidelines and workplace operating procedures</p> <p>5.3 Control faults are identified and reported in accordance with enterprise guidelines</p> <p>5.4 Hazards in the work area are identified and appropriate measures are adopted to control the risks in accordance with regulatory requirements and workplace procedures</p>
6 Stop, shut down and secure equipment	<p>6.1 Equipment is brought to a controlled halt and shut down without injury to personnel or damage to equipment, loads or facilities in accordance with manufacturers guidelines and workplace procedures</p> <p>6.2 Equipment is secured in accordance with manufacturers instructions and workplace procedures</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes, regulations, licence/permit requirements relevant to the use of gantry equipment to shift loads
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the use of gantry equipment to shift loads
- Focus of operation of work systems, equipment, management and site operating systems for the use of gantry equipment to shift loads
- Problems that may occur when using gantry equipment to shift loads and appropriate action that can be taken to resolve the problems
- Relevant safety codes and emergency procedures
- Types of gantry equipment used to shift loads in terminals/wharves, their applications and procedures and precautions for their use
- Requirements for Safe Working Load (SWL) and Working Load Limit (WLL) of gantry equipment
- The marking and numbering systems for cargo
- Relevant bond, quarantine or other legislative requirements

Required skills:

- Communicate effectively with others when shifting loads using gantry equipment
- Read and interpret instructions, procedures, information and labels relevant to the shifting of loads using gantry equipment
- Identify cargo, container and goods, coding, ADG and IMDG markings and where applicable emergency information panels
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the shifting of loads using gantry equipment
- Receive, acknowledge and send messages with appropriate communications equipment
- Estimate the size, shape and special requirements of loads
- Work collaboratively with others when shifting loads using gantry equipment
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when shifting loads using gantry equipment in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise when shifting loads

Required skills:

using gantry equipment

- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the shifting of loads using gantry equipment
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Identify, select and use relevant equipment, processes and procedures when using gantry equipment to shift loads
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Apply effective eye-hand coordination to operational tasks
- Monitor performance of equipment
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or

EVIDENCE GUIDE

- other simulated practical and knowledge assessment, and/or
- access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- limited or restricted spaces
 - exposed conditions
 - controlled or open environments
 - even or uneven surfaces
 - wet or dry surfaces
- Cargo/freight may include:
- goods/containers with specialist requirements, including

RANGE STATEMENT

- Range of equipment may include:
- temperature controlled goods and dangerous goods
 - various types of bridge and gantry cranes
- Hazards in the work area may include exposure to:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods, materials and vehicular traffic
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - protective clothing
 - high visibility clothing
- Communication in the work area may include:
- phone
 - fax
 - email
 - electronic data transfer (EDI)
 - RF systems
 - radio
 - oral, aural or signed communications
- Personnel in work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Consultative processes may involve:
- staff members
 - management
 - union representatives
 - industrial relations, OH&S specialists
 - other professional or technical staff
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Information/documents may include:
- goods identification numbers and codes
 - manifests, bar codes, and container identification/serial number
 - Australian and international codes of practice and regulations relevant to the shifting of loads using gantry equipment
 - Australian and international regulations and codes of

RANGE STATEMENT

- practice for the handling and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and induction documentation
 - manufacturers specifications for equipment
 - workplace procedures and policies
 - supplier and/or client instructions
 - dangerous goods declarations and material safety data sheets
 - award, enterprise bargaining agreement, other industrial arrangements
 - relevant Australian standards and certification requirements
 - quality assurance procedures
 - emergency procedures
 - relevant codes and regulations for the shifting of cargo/containers using gantry equipment
 - Australian and international regulations and codes of practice for the handling of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - IATA Dangerous Goods by Air regulations
 - Australian and International Explosives Codes
 - relevant Australian Standards including AS 1418 and AS 2550
 - licence, patent or copyright arrangements
 - water and road use and licence arrangements
 - export/import/quarantine/bond requirements
 - marine orders
 - relevant state/territory OH&S and environmental protection legislation
 - workplace relations regulations
 - workers compensation regulations

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to estimate and calculate mass and area and quantify dimensions of loads as part of work functions in the transport, stevedoring, warehousing, and/or storage sectors. This includes estimating loads to be transported or placed in storage, identifying mass, area and volume limitations of available transport/storage systems and carrying out calculations required to organise load(s) to match identified transport/storage limitations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with workplace requirements and any relevant regulations related to the estimation and/or calculation of mass and area and the quantification of dimensions as part of workplace tasks.

Work is performed under some supervision generally within a team environment. It involves the application of basic mathematical principles and operations to the estimation and/or calculation of mass and area and the quantification of dimensions as part of workplace activities in the transport, stevedoring, warehousing, distributi

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|---|
| 1 Estimate loads for transport or storage | 1.1 Order forms/work orders are read and requirements are noted
1.2 Shape, balance characteristics, dimensions and mass of the load(s) are identified
1.3 Area/volume required for storage is estimated
1.4 Weights and volumes are totalled to calculate load requirements of transport or storage system |
| 2 Estimate load limits of transport and/or storage | 2.1 Allowable load limits for storage and/or transport systems are identified in accordance with workplace procedures
2.2 Capacity of transport and storage systems in terms of mass, area and volume are calculated |
| 3 Organise load | 3.1 Load(s) is restricted to allowable range(s)
3.2 Load(s) is spread to ensure safe weighting on pallets, trucks, platforms or other storage or transport systems
3.3 Appropriate workplace documentation is completed |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to workplace activities
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the estimation and/or calculation of mass, area and volumes of loads and transport and storage facilities including the quantification of dimensions
- Basic mathematical operations required when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities including addition, subtraction, multiplication and division
- Focus of operation of work systems, equipment, management and site operating systems for the transport and/or storage of goods and stock
- Problems that may occur when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities and appropriate action that can be taken to resolve the problems
- Documentation requirements for the workplace activities concerned

Required skills:

- Communicate effectively with others when estimating and/or calculating mass, area and volumes of loads and transport and storage facilities
- Read and interpret instructions, procedures, information and labels relevant to the estimation and/or calculation of mass, area and volumes of loads and transport and storage facilities
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when estimating and/or calculating mass, area and volumes of loads and transport and storage facilities in accordance with workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Identify, select and use relevant calculators, computing and office equipment when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities

Required skills:

- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:

EVIDENCE GUIDE

- through activities in an appropriately simulated environment at the registered training organisation, and/or
- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|--|---|
| Work may be conducted: | <ul style="list-style-type: none"> • in a range of work environments • by day or night |
| Customers may be: | <ul style="list-style-type: none"> • internal or external |
| Workplaces may comprise: | <ul style="list-style-type: none"> • large, medium or small worksites |
| Work may be conducted in: | <ul style="list-style-type: none"> • limited or restricted spaces • exposed conditions • controlled or open environments |
| Estimating/calculation tasks may include: | <ul style="list-style-type: none"> • estimating loads to be transported or placed in storage • identifying mass, area and volume limitations of available transport/storage systems • carrying out calculations required to organise load(s) to match identified transport/storage limitations • calculations and estimations of weights and dimensions of cargo and containers to be shifted, stored or lifted |
| Calculations may include mathematical operations of addition, subtraction, multiplication and division and may be carried out: | <ul style="list-style-type: none"> • manually • with the aid of a calculator • with the aid of a computer • using appropriate tables and/or charts |
| Consultative processes may involve: | <ul style="list-style-type: none"> • other employees and supervisors • suppliers, customers and clients • relevant authorities and institutions • management and union representatives • industrial relations and OH&S specialists • other maintenance, professional or technical staff |
| Communication in the work area | <ul style="list-style-type: none"> • phone |

RANGE STATEMENT

may include:

- electronic data interchange (EDI)
- fax
- email
- internet
- radio
- RF systems
- oral, aural or signed communications

Hazards in the work area may include exposure to:

- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:

- workplace procedures and policies
- operations manuals, job specifications and induction documentation
- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes, goods and container identification/serial number
- Australian and international codes of practice and regulations relevant to workplace activities including mass and loading regulations
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- manufacturers specifications for equipment
- supplier and/or client instructions
- dangerous goods declarations and material safety data sheets (where applicable)
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- relevant codes and regulations relevant to workplace activities
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods

RANGE STATEMENT

- and hazardous substances
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- marine orders
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S procedures and guidelines concerning housekeeping operations
- Workplace procedures and policies for the carrying out housekeeping tasks in the workplace
- Risks when carrying out housekeeping tasks and related precautions to control the risk
- Housekeeping standards required in the workplace
- Site layout and obstacles
- Application of relevant industrial regulations and requirements
- Servicing procedures for housekeeping equipment

Required skills:

- Communicate effectively with others when carrying out housekeeping tasks
- Read and interpret instructions, procedures, information and signs relevant to housekeeping activities in the workplace
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to housekeeping in the workplace
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when carrying out housekeeping tasks
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any problems, faults or malfunctions identified when carrying out housekeeping tasks in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during housekeeping activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Monitor condition and performance of housekeeping tools and equipment
- Service housekeeping tools and equipment in terms of servicing schedule and standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1 Identify the housekeeping requirements, procedures and resources of different areas of the workplace

- 1.1 Workplace procedures for housekeeping are identified
- 1.2 Equipment and consumables are selected in accordance with work area requirements
- 1.3 Specific requirements for housekeeping activities in different parts of the work area are identified and followed

2 Monitor and maintain cleanliness and tidiness in the workplace

- 2.1 Initiative is used to continuously monitor the cleanliness and tidiness of the worksites
- 2.2 Housekeeping issues are raised with designated personnel in accordance with workplace procedures
- 2.3 Housekeeping equipment is operated in accordance with manufacturer instructions and company policy
- 2.4 Housekeeping equipment and supplies are maintained and stored

3 Complete assigned housekeeping duties

- 3.1 Assigned housekeeping duties are conducted following workplace procedures and ensuring that waste is removed
- 3.2 Maintenance requirements of any damaged items are notified to appropriate personnel
- 3.3 Schedules and records for housekeeping duties are maintained
- 3.4 Work areas are checked and meet required workplace standards
- 3.5 Work is carried out following enterprise practices and safe work procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

REQUIRED KNOWLEDGE AND SKILLS

Required knowledge:

- Workplace procedures and policies for carrying out housekeeping tasks in the workplace
- Risks when carrying out housekeeping tasks and related precautions to control them
- Housekeeping standards required in the workplace
- Purpose of housekeeping within the workplace
- Site layout and obstacles
- Servicing procedures for housekeeping equipment
- Relevant enterprise practices and safe work procedures for the job role

Required skills:

- Communicate effectively with others when carrying out housekeeping tasks
- Interpret and follow operational instructions and prioritise work
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when carrying out housekeeping tasks
- Report and rectify within limits of own role problems, faults and malfunctions identified when carrying out housekeeping tasks in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during housekeeping activities
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Monitor condition and performance of housekeeping tools and equipment
- Service housekeeping tools and equipment in terms of servicing schedule and standard operating procedures
- Select and use required personal protective equipment (PPE), conforming to industry and OH&S standards
-

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the

performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - identifying workplace housekeeping requirements
 - undertaking housekeeping in the workplace

Context of and specific resources for assessment

- Access is required to:
 - relevant and appropriate materials and equipment to meet the performance criteria
 - applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Practical assessment must occur:
 - in three different activities of the job role in the workplace
 - if in a simulated work environment, using industry-standard equipment

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Housekeeping tasks may be conducted:

- in a range of work environments
- by day or night

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites

Work may be conducted in:

- tight or restricted spaces
- exposed conditions
- controlled or open environments

Housekeeping duties may include:

- cleaning
- returning goods or equipment to storage
- repacking
- waste removal
- maintenance

- Hazards in the work area may include exposure to:**
- chemicals
 - dangerous or hazardous substances
 - movement of equipment, goods and materials
- Personnel in the work area may include:**
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:**
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Depending on workplace context, PPE may include:**
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
 - eye wash
- Information and documents may include:**
- OH&S and environmental protection regulations
 - workplace housekeeping procedures and policies
 - codes of practice, including the National Standard for Manual Handling and the industry safety code
 - material safety data sheets
 - policies and procedures for entry and work in confined spaces
 - manufacturer instructions concerning the use and servicing of equipment
 - supplier and customer instructions
 - emergency procedures
 - regulations and policies concerning noise, smoking, work station ergonomics and other critical OH&S issues
 - goods identification numbers and codes
 - manifests, bar codes, goods and container identification
 - relevant legislation, regulations and related documentation
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements
 - quality assurance procedures
- Applicable regulations and legislation may include:**
- relevant state and territory:
 - OH&S legislation
 - environmental protection legislation
 - workplace relations regulations

- dangerous goods and air freight regulations
-

TLIF2012A Apply safe procedures when handling/transporting dangerous goods or explosives

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to apply safe handling strategies when handling dangerous goods or explosives, including driving the vehicle concerned in a safe manner and consulting with relevant authorities/persons in accordance with regulatory requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant Australian and state/territory regulations and codes, including the current Australian Dangerous Goods Code, the Australian Explosives Code, and the Code of Practice for the Safe Transport of Radioactive Substances.

Work is performed under limited or minimum supervision. It involves the application of the basic principles, routine procedures and regulatory requirements to safe handling/transport of dangerous goods/explosives/hazardous substances in a range of operational situations.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Operate equipment and/or vehicle in a safe manner

- 1.1 Safety equipment is checked for serviceability and required quantities and types
- 1.2 Equipment/vehicle is operated safely in accordance with the relevant industry regulations, licence/permit requirements/or standards and as directed by police and/ or competent authority
- 1.3 Safety guidelines and codes are correctly applied
- 1.4 Dangerous goods/explosives/hazardous substances are handled/conveyed in accordance with the relevant government regulations and codes
- 1.5 Relevant emergency procedures are assessed relative to the dangerous goods/explosives/hazardous substances concerned
- 1.6 Emergency procedures are instigated in accordance with the relevant codes and government regulations to ensure precautions are taken consistent with directions set out in the emergency procedures
- 1.7 Procedures are implemented to minimise damage to equipment, facilities and the environment and minimise injury to personnel

2 Consult with relevant authorities/persons

- 2.1 Dangerous goods occurrences are reported to the competent authority, fire brigade and/or police using appropriate workplace procedures, in specified timeframes in accordance with relevant regulatory requirements
- 2.2 Assistance is provided to the competent authority as requested
- 2.3 Other persons within affected emergency area are warned about the hazard in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant Australian and state/territory regulations and codes pertaining to the identification, handling and marking of dangerous goods, explosives or hazardous substances including the current Australian Dangerous Goods Code
- OH&S procedures and guidelines concerning the lifting and movement of loads
- The company's incident reporting system, and the responsibility of the employer to report incidents to the relevant State or Government authority
- Risks and hazards when handling and conveying dangerous goods, explosives or hazardous substances, and related precautions to control the risk
- Workplace procedures and policies for the handling and transport of dangerous goods, explosives or hazardous substances
- Characteristics of various dangerous goods, explosives or hazardous substances and their implications for handling and transport
- Compatibility of various types of dangerous goods, explosives or hazardous substances
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when handling or transporting dangerous goods or explosives
- Read and interpret instructions, procedures, information and signs relevant to the handling or transporting of dangerous goods or explosives
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the handling or transporting of dangerous goods or explosives
- Operate electronic communication equipment to required protocol
- Work collaboratively with others handling or transporting dangerous goods or explosives
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when handling or transporting dangerous or hazardous goods or explosives in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise during the handling or

Required skills:

transporting of dangerous goods or explosives

- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the handling or transporting of dangerous goods or explosives
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in handling and transportation equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - identifying characteristics and hazards of the dangerous goods/explosives/hazardous substances being handled
 - interpreting relevant signs, labels and codes
 - locating, interpreting and applying relevant information
 - safely handling/transporting dangerous goods/explosives/hazardous substances in accordance with workplace procedures and regulatory requirements
 - identifying, selecting and using appropriate handling/transport equipment, vehicles, personal protection equipment and related procedures

Context of and specific resources

- Performance is demonstrated consistently over a period

EVIDENCE GUIDE

for assessment

of time and in a suitable range of contexts

- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:

- in a range of work environments and weather conditions
- by day or night

Customers may be:

- internal or external

Workplaces may comprise:

- internal or external

Work may be conducted in:

- restricted spaces
- exposed conditions
- controlled or open environments

RANGE STATEMENT

- a workplace, warehouse or depot
 - a vehicle on the road
 - client's workplace
 - convoy of a group of vehicles
 - special precautions for handling, stacking and transport
- Goods/cargo being handled/conveyed may require:
- as defined in the respective Australian Codes
- Classes of dangerous goods/explosives/hazardous substances are:
- in the respective Australian Codes
- Standard marking and signage for identified explosives and dangerous goods is as required:
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Handling operations may be carried out:
- both manually and with the aid of lifting equipment and/or appliances
- Load restraint procedures and equipment are:
- as specified in mass and loading regulations and guidelines
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
 - protective clothing

RANGE STATEMENT

Information/documents may include:

- goods/materials identification numbers, codes and signs
- manifests, bar codes, goods and container identification
- manufacturers specifications for equipment/tools
- workplace procedures and policies for the handling of dangerous goods, explosives and radioactive and other hazardous substances, and incident reporting
- supplier and/or client instructions
- material safety data sheets
- relevant codes of practice, including the Australian Dangerous Goods Code, the Australian Explosives Code, the Code of Practice for the Safe Transport of Radioactive Substances, the Industry Safety Code, and National Standards for Manual Handling
- National Load Restraint Guide
- award, enterprise bargaining agreement, other industrial arrangements
- standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- Australian and state/territory regulations pertaining to the handling of dangerous goods/explosives/hazardous substances
- Australian and international regulations and codes of practice for the handling and transport of explosives, dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - IATA Dangerous Goods by Air regulations
 - Australian and International Explosives Codes
 - Code of Practice for the Safe Transport of Radioactive Substances
 - state/territory legislation covering the safe handling of infectious substances
- relevant state/territory environmental protection legislation
- equal opportunity
- workplace relations regulations
- equal employment opportunity and affirmative action legislation
- relevant state/territory OH&S legislation

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|---|
| 1 Respond to the incident | <p>1.1 Details of incidents, accidents and emergencies are received, analysed and confirmed</p> <p>1.2 Immediate coordination requirements are identified and actioned in accordance with organisation procedures</p> <p>1.3 Travel to the incident site is by the shortest, fastest, legal means and routes</p> |
| 2 Coordinate on-site activities | <p>2.1 Control of site activities is assumed on arrival and the operator and other authorities present are informed of this action</p> <p>2.2 Assistance is provided to clients and operators within the limitations of duty of care and organisation requirements</p> <p>2.3 Details of personnel, including names and nature of injuries, are notified to relevant personnel, following enterprise procedures</p> <p>2.4 Assistance is provided to relevant authorities within legal and policy limitations</p> |
| 3 Complete follow-up actions | <p>3.1 Details of affected personnel, including names, nature of injuries and follow-up treatments are notified to next-of-kin in accordance with organisation procedures</p> <p>3.2 Incidents resulting in a near miss, accident or emergency are investigated and a report, including recommendations, is completed in accordance with enterprise policies and procedures</p> <p>3.3 Accident procedures and emergency plans are reviewed for effectiveness and recommendations for changes are prepared and submitted to appropriate persons</p> |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S and other regulatory codes, procedures and guidelines concerning response to accidents and emergencies
- Risks and hazards in the workplace and related precautions to control the risk
- Workplace procedures and policies for responding to accident/emergency situations
- Types of accidents and emergencies that can occur in a workplace and the appropriate action to be taken in each case
- Types of emergency equipment in the workplace and instructions for its use
- Site layout and obstacles
- Means to control and organise the accident scene, provide practical assistance and cooperate with others at the scene
- Focus of operation of work systems, equipment, management and site operating systems

Required skills:

- Communicate effectively with others when implementing and coordinating accident and emergency procedures
- Read and interpret instructions, procedures, information and signs relevant to the implementation and coordination of accident and emergency procedures
- Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the implementation and coordination of accident and emergency procedures
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when implementing and coordinating accident and emergency procedures
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when implementing and coordinating accident and emergency procedures in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events that may occur when implementing and coordinating accident and emergency procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Required skills:

- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Identify, select and use emergency equipment, processes and procedures
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and

EVIDENCE GUIDE

- Method of assessment**
- operation manuals
 - Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments and weather conditions
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Action to be taken in the event of an accident-emergency may include:
- identifying and following established emergency procedures
 - assessing the nature and extent of the emergency
 - rendering assistance and first aid
 - isolating and coordinating safety of the scene
 - alerting relevant organisational personnel and emergency services
 - recording relevant information and reporting on accident/emergency situation in accordance with regulatory and workplace requirements
- Emergency equipment may include:
- first aid kit
 - fire extinguishers
 - fire hose

RANGE STATEMENT

- Hazards in the work area may include:
- fire blanket
 - resuscitation equipment
 - exposure to chemicals
 - exposure to dangerous or hazardous substances
 - movements of equipment, goods and materials
 - accidents involving chemicals, toxic substances and other harmful substances
 - accidents involving equipment and vehicles
 - explosion and/or fire
 - personal accidents including lifting injuries
 - waste management and disposal
 - violent incidents such as armed robberies
- Consultative processes may include:
- workplace personnel and management
 - designated workplace emergency officers
 - emergency services personnel including ambulance, police, fire services, etc.
 - union representatives
 - industrial relations and OH&S specialists
 - other professional or technical staff
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
 - breathing apparatus
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Information/documents may
- workplace emergency/fire/accident procedures

RANGE STATEMENT

include:

- workplace procedures for the use of emergency equipment and personal protection equipment
- first aid instructions and procedures
- manufacturers instructions concerning the use and servicing of equipment
- manifests, bar codes, goods and container identification goods identification numbers and codes
- material safety data sheets
- codes of practice including the Dangerous Goods Code
- IMDG code markings, HAZCHEM codes and where applicable emergency information panels
- relevant legislation, regulations and related documentation related to emergency response situations
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- supplier and/or client advice on the hazards involved with goods or cargo
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- emergency procedures regulations
- dangerous goods and hazardous goods regulations
- relevant Australian standards and certification including Australian Standard AS 2865 - Safe Working in a Confined Space Code
- workplace relations regulations
- workers compensation regulations

Applicable regulations and legislation may include:

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to follow security procedures in the transport and logistics industry. It includes checking and maintaining the security of any passengers, workplace personnel and visitors; identifying and responding to any security threats or situations; and completing all required security records. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Persons achieving competence in this unit will need to fulfil the applicable security regulations and the relevant sections of a transport organisation's workplace security program and procedures.

Work is performed under some supervision generally within a team environment. It involves the application of an organisation's workplace security program and procedures and regulatory requirements to ensure that appropriate security procedures are followed when carrying out work activities in the transport and logistics industry.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Maintain security of passengers, workplace personnel and visitors

- 1.1 Where applicable, security checks of passengers, workplace personnel and visitors are carried out in accordance with workplace security program and procedures and within limits of role and responsibilities
- 1.2 Precautions and measures aimed at protecting the security of passengers, workplace personnel and visitors are followed in accordance with workplace security procedures and applicable security regulations
- 1.3 Signs of suspicious behaviour of passengers or other personnel are recognised and reported promptly to designated personnel in accordance with workplace security procedures
- 1.4 Any breaches of security requirements for passengers, workplace personnel and visitors are reported promptly to designated personnel in accordance with workplace procedures

2 Identify a security threat or situation

- 2.1 Signs of security threats are recognised and investigated where applicable in accordance with workplace security procedures
- 2.2 Security threat or situation is promptly identified, assessed and reported in accordance with workplace security procedures
- 2.3 Implications of the security threat or situation are evaluated in accordance with workplace security procedures
- 2.4 Relevant personnel are alerted to the security threat or situation as required within workplace security
- 2.5 Communications are maintained with relevant personnel to determine appropriate course of action

3 Respond to a security threat or situation

- 3.1 Response to an identified security threat or situation is in accordance with workplace security procedures, received

ELEMENT	PERFORMANCE CRITERIA
	instructions, regulatory requirements and emergency response plan where relevant
	3.2 Security threats or incidents are handled appropriately in accordance with established response plan and within limits of responsibility and duty of care
	3.3 Responsibilities are fulfilled in accordance with workplace security procedures and regulatory requirements
	3.4 Assistance is provided in controlling the site both prior to and following arrival of security and/or emergency services
	3.5 In the case of a security threat or emergency, assistance is provided to other staff and emergency services personnel conducting an initial survey of the scene
	3.6 Directions of the controlling security/emergency authority are followed and all possible assistance is provided in response to those directions
4 Maintain security records	4.1 Records of security checks and precautions are kept as applicable in accordance with workplace security procedures
	4.2 Reports of security incidents or threats are completed as applicable in accordance with workplace security procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Applicable transport security legislation including relevant international, national, state and territory acts, regulations codes and/or guidelines
- Relevant workplace security program and policies and procedures for responding to security threats, situations and emergencies
- Relevant quarantine regulations and requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Common security threats and incidents that may occur in transport, logistics and allied industries, and related roles and responsibilities of personnel when reporting them and responding to them
- Applicable measures for the securing of transport terminals, storage facilities, vehicles, trains, aircraft and/or vessels
- Signs of pillaging and theft

REQUIRED KNOWLEDGE AND SKILLS

- Signs of suspicious behaviour of passengers and other personnel
- Precautions and procedures aimed at protecting the security of passengers, workplace personnel and visitors
- Focus of operation of work systems, equipment, management and site operating systems when carrying out operations in the transport and logistics industries
- Common security problems that may occur when carrying out operations in the transport and logistics industries, and action that can be taken to address and resolve the problems
- Relevant documentation and reporting requirements
- Layout of worksite, vehicle, vessel, train or aircraft and operating procedures
- Procedures for operating any electronic communications equipment with required protocol

Required skills:

- Communicate effectively with others when following security procedures
- Read and interpret instructions, procedures, applicable regulatory requirements, labels, markings, ID cards and other information relevant to workplace security in the transport and logistics industries
- Complete required documentation and reports related to security procedures
- Work collaboratively with others when following security procedures
- Identify and solve and/or report problems that arise when following security procedures
- Modify activities depending on differing workplace contexts, risk situations and environments
- Adapt to differences in equipment, facilities, cargo and passengers
- Apply procedures for security checks and precautions as per limits of role and responsibilities
- Recognise signs of pillage and theft
- Recognise signs of security threats and situations
- Promptly report and/or rectify any identified problems that may arise when following security procedures in accordance with regulatory requirements and workplace procedures
- Follow security threat/incident response plan and procedures
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use relevant communications and other equipment required when following security procedures
- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - identifying signs of a possible security threat
 - responding to a possible security threat
 - applying relevant legislation and workplace procedures

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
- Practical assessment must occur:
 - through activities in an appropriately simulated environment, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Transport and logistics enterprises may involve:
- warehousing and distribution
 - road transport
 - rail transport
 - aviation
 - maritime
 - freight forwarding and customs broking
 - multimodal transport and logistics
- Work may be conducted:
- in a range of work environments by day or night
 - in large, medium or small transport terminals and storage facilities
 - at international airports, domestic airports, regional airports and remote airfields
 - on vehicles, trains, aircraft and vessels
- Security procedures may be aimed at preventing or identifying:
- persons trespassing on security zones and restricted areas
 - unauthorised airside access at security controlled airports and airfields
 - carriage or storage of prohibited goods
 - the carriage of improvised explosive devices
 - smuggling of goods
 - acts or threats of terrorism
 - hijacking of a vehicle, train, aircraft or vessel
 - extortion
 - assault
 - fraud
 - vandalism and graffiti
- Security measures may include:
- security guards at access points and gates to secured areas
 - locked doors, gates and fences
 - use of personal electronic access cards
 - recording of carrier and vehicle registration details at gates and checkpoints
 - bag check points
 - escorts for visitors in restricted areas
 - access control into and out of restricted security areas
 - use of ID cards
 - video surveillance equipment
 - X-ray screening of passengers, workplace personnel and visitors

RANGE STATEMENT

- explosives trace detection (ETD) screening of passengers, workplace personnel and visitors
 - screening of passengers, workplace personnel and visitors using hand-held and walk through magnetometers
- Communication in the work area may include:
- phone
 - radio
 - fax
 - email
 - electronic data transfer (EDI)
 - internet
 - oral, aural or signed communications
- Personal protection equipment may include:
- gloves
 - safety headwear and footwear
 - eye and ear protection
 - safety glasses
 - two-way radios
 - high visibility clothing
- Depending on the organisation concerned workplace procedures may be called:
- standard operating procedures
 - company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Information and documents may include:
- Australian transport security legislation and regulations
 - Australian and international codes of practice and regulations relevant to the secure transport of passengers
 - workplace security procedures and related policies and procedures
 - workplace standard operating procedures and policies
 - signs and instructions pertaining to security matters
 - operations manuals, job specifications and induction documentation
 - manufacturers specifications for equipment
 - supplier and/or client instructions
- Applicable legislation, regulations and codes may include:
- Australian transport security legislation and regulations
 - Australian and international codes of practice and regulations relevant to the secure transport of passengers
 - export/import/quarantine regulations
 - relevant state/territory OH&S legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to analyse and apply knowledge of logistics. The application of this knowledge is required by people who are not currently specialists in the field but need the knowledge to inform their decision making. The application of logistics knowledge is specific to a variety of component processes in logistical activities including the logistics support to operations, logistics support to capability and the application of logistics systems. There are no specific licensing or certification requirements applicable to this unit.

Application of the Unit

Application of the Unit

This unit was developed for emerging logistics specialists who need an understanding of the functions and activities of the wider organisation but is applicable to any individual in this field of work.

Typically these individuals must demonstrate the ability to work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. All activities are carried out in accordance with relevant organisational policy and procedures.

Licensing/Regulatory Information

Refer to Unit Descriptor

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Access and interpret relevant logistics information

- 1.1 Relevant logistics requirements are identified and obtained
- 1.2 Logistics information obtained is analysed to determine the relevance and application to the organisation
- 1.3 Outcomes of the analysis are documented and recommendations relevant to logistics are determined

2 Use knowledge of logistics

- 2.1 Logistics requirements and recommendations relevant to work are applied in accordance with organisational policy and procedures
- 2.2 Effectiveness of the recommendations is assessed, reviewed and recorded in accordance with organisational policy and procedures
- 2.3 Recommendations are adjusted if required and documented for future application in accordance with organisational policy and procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Logistics information or information systems

REQUIRED KNOWLEDGE AND SKILLS

- Logistics knowledge relevant to the work performed
- Logistics relevant to logistics support to capability and logistics support to operations
- Safety, legislative and statutory requirements, including environmental, sustainability issues relevant to logistics

Required skills:

- Undertake, analyse and interpret logistics information to determine where internal and external factors impact on the logistics requirements, and adjust planning accordingly
- Consult and negotiate with key stakeholders (both internal and external) and resolve any potential areas of conflict or concern to ensure that overall objectives are achieved
- Display resilience by continuing to move forward despite criticism or setbacks
- Focus on clear communication of key logistics information, present information confidently and select the appropriate medium for communication to a range of audiences
- Identify the relationship between organisational goals and recognise how own work contributes to the achievement of those goals
- Use appropriate information technology and software

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Assessment must confirm the ability to:
 - adhere to relevant logistics requirements
 - apply knowledge of logistics to assist in work and to guide problem solving
 - demonstrate understanding of personal role in relation to wider organisational or project context
- Competency should be demonstrated over time and should be observed in a range of actual or simulated work contexts

Context of and specific resources for assessment

- Competency should be assessed in the workplace or in a simulated workplace environment
- Access is required to:
 - computer and relevant software

EVIDENCE GUIDE

Method of assessment

- legislation, guidelines, procedures and protocols relating to logistics
 - plans
 - workplace documentation
- Assessment of this unit must be undertaken by a registered training organisation
 - Where possible, assessment should be supported by questions to assess required knowledge. Questioning techniques should suit the language and literacy levels of the candidate
 - Assessment methods should reflect workplace demands such as literacy and the needs of particular groups
 - Assessment methods suitable for valid and reliable assessment of this unit of competency may include a combination of methods such as:
 - authenticated evidence from the workplace and/or training programs
 - case studies
 - demonstration
 - feedback from supervisors and peers regarding the candidate's ability
 - observation
 - portfolios
 - projects
 - questioning
 - reviews or reports prepared by the candidate
 - scenarios
 - simulation or role plays

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Logistics may include:

- logistics support to capability
- logistics support to operations and logistics systems

Organisation may include:

- enterprises that work in logistics

RANGE STATEMENT

Organisational policy and procedures may include:

- other government departments or instrumentalities that require logistics support
- Australian Standards
- international standards
- organisational instructions and standards

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to analyse and apply knowledge of integrated logistics support. Integrated logistics support is a disciplined and iterative approach to materiel management, which addresses supportability throughout the life cycle of a materiel system with the aim of ensuring that operational and preparedness requirements are met, at a minimised life cycle cost, within regulatory, legislative and contractual constraints. The application of this knowledge is required by people who are not integrated logistics support specialists but who need the knowledge to inform their decision making. The application of integrated logistics support knowledge is specific to a variety of component processes in material logistics activities. There are no specific licensing or certification requirements applicable to this unit.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to analyse and apply knowledge of the technical regulatory framework. The application of this knowledge is required by people who are not specialists of the technical regulatory framework but need the knowledge to inform their decision making. The application of technical regulatory framework knowledge is specific to a variety of component processes in material logistics activities. There are no specific licensing or certification requirements applicable to this unit.

Application of the Unit

Application of the Unit

This unit was developed for logistics specialists working within materiel logistics but is applicable to any individual in this field of work.

Typically these individuals must demonstrate the ability to work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. All activities are carried out in accordance with relevant organisational policy and procedures.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|---|
| <p>1 Access and interpret relevant technical regulatory framework information</p> | <p>1.1 Relevant technical regulatory framework requirements are identified and obtained</p> <p>1.2 Technical regulatory information obtained is analysed to determine the relevance and application to the organisation</p> <p>1.3 Outcomes of the analysis are documented and recommendations relevant to technical regulatory requirements are determined</p> |
| <p>2 Use knowledge of technical regulatory framework</p> | <p>2.1 Technical regulatory requirements and recommendations relevant to materiel and materiel logistics are applied in accordance with organisational policy and procedures</p> <p>2.2 Effectiveness of the recommendations is assessed, reviewed and recorded in accordance with organisational policy and procedures</p> <p>2.3 Recommendations are adjusted if required and documented for future application in accordance with organisational policy and procedures</p> |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Configuration management

REQUIRED KNOWLEDGE AND SKILLS

- Materiel life cycle
- Safety, legislative and statutory requirements, including environmental, sustainability issues relevant to materiel and materiel systems
- Technical regulatory framework knowledge relevant to the work performed
- Technical regulatory framework relevant to materiel and materiel systems

Required skills:

- Display resilience by continuing to move forward despite criticism or setbacks
- Focus on clear communication of technical regulatory information to a range of audiences
- Identify, interpret and analyse technical regulatory requirements relevant to work being performed
- Present technical regulatory information confidently and select the appropriate medium for communication
- Use appropriate information technology and software

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Assessment must confirm the ability to:
 - adhere to relevant compliance requirements
 - apply knowledge of the technical regulatory framework to assist in work and to guide problem solving
 - demonstrate understanding of personal role in relation to wider organisational or project context
- Competency should be demonstrated over time and should be observed in a range of actual or simulated work contexts

Context of and specific resources for assessment

- Competency should be assessed in the workplace or in a simulated workplace environment
- Access is required to:
 - computer and relevant software
 - legislation, guidelines, procedures and protocols

EVIDENCE GUIDE

Method of assessment	<p>relating to technical regulatory framework</p> <ul style="list-style-type: none"> • plans • workplace documentation <ul style="list-style-type: none"> • Assessment of this unit must be undertaken by a registered training organisation • Where possible, assessment should be supported by questions to assess required knowledge. Questioning techniques should suit the language and literacy levels of the candidate • Assessment methods should reflect workplace demands such as literacy and the needs of particular groups • Assessment methods suitable for valid and reliable assessment of this unit of competency may include a combination of methods such as: <ul style="list-style-type: none"> • authenticated evidence from the workplace and/or training programs • case studies • demonstration • feedback from supervisors and peers regarding the candidate's ability • observation • portfolios • projects • questioning • reviews or reports prepared by the candidate • scenarios • simulation or role plays
-----------------------------	---

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Technical regulatory framework may include compliance in:	<ul style="list-style-type: none"> • environment • safety • suitability
Organisation may include:	<ul style="list-style-type: none"> • enterprises that work in materiel logistics

RANGE STATEMENT

Materiel may include:

- other government departments or instrumentalities that work with materiel
- all items (including ships, tanks, self-propelled weapon, aircraft etc. and related spares, repair parts and support equipment but excluding real property, installations and utilities) necessary to equip, operate, maintain and support designated activities without distinction as to its application for administrative or operational purposes

Materiel logistics is:

- the life cycle management of materiel to achieve the stated objectives of the capability managers

Organisational policy and procedures may include:

- Australian Standards
- international standards
- organisational instructions and standards

TLIX5020A Develop and review configuration management plans

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to develop and review configuration management plans and associated subordinate plans to ensure efficient and effective delivery of configuration management across the materiel and materiel system life cycle. Configuration management plans document how the materiel or materiel system will be supported to ensure they meet the stated capability requirement. Configuration management is a discipline applying technical and administrative direction and surveillance to: identify and document the functional and physical characteristics of a configuration item, control changes to those characteristics, and record and report change processing and implementation status. There are no specific licensing or certification requirements applicable to this unit.

Application of the Unit

Application of the Unit

This unit was developed for configuration management specialists working within materiel logistics but is applicable to any individual in broader logistic roles.

Typically these individuals must demonstrate the ability to work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. All activities are carried out in accordance with relevant organisational policy and procedures.

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

1 Identify and analyse configuration management requirements

2 Prepare configuration management plans

3 Review configuration management plans

PERFORMANCE CRITERIA

- 1.1 Configuration management planning requirements are identified in accordance with organisational policy and procedures
- 1.2 Sources of information relevant to configuration management are identified and accessed in accordance with organisational policy and procedures
- 1.3 Standards and legislation applicable to configuration management are identified and accessed
- 1.4 Analysis of configuration management resource requirements is conducted in accordance with organisational policy and procedures
- 2.1 Stakeholder consultation is conducted in accordance with relevant organisational policy and procedures
- 2.2 Organisational policy and procedures relevant to configuration management requirements are identified and interpreted
- 2.3 Configuration management plans are developed in accordance with legislative requirements and organisational policy and procedures
- 2.4 Configuration management plans are promulgated in accordance with organisational policy and procedures
- 3.1 Configuration management plans are evaluated in accordance with relevant organisational policy and procedures
- 3.2 Required changes to configuration management plans are

ELEMENT**PERFORMANCE CRITERIA**

identified and prepared in accordance with relevant organisational policy and procedures

3.3 Amendments to configuration management plans are prepared and promulgated to relevant stakeholders or personnel in accordance with relevant organisational policy and procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Codification and cataloguing processes
- Configuration management
- Legislative and regulatory environment as it pertains to materiel logistics
- Logistics governance
- Materiel logistics
- Organisational policy and procedures
- Organisational role relevant to configuration management
- Planning processes
- Product knowledge related to systems and/or equipment in service in the organisation
- Safety, legislative and statutory requirements relevant to configuration management

Required skills:

- Apply configuration management and project management knowledge relevant to planning
- Consult and negotiate effectively with stakeholders (both internal and external) and resolve any potential areas of conflict or concern to ensure that overall configuration management planning objectives are achieved
- Demonstrate an understanding of the strategic objectives of the organisation and identify and assess potential alliances and effective strategies
- Display resilience by continuing to move forward despite criticism or setbacks
- Draw on information from a variety of sources using research, analysis and judgement to identify and develop configuration management plans
- Identify, review and analyse information that may impact on configuration management planning, or may be impacted by configuration management planning

Required skills:

- Identify the relationship between organisational goals and recognise how own work contributes to the achievement of those goals
- Undertake performance measurement relevant to configuration management planning to enable objectives to be measured against defined parameters
- Use appropriate information technology and software

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Assessment must confirm the ability to:
 - adhere to relevant occupational health and safety requirements
 - identify the requirements for plans and adjust them as necessary to ensure effective and efficient performance
 - initiate and efficiently monitor processes
 - initiate any remedial action required
- Competency should be demonstrated over time and should be observed in a range of actual or simulated work contexts

Context of and specific resources for assessment

- Competency should be assessed in the workplace or in a simulated workplace environment
- Access is required to:
 - computer and relevant software
 - legislation, guidelines, procedures and protocols relating to configuration management
 - plans
 - workplace documentation

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- Where possible, assessment should be supported by questions to assess required knowledge. Questioning techniques should suit the language and literacy levels of the candidate
- Assessment methods should reflect workplace demands

EVIDENCE GUIDE

- such as literacy and the needs of particular groups
- Assessment methods suitable for valid and reliable assessment of this unit of competency may include a combination of methods such as:
 - authenticated evidence from the workplace and/or training programs
 - case studies
 - demonstration
 - feedback from supervisors and peers regarding the candidate's ability
 - observation
 - portfolios
 - projects
 - questioning
 - reviews or reports prepared by the candidate
 - scenarios
 - simulation or role plays

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Organisational policy and procedures may include:

- Australian Standards
- international standards
- organisational instructions and standards

Sources of information may include:

- conceptual documents
- contractors
- customers
- legislation
- managers
- peers
- plans
- policies
- publications
- reference material
- standards

RANGE STATEMENT

- Standards and legislation may include:
- supervisors
 - suppliers
 - Australian Standards
 - international standards
 - organisational instructions and standards
 - regulations related to such matters as export and import licensing, taxes and duties
 - relevant federal, state and local government legislation and regulations including certification requirements
- Resource requirements may include:
- financial
 - information technology applications and tools
 - infrastructure
 - personnel
 - time
 - transport
- Stakeholders may include:
- capability manager
 - contractors
 - customers
 - project managers
 - regulators
 - regulatory authorities
 - subordinates
 - supervisors
 - suppliers
 - team members
- Configuration management plans may include:
- delegations
 - instructions
 - manuals
 - processes
- Promulgated include:
- authorised
 - documented
 - endorsed
 - issued
 - published

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|--|
| 1 Identify configuration management requirements | <p>1.1 Sources of information relevant to configuration management are identified and obtained in accordance with organisational policy and procedures</p> <p>1.2 Currency of information is reviewed and documented in accordance with organisational policy and procedures</p> <p>1.3 Configuration management requirements are defined and documented in accordance with organisational policy and procedures</p> |
| 2 Develop configuration management processes | <p>2.1 Consultation with stakeholders is conducted in accordance with organisational policy and procedures</p> <p>2.2 Configuration management processes are developed and recorded in accordance with organisational policy and procedures</p> <p>2.3 Key performance indicators are developed and documented in accordance with organisational policy and procedures</p> <p>2.4 Analysis of configuration management processes is developed and documented in accordance with organisational policy and procedures</p> |
| 3 Apply configuration management processes | <p>3.1 Configuration management risks and impacts are identified, recorded and managed</p> <p>3.2 Configuration management procedures are applied in accordance with legislative requirements</p> <p>3.3 Configuration management processes are carried out in accordance with organisational policy and procedures</p> <p>3.4 Failures and variances are documented, reported and managed in accordance with organisational policy and procedures</p> |

ELEMENT	PERFORMANCE CRITERIA
	3.5 Participation and contribution to configuration management processes is established and maintained
4 Review configuration management processes	4.1 Performance systems and processes are monitored and analysed to assess progress
	4.2 Systems, procedures and records associated with documenting performance are managed in accordance with organisation's requirements
	4.3 Configuration management processes are reviewed in accordance with organisational policy and procedures
	4.4 Changes required are identified and prepared in accordance with organisational policy and procedures
	4.5 Amendments to configuration management processes are incorporated into plans and promulgated to relevant stakeholders in accordance with organisational policy and procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Codification and cataloguing processes
- Configuration management principles and processes
- Industrial base capability
- Legislative and regulatory environment, including environmental, sustainability issues as it pertains to materiel logistics
- Logistics governance
- Management processes
- Organisational policy and procedures
- Organisational role relevant to configuration management
- Product knowledge related to systems and/or equipment in service in the organisation
- Safety, legislative and statutory requirements, including environmental, sustainability issues relevant to configuration management

Required skills:

Required skills:

- Apply configuration management and project management knowledge relevant to configuration management processes
- Demonstrate an understanding of the strategic objectives of the organisation and identify and assess potential alliances and effective strategies
- Display resilience by continuing to move forward despite criticism or setbacks
- Focus on clear communication of configuration management processes, present information confidently and select appropriate medium for communication to a range of audiences
- Identify, review and analyse information that may impact on configuration management processes, or may be impacted by configuration management processes
- Negotiate and communicate effectively with key stakeholders (both internal and external) and resolve any potential areas of conflict or concern to ensure that overall configuration management objectives are achieved
- Undertake research and analysis to identify and develop configuration management processes
- Use appropriate information technology and software for configuration management processes

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Assessment must confirm the ability to:
 - adhere to relevant occupational health and safety requirements
 - identify and establish configuration management operation processes
 - identify, acquire and adjust resources as necessary to ensure effective/efficient performance of the processes
 - initiate and efficiently monitor processes
 - initiate any remedial action required
 - effectively and efficiently manage configuration management processes
- Competency should be demonstrated over time and should be observed in a range of actual or simulated work contexts

Context of and specific resources

- Competency should be assessed in the workplace or in a

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to manage and monitor all technical data and information creation, capture, use and monitoring activities within the data management system. This competency occurs with the system framework established by others. It may also be used to review these processes and activities. There are no specific licensing or certification requirements applicable to this unit.

Application of the Unit

Application of the Unit

This unit was developed for technical regulatory framework specialists working within materiel logistics but is applicable to any individual in this field of work.

Typically these individuals must demonstrate the ability to work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. All activities are carried out in accordance with relevant organisational policy and procedures.

ELEMENT	PERFORMANCE CRITERIA
data management system	<p>timeframes and frequency</p> <p>4.2 Staff being monitored are notified in accordance with organisational policy and guidelines, where applicable</p> <p>4.3 Any variation from data management system's framework, rule, standards and procedures that exceed the agreed limit is noted and details of the situation are recorded</p> <p>4.4 Where required, reports are provided to appropriate authority relating to technical data and information use and maintenance, and are in the required format, at the required intervals</p>
5 Identify and respond to problems and changes	<p>5.1 Problems and changes requiring a systematic response are identified from monitoring reports and external events</p> <p>5.2 Recommendations are made for revisions to systems, procedures, and future (strategic) plans in response to identified variations, changes and problems</p> <p>5.3 Amendments to systems are devised and implementation is planned, in response to problems and changes that require a systemic response</p> <p>5.4 Recommendations for system amendments and the planning and implementation required are prepared, and approval is sought from appropriate authority</p> <p>5.5 Procedures for using technical data and information systems, and subsequent alterations and amendments to the procedures are authorised, ensuring that performance indicator parameters and access rules are adhered to</p>
6 Designate technical data and information creation and capture responsibilities	<p>6.1 Responsibilities for technical data and information creation and capture activities are designated to staff in accordance with organisational policy</p> <p>6.2 Technical data and information creation and capture performance targets are set within the parameters of the technical data management plan</p> <p>6.3 Resources for the budget period are allocated in accordance with organisational policy and strategic plan</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

REQUIRED KNOWLEDGE AND SKILLS

- Area of technical expertise
- Data management, standards, principles, process and functional requirements
- Details of the technical regulatory framework, organisation's engineering management plans and the technical data management plan
- Established communication channels and protocols
- Organisational functions, structure and culture
- Organisational policy, strategies and procedures
- Organisation's data management systems
- Organisation's rules for the capture of, access to, and use and maintenance of, technical data and information
- Organisation's technical classification scheme and language
- Problem identification and resolution
- Procedures for recording, reporting and maintaining workplace records and information
- Quality assurance principles and processes
- Work flow and business process re-engineering principles and practices

Required skills:

- Apply technical data and information and project management knowledge to technical data and information systems
- Consult and negotiate effectively with key stakeholders (both internal and external) and resolve any potential areas of conflict or concern to ensure that overall technical data and information systems objectives are achieved
- Display resilience by continuing to move forward despite criticism or setbacks
- Identify the relationship between organisational goals and recognise how own work contributes to the achievement of those goals
- Implement processes to enable new technical data and information system requirements to be effectively transitioned across the life cycle - this includes integrated logistics support considerations, including environmental, sustainability issues, and validation and verification activities
- Monitor processes to ensure that the technical data and information systems continue to enable the operational requirements to be attained - this may include performance metrics

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Assessment must confirm the ability to:
 - apply relevant implementation processes
 - monitor and report on implementation processes
 - analyse data and information
 - apply knowledge of technical data and information plans to assist in work and to guide problem solving
 - demonstrate understanding of personal role in relation to wider organisational or project context
- Competency should be demonstrated over time and should be observed in a range of actual or simulated work contexts

Context of and specific resources for assessment

- Competency should be assessed in the workplace or in a simulated workplace environment
- Access is required to:
 - computer and relevant software
 - legislation, guidelines, procedures and protocols relating to technical data and information systems
 - plans
 - workplace documentation

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- Where possible, assessment should be supported by questions to assess required knowledge. Questioning techniques should suit the language and literacy levels of the candidate
- Assessment methods should reflect workplace demands such as literacy and the needs of particular groups
- Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of:
 - authenticated evidence from the workplace and/or training programs
 - case studies
 - demonstration
 - feedback from supervisors and peers regarding the candidate's ability
 - observation

EVIDENCE GUIDE

- portfolios
- projects
- questioning
- reviews or reports prepared by the candidate
- scenarios
- simulation or role plays

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Technical data and information may be:

- as specified and defined in the technical regulatory framework
- included either explicitly or implicitly in the established system framework

Approved system framework:

- is established by an approved authority and issued as the basis of all technical data and information management
- contains:
 - high level accountability and functional responsibilities
 - high level control/management requirements and protocols
 - key aspects of technical regulatory framework
 - outline of the structuring rules for repositories, cataloguing systems, security access systems, processes and software
 - protocols on functionality, maintainability and growth
 - technical context
 - technologies/standards

Rules may include:

- allocating access/security status
- capturing structural and contextual metadata
- classifying and indexing items
- generating and allocating unique identifiers to data items
- identifying and recording disposal status items
- identifying technical data and information creators
- links between technical data and information items
- locating and tracking items

RANGE STATEMENT

- Measurable performance indicators may include:
- naming/titling items
 - negotiating transfer of custody or ownership
 - recording the use of history of items
 - those developed for specific tasks
 - those incorporated in the data management system
 - performance indicators that relate to:
 - disposal (percentage of data, unsentenced data, overdue for disposal action, functions/data not covered by disposal schedules)
 - parameters for tracking of technical data and information
 - retrieval and access (security and access rules, response to request time limits, service levels for requests)
- Data management responsibilities may include:
- established systems framework
 - organisation's responsibility and accountability analysis
 - system's rules, standards and procedures
- Identified and documented may include:
- established systems framework
 - organisation's responsibility and accountability analysis
 - system's rules, standards and procedures
- Means of surveillance may include:
- examination of results (technical data and information)
 - form/s of reporting
 - real-time observation (security of process)
 - statistical reports
 - selected snapshots of the system
- Appropriate authority may include:
- chief executive officer
 - delegated individual
 - external public authority
 - nominated senior management representative
 - senior management team
 - technical/engineering authority
- Monitoring may include:
- number of systems
 - single data management system
- Variation may include:
- increases or decreases in the use of particular technologies/standards
 - variations from the data management system's performance or capacity
 - variations within the agreed limit but which are consistent
- Reports may include:
- technical data and information capture
 - technical data and information compliance

RANGE STATEMENT

- Problems and changes may include:
- technical data and information creation
 - technical data and information maintenance
 - technical data and information use
 - changes in administrative changes to functions/activities
 - changes to organisational structures
 - legislative or technical regulatory changes
 - technological change and implementation
- Systemic may include:
- current technical data management systems
 - technical systems (which generate technical data and information)
 - storage facilities systems
 - systemic changes which may include:
 - amendment to the classification system
 - bulk movement of technical data and information to control
 - migration of systems
 - new classification and control language
 - new disposal classes or retention periods
 - new organisational or business unit functions
- Revisions may include:
- access rules and procedures
 - classification and indexing schemes
 - disposal schedules
 - storage projections and requirements
 - technical data and information specifications
- Recommendations for system amendments may include:
- changes to/enforcement of procedures
 - counselling of non-conforming individuals/business units
 - disciplinary action

1	<p>This skill set was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <ul style="list-style-type: none"> New skill set composed of units previously contained in DEF20912 Certificate II in Communications Operations

Description

This skill set provides a set of skills for Defence Communication Operators to ensure commanders can communicate effectively using satellite terminals, radios, hand held and desk-top data terminals and security equipment. Whatever the location, deployment or task, Communication Operators provide the appropriate communications systems for the Military whether it is on land, in the air or at sea.

Pathways Information

These units may provide credit towards a range of qualifications in the Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

Units	
DEFCMM001	Maintain security in a Defence communications and information systems environment
DEFCMM002	Transmit and receive messages utilising Defence messaging systems
DEFCMM003	Transmit and receive data via information exchange systems
DEFCMM004	Conduct operator level maintenance in a Defence environment

DEFCMM005	Transmit and receive messages via voice systems
DEFCMM006	Support the operation of a communication and information system facility

Target Group

This skill set applies to those working as communications operators within Defence.

Suggested words for Statement of Attainment

These competencies meet the industry standards for communication operators.

DEFSS00009 Physical Training Skill Set

Modification History

Release	Comments
1	<p>This skill set was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <ul style="list-style-type: none"> • DEF unit codes updated • SSISSPT303A and SRXGRO001A units removed

Description

This skill set applies to people who provide fitness training support.

This skill set provides a set of skills to combat fitness leaders who provide fitness training support to small groups or organisations in an operational setting. This function is performed in addition to their primary trade or employment over a range of familiar and predictable contexts.

Pathways Information

This skill set is stand alone and does not lead to a specific Defence qualification. The units it includes may provide credit towards a Sport, Fitness and Recreational Training Package qualification.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

Units	
DEFFIT001	Conduct a group fitness appraisal
DEFFIT002	Develop a group fitness program
DEFFIT003	Conduct individual fitness assessments

DEFFIT004	Instruct a workplace physical training session
-----------	--

Target Group

This skill set applies to people who provide fitness training support.

Suggested words for Statement of Attainment

These competencies meet the industry standards for providing basic fitness training to small groups in an operational setting.

DEFSS00010 Maritime Operations Skill Set
