Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for the provision of advice on service discipline law	1.1 Identify circumstances that require the provision of advice on service discipline law. 1.2 Analyse circumstances and conduct research within scope of own responsibility.
2. Provide information on service discipline law	2.1 Identify words or actions constituting common service offences against the DFDA for which a service member may be charged and convicted by a service tribunal. 2.2 Explain privileges of witnesses. 2.3 Advise subordinates of the judicial process, documentation requirements and the legal rights of a service member. 2.4 Explain procedures applying to offenders in custody to subordinates. 2.5 Explain professional standards to be applied in the administration of a summary proceeding to subordinates. 2.6 Explain post-tribunal procedures to subordinates. 2.7 Inform subordinates of the role and jurisdiction of a discipline officer, disciplinary infringements and/or punishments available to a discipline officer and the rights of an accused.
3. Demonstrate procedural aspects related to the administration of a service tribunal	3.1 Show subordinates how to prepare for proceedings including the preparation of personal statements. 3.2 Explain and demonstrate duties of a recorder to subordinates.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning N/A					Reading					Writing					Oral communication					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCM116C Provide advice on service discipline law.

Assessment Requirements for DEFLAW001 Provide advice on service discipline law

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. The candidate must demonstrate evidence of performance of the following on at least one occasion.

- communicating orally
- conducting briefings
- responding to questioning
- listening
- reflecting
- undertaking research
- providing advice that is relevant and appropriate to the circumstances

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- ADF judicial policies and procedures for service tribunals
- application of DFDA to service members
- composition and content of the Defence Law Manual (DLM) and other relevant law including offences under the DFDA and the principles
- equity and diversity principles
- nature and limits of Defence jurisdiction
- origin and structure of the Defence legal system
- role, duties and powers of a discipline officer

- scales of punishment
- service tribunal procedures and processes

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFLAW002 Perform the duties of a unit discipline officer

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM117C Perform the duties of a unit discipline officer.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with new standards• All PC transitioned from passive to active voice

Application

This unit describes the skills required to undertake the duties and responsibilities of a unit discipline officer in the Australian Defence Force (ADF) under the Defence Force Discipline Act (DFDA).

This unit applies to those working as ADF members who may potentially be appointed as unit discipline officers by virtue of their rank.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, while performing specific tasks in a broad range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Justice

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for unit discipline officer hearings	1.1 Receive and interpret appointment to act as a unit discipline officer under the DFDA. 1.2 Confirm jurisdiction for a disciplinary infringement.
2. Deal with infringements	2.1 Conduct unit discipline officer hearings. 2.2 Impose punishments.
3. Finalise unit discipline officer hearings	3.1 Complete infringement notices. 3.2 Conduct post-hearing actions.

Foundation Skills

DEFLAW003 Provide advice on service administrative law

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM122A Provide advice on service administrative law.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 2.2 and 2.3 merged

Application

This unit describes the skills required to provide advice to subordinates on the procedural aspects and practical application of service administrative law as it relates to the Australian Defence Force (ADF). This is to assist supervisors in the following situations:

- reviewing administrative sanctions
- reviewing the Notice to Show Cause process
- drafting a regress of grievance
- listing common administrative law references
- reviewing administrative law principles
- outlining how administrative law processes apply to common ADF policies such as illicit drugs, equity and diversity, harassment and bullying, sexual harassment, alcohol abuse

This unit applies to those working as members of the ADF.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit must have authority to act independently, have or will have responsibility for subordinates, would work under the commander's direction, while performing complex tasks in a broad range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Justice

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare to provide advice on service administrative law	1.1 Identify circumstances that require the provision of advice on service administrative law. 1.2 Analyse circumstances and conduct research within the scope of own responsibility. 1.3 Locate and interpret guidance in relevant administrative law organisational policy documents.
2. Provide information on service administrative law	2.1 Identify and explain policy references on common administrative law issues to subordinates. 2.2 Explain procedures on common administrative law issues and administrative law principles to subordinates. 2.3 Provide assistance to subordinates in preparing common administrative law documents.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading					Writing					Oral communication					Numeracy N/A

DEFLAW004 Conduct an arrest

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM123A Conduct an arrest.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 3.1 and 3.4 revised • PC 3.2 and 3.3 merged

Application

This unit describes the skills required to arrest a person under the powers provided by the Defence Act. It includes making the decision to arrest, performing arrests, and preparing and submitting documentation. Defence members, as well as persons who are not Defence members, may be arrested in accordance with the DFDA Powers of Arrest where they are suspected of having committed a service offence. However, each power of arrest varies in terms of its scope, the circumstances giving rise to the power of arrest, and who may carry out the actual arrest.

This unit applies to those working as members of the Australian Defence Force. Arrests under the Defence Force Discipline Act (DFDA) may be carried out by a Defence member or a constable.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, while performing specific tasks in a broad range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Justice

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for arrest	1.1 Identify powers of arrest. 1.2 Take decision to arrest within lawful authority.
2. Perform an arrest	2.1 Arrest offenders without warrant, using the necessary force and place them in custody. 2.2 Ensure the rights of a person under arrest are protected.
3. Conduct after arrest actions	3.1 Assess circumstances and take decision to caution or report. 3.2 Identify, complete and submit relevant documentation. 3.3 Assess circumstances and take decision to notify other parties or not.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCM123A Conduct an arrest.

DEFLAW005 Conduct a unit level investigation and prefer charges

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM124A Conduct a unit level investigation and prefer charges.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 3.1 and 3.2; 3.3 and 3.4 merged

Application

This unit describes the skills required to conduct investigation and to prefer charges in accordance with the Defence Force Discipline Act (DFDA) performing the duty of an investigating officer.

This unit applies to those working as investigating officers who operate within the Australian Defence Force and prefer charges in accordance with the DFDA.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, while performing complex tasks in a broad range of contexts. If doubt exists concerning the authority or complexity to investigate a service offence then the Defence Investigative Authority (DIA) is to be contacted for advice. The DIA may deem it appropriate to conduct the investigation or may refer back to the commanding officer to deal with the matter.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Justice

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for the investigation	1.1 Receive and acknowledge tasking as investigating officer. 1.2 Confirm and acknowledge independence. 1.3 Develop investigation plan.
2. Collect and analyse information relevant to the investigation	2.1 Seek and collect information relevant to the Defence issue. 2.2 Seek, collect and record complete and accurate evidence. 2.3 Take decision to search and conduct search within lawful authority.
3. Conduct the interview	3.1 Seek and take statements. 3.2 Conduct interviews relevant to the matter being investigated ensuring interviewees are afforded their legal rights and treated fairly and equitably. 3.3 Prepare and submit documentation.
4. Prefer charges	4.1 Assess evidence against the proofs of the charge and establish a prima facie case. 4.2 Prefer charge. 4.3 Produce charge sheet.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

DEFLAW006 Conduct summary authority proceedings

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM125A Conduct summary authority proceedings.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.1 removed

Application

This unit describes the skills required to conduct service summary trials under the Defence Force Discipline Act (DFDA). These proceedings may include subordinate summary, summary, superior summary.

This unit applies to those working as Defence members who are summary authorities either as an automatic consequence of appointment (such as command) or by an instrument of appointment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously with legal support, while performing sophisticated tasks in a broad range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Justice

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Conduct summary trials	1.1 Determine jurisdiction. 1.2 Make a determination by assessing applications and objections. 1.3 Conduct trial proceedings. 1.4 Assess evidence, examine trial documentation and seek clarification. 1.5 Determine guilt or innocence and give a judgement. 1.6 Listen to, interpret and determine validity of plea/s. 1.7 Listen to and interpret prosecutorial advice and mitigation. 1.8 Impose punishment/s and provide reasons.
2. Complete post-trial requirements	2.1 Conduct post-trial procedures. 2.2 Complete, process and store post-trial documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading					Writing					Oral communication					Numeracy N/A

Assessment Requirements for DEFLAW006 Conduct summary authority proceedings

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- communicating in writing and orally
- completing post-trial documentation
- questioning and responding to questioning
- conducting interviews
- deciding the admissibility of evidence
- deciding the guilt of an accused (considering the evidence)
- interpreting relevant Australian Defence Force (ADF) policies
- selecting a punishment for the convicted (considering the circumstances and law)
- undertaking research
- providing advice that is relevant and appropriate to the circumstances
- dealing with evidence

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- types of charges and their proofs
- types of punishments
- relevant references for locating relevant information
- who can issue summonses
- who can issue warrants

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFLAW007 Conduct a quick assessment

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM126A Conduct a quick assessment.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • Elements 1 and 2 merged

Application

This unit describes the skills required to conduct a quick assessment into an incident or complaint and to report back with recommendations.

This unit applies to those working as members of the Australian Defence Organisation who may be required to conduct a quick assessment of an incident or complaint.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under indirect supervision, while performing specific tasks in a broad range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Justice

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Conduct a quick assessment (QA)	1.1 Declare conflict/s of interest or bias when tasked to conduct a QA by QA initiator. 1.2 Gather information from relevant sources. 1.3 Identify occurrence facts and circumstances from collated information. 1.4 Suspend QA and notify QA initiator when Defence Force Discipline Act (DFDA) offence or notifiable incident becomes evident.
2. Report QA results	2.1 Develop QA report and submit to QA initiator. 2.2 Make recommendations.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading					Writing					Oral communication					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCM126A Conduct a quick assessment.

DEFLAW008 Conduct a Defence administrative inquiry

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM127A Conduct a Defence administrative inquiry.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to conduct administrative inquiries under the inherent authority of commanders and under the Defence (Inquiry) Regulations. Staff may be appointed to conduct administrative inquiries to determine the facts and circumstances surrounding an incident or situation so that an informed decision may be taken about the action required including, where appropriate, action to avoid a recurrence.

This unit applies to those working as warrant officers and officers of the Australian Defence Force (ADF), and some civilian staff of the Australian Defence Organisation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under indirect supervision, while performing sophisticated tasks in a broad range of contexts. The type of inquiry conducted will be dependent on the level of authority, rank or position.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Justice

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to conduct an inquiry	<p>1.1 Receive and acknowledge appointment as inquiry officer from appointing authority.</p> <p>1.2 Analyse and discuss inquiry circumstances if necessary, with the appointing authority.</p> <p>1.3 Confirm and acknowledge independence.</p> <p>1.4 Determine course of action by referring to the appropriate Defence publications.</p>
2. Plan an inquiry	<p>2.1 Identify, analyse and clarify inquiry Terms of Reference.</p> <p>2.2 Develop an inquiry plan.</p> <p>2.3 Seek advice where appropriate.</p>
3. Gather and analyse evidence	<p>3.1 Conduct interviews.</p> <p>3.2 Identify, acquire, confirm and analyse evidence.</p> <p>3.3 Provide progress reports in accordance with the Terms of Reference and appointing authority requirements.</p> <p>3.4 Suspend inquiry and notify appointing authority when Defence Force Discipline Act (DFDA) offence or other notifiable incident is suspected.</p>
4. Present inquiry findings	<p>4.1 Draw conclusions and recommendations, based on the evidence gathered and within the boundaries of the terms of reference.</p> <p>4.2 Present inquiry findings in accordance with the Terms of Reference and appointing authority requirements.</p>

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

DEFLAW009 Make a Defence administrative decision

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM128A Make a Defence administrative decision.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.2 removed • PC 2.1 revised

Application

This unit describes the skills required to manage quick assessment (QA) inquiries and to make administrative decisions that may adversely affect members' rights, interests and expectations and that are within the discretion of the commanding officer (CO) to make.

This unit applies to those working as Defence members who have been given command, either as an automatic consequence of appointment, or by an instrument of appointment, as a CO or as an administrative CO; in some circumstances it is by rank only, irrespective of the position held.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously, while performing sophisticated tasks in a broad range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Justice

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to make an administrative decision	1.1 Determine initial action. 1.2 Instigate quick assessment. 1.3 Initiate administrative sanction.
2. Make an administrative decision	2.1 Assess factors. 2.2 Make administrative decision. 2.3 Inform stakeholders of the decision and its reasons. 2.4 Complete documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. The candidate must demonstrate evidence of performance of the following on at least one occasion.

- reflecting
- preparing statements and completing documentation
- analysing and synthesising information

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- ADF judicial policies and procedures for service tribunals
- application of DFDA to service members
- composition and content of the Defence Law Manual (DLM) and other relevant law including offences under the DFDA and the rules of evidence, equity and diversity
- nature and limits of Defence jurisdiction
- origin and structure of the Defence legal system
- role, duties and powers of a discipline officer
- scales of punishment
- service tribunal procedures and processes

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL001 Use personal camouflage and concealment in a threat environment

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM001B Use personal camouflage and concealment in a threat environment.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with new standards• All PC transitioned from passive to active voice• PC 1.1, 1.2 and 1.3 merged• PC 2.2, 2.3 and 2.4 merged• PC 3.4 remove• PC 3.6 revised

Application

This unit describes the skills required to reduce one's personal signature in a threat environment. Detection capabilities may include:

- aural
- electronic (e.g. radio)
- olfactory
- thermal
- visual

This includes camouflaging oneself (and own personal equipment), concealing movement and minimising signs.

This unit was developed for those working as Defence personnel required to use personal camouflage and concealment in a deployed threat environment, but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a range of contexts that are sometimes unfamiliar and unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Apply appropriate camouflage and concealment techniques	<p>1.1 Assess environment and tactical situation to apply appropriate camouflage and concealment techniques.</p> <p>1.2 Assess threat's detection capabilities and identify weaknesses for exploitation.</p> <p>1.3 Maintain personal camouflage.</p>
2. Minimise personal signature	<p>2.1 Prepare and pack personal equipment.</p> <p>2.2 Minimise personal signature, shadow, odours.</p> <p>2.3 Minimise or avoid electronic signature which may include radios, mobile phones and emergency positioning devices.</p> <p>2.4 Avoid detection while preparing and consuming rations.</p> <p>2.5 Communicate using non-verbal signals.</p> <p>2.6 Carry and/or dispose of waste in a fashion that minimises detection.</p>
3. Minimise personal signature when on the move	<p>3.1 Select a route that minimises detection or retards the ability and/or desire for the threat to track and pursue.</p> <p>3.2 Move according to environment and tactical situation.</p> <p>3.3 Minimise silhouetting.</p>

	<p>3.4 Minimise spoor displacement.</p> <p>3.5 React to unexpected incidents such as a shot, flare, shout or tripping device.</p> <p>3.6 Select rest areas that provide optimum concealment and refurbish them upon leaving to remove evidence of stay.</p>
--	---

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading N/A					Writing N/A					Oral communication					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCM001B Use personal camouflage and concealment in a threat environment.

Assessment Requirements for DEFMIL001 Use personal camouflage and concealment in a threat environment

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- assembling and carrying personal equipment
- undertaking movement by day or night
- reacting appropriately to unexpected incidents
- using visual scanning
- using non-verbal signals
- applying appropriate camouflage and concealment techniques
- minimising signature at the halt and when on the move

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- ability of technology
- information that can be obtained through examination of waste
- issues influencing personal camouflage
- methods of packing
- non-verbal signals
- WHS techniques
- physical environment
- principles of camouflage and concealment

- reasons why things are seen/compromised
- tactical situation
- threat detection capabilities

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL002 Operate night fighting equipment

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM002C Operate night fighting equipment.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • Elements 1 and 2 merged • All PC in elements 1 and 2 revised

Application

This unit describes the skills required to operate night fighting equipment in a threat environment. Night fighting equipment:

- is a collective term that refers to image intensification equipment
- is normally used in conjunction with weapons in low light conditions
- improves natural vision when other forms of illumination may not be suitable

This unit was developed for military personnel within a combat zone in Defence but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks, in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare and operate night fighting equipment	1.1 Prepare, handle and adjust night fighting equipment applying Defence work health and safety (WHS) requirements for night fighting equipment. 1.2 Operate and handle night fighting equipment applying Defence WHS requirements for night fighting equipment and laser safety. 1.3 Apply fire with service weapons using night fighting equipment.
2. Maintain night fighting equipment	2.1 Inspect, maintain and store night fighting equipment. 2.2 Report faults, damage and/or deficiencies.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning N/A					Reading					Writing N/A					Oral communication					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCM002C Operate night fighting equipment.

DEFMIL003 Operate a service rifle

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM101C Operate a service rifle.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.1 and 1.4 removed • PC 4.1 and 4.2 merged

Application

This unit covers the competency required to operate any current in service rifle. Operating a service rifle involves the ability to safely handle, maintain, operate and fire the service rifle.

This unit applies to those working as a member of the Australian Defence Force.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under direct supervision, in accordance with the Rules of Engagement. They would perform specific tasks, in a broad range of contexts, focussing on applying safety requirements.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for DEFMIL003 Operate a service rifle

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- operating the weapon without any safety breaches
- adopting appropriate firing position
- aiming the service rifle
- applying immediate action and stoppage drills
- applying recognised safety precautions
- conducting weapon drills
- firing the weapon using, as a minimum, ball ammunition
- recognising the limit of own authority
- passing weapons training test
- firing the weapon qualification practice

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, technical capabilities, effects, employment and limitations of the rifle and ammunition
- cycle of operation of the service rifle
- degrees of weapon readiness
- WHS requirements
- marksmanship principles

- range safety
- safety precautions of the service rifle
- types of targets

Assessment Conditions

Competency should be assessed using live ammunition on a live firing range, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations in accordance with the current weapons pamphlet. This would include 'dry' assessment to ensure that a safe environment is maintained.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL004 Operate a light support weapon

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM102C Operate a light support weapon.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.1 and 4.2 removed

Application

This unit describes the skills required to operate a light support weapon. This includes handling, maintaining, operating and firing the light support weapon and obtaining satisfactory engagement accuracy. The light support weapon would usually be carried and fired from the shoulder.

This unit applies to those working as a member of the Australian Defence Force.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under direct supervision, in accordance with the Rules of Engagement. They would perform specific tasks, in a broad range of contexts that could be unpredictable, focussing on applying safety requirements.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Application

This unit describes the skills required to apply offensive and defensive operational procedures as a member of a team within a threat environment. These operational methods are based on principles that support the conduct of any mission carried out in a threat environment.

This unit was developed for combat arms personnel within an operational zone in Defence but may be relevant to others working in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as individuals and as part of a team, under direct and/or indirect supervision. They would use discretion and judgement and take responsibility for the quality of their outputs, while performing specific tasks, in a range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for DEFMIL006 Operate in a threat environment

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying obstacle crossing drills
- applying mine and booby trap incident drills
- digging fighting pits to directed specifications
- erecting wire obstacles under supervision
- handling detainees, prisoners of war and civilians
- hardening fighting positions
- undertaking tactical movement on foot
- employing fieldcraft, offensive and defensive measures
- complying with the Laws of Armed Conflict

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- principles of fieldcraft
- Rules of Engagement
- detection avoidance techniques
- duties and responsibilities of an individual member of a tactical team
- field routine within a tactical environment
- Laws of Armed Conflict

- Orders for Opening Fire
- Orders for the Use of Force
- tactical terminology and orders
- use of field equipment: webbing, hoochie, rope, military pack

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Assessment Requirements for DEFMIL007 Participate in ceremonial activities

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- performing ceremonial drill manoeuvres, including: turns and inclines at the halt and on the march, conducting drill with arms, performing eyes right and left, open and close order on the march, forming ranks, standing at ease, standing easy, advancing in review order
- leaving ranks, reporting to an officer and being dismissed
- performing salutes

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- fronts and flanks
- generic parade sequences
- meaning of words of command
- preparation of clothing and equipment in accordance with Standing Orders for Dress
- purpose of drill
- types of ceremonial activities that employ drill

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Competency should be demonstrated during the preparation and conduct of a ceremonial activity with the candidate participating in a ceremonial activity that can be simulated.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Assessment Requirements for DEFMIL008 Display the attributes of Defence personnel

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

At least two ethical problems should be posed requiring a response or action that can be assessed.

- being aware of self and others
- developing character
- displaying daily living skills
- displaying dedication to duty, initiative, loyalty and honour, mateship and team work, the will to win, physical and moral courage, compassion and honesty towards others
- coping with the demands of service life
- performing tasks within a military context
- accepting new challenges that are a feature of service life
- recognising the fundamental importance of the military team

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- organisational drug policy
- organisational security
- arrest, charges, rights of an accused
- corps functions within the Army

- customs, uniforms and ranks of the Army
- Defence Force Discipline Act and common military offences
- history and characteristics of the Australian soldier
- organisation of the Army
- performance assessment system
- requirement for soldierly conduct

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Individuals should be observed and questioned when ethical issues arise during the conduct of routine tasks.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL009 Integrate into the Defence working environment

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFDC001B Integrate into the cadet working environment.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.2, 1.8 and 2.2 removed • PC 2.1 and 2.4 merged

Application

This unit describes the skills required by young Australians to integrate themselves into a challenging, military like, work environment.

This unit applies to cadets with a range of experiences and challenges who will develop skills and values that will usually include team work, leadership, work ethos, self-discipline, self-reliance and initiative.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would perform routine tasks under direct supervision in small range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify organisational requirements	<p>1.1 Comply with protocols for dealing with Australian Defence Force Cadet and Australian Defence Force personnel and with policies and procedures including WHS.</p> <p>1.2 Communicate within the organisation.</p> <p>1.3 Seek assistance within the organisation as required.</p> <p>1.4 Carry out personal administration requirements.</p> <p>1.5 Maintain standards of dress and bearing.</p> <p>1.6 Display Australian Defence Force Cadet code of ethical conduct and cadet organisation values.</p>
2. Participate in personal development activities	<p>2.1 Implement team work while participating in activities.</p> <p>2.2 Follow directions from superior and plan activities to achieve the desired outcome.</p> <p>2.3 Seek and act upon formal and informal performance feedback.</p>

Foundation Skills

DEFMIL010 Operate a 22 gauge rifle

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM006B Operate a 22 gauge rifle.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.1 removed • Elements 3 and 4 merged

Application

This unit describes the skills required to operate a single bolt action 22 calibre long rifle on a legal range. Operating a 22 gauge rifle involves the ability to safely handle, maintain, operate and fire the 22 gauge rifle. The operator must be familiar with the characteristics and capabilities of the rifle.

This unit applies to those required to operate a 22 gauge rifle.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision and will always operate under direct orders. They would perform specific tasks in a known context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Safely handle a 22 gauge rifle	1.1 Handle and carry a 22 gauge rifle. 1.2 Identify, select and handle ammunition. 1.3 Secure a 22 gauge rifle.
2. Safely maintain a 22 gauge rifle	2.1 Strip and assemble a 22 gauge rifle. 2.2 Clean and service a 22 gauge rifle and associated equipment. 2.3 Identify and rectify defects within limits of authority or report to supervisor. 2.4 Complete documentation.
3. Safely operate a 22 gauge rifle	3.1 Conduct weapon drills. 3.2 Apply marksmanship principles. 3.3 Employ weapon equipment. 3.4 Fire a 22 gauge rifle 3.5 Comply with range safety brief and practice brief when firing a 22 gauge rifle. 3.6 Recognise problems and take actions. 3.7 Identify and engage targets.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

Assessment Requirements for DEFMIL010 Operate a 22 gauge rifle

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying recognised safety precautions
- interpreting fire control orders
- conducting the following firearm drills:
 - degrees of weapon readiness
 - immediate action and stoppage
 - safety precautions including checking clearances
- recognising the limit of own authority

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, technical capabilities, effects, employment and limitations of the rifle and ammunition
- degrees of weapon readiness
- marksmanship principles
- safety precautions of the 22 gauge rifle
- types of targets

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Competency should be assessed using live ammunition on a live firing range.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL011 Conduct individual and collective ceremonial drill

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM132 Conduct individual and collective ceremonial drill.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to supervise groups in the conduct of collective ceremonial drill movements and to perform specific individual drill movements with a cane, including:

- advance in review order
- change from slow to quick time and quick to slow time
- form two ranks from three and three ranks from two
- forms in slow and quick time
- march in line in slow and quick time
- open and close order on the march

Collective ceremonial drill fosters discipline, team work and a sense of collective identity while providing an appropriate means to physically commemorate the unique history, customs and traditions of military service.

This unit was developed for Defence personnel who are required to participate in and lead ceremonial drill, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in mainly predictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Supervise collective ceremonial drill	1.1 Identify appropriate type of collective ceremonial drill activity. 1.2 Plan for a collective ceremonial drill activity. 1.3 Conduct collective drill instruction in accordance with prescribed format. 1.4 Set and display standards of dress, bearing and collective drill movements.
2. Perform cane drill	2.1 Rehearse cane drill movements and correct faults. 2.2 Perform cane drill movements in accordance with the manual.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading NA					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCEM132 Conduct individual and collective ceremonial drill.

1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- communicating interactively with others using words of command
- leading by example
- performing drill movements
- controlling a team/group

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- drill and ceremonial orders of dress
- format for the conduct of collective drill lessons
- formations for ceremonial drill
- work health and safety (WHS)
- protocol for funerals and guards of honour
- purpose of national flag and methods of paying compliments
- types of colours, flags and banners; entitlements, display and paying of compliments
- words of command required to direct ceremonial occasions

Assessment Conditions

Competency should be assessed in the workplace or in a simulated workplace environment and must be demonstrated over time covering all of the following drill movements:

- beating the retreat
- birthday, graduation and passing out parades
- catafalque parties
- freedom of entry to towns or cities
- funerals
- guards
- presentation of colours, guidons or banners
- unit parades

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL021 Observe and monitor hostile areas to detect targets

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC A001B Operate remote sensors to detect targets.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to observe and/or listen for targets remote from the target acquisition assets and to provide information to stakeholders. This observation is normally conducted by at least two people; one person will be the observer and one will record the data. This unit covers both roles.

This unit was developed for those working in Defence as combat arms personnel required to observe and/or listen for targets remote from the target acquisition assets and to provide information to stakeholders in a deployed operational environment but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work in pairs under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Occupy and prepare a location	1.1 Occupy vantage point and maintain concealment. 1.2 Establish occupied position. 1.3 Establish reference points and document information. 1.4 Observe and monitor possible threats so that an appropriate plan of action can be prepared.
2. Detect target/s	2.1 Establish target position via aural and visual observation, and estimate bearing and distance. 2.2 Identify and classify threat (if present) through visual or aural recognition, or by crater analysis. 2.3 Estimate enemy capability. 2.4 Monitor hostile action from prepared position. 2.5 Maintain communications with stakeholders.
3. Provide information on target to stakeholders	3.1 Describe target to stakeholders. 3.2 Maintain records.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading NA					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA001B Operate remote sensors to detect targets.

DEFMIL024 Conduct military searches

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC A004B Conduct military searches.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.5 removed • PC 2.3 and 3.2 revised

Application

This unit describes the skills required to conduct military searches of areas, routes, vehicles, buildings, property and people to find items of equipment and other material intended to cause harm to individuals and groups and destroy or damage property. It includes detecting, identifying and reporting the presence of any weapon, device or other object intended to cause harm and taking measures to prevent and/or minimise any loss or damage to persons or property. On detecting a device the individual is not responsible for ongoing management of the incident or rendering the device safe.

This unit was developed for those working as combat arms personnel in a deployed operational environment but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of contexts that could be highly unpredictable.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for search operations	1.1 Identify purpose, timing, environment and type of search from supervisor. 1.2 Establish and maintain the location of other individuals engaged in the search. 1.3 Select and use appropriate personal protective equipment. 1.4 Identify, obtain, inspect and test tools and search equipment appropriate to the type of search and report any faults. 1.5 Deploy to an incident site or search area. 1.6 Coordinate the preparation of the search site and the conduct of searches with other agencies.
2. Search buildings, structures, property, vehicles, equipment, personnel and the environment	2.1 Erect barriers and signs, as required, to slow down or stop pedestrian and/or vehicular traffic and to direct them to checkpoints for search. 2.2 Carry out search drills/procedures applicable to the type of search. 2.3 Identify presence of unauthorised personnel and/or suspect items and material. 2.4 Secure unauthorised personnel and/or suspect items or take other relevant action. 2.5 Protect potential evidence and/or other items or material of interest from contamination, improper handling or removal. 2.6 Record information and complete reports.
3. Maintain and clean site and equipment	3.1 Return any items removed from suspects or the area for further examination in the condition found. 3.2 Conduct periodic and routine maintenance of equipment. 3.3 Identify and report faulty/defective equipment.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading NA					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA004B Conduct military searches.

DEFMIL025 Operate Defence communications equipment

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCFA011 Operate Defence communications equipment.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.1 removed • Elements 1 and 2 merged

Application

This unit describes the skills required to select, set up, inspect, operate and maintain communications equipment prior to deployment and once in location. The unit also covers the ability to manage contingencies such as lost communications, jamming and interference, and implementing the necessary protocols to maintain or re-establish communications. The individual will also be responsible for establishing and maintaining communications. Compliance with radio telephone procedure, including authentication procedures, is an essential part of this unit.

This unit was developed for those working as combat arms personnel required to operate communications equipment in a deployed operational environment but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team, under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Use communications systems and equipment	<p>1.1 Select, inspect and test communication equipment appropriate to the task and report faults.</p> <p>1.2 Set up and operate communication equipment using authorised radio telephone procedure.</p> <p>1.3 Utilise communication systems to facilitate the transmission and reception of voice and data.</p> <p>1.4 Acknowledge contact, confirm communication and take action as required.</p> <p>1.5 Manage communication faults and deficiencies and utilise alternative communication strategies when required.</p> <p>1.6 Process and record communications.</p>
2. Maintain communications equipment	<p>2.1 Apply fault finding techniques and conduct basic maintenance and routine servicing.</p> <p>2.2 Identify faulty equipment, note for repair by completing documentation.</p>

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

Assessment Requirements for DEFMIL025 Operate Defence communications equipment

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying basic equipment faults
- operating current radio equipment, including secure equipment
- reporting communications faults and deficiencies
- using radio telephone procedure, including codes
- utilising communications systems
- setting up and operating the current in-service, secure and insecure, communications equipment
- utilising correct radio telephone procedure
- maintaining communications using alternative strategies when contact is lost

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- classified material handling procedures
- communications protocols, policy and procedures relevant to the operation of communications equipment
- composition of teams and roles and responsibility of team members
- message formats
- principles of teamwork and teams, aims and objectives
- radiation hazard (RADHAZ) awareness

- radio telephone procedure, including the use of codes
- range of communications equipment and accessories available
- security procedures

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL026 Perform an individual static line parachute descent

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA012 Perform an individual static line parachute descent.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 4.5 removed • PC 4.6 revised

Application

This unit describes the skills required to perform static line parachute descents carrying combat equipment by day or night. The addition of combat equipment adds considerable weight and bulk which affects all aspects of the descent.

This unit was developed for Defence personnel required to perform static line parachute descents carrying combat equipment in a deployed operational environment but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for static line parachute descent carrying combat equipment	1.1 Confirm instructions to conduct a static line parachute descent with combat equipment. 1.2 Select and fit equipment and inspect for serviceability. 1.3 Quarantine and report unserviceable equipment.
2. Complete on board aircraft procedures carrying combat equipment	2.1 Board aircraft with equipment and position and secure both self and equipment. 2.2 Communicate verbally and non-verbally with other personnel on board. 2.3 Carry out safety checks.
3. Exit from the aircraft and descend carrying combat equipment	3.1 Exit aircraft carrying combat equipment using approved techniques. 3.2 Conduct relevant drills to detect and rectify malfunctions. 3.3 Maintain situational awareness maintained during day or night descents. 3.4 Communicate verbally and non-verbally with other paratroopers as required. 3.5 Control canopy using basic flight and canopy control techniques. 3.6 Carry out in flight combat equipment drills. 3.7 Assess emergency situations and apply the correct drills to rectify the situation.
4. Land on a drop zone with combat equipment	4.1 Identify designated drop zone. 4.2 Lower combat equipment. 4.3 Apply landing and/or emergency landing techniques to land in accordance with environmental conditions. 4.4 Apply harness release and drag procedures. 4.5 Clear drop zone.
5. Complete static line post descent procedures	5.1 Review performance during the individual static line parachute descent. 5.2 Complete log card.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading NA					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA012 Perform an individual static line parachute descent.

Assessment Requirements for DEFMIL026 Perform an individual static line parachute descent

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying situational awareness during canopy flight
- using exit techniques canopy control techniques landing techniques
- carrying out basic flight drills malfunction drill
- applying harness release and drag procedures
- conducting individual safety checks
- undertaking day or night static line parachute descents while carrying combat equipment
- applying approved procedures, techniques and drills for exiting aircraft, canopy flight and landing while carrying combat equipment
- applying correct drills for emergency situations while carrying combat equipment

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- emergency situations

Assessment Conditions

Competency should be demonstrated over time and across a range of simulated or actual workplace situations, including a number of individual static line parachute descents with combat equipment and including at least one night descent, supported by simulated malfunctions and other emergencies.

Competency must be assessed during the preparation and performance of actual static line parachute descents by day or night carrying combat equipment, although due to safety limitations, assessment of the individual's response to malfunctions and other emergencies will need to be undertaken in a simulated environment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL027 Perform a team free fall parachute descent

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCFA013 Perform a team free fall parachute descent.</p> <ul style="list-style-type: none"> • Unit code updated. • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 3.2 and 3.3 merged • Element 5 all PC reordered

Application

This unit describes the skills required to perform a free fall parachute descent, carrying combat equipment, as part of a team. Descents commence from an altitude below 12 000 feet above mean sea level and land on a drop zone during day and night. Team military free fall parachute descents are a method of deploying a team from an aircraft into an operational area and involve the exercise of both individual and team responsibilities.

This unit was developed for military personnel required to perform a free fall parachute descent in a deployed operational environment but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team, under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for a team free fall parachute descent with combat equipment	1.1 Confirm instructions to conduct a team free fall parachute descent. 1.2 Select, fit and pack equipment and inspect for serviceability. 1.3 Quarantine and report unserviceable equipment. 1.4 Rehearse conduct of the descent with team members prior to boarding the aircraft.
2. Complete on board aircraft procedures with combat equipment	2.1 Board aircraft with equipment and position and secure self and equipment. 2.2 Communicate verbally and non-verbally with other personnel on board. 2.3 Carry out safety checks.
3. Exit from the aircraft and descend by free fall as a member of a team while carrying combat equipment	3.1 Exit the aircraft using team techniques. 3.2 Establish and maintain stability in free fall flight and recover from instability when necessary. 3.3 Establish and maintain relative position within the team. 3.4 Maintain situational awareness during day and night descents. 3.5 Carry out individual and team free fall positions and manoeuvres. 3.6 Communicate verbally and non-verbally with other paratroopers as required.
4. Control a ram air canopy descent as a member of a team while carrying combat equipment	4.1 Activate parachute to open at a designated time or height. 4.2 Conduct relevant drills to detect and rectify malfunctions and routine opening problems. 4.3 Identify team leader and team members after canopy opening during day and night descents. 4.4 Maintain team day and night descent using canopy control and manoeuvre techniques. 4.5 Conduct controllability checks and malfunction drills.

	4.6 Assess contingency and emergency situations and apply the correct drills to rectify the situation.
5. Land on a drop zone as a member of a team while carrying combat equipment	5.1 Identify designated drop zone marking and wind indicators for day and night descents and plan target approach. 5.2 Lower combat equipment at the correct height during approach. 5.3 Apply target approach techniques to land in accordance with environmental conditions. 5.4 Complete emergency landings drills. 5.5 Apply harness release and drag procedures. 5.6 Clear drop zone without adversely affecting other team members.
6. Complete free fall post descent procedures	6.1 Review performance during team free fall parachute descent. 6.2 Complete documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

DEFMIL028 Navigate in remote and unmodified landscapes

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA014 Navigate in remote and unmodified landscapes.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to navigate in remote and unmodified landscapes. In the context of this unit an unmodified landscape is one with few modifications to the natural surface or the natural environment so that track alignment is indistinct and signage is generally not provided. The area may include steep sections of unmodified surfaces and other difficult terrain and man-made hazards. In a military context the navigation can be conducted on foot (for example; infantry) or by vehicle (for example; armour). This unit of competency requires the individual to navigate by both day and night to a destination, within standard tolerances of accuracy, without the use of electronic navigation aids such as GPS.

This unit was developed for military personnel required to operate in remote and unmodified landscapes usually in a deployed operational environment, but is applicable to any individual who is required to navigate in remote and unmodified landscapes.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Use a map	1.1 Select the type of map(s) suitable for the activity. 1.2 Identify possible sources of error and inaccuracies on the map. 1.3 Identify symbols and information contained on the map that may be used in navigation. 1.4 Identify the way in which relevant symbols and information on the map can be used in navigation.
2. Use a compass	2.1 Identify the essential features of a compass. 2.2 Use a compass to maintain a designated course. 2.3 Use a compass to reflect understanding of factors which affect accuracy.
3. Plan a route in unmodified landscapes	3.1 Apply symbols and information contained on the map to plan an efficient route/course suitable to navigation and equipment. 3.2 Obtain additional information to assist in the preparation of a navigation data sheet from the map and from other suitable sources of information. 3.3 Identify hazards and obstacles to the route. 3.4 Prepare a navigation data sheet/route card. 3.5 Identify emergency or contingency routes.
4. Navigate in unmodified landscapes	4.1 Maintain orientation of map to surroundings. 4.2 Identify possible sources of navigation error in specific locations. 4.3 Demonstrate combined use of map, compass and other techniques whilst following a route in unmodified landscapes. 4.4 Demonstrate techniques for distance estimations of travel in the absence of identifying features. 4.5 Maintain the designated course whilst bypassing hazards and obstacles.

	<p>4.6 Demonstrate maintenance of a course in unmodified landscapes.</p> <p>4.7 Fix position accurately and regularly using a combination of appropriate navigation techniques.</p> <p>4.8 Choose route for the surroundings and conditions.</p> <p>4.9 Fix position and identify unknown features using navigation techniques when lost.</p>

Assessment Requirements for DEFMIL028 Navigate in remote and unmodified landscapes

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying problem solving techniques
- maintaining a compass bearing in poor visibility and/or extreme conditions
- observing surroundings
- making decisions
- plotting a navigation route accurately and within accepted tolerances when following a route
- maintaining positional awareness
- reacting effectively to changes in the operating environment that require re-planning
- navigating both by day and night
- navigating without the use of electronic navigation aids such as GPS
- calculating speed, distance and estimating time taken

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- cartographic symbols and legends
- grid/magnetic conversion
- map and chart types
- methods for determining current location
- route planning techniques and calculations

- factors affecting navigation techniques in extreme environmental conditions
- map types and sources of error
- use of a compass and factors that affect their accuracy
- route planning and issues that should be considered in extreme environmental conditions
- estimation of travelling times in unmodified landscape and/or difficult terrain/conditions
- techniques for estimating distance travelled in poor visibility
- back bearings and resections
- techniques to navigate around obstacles

Assessment Conditions

Competency should be demonstrated navigating a route on a minimum of three occasions; with at least two navigations being conducted at night. The route should contain a number of legs requiring one or more changes in direction.

Competency must be assessed in an area that has an unmodified landscape.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL029 Supervise combat operations

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCFA015 Supervise combat arms operations.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.6, 3.5 and 4.1 removed

Application

This unit describes the skills required to command, lead and manage a combat organisation or detachment of up to 30 personnel under extreme conditions in a high risk environment. Members of the organisation or detachment may be drawn from military personnel from the armoured, artillery, engineer or infantry corps or a group made up of personnel from more than one corps.

This unit was developed for combat personnel required to deploy in an operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work independently or as part of a team, under indirect supervision. They use discretion and judgement, lead by example and take responsibility for the quality of their outputs. They would perform complex tasks in a broad range of unpredictable and demanding contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify tasks and collect appropriate information	1.1 Determine requirement to conduct combat tasks from orders, and identify and apply appropriate standard procedures. 1.2 Determine and manage constraints imposed on tasks. 1.3 Identify and address training requirements. 1.4 Identify and manage resource requirements. 1.5 Report shortfalls/problems through the chain of command.
2. Plan and prepare for combat tasks	2.1 Identify and analyse information and intelligence in support of operations. 2.2 Identify and manage risk. 2.3 Conduct decision making process. 2.4 Identify and advise combat elements appropriate to the task. 2.5 Manage in-service resources allocated to the task. 2.6 Adjust plans to accord with resource availability. 2.7 Prepare and issue orders to combat organisations indicating their missions, tasks, resources, constraints and limitations. 2.8 Supervise and conduct battle procedure. 2.9 Liaise with stakeholders.
3. Conduct combat operations	3.1 Employ and/or coordinate appropriate supporting battlespace operating systems. 3.2 Modify plans to reflect changes in effort, resources and support. 3.3 Conduct operations as ordered, reallocating/adjusting resources to meet operational requirements. 3.4 Monitor operations to ensure efficiency of their conduct and achievement of the mission. 3.5 Action reported problems. 3.6 Provide reports.
4. Finalise combat operations	4.1 Conduct debriefing. 4.2 Conduct post activity analysis and make recommendations. 4.3 Compile and process reports and returns.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA015 Supervise combat arms operations.

Assessment Requirements for DEFMIL029 Supervise combat operations

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- allocating appropriate resources and personnel to the operations
- developing plans and delivering orders, instructions, directions and training programs
- commanding, directing, controlling, conducting, coordinating and monitoring subordinate organisations and activities
- providing reports and documentation
- coordinating multiple activities

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, technical capabilities, effects, employment and limitations of relevant combat arms organisations
- organisation, tactics, techniques and procedures of the threat organisation
- resources, personnel skills and other requirements to conduct operations
- operational environment
- standard procedures and requirements for the conduct of operations
- reporting requirements and procedures associated with the conduct of operations
- safety precautions associated with the conduct of operations
- operational doctrine for the conduct of combat arms operations
- combat arms tactics, techniques and procedures

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL030 Use individual protective equipment in a CBRN threat environment

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA016 Use individual protective equipment in a CBRN threat environment.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with the new standards• All PC transitioned from passive to active voice

Application

This unit describes the skills required to prepare and utilise individual protective equipment in chemical, biological, radiological or nuclear (CBRN) threat environment. The individual will be responsible for preparing the protective equipment prior to deployment and once in location utilising the equipment to provide individual protection from a CBRN threat. Compliance with procedures, including the functional testing of the equipment, is an essential part of this unit.

This unit was developed for military personnel required to operate in CBRN threat environment usually in a deployed operational environment, but is applicable to any individual who is required to complete this type of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare respirator and protective clothing and equipment ensemble to meet CBRN threat	1.1 Identify, prepare, assemble and function test respirator and ensemble requirements. 1.2 Conduct user maintenance on respirator and ensemble. 1.3 Reject and/or report faulty equipment.
2. Plan and prepare for combat arms tasks	2.1 Use equipment to meet operational tasking and workplace requirements. 2.2 Work within a CBRN environment using authorised procedures to complete tasks including: decontamination reduction, detection of hazards. 2.3 Conduct confirmatory function testing of equipment periodically during operations.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA016 Use individual protective equipment in a CBRN threat environment

1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying, inspecting, preparing and cleaning respirator and clothing and equipment ensemble
- identifying basic equipment faults
- using respirator and ensemble
- providing reports on faulty equipment
- using authorised CBRN drills to detect threats/hazards
- carrying out decontamination hazard reduction measures
- preparing and utilising equipment to meet changes in the operating environment, changes in threat, detection of hazards and the occurrence of an CBRN incident

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- equipment preparation and handling procedures
- policy and procedures relevant to the operation of NBC equipment
- responsibilities of individuals for operating equipment
- CBRN threat awareness
- CBRN individual protective procedures
- respirator and clothing and PPE available for use

Assessment Conditions

Competency should be demonstrated over time and across a range of simulated or actual workplace situations and is to include exposure to CS gas or a similar non-lethal chemical agent.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL041 Operate and maintain an armoured vehicle

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC104 Operate and maintain an armoured vehicle.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.4 removed • PC 1.1 and 1.2 revised

Application

This unit describes the skills required to operate and perform operational level maintenance on an armoured vehicle.

This unit applies to those working as combat arms soldiers, who are part of an armoured fighting vehicle crew, within an operational zone in Defence.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as individuals and as part of an armoured vehicle crew, under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare armoured vehicle for operations	1.1 Check armoured vehicle for operation and prepare for battle. 1.2 Complete documentation and stow equipment. 1.3 Identify, report and/or rectify armoured vehicle faults.
2. Operate armoured vehicle	2.1 Apply road laws and other legislative requirements. 2.2 Drive armoured fighting vehicle and negotiate complex terrain using driving techniques. 2.3 Apply tactical operating techniques. 2.4 React to faults. 2.5 Operate vehicle communications systems. 2.6 Apply navigational techniques.
3. Conduct operator maintenance	3.1 Conduct inspections and checks to maintain armoured fighting vehicle performance. 3.2 Test, adjust or replace armoured vehicle sub systems and ancillary equipment. 3.3 Complete and store documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA104 Operate and maintain an armoured vehicle.

Assessment Requirements for DEFMIL041 Operate and maintain an armoured vehicle

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- driving a vehicle
- employing relevant vehicle equipment
- using navigation techniques

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- armoured vehicle tactics, techniques and procedures
- characteristics and employment of vehicle weapon systems
- characteristics, technical capabilities, maintenance requirements and employment of vehicle communication systems
- characteristics, technical capabilities, maintenance requirements, effects, employment and limitations of vehicle
- current operational environment
- navigation techniques
- operational safety
- specific civil and military regulations relevant to the operation of the vehicle
- vehicle documentation

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL042 Operate and maintain armoured vehicle weapon systems

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA105 Operate and maintain armoured vehicle weapon systems</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.3 removed

Application

This unit describes the skills required to operate armoured vehicle direct fire weapon systems to effectively produce fire. Direct fire weapon systems are integral to, and operated in conjunction with, armoured vehicles. Direct fire is primarily used during conventional operations to establish fire supremacy in order to destroy the enemy's will to operate. It can also be applied in accordance with the Rules of Engagement during security operations.

This unit applies to those working as combat arms soldiers working within an operational zone in Defence.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit work independently and as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare weapon systems for operations	1.1 Prepare armoured vehicle direct fire weapon systems for the conduct of operations. 1.2 Identify in-service ammunition.
2. Operate armoured vehicle weapon systems	2.1 Operate equipment to support weapon functions. 2.2 Conduct weapon drills. 2.3 Identify, acquire and engage targets in accordance with fire control orders. 2.4 Apply effective fire.
3. Maintain armoured vehicle weapon systems	3.1 Clean weapon systems. 3.2 Maintain weapon systems. 3.3 Complete documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying operational safety
- applying relevant WHS requirements
- carrying out weapon drills
- conducting equipment maintenance
- identifying regional armoured fighting vehicles and aircraft
- responding to fire control orders
- selecting and preparing ammunition
- using communication systems
- using equipment/instruments
- reacting instinctively to fire orders
- working as an effective member of the crew
- operating the system without a breach of safety procedures

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- armoured fighting vehicle weapons drills and procedures
- characteristics, technical capabilities, effects, employment and limitations of relevant ammunition

- characteristics, technical capabilities, effects, employment and limitations of relevant armoured fighting vehicle weapon systems
- characteristics, technical capabilities, effects, employment and limitations of relevant equipment
- fire control orders and fire discipline
- WHS requirements
- regional armoured fighting vehicles and aircraft recognition reporting requirements and procedures associated with the operation of equipment
- safety precautions associated with the equipment

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL043 Supervise an armoured vehicle and crew

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC106 Supervise an armoured vehicle and crew.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.1, 2.2, 2.4, 2.5 and 2.8 removed • PC 2.11 and 2.12 merged

Application

This unit describes the skills required to command, lead and manage an armoured vehicle and its crew on operations under extreme conditions in a high risk environment. Command is the authority a commander in the military service lawfully exercises over subordinates by virtue of rank or assignment.

This unit applies to combat arms soldiers working within an operational zone in Defence.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as individuals and as part of an armoured vehicle crew, under direct and/or indirect supervision while supervising others. They would use discretion and judgement, and take responsibility for the quality of their outputs. They would perform complex tasks in a broad range of contexts that can be unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare the armoured vehicle for operation	1.1 Assess and maintain crew competence. 1.2 Ensure crew is prepared. 1.3 Manage crew personnel administration. 1.4 Receive, interpret and accept requirement to supervise the crew, its weapons, and ancillary equipment. 1.5 Ensure vehicle is checked for serviceability and prepared for operations. 1.6 Determine and manage constraints and risks relevant to the task. 1.7 Supervise identification, handling and preparation of in service ammunition. 1.8 Determine resources required for the performance of the task. 1.9 Report identified problems/shortfalls to supervisor. 1.10 Supervise deployment of the armoured fighting vehicle into areas of operations.
2. Supervise and command the operation of the armoured vehicle	2.1 Coordinate and conduct battle procedure. 2.2 Drive the vehicle at a basic level in accordance with standing orders for vehicle operations. 2.3 Supervise crew tasks when employing the vehicle. 2.4 Apply vehicle tactical operating techniques. 2.5 Supervise the operation of the vehicle communications systems. 2.6 Assess incidents, deal with minor incidents, report major ones to manager and take appropriate actions.
3. Supervise the completion of armoured vehicle tasks	3.1 Complete and maintain documentation including reports and returns. 3.2 Supervise and ensure maintenance is conducted. 3.3 Debrief crew on completed operations.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFC106 Supervise an armoured vehicle and crew.

Assessment Requirements for DEFMIL043 Supervise an armoured vehicle and crew

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- operating armoured fighting vehicle weapon systems and ancillary equipment
- applying the authority and responsibility for effective supervision using available resources and for planning the employment of, organising, directing, coordinating and controlling the crew in the accomplishment of assigned tasks
- liaising with staff and delivering orders

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- armoured tactics and standing operating procedures
- characteristics, technical capabilities, effects, employment and limitations of relevant:
 - ammunition
 - communications equipment
 - drive trains and sub systems
 - specialist equipment
 - weapons
- command and control procedures
- WHS requirements
- procedures and requirements in the performance of the task
- reporting requirements and procedures

- resource allocation processes
- safety precautions associated with the task
- vehicle documentation and record compilation

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL061 Operate indirect fire weapons

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC A201B Operate indirect fire weapons .</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.3 and 1.4 removed • Elements 1 and 2 merged

Application

This unit describes the skills required to safely handle, aim, fire, manoeuvre and maintain indirect fire weapons. The candidate must be thoroughly familiar with characteristics and capabilities of the weapon and competent in the application of fire in an operational environment.

This unit was developed for those working as combat arms personnel required to safely handle, aim, fire, manoeuvre and maintain indirect fire weapons in a deployed operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team, under direct supervision and receive orders that dictate all actions. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for firing	1.1 Move weapon into position. 1.2 Prepare weapon for firing. 1.3 Prepare ancillary equipment for use and operate. 1.4 Aim and adjust indirect fire weapon. 1.5 Maintain aiming calculations and recordings.
2. Fire the weapon	2.1 Handle ammunition. 2.2 Inspect ammunition visually, report defects to supervisor and quarantine defective ammunition. 2.3 Prepare ammunition selected by the supervisor. 2.4 Load and unload ammunition. 2.5 Fire weapon. 2.6 Complete misfire drills. 2.7 Unload ammunition residue or remove after firing.
3. Maintain the serviceability of the weapon	3.1 Report defects. 3.2 Conduct operating maintenance.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA201B Operate indirect fire weapons .

Assessment Requirements for DEFMIL061 Operate indirect fire weapons

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- demonstrating hand eye coordination and manual dexterity
- using communication equipment
- working in a stressful environment
- using ancillary equipment including at least one of:
 - collimator/aiming devices
 - fuse setters
 - orientation and positioning equipment
 - weapon sights
- identifying ammunition defects including at least two of:
 - corrosion
 - cracks
 - damaged packaging
 - dented cartridge cases
 - fluting of the cartridge case
 - incorrect fuse projectile combinations
 - incorrect propellants
 - proud or recessed primer
 - rust
 - weeping

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics and technical capabilities of the system
- WHS requirements
- safety precautions associated with the equipment

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL062 Conduct field survey to determine fixation and orientation

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA202B Conduct field survey to determine fixation and orientation.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to conduct a field survey to determine fixation and orientation. This survey is normally conducted by at least two people. One person will be the observer and one will record data. This unit of competency covers both roles.

This unit was developed for combat arms personnel required to conduct a field survey to determine fixation and orientation in a deployed operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a two-man team under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of contexts that could be unpredictable.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for survey	1.1 Identify purpose and requirements of the survey from written or oral instructions from supervisor. 1.2 Confirm and clarify specifications of the survey with supervisor. 1.3 Select equipment required for the survey and check for serviceability.
2. Conduct survey	2.1 Operate survey equipment to determine orientation and fixation as determined by the survey scheme. 2.2 Record data from the survey in field book or other proforma. 2.3 Verify results for omissions and errors by re checking visual clues in measurements or actual data. 2.4 Communicate survey data. 2.5 Establish and record survey control points. 2.6 Liaise with supervisor and colleagues regularly throughout the survey activity to ensure smooth operation and progress. 2.7 Maintain survey equipment.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

DEFMIL063 Produce meteorological data

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC A203B Produce meteorological data.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.2 and 2.4 removed • PC 1.1 and 1.3 merged • Elements 1 and 2 merged

Application

This unit describes the skills required to produce meteorological data in terms of likely weather conditions in areas, which is to be used to inform operations.

This unit was developed for those working as combat arms personnel required to produce meteorological data in areas which are to be used to conduct Defence operations, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team under supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Gather meteorological data	1.1 Select, prepare and check equipment for serviceability. 1.2 Fill and launch weather balloon or other device in order to collect atmospheric information. 1.3 Collect surface data using meteorological equipment. 1.4 Operate receiving equipment.
2. Monitor and report meteorological information	2.1 Communicate meteorological information as directed by supervisor. 2.2 Monitor incoming data to identify changing conditions and notify supervisor about any changes. 2.3 Maintain and/or refurbish meteorological equipment. 2.4 Complete and maintain documentation and records.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA203B Produce meteorological data.

Assessment Requirements for DEFMIL063 Produce meteorological data

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- using communication systems
- operating meteorological data recording equipment to provide accurate data on weather conditions

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- basic principles of meteorology
- capabilities of the equipment
- characteristics, tabulated data and limitations of the computerised meteorological station

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL064 Destroy hostile air targets using line of sight ground based air defence weapon systems

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA204B Destroy hostile air targets using line of sight ground based air defence weapon systems.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with the new standards• All PC transitioned from passive to active voice• PC 1.3 removed• PC 3.1 revised

Application

This unit describes the skills required to safely handle, aim, fire, manoeuvre and maintain line of sight ground based air defence weapon systems designed to destroy hostile aircraft. The operator must be thoroughly familiar with the characteristics and capabilities of the missile system and competent in the application of fire in an operational or simulated operational environment.

This unit applies to those working as combat arms personnel required to operate line of sight ground based air defence weapon systems in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team and be under supervision for the whole operation except during the period of firing where the operator will be under direct control and receive orders that dictate all actions. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Manoeuvre the weapon	1.1 Prepare line of sight ground based air defence weapon system for movement. 1.2 Position weapon as directed.
2. Prepare the weapon for firing	2.1 Handle ammunition. 2.2 Inspect ammunition visually, notify supervisor of ammunition defects and quarantine defective ammunition. 2.3 Load and unload ammunition. 2.4 Position and operate ancillary equipment.
3. Engage aerial targets	3.1 Identify aerial targets. 3.2 Request confirmation of identified aerial targets by supervisor. 3.3 Sight and track targets. 3.4 Fire weapon as ordered by supervisor. 3.5 Notify supervisor of defects with firing and take corrective action. 3.6 Initiate aim off drills on dispute of aircraft identification.
4. Maintain the serviceability of the weapon	4.1 Notify supervisor of maintenance defects. 4.2 Conduct operating maintenance.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- demonstrating hand eye coordination and manual dexterity
- recognising aerial targets appropriately
- using binoculars
- identifying the number of aerial targets specified by CATC
- tracking and engaging targets using very short range air defence systems and short range air defence systems

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- aircraft types
- characteristics, technical capabilities of the system
- characteristics of a range of aerial targets likely to be encountered
- methods of range estimation
- WHS requirements
- safety precautions associated with the equipment

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL065 Observe targets and direct single asset firepower on a single target

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA205B Observe targets and direct single asset firepower on a single target.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with the new standards• All PC transitioned from passive to active voice• PC 3.1 and 3.2 merged

Application

This unit describes the skills required to observe targets remotely from the firepower locations and to direct firepower to destroy/neutralise a single target. Firepower will normally be limited to the following assets:

- small arms
- indirect weapons

This unit applies to those working as combat arms personnel required to observe targets and to direct firepower to destroy/neutralise a single target in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team under direct and/or indirect supervision. While this work will be undertaken as part of a team and under the commander's direction, the capacity to act independently may also be required should communications with the commander breakdown. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Occupy and prepare a location	1.1 Occupy an appropriate vantage point and maintain concealment throughout the operation. 1.2 Establish occupied position. 1.3 Establish reference points and document information. 1.4 Observe and monitor possible threats so that an appropriate plan of action can be prepared by relevant authority.
2. Plan the engagement of firepower	2.1 Establish target location via a grid reference. 2.2 Determine altitude of the target from the map. 2.3 Determine direction from the observer to the target by compass or laser. 2.4 Describe target to command post. 2.5 Determine type and number of weapons. 2.6 Maintain communications with stakeholders throughout the operation and monitor personnel safety.
3. Direct fire on a target	3.1 Transmit planning information and direction to fire to the command post. 3.2 Conduct target analysis after impact and refer to supervisor where appropriate. 3.3 Provide adjustment and advice to terminate as required. 3.4 Maintain records.
4. Withdraw from an occupied location	4.1 Recondition occupied position and remove all evidence of occupation. 4.2 Withdrawal from the occupied position.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

DEFMIL067 Maintain radar systems at field operator level

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA208B Maintain radar systems at field operator level.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to inspect, test and troubleshoot faults with radar systems and components in an environment away from a maintenance facility.

This unit applies to combat arms personnel who are required to inspect, test and troubleshoot faults with radar systems and components in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work under indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Inspect radar systems and components	1.1 Identify specific inspection requirements using relevant maintenance documentation and modification status, including system defect reports where relevant. 1.2 Visually or physically check primary radar system components for external signs of defects. 1.3 Identify and note/report defects.
2. Test/adjust radar systems and components	2.1 Prepare radar system for the application of power/system operation. 2.2 Functionally test radar system for evidence of serviceability or malfunction. 2.3 Perform system calibration or adjustments.
3. Troubleshoot primary radar system faults	3.1 Draw conclusions about the nature and cause of the fault from available evidence and take appropriate action. 3.2 Use available information from maintenance documentation, inspection and test results to assist in fault determination. 3.3 Use maintenance manual fault diagnosis guides and logic processes. 3.4 Identify faults beyond authority to repair and document for higher level repair by an outside agency. 3.5 Locate, identify cause of and record primary radar system faults in maintenance documentation. 3.6 Identify, select and obtain spare parts, consumables and other equipment. 3.7 Rectify fault in accordance with maintenance documentation. 3.8 Complete documentation and records.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

Assessment Requirements for DEFMIL067 Maintain radar systems at field operator level

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying analytical skills
- performing radar drills and procedures
- referring problems on to appropriate outside agencies

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, tabulated data and limitations of the radar equipment
- principles of radar theory

Assessment Conditions

Competency should be demonstrated over a range of radar maintenance scenarios that could be expected in the workplace. Competency should be assessed on operations or in a simulated operational environment. Specifically, access is required to the following resources:

- a radar
- ancillary equipment
- maintenance documentation

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Assessment Requirements for DEFMIL068 Select sites for deployment in a threat environment

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- calculating mathematical data
- navigating
- using communications systems
- working in a team environment
- recording data accurately

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics and capabilities of the equipment to be deployed
- use of an appreciation process

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL069 Supervise indirect fire weapons

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA210B Supervise indirect fire weapons.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.4 removed

Application

This unit describes the skills required to supervise and control all aspects of the operation of indirect fire weapons. While this work will be undertaken under the commander's direction the individual must be able to act independently as required by the circumstances.

This unit applies to combat arms personnel who are required to supervise and control all aspects of the operation of an indirect fire weapons in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would lead a team under indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare and deploy an indirect fire weapon	1.1 Determine and organise resources required. 1.2 Report identified problems/shortfalls to immediate supervisor. 1.3 Deploy indirect fire weapon in accordance with orders.
2. Engage targets with indirect fire	2.1 Direct and control indirect fire weapon operations. 2.2 Select appropriate ammunition. 2.3 Rectify minor incidents. 2.4 Report major incidents beyond own level of authority or competence to manager/s and take action as directed.
3. Maintain indirect fire weapons	3.1 Supervise operator maintenance activities. 3.2 Complete maintenance activities.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading NA					Writing NA					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA210B Supervise indirect fire weapons.

DEFMIL070 Observe targets and engage with joint asset firepower from any agency

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA212 Observe targets and engage with joint asset firepower from any agency.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 3.3 removed

Application

This unit describes the skills required to observe targets remotely from the firepower locations and to provide advice so that single or multi-agency firepower can be employed to engage target/s. Agencies may include armour, artillery, coalition forces, close air support, helicopters, mortars, naval gun support, and tactical unmanned aerial vehicle.

While this work will be undertaken as part of a team and under the commander's direction, the capacity to act independently may also be required should communications with the commander breakdown.

This unit applies to combat arms personnel required to observe targets and to direct joint asset firepower from any agency to destroy/neutralise multiple targets in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work as part of a team under direct and/or indirect supervision, but also must be prepared to act independently. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Occupy and prepare a location	1.1 Occupy an appropriate vantage point and maintain concealment throughout the operation. 1.2 Establish occupied position. 1.3 Establish reference points and document information. 1.4 Observe and monitor possible threats so an appropriate plan of action can be prepared.
2. Plan the engagement of firepower	2.1 Transmit a warning order for intent of operations to the command post. 2.2 Use advice on overall operational plan to inform the planning process. 2.3 Make requests for resources outside own organisation to the command post when required. 2.4 Establish and record target data. 2.5 Calculate rate of movement of own personnel from available data. 2.6 Calculate resources for effective fire on targets and rates of fire. 2.7 Prioritise targets. 2.8 Develop and transmit schedule to the command post or liaison with other agency to organise engagement schedule.
3. Monitor fire on target	3.1 Communicate directly with other agencies to coordinate engagement procedures. 3.2 Maintain communications with stakeholders throughout operation.

	<p>3.3 Complete target analysis after impact and if necessary, refer to appropriate agency command centre.</p> <p>3.4 Provide advice to terminate as required.</p> <p>3.5 Maintain records.</p>
4. Withdraw from an occupied location	<p>4.1 Recondition occupied position and remove all evidence of occupation.</p> <p>4.2 Conduct a secure withdrawal from the occupied position.</p>

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading NA					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA212 Observe targets and engage with joint asset firepower from any agency.

Assessment Requirements for DEFMIL070 Observe targets and engage with joint asset firepower from any agency

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- allocating appropriate resources to the operation
- interpreting orders
- maintaining situational awareness
- providing reports and appropriate documentation
- working in a team
- maintaining awareness of safety of friendly personnel at all times
- recognising but not exceed own level of authority

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, technical capabilities, effects, employment and limitations of weapons and weapon platforms
- communication procedures
- reporting requirements and procedures for multi-agency operations
- safety associated with the operations
- standard procedures and special requirements
- teamwork principles

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL071 Supervise the destruction of hostile air targets using line of sight ground based AD weapon systems

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA213 Supervise the destruction of hostile air targets using line of sight ground based air defence weapon systems.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with the new standards• All PC transitioned from passive to active voice

Application

This unit describes the skills required to supervise and control all aspects of the operation of a direct fire ground based missile system designed to destroy hostile aircraft. It is specifically written for visual range ground based air defence weapon systems. The control of the ground based missile system requires target interrogation, analysis, engagement and decision making based on tactical information, situational awareness and observed target activity.

This unit applies to combat arms personnel involved in the operation of a direct fire ground based missile system in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under the commander's direction, however they must be able to act independently. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare and deploy	1.1 Determine and organise resources required for the performance of the task in accordance with orders. 1.2 Report identified problems/shortfalls to immediate supervisor. 1.3 Move to a directed location and maintain concealment, in accordance with orders. 1.4 Deploy ground based air defence system in accordance with orders. 1.5 Establish and integrate system and check for functionality.
2. Control the engagement of targets	2.1 Analyse advice on the operational situation to inform the engagement process. 2.2 Direct and control ground based air defence system operations in accordance with orders. 2.3 Transmit operational data to the command post. 2.4 Rectify minor incidents. 2.5 Report major incidents beyond own level of authority or competence to manager/s and take action as directed.
3. Conduct maintenance	3.1 Supervise operator maintenance activities. 3.2 Perform maintenance activities.
4. Redeploy	4.1 Prepare for redeployment. 4.2 Move from one directed location to another in accordance with orders.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA213 Supervise the destruction of hostile air targets using line of sight ground based air defence weapon systems.

Assessment Requirements for DEFMIL071 Supervise the destruction of hostile air targets using line of sight ground based AD weapon systems

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- communicating effectively
- interpreting orders, instructions and directions
- managing a small team
- operating communication equipment
- recognising aerial targets
- recognising own level of authority
- identifying correctly a number of different types of aerial targets
- prioritising targets in a high intensity situation encountered in a threat environment
- directing fire in a clear and concise manner
- taking appropriate action in the event of misfire and cancelling missile in flight

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- airspace control measures
- characteristics, technical capabilities, effects and limitations of air defence systems
- communication networks
- ground based air defence command structure
- principles of camouflage

- radar principles
- relevant WHS requirements

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL082 Perform military high-risk search

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC309B Perform military high-risk search.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.5 removed

Application

This unit describes the skills required to conduct high risk military searches of areas, routes, vehicles, buildings, property and objects to detect, identify and report the presence of items of equipment and other material intended to cause harm to individuals and to destroy or damage property. It also includes the skills to prove, mark and record safe routes. The search would be conducted where the likelihood of injury or death to the searcher is high.

This unit was developed for military personal required to perform military high-risk search in a deployed operational environment, but is applicable to individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit will usually work under supervision as part of a team. They use discretion and judgement, and take responsibility for the quality of their outputs in a broad range of highly unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for search	1.1 Identify purpose, timing, search environment and type of search from briefing provided by supervisor. 1.2 Establish and maintain location of other individuals engaged in the high risk search. 1.3 Select and wear personal protective equipment in accordance with the type of search. 1.4 Identify, obtain, inspect and test tools and search equipment appropriate to the type of search and report faults. 1.5 Deploy search personnel to an incident site or search area. 1.6 Coordinate preparation of the search site and the conduct of searches with other agencies.
2. Enter the search site	2.1 Conduct search drills/procedures applicable to the type of search in accordance with supervisor's instructions. 2.2 Mark and record a safe route through the site to the target. 2.3 Enter target using improvised remote means.
3. Neutralise the target	3.1 Inspect target and assess identified risks. 3.2 Determine future actions and equipment requirements based on the risk assessment. 3.3 Relay detailed description of activity to recorder. 3.4 Clear site. 3.5 Provide relevant information to stakeholders once the target has been searched. 3.6 Protect potential evidence and/or other items or material of interest from contamination, improper handling or removal.
4. Finalise the task	4.1 Complete and submit relevant documentation in accordance with organisational procedures. 4.2 Complete a handover of responsibility. 4.3 Conduct periodic and routine maintenance of equipment and identify and report faulty/defective equipment.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading NA					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA309B Perform military high-risk search.

Assessment Requirements for DEFMIL082 Perform military high-risk search

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- describing in detail the immediate area over the communications system
- applying knots, lashings and field machines
- neutralising and disarming booby traps and mines
- operating current high risk search equipment
- operating for protracted periods wearing ballistic individual protective equipment
- operating in a high stress environment
- operating search equipment
- operating secure communications
- using pulleys, blocks and tackle
- conducting searches including at least two of:
 - occupied building
 - unoccupied building
 - vehicle (aircraft, boat, truck, train etc.)
 - route (road)
 - area

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- basic blast effects
- building construction methods and materials
- combat engineering skill sets
- design data for generic buildings
- design data for generic vehicles
- explosive and non-explosive demolitions
- laws of armed conflict
- legal responsibilities
- mine and booby trap emplacement and breaching
- organisation's communication system
- relevant WHS regulations/requirements, equipment, material and personal safety requirements
- Rules of Engagement
- Rules of Evidence
- search equipment
- threat capability

Assessment Conditions

Competency should be demonstrated over a number of activities, exercises or incidents, including day and night searches. Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL083 Collect environmental information

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA310B Collect environmental information.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.1 removed • PC 1.4 and 2.2 merged • Elements 1 and 2 merged

Application

This unit describes the skills required to collect meteorological, hydrographic, geospatial and geological information for an area.

This unit was developed for combat engineer personnel required to collect environmental information for an area in a deployed operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work as part of a team under direct supervision. They use discretion and judgement, and take responsibility for the quality of their outputs while performing routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan, prepare and collect information and data	1.1 Identify, interpret and confirm requirement to collect information from instructions. 1.2 Determine appropriate collection methods. 1.3 Develop collection plan and consult with supervisor. 1.4 Identify resources allocated for the task. 1.5 Identify, source and collect information and data in accordance with the plan.
2. Record and report information	2.1 Record information in the organisational format. 2.2 Communicate information to a higher authority. 2.3 Disseminate information as directed by supervisor. 2.4 Complete and maintain documentation and records.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA310B Collect environmental information.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- analysing information and data
- communicating information and data
- conducting research
- using questioning techniques
- conducting tactical and technical reconnaissance
- taking measurements using a laser range finder, tape measure, ruler
- using communications equipment
- using global positioning systems
- using optical enhancement tools such as binoculars
- collecting information and data that is relevant and appropriate to the specific operation

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- basic research and analysis techniques
- collection methods
- communication requirements and equipment
- indigenous inhabitants and culture
- intelligence cycle – direction, collection, processing and dissemination
- legal responsibilities

- navigation
- operational environment
- relevant legislation and procedures in relation to environmental requirements
- relevant WHS regulations/requirements, equipment, material and personal safety requirements
- site, personnel and information security
- terrain types and terrain analysis
- urban and rural demographics
- weather effects

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL084 Operate an inland tug boat

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC328B Operate an inland tug boat.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to operate an inland tug boat, specifically a purpose built motorised vessel up to ten metres in length capable of manoeuvring pontoons and rafts, with a maximum of five crew. It covers the operation of the tug while towing/pushing unloaded pontoons of up to thirty ton. The watercraft will normally be driven in an environment of protected or inland waterways, while conducting a range of tasks including transporting personnel and/or equipment.

While the technical aspects of this competency are concerned with ‘operating a boat’, the specialisation of the skill, and safety issues associated with waterborne operations confer additional responsibilities upon the operator.

To operate an inland tug boat, relevant state/territory and Commonwealth licensing requirements must be met.

This unit was developed for combat engineer personnel required to operate an inland tug boat in a deployed operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

The individual will usually operate the boat independently or under indirect supervision and may command a crew of up to five persons. The individual must demonstrate sound judgement in the use of authority, and where possible, work within the existing lines of authority. They use discretion and judgement, and take responsibility for the quality of their outputs while performing routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for tug boat operations	1.1 Interpret operating instructions to determine the task, the cargo, the destination and route, and compile navigation data. 1.2 Check cargo weight is within the safe operating limit of the craft and complete manifests to ensure passengers and cargo are safe to move. 1.3 Check equipment for serviceability and replace or reject and report unserviceable items. 1.4 Conduct shore preparation and prepare watercraft for launch and watercraft operations. 1.5 Select and wear personal protective equipment.
2. Drive tug boat	2.1 Brief passengers and crew on safety issues prior to embarking. 2.2 Launch tug in accordance with local conditions. 2.3 Load and trim tug to ensure safety of crew and craft. 2.4 Drive tug consistent with hazards and environmental conditions. 2.5 Provide directions to passengers in order to maintain safety and efficient boat operation. 2.6 Conduct contingency and emergency drills to minimise threat to personnel and equipment.
3. Manoeuvre pontoon using tug boat	3.1 Direct crew to assist with securing and manoeuvring of pontoon. 3.2 Capture, secure and control uncontrolled pontoons. 3.3 Manoeuvre and assemble pontoons.

	3.4 Comply with supervisor's directions/commands to control the movement and momentum of the pontoon.
4. Recover and restore tug boat	4.1 Disembark personnel and unload equipment. 4.2 Recover tug from a ramp or expedient landing site. 4.3 Check tug and associated equipment for serviceability, clean and service, report defects and complete documentation. 4.4 Complete debriefings. 4.5 Complete post activity reports and documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA328B Operate an inland tug boat.

Assessment Requirements for DEFMIL084 Operate an inland tug boat

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying launch and recovery procedures
- applying pre start, start and stop procedures
- calculating and record number and weight of passengers, stores and equipment
- capturing and controlling free launched pontoons without damage to equipment
- monitoring hazards and applying safety principles to operations
- reading and interpreting navigation charts
- using clear interpersonal communication as operator of the vessel
- using communications equipment
- using knots and lashings to secure watercraft
- providing directions to personnel within the boat concerning specific safety matters such as seating, movement and actions on incidents such as 'man overboard' and 'capsize'
- managing the contingency and emergency drills:
 - abandon ship drills
 - action on capsized
 - diagnosing and rectifying minor engine faults
 - fire drills
 - man overboard drills
 - propeller replacement
 - towing vessels
 - use of improvised rudder
 - use of oars/improvised oars

- manoeuvring a pontoon, with a minimum weight of five ton, by:
 - towing
 - pushing
 - effectively directing crew

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- anchorage methods and systems
- applicable statutory waterways rules for watercraft operation
- boat orders
- boat specific safety requirements and fire suppressant system
- complete equipment schedule list and locations
- controls and indicators
- effects of water moving over objects and obstacles
- emergency procedures
- environmental hazards of refuelling over water
- forces acting on boats
- hasty buoyancy/floatation calculations
- launch and recovery procedures
- legal responsibilities
- methods for towing/pushing pontoons
- methods of connection/securing to pontoons
- night operation constraints
- operating boundaries
- pre start, start, stop procedures

Assessment Conditions

Competency should be demonstrated over a time frame that allows for the preparation, launch, recovery, driving and maintenance of watercraft under a range of water operating conditions carrying personnel and cargo.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL085 Construct equipment bridging

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA312B Construct equipment bridging.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.10 removed

Application

This unit describes the skills required to facilitate the movement of personnel, vehicles, cargo and equipment through bridging. Equipment bridging is constructed from designed and certified bridge modules and parts to provide a temporary or permanent bridge over a gap.

Bridges will normally be constructed on a temporary basis under field conditions to meet the operational need to provide a crossing point over a gap for personnel and equipment. When the crossing is no longer required the bridge is either recovered to storage or redeployed to another crossing.

This unit applies to combat engineer personnel who are required to construct and recover gap crossing bridging equipment in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and lead a team. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare and plan for gap crossing	1.1 Receive and process requirement and confirm with higher authority as necessary. 1.2 Identify resource availability and serviceability and determine constraints. 1.3 Conduct site survey, risk and environmental assessment. 1.4 Select suitable bridge design based on site survey and available resources. 1.5 Develop construction/dismantle plan in accordance with design, resources, risks and environmental considerations. 1.6 Refer problems that cannot be resolved locally to higher authority for resolution. 1.7 Confirm and monitor competence of team members. 1.8 Brief construction team. 1.9 Liaise with outside agencies.
2. Construct gap crossing	2.1 Direct and supervise construction team. 2.2 Recognise and respond to unexpected situations that require a quick and decisive response. 2.3 Check security, alignment and stability. 2.4 Organise and direct support from outside agencies. 2.5 Provide technical advice to higher authority or support agencies. 2.6 Maintain gap crossing site and gap crossing.
3. Dismantle gap crossing and refurbish site and equipment	3.1 Direct and supervise construction team in accordance with dismantle plan. 3.2 Recover, clean and maintain gap crossing equipment, tools and materials. 3.3 Store or redeploy gap crossing equipment, tools and materials. 3.4 Refurbish site in accordance with environmental requirements.

	3.5 Complete documentation.
	3.6 Conduct post activity analysis and make recommendations.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA312B Construct equipment bridging.

Assessment Requirements for DEFMIL085 Construct equipment bridging

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- commanding and controlling situations and people
- managing resources
- operating optical levelling and surveying devices
- producing design/plans
- producing written and verbal reports
- recording and processing data and information
- taking and recording accurate measurements
- leading a team to construct, maintain and dismantle a multi span bridging of not less than thirty metres made from modularised or improvised means

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- anchorages
- booming procedures and centre of gravity
- equipment bridge design features/requirements:
 - site requirements (reconnaissance):
 - location
 - gap width, depth, obstacles, etc.
 - current and direction

- angle of repose
- abutment design or enhancement
- soils testing and compaction methods
- routes in/out
- parts
- specifications
- user manual,
- material handling equipment requirements and support
- construction sequence
- designed traffic/load (MLC/tonnage)
- above ground or surface (stepped abutment)
- equipment bridge types:
 - medium girder bridge (MGB)
 - air portable bridge (APB)
 - rapid emplacement bridge (REB)
 - line of communication bridge (LOC)
 - bailey bridge, acrow bridge (FMB)
- jacking system
- mathematics to a level necessary to meet all design and construction requirements
- types of bridge category:
 - single span, multi span,
 - simply supported or continuous
- variations in construction sequences:
 - restricted sites
 - floating piers
 - multiple piers

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL086 Supervise engineering operations

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA315B Supervise engineering operations.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.6 and 2.3 removed

Application

This unit describes the skills required to command, lead and manage an engineering organisation of up to thirty personnel on operations. Command is the authority a commander in the military service lawfully exercises over subordinates by virtue of rank or assignment.

It includes the skills and knowledge required to lead and manage under extreme conditions in a high risk environment. It therefore requires individuals to be incisive in a fluid and demanding environment, to act independently, and to lead by example.

This unit applies to land engineering personnel required to deploy in an operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and lead a team under direct and/or indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for DEFMIL086 Supervise engineering operations

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- demonstrating combat engineer skills
- developing instructions from given orders
- drawing simple construction plans
- operating Global Positioning System (GPS)
- operating weapons
- conducting simple levelling for construction tasks
- supervising subordinates
- writing reports
- supervising general construction of pre designed timber structures, sandbag walls, obstacles, expedient structures and field defences using techniques, including:
 - construction design and plans
 - excavation
 - revetment
 - basic carpentry
 - concreting
- designing and using field machines (including at least one of: slings, gins, derricks and sheers) to move a load of at least three tonne
- supervising search of:
 - an occupied building
 - an unoccupied building
 - a vehicle (may include aircraft, boat, truck, train etc.)

- route (road)
- area
- liaising with a higher authority (search advisor, cordon commander, police, explosive ordnance disposal)
- supervising offensive, defensive and security tasks (including patrolling, attacking or withdrawing) involving activities such as:
 - navigation (day, night, vehicle, foot)
 - tracking and patrolling
 - employment of unit weapon systems:
 - individual weapons
 - crew served weapons
 - direct fire support weapons
 - communications
 - living in the field

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- combat communications
- combat engineer skill sets and equipment
- chemical, biological, radiological and nuclear warfare (CBRN)
- combat skills
- emergency response engineering
- geometric engineering
- legal and organisational requirements in relation to environmental requirements and Rules of Engagement
- risk assessment techniques

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL087 Supervise the construction of short term roads or tracks

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA316B Supervise the construction of short term roads or tracks.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.13 removed • Element 1 reworded

Application

This unit describes the skills required to plan and direct the construction and to ensure the maintenance of a short-term road or track. It includes repairs to all weather dirt roads to prepare them for sealing without additional construction and repairs, that would normally involve:

- potholes that cause the slowing of traffic
- removal and replacement of culverts emergency repairs to bomb damaged airfield runway, taxi-way and hard standings
- small scale stabilisation tasks
- construction of short distance emergency bypass routes
- expedient roadways

This unit applies to combat engineer personnel who are required to plan and direct the construction and to ensure the maintenance of, a short term road or track in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and lead a team under direct and/or indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform complex tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan road or track construction	1.1 Interpret road requirements and restrictions from instructions, expected time frame for usage and likely weather conditions. 1.2 Seek assistance to survey road location. 1.3 Survey water courses and other ground obstacles and note their impact on road design. 1.4 Plan crossing or entry points for other roads and tracks. 1.5 Investigate soil conditions to establish profile to sub-base level. 1.6 Plan extent and depth of clearing and cutting. 1.7 Plan soil dumping or storage areas to accommodate volume of soil to be removed, access and restoration. 1.8 Develop construction plan in accordance with design, resources, risks and environmental considerations. 1.9 Confirm availability of required road base and additional material. 1.10 Confirm and monitor competence of team members. 1.11 Brief construction team. 1.12 Liaise with outside agencies.
2. Supervise road or track construction	2.1 Direct and supervise construction team in accordance with the construction plan. 2.2 Recognise and respond to unexpected situations that require a quick and decisive response. 2.3 Check drainage, levelling, road alignment and soil stability.

	2.4 Organise and direct support from outside agencies. 2.5 Provide technical advice to higher authority or support agencies.
3. Supervise maintenance of road or track	3.1 Monitor condition of road/track in relation to volume of traffic and expected future requirements. 3.2 Identify and repair, or report to controlling body, specific damage likely to lead to safety or environmental issues. 3.3 Plan and carry out normal wear and damage repair with minimal disruption. 3.4 Note and modify ineffective drainage. 3.5 Redesign and remake areas of consistent damage.
4. Finalise the task	4.1 Conduct post activity analysis and make recommendations. 4.2 Recondition, replace or return equipment and stores. 4.3 Complete documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA316B Supervise the construction of short term roads or tracks.

Assessment Requirements for DEFMIL087 Supervise the construction of short term roads or tracks

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- analysing pavement using cone penetrometer
- conducting reconnaissance for quarries and gravel pits
- conducting route reconnaissance:
 - route formula symbols
 - limiting factors
 - construction materials
 - overhead obstructions
 - tunnels and underpasses
 - map overlays
- conducting soils testing (CBR)
- designing and constructing culverts:
 - determining ground bearing pressure and angle of repose
 - determining soil characteristics and properties
 - employing geo textiles
 - employing soil stabilisation methods
- measuring roadway parts:
 - pavement widths and thickness
 - shoulders
 - camber and crossfall
 - drainage
- preparing terrain analysis

- constructing roads and track to a standard that they could be classified as all-weather dirt roads and tracks capable of sustained heavy vehicle traffic
- constructing roads or tracks able to be sealed without further construction

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- techniques of:
 - compaction
 - pavement analysis using cone penetrometer
 - route reconnaissance
 - soil stabilisation methods
 - soil testing
 - terrain analysis
- construction standards
- types of:
 - geo textiles
 - ground bearing pressure and angle of repose
 - quarries and gravel pits
 - road systems and their relevant parts
 - soil characteristics and properties

Assessment Conditions

Competency should be demonstrated over a time frame that encompasses all aspects of the unit, in the workplace or in a simulated work environment. Assessment need only be conducted supervising the construction of one road or track due to the high cost and complex nature of the task. Specifically, access is required to the following resources:

- construction equipment and materials
- communications equipment
- suitable site
- construction team

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL088 Coordinate area and route search, and clearance of explosive ordnance

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA327 Coordinate area and route search, and clearance of explosive ordnance.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.9 removed

Application

This unit describes the skills required to plan and direct obstacle. Obstacle reduction is the creation of a safe path through an obstacle which may be widened to the boundaries/extremities for the complete removal of the obstacle, and can be accomplished by the use of explosive or non-explosive methods, including the tasking of purpose designed clearance vehicles and plant equipment.

This unit applies to combat engineer personnel who are required to plan and direct high risk search tasks as part of an obstacle reduction to provide an unhindered and safe path in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would lead a team under indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs, while performing complex tasks in a broad range of highly unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan area and route clearance	1.1 Interpret and confirm requirements with higher authority as necessary. 1.2 Identify resource availability and serviceability and determine constraints. 1.3 Conduct reconnaissance. 1.4 Develop clearance plan in accordance with design, resources, risks and environmental considerations. 1.5 Refer problems that cannot be resolved locally to higher authority. 1.6 Confirm and monitor competence of team members. 1.7 Brief clearance team. 1.8 Liaise with outside agencies as required.
2. Supervise area and route clearance	2.1 Direct and supervise clearance team in accordance with the clearance plan. 2.2 Recognise and respond to unexpected situations that require a quick and decisive response. 2.3 Check safety signage, lane marking and fencing. 2.4 Record information throughout operation and report to outside agencies as necessary. 2.5 Organise and direct support from outside agencies. 2.6 Provide technical advice to the chain of command or support agencies.
3. Finalise the task	3.1 Notify higher authority that clearance is complete. 3.2 Conduct post activity analysis and make recommendations. 3.3 Recondition, replace or return equipment and stores. 3.4 Complete documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA327 Coordinate area and route search, and clearance of explosive ordnance.

Assessment Requirements for DEFMIL088 Coordinate area and route search, and clearance of explosive ordnance

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- compiling minefield records
- analysing the threat – tactics, techniques and procedures
- collecting and reporting information for intelligence
- destroying malfunctioned explosive ordnance
- employing chemical detectors
- employing clearance methods
- employing hazard marking
- employing RRAMNS
- employing Rules of Evidence
- employing Rules of Engagement
- enforcing explosive safety distances
- laying, arming, neutralising and disarming mines and booby traps
- navigating with compass and GPS
- planning road and route repair
- calculating blast effects
- using electronic metal detector
- coordinating clearance of at least a 50 metre route, containing obstacles of explosive ordnance that as a minimum includes mines and booby traps

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- blast effects
- breaching techniques
- characteristics, technical capabilities, effects, employment and limitations of electronic metal detectors, chemical detectors
- characteristics, technical capabilities, effects, employment and limitations of mines, booby traps and battlefield ordnance
- clearance methods
- destruction of malfunctioned explosive ordnance
- explosive safety distances
- GPS
- intelligence collection and reporting
- navigation techniques
- obstacle effects and obstacle construction
- recording requirements including minefield records
- relevant WHS regulations/requirements, equipment, material and personal safety requirements
- road and route repair techniques
- supervision requirements of explosive users/workers

Assessment Conditions

Competency should be assessed over time in simulated work environment that replicates the operational threat environment. The context of assessment is simulated due to the nature of this high risk environment. Specifically, access is required to the following resources:

- cranes
- earth moving equipment
- electronic metal detectors
- explosives and ancillary equipment
- hand held prodder
- personal protective equipment
- rapid route and area mine neutralisation system
- remote positioning devices
- signage
- suitable site clearance team
- communications equipment

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL089 Shift loads manually utilising non-motorised equipment

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA318 Shift loads manually utilising non-motorised equipment.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to manually shift construction materials and other loads of up to 500kg in weight that are unable to be moved by motorised lifting equipment such as forklifts.

Loads may be moved with equipment such as chain blocks, jacks and winches, which provide mechanical advantage. Alternatively, devices such as slings, gins, derricks and sheers may need to be constructed to provide the mechanical advantage necessary to lift and move the load. Loads will need to be prepared for movement using a range of ancillary devices such as strapping, netting, ropes and chains.

This unit was developed for combat engineer personnel required to shift loads manually utilising non-motorised equipment in a deployed operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work as part of a team under direct supervision. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare to shift the load	1.1 Select and wear personal protective equipment. 1.2 Identify the type of load, safe working load and working load limits, and the distance and/or height to be moved from job instructions. 1.3 Determine condition, length, bulk, weight, most appropriate method to shift the load and resources required. 1.4 Record any damage to load and report to supervisor. 1.5 Develop a movement plan to identify potential difficulties and request approval for the method of shifting the load and any requirement for additional personnel from the supervisor. 1.6 Select and check for serviceability tools, load shifting equipment and other materials and report any defects to the supervisor. 1.7 Prepare work site to ensure sufficient clear space is available.
2. Shift the load	2.1 Break down load to allow handling and moving a number of single items to ensure the maximum weight of 500 kg is not exceeded. 2.2 Use mechanical strapping equipment and other securing devices to stabilise the load. 2.3 Sling/unslung the load using the correct securing devices. 2.4 Construct mechanical aids and field machines by the approved shifting method, so that the load can be shifted. 2.5 Identify and maintain safe working limits for lifting equipment. 2.6 Move load in accordance with approved shifting method and steadied by tag lines and store and stack in relocated position.

	2.7 Report any part of the load that is damaged during the lift to the supervisor.
3. Refurbish equipment and work site	3.1 Clean site and clear of debris and unwanted material. 3.2 Clean, inspect, service, maintain and store field machines, tools and equipment. 3.3 Complete documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy

Assessment Requirements for DEFMIL089 Shift loads manually utilising non-motorised equipment

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- calculating using basic formulae and measuring
- using knots and lashings
- splicing and maintaining cordage and steel wire rope (SWR)
- handling materials and identifying manual handling risks
- using manual handling equipment to shift loads
- using slings and securing devices
- following instructions/directives and reporting information
- using a variety of verbal and non-verbal communication techniques including language style, active listening
- completing workplace forms and reports
- calculating total weights of individual items and estimating overall load and comparing with safe working load(s) of equipment
- shifting loads of weights up to 500 kg using at least three different methods:
 - chain blocks
 - flatbed hand trucks
 - hand trucks
 - incline planes
 - levers
 - mechanical aids and field machines
 - pallet trolleys
 - rollers

- slab trolleys
- utilising load shifting equipment:
 - anchorages
 - cables
 - chains
 - cordage
 - crow bars
 - measuring tape/rule
 - mechanical aids
 - packers
 - slings
 - SWR
 - wedges
- utilising mechanical aids and field machines:
 - block and tackle, pulleys
 - gins, sheers and derricks
 - hand operated winches
 - improvised methods including Spanish windlass and par buckles
 - jacks
 - use of expedient materials such as materials obtained on the job from resources available in the local environment
- using slinging devices in conjunction with a load shifting activity using a field machine
- calculating safe working limits and working load limits of anchors, load attachment points and lifting/moving equipment
- constructing field machines and mechanical aids
- safely strapping, slinging, lifting and moving loads without damage to the load, equipment or personnel
- identifying faults and deficiencies and taking action to rectify any problems
- communicating effectively and work in a team

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- types of construction materials and their characteristics
- workplace and equipment safety requirements including relevant WHS regulations, codes and standards applying to load shifting
- handling requirements for different types of material and loads
- storage requirements for different materials
- use of tools and equipment relevant to shifting loads
- pulling and lifting equipment relevant to manual handling operations

- appropriate anchor points for locating slings and anchorages
- estimation/calculation of weights
- principles of team work
- techniques for supporting others
- composition of teams and roles and responsibilities of team members
- verbal and nonverbal communication techniques including language style, active listening

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL090 Assist in the preparation, construction, operation and maintenance of a field water-point

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA319 Assist in the preparation, construction, operation and maintenance of a field water point.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with the new standards• All PC transitioned from passive to active voice• PC 3.4 removed• PC 1.4 reworded

Application

This unit describes the skills required to assist in testing for water quality, selecting a suitable work site and preparing, constructing and operating a field water point. The unit also includes the assembly and operation of water purification equipment, and the production and storage of potable water to meet the requirements of personnel and equipment deployed into an area without adequate water supply.

This unit applies to combat engineer personnel required to assist in testing for water quality, selecting a suitable work site and preparing, constructing and operating a field water point in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work as part of a team under direct supervision, but may be responsible for completing individual tasks. They use discretion and judgement, and take responsibility for the quality of their outputs while performing complex tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Locate a supply of water	1.1 Locate a water supply within a designated area. 1.2 Test water for compliance with quality standards. 1.3 Assess suitability of water sources to be used for collection, treatment and storage. 1.4 Prepare site after gaining approval.
2. Prepare a field water point	2.1 Select and wear personal protective equipment. 2.2 Check equipment, tools and materials for serviceability and report faults. 2.3 Locate and mark local utility assets such as water, electricity and gas pipelines to prevent damage and liaise with local authorities as required. 2.4 Handle, prepare, test and store water point chemicals in accordance with standard procedures and report faults. 2.5 Establish and maintain contact with appropriate agencies to facilitate construction activities, when mechanical excavation equipment is required. 2.6 Construct water point and compact/backfill site using manual or mechanical equipment. 2.7 Construct structures such as water towers and storage tanks. 2.8 Assemble, operate and maintain field water supply equipment and accessories.
3. Operate a water point to produce potable water	3.1 Produce, store and distribute potable water. 3.2 Calibrate, service, operate and maintain water treatment and testing equipment. 3.3 Collect and test water samples. 3.4 Record information related to chemical supply, usage and disposal.

	3.5 Collect, record, maintain and report process and performance data. 3.6 Inspect and maintain equipment in accordance with manufacturer's instructions.
4. Refurbish water point site	4.1 Restore work site to normal, when required. 4.2 Dispose of chemicals.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

DEFMIL091 Prepare, operate and maintain small watercraft

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA320 Prepare, operate and maintain small watercraft.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.2 removed • Elements 2 and 3 merged

Application

This unit describes the skills required to operate small watercraft. The watercraft will normally be operated in an environment of protected or calm inland waterways, conducting a range of tasks including the transport of personnel and/or equipment.

Examples of small watercraft may include:

- motorised and non-motorised boats up to five metres in length capable of accommodating a maximum ten personnel and the operator and crewman
- motorised and non-motorised rigid and non-rigid inflatable craft
- powered by outboard motors of up to 40 hp
- motorised and non-motorised bridge and ferry construction craft

While the technical aspects of this competency are concerned with 'operating a boat', the specialisation of the skill, and safety issues associated with waterborne operations confer additional responsibilities upon the operator.

This unit applies to those working as combat arms personnel required to operate small watercraft in a deployed operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision but may need to provide directions. They must demonstrate sound judgement in the use of authority, and where possible, work within the existing lines of authority. They would perform routine tasks in a broad range of contexts, such as protected or calm inland waterways or in a threat environment.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for watercraft operations	1.1 Interpret operating instructions to determine the task, the cargo, the destination and route, and compile navigation data. 1.2 Complete hasty buoyancy/flotation calculations to ensure passengers and cargo are safe to move. 1.3 Select and check equipment is for serviceability and replace or reject unserviceable items, and report to the supervisor. 1.4 Conduct shore preparation and ensure watercraft is ready for launch. 1.5 Select and apply personal protective equipment. 1.6 Conduct a safety briefing for passengers and crew prior to embarking on watercraft operations.
2. Control operation of small watercraft	2.1 Construct improvised flotation craft, when required, in accordance with technical specifications and supervisor's instructions. 2.2 Launch in accordance with standard procedures and local conditions. 2.3 Load and trim watercraft to ensure safety of crew and load.

	<p>2.4 Operate watercraft consistent with hazards and environmental conditions.</p> <p>2.5 Direct passengers in order to maintain safety and efficient boat operation.</p> <p>2.6 Carry out contingency and emergency drills to minimise threat to personnel and equipment.</p> <p>2.7 Disembark and/or unload personnel and/or loads.</p>
3. Recover and restore vessel	<p>3.1 Recover watercraft from a ramp or improvised landing site.</p> <p>3.2 Check, clean and service watercraft and associated equipment, report defects and complete documentation.</p> <p>3.3 Debrief staff and/or management.</p>

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

DEFMIL092 Assist in the construction of wet gap crossings

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA321 Assist in the construction of wet gap crossings.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.3 removed • PC 1.3 and 3.2 revised

Application

This unit describes the skills required to plan and prepare for wet gap crossing operations, construct gap crossing equipment, and maintain and clean up site and equipment.

Equipment may include:

- floating support bridges
- fixed floating span equipment
- ferry equipment (captive and free)
- floating support bridge
- rafts
- improvised floating structures
- any other to cross rivers and other wet gaps to facilitate the movement of personnel, vehicles, cargo and equipment

Wet gap crossing is defined as a bridge that is physically supported by the water, i.e. through pontoons and associated buoyancy measures. Bridges will normally be constructed on a temporary basis to meet the operational need to provide a crossing point over a gap for personnel and equipment. When the crossing is no longer required the bridge is either recovered to storage or redeployed to another crossing.

This unit applies to those working as combat engineer personnel required to assist in the preparation, construction, operation and recovery of wet gap crossing bridging equipment, including floating support bridges, to cross rivers and other wet gaps to facilitate the movement of personnel, vehicles, cargo and equipment in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team, under supervision, but may undertake some autonomous tasks. They would perform routine tasks in a broad range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for wet gap crossing operations	1.1 Select and wear appropriate personal protective equipment. 1.2 Conduct site layout and preparation. 1.3 Check all wet gap crossing bridging components against the inventory and materials list and prepare for operation. 1.4 Report component, tool and equipment faults and deficiencies to the supervisor. 1.5 Select tools and equipment required for the task, check them for serviceability.
2. Construct a wet gap crossing	2.1 Assemble and adjust jigs, fixtures and equipment to be used in construction. 2.2 Assemble and check bridge components for compliance, accuracy and alignment.
3. Maintain and clean up site and	3.1 Maintain gap crossing sites and crossing systems. 3.2 Recover, clean and maintain gap crossing equipment, tools and

equipment	<p>unused materials.</p> <p>3.3 Document and report faults and deficiencies in gap crossing equipment, tools and unused materials.</p> <p>3.4 Store or redeploy to another site gap crossing equipment, tools and materials.</p>
------------------	--

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA321 Assist in the construction of wet gap crossings.

Assessment Requirements for DEFMIL092 Assist in the construction of wet gap crossings

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- interpreting plans and job instructions
- manually handling construction materials and heavy bridging components
- working with plant
- following instructions/directives and report information
- participating in teams
- encouraging other team members
- using a variety of verbal and non-verbal communication techniques including language style, active listening
- assisting in the construction of at least two wet gap crossings anchorages
- participating in the construction of:
 - one gap crossing with a span of at least thirty metres
 - one crossing at night
- preparing a crossing site
- checking components, tools and equipment for serviceability and completeness
- participating in the assembly, construction operation and recovery of various types of crossing systems
- communicating effectively and work as part of a team
- operating construction equipment

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- WHS workplace and equipment safety requirements
- materials handling while operating tools
- site safety while working with plant
- anchorage systems, knots and lashings
- techniques for supporting others
- composition of teams and roles and responsibilities of team members
- verbal and non-verbal communication techniques including language style, active listening

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL093 Assist in the construction of dry gap crossings

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA322 Assist in the construction of dry gap crossings.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.3 removed • PC 1.3 and 3.2 revised

Application

This unit describes the skills required to assist in the preparation, construction, maintenance and recovery of dry gap crossing bridging equipment to cross any form of gap, including rivers and streams, to facilitate the movement of personnel, vehicles, cargo and equipment. When the crossing is no longer required the bridge is either recovered to storage or redeployed to another crossing.

This unit applies to for combat engineer personnel involved in the construction of dry gap crossings in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would usually be engaged in bridge construction as part of a team under supervision, but may undertake some autonomous tasks. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for DEFMIL093 Assist in the construction of dry gap crossings

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- selecting and using tools and equipment appropriate to the task
- following instructions/directives and reporting information
- assisting in the construction of at least two dry gap crossings using two types of dry gap crossing bridging equipment:
 - multiple or single span gap crossing equipment
 - fixed clear span equipment
 - non equipment bridging
 - improvised and/or expedient materials
 - suspended cable equipment
 - aerial ropeways
- participating in the construction of:
 - at least one bridge of not less than fifteen metres span
 - at least one bridge constructed at night
- preparing the work site
- checking components, tools and equipment
- operating construction equipment

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- WHS workplace and equipment safety requirements
- materials handling while operating tools
- site safety while working with plant
- composition of teams and roles and responsibilities of team members

Assessment Conditions

Competency should be demonstrated under field conditions over a time frame that allows for individuals to be assessed in the various tasks related to the construction of at least two dry gap crossings using two types of equipment, in the workplace or in a simulated workplace environment. Specifically, access is required to the following resources:

- selected dry gap crossing equipment and components (multiple or single span gap crossing equipment, fixed clear span equipment, non-equipment bridging, improvised and/or expedient materials, suspended cable equipment, aerial ropeways)
- tools, equipment and materials required to support the construction and operation of dry gap crossing equipment
- suitable dry gap training area

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL094 Assist in the preparation, construction and maintenance of roads and tracks

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA323 Assist in the preparation, construction and maintenance of roads and tracks.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with the new standards• All PC transitioned from passive to active voice

Application

This unit describes the skills required to assist in the preparation, construction and maintenance of minor roads and tracks to provide access to work sites, camps and other installations. The minor roads and tracks will normally be of a temporary nature and can be expected to carry only a moderate amount of vehicular traffic without major upgrading, construction and maintenance work to bring it up to a permanent standard. Roads and tracks will normally be constructed in field conditions.

This unit was developed for combat engineer personnel required to assist in the preparation, construction and maintenance of minor roads and tracks to provide access to work sites, camps and other installations in a deployed operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would usually work as part of a team under supervision, but may undertake some tasks independently. They must use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for construction	1.1 Select and wear appropriate personal protective equipment. 1.2 Select and check for serviceability tools and equipment required for the job and report any faults to the supervisor. 1.3 Lay out road/track line and clear it of vegetation and obstructions.
2. Construct road/track sub base	2.1 Remove soil manually or with the assistance of plant support to establish a base of suitable width, slope and stability. 2.2 Coordinate soil and waste removal with plant operators and dump or store. 2.3 Compact or stabilise soil (chemically or mechanically) with the assistance of plant support. 2.4 Make provision for drainage and crossing points progressively.
3. Construct road/track surface and drainage	3.1 Transfer, spread, compact and lay/fix road/track base and other surface materials to meet the planned road/track design. 3.2 Provide drains and establish water runoff.
4. Construct crossings	4.1 Cut and prepare road/track surface at crossing point using appropriate compaction. 4.2 Install culverts in accordance with the predicted volume of water. 4.3 Place, backfill and compact pipes or cords.
5. Maintain road/track and refurbish work site	5.1 Monitor condition of road/track in relation to volume of traffic, loads and expected future requirements. 5.2 Identify and repair or report damage likely to lead to safety or environmental issues. 5.3 Plan and carry out normal wear and tear damage repair with minimal disruption to other activities. 5.4 Identify and modify ineffective drainage.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA323 Assist in the preparation, construction and maintenance of roads and tracks.

Assessment Requirements for DEFMIL094 Assist in the preparation, construction and maintenance of roads and tracks

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- using power tools, hand tools, small plant and other engineering equipment
- measuring relative to the construction process
- using expedient and improvised construction methods and materials
- following instructions/directives and reporting information
- reading and interpreting job instructions, procedures manuals, job guides, field engineering pamphlets, technical specifications, manufacturer's specifications, plans, maps and overlays

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- workplace and equipment safety requirements
- capabilities of small plant and equipment
- materials handling and storage
- expedient and improvised construction methods
- composition of teams and roles and responsibilities of team members
- basic numeracy required to determine linear measurement, and number and placement of pegs

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL095 Assist in the construction and maintenance of field structures

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA324 Assist in the construction and maintenance of field structures.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with the new standards• All PC transitioned from passive to active voice

Application

This unit describes the skills required to construct and maintain a range of field structures, such as bunkers, strongpoints, towers and shelters. Construction is usually of a temporary nature and is undertaken employing expedient construction methods using both commercially available and improvised materials. Construction will normally be carried out in a field environment.

This unit was developed for combat arms personnel involved in the construction and maintenance of field structures in a deployed operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit will usually work as part of a team under supervision, but may undertake some tasks independently. They use discretion and judgement, and take responsibility for the quality of their outputs in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare work site	1.1 Select and wear personal protective equipment. 1.2 Conduct site layout and preparation in accordance with approved sketches, drawings, specifications and job instructions. 1.3 Inspect for serviceability and prepare for operation all tools and equipment and report defects to the supervisor. 1.4 Source, prepare and stockpile materials in accordance with work schedule, design specifications and job instructions.
2. Build and maintain field structures	2.1 Conduct earthworks for hardstanding, pits and trenches manually, or with plant and operator support, in accordance with specifications and site requirements. 2.2 Position fabricated/pre-fabricated components for assembly. 2.3 Assemble jigs, fixtures and other equipment apply to support construction. 2.4 Erect scaffolding in accordance with job requirements. 2.5 Lay/assemble concrete, bricks/blocks, timber, wire mesh, matting, steel and other materials according to job specifications. 2.6 Conduct horizontal and vertical construction to specification using expedient methods and materials available. 2.7 Camouflage site progressively and maintain concealment. 2.8 Check assembly/construction for compliance with specifications.
3. Maintain and clean-up site and equipment	3.1 Maintain, further develop and/or repair field structures to specification. 3.2 Remove from site, clean, service, maintain and store plant, vehicles, tools and other equipment and complete documentation. 3.3 Clear area and dispose of waste material.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA324 Assist in the construction and maintenance of field structures.

Assessment Requirements for DEFMIL095 Assist in the construction and maintenance of field structures

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- following instructions
- reading drawings, plans and sketches
- selecting construction materials
- measuring relative to the construction process
- utilising expedient and improvised methods to construct field structures
- reporting information
- laying out a site
- preparing materials and equipment for construction
- applying appropriate expedient construction methods and procedures to the construction including accurate measuring and levelling
- using standard processes to handle and place materials
- completing the construction of field structures to the specified standard

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- workplace and equipment safety requirements
- materials handling and storage
- measurement relative to construction
- expedient and improvised construction methods

- types and use of field structures
- drawings, plans and graphic representation including lettering, symbols tables, charts, specifications
- techniques for supporting others
- composition of teams and roles and responsibilities of team members
- verbal and non-verbal communication techniques including language style, active listening

Assessment Conditions

Competency should be demonstrated under field conditions over a time frame that allows for constructing and maintaining a number of field structures utilising expedient construction methods and a variety of materials. Assessment should include construction of at least three types of field structures, at least one above and one below ground structure.

Competency should be assessed in the workplace or in a simulated workplace environment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL096 Prepare and operate a field water-point

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC325 Prepare and operate a field water point.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.10 and 2.7 removed

Application

This unit describes the skills required to prepare and operate a field water point. Suitable water sources include bores, canals, dams, existing piped supplies, lakes, oceans, rivers, or springs.

This unit applies to combat engineer personnel who are required to locate suitable water sources, select suitable work sites, operate and maintain a field water point, and refurbish sites in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would lead a team under direct and/or indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare and plan for water acquisition	1.1 Receive and process requirement and confirm with higher authority as necessary. 1.2 Identify resource availability and serviceability and determine constraints. 1.3 Conduct analysis of the area from available data to identify potential water sources. 1.4 Conduct site surveys, risk and environmental assessments. 1.5 Develop field water point plan in accordance with survey, water quality and quantity, resources, risks and environmental considerations. 1.6 Refer problems that cannot be resolved locally to higher authority for resolution. 1.7 Confirm and monitor competence of team members. 1.8 Brief team. 1.9 Liaise with outside agencies.
2. Construct a field water point	2.1 Direct and supervise team in accordance with plan. 2.2 Organise and direct support from outside agencies. 2.3 Locate and mark local utility assets to prevent damage. 2.4 Establish routes in and out of water points. 2.5 Design and construct/establish structures. 2.6 Provide technical advice to the chain of command and/or support agencies.
3. Operate and maintain a field water point	3.1 Produce, store and distribute potable water. 3.2 Supervise water point team. 3.3 All unexpected situations that require a response are recognised and responded to in accordance with operational requirements and standard procedures. 3.4 Provide reports and data to higher authority.
4. Refurbish site and finalise activity	4.1 Refurbish site in accordance with environmental requirements. 4.2 Dispose of chemicals and waste in accordance with

	<p>environmental requirements.</p> <p>4.3 Recover, clean and maintain equipment, tools and materials.</p> <p>4.4 Store or redeploy equipment, tools and materials.</p> <p>4.5 Complete documentation.</p>

Assessment Requirements for DEFMIL096 Prepare and operate a field water-point

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- analysing instructions
- conducting and quality assuring water analysis
- conducting risk assessment
- conducting tactical and technical water-point reconnaissance
- managing fuel/chemical spill containment
- managing the storage of water
- preparing and issuing instructions and orders
- providing advice
- selecting and maintaining routes
- supervising the construction of improvised water towers
- communicating effectively with team personnel and outside agencies
- monitoring water quality and quantity

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- design and construction requirements of improvised water towers
- environmental considerations:
 - chemical storage/MSDS
 - fuel/chemical spill containment

- legal responsibilities
- pathology report of water samples
- relevant legislation and procedures in relation to environmental requirements
- relevant WHS regulations/requirements, equipment, material and personal safety requirements
- requirements of a technical reconnaissance of a water point
- water analysis and storage requirements

Assessment Conditions

Competency should be demonstrated over a time frame that allows the individual to be observed in all aspects of the operation, a typical time frame would be three days.

Competency should be assessed in the workplace or in a simulated work environment. Specifically, access is required to the following resources:

- field water point equipment and accessories relevant to the task
- team
- hand tools, power tools, plant and other equipment appropriate to the supply of water
- suitable water supply
- field water point site
- pathology report of water samples

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL097 Operate an inland modular raft or ferry

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA326 Operate an inland modular raft or ferry.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.13 removed

Application

This unit describes the skills required to operate an inland modular raft or ferry. The raft or ferry will consist of at least three connected, unpowered pontoons that are propelled by at least two tugs. This unit of competency covers the assembly, navigation, and manoeuvring of the raft or ferry. The raft or ferry will normally be driven in an environment of protected or inland waterways, while conducting a range of tasks including the transport of personnel and/or equipment.

This unit applies to combat engineer personnel who are required to operate an inland modular raft or ferry in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would lead a team under direct and/or indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for raft or ferry operation	1.1 Determine task, cargo, destination and route from operating instructions. 1.2 Compile navigation data. 1.3 Check cargo weight is within the safe operating limit of the craft and complete manifests to ensure passengers and cargo are safe to move. 1.4 Conduct launch site survey, risk and environmental assessment. 1.5 Determine suitable raft or ferry design. 1.6 Develop assembly and disassembly plan in accordance with design, resources, surveys, risks and environmental considerations. 1.7 Select equipment and check for serviceability, replace or reject, and report unserviceable items. 1.8 Check operator and crew conform to relevant state/territory and federal licensing requirements. 1.9 Refer problems that cannot be resolved locally to higher authority for resolution. 1.10 Brief crew. 1.11 Liaise with outside agencies as required. 1.12 Conduct shore preparation and prepare the pontoons and tugs for launch.
2. Assemble and manoeuvre the raft or ferry	2.1 Direct and supervise crew. 2.2 Launch tugs and pontoons. 2.3 Assemble raft or ferry in accordance with assembly plan. 2.4 Brief passengers on safety issues prior to embarking. 2.5 Load raft or ferry in accordance with manifest and check security, alignment and load stability. 2.6 Navigate and manoeuvre raft or ferry consistent with hazards and environmental conditions. 2.7 Conduct contingency and emergency drills to minimise threat to personnel and equipment.

	<p>2.8 Disembark personnel and unload equipment.</p> <p>2.9 Recognise and respond to unexpected situations that require a quick and decisive response in accordance with operational requirements.</p>
3. Recover and restore raft or ferry	<p>3.1 Disassemble raft or ferry in accordance with disassembly plan.</p> <p>3.2 Recover pontoons and tugs.</p> <p>3.3 Check equipment for serviceability, clean and service it, and report any defects.</p> <p>3.4 Complete documentation.</p> <p>3.5 Complete debriefing requirements.</p>

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA326 Operate an inland modular raft or ferry.

Assessment Requirements for DEFMIL097 Operate an inland modular raft or ferry

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- commanding and controlling crew, passengers and loads
- commanding and navigating the raft or ferry by day and night
- monitoring hazards and applying safety principles to operations
- reading and interpreting navigation charts
- operating the LRV to launch and recover tugs and pontoons
- supervising raft and ferry construction
- using clear interpersonal communication as operator of the vessel
- using knots and lashings
- operating a raft or ferry on various waterways
- managing contingency and emergency actions
- manoeuvring a raft or ferry, with a minimum weight of twenty tonnes

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- applicable statutory waterways rules for watercraft operation
- boat specific safety requirements and fire suppressant system
- gap reconnaissance
- hasty buoyancy/floatation calculations
- launch and recovery procedure for the launch and recovery vehicle

- loading procedures and centre of gravity
- effects of water moving over objects and obstacles
- effects of wind on floating objects
- manifest data
- raft and ferry design and construction sequence

Assessment Conditions

Competency should be demonstrated over a time frame that allows for the preparation, launch, recovery, navigation and manoeuvring of a raft or ferry under a range of water operating conditions carrying personnel or cargo, either in the workplace or in a simulated work environment. Specifically, access is required to the following resources:

- tugs and pontoons
- associated equipment and accessories, including cargo crew
- suitable waterways with access to flowing/tidal water

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL111 Undertake reconnaissance tasks

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA404B Undertake reconnaissance tasks.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.4 and 2.5 removed

Application

This unit describes the skills required to operate as a team member during the conduct of reconnaissance tasks in the Defence Force. Reconnaissance operations require soldiers to operate in small teams in close proximity to the enemy in order to gather information to inform their commanders.

This unit applies to those working as combat arms personnel required to deploy in an operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for reconnaissance tasks	1.1 Interpret and clarify reconnaissance orders. 1.2 Conduct battle procedure. 1.3 Select appropriate equipment, check for serviceability and fit as directed and/or required by the operational environment.
2. Conduct a reconnaissance patrol	2.1 Adhere to formations in accordance with operational requirements. 2.2 Conduct drills and procedures. 2.3 Minimise detection when completing movement. 2.4 Conduct patrol debrief.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading					Writing NA					Oral communication					Numeracy

Assessment Requirements for DEFMIL111 Undertake reconnaissance tasks

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying navigation techniques
- applying operational safety
- preparing and using reconnaissance equipment
- utilising reconnaissance techniques
- applying fieldcraft and battle craft

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- battle craft
- characteristics, technical capabilities, effects, employment and limitations of equipment
- cultural awareness
- fire control orders
- navigation techniques
- WHS requirements
- Orders for Opening Fire
- recognised safety precautions

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL112 Undertake surveillance tasks

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC405B Undertake surveillance tasks.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.6 reworded

Application

This unit describes the skills required to undertake surveillance patrols as part of a team during land operations in the Defence Force. Surveillance patrolling is carried out in both forward and rear areas to detect, locate, identify and report on threats and to monitor the threat environment. A surveillance patrol team consists of up to ten people (for example an infantry section). Surveillance patrols are conducted to both maintain security and to gain information such as:

- changes in patterns of normalcy
- characteristics of infrastructure and facilities
- sign of activity
- strength and disposition of threat

This unit applies to those working as arms personnel required to deploy in an operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

DEFMIL114 Operate a sustained fire machine gun

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC407B Operate a sustained fire machine gun.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.1 removed • PC 1.2 and 1.4, and 4.1 and 4.3 merged

Application

This unit describes the skills required to operate a sustained fire machine gun. It involves the ability to safely handle, safely maintain, safely operate and safely fire the sustained fire machine gun. A sustained fire machine gun is normally fired from a tripod utilising a sighting system enabling direct and indirect fire.

This unit applies to those working as combat arms personnel required to operate a sustained fire machine gun.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, usually as part of a team and will operate under direct orders. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a range of contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC408B Operate sustained fire machine guns on operations.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.3 removed

Application

This unit describes the skills required to conduct battle shooting on operations with sustained fire machine guns, including but not limited to MAG 58 and 12.7 Quick Change Barrel (QCB), in the Defence Force. This is only assessed in an operational environment, for example, as a member of a direct fire support weapons platoon.

This unit applies to those working as combat arms personnel required to operate a sustained fire machine on operations in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, usually as part of a team and will usually operate under direct orders. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Handle a sustained fire machine gun	1.1 Conduct weapon drills. 1.2 Adopt fire positions as required by environment and threat. 1.3 Secure ammunition.
2. Apply fire with a sustained fire machine gun	2.1 Employ weapon sighting systems and associated equipment as required by the operational environment. 2.2 Comply with Rules of Engagement and Orders for Opening Fire when firing a sustained fire machine gun on operations, in accordance with operational requirements. 2.3 Identify and engage targets as required by the operational environment.
3. Maintain and stow a sustained fire machine gun	3.1 Clean and service sustained fire machine gun and associated equipment as required by the operational conditions. 3.2 Identify and rectify defects if within limits of authority or report them to supervisor. 3.3 Complete documentation. 3.4 Secure sustained fire machine gun.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA408B Operate sustained fire machine guns on operations.

Assessment Requirements for DEFMIL115 Operate sustained fire machine guns on operations

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- achieving the required effects of fire
- applying battle craft and fieldcraft
- applying recognised safety precautions
- carrying out weapon drills including:
 - action
 - checking clearances
 - degrees of weapon readiness
 - dismount
 - firing
 - immediate action and stoppage
 - mounting
 - parallel
 - safety precautions
 - scales adjustment
 - sight calibration
 - stripping and assembling
- firing the weapon using, as a minimum, linked ball ammunition
- applying a variety of engagement techniques including at least two of:
 - destruction
 - fixing
 - harassing

- neutralisation
- suppression
- varied rates of fire
- firing, as a minimum, from any unsupported position
- recognising limit of own authority

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- battle craft
- characteristics, technical capabilities, effects, employment and limitations of the sustained fire machine gun and ammunition
- fieldcraft
- fire control orders
- WHS requirements
- recognised safety precautions
- weapon drills

Assessment Conditions

Competency should be assessed in a simulated workplace environment using live ammunition in a range of actual live firing contexts based on a number of realistic operational scenarios. The context of assessment is simulated due to the nature of this high risk environment.

Specific resources for assessment include access to:

- sustained fire machine gun
- ammunition
- simulated operational environment

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL116 Operate a shotgun

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC409B Operate a shotgun.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.1, 4.1 and 4.2 removed • Element 1 one new PC • Elements 3 & 4 merged

Application

This unit describes the skills required to operate a shotgun, such as the Remington 870. Operating a shotgun involves the ability to safely handle, safely maintain, safely operate and safely fire it.

This unit applies to those working in Defence as combat arms personnel required to operate a shotgun.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, usually as part of a team and will operate under direct orders. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a range of contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

DEFMIL118 Operate a grenade launcher

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC411B Operate a grenade launcher.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.1 removed • PC 1.2 and 1.4, and 4.1 and 4.3 merged

Application

This unit describes the skills required to operate a grenade launcher. Operating a grenade launcher involves the ability to safely handle, maintain, operate and fire the grenade launcher. The grenade launcher fires a grenade designed to be used against area and point targets. The weapon is carried by one person and can be fired from normal small arms firing positions.

This unit applies to those working as combat arms personnel required to operate a grenade launcher.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, usually as part of a team and will operate under direct orders. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a range of contexts.

DEFMIL120 Operate a direct fire support weapon

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC413B Operate a direct fire support weapon.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.1 removed • PC 1.2 and 1.4, and 4.1 and 4.3 merged

Application

This unit describes the skills required to operate a direct fire support weapon, including any in service 66 mm or 84 mm direct fire support weapon. Operating a direct fire support weapon involves the ability to handle, maintain, operate and fire the direct fire support weapon. The weapon is designed to be carried by a person.

This unit applies to those working as combat arms personnel required to operate direct fire support weapons.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, usually as part of a team and will operate under direct orders. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for DEFMIL120 Operate a direct fire support weapon

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- adopting appropriate firing position
- aiming the direct fire support weapon
- applying immediate action and stoppage drills
- applying recognised safety precautions
- conducting weapon drills
- firing the weapon
- recognising the limit of own authority

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, technical capabilities, effects, employment and limitations of the direct fire support weapon and ammunition
- degrees of weapon readiness
- WHS requirements
- marksmanship principles
- range safety
- safety precautions of the direct fire support weapon
- types of targets

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL121 Operate direct fire support weapon systems on operations

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA414B Operate direct fire support weapon systems on operations.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.5 removed • PC 1.2 and 1.6 merged

Application

This unit describes the skills required to safely handle, aim, fire, and maintain direct fire support weapon systems (such as the 84 mm Carl Gustaf) designed to destroy targets and provide battlefield effects. The weapon system is carried and operated by a team.

All members of the team must be thoroughly familiar with target identification, the characteristics and capabilities of the weapon system and be competent in the application of fire in an operational environment. The team will usually operate under direct Orders for Opening Fire and in accordance with the Rules of Engagement.

This unit applies to those working in Defence as combat arms personnel.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, usually as part of a team and will usually operate under direct orders. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Handle a direct fire support system	1.1 Handle and carry weapon. 1.2 Identify, select, handle and secure ammunition. 1.3 Conduct weapon drills. 1.4 Adopt fire positions as required by environment and threat.
2. Apply fire with a direct fire support system	2.1 Employ weapon sighting systems and associated equipment as required by the operational environment. 2.2 Identify and engage targets.
3. Maintain and stow a direct fire support system	3.1 Conduct maintenance. 3.2 Identify and rectify defects within limits of authority or reported to supervisor. 3.3 Complete documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA414B Operate direct fire support weapon systems on operations.

DEFMIL122 Operate anti-personnel weapon

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC415B Operate anti-personnel weapon.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.1 removed • PC 1.2 and 1.3 merged • Elements 1 and 2 merged

Application

This unit describes the skills required to operate an antipersonnel weapon, including the M18A1 Claymore. This involves the ability to handle, maintain, operate and arm the antipersonnel weapon. Antipersonnel weapons are directional, command detonated, fragmentation devices.

This unit applies to those working as combat arms personnel required to operate an antipersonnel weapon.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, usually as part of a team and will operate under direct orders. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Handle and maintain the antipersonnel weapon	1.1 Handle, carry and secure antipersonnel weapon. 1.2 Clean and service antipersonnel weapon and associated equipment. 1.3 Identify and rectify defects within limits of authority or report them to supervisor. 1.4 Complete documentation.
2. Operate and arm the antipersonnel weapon	2.1 Conduct weapon drills. 2.2 Aim the antipersonnel weapon. 2.3 Employ weapon equipment. 2.4 Sight and arm antipersonnel weapon. 2.5 Comply with Range Safety Brief and Practice Brief when using an antipersonnel weapon on a range.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

DEFMIL123 Employ hand operated pyrotechnics

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA416C Employ hand operated pyrotechnics.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.4 removed

Application

This unit describes the skills required to effectively employ pyrotechnics in the Defence Force. Pyrotechnics are usually used for illumination, signalling and obscuration.

This competency was developed for combat arms personnel working with pyrotechnics, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work independently under direct and/or indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Handle pyrotechnics	1.1 Identify and select pyrotechnics according to operational requirements. 1.2 Handle and carry pyrotechnics. 1.3 Adopt operating positions as required by circumstances and type of pyrotechnic. 1.4 Monitor environmental factors to ensure safety.
2. Operate pyrotechnics	2.1 Activate pyrotechnics. 2.2 Achieve outcome required from using pyrotechnics. 2.3 Minimise environmental impact arising from use of pyrotechnics and recover waste products.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

DEFMIL124 Destroy targets using a direct fire guided weapons system

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA417B Destroy targets using a direct fire guided weapons system.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with the new standards• All PC transitioned from passive to active voice• PC 1.5, 2.2 and 2.5 removed• PC 1.2 and 1.6 merged

Application

This unit describes the skills required to safely handle, aim, fire, and maintain direct fire guided weapon systems designed to destroy targets, which may include Dragon, Javelin, Milan, and TOW. The weapon is designed to be carried by a person. The individual will usually operate under Orders for Opening Fire and in accordance with the Rules of Engagement.

This unit applies to those working as combat arms personnel required to operate direct fire guided weapon systems designed to destroy targets in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would normally operate the weapon in a team environment under supervision. The operators must be thoroughly familiar with characteristics and capabilities of the guided weapon system and competent in the application of fire in an operational or simulated operational environment. They would perform specific tasks in a broad range of contexts that can be unpredictable.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

DEFMIL125 Operate a service rifle on operations

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA419B Operate a service rifle on operations.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.5 and 2.2 removed • PC 1.2 and 1.6 merged

Application

This unit describes the skills required to effectively conduct battle shooting on operations with a service rifle in the Defence Force. The individual will usually operate under Orders for Opening Fire and in accordance with the Rules of Engagement.

This unit was developed for combat arms personnel required to operate a service rifle in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, usually as part of a team and will usually operate under direct orders. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for DEFMIL125 Operate a service rifle on operations

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">▶ Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- achieving the required effects of fire
- applying battle craft
- applying fieldcraft skills
- applying recognised safety precautions
- handling weapons in an operational environment
- following fire control orders
- working in a team
- conducting the following weapon drills:
 - checking clearances
 - degrees of weapon readiness
 - immediate action and stoppage
 - safety precautions
 - stripping and assembling
- firing the weapon using, as a minimum, ball ammunition
- applying engagement techniques including at least one of:
 - fix
 - destruction
 - neutralisation
 - rates of fire
 - suppression
- recognising limit of own authority

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- battle craft
- characteristics, technical capabilities, effects, employment and limitations of the service rifle and ammunition
- fieldcraft
- fire control orders
- WHS requirements
- recognised safety precautions
- weapon drills

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

The service rifle operator must be able to achieve the organisational standard of operation and marksmanship, in Defence stipulated in Training the Battle Shot Stage 5; MLW 2 9 1 Training the Battle Shot.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL126 Operate a light support weapon on operations

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC420B Operate a light support weapon on operations.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.5 and 2.2 removed • PC 1.2 and 1.6 merged

Application

This unit describes the skills required to effectively conduct battle shooting on operations with a light support weapon, which may include the F89 Minimi. The individual will usually operate under Orders for Opening Fire and in accordance with the Rules of Engagement.

This unit applies to those working as combat arms personnel required to operate a light support weapon on operations in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, usually as part of a team and will usually operate under direct orders. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Handle a light support weapon	1.1 Handle and carry light support weapon. 1.2 Identify, select, handle, secure and maintain ammunition. 1.3 Conduct weapon drills. 1.4 Adopt fire positions as required by environment and threat.
2. Apply fire with a light support weapon	2.1 Employ weapon sighting systems and associated equipment. 2.2 Identify and engage targets as required by the operational environment.
3. Maintain and stow a light support weapon	3.1 Clean and service weapon and associated equipment in all operational conditions. 3.2 Identify and rectify defects within limits of authority or reported to supervisor. 3.3 Complete documentation. 3.4 Secure light support weapon.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading NA					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA420B Operate a light support weapon on operations.

Assessment Requirements for DEFMIL126 Operate a light support weapon on operations

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">▶ Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- achieving the required effects of fire
- applying battle craft
- applying fieldcraft skills
- applying recognised safety precautions
- interpreting fire control orders
- carrying out weapon drills including:
 - checking clearances
 - degrees of weapon readiness
 - immediate action and stoppage
 - safety precautions
 - stripping and assembling
- firing the weapon using, as a minimum, linked ball ammunition
- applying a variety of engagement techniques including at least one of:
 - suppression
 - destruction
 - fix
 - neutralisation
 - rates of fire

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- battle craft
- characteristics, technical capabilities, effects, employment and limitations of the light support weapon and ammunition
- fieldcraft
- fire control orders
- recognised safety precautions
- weapon drills

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL127 Conduct range practices

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA422B Conduct range practices.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.2 and 2.3 removed

Application

This unit describes the skills required to conduct weapons range practice, range practice may include the following types of ranges:

- standard 25 metre range
- 25 metre and 100 metre open ranges
- classification range
- static mechanical range
- MTR
- field firing ranges including small arms, high explosive, anti-armour and indirect fire weapons
- WTSS

This unit encompasses the safe and efficient planning and conducting of range practices as the Officer in Charge (OIC). Conducting, in this instance, also includes effective supervision of safety, and the preparation and finalisation of range practice using weapons and ammunition for which the OIC is qualified to operate.

This unit applies to Defence personnel required to perform the duties of OIC for the conduct of range practices within a Defence working environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work independently under indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks, in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

DEFMIL130 Supervise sniper operations

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC427B Supervise sniper operations.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.6 and 2.8 removed

Application

This unit describes the skills required to identify tasks and collect appropriate information, plan and prepare for sniping tasks, control sniping operations and finalise sniping tasks.

This unit applies to combat arms personnel required to supervise and control all aspects of sniper operations in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would perform independently and lead a team under indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. They would perform complex tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify tasks and collect appropriate information	1.1 Determine requirement to conduct sniping tasks from orders, and identify and apply appropriate standard procedures. 1.2 Determine and manage constraints imposed on tasks. 1.3 Identify and address training requirements. 1.4 Identify and address resource requirements. 1.5 Report shortfalls/problems through the chain of command.
2. Plan and prepare for sniping tasks	2.1 Assemble and analyse information and intelligence in support of operations. 2.2 Identify and manage risk. 2.3 Conduct decision making process. 2.4 Identify and advise sniper teams to perform specialist operations. 2.5 Adjust plans to accord with resource availability. 2.6 Prepare and issue orders to participating sniper teams indicating their missions, tasks, resources, constraints and limitations. 2.7 Supervise and conduct battle procedure.
3. Control sniping operations	3.1 Monitor operations to ensure efficient conduct and achievement of the mission. 3.2 Employ appropriate battlespace operating systems. 3.3 Modify plans to reflect requirements in effort, resources and support. 3.4 Coordinate operations as required, reallocating/adjusting resources to meet operational requirements. 3.5 Liaise with superiors, subordinates, supporting organisations and other operations being conducted as required, ensuring feedback and performance is addressed. 3.6 Action reported problems. 3.7 Provide reports.
4. Finalise sniping tasks	4.1 Document operations in accordance with current instructions. 4.2 Conduct debriefing. 4.3 Conduct post-activity analysis and make recommendations. 4.4 Compile and process reports and returns.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

DEFMIL131 Undertake stability actions

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCA428 Undertake stability actions.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to operate as a team member during the conduct of stability actions in the Australian Defence Force. Stability actions involve a variety of activities conducted in a threat environment. A security operations team is a grouping of up to approximately 30 personnel (for infantry this would be a section or platoon).

This unit was developed for combat arms personnel required to deploy in an operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit work independently and as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for stability actions	1.1 Receive and clarify stability action orders. 1.2 Conduct battle procedure. 1.3 Select and fit appropriate personal protective equipment as directed and/or required by the operational environment.
2. Conduct stability actions	2.1 Conduct stability actions in accordance with operational requirements and standard procedures. 2.2 Maintain security of the team. 2.3 Conduct drills and procedures.
3. Finalise stability action activities	3.1 Conduct post operation activities. 3.2 Conduct post operation administration.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

Assessment Requirements for DEFMIL131 Undertake stability actions

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">▶ Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying battle craft
- applying cultural sensitivity
- applying navigation techniques
- applying recognised safety precautions
- assimilating orders
- interpreting fire control orders
- working as part of a team
- carrying out duties during the following activities:
 - patrol key point security
 - vehicle check points
 - cordon and search
- completing the following drills and procedures:
 - contact drills
 - counter ambush drills
 - mine incident drills
 - obstacle crossing drills
 - harbour drills
 - short and long halts

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, technical capabilities, effects, employment and limitations of equipment
- cultural awareness
- fire control orders
- navigation techniques
- Rules of Engagement

Assessment Conditions

Competency should be demonstrated over time in a range of contexts that could be expected in the workplace. Competency should be assessed in a simulated operational threat environment. The person should be exposed to the extremes of the operational environment under physical and mental stress. The context of assessment would usually be simulated due to the nature of this high risk environment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL132 Undertake defensive actions

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC429 Undertake defensive actions.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to operate as a team member during the conduct of defensive actions in the Australian Defence Force. For the purpose of this unit of competency, a team is defined as a group of up to approximately 30 personnel (for infantry this would be a section or platoon).

This unit was developed for those working in Defence as combat arms personnel required to deploy in an operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for defensive actions	1.1 Interpret defensive action orders and clarify where required. 1.2 Conduct battle procedure. 1.3 Select and fit personal and task specific equipment.
2. Conduct defensive actions	2.1 Occupy defensive position. 2.2 Construct defences. 2.3 Conduct defensive routine. 2.4 Conduct drills and routines. 2.5 Withdraw from the defensive position.
3. Finalise defensive action activities	3.1 Conduct post operation activities. 3.2 Conduct post action administration.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading NA					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA429 Undertake defensive actions.

Assessment Requirements for DEFMIL132 Undertake defensive actions

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> ▶ Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying battle craft
- applying navigation techniques
- applying operational safety
- constructing defences such as:
 - shell scrapes
 - weapon pits
 - obstacles
 - fire lanes
 - weapon stakes
- adhering to all defensive routines as detailed below:
 - applying weapon readiness states
 - camouflage maintenance
 - clearing patrols
 - maintaining communications between individual/groups
 - maintaining hygiene plan
 - maintaining obstacles
 - monitoring surveillance devices
 - observing arcs
 - range cards
 - rehearsals
 - searching ground

- stand to/down
- standing patrols
- track discipline
- using the ground

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- battle craft
- characteristics, technical capabilities, effects, employment and limitations of equipment
- fire control orders
- orders for open fire

Assessment Conditions

Competency should be assessed in a simulated operational threat environment. The person should be exposed to the extremes of the operational environment under physical and mental stress. The context of assessment would usually be simulated due to the nature of this high risk environment. Competency should be demonstrated over time and in a range of contexts that could be expected in the workplace.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL134 Undertake sniper tasks

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFC431 Undertake sniper tasks.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.2 removed

Application

This unit describes the skills required to operate as a two man team during the conduct of sniper tasks in the Defence Force. Sniper operations require soldiers to operate in close proximity to the enemy in order to hit targets with rifle fire and gather information to inform their commanders. The sniper must be thoroughly familiar with characteristics and capabilities of the weapon and competent in the application of fire in an operational environment.

This unit applies to combat arms personnel required to operate as a two man team during the conduct of sniper tasks in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit work independently and as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for sniper tasks	1.1 Interpret and clarify sniper orders where required. 1.2 Select and check appropriate equipment for serviceability and fit as directed and/or required by the operational environment.
2. Conduct a sniper patrol	2.1 Complete movement ensuring that detection is avoided. 2.2 Achieve standard of operation and marksmanship. 2.3 Perform sniper patrol techniques. 2.4 Conduct drills and procedures. 2.5 Complete sniper tasks. 2.6 Conduct patrol debrief.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading NA					Writing NA					Oral communication					Numeracy NA

Assessment Requirements for DEFMIL136 Supervise the operation of direct fire support weapons

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- interpreting orders
- directing and controlling the direct fire support weapon crew
- supervising both sustained fire machine gun and medium direct fire support weapons
- supervising sight testing
- supervising non-technical inspections

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- ammunition identification:
 - type
 - colour
 - hazard band
 - labelling
 - markings
 - lot/batch numbers
 - packaging
 - nomenclature
- safety precautions associated with the task

Assessment Conditions

Competency should be demonstrated in a simulated operational environment over time while firing live high explosive and ball link ammunition. Specifically, access is required to the following resources:

- at least two direct fire support weapons of each type, such as sustained fire machine gun and medium direct fire support weapons
- competent direct fire support weapon crews
- live ammunition
- a live firing range

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Application

This unit describes the skills required to select and apply appropriate non-lethal unarmed self-defence (NUSD) techniques to control persons in operational situations. It includes the ability to minimise the risk to self and others, to quickly re-assess the situation and respond to unexpected changes in circumstances.

This unit was developed for Defence personnel required to apply NUSD techniques in deployed operational situations, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work independently and as part of a team under direct and/or indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Assess the need to use NUSD techniques	1.1 Evaluate need to use NUSD techniques against use of force guidelines. 1.2 Assess person's intentions based on risk assessment and identified opportunities. 1.3 Consider capacity to complete action effectively prior to commencement and assess alternative actions for viability. 1.4 Identify situations requiring assistance and request support.
2. Use NUSD techniques	2.1 Select NUSD techniques to ensure protection of self and efficient completion of movement. 2.2 Apply techniques in accordance with use of force guidelines. 2.3 Carry hand restraints in a secure, protected and accessible position for safe deployment. 2.4 Present and apply hand restraints using recognised techniques in accordance with use of force guidelines and legal requirements. 2.5 Compare sufficiency of response against identified opportunities constantly.
3. Contain the incident	3.1 Adjust response with changing circumstances in accordance with use of force guidelines and tactical options model. 3.2 Detain, handle and search people within the limits of legal requirements. 3.3 Provide care and protection to detainees. 3.4 Reassess situation to determine and request support requirements
4. Evaluate response	4.1 Evaluate and review effectiveness of response in a debrief. 4.2 Provide feedback to participants and supervisors based on accurate and constructive observations of incidents in order to optimise future performance. 4.3 Comply with systems, records and reporting procedures. 4.4 Identify and manage effects of stress using recognised stress management techniques.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading NA					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCM201B Apply non-lethal unarmed self-defence techniques.

Assessment Requirements for DEFMIL137 Apply non-lethal unarmed self-defence techniques

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying basic problem solving strategies
- applying first aid
- applying legislative and/or legal provisions including provisions governing the use of force, reactive force, misuse of force, proactive force, the duty of care under criminal, civil and international law.
- applying observation techniques
- communicating and negotiating under stressful situations
- interpreting instructions to facilitate solutions within operating parameters
- following instructions and reporting information
- recording and reporting information accurately
- interpreting and complying with legal and procedural requirements
- applying and terminating force
- applying control techniques that ensure continued protection of self and others and efficient completion of the movement
- applying the most appropriate NUSD techniques to counter the threat
- identifying current and potential risk factors and their impact on the incident/situation
- providing warnings and clear instructions/directions to a person/s posing a threat
- selecting response options within specified legal and statutory limits that most effectively meet the objective in accordance with the tactical options model
- recognising and managing stress

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- appropriate force according to threat
- defensive strike techniques that target or avoid vital areas of the body
- response options
- the tactical options model
- body dynamics and the affect of force on the body
- composition of teams and roles and responsibilities of team members
- current and potential risk factors and their impact on the incident/situation
- defence policies and procedures relating to the use of NUSD techniques
- legislative and/or legal provisions including provisions governing the use of force, reactive force, misuse of force, proactive force, the duty of care under criminal, civil and international law.
- powers of arrest and procedures for handling and handing over PWs and detainees
- response options within specified legal and strategic limits
- stress management techniques

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL138 Supervise a section during defensive operations

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM133 Supervise a section during defensive operations.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.6, 2.2, 2.6 and 2.7 removed • PC 3.5 reworded

Application

This unit describes the skills required to command, lead and manage groups of up to twelve personnel during defensive operations. Defensive operations are characterised by extreme environmental conditions with high levels of risk of serious injury or death from hostile action. Supervision during defensive operations requires supervisors to be incisive in a fluid and demanding environment, to act independently, and to lead by example.

This unit applies to combat arms personnel involved in the conduct of defensive operations in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work as part of a team under direct and/or indirect supervision, but also must be prepared to act independently. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

DEFMIL140 Supervise platoon level defensive operations

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM109B Supervise platoon level defensive operations.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.6, 2.2, 2.6 and 2.7 removed • PC 3.5 reworded

Application

This unit describes the skills required to command, lead and administer groups of between 15 and 35 personnel during the conduct of defensive operations. Defensive operations are characterised by own forces delaying, accepting decisive engagement or withdrawing from action against hostile forces. It is primarily focused on the duties of a platoon second in command who, while mainly employed to administer the group, may be required to supervise group members in a dynamic environment, often acting independently and leading by example.

This unit applies to combat arms personnel involved in the conduct of defensive operations in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work as part of a team under direct and/or indirect supervision, but also must be prepared to act independently. DEFMIL141 Supervise platoon level offensive operations

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCM110B Supervise platoon level offensive operations.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.6, 2.2, 2.6 and 2.7 removed • PC 3.5 reworded

Application

This unit describes the skills required to administer, lead and command groups of between 15 and 35 personnel under extreme conditions in high risk environments. Offensive operations are characterised by rapid shifts of the main effort to take advantage of opportunities and momentum to defeat hostile forces through the capture or destruction of critical objectives. It is primarily focused on the duties of a platoon second in command who, while mainly employed to administer the platoon, may be required to supervise the group in a dynamic environment, often acting independently, and leading by example.

This unit applies to combat arms personnel involved in the conduct of offensive operations in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work as part of a team under direct and/or indirect supervision, but also must be prepared to act independently. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for DEFMIL141 Supervise platoon level offensive operations

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying administrative requirements
- applying recognised safety precautions
- applying the principles of command
- controlling risk
- employing equipment tactically
- employing weapons tactically
- managing resources
- navigating
- preparing reports
- resupplying and redistributing supplies

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- administrative processes
- employment of battlespace operating systems
- employment of weapons and equipment
- Individual Military Appreciation Process
- laws of Armed Conflict
- navigation techniques

- offensive tactics, techniques and procedures
- orders for Opening Fire
- orders for the Use of Force
- principles of offensive operations
- recognised safety precautions
- risk control processes
- Rules of Engagement
- tactics, techniques and procedures

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFRNG001 Provide technical advice on ranges and training areas

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFRM101B Provide technical advice on ranges and training areas.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • Elements 2 and 3 reworded • All PC in elements 2 and 3 revised

Application

This unit describes the skills required to provide technical advice related to ranges and training areas.

This unit was developed for Defence personnel who work in range management and range control but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under indirect supervision while performing complex tasks, in a small range of familiar contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Range

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify and analyse the issue(s)	1.1 Observe, receive and clarify the circumstances that require the provision of advice. 1.2 Identify and confirm issues via consultation with relevant personnel. 1.3 Analyse the circumstances and interpret the issues. 1.4 Conduct research related to the issues and clarify unclear findings with relevant personnel.
2. Formulate options	2.1 Identify and evaluate options related to the provision of advice. 2.2 Prioritise options and select the preferred option.
3. Provide advice	3.1 Formulate advice and discuss with stakeholders. 3.2 Negotiate, incorporate and document stakeholder requirements within the proposed advice. 3.3 Provide concluding advice within the specified time and budget.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning N/A					Reading					Writing					Oral communication					Numeracy				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFRM101B Provide technical advice on ranges and training areas.

DEFRNG003 Approve training area and range activities

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFRM202B Approve training area and range activities.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to analyse proposed range and training area activities, including the management of a booking system, reading and interpreting traces and templates and promulgating activities.

This unit was developed for Defence personnel who work in range management and range control but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, under indirect supervision, while performing routine tasks, in a variety of different contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Range

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Conduct booking/ confirmation of conferences	1.1 Promulgate and organise booking the conferences in accordance with Range Standing Orders. 1.2 Identify and resolve booking conflicts. 1.3 Process supplementary bids in accordance with Range Standing Orders.
2. Confirm range instructions conform to Range Standing Orders	2.1 Confirm the authority for weapons and ammunition to be fired on the requested range. 2.2 Conduct gross error checks on traces and templates. 2.3 Confirm contingency plans and safety requirements.
3. Ensure activities are safe and deconflicted	3.1 Identify and resolve conflict between separate activities on the range. 3.2 Coordinate activity phases to ensure there is no conflict between phases. 3.3 Appoint a Director of Practice where more than one activity is being conducted concurrently on the range.
4. Brief stakeholders	4.1 Brief stakeholders on training area and range activities in accordance with Range Standing Orders. 4.2 Raise and forward notifications in accordance with Range Standing Orders as required.
5. Approve and record use of training area and/or activity	5.1 Sign authorised traces and templates in accordance with Range Standing Orders. 5.2 Notify applicant units and authorities in accordance with Range Standing Orders. 5.3 Record activities in accordance with Range Standing Orders.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

DEFRNG005 Manage emergency operations

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFRM205B Manage emergency operations.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC added in element 1 • PC 3.1 revised • PC 3.2 and 3.3 merged • PC 5.1 and 5.2 merged and revised

Application

This unit describes the skills required to plan, prepare and manage emergency operations in a training area or a range.

This unit was developed for Defence personnel who work in range management and range control but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, while performing specific tasks, in mostly unpredictable contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Range

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for operations	1.1 Obtain operational information to conduct an accurate assessment of the problem. 1.2 Identify hazards. 1.3 Activate operational plans.
2. Manage an operations centre	2.1 Allocate operations centre tasks and conduct briefings. 2.2 Activate and maintain internal and external liaison networks. 2.3 Supervise operations centre staff. 2.4 Manage physical and financial resources.
3. Manage operational information	3.1 Organise operation centre staff to collect and collate information. 3.2 Manage information flow, analyse information and update plans. 3.3 Raise and distribute regular situation reports. 3.4 Establish radio and allied communication nets. 3.5 Implement and maintain message and information management systems to provide accurate operational records.
4. Make operational decisions	4.1 Identify the extent of the operational area. 4.2 Identify, assess and implement operational strategies in accordance with local emergency management arrangements and standard operating procedures. 4.3 Identify and prioritise hazards to ensure that the response is appropriate to the type and scale of the event. 4.4 Terminate the operation.
5. Manage post operation activities	5.1 Conduct post-operation debriefing and prepare operation reports. 5.2 Review training and operational planning to enhance future operations.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- conducting regular briefings and debriefings
- establishing an improvised operations centre
- establishing an operational plan and adapting the plan as circumstances change
- identifying operational areas of concern
- managing communications within and between teams and organisations
- planning for emergency response, including the setting up of appropriate control and coordination structures
- raising regular situation reports
- reading and understanding organisations policies and procedures

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- communication equipment and systems
- composition of teams and roles and responsibilities of team members
- emergency plans
- local alert and warning systems
- local documentation requirements
- local operating procedures

- local operational briefing and debriefing procedures
- locally available resources, their capabilities and access to them
- nature of local hazards and plans, including effects on the provision of communications
- principles of risk management
- relevant WHS and regulatory requirements
- team work principles and strategies
- written communication to a level required to complete workplace documentation and reports

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFRNG006 Conduct range inspections

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFRM206B Conduct range inspections.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 2.1 revised • PC 2.2 and 3.4 removed • PC 2.3 and 3.4 merged

Application

This unit describes the skills required to plan, prepare, conduct and follow up on a range inspection. It includes the requirement to ensure the safety of the range and to identify those aspects that may inhibit or jeopardise the safety of the range including maintenance requirements.

This unit was developed for Defence personnel who work in range management and range control but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under indirect supervision, while performing routine tasks, in a small range of familiar contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Range

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to conduct range inspection	1.1 Establish and confirm statutory requirements relevant to the range and purpose of the inspection with relevant personnel. 1.2 Obtain clearances for training area and range access. 1.3 Identify and acquire resources required for inspection. 1.4 Conduct inspection of research on the range. 1.5 Establish detailed plans for the inspection.
2. Conduct range inspection	2.1 Conduct range inspections. 2.2 Record observations and apply immediate action when appropriate. 2.3 Establish and maintain relationships with range staff.
3. Report on range inspection	3.1 Complete post inspection reports and briefs. 3.2 Report safety issues related to equipment and infrastructure maintenance and/or works requirements and follow-up. 3.3 Certify the safety of the range in accordance with statutory requirements. 3.4 Maintain inspection records and databases.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFRM206B Conduct range inspections.

Assessment Requirements for DEFRNG006 Conduct range inspections

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying environmental issues relevant to the training area
- exercising judgement in relation to range safety
- interpreting and applying range safety requirements
- interpreting range specifications and construction requirements
- interpreting range user requirements
- interpreting weapon and ammunition specifications and effects
- operating digital cameras and process images
- operating geographical information systems
- operating range communication facilities
- operating specialist measuring instruments
- performing elementary surveying tasks
- planning and preparing the conduct of the range inspection
- researching the range
- inspecting the range
- preparing and presenting relevant inspection reports

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- application of ammunition danger area traces and templates
- communications
- composition of teams and roles and responsibility of team members
- elementary surveying
- environmental issues relevant to the range
- geographical information systems
- map reading
- navigation techniques
- photography
- planning processes
- principles of teamwork and team aims and objectives
- range safety requirements
- range specifications and construction
- range user requirements for all services
- reporting requirements
- trigonometry
- weapon and ammunition specifications and effects

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFRNG007 Conduct training area inspections

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFRM207B Conduct training area inspections.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 3.5 removed

Application

This unit describes the skills required to conduct a formal inspection of a training area. It includes the planning, preparation, conduct and follow up action.

This unit was developed for Defence personnel who work in range management and range control but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, while performing complex tasks, in a small range of familiar contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Range

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to conduct training area/range inspection	1.1 Establish and confirm statutory requirements relevant to the range, training area and purpose of the inspection with relevant personnel. 1.2 Conduct briefings for users, staff and contractors. 1.3 Obtain clearances for training area access. 1.4 Identify and acquire resources required for inspection.
2. Conduct training area/range inspection	2.1 Undertake inspections in accordance with Range Standing Orders and instructions. 2.2 Apply safety precautions in accordance with Range Standing Orders, instructions and legislation/regulation. 2.3 Apply immediate appropriate action where conditions warranting such action are observed or encountered. 2.4 Check, record and report equipment and infrastructure serviceability according to Range Standing Orders, instructions, manuals and standards.
3. Report on training area/range inspection	3.1 Complete post inspection reports and briefs according to relevant standing orders, instructions and regulation. 3.2 Complete training area contamination records, reports and briefs. 3.3 Initiate equipment and infrastructure maintenance and/or refurbishment. 3.4 Provide briefs to users and other agencies and contractors on serviceability of equipment and infrastructure.
4. Maintain training records	4.1 Complete inspection records. 4.2 Complete contamination plots, charts and records according to relevant standing orders, instructions, policy and procedures.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

DEFRNG008 Manage training area and range contamination

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFRM208B Manage training area and range contamination.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to locate, identify, isolate and establish safety parameters for contaminants and contamination on training areas and ranges.

This unit was developed for Defence personnel who work in range management and range control but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit work independently or as part of a team, under indirect supervision, while performing complex tasks, in a moderate range of familiar contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Range

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for the location and identification of contaminants	1.1 Analyse post activity reports and other incident or activity reports for probable contamination and its location. 1.2 Identify on maps probable location(s) of contaminant(s). 1.3 Identify and acquire resources for location/marketing of the contaminant. 1.4 Establish plans for searches, confirmation and marking of contaminant.
2. Confirm locality and identity of contaminants	2.1 Conduct searches for contaminant. 2.2 Identify and mark contaminant on maps, charts and documentation.
3. Isolate and determine safety parameters and/or disposal or clearance action	3.1 Evaluate options and decisions on safety measures, exclusion zones and/or disposal or clearance and action. 3.2 Identify and establish contaminant exclusion zones. 3.3 Record contaminant(s) in relevant logs. 3.4 Prioritise action. 3.5 Arrange destruction/clearances.
4. Notify users and/or authorities of contaminants	4.1 Amend briefs for training area/range to reflect status of contaminant. 4.2 Prepare and issue warnings.
5. Monitor and review training area status	5.1 Negotiate revised activity plans and bookings. 5.2 Lift, remove or provide waiver restrictions.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables

DEFRNG009 Supervise contractors

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFRM209B Supervise contractors.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to supervise contractors working on a training area or a range. The focus of the monitoring role of range managers and range control officers, with contractors and contractor staff, is the continued safety and security of training area and range activities, infrastructure and facilities. They do not provide technical supervision or advice, but act as a local point of contact for works contracts and other professional/para-professional activities that may be carried out from time to time.

This unit was developed for Defence personnel who work in range management and range control but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, while performing complex tasks, in a small range of familiar contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Range

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for the monitoring and supervision of contractors	1.1 Obtain, interpret and clarify monitoring requirements in the form of management information system reports, work orders and contracts before commencing. 1.2 Identify, access, interpret and apply policies and procedures for all relevant WHS standards, statutory requirements, Range Standing Orders and other instructions. 1.3 Identify and obtain the details of the contractual requirements. 1.4 Identify and confirm training area and range access requirements.
2. Monitor and supervise contractor activities	2.1 Assess current user activities and contractor requirements. 2.2 Prepare and deliver briefings. 2.3 Determine the activity priorities. 2.4 Monitor and/or conduct supervision of contractors. 2.5 Conduct corrective action in accordance with contractual requirements. 2.6 Conduct ongoing checks on the service/activity in accordance with directions from contract manager.
3. Complete monitoring and supervision records	3.1 Complete and maintain monitoring/supervision records. 3.2 Identify and report key information relevant to the contractor activity in accordance with the relevant contract requirements and Range Standing Orders.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

Assessment Requirements for DEFRNG010 Monitor and implement environmental plans and procedures

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- accessing, interpreting and applying relevant legislation and standard operating procedures
- applying control procedures to environmental risks and incidents
- applying environmental plans and procedures
- developing local area environmental procedures
- identifying environmental risk and impacts
- monitoring specific activities
- reporting and recording environmental procedures
- maintaining environmental management documentation

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- consultation procedures
- control procedures for environmental risks and incidents
- electronic or manual recording procedures
- endangered species and habitat protection
- environmental impact assessment
- environmental plans and procedures

- identification of risks and impacts
- incident management procedures
- monitoring procedures
- potential environmental auditing
- principles of environmental protection
- rare and endangered plants
- relevant legislative requirements
- reporting procedures
- risk assessment procedures
- sedimentation and erosion control

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFRNG011 Site range complexes

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFRM211B Site range complexes.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to site range complexes as a member of a Range Siting Board. It includes the processes of siting individual ranges or a group of ranges as part of a range complex ensuring the efficient utilisation of land and the safety requirements related to the use of weapons and ammunition.

This unit was developed for Defence personnel who work in range management and range control but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team under indirect supervision, while performing complex tasks, in a range of familiar contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Range

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to site range complexes	1.1 Confirm appointment to the Range Siting Board. 1.2 Identify and research range user requirement. 1.3 Identify and acquire resources required for the Range Siting Board. 1.4 Establish and maintain contact with other board members.
2. Site range complexes	2.1 Develop options to meet the user requirement in accordance with Range Siting Board requirements. 2.2 Undertake reconnaissance of proposed and alternate range site in accordance with Range Siting Board requirements. 2.3 Assess proposed and alternate sites. 2.4 Provide technical advice to guide Range Siting Board members in their considerations. 2.5 Select the best option in consultation with Range Siting Board members.
3. Finalise Range Siting Board reports	3.1 Produce range development and works proposals in accordance with the Range Siting Board terms of reference. 3.2 Adjust and finalise proposed range templates and traces. 3.3 Contribute to final report in accordance with Range Siting Board requirements. 3.4 Finalise range inspector's report and submit to Range Siting Board.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFRM211B Site range complexes.

Assessment Requirements for DEFRNG011 Site range complexes

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying environmental issues relevant to ranges
- using liaison techniques
- exercising judgement in relation to range safety
- interpreting and applying range safety requirements
- interpreting range specifications and construction requirements
- interpreting range user requirements
- interpreting weapon and ammunition specifications and effects

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- application of ammunition danger area traces and templates
- composition of teams and roles and responsibilities of team members
- environmental issues relevant to ranges
- geographical information systems
- map reading and navigation techniques
- planning processes
- range safety requirements
- range specifications and construction
- reporting requirements

- team work and collaboration processes
- techniques for supporting others/team members
- weapon and ammunition specifications and effects
- works proposal processes

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFRNG012 Manage training areas and ranges

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFRM212A Manage training areas and ranges.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to manage Defence training areas and ranges. Defence training areas and ranges are areas prescribed for the conduct of Defence activities and exercises. Their management is a process requiring a range of functions including the management of the activities being conducted on these training areas and ranges, the security of facilities and personnel, the investigation of incidents and accidents, and the maintenance and upgrading of the facilities.

This unit was developed for Defence personnel who work in range management and range control but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, while performing complex tasks in a moderate range of familiar contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Range

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Manage training area and range activities	1.1 Identify the responsibilities associated with the management of training area and range activities. 1.2 Identify and implement plans and instructions for the efficient operation of the training area/range. 1.3 Identify resources and report shortfalls. 1.4 Identify stakeholders and forward relevant information to them. 1.5 Control and coordinate training area and range activities to ensure safe and sustainable operations.
2. Manage training area and range security	2.1 Identify security processes, procedures and plans. 2.2 Promulgate, monitor and adjust access, egress and circulate changes. 2.3 Identify and report unauthorised access and security breaches.
3. Facilitate investigations	3.1 Identify and report incidents and accidents. 3.2 Conduct investigations. 3.3 Implement recommendations for changes to policy and procedures resulting from investigations.
4. Monitor and maintain training area and range facilities	4.1 Monitor training area and range facilities. 4.2 Identify and report maintenance requirements. 4.3 Identify and report facility improvements and upgrades.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				
Performance variables																								
1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity									

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFRM212A Manage training areas and ranges.

Assessment Requirements for DEFRNG012 Manage training areas and ranges

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- accessing interpreting and applying Range Standing Orders and other instructions and policy
- liaising and negotiating
- developing, implementing and modifying plans
- directing and controlling all aspects of range management
- exercising Defence regulations relevant to Defence practice areas
- exercising tact and judgement in a command and control environment
- interpreting and applying technical information
- reading and understanding technical specifications, maps, diagrams, traces
- representing mathematical ideas in appropriate format
- solving problems and making decisions
- managing training area and range security
- monitoring and maintaining training areas and ranges

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- communications equipment and systems
- composition of teams and roles and responsibilities of team members

- Defence practice areas (DPA) – areas of land, sea or air declared for the purpose of conducting Defence operations or practices under Defence Force Regulations (DFR) Part XI, by the Minister for Defence and notified in the Commonwealth of Australia Gazette
- local alert and warning systems
- locally available resources, their capabilities and access to them
- nature of local hazards and plans, including effects on the provision of communications
- principles of risk assessment and risk management
- range danger area traces
- Range Standing Orders, instructions, clearance certificates and standard operating procedures (SOP) relevant policies, publications, legislation and regulations
- team work principles and strategies
- weapons/systems characteristics

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSEA001 Assist in seamanship operations

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFBM001C Assist in seamanship operations.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • Element 3 reworded • PC 2.2 removed

Application

This unit describes the skills required to assist in a range of seamanship operations. It covers specific skills and knowledge such as general rigging and load shifting, towing, buoy attachment, berthing and slipping, equipment recovery, sea boat operations, man overboard recovery, replenishment at sea and ladder and brow deployment.

This unit would be typically implemented in a Naval Defence environment but is applicable to any individual in this field of work. Tasks are carried out on a ship in a range of conditions that would typically apply to a lengthy operation, while minimising or eliminating environmental stresses and hazards, risk to personnel, vessel and the environment, and preserving individual safety.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would generally perform routine tasks as part of a team and under indirect supervision. They would need to be prepared for a wide of range of contexts that could be unfamiliar and highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Maritime Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to assist in seamanship operation	1.1 Record and receive operation briefing. 1.2 Identify and select equipment for the operation based on information as directed by the supervisor. 1.3 Identify and note hazards and risks associated with the specific operation. 1.4 Select and wear personal protective equipment based on the nature of the operation.
2. Assist in seamanship operations	2.1 Identify and confirm position within the team and location for the operation. 2.2 Tie and apply knots, bends, splices, whippings and hitches. 2.3 Prepare and handle lines and hardware. 2.4 Communicate during operations using the correct communications equipment. 2.5 Identify and act upon operational hazards. 2.6 Follow shipboard emergency and contingency plans in the event of a failure or emergency associated with the operation and equipment.
3. Finalise seamanship operations	3.1 Recover, clean and maintain equipment. 3.2 Re-stow equipment to maintain operational readiness. 3.3 Attend operational debriefing and provide feedback. 3.4 Complete competency log and work history sheet.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading					Writing					Oral communication					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFBM001C Assist in seamanship operations.

DEFSEA002 Assist in boarding operations

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFBM002C Assist in boarding operations.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • Element 5 reworded • PC 1.1, 3.2, 3.3 and 3.5 revised • PC 2.1 and 2.2; PC 4.3 and 4.4 merged • PC 2.4 removed

Application

This unit describes the skills required to board and secure a vessel and search personnel and property.

This unit would be typically implemented in a Naval Defence environment but is applicable to any individual in this field of work. Tasks are carried out on a ship in a range of conditions that would typically apply to a lengthy operation, while minimising or eliminating environmental stresses and hazards, risk to personnel, vessel and the environment, and preserving individual safety.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act in a broad range of contexts that could be highly unpredictable, under indirect supervision, as part of a team, while performing routine tasks that can involve less-familiar steps.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Maritime Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to board vessel	1.1 Receive and acknowledge a pre-boarding briefing. 1.2 Identify and acknowledge vessel type and environmental factors to determine method of insertion. 1.3 Establish and acknowledge roles and responsibilities of team members. 1.4 Obtain and check dress and equipment for serviceability. 1.5 Acknowledge method of insertion. 1.6 Receive and acknowledge position of insertion point.
2. Board vessel	2.1 Conduct boarding operation using dress and equipment while taking appropriate action to protect personnel and equipment. 2.2 Maintain communication throughout the operation.
3. Secure vessel	3.1 Secure insertion point and access routes. 3.2 Clear vessel for personnel. 3.3 Gather and isolate crew. 3.4 Identify master, secure bridge and obtain applicable documents. 3.5 Assess situation and adjust or discontinue response with changing circumstances. 3.6 Identify situations requiring assistance and request support.
4. Search vessel and personnel	4.1 Establish need to undertake search of personnel and property. 4.2 Explain reason for search to vessel master and personnel involved. 4.3 Conduct search of both property and personnel. When searching personnel it must be conducted at appropriate locations and, where possible, by persons of the same gender, according to specific legislation. 4.4 Identify and record illegal cargo, personal items and activities. 4.5 Gather and record physical evidence.

5. Finalise boarding operations	<p>5.1 Disembark vessel.</p> <p>5.2 Maintain and stow dress and equipment.</p> <p>5.3 Attend and participate in boarding debrief.</p> <p>5.4 Complete post-boarding reports.</p>
--	--

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy N/A

Assessment Requirements for DEFSEA002 Assist in boarding operations

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying observation and surveillance techniques
- communicating and negotiating under stressful situations
- minimising threat to self and others by use of appropriate force
- recording and reporting information accurately according to legal and international law
- using active listening skills in communication with colleagues and personnel
- responding to directions

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- composition of teams, and roles and responsibilities of team members
- differing cultural and social practices
- legislative and/or legal provisions, including provisions governing the use of force, reactive force, misuse of force, proactive force and the duty of care under criminal, civil and international law
- powers and procedures for effecting arrest
- search techniques for both persons and property
- teamwork principles and strategies

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSEA003 Control persons using non-firearms options

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFBM003C Control persons using non firearms options.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • Elements 2 and 3 merged • All PC in elements 2 & 3 revised • PC 4.1 and 4.2 merged

Application

This unit describes the skills required to select and deploy appropriate techniques and/or equipment to control persons in an operational situation.

This competency typically applies to a Naval Defence environment and was developed for boatswain's mates but is applicable to any individual in this field of work. Tasks are carried out on a ship in a range of conditions that would typically apply to a lengthy operation, while minimising or eliminating environmental stresses and hazards, risk to personnel, vessel and the environment, and preserving individual safety.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would generally perform routine tasks as part of a team and under indirect supervision. They would need to be prepared for a wide of range of contexts that could be unfamiliar and highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Maritime Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Assess the need to use empty hand techniques, hand restraints and/or baton	1.1 Evaluate situation and determine most appropriate equipment and control technique. 1.2 Evaluate risk factors and determine person's intentions. 1.3 Assess capacity to complete action prior to commencement and assess viability of alternative actions. 1.4 Identify situations requiring assistance and request support.
2. Contain incident	2.1 Carry baton and hand restraints in a secure, protected and accessible position for safe deployment. 2.2 Select appropriate techniques to ensure protection of self and efficient completion of movement. 2.3 Apply appropriate techniques (empty hand, hand restraints, baton). 2.4 Assess sufficiency of response and need for support. 2.5 Adjust or discontinue response with changing circumstances. 2.6 Detain persons.
3. Evaluate response	3.1 Review, debrief and evaluate effectiveness of response by providing observations of the incident. 3.2 Maintain system, records and reporting procedures. 3.3 Recognise effects of stress on self and use stress management techniques to diffuse.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFBM003C Control persons using non firearms options.

Assessment Requirements for DEFSEA003 Control persons using non-firearms options

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying basic problem solving strategies
- applying observation techniques
- recording and reporting information
- minimising threat to self and others by using appropriate force using force principles and defensive techniques
- managing and selecting response options within specified legal and strategic requirements
- assessing situations and readjusting or discontinuing the response as determined by unexpected changes in circumstances
- handling of batons and hand restraints to ensure retention and continued control

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- legislative and/or legal provisions governing:
 - use of force (reactive, proactive)
 - misuse of force
 - duty of care under criminal, civil and international law
- response options that are most effective for the objective, within specified legal and strategic limits

•

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSEA004 Defend persons using firearms

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFBM004C Defend persons using firearms.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.1 and 1.2 merged and PC 5.1 and 5.2 merged • All PC in element 2 revised • PC added to element 3 • PC 4.4 removed • PC 4.3 revised

Application

This unit describes the skills and evaluates the requirements to deploy firearms effectively to protect persons in an operational situation, minimising risk to self and others. This includes justifying judgements about use of firearms.

This unit was written for a Naval Defence environment but is applicable to any individual in this field of work. Tasks are carried out on a ship in a range of conditions that would typically apply to a lengthy operation, while minimising or eliminating environmental stresses and hazards, risk to personnel, vessel and the environment, and preserving individual safety.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would generally perform routine tasks as part of a team and under indirect supervision. They would need to be prepared for a wide of range of contexts that could be unfamiliar and highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Maritime Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Perform pre-operational checks	1.1 Perform firearm checks by drawing, inspecting and proofing weapon. 1.2 Issue ammunition. 1.3 Receive and acknowledge an operational brief.
2. Assess the need to use firearms	2.1 Evaluate use of firearm against Use of force guidelines, legal requirements and organisational policy and procedures. 2.2 Determine person's intentions by assessing risk factors and opportunities. 2.3 Consider capacity to complete action prior to commencement and assess viability of alternative actions.
3. Use firearms	3.1 Identify situations requiring assistance and request support. 3.2 Secure, protect and provide access to firearm carriage. 3.3 Maintain tactical positioning consistent with the assessment of person's intentions and anticipated range of possible actions. 3.4 Maintain weapons. 3.5 Justify judgements on the use of firearms. 3.6 Select ammunition. 3.7 Select protective equipment. 3.8 Discharge firearm only to stop the progress of life-threatening situations.
4. Contain incident	4.1 Adjust or discontinue response with changing circumstances. 4.2 Confirm resolution and isolation of threat by constantly monitoring person's positions and behaviour. 4.3 Detain persons.

	4.4 Monitor and provide adequate aftercare to persons injured by firearms discharge.
5. Evaluate response	5.1 Review and evaluate effectiveness of response by providing observations of the incident. 5.2 Maintain system, records and reporting procedures. 5.3 Recognise effects of stress on self and use stress management techniques to diffuse.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFBM004C Defend persons using firearms.

Assessment Requirements for DEFSEA004 Defend persons using firearms

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying basic problem solving strategies
- applying legislative and/or legal provisions, including provisions governing the use of force, reactive force, misuse of force, proactive force and the duty of care under criminal, civil and international law
- applying observation and surveillance techniques
- communicating and negotiating under stressful situations using a variety of verbal and non-verbal communication techniques
- following and interpreting instructions to facilitate solutions within operating parameters and handling and firing weapons accurately
- minimising threat to self and others by use of appropriate force applying use of force principles
- managing own stress and aggression under duress
- selecting response options within specified legal and strategic requirements
- assessing the situation and readjusting or discontinuing the response as determined by unexpected changes in circumstances

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- legislative and/or legal provisions, including provisions governing the use of force, reactive force, misuse of force, proactive force and the duty of care under criminal, civil and international law
- organisational policy and procedures relating to the use of firearms, incident management and effecting arrest

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSEA005 Maintain weapons and associated equipment

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFBM005C Maintain weapons and associated equipment.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.2 removed • PC added in element 2

Application

This unit describes the skills required to plan and conduct operational maintenance and to store weapons and associated equipment.

This unit would be typically implemented in a Naval Defence environment but is applicable to any individual in this field of work. Tasks are carried out on a ship in a range of conditions that would typically apply to a lengthy operation, while minimising or eliminating environmental stresses and hazards, risk to personnel, vessel and the environment, and preserving individual safety.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would generally perform routine tasks as part of a team and under supervision in a routine context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Maritime Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan for weapons and associated equipment maintenance	1.1 Obtain and confirm maintenance task requirements with supervisor. 1.2 Select and wear appropriate personal protective equipment. 1.3 Identify and obtain maintenance manual, plan and schedule. 1.4 Interpret and follow maintenance procedures.
2. Assess weapons and associated equipment serviceability	2.1 Check safe weapons and associated equipment. 2.2 Disassemble weapons and associated equipment. 2.3 Clean weapon. 2.4 Assess serviceability of weapons and associated equipment. 2.5 Identify defects. 2.6 Prepare weapons and associated equipment assessed unserviceable beyond operational repair facilities for return. 2.7 Select and check applicable test equipment and tools for serviceability. 2.8 Secure weapons and associated equipment.
3. Record maintenance	3.1 Raise defect reports and forward them to the appropriate authority. 3.2 Record maintenance.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading					Writing					Oral communication					Numeracy N/A				

Performance variables

DEFSEA006 Track and engage targets

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFBM006C Track and engage targets.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • Element 1 and 2 merged • PC 3.1 and 3.2 merged and PC 3.3 and 3.4 merged

Application

This unit covers the competency required to track and engage targets, and to maintain a tactical lookout during naval operations.

This unit would be typically implemented in a Naval Defence environment but is applicable to any individual in this field of work. Tasks are carried out on a ship in a range of conditions that would typically apply to a lengthy operation, while minimising or eliminating environmental stresses and hazards, risk to personnel, vessel and the environment, and preserving individual safety.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act in a broad range of contexts that could be highly unpredictable, under indirect supervision, as part of a team, while performing routine tasks that can involve less-familiar steps.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Maritime Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Search/track designated sector using tracking equipment	1.1 Test, clean and maintain lookout and tracking equipment. 1.2 Acknowledge orders from attended briefing. 1.3 Identify and record designated sector. 1.4 Select, use and operate tracking equipment. 1.5 Search designated sector. 1.6 Identify and confirm potential threats/targets. 1.7 Maintain target track. 1.8 Report target. 1.9 Update target information.
2. Engage target	2.1 Select required ammunition type and load weapon (close range or medium range). 2.2 Receive and acknowledge orders and engage target. 2.3 Report on target and weapon state to command.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading N/A					Writing					Oral communication					Numeracy N/A

Assessment Requirements for DEFSEA009 Operate a visual target designation system

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- using correct voice and reporting
- following instructions and responding to directions
- using cleaning equipment

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- gunnery terminology

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSEN001 Operate a radar system

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFSO001C Operate a radar system.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.1 removed • PC 1.4 revised • PC 2.1 and 2.2 merged

Application

This unit describes the skills required to operate a radar system. It includes the requirement to configure the system, build and maintain the collection, and collate and analyse information to track existing contacts or identify new contacts. This activity could continue for a prolonged period, requiring the operator to hand over effectively to another operator.

This unit was developed for Sensor Operators working within Defence but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team, under supervision, while performing routine tasks in a broad range of contexts and environments. They use discretion and judgement and take responsibility for the quality of their output.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Sensor Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Configure radar system	1.1 Confirm serviceability of radar system, recognise and report any fault. 1.2 Optimise radar display for operator use. 1.3 Optimise system in line with the environmental conditions. 1.4 Establish internal and external communications.
2. Compile and maintain an electronic picture	2.1 Identify and discriminate radar contacts by collecting, collating and analysing information. 2.2 Use radar identification friend or foe (IFF) and other available sensors/sources to collect information. 2.3 Report, display and disseminate contact details to stakeholders. 2.4 Respond to threats. 2.5 Report problems or issues beyond own capability to supervisor.
3. Finalise operations	3.1 Cease radar system operation or transfer to new operator as directed by supervisor. 3.2 Secure and stow system. 3.3 Secure and stow documentation. 3.4 Report to supervisor on completion.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSO001C Operate a radar system.

Assessment Requirements for DEFSEN001 Operate a radar system

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- conducting daily system operability tests (DSOTs)
- detecting contacts via electronic means
- optimising operations room equipment
- using correct voice procedures
- using identification procedures
- identifying, tracking and reporting contacts over a minimum of one hour
- completing a minimum eight hours of radar systems operations using a manual or automated system
- working within one's delegated authority

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- basic principles and characteristics of radar
- cryptographic materials
- environmental prediction system
- external/internal communication techniques and voice procedures
- tactical data systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSEN006 Optimise and monitor sensor display

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFSO006A Optimise and monitor sensor display.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.1 removed

Application

This unit describes the skills required to optimise and monitor sensor displays. This includes setting up and applying settings to sensor display. It also includes monitoring the sensor display for irregularities and taking steps to return the sensor display to optimal performance.

This unit was developed for Sensor Operators working within Defence but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team, under supervision, while performing routine tasks in a broad range of contexts and environments. They use discretion and judgement and take responsibility for the quality of their output.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Sensor Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Set up sensor display	1.1 Set up tactical display in accordance with required function and shift supervisor tasking. 1.2 Access and display tactical information. 1.3 Set up sensor display and build tactical picture using operational data from other sources.
2. Apply settings to sensor display	2.1 Select and set appropriate range scale. 2.2 Select and display sensor video to support the compilation of the tactical picture. 2.3 Prepare IFF system equipment to support the compilation of the tactical picture. 2.4 Perform sensor index error checks.
3. Monitor sensor performance and respond to sensor degradation	3.1 Monitor sensors for degradation and recommend rectification action to shift supervisor. 3.2 Liaise with other sensor operators to achieve optimum sensor performance. 3.3 Recognise and respond to sensor alarms.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSO006A Optimise and monitor sensor display.

Assessment Requirements for DEFSEN006 Optimise and monitor sensor display

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying and responding to degradation in sensor display
- communicating with operations room personnel
- receiving and interpreting instructions
- operating sensor display settings based on tasking and required function
- applying settings to sensor display in accordance with the requirements of the intended function
- optimising and monitoring a sensor display

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- IFF system operation and settings
- operational data relevant to required function
- procedure for sensor index error checks
- requirements of a tactical display over the range of functions
- roles and responsibilities of other sensor operators
- selection criteria for sensor range scale
- sensor alarms and meaning
- tactical information relevant to required function

- theory of radar
- theory of sonar
- types of sensor degradation and effect on sensor

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSEN007 Provide general support to combat systems operations

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFSO007A Provide general support to combat systems operations.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • Element 5 removed • Elements 3 and 4 merged • PC 1.1 and 1.2 merged • PC 2.2 revised • PC 3.4 removed

Application

This unit describes the skills required to provide general support to combat systems operations. It includes administration support, preparing equipment for operations, processing and distributing information, and cleaning and securing operation room.

This unit was developed for Sensor Operators working within Defence but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team, under supervision, while performing routine tasks in a broad range of contexts and environments. They use discretion and judgement and take responsibility for the quality of their output.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Sensor Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Participate in workplace briefings	1.1 Record relevant information from the attended briefing and clarify as required. 1.2 Incorporate information or tasks into own duty performance.
2. Prepare and enable equipment for operation	2.1 Gather ancillary equipment and make it available. 2.2 Perform daily system operability tests. 2.3 Recognise and report equipment faults or defects. 2.4 Load operational data required to enable equipment function. 2.5 Confirm ability to communicate internally and externally with the operations room by checking communication links.
3. Process and distribute information to promote situational awareness	3.1 Receive and act upon tasks relating to the processing and distribution of information. 3.2 Gather and interpret relevant information. 3.3 Display and distribute relevant information. 3.4 Maintain currency of information in accordance with shift supervisor instructions. 3.5 Compile, maintain and distribute correspondence and official records.
4. Secure operations room in preparation for periods of inactivity	4.1 Close internal and external communications links. 4.2 Sanitise equipment to prevent loss of data or breach of security requirements. 4.3 Shut down and secure departmental equipment. 4.4 Recover, refurbish and store ancillary equipment ready for later use.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning					Reading					Writing					Oral communication					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSO007A Provide general support to combat systems operations.

Assessment Requirements for DEFSEN007 Provide general support to combat systems operations

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- complying with security requirements
- communicating with operations room personnel
- receiving and interpreting instructions
- maintaining a small equipment inventory
- preparing operations room equipment for function
- contributing to information management that promotes operations room situational awareness

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- operations room security and information support requirements within operations room
- scope and nature of general support tasks applicable to operations room environment
- use and application of operations room ancillary equipment

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSEN008 Support the compilation of the tactical picture

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEF50008A Support the compilation of the tactical picture.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • Element 2 reworded • PC 1.3 and 1.4 revised

Application

This unit covers the competency required to provide support to the compilation of a tactical picture. It includes operating a sensor display to display and allow interpretation of tactical information. It also includes monitoring the sensor display for irregularities and taking steps to return the sensor display to optimal performance.

This unit was developed for Sensor Operators working within Defence but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team, under supervision, while performing routine tasks in a broad range of contexts and environments. They use discretion and judgement and take responsibility for the quality of their output.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Sensor Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Detect and track contacts using sensors	1.1 Detect contacts by monitoring sensor display. 1.2 Analyse sensor returns to recognise valid contacts. 1.3 Track contacts. 1.4 Alert shift supervisor and other sensor operators of the contact by transmitting initial contact report. 1.5 Monitor tracking of contacts to ensure the validity of the track. 1.6 Perform manual tracking of contacts in the event of loss of automatic tracking of critical contacts.
2. Recognise contact	2.1 Classify contacts. 2.2 Assign identity of contacts to enable quick reference and identification by other sensor operators. 2.3 Transmit supplementary contact reports. 2.4 Recognise information from other sources and reclassify contact designated as ambiguous as required.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

DEFSIM001 Fault find and repair simulator power distribution and control systems

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

Application

This unit describes the skills required to conduct fault finding and repairs to the simulator power distribution and control systems. This includes analysing fault reports, identifying and rectifying faults, conducting functional tests and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

Power distribution systems include power distribution software interfaces, programmable logic controllers, uninterruptible power supplies and control systems, power distribution cabinets/units, circuit breakers, emergency power/communication systems, emergency stop circuits and fire protection systems.

Simulator control systems include DC low voltage supplies, DC high voltage supplies, AC low voltage supplies (less than 600VAC), uninterrupted power supplies and control systems, power distribution cabinets/units, hydraulic systems and electric systems.

This unit was developed in a Defence environment but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Competency Field

Simulator Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Receive and analyse fault report	1.1 Receive and analyse simulator power distribution and/or control system fault report. 1.2 Identify and select appropriate fault finding method(s) that will apply across the range of power distribution and control systems. 1.3 Prepare the simulator power distribution and/or control system for fault finding, including the isolation of all energy sources.
2. Identify and find fault	2.1 Apply fault finding method(s). 2.2 Identify and analyse fault indicators. 2.3 Identify the power distribution and/or control system fault. 2.4 Confirm that the fault is the one initially reported.
3. Repair fault	3.1 Identify and confirm cause of fault. 3.2 Identify and confirm repair method(s). 3.3 Complete power distribution and/or control systems repair. 3.4 Conduct post repair safety check. 3.5 Restart simulator power distribution and/or control system.
4. Conduct functional test	4.1 Test simulator power distribution and/or control systems to ensure operational integrity. 4.2 Confirm operational parameters.
5. Finalise repair process	5.1 Finalise simulator power distribution and/or control system repair reports including a detailed synopsis of the fault and the repair process and any certification requirements. 5.2 Report the operational status of the simulator power distribution and/or control system.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for DEFSIM001 Fault find and repair simulator power distribution and control systems

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking research and analysis related to simulator power distribution and control systems
- following logical complex fault finding techniques
- using measuring instruments such as megaohmmeters, multimeters, cathode ray oscilloscopes (CRO), 240-415v portable appliance testers, 240-415v phase angle meters and 240-415v clamp meters
- applying simulator power distribution and control systems repair methodologies
- following configuration management processes
- using appropriate information technology and software including general online diagnostic tools and proprietary simulator management databases
- identifying, reviewing and analysing information that may impact on the simulator power distribution and control systems fault finding
- conducting simulator power distribution and control systems functional testing
- negotiating and communicating with key stakeholders

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- operational capabilities and limitations of the relevant simulator
- operational capabilities and limitations of the relevant simulator power distribution and control systems
- simulator operating modules comprising the simulator system being worked on
- fault indicators related to the simulator power distribution and control systems being worked on

- repair methodologies related to the simulator power distribution and control systems being worked on
- legislative and regulatory requirements related to the simulator being worked on
- organisational policy and procedures related to the relevant simulator power distribution and control systems
- configuration management related to the simulator power distribution and control systems being worked on
- product knowledge related to systems and/or equipment in service

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSIM002 Fault find and repair simulator computer systems and peripheral hardware

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

Application

This unit describes the knowledge and skills required to conduct fault finding and repairs to the simulator computer systems and peripheral hardware. This includes analysing fault reports, identifying and rectifying faults, conducting functional tests and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

Computer systems include Generic Simulator Computer Systems (x86 and x64), host computers, input/output systems, visual computers and instructor operating systems of simulators.

Peripheral hardware includes instruments, visual display unit equipment, printers, hard drives and data storage devices, switches and routers.

This unit was developed in a Defence environment but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFSIM002 Fault find and repair simulator computer systems and peripheral hardware

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking research and analysis related to simulator computer systems and peripheral hardware
- following logical, complex fault finding techniques
- applying simulator computer systems and/or peripheral hardware repair methodologies
- following configuration management processes
- using appropriate information technology and software including at least one of:
 - general online diagnostic tools
 - proprietary simulator management databases
 - customer diagnostics software
 - burn in test software
 - image management software
 - file comparison software
- identifying, reviewing and analysing information that may impact on the simulator computer systems and peripheral hardware fault finding
- conducting simulator computer systems and peripheral hardware functional testing
- negotiating and communicating with key stakeholders

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- operational capabilities and limitations of the relevant simulator
- operational capabilities and limitations of the relevant simulator computer systems and peripheral hardware

- simulator operating modules comprising the simulator system being worked on
- fault indicators related to the simulator computer systems and peripheral hardware being worked on
- repair methodologies related to the simulator computer systems and peripheral hardware being worked on
- legislative and regulatory requirements related to the simulator being worked on
- organisational policy and procedures related to the relevant simulator computer systems and peripheral hardware
- configuration management related to the simulator computer systems and peripheral hardware being worked on
- product knowledge related to systems and/or equipment in service

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSIM003 Fault find and repair simulator image generator and visual display systems

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

Application

This unit describes the knowledge and skills required to conduct fault finding and repairs to the simulator image generator and visual display systems. This includes analysing fault reports, identifying and rectifying faults, conducting functional tests and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

Both software and hardware components may be involved. Image generator hardware components include commercial off-the-shelf systems, proprietary designed systems and high-end rack mount personal computers with engineering graphic cards installed.

Image generator software components include proprietary software to process visual databases stored on the information gateway, under direction of simulators' host computing system, to produce drive signals for the visual display, and/or commercial software.

Maintenance tasks include fault finding hardware to line replacement at unit level, image and backup of software installation, configuration and updating.

Visual display systems include liquid crystal display, digital light processing, liquid crystal on silicon, light emitting diode, organic light emitting diode, cathode ray tube and/or laser.

Mechanisms include projection (direct and/or rear, including optics and display surfaces), and/or direct display (television, monitor).

Maintenance tasks may include setup, fault finding, alignment of projectors, optics alignment and colour matching and balance.

This unit was developed in a Defence environment but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Simulator Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Receive and analyse fault report	1.1 Receive and analyse simulator image generator and/or visual display system fault report. 1.2 Identify and select appropriate fault finding method(s) that will apply across the range of simulator image generator and/or visual display system. 1.3 Prepare the simulator image generator and/or visual display system for fault finding.
2. Identify and find fault	2.1 Apply fault finding method(s). 2.2 Identify and analyse fault indicators. 2.3 Identify the simulator image generator and/or visual display system fault. 2.4 Confirm that the fault is the one initially reported.
3. Repair fault	3.1 Identify and confirm cause of fault. 3.2 Identify and confirm repair method(s). 3.3 Complete simulator image generator and/or visual display system

	repair. 3.4 Conduct post repair safety check. 3.5 Restart simulator image generator and/or visual display system.
4. Conduct functional test	4.1 Test simulator image generator and/or visual display system to ensure operational integrity. 4.2 Confirm operational parameters.
5. Finalise repair process	5.1 Finalise simulator image generator and/or visual display system repair reports including a detailed synopsis of the fault and the repair process and any certification requirements. 5.2 Report the operational status of the simulator image generator and/or visual display system.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for DEFSIM003 Fault find and repair simulator image generator and visual display systems

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking research and analysis related to simulator image generator and visual display systems
- following logical, complex fault finding techniques
- using measuring instruments including light meters, chroma meters and theodolites
- applying simulator image generator and visual display systems repair methodologies
- following configuration management processes using appropriate information technology and software including proprietary projector software and proprietary image generation software
- identifying, reviewing and analysing information that may impact on the simulator image generator and visual display systems fault finding
- conducting simulator image generator and visual display systems functional testing
- negotiating and communicating effectively with key stakeholders

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- operational capabilities and limitations of the relevant simulator
- operational capabilities and limitations of the relevant simulator image generator and visual display system
- simulator operating modules comprising the simulator system being worked on
- fault indicators related to the simulator image generator and visual display systems being worked on
- repair methodologies related to the simulator image generator and visual display systems being worked on

- legislative and regulatory requirements related to the simulator being worked on
- organisational policy and procedures related to the relevant simulator image generator and visual display systems
- configuration management related to the simulator image generator and visual display systems being worked on
- product knowledge related to systems and/or equipment in service

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSIM004 Fault find and repair simulator motion and control loading systems

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

Application

This unit describes the knowledge and skills required to conduct fault finding and repairs to the simulator motion and control loading systems. This includes analysing fault reports, identifying and rectifying faults, conducting functional tests and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development. Simulator motion system are mechanical/electric and/or mechanical/hydraulic.

Simulator control loading systems include electric and hydraulic.

This unit was developed in a Defence environment but may be relevant to others who work in this field. This unit applies to those working in fault finding and repairing simulator motion and/or control loading systems and was developed for technicians who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those relating to WHS, fault finding and repairing the simulator motion and/or control loading systems.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFSIM004 Fault find and repair simulator motion and control loading systems

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking research and analysis related to simulator motion and control loading systems
- following logical, complex fault finding techniques
- using measuring instruments including thermal array recorders and calibrated pressure gauges
- applying simulator motion and control loading systems repair methodologies
- using tools including hydraulic flushing faucets, motion specialist tool kits and inflation kits for hydraulic accumulators
- following configuration management processes
- using appropriate information technology and software including proprietary motion control loading system calibration software and general online diagnostic tool software
- identifying, reviewing and analysing information that may impact on the simulator motion and control loading systems fault finding
- conducting simulator motion and control loading systems functional testing
- negotiating and communicating effectively with key stakeholders

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- operational capabilities and limitations of the relevant simulator
- operational capabilities and limitations of the relevant simulator motion and/or control loading systems
- simulator operating modules comprising the simulator system being worked on
- fault indicators related to the simulator motion and control loading systems being worked on

- repair methodologies related to the simulator motion and control loading systems being worked on
- legislative and regulatory requirements related to the simulator motion and control loading systems being worked on
- organisational policy and procedures related to the relevant simulator motion and/or control loading systems
- configuration management related to the simulator motion and control loading systems being worked on
- product knowledge related to systems and/or equipment in service

DEFSIM005 Fault find and repair simulator sound systems

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

Application

This unit describes the knowledge and skills required to conduct fault finding and repairs to the simulator sound systems. This includes analysing fault reports, identifying and rectifying faults, conducting functional tests and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

Simulator sound systems include communication systems, amplifiers, samplers, speakers, microphones and headsets, equalisers, mixers, tone generators, switching and control systems and audio computers.

This unit was developed in a Defence environment but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFSIM005 Fault find and repair simulator sound systems

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking research and analysis related to simulator sound systems
- following logical, complex fault finding techniques
- using measuring instruments including audio sound analysers and acoustic calibrators
- applying simulator sound systems repair methodologies
- following configuration management processes
- using tools including signal generators and sound generators
- using appropriate information technology and software including at least one of:
 - general online diagnostic tools
 - proprietary sound analysis software
 - proprietary simulator management databases
 - proprietary simulator performance test systems
- identifying, reviewing and analysing information that may impact on the simulator sound systems fault finding
- conducting simulator sound systems functional testing
- negotiating and communicating effectively with key stakeholders

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- operational capabilities and limitations of the relevant simulator
- operational capabilities and limitations of the relevant simulator sound systems
- simulator operating modules comprising the simulator system being worked on
- fault indicators related to the simulator sound systems being worked on

- repair methodologies related to the simulator sound systems being worked on
- legislative and regulatory requirements related to the simulator being worked on
- organisational policy and procedures related to the relevant simulator sound systems
- configuration management related to the simulator sound systems being worked on
- product knowledge related to systems and/or equipment in service

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSIM006 Fault find and repair simulator weapons systems

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

Application

This unit describes the knowledge and skills required to conduct fault finding and repairs to the simulator weapons systems including fire control, aiming and sighting systems. The unit includes analysing fault reports, identifying and rectifying faults, conducting functional tests and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

Simulator weapons systems include simulated cannons/guns, non-guided weapons and guided weapons.

Simulator fire control systems include simulator fire control safety interlock systems, simulator armament control systems and simulator armament control buses.

Simulator aiming and sighting systems include simulator helmet mounted displays, simulator head-up displays, simulator head-in displays, simulator TV sighting systems, simulator on-screen displays and simulator infrared/thermal sighting systems.

This unit was developed in a Defence environment but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFSIM006 Fault find and repair simulator weapons systems

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking research and analysis related to simulator weapons systems
- following logical, complex fault finding techniques
- using measuring instruments including thermal array recorders
- applying simulator weapons systems, fire control, aiming and sighting systems repair methodologies
- following configuration management processes
- using appropriate information technology and software including at least one of:
 - customer diagnostics software
 - electronics configuration software
 - electronics instrument check diagnostics software
 - proprietary helmet mounted sight diagnostic software
 - Vector CANalyzer CAN bus diagnostic software
- identifying, reviewing and analysing information that may impact on the simulator weapons systems fault finding
- conducting simulator weapons systems functional testing
- negotiating and communicating effectively with key stakeholders
-

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- operational capabilities and limitations of the relevant simulator

- operational capabilities and limitations of the relevant simulator weapons systems, fire control, aiming and sighting systems
- simulator operating modules comprising the simulator system being worked on
- fault indicators related to the simulator weapons systems being worked on
- repair methodologies related to the simulator weapons systems being worked on
- legislative and regulatory requirements related to the simulator being worked on
- organisational policy and procedures related to the relevant simulator weapons systems, fire control, aiming and sighting systems

DEFSIM007 Conduct simulator performance evaluation

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

Application

This unit describes the knowledge and skills required to evaluate the operational performance of components and/or elements of a simulator. This includes identifying the performance evaluation requirement, conducting the operational performance evaluation, analysing the results, and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

The simulator components include the complete simulator, power distribution and control systems, computers and peripheral hardware, image generator and visual display systems, motion and control loading systems, sound systems and weapons systems.

The simulator elements include subjective tests and credit sequences which affect the operational performance of the simulator.

The outcomes of the performance evaluation include immediate fault finding and repair, scheduling the simulator for routine maintenance or calibration of simulator systems.

This unit was developed in a Defence environment but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Competency Field

Simulator Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify evaluation requirement	1.1 Identify the type of simulator evaluation to be undertaken. 1.2 Identify the components and/or elements to be evaluated. 1.3 Consult simulator documentation. 1.4 Identify evaluation parameters to be met. 1.5 Prepare simulator for performance evaluation.
2. Undertake performance evaluation	2.1 Conduct performance evaluation. 2.2 Collect and collate evaluation data.
3. Analyse performance results	3.1 Conduct analysis of performance data. 3.2 Identify performance abnormalities. 3.4 Identify cause of performance variations. 3.5 Determine remedial action if necessary.
4. Finalise performance evaluation process	4.1 Complete certification and other documentation for future application. 4.2 Report abnormalities as required.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading					Writing					Oral communication					Numeracy				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for DEFSIM007 Conduct simulator performance evaluation

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking research and analysis related to simulator operational performance
- following logical, complex analysis techniques
- using measuring instruments including thermal array recorders, sound analysers, light and chroma meters and acoustic calibrators
- following configuration management processes
- using tools including signal generators
- using appropriate information technology and software including at least one of proprietary simulator management databases, proprietary motion control loading system calibration software, proprietary sound analysis software and proprietary simulator performance test systems
- identifying, reviewing and analysing information that may impact on the simulator operational performance
- identifying simulator performance abnormalities
- determining simulator operational performance remedial action
- negotiating and communicating effectively with key stakeholders

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- operational capabilities and limitations of the relevant simulator
- simulator operating modules comprising the simulator system being worked on
- subjective tests and credit sequences which affect the operational performance of the simulator
- calibration methodologies related to the simulator being evaluated

- legislative and regulatory requirements related to the simulator being evaluated
- organisational policy and procedures related to the relevant simulator
- configuration management related to the simulator being evaluated
- product knowledge related to systems and/or equipment in service

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSIM008 Work effectively with simulator systems

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

Application

This unit describes the skills required to analyse and apply a knowledge of simulator systems that is required to support a variety of applications including maintenance, fault finding, repair, and testing of simulators. This includes accessing and analysing relevant simulator systems information and implementing recommendations specific to simulator systems. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

The application of simulator systems knowledge is specific to a variety of component processes in simulator operations, including simulator systems maintenance and support to simulator operations.

This unit was developed in a Defence environment but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Competency Field

Simulator Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Access and analyse simulator systems information	1.1 Identify and obtain relevant simulator systems requirements. 1.2 Analyse obtained information to determine the relevance and application to the organisation. 1.3 Document outcomes of the analysis and determine relevant recommendations.
2. Apply simulation information to work processes	2.1 Apply simulator systems requirements and recommendations relevant to work. 2.2 Assess, review and record effectiveness of the recommendations. 2.3 Adjust and document recommendations for future application.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for DEFSIM008 Work effectively with simulator systems

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying simulator systems knowledge relevant to work being performed
- following logical, complex analysis techniques
- using appropriate information technology and software
- identifying, reviewing and analysing information relevant to simulator systems
- interpreting organisation role relevant to simulator systems
- conducting research
- negotiating and communicating effectively with key stakeholders

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- capabilities and limitations of the relevant simulator
- simulator operating modules of simulator systems
- generic understanding of hosted software and hardware
- legislative and regulatory requirements related to simulator systems
- organisational policy and procedures related to the relevant simulator
- application of appropriate information technology and software
- logical complex analysis techniques
- research techniques

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSIM009 Operate the simulator for testing purposes

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

Application

This unit describes the skills required to operate the simulator for testing purposes following maintenance. The unit includes identifying the testing requirement, conducting the test and analysing the results, and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

Testing includes particular component tests or complete simulator operational tests. The simulator components include the complete simulator or, power distribution and control systems, computers and peripheral hardware, image generator and visual display systems, motion and control loading systems, sound systems and weapons systems.

The outcomes of the test include immediate fault finding and repair or scheduling the simulator for routine maintenance.

This unit was developed in a Defence environment but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Competency Field

Simulator Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify testing requirement	1.1 Identify and confirm the type of simulator testing to be undertaken. 1.2 Identify the components to be tested. 1.3 Consult simulator documentation. 1.4 Identify test parameters to be met. 1.5 Prepare simulator for testing.
2. Undertake simulator tests	2.1 Carry out pre-start, start-up and shut-down procedures. 2.2 Conduct specified tests. 2.3 Act on and report monitoring systems warnings and alarms. 2.4 Collect and analyse test data. 2.5 Identify performance abnormalities. 2.6 Determine remedial action if necessary.
3. Complete the test sequence	3.1 Complete certification and other documentation for future application. 3.2 Report abnormalities as required.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Assessment Requirements for DEFSIM009 Operate the simulator for testing purposes

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking research and analysis related to simulator operating procedures
- following logical, complex analysis techniques
- using appropriate information technology and software
- identifying, reviewing and analysing information that may impact on the simulator operational testing including mathematical outcomes
- identifying simulator test abnormalities
- determining simulator testing remedial action
- negotiating and communicating effectively with key stakeholders

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- operational capabilities and limitations of the relevant simulator
- simulator operating modules comprising the simulator system being worked on
- simulator operating procedures
- specified simulator tests
- complex analysis techniques
- legislative and regulatory requirements related to the simulator being evaluated
- organisational policy and procedures related to the relevant simulator
- product knowledge related to systems and/or equipment in service

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR001 Catch aquatic animals in a survival situation

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFSU001B Catch aquatic animals in a survival situation.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to catch aquatic animals in a survival situation. This includes preparing improvised fishing resources and conducting fishing operations. The individual is not expected to be an expert fisherperson but rather to have sufficient skills and knowledge to obtain, where possible, a measure of sustenance from waterways to increase their chances of survival.

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare improvised fishing resources	1.1 Assemble improvised tackle from natural resources and basic survival resources (i.e. wire, fish hooks and fishing line). 1.2 Identify and prepare natural fish-stunning agents. 1.3 Bait tackle using locally acquired insects and animals appropriate to the type of aquatic animal being sought.
2. Conduct fishing operation	2.1 Choose location and timing of fishing operation to optimise the chances of success. 2.2 Apply basic fishing techniques to attract the desired aquatic animal to strike. 2.3 Land hooked aquatic animals. 2.4 Site and enhance tidal pools (includes making use of inlets, natural constrictions) to trap aquatic animals during tidal ranges. 2.5 Handle, dispatch, gut and fillet captured aquatic animals, and remove undesirable/poisonous animals from catch. 2.6 Examine guts to identify animals' preferred diet with the aim of targeting particular species and reinvesting offal and offcuts in ongoing fishing operations. 2.7 Implement techniques for maintaining aquatic animals in fresh condition until required for consumption.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading N/A					Writing N/A					Oral communication N/A					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU001B Catch aquatic animals in a survival situation.

Assessment Requirements for DEFSUR001 Catch aquatic animals in a survival situation

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- siting an appropriate fishing location that optimises the chances of success
- siting and constructing a functional tidal pool of at least two square metres surface area
- maintaining a landed fish either by tethering or depositing in an enclosed pool
- recognising dangerous aquatic animals and predators

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- ciguatera poisoning signs and symptoms
- awareness of dangerous/poisonous aquatic animals and of predators

Assessment Conditions

Competency should be demonstrated over time in a range of fishing activities that could be expected in a survival situation. Competency must be assessed in a simulated workplace environment with access to a suitable assessment area, fish hooks (maximum of five) and fishing line (maximum of five metres).

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the ability to catch aquatic animals, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR002 Construct improvised weapons and equipment in a survival situation

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFSU002B Construct improvised weapons and equipment in a survival situation.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to use traditional techniques to construct and maintain improvised weapons and equipment in a survival situation. The individual is not expected to be an expert tool maker or craftsman, but rather to have sufficient skills and knowledge to produce functional items of equipment that will increase their chances of survival.

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for the construction of improvised weapons and equipment	<p>1.1 Determine required weapons (such as bolas, boomerang, spear) and equipment (such as bed, coolamon, digging stick, rock hammer, seat, table, traps and snares) to increase chances of survival and prioritise as appropriate to the situation.</p> <p>1.2 Develop a basic plan for construction, including general design, labour and resource requirements of desired items.</p> <p>1.3 Gather natural resources to meet the concept of design.</p> <p>1.4 Make two-ply string from fibrous material for use in binding and securing.</p>
2. Construct improvised weapons and equipment	<p>2.1 Use heat to shape timber (induce and/or remove bends).</p> <p>2.2 Cut notches, edges and settings into timber to fit and secure additional items.</p> <p>2.3 Use heat to harden timber to prevent wearing, blunting and splitting.</p> <p>2.4 Use knots and lashes to secure additional items.</p> <p>2.5 Add padding using grasses and barks to survival equipment.</p> <p>2.6 Weave or assemble baskets using natural resources to store survival items.</p> <p>2.7 Maintain and preserve weapons and equipment using improvised preservation techniques, including plant and animal oils, saps and smoking.</p>

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading N/A					Writing N/A					Oral communication N/A					Numeracy				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU002B Construct improvised weapons and equipment in a survival situation.

Assessment Requirements for DEFSUR002 Construct improvised weapons and equipment in a survival situation

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- sharpening and maintaining a knife
- tying knots and lashings/seizing/whipping
- maintaining a range of survival weapons and equipment
- producing a range of items according to the survival situation, but must include:
 - either digging stick:
 - length – minimum half user’s body length
 - shaft diameter – minimum 2.5 centimetres
 - plumb – not greater than seven degrees off ‘true’ from point to end
 - point – fire hardened sufficiently to deny fingernail from making any marking/indentation
 - or spear:
 - length – minimum three-quarters user’s body length
 - shaft diameter – maximum two centimetres
 - plumb – not greater than seven degrees off ‘true’ from point to end
 - point – fire hardened sufficiently to deny fingernail from making any marking/indentation
 - either bed:
 - length and width – must cover user’s body when flat with arms by sides
 - height – must elevate user at least ten centimetres off the ground
 - level – must be level

- strength – must withstand weight of user and frame must remain rigid under user’s movements
- comfort – must have sufficient padding to prevent framework from unduly discomforting user
- or seat:
 - dimensions – seat must cover user’s posterior
 - height – must elevate to user’s knee level off the ground
 - level – must be level
 - strength – must withstand weight of user and frame must remain rigid under user’s movements
 - comfort – must have sufficient padding (including bark, grass) to prevent discomfort through pressure of framework
 - improvised cordage:
 - six metres
 - minimum two-ply lay
 - capable of supporting twenty kilograms weight
 - maximum six millimetres diameter
- basket:
 - minimum side and bottom length twenty centimetres
 - carry handle attached
 - capable of securing survival items during travel

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- knife and weapon safety
- fire safety

Assessment Conditions

Competency must be assessed in a simulated workplace environment with access to a suitable assessment area, with natural resources and a knife.

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the ability to construct improvised weapons and equipment, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions

- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR003 Employ visual emergency signalling techniques in a survival situation

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFSU003B Employ visual emergency signalling techniques in a survival situation.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 3.3 revised

Application

This unit describes the skills required to employ visual emergency signalling techniques in a survival situation. The individual is not meant to be an expert signaller, but must demonstrate sufficient skills and knowledge to construct, maintain and employ functional emergency signalling devices to enhance their survival through the attraction of, and basic communication with, search and rescue (SAR) agencies.

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for construction of visual emergency signals	1.1 Assess available natural and artificial resources for their application in emergency signalling. 1.2 Examine local area and identify the ground that would afford optimum visibility to searchers but minimum physical effort to the survivor. 1.3 Observe and note sun's transit to determine the optimum placement of reflective signalling devices.
2. Prepare emergency signalling devices for use	2.1 Site and construct ground-to-air emergency signals using purpose signal marker panels and/or improvised markers to optimise visibility from the air. 2.2 Site and construct tinsel/Christmas tree devices using artificial resources to optimise visibility from the air. 2.3 Site and construct an emergency signal fire to optimise visibility from the air, considering the prevailing wind's effect (if any) on smoke trails. 2.4 Site and excavate shadow trenches, considering the sun's movement. 2.5 Prepare purpose-built signalling devices.
3. Employ visual emergency signals	3.1 Initiate an emergency signal fire and utilise fuel to maximise the visual signature. 3.2 Attract search aircraft attention by employing purpose-built signalling devices. 3.3 Interpret and respond to recognition and response signals from search aircraft.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading N/A					Writing					Oral communication					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU003B Employ visual emergency signalling techniques in a survival situation.

Assessment Requirements for DEFSUR003 Employ visual emergency signalling techniques in a survival situation

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- selecting combustible and ‘smoking’ materials
- constructing, igniting and maintaining a fire
- siting and building a trench symbol, visible from the air at 2000 metres may be a simulated trench if ground is too hard.
- siting and constructing a tinsel tree, visible from the air at 2000 metres
- siting, constructing and maintaining the fuel and foliage stock for the fire
- lighting the fire so that it is well ablaze within 120 seconds and then generating smoke through the application of green foliage
- interpreting and responding to recognition and response signals from search aircraft, including :
 - I require your attention
 - message received and understood
 - message received but not understood
 - follow aircraft in same direction

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- air search/ground search procedures
- aircraft recognition and response/international distress signals

Assessment Conditions

Competency should be demonstrated using a range of simulated visual emergency signalling techniques that could be expected in a survival situation with access to emergency signalling devices.

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the ability to employ visual emergency signalling techniques, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR004 Erect a survival shelter using natural resources in a survival situation

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFSU004B Erect a survival shelter using natural resources in a survival situation.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 2.2 and 2.3 revised

Application

This unit describes the skills required to erect a survival shelter in a survival situation. The individual is not expected to be an expert in building construction, but rather to have the requisite skills and knowledge to identify the elemental threats to his/her survival such as sun, wind and rain, and to establish a survival shelter to provide the necessary protection. The shelter may take advantage of established natural features or may demand stand-alone construction from natural resources. This unit assumes that manufactured resources are not available.

This unit was developed for Defence personnel but may be relevant to others

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare resources for erection of survival shelter	1.1 Identify potential threat to personal survival posed by the elements and use natural features to provide immediate protection. 1.2 Optimise survival shelter's siting for protection from the elements and to minimise hazards to the survivalist, taking advantage, where possible, of existing natural resources. 1.3 Collect resources to construct survival shelter to maximise shelter strength and protection, while minimising physical effort.
2. Construct survival shelter	2.1 Construct traditional two-ply string for use in binding and securing. 2.2 Establish survival shelter's framework, taking maximum advantage of the strength of natural junction points such as forks, by using and binding with improvised cordage. 2.3 Protect survival shelter from wind and rain, using shingling (bark sections and large leaves) and thatching (bound grass and bundled grass) for roofing and siding.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading N/A					Writing N/A					Oral communication N/A					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU004B Erect a survival shelter using natural resources in a survival situation.

Assessment Requirements for DEFSUR004 Erect a survival shelter using natural resources in a survival situation

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- tying knots and lashes
- constructing at least two shelters capable of withstanding a vertical or horizontal loading to the framework of 300N; that repels all water when twenty litres is poured along the top/leading edge of the structure to simulate rain; whose tiling and thatching remains adhered to the shelter under wind conditions of Beaufort scale 4 (11–16 knots)
- using and binding with improvised cordage including at least one of
 - animal skins/gut
 - bark strips
 - reeds and grasses
 - traditional two-ply string

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- priorities of survival
- threats to survival from elements

Assessment Conditions

Competency must be assessed in a simulated workplace environment, including access to an appropriate remote survival area that has suitable natural resources and natural features; and a knife.

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the technical ability to construct and maintain a shelter, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR005 Maintain physical and emotional health and fitness in a survival environment

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFSU005B Maintain physical and emotional health and fitness in a survival environment.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with new standards• All PC transitioned from passive to active voice

Application

This unit describes the skills required to demonstrate the personal qualities of resilience and resoluteness under the hardships that must be endured to survive at the individual level, as well as the interpersonal skills to optimise the survival opportunities of the team. This unit also includes the discipline to ration food and water despite constant hunger and thirst, and to undertake arduous tasks despite increasing levels of fatigue and the diminishing potential of rescue. Individuals must demonstrate a robust standard of physical health and a meticulous attitude to personal safety and hygiene.

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Maintain personal health and safety	1.1 Minimise threats of disease, distraction and discomfort. 1.2 Minimise threats posed by exposure to the sun. 1.3 Handle equipment safely to prevent cuts. 1.4 Immediately treat injuries such as cuts and burns. 1.5 Take opportunities to improve personal hygiene, including cleaning teeth, grooming, washing skin and clothes.
2. Maintain a healthy and safe environment	2.1 Treat fire with respect to prevent injury or ignition of campsite and surrounds. 2.2 Establish latrine and slaughter areas away from the camp area to prevent disease and attraction of disease carriers. 2.3 Clear camp area of rubbish and food scraps to prevent disease and attraction of disease carriers. 2.4 Maintain safe distances from potential animal dangers.
3. Optimise the chances of survival	3.1 Maintain a positive and proactive attitude towards the survival situation by constantly reinforcing the goal of rescue. 3.2 Contain personal fears and tensions and avoid allowing them to impact on others. 3.3 Provide positive and constructive input to the group to support agreement on the survival tasks and the priority and manner in which they will be conducted to maximise outcomes and minimise energy expenditure. 3.4 Accept and undertake survival tasks allocated by the team. 3.5 Consume available resources, as rationed by the team. 3.6 Identify signs of concern in others and provide reassurance accordingly to prevent deterioration of the individual and/or the group.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning					Reading N/A					Writing N/A					Oral communication					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU005B Maintain physical and emotional health and fitness in a survival environment.

Assessment Requirements for DEFSUR005 Maintain physical and emotional health and fitness in a survival environment

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- maintaining personal health and fitness by cleaning and treating minor injuries
- maintaining a positive attitude

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- factors impacting on stress and personal health and fitness
- fire safety
- health and hygiene
- natural remedies provided by plant material
- safety in a survival situation

Assessment Conditions

Competency must be assessed in a simulated workplace environment (with access to a suitable assessment area), and in a team.

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the ability to maintain physical and emotional health and fitness, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR006 Navigate using celestial aids

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFSU012 Navigate using celestial aids.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.3, 5.2 and 6.2 revised • PC 3.3 and 3.4 merged

Application

This unit describes the skills required to navigate using celestial aids, by both day and night, to a destination, within standard tolerances of accuracy, without the use of the normal range of navigation aids.

This unit was developed for military personnel required to operate in a remote, deployed operational environment, but is applicable to any individual who is required to navigate using celestial aids. Alternatively, if an approximate position is known relative to a highway, waterway or coast, where either survival or rescue is better effected, the individual will have sufficient skills and knowledge to remain on a constant bearing and estimate distance travelled.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Establish cardinal points by day using the sun	1.1 Construct a sun compass in an open and level area to record complete movement of the sun over a solar day. 1.2 Mark true north, associated cardinal points and the arc of the sun on the sun compass. 1.3 Mark true north and associated cardinal points using a quick shadow stick method (maximum of twenty minutes of solar transit) and making allowance for the deviation arising from early morning or late afternoon siting.
2. Establish cardinal points by night using celestial aids	2.1 Extrapolate the location of cardinal points by identifying and using celestial bodies. 2.2 Extrapolate the location of the celestial pole by identifying and using celestial bodies. 2.3 Extrapolate true south (or north) by using the celestial pole on the earth/sky horizon and by establishing a compass showing all cardinal points on the ground.
3. Employ improvised direction measuring techniques	3.1 Select appropriate direction of travel to optimise survival or rescue, after analysing the survival situation. 3.2 Construct an improvised protractor using a multi-folded sheet of paper and mark the desired angle of direction. 3.3 Use established cardinal points and directional markings on an improvised protractor to navigate towards a recognisable feature in the distance.
4. Employ improvised time measuring techniques	4.1 Estimate elapsed time by measuring the angle of a segment of the sun's transit and applying an angle by rate calculation. 4.2 Estimate elapsed time by measuring the rotation of a celestial body around the celestial pole, and applying an angle by rate calculation.
5. Employ	5.1 Estimate distance by counting number of paces taken and

<p>improvised distance measuring techniques</p>	<p>applying a pace by length of pace calculation. 5.2 Estimate distance by travelling at constant estimated velocity walking pace of four km/h and applying a velocity by time calculation.</p>
<p>6. Determine overall position relative to start point and navigate back</p>	<p>6.1 Draw grid system using a standard scale on a sheet of paper, and mark cardinal points and start point. 6.2 Draw physical navigation movements as scaled vectors from the start point. 6.3 Aggregate individual navigation vectors to determine final position relative to the start point. 6.4 Determine return vector, including bearing and distance, to return to the start point.</p>

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading N/A					Writing N/A					Oral communication N/A					Numeracy				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU012 Navigate using celestial aids.

Assessment Requirements for DEFSUR006 Navigate using celestial aids

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying celestial bodies
- navigating
 - five kilometres within a solar day, which may be broken into legs of not less than one kilometre, but must include at least four legs, as part of a navigation circuit; on completion, navigators are to submit a vector diagram detailing their final position relative to their start point accurate to within 10% (of distance and direction)
 - five kilometres within eight hours at night, which may be broken into legs of not less than one kilometre, but must include at least four legs, as part of a navigation circuit; on completion, navigators are to submit a vector diagram detailing their final position relative to their start point accurate to within 10% (of distance and direction)
- locating cardinal points and true north
 - by day: make adjustments for the shadow arc, dependent upon the time, when using only a partial segment of a solar day (maximum twenty minute fix) to locate the cardinal points; and to indicate true north to within 10% with a sun compass, using a twenty minute fix
 - by night: implement contingency skills when there is partial cloud in the night sky; and to employ five different celestial body indication techniques to locate the cardinal points, either directly or through extrapolation via the celestial pole

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- angles (in degrees)
- basic physics (velocity/distance/time)
- cardinal points (magnetic and true)
- earth's orbit and rotation in relation to the sun and night sky, including the celestial pole phenomenon
- mathematical calculations including:
 - distance travelled:
 - velocity x time
 - pace length x number of paces
 - elapsed time:
 - rate of (apparent) movement of sun (15 degrees/hour x solar angle subtended)
 - rate of (apparent) movement of night sky around the celestial pole (15 degrees/hour x angle subtended by nominated celestial body)
 -

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations. Competency must be assessed in an area that has an unmodified landscape, with access to pen and paper.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR007 Preserve and cook foodstuffs in a survival situation

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFSU007B Preserve and cook foodstuffs in a survival situation.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to preserve and cook foodstuffs in a survival situation. This unit also covers the prudent management of food assets and implementing personal measures to minimise energy expenditure to enhance survival chances. The individual is not expected to be a camp chef, but rather to possess sufficient skills and knowledge to obtain, where possible, a measure of sustenance from the environment through cooking, or preserving for longer-term consumption.

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Preserve and cook flora and fauna	1.1 Apply testing procedures to unknown flora to identify their fitness for consumption. 1.2 Remove harmful components of animal and vegetable foodstuffs. 1.3 Use improvised cooking techniques to prepare animal and vegetable foodstuffs for consumption to reduce the chances of acquiring parasites and germs. 1.4 Use improvised preserving techniques to preserve animal and vegetable foodstuffs to allow long-term storage without any harmful organisms spoiling the foodstuff.
2. Manage food resources	2.1 Implement energy management techniques to minimise unnecessary wastage. 2.2 Ration foodstuffs in accordance with survival requirements.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading N/A					Writing N/A					Oral communication N/A					Numeracy N/A				

Performance variables

Assessment Requirements for DEFSUR007 Preserve and cook foodstuffs in a survival situation

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- using improvised cooking techniques for at least one animal and at least one vegetable foodstuff by two of the following methods on different meal occasions:
 - roasting
 - earth oven
 - boiling
 - grilling/frying
- applying safety principles to ensure potential parasites and other organisms are destroyed by cooking, without destroying the foodstuff by burning or overcooking
- preserving foodstuff for at least one animal and at least one vegetable foodstuff quantity sufficient for at least two separate survival meals by two of the following methods:
 - drying
 - smoking
 - salting
- using curing techniques, making sure that maggot or bacterial infestation does not spoil the foodstuff (the preserved foodstuff should not suffer deterioration for two days [minimum] after curing, and must then be consumed by the survivor as part of their survival diet)

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- fire safety
- food testing procedures
- recognition of edible plants

Assessment Conditions

Competency must be assessed in a simulated workplace environment and demonstrated at least once in the test procedure for unknown flora and, as detailed, over a range of occasions for cooking and preserving that could be expected in a survival situation.

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the technical ability to cook and preserve foodstuffs, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR008 Produce fire using improvised means in a survival situation

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFSU008B Produce fire using improvised means in a survival situation.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 2.1 revised

Application

This unit describes the skills required to initiate and maintain fire in a survival situation. Fire is one of the most critical survival resources because of the range of applications, from preventing hypothermia and sterilising water to initiating rescue signals. The individual is expected to produce fire from improvised means (which may include traditional means if there are no alternatives).

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for fire starting	1.1 Collect, dry and protect tinder. 1.2 Collect, prepare and store kindling. 1.3 Collect, prepare and store fuel (branches, logs) in a dry location.
2. Start and maintain fire	2.1 Site and prepare a fire-safe area, minimising threat to survivor effects and equipment and preventing escape of the fire into surrounding vegetation. 2.2 Use improvised means to start fire. 2.3 Prevent fire from extinguishing in all weather conditions.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading N/A					Writing N/A					Oral communication N/A					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU008B Produce fire using improvised means in a survival situation.

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- implementing fire safety
- producing fire from traditional means and friction
- nurturing the ember into a robust flame through the careful and sequential additions of tinder, kindling and fuel
- maintaining a fire continuously regardless of weather conditions
- demonstrating due regard to the safety of persons and equipment, and the surrounding environment

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- fire safety
- hypothermia
- range of applications of fire in a survival situation

Assessment Conditions

Competency must be demonstrated once under the range of methods detailed in the establishment of fire but the maintenance of fire should be assessed over time. Competency must be assessed in a simulated workplace environment in an appropriate assessment area with access to sufficient suitable dry organic material to start fires; friction method fire-starting resources including bootlace (as bow string); and a knife. Fire should be maintained in all weather conditions including rain.

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the technical ability to start and maintain a fire, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR009 Trap and kill animals in a survival situation

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFSU009B Trap and kill animals in a survival situation.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.1, 2.6, 2.8 and 2.9 revised • PC 2.1, 2.2 and 2.3 merged

Application

This unit describes the skills required to trap and kill animals in a survival situation. The individual is not expected to be an expert trapper or butcher, but rather to have sufficient skills and knowledge to catch animals using trapping techniques, and to kill and butcher the animal including inspecting for signs of disease.

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete, tasks in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Trap animals	1.1 Develop a capture plan including trap height, location and type, as well as means of attraction, by identifying animal signs and by interpreting drinking, eating, foraging, mating, and sleeping habits. 1.2 Acquire bait attractive to the targeted animal. 1.3 Create traps from natural resources. 1.4 Deploy and camouflage traps on likely animal travel routes. 1.5 Check traps regularly for captured animals.
2. Slaughter animals	2.1 Conduct slaughter humanely to cause minimum stress for the animal. 2.2 Skin or pluck carcass. 2.3 Hang carcass for butchering. 2.4 Butcher carcass by cutting edible portions (dressing) of meat and by removing internal organs. 2.5 Inspect offal for signs of disease. 2.6 Protect meat from the elements including flyblow, scavenging animals and the sun. 2.7 Maintain hygiene of the slaughterer. 2.8 Maintain hygiene of the carcass.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading N/A					Writing N/A					Oral communication N/A					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU009B Trap and kill animals in a survival situation.

Assessment Requirements for DEFSUR009 Trap and kill animals in a survival situation

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- demonstrating safe knife-handling
- constructing, siting, setting and camouflaging the following traps:
 - simple snare – focusing on the functionality of the snare and the fixing of the aperture
 - Fig 4 – focusing on the functionality of the mechanism
 - a frame – focusing on the functionality of the mechanism
- ensuring own safety
- efficiently despatching the slaughter
- removing offal and cuts of meat without rupturing the animal’s internal organs, thereby spoiling the meat
- examining carcasses for disease and parasites

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- basic animal anatomy
- hazards associated with animals

Assessment Conditions

Competency must be demonstrated in a simulated workplace environment, with access to animals for slaughter. The candidate should have access to a knife as minimum equipment.

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the technical ability to capture and kill animals, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR010 Locate, treat and manage water in a survival situation

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFSU010B Locate, treat and manage water in a survival situation.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 2.1, 2.2 and 2.3 revised

Application

This unit describes the skills required to locate, treat (for human consumption) and manage water in a survival situation. This unit also includes extracting water directly through evaporation, transpiration and desalination; filtering techniques; and treating foul water to render it potable. Of equal importance to optimising the input of water, is minimising the expenditure of water. Individuals will need to protect and ration their water assets and to implement measures to minimise water loss to increase their chances of survival.

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Locate and extract water	1.1 Discover water by recognising and investigating the likely locations and the indicators of water. 1.2 Collect water during periods of rain and high atmospheric moisture content. 1.3 Extract water from the ground through evaporation. 1.4 Extract water from vegetation using transpiration.
2. Prepare water for consumption	2.1 Filter water (i.e. clarify content, remove debris and large contaminants) using improvised filtration methods. 2.2 Make water safe for drinking using improvised desalinator system, including boiler (i.e. drum), collector (i.e. bag) and condenser (i.e. tube/pipe). 2.3 Taste and smell water to confirm it is safe for drinking.
3. Manage water resources	3.1 Store water using improvised storage receptacles. 3.2 Minimise loss of water by implementing water loss reduction management techniques. 3.3 Ration water in accordance with minimum daily requirements as per the survival situation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading N/A					Writing N/A					Oral communication N/A					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU010B Locate, treat and manage water in a survival situation.

Assessment Requirements for DEFSUR010 Locate, treat and manage water in a survival situation

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- assembling basic improvised equipment
- demonstrating extreme care in handling critical survival items
- extracting water through:
 - evaporation – a minimum of 20 millilitres of water in 24 hours through the use of a desert still
 - transpiration – a minimum of 200 millilitres of water in a solar day using a plastic (transpirator) bag (0.6 metres by 0.4 metres)
 - desalination – a minimum of five litres of potable water in 24 hours using the following:
 - a ten litre metal drum
 - plastic (transpirator) bag (0.6 metres by 0.4 metres)
 - pipe section (ten to twenty centimetres)

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- desalinator construction including:
 - drum
 - condensing tube
 - collecting device

- connections of the following to each other
- cooling options for the condensing device
- desalinator non-compliant liquids
- transpirator non-compliant vegetation

Assessment Conditions

Competency must be assessed with access to improvised desalinator kits, the desalinator is to provide the only source of water for a minimum of two days unless safety/health reasons require additional supplementation. Competency must be demonstrated once in the evaporation and transpiration of water and competency must be demonstrated in the desalination and management of water, and minimisation of water loss, over a minimum of two days.

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the technical ability to locate and treat water, the aspect of longer-term survival, i.e. management of water (including care of the desalinator), is crucial.

Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR011 Survive at sea

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFSU011B Survive at sea.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.2 revised

Application

This unit describes the skills required to survive at sea and the immediate measures that would need to be taken upon exposure to the water, including both surface and underwater swimming, treading water, rigging improvised and purpose flotation devices, and adopting heat-loss minimisation positions. It also covers the use of purpose survival craft and equipment, including water procurement, food procurement and emergency signalling devices.

This unit was developed for Defence personnel but may be relevant to others. The context of this competency would typically be when a ship is sunk or an aircraft is downed over water. The survivor can be on their own or in a group.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Survive in the water	1.1 Use surface and underwater swimming techniques to escape from dangerous situations. 1.2 Enter water from a height and then surface. 1.3 Assume heat-retaining positions in the water as an individual and in a group environment. 1.4 Use improvised flotation devices to supplement buoyancy. 1.5 Fit personal flotation device (PFD) and maintain buoyancy through manual techniques.
2. Operate and maintain survival flotation craft and its resources	2.1 Deploy, inflate, right (upon inversion) and board survival flotation craft (multi-person or single-person life raft). 2.2 Escape from inside the survival flotation craft after inversion. 2.3 Rig survival flotation craft for protection from the elements and optimisation (or minimisation) of movement. 2.4 Inspect and maintain survival flotation craft throughout the survival period. 2.5 Manage survival resources. 2.6 Deploy and operate water and food procurement devices. 2.7 Operate signal equipment from the survival flotation craft. 2.8 Interpret and respond to recognition and response signals from search aircraft.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading					Writing N/A					Oral communication					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU011B Survive at sea.

Assessment Requirements for DEFSUR011 Survive at sea

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- fitting personal floatation devices
- using duck dive technique
- swimming 30 metres in clothing
- treading water for a minimum of five minutes in clothing
- adopting the HELP for at least ten minutes
- rigging and using two different improvised flotation devices for at least five minutes each
- surviving at sea over three hours using a multi-person raft by:
 - rigging the drogue
 - rigging the canopy
 - rigging water procurement devices including solar stills and reverse osmosis machines, and producing at least 300 millilitre of water
 - bailing
 - inspecting the craft
- rigging and employing the following signalling devices from the survival craft:
 - heliograph – accurately illuminating a target at least 300 metres away
 - sea marker dye – deploying a sea marker dye effectively and safely using prevailing currents to optimise signature
 - flare – employing a signal flare effectively without threatening persons or survival equipment
- use surface and underwater swimming techniques including at least one of:
 - duck diving
 - swimming while clothed

- treading water in location
- Deploy and operate water and food procurement devices including at least one of:
 - reverse osmosis machine
 - solar stills
 -

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- aircraft response signals
- emergency signalling
- heat-retaining position
- improvised flotation techniques

Assessment Conditions

Competency should be demonstrated over time in a range of situations that could be expected in a survival situation.

Competency must be assessed in a simulated workplace environment, with access to a suitable sea-survival area, buoyancy devices, signalling devices and life rafts. All aspects of competence must be tested as part of an unbroken continuum from entry into the water at the individual level to the boarding and conduct aboard a survival flotation craft.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTRP001 Operate a vehicle in an environment of threat

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFTP001B Operate a vehicle in an environment of threat.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Element 1 reworded

Application

This unit describes the skills required to operate a vehicle in a work environment where there are a range of threats to the security of the vehicle and driver. These threats may include actions by an adversarial or enemy force targeted at destroying the vehicle and driver. The focus of the threat may be towards disablement of the driver, vehicle and/or load and may be carried out using a range of weapons from the ground and/or the air.

This unit was developed for military drivers in a threat environment but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Transport

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Camouflage and conceal a vehicle	1.1 Obtain specialist equipment appropriate to the task and check for serviceability. 1.2 Prepare vehicle for tactical employment and operational driving in a threat environment. 1.3 Camouflage vehicle from observation, surveillance and detection. 1.4 Conceal vehicle and its signature from observation, surveillance and detection using natural and artificial resources.
2. Apply tactical deployment drills and contingency actions when driving in a threat environment	2.1 Drive vehicle singularly and in convoy in a threat environment. 2.2 Deploy vehicle tactically during halts. 2.3 Employ vehicle contingency actions when threatened.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading NA					Writing NA					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTP001B Operate a vehicle in an environment of threat.

Assessment Requirements for DEFTRP001 Operate a vehicle in an environment of threat

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- preparing a vehicle for operational driving
- driving a vehicle under operational conditions
- following instructions/directives and verbally reporting information
- selecting halt and hide positions that make best use of the natural terrain and vegetation, and provide maximum concealment
- occupying halt and hide positions, optimising the position of the vehicle and the timely application and erection of camouflage
- applying procedures for camouflaging a vehicle, including use of natural vegetation and artificial aids including camouflage nets and support sets that allow emergency redeployment of the vehicle without entanglement
- reducing vulnerability through preparation of the vehicle, the use of camouflage and concealment, and the application of contingency actions that minimise risk
- carrying out contingency actions to prevent or minimise damage to the person, the vehicle and the load, both when travelling alone and in convoy with other vehicles when in a threat environment
- applying counter surveillance doctrine and procedures and the employment of operational driving techniques, in driving both a light and medium vehicle, carrying both general cargo and personnel, in a simulated operational environment

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- tactical deployment procedures including convoy driving procedures and actions at a halt and occupation of a hide or administrative position
- threats to vehicle security, observation and detection
- contingency actions

Assessment Conditions

Competency should be assessed carrying both general cargo and personnel. While assessment will normally be conducted as a team activity involving a number of vehicles and drivers, evidence of individual performance should be gathered on operational driving, the tactical deployment of vehicles, the use of camouflage to prevent observation and detection, and the employment of contingency actions including counter-ambush and counter-air attack. Most assessment tasks require the cooperation and assistance of other team members, therefore the ability to work as part of a team should be included in the overall assessment.

Assessment should be sequential from the actions of the individual on the receipt of instructions for movement through to the employment of contingency actions. Given that most of this unit of competency is based on the application of drills and procedures the assessment will be conducted primarily through the observation of practical skills. Errors detected in performance can be used to prompt a more detailed examination of a particular knowledge or skill and verbal and/or a written questioning of underpinning knowledge may complement practical assessments.

Competency should be demonstrated as part of a broader assessment activity involving the tactical deployment of drivers and vehicles over an extended period. Performance will need to demonstrate reacting to a range of threats and carrying out contingency actions on a number of occasions.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTRP002 Operate a vehicle at night

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFTP002B Operate a vehicle at night.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to drive, navigate and direct a vehicle at night under field conditions using white, reduced and blackout lighting where the threat(s) by an adversary or enemy may prohibit the full use of normal vehicle headlights, tail lights and interior lighting. In these circumstances, to assist in the control, operation and navigation of the vehicle, the driver may use guides and other aids, including specialist 'blackout' lighting equipment fitted to vehicles.

This unit was developed for military drivers in a threat environment, but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Transport

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare a vehicle for driving at night	1.1 Conduct serviceability check of vehicle and any external aids to night driving. 1.2 Rectify and report any faults. 1.3 Configure vehicle for night driving.
2. Drive a vehicle at night	2.1 Drive vehicle at night using various types of lighting and external aids in different types of terrain, road and light conditions. 2.2 Respond to directions from a co-driver and a guide, both with and without the assistance of external aids. 2.3 Navigate vehicle at night using navigational equipment.
3. Direct a vehicle at night	3.1 Identify, obtain and check appropriate external aids for serviceability. 3.2 Rectify or report any vehicle faults. 3.3 Direct vehicle using external aids. 3.4 Retrieve and check aids and return external to storage area.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTP002B Operate a vehicle at night.

Assessment Requirements for DEFTRP002 Operate a vehicle at night

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- scanning terrain
- judging terrain, distance and speed at night
- driving a vehicle at night under normal lighting conditions
- manoeuvring a vehicle in confined spaces
- navigating a vehicle
- responding to directions when driving
- reading maps and using navigational aids
- driving and navigating a vehicle at night using white, reduced and blackout lighting
- acting as guide while using external aids
- preparing a vehicle for night driving then driving the vehicle under field conditions in a range of environments including cross country, and on tracks and formed roads utilising the three types of lighting under a range of lighting and driving conditions

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- WHS requirements for driving at night
- characteristics of night vision
- vehicle navigation
- vehicle signalling and directing techniques

Assessment Conditions

Competency should be demonstrated as part of a broader assessment activity involving the tactical deployment of drivers and vehicles over an extended period.

Competency should be assessed progressively with the levels of complexity of driving with reduced lighting increasing i.e. the sequence should be white, reduced, then blackout. Activities should commence with the receipt of instructions for a night move. The individual should be assessed in the inspection and preparation of the vehicle for night driving.

Assessment under the particular light condition should test the individual's competence including the conduct of more complex tasks including manoeuvring in confined spaces with and without the use of guides and associated aids. Navigation may be assessed as part of a vehicle navigation exercise conducted under various lighting conditions driving cross country as well as on tracks and sealed roads.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTRP003 Operate a vehicle over difficult terrain

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFTP003B Operate a vehicle over difficult terrain.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to prepare a vehicle and drive over difficult terrain, including cross country and other off road situations. This involves the application of low risk driving techniques, dealing with hazards, and the assessment (where necessary) and the safe negotiation of obstacles, including water courses such as rivers and streams. The driver must be able to deal with contingencies related to an emergency that may occur in the hazardous situations that may be encountered in driving over difficult terrain under field conditions.

This unit was developed for military drivers in a threat environment, but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform complex tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Transport

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare a vehicle for driving over difficult terrain	1.1 Conduct serviceability check of a vehicle for driving over difficult terrain. 1.2 Rectify and/or report any vehicle faults. 1.3 Configure vehicle for driving in difficult terrain.
2. Drive over difficult terrain	2.1 Conduct reconnaissance of the terrain to be traversed by map and/or visual observation identifying potential hazards, including entry and exit routes, obstructions and bypasses. 2.2 Plan task and discuss potential hazards and contingency actions with a supervisor. 2.3 Reconfigure vehicle and adjust the load as necessary. 2.4 Apply low risk driving techniques when driving over difficult terrain. 2.5 Apply vehicle contingency actions when required to deal with accidents and emergencies that may occur when negotiating hazards.
3. Refurbish vehicle	3.1 Inspect vehicle for damage after hazardous situations are negotiated and on completion of the task. 3.2 Rectify and/or report faults and damage to the supervisor. 3.3 Clean and reconfigure vehicle and load as necessary for standard driving conditions.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTP003B Operate a vehicle over difficult terrain.

Assessment Requirements for DEFTRP003 Operate a vehicle over difficult terrain

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- carrying out contingency actions
- recovering a vehicle
- applying first aid
- evacuating injured people
- reading maps and use navigational aids
- conducting route reconnaissance and task planning
- driving a vehicle over difficult terrain including:
 - crossing a defile
 - crossing soft terrain
 - crossing a water obstacle
 - negotiating thick scrub
- dealing with contingencies including:
 - engine stall on a steep grade
 - breakdown of a vehicle while crossing a water obstacle
 - recovery of a vehicle from an obstacle
 - recondition a vehicle after driving in difficult terrain
- preparing and driving a vehicle over difficult terrain in a range of environments by day and night, and dealing with contingencies in hazardous situations
- applying sound judgement, this must be displayed in the analysis of difficult terrain to determine whether it is trafficable, and if so, what are the implications for vehicle preparation, safety of passengers and load planning

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- route and task planning
- obstacles and hazards
- vehicle capabilities

Assessment Conditions

Competency should be demonstrated over a time frame that allows for driving a vehicle over a variety of difficult terrain, encountering hazardous situations and applying contingency actions all under a range of field conditions.

Competency should be assessed using a number of practical assessments of driving over difficult terrain including inclines and declines (to the rated capability of the vehicle), waterways, thick scrub, defiles, sand and soft bottoms. Individuals should be assessed in each of these environs and then collectively over a 'vehicle run' in which a number of the types of difficult terrain, including watercourses, are encountered requiring a contingency response.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTRP004 Operate a vehicle using night fighting equipment (NFE)

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFTP004B Operate a vehicle using night fighting equipment (NFE).</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to operate a vehicle, including all wheeled road transport vehicles, using night fighting equipment (NFE) as an aid to driving at night in limited or no light under field conditions. NFE is a collective term that refers to image intensification equipment. It is used by the driver in limited or no light conditions to enhance and improve natural vision at night, when other forms of lighting are prohibited by the operational situation. The driver is required to perform all of the standard driving activities using NFE including vehicle preparation, serviceability checks, driving and navigation. In addition, the driver, while dismounted, is required to direct another vehicle using hand signals.

This unit was developed for military drivers in a threat environment, but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Transport

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare a vehicle for driving at night using NFE	1.1 Inspect NFE for driving and set up. 1.2 Conduct serviceability check of the vehicle using NFE and rectify and/or report faults. 1.3 Configure vehicle for night driving using NFE.
2. Direct a vehicle using NFE	2.1 Identify, obtain and check appropriate NFE for serviceability. 2.2 Report any faults with NFE to appropriate personnel, rectify and/or return to store. 2.3 Direct vehicle as an external guide using NFE. 2.4 Retrieve and check NFE and return to storage area with any faults rectified and/or reported.
3. Drive a vehicle using NFE	3.1 Drive vehicle singularly and in convoy using NFE. 3.2 Respond to directions from an external guide while driving with NFE. 3.3 Navigate vehicle while driving with NFE. 3.4 Carry out contingency actions on failure of NFE.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTP004B Operate a vehicle using night fighting equipment (NFE).

Assessment Requirements for DEFTRP004 Operate a vehicle using night fighting equipment (NFE)

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- driving a vehicle at night under a variety of lighting conditions
- reading maps and using navigational aids
- setting up NFE for night driving
- preparing, checking for serviceability, driving, directing and navigating the vehicle at night using NFE
- operating a vehicle both on roads and cross country and in convoy using NFE

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- NFE safety requirements
- characteristics of night vision
- characteristics and operation of NFE

Assessment Conditions

Competency should be assessed in operating with NFE as a complete activity commencing with the issue of instructions for a night move. The individual should conduct all preliminaries using NFE and complete a number of night driving tasks on both roads and cross country.

The individual should be responsible for navigation along the route using NFE. During the assessment, the individual will be required to drive the vehicle in accordance with instructions from an external guide and then dismount and act as a guide for another vehicle.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTRP005 Operate a multi-axle trailer

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFTP005B Operate a multi-axle trailer.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Element 1 reworded

Application

This unit describes the skills required to configure, load, tow, manoeuvre and unload a multi-axle trailer coupled to a wheeled vehicle authorised to tow this type of trailer. Multi-axle trailers in this context are used to transport wheeled and tracked vehicles, containers and items of general cargo in a range of operating environments.

This unit was developed for military drivers in a threat environment, but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Transport

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to tow a multi-axle trailer	1.1 Conduct serviceability check of the trailer. 1.2 Rectify and/or report faults. 1.3 Prepare and configure trailer to meet the requirements of the load/cargo. 1.4 Load trailer with different types of loads. 1.5 Secure and protect load.
2. Tow a multi-axle trailer	2.1 Couple and uncouple multi-axle trailer to a vehicle. 2.2 Tow multi axle trailer.
3. Refurbish a multi-axle trailer	3.1 Unload multi-axle trailer on completion of the task. 3.2 Conduct serviceability and damage checks. 3.3 Rectify and/or report faults.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading NA					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTP005B Operate a multi-axle trailer.

Assessment Requirements for DEFTRP005 Operate a multi-axle trailer

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- loading, restraining and protecting loads
- manoeuvring a trailer through a range of driving situations and road conditions
- monitoring and anticipating traffic hazards
- managing stressful and emergency situations
- operating medium and heavy vehicles and towing multi-axle trailers applying WHS requirements
- inspecting, loading, coupling/uncoupling, towing, manoeuvring and unloading a multi-axle trailer under a range of road transport operating conditions by day and night carrying different types of loads
- configuring a multi-axle trailer to suit the requirements of different types of loads and tasks
- loading and unloading a trailer with different types of loads and securing devices
- handling emergency situations
- demonstrating the ability to manoeuvre, brake, corner, reverse, push the trailer, overtake other vehicles and handle emergency situations.

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- WHS requirements for operating medium and heavy vehicles and towing multi-axle trailers

- road traffic rules and regulations for operating medium and heavy vehicles and towing multi-axle trailers
- safe loading and restraint procedures and limits for trailers
- trailer coupling systems
- emergency situations that may require towing trailers

Assessment Conditions

Competency should be demonstrated under a range of road transport operating environments towing a multi-axle trailer carrying various types of loads. Assessment will need to be undertaken on a number of occasions to provide the individual with the opportunity to demonstrate competence in manoeuvring a loaded trailer in a range of contexts and conditions.

Competency should be assessed under a range of road and traffic conditions to assess performance in stressful conditions. The assessment should be conducted as part of a 'long haul' activity of extended duration loading and towing a number of types of cargo. The individual should be assessed in the interpretation of an instruction for a transport task requiring a multi-axle trailer, preparation and configuration of the trailer and the subsequent loading, restraint and protection of the load.

The individual should then be assessed in coupling a trailer and driving the vehicle which includes the requirement to manoeuvre, brake, corner, reverse, push, overtake other vehicles and handle emergency situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTST001 Plan testing and evaluation processes

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFTE001A Plan testing and evaluation processes.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.3, 3.1, 3.3 and 3.4 revised • PC 4.2 and 4.3 merged

Application

This unit describes the skills required to plan a test and evaluation process which may be complex in terms of scope; degree of risk; environmental, political, cultural and social factors that apply; consequences of failure; and degree of control. It includes the requirement to identify the scope of the testing process, to determine the testing methodology and to prepare the plan.

This unit was developed for Defence test and evaluation workers, but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform sophisticated tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Testing

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify testing requirements and undertake scoping	1.1 Analyse the need for testing. 1.2 Undertake definition study where necessary, to determine scope of testing process. 1.3 Complete scoping, identifying rationale for the testing that includes purpose and outcomes. 1.4 Identify and canvas stakeholders to ensure that their requirements are addressed in planning.
2. Determine testing methodology	2.1 Undertake research and analysis to identify impacts and risks, constraining factors and alternate options. 2.2 Analyse methodology technical feasibility, supportability and cost effectiveness and report outcome to key stakeholders. 2.3 Assess alternatives for testing design. 2.4 Identify and report preferred option that fits organisational requirements. 2.5 Consult relevant specialists to determine extent of potential risks. 2.6 Prepare business case and obtain approvals to proceed with test development.
3. Develop test and evaluation plans	3.1 Define aims, objectives and impacts in test plan and timeframes. 3.2 Identify resources to complete quality deliverables on time and within budget. 3.3 Determine test methods by consideration of resource constraints, environmental constraints, evidence requirements, existing capabilities and their compatibility with existing procedures. 3.4 Record testing outcomes in measurable and achievable forms. 3.5 Develop indicators to monitor test performance and seek agreement by relevant parties. 3.6 Investigate potential risks and identify them in the plan. 3.7 Establish a risk management process to analyse information and options.

	<p>3.8 Clarify and agree on skills, roles and responsibilities of team members and stakeholders, and identify reporting requirements.</p> <p>3.9 Address management of test parameters in the plan and design evaluation criteria.</p> <p>3.10 Design and document planning process utilising management tools, in accordance with test and users’ requirements, in consultation with specialists.</p>
4. Finalise test plans	<p>4.1 Maintain security and confidentiality of data.</p> <p>4.2 Promulgate and maintain test plans.</p>

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTE001A Plan testing and evaluation processes.

Assessment Requirements for DEFTST001 Plan testing and evaluation processes

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying risk management techniques
- negotiating timelines, roles and responsibilities with stakeholders and team members
- scheduling testing activities
- use planning techniques related to testing and evaluation that may be complex in terms of scope; degree of risk; environmental, political, cultural and social factors that apply; consequences of failure; degree of control
- using public relations strategies to promote and gain endorsement

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- approval processes
- integrated logistics support
- legislation, organisational policy and procedures that may impact on the test and evaluation process
- management tools suited to implementing testing processes
- organisational change management
- principles relating to the implementation phase of testing processes
- resource plans
- resource scheduling packages

- test and evaluation implementation methods which may be complex in terms of scope; degree of risk; environmental, political, cultural and social factors that apply; consequences of failure; degree of control
- work breakdown structures (WBS)

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTST002 Prepare testing and evaluation processes

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFTE002A Prepare testing and evaluation processes.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.6, 2.3 and 3.2 revised

Application

This unit describes the skills required to prepare for a test and evaluation process. It includes the requirement to establish the testing process, to integrate the testing processes and to develop, review and maintain the test plan.

This unit was developed for Defence test and evaluation workers, but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform sophisticated tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Testing

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Establish test and evaluation processes	<p>1.1 Confirm drivers for the test and evaluation with stakeholders.</p> <p>1.2 Develop test plan in accordance with direction from Test and Evaluation Master Plan.</p> <p>1.3 Determine test methods by consideration of resource constraints, environmental constraints, evidence requirements, existing capabilities and their compatibility with existing procedures.</p> <p>1.4 Brief and negotiate with stakeholders to obtain endorsement for testing process.</p> <p>1.5 Obtain resources.</p> <p>1.6 Review and analyse scope and objectives.</p> <p>1.7 Develop a strategy establishing work breakdown structures in order to implement testing process.</p> <p>1.8 Identify and establish testing infrastructure.</p> <p>1.9 Identify and establish safety systems and procedures.</p> <p>1.10 Identify and obtain specialist and technical support relevant to the testing.</p> <p>1.11 Maintain security and confidentiality of data.</p> <p>1.12 Establish governance structure and processes as detailed in test plan.</p>
2. Conduct start up activities	<p>2.1 Refine test plans in consultation with steering committee and team members, and include precise details for schedules of activities, milestones and resources.</p> <p>2.2 Establish and maintain required systems throughout the process in accordance with the complexity of the testing and in line with test plan.</p> <p>2.3 Confirm team members' understanding of testing and evaluation and commitment to fulfilling the requirements.</p> <p>2.4 Confirm team members' roles and responsibilities for the duration of the process.</p> <p>2.5 Utilise and apply management tools to achieve outcomes.</p>
3. Manage test and	3.1 Integrate all aspects of testing and related processes and establish

evaluation preparedness	<p>links to ensure objectives are met in accordance with test plan.</p> <p>3.2 Establish consultation and reporting mechanisms in accordance with test plan.</p> <p>3.3 Consult with staff and contractors regularly to discuss progress and to ensure effective results.</p> <p>3.4 Monitor integration, and review and amend management plans and any related contracts as appropriate, with results reported in accordance with mechanisms identified in test plan.</p> <p>3.5 Establish ongoing progress monitoring processes against agreed milestones in accordance with test plan, to provide a measure of performance throughout the life of the testing process.</p> <p>3.6 Plan and establish programmed review of objectives and achievement in accordance with test plan.</p>
--------------------------------	---

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTE002A Prepare testing and evaluation processes.

Assessment Requirements for DEFTST002 Prepare testing and evaluation processes

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- using management techniques related to testing and evaluation that may be reasonably complex in terms of scope; degree of risk; environmental, political, cultural and social factors that apply; consequences of failure; degree of control
- using management tools suited to implementing testing processes
- using public relations strategies to promote and gain endorsement

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- approval processes
- change management
- cost schedule control systems
- integrated logistics support
- legislation, organisational policy and procedures that may impact on the test and evaluation process
- management tools suited to planning testing and evaluation processes
- principles relating to the planning phase of testing and evaluation processes
- resource plans
- scheduling packages

- test and evaluation planning methods which may be reasonably complex in terms of scope; degree of risk; environmental, political, cultural and social factors that apply; consequences of failure; degree of control
- work breakdown structure (WBS)

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTST004 Evaluate testing

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFTE004A Evaluate testing.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 3.3 and 3.4 merged • Element 1 one new PC

Application

This unit describes the skills required to evaluate the results of a testing process. It involves analysing data and solving complex problems where the information may not be obvious but can be determined by direct and logical reasoning.

This unit was developed for Defence test and evaluation workers, but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform complex tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

DEFTST006 Analyse test data

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFTE006A Analyse test data.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.4 removed

Application

This unit describes the skills required to analyse data collected during a test and evaluation process. It includes establishing trends and relationships in the data, and establishing the acceptability of the data.

This unit was developed for Defence test and evaluation workers, but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform complex tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Testing

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Perform scientific calculations	1.1 Ensure consistency of raw data with expectations and reasonable ranges. 1.2 Calculate scientific quantities. 1.3 Determine calculated quantities and estimations. 1.4 Present results using the appropriate units, uncertainties and number of significant figures.
2. Analyse trends and relationships in data	2.1 Determine relationships between sets of data. 2.2 Prepare and analyse data to determine if a process is in control. 2.3 Identify possible causes for out of control condition.
3. Determine variation and/or uncertainty in data distributions	3.1 Organise raw data into appropriate frequency distributions. 3.2 Calculate statistical properties for ungrouped and grouped data. 3.3 Interpret statistical properties to determine characteristics of sample or population. 3.4 Calculate standard deviations and confidence limits for means and replicates. 3.5 Determine uncertainty in measurements using statistical analysis. 3.6 Determine data acceptability using statistical tests and organisational procedures.
4. Check for aberrant results	4.1 Identify results that cannot be reconciled with documentation, testing procedures and/or expected outcomes. 4.2 Determine appropriate actions in consultation with supervisor as required.
5. Maintain results	5.1 Store, retrieve and manipulate data following document traceability procedures. 5.2 Present results in an appropriate format. 5.3 Verify entry of data and results. 5.4 Maintain security and confidentiality of data. 5.5 Prepare reports in a format and style consistent with their intended use and organisational guidelines.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTE006A Analyse test data.

Assessment Requirements for DEFTST006 Analyse test data

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- completing mathematical calculations involving fractions, decimals, ratios, proportions and percent
- evaluating mathematical formulae
- interpreting scientific properties
- preparing and interpreting graphs and data

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics of a valid measurement
- procedures for data traceability
- procedures for maintaining and filing records, security of data
- procedures for verifying data and rectifying mistakes
- relevant scientific terminology
- sources of uncertainty in measurements

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTST007 Apply knowledge of test and evaluation processes

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFTE007A Apply knowledge of test and evaluation processes.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to analyse and apply knowledge of test and evaluation processes. This includes the specific knowledge of test and evaluation processes required to support these areas. Applying knowledge of test and evaluation processes is specific to work undertaken by Defence personnel and may be included within a variety of areas such as management, acquisitions, audits, inspections, policy implementation, technical manual development, platform integration, configuration, staff processes, transport and inter-operability.

This unit applies to those working within Defence where knowledge of test and evaluation processes is necessary, but where the worker is not a test and evaluation practitioner.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform complex tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Testing

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Access and analyse relevant test and evaluation information	1.1 Identify and obtain relevant test and evaluation process, safety, legislative and statutory requirements. 1.2 Analyse obtained information to determine relevance and application to the organisation. 1.3 Formulate outcomes of the analysis and provide recommendations relevant to workplace requirements.
2. Implement recommendations specific to test and evaluation	2.1 Apply workplace requirements relevant to test and evaluation processes. 2.2 Determine work requirements while applying relevant recommendations. 2.3 Assess, review and record effectiveness of the recommendations. 2.4 Adjust recommendations, if required, and document for future application.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading					Writing					Oral communication NA					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTE007A Apply knowledge of test and evaluation processes.

Assessment Requirements for DEFTST007 Apply knowledge of test and evaluation processes

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- analysing and evaluating information
- applying safety, legislative and statutory requirements relevant to test and evaluation
- interpreting organisational role relevant to test and evaluation
- applying knowledge of testing and evaluation processes to assist in work and to guide problem solving

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- organisational role relevant to test and evaluation
- safety, legislative and statutory requirements relevant to test and evaluation
- test and evaluation knowledge relevant to work being performed
- test and evaluation processes

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFWHS001 Identify and monitor radiation hazards

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFOH003B Identify and monitor radiation hazards.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.3 reworded • PC 2.1 and 3.1 revised • Element 1 one new PC

Application

This unit describes the skills required to effectively identify the sources of radiation, non-ionising and ionising radiations, that may be a hazard in the workplace and to monitor the hazard and implement the hazard controls that have been recommended. Licensing conditions may be required for those working in this field.

This was developed for those working as Defence workers involved in identifying and monitoring radiation hazards as part of a workplace responsibility, but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Work Health and Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify workplace radiation hazards	1.1 Identify source of radiation and/or equipment. 1.2 Identify and access existing organisational records relevant to the radiation. 1.3 Apply regulatory requirements, including those contained in organisational procedures, throughout the operation. 1.4 Take immediate action to bring source of radiation under control. 1.5 Conduct consultation with stakeholders.
2. Monitor radiation abatement plans or controls	2.1 Monitor pre-existing controls and determine controls are adequate. 2.2 Record and report breaches of protocols, plans and local controls. 2.3 Inspect monitoring equipment regularly, where installed.
3. Maintain workplace radiation records/documentation	3.1 Maintain radiation safety management plans. 3.2 Maintain equipment/instrument deployment and maintenance records/documentation. 3.3 Maintain inventory of radiation sources. 3.4 Maintain records of radiation exposure.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Range of Conditions

Relevant legislation, organisational policies and procedures include:	<ul style="list-style-type: none"> ▶ Australian or international standards ▶ equipment manufacturers' specifications ▶ exposure standards ▶ job safety analysis ▶ legislation, regulations, and codes of practice ▶ previous testing reports ▶ risk assessments ▶ Standing Operating Procedures (SOPs)
Australian or international standards include:	<ul style="list-style-type: none"> ▶ ARPANSA RHS and RPS ▶ AS/NZ ▶ ISO ▶ ICNRP ▶ ICRP

Unit Mapping Information

This unit supersedes and is equivalent to DEFOH003B Identify and monitor radiation hazards.

Assessment Requirements for DEFWHS001 Identify and monitor radiation hazards

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- accessing, reading, interpreting and applying radiation safety plan
- identifying radiation sources
- undertaking risk assessment and control
- observing and responding to changing circumstances and unusual situations in the workplace
- making a subjective and qualitative assessment during a walk through/survey
- identifying changes in workplace configurations
- applying knowledge of relevant WHS legislative framework
- identifying inspection tools and methods appropriate to the workplace
- applying the principles and practices of WHS inspections
- identifying intervention points for advice to assist in work and to guide problem solving

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- meaning of WHS symbols, signs and labels in the workplace
- WHS requirements relevant to radiation in the workplace
- WHS requirements for the workplace, including ways in which WHS is managed and designated personnel responsible for WHS
- organisational policy and standards relevant to radiation

- relevant Australian and international standards

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFWHS002 Develop noise management plans

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFOH004B Develop noise management plans.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.2 removed • Elements 1 and 2 merged • Element 1 one new PC

Application

This unit describes the skills required to measure and analyse work noise and develop relevant noise management plans and procedures. This includes developing and drafting, procedures and plans/instructions for the management, amelioration and/or control of hazardous noise in the workplace.

This unit for developed for Defence workers involved in developing noise management plans as a workplace responsibility, but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team under indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Work Health and Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to develop a workplace noise management plan	1.1 Recognise and acknowledge noise hazards and identify their sources. 1.2 Identify and access legislation and standards appropriate to noise hazard and work noise exposure levels. 1.3 Identify and access existing organisational records relevant to noise hazards. 1.4 Identify, acquire and prepare equipment and resources required for the measurement of noise. 1.5 Measure workplace noise. 1.6 Deploy measuring equipment and record readings.
2. Analyse workplace noise	2.1 Interpret and confirm measurements. 2.2 Analyse and/or determine workplace noise and report findings to appropriate authorities/superiors.
3. Develop noise management plans	3.1 Conduct consultation with stakeholders. 3.2 Identify and interpret technical standards, organisational environmental requirements and occupational noise exposure levels. 3.3 Develop noise management plans and forward to the relevant authority.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Range of Conditions

<p>Relevant organisational policies and procedures include:</p>	<ul style="list-style-type: none"> • Australian or international standards • equipment manufacturers' specifications • exposure standards • previous testing reports • risk assessments • Standing Operating Procedures (SOPs) • state/territory/Commonwealth WHS acts, regulations, codes of practice and guidance material
<p>Work noise includes:</p>	<ul style="list-style-type: none"> • any noise in the workplace that exceeds a comfort level equivalent to that of the normal hearing capacity of human beings • any noise that is unusual or inappropriate in that work environment/role • any noise that may have an adverse impact on human beings

Unit Mapping Information

This unit supersedes and is equivalent to DEFOH004B Develop noise management plans.

Assessment Requirements for DEFWHS002 Develop noise management plans

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- analysing work environment and identifying hazards
- assessing resources needed to establish and maintain WHS in the workplace, including a range of control measures
- assessing risks and design and implementing appropriate WHS systems
- operating noise measuring/monitoring equipment
- measuring and analysing workplace noise
- developing noise management plans that adhere to Australian and organisational standards and recognising stakeholder requirements
- applying knowledge of relevant WHS legislative frameworks
- identifying inspection tools and methods appropriate to the workplace
- identifying intervention points for advice to assist in work and to guide problem solving

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- environmental factors relevant to workplace noise
- noise control requirements
- noise legislation
- noise measuring and monitoring techniques and equipment
- occupational noise exposure level standards/requirements

- organisational policy and standards relevant to workplace noise levels
- provisions and principles of effective WHS management requirements for the organisation/industry.
- relevant Australian and international standards
- reliability of measures
- tolerances of error that may apply

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFWHS003 Apply radio frequency radiation safety procedures

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFOH005B Apply radio frequency radiation safety procedures.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with the new standards• All PC transitioned from passive to active voice• PC 1.3 removed

Application

This unit describes the skills required to apply appropriate safety procedures or plans related to the control or mitigation of radio frequency radiation, including microwaves, radar radio transmissions. This includes researching, consulting about and applying procedures that have been specifically developed for the organisation.

This unit was developed for Defence workers involved in application of radio frequency radiation procedures and also applies to individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Work Health and Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for the application of workplace radio frequency radiation safety procedures/plans	1.1 Identify source of radio frequency radiation. 1.2 Identify and access existing organisational records relevant to the radiation. 1.3 Conduct consultation with stakeholders.
2. Implement radio frequency radiation safety procedures/plans	2.1 Employ radio frequency radiation protective measures. 2.2 Display or publish relevant notices/signs. 2.3 Handle radio frequency radiation sources.
3. Maintain workplace radio frequency radiation safety documentation	3.1 Maintain workplace radio frequency radiation records. 3.2 Maintain equipment/instrument deployment and maintenance records/documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

DEFWHS005 Apply ionising radiation safety procedures

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFOH007B Apply ionising radiation safety procedures.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.3 removed

Application

This unit describes the skills required to apply appropriate safety procedures or plans related to the control or mitigation of ionising radiation. In the context of this unit, ionising radiation may include emissions from radioactive material, apparatus containing radioactive material and x-ray apparatus. The unit includes researching, consulting and applying procedures within an organisation.

This unit applies to those involved in applying ionising radiation safety procedures as a workplace responsibility, but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team under, indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for the application of workplace ionising radiation safety procedures/plans	1.1 Identify source of ionising radiation. 1.2 Identify and access existing organisational records relevant to the radiation. 1.3 Conduct consultation with stakeholders.
2. Apply ionising radiation safety procedures/plans	2.1 Apply ionising radiation protection control measures. 2.2 Ensure notices/signs are displayed. 2.3 Handle ionising radiation sources.
3. Maintain workplace ionising radiation safety documentation	3.1 Maintain workplace ionising radiation records. 3.2 Maintain equipment/instrument deployment and maintenance records/documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFOH007B Apply ionising radiation safety procedures.

Assessment Requirements for DEFWHS005 Apply ionising radiation safety procedures

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- accessing, reading, interpreting and applying information on ionising radiation
- applying knowledge of relevant WHS and ionising radiation safety legislative frameworks
- identifying inspection tools and methods appropriate to the workplace
- applying principles and practices of WHS and ionising radiation safety in the workplace
- identifying intervention points for advice to assist in work and to guide problem solving

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- WHS requirements for workplace supervisors
- relevant Australian or international standards
- relevant organisational policy and standards

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFWHS006 Develop ionising radiation safety plans

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFOH008B Develop ionising radiation safety plans.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.2 removed • Elements 1 and 2 merged • Element 1 one new PC

Application

This unit describes the skills required to measure and analyse ionising radiation and to develop relevant safety plans and procedures. In the context of this unit, ionising radiation may include emissions from radioactive elements, controlled apparatus, sealed and unsealed sources. The unit includes developing and drafting policy, procedures and plans/instructions for the management, amelioration and/or control of ionising radiation in the workplace.

This was developed for those working in Defence involved in developing ionising radiation safety plans as a workplace responsibility, but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team under, indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Work Health & Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for the development of ionising radiation safety plans	1.1 Identify and confirm ionising radiation sources. 1.2 Identify and access standards and legislation appropriate to ionising radiation exposure levels. 1.3 Identify and access existing organisational records relevant to ionising radiation. 1.4 Identify, acquire and prepare equipment and resources required for the measurement of ionising radiation. 1.5 Measure ionising radiation. 1.6 Deploy measuring equipment and record readings.
2. Analyse ionising radiation	2.1 Interpret and confirm measurements. 2.2 Analyse and/or determine ionising radiation and report findings to appropriate authorities/superiors.
3. Develop ionising radiation safety plans	3.1 Conduct consultation with stakeholders. 3.2 Identify and interpret technical standards, organisational environmental requirements and ionising radiation exposure levels. 3.3 Develop ionising radiation safety plans. 3.4 Forward ionising radiation safety plans.
4. Record and interpret data from personal monitors	4.1 Record full exposure data from personal monitors. 4.2 Provide access to individual records to the radiation worker. 4.3 Initiate action whenever anomalous records are obtained. 4.4 Review personal monitoring records regularly and provide recommendations for changes in workplace procedures as appropriate.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFOH008B Develop ionising radiation safety plans.

Assessment Requirements for DEFWHS006 Develop ionising radiation safety plans

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- measuring and analysing ionising radiation
- developing practical ionising safety plans that adhere to Australian and organisational standards and recognise stakeholder requirements
- monitoring and recording data from personal ionising radiation monitors
- identifying inspection tools and methods appropriate to the workplace
- identifying intervention points for advice to assist in work and to guide problem solving

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- principles and practices of WHS and ionising radiation inspections
- ionising radiation control requirements
- ionising radiation exposure level standards/requirements
- ionising radiation legislation
- ionising radiation measuring techniques and equipment
- WHS requirements for the organisation/industry and for supervisors/managers in the workplace
- relevant Australian and international standards
- relevant environmental factors relating to workplace ionising radiation
- relevant organisational policy and standards

- reliability of measures
- tolerances of error that may apply

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFWHS007 Work safely with lasers

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFOH009B Work safely with lasers.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to work safely in an environment where lasers may be employed. This includes identifying Australian Standard class lasers, understanding potential laser hazards, and preparing appropriate laser safety controls, labels and signage.

This unit applies to those working with lasers as a workplace responsibility.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team under, indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Work Health & Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify laser safety issues	1.1 Identify potential laser source. 1.2 Identify type of laser and its Australian Standard class. 1.3 Identify dangers/risks associated with lasers. 1.4 Apply laser safety controls. 1.5 Identify and interpret laser warning signage.
2. Apply safe work practices	2.1 Identify lasers deployed in the workplace. 2.2 Identify and interpret laser exposure situations. 2.3 Identify and apply appropriate personal protective equipment. 2.4 Identify and adhere to other control measures.
3. Report on workplace laser incidents	3.1 Apply incident reporting procedures. 3.2 Comply with health surveillance requirements, including eye testing.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy NA

DEFWHS010 Identify confined space

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFOH012B Identify confined space.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.1 removed

Application

This unit describes the skills required to identify actual or potential confined spaces prior to entering a confined space for work purposes. The unit includes recognising actual and potential confined spaces in one's work environment and understanding the broad limitations they impose on work practices. It also covers identifying potential work health and safety (WHS) concerns and seeking further advice and/or applying appropriate procedures when dealing with WHS issues.

In the context of this unit, a confined space is any compartment or area that has the capability of accumulating a toxic, flammable or explosive atmosphere, or of being flooded, in addition to one of the following characteristics:

- limited opening for access
- no escape route or very restricted means of escape
- limited natural ventilation
- atmosphere containing more than 23.5% or less than 19.5% oxygen

This unit was developed for Defence personnel involved in the identification of confined spaces as a workplace responsibility, but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team under, indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Work Health & Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Recognise a confined space	1.1 Select and don required personal protective equipment (PPE) to identify a confined space. 1.2 Review nature of the possible work space and its characteristics. 1.3 Assess possible work space for its potential to be a confined space. 1.4 Determine precautions to be taken in the presence of a harmful atmosphere. 1.5 Identify and assess other hazards and factors associated with the possible work space to determine the level of risk associated with that space. 1.6 Refer identified hazards to appropriate personnel/authority for further investigation and analysis, where uncertainty exists about confined space potential. 1.7 Confirm safety of possible work space.
2. Carry out appropriate action after identifying a confined space	2.1 Identify and document potential WHS issues. 2.2 Undertake, document and revise risk assessment, whenever there is evidence to indicate that it is no longer valid. 2.3 Document broad limitations the confined space may impose on work practices.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFOH011B Develop laser safety plans.

Assessment Requirements for DEFWHS010 Identify confined space

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- accessing, reading, interpreting and applying information on confined spaces
- identifying and reporting hazards
- understanding the possible nature of the environment
- identifying intervention points for expert advice to assist work and to guide problem solving
- identifying principle risks and associated mitigation

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- appropriate signage, symbols, labels and warning devices
- location of applicable organisational procedures and documents
- preferred order of ways to control WHS risk – hierarchy of controls
- rights and responsibilities of workplace parties under WHS legislation

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFWHS011 Enter confined space

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFOH013B Enter confined space.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.3, 1.5 and 2.7 removed

Application

This unit describes the skills required to prepare to enter confined spaces, to enter the confined space and to finalise egress at the conclusion of the task/s. An individual undertakes this as part of a team in conjunction with other individuals who also have this competency. It is expected that one or more of the team members, or a team member not working in the confined space, will hold a current, recognised, first aid certificate.

In the context of this unit, a confined space is any compartment or area that has the capability of accumulating a toxic, flammable or explosive atmosphere, or of being flooded, in addition to one of the following characteristics:

- limited opening for access
- no escape route or very restricted means of escape
- limited natural ventilation
- atmosphere containing more than 23.5% or less than 19.5% oxygen

This unit was developed for Defence personnel involved in entering confined spaces as a workplace responsibility, but it is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team under indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Work Health & Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for confined space entry	1.1 Identify and confirm requirement for confined space entry from work requests/instructions. 1.2 Identify duration of and limitations on the tasks to be performed in the confined space. 1.3 Identify, acquire and prepare equipment and resources required for the confined space entry. 1.4 Prepare confined space for entry. 1.5 Confirm and delegate team and individual roles and responsibilities within the team. 1.6 Conduct pre-entry tests and checks in accordance with organisational and manufacturers' requirements.
2. Enter confined spaces	2.1 Identify entry/egress points. 2.2 Monitor environmental conditions. 2.3 Maintain verbal and non-verbal communication. 2.4 Operate equipment and resources in accordance with manufacturers' requirements and organisational procedures. 2.5 Adhere to entry permit conditions. 2.6 Recognise and respond to unexpected situations.
3. Finalise confined space entry	3.1 Exit confined space. 3.2 Clean and refurbish equipment. 3.3 Complete documentation and reports.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFOH013B Enter confined space.

DEFWHS012 Test confined space environment

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFOH014B Test confined space environment.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.4 removed • PC 2.2 and 2.3 merged

Application

This unit describes the skills required to test the environment of confined spaces to ensure safe entry and egress. This includes the preparation for and conduct of the test procedures and all post test procedures.

In the context of this unit, a confined space is any compartment or area that has the capability of accumulating a toxic, flammable or explosive atmosphere, or of being flooded, in addition to one of the following characteristics:

- limited opening for access
- no escape route or very restricted means of escape
- limited natural ventilation
- atmosphere containing more than 23.5% or less than 19.5% oxygen

This unit was developed for Defence personnel involved in the testing of confined space environments as a workplace responsibility, but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit must demonstrate the ability to work independently or as part of a team under indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

DEFWHS013 Control entry to confined spaces

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFOH015B Control entry to confined spaces.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.5 removed

Application

This unit describes the skills required to control entry and egress to confined spaces. While exercising the control of entry to confined space may not require the competency to enter confined space, it requires awareness of the legislative requirements and organisational procedures related to confined space entry.

In the context of this unit, a confined space is any compartment or area that has the capability of accumulating a toxic, flammable or explosive atmosphere, or of being flooded, in addition to one of the following characteristics:

- limited opening for access
- no escape route or very restricted means of escape
- limited natural ventilation
- atmosphere containing more than 23.5% or less than 19.5% oxygen

This unit was developed for Defence personnel involved in the control of entry to confined spaces as a workplace responsibility, but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team under, indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Assessment Requirements for DEFWHS013 Control entry to confined spaces

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- accessing, reading, interpreting and applying information on confined spaces
- analysing relevant workplace data to identify hazards, assess risks and evaluate effectiveness of WHS control measures
- analysing working environment to identify hazards, assess risks and design and implement appropriate WHS control measures
- assessing the resources needed to establish and maintain systematic approaches to managing WHS including a range of control measures
- operating equipment pertinent to the control of confined space entry
- identifying intervention points for expert advice to assist in work and to guide problem solving

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- appropriate emergency response procedures
- appropriate signage, symbols, labels and barriers
- entry permit procedures
- incident and accident investigation including WHS record keeping
- risk management principles and application of appropriate measures including hierarchy of control

- role of technical information and experts in designing control measures, and monitoring systems
- training and competency requirements for confined space entry

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFWHS014 Monitor and report on hazardous substances safety

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFOH016B Monitor and report on hazardous substances safety.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with the new standards• All PC transitioned from passive to active voice• PC 1.3 removed• PC 3.1 and 3.2 merged• Elements 2 and 3 merged

Application

This unit describes the skills required to effectively identify hazardous substances that may be present in the workplace and to monitor the hazard and hazard controls that have been recommended/implemented. The unit includes reporting the results of this identification and monitoring to commanders/managers.

In the context of this unit, a hazardous substance includes any substances with the potential, when used at work, to impact on the health or safety of persons and/or the environment (surface/ground water, flora, fauna, atmosphere, soil etc.) at or near the workplace.

This unit was developed for Defence personnel involved in the monitoring and reporting of hazardous substances as a workplace responsibility, but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team under, indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Work health and safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for the identification of a hazardous substance in the workplace	1.1 Identify hazardous substances and sources. 1.2 Identify and access existing organisational records relevant to the hazardous substance. 1.3 Conduct consultation with stakeholders.
2. Monitor hazardous substance controls and maintain records	2.1 Conduct workplace walk throughs and observations. 2.2 Record and report breaches of protocols, plans and local controls. 2.3 Inspect monitoring equipment regularly. 2.4 Review workplace hazardous substance and equipment maintenance records.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning					Reading					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFOH016B Monitor and report on hazardous substances safety.

DEFWHS015 Conduct a work health and safety audit

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFOH017 Conduct a work health and safety audit.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.3, 2.4, 3.1, 3.3 and 4.1 removed • PC 3.2 and 3.4 merged • Elements 3 and 4 merged

Application

This unit describes the skills required to conduct an audit of work health and safety (WHS) requirements in Defence. It includes researching applicable legislation and codes of practice, selecting audit tools, conducting the audit, and following up on the audit to monitor the implementation of recommendations.

This unit was developed for Defence personnel who are involved in the audit of work health and safety requirements as a workplace responsibility, but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform routine tasks in a range of familiar contexts.

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying hazards and assessing and controlling risks
- evaluating work health and safety system
- solving problems
- working effectively with teams/groups
- encouraging other team members
- using a variety of verbal and non-verbal communication techniques
- reading and interpreting WHS legislation, codes of practice and standards
- applying the principles and practices of auditing
- identifying intervention points for expert audit advice to assist in work and to guide problem solving

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- WHS codes of practice and standards
- WHS management systems
- hierarchy of risk control
- incident investigation and process improvement
- written communication to a level required to complete workplace documentation and WHS audit reports

- interpersonal communication
- techniques for giving and receiving feedback
- negotiation techniques
- research techniques
- analysis techniques
- composition of teams and roles and responsibilities of team members

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFWHS016 Conduct work health and safety inspections

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFOH018 Conduct work health and safety inspections.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with the new standards• All PC transitioned from passive to active voice

Application

This unit covers the competency required to conduct specific work health and safety (WHS) workplace inspections in Defence. It includes researching the background of the workplace, consulting with stakeholders prior to the inspection and following up on the inspection to ensure that recommendations are implemented.

This unit was developed for Defence personnel who are involved in WHS workplace inspections as a workplace responsibility, but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Work health and safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for work health and safety inspection	1.1 Identify and research previous inspection reports. 1.2 Analyse incident reporting statistics. 1.3 Identify and prepare inspection tools. 1.4 Inform personnel and finalise visit arrangements.
2. Negotiate with stakeholders	2.1 Identify and brief relevant stakeholders on inspection requirements. 2.2 Consult key stakeholders to determine options for programming inspections. 2.3 Develop and maintain appropriate records of stakeholder requirements. 2.4 Provide stakeholders with current and relevant WHS information.
3. Conduct work health and safety inspections	3.1 Negotiate outcomes with relevant stakeholders. 3.2 Access and utilise external agencies, where required. 3.3 Employ inspection tools appropriate to the area. 3.4 Confirm and record inspection information.
4. Finalise work health and safety inspections	4.1 Determine inspection findings and outcomes. 4.2 Explain identified options and recommendations to stakeholders. 4.3 Prepare and present inspection report.
5. Monitor implementation of inspection findings and recommendations	5.1 Obtain feedback from workplace on implementation of recommendations. 5.2 Monitor and assess implementation of recommendations. 5.3 Document changes to operating procedures.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFOH018 Conduct work health and safety inspections.

Assessment Requirements for DEFWHS016 Conduct work health and safety inspections

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- interpreting WHS legislation, codes of practice and standards, and management systems
- selecting and using appropriate inspection tools and methods
- identifying hazards and assessing risks
- analysing workplace environment
- evaluating WHS environment
- solving problems
- using a variety of verbal and non-verbal communication techniques including
- reading to a level required to interpret and analyse job instructions, workplace forms and inspection reports
- writing at the level required to complete workplace forms and reports
- applying principles and practices of WHS inspections
- identifying intervention points for advice to assist in work and to guide problem solving

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- relevant work health and safety legislation
- work health and safety codes of practice and standards
- work health and safety management systems
- hierarchy of risk control

- incident investigation and process improvement
- inspection techniques
- interpersonal communication
- techniques for giving and receiving feedback
- negotiation techniques
- research techniques
- analysis techniques
- team dynamics
- techniques for supporting others
- composition of teams and roles and responsibilities of team members

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFWHS017 Apply knowledge of WHS legislation

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFCP008 Apply knowledge of WHS legislation.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to analyse and apply knowledge of Work Health and Safety (WHS) legislation. The application of WHS legislation knowledge is specific to a variety of component processes in safety case activities.

This unit applies to those working in Defence who are not specialists in the field but need the knowledge to inform their decision making and underpins advice to stakeholders. This unit was developed for Defence workers involved in the evaluation and review of safety cases but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team under indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Work Health & Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Access and interpret relevant WHS legislation information	1.1 Identify and obtain relevant WHS legislation requirements. 1.2 Analyse WHS legislation information obtained to determine the relevance and application to the organisation. 1.3 Formulate outcomes of the analysis and determine recommendations relevant to WHS legislation requirements.
2. Use knowledge of WHS legislation	2.1 Apply WHS legislation requirements and recommendations relevant to safety cases. 2.2 Assess, review and record effectiveness of the recommendations. 2.3 Adjust recommendations if required and document for future application.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning					Reading					Writing					Oral communication NA					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFPC008 Apply knowledge of WHS legislation.

Assessment Requirements for DEFWHS017 Apply knowledge of WHS legislation

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying organisational requirements relevant to WHS
- applying statutory requirements relevant to the WHS legislation
- identifying, interpreting and analysing WHS legislation requirements relevant to work being performed
- using appropriate information technology and software
- adhering to relevant compliance requirements
- applying knowledge of WHS legislation to assist in work and to guide problem solving

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- configuration management
- WHS legislation relevant to the work performed
- organisational requirements relevant to WHS
- statutory requirements relevant to safety case and safety systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

HLTAID002 Provide basic emergency life support

Modification History

Release	Comments
Release 3	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 2	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the New Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. Changes to evidence requirements relative to revised scope of unit.

Application

This unit describes the skills and knowledge required to recognise and respond to life-threatening emergencies in line with the Australian Resuscitation Council (ARC) Guidelines.

This unit applies to all workers who may be required to provide an emergency response in a range of situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENT

Elements define the essential outcomes.

1. Respond to an emergency situation

PERFORMANCE CRITERIA

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1.1 Recognise an emergency situation

ELEMENT

Elements define the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

- | | |
|--|--|
| <p>1.2 Identify, assess and minimise immediate hazards to health and safety of self and others</p> <p>1.3 Assess the casualty and recognise the need for first aid response</p> <p>1.4 Assess the situation and seek assistance from emergency response services</p> | <p>2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with ARC guidelines</p> <p>2.2 Provide first aid in accordance with established first aid principles</p> <p>2.3 Display respectful behaviour towards casualty</p> <p>2.4 Obtain consent from casualty where possible</p> <p>2.5 Use available resources and equipment to make the casualty as comfortable as possible</p> <p>2.6 Operate first aid equipment according to manufacturer's instructions</p> <p>2.7 Monitor the casualty's condition and respond in accordance with first aid principles</p> |

Assessment Requirements for HLTAID002 Provide basic emergency life support

Modification History

Release	Comments
Release 3	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 2	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1	<p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the New Standards for Training Packages.</p> <p>Significant changes to elements and performance criteria, changes to scope of unit. Changes to evidence requirements relative to revised scope of unit.</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
 - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
 - responded appropriately in the event of regurgitation or vomiting
 - managed the unconscious breathing casualty
 - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
 - followed the prompts of an Automated External Defibrillator (AED)

- Responded to at least one simulated first aid scenario contextualised to the candidate's workplace/community setting, including:
 - demonstrated safe manual handling techniques
 - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
 - allergic reaction
 - anaphylaxis
 - bleeding control
 - choking and airway obstruction
 - respiratory distress, including asthma
 - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
 - ARC Guidelines relevant to provision of CPR and first aid
 - safe work practices to minimise risks and potential hazards
 - Infection control principles and procedures, including use of standard precautions
 - requirements for currency of skill and knowledge
- legal, workplace and community considerations, including:
 - awareness of potential need for stress-management techniques and available support following an emergency situation
 - duty of care requirements
 - respectful behaviour towards a casualty
 - own skills and limitations
 - consent
 - privacy and confidentiality requirements
 - importance of debriefing
- considerations when providing basic emergency life support, including:
 - airway obstruction due to body position
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - chain of survival
 - standard precautions
- principles and procedures for first aid management of the following scenarios:
 - allergic reaction
 - anaphylaxis
 - bleeding control

- cardiac conditions, including chest pain
- choking and airway obstruction
- respiratory distress, including asthma
- shock
- stroke
- basic anatomy and physiology relating to:
 - considerations in provision of first aid for specified conditions
 - chest
 - how to recognise a person is not breathing normally
 - response/consciousness
 - upper airway and effect of positional change

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandage
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressing

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>

HLTAID003 Provide first aid

Modification History

Release	Comments
Release 4.0	Updated mapping information. Equivalent outcome.
Release 3.0	Updated mapping information.
Release 2.0	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1.0	<p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the New Standards for Training Packages.</p> <p>Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit</p>

Application

This unit of competency describes the skills and knowledge required to provide a first aid response to a casualty. The unit applies to all workers who may be required to provide a first aid response in a range of situations, include community and workplace settings.

Specific licensing requirements relating to this competency, including requirements for refresher training, should be obtained from the relevant state/territory Work Health and Safety Regulatory Authority.

Elements and Performance Criteria

ELEMENT

Elements define the essential outcomes.

1. Respond in an emergency situation

PERFORMANCE CRITERIA

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1.1 Recognise an emergency situation

1.2 Identify, assess and manage immediate hazards to health and safety of self and others

1.3 Assess the casualty and recognise the need for first

ELEMENT**PERFORMANCE CRITERIA**

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

aid response

1.4 Assess the situation and seek assistance from emergency response services where required

2. Apply appropriate first aid procedures

2.1 Perform cardiopulmonary resuscitation (CPR)

2.2 Provide first aid in accordance with established first aid principles

2.3 Display respectful behaviour towards casualty

2.4 Obtain consent from casualty where possible

2.5 Use available resources and equipment to make the casualty as comfortable as possible

2.6 Operate first aid equipment according to manufacturer's instructions

2.7 Monitor the casualty's condition and respond in accordance with first aid principles

3. Communicate details of the incident

3.1 Accurately convey incident details to emergency response services

3.2 Report details of incident to workplace supervisor as appropriate

3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

4. Evaluate own performance

4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

4.2 Participate in debriefing to address individual needs

Foundation Skills

The Foundation Skills described those required skills (language, literacy and numeracy) that are essential to performance.

- Oral communication – in order to make an accurate verbal report to emergency response services and workplace supervisor

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAID003 Provide first aid

Modification History

Release	Comments
Release 1.1	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1.0	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the New Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be demonstrated evidence that the candidate has completed the following tasks at least once in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- conducted a hazard assessment and identified strategies to minimise risk
- demonstrated safe manual handling techniques
- assessed airway, breathing and responsiveness of casualty
- performed at least four minutes of uninterrupted CPR on both an infant resuscitation manikin and an adult resuscitation manikin placed on the floor, demonstrating the following techniques on each:
 - checking for response and normal breathing
 - recognising abnormal breathing
 - opening and clearing the airway
 - using correct hand location, compression depth rate in line with the ARC recommended ratio of compressions and ventilations
 - acting in the event of regurgitation or vomiting
 - following single rescuer procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an Automated External Defibrillator (AED)
- conducted a verbal secondary survey

- applied first aid procedures for the following:
 - allergic reactions
 - anaphylaxis
 - asthma
 - basic wound care
 - severe bleeding
 - burns
 - cardiac arrest
 - choking and airway obstruction
 - convulsions
 - envenomation (using pressure immobilisation)
 - fractures, sprains and strains (using arm slings, roller bandages or other appropriate immobilisation techniques)
 - poisoning
 - respiratory distress
 - shock
- provided an accurate verbal report of the incident
- responded to at least two simulated emergency scenarios contextualised to the candidate's workplace/community setting.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- state/territory regulations, first aid codes of practice and workplace procedures including:
 - ARC Guidelines relevant to provision of CPR and first aid
 - safe work practices to minimise risks and potential hazards
 - infection control principles and procedures, including use of standard precautions
 - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
 - need for stress-management techniques and available support following an emergency situation
 - duty of care requirements
 - respectful behaviour towards a casualty
 - own skills and limitations
 - consent
 - privacy and confidentiality requirements
 - importance of debriefing
- considerations when providing first aid including:
 - airway obstruction due to body position

- appropriate duration and cessation of CPR
- appropriate use of an AED
- standard precautions and infection control
- principles and procedures for first aid management of the following scenarios:
 - abdominal injuries
 - allergic reactions
 - anaphylaxis
 - bleeding control
 - burns
 - cardiac conditions
 - choking and airway obstruction
 - cold and crush injuries
 - diabetes
 - dislocations
 - drowning
 - envenomation
 - environmental impact (including hypothermia, hyperthermia, dehydration and heat stroke)
 - epilepsy
 - eye and ear injuries
 - fractures
 - head, neck and spinal injuries
 - minor skin injuries
 - needle stick injuries
 - poisoning and toxic substances
 - respiratory distress, including asthma and other respiratory conditions
 - seizures
 - severe allergic and anaphylactic reactions
 - shock
 - soft tissue injuries
 - unconsciousness, abnormal breathing or not breathing
- basic anatomy and physiology relating to:
 - absence of normal breathing
 - anatomy of the external chest
 - physiology relating to response/consciousness
 - upper airway anatomy and effect of positional change
 - anatomy and physiology considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually:

- in an environment that provides realistic in-depth, industry-validated scenarios and simulations to enable assessment of candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- first aid equipment including
 - roller bandages
 - triangular bandages cloth
 - trauma dressings
 - placebo bronchodilator and spacer device
 - adrenalin auto-injector training device
 - an AED training device
 - emergency rescue blanket
 - workplace first aid kit.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold:

- a current advanced first aid certificate

OR

- at least three years' experience as a health professional, nurse or emergency services provider.
-

ICAICT206A Install software applications

Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to select, install or upgrade basic commercial software applications.

Application of the Unit

This unit applies to workers who require the information and communications technology (ICT) skills to select, install and upgrade basic commercial software applications within a small to large office environment. Communicating effectively and supporting software application packages are key components of any ICT business or office environment.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised</i>

Element	Performance Criteria
<i>unit of competency.</i>	<i>text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Determine software or software upgrade requirements	<p>1.1 Document <i>client</i> requirements and report to <i>appropriate person</i></p> <p>1.2 Act on instructions to meet client requirements, according to <i>organisational requirements</i></p>
2. Obtain software or software upgrade	<p>2.1 Investigate and select a <i>software application program</i> that best conforms to requirements and organisational policies</p> <p>2.2 Obtain application program under instruction from appropriate <i>person</i></p> <p>2.3 Determine <i>licensing requirements</i> and record, according to organisational guidelines</p> <p>2.4 Ensure target <i>computer</i> conforms to the minimum hardware and <i>operating system</i> requirements of the <i>application program</i></p>
3. Install or upgrade software	<p>3.1 Install new or upgraded <i>software application program</i> according to <i>appropriate person</i> or organisational instructions</p> <p>3.2 Complete the installation process efficiently and effectively to minimise disruption</p> <p>3.3 Carry out testing and acceptance, according to corporate guidelines, paying particular attention to possible <i>effect</i> on other systems</p> <p>3.4 Ensure client requirements are satisfied</p> <p>3.5 Refer outstanding <i>client</i> issues to <i>appropriate person</i> as necessary</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - communicate with peers and supervisors
 - support software application deployment
- literacy skills to:
 - interpret user manuals and help functions
 - make decisions about licensing requirements
 - read and write basic workplace documents
 - seek assistance and expert advice
- technical skills to:
 - carry out testing
 - upload and install software
 - use computer hardware.

Required knowledge

- broad general knowledge of:
 - client business domain
 - hardware storage devices
 - input and output devices
 - licensing arrangements and responsibilities
 - operating systems supported by the organisation
 - organisational guidelines for purchasing
 - software application packages
 - software copyright responsibilities.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none"> • install software applications through operating system instructions • configure computer to accept new software or upgrade

	<ul style="list-style-type: none"> carry out testing and acceptance according to corporate guidelines.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> PC where software installation may be performed use of application software currently used in industry documents detailing organisational testing and acceptance policy and procedures appropriate learning and assessment support when required. <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> verbal or written questioning to assess candidate's underpinning knowledge of software upgrade requirements, current industry standard application software and acceptance testing procedures direct observation of candidate upgrading or installing new software.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Client</i> may include:	<ul style="list-style-type: none"> • employees • external organisations • individuals • internal departments.
<i>Appropriate person</i> may include:	<ul style="list-style-type: none"> • authorised business representative • client • supervisor.
<i>Organisational requirements</i> may include:	<ul style="list-style-type: none"> • budget • corporate purchasing • guidelines • licensing arrangements.
<i>Software application program</i> may include:	<ul style="list-style-type: none"> • database programs • email programs • internet browsers • spreadsheets • system browsers • word processing.
<i>Licensing requirements</i> may include:	<ul style="list-style-type: none"> • cost of licence • number of licences required • support provided • type of licence.
<i>Computer</i> may include:	<ul style="list-style-type: none"> • laptops • servers • workstations.
<i>Operating system</i> may include:	<ul style="list-style-type: none"> • Mac OS X • Linux • Windows.
<i>Effect</i> may relate to:	<ul style="list-style-type: none"> • data entry • effect on normal business • installation time • problems.

Unit Sector(s)

General ICT

ICAICT302A Install and optimise operating system software

Modification History

Version	Comments
ICAICT302A	This version first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

Unit Descriptor

This unit defines the performance outcomes, skills and knowledge required to install operating system (OS) software and to make adjustments as a means of optimising the system to accommodate business and client needs.

Application of the Unit

This unit applies to individuals in a technical support role who are required to identify the most suitable OS to meet organisational requirements. The unit develops the ability to install, configure and optimise the OS to identified vendor specifications.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised</i>

Element	Performance Criteria
<i>unit of competency.</i>	<i>text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Determine function of operating system	<p>1.1 Identify and demonstrate understanding of the purposes of <i>operating system</i></p> <p>1.2 Distinguish between batch system, real-time system, multi-tasking system</p> <p>1.3 Compare and contrast different operating systems and their features</p> <p>1.4 Identify and demonstrate knowledge of the basic functions of operating system, including file system, memory management, process scheduling</p> <p>1.5 Identify and demonstrate management of virtual memory</p>
2. Obtain operating system	<p>2.1 Contact operating system vendors to obtain technical specifications and system requirements</p> <p>2.2 Identify the process and steps required to install and configure the operating system using <i>installation components</i></p> <p>2.3 Document adjustment recommendations and provide to <i>appropriate person</i></p> <p>2.4 Determine and apply knowledge of licensing, hardware and security requirements</p>
3. Install, configure and optimise operating system	<p>3.1 Install, configure and test operating system using installation components and <i>boot-utility options</i></p> <p>3.2 Use the relevant <i>operating system user interface</i> to correctly configure the installation</p> <p>3.3 Optimise the system to meet <i>organisational requirements</i></p> <p>3.4 Document the system according to organisational requirements</p> <p>3.5 Install the operating system with minimal disruption to <i>client</i> or users</p>
4. Provide instruction to meet new software	<p>4.1 Provide one-to-one instruction about changes to the client or users as required</p>

requirements	4.2 Obtain client evaluation about new system to ensure requirements are met, using appropriate <i>feedback mechanism</i>
--------------	---

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - liaise with people working across different levels and in different contexts, such as operating system vendors and clients
- literacy skills to:
 - interpret technical computer installation manuals
 - obtain written and verbal feedback from clients
 - present information, such as the use of diagnostic tools
 - provide verbal instructions to client
- technical skills to:
 - install and configure operating system software
 - write instructions for clients.

Required knowledge

- current industry-accepted hardware and software products
- functions and features of operating systems used by the organisation
- installation and configuration of systems software
- architecture of current technical systems
- deployment of current organisational systems
- organisational requirements for operating system software
- prerequisites for system software installation
- set-up and configuration procedures
- software packages supported by the organisation
- system's current functionality
- system's diagnostic software
- vendor specifications and requirements for installation.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • install, configure and test an operating system to improve system performance with minimum disruption to clients.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • personal computer where installation may be performed • OS software and technical documentation • organisational documentation • appropriate learning and assessment support when required • modified equipment for people with special needs.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct observation of candidate: <ul style="list-style-type: none"> • questioning team members, supervisors and clients • installing and testing an operating system • review of candidate's practical assignments and reports.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Operating system</i> may include:</p>	<ul style="list-style-type: none"> • Linux: <ul style="list-style-type: none"> • Debian • Fedora • Google Chrome OS • Kubuntu • Linux Mint • Red Hat • Ubuntu • Mac OS X • Microsoft Windows: <ul style="list-style-type: none"> • Windows 2000 • Windows XP (32 bit versus 64 bit) • Windows Vista (32 bit versus 64 bit) • Windows 7 (32 bit versus 64 bit) • mobile operating systems: <ul style="list-style-type: none"> • Android • Blackberry • iPhone • Palm • Symbian • Windows Phone 7 series.
<p><i>Installation components</i> may include:</p>	<ul style="list-style-type: none"> • configure power management: <ul style="list-style-type: none"> • hibernate • sleep timers • standby • suspend • wake on local area network (LAN) • demonstrate safe removal of peripherals • device manager: <ul style="list-style-type: none"> • driver signing • install and update devices drivers

	<ul style="list-style-type: none"> • verify • directory structures: <ul style="list-style-type: none"> • create folders • navigate directory structures • disk preparation order: <ul style="list-style-type: none"> • format drive • partition • start installation • files: <ul style="list-style-type: none"> • attributes • creation • extensions • permissions • file systems, such as FAT32 versus new technology file system (NTFS) • installation methods: <ul style="list-style-type: none"> • boot media, such as DVD, CD, floppy or universal serial bus (USB) • factory recovery partition • install from image • network installation • recover CD • operating system installation options: <ul style="list-style-type: none"> • file system type • network configuration • repair install • user data migration - user state migration tool (USMT) • verification of hardware compatibility and minimum requirements • virtual memory.
Appropriate person may include:	<ul style="list-style-type: none"> • authorised business representative • client • supervisor.
Boot-utility options may include:	<ul style="list-style-type: none"> • automated system recovery (ASR) • boot options • boot to restore point • disk boot order or device priority • emergency repair disk (ERD) • recovery console • recovery options • safe mode

	<ul style="list-style-type: none"> types of boot devices (disk, network, USB).
<i>Operating system user interface</i> may include:	<ul style="list-style-type: none"> Windows-adopting interface to undertake similar tasks with chosen operating system: <ul style="list-style-type: none"> administrative tools, such as performance monitor, event viewer, services and computer management command prompt utilities, such as ipconfig, Ping and Telnet control panel location of basic network settings between OS versions MMC my computer my network places or home group run line utilities: <ul style="list-style-type: none"> cmd direct diagnostics (DXdiag) msconfig MSINFO32 REGEDIT start menu task bar or systray task manager Windows Explorer - Libraries in Windows 7.
<i>Organisational requirements</i> may include:	<ul style="list-style-type: none"> availability of system to be optimised client support documentation in-house or vendor contracting arrangements relating to IT purchasing IT policy and procedures relating to service levels and installation level of complexity of technical manuals.
<i>Client</i> may include:	<ul style="list-style-type: none"> department within the organisation person with special needs person within a department third party.
<i>Feedback mechanism</i> may include:	<ul style="list-style-type: none"> interview meeting questionnaire survey.

Unit Sector(s)

General ICT

ICAICT303A Connect internal hardware components

Modification History

Release	Comments
Release 1	This Unit first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to modify and connect system hardware components according to client and user requirements.

Application of the Unit

This unit applies to support technicians who modify and connect system components. Ensuring the integrity of the system after the operation is critical in the context of minimising client disruption and need for continuing desktop operation.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills</i>

Element	Performance Criteria
	<i>and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Identify, categorise and distinguish between the different types of internal hardware components	1.1 Identify and categorise the different <i>internal hardware components</i> 1.2 Explain the purpose and characteristics of the different internal hardware component categories 1.3 Distinguish between the different types of devices within each internal hardware component category
2. Determine components required	2.1 Identify and clarify user internal hardware component requirements according to <i>organisational guidelines</i> 2.2 Organise and record user component requirements, pass on to <i>appropriate person</i> for evaluation and vendor selection
3. Obtain components	3.1 Contact vendors to obtain technical specifications for the proposed components 3.2 Assess the options and provide recommendations to the appropriate person for final analysis 3.3 Obtain components to prepare for installation
4. Install components	4.1 Develop plans, with prioritised tasks and contingency arrangements, for the installation of selected components with minimum disruption to <i>clients</i> 4.2 Liaise with appropriate person to obtain approval for the plans 4.3 Install and configure components according to plan, installation procedures and <i>organisational requirements</i> 4.4 Test components for error-free performance, using available technology 4.5 Identify and resolve identified problems 4.6 Test and enhance system performance, using knowledge of the system, to meet organisational benchmarks 4.7 Document the installation and configuration process according to organisation guidelines
5. Evaluate modified	5.1 Collect client or user feedback and analyse against client

system	requirements 5.2 Correct identified shortcomings in the system and record actions
--------	--

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - consult with peers and supervisors, and internal and external clients
 - interpret technical computer installation manuals
 - interpret user manuals and help functions
- literacy skills to:
 - organise resources for one-to-one instruction
 - plan, prioritise and organise work
 - write technical reports and maintain records
- planning and organisational skills to address technical issues
- problem-solving skills to anticipate and respond to a range of driver-related errors that may arise
- technical skills to:
 - comprehend how the operating system will communicate with the installed component
 - install components
 - test components using available technology
 - test system performance.

Required knowledge

- areas of the operating system relevant to configuration and testing
- current industry-accepted hardware and software products
- environmental considerations in e-waste disposal
- organisational guidelines and organisational requirements with regard to safety, recycling and component installation
- system's diagnostic software and current functionality
- vendor specifications and requirements for component installation.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • identify and categorise the different types of internal hardware components • modify system's hardware to meet client requirements • plan the modification and connect internal hardware components according to vendor and technical specifications • install components across a variety of situations and account for unexpected contingencies.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • personal computer and internal hardware components for installation • current industry standard performance testing software • documents detailing organisational guidelines and requirements • technical manuals and tools • appropriate learning and assessment support when required • modified equipment for people with special needs. <p>Note: The careful planning and promotion of hardware upgrades and changes are critical to the effective support of business functions. Hardware modifications need to be risk managed similar to other business processes. The effective management and execution of the component maintenance and replacement process may significantly determine the amount of downtime a company encounters.</p>
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • verbal or written questioning to assess candidate's knowledge of system diagnostic software and system functionality • direct observation of candidate connecting internal hardware components • evaluation of client requirements and candidate's final recommendations

	<ul style="list-style-type: none"> review of candidate's written notes. <p>Note: Evidence for assessment from industry or vendor-certified training may be presented for the whole or part of this unit depending on the range of variables and performance criteria.</p>
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Internal hardware components may include:	<ul style="list-style-type: none"> adapter card components: <ul style="list-style-type: none"> communications: <ul style="list-style-type: none"> modem network interface card (NIC) I/O: <ul style="list-style-type: none"> parallel small computer system interface (SCSI) serial universal serial bus (USB) multimedia: <ul style="list-style-type: none"> capture cards sound card TV tuner cards video:

Unit Sector(s)

General ICT

ICAICT304A Implement system software changes

Modification History

Version	Comments
ICAICT304A	This version first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to implement system software changes and to hand over the modified system to the client's operational area.

Application of the Unit

This unit applies to those working in support roles who are required to update operating systems on client computers with the latest technology fixes.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of</i>

Element	Performance Criteria
	<i>performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Determine system changes required	1.1 Determine and record required changes to <i>system</i> 1.2 Ensure that documentary evidence exists to support changes and evaluate changes required 1.3 Complete <i>documentation</i> required according to maintenance methodologies 1.4 Clarify and confirm the nature of the changes with the <i>client</i> 1.5 Obtain technical data from reliable sources and request other resources that may be required to complete the changes
2. Carry out system changes	2.1 Plan the procedure to effect intended changes 2.2 Consult with colleagues and <i>users</i> involved in the proposed changes and agree a mutually acceptable timeline and method of implementation 2.3 Copy initialisation or configuration files prior to implementation 2.4 Create a roll-back path in the event of failure 2.5 Ensure that changes required in <i>software</i> are made according to project or <i>organisational guidelines</i> 2.6 Test and verify that the changes have been made according to implementation guides and <i>organisational standards</i>
3. Present changes to client	3.1 Demonstrate changes to the client and explain the impact of these changes 3.2 Work towards making these changes acceptable to the client if changes are rejected, or making further modifications if required 3.3 Update documentation and repositories according to standards and update modifications made to the change-management system
4. Perform handover to client	4.1 Update documentation and client procedures to reflect changes made 4.2 Secure sign-off of acceptance documents by client 4.3 Facilitate handover of modified system to client's operational area

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - consult with colleagues and users
 - evaluate client user requirements
- literacy skills to:
 - interpret organisational guidelines and standards
 - interpret policy and procedures
 - interpret technical manuals
 - write documentation and client procedures
- planning and organisational skills to:
 - effect intended changes
 - prioritise and organise own work
 - technical skills to install and configure system software.

Required knowledge

- business scheduling requirements
- change control procedures
- client business domain
- current industry-accepted hardware and software products
- emerging standards for data and voice communications
- system's current functionality
- features of system under modification
- organisational policy and procedures with regard to system changes
- vendor software services with regard to system changes.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
-------------------------------	--

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none"> • evaluate, document and implement changes to the system with minimum disruption to the system and client users.
Context of and specific resources for assessment	Assessment must ensure access to: <ul style="list-style-type: none"> • computer • system software currently used in industry • technical manuals and tools • appropriate learning and assessment support when required • modified equipment for people with special needs.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: <ul style="list-style-type: none"> • verbal or written questioning to assess candidate's knowledge of the system's functionality • direct observation of candidate implementing software change • evaluation of candidate's change process and updated modifications • review reports prepared by candidate, including log books and test results.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>System</i> may include:	<ul style="list-style-type: none"> • application • business • computers • financial system • information system • management system • mobile equipment • network • software.
<i>Documentation</i> for version control may follow:	<ul style="list-style-type: none"> • audit trails • client training • International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards • maintaining equipment inventory • naming standards • project-management templates and report writing • satisfaction reports • version control.
<i>Client</i> may include:	<ul style="list-style-type: none"> • customer • external organisation • individual • internal department • internal employee.
<i>Users</i> may include:	<ul style="list-style-type: none"> • department within the organisation • person within a department • third party.
<i>Implementation</i> may include:	<ul style="list-style-type: none"> • formulating methods for standby operations or contingency plans • implementing the entire system.
<i>Software</i> may include:	<ul style="list-style-type: none"> • commercial software applications • in-house or customised software • organisation-specific software

	<ul style="list-style-type: none"> packaged software.
<i>Organisational guidelines</i> may include:	<ul style="list-style-type: none"> communication methods content of emails dispute resolution document procedures and templates downloading information and accessing particular websites financial control mechanisms making voice or video calls opening mail with attachments personal use of emails and internet access virus risk.
<i>Organisational standards</i> may include:	<ul style="list-style-type: none"> communication with stakeholders dispute resolution and modification procedures formal procedures that must be adhered to, such as check points and sign-offs with documented procedures and templates implementation of financial control mechanisms processes for determining size and cost.

Unit Sector(s)

General ICT

ICANWK305A Install and manage network protocols

Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to install and manage network protocols in a networking environment.

Application of the Unit

This unit applies to network administrators who are required to ensure that appropriate protocols have been installed in networks to allow user functionality. The role will also involve the maintenance of installed protocols.

This unit requires the application of transmission control protocol or internet protocol (TCP/IP) and OSI models. Protocols transcend organisational size and network complexity.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Install and manage network protocols	1.1 Select, test and validate appropriate <i>network protocol services</i> 1.2 Design a <i>network</i> addressing system, with subnet and host IDs, including appropriate <i>devices</i> 1.3 Configure hosts and workstations to use IP addresses either manually or through automatic allocation of addresses, such as found with dynamic host configuration protocol (DHCP)
2. Identify network protocol applications	2.1 Review a range of well-known network protocol <i>applications</i> 2.2 Evaluate client user requirement and recommend network-protocol services 2.3 Apply IP addressing scheme according to approved policy and procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to evaluate client user requirements and map to appropriate protocols
- learning skills to ensure currency with protocols development
- literacy skills to interpret technical manuals
- organisational skills to plan, prioritise and organise work
- problem-solving skills to develop and refine configuration protocols

- technical skills to:
 - configure workstations
 - develop strategic initiatives when designing a network addressing system
 - test components using available technology
 - write detailed technical notes.

Required knowledge

- client business domain, including client organisation structure and business functionality
- current communications technologies and their associated protocols
- current industry-accepted hardware and software products and general features and capabilities
- network protocols currently in use in organisation and industry
- vendor product range and development directions.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • configure, test and validate network protocols in order to facilitate interconnectivity • install and manage network protocols in a network, and troubleshoot when problems arise.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • a live network • application software and operating system • appropriate learning and assessment support when required • modified equipment for people with special needs • networked computers • organisational guidelines • technical documentation and installation manuals • vendor software.
Method of assessment	A range of assessment methods should be used to assess practical

	<p>skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • verbal or written questioning to assess candidate's knowledge of communications technologies and network protocols • direct observation of candidate configuring network or application protocols • review of candidate's analysis of client user requirements and final recommendations • evaluation of performance test results conducted by candidate.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Network protocol services</i> may include:	<ul style="list-style-type: none"> • address resolution protocol (ARP) • DHCP • electronic mail protocols • file transfer protocol (FTP) • H.323 protocol • hypertext transfer protocol (HTTP) • internet protocol (IP) • internet protocol version 4 (IPv4) • internet protocol version 6 (IPv6) • simple network management protocol (SNMP)
--	---

	<ul style="list-style-type: none">• simple object access protocol (SOAP)• TCP/IP• wireless application protocol (WAP).
<i>Network</i> may include:	<ul style="list-style-type: none">• large and small local area networks (LANs)• virtual private networks (VPNs)• wide area networks (WANs)• wireless local area networks (WLANs).
<i>Devices</i> may include:	<ul style="list-style-type: none">• emulators• gateways• routers.
<i>Applications</i> may include:	<ul style="list-style-type: none">• FTP• HTTP• hypertext transfer protocol secure (HTTPS)• secure shell• secure socket layer (SSL)• simple mail transfer protocol (SMTP)• Telnet (not secure).

Unit Sector(s)

ICANWK410A Install hardware to a network

Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAIT Information and Communications Technology Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan, manage and install new hardware components in a network.

Application of the Unit

This unit applies to those employed in technical information technology (IT) support roles, such as network administrators, who are required to install and support network hardware in a peer-to-peer or client-server networked environment.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the</i>

Element	Performance Criteria
	<i>required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Determine network hardware requirements	<p>1.1 Assess client network hardware and cabling requirements, considering compatibility with existing application software and operating system</p> <p>1.2 Analyse requirements against local area network (LAN), wide area network (WAN), wireless networks, and mobile equipment access design limitations and organisational guidelines</p> <p>1.3 Evaluate client requirements according to organisational guidelines, corporate purchasing procedures, licensing arrangements and budget</p>
2. Obtain network hardware	<p>2.1 Contact vendors and obtain technical specifications</p> <p>2.2 Evaluate or test hardware according to client requirements and organisational guidelines</p> <p>2.3 Document recommendations and provide copies to appropriate person</p> <p>2.4 Determine and document licensing requirements and security issues</p> <p>2.5 Acquire hardware according to recommendations and organisational procedures</p> <p>2.6 Organise cabling infrastructure where required</p>
3. Install network hardware	<p>3.1 Conduct installation with minimal disruption to clients</p> <p>3.2 Install hardware according to appropriate installation procedures</p> <p>3.3 Configure and test the installation to ensure that it meets client needs</p>
4. Provide instruction and support for installed products	<p>4.1 Determine and document client instructions and needs</p> <p>4.2 Provide one-to-one or group instruction to client and users, as required</p> <p>4.3 Obtain client evaluation and feedback, to ensure that</p>

	client requirements have been met
--	-----------------------------------

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to assess current client hardware and future requirements
- communication skills to:
 - discuss client requirements and specifications
 - interpret client budget requirements
 - interpret technical and hardware installation manuals
 - provide client instruction
- literacy skills to write technical notes and reports
- numeracy skills to plan, prioritise and organise work
- planning and organisational skills to maintain the continuity of network operations and business functions during network installation tasks
- research skills to document licensing requirements and security issues
- technical skills to:
 - evaluate client equipment for requirements
 - use application and diagnostic software.

Required knowledge

- overview knowledge of:
 - current industry, data and voice networking, security products, devices and procedures
 - current industry-accepted network protocols
 - organisational contracting procedures and responsibilities
 - system diagnostic software
- current industry-accepted network hardware and software products
- hardware and software installation procedures
- LAN capabilities and characteristics, such as network type, IP addressing, switch or hub operation
- network connections, including types of cables and cabling distance limitations and wireless connections
- operating systems sufficient to enable basic installation
- set-up and configuration procedures

- software packages supported by the organisation.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • evaluate client user requirements and hardware installation • install a range of network hardware by planning, managing and supporting the installation of new components in a network, according to organisational policies and procedures.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • vendor hardware and software components • application software and operating system • hardware maintenance tools • live network • networked computers • organisational guidelines • technical documentation and installation manuals • appropriate learning and assessment support when required. <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • verbal or written questioning to assess candidate's underpinning knowledge • direct observation of candidate installing network devices • review of instructional guides for client or group presentation prepared by candidate • evaluation of performance test results prepared by candidate.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level,</p>

	<p>language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Network hardware</i> may include:	<ul style="list-style-type: none"> • access points • firewalls • gateways • hubs • IP cameras • mobile phones • modems • network bridges • network interface cards • network printers • network scanners or multifunction devices • network-attached storage (NAS) • personal digital assistants (PDAs) • print servers • routers • switches.
<i>Application software</i> may include:	<ul style="list-style-type: none"> • database programs to handle data and voice functionality • email programs • internet browsers • spreadsheets • system browsers • word processing.
<i>Operating system</i> may	<ul style="list-style-type: none"> • Linux • Mac

include:	<ul style="list-style-type: none"> • Windows.
<i>Organisational guidelines</i> may include:	<ul style="list-style-type: none"> • communication methods • content of emails • dispute resolution • document procedures and templates • downloading information and accessing particular websites • financial control mechanisms • opening mail with attachments • personal use of emails and internet access • virus risk.
<i>Client</i> may include:	<ul style="list-style-type: none"> • clubs • external organisations • individuals • internal departments • internal employees.
<i>Appropriate person</i> may include:	<ul style="list-style-type: none"> • authorised business representative • client • supervisor.

ICANWK411A Deploy software to networked computers

Modification History

Version	Comments
ICANWK411A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan, manage and support the installation of new or upgraded software to networked computers according to vendor and organisation specifications.

Application of the Unit

This unit applies to those involved in installing, configuring, maintaining and supporting software, such as network administrators and network support staff.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold</i>

Element	Performance Criteria
<i>unit of competency.</i>	<i>italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Determine operating system and software and hardware requirements	<p>1.1 Assess client software and licensing requirements, considering compatibility with existing application software and operating system</p> <p>1.2 Assess hardware requirements</p> <p>1.3 Analyse requirements against local area network (LAN), wide area network (WAN), and wireless networks within organisational guidelines</p> <p>1.4 Evaluate client requirements according to organisational guidelines, corporate purchasing procedures and budget</p>
2. Obtain deployment software to automate deployment	<p>2.1 Evaluate deployment software according to client requirements and organisational guidelines</p> <p>2.2 Contact vendors and obtain technical specifications, including support arrangements and licensing</p> <p>2.3 Acquire software and licences, according to organisational procedures</p> <p>2.4 Store software licences and manuals, according to organisational guidelines</p>
3. Automate installation of operating system via network	<p>3.1 Plan and deploy operating system according to appropriate vendor installation procedures with minimal disruption to network and clients</p> <p>3.2 Configure and test installation to ensure that it meets client needs and vendor specifications</p> <p>3.3 Install updates and patches</p>
4. Automate installation of software packages via network	<p>4.1 Plan and deploy software packages according to appropriate vendor installation procedures with minimal disruption to network and clients</p> <p>4.2 Configure and test installation to ensure that it meets client needs and vendor specifications</p>

	4.3 Install updates and patches
5. Test and sign off	<p>5.1 Test installed operating system and software for error-free performance, identifying and resolving problems</p> <p>5.2 Determine and document security and licensing issues</p> <p>5.3 Obtain client evaluation and feedback, to ensure that client requirements have been met</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to liaise with a client to determine functional requirements of network
- literacy skills to document client requirements
- problem-solving skills to troubleshoot and debug:
 - deployment issues
 - configuration issues
- research skills to determine most suitable solution for client
- technical skills to:
 - implement LANs
 - implement various software deployment solutions.

Required knowledge

- overview knowledge of:
 - network protocols and operating systems
 - organisational contracting procedures and responsibilities
 - software licensing requirements and documentation
 - transmission control protocols or internet protocols (TCPs/IPs) and applications
- detailed knowledge of:
 - current industry standards related to software deployment
 - deployment software configuration
 - configuration of automated deployment processes
 - operating system deployment
 - software package deployment
 - troubleshooting deployment processes.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • identify client software requirements • plan and deploy automatic installation of operating system and software • configure and test installation, ensuring client needs are met.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • site or prototype where deployment processes may be implemented • live network • software tools to support implementation of deployment processes • technical documentation and installation manuals • organisational guidelines • appropriate learning and assessment support when required. <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • verbal or written questioning to assess candidate's knowledge of underpinning knowledge and skills • direct observation of candidate performing the tasks required to successfully implement automated deployment processes • documentation produced in a small project environment that reflects the understanding of client and technical skills required.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally</p>

	<p>appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Client</i> may include:	<ul style="list-style-type: none"> • external organisations • individuals • internal departments • internal employees.
<i>Hardware</i> may include:	<ul style="list-style-type: none"> • networks • network interface card (NIC) • personal computers • servers • workstations.
<i>Deployment software</i> may include:	<ul style="list-style-type: none"> • Acronis • Altiris • Ghost • remote installation services (RIS) and wireless distribution system (WDS) • Windows Server tools.
<i>Vendors</i> may include:	<ul style="list-style-type: none"> • Adobe • Apple • Citrix • Linux or Unix • Microsoft • Novell • open source.

<i>Operating system</i> may include:	<ul style="list-style-type: none">• Linux• Mac• Unix• Windows.
<i>Software packages</i> may include:	<ul style="list-style-type: none">• office applications• utilities.

Unit Sector(s)

Networking

ICASAS203A Connect hardware peripherals

Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to connect hardware peripherals according to instructions.

Application of the Unit

This unit applies to workers who require the information and communications technology (ICT) skills to connect a variety of hardware peripherals to different configurations and types of ICT equipment. Communicating effectively, and simplifying and solving technical incompatibility conflicts and problems are key components of this ICT support role.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text</i>

Element	Performance Criteria
<i>unit of competency.</i>	<i>is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Confirm client requirements	<p>1.1 Identify and confirm peripheral requirements of client according to organisational standards</p> <p>1.2 Document client requirements and peripherals needed and report findings to the appropriate person according to organisational standards</p> <p>1.3 Verify client requirements with appropriate person according to organisational standards and reporting procedures</p> <p>1.4 Take action to ensure client support expectations are covered by vendor warranty and support services</p>
2. Obtain required peripherals	<p>2.1 Obtain peripherals under instruction from appropriate person</p> <p>2.2 Enter details of peripherals into equipment inventory according to organisational standards</p> <p>2.3 Validate that contents of delivered components and physical contents match the packing list and resolve discrepancies if necessary</p> <p>2.4 Store peripherals according to vendors guidelines</p>
3. Connect hardware peripherals	<p>3.1 Verify timeframe for installation schedule with client</p> <p>3.2 Remove old peripherals with minimal disruption to clients if they are to be replaced, taking into account environmental considerations and OHS standards</p> <p>3.3 Connect new peripherals with minimum disruption to clients, taking into account operating system procedures</p> <p>3.4 Configure computer to accept new peripherals</p> <p>3.5 Test hardware peripherals and confirm client satisfaction, paying particular attention to possible effect on other systems and making adjustments as required</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service and conflict-resolution skills to:
 - ensure proposed actions are consistent with client's expectations
 - transfer and collect information
- literacy skills to:
 - document client requirements
 - follow vendor guidelines
 - present information
 - update equipment inventory
- negotiation skills to interact with other team members and clients
- problem-solving skills to resolve routine installation and configuration issues
- technical skills and decision-making skills to:
 - ensure compatibility of peripherals with operating system
 - remove and install peripherals
 - undertake maintenance procedures.

Required knowledge

- broad general knowledge of:
 - computer operating systems
 - help desk and maintenance practices
 - peripheral devices
 - OHS procedures for electrical equipment
 - interconnectivity of technical system components
- current industry-accepted hardware and software products
- detailed knowledge of inventory procedures
- organisational guidelines relating to external suppliers and vendors.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • safely connect several different types of hardware peripherals to the system according to vendor instructions with a minimum of downtime using known routines and procedures • locate, interpret and use vendor documentation related to connection and storage of hardware peripherals • test operation of newly installed hardware peripherals and confirm client satisfaction • adhere to OHS regulations when working with electrical equipment.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • sites with a representative range of workstations, hardware peripherals, internet connections, cabling, and software to be installed, interconnected and configured • hardware and software currently used in industry • technical documentation, including organisational hardware blueprint • vendor support • appropriate learning and assessment support when required. <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct observation of candidate installing, connecting and configuring hardware peripheral devices • review of reports that document client requirements and peripherals completed for different scenarios and situations • verbal or written questioning to assess candidate's ability to locate, use and interpret vendor documentation • direct observation of candidate testing hardware peripherals added to a system.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking</p>

	<p>background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Peripheral may include:	<ul style="list-style-type: none"> • Bluetooth device • firewire (IEEE 1394) device • hard drive • keyboard • laptop • mobile phone • modem • mouse • multimedia kit • pen • personal digital assistant (PDA), such as palmtop • printer • scanner • speaker • tape cartridge • touch pad • universal serial bus (USB) device • wireless fidelity (wi-fi) router.
Client may include:	<ul style="list-style-type: none"> • external organisations • individuals • internal departments.
Organisational standards may include:	<ul style="list-style-type: none"> • communication methods • content of emails • dispute resolution • document procedures and templates • downloading information and accessing particular websites • financial control mechanisms

	<ul style="list-style-type: none"> • opening mail with attachments • personal use of emails and internet access • virus risk.
<i>Appropriate person</i> may include:	<ul style="list-style-type: none"> • authorised business representative • client • help-desk person • subject matter expert • supervisor • system administrator.
<i>Equipment inventory</i> may include detailed lists of peripherals, including:	<ul style="list-style-type: none"> • hard drives • hubs • modems or other connectivity devices • monitors • other peripheral devices • personal computers • PDA • printers • switches.
<i>Store</i> may include:	<ul style="list-style-type: none"> • anti-static packaging • controlled humidity • controlled temperature • secure storage area • shock and vibration minimisation • silica gel desiccant • stacking limits.
<i>Environmental considerations</i> may include:	<ul style="list-style-type: none"> • recycling of packaging: <ul style="list-style-type: none"> • cardboard • paper • polystyrene • recycling or disposal of ewaste: <ul style="list-style-type: none"> • cathode ray tube (CRT) monitors • printed circuit boards • redundant hardware.
<i>OHS standards</i> may include:	<ul style="list-style-type: none"> • electrical safety • safe lifting methods • ventilation.
<i>Operating system</i> may include:	<ul style="list-style-type: none"> • GNUs Not Unix (GNU) • Linux • Mac OS X • Microsoft Windows

	<ul style="list-style-type: none">• Unix-like operating systems:<ul style="list-style-type: none">• HP-UX• IBM AIX• Silicon Graphics IRIX• Sun Solaris.

Unit Sector(s)

Systems administration and support

ICASAS205A Maintain IT system integrity

Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to protect and secure stand-alone or client server environments.

Application of the Unit

This unit applies to technical support personnel who are required to protect and secure equipment and software in a small or large office environment. Maintaining system integrity through backup and recovery procedures, virus security and implementing licensing and copyright requirements are key components of any information and communications technology (ICT) environment.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the</i>	<i>Performance criteria describe the performance needed to</i>

Element	Performance Criteria
<i>essential outcomes of a unit of competency.</i>	<i>demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Carry out system backup	1.1 Create and review organisational backup schedule 1.2 Determine storage media and hardware for backups 1.3 Ensure backups are carried out according to the schedule 1.4 Label and store backups according to organisational standards 1.5 Maintain records of backups
2. Restore system backup	2.1 Determine and test restoration procedures according to organisational standards 2.2 Restore data under instruction from an appropriate person 2.3 Restore data according to organisational standards 2.4 Document and report on backup results
3. Maintain virus protection	3.1 Maintain and update virus protection software according to operating system in use 3.2 Carry out virus scanning and report detected viruses to appropriate person 3.3 Remove viruses and update scanning software
4. Follow copyright procedures and record software licences where appropriate	4.1 Identify licensed software used by the organisation 4.2 Maintain records of licence number and location 4.3 Monitor operation and use of licensed software where applicable 4.4 Check personal computers and networks to ensure software compliance 4.5 Report licensing anomalies related to software to an appropriate person

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - clarify instructions
 - communicate with peers and supervisors
 - present information
 - seek assistance and expert advice
- literacy skills to:
 - interpret user manuals, technical documentation and help functions
 - read and write basic workplace documents
- problem-solving skills to address common operational problems when carrying out system backup and recovery
- technical skills to perform:
 - backup and recovery operations
 - basic diagnostic tests in system integrity.

Required knowledge

- broad knowledge of:
 - organisational standards regarding:
 - backup and recovery procedures and operations
 - label and store backups
 - current industry-accepted hardware and software products
 - current viruses and protection methods
 - diagnostic tools
 - inventory procedures
 - maintenance procedures
 - storage and retrieval guidelines
 - system performance
- software copyright and general public licence (GPL) or copyright responsibilities.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • protect and secure stand-alone or networked client-server environments and operating systems according to system maintenance procedures • undertake system and file backup, recovery delete and archive according to backup and recovery procedures • check computers to ensure software compliance.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • sites with a representative range of stand-alone and networked client-server environments and operating systems • antivirus software • technical records and documentation • appropriate learning and assessment support when required. <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct observation of candidate undertaking file backup and recovery • direct observation of candidate performing virus scans and virus removal • review of documented reports on backup results • review organisational backup schedules • review software licence records • verbal or written questioning to assess candidate's knowledge of maintaining and updating virus protection software and checking computers for software copyright compliance.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.

<i>Licensed software</i> may include:	<ul style="list-style-type: none"> • corporate licences • educational licences • freeware • open source • shareware licences • single-user licences • user-restrictive licences.
<i>Software</i> may include:	<ul style="list-style-type: none"> • application: <ul style="list-style-type: none"> • database • internet browser • spreadsheet • word-processing • commercial • customised • in-house • programming: <ul style="list-style-type: none"> • assembler • compiler • development tools • system: <ul style="list-style-type: none"> • computer security • device drivers • operating system.

Unit Sector(s)

Systems administration and support

ICTICT206 Install software applications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to select, install or upgrade basic commercial software applications.

It applies to individuals who require basic information and communications technology (ICT) skills to undertake related tasks under supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine software or software upgrade requirements	1.1 Document client requirements and report to appropriate person 1.2 Act on instructions to meet client requirements, according to organisational requirements
2. Obtain software or software upgrade	2.1 Investigate and select a software application program that best conforms to requirements and organisational policies 2.2 Obtain application program under instruction from appropriate person

ELEMENT	PERFORMANCE CRITERIA
	2.3 Determine licensing requirements and record, according to organisational guidelines 2.4 Ensure target computer conforms to the minimum hardware and operating system requirements of the application program
3. Install or upgrade software	3.1 Install new or upgraded software application program according to appropriate person or organisational instructions 3.2 Complete the installation process efficiently and effectively to minimise disruption 3.3 Carry out testing and acceptance, according to organisational guidelines, paying particular attention to possible effect on other systems 3.4 Ensure client requirements are satisfied 3.5 Refer outstanding client issues to appropriate person as necessary

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 2.3	<ul style="list-style-type: none"> • Uses available literature to appropriately address requirements • Interprets and responds to complex text to ascertain and confirm requirements
Writing	1.1, 2.3	<ul style="list-style-type: none"> • Records key information relevant to requirements, using basic punctuation, text and correct spelling
Oral Communication	1.1, 2.2, 3.1, 3.4, 3.5	<ul style="list-style-type: none"> • Uses listening and questioning techniques to confirm understanding of requirements • Uses clear and specific language to convey requirements
Navigate the world of work	2.1	<ul style="list-style-type: none"> • Takes some personal responsibility for adherence to organisational requirements
Get the work done	1.2, 2.1, 2.2, 2.4, 3.1-3.3	<ul style="list-style-type: none"> • Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to role • Understands purposes, specific functions and key

		<p>features of common digital systems and tools, and operates them effectively to complete routine tasks</p> <ul style="list-style-type: none"> Plans routine tasks with familiar goals and outcomes, taking some limited responsibility for decisions regarding sequencing

Assessment Requirements for ICTICT206 Install software applications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- install software applications through operating system instructions
- configure computer to accept new software or upgrade
- carry out testing and acceptance according to organisational guidelines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe a typical client business domain
- identify typical hardware storage devices
- identify typical input and output devices
- describe key licensing arrangements and responsibilities to ensure they are adhered to
- identify operating systems supported by the organisation
- describe the organisational guidelines for purchasing
- identify the installation requirements for key software application packages
- describe typical software copyright responsibilities.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a personal computer (PC) where software installation may be performed

- application software currently used in industry
- documents detailing organisational testing and acceptance policy and procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT302 Install and optimise operating system software

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit defines the skills and knowledge required to install, configure and optimise operating system (OS) software to meet business and client needs.

It applies to individuals who may work under supervision and support others using well developed skills in creating solutions through analysis and evaluation of information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine function of operating system	1.1 Identify and demonstrate understanding of the purposes of operating system 1.2 Distinguish between batch system, real-time system and multi-tasking system 1.3 Compare and contrast different operating systems and their features 1.4 Identify and demonstrate knowledge of the basic functions of operating system, including file system, memory

ELEMENT	PERFORMANCE CRITERIA
	management, process scheduling 1.5 Identify and demonstrate management of virtual memory
2. Obtain operating system	2.1 Contact operating system vendors to obtain technical specifications and system requirements 2.2 Identify process and steps required to install and configure the operating system using installation components 2.3 Document adjustment recommendations and provide to appropriate person 2.4 Determine and apply knowledge of licensing, hardware and security requirements
3. Install, configure and optimise operating system	3.1 Install, configure and test operating system using installation components and boot-utility options 3.2 Use the relevant operating system user interface to correctly configure the installation 3.3 Optimise the system to meet organisational requirements 3.4 Document the system according to organisational requirements 3.5 Install the operating system with minimal disruption to client or users
4. Provide instruction to meet new software requirements	4.1 Provide one-to-one instruction about changes to the client or users as required 4.2 Obtain client evaluation about new system to ensure requirements are met, using appropriate feedback mechanism

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3-1.5, 2.1, 2.2, 2.4, 3.1, 3.2, 4.2	<ul style="list-style-type: none"> Identifies, analyses and evaluates a range of on-line and hard-copy text containing complex, OS specific terminology, and applies the information to the selection, installation, configuration and optimisation of operating systems

		<ul style="list-style-type: none"> Interprets and comprehends a large range of syntax, diagrams, icons, symbols, text, numbers and letters necessary to install and configure operating systems
Writing	2.3, 3.4	<ul style="list-style-type: none"> Uses the correct spelling and grammar, clear plain English and systems related text to document recommendations and processes, and develop feedback tools
Oral Communication	2.1, 3.5, 4.1, 4.2	<ul style="list-style-type: none"> Elicits and evaluates information using OS related terminology and effective listening and questioning techniques Uses simple and relevant language to liaise with clients, present information and obtain feedback
Navigate the world of work	2.4	<ul style="list-style-type: none"> Takes some personal responsibility for adherence to legal and regulatory requirements, and seeks clarification when required
Get the work done	1.1-1.5, 2.1, 2.2, 3.1-3.3, 3.5	<ul style="list-style-type: none"> Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency and considering how to link with the work of others Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks

Assessment Requirements for ICTICT302 Install and optimise operating system software

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- install, configure and test an operating system to improve system performance with minimum disruption to clients.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare current industry accepted hardware and software products
- outline functions and features of operating systems used by the organisation
- explain the installation and configuration of systems software
- explain the architecture of current technical systems
- outline the deployment of current organisational systems
- list organisational requirements for operating system (OS) software
- explain prerequisites for system software installation
- outline set-up and configuration procedures
- list software packages supported by the organisation
- describe system's current functionality
- list system's diagnostic software
- outline vendor specifications and requirements for installation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a personal computer where installation may be performed
- OS software and technical documentation
- organisational documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT303 Connect internal hardware components

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to acquire, install, configure and evaluate system hardware components according to client and user requirements.

It applies to individuals who work with a degree of self-sufficiency and provide support in a range of information and communications technology (ICT) work areas and activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify, categorise and distinguish between the different types of internal hardware components	1.1 Identify and categorise the different internal hardware components 1.2 Define the purpose and characteristics of the different internal hardware component categories 1.3 Distinguish between different types of devices within each internal hardware component category
2. Determine components required	2.1 Identify and clarify user internal hardware component requirements according to organisational guidelines

ELEMENT	PERFORMANCE CRITERIA
	2.2 Organise and record user component requirements, pass on to appropriate person for evaluation and vendor selection
3. Obtain components	3.1 Contact vendors to obtain technical specifications for the proposed components 3.2 Assess options and provide recommendations to the appropriate person for final analysis 3.3 Obtain components to prepare for installation
4. Install components	4.1 Develop plans, with prioritised tasks and contingency arrangements, for the installation of selected components with minimum disruption to clients 4.2 Liaise with appropriate person to obtain approval for the plans 4.3 Install and configure components according to plan, installation procedures and organisational requirements 4.4 Test components for error-free performance, using available technology 4.5 Identify and resolve identified problems 4.6 Test and enhance system performance, using knowledge of the system, to meet organisational benchmarks 4.7 Document the installation and configuration process according to organisation guidelines
5. Evaluate modified system	5.1 Collect client or user feedback and analyse against client requirements 5.2 Correct identified shortcomings in the system and record actions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 3.2, 4.3, 5.1	<ul style="list-style-type: none"> Identifies, interprets and evaluates online and hard copy documentation containing complex ICT related terminology, acronyms and concepts

Writing	2.2, 3.2, 4.1, 4.7	<ul style="list-style-type: none"> • Uses correct spelling, grammar and plain English together with the ICT specific terminology and diagrams to convey recommendations and requirements, and complete organisational documentation
Oral Communication	1.1, 2.2, 3.1-3.3, 4.1, 4.2, 5.1	<ul style="list-style-type: none"> • Converts highly technical language and terminology into plain English to communicate ideas and plans, and gather feedback from clients • Uses effective listening and questioning techniques and technical terminology to elicit information and make the correct component selection
Navigate the world of work	2.1, 4.3	<ul style="list-style-type: none"> • Recognises and follows explicit protocols and meets expectations associated with own role
Get the work done	1.1, 1.3, 2.1, 2.2, 3.2, 3.3, 4.1, 4.4-4.6, 5.1, 5.2	<ul style="list-style-type: none"> • Initiates standard procedures when responding to familiar problems within immediate context • Recognises some general design and operating principles of digital tools and uses these to help when modifying systems and when troubleshooting • Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency

Assessment Requirements for ICTICT303 Connect internal hardware components

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and categorise the different types of internal hardware components
- modify system's hardware to meet client requirements
- plan modification of and connect internal hardware components according to vendor and technical specifications
- install components across a variety of situations and account for unexpected contingencies
- evaluate the system on completion.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe areas of the operating system relevant to configuration and testing
- compare current industry accepted hardware and software products
- outline environmental considerations in e-waste disposal
- outline organisational guidelines and organisational requirements with regard to safety, recycling and component installation
- outline system's diagnostic software and current functionality
- interpret vendor specifications and requirements for component installation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a personal computer and internal hardware components for installation
- current industry standard performance testing software
- documents detailing organisational guidelines and requirements
- technical manuals and tools.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT304 Implement system software changes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement system software changes and to hand over the modified system to the client's operational area.

It applies to individuals working in support roles who are required to update operating systems on client computers with the latest technology fixes, working under minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine system changes required	1.1 Determine and record required changes to system 1.2 Ensure documentary evidence exists to support changes and evaluate changes required 1.3 Complete documentation required according to maintenance methodologies 1.4 Clarify and confirm nature of the changes with the client 1.5 Obtain technical data from reliable sources and request

ELEMENT	PERFORMANCE CRITERIA
	other resources that may be required to complete the changes
2. Carry out system changes	2.1 Plan the procedure to effect intended changes 2.2 Consult with colleagues and users involved in the proposed changes and agree a mutually acceptable timeline and method of implementation 2.3 Copy initialisation or configuration files prior to implementation 2.4 Create a roll-back path in the event of failure 2.5 Ensure changes required in software are made according to project or organisational guidelines 2.6 Test and verify that the changes have been made according to implementation guides and organisational standards
3. Present changes to client	3.1 Demonstrate changes to the client and explain the impact of these changes 3.2 Work towards making these changes acceptable to the client if changes are rejected, or making further modifications if required 3.3 Update documentation and repositories according to standards and update modifications made to the change management system
4. Perform handover to client	4.1 Update documentation and client procedures to reflect changes made 4.2 Secure sign-off of acceptance documents by client 4.3 Facilitate handover of modified system to client's operational area

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.5	<ul style="list-style-type: none"> Identifies and interprets hard copy, online and computer generated text, numerical and diagrammatic information with systems

		<p>software specific terminology</p> <ul style="list-style-type: none"> Reviews a range of organisational documentation to identify relevant information relating to the requirements of both the job role and organisation
Writing	1.1, 1.3, 3.3, 4.1	<ul style="list-style-type: none"> Uses correct spelling and grammar, plain English and, when necessary, systems related text and terminology to complete documentation and update client procedures
Oral Communication	1.1, 1.2, 1.4, 1.5, 2.1, 2.2, 3.1, 3.2, 4.2, 4.3	<ul style="list-style-type: none"> Uses effective listening and questioning techniques and systems related terminology to elicit information about the systems and determine the job requirements Converts highly technical language and terminology to plain English to communicate changes to, and gather feedback from, the client(s)
Navigate the world of work	2.5, 2.6, 3.3	<ul style="list-style-type: none"> Recognises and follows explicit protocols and meets expectations associated with own role
Get the work done	1.1, 2.1-2.4, 2.6, 3.2, 3.3, 4.3	<ul style="list-style-type: none"> Initiates standard procedures when responding to familiar problems within immediate context Recognises some general design and operating principles of digital tools and uses these to help when modifying systems and when troubleshooting Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency

Assessment Requirements for ICTICT304 Implement system software changes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- evaluate, document and implement changes to the system with minimum disruption to the system and client users
- hand over the project to the client with instructions and updated documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe business scheduling requirements
- identify change control procedures
- describe client business domain
- discuss current industry accepted hardware and software products
- discuss emerging standards for data and voice communications
- outline the system's current functionality
- discuss the features of the system under modification
- outline the organisational policy and procedures with regard to system changes
- recognise vendor software services with regard to system changes.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a computer
- system software currently used in industry
- technical manuals and tools.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK305 Install and manage network protocols

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to install and manage network protocols in a networking environment.

It applies to individuals with competent information and communications technology (ICT) skills, working as network administrators who are required to ensure that appropriate protocols have been installed in networks to allow user functionality and maintenance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Install and manage network protocols	1.1 Select, test and validate appropriate network protocol services 1.2 Design a network addressing system, with subnet and host IDs, including appropriate devices 1.3 Configure hosts and workstations to use IP addresses either manually or through automatic allocation of addresses, such as found with dynamic host configuration protocol (DHCP)
2. Identify network	2.1 Review a range of well-known network protocol applications

ELEMENT	PERFORMANCE CRITERIA
protocol applications	<p>2.2 Evaluate client user requirement and recommend network protocol services</p> <p>2.3 Apply internet protocol (IP) addressing scheme according to approved policy and procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.2, 2.3	<ul style="list-style-type: none"> Recognises and interprets textual information, including technical manuals, to establish the job requirements
Writing	2.2	<ul style="list-style-type: none"> Uses specific and relevant language to document new file systems, user access and disaster recovery procedures
Oral Communications	2.2	<ul style="list-style-type: none"> Articulates clearly using specific and relevant language suitable to audience to convey requirements Uses listening and questioning techniques to confirm understanding
Navigate the world of work	2.3	<ul style="list-style-type: none"> Complies with explicit organisational policies and procedures Ensures knowledge of legislative requirements and products is kept up to date
Get the work done	1.1-1.3, 2.1	<ul style="list-style-type: none"> Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency, and considering how to link with the work of others Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks Initiates standard procedures when developing and refining configuration protocols

Assessment Requirements for ICTNW K305 Install and manage network protocols

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- configure, test and validate network protocols in order to facilitate interconnectivity
- install and manage network protocols in a network, and troubleshoot problems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the client business domain, including client organisation structure and business functionality
- list current communications technologies and their associated protocols
- outline current industry accepted hardware and software products, and general features and capabilities
- summarise network protocols currently in use in the organisation and industry, including:
 - transmission control protocol
 - internet protocol (TCP/IP)
 - OSI models
- clarify the vendor product range and development directions
- describe how network protocols transcend organisational size and network complexity.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- a live network
- application software and operating system
- appropriate learning and assessment support when required
- networked computers
- organisational guidelines
- technical documentation and installation manuals
- vendor software.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK410 Install hardware to a network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, manage and install new hardware components in a network.

It applies to individuals employed in technical information and communications technology (ICT) support roles, such as network administrators, who support network hardware in a peer-to-peer or client-server networked environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine network hardware requirements	<p>1.1 Assess client network hardware and cabling requirements, considering compatibility with existing application software and operating system</p> <p>1.2 Analyse requirements against local area network (LAN), wide area network (WAN), wireless networks, and mobile equipment access design limitations and organisational guidelines</p> <p>1.3 Evaluate client requirements according to organisational guidelines, corporate purchasing procedures, licensing</p>

ELEMENT	PERFORMANCE CRITERIA
	arrangements and budget
2. Obtain network hardware	<p>2.1 Contact vendors and obtain technical specifications</p> <p>2.2 Evaluate or test hardware according to client requirements and organisational guidelines</p> <p>2.3 Document recommendations and provide copies to appropriate person</p> <p>2.4 Determine and document licensing requirements and security issues</p> <p>2.5 Acquire hardware according to recommendations and organisational procedures</p> <p>2.6 Organise cabling infrastructure where required</p>
3. Install network hardware	<p>3.1 Conduct installation with minimal disruption to clients</p> <p>3.2 Install hardware according to appropriate installation procedures</p> <p>3.3 Configure and test the installation to ensure that it meets client needs</p>
4. Provide instruction and support for installed products	<p>4.1 Determine and document client instructions and needs</p> <p>4.2 Provide one-to-one or group instruction to client and users as required</p> <p>4.3 Obtain client evaluation and feedback to ensure that client requirements have been met</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.2, 2.5	<ul style="list-style-type: none"> Recognises and interprets licensing and security issues, technical information and organisational procedures to determine job requirements
Writing	2.4, 4.1	<ul style="list-style-type: none"> Prepares information which incorporates evaluation of information and specialised and cohesive language in a format and style appropriate to a specific audience

Oral Communication	2.1, 2.3, 4.1-4.3	<ul style="list-style-type: none"> • Uses listening and questioning skills to confirm understanding for requirements • Participates in regular verbal exchanges and uses appropriate, detailed and clear language to address key personnel and to disseminate information
Numeracy	1.3	<ul style="list-style-type: none"> • Uses mathematical formulas and calculations to estimate and plan costs according to business budgets
Navigate the world of work	1.2, 1.3, 2.4, 2.5	<ul style="list-style-type: none"> • Appreciates the implications of legal and regulatory responsibilities related to own work
Get the work done	1.1-1.3, 2.2, 2.5, 2.6, 3.1- 3.3	<ul style="list-style-type: none"> • Determines job priorities, resources and equipment, and works logically and systematically to maintain the continuity of network operations and business functions during network installation tasks • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks • Recognises and responds to predictable routine problems related to own role in the immediate work context • Automatically implements standard procedures for routine decisions

Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- evaluate client user requirements and hardware installation
- install a range of network hardware by planning, managing and supporting the installation of new components in a network, according to organisational policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise current industry, data and voice networking, security products, devices and procedures, including:
 - current industry accepted network protocols
 - organisational contracting procedures and responsibilities
 - system diagnostic software
- outline current industry accepted network hardware and software products
- explain hardware and software installation procedures
- describe local area network (LAN) capabilities and characteristics, such as network type, internet protocol (IP) addressing, switch or hub operation
- describe various features of network connections, including types of cables, cabling distance limitations and wireless connections
- outline operating systems sufficient to enable basic installation
- summarise set-up and configuration procedures
- describe software packages supported by the organisation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- vendor hardware and software components
- application software and operating system
- hardware maintenance tools
- a live network
- networked computers
- organisational guidelines
- technical documentation and installation manuals.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK411 Deploy software to networked computers

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, manage and support the installation of new or upgraded software to networked computers according to vendor and organisation specifications.

It applies to individuals involved in installing, configuring, maintaining and supporting software, such as network administrators and network support staff.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine operating system and software and hardware requirements	1.1 Assess client software and licensing requirements, considering compatibility with existing application software and operating system 1.2 Assess hardware requirements 1.3 Analyse requirements against local area network (LAN), wide area network (WAN), and wireless networks within organisational guidelines 1.4 Evaluate client requirements according to organisational

ELEMENT	PERFORMANCE CRITERIA
	guidelines, corporate purchasing procedures and budget
2. Obtain deployment software to automate deployment	<p>2.1 Evaluate deployment software according to client requirements and organisational guidelines</p> <p>2.2 Contact vendors and obtain technical specifications, including support arrangements and licensing</p> <p>2.3 Acquire software and licences according to organisational procedures</p> <p>2.4 Store software licences and manuals according to organisational guidelines</p>
3. Automate installation of operating system via network	<p>3.1 Plan and deploy operating system according to appropriate vendor installation procedures, with minimal disruption to network and clients</p> <p>3.2 Configure and test installation to ensure that it meets client needs and vendor specifications</p> <p>3.3 Install updates and patches</p>
4. Automate installation of software packages via network	<p>4.1 Plan and deploy software packages according to appropriate vendor installation procedures, with minimal disruption to network and clients</p> <p>4.2 Configure and test installation to ensure that it meets client needs and vendor specifications</p> <p>4.3 Install updates and patches</p>
5. Test and sign off	<p>5.1 Test installed operating system and software for error-free performance, identifying and resolving problems</p> <p>5.2 Determine and document security and licensing issues</p> <p>5.3 Obtain client evaluation and feedback to ensure that client requirements have been met</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.4, 2.1, 2.3, 2.4,	<ul style="list-style-type: none"> Recognises and interprets technical, licensing

	3.1, 3.2, 4.1, 4.2	and organisational information to determine business requirements
Writing	1.3, 5.2	<ul style="list-style-type: none"> Develops material for a specific audience, using clear and detailed language in order to convey explicit information
Oral Communication	2.2, 5.3	<ul style="list-style-type: none"> Uses active listening, observational and questioning techniques in order to identify information and confirm, clarify or revise understanding Uses specific and relevant language to obtain information to determine job requirements
Numeracy	1.4	<ul style="list-style-type: none"> Uses mathematical formulas and calculations to estimate and plan costs according to business budgets
Navigate the world of work	1.1, 1.3, 1.4, 2.1-2.4, 5.2	<ul style="list-style-type: none"> Appreciates the implications of legal and regulatory responsibilities related to own work
Get the work done	1.1-1.4, 2.1, 2.3, 2.4, 3.1-3.3, 4.1-4.3, 5.1	<ul style="list-style-type: none"> Determines job priorities, resources and equipment, and works logically and systematically Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks Uses analytical processes to respond to deployment and configuration issues in the immediate work context Automatically implements standard procedures for routine decisions

Assessment Requirements for ICTNWK411 Deploy software to networked computers

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify client software requirements
- plan and deploy automatic installation of operating system and software
- configure and test installation, ensuring client needs are met.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise network protocols and operating systems, including:
 - transmission control protocols (TCP)
 - internet protocols (IPs)
 - network applications
- describe organisational contracting procedures and responsibilities
- outline software licensing requirements and documentation
- explain current industry standards related to software deployment, including:
 - deployment software configuration
 - configuration of automated deployment processes
 - operating system deployment
 - software package deployment
 - troubleshooting deployment processes.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- a site or prototype where deployment processes may be implemented
- a live network
- software tools to support implementation of deployment processes
- technical documentation and installation manuals
- organisational guidelines.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS203 Connect hardware peripherals

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to connect hardware peripherals according to instructions.

It applies to individuals employed in an information and communications technology (ICT) support role who are required to solve technical hardware and software incompatibility conflicts and problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm client requirements	<p>1.1 Identify and confirm peripheral requirements of client according to organisational standards</p> <p>1.2 Document client requirements and peripherals needed, and report findings to the appropriate person according to organisational standards</p> <p>1.3 Verify client requirements with appropriate person according to organisational standards and reporting procedures</p>

ELEMENT	PERFORMANCE CRITERIA
	1.4 Take action to ensure client support expectations are covered by vendor warranty and support services
2. Obtain required peripherals	2.1 Obtain peripherals under instruction from appropriate person 2.2 Enter details of peripherals into equipment inventory according to organisational standards 2.3 Validate that contents of delivered components and physical contents match the packing list and resolve discrepancies if necessary 2.4 Store peripherals according to vendors guidelines
3. Connect hardware peripherals	3.1 Verify timeframe for installation schedule with client 3.2 Remove old peripherals with minimal disruption to clients if they are to be replaced, taking into account environmental considerations and work health and safety (WHS) standards 3.3 Connect new peripherals with minimum disruption to clients, taking into account operating system procedures 3.4 Configure computer to accept new peripherals 3.5 Test hardware peripherals and confirm client satisfaction, paying particular attention to possible effect on other systems and making adjustments as required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1-2.4, 3.1-3.5	<ul style="list-style-type: none"> Interprets textual information from a range of sources to identify and adhere to requirements
Writing	1.2, 1.3, 1.4, 2.1	<ul style="list-style-type: none"> Develops materials and resources using simple vocabulary to convey and record information and inventory, according to client and vendor requirements
Oral Communication	1.2, 1.3, 1.4, 2.1, 3.1, 3.5	<ul style="list-style-type: none"> Participates in verbal exchanges of familiar ideas and information using questioning and active listening to elicit views, opinions and feedback from others
Navigate the	1.1, 1.3, 1.4, 2.1-2.4,	<ul style="list-style-type: none"> Understands roles and responsibilities for task and makes basic decisions on work completion parameters

world of work	3.2-3.5	in accordance with organisational requirements, WHS standards and environmental considerations
Interact with others	1.1-1.4, 2.1, 3.1	<ul style="list-style-type: none"> Identifies and takes steps to follow accepted communication practices and protocols
Get the work done	1.1-1.4, 2.1-2.4, 3.1-3.5	<ul style="list-style-type: none"> Plans and implements routine tasks, aiming to achieve them efficiently Responds to predictable routine problems and implements standard or logical solutions Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks

Assessment Requirements for ICTSAS203 Connect hardware peripherals

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- connect several different types of hardware peripherals to the system safely and according to vendor instructions with a minimum of downtime, using known routines and procedures
- locate, interpret and use vendor documentation related to connection and storage of hardware peripherals
- test the operation of newly installed hardware peripherals and confirm client satisfaction
- follow work health and safety policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the commonly used computer operating systems
- identify help desk and maintenance practices
- describe common peripheral devices
- summarise WHS procedures for electrical equipment
- list the system components and describe their interconnectivity
- identify current industry accepted hardware and software products
- describe procedures relevant to maintaining inventory
- list the organisational guidelines and standards that impact on service support including:
 - external suppliers and vendors
 - internal and external communications
 - internet access
 - security of information and data

- identify common principles for environmentally sustainable business practices.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- sites with a representative range of workstations, hardware peripherals, internet connections and cabling
- software to be installed, interconnected and configured
- hardware and software currently used in industry
- technical documentation, including organisational hardware blueprint and vendor support.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS205 Maintain ICT system integrity

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to protect and secure stand-alone or networked client server environments.

It applies to technical support individuals who are required to maintain workflow and quality processes in a small or large office environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Carry out system backup	1.1 Create and review organisational backup schedule 1.2 Determine storage media and hardware for backups 1.3 Ensure backups are carried out according to the schedule 1.4 Label and store backups according to organisational standards 1.5 Maintain records of backups
2. Restore system backup	2.1 Determine and test restoration procedures according to

ELEMENT	PERFORMANCE CRITERIA
	organisational standards 2.2 Restore data under instruction from an appropriate person 2.3 Restore data according to organisational standards 2.4 Document and report on backup results
3. Maintain virus protection	3.1 Maintain and update virus protection software according to operating system in use 3.2 Carry out virus scanning and report detected viruses to appropriate person 3.3 Remove viruses and update scanning software
4. Follow copyright procedures and record software licences where appropriate	4.1 Identify copyright procedures for licensed software used by the organisation 4.2 Maintain records of licence number and location 4.3 Monitor operation and use of licensed software where applicable 4.4 Check personal computers and networks to ensure software compliance 4.5 Report licensing anomalies related to software to an appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.5, 2.1-2.3, 3.1-3.3, 4.1-4.5	<ul style="list-style-type: none"> Interprets familiar textual information from a range of sources to identify and review practices and determine that appropriate standards have been maintained Researches and interprets information to identify, monitor and evaluate technical information and maintain appropriate standards
Writing	1.4, 1.5, 2.4, 4.2, 4.5	<ul style="list-style-type: none"> Develops materials and resources using simple vocabulary to record information in a sequential manner, adhering to standards for client engagement as well as internal reference

Navigate the world of work	1.1-1.5, 2.1-2.4, 3.1-3.3, 4.1-4.5	<ul style="list-style-type: none"> Understands roles and responsibilities for task and makes basic decisions on work completion parameters in accordance with organisational standards
Interact with others	2.2, 4.5	<ul style="list-style-type: none"> Identifies and takes steps to follow accepted communication practices and protocols
Get the work done	1.1-1.5, 2.1-2.4, 3.1-3.3, 4.1-4.5	<ul style="list-style-type: none"> Plans and implements routine tasks, aiming to achieve them efficiently Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions, and evaluates the effectiveness of the outcome Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks

Assessment Requirements for ICTSAS205 Maintain ICT system integrity

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- protect and secure stand-alone or networked client server environments and operating systems according to system maintenance procedures
- complete file backup according to organisational standards
- recover, delete and archive according to backup and recovery procedure
- check computers and networks for compliance with licensing requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify organisational standards regarding:
 - backup and recovery procedures and operations
 - labelling and storage of backups
- describe current industry accepted hardware and software products
- describe current viruses and protection methods
- identify common diagnostic tools
- identify inventory procedures
- identify maintenance procedures
- describe storage and retrieval guidelines
- explain system performance
- identify software copyright and General Public Licence (GPL) or copyright responsibilities.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- sites with a representative range of stand-alone and networked client server environments
- antivirus software
- technical records and documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

LGADMIN425A Develop a communication plan

Modification History

LGADMIN425A Release 2: Layout adjusted.

LGADMIN425A Release 1: Primary release.

Unit Descriptor

This unit covers preparing and developing an integrated communication plan to enable the effective communication to the community and specific groups of council services and other relevant information. The unit is suitable for a range of contexts in the organisation and can be applied to promotional and marketing material, informative material and material related to specific events or activities.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the

Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop communication objectives	1.1 The target audience is identified. 1.2 Relevant and appropriate media are identified and assessed in accordance with council requirements and audience needs. 1.3 Relevance of existing materials and activities is assessed based on changing communication needs and organisational policies. 1.4 Communication objectives are determined and integrated into council strategies and priorities.
2. Prepare a communication plan	2.1 The elements of a communication plan are determined in accordance with council requirements. 2.2 <i>Forms of communications</i> are evaluated in relation to communication objectives. 2.3 <i>Promotions</i> are evaluated for inclusion in the communication plan. 2.4 Objectives of <i>the communication plan</i> are developed and evaluated for cost effectiveness and for effectiveness. 2.5 Communication plan is prepared in accordance with council requirements.
3. Implement the communication plan	3.1 Resources required to complete the communication activities are obtained. 3.2 Responsibilities and functions are allocated to relevant personnel. 3.3 Communication materials are developed to suit purpose of the communication activity and requirements of the audience. 3.4 Professional assistance in the development of materials is sought as appropriate. 3.5 Communication is paced and sequenced to meet a range of requirements and types of audience.
4. Review and report on the communication plan	4.1 <i>Feedback mechanisms</i> are established and utilised to evaluate and review communication activities. 4.2 Reports are prepared in accordance with organisational requirements.

ELEMENT**PERFORMANCE CRITERIA**

4.3 Communication activities are adjusted as appropriate.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- verbal and written communication
- consultation
- analytical
- problem solving
- research
- evaluative
- collating and interpreting statistical data, including trend analysis
- risk management
- cost-benefit analysis
- strategic thinking
- negotiation
- report writing

Required Knowledge

- organisation's marketing plan
- organisation's services
- data collection and analysis techniques
- basic financial records
- communication models

Evidence Guide**Overview of assessment requirements**

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:

- undertake appropriate, detailed and thorough research to determine communication objectives using a range of techniques
- develop a communication plan based on the analysis undertaken to provide a strategic direction for communications and promotions in a clear and unequivocal manner
- manage the implementation of the communication plan within the organisation and unit/area
- monitor, evaluate and review the communication plan and prepare a report that includes recommendations for adjustments

Context of assessment

Competency is demonstrated by performance of all stated criteria, with particular attention to the critical aspects and the knowledge and skills elaborated in the Evidence Guide, and within the scope of the Range Statement.

Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.

Assessment of the performance requirements in this unit should be undertaken in an actual workplace or simulated environment.

Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the key competency levels at the end of this unit.

Relationship to other units (prerequisite or co-requisite units)

To enable holistic assessment this unit may be assessed with other units that form part of the job role.

Method of assessment

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

Evidence required for demonstration of

Evidence should be collected over a set period of time that is sufficient to include dealings with an appropriate range and

consistent performance	variety of situations.
Resource implications	The learner and trainer should have access to appropriate documentation and resources normally used in the workplace.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<i>Forms of communication</i> may include:	<ul style="list-style-type: none"> • fliers, brochures and pamphlets • media products • press releases • posters • kits • public relations materials • invitations • presentations and demonstrations • audio and videotapes • electronic press hits • web sites • focus groups on relevant issues • community programs • guidance materials • descriptions • labels • signs
<i>Promotions</i> may include:	<ul style="list-style-type: none"> • films • multimedia products • seminars and workshops • public forums • special occasions and festivals • performances • open days • ceremonies
<i>The communication plan</i> may include:	<ul style="list-style-type: none"> • the rationale, aims, objectives and expected outcomes in financial and other terms • facilities and equipment needed • target audience • communication and promotion requirements

Key stakeholders may include:

- time constraints
- budget allocation
- resources, including human resources
- staff training
- government and non-government organizations
- community leaders
- networks
- staff and colleagues
- board or committee of management
- specialist organisation
- media
- partners or potential partners
- senior management
- technical specialists

Feedback mechanisms may include:

- surveying clients
- informal discussion
- focus groups

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Undertake programmed safety and maintenance checks	1.1. Checks are undertaken safely and to prescribed procedure. 1.2. Status/report is recorded on proforma or reported orally.
2. Undertake programmed maintenance	2.1. Removal/replacement of consumable components is undertaken to prescribed procedure and instructions are followed. 2.2. Fluids and lubricants are replaced and/or topped up to prescribed schedule.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- undertaking programmed safety and maintenance checks
- undertaking programmed operational maintenance
- entering routine and familiar information onto proformas and standard workplace forms
- following routine information on written procedures
- following oral instructions
- orally reporting routine information

Required knowledge

Look for evidence that confirms knowledge of:

- programmed maintenance and safety check procedures for the specified machine/equipment
- recording/reporting requirements
- safe work practices and procedures
- hazards and control measures associated with operational maintenance of machines/equipment

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to perform operational maintenance of machines/equipment. Competency in this unit cannot be claimed until all prerequisites have been satisfied.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required

EVIDENCE GUIDE	
	knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with operational maintenance of machines/equipment or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating

RANGE STATEMENT

conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Machines/equipment	Manual, semi-automatic and automatic machines of a stand-alone continuous production or process nature
Checks	Programmed safety and maintenance checks Adjustments of a limited nature including safety guards, stops, wear pads and tool holders, nipping up glands and adjustment of scrapers and aprons
Consumable components	Air filters, oil wipers, grease containers, tool tips, indicator globes, fluids and lubricants, guides and limit switch actuators

MEM14086A Apply mechatronic engineering analysis techniques

Modification History

Release 1 - New unit. Replaces MEM14062A, but not equivalent.

Unit Descriptor

This unit of competency covers the skills needed to undertake a range of mechatronic analyses. The analyses may relate to design or contribution to the design of mechatronic devices or automated plant or be for other purposes, including fitness for purpose evaluations, installation and commissioning, system changes or improvements or other mechatronic engineering-related tasks. It includes application of mechanical, fluid, electrical and controller design and analytical techniques.

Application of the Unit

This unit applies to mechatronic analyses undertaken as part of a mechatronic engineering design or assessment of automated plant or devices for projects, system changes or improvements.

It is suitable for people working as mechatronic or automated system designers and draftspersons and those pursuing careers and qualifications in mechatronic, automation, maintenance or manufacturing engineering. The work may be undertaken individually or as part of a team.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

MEM23004A	Apply technical mathematics
MEM23111A	Select electrical equipment and components for engineering applications
MEM23112A	Investigate electrical and electronic controllers in engineering applications
MEM14090A	Integrate mechatronic fundamentals into an engineering task

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element.

Elements and Performance Criteria

1	Investigate mechatronic analysis context and need	1.1	Review the context and negotiate parameters of the engineering design brief in consultation with stakeholders
		1.2	Identify relevant engineering scientific principles and required analysis techniques
		1.3	Investigate life cycle design and sustainability implications of mechatronic design or existing mechatronic systems, devices or equipment
		1.4	Determine specification, documentation and graphical techniques required for analysis
		1.5	Confirm work health and safety (WHS), regulatory requirements, codes of practice, standards, and risk management relevant to mechatronic analysis task
		1.6	Determine available sources for any required technical and professional assistance
2	Apply mechatronic analysis techniques	2.1	Plan, schedule and coordinate the analysis task
		2.2	Create adequate and accurate calculations, preliminary graphics and maintain design process records
		2.3	Evaluate multiple solutions against analysis criteria
		2.4	Integrate mechatronic techniques, hardware and software, including mechanical, fluid, electrical, electronic, controller and networking

- | | | |
|---|----------------|---|
| | 2.5 | Apply systems thinking, problem solving and decision making |
| | 2.6 | Incorporate professional and technical assistance, as required |
| | 2.7 | Apply specification, documentation and graphical techniques modelling, mock-up or prototyping techniques, where required, to achieve or test solution |
| 3 | Report results | |
| | 3.1 | Record results of analysis |
| | 3.2 | Provide documentation such as calculations, specifications, diagrams, computer-aided design (CAD) files, control circuits and controller programs, mock-ups or prototypes |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating and negotiating with stakeholders and team
- determining or confirming relevance of mechatronic scientific principles and analysis techniques, including principles of:
 - mechanical
 - fluid power
 - fluid dynamics
 - thermodynamics
 - electrical and electronic fundamentals
 - controller and system control and data acquisition (SCADA) or distributed control systems (DCS) programming
 - engineering materials, properties and processes
 - techniques for integration of mechanical, fluid, electrical, electronic, controller and networking elements
- evaluating relevance of WHS, and regulatory requirements, standards and codes of practice
- evaluating multiple solutions against design criteria, risk, sustainability and cost factors

- applying life cycle design and sustainability parameters to analysis task
- planning, scheduling and coordinating the mechatronic analysis task
- solving problems and making decisions with systems thinking approach for contingencies and constraints, and continuous improvement
- integration of hardware and software and mechatronic techniques, such as mechanical, fluid, electrical, electronic, controller and networking
- specifying, documenting and applying graphical techniques, including modelling
- undertaking or supervising mock-up or prototyping techniques, where required, to achieve solution
- creating and maintaining adequate and accurate calculations and analysis process records
- reporting and documenting, results of investigations, application of principles and techniques, calculations, specifications, diagrams, CAD files, mock-ups or prototypes of designs

Required knowledge

Required knowledge includes:

- implications of life cycle design, fitness for purpose evaluation and sustainability for mechatronic analysis process
- mechatronic analysis processes and techniques to investigate, synthesise and develop proposals, evaluate feasibility against design criteria, and review and revise in consultation with stakeholders, team or support functional group
- common model, mock-up and prototyping techniques relevant to mechatronic engineering
- systems thinking, problem solving and decision making, and continuous improvement methods
- WHS and regulatory requirements, codes of practice, standards, risk management and registration requirements with particular emphasis on automation safety requirements
- sources of professional and technical assistance
- procedures for planning, scheduling and coordination of analysis
- hardware requirements of typical mechatronic or automation applications
- engineering mechatronic scientific principles and techniques required for analysis tasks:
 - mechanical
 - fluid power
 - fluid dynamics
 - thermodynamics
 - electrical and electronic fundamentals
 - controller and SCADA or DCS programming
 - engineering materials, properties and processes
 - techniques for integration of mechanical, fluid, electrical, electronic, controller and networking elements
- mechatronic analysis calculations techniques
- software for product planning and design, such as CAD, circuit design, controller

programming and project management

- required documentation prototyping options, including mock-ups, physical and virtual modelling and rapid prototyping

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	A person who demonstrates competency in this unit must be able to apply mechatronic design techniques consistent with a design brief information, relevant standards and conventions.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors must be satisfied that the candidate can competently and consistently:</p> <ul style="list-style-type: none"> • communicate, negotiate and review design brief with stakeholders and team or support functional group • determine or confirm relevant scientific principles and analysis techniques, WHS and regulatory requirements • evaluate multiple solutions • investigate life cycle design and sustainability • plan, schedule and coordinate the design task • integrate mechatronic techniques, hardware and software • solve problems and make decisions with systems thinking for contingencies and constraints, and continuous improvement • define analysis, specify and document and apply graphical techniques, modelling, mock-up or prototyping techniques • create and maintain adequate and accurate calculations and design process records • report and document results and processes.
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, then a simulated working environment must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. • Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability. • Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical

	resources should include equipment modified for people with disabilities.
Method of assessment	<ul style="list-style-type: none"> • Assessment must satisfy the endorsed Assessment Guidelines of the MEM05 Metal and Engineering Training Package. • Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of underpinning knowledge. • Assessment methods must be by direct observation of tasks and include questioning on underpinning knowledge to ensure correct interpretation and application. • Assessment may be applied under project-related conditions (real or simulated) and require evidence of process. • Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances. • Assessment may be in conjunction with assessment of other units of competency where required.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Mechatronic engineering analysis</i>	<p>Mechatronic engineering analysis may be required for a variety of reasons, including:</p> <ul style="list-style-type: none"> • design of automated devices and plant • design or evaluation of significant modifications, process changes or improvements • sustainability issues relevant to plant, equipment or processes • fitness for purpose evaluation • installation and commissioning of plant and equipment
<i>Planning processes</i>	<p>Planning processes may include:</p> <ul style="list-style-type: none"> • establishing design parameters and design criteria

	<ul style="list-style-type: none"> • contributing to the negotiation and advice process • preliminary planning, design investigations and costing • identifying design, development, prototyping activities and skills requirements • planning and scheduling design activities • improving, adjusting and rescheduling as required by emergency contingencies and constraints
Analysis process	<p>Designing as a systematic process includes:</p> <ul style="list-style-type: none"> • establish design parameters and criteria • research, measurement, experimentation and investigation • generating ideas • synthesis, problem solving and decision making, and addressing constraints • apply scientific principles, calculation and graphics, prototyping and mock-up techniques • evaluating solutions against design criteria • consultation, adjustments and agreement • finalise design and sign-off
Analysis criteria	<p>Analysis includes relevant technical criteria and may also include criteria relating to:</p> <ul style="list-style-type: none"> • function • aesthetics • manufacturability and maintainability • marketability • sustainability • cost constraints • ergonomics and anthropometrics and physiology • manufacturability, maintainability • facilities, plant and skills available • safety and risk
Sustainability	<p>Sustainability is used to mean the entire sustainable performance of the organisation/plant, including:</p> <ul style="list-style-type: none"> • meeting all regulatory requirements • conforming to all industry covenants, protocols and best practice guides • minimising ecological and environmental footprint of process, plant and product • maximising economic benefit of process plant and product to the organisation and the community • minimising the negative WHS impact on employees, community and customer

Life cycle assessment	<p>Life cycle analysis can be used to improve sustainability of products and services. It may be applied to:</p> <ul style="list-style-type: none"> • all aspects of manufacture of a single product • the entire operations of an organisation • a particular aspect of operations, such as environmental implications
Prototyping	<p>Prototyping may include:</p> <ul style="list-style-type: none"> • mock-ups, physical and virtual modelling with post-processing for computer numeric control (CNC) and rapid prototyping
Appropriate licensed technical and professional assistance	<p>Appropriate licensed technical and professional assistance may include:</p> <ul style="list-style-type: none"> • technical support and advice relating to elements which have intrinsic dangers, such as: <ul style="list-style-type: none"> • high pressure • energised fluid vessels • high temperatures and heat energy capacity • wiring with high current control voltages above extra low voltage • professional support for technologies, such as: <ul style="list-style-type: none"> • specialist electric motor drives and controllers • specialist materials, plastics, metal alloys and nano materials • special processes, foundry, alloy welding, heat treatment, sealing and fastening
WHS, regulatory requirements and enterprise procedures	<p>WHS, regulatory requirements and enterprise procedures may include:</p> <ul style="list-style-type: none"> • WHS Acts and regulations • relevant standards • codes of practice from Australian and overseas engineering and technical associations and societies • risk assessments • registration requirements • safe work practices • state and territory regulatory requirements
Standards and codes	<p>Standards and codes refer to all relevant Australian and international standards and codes applicable to a particular mechatronic analysis task</p>
Systems thinking	<p>Systems thinking refers to the conduct of engineering work in a manner that demonstrates knowledge of how the interaction of different technical systems on equipment, machinery or structures, as well as the skills and techniques of personnel, combine to perform or</p>

	support engineering-related operations, processes or projects. It embraces determining or establishing how the function of each technical system or component, as well as the skills and techniques of personnel, effects or potentially may effect outcomes. Systems should be interpreted broadly within the context of the organisation and depending on the project or operation can include equipment, related facilities, material, software, internal services and personnel, and other organisations in the value chain
Automation safety	Automation safety refers to the reliance on emergency stop, failsafe design, redundancy, interlocks and data integrity. Standards apply to general plant design and use as well as the 'functional safety of safety-related electrical, electronic and programmable electronic control systems'
Mechatronic hardware	<p>Mechatronic hardware may include:</p> <ul style="list-style-type: none"> • mechanical, fluid and electric actuators • power transmission devices • pipes, conduits wires, fittings and connectors • controllers • power interfaces • signal conditioning interfaces
Documentation	<p>Documentation includes:</p> <ul style="list-style-type: none"> • documented calculations • specifications • CAD files • risk analysis • sustainability and life cycle assessments

MEM14088A Apply maintenance engineering techniques to equipment and component repairs and modifications

Modification History

Release 1 (MEM05v9).

Unit Descriptor

This unit of competency covers the skills needed to apply maintenance engineering techniques to equipment or component modification or repair. It includes decision making on the need for repair, replacement or modification and design of any repair or modification. The unit covers maintenance techniques for repair and modification of mechanical, fluid and electrical plant, and facilities in accordance with procedures, work health and safety (WHS) and legislative requirements, and risk management procedures. Documentation of the repair or modification process includes calculations, specifications, computer-aided design (CAD) files, risk analysis, sustainability and life cycle assessments.

Application of the Unit

This unit applies to maintenance-related work where a technical evaluation must occur on whether to repair, replace or modify equipment or components and where engineering design techniques are applied where repair or modification is required. The unit applies across all engineering disciplines and would normally be selected in conjunction with appropriate technical units for the equipment or components being considered for maintenance.

The unit includes reviewing condition analysis and non-destructive test (NDT) reports. However, the conduct of condition analysis and NDT tests is covered by the relevant specialist technical units.

Where an organisation or whole of plant maintenance management systems is being reviewed or considered for change the unit MEM23125A Evaluate maintenance systems, should be selected.

The unit is suitable for people working at a technician level in maintenance-related design drafting or in maintenance-related supervision or management.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

MEM14092A Integrate maintenance fundamentals into an engineering task

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element.

Elements and Performance Criteria

1	Investigate requirements of equipment or component maintenance task	1.1	Review the context and parameters of the maintenance task in consultation with stakeholders
		1.2	Review equipment or component original design and any subsequent modifications and repairs
		1.3	Review current performance specifications
		1.4	Determine engineering scientific principles and design techniques required for equipment or component maintenance
2	Investigate alternatives of repair, replacement or modification	2.1	Review preventative maintenance system requirements or defect/failure details to determine if replacement is required
		2.2	Review equipment or component condition analysis reports, including the results of any required NDT
		2.3	Review maintenance repair techniques and processes, standard parts, labour and skill requirements
		2.4	Consider life cycle design and sustainability implications of maintenance design and maintenance

- activities
- 2.5 Determine specification, documentation and graphical techniques required to define designs
 - 2.6 Confirm WHS and regulatory requirements, codes of practice, standards, risk management and registration requirements relevant to repair and modification design projects
 - 2.7 Assess the need for technical and professional assistance
 - 2.8 Consider software options for repair and modification design, such as computer-aided design (CAD), stress analysis and project management software
 - 2.9 Decide if repair, replacement or modification is appropriate and seek any necessary approvals
- 3 Apply repair and modification design techniques
- 3.1 Plan, schedule and coordinate the repair or modification design task
 - 3.2 Apply the design process and scientific principles to repair and modification design proposals
 - 3.3 Determine materials, components, maintenance processes, equipment and tools required to implement design
 - 3.4 Create adequate and accurate calculations, preliminary graphics and maintain design process records, including use of software, as appropriate
 - 3.5 Assess repair and modification designs against design criteria
 - 3.6 Apply systems thinking to problem solving and decision making techniques in dealing with contingencies and constraints for continuous improvement and development of design options
 - 3.7 Incorporate professional and technical assistance, as required
 - 3.8 Use specification, documentation and graphical techniques, modelling, mock-up or prototyping techniques, as appropriate, to define repair or modification

- | | | | |
|---|----------------|-----|--|
| 4 | Report results | 4.1 | Record results of investigations, application and development of repair and modification design |
| | | 4.2 | Provide appropriate documentation, such as calculations, specifications, diagrams, CAD files, mock-ups or prototypes |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- determining or confirming scientific principles and maintenance design techniques, WHS and regulatory requirements, and design specification requirements required to meet maintenance brief
- evaluating multiple solutions, materials and components, maintenance repair processes and techniques, standard parts, skill requirements, equipment and tools
- investigating life cycle design and sustainability, technical and professional assistance alternatives for repair, replacement or improvement, and software options for maintenance planning and design
- planning, scheduling and coordinating the maintenance task
- applying design process and scientific principles to component and hardware selection and design proposals
- solving problems and making decisions with systems thinking for contingencies and constraints, and continuous improvement
- defining designs, specifying and documenting and applying graphical techniques, modelling, mock-up or prototyping techniques
- creating and maintaining adequate and accurate calculations and design process records
- reporting and documenting results of investigations, application of principles and techniques, calculations, specifications, diagrams, CAD files, mock-ups or prototypes of designs

Required knowledge

Required knowledge includes:

- sustainability implications of maintenance processes, materials and products, including consideration of life cycle analysis
- design processes and techniques

- concurrent engineering techniques, systems thinking, problem solving and decision making, and continuous improvement methods
- WHS Acts and regulations, codes of practice, standards, registration and risk assessment for design, maintenance and prototyping activities
- procedures for planning, scheduling and coordination of maintenance design
- typical maintenance criteria, such as:
 - strength and servicability of repairs compared to original
 - function and aesthetics
 - maintainability and manufacturability
 - preventative maintenance evaluation criteria, such as mean time between failure (MTBF) and failure mode effects analysis (FMEA)
 - required quality, cost and sustainability
- design calculations techniques
- typical maintenance design requirements of various industries
- typical repairs, parts, skills and maintenance processes
- hardware specifications and catalogues
- typical maintenance plant, equipment and tools
- plant condition and maintenance assessment techniques
- typical maintenance techniques and technologies for monitoring, preventative maintenance, online and breakdown maintenance, disassembly, repair, reassembly and recommission
- design calculations layout and documentation for design checking and maintenance records
- design process documentation and reports, including specifications and CAD graphics
- software for maintenance planning and repair and modification design, including CAD and stress analysis software
- software and systems, such as system control and data acquisition (SCADA) and distributed control systems (DCS) for maintenance control and information distribution
- developments in repair and modification design
- options for mock-up, modelling and prototyping

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Liaise with external suppliers	1.1. The exact quality requirements are communicated to suppliers. 1.2. Quality assurance system is negotiated and agreed. 1.3. Verification method and systems and procedures for dispute settlement are established and agreed. 1.4. Recording system of procured products or services which ensures traceability is established.
2. Check for conformance to specifications	2.1. The requirements of all relevant documentation including contract specifications, drawings and purchase orders are obtained and understood. 2.2. The conformance of the procured product or service to all of the documented requirements is established.
3. Assess external suppliers	3.1. Assessment and evaluation of suppliers' capability and/or quality system are conducted. 3.2. Suppliers' goods or services are evaluated.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- communicating quality requirements to the supplier
- negotiating quality assurance system
- implementing system for recording and tracing products or services procured
- obtaining and interpreting relevant drawings, specifications, documentation etc.
- checking products/materials or services provided for conformance to documented requirements/ specifications
- assessing supplier capability to provide the required product/material or service
- evaluating supplier quality systems
- evaluating supplier goods or services
- using communication and conflict resolution

Required knowledge

Look for evidence that confirms knowledge of:

- the exact quality requirements of the product/material to be supplied
- the procedures to be followed to ensure the supplier understands the quality requirements
- the requirements of a quality assurance system to ensure the supplied product/material conforms to the quality requirements
- the procedures for negotiating agreements with suppliers
- the procedures for verifying that the agreed quality assurance system is being utilised by the supplier
- techniques for dispute resolution
- the procedures for recording procured products or services
- the means of tracing procured products or services
- the reasons for tracing procured products or services
- the specifications of the product/material to be supplied or service to be provided
- any variations from documented requirements/ specifications
- the procedures for assessing/evaluating a supplier's capability to supply the required product/material or service
- the procedures for evaluating a supplier's quality system
- the procedures for evaluating a supplier's goods or services
- any equipment and techniques required to carry out the evaluation procedures
- hazards and control measures within the scope of this unit
- use and application of personal protective equipment

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to exercise external quality assurance. Competency in this unit cannot be claimed until all prerequisites have been satisfied.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with exercising external quality assurance or other units requiring the exercise of the skills and knowledge covered by this unit.

Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not

EVIDENCE GUIDE	
	require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Quality assurance system	ISO 9000 procedures, Six Sigma procedures, sampling plans of all kinds etc.
Traceability	Unique identification of individual product or batches as appropriate
Assessment and evaluation	Vendor rating procedures, design reviews, audit reports, site surveillance reports, failure reports and concession applications etc.

MSACMC411A Lead a competitive manufacturing team

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the knowledge and skills needed by people who lead teams in a competitive manufacturing environment. The team may be operating in manufacturing or in a manufacturing support function e.g. maintenance, office, warehousing etc.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario, the team leader in a <i>competitive manufacturing</i> organisation needs to integrate a range of knowledge and skills. The team leader must lead and assist team members to understand and apply a holistic view of their job and the team's role within the organisation and the objectives that the team must meet as part of the competitive manufacturing system used by the enterprise.</p> <p>This unit requires the application of skills associated with communication, teamwork, problem solving, initiative, enterprise, planning, organising and self management in order to provide leadership in a competitive manufacturing team. This unit has a strong emphasis on planning and implementation, but also requires an ability to learn from experience and feed new information back into strategies to improve both the team's and own performance.</p>

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Facilitate the development of process and competitive manufacturing knowledge	1.1.Ensure necessary technical documentation and information about the process and <i>competitive manufacturing</i> is available to the team 1.2.Develop mentoring processes for team members 1.3.Structure team activities in a way which facilitates the ongoing development of the skills and knowledge of team members 1.4.Arrange for the provision of workforce development and training for team members as appropriate 1.5.Encourage team members to apply technical knowledge to the process.
2. Facilitate efficiency improvements in team activities	2.1.Ensure <i>budgets, operating procedures</i> and other related documentation is available to the team 2.2.Assist team members apply this information to the process responsibilities of the team 2.3.Encourage team members to identify <i>waste</i>

ELEMENT	PERFORMANCE CRITERIA
3. Resource and encourage a proactive maintenance approach	<p>2.4. Develop an environment where efficiency improvements are recommended by team members</p> <p>3.1. Develop communications between specialists outside the team and team members</p> <p>3.2. Develop strategies to monitor and deal with <i>key reliability issues</i></p> <p>3.3. Resource and encourage team members to identify and take appropriate action on potential equipment problems</p> <p>3.4. Arrange for workforce development and training for team members as required in proactive maintenance procedures and techniques</p> <p>3.5. Involve team members in relating identified problems to the maintenance strategy, and developing any required changes, to ensure awareness, learning and commitment</p>
4. Implement process and organisation improvements	<p>4.1. Plan the implementation of team suggested and externally directed improvements</p> <p>4.2. Facilitate team member commitment to, and involvement in, the implementation planning of improvements and to follow improvements to their conclusion</p> <p>4.3. Encourage the application of the 'plan, do, measure, improve, control' approach to the job</p> <p>4.4. Arrange for workforce development and training as required to facilitate continued team involvement in improvement processes</p> <p>4.5. Involve team and other key personnel in identification of skill needs and means of skills acquisition to fill any identified gaps</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- communication techniques

REQUIRED SKILLS AND KNOWLEDGE
<ul style="list-style-type: none"> • negotiation skills • information finding and analysing/using skills • team work • planning and organising • problem solving
Required knowledge:
<ul style="list-style-type: none"> • understanding of the competitive manufacturing process or processes used at the enterprise

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
Overview of assessment requirements	The competent person would be able to lead a competitive manufacturing team and facilitate their improving the process.
What critical aspects of evidence is required to demonstrate competency in this unit?	Evidence of effective team leadership would be required.
In what context should assessment occur?	Assessment needs to occur in an organisation implementing a competitive manufacturing environment or by a project.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit could be assessed concurrently with other team leader units dealing with change/improvement in the organisation.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct</p>

EVIDENCE GUIDE	
	<p>observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment</p>
What evidence is required for demonstration of consistent performance?	Evidence from one significant manufacturing improvement or change process may be sufficient. For less significant improvement or changes, a range of changes will be needed to generate sufficient evidence.
What are the specific resource requirements for this unit?	Access to an organisation implementing a significant change to or in competitive manufacturing.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Competitive manufacturing	<p><i>Competitive manufacturing</i> is used to describe the range of systemic manufacturing practice concepts and approaches. It covers but is not limited to:</p> <ul style="list-style-type: none"> • lean manufacturing • agile manufacturing • preventative and predictive maintenance approaches • monitoring and data gathering systems such as Systems control and data acquisition software (SCADA), enterprise resource planning systems (ERP), Manufacturing resource planning (MRP),

RANGE STATEMENT	
	<p>and proprietary systems such as SAP etc.</p> <ul style="list-style-type: none"> • statistical process control systems including six sigma and three sigma • just in time, kanban and other pull related manufacturing control systems • supply, value, and demand chain monitoring and analysis • other continuous improvement systems. <p>Competitive manufacturing should be interpreted so as to take into account the stage of implementation of competitive manufacturing approaches, the enterprise's size and work organisation, culture, regulatory environment and manufacturing sector..</p>
Team	<i>Team</i> may include work teams from all sections of the organisation including production, maintenance, technical, administration/finance, sales/marketing.
Budgets	Budgets include financial, time, materials/product and other business plans which are relevant to the team and the work area.
Waste	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product. Within manufacturing, categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items <p>Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers.</p>
Key reliability issues	Key reliability issues are typically things like cleanliness, lubrication and correct adjustment which are most likely to lead to failure.

MSACMS401A Ensure process improvements are sustained

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed to ensure that the gains which have been made by using improved methods, processes and equipment are sustained as the new base line/standard to the team's area of work and so prevent regression to former practices, or digression to less efficient practices.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to an environment where continuous improvement in a manufacturing enterprise is being undertaken.</p> <p>The team leader or other responsible person then facilitates and implements methods of ensuring that these improvements are sustained.</p> <p>Improvement initiatives can be made by any of any number of methods and by teams or individuals. The unit assumes that desired levels of performance or quality are known.</p> <p>The unit covers ensuring that team members implement the modified processes to ensure the improvements are sustained and opportunities taken to suggest further improvements.</p> <p>This unit requires the application of skills associated with problem solving, initiative and enterprise, planning and organising in order to check and monitor the impacts of change. It also requires communication and teamwork in order to assess the impact of change in a team's area of work. Self management and learning will be used to continuously monitor change influences and adapt improvements according to new information and</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Ensure corrective actions are implemented.	1.1.Liaise with relevant people associated with the anticipated corrective action 1.2.Ensure the supply of resources (equipment, modifications, consumables, people) 1.3.Check occupational health and safety (OHS) impacts of corrective action and take action in accordance with procedures if required 1.4.Ensure workforce has relevant skill level 1.5.Negotiate solutions with relevant people to allow

ELEMENT	PERFORMANCE CRITERIA
	implementation 1.6. Supervise implementation of corrective action 1.7. Monitor implementation of corrective action 1.8. Make required adjustments
2. Verify systems support improvement	2.1. Ensure <i>procedures</i> reflect improvements 2.2. Ensure training and assessment systems reflect improvements 2.3. Liaise with relevant people to ensure their support of the new modified system/s
3. Audit the change	3.1. Determine an appropriate audit period/cycle 3.2. Agree relevant measures/indicators for the improvement 3.3. <i>Measure performance</i> at agreed times using agreed measures 3.4. Investigate the cause/s of under performance 3.5. Take appropriate corrective action to improve performance 3.6. Reaudit the improvement on an agreed basis

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- communication/negotiation skills
- teamwork
- basic mathematics
- planning
- problem solving
- analysing.

Required knowledge:

- existing procedures
- modified procedures
- overall process of manufacturing relative to improvements being made
- appropriate measures of performance
- business performance goals sufficient to determine best measures of improved

REQUIRED SKILLS AND KNOWLEDGE

performance.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

Overview of assessment requirements	The person will be able to point to improvements which have been made where they have been active in designing and implementing systems for sustaining the improvement.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of having sustained improvements in the workplace and of reviewing these improvements for their real impact.
In what context should assessment occur?	Assessment will need to occur in a workplace where improvements are occurring, or where specific improvement projects are undertaken for the purpose of providing evidence of competence (among other aims). The unit may also be assessed on a project basis in a simulated environment.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with appropriate units on continuous improvement. This unit relates to a team leader ensuring that their team sustains improvements. <i>MSACMS201A Sustain process improvements</i> is a lower level unit for a person's own area of responsibility.
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and

EVIDENCE GUIDE	
	<p>colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Evidence should be available from multiple small changes, or from a large change which has had multiple facets implemented over a period of some months.
What are the specific resource requirements for this unit?	Access to a workplace implementing competitive manufacturing strategies, or where improvement projects can be conducted and relevant records is required. No other specific resources are required.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Systems	<p>Systems is used to mean any/all of the equipment, process, procedures and work practices that are used to produce the product.</p> <p>A term often used in this context is:</p> <ul style="list-style-type: none"> • Kaizen - the philosophy of continual improvement, that every process can and should be continually evaluated and improved in terms of time required, resources used, resultant quality, and other aspects relevant to the process.

RANGE STATEMENT	
Procedures	<p>Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (e.g. Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>
Improvement	<p>Improvement procedures in some enterprises are also known by baka-yoke which is a manufacturing technique of preventing mistakes by designing the manufacturing process, equipment and tools so that an operation literally cannot be performed incorrectly. An attempt to perform incorrectly, as well as being prevented, is usually met with a warning signal of some sort. The term poka-yoke is sometimes referred to as a system where only a warning is provided.</p> <p>Improvements may be sustained by use of technology so that it is impossible to do the job any other way. However, improvements may also be sustained by changes to process or procedures or other changes to the manufacturing system which, if followed, will sustain the change and this unit may be applied to all these situations.</p>
Measuring performance	<p>Measuring performance is not used literally and may mean the personal taking of measurements, or it may mean arranging for measurements to be taken/made by appropriate personnel. The interpretation of the measurements however is to be undertaken personally.</p>

MSACMT270A Use sustainable energy practices

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills needed to use and make improvements in sustainable energy practices in production, maintenance and logistics.
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario, a team member will be aware of energy use. Some of this energy use is necessary but typically a large part of energy use is <i>unnecessary waste</i> and so should be eliminated. The team member will observe energy use and ensure it is according to the organisation's plans and will also engage in continuous improvement for energy use.</p> <p>This unit requires the application of skills associated with interpreting workplace information on energy use and using procedures and technology to minimise energy use and waste.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify energy use	1.1. Identify energy consuming processes in relation to own work 1.2. Recognise the type/source of <i>energy</i> consumed
2. Follow energy conservation plans	2.1. Check energy use in accordance with conservation plans 2.2. Identify most efficient or appropriate equipment or procedures to comply with conservation plans 2.3. Identify any uses which do not comply with conservation plans 2.4. Take action in accordance with procedures to bring energy use back in line with conservation plans
3. Improve energy use	3.1. Note any waste of energy use 3.2. Recommend improvements to energy use

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.

REQUIRED SKILLS AND KNOWLEDGE
Required skills
<ul style="list-style-type: none"> • analysis • basic mathematics • communication • problem solving
Required knowledge
<ul style="list-style-type: none"> • types and sources of energy relevant to the process • basic principles of energy efficiency • process needs for energy

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
Overview of assessment requirements	The team member will be able to identify the energy use of any/all parts of the process and recommend better ways of using it.
What are the specific resource requirements for this unit?	Access to an organisation seeking to improve its energy usage.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of conformance to energy usage plans and suggestions for improvement should be available.
In what context should assessment occur?	Assessment needs to be conducted in an organisation where energy is a significant cost component or by use of a project, simulation or case study.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit is related to:</p> <ul style="list-style-type: none"> • <i>MSACMT271A Use sustainable environmental practices</i> - which covers general environmental practices, and • <i>MSACMT670A Develop and manage sustainable energy practices</i> - which covers higher level aspects.

EVIDENCE GUIDE	
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Evidence should be available from the daily routine of the job to show that there is consistent performance.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Waste	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product. Within manufacturing, categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production • delays • movement and transport

RANGE STATEMENT	
	<ul style="list-style-type: none"> • poor process design • inventory • inefficient performance of a process • making defective items. <p>Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers.</p>
Energy	<p>Energy is used to mean all sources of energy used by the process be it electricity, gas or mobile transport fuel. The uses of the energy will also be potentially wide and include heating and cooling, lighting, moving materials (including pumps and conveyors), modifying materials (including cutting, forming, weaving, knitting, reacting, moulding, extruding, mixing), generating pressure/vacuum or providing motive power for equipment and transport.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify current resource use and environmental issues.	1.1. Identify workplace <i>environmental and resource efficiency issues</i> . 1.2. Identify resources used in own work role. 1.3. <i>Measure</i> and record current usage of resources using <i>appropriate techniques</i> .

ELEMENT	PERFORMANCE CRITERIA
	1.4. Identify and report workplace environmental hazards to appropriate personnel.
2. Comply with environmental regulations.	2.1. Follow <i>procedures</i> to ensure <i>compliance</i> . 2.2. Report environmental incidents to appropriate personnel.
3. Seek opportunities to improve environmental practices and resource efficiency.	3.1. Follow <i>enterprise plans</i> to improve environmental practices and resource efficiency. 3.2. Make <i>suggestions</i> for improvements to workplace practices in own work area.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include the ability to:

- report as required by procedures
- follow procedures and instructions and respond to change
- ask questions and seek clarifications relating to work requirements

Reading and writing is required in order to interpret required procedures and complete required workplace forms/reports.

Numeracy is required to interpret numeric workplace information, readings and measurements, handle data as required and complete numeric components of workplace forms/reports.

Required knowledge

Competency includes sufficient knowledge to:

- have a basic understanding of sustainability
- know the environmental hazards/risks, resource use and inefficiencies associated with own workplace (at an appropriate level)
- know the relevant environmental and resource efficiency systems and procedures for own work area
- know the impact of laws and regulations to a level relevant to the work context

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competence in this unit must be able to provide evidence of the ability to follow workplace procedures according to instructions given and to participate in the improvement of environmental and resource efficient work practices at own level of responsibility. Evidence must be strictly relevant to the particular workplace role.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:</p> <ul style="list-style-type: none"> • identify and measure resources used in their job • identify situations likely to lead to an environmental incident • follow procedures related to environmental performance. <p>Consistent performance should be demonstrated. For example, look to see that:</p> <ul style="list-style-type: none"> • work is routinely to procedures • the minimum of resources is used consistent with the job requirements, good practice and the procedures.
<p>Context of and specific resources for assessment</p>	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.</p> <p>Depending on the selected methods of assessment access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans • documentation in relation to production, waste, overheads, hazard control/management • reports from supervisors/managers • case study/scenarios
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed:</p> <ul style="list-style-type: none"> • by demonstration in the workplace

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • using targeted questioning for appropriate portions • by use of a suitable simulation and/or a range of case studies/scenarios • by a combination of these techniques. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment.</p>
Guidance information for assessment	Assessors need to be aware of any cultural issues that may affect responses to questions. Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Procedures	All operations are performed in accordance with procedures including all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.
Environmental and resource efficiency issues	<p>Environmental and resource efficiency issues include minimisation of environmental risks and maximisation of opportunities to improve business environmental performance and to promote more efficient production and consumption of natural resources, for example by:</p> <ul style="list-style-type: none"> • minimisation of waste, through implementation of the waste management hierarchy

RANGE STATEMENT	
	<ul style="list-style-type: none"> • efficient and effective use of energy and other resources • seeking alternative sources of energy • efficient use of materials and appropriate disposal of waste • use of controls to minimise the risk of environmental damage from hazardous substances • efficient water use • reducing emissions • life cycle analysis applied to issues such as energy supply, materials, transport, production
Measure	<p>Measure should be interpreted in a manner consistent with the scope of the job and may include things like:</p> <ul style="list-style-type: none"> • counting the number of items entering/leaving a work area • reading indicators in the work area • obtaining relevant information from support personnel • other simple means
Appropriate techniques	<p>Appropriate techniques include:</p> <ul style="list-style-type: none"> • material fed to/consumed by plant/equipment • plant meters and gauges • job cards including kanbans • examination of invoices from suppliers • measurements made under different conditions • examination of relevant information and data.
Compliance	<p>Compliance includes meeting relevant federal, state and local government laws, by-laws, regulations and mandated codes of practice. It also includes any codes and standards that the enterprise applies voluntarily.</p>
Incidents	<p>Incidents include:</p> <ul style="list-style-type: none"> • breaches or potential breaches of regulations • occurrences outside of standard procedure which may lead to lower environmental performance.
Enterprise plans	<p>Enterprise plans include:</p>

RANGE STATEMENT	
	<ul style="list-style-type: none"> • documented policies and procedures • work plans to minimise waste, increase efficiency of water/energy use, minimise environmental hazards
Suggestions	<p>Suggestions include ideas that help to:</p> <ul style="list-style-type: none"> • prevent and minimise environmental risks and maximise opportunities • reduce emissions of greenhouse gases • reduce use of non-renewable resources • improve energy efficiency • increase use of renewable, recyclable, reusable and recoverable resources • reduce waste • increasing the reusability/recyclability of wastes/products • reduce water usage and/or water wastage.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Check job requirements.	<p>1.1. Identify <i>workplace</i> requirements by following established <i>procedures</i> and practices</p> <p>1.2. Identify product, materials and <i>equipment</i> requirements for job(s)</p>

ELEMENT	PERFORMANCE CRITERIA
2. Control hazards.	2.1. Identify <i>hazards</i> in the production work area 2.2. Assess the risks arising from those hazards 2.3. Implement measures to control or avoid those risks in line with procedures and duty of care to fellow workers.
3. Prepare equipment for operation as required	3.1. Perform <i>pre-start up checks</i> 3.2. Suspected unusual or non standard product, materials and equipment are reported to an appropriate person 3.3. If required notify other team members on the intended equipment function and start up 3.4. Check/supply materials to equipment as required 3.5. Start up the item of equipment as required 3.6. Bring to specified conditions and build operating rate steadily, checking expected performance at various stages in accordance with procedures
4. Operate equipment	4.1. Monitor <i>equipment operating conditions</i> 4.2. Monitor <i>product characteristics</i> 4.3. Recognise conditions and characteristics which indicate a <i>problem or a potential problem</i> 4.4. Take <i>appropriate action</i> in response to problem or potential problem 4.5. Maintain supply of materials and removal of products as required 4.6. Complete required <i>records</i> 4.7. Keep equipment and work area in a clean, organised and safe condition
5. Prepare equipment for shut down as required	5.1. Perform emergency pause, stop or shutdown as required 5.2. Ensure equipment is free of product or purged as required 5.3. Shut down equipment in accordance with procedures 5.4. Make sure equipment and area is left in a safe condition and ready for <i>need</i>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- observation
- following procedures for start up, operation and shut down of equipment
- analysis
- problem solving
- communication
- documenting

Required knowledge

- all major components of the equipment and describe the function of each
- principles of equipment operation
- equipment operating parameters
- equipment and product variables and their interactions.
- apply and/or explain:
 - impact of materials and properties
 - start-up and shutdown processes
 - construction and limitations of the equipment
 - out of specification situations
 - distinguish between causes of faults such as:
 - raw materials
 - instrument failure/malfunction
 - electrical failure/malfunction
 - mechanical failure/malfunction
 - variations in product parameters (temperature, flows, pressure&levels).

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The competent person will be able to carry out the day to day operation of a piece of production equipment, meeting the demands of productivity and quality while resolving routine problems.

EVIDENCE GUIDE	
<p>What critical aspects of evidence is required to demonstrate competency in this unit?</p>	<p>It is essential that the equipment be understood and that the importance of critical material properties, settings and readings is known. Competence must be demonstrated in the ability to recognise and analyse potential or actual problem situations requiring action and then in implementing appropriate corrective action. The emphasis should be on the ability to avoid problems rather than on recovery from a problem.</p> <p>Consistent performance should be demonstrated. In particular look to see that:</p> <ul style="list-style-type: none"> • process conditions are maintained within limits • quality is monitored to minimise wastage • start-up and shutdown occurs first time • signals and alarms are responded to immediately • process measurements are continually made or observed • all OHS requirements are followed. • early warning signs of equipment/processes needing attention or with potential problems are recognised • the range of possible causes can be identified and analysed and the most likely cause determined • appropriate action is taken to ensure a timely return to full performance • obvious problems in related plant areas are recognised and an appropriate contribution made to their solution • pre-start checks are made to ensure equipment is lined up to the plant in accordance with procedures and/or manufacturers specifications. <p>Besides assessing actual operation of manufacturing equipment many aspects may also be assessed using a range of scenarios, case studies or what ifs as the assessment method. These assessment activities should include a range of problems, including new, unusual situations that may have been generated from past history</p>
<p>In what context should assessment occur?</p>	<p>Assessment will need to occur on an operating item of production equipment although some aspects especially problem solving may be assessed through simulation.</p>
<p>Are there any other units which could or should be assessed with this unit or which relate directly to this</p>	<p>This unit could be assessed concurrently with other relevant units.</p>

EVIDENCE GUIDE	
unit?	
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	<p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p>
What are the specific resource requirements for this unit?	<p>Access to an operating item of production equipment over an extended time.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Workplace	<p>Workplace for this unit covers a manufacturing environment specifically established for learning introductory manufacturing skills. It may be:</p> <ul style="list-style-type: none"> • a school classroom or workshop equipped to teach manufacturing principles and practices • RTO premises equipped to teach manufacturing principles and practices

RANGE STATEMENT	
	<ul style="list-style-type: none"> an enterprise environment where above average supervision exists and training is occurring. The normal production imperatives have been modified to take into account the training being delivered.
Procedures	<p>Procedures includes all work instructions, standard operating procedures, formulas/ recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of equipment and processes. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>
Equipment	<p>Equipment for the purposes of this unit covers routine or common manufacturing equipment suitable for students operating in a simulated or trial manufacturing environment where there is a high degree of direct supervision. examples include but are not limited to:</p> <ul style="list-style-type: none"> guillotines bending and folding machines non CNC lathes, especially bench and training lathes soldering equipment pedestal drills bench grinders
Hazards	<p>Workplace hazards include:</p> <ul style="list-style-type: none"> hazardous materials gases and liquids under pressure moving machinery cutting edges electrical equipment materials handling environments subject to heat, noise, dusts or vapours.
Pre-start up checks	<p>Pre-start up checks include:</p> <ul style="list-style-type: none"> visual checks

RANGE STATEMENT	
	<ul style="list-style-type: none"> • completing checklists • checking that safety guards, gates etc are in position and are operational • other checks required by standard operating procedures and manufacturer's instructions
Equipment operating conditions	<p>Equipment operating conditions will be monitored using a range of techniques including:</p> <ul style="list-style-type: none"> • monitoring of measured or indicated data as shown by gauges, charts etc., (eg. speed, hours on line, pressure, temperature, flow, vibration) • the senses of smell, sight, sound and feel as appropriate.
Product characteristics	<p>Product characteristics includes:</p> <ul style="list-style-type: none"> • product quality • production rate • defect rate
Problem/potential problem	<p>Problem/potential problem includes:</p> <ul style="list-style-type: none"> • changes to operating conditions • adverse changes to product characteristics • adverse changes to waste
Appropriate action	<p>Appropriate action includes:</p> <ul style="list-style-type: none"> • making adjustments in accordance with procedures • stopping the equipment in accordance with procedures • reporting to appropriate person.
Records	<p>Records include:</p> <ul style="list-style-type: none"> • log sheets/books • job/work sheets • electronic/paper records • verbal/voicemail/email reports
Need	<p>Need includes:</p> <ul style="list-style-type: none"> • leaving the equipment ready for restart • leaving it safe for maintenance • preparing for a medium/long term shut down

Co-requisite units

Co-requisite units		

MSAPCII297A Make an object from cloth using an existing pattern

Modification History

Not applicable.

Unit Descriptor

<p>Unit descriptor</p>	<p>This unit of competency has been primarily developed for use in a simulated or trial manufacturing environment where there is a high degree of direct supervision.</p> <p>It covers the skills required to make an object from cloth (such as basic decorative items or clothing) following the requirements of an identified pattern. It may or may not require machinery.</p> <p>The elements of this unit should always be assessed in conjunction with other units that relate to the requirements of a specified work or job function</p> <p>Training and assessment against this competency unit must incorporate all relevant OHS and related legislative requirements.</p>
-------------------------------	---

Application of the Unit

<p>Application of the unit</p>	<p>This unit applies to a learning and assessment environment where access to normal production operations is not available . A typical environment will be for application in a VET in Schools delivery environment or other simulated or trial manufacturing environment where a high degree of supervision exists.</p> <p>The unit applies to the construction of a cloth item that does not require complex sewing or finishing or the development of a pattern. Typical items include tablecloths, hats, towels, cushions, BBQ covers, place mats, cloth bags, scarves, wall hangings, external awnings, and cloth pencil or tool cases.</p> <p>The unit should be regarded as an integrating unit which</p>
---------------------------------------	---

	<p>has application in Certificate I and II qualifications that act as general introductory qualifications to manufacturing industry. It should be applied to a specific 'project' or task which has a defined beginning, middle and end, occurs over an extended period of time, and is reflective of clothing manufacturing industry and/or organisation.</p> <p>When delivered and assessed as part of a qualification the unit should be customised to ensure its relevance to a real or simulated work activity and related workplaces and must be delivered and assessed over a period of time.</p>

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify job requirements	1.1. Job requirements for making the <i>object from cloth</i> are identified from <i>work instructions</i> 1.2. Instructions for designing and sequencing of work are considered 1.3. Particular measurements or adjustments are interpreted and mapped out 1.4. <i>OH&S requirements</i> are considered, planned for and observed
2. Prepare for work	2.1. <i>Suitable work area</i> is selected for the task 2.2. Appropriate <i>tools, equipment and materials</i> are selected 2.3. <i>Potential hazards</i> are identified from observation of the tools, equipment, materials 2.4. Required tools and materials are laid out in sequence according to job requirements and work instructions 2.5. Equipment, if required, is checked and adjusted in accordance with workplace procedure
3. Create work	3.1. Fabric is measured, cut and laid out according to specifications 3.2. Fabric is secured or sewed according to quality requirements 3.3. Work is checked against patterns and work sheets at the identified checkpoints 3.4. Non-conformity with the required pattern or quality standard is rectified.
4. Complete work	4.1. Completed work is checked against required quality standards 4.2. Documentation is completed following workplace <i>reporting procedures</i> 4.3. Work area is cleaned, tools and equipment are returned to storage 4.4. Unused materials are returned to storage and waste and scrap are dealt with following workplace procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- collect, organize and understand information related to basic plans and safety procedures
- coordinate work
- plan and organise activities
- work with others
- the ability to ask for limitations and ask for help where needed; and
- use mathematical ideas and techniques to correctly complete measurements and calculate areas and estimated materials requirement

Required knowledge

- workplace procedures and work instructions
- organisational structure
- evaluation and review procedures;
- creative thinking techniques.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

What critical aspects of evidence are required to demonstrate competency in this unit?

- identify appropriate materials for use in making cloth items, and any special sewing or handling requirements for those materials.
- apply safe operating and handling practices for equipment, products and materials.
- interpret work order and locate and apply relevant information.
- use patterns select and use tools and equipment appropriate to the task.
- follow work instructions, operating procedures and inspection practices to:
 - prevent damage to goods, equipment or products
 - maintain required production output and product

EVIDENCE GUIDE

	<p>quality</p> <ul style="list-style-type: none"> • minimise the risk of injury to self or others. • work effectively with others. • modify activities to cater for variations in workplace contexts and environment. • report process or materials faults, damaged products or equipment. <p>Assessment must confirm appropriate knowledge and skills to:</p> <ul style="list-style-type: none"> • follow workplace procedures for hazard identification and risk control • use relevant personal protective clothing and equipment • communicate effectively with others as required when following safety procedures <p>Performance is demonstrated consistently over a period of time and in a suitable range of contexts</p> <p>Consistently applies required knowledge and skills when completing workplace hazard prevention tasks and following relevant procedures:</p> <p>Consistently shows evidence of application of relevant workplace procedures, policies, instructions and regulations, including:</p> <ul style="list-style-type: none"> • OHS regulations and hazard prevention policies and procedures • relevant manufacturer's guidelines relating to the operation and use of equipment <p>Action is taken promptly to report and/or rectify any safety incidents in accordance with workplace procedures</p> <p>Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions among staff and others</p> <p>Work is completed systematically with required attention to detail without damage to goods, equipment or personnel</p>
Context of assessment	<p>Assessment may occur on the job or in a workplace simulated facility with relevant equipment, materials, and work instructions and specifications.</p> <p>Assessment of this unit must be carried out or managed</p>

EVIDENCE GUIDE	
	<p>by a registered training organisation:</p> <p>Assessment of knowledge must be conducted through appropriate written/oral examinations</p> <p>Appropriate practical assessment must occur:</p> <ul style="list-style-type: none"> • in suitable simulations of a work environment organised by the registered training organisation, and/or • in an appropriate workplace
Specific resources required for assessment	<p>Access is required to opportunities and appropriate resources to either:</p> <ul style="list-style-type: none"> • carry out a range of suitably simulated practical and knowledge assessments that demonstrate the skills and knowledge to work safely (usually as part of a holistic assessment involving other competency units), and/or • participate in actual workplace activities that demonstrate the skills and knowledge to work safely

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
What does an object from cloth include?	<p>An object from cloth is a cloth item that does not require sewing of complex shapes or finishing or the development of a pattern and may include:</p> <ul style="list-style-type: none"> • basic cushions • soft tableware such as placemats or serviettes • basic clothing such as a scarf, simple cloth hat not requiring blocking or a circle skirt, • a basic carry bag • handkerchief • tea towel • wall hanging

RANGE STATEMENT	
	<ul style="list-style-type: none"> pencil case
What are the work instructions?	<p>Work instructions may include:</p> <ul style="list-style-type: none"> job sheets including number and type of objects to be produced patterns for making an object from cloth plans drawings and sketches operating instructions for equipment including safety procedures designer instructions quality requirements verbal directions from a supervisor or instructor
What do OH&S requirements include?	<p>OH&S requirements may include:</p> <ul style="list-style-type: none"> legislation regulations material handling instructions including hazardous and dangerous goods codes local safe operating procedures specific workplace rules and regulations regarding personal protective wear and equipment
What is a suitable work area?	<p>A suitable work area may include:</p> <ul style="list-style-type: none"> a bench top or desk a sewing or layout table a sewing table with a sewing machine
What are tools, equipment and materials?	<p>Tools and equipment may include:</p> <ul style="list-style-type: none"> measuring equipment such as tapes and rulers calculating equipment such as calculators and computers general cutting and sewing tools including scissors, drills, sewing machines, hemming machines, glue guns personal protection equipment <p>Materials may include:</p> <ul style="list-style-type: none"> plain and patterned fabric velvet threads

RANGE STATEMENT	
	<ul style="list-style-type: none"> • wadding • foam • tape • fasteners including buttons and hooks
What are potential hazards?	Potential hazards may include broken or faulty equipment, damaged needles, a lack of lighting, untidy working conditions, wet or slippery floors, improperly secured sewing machines, damaged or frayed electrical cables and connections,
What are reporting procedures?	<p>Workplace reporting procedures may include:</p> <ul style="list-style-type: none"> • completing necessary paperwork • communicating with a supervisor or key person that you are completed with the task • reporting, accidents, injuries and faulty equipment or materials • filing necessary paperwork

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify job requirements	1.1. Specifications for <i>metal</i> item are identified from <i>work instructions</i> 1.2. Design is interpreted to determine process, tool, equipment and materials requirements 1.3. <i>OH&S requirements</i> are considered and observed

ELEMENT	PERFORMANCE CRITERIA
	throughout the <i>workplace</i>
2. Prepare for work	<p>2.1. <i>Suitable work area</i> is selected for the task</p> <p>2.2. Work area is prepared according to OH&S and ergonomic requirements</p> <p>2.3. <i>Appropriate tools, equipment</i> and <i>materials</i> are selected in accordance with the specifications determined for the work</p> <p>2.4. Equipment and machinery is cleaned, checked, and prepared for operation in accordance with OH&S requirements and workplace procedure</p> <p>2.5. <i>Potential hazards</i> associated with the use of tools, equipment, materials and the workplace are identified and steps taken to eliminate them in accordance with OH&S legislative requirements and established workplace procedures.</p> <p>2.6. Where required, <i>records</i> are kept in accordance with workplace requirements</p>
3. Produce work	<p>3.1. Dimensions are transferred from job specifications and/or drawings or sketches and material is marked out to conform to <i>specifications</i> and templates are <i>formed</i> using appropriate machinery or tools</p> <p>3.2. Edges and surfaces are <i>prepared</i> according to specifications.</p> <p>3.3. Components are <i>joined</i> according to project requirements</p> <p>3.4. Work is checked for conformance with specifications.</p> <p>3.5. Non-conformity with specifications or quality standard is <i>rectified</i></p> <p>3.6. Work is <i>finished</i> according to specifications and quality standards</p>
4. Complete work	<p>4.1. Completed work is checked against required quality standards</p> <p>4.2. Unused materials are returned to storage and waste and scrap are dealt with following workplace procedures</p> <p>4.3. Work area is cleaned, tools and equipment are returned to storage</p> <p>4.4. Where required, documentation and records are completed and maintained following workplace procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- apply occupational health and safety standards
- observe relevant statutory requirements and codes of practice
- use, update and where appropriate produce sketches and basic drawings
- select materials and resources
- use and apply basic quality standards
- apply quality procedures
- communicate effectively
- communicate ideas and information to obtain confirmation of work requirements and specifications, coordination with other workers and the reporting of work outcomes and problems.
- collect, organise and understand information related to work orders, basic plans and safety procedures.
- plan and organise activities, including preparation for work and obtaining equipment and materials.
- work with others and in a team to optimise efficient workflow and productivity.
- apply pre-checking and quality techniques to anticipate construction problems, avoid reworking and avoid wastage.
- use of routine workplace tools, equipment, materials and measuring devices.

Depending on the object to be made required skills may also include:

- use cutting and heating equipment
- use of mechanical cutting equipment
- use of workshop plant and equipment
- use of hand and portable power tools

Required knowledge

- the interpretation of a plan representing the product to be made
- the concept of workflow and its relation to manufacture of objects
- identification of appropriate hand and power tools, materials, equipment, processes and procedures.
- occupational health and safety standards and practices.
- relevant statutory requirements and codes of practice
- hand and portable power tools and their application
- mechanical cutting techniques

REQUIRED SKILLS AND KNOWLEDGE

- paints, sealants and glues
- jigs and templates
- workshop plant and equipment
- manufacture and assembly techniques
- common materials used in the manufacture of metal objects
- mathematical techniques
- communication principles

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Knowledge and application of relevant sections of:

- occupational, health and safety legislation; statutory legislation;
- enterprise/site safety procedures;
- enterprise/site emergency procedures
- preparation and planning of work
- lay out, marking off/out and developing techniques and procedures
- fabrication techniques
- shaping techniques
- cutting techniques
- perform normal operator maintenance of work area to enable work to be conducted safely and efficiently
- relevant standards and procedures
- completion of work procedures

Context of assessment

Assessment may occur on the job or in a workplace simulated facility with relevant equipment, materials, work instructions and deadlines.

Specific resources required for assessment

Access to plans, hand and/or power tools, equipment, materials and a work area.

Access is required to opportunities and appropriate

EVIDENCE GUIDE

	<p>resources to either:</p> <ul style="list-style-type: none"> • carry out a range of suitably simulated practical and knowledge assessments that demonstrate the skills and knowledge to work safely (usually as part of a holistic assessment involving other competency units; and/or • participate in actual workplace activities that demonstrate the skills and knowledge to work safely
--	--

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

What can metal include?	<p>Metal <i>may include</i>:</p> <ul style="list-style-type: none"> • mild steel • galvanised steel • stainless steel • aluminium • brass
What can object from metal include?	<p><i>An object from metal can include</i>:</p> <ul style="list-style-type: none"> • a small decorative box, with or without a lid • desk pencil holder • metallic photo album • cabinet • shelving • CD rack • metallic picture frame.
What are the work instructions?	<p><i>Work instructions may include</i>:</p> <ul style="list-style-type: none"> • job sheets • patterns • plans • drawings and sketches

RANGE STATEMENT	
	<ul style="list-style-type: none"> • verbal or illustrated directions from supervisor • number and type of objects to be produced • quality requirements. • OH&S requirements • environmental requirements
What can OH&S requirements include?	<p><i>OH&S requirements may include:</i></p> <ul style="list-style-type: none"> • legislative requirements • hazardous and dangerous goods codes • safe operating procedures • specific workplace rules regarding personal protective wear and equipment such as disposable overalls, dust mask, eye and ear protection and gloves.
Workplace	<p>Workplace for this unit means a manufacturing environment specifically established for learning introductory manufacturing skills. It may be:</p> <ul style="list-style-type: none"> • a school classroom or workshop equipped to teach manufacturing principles and practices • RTO premises equipped to teach manufacturing principles and practices • an enterprise environment where above average supervision exists and training is occurring. The normal production imperatives have been modified to take into account the training being delivered.
What can a suitable work area include?	<p><i>A suitable work area may include:</i></p> <ul style="list-style-type: none"> • workbench • desk or table • workshop • shed • durable space
What can appropriate tools, equipment and materials include?	<p><i>Appropriate tools</i> will vary according to the project, but may include:</p> <ul style="list-style-type: none"> • measuring tapes or rulers • hammers • mallets • squares • bevels • chisels

RANGE STATEMENT	
	<ul style="list-style-type: none"> • files • planes • hand saws • cordless drills/ screwdrivers • fixing and joining devices • jigs • clamping devices • pincers <p><i>Appropriate equipment</i> could include:</p> <ul style="list-style-type: none"> • power saws • power drills • band saws • vertical drill presses • protective eye ware • protective gloves • dust masks • overalls or protective clothing <p><i>Appropriate materials</i> could include:</p> <ul style="list-style-type: none"> • metal • adhesives • screws • nuts • bolts • hinges and metal fasteners • pencils and markers • paints.
What potential hazards include?	<p><i>Potential hazards</i> may include:</p> <ul style="list-style-type: none"> • broken or faulty equipment • unnoticed sharp objects • poor lighting • inadequate ventilation • inadequate attention to the activities of others • electrical shortages and power overload • disorganised or cluttered workspace (poor housekeeping) • poor attention when dealing with tools and equipment. • environmental chemicals, heat, dust, noise, gas and oil.

RANGE STATEMENT	
What could records include?	<p><i>Records</i> could include:</p> <ul style="list-style-type: none"> • plant and maintenance records • job cards • check sheets • reporting requirements • documenting equipment and/or material defects • workplace procedures relating to the use of tools and equipment.
What could specifications include and what does it mean for materials to be formed?	<p><i>Specifications</i> could include:</p> <ul style="list-style-type: none"> • measurements and dimensions • forming methods could include cutting, bending, rolling, beading.
What is involved in making sure edges and surfaces are prepared?	<p><i>Preparing edges and surfaces</i> could include:</p> <ul style="list-style-type: none"> • filing • sanding • cleaning • grinding • polishing
What is involved in making sure metal pieces are joined?	<p><i>Joining metal pieces</i> could include attaching pieces together with:</p> <ul style="list-style-type: none"> • screws, rivets, nuts and bolts • hinging • soldering
What is involved in making sure non-conformities are rectified?	<p><i>Rectifying non-conformities</i> could involve:</p> <ul style="list-style-type: none"> • deconstructing the assembled pieces • reshaping /resizing or re-cutting elements • reassembling elements.
What is involved in making sure work is finished?	<p><i>Finishing work</i> can include:</p> <ul style="list-style-type: none"> • filing • polishing • grinding • painting and decorating.

MSAPMOHS210B Undertake first response to non-fire incidents

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor	This unit deals with recognising and responding to an emerging incident (except for fire) to provide an appropriate first response
------------------------	--

Application of the Unit

Application of the unit	This competency applies to operators who are required to respond to an incident such as a leak, spill or other incident. The worker is not expected to deal with the emerging incident, but to provide an initial first response in order to contain the incident and/or secure the immediate area in order to minimise resultant damages and loss. In this unit it is assumed that the worker is acting according to established workplace procedures.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Pre-requisite Units	

Employability Skills Information

Employability Skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess level of severity.	1.1. Recognise an incident has occurred or is about to occur. 1.2. Access hazard information as appropriate. 1.3. Assess frequency, duration, actual and potential outcome. 1.4. Evaluate and communicate in a timely and appropriate manner the location, nature and extent of the incident.
2. Undertake routine response to minimise affect of the incident.	2.1. Determine first response requirements to contain the incident or evacuate the affected areas. 2.2. Select the appropriate response from the incident procedures and equipment. 2.3. Apply incident procedures as appropriate. 2.4. Clear and secure the incident area. 2.5. Safely locate, access and operate incident response equipment.
3. Notify responsible authorities.	3.1. Follow incident reporting procedures. 3.2. Identify appropriate authorities and notify. 3.3. Clearly and unambiguously communicate information concerning the incident in a timely manner.
4. Undertake safe evacuation.	4.1. Evacuate the area in a safe and controlled manner when first response has failed to control the incident or has proven inappropriate. 4.2. Secure the immediate area of the incident to ensure no further loss occurs to people, equipment, materials, process and environment.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Competence includes the ability to apply and explain procedures for:

- identifying hazard and emergency signs and labels
- evacuation of different areas
- operating various pieces of incident response equipment
- communicating details of an incident situation clearly.

Language, literacy and numeracy requirements

- This unit requires the ability to respond to data and information indicating an incident.
- Writing is required to the level of completing required workplace forms and reports.
- Numeracy is required to the level of interpreting and reporting relevant data.

Required knowledge:

- Knowledge and understanding of the incident response procedures and equipment, sufficient to recognise standard and non-standard situations and then determine the appropriate action which is consistent with operating guidelines.
- Knowledge of the relevant OHS and environmental requirements, and organisation standard operating procedures is required along with an ability to implement them in a manner that is relevant to incident response practices.
- Evidence of knowledge of all relevant workplace procedures will include:
 - principles of operation of the incident response equipment
 - hazards policies and procedures
 - incident, fire and accident procedures
 - procedures for the use of personal protective clothing and equipment
 - organisation standard operating procedures (SOPs).

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The unit will be assessed in as holistic a manner as is

EVIDENCE GUIDE	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation.</p> <p>Assessment will occur with simulated industrial incidents and will be undertaken in a work-like environment.</p> <p>It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:</p> <ul style="list-style-type: none"> • recognise and analyse potential situations requiring action • implement the appropriate corrective action. <p>The reasoning process behind the problem analysis and determining the required actions should be assessed. The emphasis should be on the ability to minimise the affect of an incident situation.</p> <p>Consistent performance should be demonstrated. For example, look to see that:</p> <ul style="list-style-type: none"> • incident situations are recognised and communicated promptly • action is taken to ensure that the effects of the incident situation are controlled promptly • potential to involve others in the incident is recognised and appropriately communicated • incident procedures are understood and followed. <p>These aspects may be best assessed using a range of scenarios/case studies and 'what ifs' as the stimulus with a walk through forming part of the response. These assessment activities should include a range of problems, including new, unusual and extreme situations that may have been generated from the past incident history of the workplace, incidents on similar plants around the world, hazard analysis activities (eg HAZOP) and similar sources.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment for this unit will be on a processing plant or in a manufacturing environment.</p> <p>Assessment will require access to an operating plant or manufacturing environment over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of</p>

A bank of scenarios/case studies/what ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.</p> <p>This unit requires a body of knowledge which will be assessed through questioning and the use of 'what if' scenarios both in the workplace (during demonstration of normal operations and walk throughs of abnormal operations) and off the job.</p> <p>In all cases it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.</p> <p>In a major hazard facility, it may be appropriate to assess this unit concurrently with:</p> <ul style="list-style-type: none"> • <i>PMPOHS200 Participate in workplace safety procedures</i> • <i>PMASUP220 Monitor and control environmental hazards.</i> <p>Simulation may be required to allow for timely assessment of parts of this unit of competency. Simulation should be based on the actual workplace and will include walk throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays.</p> <p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.</p>
--	---

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.

RANGE STATEMENT	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	This competency covers all emerging incidents except for fire.
Procedures	<p>All operations are performed in accordance with procedures.</p> <p>Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.</p> <p>All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.</p>
Tools and equipment	<p>This competency includes use of equipment and tools as required for the situation such as:</p> <ul style="list-style-type: none"> • personal protective equipment such as breathing apparatus • incident response equipment such as hand held extinguishers, hose reels, fire blankets • evacuation equipment • survival equipment • standard operating procedures (SOPs) • external personnel such as: <ul style="list-style-type: none"> • police • fire brigade • ambulance.
Hazards	<p>Typical hazards include:</p> <ul style="list-style-type: none"> • chemicals and hazardous materials • gases and liquids under pressure • moving machinery • materials handling • working at heights, in restricted or confined spaces, or environments subjected to heat, noise, dusts or vapours.
Problems	<p>'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'.</p> <p>Typical process and product problems may include:</p> <ul style="list-style-type: none"> • accidents • chemical or oil spills

RANGE STATEMENT	
	<ul style="list-style-type: none"> • gas leak or vapour emission • utilities failure • bomb scares.
Personnel	<p>Appropriate personnel for OHS referrals may include:</p> <ul style="list-style-type: none"> • employer • supervisor • employees elected as incident team leader • other personnel with incident team leader responsibilities.
OHS issues	<p>OHS issues which may need to be raised by workers with designated personnel may include:</p> <ul style="list-style-type: none"> • recognition of different types of emergencies • problems encountered in control measures and implementation • observation on injury and/or incident occurred in the workplace.
Required functions	<p>Required functions include:</p> <ul style="list-style-type: none"> • containment of incident, eg chemical/oil spill or gas/vapour leak • communication with internal and external personnel.
Health, safety and environment (HSE)	<p>All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.</p>

Unit Sector(s)

Unit Sector

Competency field

Competency Field

Co-requisite units

Co-requisite Units		

MSAPMOHS300A Facilitate the implementation of OHS for a work group

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

On completion of this unit, the worker will be able to implement and monitor defined OHS policies and procedures for a work group or area, within their scope of responsibilities.

Application of the Unit

Application of this unit

This competency applies to operators who are capable of coaching the team in participating and contributing to OHS management issues. The worker will be able to perform duties that are required of a safety committee member or safety representative in an organisation.

Typically this worker might be a team leader or on the OHS committee.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has the prerequisite of *MSAOHS200A Work safely*.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Communicate OHS information for co-workers in team.	1.1 Accurately and clearly explain to the work group basic OHS rights, responsibilities and requirements. 1.2 Provide, in a readily accessible manner, information on the relevant organisation OHS policies, procedures and programs, and accurately and clearly explain them to the work group. 1.3 Regularly provide relevant information about identified hazards and the outcomes of risk assessment and risk control procedures, and accurately and clearly explain them to the work group.
2. Coach co-workers in team.	2.1 Establish mutual support groups, eg buddy system, to encourage effective development of individual and group competencies in OHS. 2.2 Provide personal encouragement and assistance to team members to contribute to the management of OHS at the workplace.
3. Facilitate the consultative process.	3.1 Deal with, and promptly resolve, issues raised through consultation or refer to the appropriate personnel for resolution in accordance with workplace procedures. 3.2 Seek input from work group on OHS issues and proposed changes to process, procedures or work place. 3.3 Encourage and use feedback from individuals and teams to identify and implement improvements in the

ELEMENT ELEMENT	PERFORMANCE CRITERIA
	<p>Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.</p> <p>management of OHS.</p> <p>3.4 Promptly inform the work group of the outcomes of consultation over OHS issues.</p>
<p>4. Implement and monitor organisation procedures for identifying hazards, and assessing and controlling risk.</p>	<p>4.1 Implement and monitor adherence to work procedures to identify hazards and assess and control risk.</p> <p>4.2 Monitor existing risk control measures and report results regularly.</p> <p>4.3 Access internal and external sources of relevant OHS information.</p> <p>4.4 Evaluate and identify inadequacies in existing risk control measures in accordance with the hierarchy of control, and report to designated personnel.</p> <p>4.5 Identify inadequacies in resource allocation for implementation of risk control measures and report to designated personnel.</p> <p>4.6 Identify actual/potential inadequacies in procedures and report to designated personnel.</p> <p>4.7 Identify actual/potential inadequacies in individual or team competency and report to designated personnel.</p>
<p>5. Maintain and use OHS records.</p>	<p>5.1 Accurately and legibly complete OHS records for work area, in accordance with workplace requirements for OHS records and legal requirements for the maintenance of records of occupational injury and disease.</p> <p>5.2 Use aggregated information from the area OHS records to identify hazards and monitor risk control procedures within work area according to procedures and within scope of responsibilities and competencies.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of the workplace OHS system and State OHS legislative requirements, codes of practice and relevant industry standards sufficient to implement and monitor OHS activities for a work group or area within the scope of their responsibilities and competencies.

In these industries which are characterised by high potential hazard, employees need to exercise their duty of care responsibilities not only within the general OHS Acts and regulations, but also within those State and national standards applying to hazardous substances, dangerous goods and major hazards.

Competence includes the ability to apply and describe the:

- identification of hazards in the workplace and standard controls
- assessment of risk and implementation of risk control measures
- rights and responsibilities of employees under OHS legislation
- obligations of employers under the OHS legislation
- legislative requirements for information and consultation
- arrangements for consultation within the workplace
- management systems and procedures for OHS
- the hierarchy of control
- hazard policies and procedures
- safety procedures
- emergency, fire and accident procedures.

Competence also requires the ability to:

- locate, understand and follow workplace OHS procedures
- identify and communicate with all key personnel in the organisation
- identify and access relevant sources of information
- interpret OHS data such as tables of numbers and graphs
- select, recommend and use personal protective clothing and equipment.

Language, literacy and numeracy requirements

This unit requires the ability to communicate with members of the work team/area and also management. It also requires the ability to interpret and apply OHS procedures and explain them to work team members.

Writing is required to the level of being able to keep records as required and also keep notes from meetings.

Numeracy is required to interpret incident statistics and hazard data.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations that will include disruptions to normal, smooth operation.

Where the assessee does not currently possess evidence of competency in *MSAOHS200A Work safely*, it may be co-assessed with this unit.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- communicate effectively with the work group(s)
- proactively promote consultation and participation in the OHS processes
- participate in decisions which impact on OHS for their workgroup.

Consistent performance should be demonstrated. In particular look for knowledge and understanding of:

- specific hazard policies and the use of hazard procedures (eg identify, assess, control)
- the consultation processes, either general or specific to OHS
- OHS information
- OHS record keeping
- counselling, disciplinary and issue resolution processes.

These aspects may be best assessed using a range of scenarios/case studies/what ifs as the stimulus with a walk through forming part of the response. These assessment activities should cover a range of problems, including new, unusual and extreme situations that may have been generated from the past incident history of the workplace, incidents on similar plants around the world, hazard analysis activities and similar sources.

Assessment method and context

Assessment for this unit of competency will be on a processing plant or in a manufacturing environment.

Simulation may be required to allow for timely assessment of parts of this unit of competency. Simulation should be based on the actual workplace and will include walk throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays.

This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of 'what if' scenarios both in the workplace (during demonstration of normal operations and walk throughs of abnormal operations) and off the job.

It is expected that this competency may be applicable in combination with other industry, occupation or workplace-specific competencies. In all cases it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.

Specific resources for assessment

Assessment will require access to an operating plant or manufacturing environment over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what ifs will be required as will a bank of questions that will be used to probe the reasoning behind the observable actions.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This unit describes OHS requirements applicable for all workers who are responsible for the organisation of OHS arrangements for a work group or area, including coaching.

It is expected that workers will be provided with clear directions, information, instruction, training and appropriate supervision regarding the relevant State/Territory OHS legislation, codes of practice, relevant industry standards, workplace procedures and work instructions.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Hazards

Typical hazards include:

- handling chemicals and hazardous materials
- chemical and or hazardous materials spillage
- gases and liquids under pressure
- moving machinery
- materials handling
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- fire and explosion.

Personnel

Appropriate personnel for OHS referrals may include:

- employer
- supervisor
- employees elected as OHS representatives

- other personnel with OHS responsibilities.

Participative arrangements

Participative arrangements for OHS management may involve:

- making safety suggestions
- information sessions on existing or new issues
- meetings between employer and employees or representatives
- access to relevant workplace information
- use of clear and understandable language.

OHS Issues

OHS issues which may need to be raised by workers with designated personnel may include:

- recognition of hazards
- problems encountered in controlling risks associated with hazards
- clarification of understanding of OHS policies and procedures.

OHS Records

OHS records include:

- hazard and incident reports
- logs/logs sheets
- inspection/start up/shut down checklists
- injury reports
- maintenance records.

OHS Information Sources

Relevant sources of OHS information include:

- OHS legislation and codes of practice
- industry standards for materials, process, equipment etc
- SA/ISO standards
- OHS authorities
- unions and industry associations
- internet, journals, magazines
- manufacturer/supplier manuals/specifications
- policies and procedures
- JSA, risk assessments, HAZOPs
- hazard, incident and injury records
- training resources
- employee information brochures, newsletters etc
- OHS reports such as inspections, technical reports.
-

Unit Sector(s)

Not applicable.

MSAPMOPS400A Optimise process/plant area

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the ability to optimise the process performance of a complete plant area. It includes ensuring that production systems comply with Health, Safety and Environment (HSE) requirements, that process, plant and equipment utilisation is planned and carried out, and that problems are solved to fully meet operational needs and ensure that production of finished goods meets customer requirements.

Application of the Unit

Application of this unit

This competency requires the application of detailed operational and process knowledge, including the principles of operation of equipment, and the chemistry and/or physics and/or biology/biochemistry of changes to materials occurring during processing. It embodies a significant breadth and depth of technical knowledge and process understanding.

Assessment of this competency should ensure that the applicant can apply this knowledge to a process, and should typically rely on the applicant undertaking, or leading, a significant process improvement project.

This competency is typically performed by a senior operator, team leader or frontline manager.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has prerequisites of

- MSAPMSUP390A Use structured problem solving tools
-

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
1. Analyse and evaluate current plant, equipment and processes.	1.1 Compare actual process, plant and equipment performance with requirements and/or historical data/records and/or design performance. 1.2 Identify abnormal or sub-optimal process, plant and equipment performance. 1.3 Identify hazards associated with the plant and equipment. 1.4 Collect and evaluate product, materials and/or process records to determine possible causes for sub-optimal performance. 1.5 Use appropriate techniques to rank possible causes from most to least probable cause.
2. Develop plan for corrective and/or optimisation action.	2.1 Analyse cause(s) to determine appropriate corrective action. 2.2 Predict the impact of a change in one unit/area on other related plant units/areas. 2.3 Predict the impact of a change on health, safety and environmental performance 2.4 Develop measurable objectives and evaluate alternatives.

ELEMENT ELEMENT	PERFORMANCE CRITERIA
	<p>Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.</p> <p>2.5 Identify requirements to implement change.</p> <p>2.6 Consult with stakeholders regarding planned changes and impacts.</p> <p>2.7 Develop optimisation plan taking account of hazards identified and HSE implications and communicate to appropriate personnel.</p> <p>2.8 Evaluate optimisation action to determine measures of effectiveness.</p>
3. Coordinate corrective and/ or optimisation action plan	<p>3.1 Coordinate all appropriate unit areas and operations in order to rectify problem causes in process, plant and equipment performance.</p> <p>3.2 Initiate and/or implement all required corrective/optimisation actions.</p> <p>3.3 Communicate corrective/optimisation outcomes to all relevant personnel.</p> <p>3.4 Implement procedures/systems to eliminate possible future causes.</p> <p>3.5 Record and maintain log of all relevant information.</p>
4. Develop continuous improvement strategies.	<p>4.1 Review sources of information to identify possible factors causing sub-optimal performance.</p> <p>4.2 Identify options for removing or controlling the risk of sub-optimal performance.</p> <p>4.3 Assess the adequacy of existing control and quality methods and systems.</p> <p>4.4 Identify opportunities to continuously improve performance.</p> <p>4.5 Develop recommendations for continual improvement of process, plant and equipment effectiveness.</p> <p>4.6 Consult with appropriate personnel and implement continuous improvement strategies.</p> <p>4.7 Document implementation of continuous improvement strategies.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of the:

- equipment,
- processes
- systems

sufficient to

- identify hazards associated with the process
- recognise opportunities to improve and/or enhance the quality of performance of the plant.

This knowledge needs to include:

- the relevant technical theory of the plant area
- an in depth understanding across the entire plant area
- the organisation standard procedures and work instructions
- relevant regulatory requirements, including those related to OHS risk control as appropriate to process/plant area optimisation.

Competence includes the ability to:

- apply analytical skills which enable corrective or optimal conditions to prevail
- identify and control hazards by applying the hierarchy of control as part of the optimisation process
- interpret information and make appropriate process control decisions.

Competence includes the ability to distinguish between:

- optimum and marginal performance of the plant
- effective and marginal performance corrections and actions.

as is relevant to the practical operation of all major equipment/process/systems within the area.

Optimising process systems requires application of detailed operational and process knowledge to address issues such as:

- starting material quality
- yield maximisation
- throughput maximisation
- energy efficiency
- use of utilities
- labour utilisation
- overall cost
- efficient use of equipment
- reducing downtime
- minimisation of waste and rework
- improved workplace layout and workflow.

Language, literacy and numeracy requirements

This unit requires the ability to communicate at all levels about what may be complex technical matters. It also requires the ability to evaluate complex information and sort often conflicting information into *useful* and *distracting* and to rank/prioritise information.

Writing is required to the level of reading and interpreting technical information, developing and modifying plans and procedures and interpreting relevant regulatory requirements.

Numeracy is required to the level of analysing product/process performance data, interpreting process condition information and deriving useful information from technical brochures, papers and similar. Calculation will be required to assist this and to determine priorities for optimisation plans (ie benefit/cost or other quantitative criteria)

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Competence must be demonstrated in the ability to analyse and evaluate current production performance, and develop and implement plans to optimise process systems.

While the technician is expected to take a lead technical role, and to demonstrate competence as defined above, optimisation is rarely undertaken by an individual alone and liaison with all relevant stakeholders is an expected part of this competency.

Where the assessee does not currently possess evidence of competency in *MSASUP390A Use structured problem solving tools*, it may be coassessed with this unit.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that the equipment/process/system be understood in depth and that the importance of critical material properties/settings/readings is known. Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action.

Consistent performance should be demonstrated. For example, look to see that:

- non-routine problems are recognised and defined
- hazards are identified and controlled by applying the hierarchy of control

- possible causes of complex problems are identified based on experience and the use of analytical techniques in solving the problem, including identifying variations and cause, separating single problems from multiple problems and the recognition of recurring problems
- fundamental cause of process or equipment faults is determined
- corrective/preventative actions are developed to avoid recurrence of the problem and optimise the condition of the process, plant and equipment
- product quality and uniformity are maintained.

Competence must be demonstrated in the operation of all ancillary equipment to the level required for this competency unit.

Competence also includes the ability to implement improvements within appropriate time constraints and in a manner relevant to the operation of the equipment, processes and systems.

Context of assessment

Competence in this unit may be assessed by:

- observation over time in a processing plant allowing for adequate assessment of operation under all normal and a range of abnormal conditions. Where this is not practical, additional assessment techniques must be used.
- using a suitable simulation and/or a range of case studies/scenarios
- undertaking a specific project based in the plant
- a combination of these techniques.

Method of assessment

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This unit describes the work conducted by senior operators, team leaders or front line managers who optimise process systems as part of their work function. It includes all items of equipment and unit operations which form part of the production process of a complete area.

Typical problems will require the application of detailed operational and process knowledge over the entire production/manufacturing area, including the principles of operation of the equipment and the chemistry, physics, biology and/or biochemistry of the changes to materials occurring within that area.

All operations are performed in accordance with organisation procedures, licensing requirements, legislative requirements and industrial awards and agreements.

Procedures

All operations are performed in accordance with procedures. Procedures means all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards. These may include or have been prepared from/to comply with:

- industry codes of practice
- materials safety data sheets
- equipment manuals
- equipment start up, operation and shut down procedures
- calibration and maintenance schedules
- quality manuals and procedures
- organisation recording and reporting procedures
- production and laboratory schedules
- material, production and product specifications.

Data/records

Historical data/records may include:

- hazard logs
- incident reports
- maintenance records
- product non-conformance reports
- production records.

Implementing change

Requirements to implement change may include:

- changes to procedures

- training of operators
- equipment modifications
- ensuring all HSE requirements are addressed.

Relevant/appropriate personnel

Relevant/appropriate personnel may include:

- managers
- OHS representatives and OHS committee.

Relevant information

Relevant information logged to include:

- modifications to plant or equipment
- modifications to procedures or practices.

Sources of information

Sources of information may include:

- hazard logs
- incident reports
- maintenance records
- work practices
- procedures
- industry journals
- equipment supplier information
- industry best practice information.

Health, Safety and Environment (HSE)

All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

Unit Sector(s)

Not applicable.

MSAPMOPS401A Trial new process or product

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency typically applies to a technician in a plant who is taking a lead technical role in the trialling of a new product or the trialling of a new or significantly altered process. This competency does not apply to minor modifications to existing products or processes.

Similarly it does not apply to a technician or operator taking part in such trials, and/or who is following directions set by the technician, chemist, engineer, supervisor or manager.

The technician is expected to be a technical expert in that part of the plant/process where the trial is being conducted.

Application of the Unit

Application of this unit

The technician would be expected to operate and control all equipment required for the trial. Generally the technician would be part of a team during the trial, and would usually be working in conjunction with a process/product development expert such as a chemist or engineer. The technician is often the most technically competent member of an operational team. As such they may not have the 'hands on' role of operating items of equipment, but they are expected to have the competence to direct the operation of equipment as appropriate throughout the trial. At all times they would be liaising and cooperating with other members of the team.

Trialling refers to the scale-up and other development steps required to take a new product or process from its design/laboratory trials to full commercial operation on a plant. Trialling may be done on a pilot plant where available and/or on a full scale plant.

The technician would:

- identify and rectify operational problems within their scope
- analyse the trial, both while it is occurring and after completion, and suggest improvements
- be alert for indications of developing problems and take required action to ensure the trial remains safe to people, the environment and the plant.
-

	<p>Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.</p> <p>equipment, materials and product characteristics.</p> <p>1.6 Recommend feed rates/order/condition appropriate to the process conditions, equipment, materials and product characteristics.</p> <p>1.7 Ensure hazard identification and analysis procedures are completed, including consultation with stakeholders, and findings included in plan.</p> <p>1.8 Ensure recommendations meet the identified need.</p>
2. Prepare for trials.	<p>2.1 Determine the availability of resources required such as materials, equipment, people and skills.</p> <p>2.2 Estimate time required for trial.</p> <p>2.3 Liaise with relevant stakeholders.</p> <p>2.4 Schedule trial at a convenient time.</p> <p>2.5 Develop documentation for the trial.</p> <p>2.6 Identify potential hazards and required hazard control procedures by applying the hierarchy of control.</p> <p>2.7 Determine clearance requirements and special safety and storage requirements.</p> <p>2.8 Verify decisions with appropriate experts/stakeholders.</p> <p>2.9 Ensure people with adequate skills are available for the trial.</p>
3. Conduct test runs/trials	<p>3.1 Ensure hazard controls are implemented prior to commencement.</p> <p>3.2 Run trials.</p> <p>3.3 Maintain communication with all relevant people.</p> <p>3.4 Closely monitor critical parameters.</p> <p>3.5 Recognise actual and potential problems.</p> <p>3.6 Make adjustments to process conditions as required during trial.</p> <p>3.7 Sample and test product as required.</p> <p>3.8 Record and report performance data.</p> <p>3.9 Ensure all materials, products and waste are handled correctly.</p> <p>3.10 Leave plant in a condition suitable for routine production to recommence.</p>

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
4. Evaluate results and identify modifications.	4.1 Interpret data from trial. 4.2 Identify factors which might be related to low rates or low charge amounts. 4.3 Recommend modifications and improvements required. 4.4 Develop and check standard operating procedure. 4.5 Complete documentation and report to appropriate personnel. 4.6 Ensure all relevant staff have required skill levels for the introduction of the new process.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Competence includes an understanding of the plant systems and all integral equipment involved in the trial to the level needed to control the system and recognise and resolve problems. In particular it includes the ability to:

- identify all items on a schematic of the plant and describe the function of each
- describe the nature/condition of materials entering and leaving each stage of the process, the changes which have occurred in that stage and why they have occurred
- state the major design features of plant equipment, plant conditions and variables and the impact of these on the properties of materials passing through them
- describe the causes and remedies of common problems such as those selected in the Range Statement
- apply the hierarchy of control to minimise the risk of hazards identified
- describe methods of changing rate and the advantages and disadvantages of each
- describe methods of controlling other process variables and the advantages and disadvantages of each.

Competence also includes the ability to isolate the causes of problems to an item of equipment within the plant system and to be able to distinguish between causes of problems/alarm/fault indications such as:

- process material variations
- instrument failure/wrong reading
- electrical failure

- mechanical failure
- operational problem.

Language, literacy and numeracy requirements

This unit requires the ability to communicate and liaise with people at a range of levels about technical matters.

Reading is required to the level of interpreting technical specifications, manuals and procedures; and writing technical documentation such as specifications and procedures required for the trial.

Numeracy is required to the level of interpreting technical specifications and test results, analysing process data and determining required variations in process variables.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency.

Assessment will occur over a range of situations which will include disruptions to normal, smooth operation.

Critical aspects

It is essential that competence is demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster.

Consistent performance should be demonstrated. For example, look to see that:

- hazards are identified and controlled
- early warning signs of equipment/processes needing attention or with potential problems are recognised
- the range of possible causes can be identified and analysed and the most likely cause determined
- appropriate and timely action is taken to ensure the safety and success of the trial
- obvious problems in related plant areas are recognised and an appropriate contribution made to their solution.

Context and method of assessment

This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of 'what if' scenarios both on the plant (during demonstration of normal operations and walk throughs of abnormal operations) and off the plant.

Competence in this unit may be assessed:

- using a pilot plant or a production plant as appropriate
- using a range of scenarios/case studies and 'what ifs' as the stimulus with a walk-through forming part of the response
- using a range of problems, including new, unusual and improbable situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources
- using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge; and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This unit includes all items of equipment and unit operations which form part of the trial.

Liaison

Liaison with technical experts may (depending on trial requirements and company protocols) include one or more of:

- manufacturers
- chemists
- engineering personnel
- designers
- OHS advisors
- maintenance personnel
- potential customers.

Hazard analysis

Hazard analysis procedures may include:

- JSA/JHA (Job Safety Analysis/Job Hazard Analysis)
- hazard and operability (HAZOP) studies
- hazard analysis (HAZAN) studies
- other company specified procedures.

It is not expected that the candidate will be able to conduct technical hazard analysis procedures (such as HAZOP or HAZAN) but they should be able to interpret and use the outcomes of such analyses where relevant.

Hazards

Hazards may be determined from:

- materials safety data sheets (MSDSs)
- other relevant documentation such as hazard logs, incident reports
- company hazard identification procedures
- hazard analysis results
- standard operating procedures.

Waste handling

Waste handling may include:

- collection for re-use
- recycling
- disposal in accordance with health and environmental regulations.

Problems

Typical problems for the trial might include:

- mixing is poor
- materials do not behave as expected
- process/reaction does not proceed /proceeds too slowly
- process/reaction proceeds too quickly/runs away
- yield is low
- quality is out of specification
- process is unstable

- instrumentation is not sufficiently sensitive/too sensitive
- variable catalyst activity
- surging flow/pressure.

Health, Safety and Environment (HSE)

All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Procedures

All operations are performed in accordance with procedures.

Procedures means all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Unit Sector(s)

Unit Descriptor

Unit descriptor

This unit of competency covers receiving, relaying and recording written and oral messages and providing relevant information in response to requests, within time lines.

Application of the Unit

Application of this unit

This competency applies to operators who are required to receive, relay and record work related information as well as respond to information requests in the workplace.

The operator will:

- record received messages
- seek clarification, when necessary
- access needed information, as required
- relay the correct information to appropriate person/s.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Receive and relay messages	1.1 Confirm understanding of the message is correct. 1.2 Accurately record the message. 1.3 Relay message accurately to appropriate person or section within designated timelines.
2. Interpret messages.	2.1 Clarify message if necessary. 2.2 Take appropriate action.
3. Respond to information.	3.1 Acknowledge and understand the request for information. 3.2 Access information from appropriate sources. 3.3 Relay information to appropriate person or section.
4. Complete workplace forms.	4.1 Select appropriate form. 4.2 Assemble information required for form. 4.3 Complete form as required. 4.4 Submit form as required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and ability to implement organisation policies and procedures on workplace communication, including:

- types, purpose and importance of workplace documentation
- workplace codes, including numbers, symbols, signs, colours and other codes.

Competence also includes the ability to:

- listen attentively
- formulate questions to clarify work requirements or instructions
- establish effective workplace relationship with colleagues
- adapt communication to a range of social, cultural and ethnic backgrounds.

Language, literacy and numeracy requirements

This unit requires the ability to read and understand information contained in typical workplace documents such as standard operating procedures, material safety data sheets, job cards, maintenance logs. Everyday workplace language is used, including some technical terms and mathematical language.

Writing is required to the level of completing workplace forms and records. Types of text may include short sentences, symbols, codes, signs, sketches and may be conveyed in printed form or screen based.

Basic numeracy is needed to the extent required by work instructions and procedures.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

In all cases it may be appropriate to assess this unit concurrently with relevant team work and communication units.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- provide and assess all required information and that the information provided both verbally and in writing is completed in a clear and concise manner that is easily understood by others and in accordance with workplace requirements.
- apply approved procedures.

Consistent performance should be demonstrated. For example, look to see that:

- all information is provided in an efficient, effective, courteous and timely manner.

Assessment method and context

Assessment will occur on-the-job or in a simulated workplace.

Competence in this unit may be assessed:

- by observation and questioning to indicate understanding
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Reasonable adjustment of assessment tasks will be undertaken as required.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments.

Procedures

All operations are performed in accordance with procedures. Procedures include:

- all relevant workplace procedures
- work instructions
- temporary instructions
- relevant industry and government codes and standards
- telephone protocol , including industry timelines in answering calls.

Messages

Messages includes the following as appropriate to workplace requirements:

- written
- oral
- electronic.

Tools and equipment

This competency includes use of equipment and tools such as:

- two way radio
- computer
- telephone.

Problems

Respond to routine problems means 'apply known solutions to a limited range of predictable problems'. Typical problems may include:

- missing/lost messages
- required information not available
- required equipment not available
- conflict of work priorities.

Appropriate action for non-routine problems may be reporting to designated person or other action specified in the procedures.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Access information.	1.1 Identify the need for information. 1.2 Request appropriate information. 1.3 Access information in accordance with procedures. 1.4 Comply with security procedures in accessing appropriate information.
2. Provide appropriate information.	2.1 Deal with enquiries promptly and courteously. 2.2 Establish details of enquiry by questioning and summarising. 2.3 Provide appropriate information relevant to enquirer's request. 2.4 Organise information clearly, concisely and logically. 2.5 Provide information in a form that is readily understood by others. 2.6 Provide information in a timely manner. 2.7 Redirect enquiries to relevant personnel for resolution where outside the operator's area of responsibility.
3. Give and follow routine instructions.	3.1 Give accurate, clear and concise instructions that are consistent with the skills of the receiver. 3.2 Ensure that interaction with others is efficient, effective, responsive, courteous and supportive. 3.3 Confirm that instructions are understood.

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	3.4 Follow prescribed and routine work related sequences.
4. Provide reports.	4.1 Complete all workplace reports clearly and accurately in accordance with procedures. 4.2 Report all relevant information clearly and concisely.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Competence includes the ability to:

- describe importance of workplace documentation in relation to job role
- apply organization, operational, quality and safety policies and procedures
- apply workplace codes such as numbers, symbols, signs, colour and other codes.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret work instructions, procedures, operating manuals, job card and other documents provided to operators.

Writing is required to the level of completing workplace forms.

Basic numeracy is required to the extent required by work instructions and procedures.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

Assessment will occur on the job or in a simulated workplace. In all cases it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competence must be demonstrated in the ability to provide and assess all required information and that the information provided both verbally and in writing is completed in a clear and concise manner, that is easily understood by others and in accordance with workplace requirements

Consistent performance should be demonstrated. For example, look to see that:

- reports and records are completed accurately, concisely and in accordance with procedures
- all information is provided in an efficient, effective, courteous and timely manner
- completion of shift handover, log books and company production records conveys all relevant information
- information sharing demonstrates effective communication processes such as turn-taking, participating in discussions and tolerating views of others in a way that contributes to the overall discussion
- notes of discussion are prepared so that they can be clearly interpreted by the receiver
- communication distinguishes between relevant and peripheral issues.

Assessment method and context

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge. A holistic approach should be taken to the assessment.

Competence in this unit may be assessed:

- by observation and questioning to indicate understanding
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- by a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Reasonable adjustment of assessment tasks will be undertaken as required.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments and sectors within the industry.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes items of equipment such as:

- telephone
- two way radio
- computer equipment.

Information sources and plant documentation may include:

- operating procedures
- work instructions
- incident procedures
- operating manuals
- quality procedures
- training program contents/materials
- safety data sheets
- job cards
- maintenance logs
- non compliance reports
- incidence and accident reports
- permits
- schematics/process flows/engineering drawings.

Reports

Reports includes the following as appropriate to workplace requirements:

- oral

- written
- electronic
- handovers (giving/receiving).

Problems

Respond to routine problems means 'apply known solutions to a limited range of predictable problems'. Typical process and product problems may include:

- difficulty in quickly locating information required
- missing forms, logbooks etc.
- conflicting work priorities
- delays in reporting of information
- information is inaccessible
- absence of approver/ other signatories
- breakdown of communication equipment.

Appropriate action for non-routine problems may be reported to designated person or other action identified in the procedures.

Unit Sector(s)

Not applicable.

MSAPMSUP240A Undertake minor maintenance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit applies to operators who are involved in providing basic maintenance and the resolving of routine problems to procedures. It does not cover activities normally requiring traditional trade training.

Application of the Unit

Application of this unit

In a typical scenario a plant operator does minor maintenance activities on the plant and equipment being operated. For instance the pressure drop across a filter unit may be high, indicating the filter cartridge needs changing. The operator takes the filter unit out of operation, cleans the unit, uses the correct spanner to open the lid, installs a fresh cartridge, closes the unit using the spanner again, then cleans up the area and disposes of the spent cartridge. Typically this sort of maintenance will be done on the plant and will not require workshop type facilities.

The operator will:

- be aware of and contribute to a safe working environment
- identify and check equipment for faults
- perform basic maintenance to procedures
- complete logs and reports.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify maintenance requirements.	1.1 Identify equipment variations/irregularities using observed data and plant records. 1.2 Assess the urgency/priority of the situation. 1.3 Identify appropriate corrective action. 1.4 Identify correct tools and materials. 1.5 Assess the impact of the maintenance activity and communicate to appropriate personnel. 1.6 Identify hazards and risk controls. 1.7 Identify work permit requirements.
2. Prepare for maintenance activity.	2.1 Ensure equipment is turned off and isolated as required. 2.2 Clear the area of obstructions and hazardous materials. 2.3 Obtain appropriate tools, parts, materials and procedures. 2.4 Obtain the appropriate work permits and adhere to the requirements. 2.5 Communicate the impending maintenance activity to the appropriate personnel.

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
3. Perform maintenance activity.	3.1 Access all relevant information. 3.2 Undertake maintenance activity according to procedures. 3.3 Use tools and maintenance techniques correctly. 3.4 Restore equipment to normal working condition. 3.5 Leave the work area in a clean and safe condition. 3.6 Ensure permits are signed off as appropriate.
4. Test equipment.	4.1 Test equipment according to procedures. 4.2 Return equipment to service. 4.3 Ensure equipment meets normal operating requirements.
5 Record maintenance activity.	5.1 Complete maintenance logs/plant history records. 5.2 Report maintenance activity to relevant personnel. 5.3 Identify and report outstanding maintenance requirements to relevant personnel.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of equipment operation and maintenance practices sufficient to recognise fault and no-fault conditions in standard and non-standard situations and then determine appropriate action which is consistent with operational guidelines is required.

Knowledge of organisation procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Application of the knowledge of managing risks using the hierarchy of controls applied to the process. Application of approved hazard control, safety procedures, use of PPE in relation to handling materials, equipment operation and clean up.

Knowledge as a basis for solving maintenance problems, including:

- principles of operation of the equipment to be maintained
- function and troubleshooting of major internal components and their problems
- appropriate testing procedures and use of equipment for a range of equipment faults

- typical causes of equipment failures and the service conditions which may increase maintenance
- types and nature of maintenance (preventative, predictive, corrective) uses, benefits and limitations
- urgency and timeliness factors in maintenance
- maintenance planning/scheduling/records systems
- identification of tools, materials and spare parts
- basic techniques for using and handling tools
- physical measurement, alignment and clearance principles.

Competence also includes the ability to:

- plan own work, including predicting consequences and identifying improvements
- identify factors which may affect product quality or production output and appropriate remedies
- identify when the operator is able to rectify faults and when assistance is required.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical equipment specifications schematics and diagrams.

Writing is required to the level of completing workplace forms and production reports.

Basic numeracy is required, to interpret plant data and maintenance schedules.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Where the completion of this unit requires working under a permit/clearance, then competency must also be established in *PMAAPER200C Work in accordance with an issued permit*, or other appropriate unit.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- understand the procedures and know the importance of critical operational systems
- recognise potential situations requiring action and then implement appropriate action.

Consistent performance should be demonstrated. For example, look to see that:

- early warning signs of equipment in need of attention/with potential problems are recognised
- appropriate equipment tests are undertaken and analysed appropriately
- proposals for equipment repair are based upon the most appropriate and cost effective method to return equipment to full performance in a timely manner
- maintenance activities are completed safely and to procedures.

Assessment method and context

Assessment will occur on industrial equipment and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- on a processing plant, allowing for operation under all normal and a range of abnormal conditions
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments and sectors within the industry. It does not include maintenance that would require trade level skills. It is not intended that this competency would cover maintenance that is carried out in a workshop.

Procedures

All operations are performed in accordance with procedures.

Procedures mean all relevant workplace procedures, work instructions, temporary instructions, standard operating procedures, plant description manuals, manufacturer instructions, specifications, service manuals, machine circuit diagrams for hydraulic/pneumatic and electrical/electronic circuits and relevant industry and government codes and standards.

Maintenance activities

This competency unit includes minor maintenance such as the following:

- operational maintenance (eg connection-disconnection of hoses, greasing, lubrication and lubricant systems, adjusting sealing glands, cleaning and changing filters, 'nipping up' flanges)
- general cleaning
- removal and replacement (eg gland packing, changing blades or cutters, replacing gaskets, replacing /maintaining seals, changing filter elements, servicing strainers).

Tools and equipment

This competency includes use of equipment and tools such as:

- hand tools
- specialised tools
- measuring and aligning equipment.

Hazards

Typical hazards include:

- rotating and moving machinery
- process materials, solids, liquids and gases under pressure or flowing
- hot surfaces or materials
- temporary connections or by-passes
- electrical, hydraulic or pneumatic energy sources
- out of specification operation.

Problems

Respond to/rectify 'non-routine problems' means 'apply known solutions to a variety of predictable problems'. Typical process and product problems may include:

- out-of-specification product or variations
- response of equipment to materials variations

- equipment in need of maintenance.

Variables

Key variables to be monitored include:

- equipment performance (eg speed, output, variations)
- equipment component performance
- sequences and timing of operations
- materials changes (desired and not desired).

Data and Records

Typical information sources, observed data and plant records may include:

- plant data
- log sheets
- operational and performance reports
- physical aspects such as noise, smell, feel and pressure condition monitoring information
- planned maintenance schedules
- procedures
- manufacturer specifications, instructions, service manuals and other information.
-

Unit Sector(s)

Not applicable.

MSAPMSUP292A Sample and test materials and product

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the taking of routine samples and the conducting of simple tests.

Application of the Unit

Application of this unit

This competency applies to operators who are required to undertake the routine sampling and testing in the workplace. Testing will typically also be done in the workplace or in a 'factory laboratory' (or bench) adjacent to/in the factory. Tests will be simple, routine tests to procedure. This competency is typically performed by operators working either independently or as part of a work team. The operator:

- takes the sample
- performs the test
- makes a simple interpretation of the test results
- takes actions specified based on the test results
- completes logs and reports.

More advanced sampling and testing should use the relevant units from *PML04 Laboratory Operations Training Package*.

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Take sample.	1.1 Determine type of sample and sampling equipment required. 1.2 Check sampling equipment is clean and in good order. 1.3 Take sample(s) of required type(s), from the required place(s) and at the required time(s) and place in required container(s). 1.4 Label sample(s) to procedure. 1.5 Carry sample(s) to required place.
2. Complete test.	2.1 Check test required from procedures/work instruction. 2.2 Check sample identification and integrity. 2.3 Check test equipment is clean, in good order and within calibration. 2.4 Complete test(s) required as per standard procedures/instructions.
3. Interpret results and take action.	3.1 Note anything about sample, equipment or the test itself which may have caused it to give a bad result. 3.2 Compare results to specification.

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	3.3 Take action appropriate to the test results and any other observations.
4. Complete sample and test cycle.	4.1 Complete required records. 4.2 Store and/or dispose of sample as required. 4.3 Clean all equipment and leave ready for next sample/test.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Application of knowledge of the sampling and testing techniques used sufficient to recognise a suspicious test result cause by a fault in these areas.

Knowledge of organisation procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Knowledge and skills in sampling and testing sufficient for consistent and meaningful test results including:

- basic principles of taking the particular sample
- basic principles of the particular test
- sample techniques and requirements
- test methods used and critical factors leading to good/poor test results.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical sampling and testing methods/procedures and to read and interpret numbers or other test result data.

Writing is required to the level of completing workplace forms and labelling samples.

Basic numeracy is required to read and interpret test results and undertake minor data manipulation such as might be required for the test, test interpretation or reporting.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- take a sample correctly
- undertake tests with adequate reproducibility
- select and use the appropriate procedures.

Assessment method and context

Assessment will occur in a factory testing environment and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- by using appropriate, industrial testing regimes
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that will affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency unit includes the range of sampling and testing which may be carried out in a plant/factory, or in a manufacturing laboratory. It typically applies to operators who carry out a narrow range of tests as part of their job.

It does NOT include testing which would normally be conducted in a laboratory, nor operators carrying out a wide range of testing which is a significant part of their job role. These competencies are more properly covered by *PMLTEST300A Perform basic tests* or other units from the Laboratory Operations Training Package.

The tasks covered by this competency include:

- receiving, handling and storing samples
- preparing for sample collection
- performing sample collection
- performing sample preparation
- performing tests
- recording results.

Problems

'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'. Typical problems include:

- correct sampling technique
- test equipment condition/calibration
- consistent test technique according to standard procedure
- correct recording of result
- interpretation of result and the initiation of appropriate action
- correct retention/disposal of sample/test materials.
-

Unit Sector(s)

Not applicable.

MSAPMSUP390A Use structured problem solving tools

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the solving of process and other problems, beyond those associated directly with the process unit/equipment, using structured process improvement tools to identify improvements and/or solve problems.

Application of the Unit

Application of this unit

The competency is typically performed by an experienced operator, team leader or supervisor.

Generally the person would be part of a team during the solving of complex or systemic problems and would be expected to perform all parts of this unit and at all times would be liaising and cooperating with other members of the team. This includes:

- using a range of formal problem solving techniques
- identifying and clarifying the nature of the problem
- devising the best solution
- evaluating the solution
- developing an implementation plan to rectify the problem.

This unit does not cover the solving of problems undertaken as part of the operator's normal role which is covered in the relevant operation competency unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify the problem.	1.1 Identify variances from normal operating parameters and product quality. 1.2 Define the extent, cause and nature of the problem by observation and investigation. 1.3 State and specify the problem clearly.
2. Determine fundamental cause of problem.	2.1 Identify possible causes based on experience and the use of problem solving tools/analytical techniques. 2.2 Develop possible cause statements. 2.3 Identify fundamental cause.
3. Determine corrective action.	3.1 Consider all possible options for resolution of the problem. 3.2 Consider strengths and weaknesses of possible options. 3.3 Determine corrective action to remove the problem and possible future causes. 3.4 Develop implementation plans identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures. 3.5 Develop recommendations for ongoing monitoring

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	and testing.
4. Communicate recommendations.	4.1 Prepare report on recommendations. 4.2 Present recommendations to appropriate personnel. 4.3 Follow up recommendations if required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Competence includes a thorough knowledge and understanding of the process, normal operating parameters, and product quality to recognise non-standard situations.

This unit of competency includes use of analytical techniques in problem solving such as:

- brainstorming
- fishbone diagrams/cause and effect diagrams
- process logic/process requirements
- logic tree
- similarity/difference analysis
- Pareto analysis
- force field/SWOT analysis
- flow charts
- control charts, runcharts and graphs
- scattergrams.

Action plans to solve problems are prepared including:

- priority requirements
- measurable objectives
- resource requirements
- methods for reaching objectives
- timelines
- coordination and feedback requirements
- safety requirements
- risk assessment
- environmental requirements.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets and material labels as provided to operators.

Writing is required to the level of report writing and completing workplace forms.

Basic numeracy is also required, eg to interpret quality data and graphs.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to apply and explain:

- relevant equipment and operational processes
- enterprise policies and procedures
- enterprise goals, targets and measures
- enterprise quality, OHS and environmental requirements
- principles of decision-making strategies and techniques
- enterprise information systems and data collation
- industry codes and standards.

Consistent performance should be demonstrated. For example, look to see that:

- problems are recognised and clarified
- possible causes are identified, based on experience and use of analytical techniques in solving the problem, including:
 - identifying variations
 - identifying cause and effect
 - separating single problems from multiple problems
 - recognising recurring problems.
- fundamental cause of process or equipment faults is determined
- corrective/preventative implementation plans are developed to avoid recurrence of the problem
- implementation plan is presented to relevant personnel.

Assessment method and context

Assessment will occur on the job or in a simulated workplace.

Competence in this unit may be assessed:

- in a situation allowing the generation of evidence of the ability to recognise and respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

The competency unit applies to a wide range of processes and equipment. The process manufacturing technical units of competency include a problem solving element where problems specific to that competency unit are to be resolved. This competency unit is where structured problem solving techniques are to be applied more broadly, or with greater depth/rigour than is implied by the problem solving element of the technical units.

In large plants or manufacturing organisations with multiple processes, it may apply to more than one process if those processes interact with each other. It applies to all operators across all functions.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Hazards

Typical hazards include leaks, spillages and equipment hazards that can occur during the walk-through of a plant.

Problems

'Anticipate and solve problems' means resolve a wide range of routine and non-routine problems, using product and process knowledge to develop solutions to problems which do not have a known solution/a solution recorded in the procedures.

Typical process and product problems may include:

- non-routine process and quality problems
- equipment selection, availability and failure
- teamwork and work allocation problems
- safety and emergency situations and incidents.
-

Unit Sector(s)

MSL974003A Perform chemical tests and procedures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the ability to interpret chemical test requirements, prepare samples, conduct pre-use and calibration checks on equipment and perform routine chemical tests/procedures. These tests will involve several measurement steps. The unit includes data processing and interpretation of results and tracking of obvious test malfunctions where the procedure is standardised. However, personnel are not required to analyse data, optimise tests/procedures for specific samples or troubleshoot equipment problems where the solution is not apparent.
------------------------	---

Application of the Unit

Application of the unit	This unit of competency is applicable to laboratory or technical assistants and instrument operators in all industry sectors. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret and schedule test requirements	1.1. Review test request to identify samples to be tested, test method and equipment/instruments involved 1.2. Identify hazards and enterprise control measures associated with the sample, preparation/test methods, reagents and/or equipment 1.3. Plan work sequences to optimise throughput of multiple samples, if appropriate
2. Receive and prepare samples	2.1. Log samples using standard operating procedures (SOPs) 2.2. Record sample description, compare with specification and note and report discrepancies 2.3. Prepare samples and standards in accordance with chemical testing requirements 2.4. Ensure traceability of samples from receipt to

ELEMENT	PERFORMANCE CRITERIA
	reporting of results
3. Check equipment before use	3.1. Set up equipment/instruments in accordance with test method requirements 3.2. Perform pre-use and safety checks in accordance with relevant enterprise and operating procedures 3.3. Identify faulty or unsafe components and equipment and report to appropriate personnel 3.4. Check equipment calibration using specified standards and procedures, if applicable 3.5. Quarantine out of calibration equipment/instruments 3.6. Ensure reagents required for the test are available and meet quality requirements
4. Test samples to determine chemical species or properties	4.1. Operate equipment/instruments in accordance with test method requirements 4.2. Perform tests/procedures on all samples and standards, if appropriate, in accordance with specified methods 4.3. Shut down equipment/instruments in accordance with operating procedures
5. Process and interpret data	5.1. Record test data noting atypical observations 5.2. Construct calibration graphs, if appropriate, and compute results for all samples from these graphs 5.3. Ensure calculated values are consistent with expectations 5.4. Record and report results in accordance with enterprise procedures 5.5. Estimate and document uncertainty of measurement in accordance with enterprise procedures, if required 5.6. Interpret trends in data and/or results and report out of specification or atypical results promptly to appropriate personnel 5.7. Determine if obvious procedure or equipment problems have led to atypical data or results
6. Maintain a safe work environment	6.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel 6.2. Minimise the generation of wastes and environmental impacts 6.3. Ensure the safe collection of laboratory and hazardous waste for subsequent disposal 6.4. Care for and store equipment and reagents as

ELEMENT	PERFORMANCE CRITERIA
	required
7. Maintain laboratory records	7.1. Enter approved data into laboratory information management system 7.2. Maintain confidentiality and security of enterprise information and laboratory data 7.3. Maintain equipment and calibration logs in accordance with enterprise procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- interpreting test methods and procedures
- sample preparation procedures
- performing calibration checks
- using instruments for qualitative and/or quantitative analysis
- maintaining and evaluating reagents
- troubleshooting basic equipment/method
- using calculation methods, including appropriate units, uncertainties, balancing equations, and the concentration of the solution given the chemical reaction for the titration
- preparing calibration graphs and calculating results using appropriate units and precision
- applying theoretical knowledge to interpret gross features of data and make relevant conclusions such as identifying atypical results as out of normal range or an artefact
- tracing and sourcing obvious causes of an artefact
- recording and communicating results in accordance with enterprise procedures
- maintaining security, integrity, traceability of samples, sub-samples, test data, results and documentation

Required knowledge

Required knowledge includes:

- chemical principles and concepts underpinning test/procedure
- purpose of the tests

REQUIRED SKILLS AND KNOWLEDGE

- concepts of metrology
- principles and concepts related to equipment/instrument operation and testing
- function of key components of the equipment/instrument and/or reagents
- effects of modifying equipment/instrument variables
- use of calibration procedures
- enterprise and/or legal traceability requirements
- relevant health, safety and environment requirements

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Assessors should ensure that candidates can:

- interpret test methods/procedures accurately
- prepare and test samples using procedures appropriate to the nature of sample
- perform calibration checks (if required)
- safely operate test equipment/instruments to enterprise standards and/or manufacturer's specification
- prepare calibration graphs and calculate results using appropriate units and precision
- apply basic theoretical knowledge to interpret gross features of data and make relevant conclusions
- identify atypical results as out of normal range or an artefact
- traces and source obvious causes of an artefact
- communicate problems to a supervisor or outside service technician
- record and communicate results in accordance with enterprise procedures
- maintain security, integrity, traceability of samples, sub-samples, test data and results and documentation.

Context of and specific resources for

This unit of competency is to be assessed in the

EVIDENCE GUIDE	
assessment	<p>workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL924001A Process and interpret data</i> • <i>MSL974001A Prepare, standardise and use solutions.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard laboratory equipped with appropriate test equipment/instruments, standards and reagents • enterprise procedures and standard methods.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of test data/results obtained by the candidate over a period of time to check accuracy, consistency and timeliness of results • review of test records and workplace documentation completed by the candidate • observation of candidate conducting a range of chemical tests and procedures and sample preparation • feedback from peers and supervisors • oral or written questioning of chemical principles and concepts, test methods and enterprise procedures. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Manufacturing</p>

EVIDENCE GUIDE

Ultraviolet spectroscopy is a suitable method for determining the concentration of sulphanilamide in pharmaceutical preparations. The ultraviolet absorption spectrum is pH dependent, with the wavelength maximum different in acid and alkaline solutions. Example: a technician was conducting an analysis and noted that the wavelength maxima had moved from approximately 250nm to below 230nm. After reviewing the procedure being used and checking for possible errors, the technician found that an incorrect solvent had been used for the analysis. The hydrochloric acid solvent was replaced with sodium hydroxide, as per the standard method, and the correct absorption spectrum was obtained.

Environmental

A technician was asked to test water samples from a local lake over several days to determine the lake's nutrient levels following reports of algal blooms in the lake over the preceding weeks. He/she used a field colorimeter kit to determine both nitrates and orthophosphates using SOPs. Because the same colorimetric cells were used for the nitrate and orthophosphate tests, they were carefully washed and rinsed with distilled water between all tests (as specified in the SOP). After reviewing the results from the first three days, the technician noted that the first orthophosphate result, which was done immediately after all the nitrate tests, was much higher than subsequent orthophosphate tests which were all consistently low. The technician argued that the 'high' results for the first orthophosphate test may be due to cross-contamination from trace amounts of reagents used in previous nitrate tests despite having closely followed the cleaning/rinsing SOPs. After discussion with his/her supervisor, the technician modified the field procedures by using totally different colorimetric cells for the nitrate and orthophosphate tests. For all subsequent tests no 'high' orthophosphate results were obtained for the first sample. As a result, the laboratory supervisor amended the SOPs to incorporate this new requirement.

Food processing

Regular checks are conducted on the percentage of salt in cheese at a dairy company's laboratory. A technician checks the results from the aromatic salt-titration

EVIDENCE GUIDE

	<p>equipment and, if the results are abnormal, notifies the supervisor before taking appropriate action. After obtaining a high result, for example, the assistant notified the supervisor and then began checking the machine to identify a possible reason for the high reading. He/she found that the supply bottle of silver nitrate used in the test was almost empty. This had resulted in less solution being pumped through the equipment than required, leading to graph readings that indicated a high percentage of salt. After replacing the silver nitrate bottle and recalibrating the equipment, the assistant retested the cheese samples and found that they contained the expected 1-2% salt.</p>
--	---

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
 - AS 2134.1-1999 Recommended practice for chemical analysis by atomic absorption spectrometry - Flame atomic absorption spectrometry
 - AS 2162.1-1996 Verification and use of volumetric apparatus - General - Volumetric glassware
 - AS 3753-2001 Recommended practice for chemical analysis by ultraviolet/visible spectrophotometry

RANGE STATEMENT

	<ul style="list-style-type: none"> • AS ISO 1000-1998 The international system of units (SI) and its application • AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories • AS/NZS 2243 Set:2006 Safety in laboratories set • AS/NZS ISO 9000 Set:2008 Quality management systems set • Australian code of good manufacturing practice for medicinal products (GMP) • calibration and maintenance schedules • enterprise recording and reporting procedures • equipment manuals • equipment startup, operation and shutdown procedures • industry methods, such as Royal Australian Chemical Institute (RACI) and/or American Association of Cereal Chemists (AACC) methods for inorganic constituents • material safety data sheets (MSDS) and safety procedures • material, production and product specifications • national measurement regulations and guidelines • principles of good laboratory practice (GLP) • production and laboratory schedules • quality manuals and equipment and procedure manuals • SOPs • waste minimisation and safe disposal procedures
Sample preparation processes	<p>Sample preparation processes may include:</p> <ul style="list-style-type: none"> • grinding • mulling • preparation of discs • digestion • dissolving • ashing • refluxing • tracting

RANGE STATEMENT	
	<ul style="list-style-type: none"> • filtration • evaporation • flocculation • precipitation • washing • drying • centrifugation
Non-instrumental test/procedures	<p>Non-instrumental test/procedures may include:</p> <ul style="list-style-type: none"> • gravimetric analysis: <ul style="list-style-type: none"> • loss on drying • suspended solids • ashes, such as sulphated and gravimetric assays (e.g. sulphates and nitrogen in fertilisers) • Ni by dimethylglyoxime • bitumen content of asphaltic concrete • titrimetric analysis: <ul style="list-style-type: none"> • acid/base determinations • compleximetric, such as water hardness, Fe by dichromate and binder content analysis • redox, such as precipitation of chlorides in water • dissolved oxygen (DO), chemical oxygen demand (COD) and biochemical oxygen demand (BOD) • filtration, separation and solvent extraction techniques • corrosion testing, cement content and accelerated weathering

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish requirements for image capture	1.1. Define requirements and purpose of the work and create a brief 1.2. Choose an imaging technique that maintains the integrity and veracity of the subject and fulfils the work requirements 1.3. Plan the work using technical knowledge to ensure an effective and efficient result
2. Plan and set up the	2.1. Select and assemble the required equipment

ELEMENT	PERFORMANCE CRITERIA
shoot	2.2. Follow ethical and legal work practices at all times 2.3. Assess risks or hazards and implement safety procedures 2.4. Prepare the subject to achieve the brief
3. Capture and reproduce the required image	3.1. Expose media or film and accurately document the work in progress 3.2. Review the image against the work requirements and repeat if necessary 3.3. Reproduce the image to specification
4. Keep records and deliver images	4.1. Accurately and retrievably record the request, technical specifications and images so that they are retrievable 4.2. Store records safely and securely to archival standards 4.3. Follow copyright and crediting policies and procedures 4.4. Make the images available to the client, discuss the results and ensure that requirements have been met

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- creating and interpreting a brief
- applying an imaging technique that best meets the specifications and purpose of the job
- using a back-up system of image capture when shooting images
- producing consistent high quality, cost effective outcomes for clients
- keeping accurate records that allow future replication of images
- working safely and in an ethical manner

Required knowledge

Required knowledge includes:

- repercussions of manipulation of images and differences between adjustment and

REQUIRED SKILLS AND KNOWLEDGE

manipulation

- scientific approach and protocols to ensure integrity of images
- veracity of different types of storage media
- relevant copyright, moral rights and intellectual property issues and legislation
- relevant health, safety and environment requirements
- enterprise policies and procedures for capturing and managing scientific images

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Assessors should ensure that candidates can:

- create and interpret a brief
- apply an imaging technique that best meets the specifications and purpose of the job, consistent with enterprise procedures
- provide a back-up system of image capture when shooting images
- produce consistent high quality, cost effective outcomes for clients
- keep accurate records that allow future replication of images
- work safely and in an ethical manner consistent with legislation, regulations and codes of practice.

Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- *MSL975015A Prepare animal and plant material for display.*

Resources may include:

- appropriate facilities, equipment and materials for image capture
- enterprise procedures, equipment manuals, industry

EVIDENCE GUIDE	
	catalogues and journals.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of portfolio of work completed by the candidate • feedback from clients and supervisor • oral or written questions to assess underpinning knowledge • case studies to assess the candidate's approach to different subjects and use of a variety of imaging techniques. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case study below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Biomedical, biotechnology, environmental</p> <p>It's Friday afternoon and a technical officer in a university biology faculty is asked, at short notice, to assist a postgraduate student to obtain images to support a presentation of her work at an international conference. She's flying out of the country to the conference on Sunday. The officer discusses the requirements with the student and determines that the images are needed for a poster presentation to show the differences between sizes of fungal spores. It is agreed that colour prints of four different sized spores are to be produced using a camera coupled to a stereomicroscope. Given the time constraints, a decision is made to use a digital image that</p>

EVIDENCE GUIDE

	can be reproduced on-site. The images are produced on Friday evening and the student produces her poster on Saturday. The details of the subject, conditions and the images themselves are carefully stored for later use in the student's thesis.
--	--

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used
Scientific images	<p>Scientific images may include the following types of imaging techniques:</p> <ul style="list-style-type: none"> • photographic • digital • X-ray • video • prints • transparencies • direct transformation from images to data, such as reading of DNA sequencing gels • auto-radiations • micrographs • other non-visible light sources, such as ultraviolet (UV) light, fluorescence and phosphorescence • electron micrographs
Scientific subjects	<p>Scientific subjects may include:</p> <ul style="list-style-type: none"> • building sites, environmental survey and monitoring sites

RANGE STATEMENT	
	<ul style="list-style-type: none"> • accident or incident sites, and injuries • forensic evidence • biological specimens • histological sections • live animals • chromatography gels
Job requirements and brief	<p>Job requirements and brief may include:</p> <ul style="list-style-type: none"> • description and specification of work, including constraints and due date • purpose of the image • specifications, such as size, purpose, audience, medium and style • interviewing and collecting information from the client • keeping records, request forms and notes
Purposes of the image	<p>Purposes of the image may include:</p> <ul style="list-style-type: none"> • publication as a thesis, presentation or on the web • temporal serial recording of changes over time • display as a poster, diorama, print or projection • preview, snapshot or proof of an image for production at a later stage • records of data for inclusion in databases • use in forensic investigation or court proceedings
Planning of the job	<p>Planning of the job may include:</p> <ul style="list-style-type: none"> • choice of type of image, media, site and conditions • preparation of the subject, such as make-up, choice of whole or part, staining, dissection, mounting, animal handling, setting up a light path for a microscope and appropriate magnification • technical requirements, such as resolution, film type, tripods, shutter speed, lens type and colour differential • back-up method and equipment for image capture • specification of final product, size, delivery, number and cost

RANGE STATEMENT	
	<ul style="list-style-type: none"> • position of subject
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • lighting • backdrops • camera systems and accessories
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • microbiological organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids • solar radiation, dust and noise • chemicals and radioisotopes • X-rays and other sources of electromagnetic radiation (laser and UV) • manual handling of heavy objects • slips, trips and falls, falling objects and moving machinery (e.g. on building sites) • pedestrian and vehicular traffic
Safety procedures	<p>Safety procedures may include:</p> <ul style="list-style-type: none"> • recognising and observing hazard warnings and safety signs • use of personal protective equipment, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits, respirators and safety boots • following required containment procedures through the use of appropriate equipment, such as biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets and Class PCII, PCIII, and PCIV physical containment facilities • use of material safety data sheets (MSDS) • handling and storage of all hazardous materials and equipment in accordance with labelling, MSDS and manufacturer's instructions • following established manual handling procedures
Ethical and legal work practices	<p>Ethical and legal work practices may include consideration of:</p> <ul style="list-style-type: none"> • industry codes of practice, contracts, permits,

RANGE STATEMENT	
	<p>intellectual property, crediting, plagiarism and copyright</p> <ul style="list-style-type: none"> • moral rights, model release, etiquette, decorum and sensitivity towards the subject, use of a chaperone and confidentiality
Production of images	<p>Production of images may include:</p> <ul style="list-style-type: none"> • sending images for processing • processing the images • use of commercial software
Storage of records	<p>Storage of records may include:</p> <ul style="list-style-type: none"> • the brief, technical specifications and images • file management (back-ups, data retrieval and storage) • paper-based, electronic or digital
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Competency field

Competency field	
------------------	--

Co-requisite units

Co-requisite units		

MSS015002A Develop strategies for more sustainable use of resources

Modification History

Not applicable.

Unit Descriptor

This unit of competency covers identifying strategies for more sustainable uses of resources. The unit includes the identification of waste as defined in lean manufacturing (muda) as part of a strategy for achieving better sustainability outcomes in a process as well as quantifying theoretical and actual resource (including energy) consumption.

Application of the Unit

This unit applies inside organisations and their value chains and specifically applies to the use of resources as part of an overall response to improving sustainability. The unit has been developed with manufacturing operations as a focus. However, because of the range of organisations in a typical manufacturing value chain it may also be applied to other types of organisations.

The unit assumes that a decision to attempt to achieve more sustainable use of resources has already been made. The unit covers the skills needed for developing a strategic approach to resource use at the organisation or value chain level.

The unit does not cover the technical skills required to implement specific initiatives that may be identified as part of the strategic plan. However, there is a requirement to present and organise data. The complexity of this requirement will vary according to the type and scale of the organisation's processes. Where required, appropriate mathematics and statistics units should be selected from the MEM05 Metal and Engineering Training Package or other appropriate Training Package.

Where the carbon footprint (or water footprint or similar) of an enterprise or value chain is known, the unit can be applied to developing strategies for the reduction of that footprint.

It would typically be undertaken by a manager or technical specialist who had a major responsibility for sustainability as part of a broader work role, or sustainability may be their primary work responsibility.

For specific techniques covering the auditing of water, energy, emissions and transport, refer to relevant sustainability audit units.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

- | | |
|---|---|
| 1 Quantify resource consumption | 1.1 Identify all significant resources used by process |
| | 1.2 Identify consumption measurements available for each resource |
| | 1.3 Determine consumption for each resource |
| 2 Quantify resource loss | 2.1 Determine theoretical consumption of each resource |
| | 2.2 Compare theoretical consumption with actual consumption |
| | 2.3 Determine loss (emission) for each resource |
| 3 Recommend strategies for reducing waste | 3.1 Short-list high emission process steps |
| | 3.2 Analyse process to identify emission steps or locations |
| | 3.3 Determine root cause of emission |
| | 3.4 Investigate methods for reducing emission |
| | 3.5 Develop strategies and recommendations for improvement |
| 4 Prepare resources use audit report | 4.1 Identify purpose of report and key stakeholders |
| | 4.2 Compile data, implications and recommendations |
| | 4.3 Consult with stakeholders as appropriate |
| | 4.4 Draft and present report |

Required Skills and Knowledge

Required knowledge includes:

- the concept of muda. Muda is usually summarised under the headings of the ‘seven wastes’ which include:
 - overproduction
 - delay/waiting
 - transportation
 - over processing
 - excess inventory
 - unnecessary motion
 - defects and rework
- methods of material balancing
- methods of energy balancing
- methods of comparing theoretical with actual resource consumption
- methods for mapping manufacturing processes and resources consumed
- methods of measuring actual resource usage
- concept of muda and muda categories
- muda reduction methods and strategies
- AS/NZS ISO 14000 Environmental Management Standards

Required skills include:

- calculating, manipulating and interpreting numerical data, including establishing series, means and averages, absolute and proportional material and energy usage per product or process, correlations and rates of change
- analysing and conducting root cause analysis
- calculating theoretical consumption of resources as the minimum amount of resources per product or process step as defined by the customer multiplied by the rate of production or process
- calculating actual consumption of resources per unit (e.g. per product, operation, site or value chain)
- writing technical reports
- consulting with technical experts and internal and external stakeholders

Evidence Guide

Overview of assessment	A person who demonstrates competency in this unit must be able to identify and quantify resources and waste in a process, recommend strategies to reduce waste and prepare a report with recommendations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors must be satisfied that the candidate can competently and consistently apply the skills covered in this unit of competency in new and different situations and contexts. Critical aspects of assessment and evidence include:</p> <ul style="list-style-type: none"> • quantifying significant resource consumption and emission using materials balancing • identifying and consulting with stakeholders • developing strategies for reducing emissions • preparing and presenting a resources use report.
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit of competency is to be assessed in the workplace or a simulated workplace environment. • Assessment should emphasise a workplace context and procedures found in the candidate's workplace. • This unit of competency may be assessed with other relevant units addressing sustainability at the enterprise level or other units requiring the exercise of the skills and knowledge covered by this unit. • The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team.
Method of assessment	<ul style="list-style-type: none"> • In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. • Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability. • The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work-like environment.
Guidance information for assessment	

Range Statement

Waste	Waste in this unit is used in the broader sense of ‘muda’ as used in lean manufacturing and the competitive manufacturing units of competency developed by Manufacturing Skills Australia (MSA)
Emissions	<p>Emissions means all materials which enter the process/site but which do not leave as part of the product and so includes:</p> <ul style="list-style-type: none"> • known or able to be physically measured emissions of: <ul style="list-style-type: none"> • gases, vapours and fumes • liquids • solids • assumed emissions through material balancing • assumed emissions through energy loss, including heat, friction and other energy conversion yield losses
Theoretical consumption	Theoretical consumption of resources is the minimum amount of resources per product as defined by the customer multiplied by the rate of production
Actual consumption	Actual consumption is the amount of a resource entering the value chain
Significant resources	<p>Significant resources includes resources which are deemed to be significant because they are:</p> <ul style="list-style-type: none"> • high volume • high value • high environmental significance • important to the product or process • covered by legislation or regulation • important to the enterprise <p>It need not include resources which are incidental to the activity and which are not otherwise significant</p>

MSS402001A Apply competitive systems and practices

Modification History

New unit, superceding MSACMS200A Apply competitive manufacturing practices - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to implement basic improvement practices within an organisation using competitive systems and practices. The unit focuses on bringing together the basic concepts and the holistic application of these basic concepts and processes to operations. It would typically be carried out working as part of a team.

Application of the Unit

This unit applies to an individual in an organisation that has embarked on competitive systems and practices. The unit covers the skills and knowledge required to contribute to the competitive systems and practices processes and assumes that they are to be used within the scope of the individual's job and authority.

This unit requires the application of skills associated with planning and organising an individual's own role within the competitive systems and practices framework.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|---------------------------------------|---|
| 1 | Identify own place in the value chain | 1.1 Identify customers relevant to own work and their needs/requirements |
| | | 1.2 Identify suppliers for own work |
| | | 1.3 Identify value contributions along the chain |
| | | 1.4 Identify and recommend methods of increasing own contribution to the value chain |
| | | |
| 2 | Improve the product and process value | 2.1 Identify customer features/benefits in the product and process |
| | | 2.2 Identify aspects of product and process which contribute to customer features/benefits |
| | | 2.3 Identify aspects of product and process which do not contribute to customer benefits/features |
| | | 2.4 Recommend methods of reducing waste and increasing features/benefits |
| | | |
| 3 | Use competitive systems and practices | 3.1 Identify competitive systems and practices used in organisation and own work area |
| | | 3.2 Apply practices appropriate for the job or process |
| | | 3.3 Monitor the job/process and make adjustments to improve it in accordance with procedures |
| | | 3.4 Identify own skill requirements and seek skill development, if required |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others to clarify scope of competitive systems and practices implementation and contributing suggestions for improvement
- visualising normal operational procedures in terms of flow and contribution to customer outcomes
- planning own tasks to support competitive systems and practices implementation
- implementing competitive systems and practices in own work area according to instructions
- identifying waste (muda)

Required knowledge

Required knowledge includes:

- internal and external customers and the value they derive from operations
- suppliers, their capabilities and contribution to value (this may be obtained from an existing value stream map or other enterprise documentation)
- waste (muda)
- relevant competitive systems and practices for own job and how to apply them
- factors impacting on product, operations and waste, particularly those wholly or partially under their control (and how to control them)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	A person being assessed against this unit will work effectively in a competitive systems and practices environment, making continual positive contributions to the improvement of the business within the scope of their job.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: <ul style="list-style-type: none"> • identify the scope of competitive systems and

	<p>practices implemented in their work area</p> <ul style="list-style-type: none"> • identify services and/or functions supplied by suppliers and to customers • identify own tasks and responsibilities and relate them to organisation and customer requirements • identify aspects of products and process which add to or detract from customer benefit • contribute suggestions for improvement.
Context of and specific resources for assessment	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads, and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>

Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.
-------------------------------------	--

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control And Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted</p>
--	--

	<p>so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Customers	<p>Customers may include:</p> <ul style="list-style-type: none"> • internal or external customers and should be sufficiently close to the individual's work as to be easily identifiable • final customers used as the basis for the identification of value and waste <p>The individual does not need to interface directly with the external customer, but should be provided with sufficient information to enable them to identify customer benefits and customer features</p>
Suppliers	<p>Suppliers may be:</p> <ul style="list-style-type: none"> • internal or external suppliers and should be sufficiently close to the individual's work as to be easily identifiable <p>The operator does not need to interface directly with external suppliers, but should be provided with sufficient information to enable them to identify supplier contribution to their own work and to customer benefit</p>
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the organisation • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) and government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other format

MSS402002A Sustain process improvements

Modification History

New unit, superseding MSACMS201A Sustain process improvements - Not equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to prevent process improvements in their own work from slipping back to former practices or digressing to less efficient practices.

Application of the Unit

This unit applies to organisations implementing competitive systems and practices and continuous improvement. It covers the skills needed to ensure that process improvements are sustained and opportunities taken to suggest further improvements.

Improvement initiatives can be made by any of a number of methods and by teams or individuals. The unit assumes that desired levels of performance or quality are known to employees.

The unit can be applied to all areas of an organisation, including production, maintenance, logistics and office functions.

This unit requires the application of skills associated with problem solving, initiative and enterprise and self-management in order to understand implement and monitor improvement practices. It also requires the ability to identify and address personal skill gaps in order to manage own ability to implement change.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Elements and Performance Criteria Pre-Content

Elements describe the Performance criteria describe the performance needed to

essential outcomes of a unit of competency.

demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Examine previous improvements	1.1	Identify impact of previous process improvements to equipment, operations, services or products in own work area
		1.2	Identify improvements where objectives have not been met
2	Implement corrective actions	2.1	Identify corrective actions that can be taken by self on process improvements that have not met objectives
		2.2	Obtain any required approvals
		2.3	Identify any additional, personal skill gaps and seek skill development
		2.4	Adopt improved processes
3	Check changes	3.1	Identify claimed improvements
		3.2	Identify methods of observing and measuring claimed improvements in own work area
		3.3	Check if claimed improvements are occurring and report problems in accordance with procedures
4	Check for further improvements	4.1	Look for areas of possible further improvement
		4.2	Discuss further improvements with peers and supervisors
		4.3	Take action to implement improvements in accordance with procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others to clarify scope and stage of implementation of competitive systems and practices and contribute suggestions for further improvements in implementation
- visualising normal operational procedures in terms of flow and contribution to customer outcomes
- planning own tasks to support competitive systems and practices implementation
- implementing competitive systems and practices in own work area according to instructions
- identifying waste (muda)
- monitoring competitive systems and practices performance indicators in own work and work area

Required knowledge

Required knowledge includes:

- internal and external customers and the value they derive from own work area operations
- suppliers to own work area, their capabilities and contribution to customer benefit
- waste (muda)
- relevant competitive systems and practices for own job and how to apply and monitor the outcomes
- factors impacting on product, operations and waste, particularly those wholly or partially under their control (and how to control them)

Evidence Guide

MSS402010A Manage the impact of change on own work

Modification History

New unit, superseding MSACMC210A Manage the impact of change on own work - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by an employee to effectively manage the changes in their own work resulting from their organisation's implementation of competitive systems and practices.

Application of the Unit

This unit applies to an employee in an organisation implementing competitive systems and practices that affect the employee's own work. The unit includes the skills required to positively participate in ongoing and continuous change as it affects their work. The employee will be expected to deal with these changes as part of a team and to give feedback from their own perspective.

This unit requires the application of skills associated with problem solving, planning and organising and self-management for assessing and managing the impact of change on own work. This unit also requires the ability to seek information and feedback from team members on the impact of changes and suggested improvements.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|--|--|
| 1 | Examine the impact of change on own work practices | 1.1 Identify competitive systems and practices relevant to changes in own work |
| | | 1.2 Examine changes to work flow |
| | | 1.3 Examine changes to equipment/process/physical environment |
| | | 1.4 Examine changes to work relationship with team members and other teams |
| | | 1.5 Examine changes to data collection needs |
| | | 1.6 Examine changed work for impacts on health, safety and environment (HSE) |
| | | 1.7 Examine changes to quality requirements |
| | | 1.8 Identify any additional individual skill needs |
| | | 1.9 Identify other areas requiring assistance |
| 2 | Implement change | 2.1 Review changes which may have an adverse impact with team leader |
| | | 2.2 Adopt changes to individual work practice |
| | | 2.3 Seek assistance in gathering/processing data, as required |
| | | 2.4 Implement the data collection/processing and take actions on resulting information in accordance with procedures |
| | | 2.5 Seek assistance/training to meet needs caused by change |
| 3 | Implement continuous | 3.1 Critically examine all changes |
| | | 3.2 Identify impacts of changes both up and down the |

improvement

immediate value stream

3.3 Identify areas for improvement

3.4 Make recommendations for improvement in accordance with procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying the competitive systems and practices being implemented in the organisation that are relevant to own work, including, if implemented:
 - Just in Time (JIT) and kanban systems
 - preventative maintenance
 - 5S housekeeping
 - continuous improvement processes (e.g. kaizen)
 - waste (muda) elimination
 - formal problem solving procedures (e.g. root cause analysis (RCA))
- analysing own work procedures
- communicating with others in work area, team leaders and other employees relevant to changes in own work
- solving problems relevant to changes in own work
- identifying sources of assistance in organisation if difficulty is experienced with changes
- interpreting relevant procedures and instructions
- working as part of a team

Required knowledge

Required knowledge includes:

- features of common competitive systems and practices sufficient for identification, including:
 - JIT and kanban systems
 - preventative maintenance
 - 5S housekeeping
 - continuous improvement processes (e.g. kaizen)

- waste (muda) elimination
- formal problem solving procedures (e.g. RCA)
- current processes and principles of operation
- sources of data on the process/plant and possible applications to information
- methods of determining own skill needs and developing skills, if required
- HSE principles as relevant to own job
- change implementation contacts and procedures relevant to work area
- employee assistance mechanisms in the organisation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify the competitive systems and practices used in their own work • identify changes to their own work flowing from the implementation of the relevant competitive systems and practices • implement changes • know when and how to seek assistance with work changes • make suggestions for improvements.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess response to

	contingencies.
Method of assessment	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on. • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems such as Systems Control and Data Acquisition (SCADA)
--	---

	<p>software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems</p> <ul style="list-style-type: none"> • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Managing impact of change</p>	<p>Managing impact of change may include:</p> <ul style="list-style-type: none"> • elements being undertaken individually or as part of a team • seeking assistance from team leaders for areas outside the employee’s range of responsibility and authority
<p>Procedures</p>	<p>Procedures may include:</p> <ul style="list-style-type: none"> • all work instructions • standard operating procedures • formulas/recipes • batch sheet • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing

	<p>practice (GMP) and responsible care) and government regulations</p> <p>Procedures may be:</p> <ul style="list-style-type: none"> written, verbal, computer-based or in some other format
Gathering and monitoring performance data	<p>The gathering and monitoring of performance data may be:</p> <ul style="list-style-type: none"> undertaken manually by individual employees through charts, tally sheets or keypad/board entry collected automatically through software, such as SCADA software, ERP systems, MRP and proprietary systems
Continuous improvement	<p>Continuous improvement in competitive systems and practices (often referred to as kaizen) includes:</p> <ul style="list-style-type: none"> the continual evaluation and improvement of all process in terms of time required, resources used, resultant quality, and other aspects relevant to the process
Value stream	<p>The value stream begins with the customer and includes all actions (both value adding and non-value added) by both internal sections/departments and external organisations to meet a customer requirement.</p> <p>Depending on the operations and the customer requirement stages where value stream actions may occur include:</p> <ul style="list-style-type: none"> sales outlet/representative information gathering, data analysis and research product design raw material sourcing intermediate processing final assembler/collation/preparation support services (e.g. accounting, finance and legal) storage and delivery to customer after market support

MSS402020A Apply quick changeover procedures

Modification History

New unit, superseding MSACMT220A Apply quick changeover procedures - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to apply quick changeover procedures in an organisation implementing competitive systems and practices.

Application of the Unit

This unit applies to individuals in an organisation which is implementing competitive systems and practices and is pursuing quick changeover as one of its competitive operations tools. The unit can apply to quick changeovers of equipment, processes, batches or product type.

This unit covers the carrying out of these quick changeovers and also recommending improvements within the scope and authority of the individual's job.

Particular technical skills may also be required in some operations sectors and for some jobs. These skills should be gained from the Training Package relevant to the individual's industry and occupation.

This unit requires the application of skills associated with applying quick changeover procedures, including the planning and organising of own work, identifying problems and making suggestions for improvement of procedures.

This unit may not be applicable to a totally continuous operation producing only the one product, or simultaneous range of products. The unit is also not applicable to a maintenance/PVI shutdown as experienced by the continuous process manufacturers. However, where there is continuous operation on a campaign basis, it may be applied to the changeover between campaigns or similar changeovers.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|--|-----|---|
| 1 | Prepare for changeover | 1.1 | Determine when changeover will be required |
| | | 1.2 | Review plans and instructions for quick changeover |
| | | 1.3 | Identify role of others in quick changeover |
| | | 1.4 | Obtain all required tools/parts/materials for changeover |
| | | 1.5 | Organise process and tools/parts/materials ready for changeover |
| 2 | Make quick changeover | 2.1 | Plan changeover according to quick changeover principles |
| | | 2.2 | Liaise and work with relevant people in quick changeover |
| | | 2.3 | Complete changeover according to procedures |
| | | 2.4 | Check output meets specification |
| | | 2.5 | Debrief with all relevant stakeholders |
| | | 2.6 | Note any steps which cause a problem |
| | | 2.7 | Recommend changes to problematic steps |
| 3 | Improve occupational health and safety | 3.1 | Identify hazards to self or others in all steps/actions |
| | | 3.2 | Determine risks from each hazard |

- (OHS)
- 3.3 Identify actions which may be performed in a more ergonomic manner
 - 3.4 Recommend changes to improve OHS

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- determining/predicting when a changeover will occur through knowledge of products and processes in own work area
- communicating with others to clarify scope and procedures for quick changeover and contributing suggestions for improvement
- planning own tasks in quick changeover
- identifying and working to target changeover time
- working as part of a team
- setting up quick changeover using appropriate tools, process skills and procedures
- following OHS procedures and regulatory requirements and notifying risks

Required knowledge

Required knowledge includes:

- principles of quick changeover, including:
 - setting of target time for changeover
 - conversion of internal set-up time to external set-up time, where appropriate
 - simplification of changeover steps
 - monitoring and continuous improvement of changeovers
- relevant operational procedures
- target time for changeover
- relevant OHS regulations and requirements
- purposes/requirements of changeover
- methods of recommending changes
- quality requirements for products and processes
- minimisation of changeover waste (e.g. scrap and energy)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify the scope and equipment to be used in a quick changeover implemented in their work area • identify the target time • understand the difference between internal and external changeover steps • identify own tasks and responsibilities in a quick changeover • identify problems in quick changeovers • contribute suggestions for improvement.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess response to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on)

	<ul style="list-style-type: none"> • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S
--	---

	<ul style="list-style-type: none"> • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Changeover	<p>Changeover may refer to:</p> <ul style="list-style-type: none"> • an exchange of equipment (often dies or tools (traditional)) • a change between products/batches or between campaigns or processes. It may be any quantum change to produce a different product or undertake a different process <p>In competitive systems and practices equipment-based quick changeover techniques in manufacturing can often be referred to under different names, for example:</p> <ul style="list-style-type: none"> • single minute exchange of die (SMED) – The term originated with die changeovers but now often refers to the ability to perform any set-up activity in a minute or less of machine or process downtime • single-digit set-up – performing a set-up activity in a single-digit number of minutes (i.e. fewer than ten) • one touch exchange of die (OTED) – literally, changing a die with one physical motion, such as pushing a button; broadly, an extremely simple procedure for performing a set-up activity
Set-up	<p>Set-up can be divided into two types:</p> <ul style="list-style-type: none"> • internal set-up (work that can be done only when the machine or process is not actively engaged in production) • external set-up (work that can be done concurrently

	<p>with the machine or process performing production duties)</p> <p>The same distinction can be applied to non-production equipment-based work areas where changeovers of processes or operations can be:</p> <ul style="list-style-type: none"> • internal (requires work to stop, be reset, computers restarted, and so on) • external (where work can continue during the changeover)
Set-up time	<p>Set-up time includes:</p> <ul style="list-style-type: none"> • the work time required to change over a machine or process from one item or operation to the next item or operation
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of operations, processes, plant and equipment • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) and government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other format

MSS402021A Apply Just in Time procedures

Modification History

New unit, superseding MSACMT221A Apply Just in Time (JIT) procedures - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to work in an organisation implementing Just in Time (JIT) procedures.

Application of the Unit

This unit applies to an individual working in an organisation following JIT who will need to follow procedures which are specific to JIT, such as the controlled flow of material (e.g. the use of kanban and elimination of waste). This will involve the individual in the application of the pull system to their job and the authorisation of product/material flows in accordance with procedures and their level of authority.

This unit requires the application of skills associated with planning and organising and self-management to deliver product on demand using necessary tools, equipment and processes to meet production requirements. The unit also requires an ability to recognise and act on problems that may interfere with meeting production demands.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Respond to indicator of demand	1.1	Identify pull of product through work role
		1.2	Recognise indicator of flow authorisation
		1.3	Identify production or service required
2	Make products or deliver service to demand	2.1	Make product or deliver service as required by ticket
		2.2	Identify any factors likely to prevent demand being satisfied in own work or work of the team
		2.3	Take action in accordance with procedures
3	Update demand information as required	3.1	Record information on ticket to procedures, as required
		3.2	Facilitate operation of flow authorisation as part of work
4	Recommend improvements	4.1	Examine the operation of the JIT system as it relates to own work
		4.2	Identify areas for improvement
		4.3	Identify any additional personal skill requirements to implement JIT procedures
		4.4	Recommend improvements

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- receiving ticket, kanban, order or other indicator of demand and interpreting correctly for own work function, including quantity, quality, time and delivery requirements
- ensuring that all production and movement of parts/material or delivery of a service for which the individual is responsible for takes place only as required by a downstream operation
- recognising and taking appropriate action on faults and other issues that may threaten the JIT delivery of own product or service
- reading and recording information on tickets or other indicators of demand
- suggest improvements to JIT system, as appropriate
- performing technical functions to meet indicators of demand from downstream and to issue indicators of demand upstream

Required knowledge

Required knowledge includes:

- relevant indicator of demands for own job
- own role in flow authorisation
- JIT methods relevant to job
- procedures for recommending improvements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify the indicators of demand and the flow authorisation system in their work area • relate products and services supplied by suppliers and customers to the flow authorisation system • identify own tasks and responsibilities and relate them to the flow authorisation system • interpret received indicators of demand correctly for quantity, quality and time of delivery • contribute suggestions for improvement.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.

	<p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess response to contingencies.
Method of assessment	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using some combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work

environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>JIT</p>	<p>JIT is a scheduling concept that calls for any item or service needed for an operation, whether a service, raw material, finished item, or anything in between to be available:</p>

	<ul style="list-style-type: none"> precisely when the service, product or operation is to be produced or undertaken in the right quantity and at the right quality
Product	<p>Product may include:</p> <ul style="list-style-type: none"> a physical product a supporting utility service, such as water, gas, power some other service (e.g. cranes and forklifts)
Flow authorisation	<p>Flow authorisation refers to:</p> <ul style="list-style-type: none"> a system which authorises the worker to make a product without reference to another authority
Indicator of demand	<p>An indicator of demand may include:</p> <ul style="list-style-type: none"> kanban bin, ticket or similar some other indicator of demand pull which authorises production or movement of an item (in some plants, this may also include authorisation using SCADA software) <p>In continuous operations organisations, production is measured in terms of production rate (e.g. kg/h, tonne/day) and rate is increased/decreased according to the flow authorisation which may be a kanban (e.g. ticket, order from a supplier) or may be a SCADA signal from a remote facility (e.g. customer tank) saying that resupply is required or similar</p>
Ticket	<p>A ticket may include:</p> <ul style="list-style-type: none"> kanban or some other record, paper or electronic, which constitutes the whole or part of the flow authorising system (where kanban bins are used, there may be no other record)
Kanban	<p>Kanban refers to:</p> <ul style="list-style-type: none"> a card or sheet used to authorise production or movement of an item and may vary in format or content between organisations and departments
SCADA	<p>SCADA refers to:</p> <ul style="list-style-type: none"> a number of systems which automatically collect critical process data, perform required mathematical manipulations on it and then make control decisions and/or give required information to personnel for action
Pull system	<p>A pull system refers to:</p>

	<ul style="list-style-type: none"> • an operations planning system based on making on demand, as opposed to a push system based on making for stock using a sales forecast
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) and government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other format

MSS402030A Apply cost factors to work practices

Modification History

New unit, superseding MSACMT230A Apply cost factors to work practices - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by an individual to identify cost components in their work and to be able to determine, in general terms, the cost impacts of alternative actions.

Application of the Unit

This unit applies to an individual who is required to contribute to, and be involved in, the assessment of cost factors in their work. This may be done individually or in a team environment.

The unit covers the skills to be able to assess the relative costs of the alternatives and use this as one of the key factors in making decisions. Decisions are made within the scope of the employee's authority and according to procedures. Typical decisions include those that contribute to the efficient organisation of own work and the improvement of production time and cycle times.

This unit requires the application of skills associated with problem solving to identify cost factors and cost implications of own work and self-management to apply cost-effective practices.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

unit of competency. text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Identify the major cost components of product or process in own work area	1.1	Identify cost components in the product or process in own work area
		1.2	Recognise the impact of current or alternative actions on costs
2	Identify constraints to cost-efficiency	2.1	Identify required production/process rate and major costs
		2.2	Identify costs factors under individual or team control
		2.3	Relate identified costs factors to impact on overall cost of production/process
		2.4	Identify cost factors that are a constraint to cost-efficiency in own work area
3	Apply cost-efficient work practices	3.1	Identify and explain to relevant people the implications of possible actions/changes to improve cost-efficiency in simple financial terms
		3.2	Identify non-financial implications of proposed changes in discussion with relevant people
		3.3	Select actions which minimise overall costs
		3.4	Monitor actions to ensure cost-efficiency in own work area is maintained

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others to clarify cost factors and contribute suggestions for improvement
- visualising normal operational procedures in terms of flow
- distinguishing between fixed and variable costs
- identifying fixed and variable cost components relevant to own work, including where applicable:
 - power/energy
 - materials, plant and equipment
 - production or process time, including impact on salary and wages
 - office expenses
 - government taxes and charges

Required knowledge

Required knowledge includes:

- cost components of products made
- costs concepts, such as expense and income
- major cost contributors to product (e.g. energy)
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify the scope of their own and their teams work and relate it to the overall flow of work in the organisation • express cost factors in specific terms (e.g. cost per
---	--

	<p>item, process and task) and not just in a general manner</p> <ul style="list-style-type: none"> • identify and express costs factors in simple financial terms • use cost factors to select lower cost alternatives when making decisions.
Context of and specific resources for assessment	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and</p>

	literacy capacity of the candidate and the work being performed.

MSS402031A Interpret product costs in terms of customer requirements

Modification History

New unit, superseding MSACMT231A Interpret product costs in terms of customer requirements - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by an individual to be able to identify the major cost components of either products or processes, the basic relationship of these to customer benefit, and use this to help minimise waste (defined as anything not delivering value as defined by the customer). It has a different focus to MSS402030A Apply cost factors to work practices, which focuses on costs in isolation, whereas this unit regards all costs not directly leading to customer benefit as waste.

Application of the Unit

This unit applies to an individual who uses their understanding of the customer's requirements of the product or process being undertaken as the basis for investigating work processes to identify waste sources and then takes action relevant to their level of competency and authority to reduce this waste. It requires an understanding of both the cost factors in the products they make and also the benefits which the customer derives from the product.

This competency may be performed individually or in a team-based environment.

This unit requires the application of skills associated with analysis and problem solving to identify waste and determine ways to minimise waste. This unit requires initiative and enterprise and application of learning in concepts of waste and waste minimisation.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|--|-----|--|
| 1 | Identify cost components deriving from customer benefit and other costs | 1.1 | Identify customer features/benefits in product or process being undertaken |
| | | 1.2 | Identify cost components which deliver customer features/benefits and those which do not |
| 2 | Compare required performance of product or process steps with actual performance | 2.1 | Identify performance required to meet customer needs in own work and that of team |
| | | 2.2 | Identify actual performance |
| | | 2.3 | Compare cost components of products or process with current customer-related targets |
| | | 2.4 | Separate costs components into those that contribute to customer features/benefits and those that do not |
| | | 2.5 | Determine non-contributing cost components which are under control of the individual or team |
| 3 | Minimise waste | 3.1 | Recommend changes to eliminate or reduce waste |
| | | 3.2 | Adopt changes which minimises waste |
| | | 3.3 | Monitor effect of changes to ensure gains are made against customer features/benefits |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying customer benefit in own work and that of the individual's team
- identifying financial and other performance indicators for own work and of team, including where appropriate, takt time
- communicating with others to clarify cost factors and contribute suggestions for improvement
- visualising normal operational procedures in terms of flow
- distinguishing between fixed and variable costs
- classifying fixed and variable cost components in terms of relevancy to customer benefit, including where applicable:
 - power/energy
 - materials, plant and equipment
 - production or process time, including impact on salary and wages
 - required and unnecessary downtime
 - office expenses
 - government taxes and charges

Required knowledge

Required knowledge includes:

- value as defined by the customer and the relevancy to own and team's work
- ability to access company information about:
 - customer features/benefits
 - cost components of products made
 - costs concepts, such as expense and income
 - major cost contributors to product (e.g. energy)
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify customer benefit from own and team's work • express cost factors (financial and other factors) in specific terms (e.g. cost per item, process and task), and not just in a general manner • identify and express costs factors in simple financial terms • contribute suggestions for improvement to minimise waste and overall costs.
Context of and specific resources for assessment	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p>

	Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just In Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving
--	--

	<ul style="list-style-type: none"> • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Customer features/benefits	<p>Customer features/benefits include:</p> <ul style="list-style-type: none"> • characteristics of the product or service which add value to the customer, this value may be assessed in financial or features terms <p>The customer may be:</p> <ul style="list-style-type: none"> • internal or external
Performance	<p>Performance may include:</p> <ul style="list-style-type: none"> • the rate of output of the plant compared to the rate required to meet demand • takt, where takt time is the allowable time to produce one product at the rate and quality customers are demanding it (this is NOT the same as cycle time, which is the normal time to complete an operation on a product – which should be less than or equal to takt time)
Customer-related targets	<p>Customer-related targets include:</p> <ul style="list-style-type: none"> • internally set financial and operational targets that contribute to meeting customer features/benefits
Contributing and non-contributing cost components	<p>Contributing costs include:</p> <ul style="list-style-type: none"> • costs that make a direct contribution to customer features/benefits. These costs continue to need to be incurred (although they may be minimised) in order to gain the customer feature/benefit <p>Non-contributing costs include:</p> <ul style="list-style-type: none"> • other costs that do not contribute to customer features/benefits. These may be costs that must be maintained, such as regulatory compliance and occupational health and safety (OHS) costs and other costs which are not required and do not contribute to customer features and so should be eliminated if possible (this is also defined in terms of <i>waste</i> – see

	below)
Waste	<p>Waste (also known as muda in the Toyota Production System and its derivatives) includes:</p> <ul style="list-style-type: none"> • any activity which does not contribute to customer or organisation benefit/features in the product <p>Categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items <p>Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers</p>

MSS402040A Apply 5S procedures

Modification History

New unit, superseding MSACMT240A Apply 5S procedures in a manufacturing environment
- Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by an employee to apply 5S procedures to their own job and work area. The unit assumes the employee has a particular job and an allocated work area and that processes in the work area are known by the individual.

Application of the Unit

This unit applies to an individual in an organisation who works in an operational position as part of production, maintenance, logistics, and so on. The unit can also apply to individuals in other organisations who have a discrete role and responsibility for individually managed processes. For employees in an office, the specific office-related unit *MSS402041A Apply 5S in an office* should be selected.

This unit applies where an organisation has decided to embark on a competitive systems and practices strategy and as part of this has adopted the philosophy of 5S as one of the tools to improve performance. The employee needs to apply 5S to their job and work area and maintain the housekeeping and other standards set by 5S.

This unit requires the application of skills associated with planning and organising, problem solving and self-management, in order to identify and implement 5S housekeeping practices.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|---------------------------------|-----|---|
| 1 | Sort needed items from unneeded | 1.1 | Identify all items in the work area |
| | | 1.2 | Sort items to achieve deliverables and value expected by downstream and final customers |
| | | 1.3 | Sort items required for regulatory or other required purposes |
| | | 1.4 | Place any non-essential item in a appropriate place other than the workplace |
| | | 1.5 | Regularly check that only essential items are in the work area |
| 2 | Set the workplace in order | 2.1 | Identify the best location for each essential item |
| | | 2.2 | Place each essential item in its assigned location |
| | | 2.3 | After use immediately return each essential item to its assigned location |
| | | 2.4 | Regularly check that each essential item is in its assigned location |
| 3 | Shine the work area | 3.1 | Keep the work area clean and tidy at all times |
| | | 3.2 | Conduct regular housekeeping activities during shift |
| | | 3.3 | Ensure the work area is neat, clean and tidy at both beginning and end of shift |

4	Standardise activities	4.1	Follow procedures
		4.2	Follow checklists for activities, where available
		4.3	Keep the work area to specified standard
5	Sustain the 5S system	5.1	Clean up after completion of job and before commencing next job or end of shift
		5.2	Identify situations where compliance to standards is unlikely and take actions specified in procedures
		5.3	Inspect work area regularly for compliance to specified standard
		5.4	Recommend improvements to lift the level of compliance in the workplace

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others to clarify issues during 5S implementation, communicate results and contribute suggestions for improvement
- visualising operations in terms of flow and contribution to customer outcomes
- planning own tasks in implementation of 5S
- implementing 5S in own work area according to instructions
- identifying waste (muda)
- prioritising activities and items
- reading and interpreting documents describing procedures
- recording activities and results against templates and other prescribed formats
- working with others
- solving problems

Required knowledge

Required knowledge includes:

- operations and processes relevant to own job
- meaning and application of 5S steps to own job and work area
- principles of efficient workplace organisation
- purposes of 5S
- methods of making/recommending improvements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify own tasks and responsibilities and relate them to organisation and customer requirements • identify and explain the stages of 5S • implement 5S in own work area • identify waste (muda) in the work area.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects

	<ul style="list-style-type: none"> • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems
--	--

	<ul style="list-style-type: none"> • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
5S	<p>5S is a system of work organisation originally developed in Japan based around housekeeping principles. A close translation of the five stages in the housekeeping approach is:</p> <ul style="list-style-type: none"> • sort • set in order • shine • standardise • sustain
Sort	<p>Sort involves keeping only what is absolutely necessary for the processes in the work area. Sort includes:</p> <ul style="list-style-type: none"> • clearing the work area of all non-essential equipment and materials <p>Non-essential items are those not required to either produce product, conduct process or operations, or make required adjustments to equipment during process or operations</p>
Set in order	<p>Set in order includes:</p> <ul style="list-style-type: none"> • assigning required equipment and materials appropriate locations in the work area

Shine	<p>Shine includes:</p> <ul style="list-style-type: none"> • keeping the work area clean at all times. This should be carried out to a regular daily schedule against allowed time and, on most occasions, at the end of a job
Standardise	<p>Standardising includes:</p> <ul style="list-style-type: none"> • activities that help maintain the order and the housekeeping standards • using procedures and checklists developed from a procedure
Sustain	<p>Sustain includes:</p> <ul style="list-style-type: none"> • making sure that daily activities are completed every day regardless of circumstance • cleaning up after a job • undertaking inspections, including: <ul style="list-style-type: none"> • informal inspections carried out often, at least weekly • formal inspections carried out at least monthly • generating continuous improvement actions from daily activities • following up specific actions to generate continuous improvement
Items in work area	<p>Items in work area may include:</p> <ul style="list-style-type: none"> • tools • jigs/fixtures • materials/components • plant and equipment • manuals • personal items (e.g. bags, lunch boxes and posters) • safety equipment and personal protective equipment • other items which happen to be in the work area
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the operation of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing

	<p>practice (GMP) and responsible care) and government regulations</p> <p>Procedures may be:</p> <ul style="list-style-type: none">• written, verbal, computer based or in some other format

MSS402050A Monitor process capability

Modification History

New unit, MSACMT250A Monitor process capability - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required for gathering of data and the interpretation of simple information to determine the compliance of the process and the taking of action as defined by the procedures where the information reveals the process is out of control parameters.

Application of the Unit

This unit applies to an individual in an organisation adopting specific competitive systems and practices, usually either six sigma or statistical process control/three sigma, as a means of determining and improving the capability of their process to customer requirements. The individual is involved in collecting specified data and performing specified manipulations to the data (typically by plotting on a chart or by entering into a nominated computer program). The information is typically presented to team members in terms of graphs/charts which they are expected to interpret at a basic level and then take action in accordance with procedures to restore the process to being under control parameters.

This unit requires the application of skills associated with entering and monitoring operational data and information and requires initiative, enterprise and problem solving in identifying production variations and making improvement recommendations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

1	Collect and process data	1.1	Take specified measurements/readings, as required
		1.2	Enter data in log, computer or other record
		1.3	Manipulate and/or chart data as required by procedures
2	Identify variations that are not random and take action	2.1	Examine chart and/or reliability information
		2.2	Distinguish between random variations and those with an identifiable cause
		2.3	Take action specified in procedures when a variation with an identifiable cause occurs
3	Assist in process improvement	3.1	Collect data for process capability improvement trials
		3.2	Make recommendations for improvement
		3.3	Implement revised capability monitoring procedures

Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- reading and interpreting electronic and hard copy operating instructions and documents, including where used:
 - work instructions

- standard operating procedures
- formulas/recipes
- production and batch sheets
- temporary instructions
- other provided operating instructions
- monitoring performance data against specifications and control parameters
- examining equipment procedures, products and processes for possible causes of variations
- identifying when corrective action is required by reference to procedures

Required knowledge

Required knowledge includes:

- data collection methods for operations in work area
- data processing techniques required
- basic variability and normal distribution
- recognition of identifiable causes in accordance with procedures
- causes of different types of identifiable causes as defined by procedures
- actions to be taken for the different causes

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence should be available of data collected and processed. There may also be evidence of assignable causes recognised and action taken. There should not be evidence of assignable causes being ignored.</p> <p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify the scope of operations, including required performance parameters in their work area • collect, enter and process data, including normal performance and variations • read and interpret data, including identifying variation to set parameters • determine where assignable causes can be allocated to variations and take appropriate action • participate in data collection, when required, for
--	--

	<p>process capability trials</p> <ul style="list-style-type: none"> • contribute suggestions for improvement.
Context of and specific resources for assessment	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems. • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
---	--

Six sigma	<p>Six sigma is a process improvement methodology based on statistical process control with six sigma limits which equates to 3.4 defects per million opportunities for each product or service transaction</p> <p>Six sigma is also often used as a general term covering a competitive systems and practices approach. Six sigma training typically covers several units of competency in this Training Package</p>
Three sigma	<p>Three sigma includes:</p> <ul style="list-style-type: none"> • statistical process control with three sigma limits which equates to 3 defects per thousand opportunities for each product or service transaction
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other form
Random variation	<p>Random variation is the term used in statistical control to refer to those variations for which no cause can be found</p>
Identifiable cause	<p>Identifiable cause (also referred to as assignable cause or special cause) refers to:</p> <ul style="list-style-type: none"> • those variations for which a cause can be found and so the cause of the variation eliminated
Process capability	<p>Process capability means the capability of the process to deliver to customer defined requirements. Process capability includes process stability against standardised practices and documentation to eliminate variation against customer requirements</p>

MSS402051A Apply quality standards

Modification History

New unit, superseding MSACMT251A Apply quality standards - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to apply quality standards to work operations in an organisation. The unit is designed to complement competitive systems and practices units.

Application of the Unit

This unit applies to an individual who is expected to take responsibility for the quality of their own work, and to take actions specified in the procedures and within the scope of their job and authority to ensure that quality standards are met.

This unit requires the application of skills associated with interpreting and applying workplace standards and identifying and addressing problems that interfere with quality outcomes. The unit requires initiative, enterprise and self-management to ensure quality standards are achieved.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|---|-----|--|
| 1 | Assess own work | 1.1 | Continuously check completed work against workplace standards relevant to the operation being undertaken |
| | | 1.2 | Demonstrate an understanding of how the work activities and completed work relate to the next production process or processes and to the final products or services concerned |
| | | 1.3 | Identify and isolate faulty components, products or processes |
| | | 1.4 | Record and/or report faults and any identified causes to the supervisor concerned, where required, in accordance with workplace procedures |
| 2 | Assess quality of received components, parts or materials | 2.1 | Continuously check received components, parts, materials, information, service or final products against workplace standards and specifications for conformance |
| | | 2.2 | Demonstrate an understanding of how the received components, parts or materials, information or service relate to the current operation and how they contribute to the final quality of the product or service |
| | | 2.3 | Identify and isolate faulty components, parts, materials or information that relate to the operator's work |
| | | 2.4 | Record and/or report faults and any identified causes in accordance with workplace procedures |
| | | 2.5 | Identify causes of any identified faults and take corrective action as specified in workplace procedures |
| 3 | Measure components, parts or materials | 3.1 | Measure materials, component parts, information, service or products, as required, using the appropriate measuring instruments in accordance with workplace procedures |

4	Record information on production indicator	4.1	Record basic information on quality and other indicators of process performance in accordance with workplace procedures
5	Investigate causes of quality deviations	5.1	Investigate and report causes of deviations from specified quality standards for components
		5.2	Recommend suitable preventative action based on workplace quality standards and the identified causes of deviations from specified quality standards of materials

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- interpreting work instructions, specifications, standards and patterns appropriate to own work
- carrying out relevant visual inspections of materials, component parts and final products
- carrying out relevant physical/chemical measurements or tests
- maintaining accurate work records in accordance with procedures
- carrying out work in accordance with occupational health and safety (OHS) policies and procedures
- meeting work specifications
- communicating effectively within defined workplace procedures
- interpreting and applying defined procedures

Required knowledge

Required knowledge includes:

- relevant quality standards, policies and procedures
- relevant production processes, materials and products
- basic characteristics of materials used in the relevant production processes
- safety and environmental aspects of relevant production processes
- relevant measurement techniques and quality checking procedures
- workplace procedures
- reporting procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • interpret, relevant work instructions, standards and specifications appropriate to own work • check and measure relevant quality parameters • interpret results of quality checks in terms of specifications, patterns and work standards • take required action where standards of materials, component parts, final product or work processes are found to be unacceptable • maintain accurate records.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of

	<p>contingencies, improvement scenarios, and so on)</p> <ul style="list-style-type: none"> • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis
--	---

	<ul style="list-style-type: none"> • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Quality parameters	<p>Quality parameters may include:</p> <ul style="list-style-type: none"> • finish • size • durability • product or process variations • materials • alignment • colour • damage and imperfections • time
Quality checks	<p>Quality checks are against set parameters for the process or product. Examples include:</p> <ul style="list-style-type: none"> • visual inspection • physical measurements • chemical tests • checks against patterns, templates and guides • processing time
Materials	<p>Materials may include:</p> <ul style="list-style-type: none"> • physical raw materials • orders, forms and other documentation • services required for undertaking an operation (e.g. power, water, compressed air and fuel)

Measure	<p>Measure includes:</p> <ul style="list-style-type: none"> those measurements which may be taken by the employee in the workplace/at their work station
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> work instructions standard operating procedures formulas/recipes batch sheets temporary instructions and similar instructions provided for the operation of the plant good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> written, verbal, computer-based or in some other format
Indicators of production performance	<p>Indicators of production performance may include:</p> <ul style="list-style-type: none"> number of items/production rate delays and causes of delays (where known) other information as specified in the procedures
Data entry/recording	<p>Data entry/recording may include:</p> <ul style="list-style-type: none"> keyboard written (including ticks or signs) verbal
Sources of information/ documents	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> quality and Australian standards and procedures work instructions, patterns, designs and recipes organisation work procedures manufacturer instructions for materials and equipment organisational or external personnel customer requirements
Investigate and report	<p>Investigate and report includes:</p> <ul style="list-style-type: none"> following set procedures defined for such investigations <p>Set procedures may include:</p> <ul style="list-style-type: none"> verbal instructions

	<ul style="list-style-type: none"> • documented procedures • other quality procedures as implemented within an organisation or work environment
Workplace context	<p>Workplace context includes:</p> <ul style="list-style-type: none"> • work organisation procedures and practices relating to the manufacture and quality outcomes for products • conditions of service, legislation and industrial agreements, including: <ul style="list-style-type: none"> • workplace agreements and awards • federal or state/territory legislation • standard work practice
Reporting/communication	<p>Reporting/communication may include:</p> <ul style="list-style-type: none"> • verbal and written communication in accordance with organisational policies and procedures • oral, written or visual communication and may include simple data
Being responsible for the maintenance of own work quality	<p>Being responsible for the maintenance of own work quality may include:</p> <ul style="list-style-type: none"> • contributing to the quality improvement of team or section output, where necessary, in accordance with workplace procedures • following safety, environmental, housekeeping and quality procedures as specified by materials/machine/equipment manufacturers, regulatory authorities and the organisation
Applicable regulations and legislation	<p>Applicable regulations and legislation may include:</p> <ul style="list-style-type: none"> • OHS legislation relevant to workplace activities • workers compensation legislation

MSS402060A Use planning software systems in operations

Modification History

New unit, superseding MSACMT260A Use planning software systems in manufacturing -
Not equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to access planning software (often known as Enterprise resource Planning (ERP), Materials Resource Planning (MRP and MRPII), and often by a proprietary name, to make routine business decisions required of the person as a regular part of their job.

Application of the Unit

This unit applies to an individual in an organisation using a planning software system and who must interface with that system. The unit applies to both accessing information from the planning software system and using it as an aid to decision making. This unit requires the application of communication, planning, and problem solving associated with using planning software in own work.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|--|---|
| 1 | Use interface | 1.1 Identify terminals relevant to own work station and functions |
| | | 1.2 Use keyboards, track ball/mouse and monitor and/or other peripherals to access system |
| | | 1.3 Navigate through system and screens to find program menu and data relevant to own work |
| | | 1.4 Identify and input information on own work processes at required frequency and to required detail |
| | | 1.5 Access message section and acknowledge messages |
| | | 1.6 Identify problems and make suggestions for improvements to relevance of planning software to own work |
| | | |
| 2 | Access information | 2.1 Identify work processes that require information from planning software system |
| | | 2.2 Obtain relevant data and information on current operations from the planning software system |
| | | 2.3 Identify the status of items in the value stream |
| | | 2.4 Access historical data and information |
| | | 2.5 Interpret information and identify and prioritise any actions required in response to information |
| | | |
| 3 | Take appropriate actions in accordance with procedures | 3.1 Take actions in response to information obtained from planning software |
| | | 3.2 Follow up as appropriate to ensure anticipated results have occurred |
| | | 3.3 Record adjustments and variations according to procedures |

3.4 Identify any learning needs to use planning software and seek appropriate support

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- reading and interpreting electronic and hard copy operating instructions and documents, including where used:
 - work instructions
 - standard operating procedures
 - formulas/recipes
 - production and batch sheets
 - temporary instructions
 - other provided operating instructions
- working within access control requirements of the planning software system
- identifying modules, screens, files, and so on, of software relevant to own work
- logging in and using terminals and planning software at a level of access appropriate to own work
- accurately inputting data
- searching and retrieving data
- accessing nominated assistance with planning software

Required knowledge

Required knowledge includes:

- technical knowledge needed to operate own work processes
- planning software system and operation, including:
 - terminal locations and types
 - security and access arrangements
 - range of information held in planning software relevant to own work
 - data collection methods for operations in work area
 - assistance arrangements for users of planning software
 - business activities exercised by/through the planning software system
- value created by operations for customers

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify the scope and relevance of planning software system to their own work • enter and retrieve data, including normal performance and variations • use planning software system to assist in own work • contribute suggestions for improvement to performance and relevance of planning software to own work area.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues

	<p>(third-party reports)</p> <ul style="list-style-type: none"> • portfolio of evidence <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz)
--	---

	<ul style="list-style-type: none"> • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Planning software	<p>Planning software includes:</p> <ul style="list-style-type: none"> • software systems which integrate a range of business information, such as finance, logistics maintenance and production (frequently referred to as ERP, MRP, MRPII or a range of proprietary names)
Relevant data and information	<p>Relevant data and information may include:</p> <ul style="list-style-type: none"> • technical and other drawings • standard operating procedures and other work instructions • production schedules including historical data • orders and order tracking information • stock control • contact lists • occupational health and safety (OHS) information
Value stream	<p>The value stream begins with the customer and includes all actions (both value-adding and non-value added) by both internal sections/departments and external organisations to meet a customer requirement.</p> <p>Depending on the operations and the customer requirement, stages where value stream actions may occur include:</p> <ul style="list-style-type: none"> • sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing

	<ul style="list-style-type: none"> • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support
Items in the value stream	<p>Items in the value stream refer to information held within the planning software system that contributes to creating value as determined by the customer. Depending on the organisation it may include:</p> <ul style="list-style-type: none"> • physical elements of the production system, such as sites, work stations, equipment, material, including stock, work in progress and finished products • information needed to meet customer requirements, such as designs, drawings, work instructions, standard operating procedures, standards, material lists and pricing • information not directly related to current customer requirements but required by the organisation
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other format

MSS402061A Use SCADA systems in operations

Modification History

New unit, superseding MSACMT261A Use SCADA systems in manufacturing - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by an individual to interact with a System Control and Data Acquisition (SCADA) system as part of their job.

Application of the Unit

This unit applies to an individual in an organisation using a SCADA system and the individual must interface with that system. The individual will need to access this system as part of their routine and take actions based on the information they obtain from the SCADA system in accordance with procedures.

This unit requires the application of skills associated with using communication tools and technology for management of own work, planning and problem solving.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|---|---|
| 1 | Use operator interface | 1.1 Identify SCADA terminals relevant to own work station and functions |
| | | 1.2 Use keyboards, track ball, monitor and/or stand alone controllers to access/interrogate system |
| | | 1.3 Use correct level of access and find all relevant screens and information |
| | | 1.4 Access message section and acknowledge messages |
| | | 1.5 Input and output information correctly according to program and organisation requirements |
| 2 | Use information | 2.1 Obtain data and information from SCADA, as required, including process, supply and product chain data |
| | | 2.2 Interpret data and information as required by own job |
| | | 2.3 Find and use relevant historical data and information |
| | | 2.4 Use manufacturer manuals or specifications, as required, to expand knowledge of SCADA system relevant to own work |
| | | 2.5 Determine and prioritise required actions |
| 3 | Make required changes in accordance with procedures | 3.1 Adjust production/process in response to SCADA information |
| | | 3.2 Record adjustments and variations to specifications/schedules and report to appropriate personnel |
| | | 3.3 Seek feedback and information on adjustments to further improve procedures, where required |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using SCADA terminals and other input devices
- reading and interpreting electronic and hard copy SCADA operating instructions and documents, including where used:
 - work instructions
 - standard operating procedures
 - temporary instructions
 - other provided operating instructions
- working within security and access control requirements of the SCADA system
- identifying modules, screens, and so on, of SCADA system relevant to own work
- accurately inputting and outputting data
- searching and retrieving data
- accessing SCADA system nominated assistance, when required

Required knowledge

Required knowledge includes:

- technical knowledge needed to operate own work processes
- hierarchy of SCADA system and operation
- information available from and controls exercised by/through the SCADA system

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify the scope and relevance of the SCADA system to their own work • access correct levels of the SCADA system • enter and retrieve data, including normal performance and variations
--	--

	<ul style="list-style-type: none"> • use SCADA system to assist in own work.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented ,or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as SCADA software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>SCADA</p>	<p>SCADA refers to:</p> <ul style="list-style-type: none"> • a number of systems which automatically collect

	<p>critical process data, perform required mathematical manipulations on it and then make control decisions and/or give required information to personnel for action</p> <p>In some industry sectors, the SCADA system is sometimes integrated into other sophisticated computer control systems, such as Distributed Control System (DCS). These sectors may simply refer to their SCADA as the DCS or other similar term (such as the proprietary name of the computer system).</p> <p>SCADA systems may provide information from outside of the process, such as stock/material levels in a customer plant and/or available supply, supply rates and pricing from a supplier plant. This information may all be accessed by the SCADA system and the employee using it in order to make production rate and other control decisions (either automatically or human assisted) about their own operations and work processes</p>
Supply and product chains	<p>The supply chain Includes:</p> <ul style="list-style-type: none"> • all suppliers in the chain from the initial raw material up to the current step in the operations process <p>The product chain includes:</p> <ul style="list-style-type: none"> • all steps after the current step up to the final customer <p>Competitive systems and practices organisations encompass the entire production system, beginning with the customer, and includes:</p> <ul style="list-style-type: none"> • the product sale • outlet • the final assembler • product design • raw material mining and processing • all tiers of the value stream (sometimes called the supply chain) <p>Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive systems and practices can reach its full potential without including the entire 'organisation' in its planning</p>
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures

	<ul style="list-style-type: none">• formulas/recipes• batch sheets• temporary instructions and similar instructions provided for the smooth running of the plant• good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care)• government regulations <p>Procedures may be:</p> <ul style="list-style-type: none">• written, verbal, computer-based or in some other format

MSS402080A Undertake root cause analysis

Modification History

New unit, superseding MSACMT280A Undertake root cause analysis - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to undertake root cause analysis (RCA) by any person. This will often be undertaken by people working in a team. This unit also covers the competencies needed by operators to contribute to an advanced maintenance strategy using RCA coupled with diagrams and charts.

Application of the Unit

This unit applies to individuals working in an organisation which is applying competitive systems and practices strategies. The unit applies to the formal problem solving to root cause that the individual must undertake in their own work area or where the individual contributes to problem solving to root cause as part of a team.

This unit requires an ability to seek and apply information from a variety of sources in order to inform RCAs. Initiative and enterprise is also required to identify quick fix and permanent solutions to problems.

Where training in a wider range of problem solving techniques and tools is required the unit MSAPMSUP390A Use structured problem solving tools should be selected.

Elements and Performance Criteria Pre-Content

Elements describe the Performance criteria describe the performance needed to

essential outcomes of a unit of competency.

demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Recognise problems	1.1	Identify features or occurrences indicative of a problem
		1.2	Use appropriate tools, techniques and charts to define the problem
2	Implement quick fix	2.1	Recommend a quick fix within the scope of competency and authority
		2.2	Use technology or processes relevant to the problem to implement quick fix
3	Determine root cause	3.1	Identify a range of possible causes
		3.2	Gather data and other information to eliminate or confirm possible causes
		3.3	Use available data and information to link causes and effects
		3.4	Seek assistance, as required
		3.5	Identify root cause
4	Develop permanent solution	4.1	Identify a range of methods to eliminate the root cause or break the cause tree
		4.2	Select the most appropriate solution
		4.3	Liaise with relevant people
		4.4	Recommend or implement solution within the limits of competency and authority

- 4.5 Monitor impact of solution and make further recommendations, as required

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- cooperating and working with others on problem solving
- assessing and recording information from a variety of sources
- defining potential problems factually, including:
 - location and extent of problem or incident
 - sequence of events where relevant
 - extent of deviation from normal operation or performance
- analysing potential problems across a range of varied activities and knowledge applications
- reading and constructing simple charts, such as cause and effect diagrams

Required knowledge

Required knowledge includes:

- RCA methodology, including difference between quick fixes and root cause elimination or breaking of causal tree
- principles and normal operation of equipment, plant and processes in own work area sufficient to undertake a RCA and propose solutions
- common variances to normal performance that are indicators of a problem
- use of relevant analysis tools (e.g. cause/effect diagrams, Pareto charts and 5 Whys)
- operations in own work area

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and	A person who demonstrates competency in this unit must
--	--

<p>evidence required to demonstrate competency in this unit</p>	<p>be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • undertake problem identification • use appropriate processes to achieve root cause identification • prioritise solutions • recommend solutions and implementation procedures to problems within own area and range of technical skills and knowledge • evaluate implementation of solutions.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess response to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and</p>

	disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree
--	---

	<p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Features or occurrences indicative of a problem	<p>Examples of features or occurrences indicating problems include:</p> <ul style="list-style-type: none"> • variation to normal plant or equipment operation • unplanned or non-conforming process or operations outcomes • out of specification products • excess scrap • accidents and emergencies • regulatory breaches • customer returns and complaints • reduction or loss of sales
Root cause	<p>There are many possible causes of any problem. The root cause contrasts with other possible causes of a problem which when eliminated have no impact or only ameliorate the problem. Elimination of the root cause permanently eliminates the problem. There should only be one root cause for any problem and so the analysis should continue until this one cause is found.</p>
Cause tree	<p>The series of causes is referred to as the cause tree. Not all root causes are accessible and able to be eliminated. Breaking the cause tree is such a way that the problem cannot recur is an acceptable alternative.</p> <p>Not all situations can wait for the RCA and eventual elimination of the root cause as there may be serious current impacts. The quick fix will control these immediate impacts, but does not eliminate the root cause.</p>
Quick fix	<p>A quick fix is not a short cut or side step for a permanent solution to the root cause. It is a necessary step designed to control the immediate impacts of a problem, for example, to prevent ongoing errors or to ameliorate damage.</p>
Appropriate techniques/charts	<p>Appropriate techniques/charts may include:</p> <ul style="list-style-type: none"> • control charts • Pareto charts

	<ul style="list-style-type: none">• run charts• flow charts• cause and effect diagrams• tree diagrams• 5 Whys analysis

MSS402081A Contribute to the application of a proactive maintenance strategy

Modification History

New unit, superseding MSACMT281A Contribute to the application of a proactive maintenance strategy - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to make a positive contribution to proactive maintenance strategies, including actions that contribute to equipment uptime and overall equipment effectiveness (OEE).

Application of the Unit

This unit applies to an individual in an organisation which is following a predictive, preventative or reliability-centred maintenance strategy and which requires commitment from all employees. The employee should 'own' their equipment/plant and take an active part in the implementation of the strategy within the scope of their authority.

This unit requires the application of skills associated with accessing and maintaining equipment/plant documentation, It also requires problem solving, initiative and enterprise to continually monitor and maintain operational performance of equipment/plant used in work role.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

unit of competency. text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Maintain equipment/plant	1.1	Keep equipment/plant within area of responsibility clean
		1.2	Ensure equipment/plant is serviced and adjusted, as required, in accordance with procedures and own level of responsibility
		1.3	Access manufacturer manuals and specifications, where required, to expand knowledge on the maintenance of equipment/plant
		1.4	Access and update documentation on equipment/plant operation and maintenance as appropriate to workplace procedures
2	Monitor operation of equipment/plant	2.1	Regularly check key conditions of the equipment/plant as defined in workplace procedures
		2.2	Regularly check equipment/plant OEE
		2.3	Note any deviation from conditions specified in procedures
		2.4	Identify any previous occurrences of this deviation
3	Identify deviations and patterns	3.1	Identify any previous occurrences of a deviation
		3.2	Identify any related deviations which have occurred
		3.3	Identify any unusual occurrence which may be related to a deviation
4	Take action appropriate to	4.1	Liaise with relevant people regarding the deviation and the solution

competency and authority on deviation	4.2	Implement solution and/or assist with the implementation of the solution, as appropriate
---------------------------------------	-----	--

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- reading and interpreting electronic and hard copy plant, equipment, and process instructions and documents, including where used:
 - work instructions
 - standard operating procedures
 - workshop manuals and instructions from equipment manufacturers in regards to plant or equipment operation, regular maintenance, troubleshooting, and record of use or production
 - production and batch sheets
 - temporary instructions
 - other provided operating instructions
- examining equipment procedures, products and processes for possible causes of deviations from patterns of normal use
- interpreting OEE rates
- servicing and maintaining plant and equipment consistent with area of responsibility and own technical skills

Required knowledge

Required knowledge includes:

- normal behaviour of the equipment/plant
- indicators of abnormal performance
- principles of operation of plant and equipment sufficient to recognise problems and propose solutions
- appropriate cleaning and adjusting for the equipment/plant/area as required by procedures
- concept of OEE as: $availability \times performance \times quality\ rate$

where:

- availability takes into account losses due to breakdown, set up and adjustments
- performance takes into account losses due to minor stoppages, reduced speed and idling

- quality rate takes into account losses due to rejects, re-works and start-up waste

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • recognise deviations from normal performance patterns and deal with them appropriately • undertake operational service and maintenance on plant and equipment according to instructions.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports)

	<ul style="list-style-type: none"> • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams

MSS403001A Implement competitive systems and practices

Modification History

New unit, superseding MSACMS400A Implement a competitive manufacturing system - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to implement and review competitive systems and practices in a person's own work within a team or work area, including the consideration of the impact on the work of others. The unit focuses on the holistic application of competitive systems and practices to achieve improved performance in own work and in activities with others in the team or work area that contribute to improving customer benefit.

Application of the Unit

This unit applies to individuals who are applying competitive systems and practices to their own work in a way that integrates with others in the team or work area who are also implementing competitive systems and practices. Depending on the operations or processes in the team or work area the unit may also include interaction with other teams and work areas.

The unit is suitable for individuals who have formal responsibility for the work of others, such as team leaders. It is also suitable for individuals, such as technicians and tradespeople, who must integrate the application of their technical skills with the implementation of competitive systems and practices in an organisation.

The unit applies to the areas of cost, quality, delivery, safety/environment, and employee capability including continuous reviewing of performance against these five areas in liaison with other relevant people. Improvement initiatives in these five areas are usually developed and implemented with the support of technical support staff. Whereas other units may emphasise the competence to use one or more competitive practices, this unit emphasises the ability to advance on all five key areas over a moderate time period.

This unit requires the application of skills associated with problem solving and initiative and enterprise in order to identify opportunities to make improvements and maximise performance. Communication, the ability to work in a team and planning and organising skills are required to implement improvements and address any conflicts that arise. This unit also requires an ability to identify appropriate technology, and to consider and integrate feedback on how personal performance can be improved.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Contribute to the improvement of the operations system in team or work area	1.1	Identify key performance indicators for area of operations
		1.2	Implement and review competitive systems and practices to improve health, safety and environment (HSE) performance of self and others
		1.3	Implement and review competitive systems and practices to maximise quality consistency
		1.4	Implement and review competitive systems and practices and identify any skill and training issues that need to be addressed to improve capability of self and others
		1.5	Implement and review competitive systems and practices to maximise customer benefit/cost ratio
		1.6	Implement and review competitive systems and practices to reduce lead time to delivery within the scope of authority and responsibility
		1.7	Work with relevant stakeholders to resolve conflicts

		which arise from implementation of competitive systems and practices
	1.8	Select improvements which will deliver the greatest overall benefit for the resources required/available without reducing current performance on individual factors
2	Implement improvements	
	2.1	Implement the chosen improvement/s
	2.2	Check the selected improvements improve the system as a whole and do not result in unintended consequences
	2.3	Monitor implementation and make adjustments, as required

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others to clarify scope of implementation of competitive systems and practices, including:
 - value stream mapping
 - 5S
 - Just in Time (JIT)
 - mistake proofing
 - process mapping
 - establishing customer pull
 - kaizen and kaizen blitz
 - setting of key performance indicators/metrics
 - identification and elimination of waste (muda)
- monitoring performance in key areas, including:
 - HSE performance
 - quality consistency
 - capability and performance by team members
 - customer benefit/cost ratio
 - reduce lead time to delivery

- contributing suggestions for improvement
- analysing operational procedures in terms of flow and contribution to customer outcomes
- planning tasks to support competitive systems and practices implementation
- identifying and implementing appropriate data gathering and analysis techniques within area of responsibility to identify change over time in indicators relating to:
 - cost
 - quality
 - delivery
 - safety/environment
 - employee capability and support for competitive systems and practices
- solving problems to root causes

Required knowledge

Required knowledge includes:

- customers and the value they derive from products and processes of the organisation or area
- cost components and their relationship to customer benefits/features
- suppliers and their capabilities
- waste (muda)
- factors causing variability in a product and how to control them
- factors that promote standardisation
- relevant competitive systems and practices tools for area and how to apply them
- factors impacting on the product, process and waste, particularly those wholly or partially under own and other immediate area employees control (and how to control them)
- good HSE practice and factors impacting on HSE performance
- own capability and how to improve it
- optimisation techniques appropriate to the organisation and the job
- application of quality standards and processes

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • identify key performance indicators appropriate to their own work area

MSS403002A Ensure process improvements are sustained

Modification History

New unit, superseding MSACMS401A Ensure process improvements are sustained - Not equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to ensure that the gains which have been made by using improved methods, processes and equipment are sustained as the new baseline/standard for an area of work and so prevent regression to former practices, or digression to less efficient practices.

Application of the Unit

This unit applies to individuals working in a team or work area who have already implemented competitive systems and practices related improvements in their own work and who must work effectively with others implementing competitive systems and practices to ensure that performance improvement gains are sustained.

The unit is also suitable for individuals who have formal or informal responsibility for the work of others, such as team leaders; individuals, such as senior operators, who must mentor others; or individuals, such as technicians and tradespeople, who must integrate the application of their technical skills with the implementation of competitive systems and practices in an organisation.

The unit can be applied to all areas of an organisation, including production, maintenance, logistics and office functions.

The unit covers the implementation of practices to ensure that process improvements are sustained and opportunities taken to suggest further improvements. If mistake proofing is used as one of the methods for ensuring that process improvements are sustained, the unit MSS403051A Mistake proof a production process should be selected.

Improvement initiatives can be made by any of any number of methods and by teams or individuals. The unit assumes that desired levels of performance or quality are known.

This unit requires the application of skills associated with problem solving, initiative and enterprise, and planning and organising in order to check and monitor the impacts of change. It also requires communication and the ability to work with others to assess the impact of change in own work and on other's work, as well as self-management and learning to adapt improvements according to new information and feedback.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Examine previous improvements	1.1	Identify impact of previous process improvements to systems, equipment, operations or products in work area
		1.2	Identify improvements that have not met objectives
2	Ensure corrective actions are implemented	2.1	Identify corrective actions that can be taken on process improvements that have not met objectives
		2.2	Liaise with relevant people associated with the anticipated corrective action
		2.3	Obtain any required approvals
		2.4	Ensure the supply of resources
		2.5	Check impacts of corrective action on occupational health and safety (OHS), quality and environmental systems in work area and take action in accordance with procedures, if required

- | | | | |
|---|------------------------------------|-----|---|
| | | 2.6 | Check that self and others in team or work area have required skills for corrective actions |
| | | 2.7 | Monitor implementation of corrective action |
| | | 2.8 | Make required adjustments |
| 3 | Verify systems support improvement | 3.1 | Ensure procedures reflect improvements |
| | | 3.2 | Check that training and assessment activities in team or work area reflect improvements |
| | | 3.3 | Liaise with relevant people to ensure their support of the new or modified system/s |
| 4 | Audit the change | 4.1 | Determine an appropriate audit period/cycle |
| | | 4.2 | Agree relevant measures/indicators for the improvement |
| | | 4.3 | Measure performance at agreed times using agreed measures |
| | | 4.4 | Investigate causes of under-performance |
| | | 4.5 | Take appropriate corrective action to improve performance |
| | | 4.6 | Re-audit the improvement on an agreed basis |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others to clarify scope and stage of implementation of competitive systems and practices and contribute suggestions for further improvements in implementation
- examining normal operational procedures in terms of flow and contribution to customer benefit
- planning own tasks, including the impact on others to support competitive systems and

practices implementation

- implementing competitive systems and practices in own work area according to instructions
- identifying waste (muda)
- monitoring competitive systems and practices performance indicators for own work and work area

Required knowledge

Required knowledge includes:

- overall procedures for and process of operations relative to improvements being made
- appropriate measures of performance
- business performance goals sufficient to determine best measures of improved performance

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify process and operational changes as a result of implementation of competitive systems and practices • identify and assess impact of performance improvements in a work area against objectives • identify actions and resources required for further improvements • communicate and negotiate with others on improvements • apply procedures for seeking approvals and reporting non-conformances • determine appropriate period and procedures for monitoring implemented changes.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned,

	<p>currently being implemented, or implemented changes to work processes and procedures relevant to the assessee</p> <ul style="list-style-type: none"> • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using some combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of

the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Improvement	<p>Improvement may be any change aimed at reducing waste (muda). This unit is not about making the improvements, but ensuring beneficial changes remain in place</p>
Customers	<p>Customers may include:</p> <ul style="list-style-type: none"> • internal or external customers, including final

	<p>customers, as these should be used as the basis for the identification of value and waste</p> <p>The individual does not need to interface directly with the external customer, but should be able to sufficiently identify customer benefit and customer features in processes and operations of their team and their work area</p>
Suppliers	<p>Suppliers may be:</p> <ul style="list-style-type: none"> • internal or external suppliers and should be sufficiently close to the individual's work as to be easily identifiable <p>The operator does not need to interface directly with external suppliers, but should be provided with sufficient information to enable them to identify supplier contribution to their own work and to customer benefit</p>
Systems	<p>Systems are used to mean any/all of the equipment, processes, procedures and work practices that are used to produce the product. A term often used in this context includes:</p> <ul style="list-style-type: none"> • kaizen - the philosophy of continual improvement that every process can and should be continually evaluated and improved in terms of time required, resources used, resultant quality and other aspects relevant to the process
Resources	<p>Resources for corrective actions may include:</p> <ul style="list-style-type: none"> • equipment • modifications • consumables • people • suitable work area
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the organisation • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) and government regulations

	<p>Procedures may be:</p> <ul style="list-style-type: none"> written, verbal, computer-based or in some other format
Improvements	<p>Improvements include:</p> <ul style="list-style-type: none"> techniques for preventing mistakes by designing the operations process, equipment and tools so that an operation literally cannot be performed incorrectly (e.g. baka-yoke) techniques that generate warning signals were a mistake is about to be performed (poka-yoke) <p>Improvements may be sustained by:</p> <ul style="list-style-type: none"> use of technology so that it is impossible to do the job any other way changes to process or procedures or other changes to the operations system which, if followed, will sustain the change and this unit may be applied to all these situations
Measuring performance	<p>Measuring improvements may include:</p> <ul style="list-style-type: none"> personally taking measurements arranging for measurements to be taken/made by appropriate personnel

MSS403005A Facilitate use of a Balanced Scorecard for performance improvement

Modification History

New unit, superseding MSACMS405A Lead a manufacturing team using a balanced score card approach - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to encourage and facilitate others in using a Balanced Scorecard approach to assist in performance improvement.

Application of the Unit

This unit applies in organisations using a Balanced Scorecard approach to performance improvement. In these organisations the unit applies to individuals in a team or workgroup who facilitate the use of the Balanced Scorecard through leading, assisting and/or motivating others in using the Balance Scorecard approach.

This unit requires the application of skills associated with communication, teamwork, problem solving, initiative, enterprise, and planning and organising in order to provide leadership in the interpretation, review and strategic response to Balanced Scorecard results. This unit has a strong emphasis on identifying and reviewing required performance measures and requires an ability to use new information to improve performance.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance criteria describe the performance needed to

essential outcomes of a unit of competency. demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|---|---|
| 1 | Interpret Balanced Scorecard results | <ul style="list-style-type: none"> 1.1 Identify patterns of performance shown on strategy map 1.2 Identify actions indicated by Balanced Scorecard results 1.3 Discuss results with fellow employees and other relevant stakeholders 1.4 Facilitate the selection of required actions with employees and other stakeholders 1.5 Facilitate the development of implementation plans for team or individuals 1.6 Facilitate the implementation of required actions from developed plans 1.7 Follow up on implementation to ensure it occurs as planned |
| 2 | Review key performance indicators (KPIs) in the Balanced Scorecard for the organisation and work area | <ul style="list-style-type: none"> 2.1 Relate area and other KPIs to strategy map/strategic objective 2.2 Review the actions required by self and others to meet each KPI 2.3 Compare current actions to the optimal actions to achieve strategy 2.4 Discuss with employees and other stakeholders any modifications to KPIs which will better meet strategy 2.5 Recommend amendments to KPIs to relevant personnel |
| 3 | Review reporting systems for | <ul style="list-style-type: none"> 3.1 Review reporting systems to ensure information needed by self, other employees in area and organisation is |

Balanced Scorecard information	available
	3.2 Review the mix of operational and strategic information to ensure it is appropriate for work area
	3.3 Review information provided for relevance and currency, and that it is meaningful and not excessive
	3.4 Recommend improvements to reports and reporting system, as appropriate
4 Lead improvement to work area total performance	4.1 Compare actual performance of teams, work areas or individuals with desired total performance using KPIs and other Balanced Scorecard information
	4.2 Discuss with team ways of improving total performance
	4.3 Lead processes for improvement in total performance

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying KPIs and their application to own work and the work of other employees
- analysing Balanced Scorecard results and determining implications for a work area
- solving problems associated with use or interpretation of Balanced Scorecard
- planning strategies for use of Balanced Scorecard, including:
 - required communication with others
 - negotiations if any required with internal and external suppliers, customers and delegates
 - analysis of any skill gaps in self and others
 - required training
 - data collection
 - work organisation and procedure changes
 - risk identification and contingency measures
- communicating effectively in informal and formal meetings, and with personnel at all levels
- providing effective feedback

Required knowledge

Required knowledge includes:

- components of the Balanced Scorecard, including perspectives, feedback loops, targets and metrics, and reporting systems
- responsibilities of self and others in a Balanced Scorecard strategy
- health, safety and environment (HSE) principles and requirements for area of responsibility
- change implementation contacts and procedures relevant to work area
- employee assistance mechanisms in the organisation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • interpret Balanced Scorecard results • review KPIs in the Balanced Scorecard • review related reporting systems • lead improvement to team performance.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case study and scenarios to assess responses to contingencies
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a</p>

	<p>combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems
---	--

	<ul style="list-style-type: none"> • statistical process control systems ,including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Team</p>	<p>Team includes:</p> <ul style="list-style-type: none"> • all individuals in the target work area who are involved in the implementation and use of the Balanced Scorecard <p>The team may or may not be a formally designated team working to a team leader</p>
<p>Balanced Scorecard</p>	<p>The Balanced Scorecard refers to:</p> <ul style="list-style-type: none"> • an approach to competitive systems and practices that sets out an organisations vision and strategy by establishing and measuring enterprise activity in a number of different perspectives in addition to the normal financial perspective <p>Perspective areas include:</p> <ul style="list-style-type: none"> • customer • environmental • internal business process • learning and growth

	For each perspective area the Balanced Scorecard emphasises establishing and measuring performance (metrics)
KPIs	<p>KPIs may include:</p> <ul style="list-style-type: none"> • financial and non-financial performance measures against targets within the Balanced Scorecard • other performance indicators not contained with the Balanced Scorecard for the team but relevant for informing the teams activities (e.g. performance indicators for other areas or sections, suppliers or customers)
Actions indicated	<p>Actions indicated may include:</p> <ul style="list-style-type: none"> • corrective action for poor results • confirming action for acceptable results • taking steps to ensure actions for good results are consistently maintained • changes to performance indicators or performance measurement

MSS403010A Facilitate change in an organisation implementing competitive systems and practices

Modification History

New unit superseding MSACMC410A Lead change in a manufacturing environment - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by individuals responsible for facilitating change processes in an organisation implementing competitive operational practices.

Application of the Unit

This unit applies to people who facilitate the change process resulting from implementing one or more competitive systems or practices. This implementation may also be associated with other changes, such as the introduction of new products, processes or equipment. The unit will usually apply to people whose responsibility is at the team, area or section level rather than the whole organisation. The responsibility may be formally designated or be informal, as in mentoring and assisting fellow employees.

This unit assumes that consultation and agreement on the implementation of the competitive systems and practices and other associated changes has already occurred and the nature and extent of the change has been agreed.

This unit does not cover the negotiation of change in a formal industrial relations sense but does cover the skills needed to identify real or potential change implementation issues, including those that may need to be referred to formal consultation and/or dispute settlement procedures.

This unit has a strong emphasis on planning, encouraging and facilitating in a changing environment within the organisation, including using appropriate communication, teamwork, problem solving, initiative and self-management.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|--|-----|--|
| 1 | Define nature and impact of change for designated area and processes | 1.1 | Identify the organisation's aims and objectives for the competitive systems and practices techniques related to the change process |
| | | 1.2 | Identify opportunities for implementation of change within work area |
| | | 1.3 | Determine impacts of change for work area, including potential benefits and impacts on own work and work of fellow employees |
| 2 | Identify key performance indicators (KPIs) | 2.1 | Liaise, where required, with managers, engineers and other staff responsible for designing and/or implementing change |
| | | 2.2 | Identify KPIs for own work responsibility and that of the work area |
| | | 2.3 | Communicate KPIs to fellow employees |
| | | 2.4 | Check that data collection and processing are appropriate for KPIs |
| | | 2.5 | Raise and resolve issues related to KPIs with relevant personnel |

- | | | | |
|---|---|-----|---|
| 3 | Liaise with key stakeholders | 3.1 | Identify key stakeholders impacted by the change |
| | | 3.2 | Communicate with key stakeholders within scope of authority |
| | | 3.3 | Identify and address issues and concerns of each stakeholder if within scope of authority |
| | | 3.4 | Develop and/or locate information required to address key concerns |
| | | 3.5 | Refer issues and concerns outside of scope of authority to appropriate personnel |
| 4 | Develop a strategy to help implement change | 4.1 | Identify or develop a work plan for implementing change |
| | | 4.2 | Make information required to support change available to team members |
| | | 4.3 | Communicate/circulate draft work plan to other employees in work area, supervisors, technical experts and other appropriate personnel for comment |
| | | 4.4 | Assess suggested changes and incorporate into work plan, where appropriate |
| 5 | Implement change | 5.1 | Obtain authorisation to commence change implementation in accordance with organisation procedures |
| | | 5.2 | Implement change in accordance with work plan and organisational occupational health and safety (OHS) and consultation procedures |
| 6 | Monitor implementation of change | 6.1 | Maintain open communication channels with all stakeholders during implementation |
| | | 6.2 | Monitor KPIs during implementation |
| | | 6.3 | Encourage and facilitate improvement suggestions of team members |
| | | 6.4 | Identify areas requiring improvement in change |

implementation

- 6.5 Make improvements to implementation according to organisation procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying the competitive operational practices being implemented in the organisation, including:
 - Just in Time (JIT) and kanban systems
 - preventative maintenance
 - 5S housekeeping
 - continuous improvement processes (e.g. kaizen)
 - waste (muda) elimination
 - formal problem solving procedures (e.g. root cause analysis (RCA))
- identifying other products, processes or equipment changes being implemented within area of responsibility
- identifying the work and culture changes required for effective implementation of the competitive systems and practices being implemented and other products, processes or equipment changes
- identifying organisation KPIs and contextualise for area of responsibility to determine successful change implementation
- planning strategies for change implementation, including:
 - required communication with others
 - negotiations if any required with internal and external suppliers, customers and delegates
 - analysis of any skill gaps in self and others
 - required training
 - data collection
 - work organisation and procedure changes
 - risk identification and contingency measures
- monitoring performance against KPIs and taking appropriate corrective action in the event of a non-conformance
- identifying and communicating with sources of assistance if difficulty is experienced with changes

Required knowledge

Required knowledge includes:

- features of common competitive operational practices, including:
 - JIT and kanban systems
 - preventative maintenance
 - 5S housekeeping
 - continuous improvement processes (e.g. kaizen)
 - waste (muda) elimination
 - formal problem solving procedures (e.g. RCA)
- health, safety and environment (HSE) principles and requirements for area of responsibility
- change implementation contacts and procedures relevant to work area
- employee assistance mechanisms in the organisation
- processes to develop work plans, including consideration of timetable, KPIs, training needs, OHS implications, contingency plans and responsibilities (the work plan must be capable of being coherently communicated to others)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: <ul style="list-style-type: none">• identify the competitive systems and practices used in their own work• identify changes to their own work flowing from the implementation of the relevant competitive systems and practices• implement changes• know when and how to seek assistance with work changes• make suggestions for improvements.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: <ul style="list-style-type: none">• workplace procedures and plans relevant to work area• specifications and documentation relating to planned,

	<p>currently being implemented, or implemented changes to work processes and procedures relevant to the assessee</p> <ul style="list-style-type: none"> • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using some combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of

the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Team</p>	<p>Team may include:</p> <ul style="list-style-type: none"> • work teams from all sections of an organisation, including production or other operational areas, maintenance, technical, administration/finance, and sales/marketing
<p>Change</p>	<p>The philosophy of continual improvement is that every</p>

	<p>process can and should be continually evaluated and improved in terms of time required, resources used, resultant quality, and other aspects relevant to the process.</p> <p>Superimposed on this is the concept of breakthrough change when a large change/improvement is made which can shift the direction or operation of the organisation. Once such breakthrough change is the introduction of competitive operational practices.</p>
Work plan for change	<p>The work plan for change covers the designated work area and may include, depending on the organisation and work area processes:</p> <ul style="list-style-type: none"> • timetable • KPIs • training needs • OHS implications • contingency plans • responsibilities with team members and senior managers, engineers and other staff responsible for designing and/or implementing change
Issues and concerns	<p>Issues and concerns may be communicated formally and informally and may include:</p> <ul style="list-style-type: none"> • individual and group concerns • those expressed by and through industrial processes
Gathering and monitoring performance data	<p>Performance data may be gathered and monitored:</p> <ul style="list-style-type: none"> • manually by individual employees through charts, tally sheets or keypad/board entry • automatically through software, such as SCADA software, ERP systems, MRP and proprietary systems

MSS403021A Facilitate a Just in Time system

Modification History

New unit, superseding MSACMT421A Facilitate a Just in Time (JIT) system - Equivalent

Unit Descriptor

This unit of competency covers skills and knowledge required to facilitate the implementation/operation of a Just in Time (JIT)/kanban system in a team or work area.

Application of the Unit

This unit applies to a person who needs to monitor the operation of a JIT system and facilitate its working in a team or work area. This will involve liaison with stakeholders as well as examining the data generated. They will need to be alert to potential problems and areas for improvement.

This unit requires the application of skills associated with gathering, analysing and communicating information to facilitate implementation of the JIT system. It requires planning and organising skills and has a strong emphasis on communication and teamwork skills to ensure the JIT system is being effectively implemented. This unit also requires the ability to problem solve and take the initiative to consider performance issues and learn from experience to improve future performance.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills

unit of competency. and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Monitor the operation of the JIT system	1.1 Track value of key measures
		1.2 Recognise indicators of poor performance
		1.3 Take appropriate quick fix action
2	Liaise with relevant stakeholders	2.1 Regularly communicate with team or work group members regarding the operation of the JIT system
		2.2 Review JIT key performance indicators (KPIs) with team or work group members
		2.3 Communicate with relevant personnel up and down the value stream regarding the operation of the JIT system
		2.4 Identify issues with stakeholders and take appropriate quick fix action
3	Improve the JIT system	3.1 Identify areas requiring improvement in the JIT system
		3.2 Identify root cause of JIT-related problems
		3.3 Review value of key measures
		3.4 Recognise skill gaps in team members and other stakeholders
		3.5 Determine any other issues in team or work group, other stakeholders and JIT system leading to poor performance indicators
		3.6 Develop appropriate improvement solutions
		3.7 Liaise with relevant people regarding improvement solutions

3.8 Implement and/or assist with the implementation of the solutions

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying KPIs for JIT system in team or area of responsibility
- analysing the JIT/kanban implementation in the team or area and the relevant sections of the internal and external value stream, including identifying people-related needs and issues
- identifying and implementing quick fix to JIT problems
- using formal problem solving procedures (e.g. root cause analysis (RCA))
- developing formal and informal communication procedures with others in work area, team leaders, other employees and value stream members relevant to JIT implementation
- establishing sources of assistance in the organisation for people experiencing difficulty with competitive systems and practices changes
- interpreting procedures and instructions relevant to own expertise for others
- establishing KPIs for own work

Required knowledge

Required knowledge includes:

- JIT principles relevant to operations and processes in own area or team and in the organisation generally
- procedures for making/recommending improvements
- typical reasons for delays/storages/inventories in the team or area of responsibility and methods of reducing/eliminating them
- skill gap analysis and methods of filling skill gaps
- principles of the operations process relevant to the section/team
- production data generated by the process and its application to JIT

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Evidence should be available of the person's facilitation of the operation of the JIT system and their making of recommendations for/making improvements.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify the JIT system and practices used in their team or area of responsibility • identify and monitor JIT key measures • solve JIT-related problems to root cause • implement and monitor JIT-related changes to operations and practices.
Context of and specific resources for assessment	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p>

	Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving
--	---

	<ul style="list-style-type: none"> • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
JIT	<p>JIT refers to:</p> <ul style="list-style-type: none"> • a production scheduling concept that calls for any item needed at a production operation (whether raw material, finished item, or anything in between) to be produced and available precisely when needed, neither a moment earlier nor a moment later
Kanban	<p>Kanban is a card or sheet used to authorise production or movement of an item; when fully implemented, kanban operates according to the following rules:</p> <ul style="list-style-type: none"> • all production and movement of parts and material take place only as required by a downstream operation (i.e. all operations and procurement are ultimately driven by the requirements of final assembly or the equivalent) • the specific tool which authorises production or movement is called a kanban. The word literally means card or sign, but it can legitimately refer to a container or other authorising device. Kanban have various formats and content as appropriate for their usage (e.g. a kanban for a vendor is different than a kanban for an internal machining operation) <p>Kanban is typically applied to batch type operation and the production is measured in units produced. In continuous processing organisations, production is measured in terms of production rate (e.g. kg/h, tonne/day) and rate is increased/decreased according to the flow authorisation which may be a kanban (e.g. ticket, order from a supplier) or may be a SCADA signal from a remote facility (e.g. customer tank) saying that resupply is required or similar</p>
SCADA	<p>SCADA refers to:</p> <ul style="list-style-type: none"> • a number of systems which automatically collect critical process data, perform required mathematical

	manipulations on it and then make control decisions and/or give required information to personnel for action
Key measures	<p>Key measures may include:</p> <ul style="list-style-type: none"> • inventory levels • lead time • In Full, On Time and In Specification (IFOTIS) delivery • productivity/production rate • other measures of pull through the value stream • quality
Quick fix	<p>Quick fix refers to:</p> <ul style="list-style-type: none"> • action taken to immediately and cheaply control a problem, prevent it getting worse and/or ameliorate its impact, but which does not necessarily solve it long term
Pull system	<p>Pull refers to:</p> <ul style="list-style-type: none"> • a system of making to demand rather than for stock or to a forecast
Value stream	<p>The value stream begins with the customer and includes all actions (both value-adding and non-value added) by both internal sections/departments and external organisations to meet a customer requirement.</p> <p>Depending on the operations and the customer requirement, stages where value stream actions may occur include:</p> <ul style="list-style-type: none"> • sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support

MSS403030A Improve cost factors in work practices

Modification History

New unit, superseding MSACMT430A Improve cost factors in work practices - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to evaluate the product or process outcomes of a team in terms of their cost components and to be able to determine, in general terms, the cost impacts of alternative actions.

Application of the Unit

This unit applies to a person who is required to assess the relative costs of alternatives and use this as one of the key factors in decision making. Typical decisions include the efficient organisation of own work and that of others in a work area or within a team and the improvement of throughput and cycle times.

Decisions are made within the scope of the authority of the individual and other employees in the area or team and according to procedures.

This unit primarily requires the application of skills associated with communication and information gathering, teamwork and problem solving to analyse the cost components of work processes. Initiative and enterprise, and planning and organising are also required to identify opportunities for improved cost-efficiency. This unit also requires a degree of self-management and learning to effectively operate and maintain skills and performance.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|---|-----|---|
| 1 | Analyse cost components of work area or team function | 1.1 | Identify cost components in the product or process |
| | | 1.2 | Identify costs factors under control of area or employees in the team |
| | | 1.3 | Identify causes of variability in costs |
| | | 1.4 | Analyse impact of costs on production or process activities undertaken |
| 2 | Improve cost-efficiency of processes and procedures | 2.1 | Identify methods of improving productivity and/or reducing costs within area or team's responsibility |
| | | 2.2 | Determine cost/benefit ratio of alternative methods of improving productivity and/or reducing costs |
| | | 2.3 | Consult with all relevant stakeholders regarding possible changes |
| | | 2.4 | Recommend changes which will increase productivity and reduce cost and variability |
| | | 2.5 | Implement recommended changes in consultation with relevant stakeholders |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying fixed and variable costs in products or processes
- analysing costs and determining those that can be controlled by the individuals in an area or team
- analysing costs over time and identifying variability in cost components
- determining cost/benefit ratios
- communicating and negotiating with others on changes using a variety of mediums

Required knowledge

Required knowledge includes:

- cost components of products made
- costs concepts, such as expense, income and cost/benefit
- major cost contributors to product (e.g. energy, materials, labour and distribution, and so on) depending on the product and process)
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify the scope of their own work and the team or area work and relate it to the overall flow of work in the organisation • express cost factors in specific terms (e.g. cost per item, process and task) • identify and express cost factors in basic financial terms • analyse variability in costs and recommend improvements • use cost/benefit to select preferred improvement strategies.
<p>Context of and specific resources</p>	<p>Assessment of performance must be undertaken in a</p>

<p>for assessment</p>	<p>workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace project(• suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices, • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Cost components</p>	<p>Cost components may include:</p>

	<ul style="list-style-type: none"> fixed and variable costs, such as power/energy, materials, plant and equipment, salary and wages, and office expenses (e.g. telephone) government taxes and charges
Variability in costs	<p>Variability in costs should be assessed over a suitable time. The time should be sufficient to identify:</p> <ul style="list-style-type: none"> fluctuations in variable costs related to different volumes of sales, production or operations abnormal cost fluctuations due to poor design of product or process, poor scheduling, faults, breakdowns and other waste
Process	<p>Process includes all functions that go to meet customer requirements as well as other required functions (e.g. regulatory related functions). Examples include:</p> <ul style="list-style-type: none"> design production maintenance logistics office processes
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> work instructions standard operating procedures drawings and specifications manuals formulas/recipes batch sheets temporary instructions and similar instructions provided for the smooth running of the organisation good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> written, verbal, computer based or in some other format
Benefits	<p>Benefits should include:</p> <ul style="list-style-type: none"> positive benefits as well as negative benefits, such as quality, safety, reliability and similar issues which may be impacted by a cost saving

MSS403032A Analyse manual handling processes

Modification History

New unit, superseding MSACMT432A Analyse manual handling processes - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to analyse manual handling in terms of its efficiency and safety.

Application of the Unit

This unit applies to an individual who is required to examine the manual handling component of a job and improve it in terms of safety, effort required and efficiency. This may be conducted for a job performed by others or it may be for the person's own job.

This unit primarily requires the application of skills associated with problem solving, initiative and enterprise to identify safe and efficient manual handling, and planning and organising to ensure processes are implemented. This unit also requires communication with, and involvement of, others to ensure they understand the approach and to facilitate training.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess manual handling risks	1.1	Identify manual handling hazards in work area
		1.2	Assess risks arising from manual handling hazards
2	Analyse physical effort requirements of job	2.1	Determine basic manual handling requirements of job
		2.2	Analyse requirements in terms of components, such as lift, move, place and hold
		2.3	Analyse items to be handled in terms such as weight, size, shape or other hazards
3	Determine time/effort components of physical effort	3.1	Break required movement pattern down into movement components
		3.2	Determine time and effort requirements for movements
		3.3	Develop alternative movement patterns
		3.4	Determine time and effort requirements for alternative movements
		3.5	Determine handling aids required to assist movement
		3.6	Determine preferred movement pattern
4	Analyse the ergonomics of physical effort	4.1	Analyse the ergonomics of the preferred movement pattern
		4.2	Develop substitute movements for any movement which is not ergonomically sound
		4.3	Determine handling aids required to improve ergonomics of required movements
5	Optimise	5.1	Select movement patterns which are ergonomically

application of physical effort		sound and time and effort efficient
	5.2	Ensure all relevant people are trained to use these methods
	5.3	Ensure procedures and practices reflect the optimum methods
	5.4	Communicate with team members and involve them in development of alternatives to ensure awareness and facilitate learning

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others about work processes and jobs
- identifying ergonomically sound and unsound movements both at a general level and related to individual capability
- analysing manual handling processes
- working cooperatively with others
- demonstrating or arranging to have demonstrated ergonomically correct movements
- applying basic mathematics
- solving problems

Required knowledge

Required knowledge includes:

- relevant occupational health and safety (OHS) Acts and regulations as applied to manual handling
- principles of job and work method design as applied to efficient and safe movement
- principles of work analysis
- principles of ergonomics/safe movement
- aids that can assist with or substitute for manual handling

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • analyse manual handling requirements and risks in jobs • distinguish between ergonomically sound and unsound movement • analyse manual handling movements and risks for an individual • relate manual handling requirements to job efficiency.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using some combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence.

	<p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE)
--	---

	<ul style="list-style-type: none"> • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and Responsible Care) • government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other format
Manual handling hazards	<p>Manual handling hazards may include:</p> <ul style="list-style-type: none"> • loads that pose a risk of injury • ergonomically unsound movements • hazard requirements as defined by relevant OHS Acts and regulations, industry standards and best practice
Ergonomically unsound movements	<p>Ergonomically unsound movements may include:</p> <ul style="list-style-type: none"> • awkward and repetitive movements • carrying, pushing, pulling or lifting of heavy loads • carrying or movement against hard, sharp, slippery or other difficult to grasp loads <p>Ergonomically unsound movements should be assessed against the capabilities of individual workers as what is a sound movement for one worker may be unsound for</p>

	others depending on physique and individual condition
Ergonomically sound movements	<p>Ergonomically sound movements are movements which decrease the risk of injury. Sound movements will vary according to the load and individual. Examples include:</p> <ul style="list-style-type: none">• keeping loads close to the body and near the person's centre of gravity• using diagonal foot positions for lifting• moving loads at waist height rather than directly from the floor

MSS403040A Facilitate and improve implementation of 5S

Modification History

New unit, superseding MSACMT440A Lead 5S in a manufacturing environment - Not equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to facilitate the implementation and improvement of the 5S by self and others in a team or work area.

Application of the Unit

This unit applies to individuals who facilitate 5S in a team or work area, including implementation, monitoring and improvement. The facilitation may be undertaken by formally designated supervisory staff, such as team leaders or other individuals in a competitive systems and practices implementation role, who need to provide support and encouragement to others to facilitate the achievement of 5S outcomes in the workplace.

This unit requires the application of skills associated with communication, teamwork, problem solving, initiative and enterprise, planning and organising, and self-management in order to provide leadership in a 5S environment. This unit has a strong emphasis on planning and change management, but also requires an ability to learn from experience and feed new information back into strategies to improve performance.

For planning, implementing and leading the application of 5S in an office environment see unit *MSS403039A Facilitate and improve 5S in an office*.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|-------------------------------------|--|
| 1 | Facilitate the set-up of 5S | <ul style="list-style-type: none"> 1.1 Assist others to determine what are necessary and unnecessary items in the work area 1.2 Assist others to determine optimum assigned location for all necessary items 1.3 Liaise with relevant production and occupational health and safety (OHS) personnel in determining optimum locations 1.4 Assist others to determine optimum location for unnecessary items 1.5 Assist others to determine 5S schedule 1.6 Ensure procedures reflect 5S practices 1.7 Assist others to achieve the required level of skill |
| 2 | Facilitate the implementation of 5S | <ul style="list-style-type: none"> 2.1 Ensure procedures reflect 5S practices 2.2 Assess skill base of team or work group members in 5S and arrange for any required training 2.3 Ensure that any damage and/or safety risks reported by the team or work group are addressed through correct mechanisms |
| 3 | Monitor 5S | <ul style="list-style-type: none"> 3.1 Check work area for 5S implementation as part of normal routine |

- 3.2 Identify non-conformances
- 3.3 Negotiate solutions to non-conformances
- 4 Improve 5S
 - 4.1 Work with others to find areas for improvement
 - 4.2 Assist others to develop improvement solutions
 - 4.3 Facilitate the availability of resources required for the improvement solution
 - 4.4 Facilitate the implementation of the improvement solution

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with other employees and managers to engender commitment to achieving 5S outcomes, conduct formal and informal meetings and to explain 5S and related concepts
- facilitating team or work area goals, activities and communications and accessing resources
- visualising normal operational procedures in terms of flow and contribution to customer outcomes
- planning and prioritising activities
- problem solving to determine potential improvements to the 5S system
- reading and interpreting the application of operating procedures for jobs within team or target work area
- analysing work practices, procedures and 5S principles to facilitate setting up the 5S system and to identify improvements
- identifying gaps in skills and/or knowledge and options to address them

Required knowledge

Required knowledge includes:

- principles and purpose of 5S
- methods of identifying waste in the work area, such as:
 - waste walk
 - document tagging
 - tracking/log sheets
 - spaghetti diagrams
 - existing information technology and enterprise resource systems (e.g. Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems
- organisational policies, plans and procedures
- processes for identifying and addressing skill gaps
- ways of encouraging team members to find and suggest areas for improvement
- methods of identifying and evaluating options and making/recommending improvements
- methods of accessing required resources
- OHS requirements relevant to team and work area

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify the scope of the services and/or functions supplied to and by the team or work area and the deliverables expected by customers, including the ultimate customer • facilitate a systematic approach to implementing 5S • lead and motivate others in achieving 5S outcomes and making improvements to the 5S systems • set up systems for monitoring and improving 5S implementation • manage non-conformances in implementation of 5S.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p>

	<ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised wording***, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with

training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as SCADA software, ERP systems MRP and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Procedures</p>	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant

	<ul style="list-style-type: none"> good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and Responsible Care) government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> written, verbal, computer-based or in some other format

MSS403051A Mistake proof an operational process

Modification History

New unit, superseding MSACMT451A Mistake proof a production process - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to make changes to own and others work in a work area which prevents errors and/or backsliding to a pre-improvement level of practice.

Application of the Unit

This unit applies to a person who needs to analyse a process that a team is responsible for and determine methods of mistake proofing it (e.g. ensuring it only produces product within an acceptable range or error-free transport and storage of goods). The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to mistake proof the production process in their area. After improvement activities have been undertaken these improvements need to be sustained.

This unit requires the application of skills associated information gathering and analysis. Initiative, enterprise and problem solving are also required to identify mistakes and determine strategies for eliminating them. This unit also requires communication and teamwork skills to ensure mistake proofing strategies are implemented and self-management and learning skills to continually reflect on and integrate feedback about the effectiveness of strategies.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Analyse process	1.1	Identify sources of variability/non-conformance in the process
		1.2	Identify critical control points in process
		1.3	Analyse causes of variability/non-conformance
2	Develop preventative techniques/systems	2.1	Liaise with team members and other people to develop mistake proof options for performing operation
		2.2	Test and validate mistake proofing options
3	Implement permanent fix	3.1	Liaise with relevant people to have systems/procedures changed to implement solution
		3.2	Liaise with relevant people to implement the solution
		3.3	Liaise with relevant people to ensure self and others in the team or work area have an appropriate skills set
		3.4	Follow through to ensure implementation occurs
4	Monitor implementation	4.1	Critically observe the implementation
		4.2	Compare the results of the implementation against the expected outcomes
		4.3	Modify solution to improve outcomes

- 4.4 Ensure procedures reflect change
 - 4.5 Ensure training/assessment reflects change
 - 4.6 Audit change at agreed period/cycle
 - 4.7 Take action on any observed deviation
- 5 Seek improvements
- 5.1 Observe changes
 - 5.2 Analyse process again, if required, to ensure improvements are sustained

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with team or work group members, technical support personnel and other relevant staff
- explaining mistake proofing and related concepts
- facilitating input of others and encouraging acceptance of changes
- analysing and visualising operations in terms of flow and contribution to customer outcomes
- solving problems to determine root cause of errors and possible solutions
- analysing and interpreting information about errors and mistake proofing options in terms of cost, feasibility, regulations and value to the customer
- suggesting design changes to operations and products that eliminate the potential for errors
- suggesting mechanisms or procedures that warn of errors where operations cannot be designed to eliminate errors,

Required knowledge

Required knowledge includes:

- mistake proofing concepts, including, in priority order:
 - eliminate the possibility of the error via changes to the process
 - prevent the error from occurring via physical or virtual barriers
 - reduce likelihood of the error by encouraging correct action

- mitigate the impact of the error if it does occur
- understanding of processes undertaken by team
- factors in the processes which may cause variability
- methods of controlling the variability in the process
- mistake proofing methods relevant to the process/product

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • analyse variability and non-conformances • identify, analyse and evaluate information from a variety of sources to identify errors and options for mistake proofing • facilitate implementation of mistake proofing activities that reduce waste • facilitate sustaining the mistake proofing activities.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace

	<ul style="list-style-type: none"> • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related
--	---

	<p>operations control systems</p> <ul style="list-style-type: none"> • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Mistake proofing</p>	<p>Mistake proofing is based on the concept of zero defects. The first priority is to eliminate the possibility of an error occurring. However, where this is not feasible mistake proofing can be used to reduce the occurrence of errors and/or to minimise their impact.</p> <p>Mistake proofing should target an error in the following priority order:</p> <ul style="list-style-type: none"> • eliminate the possibility of the error via changes to the process • prevent the error from occurring via physical or virtual barriers, • reduce likelihood of the error by encouraging correct action (e.g. through warning systems) • mitigate the impact of the error if it does occur <p>Mistake proofing is also called error proofing or baka-yoke or poka-yoke</p>
<p>Options for mistake proofing</p>	<p>Factors to consider when prioritising options for mistake proofing will vary according to the process and may include:</p> <ul style="list-style-type: none"> • success rate in eliminating errors

	<ul style="list-style-type: none"> • feasibility • skills required by employees • cost • capacity to reduce waste
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • all work instructions • standard operating procedures • formulas/recipes • batch sheet • temporary instructions and similar instructions provided for the operation of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other format

MSS404050A Undertake process capability improvements

Modification History

New unit, superseding MSACMT450A Undertake process capability improvements* - Equivalent

* New prerequisite *MSS404052A Apply statistics to operational processes* superseding MSACMT452A Apply statistics to processes in manufacturing

Unit Descriptor

This unit of competency covers the skills and knowledge required to make process capability improvements, including analysing data from the process, developing improvements to eliminate variation due to assignable causes, and then implementing actions.

Application of the Unit

This unit applies to a person who reviews a range of process capability data and information, makes/arranges for changes to be made to procedures, equipment or process and then recalculates the process capability and monitors resulting improvement actions. The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to suggest and justify process capability improvements.

Process capability may have been determined using either a six sigma or three sigma processes. This unit applies to the application of statistical methods and the determination of capability based on those methods. Other related units may be *MSS404052A Apply statistics to operational processes* and *MSS404053A Use six sigma techniques*

This unit primarily requires the application of skills associated with communication, information gathering and analysis. Initiative, enterprise and problem solving are also required to identify opportunities to improve process capacity. This unit also requires aspects of self-management and learning to validate own analysis.

For a qualitative approach to improvement (one not using statistics) see *MSS403051A Mistake proof an operational process*.

Pre-Requisites

MSS404052A Apply statistics to operational processes

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Obtain required data	1.1	Identify process for study
		1.2	Obtain/organise process to obtain required data/information
2	Analyse information	2.1	Analyse data and determine assignable causes
		2.2	Develop possible improvements to eliminate assignable causes
		2.3	Incorporate own experience and learning into proposed process improvement proposals
		2.4	Develop process improvement proposals
3	Improve process capability	3.1	Obtain required authorities to implement improvements
		3.2	Liaise with relevant people to implement improvements
		3.3	Obtain/organise required data for improved process

- 3.4 Recalculate process capability
- 3.5 Implement revised data collection/processing and new capability information
- 3.6 Monitor improvement actions and make adjustments, as necessary

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- performing relevant mathematical operations
- identifying and using relevant statistical methods
- communicating and explaining data-related changes and procedures to individuals and groups
- negotiating with other employees and managers on proposed improvement actions
- analysing procedures and data to establish variation
- solving problems to root cause where assignable cause of variation is not obvious
- working in a team
- using computer software relevant to required analyses and process

Required knowledge

Required knowledge includes:

- data collection methods
- data processing techniques required
- variability and normal distribution
- three sigma or six sigma processes, as relevant
- random and non-random results (recognition of assignable causes)
- causes of different types of non-random results
- causes of random variation
- process understanding sufficient to translate the data into variations in the process and determine methods of controlling them

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • analyse process information • calculate process capability/trial limits • improve process capability (or organise for it to be improved) • analyse revised process information and recalculate process capability.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence <p>In all cases it is expected that practical assessment will</p>

	<p>be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time
--	--

	<ul style="list-style-type: none"> • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Process capability	<p>Process capability is:</p> <ul style="list-style-type: none"> • the measurable ability of a process to reliably produce within calculated limits (the limits depend on the variation of the process)
Variation	<p>All processes have variation. The approach in this unit is to separate random variation (no assignable cause) from non-random variation (which has an assignable cause). By finding and eliminating assignable causes, total variation is reduced and process capability will be improved</p>
Six sigma	<p>Six sigma refers to:</p> <ul style="list-style-type: none"> • a statistical tool for recording defects and determining capability. Six sigma limits equate to 3.4 defects per million opportunities for each product or service transaction. Six sigma is also used as a general term covering a competitive systems and practices approach. Six sigma training typically covers several units of competency in this Training Package
Three sigma	<p>Three sigma refers to:</p> <ul style="list-style-type: none"> • a traditional statistical process control. Three sigma limits equate to 3 defects per thousand opportunities for each product or service transaction
Required data	<p>The calculation of three sigma or six sigma limits requires process data. The data required depends on the nature of the limits being calculated</p>
Assignable cause	<p>Any non-random variation is said to have an 'assignable cause'. The methods of data analysis common to statistical capability analysis as well as other methods of</p>

	root cause analysis should be used to determine the cause of this non-random variation
Improved process capability	<p>Improvements to process capability result from eliminating the causes of non-random variation. The improvements made may be:</p> <ul style="list-style-type: none"> • as a result of continuous improvement with the process capability being recalculated periodically • as a result of an improvement project with the process capability recalculated as part of that project
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other format

MSS404052A Apply statistics to operational processes

Modification History

New unit, superseding MSACMT452A Apply statistics to processes in manufacturing - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to apply statistical theory and principles to the analysis and control of processes and operations.

Application of the Unit

This unit applies to a person working in an organisation applying statistical process control on processes or operations. The statistical process control will usually be used to monitor the processes or operations and determine when action needs to be taken. The appropriate action will then be taken in accordance with standard procedures.

The unit includes applying knowledge of frequency distribution and variation to the data/chart to distinguish between random and non-random variation and assumes understanding of the process and/or equipment to help interpret those results.

This unit primarily requires the application of skills associated with gathering and analysing data and communicating statistical information to others. This unit also has a strong emphasis on problem solving, initiative and enterprise, planning and organising, and self-management to solve problems and manage processes.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Collect process data	1.1	Interpret sampling scheme
		1.2	Obtain measurements in accordance with standard procedures
		1.3	Handle data, as required
2	Interpret data	2.1	Plot data on appropriate control chart
		2.2	Distinguish between random and non-random patterns of results
		2.3	Identify results outside the control limits
		2.4	Recognise situations requiring action
		2.5	Take appropriate action in accordance with standard procedures
		2.6	Determine cost of non-conformance
3	Calculate control limits	3.1	Consult relevant stakeholders to determine appropriate limits
		3.2	Use relevant methods to calculate/revise control limits
		3.3	Plot limits on control chart
		3.4	Explain impact of limit to relevant stakeholders

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- applying a range of sampling procedures
- analysing samples and data for variation, relevance, reliability and representativeness
- problem solving the causes of variation in a process
- communicating with other employees to obtain samples/data and to explain results and limits
- plotting or documenting results
- undertaking calculations, including:
 - basic arithmetic functions
 - mean, range, mean of means, standard deviation (using appropriate calculation aids)
- using statistics to support process and operations control

Required knowledge

Required knowledge includes:

- sampling techniques
- purpose of sampling and measurement
- random, systematic and stratified sampling
- purpose of replication of data for statistical control
- samples, populations, finite and infinite populations and the differences
- methods of calculating means, standard deviations and the like and their purpose in statistical control
- the meaning of broad/narrow frequency distributions/range/standard deviations and skewed distributions in process terms
- concept of limits, including:
 - 1 sigma warning limits
 - 2 sigma warning limits
 - 3 sigma control limits
 - 6 sigma limits
- types of control charts and their applications to different types of process/product and for different purposes
- process causes of variation and typical cause types of non-random variation
- non-process (e.g. measurement) causes of variation
- recognition of stable and unstable processes
- causes of stability/instability in the process

- calculation of control limits/process capability and the applications of different control limits
- the standard distribution curve and confidence limits

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • follow sampling procedures • apply basic statistical processes • analyse data to identify variations and non-conformances • plot or document results.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning

	<ul style="list-style-type: none"> • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen)
--	--

	<ul style="list-style-type: none"> • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Sampling scheme	<p>Sampling scheme may include:</p> <ul style="list-style-type: none"> • sampling for attributes or sampling for variables • batch, continuous or custom made products • number of items/samples • size of sample • timing of sampling • location of sampling points • type of sample • number/type of measurements to be done on each sample • sampling equipment • measurement/testing equipment/methods
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/ recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other

	format
Handle data	<p>Handle data may include:</p> <ul style="list-style-type: none"> • calculating means, ranges, mean of means and standard deviations (using appropriate calculation aids) • entering data into a software package • recording data either in writing or electronically • other required manipulations of the data
Control chart	<p>Control charts may include:</p> <ul style="list-style-type: none"> • run • tally • mean/range • attributes • other relevant charts
Random	Random variation is the term used in statistical control to refer to those variations for which no cause can be found
Non-random	Non-random (also called identifiable cause, assignable cause or special cause) are those variations for which a cause can be found and so the cause of the variation eliminated. Non-random variation may also be used to predict possible breaches of the control limits
Control limits	Control limits (also referred to as process capability) are those limits within which the process will operate if it is 'under control'
Cost of non-conformance	<p>Cost of non-conformance includes:</p> <ul style="list-style-type: none"> • reprocessing/rework • expediting • unplanned service • excess inventory • complaint handline • downtime • returns • scrap • labour costs • material costs • infrastructure costs/overhead • utility costs
Appropriate limits	Appropriate limits may include:

	<ul style="list-style-type: none">• 1 sigma warning limits• 2 sigma warning limits• 3 sigma control limits• 6 sigma limits

MSS404060A Facilitate the use of planning software systems in a work area or team

Modification History

New unit, superseding MSACMT460A Facilitate the use of planning software systems in manufacturing* - Not equivalent

* Prerequisite *MSACMT260A Use planning software systems in manufacturing* - removed

Unit Descriptor

This unit of competency covers the skills and knowledge required to facilitate the use of planning software in an organisation in a person's work area or team. These systems are known by various generic names, such as Enterprise Resource Planning (ERP), Materials Resource Planning (MRPII, MRP III etc.) or by proprietary names.

Application of the Unit

This unit applies to a person who will access the planning software system for their own work, but will also need to provide support and organise skill development programs for their team or work group members. The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to facilitate the use of the planning software system.

The planning software system will be used routinely in the work of the team or work group.

This unit primarily requires the application of skills associated with using communication technology and supporting team use of planning software. Problem solving, initiative and enterprise, and planning and organisational skills are required to ensure that planning software is used efficiently. This requires aspects of learning and self-management to ensure own performance and that of the team.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Identify scope of planning software	1.1	Identify categories of information held by planning software
		1.2	Identify information categories relevant to team and area processes
		1.3	Identify range of information able to be provided to planning software by team or work group
		1.4	Identify range of information able to be provided to team or work group by planning software
2	Communicate using the planning software system	2.1	Send and receive information using planning software
		2.2	Send and receive messages using planning software
3	Make decisions using planning software	3.1	Interrogate the planning software system to find required current, historical or predicted information
		3.2	Take actions appropriate to the information in accordance with procedures
4	Monitor the use of	4.1	Routinely monitor planning software information

planning software	4.2	Review performance and use of planning software with team
5 Support others to use planning software	5.1	Regularly communicate with team or other work group members, both using planning software and face to face
	5.2	Identify improvements required
	5.3	Take appropriate actions to implement improvements

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- entering and receiving information via planning software terminals
- communicating with team and organisation planning software support personnel
- engaging and motivating team in use of planning software
- identifying team or work group area information requirements
- identifying scope of information relevant to team and area available in planning software by categories
- planning and organising improvements in team's use of planning software

Required knowledge

Required knowledge includes:

- hierarchy of planning software system and operation
- information available from/through the planning software system
- query facilities and information analysis capabilities offered by planning software
- support/training/skill development mechanisms available for access by team members

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the

performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify team or work group area information requirements and relate to planning software categories • lead and motivate others in using planning software • ensure information sent to planning software is accurate and appropriate • obtain regular and one-off information from planning software • make decisions using planning software generated information.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence.

	<p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, ERP systems, MRP and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time
---	---

	<ul style="list-style-type: none"> • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Planning software</p>	<p>Planning software is a general term applied to a number of software systems which integrate a range of business information, such as:</p> <ul style="list-style-type: none"> • sales/order taking • finance/accounting • logistics • maintenance • human resources • production <p>It is frequently referred to by names such as ERP or MRP/MRPII. In some cases it can be integrated with engineering applications, such as SCADA systems. In such cases the unit MSS402061A Use SCADA systems in operations may also be required</p>
<p>Information and messages</p>	<p>Information and messages able to be sent and received via the planning software will vary between programs and organisations. This unit assumes that a range of discretion is available to the team leader over the information and messages that can be sent or received. Examples of information and message categories include:</p> <ul style="list-style-type: none"> • orders • production/operations processes • scheduling (e.g. daily/weekly) • finance and accounting • human resources (e.g. rosters, reserves, training completed and scheduled) • quality requirements • customers • suppliers

<p>Value stream</p>	<p>The value stream begins with the customer and includes all actions (both value-adding and non-value added) by both internal sections/departments and external organisations to meet a customer requirement.</p> <p>Depending on the operations and the customer requirement stages where value stream actions may occur include:</p> <ul style="list-style-type: none"> • sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support

MSS404061A Facilitate the use of SCADA systems in a team or work area

Modification History

New unit, superseding MSACMT461A Facilitate SCADA systems in a manufacturing team or work area* - Not equivalent

* Prerequisite *MSACMT261A Use SCADA systems in manufacturing* - removed

Unit Descriptor

This unit of competency covers the skills and knowledge required by a team leader or technical expert to personally use and facilitate the use of System Control and Data Acquisition (SCADA), or other similar systems, and support the team in their use of SCADA.

Application of the Unit

This unit applies to team leaders and others who are providing guidance and support to assist employees to use SCADA. The person will access the SCADA system for their own work, but will also need to provide support and organise skill development programs for their team members.

This competency is also relevant to maintenance personnel using a SCADA system to coordinate maintenance activities.

This unit primarily requires the application of skills associated with using communication technology and supporting team use of SCADA systems. Problem solving, initiative and enterprise, and planning and organisational skills are required to ensure that system is used efficiently. This requires aspects of learning and self-management to ensure own performance and that of the team.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Identify scope of SCADA system	1.1	Identify categories of information held in and control options of SCADA system relevant to team or area
		1.2	Identify range of information able to be provided to SCADA system by team
		1.3	Identify range of information able to be provided to team by SCADA system
		1.4	Identify team or area functions impacted by SCADA system
2	Communicate using SCADA system	2.1	Send and receive information using SCADA
		2.2	Send and receive messages using SCADA
3	Make decisions using SCADA	3.1	Interrogate the SCADA system to find required current, historical or predicted information
		3.2	Take actions appropriate to the information
4	Monitor the use of SCADA	4.1	Routinely monitor SCADA information
		4.2	Identify poor uses of SCADA system within team and system inadequacies
		4.3	Identify system improvements required

- | | | | |
|---|---------------------------|-----|--|
| | | 4.4 | Take appropriate action to improve SCADA system and its use |
| 5 | Support team use of SCADA | 5.1 | Regularly communicate with team, both using SCADA-based communication and face to face |
| | | 5.2 | Identify skill improvement needs |
| | | 5.3 | Identify team members who require additional support |
| | | 5.4 | Take appropriate action to provide support |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- entering and receiving information via SCADA terminals
- communicating with team and organisation SCADA support personnel
- engaging and motivating team in use of SCADA system
- identifying team or work area information requirements
- identifying scope of team or area processes controlled by SCADA system
- planning and organising improvements in team's use of SCADA

Required knowledge

Required knowledge includes:

- hierarchy of SCADA system and operation
- information available from and controls exercised by/through the SCADA system
- query, control and other facilities and information offered by SCADA
- support/training/skill development mechanisms available for access by team member

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify team or area information and operations requirements and relate to SCADA system • lead and motivate others in using SCADA system • obtain regular and one-off information from SCADA system • make decisions using SCADA generated information.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will</p>

	<p>be combined with targeted questioning to assess the underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time
--	--

	<ul style="list-style-type: none"> • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
SCADA	<p>SCADA is a general term applied to a number of systems which automatically collect critical process data, perform required mathematical manipulations on it and then make control decisions and/or give required information personnel for action.</p> <p>SCADA systems are often used in manufacturing but can also be used in other industries. In the continuous sector, the SCADA system is sometimes integrated into other sophisticated computer control systems, such as Distributed Control System (DCS) and these systems do merge in advanced systems. These organisations may simply refer to their SCADA as the DCS or other similar term (such as the proprietary name of the computer system)</p>
Value stream	<p>The value stream begins with the customer and includes all actions (both value-adding and non-value added) by both internal sections/departments and external organisations to meet a customer requirement.</p> <p>Depending on the operations and the customer requirement stages where value stream actions may occur include:</p> <ul style="list-style-type: none"> • sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/ collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support

MSS404081A Undertake proactive maintenance analyses

Modification History

New unit, superseding MSACMT481A Undertake proactive maintenance analyses - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to undertake the most common forms of analyses associated with predictive/preventative/reliability centred maintenance strategies.

Application of the Unit

This unit applies to a technical expert (usually an engineer, technician or tradesperson) who is required to undertake analyses for the purpose of predictive/preventative/reliability centred maintenance as part of a competitive systems and practices strategy.

This unit primarily requires the application of skills associated with communication, teamwork, problem solving, initiative and enterprise, and planning and organising in order to undertake maintenance analyses. This is normally done in the context of using computer technology, and requires aspects of learning and self-management to ensure team involvement and facilitation of learning.

Licensing/Regulatory Information

Elements describe the essential outcomes of a Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

unit of competency. text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Liaise with operator	<p>1.1 Establish a relationship with the operator of equipment/plant</p> <p>1.2 Ensure the operator has the required skills and resources to keep the equipment/plant clean</p> <p>1.3 Ensure the operator is able to effectively monitor the operation of the equipment/plant</p> <p>1.4 Regularly communicate with operator about the overall equipment effectiveness (OEE) of their equipment/plant</p> <p>1.5 Involve operator, team leader and other key personnel in identification of skill needs and means of skill acquisition to fill any identified gaps</p>
2	Analyse history	<p>2.1 Analyse mean time between failures (MTBF) from maintenance records</p> <p>2.2 Analyse performance data of the equipment/plant</p> <p>2.3 Identify causes of changes to historic trends/status</p> <p>2.4 Determine methods of ensuring causes of improvements and resolution of deterioration are locked in</p>
3	Undertake failure mode effects analysis (FMEA) or similar failure effects analysis	<p>3.1 Undertake analysis</p> <p>3.2 Record results of analysis</p> <p>3.3 Investigate methods of eliminating possibility of failure and/or minimising the impact of the failure</p> <p>3.4 Liaise with operator, team leader and other key personnel regarding possible solutions</p>

- 3.5 Select most appropriate solution
 - 3.6 Implement selected solutions
- 4 Undertake condition monitoring analysis
 - 4.1 Obtain data for condition monitoring analysis
 - 4.2 Interpret condition monitoring data
 - 4.3 Predict required maintenance type and timing from condition monitoring data
 - 4.4 Liaise with operator, team leader and other key personnel regarding implications of condition monitoring report
 - 4.5 Involve team members in development of changes to maintenance strategy to ensure awareness, learning and commitment

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with operators and team leaders in a variety of situations and with different media
- adapting personal communication strategy to different levels of operator and team leader literacy and numeracy
- working in formal and ad-hoc teams to undertake proactive maintenance related analyses
- analyse data to determine trends, variations, equipment history and to prioritise methods of eliminating or minimising equipment failure
- solving problems to root cause
- applying basic arithmetic and statistical methods
- planning for effective data collection
- reading and interpreting engineering specifications/drawings
- reading and interpreting charts and diagrams
- using information system terminals and computer
- recording data in hard or soft formats

Required knowledge

Required knowledge includes:

- cleaning needs, techniques and principles of equipment in area of responsibility
- methods of assessing operator and maintenance skill gaps and filling them
- techniques for determining MTBF or similar
- techniques for undertaking FMEA or similar
- underpinning principles of competitive systems and practices strategies being implemented and how to adapt them to maintenance
- root cause analysis
- techniques to analyse condition monitoring data

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify and analyse data and other information on the historical performance of equipment • involve operators, maintenance and other stakeholders in decisions on proactive maintenance strategies • identify root cause of failure and deterioration in equipment performance • select and implement failure elimination or minimisation solutions.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to

	<p>production, waste, overheads and hazard control/management</p> <ul style="list-style-type: none"> • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations
--	---

	<ul style="list-style-type: none"> • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • OEE • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
OEE	<p>OEE is the combination of the main factors causing loss of productive capacity from equipment/plant and is:</p> $OEE = availability \times performance \times quality\ rate$ <p>where:</p> <ul style="list-style-type: none"> • availability takes into account losses due to breakdown, set up and adjustments • performance takes into account losses due to minor stoppages, reduced speed and idling • quality rate takes into account losses due to rejects, reworks and start-up waste

MTBF	<p>MTBF is one key measure of the effectiveness of a maintenance procedure, and is an indicator as to whether root causes are being found and resolved. If MTBF is reducing, then it is an indicator that the maintenance regime is failing.</p> <p>There are many possible causes of any problem. Eliminating some will have no impact, others will ameliorate the problem. However, elimination of the root cause will eliminate the problem. There should only be one root cause for any problem and so the analysis should continue until this one cause is found. Elimination of the root cause permanently eliminates the problem.</p> <p>Depending on the equipment, operations and procedures of the organisation, alternative statistical records of maintenance and maintenance related events may be substituted for MTBF providing they relate strategies for improving OEE.</p>
FMEA	<p>FMEA is a systematic approach that identifies potential failure modes in a system, product, or operations/assembly operation caused by either design or operations/assembly process deficiencies. It also identifies critical or significant design or process characteristics that require special controls to prevent or detect failure modes. FMEA is a tool used to prevent problems from occurring.</p> <p>Some industry sectors have highly adapted forms of FMEA and may practice traditional FMEA in say their routine maintenance while using another technique, such as Hazard and Operability Studies (HAZOP) for design and modification.</p> <p>HAZOP is a form of FMEA which has been practiced by the process industries for over 30 years and examines the implications of changes in process conditions to process stability.</p>
Condition monitoring	<p>In this unit condition monitoring is used to describe the process of analysing the implications of condition monitoring data for proactive maintenance, whether it be obtained from non-destructive testing (NDT) reports, visual assessment by experts, diagnostic reports obtained from SCADA or other enterprise or equipment software and product or process quality analyses. It does not require the actual undertaking of the NDT or condition monitoring assessment or test. If this is required appropriate units from other Training Packages will be</p>

	required.

MSS404082A Assist in implementing a proactive maintenance strategy

Modification History

New unit, superseding MSACMT482A Assist in implementing a proactive maintenance strategy - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by a maintenance person to assist in the implementation of a proactive maintenance strategy in an organisation. This unit includes the interaction between a maintenance worker and operators, as appropriate.

Application of the Unit

This unit applies to a maintenance person in an organisation that has adopted or is implementing total preventative/productive maintenance (TPM), reliability centred maintenance (RCM) or similar strategies. As part of this, the maintenance person is expected to assist in the implementation by determining appropriate maintenance related schedules and also by providing maintenance related assistance to non-maintenance personnel, such as assisting production personnel to fulfil their role in the TPM/RCM strategy.

This unit requires the application of skills associated with problem solving and initiative and enterprise in order to analyse maintenance requirements. Communication, teamwork and planning and organising skills will be required to implement reliability strategies. This requires aspects of self-management to ensure improvement of own performance and learning.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Develop components of reliability strategy for a work/plant area	1.1	Determine manufacturer's recommended inspection, servicing and related schedules for relevant plant
		1.2	Consult with relevant people with regard to appropriate inspections, services and schedules
		1.3	Discuss any conflicts with relevant people and seek resolution of conflicts
		1.4	Develop schedules in liaison with relevant people
		1.5	Identify inspections and servicing which may be done by operations personnel in liaison with relevant stakeholders
2	Assess current practice for maintenance implications	2.1	Identify the overall equipment effectiveness (OEE) or other organisation targets for equipment/plant
		2.2	Evaluate procedures for plant/equipment reliability implications
		2.3	Discuss current practices with relevant people to determine any plant/equipment reliability implications
		2.4	Recommend changes to improve plant/equipment reliability in accordance with procedures
3	Assist in implementing the reliability strategy	3.1	Arrange for schedules to be incorporated in relevant work plans
		3.2	Identify training needs in discussion with relevant

personnel

- 3.3 Assist personnel to develop required skills for inspections/servicing within scope of authority
- 3.4 Collect data/information as required by own work plan
- 3.5 Compare data/information with performance indicators
- 3.6 Recommend improvements to reliability strategy in accordance with procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- explaining concepts and processes of chosen proactive maintenance strategy used by the organisation and distinguishing from traditional (breakdown) maintenance strategies
- communicating with operators, other maintenance personnel, team leaders and technical experts in a variety of situations and using different media
- adapting personal communication strategy to different levels of operator and team leader literacy and numeracy
- working in formal and ad-hoc teams to implement proactive maintenance
- solving problems to root cause
- planning proactive maintenance tasks to fit in with maintenance and production schedules and the needs of other staff
- assessing the ability of operations personnel with regard to inspections and servicing of equipment
- reading and interpreting charts and diagrams, manufacturer manuals and specifications and operating procedures

Required knowledge

Required knowledge includes:

- requirements of the proactive maintenance strategy being implemented
- operating principles and procedures for equipment/plant subject to proactive maintenance strategy
- purpose and processes for data collection in proactive maintenance strategies
- procedures relevant to own job and organisation implementation of proactive maintenance

- methods of making/recommending improvements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • source information from manuals and other technical documentation or software • effectively communicate with users on equipment operational and maintenance history • develop schedules for maintenance activities including seeking technical assistance, where appropriate • differentiate between proactive and traditional maintenance strategies.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation

	<ul style="list-style-type: none"> • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and

MSS405001A Develop competitive systems and practices for an organisation

Modification History

New unit, superseding MSACMS600A Develop a competitive manufacturing system - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to develop new strategies for competitive systems and practices or make improvements to existing systems and practices.

Application of the Unit

This unit applies to a manager, technical specialist or similar in an organisation implementing competitive systems and practices, or in an organisation wishing to embark on the competitive systems and practices path. The person needs to be able to analyse the needs of the organisation and develop strategies and systems for effective implementation and continuous improvement of competitive systems and practices in the organisation.

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Problem solving, initiative and enterprise, and planning and organising are required to determine effective competitive systems and practices strategies for the organisation. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices strategies.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Determine appropriate analytical techniques	1.1	Liaise with key stakeholders to determine objectives of operations strategy
		1.2	Examine current operations to determine major areas requiring improvement
		1.3	Compare possible strategies, techniques and tools against organisation needs
		1.4	Select possible strategies, techniques and tools
		1.5	Consult with key stakeholders to confirm selected strategies, techniques and tools
2	Develop competitive systems and practices strategies	2.1	Estimate benefit/cost ratio for major stakeholders and the value stream overall
		2.2	Determine preferred operations strategy
		2.3	Examine and adapt strategy to organisation needs and priorities
		2.4	Examine and adapt competitive systems and practices techniques and tools required to implement strategy
		2.5	Negotiate with key stakeholders to develop an implementation plan
		2.6	Determine key information and performance indicators required

3	Implement strategy	3.1	Determine data collection required
		3.2	Identify and evaluate methods of collecting and processing required data
		3.3	Determine hardware and other resources required
		3.4	Evaluate skill needs required
		3.5	Ensure all resources/training are available and completed
		3.6	Implement strategy
4	Monitor implementation of strategy	4.1	Compare information/performance indicators with desired levels
		4.2	Liaise with key stakeholders regarding strategy issues
		4.3	Identify areas requiring adjustment
		4.4	Make required adjustments

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- undertaking self-directed problem solving and decision-making on issues of a broad and/or highly specialised nature and in a wide variety of contexts
- analysing current state/situation of the organisation and value stream, including appropriateness of strategy, operations and internal and external relationships, including value stream members
- determining appropriate key performance indicators (KPIs) and overseeing data collection
- selecting appropriate competitive systems and practices tools and techniques, such as:
 - value stream mapping
 - 5S
 - Just in Time (JIT)
 - mistake proofing
 - process mapping

- establishing customer pull
- kaizen and kaizen blitz
- setting of KPIs/metrics
- identification and elimination of waste
- communicating at all levels in the organisation and value stream and to audiences of different levels of literacy and numeracy
- prioritising situations and actions based on:
 - customer benefit
 - cost/benefit analysis
- reviewing and modifying strategies and KPIs, as required

Required knowledge

Required knowledge includes:

- competitive systems and practices principles and tools, including:
 - value stream mapping
 - 5S
 - JIT
 - mistake proofing
 - process mapping
 - establishing customer pull
 - kaizen and kaizen blitz
 - setting of key performance indicators/metrics
 - identification and elimination of waste
- methods of estimating costs/benefits
- acceptable benefit/cost ratios
- continuous improvement principles
- principles of motivation and leadership
- characteristics and strengths of different types of strategies, techniques and tools, such as 5S, JIT, six sigma, lean operations and agile operations
- business goals sufficient to match the strategy to the business needs
- strategic thinking
- principles of process equipment and how to improve its reliability
- resources required and how to obtain them

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the

performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • determine appropriate analytical techniques • develop strategies that deliver the greatest overall benefit • implement the strategies • monitor the implementation of the strategy.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to</p>

	accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures
--	--

	<ul style="list-style-type: none"> • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Competitive systems and practices techniques and tools</p>	<p>Competitive systems and practices techniques and tools may include:</p> <ul style="list-style-type: none"> • value stream mapping • 5S • JIT • mistake proofing • process mapping • establishing customer pull • kaizen and kaizen blitz • setting of KPIs/metrics • identification and elimination of waste (muda) • standardisation
<p>Value stream</p>	<p>The value stream begins with the customer and includes all actions (both value-adding and non-value added) by both internal sections/departments and external organisations to meet a customer requirement.</p> <p>Depending on the operations and the customer requirement stages where value stream actions may occur include:</p> <ul style="list-style-type: none"> • sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support

MSS405002A Analyse and map a value stream

Modification History

New unit, superseding MSACMS601A Analyse and map a value chain* - Not equivalent

* Prerequisite *MSACMT631A Undertake value analysis of product costs in terms of customer requirements* - removed

Unit Descriptor

This unit of competency covers the skills and knowledge required to analyse and map a value stream, including the clear identification of the place of an organisation in the value stream and its contribution to the value stream. The unit includes the identification of an organisation in a value stream, their relationships and the activities undertaken by value stream organisations. The identification skills include identification at the virtual or information level, the technical or process level, and at the physical or logistic level.

The unit includes the analysis of value-adding and non-value adding activities and the information needs for successful value stream mapping, including information technology (IT) needs.

This unit covers the analysis of the supply chain, the demand chain as well as the overall value stream.

Application of the Unit

This unit applies to a person in a senior role in an organisation, such as an operations manager, purchasing manager, senior technical officer performing planning or scheduling or similar who needs to analyse and map a value stream, a supply chain, or a demand chain in order to understand the interactions between all members and determine the value added/potential value added by each member. The value stream is represented visually according to organisation format requirements.

This information is the basis for the design of Just in Time (JIT) and for the determination of waste. Value stream analysis is not a one-off activity but rather an ongoing activity of re-analysis as the value stream changes and its members progress towards excellence in competitive systems and practices.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Map the value stream	1.1	Select a product/product group for analysis
		1.2	Identify ultimate customer
		1.3	Identify ultimate supplier
		1.4	Identify all organisations between ultimate supplier and ultimate customer
		1.5	Identify all steps in own organisation
		1.6	Map value stream
2	Define customer need	2.1	Determine the features/benefits obtained by customers from product
		2.2	Determine methods of measuring the contribution to each features/benefits
		2.3	Identify possible data sources for required measures
		2.4	Implement measurement of contribution to features/benefits

- | | | | |
|---|-------------------------------------|-----|--|
| 3 | Assess the value added at each step | 3.1 | Identify value contributed by each external organisation |
| | | 3.2 | Determine value added by each internal step |
| | | 3.3 | Determine method of measuring value added |
| 4 | Reduce waste | 4.1 | Compare value added to customer benefit/feature |
| | | 4.2 | Identify activities on value stream map which do not add to customer benefit/features |
| | | 4.3 | Liaise with external value stream members to determine methods to reduce overall waste |
| | | 4.4 | Take required actions to reduce waste |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying for an individual organisation its place in the value stream, including immediate upstream and downstream organisations
- determining flow of materials and information along the value stream, including:
 - output quantities and qualities
 - variability in quality and quantity
 - uptime
 - other key performance indicators (KPIs) indicators appropriate to the organisation and customer requirements
- classifying steps and processes into value adding and non-value adding, including determining appropriate methods for measuring value added
- mapping value stream showing flow of information and materials in either hard copy or using software
- communicating at all levels in the organisation and value stream and to audiences of different levels of literacy and numeracy

Required knowledge

Required knowledge includes:

- purpose of value stream analysis
- methods of value stream analysis and mapping
- concept of waste and value in terms of customer benefit
- types of waste and methods of reducing it
- processes, and operations used in own organisation to make products or deliver services to internal and external customers
- processes employed by other members of the value stream sufficient to have meaningful dialogue with them

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • review activities of organisations to determine: <ul style="list-style-type: none"> • their place in value stream • value added by each organisation • non-value added steps within each organisation • determine methods of measuring value added • prepare a map of a value stream that includes all value creating and non value adding steps.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers

	<ul style="list-style-type: none"> • case studies and scenarios to assess responses to contingencies.
Method of assessment	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as
--	---

	<p>Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems</p> <ul style="list-style-type: none"> • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Value stream</p>	<p>The value stream begins with the customer and includes all actions (both value-adding and non-value added) by both internal sections/departments and external organisations to meet a customer requirement.</p> <p>Depending on the operations and the customer requirement stages where value stream actions may occur include:</p> <ul style="list-style-type: none"> • sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal)

	<ul style="list-style-type: none"> • storage and delivery to customer • after market support
Value-added	<p>Value-added is measured against its contribution to the customer benefits/features and may be in the form of:</p> <ul style="list-style-type: none"> • technical benefits/features • location benefits/features • aesthetic benefits/features • information benefits/features
Map value stream	<p>The map of the value stream can be completed using:</p> <ul style="list-style-type: none"> • hard copy (e.g. paper or whiteboard) • appropriate software tools <p>The map should show all participants and stages of materials and information flow and the value creating and non-value adding steps and processes</p>
JIT	<p>JIT refers to:</p> <ul style="list-style-type: none"> • a production scheduling concept that calls for any item needed at a production operation (whether raw material, finished item, or anything in between) to be produced and available precisely when needed, neither a moment earlier nor a moment later
Waste	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product. Within operations, categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items • activities which do not yield any benefit to the organisation or any benefit to the organisations customers

MSS405003A Manage a value stream

Modification History

New unit, superseding MSACMS602A Manage a value chain* - Not equivalent

* Prerequisites MSACMS601A Analyse and map a value chain and MSACMT631A Undertake value analysis of product costs in terms of customer requirements - removed

Unit Descriptor

This unit of competency covers the skills and knowledge required to manage a value stream, a supply chain or a demand chain, including close liaison with suppliers and customers.

This unit covers the managing of the supply chain, the demand chain as well as the overall value stream and may be applied to the managing of the chain internally/externally within an organisation.

Application of the Unit

This unit applies to a person in a senior role in an organisation, such as a manager, technical specialist or similar, who needs to manage the value/supply/demand chain on an ongoing basis to achieve the best overall contribution of value added to their product in terms of customer benefit/features. The unit can be applied to value streams of large or small organisations and to internal and external value streams or a combination value stream.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|--------------------------------------|--|
| 1 | Evaluate the value stream | <ul style="list-style-type: none"> 1.1 Identify all members in the value stream for products in area of responsibility 1.2 Identify value added by each member of the chain 1.3 Identify non-value adding steps in the value stream 1.4 Identify acute and chronic issues which impact on the value stream 1.5 Develop priority list of items for improvement |
| 2 | Liaise regularly with chain members | <ul style="list-style-type: none"> 2.1 Establish and maintain regular liaison with all chain members 2.2 Identify current and forecast issues with each member 2.3 Work with members to help them address their issues 2.4 Build trust and confidence in the relationship 2.5 Develop with each chain member a priority list of items for improvement 2.6 Negotiate with all chain members to ensure improvements benefit chain members and improve the benefits/features perceived by the ultimate customer |
| 3 | Monitor the value added at each step | <ul style="list-style-type: none"> 3.1 Identify changes in value added by each chain member 3.2 Identify areas where changes to value added are required |

- | | | | |
|---|--------------------------|-----|---|
| | | 3.3 | Develop a priority list of required value-added changes |
| | | 3.4 | Work with chain member to bring about improvements to value added |
| 4 | Continue to reduce waste | 4.1 | Identify waste in value stream |
| | | 4.2 | Work with chain members to continually reduce waste |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- reading and interpreting a value stream map
- identifying, monitoring and managing flow of materials, information and services in the value stream, including:
 - output quantities and qualities
 - variability
 - uptime
 - other key performance indicators (KPIs) indicators appropriate to the value stream organisations and customer benefit/requirements
- communicating and negotiating at all levels in the organisation and value stream and with individuals of different levels of literacy and numeracy
- identifying steps and processes as value adding and non-value adding
- using appropriate methods for measure value added at steps in the value stream

Required knowledge

Required knowledge includes:

- purpose of value stream analysis
- methods of value stream analysis and mapping
- concept of waste and value in terms of customer benefit
- types of waste and methods of reducing it
- processes, and operations used in own organisation to make products or deliver services to internal and external customers

- processes employed by other members of the value stream sufficient to have meaningful dialogue with them

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • review activities of organisations to determine: • their place in value stream • value added by each organisation • non-value added steps within each organisation • determine priorities for improvement in own organisation • negotiate with value stream members on improvements • monitor improvements to determine value added.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects

	<ul style="list-style-type: none"> • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>

MSS405004A Develop business plans in an organisation implementing competitive systems and practices

Modification History

New unit, superseding MSACMS603A Develop manufacturing related business plans -
Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to develop business plans in an organisation implementing competitive systems and practices.

Application of the Unit

This unit applies to a person in an organisation implementing competitive systems and practices (e.g. a production/plant manager, purchasing/technical officer or similar) who is required to develop a section business plan to meet the requirements of the overall strategic plan of the organisation. The plan includes the impact on the value stream and other critical competitive systems and practices factors. Due to competitive pressures this may be a reasonably frequent activity and can occur at any time over the business cycle. The plan may be in response to a specific change, or it may be a plan for the next period.

This unit assumes that up-to-date information about the organisation's role in the value stream is available. For detailed mapping and analysis of the value stream refer to MSS405002A Analyse and map a value stream.

This unit primarily requires the application of skills associated with gathering, analysing and applying information and consulting with stakeholders. Problem solving, initiative and enterprise, and planning and organising are required to develop an effective and measurable business plan. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices strategies.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Determine purpose of plan	1.1	Confirm reason for developing plan and expected outcomes from plan
		1.2	Confirm purpose of plan with all relevant stakeholders
		1.3	Check expected outcomes from plan with overall strategic plan for organisation
		1.4	Identify any potential areas for conflict between proposed plan and strategic directions
		1.5	Negotiate with relevant stakeholders to resolve issues
2	Develop objectives and strategies	2.1	Draft objectives for business plan
		2.2	Draft strategies to achieve these objectives
		2.3	Determine implications for value stream
		2.4	Determine capital or workplace layout/organisation implications for objectives and strategies
3	Develop plans to meet objectives	3.1	Negotiate with relevant stakeholders over implications for objectives and strategies

and strategies	3.2	In liaison with relevant stakeholders, develop plans to meet objectives
	3.3	Determine relevant key performance indicators (KPIs) for plan
	3.4	Check KPIs are appropriate for purpose of plan
	3.5	Check plan will deliver planned purpose
	3.6	Map plan to changed value stream
	3.7	Adjust plan to optimise value stream
	3.8	Validate plan with relevant stakeholders
4	4.1	Release plan for implementation
Monitor the implementation of the plan	4.2	Check the key progress points against the key stages of the plan
	4.3	Note any discrepancies
	4.4	Take appropriate action to ensure correct implementation of plan

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating at all levels in the organisation and value stream and to audiences of different levels of literacy and numeracy
- undertaking self-directed problem solving and decision-making on issues of a broad and/or highly specialised nature and in a wide variety of contexts
- analysing organisation overall strategic plan for implications relevant to competitive systems and practices implementation
- determining appropriate KPIs and methods of data collection
- determining best means of gathering data, including data from monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary

systems

- identifying value stream members and performance
- determining implications of business plan for value stream
- analysing data, including competitive systems and practices indicators and verifying results with stakeholders
- determining key parameters for business plan, including:
 - scope
 - period
 - objectives in terms of customer benefit
 - relationship to overall organisation objectives
 - targets
 - KPIs
 - implementation strategy
 - risk management
 - monitoring and adjustment strategy
 - approval process

Required knowledge

Required knowledge includes:

- organisation strategic directions
- business planning methods and types of plans
- contingency planning and other risk mitigating planning tools
- the organisation's value stream
- analysis of value stream
- competitive systems and practices
- application of quality principles
- human resources and industrial relations
- occupational health and safety (OHS)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of their ability to: <ul style="list-style-type: none">• develop a business plan that conforms to organisation
---	---

	<p>overall strategic directions</p> <ul style="list-style-type: none"> • determine implications of business plan for competitive systems and practices practice in organisation • determine KPIs appropriate for business plan • monitor the implementation of a business plan and make adjustments as necessary.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.

MSS405020A Develop quick changeover procedures

Modification History

New unit, superseding MSACMT620A Develop quick changeover procedures - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to develop/improve changeovers for equipment, processes or operations. It includes critically analysing existing changeovers, applying quick changeover principles, and developing improved changeover procedures.

Application of the Unit

This unit applies to managers, technical specialists or similar in an organisation that has adopted or is adopting a quick changeover approach to its changeovers. The changeovers may be to equipment, processes or operations. This unit applies to the structured development and/or improvement of the changeover procedures.

This unit requires the application of skills associated with communication, problem solving, initiative, enterprise, planning and organising in order to analyse and determine changeover procedures. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into the development of procedures.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

unit of competency. text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Analyse changeover	1.1	Critically observe changeover process
		1.2	Identify steps in changeover
		1.3	Identify start situation and required finish situation for changeover
2	Apply quick changeover principles	2.1	Identify changes to the start situation and required finish situation which are possible
		2.2	Identify internal and external changeover activities
		2.3	Identify activities which could be improved/eliminated
		2.4	Eliminate/reduce adjustments required after changeover
		2.5	Develop improved changeover process and recommendations for implementation procedure
		2.6	Liaise with relevant people to validate recommendations
3	Assess and minimise risks in changeover	3.1	Analyse hazards and risks from all steps in changeover
		3.2	Apply ergonomic principles and hierarchy of control to each equipment and manual hazard
		3.3	Assess any regulatory risk in changeover
		3.4	Minimise hazards during changeover ensuring final risk profile is acceptable
4	Implement	4.1	Acquire any required resources and approvals

improved changeover	4.2	Organise trials of improved changeover
	4.3	Monitor trial
	4.4	Make adjustments to changeover process
	4.5	Implement improved changeover process

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- critically analysing an existing changeover, including a detailed examination of all actions and delays and the times taken
- determining key steps in changeover
- identifying regulatory implications and other risks changes to procedures
- differentiating between habitual practice and necessary activity
- identifying opportunities to maximise external set up work
- communicating with others to explain and supervise changed procedures

Required knowledge

Required knowledge includes:

- principles of quick changeover
- equipment and operating environment of activities subject to quick changeover
- regulatory and commercial obligations and risk environment for operations subject to quick changeover analysis
- safe movement and other relevant occupational health and safety (OHS) principles
- relevant procedures
- purposes/requirements of changeover
- sourcing of resources
- trialling procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • observe and analyse steps in an existing changeover • manage risks in adjusting changeover procedures • develop changeover adjustments that deliver the greatest overall benefit • supervise changeover procedure trials.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenario, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess</p>

	<p>underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping
--	---

	<ul style="list-style-type: none"> • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Changeover	<p>Changeover may refer to:</p> <ul style="list-style-type: none"> • equipment exchanges, such as an exchange of dies/tools (traditional) • change between batches • change between campaigns (process manufacturing) • quantum equipment/process change to produce a different product
Quick changeover	<p>Quick changeovers may be known by a number of alternative titles depending on the industry sector. In manufacturing quick changeovers may be referred to as:</p> <ul style="list-style-type: none"> • single minute exchange of die (SMED) • single-digit set-up – performing a set-up activity in a single-digit number of minutes (i.e. fewer than ten) • one touch exchange of die (OTED) – literally, changing a die with one physical motion, such as pushing a button – broadly, an extremely simple procedure for performing a set-up activity <p>While the term die is the traditional term, organisations that require changeovers using other equipment are also covered by this unit.</p> <p>This unit may not be applicable to a totally continuous operation producing only the one product, or simultaneous range of products. This is not applicable to a maintenance/pressure vessel inspection (PVI) shutdown as experienced by the continuous process manufacturers. However, where there are continuous operations on a campaign basis, it may be applied to the development of changeover procedures between campaigns or similar changeovers</p>
Set-up work	<p>Set-up time is the work required to change over a machine or process from one item or operation to the</p>

	<p>next item or operation. It can be divided into two types:</p> <ul style="list-style-type: none"> • internal set-up work that can be done only when the machine or process is not actively engaged • external set-up work that can be done concurrently with the machine or process performing productive duties
Principles	<p>The principles of quick changeover include:</p> <ul style="list-style-type: none"> • the principles of efficient movement as well as an understanding of equipment features and aids, including jigs, fixtures, locating devices and mechanical aids which will reduce human effort and time required
Improved/eliminated	<p>Activities which should be improved/eliminated include:</p> <ul style="list-style-type: none"> • those which take time or are unreliable in terms of outcome • those which are difficult to do or have adverse OHS implications (e.g. repetitive strain injury, back injury and finger injuries)
Hazards and risks	<p>Hazards and risks include those related to:</p> <ul style="list-style-type: none"> • OHS • regulatory compliance • environment • commercial and contractual obligations <p>An acceptable risk profile for changeovers is one which, at the minimum, meets regulatory and organisation requirements and does not increase the current risk profile</p>
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plan • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other

MSS405021A Develop a Just in Time system

Modification History

New unit, superseding MSACMT621A Develop a Just in Time (JIT) system* - Not equivalent

* Prerequisite MSACMC410A Lead change in a manufacturing environment - removed

Unit Descriptor

Not applicable.

Application of the Unit

This unit applies to a person responsible for planning and implementing a JIT system. It includes consulting with employees, suppliers and customers regarding the change. This may require identification of training and other employee support as well as identifying possible logistical support.

The unit includes kanban-based JIT systems but also applies to other sectors and systems where a traditional kanban-type JIT may not be suitable through the unit's coverage of JIT principles.

This unit requires the application of skills associated with communication in gathering, analysing and applying information, consulting with stakeholders, problem solving, and demonstrating initiative and enterprise. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into the JIT design.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Design the JIT system/system improvements	1.1	Identify value chain members
		1.2	Consult with internal and external value chain members
		1.3	Identify current storage/inventory in value chain
		1.4	Determine flow authorisation indicators
		1.5	Determine minimum and maximum operations rate
		1.6	Determine lead time for product or service
		1.7	Determine number of units per kanban
		1.8	Draft workable procedures to implement JIT
2	Implement the JIT system/improvements	2.1	Consult with key internal stakeholders to develop solutions to JIT issues
		2.2	Ensure all stakeholders have required JIT-related skills and related issues have been resolved
		2.3	Liaise with key external members of the value chain to develop solutions to JIT issues
		2.4	Develop implementation plan for JIT
		2.5	Determine key measures of JIT
3	Monitor the JIT	3.1	Monitor key measures of JIT

- system
- 3.2 Regularly liaise with key stakeholders seeking areas for improvement
 - 3.3 Identify areas in need of improvement

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating at all levels in the organisation and value stream and to audiences of different levels of literacy and numeracy
- undertaking self-directed problem solving and decision-making on issues of a broad and/or highly specialised nature and in a wide variety of contexts
- analysing equipment, operations and value stream and determining best flow authorisation strategy, including:
 - form of kanban or flow authorisation indicator
 - integration with operations and other competitive systems and practices tools and techniques
 - key measures and monitoring strategy for JIT system
 - procedures to be adopted in the event of a non-conformance
- problem solving JIT issues and non-conformances to root cause

Required knowledge

Required knowledge includes:

- needs of internal and external value chain members
- principles of JIT, including:
 - demand pull
 - flow authorisation
 - kanban
 - capability rate
 - monitoring
 - non-conformance procedures
- reasons for delays/storages/inventories in the value stream and methods of reducing/eliminating them
- methods of identifying skill gaps and methods of filling skill gaps

- key business objectives associated with implementing JIT
- principles of the operational processes relevant to the JIT implementation
- production data generated by the process and its application to JIT

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • develop a complete JIT system, including: <ul style="list-style-type: none"> • implementation strategy • key measures • training and support strategy for employees and value chain members • procedures in the event of a non-conformance • communicate and negotiate complex issues to a wide variety of individuals • supervise JIT implementation and suggest improvements.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a</p>

	<p>combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>This unit may be assessed concurrently with:</p> <ul style="list-style-type: none"> • MSS405002A Analyse and map a value stream, and/or • MSS405050A Determine and improve process capability. <p>This unit is related to:</p> <ul style="list-style-type: none"> • MSS402021A Apply Just in Time procedures • MSS403021A Facilitate a Just in Time system <p>which cover the lowest and intermediate skill levels in competitive systems and practices respectively.</p> <p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of

the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>JIT</p>	<p>JIT is a production scheduling concept that calls for any item or service needed at a production operation, whether raw material, components, fuel, power, finished item, or anything else in between raw material and delivery to the final customer, to be produced and available precisely when needed, neither a moment earlier nor a moment later. JIT principles may also be applied to non-product based manufacturing operations (e.g. where services</p>

	must be delivered on demand, such as transport)
Kanban	<p>Kanban is a signal to authorise production or movement of an item to the next stage of production or operations. It is often a physical item for example a card, bin or sheet. When fully implemented, kanban operates according to the following rules:</p> <ul style="list-style-type: none"> • all production and movement of parts, material or other necessary items takes place only as required by a downstream operation • the specific tool which authorises production or movement is called a kanban <p>Kanban is typically applied to batch type operations and the production is measured in units produced. In continuous operations organisations, production is measured in terms of production rate (e.g. kg/h, tonne/day) and rate is increased/decreased according to the flow authorisation which may be a kanban (e.g. ticket or order from a supplier) or may be a SCADA signal from a remote facility (e.g. customer tank) saying that resupply is required or similar.</p> <p>In service operations a physical kanban may not be used – see flow authorisation indicator</p>
SCADA	<p>SCADA refers to:</p> <ul style="list-style-type: none"> • a number of systems which automatically collect critical process data, perform required mathematical manipulations on it and then make control decisions and/or give required information personnel for action
Value stream	<p>The value stream begins with the customer and includes all actions (both value-adding and non-value added) by both internal sections/departments and external organisations to meet a customer requirement.</p> <p>Depending on the operations and the customer requirement stages where value stream actions may occur include:</p> <ul style="list-style-type: none"> • sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/ collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer

	<ul style="list-style-type: none"> • after market support
Flow authorisation indicator	<p>Flow authorisation indicator may include:</p> <ul style="list-style-type: none"> • kanban bin, ticket or similar • other indicator of demand pull
Pull system	<p>Pull system includes:</p> <ul style="list-style-type: none"> • an operations planning system which makes to demand, rather than for stock or to a forecast
Cards/bins	<p>Cards/bins include:</p> <ul style="list-style-type: none"> • the indicators used for production authorisation and may be physical cards or bins or some other suitable indicator
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other format
Key measures	<p>Key measures may include:</p> <ul style="list-style-type: none"> • inventory levels • lead time • in full, on time and in specification (IFOTIS) delivery • productivity/production rate • other measures of pull through the value chain • quality

MSS405030A Optimise cost of a product or service

Modification History

New unit, superseding MSACMT630A Optimise cost of product* - Not equivalent

* Prerequisite *MSACMT631A Undertake value analysis of product costs in terms of customer requirements* - removed

Unit Descriptor

This unit of competency covers the skills and knowledge required to examine the costs of a product or service and determine methods of reducing costs.

Application of the Unit

This unit applies to an individual who is required to undertake a detailed study of a product or service's costs, including analysing it by its cost components to determine the best method of lowering the cost overall. This unit differs from *MSS405031A Undertake value analysis of a product or process costs in terms of customer requirements*, in that it looks at all costs, including overheads and takes a wider and more traditional approach to the cost of the product. Information and cost reduction strategies gained from the application of this unit may support other cost approaches in the enterprise, including value stream costing.

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information. Problem solving, initiative and enterprise, and planning and organising are required to calculate cost components and determine cost optimisation strategies. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into costing methods.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|---|-----|--|
| 1 | Analyse total cost components of a product or service | 1.1 | Identify all cost components of product or service |
| | | 1.2 | Allocate cost components to major categories, such as overhead, depreciation, energy, consumables and labour |
| | | 1.3 | Distinguish between costs which directly deliver customer features/benefits and waste |
| 2 | Optimise costs | 2.1 | Analyse causes of costs which lead to customer features/benefit |
| | | 2.2 | Determine methods of increasing the customer benefit/cost ratio |
| | | 2.3 | Analyse causes of waste costs |
| | | 2.4 | Determine methods of reducing/eliminating waste costs |
| | | 2.5 | Analyse interactions between cost components |
| | | 2.6 | Check that one method of reducing costs does not cause an increase in another cost/reduction in consumer benefit |
| | | 2.7 | Check that cost reduction plans do not reduce required levels of regulatory compliance or occupational health and safety (OHS) |
| 3 | Implement cost optimisation | 3.1 | Develop cost optimisation plans |
| | | 3.2 | Negotiate with relevant people to agree on implementation plans |

- 3.3 Take actions to implement the cost optimisation
- 3.4 Monitor the implementation of the cost optimisation
- 3.5 Make adjustments to the plan, as required

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- undertaking self-directed problem solving and decision-making on issues of a broad and/or highly specialised nature and in a wide variety of contexts
- communicating at all levels in the organisation and value chain and to audiences of different levels of literacy and numeracy
- identifying relevant cost component categories for organisation, product and process
- identifying customers, including final customer and features/benefits as valued by customers
- expressing customer features/benefits in cost terms
- determining application scope of cost reduction plan, including product/s, areas, employees and suppliers included in plan

Required knowledge

Required knowledge includes:

- cost components of product
- major costs which are controllable (and how to control them)
- concept and types of waste (muda)
- interrelationship of cost components and costs and benefits, including:
 - methods of estimating costs/benefits
 - acceptable benefit/cost ratios

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • determine relevant cost categories for a product or service • determine which costs are waste • develop a cost optimisation plan • implement and monitor the plan .
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads, hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.

	disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree
--	---

	<p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Waste	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product. Within operations, categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items • activities which do not yield any benefit to the organisation or any benefit to the organisations customers
Cost	<p>Cost includes:</p> <ul style="list-style-type: none"> • the monetary value of expenditures able to be directly identified for supplies, services, direct labour, materials, components, cost of inventory, faults and reworks, rejects/scrap, equipment and other items used in the production of the product • allocations and estimates for indirect costs (e.g. indirect labour, rent, energy, water and cost of capital) where a direct monetary value cannot be identified
Cost optimisation plans	<p>Cost optimisation plans should include:</p> <ul style="list-style-type: none"> • application scope (e.g. product/s, services, areas, employees and suppliers included in plan) • target costs and target cost reductions • implementation period • method of monitoring • method of communicating progress to stakeholders
