The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	This competency unit includes the analysis of plant, equipment and equipment components. This competency applies to all work environments and sectors within the chemical, hydrocarbons and oil refining industry, but does require both a theoretical/ mathematical and a practical analysis of the process. The competency does not require a knowledge of industry sectors and materials other than that in which the technician works. It assumes an understanding of the operation of all relevant equipment and processes but does not necessarily require them to be used personally. Typical problems include: • worn equipment/components • validation of new equipment/components to design specification • performance analysis in order to upgrade process performance.
Health, safety and environment (HSE)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

PSPETH002 Uphold and support the values and principles of public service

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPETHC401A Uphold and support the values and principles of public service. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to contribute to an ethical workplace and participate in ethical decision making.

This unit applies to those working in public sector roles but may be applied to anyone working in a similar organisational context.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would generally work independently and as part of a team, where they may have some supervisory responsibilities. They would perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Ethics

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Contribute to an ethical workplace	1.1 Access, interpret and apply information on ethical values. 1.2 Discuss and confirm application of ethical values and principle with senior management and colleagues to ensure common understanding and application. 1.3 Assist others to access and use public sector ethics legislation and guidelines to ensure compliance with requirements. 1.4 Explain the differences between ethics and personal beliefs to others to encourage understanding and compliance with the principles of procedural fairness. 1.5 Identify and discuss with work colleagues hypothetical work practices that would constitute unethical conduct including strategies to avoid or deal with them.
2. Participate in ethical decision-making	2.1 Identify real and potential ethical problems, and the decision-making processes used to resolve or refer them. 2.2 Monitor and access information to ensure currency in ethical knowledge. 2.3 Develop judgment through involvement in workplace discussions or ongoing professional development related to ethical standards and practices. 2.4 Support staff to contribute to ethical discussions and problem-solving. 2.5 Use processes for preventing and reporting unethical conduct and assist others in their application.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

Assessment Requirements for PSPETH002 Uphold and support the values and principles of public service

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. The candidate must demonstrate evidence of performance of the following on at least one occasion:

- accessing legislation and codes of ethics electronically or in hard copy
- applying objective and impartial evaluation of ethical problems
- preparing written reports that contain information that is impartial, substantiated, accurate and complete
- adjusting communication methods to suit different audiences

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- the nature of public sector ethics and ethical values as opposed to personal beliefs/value systems
- fundamental ethical principles including at least one of:
  - natural justice
  - procedural fairness
  - respect for persons
  - responsible care
- equal employment opportunity, equity and diversity principles
- procedures and protocols for reporting unethical conduct

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Access and use legislation and guidelines	1.1 Access the range of legislation and guidelines common to employment in a public sector organisation. 1.2 Identify the key principles contained in the legislation and guidelines. 1.3 Clarify information in order to confirm own understanding. 1.4 Apply the principles contained in legislation and guidelines to individual workplace practice.
2. Access and use organisational information	2.1 Identify the staffing and organisational structure. 2.2 Identify and clarify procedures for dealing with staff at all levels of the organisation. 2.3 Identify procedures for dealing with clients. 2.4 Identify sources of assistance and types of assistance available from each source.
3. Work with diversity	3.1 Demonstrate appreciation of the differences between colleagues through workplace behaviour. 3.2 Use effective communication styles to take account of workplace diversity and reflect the principles of emotional intelligence. 3.3 Make contribution to the workgroup to utilise personal strengths and take any opportunities provided to develop new competencies. 3.4 Meet the requirements of multicultural awareness and anti discrimination legislation.
4. Investigate career options	4.1 Identify personal working and learning styles, values and attitudes and weigh against the requirements of current and potential work opportunities. 4.2 Identify and prioritise personal work goals. 4.3 Seek advice on future work/career options. 4.4 Identify a range of possible career paths and undertake initial planning to map out broad competency areas and experiences required to pursue them. 4.5 Plan personal development to prepare for career options. 4.6 Seek and access learning opportunities in line with personal work goals.

PSPGEN003 Deliver a service to clients

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV203B Deliver a service to clients. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to provide service to clients within a prescribed framework. It includes matching client service to needs and delivering client service.

This unit applies to those working as generalist or specialist public sector workers but may be applied to other similar roles.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision and in a team environment while performing routine tasks in mostly familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

PSPGEN009 Work effectively in the organisation

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV301B Work effectively in the organisation. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to work effectively in a public sector organisation with a focus on self-management. It includes evaluating and developing your own expertise, identifying career options, working within the organisational structure and culture, and managing your own work.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work in teams or autonomously, performing routine tasks in familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Evaluate and develop own expertise	1.1 Make self-assessment of work-related competencies by reflecting on own workplace experience and training, and from monitoring feedback on performance in the workplace. 1.2 Undertake research to identify possible careers and compare the requirements of these careers with current skill base and development opportunities available within the organisation and across the public sector. 1.3 Identify areas requiring competency development by comparing current competencies with the competency requirements of current or anticipated duties. 1.4 Set personal learning goals and monitor progress towards them. 1.5 Identify and access potential competency recognition or development opportunities. 1.6 Maintain records of competency development and convey work-related competencies and experience to relevant people as required.
2. Work within the organisational structure and context	2.1 Develop and use a comprehensive knowledge of the organisation's structure and function. 2.2 Develop and use an understanding of the organisation's context. 2.3 Identify the work unit's position in the organisational structure, examine its relationship with other organisational work units and determine any protocols, difficulties or special requirements. 2.4 Identify and confirm the contribution of the work role and the work unit to the organisation's vision, goals and outcomes. 2.5 Undertake work in a manner that has regard for the workgroup position and the organisation's structure, functioning, culture and vision.
3. Manage own work	3.1 Identify, clarify and prioritise individual work goals. 3.2 Identify and manage risks to the achievement of personal work outcomes in accordance with organisational risk management requirements. 3.3 Select work strategies with regard to applicable work parameters. 3.4 Monitor progress with work against set goals, strategies and outcomes. 3.5 Achieve work goals and revise work plans to attend to ongoing or new responsibilities.

Assessment Requirements for PSPGEN009 Work effectively in the organisation

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking self-reflection
- communicating with diverse audiences including discussion of competency recognition or development needs
- presenting/reporting information to others
- writing including work plans, curriculum vitae, records, reports, referrals
- reading and interpreting organisational materials
- planning and time management
- using numeracy skills to manage time and undertake mathematical tasks embedded in information or instructions

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including work health and safety and environment, regulations, policies, procedures and guidelines relating to work in the public sector
- competency requirements of current duties
- principles of career planning/development and taking responsibility for own learning and development
- self-assessment techniques
- alternative work strategies

© Commonwealth of Australia, 2024 Public Skills Australia

- range of learning and development strategies
- the organisation's risk management procedures

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPGEN011 Build and maintain internal networks

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV303B Build and maintain internal networks. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to build and maintain internal networks. It includes identifying key internal stakeholders, building network links and participating in internal networks.

This unit applies to those working in a role where the exchange of information between workgroups depends on building and maintaining good internal networks.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit will be working independently where some support is available from a mentor, performing routine tasks in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for PSPGEN011 Build and maintain internal networks

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations and policies relating to public sector environment
- using interpersonal and group communication, including negotiation and consultation, within diverse internal networks using formal and informal organisational channels
- identifying and obtaining assistance to resolve conflicts in a networking context

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including work health and safety and environment, regulations, policies, procedures and guidelines relating to work in a public sector environment
- organisational structure and protocols
- principles of interpersonal, group, system and organisational communication
- principles of conflict resolution

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

© Commonwealth of Australia, 2024 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPGEN014 Organise workplace information

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV307B Organise workplace information. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to organise information in the workplace. It includes collecting, assessing, organising and disseminating information.

This unit applies to those working in an environment where they are required to manage information as part of their role.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit will be working as part of a team or independently where support is available for more complex situations. They will perform routine tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

PSPGEN023 Deliver and monitor service to clients

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV402B Deliver and monitor service to clients. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to identify client needs, deliver a service, monitor through feedback and then review the service.

This unit applies to those working in public sector roles but may be applied to anyone working in a similar organisational context.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would be working under supervision, performing routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

General

© Commonwealth of Australia, 2024 Public Skills Australia

Elements and Performance Criteria

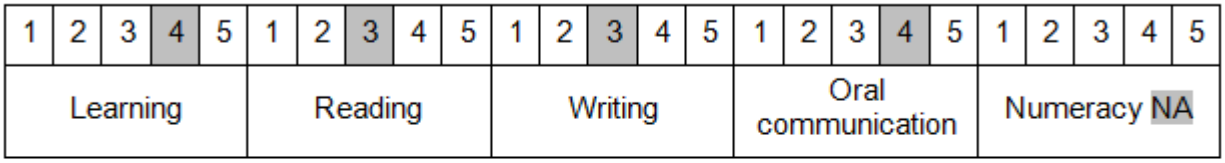
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify and define client needs	1.1 Identify services required by client, ensuring needs of clients are recognised and addressed. 1.2 Identify potential difficulties and address or refer for recommended action.
2. Deliver client service	2.1 Respond to client enquiries. 2.2 Tailor communication to the situation and the client's specific needs. 2.3 Negotiate or use conflict resolution techniques to resolve difficult situations, or refer where appropriate. 2.4 Undertake remedial actions for clients with specific needs or in potential areas of difficulty. 2.5 Use accountability measures, including the organisational client service charter, client service records, grievance procedures and/or external review.
3. Monitor and improve client service delivery	3.1 Monitor service delivery and use feedback to and from colleagues to improve personal service. 3.2 Convey changes in policies and procedures that impact upon client relations. 3.3 Seek advice and assistance where necessary, to deal with client service issues, meeting changing needs and achieving service potential.
4. Review client service	4.1 Monitor procedural aspects of service delivery and maintain records. 4.2 Seek client feedback and propose changes in response to feedback on service development and delivery. 4.3 Carry out modifications to client service within limits and area of responsibility.

Foundation Skills

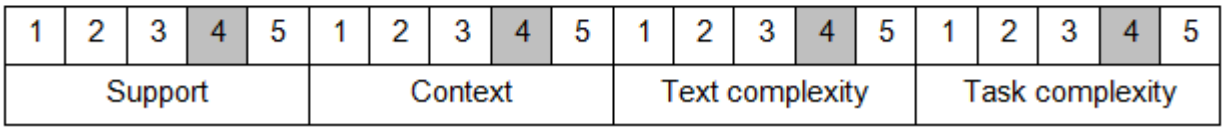
The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2024 Public Skills Australia

ACSF levels indicative of performance :



Performance variables



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to PSPGOV402B Deliver and monitor service to clients.

Assessment Requirements for PSPGEN023 Deliver and monitor service to clients

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations and policies relating to client service
- using communication methods with a diverse range of clients including negotiation and problem solving
- using a variety of words and language structures to explain sometimes complex ideas to different audiences
- analysing feedback on client service delivery
- recommending improvements to client service delivery within organisational constraints

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- legislation, policies, procedures, standards and guidelines relating to client service
- principles of effective client service delivery
- client services provided by the organisation
- limitations of resources for service delivery

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

PSPGEN024 Use resources to achieve work unit goals

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV403B Use resources to achieve work unit goals. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to organise available resources at a senior operative level to facilitate achievement of work unit objectives. It includes acquiring and applying available resources, monitoring and reporting on resource usage and maintaining resources.

This unit applies to those working in senior roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously, supervising others performing complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Deal with complex enquiries and/or complaints	1.1 Establish relationship with the client by displaying understanding towards client needs, and the nature of complaint and/or enquiry by listening, questioning and confirming. 1.2 Record complaint and/or enquiry, and verify with the client. 1.3 Obtain documentation to support complaint and/or enquiry if required. 1.4 Identify action available under organisational policies, and follow procedures to respond to and resolve complaint and/or enquiry. 1.5 Identify and refer complaints and/or enquiries that require other personnel or external organisations' input to resolve. 1.6 Advise client of action taken to resolve the complaint and/or enquiry and record.
2. Give directions	2.1 Give ethical, lawful and reasonable directions to others, and protect staff from reprisals for refusing directions to act unethically. 2.2 Give directions and confirm understanding of directions. 2.3 Resolve problems or refer if required. 2.4 Provide feedback on implementation.
3. Manage meetings	3.1 Clarify purpose of each meeting and develop the agenda in consultation with participants. 3.2 Select procedure for each meeting and style of facilitating. 3.3 Chair meetings in accordance with agreed conventions for the type of meeting and legal and ethical requirements. 3.4 Ensure meetings are focused on the objectives of the meeting and are time efficient. 3.5 Enable participation, discussion, problem solving and resolution of issues by all those present. 3.6 Summarise decisions and recommendations, check for accuracy and record as required.
4. Make presentations	4.1 Make presentations to a range of audiences. 4.2 Structure presentations logically and ensure they contain relevant information to meet the purpose of the presentation. 4.3 Create, organise and select supporting materials and presentation aids to enhance audience understanding of key concepts and ideas.

© Commonwealth of Australia, 2024 Public Skills Australia

	4.4 Choose presentation strategies to match the characteristics of the target audience, the location, the resources and the personnel needed. 4.5 Evaluate effectiveness of the presentation formally and informally for the purpose of continuously improving future presentations.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPGOV412A Use advanced workplace communication strategies.

Assessment Requirements for PSPGEN033 Use advanced workplace communication strategies

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- speaking and listening relating to sustained and sometimes complex communication exchanges
- taking part in interpersonal exchanges of information, with a flexible use of register and strategies for interaction
- dealing with complaints, clarifying meaning, exploring issues and using problem solving or referral
- deriving meaning from sustained oral discussions
- using observation to read non-verbal cues, especially those relating to culture, ethnicity, emotional state
- using presentation software

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including WHS and environment, regulations, policies, procedures and guidelines relating to workplace communication
- complaints procedures
- conflict resolution techniques
- knowledge of organisation processes and hierarchy
- official communication channels
- organisational protocols and etiquette for oral communication

© Commonwealth of Australia, 2024 Public Skills Australia

- meeting formats and facilitation/chairing requirements to suit
- presentation styles to suit different audiences

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPGEN034 Compose complex workplace documents

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV413A Compose complex workplace documents. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to compose written complex workplace documents. It includes interpreting and evaluating workplace information and editing.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently performing complex tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Interpret and evaluate workplace information	1.1 Seek information from inside and outside the organisation and analyse sources for reliability. 1.2 Distinguish cultural context of the information and use to aid in interpretation. 1.3 Analyse information for relevance to own work and seek assistance with interpretation of complex materials. 1.4 Identify assumed prior knowledge underpinning workplace information and gather additional information if necessary. 1.5 Advise implications of information to relevant personnel.
2. Compose complex written materials	2.1 Determine the purpose, objectives and format for the materials. 2.2 Seek, collate and assess information to inform the document. 2.3 Determine content, structure and sequencing of materials in line with the purpose and intended audience. 2.4 Consider options for inclusion. 2.5 Assess possible impact on the target audience and counter potential criticism where necessary. 2.6 Review composed material to confirm objectives, organisational and legislative requirements are met, and submit materials within required timeframes.
3. Edit written material	3.1 Confirm intent of the communication. 3.2 Check content and proofread for grammar, spelling and punctuation. 3.3 Assess communication in light of the needs of the intended audience. 3.4 Make recommendations for improvement if necessary and record. 3.5 Amend information if required, and submit for approval.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- integrating information from a diverse number of sources in order to generate meaning
- writing and sequencing abstract concepts according to the required purpose of written material
- linking complex ideas in written material through selection and use of words, grammatical structures, headings and punctuation appropriate to the purpose

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including WHS and environment
- regulations, policies, procedures and guidelines relating to written communication in the public sector, including privacy, freedom of information, information security, confidentiality and copyright
- principles of effective written communication at a high level of complexity
- differences in register/style between workplace communication for different purposes
- government style manual
- organisation protocols for complex written communication
- channels of communication and processes for obtaining advice and approvals
- organisational policy for recordkeeping – paper-based and electronic

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Establish the need for mentoring	1.1 Identify purpose of the mentoring relationship. 1.2 Clarify expectations and goals of the mentoring relationship with the other party. 1.3 Identify and confirm skill sets that may be shared within the objectives of the mentoring relationship. 1.4 Negotiate and agree upon a mentoring agreement in accordance with the identified need, personal expectations and cultural or other considerations.
2. Develop a mentoring plan	2.1 Identify the scope and boundaries of the mentoring relationship. 2.2 Establish ground rules and negotiate realistic expectations. 2.3 Establish and maintain confidentiality of the relationship. 2.4 Manage the perceptions of others outside the mentoring relationship.
3. Facilitate mentoring relationship	3.1 Share personal experiences and knowledge with the person being mentored, in accordance with agreed objectives. 3.2 Support the person being mentored to develop skills in problem solving and decision making. 3.3 Use personal and professional networks to assist the person being mentored. 3.4 Assist the person being mentored to identify and access opportunities for development. 3.5 Use techniques for resolving differences without damaging the relationship, or seek assistance.
4. Monitor mentoring relationship	4.1 Provide planning assistance and guidance as requested. 4.2 Provide feedback on progress towards achieving the expectations and goals of the mentoring process. 4.3 Recognise and discuss changes in the mentoring relationship. 4.4 Negotiate and manage closure of the mentoring arrangement.
5. Evaluate effectiveness of mentoring	5.1 Establish and discuss benefits gained from the mentoring process. 5.2 Identify and report the benefits and outcomes of the mentoring arrangement for the organisation.

PSPGEN038 Identify and treat risks

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV417A Identify and treat risks. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to identify and treat risk using the organisation's risk management procedures and treatments. It applies to the risks inherent in all aspects of everyday work in the public sector as well as to specific functional activities and projects related to the particular mandate of the organisation. It includes establishing the risk context, analysing and evaluating risks and monitoring and reviewing the risk treatment plan.

This unit applies to those working in generalist or specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Establish the risk context	1.1 Establish the nature and extent of the work activity within the broader organisational context. 1.2 Identify and document outcomes to be achieved. 1.3 Analyse relationship between the activity and its environment and identify critical factors in the environment that may impact on the achievement of outcomes. 1.4 Identify and consult stakeholders to understand their opinions, concerns and needs. 1.5 Determine risk evaluation criteria for the activity.
2. Identify risks	2.1 Select method/s for identifying risks in accordance with risk management policy and procedures, budgetary and time constraints relative to the type of activity to be undertaken. 2.2 Identify and document sources of risk as required. 2.3 Identify and record risk events related to each source of risk. 2.4 Undertake consultation to ensure all possible risks are identified.
3. Analyse risks	3.1 Analyse and rate the probability of identified risks occurring and consequences. 3.2 Consider current control measures for any of the identified risks in the risk analysis, and analyse and include residual risks if necessary. 3.3 Determine levels of risk in accordance with risk matrix used by the organisation. 3.4 Consult as required to confirm risk levels, and document analysis.
4. Evaluate risks	4.1 Evaluate risks by comparing the level of risk with risk evaluation criteria established at the beginning of the risk management process. 4.2 Consider the importance of the activity, its outcomes and the degree of control over the risks. 4.3 Consider potential and actual losses which may arise from the risk. 4.4 Take into account benefits and opportunities presented by the risk. 4.5 Identify risks as acceptable or unacceptable in accordance with risk evaluation criteria, and obtain approval. 4.6 Prioritise unacceptable risks and document the reason/s for

© Commonwealth of Australia, 2024 Public Skills Australia

	acceptance of risks.
5. Treat risks	5.1 Determine options for treating risks. 5.2 Select the best treatment option and undertake a cost-benefit analysis. 5.3 Prepare, approve and communicate a risk treatment plan to those who will be involved in implementation. 5.4 Negotiate changes required to operational structure, procedures or staffing in order to implement risk treatments. 5.5 Organise resources and implement risk treatment plan.
6. Monitor and review risk treatment plan	6.1 Monitor changes in the organisational environment and factors impacting on the organisation for their impact on risks and existing risk treatments. 6.2 Monitor and adjust risk treatments for unacceptable risks as required. 6.3 Monitor acceptable risks to ensure these risk levels do not increase over time. 6.4 Consult and collect, analyse and use data relating to risks and risk treatments to improve risk management in own area of operation. 6.5 Review risk treatment plan in accordance with timetable for review of plan and updated as required. 6.6 Provide input into formal reviews of risk in the organisation to improve risk management outcomes.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Analyse client needs	1.1 Gather information on the client group from a range of sources. 1.2 Use information on the client group to target service provision for clients. 1.3 Identify clients and their specific needs to enable the service to be provided and expanded in order to respond to changing needs. 1.4 Seek and consider client feedback in order to respond to changing needs.
2. Review client service	2.1 Record, maintain, share and use client information to ensure future client dealings and service developments are well informed. 2.2 Use client feedback on service delivery to refine the service. 2.3 Undertake client service delivery in a manner that upholds and enhances the reputation of the organisation. 2.4 Identify and address individual differences of clients. 2.5 Identify significant problems in addressing client needs and refer to appropriate staff.
3. Promote client services	3.1 Promote services to existing and/or potential clients to ensure that the benefits and costs of the service are clearly understood. 3.2 Promote a range of service options for clients. 3.3 Assist clients, using a range of communication techniques, to identify their needs and select the best available service. 3.4 Negotiate and use conflict resolution techniques to resolve difficult situations, or refer.
4. Develop and enhance client service	4.1 Ensure improvements to client service are within policy and budgetary frameworks. 4.2 Establish and implement appropriate strategies for meeting changing client needs. 4.3 Use information on the product and/or service to match client needs with service delivery. 4.4 Modify specified aspects of the service or service delivery to meet changing client and service requirements. 4.5 Adapt client service within procedural and legislative requirements to maintain high standards of delivery.

Assessment Requirements for PSPGEN044 Develop client services

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations and policies relating to client service
- recordkeeping and interpreting records
- monitoring and evaluation
- communicating with a diverse range of clients, including through negotiation and problem-solving
- using a variety of words and language structures to explain sometimes complex ideas to different audiences
- analysing feedback on client service delivery

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including WHS and environment, policies, procedures, standards and guidelines relating to client service
- principles of client service delivery in the public sector
- organisation specific client services available
- organisation client service standards
- client services provided by the organisation
- organisational goals and processes
- government processes
- limitations of resources for service delivery

PSPGEN045 Coordinate resource allocation and usage

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV503B Coordinate resource allocation and usage. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to coordinate and monitor available resources to achieve work unit outcomes. It includes allocating available resources, monitoring and evaluation of resource usage and reporting on resource usage.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Monitor and evaluate resource usage	1.1 Identify, seek and allocate required resources to enable achievement of work unit objectives. 1.2 Implement systems to enable monitoring and evaluation of resource usage against targets and organisational standards. 1.3 Maintain records of resource allocation and usage. 1.4 Identify, analyse and address resource usage issues within limits of individual delegation or refer. 1.5 Allocate replacements or additional resources as required.
2. Report on resource usage	2.1 Report resource usage in required format and on a regular basis. 2.2 Complete reports to indicate the level of performance achieved and any follow up action. 2.3 Apply technology to resource management systems.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPGOV503B Coordinate resource allocation and usage.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify and undertake research	1.1 Define information needs based on work objectives and client and organisation requirements. 1.2 Evaluate and select potential sources of information and the format in which they are presented in line with the purpose and audience for the research. 1.3 Develop strategies to acquire required information. 1.4 Research information in a thorough way and within resource allocation. 1.5 Assess quantity, quality and relevance of initial search results and fill gaps using the same or adjusted research strategies. 1.6 Communicate the methods and outcomes of research, and the criteria used to make information decisions and choices.
2. Analyse information and apply the results of analysis	2.1 Examine, compare and evaluate information from various sources for content, structure and logic. 2.2 Select analytical techniques and processes in line with defined objectives. 2.3 Collate, consolidate and analyse information and advise senior staff of outcomes. 2.4 Identify facts, issues, patterns, interrelationships and trends through analysis in accordance with research aims. 2.5 Meet agreed project timelines and the defined standards of the organisation.
3. Maintain information systems	3.1 Maintain, validate and reconcile information systems so that data and system integrity are assured. 3.2 Maintain a range of standard and complex information systems and applications. 3.3 Review and update information systems as necessary.
4. Compile reports from information systems	4.1 Use the findings from analysing information to meet client and/or organisational needs and organisation standards. 4.2 Determine and organise content of reports in a manner that supports the purposes and format of the organisation and audience. 4.3 Sequence the reporting of results and ensure it includes predictions, assumptions and constraints where relevant.

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Develop coaching/ mentoring strategy	1.1 Research the potential for coaching and mentoring within the organisation. 1.2 Implement and promote a coaching and mentoring framework, linked to other human resource strategies in the organisation. 1.3 Outline benefits to all parties involved in coaching and mentoring, ensuring consistency with the organisation's philosophy and goals. 1.4 Establish ground rules for coaching and mentoring in the organisation. 1.5 Develop timelines for the implementation of the strategy with key stakeholders. 1.6 Seek organisational support and resources for the strategy.
2. Establish a coaching/ mentoring framework	2.1 Identify a range of coaching/mentoring models to suit the organisation's needs. 2.2 Arrange training for those interested in being coaches, coached, mentors and/or mentored. 2.3 Develop and monitor the requirements of coaching and mentoring contracts/agreements in accordance with the strategy. 2.4 Identify the range of stages in coaching and mentoring relationships and ensure flexibility in the framework. 2.5 Formalise protocols for matching participants and dealing with difficulties, disputes and grievances.
3. Implement and support coaching and mentoring	3.1 Promote the value of coaching and mentoring at all levels of the organisation. 3.2 Identify opportunities for mentoring and coaching and communicate to interested parties. 3.3 Use internal and external networks to support coaching and mentoring. 3.4 Suggest techniques and practices for resolving differences without damaging relationships, or provide assistance.
4. Monitor coaching and	4.1 Encourage people involved in coaching and mentoring to reflect on organisational processes, organisational support and their

© Commonwealth of Australia, 2024 Public Skills Australia

mentoring arrangements	activities to identify opportunities for improvement and innovation. 4.2 Evaluate and implement recommendations made for improvements in the coaching/mentoring strategy as necessary.
5. Consolidate opportunities for further coaching and mentoring	5.1 Recognise and acknowledge positive contributions of individuals to coaching and mentoring arrangements. 5.2 Celebrate and reward positive changes created through coaching and mentoring arrangements. 5.3 Identify and promote ongoing opportunities for coaching and mentoring.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan for negotiation	1.1 Clarify the purpose of the negotiation and the issue/s under consideration with affected personnel and through analysis of all related information. 1.2 Identify primary needs and desired outcomes of all parties. 1.3 Determine the organisation's position in consultation with senior personnel, and devise a negotiation approach based on an analysis of the strengths and weaknesses of the position. 1.4 Collect, analyse and organise information relating to the negotiation, including any precedents. 1.5 Agree upon timeframe and logistics, develop a negotiation plan and communicate to other staff, if any, involved in the negotiation team.
2. Conduct negotiation	2.1 Agree upon the issue/s under consideration and the negotiation process to be used with all parties and document. 2.2 Use negotiation techniques to persuade the other party of the strength of the argument in favour of the organisation's position. 2.3 Modify the negotiation plan if necessary to respond to contingencies. 2.4 Select and use techniques for dealing with conflict or deadlocks in accordance with the negotiation plan and the progress of the negotiation. 2.5 Discuss options for resolving the issue and determine the acceptability of these to the parties.
3. Finalise negotiation outcomes	3.1 Reach an agreed conclusion, document and obtain sign-off by the parties. 3.2 Report negotiation outcomes and debrief stakeholders if required. 3.3 Determine any further action required as a result of agreement and action. 3.4 Review the negotiation process and outcomes, and document lessons learnt for future use.

PSPGEN053 Provide leadership

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV511A Provide leadership. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to achieve operational results and effective working relationships through leadership, feedback and support of individuals in a workgroup that may exist in the workplace, be formed for a special purpose or project, or consist of community members, volunteers and/or interagency members. It includes facilitating commitment to objectives and required standards, contributing to the development of a cooperative, high performance workgroup, giving and receiving feedback on performance, supporting and participating in development activities, and providing leadership, direction and guidance in the workgroup.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously with management responsibilities performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Facilitate commitment to objectives and required standards	1.1 Discuss and clarify the organisation's vision, strategic objectives and required standards of performance with others in accordance with the needs, communication and learning styles of workgroup members. 1.2 Establish the purpose, objectives, roles and responsibilities in the workgroup. 1.3 Model commitment to objectives and standards to provide leadership and develop workgroup commitment. 1.4 Model and promote equal employment opportunity, workplace health and safety, diversity management and participative work practices within the workgroup.
2. Contribute to the development of a cooperative, high performance workgroup	2.1 Encourage, acknowledge and consider work contributions or suggestions. 2.2 Support workgroup members to use, share and develop their skills according to work requirements. 2.3 Facilitate work allocation within the group on the basis of current skills and development needs. 2.4 Consult with workgroup members in the implementation of new work practices. 2.5 Resolve conflict and other issues which affect performance within the workgroup wherever possible, or refer.
3. Give and receive feedback on performance	3.1 Seek feedback from others outside the workgroup on personal and workgroup performance, and give open and constructive responses to feedback. 3.2 Gather and provide regular constructive feedback on all aspects of work performance from and to the workgroup. 3.3 Assess and address performance and recognise and/or reward notable performance. 3.4 Address under performance of self and others. 3.5 Use feedback to continuously improve performance and outcomes.
4. Support and	4.1 Develop, agree upon and implement an action plan to meet

© Commonwealth of Australia, 2024 Public Skills Australia

participate in development activities	individual and group learning and development needs. 4.2 Support individuals to identify their specific learning and/or development needs. 4.3 Encourage and support workgroup members to take advantage of development opportunities in accordance with their needs. 4.4 Access learning and development opportunities to continuously improve own leadership skills and other identified development needs. 4.5 Provide on-the-job learning opportunities in accordance with individual needs and to the required standard. 4.6 Encourage and support workgroup members in applying new skills and knowledge in the workplace.
5. Provide leadership, direction and guidance in the workgroup	5.1 Use participative decision making in developing, implementing and reviewing the work of the group and the distribution of responsibilities, where appropriate. 5.2 Give opportunities and encouragement to workgroup members to develop new and innovative work practices and strategies. 5.3 Provide workgroup members with the support, leadership, advice and policy direction necessary to perform work. 5.4 Allocate tasks in accordance with the competencies of workgroup members, and delegate autonomy and authority as appropriate. 5.5 Vary leadership and guidance strategies to meet changing priorities and situations, and take into account the differing needs and skills of individuals and the requirements of the tasks and workplace.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

PSPGEN054 Use complex workplace communication strategies

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV512A Use complex workplace communication strategies. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to use complex workplace communication for working at middle management level with internal and external clients, colleagues and other staff. It includes preparing for complex communication, analysing and responding to opinions, presenting a convincing argument, and developing a range of communication strategies.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously with management responsibilities performing complex tasks, in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for complex communication	1.1 Clarify communication objectives, confirm those to be present and identify the communication mode. 1.2 Undertake analysis to anticipate the likely positions to be taken by those present on the matters under discussion. 1.3 Research and organise subject matter, identify and record key points to be conveyed, and summarise information to counter other positions. 1.4 Identify and incorporate requirements of legislation, policy and guidelines relevant to the discussion.
2. Analyse and respond to opinions	2.1 Evaluate discussion to identify impartiality, bias or unsupported argument. 2.2 Record points of view of other speakers and present information to counter opposing views. 2.3 Analyse reaction to speakers and their point of view to identify and manage emotional reactions and maintain objectivity. 2.4 Examine opposing or challenging views for their value in achieving the same ends. 2.5 Use active listening and questioning to clarify own understanding, challenge or justify other points of view.
3. Present a convincing argument	3.1 Choose communication approach to suit the given audience. 3.2 Assert prepared position with conviction and purpose. 3.3 Adjust verbal and non-verbal behaviour to maintain listener interest if the audience is unresponsive. 3.4 Use questions to elicit feedback and check audience understanding. 3.5 Respond to audience questions and arguments and support answers by reasoned explanation. 3.6 Negotiate agreement where possible, concluding with a summary of agreed items.
4. Develop a range of communication strategies	4.1 Seek feedback from others and assess the outcomes of communication. 4.2 Record and use lessons learnt to underpin future interactions. 4.3 Develop and practise language structures and features that influence audiences to a preferred point of view. 4.4 Explore and practise communication strategies for a range of

PSPGEN055 Refine complex workplace documents

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV513A Refine complex workplace documents. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to refine complex written workplace communication at a level where preliminary research or documents may have been prepared by others as input, and final documents are being prepared. It includes critical analysis of workplace information, composition, revision and refinement to meet workplace requirements.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify the political terrain	1.1 Identify and take into account stakeholder positions. 1.2 Analyse corporate politics to identify agendas and players. 1.3 Develop and utilise awareness of political agendas, both open and hidden. 1.4 Locate the current agenda in the wider context to appreciate the big picture and provide more than one perspective. 1.5 Identify and confirm the impact of the agenda on the work area.
2. Evaluate the political environment	2.1 Source information from inside and outside the organisation, and confirm its authenticity and reliability. 2.2 Analyse the political, social and economic environment and take into account emerging trends and current and possible future goals of the organisation.
3. Form alliances	3.1 Identify power structure and sources of power in the organisation and the wider public sector. 3.2 Identify people prepared to trade mutual support and assess the benefits. 3.3 Weigh the risks and benefits of possible alliances. 3.4 Lobby interested groups and/or individuals to gain support and acceptance of ideas and/or courses of action. 3.5 Build influence with key policy makers, decision makers and key influencers.
4. Bargain and negotiate to achieve outcomes	4.1 Develop sound positions with supporting arguments. 4.2 Formulate responses to possible contradictory positions. 4.3 Negotiate and refine positions with feedback from the negotiation process. 4.4 Achieve consensus with others for one’s position. 4.5 Implement outcomes.

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for high-level communication	1.1 Clarify communication objectives, confirm those to be present and identify communication mode. 1.2 Anticipate the likely attitudes of and positions to be taken by those present on the matters under discussion. 1.3 Consider communication styles of those to be present and assess their effect on the tone and likely progress of the discussion. 1.4 Undertake critical self-evaluation of communication strengths and vulnerabilities and compare with other participants' in planned encounters. 1.5 Research and organise subject matter, identify key messages and plan tactics to use personal strengths and maximise outcomes.
2. Critically analyse and respond to opinions	2.1 Listen to others critically and responsively to evaluate complex levels of meaning in spoken communication and to identify bias or unsupported argument. 2.2 Note tone, style, non-verbal elements and points of view of speakers and consider their use in influencing and affecting particular outcomes. 2.3 Analyse reaction to speakers and their point of view to identify and manage emotional triggers and maintain objectivity. 2.4 Welcome opposing or challenging views and examine them for their value in achieving the same ends. 2.5 Examine communication for subtext, significant inclusions and exclusions, socio-cultural values, attitudes and assumptions. 2.6 Explore complex concepts and ideas to clarify understanding, and to challenge and justify interpretations based on underlying assumptions, beliefs and values.
3. Persuade and influence others	3.1 Choose a communication approach to maximise effect with the given audience. 3.2 Assert sustained points of view with determination and conviction. 3.3 Modify content and approach when speaking to an unresponsive audience, and handle diversions and unexpected questions

© Commonwealth of Australia, 2024 Public Skills Australia

	confidently. 3.4 Use a variety of verbal and non-verbal behaviour to explain abstract ideas and expand on complex issues. 3.5 Respond to complex questions and arguments with reasoned explanation. 3.6 Handle disagreements or conflicting personalities objectively and negotiate agreements where possible, concluding with positive summaries of achievement.
4. Reflect on and hone communication strategies	4.1 Seek feedback from others, assess outcomes and analyse underlying interactions and motivations. 4.2 Analyse own vulnerability to emotional and other seductive appeals dispassionately. 4.3 Articulate and use lessons learnt to underpin future interactions. 4.4 Develop and practise sophisticated language structures and features that influence audiences. 4.5 Explore and practise creative and innovative communication strategies for a range of workplace applications.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- reading complex and formal documents, including legislation, policies, procedures, and accounting standards, and providing advice on their interpretation and application
- adjusting communication to suit different audiences
- using financial applications for entering data and preparing reports requiring accuracy of expression
- applying delegations
- working in accordance with public sector industry benchmarks
- accessing information and legislation electronically or in hard copy
- applying environmental and work health and safety procedures relating to working in the public sector
- applying numeracy skills and reading and interpreting financial information

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including work health and safety and environment, policies and processes relating to public sector finance
- public sector financial management compliance framework (detailed knowledge) and the relationship of the elements of the framework
- documents that make up the financial management compliance framework
- delegations and why the public sector uses them

© Commonwealth of Australia, 2024 Public Skills Australia

- internal controls, mechanisms for internal controls and why these are used
- separation of duties
- corporate governance requirements/relationship of financial management compliance framework to organisational structures
- service level agreements
- accrual accounting principles
- ethics/code of conduct

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPGEN082 Coordinate public affairs events and activities

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPPA502A Coordinate public affairs events and activities. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to coordinate public affairs events and activities. It includes planning and implementing events and activities, and evaluating implementation and outcomes.

This unit applies to those working in public affairs, managing relationships with the media.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently in consultation with others, performing complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Contribute to public affairs scope and direction	1.1 Conduct an environmental scan to identify public affairs issues and needs for the organisation. 1.2 Identify target audiences for public affairs action. 1.3 Develop public affairs objectives and programs in line with the organisation's business and strategic plans. 1.4 Develop criteria and measures for assessing objectives. 1.5 Identify resourcing requirements and negotiate the scope of public affairs activities in accordance with organisational priorities and resource constraints.
2. Plan and manage public affairs program	2.1 Develop operational plan for public affairs to integrate strategies and coordinate communications and activities. 2.2 Develop schedules for communications and activities that are flexible enough to provide for contingencies and emerging issues. 2.3 Define responsibilities and accountabilities, and identify reporting requirements and benchmarks for monitoring the program. 2.4 Implement and monitor public affairs program to ensure progress or make changes to achieve the program objectives. 2.5 Evaluate results in terms of media coverage, penetration and desired audience response, identify reasons for variations and make changes to improve results.
3. Develop crisis management communication strategies	3.1 Assess organisational activities and operations to identify potential crisis factors and evaluate risk management strategies. 3.2 Explore and determine the composition of a crisis communication team in terms of required specialist knowledge and guidance. 3.3 Identify training needs for potential spokespersons and organise media training. 3.4 Identify individuals and groups who must be contacted in crisis situations, establish lines of communication and confirm their roles and responsibilities. 3.5 Develop crisis management action plan and submit for approval.
4. Handle high-profile events	4.1 Undertake public affairs strategic planning for high-profile events. 4.2 Involve outside groups, partners, the media and business in sponsoring/supporting special events as required. 4.3 Apply and explain protocol standards to others as required to

© Commonwealth of Australia, 2024 Public Skills Australia

	ensure a positive organisational outcome from high-profile events. 4.4 Oversee and support the involvement of managers, staff and government representatives in high-profile events. 4.5 Prepare speeches and statements for management and other officials for special events or in times of crisis.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Advise on sensitive situations	1.1 Maintain close communication with national, regional and local media to identify and anticipate issues of significance to the organisation. 1.2 Identify and assess trends, public opinion and perspectives for their impact on the organisation. 1.3 Provide advice on sensitive issues as they arise and on emerging issues that may be politically sensitive for the organisation. 1.4 Ensure advice is based on well-researched background information, is objective and meets the organisation's needs. 1.5 Ensure advice includes strategies for dealing with sensitive situations while maintaining confidentiality, and handling breaches of confidentiality.
2. Advise on reactions to organisational action	2.1 Analyse proposed organisational policies, programs and actions for their impact on clients and/or the public. 2.2 Provide advice on anticipated or actual public and media reaction to proposed organisational changes. 2.3 Include in advice given strategies for ensuring full understanding of the benefits of change, minimising damage to the organisation's image and reputation, and recommendations to counter negative publicity. 2.4 Provide candid, objective and confidential advice.
3. Advise on organisational materials	3.1 Analyse draft materials produced by the organisation for political, social or economic issues relevant to the government as a whole, the intended audience and/or the public. 3.2 Identify cultural context of the information in terms of its relevance or otherwise to the target audience and the general population. 3.3 Identify stereotypes, bias, prejudice and motive and highlight for amendment. 3.4 Identify key issues, separate fact from opinion and explore underlying values and beliefs. 3.5 Synthesise information and prepare advice or feedback to ensure

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Liaise with media personnel	1.1 Obtain information on local, regional and national media contacts and keep up to date. 1.2 Confirm processes and procedures for dealing with the media, and establish requirements for format, presentation and deadlines for information. 1.3 Establish communication processes to develop mutual trust and cooperation, and to foster awareness of public affairs events and activities. 1.4 Provide information that is reliable and represents the current position of the organisation or situation to the media. 1.5 Handle situations where serious errors or misquoting occurs.
2. Negotiate media coverage	2.1 Assess the potential level of interest in particular events, and make activities and communications, and media selections to maximise coverage and achieve public affairs objectives. 2.2 Identify the form of information and preferred message positions to maximise media coverage. 2.3 Give notice to the media of the timing of events and activities, and provide contact information to enable confirmation of details. 2.4 Negotiate media coverage.
3. Monitor media coverage	3.1 Assess options for monitoring media coverage and select based on organisational requirements and value for money. 3.2 Develop and implement procedures for monitoring media performance, and recommend actions that address variations from expected performance. 3.3 Evaluate media coverage in terms of effectiveness in achieving message placement objectives, anticipated impact and public affairs objectives.
4. Prepare spokespersons for media interaction	4.1 Brief spokespersons on the characteristics, communication techniques and potential impact of media interviews for newspapers, radio and television. 4.2 Brief spokespersons on interview approaches and the techniques of specific interviewers.

© Commonwealth of Australia, 2024 Public Skills Australia

	4.3 Establish objectives with spokespersons for interview outcomes in planned situations in order to communicate specific information. 4.4 Provide responses and techniques for achieving positive communication outcomes in unplanned media interactions. 4.5 Prepare spokespersons for crisis situations in accordance with crisis communication plans and responsibilities.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPPA603A Manage media relationships.

PSPGOV201B Work in a public sector environment

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the requirements for entry into/working as a trainee in the public sector. It includes compliance with the principles of public sector legislation and guidelines, the use of public sector and organisational procedures when dealing with others at work, respect for individual differences and career planning.

In practice, working in a public sector environment may overlap with other generalist or specialist public sector work activities such as communicating with others, delivering client service, using resources, handling information.

The unit serves as the introductory unit of competency in the *Working in Government* competency themes of *Effective Work* and *Diversity*, and in the Competency Fields of *Ethics&Accountability*, and *Legislation&Compliance*, so provides the introductory unit for:

- PSPGOV301B Work effectively in the organisation
- PSPGOV308B Work effectively with diversity
- PSPGOV310A Work in and with small, regional and remote organisations
- PSPETHC301B Uphold the values and principles of public service
- PSPLEGN301B Comply with legislation in the public sector
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

© Commonwealth of Australia, 2024 Public Skills Australia

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Access and use legislation and guidelines**	1.1 The range of ***legislation*** and ***guidelines*** common to employment in a public sector organisation is accessed. 1.2 The ***key principles*** contained in the legislation and guidelines are identified. 1.3 Information is clarified in order to confirm own understanding. 1.4 Work is undertaken in accordance with the principles contained in legislation and guidelines.
2. **Access and use organisational information**	2.1 The staffing and organisational structure is identified. 2.2 Procedures for dealing with staff at all levels of the organisation are identified and clarified. 2.3 Procedures for dealing with ***clients*** are identified. 2.4 ***Sources of assistance*** are identified, and types of assistance available from each source are identified. 2.5 Work is carried out within ***organisational procedures***.
3. **Work with diversity**	3.1 Appreciation of the ***differences*** between ***colleagues*** is demonstrated through workplace behaviour. 3.2 Communication styles are used to take account of workplace diversity and reflect the principles of ***emotional intelligence***. 3.3 Contribution to the workgroup is made to utilise personal

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	strengths and take any opportunities provided to develop new competencies.
	3.4 The requirements of multicultural awareness and anti-discrimination legislation are met.
4. Investigate career options	4.1 Personal working and learning styles, values and attitudes are identified and weighed against the requirements of current and potential work opportunities.
	4.2 Personal work goals are identified and prioritised.
	4.3 ***Advice*** is obtained on future work/career options.
	4.4 A range of possible career paths is identified and initial planning undertaken to map out broad competency areas and experiences required to pursue them.
	4.5 Personal development is planned to prepare for career options.
	4.6 Learning opportunities are sought and accessed in line with personal work goals.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- accessing and identifying information
- scanning techniques to locate main ideas
- reading written materials such as manuals and codes of practice
- responding to diversity, including gender and disability
- using interpersonal communication including negotiating strategies to clarify understanding
- recognising own and others' emotions in the workplace
- using information technology and the Internet
- applying public sector legislation such as occupational health and safety and environmental procedures in the workplace

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- public sector legislation, regulations and guidelines
- organisation guidelines and procedures
- principles of cultural awareness, workplace diversity and emotional intelligence

© Commonwealth of Australia, 2024 Public Skills Australia

and their application in the workplace
- codes of conduct
- equal employment opportunity, equity and diversity principles
- principles of personal career planning

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPGOV202B Use routine workplace communication techniques
  - PSPGOV203B Deliver a service to clients
  - PSPGOV204B Access and use resources
  - PSPGOV205B Participate in workplace change
  - PSPGOV206B Handle workplace information
  - PSPGOV208A Write routine workplace materials
  - PSPOHS201B Follow workplace safety procedures

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- completing work in a range of (3 or more) public sector contexts, such as different work functions or roles (or 3 or more occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to work in the public sector
- case studies and workplace scenarios to capture the range of situations likely to be encountered when working in a public sector environment

Where and how to

Valid assessment of this unit requires:

© Commonwealth of Australia, 2024 Public Skills Australia

assess evidence	• a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when working in a public sector environment, including coping with difficulties, irregularities and breakdowns in routine • completing work in a range of (3 or more) public sector contexts, such as different work functions or roles (or 3 or more occasions, over time). Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as: • people with disabilities • people from culturally and linguistically diverse backgrounds • Aboriginal and Torres Strait Islander people • women • young people • older people • people in rural and remote locations. Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of: • case studies • portfolios • questioning • scenarios • simulation or role plays • authenticated evidence from the workplace and/or training courses.
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.	
Legislation may include:	• anti-discrimination

© Commonwealth of Australia, 2024 Public Skills Australia

	• duty of care • employee relations • employment • equal employment opportunity • fraud control • freedom of information • government security management • occupational health and safety • privacy • public sector management • whistleblowers protection • workplace diversity • workplace harassment • international legislation/codes of practice
Guidelines may include:	• public sector standards • relevant public sector code of ethics • organisational code of conduct • organisational mission and values statements • organisational procedures/guidelines • government policy • Ministerial directions • directives from head of organisation • standard operational procedures
Key principles may include:	• honesty and integrity • confidentiality and non-disclosure of official information • security of information, resources, facilities and people • due care and diligence • avoiding conflicts of interest • obeying lawful and reasonable direction • compliance with the law
Clients may include:	• the public • private enterprise • other public sector organisations • internal clients • the Minister
Sources of assistance may include:	• colleagues • immediate supervisor • line management • human resources personnel • workplace representatives/union personnel
Organisational	• mission and values statements

© Commonwealth of Australia, 2024 Public Skills Australia

procedures may include:	• organisational charts • strategic plans • business unit and work area plans • customer service charters • induction materials • standard operating procedures • relevant workplace agreements • disciplinary processes • grievance procedures • advertising materials • Internet and/or intranet web pages
Individual differences may include:	• age • cultural background • disability • educational level • ethnicity • expertise • family responsibilities • gender • interests • interpersonal approach • language • life experience • marital status • personality • physical ability • political orientation • religious belief • sexual orientation • socio-economic background • thinking/learning styles • work experience • working styles
Colleagues may include:	• peers • junior staff • internal stakeholders • external stakeholders/clients/customers • supervisors and senior management

© Commonwealth of Australia, 2024 Public Skills Australia

Emotional intelligence is:	• widely recognised as the ability of an individual to monitor their own and others' emotions in a social or work environment, to discriminate among the emotions and to use the information to guide their thinking and actions • characterised by self-awareness (personal), self-management (personal), social awareness (social) and relationship management (social)
Advice may include:	• formal/informal performance appraisals • feedback from supervisors and colleagues • reflection/comment on personal goals • vocational/career counselling

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Access and use resources	1.1 ***Resources*** required to achieve work outcomes are identified and accessed in accordance with ***legislation and organisational policy and procedures***. 1.2 Resources are used efficiently and effectively and in accordance with legislation, organisational policy and procedures.
2. Administer physical resources	2.1 Supplies and materials required to support the operation of the workgroup are obtained and maintained. 2.2 ***Records*** of resource usage are maintained as required by the organisation/work unit. 2.3 Orders are processed in a timely manner and in accordance with defined organisational procedures. 2.4 Supplies and materials are stored in accordance with organisational procedures and to reduce theft and fraudulent activity.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

© Commonwealth of Australia, 2024 Public Skills Australia

- recordkeeping
- reading materials such as legislation and operational procedures related to resources and finances
- completing and processing orders requiring both literacy and numeracy
- securing information and resources
- responding to diversity, including gender and disability
- applying public sector legislation such as occupational health and safety and environment in the context of resource use

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- public sector legislation and operational procedures relating to accessing and using resources
- security requirements for resources, facilities, people and information
- principles of fraud control in the public sector
- principles of financial management and stock handling
- occupational health and safety requirements
- environmental and sustainability requirements
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPGOV201B Work in a public sector environment
  - PSPGOV202B Use routine workplace communication techniques
  - PSPGOV203B Deliver a service to clients
  - PSPGOV206B Handle workplace information
  - PSPGOV207B Use technology in the workplace
  - PSPGOV208A Write routine workplace materials
  - PSPOHS201B Follow workplace safety procedures

Overview of evidence

In addition to integrated demonstration of the elements and their

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in *italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and use technology	1.1 The technology requirements of tasks are assessed and ***technology*** and/or ***software applications*** are selected in accordance with task requirements and available workplace resources.
	1.2 Work area, furniture and equipment are adjusted and used in accordance with ergonomic requirements.
	1.3 Technology/software is ***used*** to achieve work outcomes in accordance with organisational ***guidelines*** and occupational health and safety requirements.
	1.4 Manuals, training booklets, online/telephone assistance or help-desks are used to overcome basic difficulties with technology, and more complex problems are referred for assistance in accordance with organisational policy and procedures.
	1.5 Technology and data are secured in accordance with legislation, policy and procedures.
2. Maintain technology	2.1 ***Routine maintenance*** is carried out and/or arranged to ensure that technology is maintained in accordance with manufacturers' instructions and organisational requirements.
	2.2 ***Equipment faults*** are corrected or reported in accordance with manufacturers' instructions and service agreements.
	2.3 Technology consumables are replaced as they are used in accordance with manufacturers' instructions and organisational requirements.
	2.4 Use of technology and disposal of ***used consumables*** meets government and organisational ***environmental policies***.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for

© Commonwealth of Australia, 2024 Public Skills Australia

this unit.

Skill requirements

Look for evidence that confirms skills in:

- planning technology use
- identifying work requirements and selecting the equipment and software application of best fit in terms of timeliness, cost effectiveness, occupational health and safety conditions
- using a keyboard
- using a range of technology applications
- using communication to request advice, receive feedback and work with others
- applying problem solving in relation to routine problems
- following manufacturers' instructions
- responding to diversity, including gender and disability
- applying public sector legislation such as occupational health and safety and environment in the context of using workplace technology

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, procedures and guidelines relating to the use of technology in the workplace
- occupational health and safety procedures and regulations
- logon, backup, virus protection and shutdown procedures for computer equipment
- basic technical terminology in relation to reading manuals and help files
- methods of detecting faults in and solving problems with business technology
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to any of the generalist public sector specific units at Certificate II or above, particularly:
  - PSPGOV201B Work in a public sector environment
  - PSPGOV202B Use routine workplace communication

© Commonwealth of Australia, 2024 Public Skills Australia

techniques
- PSPGOV203B Deliver a service to clients
- PSPGOV204B Access and use resources
- PSPGOV205B Participate in workplace change
- PSPGOV206B Handle workplace information
- PSPGOV208A Write routine workplace materials

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- use of equipment and application of software in a range of (3 or more) contexts (or occasions, over time).

The unit relates to the application of technology as a transferable competency. It is not necessary to assess (or address) an exhaustive range of equipment, rather attention should be given to the different kinds of technology that can be used and the selection of the 'technology of best fit' for the task. (Is it better/more economical to print one master copy, and photocopy multiples, or print multiple copies direct from the computer? I need a graph - do I use a word processing or spreadsheet application?)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the use of technology in the workplace
- case studies and workplace scenarios to capture the range of situations likely to be encountered when using technology in the workplace

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when using technology in the workplace, including coping with difficulties, irregularities and breakdowns in routine
- correct use of equipment and application of software in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women

© Commonwealth of Australia, 2024 Public Skills Australia

- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from workplace training courses

For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Technology covers all equipment used in the workplace and may include:	• computer facsimiles • computer technology, such as laptops, notebooks, palm pilots and personal computers • datashow projectors • digital cameras • electronic whiteboards • facsimile machines • keyboards • modems • mouses • multifunction scanners/faxes/printers • pagers • photocopiers • printers

© Commonwealth of Australia, 2024 Public Skills Australia

	• routers • scanners • tape/MD recorders • telephones/mobiles/wireless telephones • video cameras • wireless technology equipment • zip drives
Software applications may include:	• email • Internet • instant messages • word processing • spreadsheets • databases • accounting • presentation packages
Use of technology may include:	• information searches • data storage, retrieval and analysis • numerical calculations • presentation of information • copying information • communication • Internet • Email
Guidelines may include:	• work unit and organisation standards • occupational health and safety policies and procedures • environmental procedures • manufacturers' operating instructions • ethical considerations
Routine maintenance may include:	• regular checking of equipment • replacing consumables • 'in-house' cleaning and servicing of equipment according to manufacturers' guidelines • periodic servicing by qualified or manufacturer-approved technician
Equipment faults may be identified or countered by:	• routine checking of equipment • preparation of a maintenance program • encouraging feedback from work colleagues • regular back-ups of data • keeping a log book of detected faults • regular occupational health and safety inspections • checking that repairs have been carried out

© Commonwealth of Australia, 2024 Public Skills Australia

Used consumables may include:	• ink cartridges • toner cartridges • print heads • CD-ROMs • zip disks • floppy disks • backup tapes
Environmental policies may cover:	• type of paper • recycling requirements

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Seek and act on workplace feedback	1.1 ***Feedback*** on performance and ***other workplace issues*** is sought from ***others*** in accordance with organisational policy and procedures. 1.2 Feedback is discussed, questions asked to clarify understanding, and active listening used to ensure understanding of the issues and any constructive suggestions. 1.3 ***Diversity issues*** are considered when evaluating feedback to ensure correct interpretation. 1.4 Suggestions for improvements made by other workgroup members are considered objectively and implemented where appropriate.
2. Provide informal feedback in the workplace	2.1 Informal feedback is given regularly, in a timely manner, in accordance with workplace procedures and protocols. 2.2 Evidence from a range of sources is considered in providing feedback in the workplace. 2.3 The opinions of others are considered when providing informal feedback. 2.4 Performance of self and others is evaluated and confirmed with workgroup members. 2.5 ***Strategies/opportunities for continuous improvement*** are planned and implemented in consultation with the workgroup, and notable performance is recognised in accordance with organisational policy and procedures.
3. Provide formal	3.1 Where they exist, processes/***guidelines*** for providing ***formal***

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
feedback in the workplace	***feedback*** are used to ensure feedback meets purpose/s for which it is required. 3.2 ***Standards/criteria*** for feedback are identified and clarified. 3.3 Written or verbal feedback is prepared to address required criteria and purpose in accordance with ***legislation, policy and procedures***. 3.4 Where others disagree with feedback provided, their opinions and ideas are considered objectively and the feedback is amended or supported in line with organisational procedures. 3.5 Agreement with those seeking formal feedback is negotiated and documented regarding any actions/follow-up as a result of feedback. 3.6 Where agreement cannot be reached, reports are prepared and further action is taken if necessary, in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- using techniques for maintaining objectivity while giving and receiving feedback
- using a range of communication techniques with members of a diverse workforce, including negotiating, questioning, clarifying, understanding, active listening, evaluating the ideas and opinions of others
- evaluating workplace performance and issues affecting clients and others
- responding to diversity, including gender and disability
- applying legislation such as occupational health and safety and environment in the context of giving and receiving feedback

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- public sector legislation, regulations, policies, procedures and guidelines relating to giving and receiving feedback
- organisation policies, practices and procedures relating to feedback
- workplace performance requirements and issues
- equal employment opportunity, equity and diversity principles

© Commonwealth of Australia, 2024 Public Skills Australia

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC301B Uphold the values and principles of public service
  - PSPGOV301B Work effectively in the organisation
  - PSPGOV302B Contribute to workgroup activities
  - PSPGOV303B Build and maintain internal networks
  - PSPGOV307B Organise workplace information
  - PSPGOV308B Work effectively with diversity
  - PSPGOV312A Use workplace communication strategies
  - PSPGOV313A Compose workplace documents
  - PSPGOV314A Contribute to conflict management
  - PSPLEGN301B Comply with legislation in the public sector
  - PSPOHS301A Contribute to workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- feedback given and received in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to feedback in the workplace
- case studies and workplace scenarios to capture the range of situations likely to be encountered when giving and receiving workplace feedback

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when giving and receiving workplace feedback, including coping with difficulties, irregularities and

breakdowns in routine
- feedback given and received in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Feedback on performance may include:	• client feedback • 360° feedback • feedback from assessors • performance feedback

© Commonwealth of Australia, 2024 Public Skills Australia

	• feedback on a job application
Other workplace issues may include:	• personal presentation • attitude • style, tone and form of language used • body language • cultural interactions • equity and diversity • telephone manner • client service manner
Others may include:	• team members • colleagues • superiors • subordinates • clients • assessors • performance appraisers • referees • interview panels • validators
Diversity issues may include:	• accepting that different ways of working and communicating are valid • focus on outcomes rather than process so that different ways of reaching the same end are not raised as negative feedback • interpreting feedback in light of diversity considerations • using culturally appropriate verbal and non-verbal language
Strategies/opportunities for continuous improvement may include:	• coaching, mentoring and/or supervision • formal/informal learning programs • internal/external training provision • work experience/exchange/opportunities • personal study • career planning/development • learning pathways.
Guidelines may include:	• sources of evidence • feedback methods/decisions • how to provide feedback • who gets feedback • appeal processes • grievance processes • dispute resolution processes • confidentiality • privacy

© Commonwealth of Australia, 2024 Public Skills Australia

	• freedom of information requirements
Formal feedback may be required by:	• peers • managers/supervisors/team leaders • employees • teams and team members • clients/customers • job applicants (360° feedback)
Standards/***criteria*** may include:	• selection criteria • best practice standards • organisational practice standards • competencies • service level standards • codes of ethics/conduct • legislation/regulations

Legislation, ***policy and procedures*** may include:	• State/Territory and Commonwealth legislation and regulations such as:
	  • public sector management acts
	  • privacy legislation
	  • freedom of information
	  • equal employment opportunity, anti-discrimination and harassment legislation
	  • occupational health and safety legislation
	• environmental legislation
	• ethics and accountability standards
	• public sector standards
	• organisational policy, procedures and protocols
	• international legislation/codes of behaviour

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Acquire and apply available resources**	1.1 Available ***resources*** are identified and gaps filled in accordance with ***work unit plans***. 1.2 ***Procedures*** are applied that promote efficient, economical and effective allocation and distribution of resources. 1.3 Acquisition and storage of resources is carried out in accordance with ***legislation, organisational policy and procedures***. 1.4 Resource handling is undertaken in accordance with established work practices and guidelines, including occupational health and safety and security requirements.
2. **Monitor and report on resource usage**	2.1 Trends on resource usage are monitored and reported in accordance with organisational requirements. 2.2 Records of resource usage are maintained in accordance with relevant legislation and guidance. 2.3 Relevant financial and resource management systems are operated in accordance with organisational policy and procedures. 2.4 Resource shortfalls are identified and recommendations made to address these.
3. **Maintain resources**	3.1 Resources are maintained in accordance with manufacturers'

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and organisational guidelines and service contracts. 3.2 Maintenance of resources is organised to facilitate work practices and outcomes. 3.3 Contingency plans are developed to ensure operational continuity.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, policy and guidelines relating to resource usage, storage and maintenance
- using a range of communication methods with a diverse range of people including maintenance contractors, work unit members, managers etc on a range of resource related matters
- responding to diversity, including gender and disability
- monitoring outcomes
- applying public sector legislation, including occupational health and safety and environmental requirements in the context of resource usage, storage and maintenance

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to resource usage
- operational procedures for accessing, storing, maintaining and using resources
- security and fraud control guidelines
- stock handling procedures
- occupational health, safety and environmental and sustainability requirements in the context of resource usage, storage and maintenance
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance

Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV402B Deliver and monitor service to clients
  - PSPGOV404B Develop and implement work unit plans
  - PSPGOV406B Gather and analyse information
  - PSPGOV408A Value diversity
  - PSPGOV412A Use advanced workplace communication strategies
  - PSPGOV413A Compose complex workplace documents
  - PSPGOV422A Apply government processes
  - PSPLEGN401A Encourage compliance with legislation in the public sector
  - PSPOHS401B Implement workplace safety procedures and programs

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- use and maintenance of resources in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and guidelines relating to resource usage, storage and maintenance
- workplace technology for resource ordering, managing and financial requirements
- case studies and workplace scenarios to capture the range of situations likely to be encountered when using resources to achieve work unit goals

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when using resources to achieve work unit goals, including coping with difficulties, irregularities and

© Commonwealth of Australia, 2024 Public Skills Australia

breakdowns in routine
- use and maintenance of resources in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- demonstration
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Resources may include:	• knowledge, information and other intellectual resources • human resources • finances • facilities • equipment

Unit Descriptor

This unit covers development and implementation of work unit plans at both the work unit and individual level to achieve results through planning. It includes participating in the planning activities of the work unit, preparing individual work plans, and implementing and evaluating work plans.

In practice, development and implementation of work plans may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government processes, gathering and analysing information, using resources, etc.

This is one of 6 units in the *Working in Government* and *Management* Competency Fields that deal with working with others. Related units are:

- PSPGOV302B Contribute to workgroup activities
- PSPGOV511A Provide leadership
- PSPGOV516A Develop and use emotional intelligence
- PSPGOV604A Foster leadership and innovation
- PSPMNGT701B Provide strategic

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Participate in planning activities**	1.1 Contributions are made to planning that reflect a knowledge of corporate goals and their relationship to work unit and individual plans. 1.2 Consideration of ***workplace requirements*** is reflected in contributions to ***work unit plans***. 1.3 Planning activities are completed as requested within the defined timeframe and meet the organisation's requirements. 1.4 Feedback is sought and acted on in relation to effectiveness of input to planning activities.
2. **Prepare individual work plans**	2.1 Work plan objectives are linked to and consistent with organisational and work unit aims. 2.2 Objectives are stated as measurable targets with clear performance indicators. 2.3 Innovative and cost-effective options for achieving objectives are explored and aligned to organisational aims. 2.4 Individual work plans are used to promote the achievement of work unit objectives and to reflect personal and organisational accountability to all clients. 2.5 Collaborative planning with other workgroup members is used to integrate individual plans and build working relationships.

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3. Implement and evaluate work plans	3.1 Work methods and practices to implement plans are identified in consultation with others. 3.2 Workload and work flows are monitored and balanced. 3.3 Work is completed in accordance with work plans and meets time and workplace requirements, ***legislation, policies and procedures***. 3.4 Problems in implementing work plans are monitored and solutions are proposed within area of responsibility. 3.5 Work plans are revised according to changes in work priorities and organisational needs.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- planning own work to achieve goals
- engaging in collaborative planning with other workgroup members
- applying problem solving
- monitoring and evaluation of progress towards work unit goals
- negotiating goals and outcomes
- responding to diversity, including gender and disability
- applying public sector legislation such as occupational health and safety and environment in the context of work planning

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to work planning in the public sector
- effective planning processes
- policies and procedures on sustainable practice
- corporate goals or aims
- organisational procedures
- importance of aligning work unit plans with organisational goals
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of work planning

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPBORD401A Create and maintain profiles
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV403B Use resources to achieve work unit goals
  - PSPGOV405B Provide input to change processes
  - PSPGOV406B Gather and analyse information
  - PSPGOV408A Value diversity
  - PSPGOV411A Deal with conflict
  - PSPGOV412A Use advanced workplace communication strategies
  - PSPGOV413A Compose complex workplace documents
  - PSPGOV417A Identify and treat risks
  - PSPGOV422A Apply government processes
  - PSPLEGN401A Encourage compliance with legislation in the public sector
  - PSPOHS401B Implement workplace safety procedures and programs
  - PSPPM401B Design simple projects
  - PSPPM402B Manage simple projects
  - PSPPROC410A Administer contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- work unit plans developed and implemented in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to work planning in the public sector

© Commonwealth of Australia, 2024 Public Skills Australia

- case studies and workplace scenarios to capture the range of situations likely to be encountered when developing and implementing work unit plans

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing and implementing work unit plans, including coping with difficulties, irregularities and breakdowns in routine
- work unit plans developed and implemented in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the

PSPGOV405B Provide input to change processes

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers understanding the reasons for change and initiating specific changes related to the work unit. It includes suggesting options and opportunities for change, encouraging commitment to workplace change, monitoring and evaluating change and dealing with ambiguity in the change process.

In practice, providing input to change may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government processes, gathering and analysing information, using resources, etc.

This is one of 6 units of competency in the *Working in Government* and *Management* Competency Fields that deal with change. Related units are:

- PSPGOV205B Participate in workplace change
- PSPGOV306B Implement change
- PSPGOV514A Facilitate change
- PSPMNGT604B Manage change
- PSPMNGT703A Lead and influence change

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Suggest options and opportunities for change**	1.1 The need for change in work practice within the work unit is identified, suggestions sought and options devised. 1.2 Options and opportunities for change are suggested to improve efficiency and effectiveness of the workgroup and the work environment. 1.3 The broader workplace context, including future trends, is taken into account in suggestions for change. 1.4 ***Risk factors*** affecting change are analysed to identify possible constraints.
2. **Encourage commitment to workplace change**	2.1 Positive encouragement is provided to implement workplace **change**. 2.2 The needs and viewpoints of individuals are identified and considered when implementing change. 2.3 Communication strategies are developed and support is provided to colleagues on adjusting to change. 2.4 Issues requiring further action are identified and dealt with in accordance with ***legislation, policy and procedures***.
3. **Monitor and evaluate change**	3.1 Implementation of change is monitored and feedback on individual and group work practices is prompt and constructive. 3.2 Suggestions for improvements made by workgroup members

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	are positively received and acted on where appropriate.
	3.3 Work activities are evaluated based on feedback from workgroup members and other ***stakeholders***.
	3.4 ***Evidence and information*** is collected on the impact of change, is accurate, relevant and reported according to organisational requirements.
	3.5 Recommendations for improving methods or techniques to manage change are ***negotiated*** in accordance with organisational policy and procedures.
	3.6 Learning from the implementation of change are identified, shared with others and transferred to other change initiatives.
4. **Deal with ambiguities in the change process**	4.1 The need to operate within constraints beyond one's own control is recognised and accepted.
	4.2 Areas of ambiguity in proposed change are identified.
	4.3 Options for dealing with ambiguity and criteria for assessing those options are developed and communicated to the workgroup.
	4.4 Best option is selected, work is undertaken and ambiguity handled in accordance with option determined.
	4.5 The impact of change and identified related issues are communicated to management as required.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- communicating with a diverse range of individuals at different levels in the organisation
- applying problem solving strategies in the context of managing ambiguity and change
- working in teams
- applying monitoring and observation methods
- giving and receiving feedback, including 'managing upwards'
- responding to diversity, including gender and disability

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

© Commonwealth of Australia, 2024 Public Skills Australia

- legislation, policy and procedures relating to public sector workplaces
- a range of change management models and their application to the work environment
- organisational structure and culture
- the nature of change and its effects in the workplace, including occupational health and safety issues such as workplace stress
- group dynamics
- emotional intelligence
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite units* that must be achieved **prior** to this unit**:** *Nil*
- *Co-requisite units* that must be assessed **with** this unit**:** *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV406B Gather and analyse information
  - PSPGOV408A Value diversity
  - PSPGOV411A Deal with conflict
  - PSPGOV412A Use advanced workplace communication strategies
  - PSPGOV414A Provide workplace mentoring
  - PSPGOV416A Monitor performance and provide feedback
  - PSPGOV418A Develop internal and external networks
  - PSPGOV422A Apply government processes
  - PSPLEGN401A Encourage compliance with legislation in the public sector

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- provision of input to change in a range of (3 or more) contexts

© Commonwealth of Australia, 2024 Public Skills Australia

(or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the public sector environment
- a range of change management models and their application
- case studies and workplace scenarios to capture the range of situations likely to be encountered when providing input to change processes

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when providing input to change processes, including coping with difficulties, irregularities and breakdowns in routine
- provision of input to change in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.	
Risk factors may include:	• disturbances to workflow • confusion/loss of confidence • budget constraints • supplier problems • product/service delivery problems • time delays • ineffective communication • lack of participation/buy in of staff in workplace change leading to resistance and conflict
Change may include:	• imposed change • self-initiated change • implementation of new work practices • legislative change • changes in the machinery of government • organisational restructuring • technology transfer to the workplace • changing work practices and procedures • staffing changes • shared services environment
Legislation, ***policy and procedures*** may include:	• Commonwealth and State/Territory legislation • government policy • public sector code of ethics • national standards • the organisation's policies and practices • environmental or sustainability practices • organisational code of conduct
Stakeholders may include:	• all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services, including: • employees at all levels of the organisation • clients • other public sector organisations • community organisations • private sector organisations

© Commonwealth of Australia, 2024 Public Skills Australia

	• union and association representatives • boards of management • government • Ministers
Evidence and information may include:	• client surveys • employee satisfaction feedback • industrial disputes • supplier feedback • productivity/efficiency measures • cost savings

Negotiation may include:	• assertiveness
	• collaboration
	• solution designing
	• confidence building
	• conflict reduction
	• stress management
	• empathising
	• techniques such as:
	  • speaking skills
	  • presentation techniques
	  • effective listening
	  • questioning techniques
	  • verbal and non-verbal communication
	  • using personal attributes
	  • culturally appropriate strategies
	  • constructive feedback
	  • issues identification
	  • exploring options
	  • identifying areas of agreement
	  • recording agreements.
	• clarifying
	• restating position
	• summarising progress
	• deferring decision
	• preparing a compromise
	• using a mediator/third party

Unit Descriptor

This unit covers collection and analysis of information to achieve work unit objectives and meet client needs. It includes identifying and collecting information, analysing and interpreting information, developing and applying workable solutions, presenting information and maintaining information.

In practice, gathering and analysing information may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government processes, using resources, gathering evidence, carrying out projects, using financial processes, identifying and treating risks, monitoring for fraud, undertaking, court listings, conducting claim assessments, etc.

This is one of 5 units of competency in the *Working in Government* and *Management* Competency Fields that deal with information/knowledge management. Related units are:

- PSPGOV206B Handle workplace information
- PSPGOV307B Organise workplace information
- PSPGOV504B Undertake research and analysis
- PSPMNGT614A Facilitate knowledge management

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify and collect information**	1.1 Nature, extent and purpose of required ***information*** is identified. 1.2 Internal and external ***sources*** are identified and accessed to produce required information in accordance with ***legislation, policy and procedures***. 1.3 Information is collected, organised, recorded and reported in accordance with organisational procedures and defined guidelines. 1.4 Information collected is organised in a way which enables easy access and retrieval by other staff.
2. **Analyse and interpret information**	2.1 Information and its sources are critically evaluated for relevance and validity to business/client requirements. 2.2 Basic ***analysis of information*** is undertaken as required to identify key issues. 2.3 More detailed analysis of information is carried out as required using relevant techniques including mathematical calculations and methods for numerical/graphical information.
3. **Develop and apply workable solutions**	3.1 Workable solutions to business/client requirements are developed on consideration of analysed information. 3.2 Proposed solutions are communicated or implemented as

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	required.
4. **Present information**	4.1 Information is reported in the required format, style, structure and timeframe.
	4.2 ***Information is presented*** in required medium in accordance with organisational requirements using relevant technology.
5. **Maintain information**	5.1 A range of standard and complex ***information systems*** and operations is used in accordance with organisational policy and procedures.
	5.2 Information and records are maintained in accordance with organisational procedures to ensure data and system integrity.
	5.3 Routine data and records are reconciled as required.
	5.4 Inadequacies in system/s relating to information retrieval are identified and corrected or reported to relevant staff as required.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying public sector legislation such as occupational health and safety and environment in the context of information management
- accessing and using information ethically and legally
- using manual and computerised techniques for information management
- applying computer technology to data storage, security, retrieval and presentation
- using basic statistical and numerical manipulation
- using critical analysis techniques
- communicating with colleagues and supervisors
- presenting information in a range of ways such as report format, numerically, in tables, with graphs, spatially
- responding to diversity, including gender and disability
- using problem solving and referring problems as required
- applying equal employment opportunity, equity and diversity principles

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, policies, procedures and guidelines relating to information handling in the public sector, such as confidentiality, privacy, security, freedom of information

© Commonwealth of Australia, 2024 Public Skills Australia

- data collection and management procedures
- organisational information handling and storage procedures
- cultural aspects of information and meaning
- sources of public sector work-related information
- economic, legal, security and social issues surrounding the use of information
- public sector standards
- electronic and manual filing systems
- databases and data storage systems
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of information management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPCRT407A Undertake court listings
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPFIN401A Use public sector financial processes
  - PSPFRAU401B Monitor data for indicators of fraud
  - PSPGOV402B Deliver and monitor service to clients
  - PSPGOV403B Use resources to achieve work unit goals
  - PSPGOV404B Develop and implement work unit plans
  - PSPGOV405B Provide input to change processes
  - PSPGOV407B Provide a quotation
  - PSPGOV417A Identify and treat risks
  - PSPGOV422A Apply government processes
  - PSPIM401A Conduct initial claim assessments
  - PSPLEGN401A Encourage compliance with legislation in the public sector

- PSPREG412A Gather and manage evidence
- PSPSEC405A Handle security classified information

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- information gathered and analysed in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to information research, presentation and management
- access to electronic information/records management systems
- Case studies and workplace scenarios to capture the range of situations likely to be encountered when gathering and analysing information

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when gathering and analysing information, including coping with difficulties, irregularities and breakdowns in routine
- information gathered and analysed in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios

© Commonwealth of Australia, 2024 Public Skills Australia

	• simulation or role plays • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.	
Information may include:	• legislation, guidelines and awards • organisation, legal and policy materials • client information • market trends • media reports • registries and file records • library materials • financial records • basic statistical information • human resources/personnel records • asset records • meta-data

Sources of information may include:	• those internal to the organisation such as:
	  • intranet
	  • databases/files
	  • library collections
	  • internal publications
	  • annual reports
	  • newsletters
	  • other staff
	• those external to the organisation such as:
	  • Internet
	  • local, state, national and international libraries and archives
	  • other organisations' publications

PSPGOV417A Identify and treat risks

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the identification and treatment of risk using the organisation's risk management procedures and treatments. It applies to the risks inherent in all aspects of everyday work in the public sector as well as to specific functional activities and projects related to the particular mandate of the organisation. The unit covers establishment of the risk context, identification, analysis and evaluation of risks, risks treatment, and monitoring and review of risk treatment plan.

In practice, identifying and treating risk occurs in the context of other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government processes, handling classified information, using resources, administering projects, providing parliamentary support, making arrests, using financial processes, undertaking scientific research, awarding contracts, undertaking native title assessments, assessing compensation claims, road transport compliance, etc.

This is one of 4 units of competency in the *Working in Government* and *Management* Competency Fields that deal with risk. Related units are:

- PSPGOV517A Coordinate risk management
- PSPMNGT608B Manage risk
- PSPMNGT704A Undertake enterprise risk management
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication
-

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish the risk context	1.1 The nature and extent of the work activity are established within the broader ***organisational context***.
	1.2 The outcomes to be achieved are identified and documented as required.
	1.3 The relationship between the activity and its environment is analysed and critical ***factors*** in the environment that may impact on the achievement of outcomes are identified.
	1.4 ***Stakeholders*** are identified and consulted to identify their opinions, concerns and needs related to the activity and the management of risks related to it.
	1.5 ***Risk evaluation criteria*** are determined for the activity in accordance with ***legislation, policy and procedures*** related to ***risk management*** in the organisation.
2. Identify risks	2.1 ***Method/s for identifying risks*** are selected in accordance with risk management policy and procedures, budgetary and time constraints relative to the type of activity to be undertaken.

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2 ***Sources of risk*** are identified and documented as required.
	2.3 ***Risk events*** related to each source of risk are identified and recorded in accordance with risk management policy and procedures.
	2.4 Consultation and communication is undertaken to ensure all possible risks are identified.
3. Analyse risks	3.1 The ***probability of identified risks*** occurring is analysed and rated in accordance with risk management policy and procedures.
	3.2 The ***consequences of identified risks*** occurring are analysed and rated according to organisational procedures.
	3.3 Current ***control measures*** for any of the identified risks are considered in the risk analysis, and residual risks are analysed and included if necessary.
	3.4 ***Levels of risk*** are determined in accordance with risk matrix used by the organisation.
	3.5 Consultation/communication is undertaken as required to confirm risk levels, and ***analysis is documented*** in accordance with organisational risk management procedures.
4. Evaluate risks	4.1 Risks are evaluated by comparing the level of risk with risk evaluation criteria established at the beginning of the risk management process.
	4.2 The importance of the activity, its outcomes and the degree of control over the risks are considered.
	4.3 Potential and actual losses which may arise from the risk are considered.
	4.4 Benefits and opportunities presented by the risk are taken into account.
	4.5 Risks are identified as ***acceptable*** or ***unacceptable*** in accordance with risk evaluation criteria, and confirmation/approval is obtained in accordance with risk management policy and procedures.
	4.6 Unacceptable risks are prioritised and the reason/s for acceptance of risks is documented.
5. Treat risks	5.1 ***Options for treating risks*** are determined in accordance with risk management policy and procedures.
	5.2 The best treatment option is selected and a cost-benefit analysis is undertaken to compare the cost of implementing the treatment with the benefits.
	5.3 A ***risk treatment plan*** is prepared, approved and communicated to those who will be involved in implementation.

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	5.4 Changes required to operational structure, procedures or staffing in order to implement risk treatments are negotiated in accordance with organisational policy and procedures.
	5.5 ***Resources*** are arranged and risk treatment plan is implemented in accordance with risk management policy and procedures.
6. **Monitor and review risk treatment plan**	6.1 ***Changes*** in the organisational environment and factors impacting on the organisation are monitored for their impact on risks and existing risk treatments.
	6.2 Risk treatments for unacceptable risks are monitored and adjusted as required to ensure they remain effective.
	6.3 Acceptable risks are monitored to ensure these risk levels do not increase over time.
	6.4 Consultations are conducted and data relating to risks and risk treatments are collected, analysed and used to improve risk management in own area of operation.
	6.5 Risk treatment plan is reviewed in accordance with timetable for review of plan and updated as required.
	6.6 Input is provided into formal reviews/audits of risk in the organisation to improve risk management outcomes.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to risk management
- researching and analysing the wider context affecting the organisation
- assessing and evaluating risks
- monitoring and reviewing risks and risk treatments
- communicating and consulting with a diverse range of stakeholders
- estimating and arranging resources needed for implementation of risk treatments
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of risk management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to risk

© Commonwealth of Australia, 2024 Public Skills Australia

management
- AS/NZS ISO31000:2009 Risk management - Principles and Guidelines
- HB 436:2004 (Guidelines to AS/NZS 4360:2004) Risk Management Guidelines Companion to AS/NZS 4360:2004
- the organisation's risk management framework
- the relationship of risk to context - how the context may define the risks
- the importance of consultation and communication at every stage of the risk management cycle
- risk management as a core activity of everyday work in the public sector
- the diversity of risks in the public sector
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of risk management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPFIN401A Use public sector financial processes
  - PSPGOV402B Deliver and monitor service to clients
  - PSPGOV405B Provide input to change processes
  - PSPGOV406B Gather and analyse information
  - PSPGOV409A Provide support to Parliament
  - PSPGOV422A Apply government processes
  - PSPGOV419A Work with interpreters
  - PSPLAND402A Undertake native title assessments
  - PSPPM405A Administer simple projects
  - PSPPROC410A Administer contracts
  - PSPREG406C Make arrests
  - PSPSEC405A Handle security classified information

Overview of evidence

In addition to integrated demonstration of the elements and their

© Commonwealth of Australia, 2024 Public Skills Australia

requirements	related performance criteria, look for evidence that confirms: • the knowledge requirements of this unit • the skill requirements of this unit • application of Employability Skills as they relate to this unit • identification and treatment of risks in a range of (3 or more) contexts (or occasions, over time)
Resources required to carry out assessment	These resources include: • legislation, policy, procedures and protocols relating to risk management • AS/NZS ISO 31000:2009 Risk management - Principles and Guidelines • HB 436:2004 (Guidelines to AS/NZS 4360:2004) Risk Management Guidelines Companion to AS/NZS 4360:2004 • other national and international risk management standards • case studies and workplace scenarios to capture the range of risk management situations likely to be encountered
Where and how to assess evidence	Valid assessment of this unit requires: • a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when identifying and treating risks, including coping with difficulties, irregularities and breakdowns in routine • identification and treatment of risks in a range of (3 or more) contexts (or occasions, over time). Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as: • people with disabilities • people from culturally and linguistically diverse backgrounds • Aboriginal and Torres Strait Islander people • women • young people • older people • people in rural and remote locations. Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of: • case studies • portfolios • projects • questioning • scenarios

© Commonwealth of Australia, 2024 Public Skills Australia

	• authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.	

Organisational context may include:	• the organisation, how it is organised, and its capabilities
	• the organisation's functions:
	  • political
	  • operational
	  • financial
	  • social
	  • legal
	  • commercial
	• the various stakeholders and clients
	• any official resources, including physical areas and assets, that are vital to the operation of the organisation
	• key operational elements and services of the organisation
	• any major projects
	• the relationship between the organisation and the environment in which it operates

Environmental factors may be:	• social • economic • legal • technological • environmental
Stakeholders may include:	• employees • managers • volunteers • unions • financial managers • self-insurers

© Commonwealth of Australia, 2024 Public Skills Australia

	• clients • suppliers • contractors • service providers • community organisations • the public

Risk evaluation criteria are:	• used to rank risks and decide whether they are acceptable or not
	• affected by:
	  • legal requirements
	  • perceptions of internal/external stakeholders
	  • cost-benefit analysis, for example, cost of risk management being less than financial cost if the risk occurred

Legislation, ***policy and procedures*** may include:	• Commonwealth and State/Territory legislation relating to risk management • national and international codes of practice and standards, such as SIRCA 8001:2003 • the organisation's risk management policies and practices • codes of conduct/codes of ethics • AS/NZS ISO 31000:2009 Risk management - Principles and Guidelines • HB 436:2004 (Guidelines to AS/NZS 4360:2004) Risk Management Guidelines Companion to AS/NZS 4360:2004 • ISO Guide 73:2009 Risk Management, Vocabulary • professional standards for risk management, for example certified practising risk manager (CPRM) • jurisdictional policies, guidelines and web sites, for example www.riskmanagement.qld.gov.au

Risk management:	• is a logical and systematic process of identifying, analysing, evaluating, treating and monitoring risks related to any strategy, plan, process, program or procedure that will enable the organisation to minimise losses and maximise opportunities.
	• may be considered in relation to an organisation's:
	  • people
	  • assets and physical environment
	  • reputation and image
	  • legal issues
	  • business continuity
	  • finances
	• may include written procedures to ensure staff know:
	  • what
	  • how
	  • when, and

© Commonwealth of Australia, 2024 Public Skills Australia

	• by whom, action is to be taken to treat risks in the organisation
Methods for identifying risks may include:	• analysis of past records • personal, local or overseas experience • interviews/discussions with stakeholders • surveys/questionnaires • audits and physical inspections • observation of activity • analysis of scenarios • research of external sources • using industry experts/consultants
Risks may include:	• physical injury or death • failure of machinery or equipment • breaches of security • fraud • litigation • client dissatisfaction • unfavourable publicity
Risks may be:	• internal • external • random • real • perceived
Sources of risk may include:	• human behaviour • technology/technical issues • occupational health and safety • legal • political • property/equipment • environmental • financial/market • natural events
Risk events are:	• what can happen, as opposed to the source (how a risk may arise) and the impact (what is the implication if it happens)
Probability of identified risk may be:	• almost certain • likely • possible • unlikely • rare
Consequences of	• insignificant • minor

© Commonwealth of Australia, 2024 Public Skills Australia

identified risk may be:	• moderate • major • catastrophic

Control measures may:	• reduce the probability of the risk occurring, the consequences of the risk, or both
	• include:
	  • training
	  • supervision
	  • minimising/restricting exposure
	  • physical barriers
	• relocation

Level of risk may be:	• low - treated with routine procedures • moderate - with specific responsibility allocated for the risk, and monitoring and response procedures implemented • high - requiring action, as it has potential to be damaging to the organisation • extreme - requiring immediate action, as the potential could be devastating to the organisation
Documentation of analysis may include:	• table showing all risks, any existing controls, probability of occurring, consequences and subsequent level of risk
Acceptable risks are:	• those which an organisation has determined have the least potential for harm • not necessarily insignificant
Risks may be acceptable because:	• the risk level is so low that it does not warrant spending time and money to treat it • the risk is low and the benefits outweigh the cost of treating it • the opportunities presented are much greater than the threat
Unacceptable risks are:	• those which an organisation has determined have the most potential for harm
Options for treating risks may include:	• avoiding the risk, for example, by terminating the activity or conducting it in another way (these actions may have different risks attached) • controlling the risk, by reducing the probability of the risk occurring, the consequences of the risk, or both • transferring the risk, for example, by arranging insurance, contracting some or all of the activity to another organisation or person, etc • retaining the risk, and making contingency plans/funds allocation for covering any loss or other negative effect from the risk
Risk treatment plan may	• sources of risk and risk events • analysis of risks - probability, consequences and risk levels

© Commonwealth of Australia, 2024 Public Skills Australia

include:	• prioritised list of unacceptable risks • treatment options selected • person/s responsible for implementing treatment options • resources required • performance measures • timeframe for implementation • timetable for review of plan
Resources may include:	• physical - equipment, motor vehicles, furniture • human - management, employees, volunteers • financial - funding, budget allocation, sponsorship • resources that are part of the risk treatment, not just implementation of the treatment plan • training and briefing sessions • changes to the organisation's operating structure
Changes may mean that:	• new risks are created • existing risks are increased or decreased • risks no longer exist • the priority order of risks changes • risk treatment strategies are no longer effective

1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers evaluation relevant to the full range of processes and outcomes in the public sector such as policy, procedures, processes, structures, service delivery, projects etc. It includes identifying the purpose of the evaluation, identifying the evaluation process and tools, carrying out the evaluation, analysing results, reporting outcomes and recommending action.

In practice, conducting evaluations may overlap with other generalist or specialist public sector workplace activities such as acting ethically, complying with legislation, providing client service, developing policy etc.

This is one of two competencies in the *Working in Government* and *Management*. Competency Fields that deal with evaluation in the public sector. The related unit is:

- PSPMNGT611A Manage evaluations
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the purpose of the evaluation	1.1 The ***purpose, scope*** and terms of reference of the evaluation are confirmed with key ***stakeholders*** and approvals are gained in accordance with organisational requirement. 1.2 The range of documentary evidence, individuals and organisations who can provide specialist input are identified and commitment is gained for their contribution to the evaluation. 1.3 Information critical to the evaluation is determined to inform the selection of the evaluation methodology and tools. 1.4 Ownership of the evaluation data/outcomes and right of access to the reported results are determined in accordance with organisational policy and procedures.
2. Identify evaluation methodology and tools	2.1 ***Criteria*** for the evaluation and the audience for evaluation results are identified and communicated to stakeholders. 2.2 ***Evaluation methods*** are selected from a range of alternatives to suit the scope, purpose and outcome requirements of the evaluation. 2.3 ***Measuring tools*** and ***media*** are selected/developed to ensure valid and reliable evaluation results. 2.4 An evaluation strategy is formulated in consultation with key stakeholders to ensure acceptance and commitment. 2.5 Resource needs are determined in accordance with budgetary constraints and obtained in accordance with organisational policy and procedures. 2.6 ***Evaluation infrastructure*** is established in accordance with

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	evaluation requirements and resource constraints.
3. Implement evaluation	3.1 Implementation tasks are defined and clarified with stakeholders in accordance with the evaluation methodology.
	3.2 Evaluation strategy is implemented and data collected, collated and recorded against evaluation criteria in accordance with planned methodology.
	3.3 Expectations are managed and barriers to the evaluation are identified and addressed or referred in accordance with organisational policy and procedures.
	3.4 Progress of the evaluation is monitored and changes are negotiated as needed to timeframes, methodology or tools in accordance with organisational policy and procedures.
	3.5 Data is analysed/referred for specialist analysis, and results are compared with evaluation criteria.
	3.6 Preliminary results are ***presented*** for stakeholder feedback in accordance with organisational policy and procedures.
	3.7 The evaluation is conducted in accordance with ***legislative and organisational requirements***.
4. Report outcomes	4.1 An evaluation report is prepared that compares outcomes to the evaluation criteria established at the outset, and provides supporting evidence in accordance with legislative and organisational requirements.
	4.2 ***Recommendations for action*** are made in accordance with the terms of reference and supported by the evaluation outcomes.
	4.3 Unbiased and objective evaluation outcomes are reported in a form and language to suit the intended audience of the report.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- implementing planning, research and analysis
- using negotiation and problem solving
- undertaking project management
- applying statistical analysis of evaluation data
- using a range of communication styles to communicate with different audiences and purposes

© Commonwealth of Australia, 2024 Public Skills Australia

- responding to diversity, including gender and disability
- explaining complex and formal documents such as legislation and codes of conduct and applying them to work practices
- developing objectives and evaluation criteria
- accessing legislation and codes of conduct electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- evaluation principles - time, cost, quality, quantity, efficiency
- qualitative and quantitative evaluation methodologies and data analysis
- reporting requirements of a range of audiences
- legislation, policy and procedures relating to the conduct of evaluations in the public sector
- public sector values and codes of conduct
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPFIN501A Apply public sector financial policies and processes
  - PSPGOV502B Develop client services
  - PSPGOV503B Coordinate resource allocation and usage
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV507A Undertake negotiations
  - PSPGOV508A Manage conflict
  - PSPGOV511A Provide leadership
  - PSPGOV512A Use complex workplace communication strategies
  - PSPLEGN501B Promote compliance with legislation in the

© Commonwealth of Australia, 2024 Public Skills Australia

public sector
- PSPPM502B Manage complex projects
- PSPPOL501A Develop organisation policy
- PSPPROC504A Finalise contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- conduct of a range of (3 or more) evaluations in different contexts

Resources required to carry out assessment

These resources include:

- legislation, policies, procedures and protocols
- access to an evaluation target
- case studies and workplace scenarios

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when conducting evaluations, including coping with difficulties, irregularities and breakdowns in routine
- conduct of a range of (3 or more) evaluations in different contexts

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training

© Commonwealth of Australia, 2024 Public Skills Australia

	courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.	
Purpose of evaluation may include:	• measuring merit/quality • measuring worth or value for a particular purpose • measuring results, outputs or outcomes • decision making • unintentional negatives
Scope may include evaluation of:	• planning • delivery • results • needs • objectives • design • processes • inputs • outputs • outcomes • impact

Stakeholders may include:	• all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services such as:
	  • the owner/organisation that commissioned the evaluation
	  • those subject to the evaluation process
	  • research staff who conduct evaluation
	  • contractors/consultants contracted to conduct evaluation
	  • employees at all levels of the organisation
	  • community
	  • clients

© Commonwealth of Australia, 2024 Public Skills Australia

	• other public sector organisations • private sector • non-government organisations • union and association representatives • boards of management • government • Ministers
Criteria for evaluation may include:	• whether objectives have been met • standards against which to compare quality • baseline studies for comparison • performance measures • key success areas • key performance indicators • results/outputs/outcomes • value for money • public interest
Evaluation methods may be:	• qualitative • quantitative • anonymous
Measuring tools may include:	• surveys • interviews • questionnaires • focus groups • semi-structured interview techniques • document analysis • process analysis • observation • tests
Media for measuring tools may include:	• paper-based • Internet-based • email • electronic • face-to-face • telephone.
Evaluation infrastructure may include:	• steering committee • manager • internal/external research staff • internal/external administrative staff • office • telephone • technology

© Commonwealth of Australia, 2024 Public Skills Australia

	• email • web site • equipment • consumables • resources including budget • internal/external specialist or technical support • contractors • consultants
Presentation of information may include:	• interim reports • progress reports • draft reports • executive summaries • to meetings, groups, seminars • Internet or email

Legislative and organisational requirements may include:	• Commonwealth and State/Territory legislation including equal employment opportunity and anti-discrimination law, for example:
	  • Commonwealth Racial Discrimination Act
	  • Commonwealth Human Rights and Equal Opportunity Act
	  • Commonwealth Sex Discrimination Act
	  • Commonwealth Disability Discrimination Act.
	• national and international codes of practice and standards
	• the organisation's policies and practices
	• government policy
	• codes of conduct
	• confidentiality
	• privacy
	• ethical practices and procedures
	• intellectual property
	• copyright

Recommendations for action may include:	• new goals • improvement strategies • changes to services, products • governance strategies • change management strategies • termination • replacement

PSPGOV512A Use complex workplace communication strategies

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers complex workplace communication for working at middle management level with internal and external clients, colleagues and other staff. It includes preparing for complex communication, analysing and responding to opinions, presenting a convincing argument, and developing a range of communication strategies.

In practice, using complex workplace communication strategies may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing change, managing diversity, etc.

This is one of 5 units of competency in the *Working in Government* Competency Field that deal with communication. Related units are:

- PSPGOV202B Use routine workplace communication techniques
- PSPGOV312A Use workplace communication strategies
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV605A Persuade and influence opinion
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Prepare for complex communication**	1.1 ***Communication objectives*** are clarified, those to be ***present*** are confirmed and ***communication mode*** is identified. 1.2 Analysis is undertaken to anticipate the likely positions to be taken by those present on the matters under discussion. 1.3 Subject matter is researched/***organised***, key points to be conveyed are identified and recorded, and information to counter other positions is summarised. 1.4 Requirements of ***legislation, policy and guidelines*** relevant to the discussion are identified and incorporated.
2. **Analyse and respond to opinions**	2.1 Discussion is evaluated to identify impartiality, bias or unsupported argument. 2.2 Points of view of other speakers are noted and information to counter opposing views is presented objectively in accordance with required position. 2.3 ***Reaction to speakers*** and their point of view is analysed to identify and manage emotional reactions and maintain objectivity. 2.4 Opposing/challenging views are examined for their value in achieving the same ends. 2.5 Active listening and questioning are used to clarify own

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	understanding, challenge or justify other points of view.
3. **Present a convincing argument**	3.1 ***Communication approach*** is chosen and used to suit the given audience.
	3.2 Prepared position is asserted with conviction and purpose.
	3.3 ***Verbal and non-verbal behaviour*** are adjusted to maintain listener interest if the audience is unresponsive.
	3.4 Questions are used to elicit feedback and check audience understanding.
	3.5 Audience questions and argument are responded to objectively, and answers are backed by reasoned explanation.
	3.6 Agreement is negotiated where possible, concluding with a summary of agreed items.
4. **Develop a range of communication strategies**	4.1 Feedback from others is obtained and the outcomes of communication are assessed.
	4.2 Lessons learnt are recorded and used to underpin future interactions.
	4.3 ***Language structures and features*** that influence audiences to a preferred point of view are developed and practised.
	4.4 Communication strategies are explored and practised for a range of workplace applications in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to communication in the public sector
- analysing and using language structures and features that influence the interpretation of spoken communication
- interacting confidently with groups on familiar topics in formal and informal workplace situations
- speaking with confidence and listening critically
- clarifying meaning, exploring issues and problem solving
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in

© Commonwealth of Australia, 2024 Public Skills Australia

the context of high-level communication

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to communication in the public sector
- the power and effect of spoken language
- knowledge of organisation processes and hierarchy
- techniques to deal with opposing views and positions
- emotional intelligence techniques
- organisational protocols and etiquette for communication in meetings
- communication strategies to suit different audiences, such as workgroup, organisational, inter-agency
- ways to influence the interpretation of spoken communication
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of high-level communication

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV507A Undertake negotiations
  - PSPGOV508A Manage conflict
  - PSPGOV511A Provide leadership
  - PSPGOV514A Facilitate change
  - PSPGOV515A Develop and use political nous
  - PSPGOV516A Develop and use emotional intelligence
  - PSPLEGN501B Promote compliance with legislation in the public sector

© Commonwealth of Australia, 2024 Public Skills Australia

- PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- use of complex communication strategies in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to public sector communication
- current theory and practice on influencing skills for the public sector
- case studies and workplace scenarios to capture the range of situations likely to be encountered when using complex communication strategies

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when using complex communication strategies, including coping with difficulties, irregularities and breakdowns in routine
- complex communications strategies used in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- questioning

© Commonwealth of Australia, 2024 Public Skills Australia

	• scenarios • simulation or role plays • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.	
Communication objectives may be to:	• share information • reach consensus • contribute to policy • represent the business unit's position/interests in internal negotiations • resolve differences • negotiate a joint position/compromise • build reputation (of self and organisation/business unit) • market services
Those to be present may include:	• peers • colleagues • those senior or junior to the position • staff from other agencies
Mode of communication may include:	• telephone • teleconference • video conference • Internet (online forums) • face-to-face • one-on-one, or in a group • forum, seminar or conference
Organisation of subject matter may include:	• identifying features, advantages and benefits and aligning evidence/examples • anticipating likely disagreements and structuring material to address these

© Commonwealth of Australia, 2024 Public Skills Australia

Legislation**, **policy and guidelines may include:	• State/Territory and Commonwealth legislation, regulations, policies, guidelines and standards relating to exchange of information in the public sector, such as:
	  • ethics and accountability guidelines/codes of practice
	  • information security standards
	  • principles of equal employment opportunity, equity and diversity
	  • freedom of information and privacy.
	• intellectual property
	• fraud standards
	• professional liability

Reaction to speakers may include:	• own reaction • others present
Communication approach may include:	• catering to political sensitivities • working within government processes and operational frameworks • balancing debate and action • consideration of wider organisational/public sector issues • speaking with confidence • cultural, ethnic, diversity or equity considerations • consultative • collaborative • assertive • reasonable • humorous
Verbal and non-verbal behaviour may include:	• inclusive language, ideas and information • congruent speech and body language • speaking with confidence • impartiality • responsiveness • drawing on different sources of information
Language structures and features may include:	• use of metaphors and similes • use of analogy, imagery and other comparisons • use of passive voice • using personal names repeatedly to convey intimacy or sincerity • tone, style and point of view

PSPGOV513A Refine complex workplace documents

Modification History

Release	TP Version	Comments
3	PSP12V1	Layout adjusted.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers written workplace communication at a level where preliminary research or documents may have been prepared by others as input, and final documents are being prepared. It includes critical analysis of workplace information, composition, revision and refinement to meet workplace requirements.

In practice, refinement of complex workplace documents may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, providing client service, leading a group, developing policy, undertaking research and analysis, etc.

This is one of 5 units of competency in the *Working in Government* Competency Field that deal with written communication. Related units are:

- PSPGOV208A Write routine workplace materials
- PSPGOV313A Compose workplace documents
- PSPGOV413A Compose complex workplace documents
- PSPGOV606A Prepare high-level/sensitive written materials

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Critically analyse information	1.1 ***Information*** is tested for relevance, reliability, consistency and usefulness to the task/organisation. 1.2 Fact is separated from opinion and underlying values and beliefs are identified. 1.3 Cultural context of the information is taken into account in the analysis. 1.4 Stereotypes, bias, prejudice and motive are recognised. 1.5 Conclusions are drawn and a critical analysis with supporting evidence is prepared and submitted in accordance with organisational requirements.
2. Compose/refine complex documents	2.1 The ***purpose***, audience and objectives of ***complex documents*** are confirmed in accordance with organisational requirements. 2.2 ***Structure and content*** of document is approved in line with the purpose and intended audience. 2.3 Risk assessment is undertaken and risk management is implemented in relation to document preparation and content, in accordance with the nature and classification of the material. 2.4 Information/documents provided by others are analysed for bias, gaps, the influence of values, attitudes and context, conflicting advice/evidence and political implications. 2.5 Information is synthesised and complex documents are prepared and ***submitted*** in accordance with ***organisational requirements, legislation, policy and procedures***. 2.6 Feedback is provided to contributors of information/documents

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	to improve future input in a manner that provides learning opportunities for the researchers/authors.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading and writing at a level to cope with a range of complex and sensitive workplace materials
- critically analysing and synthesising information to compose complex written documents
- refining content, structure and sequence according to the required purpose of written material
- using spelling, punctuation and grammar for workplace documents at an experienced level
- providing feedback on other people's work in ways suited to the diversity of the workplace, including creation of learning opportunities to improve research/document input
- responding to diversity, including gender and disability
- implementing ergonomic requirements for office work
- complying with environmental policies such as those relating to paper use/wastage/recycling

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to written communication in the public sector such as privacy, freedom of information, information security, confidentiality, copyright, intellectual property
- critical analysis of complex information
- politically and culturally sensitive documents
- organisational requirements for complex written documents
- government style manual requirements
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of preparing written materials

© Commonwealth of Australia, 2024 Public Skills Australia

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV515A Develop and use political nous
  - PSPLEGN501B Promote compliance with legislation in the public sector
  - PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- complex workplace documents composed/refined in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to written communication in the public sector
- examples of complex workplace documents
- government style guide
- case studies and workplace scenarios to capture the range of situations likely to be encountered when composing/refining complex workplace documents

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when refining complex workplace documents, including coping with difficulties, irregularities and breakdowns in routine
- complex workplace documents composed/refined in a range of (3 or more) contexts (or occasions, over time).

© Commonwealth of Australia, 2024 Public Skills Australia

	Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as: • people with disabilities • people from culturally and linguistically diverse backgrounds • Aboriginal and Torres Strait Islander people • women • young people • older people • people in rural and remote locations. Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of: • portfolios • projects • questioning • scenarios • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.	
Information for critical analysis may include:	• applications • briefing papers • discussion papers • expert opinion • literature • plans • policy advice • project briefs • reports • research

© Commonwealth of Australia, 2024 Public Skills Australia

	• speeches • submissions • web site information
Purpose may include:	• influencing opinion • reporting on achievement • recommending options and corresponding actions • meeting regulatory requirements • meeting public sector reporting requirements • documenting policy • developing policy • obtaining funding • providing briefing material • contributing to strategic planning • responding to enquiries/complaints
Complex documents may include:	• funding submissions • briefing papers • speeches • media briefs • position papers • discussion papers • business cases • reports • project briefs • strategic and operational plans • functional area strategy • justification for policy development • policy guidance • counter argument to submission
Structure and content may include:	• executive summary • division into sections or chapters • tables of contents and indexes • conclusions • glossaries • footnotes/endnotes • references • critical analysis • facts and observations • submissions • creative ideas • recommendations and supporting arguments • opinion

© Commonwealth of Australia, 2024 Public Skills Australia

	• anticipated arguments and rebuttals • case studies
Submission of document may include:	• approvals • sign-off procedures

Organisational requirements may include:	• use of plain English
	• style formats
	• acknowledgements
	• particular terminology to be used/not used:
	  • acronyms
	  • technical terms
	  • bureaucratic language
	  • abbreviations
	• requirements for minimising jargon in written materials
	• requirements for written material to take account of cultural, ethnic, religious or language differences, disabilities, etiquette
	• guidelines for illustrative items
	• standards for references, acknowledgements, citations, footnotes, endnotes
	• using particular communication channels

Legislation, ***policy and procedures*** may include:	• State/Territory or Commonwealth legislation, regulations, policies, procedures and guidelines relating to the preparation and security of written information in the public sector, including freedom of information, copyright, privacy, confidentiality, equal employment opportunity, diversity, occupational health and safety • risk assessment • information security requirements • public sector standards • fraud control standards • codes of practice • codes of ethics • private or confidential materials • embargoed material • politically sensitive materials • security standards for government information

PSPGSD002 Administer government service delivery requirements

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGSD402A Administer government service delivery requirements. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to administer government service offers, agreements and records. It includes reviewing service offers or agreements, and reviewing and updating records.

This unit applies to those working in public sector roles but may be applied to anyone working in a similar organisational context.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, performing routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Government service delivery

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Administer service offers or agreements	1.1 Identify and act on the need for assistance. 1.2 Identify and explain mutual obligations, rights and responsibilities associated with government service delivery. 1.3 Ensure delivery of services matches the circumstances.
2. Review service offers or agreements	2.1 Review service offer decisions as required. 2.2 Process appeals against service offer decisions. 2.3 Identify and negotiate ongoing resources and support required to progress the service offer. 2.4 Update records to reflect changes in circumstances.
3. Review and update government service delivery records	3.1 Review service delivery records for accuracy and currency. 3.2 Record and update information about individuals' needs as circumstances change. 3.3 Update information systems and records related to services provided to individuals. 3.4 Protect the privacy and security of personal information and records.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPGSD402A Administer government service delivery requirements.

Assessment Requirements for PSPGSD002 Administer government service delivery requirements

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- reading complex, formal documents including legislation and guidelines and explaining them to people from diverse backgrounds
- granting and adjusting payments

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- the range of applicant circumstances and complexity of needs in the context of government service delivery
- range of services available through the organisation
- mutual obligations, rights and responsibilities
- service offers
- appeal processes
- administration systems and requirements for payments and benefits
- legislation, policy, procedures and protocols relating to government service delivery, including work health and safety and environment and sustainability practices
- principles of equal employment opportunity and diversity

© Commonwealth of Australia, 2024 Public Skills Australia

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPINV001 Plan and initiate an investigation

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.

Application

This unit describes the skills required to identify and confirm possible non-compliance, and plan and initiate a subsequent investigation. It includes planning and activating evidence collection, identifying witnesses and persons of interest.

This unit applies to those working in a range of regulatory work environments involving gathering and managing physical or documentary evidence from a range of sources.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS in the context of investigations.

Those undertaking this unit would work independently using support from a range of established resources to perform complex tasks in a range of contexts, including some that are unfamiliar and/or unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Investigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Initiate preliminary investigation to confirm non-compliance	1.1 Assess information, confirm likely non-compliance and if matter under investigation falls within jurisdiction. 1.2 Prioritise importance and urgency of the matter for action. 1.3 Initiate documentation for investigation of alleged matter.
2. Plan investigation	2.1 Determine the objectives of the investigation and obtain necessary resources to conduct the investigation. 2.2 Identify and plan for risks associated with the investigation including sensitivities that might affect the organisation. 2.3 Select methods to achieve the investigation's objectives. 2.4 Identify timelines and prioritise tasks. 2.5 Confirm and initiate communication and case management requirements. 2.6 Record investigation planning. 2.7 Obtain approval to commence investigation.
3. Initiate investigation	3.1 Implement evidence recording process. 3.2 Identify, locate and contact possible witnesses to request information. 3.3 Identify and locate responsible parties and record their particulars. 3.4 Contact responsible parties for interview and inform them of the nature of the investigation as required by law. 3.5 Research evidence requirements to establish the type and standard of evidence and necessary resources according to the size of investigation and nature of the offence. 3.6 Select and initiate investigative techniques.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

Assessment Requirements for PSPINV001 Plan and initiate an investigation

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least two occasions.

- acting ethically
- applying legislation, regulations and codes of practice
- using process mapping
- undertaking research, analysis and problem solving in the context of investigating non compliance
- questioning and negotiating meaning
- responding to diversity
- using planning and time management in the context of investigations
- preparing written reports and recommendations requiring accuracy, formal language structures
- using information technology for data analysis, recording and reporting

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- investigation methodology and techniques
- rules and types of evidence
- storage and continuity of evidence
- applicable legislation
- aspects of criminal, civil or administrative law
- jurisdiction, powers and restrictions to investigate
- organisational policy and procedures
- cultural awareness

© Commonwealth of Australia, 2024 Public Skills Australia

- confidentiality and privacy issues
- reporting procedures which provide a written or electronic audit trail

Assessment Conditions

Valid assessment of this unit requires a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when initiating investigations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPINV002 Conduct an investigation

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.

Application

This unit describes the skills required to conduct an investigation under commonwealth and/or jurisdictional law, in accordance with an established investigation plan. It includes gathering and managing evidence, identifying persons of interest, reviewing and reporting on progress and briefing/debriefing relevant personnel.

This unit applies to those working in a range of regulatory work environments.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and environment in the context of investigations.

Those undertaking this unit would work independently using support from a range of established resources to perform complex tasks in a range of contexts, including some that are unfamiliar and/or unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

the essential outcomes	achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Locate and record information sources	1.1 Identify subjects and suspects involved in the matter under investigation and record details. 1.2 Obtain or verify authority to search, involving other organisations where necessary. 1.3 Collect and analyse information relevant to the investigation. 1.4 Identify and locate persons relevant to the investigation and eliminate persons who are not. 1.5 Access expert skills and knowledge when necessary to further assist staff in areas where they cannot, or are not authorised, to act. 1.6 Anticipate likely defences and include evidence to counter these.
2. Collect and manage information and exhibits	2.1 Collect, label, record and preserve identified and/or corroboratory evidence for later use in proceedings. 2.2 Identify, secure and manage evidence from incoming information. 2.3 Maintain continuity, security and integrity of exhibits. 2.4 Handle, record, store and dispose of exhibits.
3. Review and adjust investigation process	3.1 Monitor and review evidence collection to address gaps and inadequacies. 3.2 Conduct briefings and debriefings of all relevant personnel. 3.3 Conduct investigation with sufficient flexibility to allow for contingencies, modify process of investigation and implement solutions where practicable.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

Assessment Requirements for PSPINV002 Conduct an investigation

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least two occasions.

- organising and problem-solving
- liaising and negotiating
- communicating with people from diverse backgrounds
- making comparisons and exercising judgment about facts in written materials
- writing reports using formal structures and language
- collecting, labelling, recording and preserving identified and/or corroboratory evidence for later use in proceedings according to exhibit management principles, continuity of possession, legislation and standards

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- rules of evidence and legislation relevant to the jurisdiction
- legislation dealing with offence/s under investigation
- document management systems
- exhibit management principles
- organisational policies, guidelines and regulations
- equal employment opportunity, equity and diversity principles
- legal and ethical considerations in investigations which involve juveniles and indigenous people

PSPINV003 Finalise an investigation

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.

Application

This unit describes the skills required to complete, review and report on the results of an investigation. It includes finalising the investigation, handling complaints and appeals, preparing an investigation report and using investigation outcomes.

This unit applies to those working in a range of regulatory work environments comprising gathering, managing and interpreting documentary evidence to determine appropriate responses including reporting and acting on investigation outcomes.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and environment in the context of investigations.

Those undertaking this unit would work independently using support from a range of established resources to perform complex tasks in a range of contexts, including some that are unfamiliar and/or unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Investigation

Elements and Performance Criteria

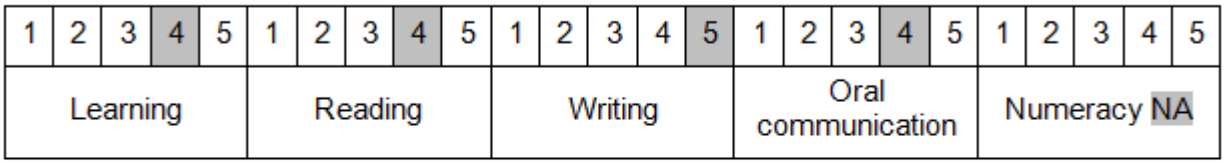
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Address investigation outcomes	1.1 Complete documentation if no breach has occurred or no action is to be taken, including reasons and justification. 1.2 Prepare and submit a record of the investigation and consequent recommendations for action. 1.3 Respond to complaints, appeals and the potential role of the ombudsman. 1.4 Advise relevant personnel on the outcome of the investigation. 1.5 Make recommendation for referral to another organisation as required and document for the organisation's information.
2. Report findings	2.1 Prepare finalisation report in relation to the findings and submission of evidence, with recommendations for subsequent action if relevant. 2.2 Prepare report and refer to relevant personnel for further action.
3. Finalise investigation	3.1 Undertake self-assessment of the conduct of the investigation and provide verbal and written briefings. 3.2 Inform relevant external organisations of outcomes and document this action. 3.3 Update organisational systems regularly, contributing investigation results for the development of statistics, trends and precedents.

Foundation Skills

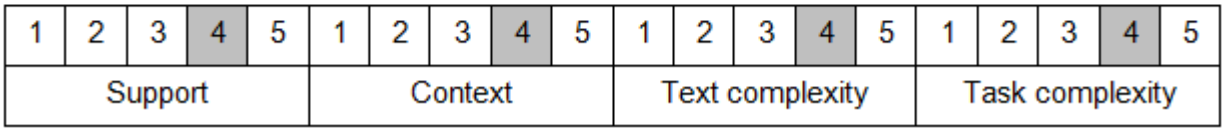
The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2024 Public Skills Australia

ACSF levels indicative of performance:



Performance variables:



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for PSPINV003 Finalise an investigation

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least two occasions.

- undertaking analysis and problem-solving
- engaging in exchanges of sometimes complex oral information
- varying style and language during briefings to suit audience
- writing summaries, briefing papers and reports requiring clarity, accuracy and formality of structure and language
- applying analytical techniques, logic and reasoning to identify and select avenues of inquiry and substantiate these choices

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- legislation relating to the offences under investigation
- investigation principles and the range of investigation techniques available
- organisational guidelines for reporting and information management
- ethical standards
- principles of equal employment opportunity, equity and diversity
- operational safety
- legislation related to anti-discrimination and disability
- different types of criminal activity and their elements
- available resources which may need to be deployed to support the investigation
- security issues and classifications
- legal and ethical considerations in investigations which involve juveniles and indigenous people

© Commonwealth of Australia, 2024 Public Skills Australia

- knowledge of case management systems and the range of contexts in which they can be applied
- court procedures and evidentiary in provision of briefs of evidence for use by the prosecution
- role and functions of other agencies who work with policing in the conduct of investigations
- methods and process for subject/suspect identification and profiling

Assessment Conditions

Valid assessment of this unit requires a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when initiating investigations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Assessment Requirements for PSPLEG003 Promote compliance with legislation in the public sector

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying research and evaluation
- reading and explaining complex and formal documents, including legislation and codes of ethics, and applying them to work practices
- communicating with others involving exchanges of complex oral and written information
- applying environmental and WHS procedures and promoting their use by others

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- legislation relating to the public sector including WHS and environment
- regulations, guidelines, policy, practices
- public sector codes of ethics and conduct
- government processes and practices

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

© Commonwealth of Australia, 2024 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPLEGN401A Encourage compliance with legislation in the public sector

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the competency to encourage others (colleagues or those supervised) in the workplace to comply with legislation. It includes assisting others to comply with legislative requirements, and taking action on non-compliance.

In practice, encouraging compliance with legislation is demonstrated in the context of other generalist or specialist work activities such as using government processes, delivering and monitoring client services, using resources, preparing quotations, conducting interviews, awarding contracts etc.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assist others to comply with legislative requirements	1.1 Knowledge of the range of ***legislation and guidelines*** relating to the public sector workplace is regularly updated to ensure currency. 1.2 The way various pieces of legislation are integrated to provide a legislative framework for public sector work and the key requirements of each piece of legislation are confirmed and conveyed to ***others*** using language and examples suited to their individual needs. 1.3 Own work practices and procedures are used to provide a consistent model of compliance with legislative requirements relating to the public sector work environment. 1.4 The ***consequences of non-compliance*** with public sector legislation are identified and conveyed to others using language and examples suited to individual needs. 1.5 Others are assisted to locate and access current information on legislation and guidelines. 1.6 Others are encouraged to identify and obtain advice on apparently ***conflicting legislative requirements*** in accordance with organisational policy and procedures.
2. Act on non-compliance	2.1 Actions that might constitute breaches of legislation are identified and discussed with others in accordance with organisational requirements. 2.2 Possible breaches of legislation are acted upon or referred promptly to an authorised person/body in accordance with organisational procedures. 2.3 ***Inadequacies in workplace procedures*** which may contribute to non-compliance are reported and addressed in accordance with organisational procedures.

© Commonwealth of Australia, 2024 Public Skills Australia

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- accessing and reading complex and formal documents such as legislation and related materials
- assisting others to apply legislation to work practices and to identify inappropriate conduct
- using guidelines to effectively administer legislative requirements
- exercising discretion in accordance with legislation and guidelines
- communicating with others involving exchanges of complex oral/written information
- using technology to access legislative requirements
- responding to diversity, including gender and disability
- applying environmental and occupational health and safety procedures and encouraging others in their application

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- the range of legislation relating to the public sector (including occupational health and safety, and specific enabling legislation relating to the business) and the key requirements of each
- public sector codes of ethics/conduct
- consequences of non-compliance
- procedures for acting on and reporting possible breaches of legislation
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to

© Commonwealth of Australia, 2024 Public Skills Australia

increase the efficiency and realism of the assessment process include, but are not limited to:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV402B Deliver and monitor service to clients
- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV407B Provide a quotation
- PSPGOV422A Apply government processes
- PSPPROC409A Receive and select offers
- PSPREG407B Produce formal record of interview

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- compliance with legislation encouraged in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- public sector legislation, regulations and guidelines
- procedures and protocols
- scenarios and case studies to capture the range of situations likely to be encountered when assisting others to comply with legislation

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when encouraging compliance with legislation in the public sector, including coping with difficulties, irregularities and apparently conflicting legislative requirements
- compliance with legislation encouraged in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people

© Commonwealth of Australia, 2024 Public Skills Australia

- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Legislation and guidelines may relate to:

- public sector standards:
  - codes of conduct/ethics
  - guarantee of service
  - legislated standards
  - State/Territory/Commonwealth/organisational standards
  - technical/industrial standards
  - professional standards
  - industry competency standards
  - anti-corruption legislation
  - whistleblowers' protection
- public sector employment:
  - employee relations
  - chief executive officer's instructions
  - Commissioner's instructions
  - public sector notices

© Commonwealth of Australia, 2024 Public Skills Australia

- workplace environment:
  - equal employment opportunity
  - affirmative action
  - workplace diversity
  - anti-discrimination
  - workplace harassment
  - occupational health and safety
  - duty of care
  - security, storage, handling and classification of documents
- financial management and accountability:
  - Treasurer's instructions
  - contractual obligations
- transparency:
  - freedom of information
  - professional reporting
  - accountability
  - fair trading
- business and community:
  - privacy
  - trade practices
  - competition
  - road transport legislation
- information and records management standards and legislation
- the organisation's enabling legislation, regulations
- aspects of common law, criminal law, contract law, employment law and administrative law, including judges' rules
- international legislation/codes of behaviour

Others may include:

- colleagues
- supervised staff
- contractors

Consequences of non-compliance may include:

- for individuals:
  - counselling
  - disciplinary action
  - transfer, demotion, dismissal
  - legal liability
  - fine
- external consequences, for example:

© Commonwealth of Australia, 2024 Public Skills Australia

- to clients
- to the organisation's reputation

Conflicting legislative requirements may include:

- apparent contradiction between statutes
- apparent conflict between statutes and policy requirements
- contradictions between different policy requirements
- contradictions within a single piece of legislation

Inadequacies in workplace procedures may include:

- insufficient financial/other controls
- insecure Internet/fax access
- non-auditable records processes
- ambiguous guidelines
- no guidelines
- unnecessary complexity
- use of non-current legislation

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Model and encourage compliance with legislative requirements	1.1 Personal work practices are used to provide a consistent model of compliance with current public sector ***legislation and guidelines***.
	1.2 Responses to staff enquiries about the legislative requirements of the workplace are provided in a timely, consistent and constructive manner.
	1.3 The ***consequences of non-compliance*** relating to a range of legislation are explained to staff using language and materials suited to their levels of experience, learning styles and individual needs.
	1.4 ***Compliance strategies*** are used to encourage compliance with legislation, policies and guidelines in accordance with the situation at hand.
2. Monitor compliance with legislative requirements	2.1 Compliance with legislative requirements is monitored in accordance with organisational procedures.
	2.2 Compliance issues are resolved or referred in accordance with organisational policy and procedures.
	2.3 ***Inadequacies in workplace procedures*** which may contribute to non-compliance are raised promptly and addressed in accordance with organisational procedures.
	2.4 Compliance with legislative requirements is reported on, in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2024 Public Skills Australia

Skill requirements

Look for evidence that confirms skills in:

- applying research and evaluation
- assisting other people in areas such as conflict resolution, coaching, problem solving
- reading and explaining complex and formal documents such as legislation and codes of ethics and applying them to work practices
- communicating with others involving exchanges of complex oral and written information
- responding to diversity, including gender and disability
- using technology skills to access legislation and guidelines electronically
- applying environmental and occupational health and safety procedures and promoting their use by others

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation relating to the public sector (including occupational health and safety and environment)
- regulations, guidelines, policy, practices
- public sector codes of ethics/conduct
- government processes
- governance practices
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPMGT001 Manage resources

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPMNGT602B Manage resources. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to manage resources in accordance with planned business strategies. It includes analysing resource requirements, developing resource plans, allocating resources, reviewing and reporting on resource usage.

This unit applies to those involved in the management of organisation resources.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously with management responsibilities, performing complex tasks in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Analyse resource requirements	1.1 Develop resource bids in line with outputs identified in business plans. 1.2 Consult key stakeholders in determining the nature and level of resources required. 1.3 Analyse resource requirements to identify proposed costs and benefits. 1.4 Identify opportunities to share resources across business units within the organisation.
2. Develop resource plans to support achievement of business unit objectives	2.1 Develop resource plans that detail the acquisition and allocation of resources, and the relationship to business strategies, contingencies, plans, programs and processes. 2.2 Identify internal resourcing capabilities and external resourcing requirements. 2.3 Identify procedures for the evaluation of resource allocation. 2.4 Include processes for managing changing government priorities. 2.5 Obtain approval from senior management.
3. Allocate resources	3.1 Manage resource allocation to enable achievement of business unit objectives. 3.2 Negotiate and obtain resources within required timeframe. 3.3 Develop and implement systems to enable accurate monitoring and review of resource usage. 3.4 Incorporate efficient use of technology into work practices.
4. Review and report on resource usage	4.1 Develop and implement procedures to review resource allocation against business unit objectives. 4.2 Monitor compliance with program and project budgets and recommend and apply corrective action where necessary. 4.3 Prepare reports that indicate the level of performance achieved and any action taken to adjust or rectify procedures in meeting service and product delivery standards.

Assessment Requirements for PSPMGT001 Manage resources

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations, policies, procedures and guidelines relating to resource management in the public sector
- using effective consultation and negotiation with stakeholders
- writing reports requiring reasoning and precision of expression
- communicating using complex exchange of oral information
- applying budgeting and financial management

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- financial management and budgetary processes in the organisation
- business strategies
- risk management concepts
- organisational goals, policies and procedures
- jurisdictional legislation and guidelines applicable to resource management, including work health and safety and environment

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

© Commonwealth of Australia, 2024 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPMNGT611A Manage evaluations

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers managing evaluations relevant to the full range of processes and outcomes in the public sector such as policy, procedures, processes, structures, service delivery, projects etc. It includes initiating and managing the implementation of evaluations and utilising evaluation findings.

In practice, managing evaluations may overlap with other generalist or specialist public sector workplace activities such as managing people, performance and client service, acting ethically etc.

This unit is one of 2 competencies relating to evaluation in the public sector, located in the Competency fields of *Working in Government* and *Management*. Related unit of competency is:

- PSPGOV509A Conduct evaluations

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2024 Public Skills Australia

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills..

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Initiate evaluation**	1.1 A critical analysis of the need for evaluation is conducted that includes a scan of the internal and external environment, political imperatives, related activities and evaluations. 1.2 The ***scope*** of the evaluation and the terms of reference are determined in accordance with organisational policy and procedures, and a rationale, ***purpose***, outcomes and ***evaluation criteria*** are identified. 1.3 ***Stakeholders*** are identified and canvassed to ensure that their requirements are addressed in the planning stage of the evaluation. 1.4 Ownership of the evaluation data/outcomes and right of access to the reported results is secured in accordance with organisational policy and procedures. 1.5 A ***risk management*** strategy is developed and applied to ensure evaluation objectives will be met. 1.6 ***Infrastructure*** for the evaluation is approved in accordance with ***legislation, policy and procedures***.
2. **Manage implementation of evaluation**	2.1 Evaluation strategy is approved and a work plan for checking progress, reading reports and providing feedback and interim approvals is developed in accordance with requirements. 2.2 Processes identified for monitoring, evaluating and reporting progress of the evaluation against objectives and timelines are established in accordance with organisational requirements. 2.3 The political context and stakeholder expectations are managed in accordance with organisational policy and procedures, to

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	overcome barriers and ensure ongoing commitment/input to the evaluation.
	2.4 Progress of evaluation is monitored and changes are negotiated as needed to timeframes, methodology or tools in accordance with organisational policy and procedures.
	2.5 Interim and final evaluation ***reports*** are analysed, outcomes are compared to the evaluation criteria established at the outset and ***recommendations for action*** are analysed to ensure they are compatible with the organisation's strategic requirements.
	2.6 Evaluation findings are reported to stakeholders in accordance with organisational policy and procedures.
3. Utilise evaluation findings	3.1 An implementation strategy is developed to action approved recommendations and facilitate transition from current to future position.
	3.2 Evaluation findings are ***disseminated*** and ***applied*** in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- researching information
- developing objectives and evaluation criteria
- data gathering/management/measurement
- planning and analysis
- negotiating and problem solving
- applying project management in the context of managing an evaluation
- using a range of communication styles for communicating with different audiences and purposes
- responding to diversity, including gender and disability
- applying sustainability principles

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- evaluation principles - time, cost, quality, quantity, efficiency
- reporting requirements to a range of audiences

© Commonwealth of Australia, 2024 Public Skills Australia

- legislation, policy and procedures relating to the conduct of evaluations in the public sector
- public sector values, ethics and codes of conduct
- equal employment opportunity, equity and diversity principles
- environmental/sustainability standards

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPMNGT604B Manage change
  - PSPMNGT605B Manage diversity
  - PSPMNGT606B Manage quality client service
  - PSPMNGT608B Manage risk
  - PSPMNGT609B Formulate business strategies
  - PSPMNGT610A Manage public sector financial resources
  - PSPMNGT612A Review and improve business performance
  - PSPMNGT613A Develop partnering arrangements
  - PSPMNGT614A Facilitate knowledge management
  - PSPPOL601A Develop public policy

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of evaluations in a range of (3 or more) contexts (or occasions, over time)

© Commonwealth of Australia, 2024 Public Skills Australia

Resources required to carry out assessment

These resources include:

- legislation, policies, procedures and protocols
- evaluation models/types
- access to evaluation targets/objectives
- case studies and workplace scenarios to capture the range of evaluation situations likely to be encountered in the public sector

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing evaluations, including coping with difficulties, irregularities and breakdowns in routine
- management of evaluations in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

© Commonwealth of Australia, 2024 Public Skills Australia

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Scope may include evaluation of	• planning • delivery • results • needs • objectives • design • outputs • outcomes
Purpose of evaluation may include:	• measuring merit/quality • measuring worth or value for a particular purpose • measuring results, outputs or outcomes • decision making • unintentional negatives
Evaluation criteria may include:	• whether objectives have been met • standards against which to compare quality • baseline studies for comparison • performance measures • key success areas • key performance indicators • results/outputs/outcomes • value for money • public interest • those identified for a project prior to its implementation

Stakeholders may include:	• all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services such as:
	  • employees at all levels of the organisation
	  • community
	  • clients
	  • students, parents/guardians
	  • other public sector organisations

© Commonwealth of Australia, 2024 Public Skills Australia

- private sector
- non-government organisations
- union and association representatives
- boards of management
- government
- Ministers

Risk management may include:

- identification of risks
- acceptance of risks
- avoidance of risks
- minimisation of risks

Evaluation infrastructure may include:

- steering committee
- manager
- research staff
- administration staff
- office
- telephone
- technology
- email
- web site
- equipment
- consumables
- resources including time, staffing, budget
- specialist or technical support
- contractors

Legislation, policy and procedures may include:

- Commonwealth and State/Territory legislation including equal employment opportunity and anti-discrimination law
- national and international codes of practice and standards
- the organisation's policies and practices
- government policy
- codes of conduct
- confidentiality
- privacy
- ethical practices and procedures
- intellectual property
- copyright
- freedom of information
- environmental/sustainability policies

Reports may include:

- interim reports
- progress reports

© Commonwealth of Australia, 2024 Public Skills Australia

	• draft reports • executive summaries • presentations to meetings, groups, seminars • Internet or email presentations
Recommendations for action may include:	• new goals • improvement strategies • changes to services, products • change management strategies • termination • replacement • compliance with standards • further review
Dissemination of findings may be affected by:	• privacy requirements • security requirements
Application of evaluation findings may include:	• informing other projects • organisational development • contributing to knowledge management

Unit Descriptor

This unit covers management of knowledge and information in the business unit to improve productivity and organisational efficiency, promote innovation and meet business unit goals. It includes establishing the organisational context for knowledge management, developing capability, facilitating knowledge management, and integrating aspects of knowledge management with information/records management.

In practice, facilitation of knowledge management may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing change, managing diversity, facilitating workforce effectiveness, etc.

Related units in the Information competency theme in the *Working in Government* Competency field are:

- PSPGOV206B Handle workplace information
- PSPGOV307B Organise workplace information
- PSPGOV406B Gather and analyse information
- PSPGOV504B Undertake research and analysis

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish the organisational context for knowledge management	1.1 The organisation's history, culture, functions, strategic direction, performance and ***knowledge*** resources are identified. 1.2 Organisational strategies and goals that may be assisted by the development of organisational capability in ***knowledge management*** are identified. 1.3 The current ***knowledge management position*** of the organisation is assessed and the ***strengths and weaknesses*** of its knowledge resources and activities are determined. 1.4 Consultation with ***stakeholders*** is undertaken to raise knowledge and awareness of knowledge management and to establish knowledge management ***goals*** for the business unit and/or the organisation. 1.5 The cultural aspects of knowledge and knowledge management are identified and explored in the context of the organisational environment.
2. Develop capability in knowledge management	2.1 The ***benefits*** of knowledge management are identified and promoted to build an environment where these benefits may be realised. 2.2 Knowledge management ***initiatives*** are developed and aligned with the overall organisational strategy and contribute to

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	business unit goals.
	2.3 Initiatives are developed to build long-term capability in knowledge management and a culture of sharing knowledge and creating new knowledge in the organisation.
	2.4 Knowledge management initiatives are focused on the management and use of tacit knowledge in the business unit and creating new knowledge, as well as the capture and sharing of explicit knowledge.
	2.5 Management and stakeholder support is built throughout knowledge management initiatives to ensure immediate successes are transformed into ongoing benefits.
3. **Facilitate knowledge management**	3.1 Strategies are implemented to facilitate the development of strong and trusting culturally diverse networks where knowledge can be created and shared.
	3.2 ***Methods for creating, discovering and acquiring*** knowledge are facilitated in the business unit.
	3.3 ***Methods and systems for capturing and storing*** knowledge are promoted in accordance with ***legislation, policy and procedures***.
	3.4 ***Methods and systems for presenting, distributing and sharing*** knowledge are promoted.
	3.5 ***Activities for revising and disposing of*** knowledge are facilitated in accordance with legislation, policy and procedures.
4. **Integrate aspects of knowledge management with information management**	4.1 Processes for the management of explicit knowledge are integrated with the organisation's information management processes/systems to ensure efficiency and to provide wide access to explicit knowledge.
	4.2 Explicit knowledge is recorded and stored in accordance with organisational and public sector standards for information/records management.
	4.3 Structuring, maintaining and linking of explicit knowledge to related organisational ***information*** is facilitated in accordance with organisational requirements.
	4.4 Knowledge and information are managed to improve their integration and use to meet business unit goals.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2024 Public Skills Australia

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to knowledge management and information management
- showing leadership and taking risks in the context of knowledge management
- applying organisation and resource management techniques and methods
- building strong and trusting networks
- facilitating groups and learning
- communicating with a diverse range of stakeholders to build knowledge management capacity
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of knowledge and information management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to knowledge management and information management, such as privacy, freedom of information
- principles of knowledge management
- Australian Standard AS 5037(Int)-2003 Knowledge management
- tools and techniques related to introduction of knowledge management initiatives
- intersection of knowledge management with other disciplines, such as organisational learning, information management/technology, human resources management, communications
- cultural aspects of knowledge and knowledge management
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of knowledge and information management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*

© Commonwealth of Australia, 2024 Public Skills Australia

- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC601B Maintain and enhance confidence in public service
  - PSPGOV601B Apply government systems
  - PSPGOV602B Establish and maintain strategic networks
  - PSPLEGN601B Manage compliance with legislation in the public sector
  - PSPMNGT615A Influence workforce effectiveness
  - PSPMNGT602B Manage resources
  - PSPMNGT604B Manage change
  - PSPMNGT605B Manage diversity
  - PSPMNGT608B Manage risk

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of knowledge and information in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to knowledge management and information management
- current theory and practice in knowledge management
- Australian Standard AS 5037(Int)-2003 Knowledge management
- case studies and workplace scenarios to capture the range of situations likely to be encountered when managing knowledge and information

Where and how to assess evidence

Valid assessment of this unit requires:

- an environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing knowledge and information, including coping with difficulties, irregularities and breakdowns in routine
- management of knowledge and information in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as

© Commonwealth of Australia, 2024 Public Skills Australia

literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Knowledge is:

- a body of understanding and skills that is constructed by people
- increased through interaction with information (typically from other people)
- tacit - residing in the mind and may include aspects of culture or 'ways of doing things'
- explicit - when recorded as information in a document, image, film clip or some other medium AS 5037(Int)-2003
- also sometimes identified as 'expert' knowledge, or

© Commonwealth of Australia, 2024 Public Skills Australia

	'entrepreneurial' knowledge • affected by experience
Knowledge management is:	• a multi-disciplined approach to achieving organisational objectives by making best use of knowledge • involves the design, review and implementation of both social and technological processes to improve the application of knowledge in the collective interest of stakeholders AS 5037(Int)-2003
The organisation's current position in relation to knowledge management may include:	• low literacy in knowledge management and no trust or networks developed (new organisation) • low literacy in knowledge management but well-networked staff (existing organisation) • high literacy in knowledge management but no trust or networks developed (new organisation) • high literacy in knowledge management and well-networked staff (existing organisation)
Strengths and weaknesses may relate to:	• people • process • technology • content

Stakeholders may include:	• all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services, including:
	  • boards of management
	  • clients
	  • community organisations
	  • contractors
	  • employees at all levels of the organisation
	  • government
	  • Ministers
	  • other public sector organisations
	  • service providers
	  • suppliers
	  • the public
	  • union and association representatives
	  • volunteers

Knowledge management goals may include:	• new knowledge creation • improving knowledge utilisation • developing a community of practice in knowledge management with strong social networks

© Commonwealth of Australia, 2024 Public Skills Australia

Benefits of knowledge management may include:	• improved decision making • improved performance • improved productivity and organisational efficiency • retaining corporate knowledge and organisational learning • improving networking, trust and morale • increased innovation • increased motivation
Knowledge management initiatives may include:	• development of knowledge management policy/strategy • knowledge management projects • mentoring in knowledge management • electronic collaboration • tools and approaches to remedy weaknesses in knowledge management or build on strengths
Methods for creating, discovering and acquiring knowledge may include:	• meetings to foster innovation • employing staff or consultants with knowledge/skills not currently in the organisation for the purpose of knowledge transfer • research outside the organisation • through publications • analysis of existing and archived information • auditing/mapping of information • consulting staff in similar organisations

Methods and systems for capturing and storing knowledge may include:	• traditional information management systems, such as:
	  • files
	  • books
	  • journals
	  • documentation and archives
	  • intranets
	  • portals
	  • web sites
	  • databases
	  • electronic documents
	• ways of making tacit knowledge visible and available (without making it explicit and storing as above), such as advertising available expertise, providing help desk facilities
	• capturing learning from past activities
	• openness to change
	• drive for continual improvement

Legislation, policy and	• State/Territory and Commonwealth legislation, regulations and guidelines relating to knowledge management and

© Commonwealth of Australia, 2024 Public Skills Australia

procedures may include:	information management, such as privacy, freedom of information, confidentiality, security, etc • public sector management acts • codes of ethics • codes of conduct • public sector standards, such as fraud control, security management, risk control • disaster recovery
Methods and systems for presenting, distributing and sharing knowledge may include:	• information management systems • intranets • files • databases • work processes where explicit knowledge is formally distributed • face-to-face meetings • providing leadership to encourage risk taking • development of trusted social networks for knowledge exchange
Activities for revising and disposing of knowledge may include:	• processes to authenticate and update knowledge • processes to ensure that out-of-date or incorrect knowledge (especially tacit knowledge) is not used • processes for destruction of explicit knowledge that follow records management standards for destruction of records and public sector/legal requirements
Information is:	• data in a context to which meaning has been attributed AS 5037(Int)-2003

PSPMNGT615A Influence workforce effectiveness

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the competency to ensure the effectiveness of the workforce, whether staff or contractors, in promoting the attainment of strategic objectives. It includes providing leadership to individuals and work teams, creating a cooperative work environment, capitalising on workplace emotions, motivating the workforce to achieve quality results, and delegating work to achieve strategic objectives, and managing up.

In practice influencing workforce effectiveness occurs in the context of other generalist or specialist work functions such as managing performance, managing diversity, managing change, managing client service.

This unit is one of a series of 4 units of competency relating to working with others, located in the Competency fields of *Working in Government* and *Management*. Related units are:

- PSPGOV302B Contribute to workgroup activities
- PSPGOV404B Develop and implement work unit plans
- PSPGOV511A Provide leadership

This unit replaces *PSPMNGT601A Facilitate workforce effectiveness*. The units are not equivalent as elements dealing with emotional intelligence and managing up have been added.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Provide leadership to individuals and work teams**	1.1 The vision and strategic goals of the organisation that impact on the work area are identified and promoted. 1.2 ***Workforce members*** are regularly consulted on business objectives, plans and operational issues to minimise role ambiguity and uncertainty. 1.3 Roles, functions, responsibilities and work goals are defined in accordance with organisational requirements, and are communicated and agreed. 1.4 Opportunities are provided for workforce members to clarify aspects of particular tasks, resolve issues and seek feedback or further direction. 1.5 Encouragement is provided to develop new and innovative practices, procedures, processes, technologies and strategies in line with corporate values, vision and goals. 1.6 ***Leadership*** is provided appropriate to changing priorities and situations and takes account of the specific needs of a diverse workforce.
2. **Create a cooperative work environment**	2.1 Cooperation in the work environment is actively facilitated through balanced and fair work allocation and recognition of all contributions.

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2 Teams and individuals are encouraged to find styles of working which are consistent both with team and individual competencies, preferences and ***business unit*** objectives.
	2.3 Conflict management strategies are used to facilitate a cooperative work environment.
	2.4 Cooperative and productive relationships with individuals and teams are established.
	2.5 Leadership style and guidance that take into account the differing needs and background of a diverse workforce are used.
3. **Monitor and respond to workplace emotions**	3.1 Emotional ***strengths*** and triggers are ***identified*** for self and ***others in the workplace***, and communication, client service or work allocations are tailored to take account of these.
	3.2 Self-reflection and feedback is used to identify the effect on others of own emotions, and emotional control is exerted to model positive workplace behaviour.
	3.3 Opportunities are provided for others to express their thoughts and feelings, and ***emotions*** are taken into account in decision making to maintain a positive emotional climate in the workplace.
	3.4 Assistance is provided to others to identify the effect of emotions in the workplace and to ***develop*** and use their own ***emotional intelligence*** to build productive relationships and maximise workplace outcomes.
4. **Motivate the workforce to achieve quality results**	4.1 Ways to motivate a diverse workforce are explored and matched to individual needs.
	4.2 Opportunities are identified for individuals to develop competencies required to meet work objectives.
	4.3 Individuals' career development requirements are recognised and balanced with team objectives.
	4.4 Feedback that is prompt, consistent and constructive and ongoing is provided on performance.
	4.5 Achievements are promoted and rewarded in a way which openly acknowledges the contribution of individuals and teams.
	4.6 ***Team building strategies*** are applied to strengthen individual and team commitment to organisational vision and work unit goals.
5. **Delegate work to achieve business unit strategic objectives**	5.1 Work is delegated in accordance with individual competencies or as development opportunities arise, and sufficient information is communicated, resources allocated and support provided to enable tasks to be completed successfully.
	5.2 Responsibilities are delegated while still accepting accountability for their success/failure.

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	5.3 Mechanisms for monitoring progress in achieving work goals are established and implemented in accordance with organisational policy and practices.
	5.4 Areas for improvement are determined collaboratively and improved processes/strategies are implemented.
	5.5 Tasks are delegated effectively to facilitate the attainment of business unit objectives and the continuous improvement of business processes.
	5.6 Up-to-date and accessible record of delegations is maintained in accordance with organisational policy and procedures.
6. **Manage up**	6.1 People and influences outside the immediate work environment with the potential to affect work priorities, outcomes and resources are identified.
	6.2 Role relationships and responsibilities for managing up are analysed.
	6.3 Strategies are developed and implemented to ensure executives consider the operational consequences of policy changes.
	6.4 Strategies are used to engage support for public sector activities and ensure sufficient resources are provided to implement initiatives.
	6.5 Self-evaluation and feedback from ***others*** on own performance is used to continuously improve performance and outcomes.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- delegating work to others
- counselling and resolving conflict in teams
- using team building strategies
- using facilitation, negotiation and consultation requiring exchanges of complex oral information
- using consensual decision making skills
- keeping check of emotions when challenges arise, maintaining composure, perceiving the emotional motivators that drive individuals and groups in the workplace and engaging those motivators, where appropriate, to optimize organisational performance

© Commonwealth of Australia, 2024 Public Skills Australia

- using a variety of words and language structures to explain complex ideas to different audiences
- interpreting and explaining complex, formal documents and assisting others to apply them in the workplace
- responding to diversity, including gender and disability
- applying occupational health and safety strategies relevant to managing and working with others in a public sector workplace

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- organisational goals, policies and procedures
- equal employment opportunity, equity and diversity principles
- the relationship between effective human resource functions and the attainment of business unit objectives
- human resource policies and practices
- emotional intelligence principles and strategies
- group processes and facilitation techniques
- team building strategies
- the organisation's career and human resource development strategies, programs and plans
- conflict resolution strategies
- jurisdictional legislation applicable to management and human resource management functions
- occupational health and safety issues relevant to managing and working with others in a public sector workplace
- environmental and sustainability issues relevant to managing and working in a public sector environment

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC601B Maintain and enhance confidence in

© Commonwealth of Australia, 2024 Public Skills Australia

public service
- PSPGOV601B Apply government systems
- PSPGOV602B Establish and maintain strategic networks
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPPOL603A Manage policy implementation

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- workforce effectiveness influenced in a range of (3 or more) contexts (or occasions, over time) such as working with staff, clients and contractors

Resources required to carry out assessment

These resources include:

- procedures and protocols
- public sector policies and legislation such as those dealing with:
- human resource management and development
- workforce capability
- case studies and workplace scenarios to capture the range of situations likely to be encountered when influencing workforce effectiveness

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when facilitating workforce effectiveness, including coping with difficulties, irregularities and breakdowns in routine
- workforce effectiveness influenced in a range of (3 or more) contexts (or occasions, over time) such as working with staff, clients and contractors

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women

© Commonwealth of Australia, 2024 Public Skills Australia

- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Workforce members may include:	• employees • consultants • external contractors • job rotation staff • trainees
Leadership refers to:	• the process of influencing others to engage in work behaviours that facilitate the attainment of the business unit's strategic objectives
Business unit may refer to:	• a program • sub-program • cost centre • area • division

© Commonwealth of Australia, 2024 Public Skills Australia

- branch
- production unit or section located within the organisation

Emotional strengths may include ability to:

- monitor and control negative emotions
- recognise and respond to others' emotional states
- see beyond an immediate emotional reaction to the real cause, rather than responding to the emotions on face value

Identification of emotions may need to take account of:

- the varying cultural expressions of emotion

Others in the workplace may include:

- management
- staff
- clients
- contractors

Emotions may include:

- anger
- anxiety
- apprehension
- caring
- confidence
- depression
- elation
- enthusiasm
- excitement
- fear
- happiness
- inadequacy
- joy
- nervousness
- over-confidence
- pride
- stress
- under-confidence
- unhappiness

Development of emotional intelligence may occur through:

- mentoring
- shadowing
- coaching
- training
- simulation

© Commonwealth of Australia, 2024 Public Skills Australia

Emotional intelligence is:	• widely recognised as the ability of an individual to monitor their own and others' emotions in a social or work environment, to discriminate among the emotions and to use the information to guide their thinking and actions • characterised by self-awareness (personal), self-management (personal), social awareness (social) and relationship management (social)
Team building strategies may include:	• defining and clarifying objectives/work area plans • strengthening communication processes • clarifying ground rules and behavioural expectations • fostering creativity • offering constructive feedback • providing facilitated meetings • recognising achievements
Others may include:	• superiors • reportees

PSPOHS301A Contribute to workplace safety

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the competency to contribute to a safe workplace for self and others. It includes contributing to workplace safety arrangements, identifying hazards and controlling risks.

In practice, workplace safety may be demonstrated in the context of other work activities such as contributing to workplace activities, organising workplace information, implementing change, giving and receiving feedback.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

© Commonwealth of Australia, 2024 Public Skills Australia

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to participative workplace safety arrangements	1.1 Occupational health and safety ***issues*** are addressed/reported to ***designated personnel*** in accordance with workplace procedures and ***occupational health and safety legislation***. 1.2 ***Contributions*** are made to ***participative workplace safety arrangements*** within organisational procedures and scope of responsibilities and competencies.
2. Identify hazards and control risks	2.1 Existing and potential ***hazards*** in the work area are identified, dealt with and/or reported to designated personnel according to workplace procedures. 2.2 ***Workplace procedures*** and work instructions for ***controlling risks*** are identified and implemented. 2.3 Workplace procedures for dealing with accidents and ***other hazardous events*** are followed whenever necessary within scope of responsibilities and competencies. 2.4 Feedback on the effectiveness of safety procedures and risk control measures is provided to enable improvements to be made where necessary.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying objective identification of workplace safety issues

© Commonwealth of Australia, 2024 Public Skills Australia

- documenting hazards in clear language according to organisational guidelines
- accessing workplace safety legislation, policies and procedures electronically or in hard copy
- reading documentation such as workplace safety legislation, policies and procedures and applying them to work practices
- tailoring communication to suit different audiences, such as colleagues, management, safety representatives, inspectors
- responding to diversity, including gender and disability

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legal rights and responsibilities of the workplace parties
- the ways in which occupational health and safety is managed in the workplace, and legal requirements
- participative arrangements for workplace safety
- workplace hazards and associated risks
- preferred order of ways to control risks
- occupational health and safety procedures
- the meaning of workplace occupational health and safety symbols and signs
- designated workplace personnel responsible for occupational health and safety

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPGOV301B Work effectively in the organisation
  - PSPGOV302B Contribute to workgroup activities
  - PSPGOV303B Build and maintain internal networks
  - PSPGOV306B Implement change
  - PSPGOV307B Organise workplace information
  - PSPGOV308B Work effectively with diversity
  - PSPGOV312A Use workplace communication strategies

© Commonwealth of Australia, 2024 Public Skills Australia

- PSPGOV313A Compose workplace documents

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- contribution to workplace safety in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- organisational occupational health and safety legislation, policies and procedures
- details of the organisation's occupational health and safety system
- information on hazards and risks relevant to the workplace
- personal protective equipment
- relevant work areas for identification of hazards and control measures

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when contributing to workplace safety, including coping with difficulties, irregularities and breakdowns in routine
- the applicant to contribute to workplace safety in a range of (3 or more) contexts (or occasions, over time)
- the assessor to have recognised expertise in managing occupational health and safety in the industry, or work in an assessment team with such a person.

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination

© Commonwealth of Australia, 2024 Public Skills Australia

	of 2 or more of: • case studies • demonstration • observation • questioning • scenarios • simulation or role plays • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Occupational health and safety issues may include:	• hazards relating to the physical environment • workplace stress • conflict • bullying • harassment

Designated personnel may include:	• supervisors
	• managers
	• team leaders
	• designated occupational health and safety officers
	• health and safety representatives
	• other persons authorised or nominated by the enterprise or industry to:
	  • perform specified work
	  • approve specified work
	  • inspect specified work
	  • direct specified work

Occupational health and safety legislation may	• State/Territory/Commonwealth occupational health and safety acts, regulations and codes of practice including, but

© Commonwealth of Australia, 2024 Public Skills Australia

include:	not limited to: • regulations and codes of practice relating to hazards present in the workplace or industry • general duty of care under occupational health and safety legislation and common law • provisions relating to roles and responsibilities of health and safety representatives and/or occupational health and safety committees • provisions relating to occupational health and safety issue resolution
Contributions may include:	• identifying and reporting hazards and their associated risks • identifying safety issues and hazards that can be addressed immediately and taking action in accordance with safety procedures • reporting on effectiveness of safety procedures and risk controls • suggesting improvements to procedures and controls • listening to the ideas and opinions of others in the workplace • sharing opinions, views, knowledge and skills
Participative workplace safety arrangements may include:	• formal and informal health and safety meetings • health and safety committees • other committees, for example, consultative, planning and purchasing • meetings called by health and safety representatives • suggestions, requests, reports and concerns put forward to management
Hazard identification may include:	• checking equipment or the work station and work area before work commences and during work • workplace inspections • responding to physical cues that ergonomics are ineffective and need adjustment • on-the-job housekeeping checks (spills, furniture out of place, loose hand rails, curling mats, frayed cords, etc) • anticipation of potential hazards
Workplace procedures may include:	• complying with workplace occupational health and safety symbols and signs • hazard reporting procedures • job procedures, safe work instructions and allocation of responsibilities • emergency procedures • incident and near miss reporting and recording procedures

© Commonwealth of Australia, 2024 Public Skills Australia

	• consultation on occupational health and safety issues • correct selection, use, storage and maintenance procedures for use of personal protective equipment • risk control procedures

Controlling risks may include actions such as:	• consultation with others
	• measures to remove the cause of the risk at its source
	• application of the hierarchy of control, namely:
	  • elimination
	  • substitution
	  • engineering controls
	  • administrative controls
	  • personal protective equipment

Other hazardous events may include:	• fires • bomb threats • chemical spills • occupational violence • natural disasters/events • terrorist attacks

PSPPCM001 Carry out basic procurement

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPPROC303A Carry out basic procurement. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to plan and undertake basic procurement of goods or services and receive goods or services.

This unit applies to those working in public sector roles whose duties include simple purchasing of low-value goods or services, and coordinating the end-to-end process.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, and as part of a team, while performing routine tasks, in familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Procurement

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan for basic procurement of goods or services	1.1 Confirm procurement requirements and limit of delegated authority. 1.2 Determine the most suitable option for acquiring goods or services considering value for money. 1.3 Identify the approval process. 1.4 Conduct risk planning for the procurement activity.
2. Undertake procurement	2.1 Obtain quotes and approvals for procurement of goods or services with any conflict of interest declared and resolved. 2.2 Assess and select suppliers or service providers in line with the organisation's financial management system and on the basis of best value for money. 2.3 Initiate and conduct procurement in accordance with organisation's probity and governance requirements.
3. Receive goods or services	3.1 Implement quality assurance processes to ensure goods or services meet procurement specifications. 3.2 Resolve non-compliance with specifications within limits of own authority. 3.3 Confirm receipt of goods or services and process accounts for payment. 3.4 Maintain records and meet reporting obligations to provide an audit trail.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPPROC303A Carry out basic procurement.

Assessment Requirements for PSPPCM001 Carry out basic procurement

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion:

- writing and conveying procurement requirements
- consulting and negotiating with providers
- assessing procurement options and selecting the most suitable option
- assessing goods and services against specifications

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- Commonwealth, state/territory and local government procurement legislation, policies and procedures, including environmental purchasing guidelines
- conflict of interest, gifts and inappropriate relationships with providers relating to procurement of goods and services
- procurement options and methods
- coping with difficulties, irregularities and breakdowns in routine in 3 or more contexts or occasions

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

© Commonwealth of Australia, 2024 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Interpret procurement requirements	1.1 Consult with stakeholders to determine whether viable alternatives to procurement exist that address identified business need, to define and clarify requirements, and to justify the procurement decision. 1.2 Conduct scoping of procurement requirements identifying outcomes, objectives and logistics or supply chain factors. 1.3 Conduct market analysis to identify factors that may impact on procurement decisions. 1.4 Confirm procurement approvals and appropriations for whole-of-life of the activity. 1.5 Access information on sources of supply to determine possible providers and identify and resolve any conflict of interest. 1.6 Specify planned provider contract arrangements. 1.7 Investigate issues and opportunities for integration into procurement activity.
2. Plan procurement activities	2.1 Outline procurement requirement from transition to close out. 2.2 Plan opportunities to obtain stakeholder input at all stages of the procurement process. 2.3 Confirm resource requirements and nominate responsible authorities. 2.4 Include strategies for briefing potential bidders when required, and ensure they are practical and meet probity requirements of fairness and impartiality, public sector standards and organisational protocols.
3. Manage procurement plans	3.1 Develop and approve procurement documentation and procurement plan which contains relevant detail about the procurement process and desired business outcomes. 3.2 Seek stakeholder input at all stages during the development of the procurement plan. 3.3 Consider probity risks in the procurement process. 3.4 Communicate approved procurement plan or strategy to stakeholders.

Assessment Requirements for PSPPCM004 Plan procurement

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- consulting with stakeholders
- writing a procurement requirement
- analysing issues relating to procurement need
- making comparisons, justifying a point of view and providing supporting evidence
- researching issues relating to procurement need
- planning issues relating to procurement need
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- Commonwealth, state or territory, and local government legislation, policies, practices and guidelines relating to contract management, including environmental purchasing and corporate social responsibility guidance
- organisational procurement policies, practices and approval processes
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to procurement
- life cycle costs
- whole-of-life considerations
- technical knowledge or subject matter expertise in the goods or services being procured

© Commonwealth of Australia, 2024 Public Skills Australia

- aspects of law of contract, laws of tort, trade practices law, commercial law and other legislation relating to receipt and evaluation of offers, negotiation and award of contracts

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Specify procurement requirement	1.1 Undertake scoping of requirement to identify outcomes, objectives and practical requirements. 1.2 Prepare statement of requirement. 1.3 Consider needs of clients, end users and other stakeholders and incorporate into statement of requirement. 1.4 Ensure procurement outcome is fair to, and achievable by, potential providers. 1.5 Specify planned provider contract arrangements, standards of performance and codes of practice, incentives, disincentives and performance measures.
2. Develop request for offers	2.1 Develop and clarify request for offers and contractual conditions suitable for procurement activity with clients, providers and/or experts as necessary. 2.2 Develop and clarify contractual conditions suitable for procurement activity with clients, providers and/or experts as necessary. 2.3 Obtain input on content of request for offer documents and proposed contractual conditions from market according to probity requirement of impartiality when possible and appropriate. 2.4 Obtain approvals to approach marketplace. 2.5 Maintain records relating to documenting request, and seeking, processing and closing offers.
3. Manage offer evaluation plan	3.1 Develop and document offer evaluation plan, including criteria for evaluation and approve prior to releasing formal request documentation to the market. 3.2 Arrange specialist expertise to evaluate offers and membership of evaluation panel if required. 3.3 Ensure offer evaluation plan complies with probity requirements, in particular impartiality and management of conflict of interest.
4. Manage distribution and receipt of offers	4.1 Disseminate request for offers. 4.2 Clarify information in the request for offer as required. 4.3 Disseminate requests for offers and closing offers in line with probity issues. 4.4 Deal with late offers and non-conforming bids.

Assessment Requirements for PSPPCM005 Develop and distribute requests for offers

Modification History

Not applicable.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- consulting with stakeholders, specialists and providers
- reading complex documents
- applying probity requirements in specifying and developing requests for offers, providing briefings and information, and receiving offers
- managing the release of documents to stakeholders
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- Commonwealth, state or territory, and local government legislation, policies, practices and guidelines: relating to requests for offers, including environmental purchasing and corporate social responsibility guidance
- organisational procurement policies, practices and approval processes
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to developing and receiving requests for offers
- issues to be considered when developing requests for offers, including things like buying locally, and open or restricted opportunities to tender
- aspects of law of contract, laws of tort, trade practices law, commercial law and other legislation relating to requests for offers

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

PSPPCM006 Select providers and develop contracts

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPPROC413A Select providers and develop contracts. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to select preferred providers as a result of a formal request for offer process. It includes evaluating offers, obtaining approvals, developing and formalising contractual arrangements, and debriefing the market and other stakeholders.

This unit applies to those working as public sector staff required to select providers.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, while performing complex tasks in familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Select preferred providers	1.1 Form and coordinate evaluation panel. 1.2 Evaluate offers according to evaluation plan and organisational probity requirements which relate to managing conflicts of interest and adherence to public sector standards. 1.3 Obtain specialist expertise where necessary to assist with evaluation of offers. 1.4 Undertake clarification and negotiation of matters contained in offers with bidders. 1.5 Select preferred providers and develop, justify and document recommendations for allocation of business against selection criteria. 1.6 Obtain approvals for the recommended offers. 1.7 Notify successful providers.
2. Develop and formalise contractual arrangements	2.1 Obtain approvals to enter negotiations and negotiate final wording of contract. 2.2 Obtain approvals to enter into contracts and ensure contracts are signed by all parties before contracted work commences. 2.3 Structure contracts to capture and address identified risks, protect both parties, provide the basis for due performance, and outline expected standards of behaviour. 2.4 Ensure contracts are valid and legally binding to the parties.
3. Debrief market and other stakeholders	3.1 Provide advice on the contractual arrangements to internal stakeholders. 3.2 Inform unsuccessful bidders and provide constructive feedback on their proposals. 3.3 Make details of successful providers public.

Assessment Requirements for PSPPCM006 Select providers and develop contracts

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- consulting and negotiating with contractors and stakeholders, involving complex oral and written exchanges of information
- networking within probity boundaries with diverse stakeholders and contractors
- applying probity requirements in evaluating offers, formalising contracts and debriefing stakeholders
- planning and organising skills to analyse and compare written information to ensure key elements from the specification and the procurement plan are captured in the written contract
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- Commonwealth, state or territory, and local government legislation, policies, practices and guidelines relating to award of contracts, including environmental purchasing and corporate social responsibility guidance
- organisational procurement policies, practices and approval processes
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to receipt and selection of offers

© Commonwealth of Australia, 2024 Public Skills Australia

- aspects of law of contract, laws of tort, trade practices law, commercial law and other legislation relating to receipt and evaluation of offers, negotiation and award of contracts
- equal employment opportunity

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPPCM008 Manage contract performance

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPPROC503B Manage contract performance. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to implement strategies that ensure effective contract performance. It includes managing the business relationship, performance of the contract, and contract issues; and implementing a communication strategy.

This unit applies to those working in roles involved in procurement contract maintenance.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently seeking advice as required, performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Confirm contract requirements	1.1 Identify legislation, public sector standards and organisational requirements relating to probity, financial management, approvals and other considerations for inclusion in the contract management plan. 1.2 Re-confirm contract requirements with all parties. 1.3 Determine obligations to the contractor, limits of authority and delegations according to contractual arrangements. 1.4 Confirm start-up or transition arrangements.
2. Prepare contract management plan	2.1 Identify contract risks and develop a risk management plan. 2.2 Determine procedures to identify, receive and address contract variations. 2.3 Determine procedures to investigate, resolve or refer disputes or complaints. 2.4 Develop and negotiate key performance indicators and identify and approve administrative processes for the life of the contract. 2.5 Document, obtain approval on and maintain a contract management plan that addresses key elements. 2.6 Apply expected standards of behaviour, probity and privacy principles to all elements of contract management plan. 2.7 Apply environmental, sustainability and corporate social responsibility principles to all elements of contract management plan.
3. Develop stakeholder relationships	3.1 Identify stakeholder networks and relationships. 3.2 Use networking strategies to establish, develop and maintain working relationships to promote benefits to the contract requirements. 3.3 Develop and maintain confidence of stakeholders through high standards of behaviour and ethical conduct. 3.4 Use negotiation strategies to achieve positive outcomes when difficult situations arise. 3.5 Identify and confirm communication requirements in line with contractual obligations and stakeholder needs.
4. Implement contract strategies	4.1 Identify requirements of confidentiality and freedom of information for the contract. 4.2 Develop communication and/or information strategy that matches needs of the organisation, the contract and the contractor's

© Commonwealth of Australia, 2024 Public Skills Australia

	business environment. 4.3 Establish contract review requirements with stakeholders. 4.4 Develop contract review strategy to review management of the contract, contractor performance and user satisfaction.
5. Implement contractual arrangements	5.1 Establish and manage business relationship with contractor. 5.2 Implement start-up or transition arrangements. 5.3 Establish financial, administrative and information management processes. 5.4 Implement contractual arrangements according to contract management plan. 5.5 Maintain appropriate records for the life of the contract.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Establish, apply and manage procurement governance arrangements	1.1 Make contributions to forward procurement planning. 1.2 Apply organisational, financial and budgetary framework effectively to procurement. 1.3 Research and apply organisational objectives, policies and goals. 1.4 Identify and apply relevant interacting legislative, policy and probity requirements to the proposed procurement activity. 1.5 Develop and/or assess procurement needs, aligned to organisational objectives, business plan and appropriate justification of estimated procurement expenditure. 1.6 Propose alternatives to procurement action where appropriate. 1.7 Apply and manage probity principles when planning procurement activities.
2. Identify, consult with and manage procurement stakeholders	2.1 Identify internal and external stakeholders for procurement activities. 2.2 Develop strategies to effectively gather information from and distribute information to procurement stakeholders throughout the procurement process. 2.3 Inform and educate stakeholders on the concept of value for money. 2.4 Develop strategies for the ongoing consideration and management of key stakeholders.
3. Conduct market research and develop appropriate strategies to approach the market	3.1 Conduct market research and analysis. 3.2 Identify strengths and weaknesses of the market. 3.3 Determine appropriate procurement options and procurement methods for approaching the market, taking into account relevant jurisdictional and organisational policy requirements.
4. Identify, source and manage resources to conduct procurement processes	4.1 Identify, seek and manage financial and budgetary resources required to effectively conduct procurement processes. 4.2 Identify, seek and manage technical and procurement expertise required to effectively conduct procurement processes, including the establishment of tender evaluation panel or working group. 4.3 Determine and apply appropriate structures and processes to the conduct of the procurement, including operation of the tender evaluation panel or working group.

© Commonwealth of Australia, 2024 Public Skills Australia

	4.4 Plan and communicate appropriate lead times for conducting procurement processes to stakeholders.
5. Define procurement specifications and requirements	5.1 Align procurement requirements with organisational objectives and business plans that are realistic in terms of the capacity of the market to supply. 5.2 Develop and/or critically assess statements of requirements and specifications that meet business needs of the organisation. 5.3 Review previous procurements and consult stakeholders to inform and define the specifications. 5.4 Explore the viability of specifications to ensure risks and whole-of-life costs and benefits are identified and to support value for money.
6. Undertake detailed procurement planning	6.1 Assist stakeholders to make meaningful contributions to procurement plans. 6.2 Conduct procurement risk assessments and determine appropriate risk management strategies. 6.3 Address jurisdictional, organisational, legislative, policy and probity requirements. 6.4 Design a procurement process that achieves a value for money outcome, including consideration of whole-of-life costs and benefits. 6.5 Document detailed procurement plans and sub-plans for the various activities that will be conducted throughout the procurement process, including evaluation and reporting requirements. 6.6 Plan prompt execution of financial delegations and other approvals. 6.7 Undertake procurement activity in line with jurisdictional, organisational and best practice requirements for accountability and transparency, including record keeping and reporting regimes.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

- providing feedback
- modelling effective team management approaches
- referring issues to the correct person
- resolving complicated procurement issues
- developing options for inclusion in a business case
- undertaking research and business analysis
- planning procurement processes in alignment with business and organisational goals
- documenting procurement planning decisions and expected outcomes
- managing and updating the procurement plan and sub-plans
- maintaining currency in best practice examples in procurement practice and relevant procurement legislation, policies and procedures
- using electronic procurement templates

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

© Commonwealth of Australia, 2024 Public Skills Australia

- Commonwealth, state or territory, and local government legislation, policies, practices and guidelines relating to contract management, including environmental purchasing and corporate social responsibility guidance
- organisational procurement policies, practices and approval processes
- procurement planning for complex procurement requirements and associated outcomes in alignment with business and organisational goals
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to the procurement process
- government procurement environment
- legal requirements of government procurement
- implications of particular procurement arrangements
- whole-of-life considerations
- financial and accounting issues relevant to the procurement
- cultural issues relating to complex procurement and industry development in certain industry sectors
- relationship management

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPPCY006 Develop organisation policy

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPPOL501A Develop organisation policy. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to develop or review internal policy in an organisation, formulated to facilitate the implementation of government or board directives. It includes anticipating and confirming the need for policy development or review; planning the policy development process; gathering and analysing information; determining policy direction; and drafting, releasing and promoting policy.

This unit applies to public sector staff working in policy development.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, while performing complex tasks in familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

© Commonwealth of Australia, 2024 Public Skills Australia

Competency Field

Policy

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Assess the need for policy development and/or review	1.1 Identify internal and external factors, issues, events, directions or government and/or board policies likely to cause changes to organisation policy. 1.2 Identify the likely implications and impact of factors on policy development in consultation with stakeholders. 1.3 Conduct a critical analysis of the need for new or revised policy including a scan of the wider internal and external environment. 1.4 Recommend priority areas for policy development and/or review. 1.5 Detail confirmation of the need for policy development and/or review with supporting evidence.
2. Plan the policy development process	2.1 Confirm the approving authority and relevant organisational procedures and protocols. 2.2 Identify and analyse issues likely to impact on the policy development process and address risks in planning. 2.3 Outline policy requirements in a policy development plan.
3. Gather and analyse information for policy development	3.1 Identify and engage with stakeholders through the establishment and maintenance of a representative and relevant policy network. 3.2 Identify, gather, analyse and interpret information required to support the policy development process. 3.3 Determine and apply an analytical framework for the development of the policy.
4. Determine policy direction	4.1 Develop a range of policy options and criteria for choice and communicate them to those responsible for selecting the policy direction. 4.2 Promote specific policy options to executives within the organisation. 4.3 Recommend preferred policy option. 4.4 Determine risk treatments in accordance with the policy development plan. 4.5 Obtain approvals.
5. Draft policy	5.1 Implement a cyclical process of consultation, feedback,

© Commonwealth of Australia, 2024 Public Skills Australia

	identification of changes and re drafting. 5.2 Implement risk management processes in accordance with the policy development plan to ensure progress against the timeframe and milestones. 5.3 Add an implementation plan in the policy that details responsibilities for implementation and strategies for transition, change management, initial and ongoing training and maintenance of the policy. 5.4 Add mechanisms within the policy for monitoring compliance, quality assurance, and evaluation of the policy.
6. Finalise development of policy	6.1 Clear policy through organisational channels, and gain agreement of critical stakeholders. 6.2 Ensure all stakeholders, particularly those who will be responsible for implementing the new or revised policy, are informed of the outcomes, and manage fallout from dissenting stakeholders. 6.3 Release and promote policy.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPPOL501A Develop organisation policy.

Assessment Requirements for PSPPCY006 Develop organisation policy

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- reading and evaluating complex and formal documents
- researching, analysing and presenting information
- preparing written reports
- consulting on and validating policy
- dealing with different points of view and dissenting stakeholders

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- policy development processes and practices in the public sector
- policy cycles
- analytical policy development frameworks
- current policies underpinning the work area
- organisation and government procedures and protocols
- public sector code/s of ethics and code/s of conduct

© Commonwealth of Australia, 2024 Public Skills Australia

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPPM401B Design simple projects

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the planning and development of simple, generally low risk projects that may be small scale and managed by one person or by a person with a small team. It includes identifying project requirements, preparing a business case, preparing the project plan and establishing project infrastructure. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, project planning and development overlaps with other generalist and specialist work activities such as applying government processes, using resources, developing work plans, gathering information.

This unit, and unit *PSPPM405A Administer simple projects*, are mutually exclusive. One or the other, but not both, may contribute to a qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2024 Public Skills Australia

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify project requirements**	1.1 A rationale for the project is outlined that identifies the purpose, outcomes and likely benefits for the user/s. 1.2 ***Stakeholders*** are identified and their input is obtained at the planning stage to ensure the project proposal and its objectives are required and achievable. 1.3 The project environment is assessed and environmental issues are addressed in the project proposal. 1.4 ***Project parameters*** are determined and a project proposal is completed to organisational standards and within guidelines. 1.5 The project proposal is structured so it is compatible with organisational objectives and other organisational projects, and is designed in accordance with the organisation's ***policies and procedures*** and in consultation with ***specialists*** to meet user/client requirements.
2. **Prepare business case**	2.1 Research and analysis is undertaken to identify impacts and risks, ***constraining factors*** and alternate options. 2.2 Options and solutions are identified, advice is obtained and recommendations are made in accordance with the strategic direction of the organisation/work unit. 2.3 A ***report*** is prepared that demonstrates a business case for the project in accordance with organisational requirements. 2.4 ***Approvals*** for the project proposal are obtained in accordance with organisational policy and procedures.
3. **Prepare project plan**	3.1 ***Project scope*** is determined in terms of objectives, outcomes

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and project deliverables.
	3.2 Specialists are consulted where necessary, to advise on potential risks, and ***options to manage risks*** are investigated and recorded in the ***project plan.***
	3.3 Each of the ***parameters*** identified in the proposal are addressed in the project plan in consultation with relevant parties and appropriate approvals are sought and recorded.
	3.4 ***Project management tools*** are utilised for planning in accordance with project requirements.
	3.5 Project outputs are determined that are measurable and achievable and indicators to monitor the performance of the project are developed, under guidance, and agreed by relevant parties in accordance with organisational policy and procedures.
4. **Establish project infrastructure**	4.1 An implementation strategy is developed in accordance with the project plan and organisational guidelines, and presented to stakeholders to gain project support.
	4.2 Terms of reference and ***project infrastructure*** requirements for set-up and implementation of the project are clarified in the implementation strategy in accordance with the project plan.
	4.3 Resources are obtained to set up the project office, and roles and responsibilities are assigned to team members and stakeholders as agreed in the project plan.
	4.4 Processes identified for monitoring, evaluating and reporting performance against project objectives are established in accordance with the project plan.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- detailing requirements, writing recommendations and preparing plans requiring precision of expression
- negotiating timelines, roles and responsibilities with stakeholders or team members
- communicating with stakeholders or team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability

© Commonwealth of Australia, 2024 Public Skills Australia

- using project management tools
- applying workplace safety procedures in line with project planning requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on the project and management of the project, for example:
- public sector codes of ethics/conduct
- occupational health and safety and environment requirements
- quality standards
- risk management
- financial management
- procurement
- human resources
- equal employment opportunity, equity and diversity principles
- organisational project approval processes
- scheduling
- change management
- project planning methods for small scale or low risk projects
- project management tools to suit the projects planned
- principles relating to the planning phase of project management for small scale or low risk projects

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV402B Deliver and monitor service to clients

© Commonwealth of Australia, 2024 Public Skills Australia

- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV405B Provide input to change processes
- PSPGOV408A Value diversity
- PSPGOV411A Deal with conflict
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV416A Monitor performance and provide feedback
- PSPGOV422A Apply government processes
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPOHS401B Implement workplace safety procedures and programs
- PSPPROC409A Receive and select offers
- PSPPROC410A Administer contracts
- PSPPM402B Manage simple projects
- PSPPM403B Close simple projects

- *Excluded units* that may not contribute to the same qualification as this unit:
  - PSPPM405A Administer simple projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- design of simple projects in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- documented information and/or examples of the assessee's personal work
- project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions

© Commonwealth of Australia, 2024 Public Skills Australia

likely to be encountered when planning projects, including coping with difficulties, irregularities and breakdowns in routine
- design of simple projects in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Stakeholders may

- project sponsor/funding bodies

© Commonwealth of Australia, 2024 Public Skills Australia

include:

- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee
- end user
- supplier/service provider

Project parameters include:

- project scope - outcomes, objectives, project deliverables
- feasibility
- skills required for project team
- people required for project including specialist expertise
- communications including reporting requirements
- risks associated with project including people, environment, resources, technology change during the life of the project, if applicable
- steering committee arrangements
- timeframe and milestones
- cost
- resources for project
- acquisition/procurement
- organisational structure for project
- project quality control and operational flexibility
- project governance structure
- monitoring through staged rollout
- project delivery requirements
- pilot outcomes
- intellectual property
- integration of project within organisation
- transition arrangements
- change management
- project evaluation

Policies and procedures may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
  - public sector management acts

© Commonwealth of Australia, 2024 Public Skills Australia

- financial management and accounting legislation and regulations
- privacy legislation

- government and organisational guidelines and procedures relating to:
  - project governance
  - resourcing
  - security
  - strategic plans
  - recruitment
  - risk management
  - procurement guidelines
  - designation approvals
  - industrial agreements

Specialists may include:

- legal
- technical
- financial
- other functional areas
- other relevant agencies
- logistics

Constraining factors may include:

- political
- industrial
- legislative
- technical
- financial
- resourcing
- social and cultural considerations
- cultural change management (internal)
- security/privacy
- environmental
- logistic support

Analysis report will contain:

- cost-benefit analysis

Approval may be required from:

- project sponsor/funding body
- business owner of the project
- program manager
- line manager
- project governance office/personnel in the organisation
- chief executive officer, manager or management

© Commonwealth of Australia, 2024 Public Skills Australia

	representative • customer or client
Project scope is defined by:	• objectives - aims/goals for doing the project • outcomes - measurable benefit achieved from the utilisation of the outputs delivered by the project • outputs/project deliverables - the services/products delivered by the project
Options to manage risks may include:	• acceptance • avoidance • minimisation • transfer • strategies • flexibility • empathy • emotional intelligence
Project plan will include some or all of:	• acquisition strategies • budget and financial management strategy • contract management • cost estimates • evaluation criteria • expected outcomes/measurable benefits of the project • facilities • inclusions and exclusions from project • information/communication strategy • intellectual property strategies • milestones • objectives • outputs/project deliverables and their acceptance criteria • people plan including human resource management and human resource development • performance criteria/indicators • project control mechanisms • project implementation strategy • project governance strategy • purpose • quality assurance • quality control • quality standards for project • rationale

- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

Project parameters include:

- risk management
- schedule management
- financial management
- communication, including reporting
- resources management
- logistics management
- scope management
- change management
- quality management
- people management
- occupational health and safety management

Project management tools may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
  - Gantt and bar charts
  - Program Evaluation and Review Technique (PERT) charts
  - Critical Path Method
- cost schedule control system
- logistics support analysis
- life cycle cost analysis
- spreadsheets
- recording systems - electronic and manual

Project infrastructure may include:

- staffing levels/need for recruitment action and training
- equipment and technical support
- resource requirements including travel, finance etc
- project office accommodation
- management infrastructure

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Implement start-up activities**	1.1 The ***project plan*** is updated with confirmed information for key dates and activities, resources and project governance details in accordance with the project implementation strategy. 1.2 Project ***stakeholders'*** understanding of and agreement to fulfil the project requirements and their roles and responsibilities are confirmed. 1.3 ***Required systems*** are established and maintained throughout the project in accordance with the project plan. 1.4 A working knowledge of ***project management tools*** is used to facilitate integration of project activities and achievement of project outcomes.
2. **Coordinate project implementation**	2.1 ***Integration*** and ***management*** of project activities are handled in accordance with the project plan. 2.2 Stakeholder input and expectations are managed and their commitment is maintained throughout the life of the project in accordance with organisational policy and procedures and the project plan. 2.3 Disagreements and disputes are resolved or referred to a higher authority in accordance with organisational policy and procedures. 2.4 Project ***change proposals*** are received and changes are recommended/made in accordance with the project plan, and documented in accordance with ***policy and procedures***.
3. **Monitor project**	3.1 All aspects of the project are continually monitored and

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	corrective action is taken as necessary to maintain progress in accordance with the project plan.
	3.2 Consultation and reporting mechanisms are applied in accordance with the communication plan when dealing with management, staff and/or contractors, steering committee members or other stakeholders.
	3.3 Project governance plans and any related contracts are monitored, reviewed and amended as appropriate, and results are reported in accordance with the communication plan.
	3.4 Project progress is monitored against agreed milestones in accordance with the project plan to provide a measure of performance throughout the life of the contract.
	3.5 Programmed review of objectives and achievement is implemented in accordance with the project plan.
4. **Arrange project follow-up activities**	4.1 Project deliverables are analysed against ***specifications***, performance standards and project objectives, under broad guidance, and the results are reported to stakeholders.
	4.2 An initial support package or product manual is produced, if required, to provide guidance for stakeholders who will be required to apply the project results.
	4.3 The support package includes options for stakeholders to take account of environmental and cultural factors in applying project results.
	4.4 Operational and support authorities are consulted to research any testing/trialling/building requirements resulting from the project, and evaluation of any recommendations are included in the project report.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- leading and mentoring people to achieve project deliverables
- maintaining agreement of stakeholders and team members to timelines, roles and responsibilities
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes

© Commonwealth of Australia, 2024 Public Skills Australia

- responding to diversity, including gender and disability
- using project management tools applicable to small scale or low risk projects
- applying ethical decision making and problem solving related to project management of small scale or low risk projects
- writing recommendations and preparing implementation support packages requiring precision of expression
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project management, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environment requirements
  - project governance requirements
  - quality standards
- risk management
- procurement guidelines
- human resources
- equal employment opportunity, equity and diversity principles
- project management tools to suit a range of small scale or low risk projects
- project management principles
- organisational and political context

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV402B Deliver and monitor service to clients

- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV411A Deal with conflict
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV422A Apply government processes
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC410A Administer contracts
- PSPPM401B Design simple projects
- PSPPM403B Close simple projects

- *Excluded units* that may not contribute to the same qualification as this unit:
  - PSPPM405A Administer simple projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when implementing projects, including coping with difficulties, irregularities and breakdowns in routine
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse

backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Project plan will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones

© Commonwealth of Australia, 2024 Public Skills Australia

- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project

- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

Required systems for project management may include:

- planning and monitoring system
- financial management including:
  - budget allocation/funding
  - income generated
  - expenditure
- recordkeeping for documented information such as:

© Commonwealth of Australia, 2024 Public Skills Australia

- correspondence
- quality data including survey, needs, test results
- contracts
- time allocated and spent on each aspect of the project
- progress reports
- performance reports against milestones
- project outcomes
- samples, prototypes, models

Project management tools may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
  - Gantt and bar charts
  - Program Evaluation and Review Technique (PERT) charts
  - Critical Path Method
  - cost schedule control system
  - logistics support analysis
  - life cycle cost analysis
  - spreadsheets
  - recording systems - electronic and manual

Integration of project activities may include:

- scope
- time
- cost
- quality
- human resources
- communications
- risk
- procurement

Management may include:

- scope management
- communication and reporting
- schedule management
- financial management
- quality management
- resources management
- people management
- logistics management
- risk management

- contract management
- change management

Change proposals may include:

- scope
- administration
- engineering, technical, technology changes
- time
- cost
- resources

Policy and procedures may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
  - public sector management acts
  - financial management and accounting legislation and regulations
  - privacy legislation
- government and organisational guidelines and procedures relating to:
  - project governance
  - resourcing
  - security
  - strategic plans
  - recruitment
  - risk management
  - procurement guidelines
  - designation approvals
  - industrial agreements

Specifications may include:

- functional
- technical
- performance
- material

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers project evaluation and reporting for generally low risk projects that may be small scale and managed by one person or a person with a small team. It includes implementing project review activities and finalising projects. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, closing simple projects may overlap with other generalist and specialist work activities such as applying government processes, using resources, gathering information, providing input to change, managing contracts etc.

This unit, and unit *PSPPM405A Administer simple projects*, are mutually exclusive. One or the other, but not both, may contribute to a qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement project review activities	1.1 Evaluation of project process and achievement against objectives is undertaken in consultation with ***stakeholders*** and results are reported in accordance with the ***project plan*** and organisational ***policy and procedures***.
	1.2 Action to rectify problems in meeting client needs is recommended and documented.
	1.3 Implications of project results for policies and operating procedures are identified and recommendations are made for their amendment.
	1.4 Information obtained from the evaluation of the project is structured so it may be used to improve relevant policy and practice in accordance with organisational requirements.
2. Finalise project	2.1 Contracts are finalised and financial records are checked for accuracy and completed in accordance with organisational procedures.
	2.2 Project wind-down is ***managed, documentation*** is completed, records are archived and ***approvals*** are obtained in accordance with the project plan and organisational policy and procedures.
	2.3 Project stakeholders are debriefed, and recommendations are made for redeployment of infrastructure/resources in accordance with organisational policy and procedures.
	2.4 Project hand-over to user/s is completed in accordance with organisational procedures and lessons learnt are documented and reported to stakeholders to assist in continuous improvement.

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.5 Stakeholders are advised of procedures and authorities for initial support to implement project deliverables where relevant, and strategies are devised to manage long-term project momentum in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- analysing results and evaluating results against objectives
- writing recommendations and preparing reports requiring precision of expression
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- debriefing project team members
- reporting on resource expenditure including time and costs
- using project management tools suited to small scale or low risk projects
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project finalisation, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environment requirements
  - project governance requirements
  - quality standards
- risk management
- procurement guidelines
- human resource management and development
- equal employment opportunity, equity and diversity principles
- project management tools to suit a range of small scale or low risk projects
- project management principles

- organisational and political environment

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV402B Deliver and monitor service to clients
  - PSPGOV403B Use resources to achieve work unit goals
  - PSPGOV411A Deal with conflict
  - PSPGOV412A Use advanced workplace communication strategies
  - PSPGOV422A Apply government processes
  - PSPLEGN401A Encourage compliance with legislation in the public sector
  - PSPPROC410A Administer contracts
  - PSPPM401B Design simple projects
  - PSPPM402B Manage simple projects
- *Excluded units* that may not contribute to the same qualification as this unit:
  - PSPPM405A Administer simple projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- closure of simple projects in a range of (3 or more) contexts (or occasions, over time)

© Commonwealth of Australia, 2024 Public Skills Australia

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project close-out
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when closing projects, including coping with difficulties, irregularities and breakdowns in routine
- closure of simple projects in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

© Commonwealth of Australia, 2024 Public Skills Australia

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Stakeholders may include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

Project plan will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy

© Commonwealth of Australia, 2024 Public Skills Australia

- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

Policy and procedures may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
  - public sector management acts
  - financial management and accounting legislation and regulations
  - privacy legislation
- government and organisational guidelines and procedures relating to:
  - project governance
  - resourcing
  - security
  - strategic plans
  - recruitment
  - risk management
  - procurement guidelines
  - designation approvals
  - industrial agreements

Management of project wind-down may include:

- risks
- issues
- assets
- consultants
- project team
- support staff

Documentation may include:

- project completion report
- supplier performance reports
- whole-of-life support plans
- transfer documents

© Commonwealth of Australia, 2024 Public Skills Australia

- financial reports and acquittals

Approvals may be required from:

- project sponsor/funding body
- business owner of the project
- program manager
- line manager
- project governance office/personnel in the organisation
- chief executive officer, manager or management representative
- customer or client

PSPPM404A Carry out simple project activities

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the activities required to carry out simple projects, working on one project at a time. This work is typically undertaken by a project officer working individually or as part of a project team. It includes reviewing and confirming the project brief, carrying out project activities, monitoring and maintaining progress and completing the project. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, carrying out project work overlaps with other generalist and specialist work activities such as acting ethically, applying government processes, using resources, developing work plans, gathering information.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Review and confirm project brief	1.1 Project information and supporting materials are obtained and the individual ***project brief*** is clarified in accordance with the ***project plan*** and organisational ***policy and procedures***. 1.2 Project plan is analysed and requirements, timeframes, roles, responsibilities and ***stakeholder*** involvement are confirmed. 1.3 Project management procedures and controls are confirmed in accordance with the project plan, and any required changes are negotiated according to the project plan change management strategy. 1.4 The project plan is updated with confirmed information for milestones, resources, other team members and steering committee details.
2. Undertake project activities	2.1 Professional or technical skills are provided to accomplish project tasks in accordance with the project requirements. 2.2 ***Project data*** is captured and recorded in accordance with project requirements. 2.3 Specialist advice and support are provided to the project manager, steering committee and stakeholders as required to achieve project objectives.
3. Monitor and maintain progress of project	3.1 ***Project management tools*** are used for integration and timing of project activities and achievement of project deliverables. 3.2 Risks to progress and achievement of project objectives are anticipated and related to the project manager for action in accordance with the ***risk management*** plan. 3.3 Completion of project activities and progress against targets and milestones are monitored and corrective action is taken if needed, in accordance with project plans and in ***consultation***

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	with management/governance personnel.
	3.4 Problem solving to find innovative ***solutions*** to project problems or unplanned-for contingencies is undertaken in consultation with project management.
	3.5 Progress reports are provided as required by the project communication plan.
4. **Complete project**	4.1 Project deliverables are completed to the required standard in the required timeframe.
	4.2 Recordkeeping associated with the project is completed and archived as required by the project plan.
	4.3 Project process is evaluated, issues identified and recommendations made for continuous improvement.
	4.4 Project reports are completed to the required standard, containing required information and using agreed style, voice and format.
	4.5 Project hand-over of deliverables and return of borrowed/unused materials are completed in accordance with the project plan and organisational procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- recording information, writing recommendations and preparing reports requiring complex language structures and precision of expression
- negotiating changes to timelines, roles and responsibilities
- communicating with stakeholders, managers and other team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- managing self, time and costs
- using project management tools
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the administration of a straightforward project or a discrete component of a larger project by staff who are not specialists in project management. The unit focuses on the application of project management skills and the requirement to meet timelines, quality standards, budgetary limits and other requirements set for the project. It includes defining the project, developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learnt for application to future projects. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

Units of competency for specialist project managers at this level include *PSPPM401B Design simple projects*, *PSPPM402B Manage simple projects* and *PSPPM403B Close simple projects*. The unit of competency for specialist project officers is *PSPPM404A Carry out simple project activities*.

This unit and the 3 project management competencies for specialist project managers (PSPPM401B - PSPPM403B) are mutually exclusive and may not contribute to the same qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

This unit contains employability skills..

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define project	1.1 ***Project scope*** and other relevant documentation are accessed in accordance with organisational ***policy and procedures***. 1.2 Project ***stakeholders*** are identified and their interest in or relationship to the project is established. 1.3 Clarification is sought from ***delegating authority*** of any issues related to the project and ***project parameters***. 1.4 Limits of own responsibility and reporting requirements are confirmed. 1.5 Relationship of the project to other projects and to the organisation's objectives is clarified. 1.6 Available resources to undertake the project are determined and accessed in accordance with organisational requirements.
2. Develop detailed project plan	2.1 A ***project plan*** is developed that identifies in detail how the project will be executed and managed in relation to the project parameters. 2.2 ***Project management tools*** are identified and accessed in accordance with project requirements. 2.3 A communication strategy and risk management plan that address the project, organisational and legislative requirements are contained within the project plan.

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.4 A timeline for completion of activities and a budget, developed and approved in accordance with organisational procedures, are included within the project plan.
	2.5 Stakeholders' understanding of and agreement to fulfil the project requirements and their roles and responsibilities are confirmed.
	2.6 Project plan is finalised and any necessary approvals are gained to commence the project according to the documented plan.
3. Administer and monitor project	3.1 ***Support*** is provided to ensure that the quality of the expected deliverables of the project and documented timelines are met.
	3.2 Required ***recordkeeping*** systems are established and maintained throughout the project.
	3.3 ***Component plans*** that identify how key aspects of the project will be managed are implemented and monitored in accordance with set requirements.
	3.4 Project reports are completed and forwarded as required in accordance with the project communication strategy.
	3.5 ***Risk management*** is undertaken in accordance with the project plan to ensure project requirements are achieved in accordance with the project plan.
	3.6 Project deliverables are completed to the required standard, in the required timeframe and within budget.
4. Finalise project	4.1 Any financial recordkeeping associated with the project is completed and checked for accuracy.
	4.2 Staff involved in the project are de-briefed before assignment to new or previous roles.
	4.3 Project documentation is completed and ***signed off*** in accordance with organisational procedures.
5. Review project	5.1 Project deliverables and processes are reviewed against the project scope and plan.
	5.2 Stakeholders are involved in the review of the project.
	5.3 Lessons learnt from the project are documented and reported in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

© Commonwealth of Australia, 2024 Public Skills Australia

Look for evidence that confirms skills in:

- detailing requirements, writing recommendations and preparing reports requiring complex language structures and precision of expression
- negotiating timelines, roles and responsibilities with team members
- communicating with stakeholders using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- leading and managing a project team
- managing time and costs
- using project management tools
- applying quality management techniques including testing and auditing as appropriate
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on the project and management of the project, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environment and sustainability
- project governance requirements
- quality standards
- risk management
- procurement
- human resources
- equal employment opportunity, equity and diversity principles
- organisational structure and lines of authority within organisation
- project management tools to suit the projects administered
- evaluation techniques for projects

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*

© Commonwealth of Australia, 2024 Public Skills Australia

- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV402B Deliver and monitor service to clients
  - PSPGOV403B Use resources to achieve work unit goals
  - PSPGOV404B Develop and implement work unit plans

- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

Project management tools may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
  - Gantt and bar charts
  - Program Evaluation and Review Technique (PERT) charts
  - Critical Path Method
  - cost schedule control system
  - logistics support analysis
  - life cycle cost analysis
  - spreadsheets
  - recording systems - electronic and manual

Support may include:

- mentoring and coaching
- feedback
- encouragement
- additional physical and human resources (within allocated budget) if and as required
- regular meetings

Recordkeeping may include systems for:

- financial data including costs, expenditure, income generated, purchases, contracts
- quality data including survey, needs, test results
- recording of time spent on project and progress in completing project
- progress reports
- performance reports against milestones
- correspondence
- samples, prototypes, models
- project deliverables/outputs and outcomes

Unit Descriptor

This unit covers planning and development of projects which may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects. It includes identifying project opportunities, undertaking scoping, analysing the feasibility of projects, developing project plans and managing the establishment of projects. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, designing complex projects overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify project opportunities and undertake scoping	1.1 A ***critical analysis*** of the need for a project is conducted in accordance with organisational ***policy and procedures***. 1.2 A project definition study is undertaken, where necessary, to determine the scope of the project. 1.3 Project scoping is completed in accordance with organisational policy and procedures and identifies a rationale for the project that includes the purpose, outcomes/expected benefits. 1.4 ***Stakeholders*** are identified and canvassed to ensure that their requirements are addressed in project planning.
2. Analyse project feasibility	2.1 Research and analysis is undertaken to identify impacts and risks, ***constraining factors*** and alternate options. 2.2 Technical feasibility, supportability and cost effectiveness of the project are analysed and the outcome is reported to key stakeholders. 2.3 Alternatives for project design are assessed and a preferred option that fits the strategic direction of the organisation/work unit is identified and reported. 2.4 Relevant specialists are consulted to determine the extent of financial, technical, security, scheduling, ***whole-of-life support*** and probity, and other risks. 2.5 A business case is prepared and ***approvals*** to proceed with project development are obtained in accordance with organisational policy, procedures and guidelines.
3. Develop project	3.1 Project aims, objectives and impacts are defined in the ***project***

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
plans	***plan***, and timeframes and resources to complete quality deliverables on time and within budget are identified. 3.2 Projected outcomes are recorded in measurable and achievable forms and indicators to monitor the performance of the project are developed and agreed by relevant parties. 3.3 Potential risks are investigated and identified in the project plan and a risk management process is established to analyse information and options to ***manage risks***. 3.4 Skills, roles and responsibilities of team members and stakeholders are clarified and agreed, and reporting requirements are identified. 3.5 ***Management*** of ***project parameters*** is addressed in the project plan and evaluation criteria are designed in accordance with organisational policy and practice. 3.6 ***Project management tools*** are utilised for planning in accordance with project requirements and the project is designed and ***documented*** in consultation with ***specialists*** to meet user requirements.
4. Manage establishment of project	4.1 If required, stakeholders are lobbied in accordance with organisational policy and procedures, to negotiate endorsement for the project. 4.2 Terms of reference are written and agreed to by stakeholders and resources are obtained in accordance with organisational procedures to establish the project. 4.3 Project scope and objectives are reviewed and analysed, and a strategy is developed to establish ***work breakdown structures*** to implement the project. 4.4 Project ***infrastructure*** is identified and established in accordance with organisational policy and procedures. 4.5 Specialist and technical support relevant to the project is obtained in accordance with the project plan. 4.6 Project governance structure and processes are established as detailed in the project plan.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

© Commonwealth of Australia, 2024 Public Skills Australia

Look for evidence that confirms skills in:

- using project planning techniques related to projects that may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects
- detailing requirements, writing recommendations and preparing plans requiring precision of expression
- negotiating timelines, roles and responsibilities with stakeholders and team members
- scheduling project activities
- communicating with stakeholders using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- using project management tools suited to planning reasonably complex projects
- applying risk management techniques in project establishment including risk sharing and transfer
- using public relations strategies to promote and gain endorsement for projects
- including workplace safety issues in project planning requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on the project and management of the project, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environmental and sustainability requirements
- project governance requirements
- financial management requirements
- quality standards
- risk management
- procurement
- human resources
- equal employment opportunity, equity and diversity principles
- project planning methods which may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects
- project management tools suited to planning reasonably complex projects
- principles relating to the planning phase of project management
- the project specifications
- market capability
- resource plans

© Commonwealth of Australia, 2024 Public Skills Australia

- project approval processes
- scheduling packages
- cost schedule control systems
- integrated logistics support
- work breakdown structures
- change management in the context of designing complex projects

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV502B Develop client services
  - PSPGOV503B Coordinate resource allocation and usage
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV507A Undertake negotiations
  - PSPGOV512A Use complex workplace communication strategies
  - PSPPM502B Manage complex projects
  - PSPPM503B Close complex projects
  - PSPPROC502A Establish contract management arrangements

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see table Following for examples)
- complex projects designed in a range of (3 or more)

© Commonwealth of Australia, 2024 Public Skills Australia

contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project planning and management
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when initiating projects, including coping with difficulties, irregularities and breakdowns in routine
- complex projects designed in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the

assessment	competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Critical analysis may include:	• internal and external environment scan • political imperatives • previous and current related projects • policies likely to be impacted • cost-benefit analysis

Policy and procedures may include:	• government legislation (Federal, State and Local) affecting organisation's administration such as:
	  • public sector management acts
	  • financial management and accounting legislation and regulations
	  • privacy legislation
	  • environmental/sustainability legislation
	• government and organisational guidelines and procedures relating to:
	  • project governance
	  • resourcing
	  • security
	  • strategic plans
	  • recruitment
	  • risk management
	  • procurement guidelines
	  • designation approvals
	  • industrial agreements

Stakeholders may include:	• project sponsor/funding bodies • clients or customers (internal and external) • industry • other agencies • general public • relevant interest groups

	• unions • functional areas • the organisation's senior management • Ministers • project team • steering committee members • end user • supplier/service provider
Constraining factors may include:	• political • industrial • legislative • technical • financial • social • cultural • security/privacy • environmental • logistical support • resources
Whole-of-life support may include:	• maintenance • supply • technical data • personnel • training • facilities • packaging, handling • storage and transportation • support and test equipment • computing support
Approval may be required from:	• project sponsor • business owner of the project • program manager • line manager • specialist project management office • chief executive officer, manager or management representative • funding body • customer or client
Project plan will include	• acquisition strategies

© Commonwealth of Australia, 2024 Public Skills Australia

some or all of:	• budget and financial management strategy • contract management • cost estimates • evaluation criteria • expected outcomes/measurable benefits of the project • facilities • inclusions and exclusions from project • information/communication strategy • intellectual property strategies • milestones • objectives • outputs/project deliverables and their acceptance criteria • people plan including human resource management and human resource development • performance criteria/indicators • project control mechanisms • project implementation strategy • project governance strategy • purpose • quality assurance • quality control • quality standards for project • rationale • required project resources • resource management • risk management • roles and responsibilities • schedule/timeline • task/work breakdown structure (WBS)
Risk management may include:	• acceptance • avoidance • minimisation • transfer
Management may include:	• risk management • schedule management • financial management • communication, including reporting • resources management • logistics management

© Commonwealth of Australia, 2024 Public Skills Australia

- scope management
- change management
- quality management
- people management
- procurement management
- occupational health and safety management

Project parameters include:

- project scope - outcomes, objectives, project deliverables
- feasibility
- skills required for project team
- people required for project including specialist expertise
- communications including reporting requirements
- risks associated with project including people, environment, resources, technology change during the life of the project, if applicable
- steering committee arrangements
- timeframe and milestones
- cost
- resources for project
- acquisition/procurement
- organisational structure for project
- project quality control and operational flexibility
- project governance structure
- monitoring through staged rollout
- project delivery requirements
- pilot outcomes
- intellectual property
- integration of project within organisation
- transition arrangements
- change management
- project evaluation

Project management tools may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
  - Gantt and bar charts
  - Program Evaluation and Review Technique (PERT) charts
  - Critical Path Method
  - cost schedule control system

© Commonwealth of Australia, 2024 Public Skills Australia

- logistics support analysis
- life cycle cost analysis
- spreadsheets
- recording systems - electronic and manual

Documented information may include:

- reports detailing strategy
- statement of requirement/work
- industry development proposals
- project plans
- resource plans
- project team work plans
- risk and issues plan and log
- performance evaluation criteria
- reports to industry
- whole-of-life support proposals
- project definition study

Relevant specialists may include:

- legal
- technical
- financial
- other functional areas
- other relevant agencies
- logistics

Work breakdown structures may include:

- how the work is to be performed and how cost and schedule data are to be tracked and reported
- identification of the project tasks (deliverables)
- identification of specific management responsibilities for tasks

Project infrastructure may include:

- staffing levels/need for recruitment action and training
- equipment and technical support
- resource requirements including travel, finance etc
- project office accommodation
- management infrastructure

Unit Descriptor

This unit covers management of projects that may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects. It includes managing start-up, project implementation, project integration and follow-up activities. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, managing complex projects overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manage start-up activities	1.1 ***Project plans*** are refined in consultation with steering committee and team members, and precise details are included for schedules of activities, milestones and resources.
	1.2 ***Required systems*** are established and maintained throughout the project in accordance with the complexity of the project and in line with the project plan.
	1.3 Project team members' understanding of and commitment to fulfilling the project requirements and their roles and responsibilities for the duration of the project are confirmed.
	1.4 ***Project management tools*** are selected and applied effectively to achieve project outcomes.
2. Manage project implementation	2.1 ***Integration*** and ***management*** of complex project activities are handled in accordance with the project plan.
	2.2 Leadership and required ***development*** are provided to the project team, and morale, stress levels and triggers are managed throughout the life of the project in accordance with organisational ***policy and procedures***.
	2.3 ***Stakeholder*** input and expectations are managed throughout the project in accordance with the communication plan.
	2.4 Disagreements and disputes are resolved to the satisfaction of stakeholders or referred to a higher authority in accordance with organisational policy and procedures.
	2.5 Project ***change proposals*** are negotiated, agreed and documented in accordance with policy and procedures.
3. Manage project integration	3.1 All aspects of the project and related projects are integrated and links are established to ensure objectives are met in accordance with the project plan.

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.2 Consultation and reporting mechanisms are applied in accordance with the communication plan and staff and contractors are regularly consulted to discuss progress and ensure effective results.
	3.3 Project integration is monitored, and management plans and any related contracts are reviewed and amended as appropriate, with results reported in accordance with mechanisms identified in the communication plan.
	3.4 Ongoing progress is monitored against agreed milestones in accordance with the project plan to provide a measure of performance throughout the life of the project.
	3.5 Programmed review of objectives and achievement is planned and implemented in accordance with the project plan.
4. Coordinate project follow-up activities	4.1 Significant judgment is applied in the analysis of project deliverables against ***specifications***, performance standards and project objectives, and the results are reported to stakeholders.
	4.2 Support package arrangements are identified and offered to stakeholders who will be required to apply the project results.
	4.3 Options for stakeholders to take account of environmental and cultural factors in applying the project results are included in the support package.
	4.4 Operational and support authorities are consulted to investigate any testing/trialling/building and evaluation requirements resulting from the project, and funding implications estimated in project report.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- leading and mentoring people to achieve project outcomes
- maintaining agreement of stakeholders and team members to timelines, roles and responsibilities
- negotiating with stakeholders and team members using communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- using project management tools applicable to reasonably complex projects

© Commonwealth of Australia, 2024 Public Skills Australia

- applying ethical decision making and problem solving related to project management of reasonably complex projects
- writing recommendations and preparing project reports requiring precision of expression
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project implementation, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environmental and sustainability requirements
- project governance requirements
- quality standards
- risk management
- procurement guidelines
- financial management and budgetary framework
- human resources
- equal employment opportunity, equity and diversity principles
- project management tools to suit a range of reasonably complex projects in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the project
- project management systems
- organisational and political context
- critical analysis in a project management context
- business and commercial issues related to the projects managed

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment

process include, but are not limited to:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV502B Develop client services
- PSPGOV503B Coordinate resource allocation and usage
- PSPGOV504B Undertake research and analysis
- PSPGOV505A Promote diversity
- PSPPM501B Design complex projects
- PSPPM503B Close complex projects
- PSPPROC501A Manage contract risk
- PSPPROC503A Manage contract performance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of complex projects in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management in the organisation and the public sector
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing complete projects, including coping with difficulties, irregularities and breakdowns in routine
- management of complex projects in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds

© Commonwealth of Australia, 2024 Public Skills Australia

- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Project plans will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives

© Commonwealth of Australia, 2024 Public Skills Australia

- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

Required systems for project management may include:

- planning and monitoring system
- financial management including:
- budget allocation/funding
- income generated
- expenditure
- recordkeeping for documented information such as:
- correspondence
- quality data including survey, needs, test results
- contracts
- time allocated and spent on each aspect of the project
- progress reports
- performance reports against milestones
- project outcomes
- samples, prototypes, models

Project management tools may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
- Gantt and bar charts
- Program Evaluation and Review Technique (PERT) charts

© Commonwealth of Australia, 2024 Public Skills Australia

- Critical Path Method
- cost schedule control system
- logistics support analysis
- life cycle cost analysis
- spreadsheets
- recording systems - electronic and manual

Integration of project activities may include:

- scope
- time
- cost
- quality
- human resources
- communications
- risk
- procurement

Management may include:

- scope management
- communication and reporting
- schedule management
- financial management
- fraud control
- quality management
- resources management
- people management
- logistics management
- risk management
- contract management
- project implementation
- transition
- change management

Development may include:

- regular meetings
- feedback
- encouragement
- mentoring and coaching
- additional physical and human resources (within allocated budget) if and as required

Policy and procedures may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
  - public sector management acts
  - financial management and accounting legislation and regulations

© Commonwealth of Australia, 2024 Public Skills Australia

- privacy legislation
- government and organisational guidelines and procedures relating to:
  - project governance
  - resourcing
  - security
  - strategic plans
  - recruitment
  - risk management
  - procurement guidelines
  - designation approvals
  - industrial agreements
  - environment and sustainability

Stakeholders may include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee
- end user
- supplier/service provider

Contract change proposals may include:

- administration
- cost
- engineering, technical, technology changes
- resources
- scope
- specifications
- time

Specifications may include:

- functional
- technical
- performance
- material

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Review project activity	1.1 Evaluation of project process, supplier performance and achievement against objectives is undertaken in consultation with ***stakeholders*** and results are reported in accordance with the ***project plan*** evaluation framework and organisational ***policy and procedures***. 1.2 The extent to which clients needs were met is evaluated and action to rectify problems is identified and documented. 1.3 Implications of project outputs/outcomes for policies and operating procedures are identified and recommendations are made for their amendment. 1.4 Information obtained from the evaluation of the project is provided in accordance with organisational requirements so it may be used to improve relevant policy and practice .
2. Manage project closure	2.1 Any funding associated with the project is acquitted against project budget items, and financial records are checked for accuracy and completed in accordance with organisational procedures. 2.2 Project wind-down is ***managed*** and ***documentation***, records and ***approvals*** are handled in accordance with project plan and organisational policy and procedures. 2.3 Project stakeholders are debriefed, and infrastructure and resources are redeployed in accordance with organisational policy and procedures. 2.4 Project hand-over to user/s is completed in accordance with organisational procedures, and lessons learnt are documented and reported to stakeholders to assist in continuous improvement. 2.5 Stakeholders are advised of procedures and authorities for initial support to apply project results where relevant, and strategies

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	are provided to manage long-term project momentum in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- analysing results and evaluating outcomes against objectives
- writing recommendations and preparing reports requiring precision of expression
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- debriefing stakeholders and redeploying resources and infrastructure
- acquitting and reporting on resource expenditure including time and costs
- using project management tools applicable to reasonably complex projects
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project finalisation, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environmental and sustainability requirements
  - project governance requirements
  - quality standards
  - risk management
  - procurement guidelines
  - financial management
  - human resource management and development
  - equal employment opportunity, equity and diversity principles
  - project specifications and objectives
- project management tools to suit a range of reasonably complex projects in

© Commonwealth of Australia, 2024 Public Skills Australia

terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the project
- project management principles and systems
- critical analysis in a project management context
- business and commercial issues related to the projects managed
- organisational and political environment

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV502B Develop client services
  - PSPGOV503B Coordinate resource allocation and usage
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV507A Undertake negotiations
  - PSPGOV512A Use complex workplace communication strategies
  - PSPGOV517A Coordinate risk management
  - PSPPM501B Design complex projects
  - PSPPM502B Manage complex projects
  - PSPPROC504A Finalise contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- reviewing and closing complex projects in a range of (3 or

© Commonwealth of Australia, 2024 Public Skills Australia

more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project close-out
- workplace project documentation
- scenarios and case studies
- examples of project management tools suited to reasonably complex projects

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when reviewing and closing complex projects, including coping with difficulties, irregularities and breakdowns in routine
- reviewing and closing complex projects in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of

Evidence must be gathered over time in a range of contexts to

assessment	ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Stakeholders may include:	• project sponsor/funding bodies • clients or customers (internal and external) • industry • other agencies • general public • relevant interest groups • unions • functional areas • the organisation's senior management • Ministers • project team • steering committee members • end user • supplier/service provider
Project plan will include some or all of:	• acquisition strategies • budget and financial management strategy • contract management • cost estimates • evaluation criteria • expected outcomes/measurable benefits of the project • facilities • inclusions and exclusions from project • information/communication strategy • intellectual property strategies • milestones • objectives • outputs/project deliverables and their acceptance criteria • people plan including human resource management and

	human resource development • performance criteria/indicators • project control mechanisms • project implementation strategy • project governance strategy • purpose • quality assurance • quality control • quality standards for project • rationale • required project resources • resource management • risk management • roles and responsibilities • schedule/timeline • task/work breakdown structure (WBS)

Policy and procedures may include:	• government legislation (Federal, State and Local) affecting organisation's administration such as:
	  • public sector management acts
	  • financial management and accounting legislation and regulations
	  • privacy legislation
	• government and organisational guidelines and procedures relating to:
	  • project governance
	  • resourcing
	  • security
	  • strategic plans
	  • recruitment
	  • risk management
	  • procurement guidelines
	  • designation approvals
	  • industrial agreements
	  • environment and sustainability

Management of project wind-down may include:	• risks • issues • assets • consultants • project team • support staff

© Commonwealth of Australia, 2024 Public Skills Australia

Documentation may include:	• project completion report • supplier performance reports • whole-of-life support plans • transfer documents • financial reports and acquittals • evaluation reports • transition plans
Approvals may be required from:	• project sponsor/funding body • business owner of the project • program manager • line manager • project governance office/personnel in the organisation • chief executive officer, manager or management representative • customer or client

Unit Descriptor

This unit covers the work activities required to carry out complex project activities or multiple projects simultaneously. Typically this work is undertaken by project officers who are required to work on projects for multiple clients, or all aspects of larger projects. They are sometimes responsible for all the project deliverables, and at other times they work in teams on aspects of a number of projects. Contract management requirements are not included, as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

The unit includes reviewing and confirming requirements of each project/activity, organising and undertaking project activities, managing the progress of multiple projects/activities and finalising projects/activities.

In practice, conducting complex project activities overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Review and confirm project requirements	1.1 Limits of own responsibility and reporting requirements are confirmed for each of the projects/project activities assigned. 1.2 Information and supporting materials for each project/project activity are obtained in accordance with project requirements, organisational ***policy and procedures***. 1.3 ***Project plans*** are analysed and requirements, timeframes, roles, responsibilities and ***stakeholder*** involvement are confirmed for each. 1.4 Project management procedures and controls are confirmed in accordance with each project plan, and any required changes are negotiated according to the project plan change management strategy. 1.5 Project plans are updated with confirmed information for milestones, resources, team members and steering committee details.
2. Organise and undertake project activities	2.1 Personal work plans are prepared to assign activities, timeframes and milestones for all projects/project activities to a single planning management framework to meet the progress requirements for each project/project activity. 2.2 Where project requirements cannot be accommodated and clashes occur, negotiations are conducted with project managers and/or supervisory staff to find a compromise satisfactory to all stakeholders. 2.3 Project tasks are accomplished in accordance with project plans

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and any changes are managed in accordance with the approved project change strategy.
	2.4 ***Project data*** is captured and recorded in accordance with project requirements.
	2.5 Specialist advice and support are provided to project managers, steering committees and stakeholders as required to achieve project objectives.
3. **Manage progress of multiple projects/activities**	3.1 ***Project management tools*** are used for integration and timing of project activities and achievement of project outcomes.
	3.2 Risks to progress and achievement of project objectives are anticipated and reported to project management for action in accordance with ***risk management*** plans.
	3.3 Completion of project activities and progress against targets and milestones are monitored and corrective action is taken if needed, in accordance with project plans and in ***consultation with project manager***s.
	3.4 Problem solving to find innovative ***solutions*** to project problems or unplanned-for contingencies is undertaken in consultation with project management.
	3.5 Progress reports are provided as required by project communication plans.
4. **Finalise project activities**	4.1 Project deliverables for each project/activity are completed to the required standard in the required timeframes.
	4.2 Recordkeeping associated with each project is completed as required by project plans.
	4.3 Project processes are evaluated, issues identified and recommendations made for continuous improvement of projects/activities.
	4.4 Project reports are prepared containing required information completed to the required standard using agreed style, voice and formats.
	4.5 Project hand-overs of deliverables and return of borrowed/unused materials are completed in accordance with project plans and organisational procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2024 Public Skills Australia

Skill requirements

Look for evidence that confirms skills in:

- managing the logistics of dealing with multiple projects/activities, masters and milestones
- managing self, time and costs
- using project management tools
- negotiating changes to timelines, roles and responsibilities
- communicating with project managers and other stakeholders using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- recording information, writing recommendations and preparing reports requiring complex language structures and precision of expression
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on projects and management of the projects, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environmental and sustainaibilty standards
- project governance requirements
- quality standards
- risk management
- procurement
- financial management
- human resources
- equal employment opportunity, equity and diversity principles
- principles of project management
- project management tools to suit the combination of projects/activities carried out
- risk management strategies for carrying out multiple projects

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training

- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

Stakeholders may include

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

Project data may include

- research data
- quality data including trials or test results
- draft materials
- samples, prototypes, models
- project outcomes
- record of time spent on project and progress in completing project
- correspondence
- financial data including costs, expenditure, income generated, purchases

Project management tools may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
  - Gantt and bar charts
  - Program Evaluation and Review Technique (PERT) charts
  - Critical Path Method
  - cost schedule control system

- logistics support analysis
- life cycle cost analysis
- spreadsheets
- recording systems - electronic and manual

Risk management may include:

- removing the risk
- transferring the risk
- minimising the risk
- accepting the risk
- preparing a contingency plan
- keeping reserves

Consultation with project managers may also include:

- steering committees
- project sponsors
- business owners of the projects
- program managers
- specialist project management office
- chief executive officer, manager or management representative
- funding body representatives
- customers or clients

Solutions to problems may include:

- reducing costs
- researching and applying more efficient methods of completing project tasks
- seeking further resources to meet deadline
- negotiating an extension of deadline or redefining completion or quantities or quality of outcomes
- sharing of ideas to gain improvements to work undertaken within the project
- outsourcing aspects of the project
- changing roles and responsibilities within project team

Unit Descriptor

This unit covers the development or review of 'in house' policy in an organisation, formulated to facilitate the implementation of government or board directives. It includes anticipating and confirming the need for policy development or review; planning the policy development process; gathering and analysing information; determining policy direction; and drafting, releasing and promoting policy.

In practice, developing organisation policy may overlap with other generalist or specialist work activities such as developing client services, complying with public sector legislation, acting ethically, engaging the community, coordinating research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Anticipate and confirm the need for policy development or review	1.1 ***Internal and external factors,*** issues, ***events***, directions or government/board policies likely to cause changes to ***organisation policy*** are identified. 1.2 The likely implications and impact of these factors that might require policy development are identified in consultation with ***stakeholders***. 1.3 A critical analysis of the need for new or revised policy is conducted that includes a scan of the wider internal and external environment, that checks related policies for context and identifies other policies likely to be impacted. 1.4 Priority areas for policy development/review are recommended in accordance with organisational procedures. 1.5 Confirmation of the need for policy development/review and supporting evidence is detailed in accordance with organisational procedures.
2. Plan the policy development process	2.1 The ***approving authority*** is confirmed and organisational procedures and protocols for policy development are confirmed and applied. 2.2 ***Issues*** likely to impact on the policy development process are identified, analysed (in terms of risk) and addressed in policy development planning. 2.3 ***Policy requirements*** are outlined in a ***policy development plan*** in accordance with organisational procedures.
3. Gather and analyse information for policy development	3.1 Stakeholders are identified and engaged through the establishment and maintenance of a representative and relevant ***policy network***. 3.2 ***Information*** required to support the policy development process is identified, gathered, analysed and interpreted. 3.3 An ***analytical framework*** for the development of the policy is

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	determined and applied.
4. **Determine policy direction**	4.1 A range of policy options and ***criteria for choice*** are developed and communicated in a timely and understandable way to those responsible for selecting the policy direction.
	4.2 Where appropriate, specific policy options are promoted to executive within the organisation.
	4.3 Preferred policy option is recommended and risk treatments are determined in accordance with the policy development plan.
	4.4 Approvals/endorsements are obtained in accordance with the policy development plan and organisational procedures.
5. **Draft policy**	5.1 Policy is drafted and a cyclical process of consultation, feedback, identification of changes and re-drafting is implemented in accordance with the policy development plan.
	5.2 Risk management processes are implemented in accordance with the policy development plan to ensure progress of the process against the timeframe and milestones.
	5.3 An implementation plan is included in the policy that details responsibilities for implementation and strategies for transition, change management, initial and ongoing training and maintenance of the policy.
	5.4 Mechanisms for monitoring compliance with the policy, quality assurance of the policy, and evaluation of the policy are included within the policy.
	5.5 The policy is developed in accordance with ***organisational requirements for style, format and contents***.
6. **Release and promote policy**	6.1 Policy is cleared through organisational channels, and agreement of critical stakeholders is gained in accordance with organisational procedures.
	6.2 All stakeholders, particularly those who will be responsible for implementing the new or revised policy, are fully informed of the ***outcomes***, and fallout from dissenting stakeholders is managed in accordance with the policy development plan.
	6.3 The policy is released and ***promoted*** in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2024 Public Skills Australia

Skill requirements

Look for evidence that confirms skills in:

- reading and evaluating complex and formal documents such as policy and legislation
- researching, analysing and presenting information
- preparing written reports requiring precision of expression and language and structures suited to the intended audience
- working as a member of a team to consult on and validate policy
- adjusting communication to suit different audiences
- responding to diversity, including gender and disability
- dealing with different points of view and dissenting stakeholders
- accessing policies and legislation electronically or in hard copy
- identifying and addressing the environmental, sustainability and occupational health and safety implications of policy/s being developed

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- policy development processes and practices in the public sector
- policy cycles
- analytical policy development frameworks
- current policies underpinning the work area
- organisation and government procedures and protocols
- public sector code/s of ethics and code/s of conduct
- equal employment opportunity, equity and diversity principles
- environmental, sustainability and occupational health and safety implications of policy/s being developed

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Internal and external factors may include:

- internal:
  - restructuring
  - new service models
  - amalgamation with other departments/agencies
  - new work practices
- external:
  - legislative changes
  - changing social trends
  - economic/technological change

Events may include:

- restructure
- amalgamation
- changes to legal risks
- changes in strategic direction
- changes to legislation and whole of government policies
- pilots or trials of policy

© Commonwealth of Australia, 2024 Public Skills Australia

Organisation policy may include:	• any aspect of an organisation's business, such as policies relating to:
	  • core business
	  • client services
	  • business structure
	  • human resources
	  • administration
	  • financial management
	  • work practices
	  • training
	  • information technology
	  • technical/professional requirements
	  • legal requirements
	  • environmental and sustainability practices

Stakeholders may include:	• all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's conduct, actions, products and services, including:
	  • employees at all levels of the organisation
	  • other public sector organisations
	  • private sector organisations
	  • non-government organisations
	  • other jurisdictions
	  • union and association representatives
	  • boards of management
	  • government
	  • Ministers
	  • clients
	  • the public
	  • special interest groups

Approving authority may include:	• chief executive officer • delegated officer, such as policy manager • senior management • board of management • managing director
Issues may include:	• political sensitivities • social and cultural sensitivities/factors • equity in service delivery and employment practice • resource implications (of policy implementation)

© Commonwealth of Australia, 2024 Public Skills Australia

	• technological influences/implications • jurisdictional boundaries/crossovers • ‘sunk cost’ restrictions • non-consenting stakeholders at the end of the policy development process • existing awards or agreements impacting on staff, including enterprise bargaining agreements
Policy requirements may be defined in terms of:	• context • rationale • issues to be addressed • expected outcomes • timeframe • research methods • resource requirements for development • key stakeholders • communication strategy • feedback mechanisms for review • milestones • precedents • risk analysis • possible complications • success measures • impact on equity • possible resource implications for implementation
Policy development plan may include:	• policy objectives/outcomes • timelines • methodology – a cyclical process of consultation, feedback, identification of changes, and re-drafting • stakeholders • risks/risk management • performance criteria to inform review and evaluation • dissemination and promotion activities • implementation issues
Establishment and maintenance of a ***policy network*** may include:	• communication and information strategy to capture required range of opinions • range of communication channels for providing information • range of input strategies for obtaining information
Information gathering may include:	• consulting with stakeholders, including specialists in relevant issues • focus groups

© Commonwealth of Australia, 2024 Public Skills Australia

- developments in other public sector or private sector organisations
- evaluation of similar policies
- benchmarking against other organisations/work functions
- accessing information in current and closed files
- surveys
- literature reviews
- Internet

Analytical frameworks may include:

- logical/rational (including best practice)
- incremental
- radical transformation

Criteria for choice of preferred policy option may include:

- likely effectiveness in terms of:
  - meeting policy objectives
  - minimising risks
  - impact on day-to-day implementation throughout the organisation
  - practicality at the coal-face
  - competing priorities in the workplace
  - constraints
  - structure and culture of the organisation
  - implementation timeframe and costs (including infrastructure)
  - interaction with other policies (existing or being developed)
  - consistency with broader government agendas

Organisational requirements for style, format and contents may require policies to be:

- forward-looking
- outward-looking
- principles-based
- innovative, creative, flexible
- evidence-based
- inclusive
- consistent
- self-contained, with adequate coverage of the subject matter
- accessible to the intended audience/understandable to all users
- gender-neutral and written in non-discriminatory language
- version-controlled to support evaluation and revision

Outcomes of the policy development process may include:

- nature of the policy change
- the outcomes expected by stakeholders
- issues

© Commonwealth of Australia, 2024 Public Skills Australia

	• expected costs • timelines • contextual factors (including any impact on other related policies)
Promotion of policy may include:	• formal launch • information sessions • presentations • ongoing advice • intranet • web site • advertising where policy is located and how to access it

Unit Descriptor

This unit covers the development or review of public policy, to enable the implementation of government objectives. For the purposes of this unit, public policy includes government policy affecting all Australians and public sector policy that is not restricted to a particular organisational structure or individual organisation. The unit includes anticipating and confirming the need for public policy development or review; planning the policy development process; gathering and analysing information; determining policy direction; and drafting, gaining agreement for, and disseminating public policy.

In practice, developing public policy may overlap with other generalist or specialist work activities such as managing change, managing diversity, managing workplace safety, managing the delivery of client services, managing risk, directing the management of contracts.

This unit replaces and, for qualification purposes, is equivalent to *PSPPOLD601A Develop public policy*. Policy evaluation is no longer part of the unit. Evaluation is addressed in *PSPMNGT611A Manage evaluations*.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Anticipate and confirm the need for public policy development or review**	1.1 ***Events***, issues or government policies likely to cause changes to ***public policy*** are identified. 1.2 The likely implications and impact of these factors that might require public policy development are identified and prioritised in consultation with ***stakeholders***. 1.3 A critical analysis of the need for new or revised public policy is conducted that includes a scan of both internal and external environments, that checks related policies for context and identifies other public policy likely to be impacted. 1.4 Priority areas for public policy development/review are recommended in accordance with government directions. 1.5 Confirmation of the need for public policy development/review and supporting evidence is detailed in accordance with policy and procedures.
2. **Plan public policy development process**	2.1 The ***approving authority*** is confirmed and procedures and protocols for public policy development are confirmed and applied. 2.2 ***Issues*** likely to impact on the policy development process are identified, analysed (in terms of risk) and addressed in policy development planning.

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Public ***policy requirements*** are outlined in a policy development plan in accordance with organisational procedures.
3. Gather and analyse information for public policy development	3.1 Stakeholders are identified and engaged through the establishment and maintenance of a public policy network. 3.2 Information required to support the policy development process is ***gathered***, analysed and interpreted. 3.3 An ***analytical framework*** for the development of public policy is determined and applied.
4. Determine public policy direction	4.1 Strategic input is obtained from high-level staff in accordance with organisational/public sector protocols. 4.2 A range of policy options and ***criteria*** *for* ***choice*** are developed and communicated in a timely and understandable way to those responsible for selecting the policy direction. 4.3 Where appropriate, specific policy options are promoted to key individuals, organisations and groups. 4.4 A preferred public policy option is identified and risk treatments are determined in accordance with the policy development plan. 4.5 Approvals/endorsements are obtained in accordance with the policy development plan and public sector procedures and protocols.
5. Draft public policy	5.1 Public policy is drafted using a cyclical process of consultation, feedback, identification of changes and re-drafting implemented in accordance with the policy development plan. 5.2 Risk management processes are implemented in accordance with the policy development plan to ensure progress of the process against the timeframe and milestones. 5.3 An implementation plan that details responsibilities for implementation and strategies for transition, change management, and initial and ongoing training and maintenance of the policy, is included within the policy. 5.4 Mechanisms for monitoring compliance with the policy, quality assurance of the policy, and for evaluation of the policy are included within the policy. 5.5 The policy is developed in accordance with ***organisational requirements for style, format and contents***.
6. Release and promote public policy	6.1 Public policy is cleared through required channels, and agreement of critical stakeholders is gained in accordance with the policy development plan. 6.2 All stakeholders, particularly those who will be responsible for implementing the new or revised policy, are fully informed of the ***outcomes***, and fallout from dissenting stakeholders is managed in accordance with the policy development plan.

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	6.3 The policy is released and ***promoted*** in accordance with government requirements.
	6.4 Advice is provided to those affected by policy changes in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading and evaluating complex and formal documents such as policy and legislation
- researching, analysing and presenting information
- preparing written reports requiring precision of expression and language and structures suited to the intended audience
- working as a member of an inter-agency team to consult on and validate policy
- adjusting communication to suit different audiences
- responding to diversity, including gender and disability
- dealing with different points of view and dissenting stakeholders
- accessing policies and legislation electronically or in hard copy
- identifying and addressing the environmental, sustainability and occupational health and safety implications of policy/s being developed

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- policy development processes and practices in the public sector
- current policies underpinning the work area
- government procedures and protocols
- public sector code/s of ethics and code/s of conduct
- principles of community engagement in policy development
- equal employment opportunity, equity and diversity principles
- environmental, sustainability and occupational health and safety implications of policy/s being developed

© Commonwealth of Australia, 2024 Public Skills Australia

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPMNGT604B Manage change
  - PSPMNGT605B Manage diversity
  - PSPMNGT606B Manage quality client service
  - PSPMNGT608B Manage risk
  - PSPOHS602A Manage workplace safety
  - PSPPROC602B Direct the management of contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- development of public policy in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- public sector policy and legislation
- public sector standards, procedures and protocols
- policy development guidelines

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing public policy, including coping with difficulties, irregularities and breakdowns in routine
- development of public policy in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as

© Commonwealth of Australia, 2024 Public Skills Australia

literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Events may include:

- Machinery of Government changes
- a shift to designing policy around a set of government priorities not organisational structures/individual agencies
- a focus on whole of government policies
- changes to legal risks
- emphasis on policy research focused on the mid to long term, as well as that developed to meet immediate needs of government

© Commonwealth of Australia, 2024 Public Skills Australia

- national or international events such as:
  - change in government
  - changes in government policy
  - changes in strategic direction
  - changes in legislation
  - changes in the policies of other governments
  - changing social trends
  - economic/technological change

Public policy may include:

- ongoing policy formulation to meet the immediate needs of government
- evidence-based policy
- policy focused on the medium to long term
- any aspect of Australian life or public sector services or practices for which government considers policy development is required

Stakeholders may include:

- all those individuals and groups both inside and outside the government that have some direct interest in government conduct, actions, products and services, including:
  - employees at all levels of the public sector
  - government
  - Ministers
  - clients
  - the public
  - other public sector organisations
  - other jurisdictions
  - union and association representatives
  - boards of management
  - international governments
  - international bodies
  - community groups
  - non-government organisations
  - special interest groups
  - key individuals of influence

Approving authority may include:

- chief executive officer
- delegated officer, such as policy manager
- senior management
- board of management
- managing director

Issues may include:

- political sensitivities
- social and cultural sensitivities/factors

© Commonwealth of Australia, 2024 Public Skills Australia

- resource implications (of policy implementation)
- technological influences/implications
- jurisdictional issues
- 'sunk cost' restrictions
- non-consenting stakeholders at the end of the policy development process
- refusal to be involved, blocking, hampering process

Policy requirements may be defined in terms of:

- context
- rationale
- issues to be addressed
- expected outcomes
- timeframe
- business/government cycles
- research methods
- resource requirements for development
- key stakeholders
- communication strategy
- feedback mechanisms for review
- milestones
- precedents
- risk analysis
- possible complications
- success measures/learning from failure or previous problems
- possible resource implications for implementation

Information gathering may include:

- stakeholder consultation
- developments across the public sector or in private sector organisations
- evaluation of similar policies
- benchmarking (including international benchmarking)
- current and closed files
- surveys
- literature reviews
- Internet
- comparing with approaches in other countries

Analytical frameworks may include:

- logical/rational (including best practice)
- incremental
- radical transformation

Criteria for choice of

- likely effectiveness

© Commonwealth of Australia, 2024 Public Skills Australia

preferred policy option may include:	• implementation timeframe and costs (including infrastructure) • interaction with other policies (existing or being developed) • consistency with broader government and community agendas
Organisational requirements for style, format and contents may require policies to be:	• forward-looking • outward-looking • principles-based • innovative, creative, flexible • evidence-based • inclusive • consistent • self-contained, with adequate coverage of the subject matter • accessible to the intended audience/understandable to all users • gender-neutral and written in non-discriminatory language
Outcomes of the policy development process may include:	• nature of the policy change • the outcomes expected by stakeholders • issues • expected costs • timelines • contextual factors (including any impact on other related policies)
Promotion of policy may include:	• formal launch • national campaign • information sessions • presentations • media campaign • ongoing advice

Unit Descriptor

This unit covers the expenditure of public monies for simple purchasing that requires simple and routine purchasing tasks to be undertaken under supervision. Goods and services are of low value or low risk, and purchasing is in accordance with government policy, public accountability requirements and organisational procedures. The unit includes planning for and undertaking procurement, and receiving goods and services.

In practice, undertaking basic procurement may overlap with other generalist or specialist work activities, such as working effectively in the organisation, upholding the values of public service or local government, complying with legislation, and using resources and financial systems.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to those who undertake purchasing as part of their role, whether as an initiator of a purchase or as an approver. This unit may not be appropriate for those who have a significant role in procurement.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan for basic procurement of goods or services	1.1. ***Delegation/limit of authority*** for basic procurement of goods or services is confirmed. 1.2. Procurement requirements are researched, confirmed and clarified as necessary with ***relevant personnel***. 1.3. Most suitable ***option for acquiring goods or services*** is determined in accordance with legislation, policy and procedures, and value for money considerations. 1.4. Approval processes for procurement options are identified. 1.5. ***Risk planning*** is conducted for the procurement activity in accordance with procedures, delegation and guidelines.
2. Undertake procurement	2.1. Approvals are obtained as necessary for procurement of goods or services in accordance with organisational policy and procedures. 2.2. Quotations are obtained if necessary in accordance with legislation, policy and procedures, and any conflict of interest is declared and resolved in accordance with organisational policy and procedures. 2.3. Suppliers or service providers are assessed and selected on the basis of ***best value for money***. 2.4. Procurement is initiated or orders are placed in

© Commonwealth of Australia, 2024 Public Skills Australia

	accordance with selected procurement option. 2.5. Procurement is conducted in accordance with the organisation's probity and governance requirements. 2.6. Procurement is conducted in line with the organisation's ***financial management system***.
3. Receive goods or services	3.1. Goods are received or provision of services is accepted in accordance with procurement requirements. 3.2. Quality assurance processes are implemented to ensure goods or services meet procurement specifications and outcomes required. 3.3. Action is taken to resolve non-compliance with specifications within limits of own authority, or is referred according to organisational policy and procedures. 3.4. Receipt of goods or services is ***confirmed*** and accounts are processed for payment according to organisational procedures. 3.5. ***Records*** are maintained and reporting obligations are met according to organisational and legal requirements to provide an audit trail and for other organisational purposes.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - write and communicate procurement requirements in unambiguous terms
  - consult and negotiate with providers
  - provide feedback
- teamwork skills to:
  - work independently or under direction as appropriate to the situation
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to:
  - assess procurement options and select the most suitable option
  - assess goods and services against specifications
- initiative and enterprise skills to apply OHS and environmental requirements to basic procurement requirements
- planning and organising skills to apply risk-management processes

© Commonwealth of Australia, 2024 Public Skills Australia

- self-management skills to apply codes of conduct, codes of practice and standards of individual behaviour
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures
- technology skills to:
  - operate organisational IT systems
  - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government procurement guidelines, including environmental purchasing guidelines
- organisation's code of conduct, codes of practice and standards of individual behaviour relating to procurement of goods and services, in particular identifying and managing conflict of interest, gifts and inappropriate relationships with providers
- procurement options and methods
- probity and ethical issues
- procedures for receipt and payment of goods or services, including credit card procedures
- procurement approval procedures
- financial and government accountability requirements
- equal employment opportunity, equity and diversity principles
- public sector legislation and guidelines, including OHS and environment

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Competency must be demonstrated by undertaking basic procurement of goods or services consistently in accordance with legislative and organisational requirements.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • produce a procurement plan appropriate to the scale, complexity and risk of the procurement • implement the procurement plan in a way that reflects organisational policies and approaches • use relevant template documents • accept delivered goods and services into use • operate within own delegations and seek advice when

© Commonwealth of Australia, 2024 Public Skills Australia

appropriate
- keep records of procurement activities.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least three separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to basic procurement of goods and services
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of basic procurement activities
- case studies that incorporate dilemmas, and probity requirements relating to basic procurement of goods and services.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies selected for basic procurement
- review of basic procurement plans, requests for quotation, quotation evaluation plans, selection reports, credit card purchase documents, approvals obtained, simple budgets, invoices paid, other financial documents and other documentation prepared by the candidate in a range of contexts
- feedback from peers or supervisors on actions taken to monitor and review contract performance

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC301B Uphold the values and principles of

© Commonwealth of Australia, 2024 Public Skills Australia

public service
- PSPGOV301B Work effectively in the organisation
- PSPGOV305B Access and use resources and financial systems
- PSPGOV309A Address client needs
- PSPGOV312A Use workplace communication strategies
- PSPLEGN301B Comply with legislation in the public sector

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Delegation/limit of authority may include:	• low value or low risk procurement • one-off purchases • expenditure approval limits • approval processes • procurement decision making
Relevant personnel may include:	• internal user of procured goods or services • supervisor • specialist procurement personnel • supplier
Options for acquiring goods or services may include:	• purchasing off an existing contract, standing offer or multi-use list • government credit card transactions • direct purchase from retail or wholesale outlets • petty cash • standard electronic commerce or online transactions
Risk planning may include:	• stakeholder consultation • confirmation that a procurement process is necessary • confirmation that funds are available • confirmation that required approvals have been obtained
Best value for money	• availability

© Commonwealth of Australia, 2024 Public Skills Australia

includes:	• ease of disposal • price • through life support • warranty • quality and suitability of product
Financial management system may include:	• procurement and contracts' register • delegations and authorities • reporting requirements • record keeping • receiving and accepting deliverables • payment approval process • credit card process
Confirmation may include:	• verbal and written • internal and external • to users • to management.
Records may include:	• purchase requests and orders • invoices and payment requests • statements and petty cash vouchers • records of authorised decisions • corporate credit card transaction statements • records of supplier performance • financial statements • asset registers • actions taken to manage identified conflict of interest • records of conversation • procurement reporting

Unit Descriptor

This unit covers the expenditure of public monies for simple procurement of low value/low risk goods and services using contractual arrangements that include simple tendering and requests for quotation. The unit requires analysis and decision making in the procurement process, which is undertaken under limited supervision. It includes planning and undertaking procurement, managing contractors and completing contractual arrangements.

In practice, procuring goods and services overlaps with other generalist and specialist public sector or local government work activities, such as upholding and supporting the values and principles of public service, identifying and treating risks, exercising delegations, applying government processes, encouraging compliance with legislation in the public sector or local government, planning procurement, developing and distributing requests for offers, selecting providers and managing contracts.

This unit is not recommended for those who specialise in procurement. It cannot be included in the Certificate IV in Government (Procurement and Contracting).

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to those who enter into contracts or go out to tender or manage the procurement but are not procurement professionals. Those undertaking this unit may be developing a request for tender but procurement is not a major part of their role.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan for procurement of goods or services.	1.1. ***Market assessment*** is used to identify and select options for procuring goods or services in accordance with business plan requirements, legislation, policy and procedures, and ***probity requirements***. 1.2. ***Commercial strategy*** is identified to achieve the procurement outcome set out in the business plan, achieve value for money, and meet legal and probity requirements. 1.3. Risk planning is conducted for the procurement activity according to procedures, delegations and guidelines. 1.4. Process and criteria for evaluation of offers from suppliers or service providers are identified to meet public sector probity requirements, and are recorded in a tender evaluation plan. 1.5. Procurement plan is developed to manage procurement process and ***contractual arrangements*** in accordance with ***legislation***, ***policy and procedures***, ***and probity requirements***.

© Commonwealth of Australia, 2024 Public Skills Australia

	1.6. ***Stakeholders*** are consulted about the planned procurement and their feedback is incorporated into the procurement process.
2. Undertake procurement.	2.1. ***Method for requesting and receiving offers*** is chosen to suit the procurement activity and comply with organisational policy and procedures and probity requirements. 2.2. Specialist expertise is used to assist in evaluation of offers as required. 2.3. Evaluation and selection of the offer are made according to tender evaluation plan, and organisational policy and procedures. 2.4. Notification of successful and unsuccessful suppliers/providers is undertaken according to procurement plan, and organisational policy and procedures. 2.5. Work does not commence and payment is not made until contractual arrangements are formalised. 2.6. Contractual arrangements that are legally binding to all parties and suitable to the procurement activity are negotiated, formalised and ***reported*** according to organisational policy and procedures.
3. Manage contractors.	3.1. Communication strategies are established to build and maintain relationships with contractors. 3.2. Performance is monitored against contract performance indicators for quality assurance of the goods or services and to ensure compliance with contract specifications. 3.3. Contract performance indicators are regularly reviewed to ensure relevance. 3.4. Approvals are obtained for contract variations according to organisational and contractual requirements. 3.5. Disputes or complaints are investigated, documented and resolved or referred according to contractual provisions. 3.6. Contractual obligations to contractors are met. 3.7. ***Records*** are maintained according to organisational and legal requirements to provide an audit trail and for other ***organisational purposes***.
4. Complete contractual arrangements.	4.1. Goods and services received are confirmed as meeting contractual specification and required outcome, and accounts are processed for payment according to organisational procedures.

© Commonwealth of Australia, 2024 Public Skills Australia

4.2. Contracts are finalised, cancelled or terminated according to contractual arrangements.

4.3. Contract performance, outcomes and management processes are evaluated, and lessons learnt are recorded and used to inform ongoing contract management practices.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - write procurement specifications in unambiguous terms
  - consult and negotiate with providers
  - write, read and/or sign contractual agreements that may include complexity of language and style, using templates where appropriate
  - engage in ongoing communication with contractors that may involve explaining or clarifying written and oral information, note-taking at meetings, active listening, and checking for understanding
  - provide feedback
- teamwork skills to:
  - work independently or under direction as appropriate to the situation
  - model team leadership approaches if appropriate
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to:
  - evaluate procurement options and select the most suitable option
  - assess goods or services provided against specifications
- initiative and enterprise skills to apply OHS, environmental, sustainability and corporate social responsibility practices in the context of government procurement activities
- planning and organising skills to:
  - manage contractor performance against contract requirements
  - make payments and manage financial arrangements
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures
- technology skills to:
  - operate organisational IT systems
  - use electronic procurement templates

© Commonwealth of Australia, 2024 Public Skills Australia

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to contract management, including environmental purchasing and corporate social responsibility guidance
  - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- organisation's code of conduct and code of ethics
- procurement options and methods
- probity and ethical issues
- codes of conduct, codes of practice and standards of individual behaviour relating to procuring goods and services, in particular identifying and managing conflict of interest, gifts and inappropriate relationships with providers
- procedures for receipt and payment of goods or services
- common use arrangements
- procurement approval procedures
- financial accountability requirements
- aspects of contract law, laws of tort, trade practices law, commercial law and other legislation relating to receipt and evaluation of offers, negotiation and award of contracts

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Competency must be demonstrated in the ability to procure goods and services consistently in accordance with legislative and organisational requirements.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • plan a procurement activity, using templates where these are available, to a level of detail commensurate with the complexity and risk profile of the procurement • implement the procurement plan in a way that reflects the legislative and policy environment applicable to the organisation • develop a suitable contract management plan, using templates if available • manage the performance of contractors to ensure that the

© Commonwealth of Australia, 2024 Public Skills Australia

goods or services are delivered in accordance with the contract
- act within own delegations and refer issues to higher authority when necessary.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to procuring goods and services
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of procurement activities
- case studies that incorporate dilemmas, and probity requirements relating to procurement of goods and services.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies selected for procurement
- review of procurement plans, requests for quotation/tender, tender evaluation plans, selection reports, contracts, contract management plans and reports, and other documentation prepared by the candidate in a range of contexts
- feedback from peers or supervisors on actions taken to monitor and review contract performance.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

© Commonwealth of Australia, 2024 Public Skills Australia

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV417A Identify and treat risks
- PSPGOV421A Exercise delegations
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC411A Plan procurement
- PSPPROC412A Develop and distribute requests for offers
- PSPPROC413A Select providers and develop contracts
- PSPPROC414A Manage contracts.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Market assessment may include:	• structure of the market • number and quality of providers • factors and conditions which may affect supply of goods or provision of services • potential impact of intended procurement activity
Evaluation of options may include:	• stakeholder consultation • confirmation that procurement is necessary • development of a business case • comparison of internal and outsourced provision

Probity requirements:	• may include:
	  • accountability
	  • transparency
	  • confidentiality
	  • managing conflict of interest
	  • impartiality
	• are maintained to:
	  • encourage conformity to processes
	  • facilitate accountability
	  • ensure proponents are treated in a fair and equitable manner

© Commonwealth of Australia, 2024 Public Skills Australia

	• encourage commercial completion • preserve public and private sector confidence in government processes
Key elements of a ***commercial strategy*** may include:	• consultation with key stakeholders • expenditure budget meets organisational requirements for probity and accountability • procurement process agreed by users and documented, and meets legal and probity requirements • approvals obtained • contractual arrangements that capture and address identified risks, protection of all parties, and include performance indicators that provide the basis for due performance
Contractual arrangements may include:	• verbal and written orders • purchase order • government credit cards • petty cash • memoranda of understanding/memoranda of agreement • in-house service level agreements • contracts • standing offers • inter and intra-government agreements
Legislation, ***policy and procedures and probity requirements*** may include:	• commonwealth or state and territory legislation • council rules and by-laws • equal employment opportunity and anti-discrimination law • commonwealth, and state or territory government procurement guidelines, including environmental purchasing guidelines • organisational policies and practices • probity guidelines • financial management requirements
Stakeholders may include:	• end users, customers or clients, and sponsors • current or potential providers or suppliers • technical or functional experts or advisers • commonwealth, state or territory, and local government • the organisation • other public sector organisations • employees, unions and staff associations

PSPSEC006 Implement security risk treatments

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPSEC402A Implement security risk treatments. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 2.1 and 2.2, PC 3.3 and 3.4, PC 4.1 and 4.2 merged

Application

This unit describes the skills required to confirm risk decisions, identify risk treatments, implement countermeasures and monitor and review the security risk management process.

This unit applies to those working in a security role where they will be required to confirm, identify, implement and review risk.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to the security plan.

Those undertaking this unit would generally work independently and as part of a team using support resources as required. They would perform complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Security

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Confirm risk decisions	1.1 Confirm management decisions determining acceptable and unacceptable levels of risks. 1.2 Note and monitor low level risks accepted by the organisation, to detect changed circumstances. 1.3 Refer unacceptable high-level risks for development of formal management plans. 1.4 Note for treatment all major or significant risks determined as unacceptable.
2. Identify risk treatments	2.1 Ensure treatments are consistent with the security plan, are cost effective and address levels and types of risk and the importance of the function or resource at risk. 2.2 Select treatments to reduce the likelihood and/or consequences of the risk. 2.3 Include continuity plans in treatments where appropriate. 2.4 Document treatments and submit for approval.
3. Implement countermeasures	3.1 Develop and implement a treatment plan. 3.2 Apply countermeasures in accordance with the implementation strategy detailed in the security plan. 3.3 Implement countermeasures in accordance with timeframe, budgetary requirements and legal requirements.
4. Monitor and review security risk management process	4.1 Implement strategies to monitor risk environment. 4.2 Evaluate risk treatments against the objectives of the security plan. 4.3 Obtain feedback from stakeholders on the adequacy and need for current security measures affecting their work/area. 4.4 Convey recommendations for re-examination of security risk or improved risk treatments to the appropriate personnel.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy					

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to PSPSEC402A Implement security risk treatments.

Assessment Requirements for PSPSEC006 Implement security risk treatments

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least two occasions.

- applying legislation, regulations and policies relating to government security management
- reading and analysing the organisation's security plan
- communicating with diverse stakeholders
- using computer technology to gather and analyse information, and prepare formal reports
- representing mathematical information in format to suit the purpose

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- legislation, regulations, policies, procedures and guidelines relating to government security management including WHS
- Crimes Act 1914 and Criminal Code 1985
- Freedom of Information Act 1982
- Privacy Act 1988
- fraud control and protective security policies
- Australian Government Information Security Manual (ISM)
- Protective Security Policy Framework
- risk analysis terminology and techniques
- the organisation's security plan
- the organisation's assets and security environment

© Commonwealth of Australia, 2024 Public Skills Australia

- risk management: principles and guidelines
- AS/NZS ISO 31000:2009

Assessment Conditions

Assessment of this unit requires a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when implementing security risk treatments.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPSEC007 Develop and advise on government security procedures

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPSEC403A Develop and advise on government security procedures. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 2.1 and 2.2 merged, PC 4.2 removed

Application

This unit describes the skills required to interpret security policy and legislation, analyse security related data, develop procedures and provide advice on government security matters.

This unit applies to those working in the policy development division of the organisation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to policy development and implementation.

Those undertaking this unit would generally work independently and as part of a team using support resources as required. They would perform complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Interpret security policy and legislation	1.1 Identify and analyse legislation impacting on security policy and procedures. 1.2 Analyse the organisation's security policy in relation to risk identification, security management and security incidents. 1.3 Confirm policy intent and identify and review existing procedures for consistency.
2. Analyse security related data	2.1 Collect and analyse data and confirm its integrity. 2.2 Identify outcomes and trends that need to be addressed through security procedures. 2.3 Determine any changes in organisational circumstances and identify related security procedures.
3. Develop procedures	3.1 Identify intended audience/s for procedures and determine language style, structure and format accordingly. 3.2 Develop security procedures to reflect changes in circumstances. 3.3 Develop procedures in consultation with security plan developer/s, end users and approval personnel. 3.4 Submit and gain approval for procedures.
4. Provide advice on government security matters	4.1 Provide information and advice on security procedures and related legislation, regulations, standards and guidelines. 4.2 Consider intended use and consequences of advice and communicate in a manner that addresses the requirements of stakeholders. 4.3 Check documentation provided to ensure it supports the information and advice given.

PSPSEC012 Develop security risk management plans

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPSEC502A Develop security risk management plans. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 2.1 and 2.2 merged

Application

This unit describes the skills required to treat security risks through the development of a security risk management plan. It includes identifying security countermeasures and developing a plan with schedule for implementing, monitoring and evaluating security strategies.

This unit applies to those working in a security role with some responsibility for addressing organisational risk.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to developing risk management plans.

Those undertaking this unit would work autonomously occasionally accessing and evaluating support from a broad range of sources. They would perform complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Security

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify counter-measures	1.1 Review documented risks and threats and validate management decisions on acceptable and unacceptable risks. 1.2 Determine treatment options and countermeasures to reduce the likelihood of occurrence or consequences of the risk. 1.3 Propose treatments which include continuity plans where appropriate. 1.4 Propose treatments which match the level and type of risk and importance of the function or resource. 1.5 Conduct a cost-benefit analysis to determine countermeasures. 1.6 Consult stakeholders on the cost-benefit analysis and determine and submit countermeasures for prioritising.
2. Develop security plan	2.1 Prepare a security plan containing explanatory information on the importance of security and the organisation’s security objectives in achieving corporate and business objectives. 2.2 Summarise the threat assessments undertaken, current exposure and current protective security arrangements in the plan. 2.3 Outline security strategies for implementing, monitoring and evaluating countermeasures. 2.4 Include timeframes and security budget for implementing countermeasures including assigned responsibilities and methodologies to be used. 2.5 Submit security plan for approval and communicate to stakeholders.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2024 Public Skills Australia

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy					

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Assessment Requirements for PSPSEC012 Develop security risk management plans

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least two occasions.

- applying legislation, regulations and policies relating to security risk management plans
- using evaluation, deductive reasoning, problem solving and decision making
- communicating with diverse stakeholders involving presentation, listening, questioning, paraphrasing, clarifying, summarising
- reading and analysing complex information in standards and security plans
- writing reports requiring formal language and structure
- representing numerical, graphical and statistical information in diverse formats

Knowledge Evidence

- Operational knowledge of:
  - Crimes Act 1914 and Criminal Code 1985
  - Freedom of Information Act 1982
  - Privacy Act 1988
  - fraud control policy
  - Australian Government Information Security Manual (ISM)
  - Protective Security Policy Framework
  - Australian standards, quality assurance and certification requirements
  - international treaties and protocols
  - requires comprehensive knowledge of cross-jurisdictional protocols
  - organisation’s strategic objectives

© Commonwealth of Australia, 2024 Public Skills Australia

- national strategic objectives
- formats for different types of reports
- cost-benefit analysis techniques
- equal employment opportunity, equity and diversity principles
- public sector legislation, including WHS and environment, in the context of security risk assessment

Assessment Conditions

Assessment of this unit requires evidence gathered over time in a workplace environment or one that closely resembles normal work practice and replicates the diverse conditions likely to be encountered when developing risk management plans.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPSEC405A Handle security classified information

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the requirements related to handling security classified information. It includes receiving, dealing with and maintaining security classified information.

In practice, handling security classified information may overlap with other generalist or specialist public sector work activities such as working ethically, complying with legislation, applying government processes, gathering and analysing information, exercising regulatory powers.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

© Commonwealth of Australia, 2024 Public Skills Australia

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive security classified information	1.1 ***Security classified information*** is ***received*** and checked to ensure transmission protocols have been adhered to. 1.2 Action is taken in accordance with security policy and procedures where protocols have not been adhered to. 1.3 Security classified information is recorded in accordance with organisational policy and procedures.
2. Deal with security classified information	2.1 Security classified information is ***reviewed*** to ensure classification meets the organisation's security policy for protection of information. 2.2 Aggregated security classified information is reviewed to ensure that it is classified in accordance with security requirements. 2.3 Classification requirement is checked to ensure it is warranted, and the level of protection is assigned in accordance with the consequences that might result from the compromise of the information's confidentiality, integrity and availability. 2.4 Originators of information who classify documents are contacted to discuss re-classification or de-classification where necessary. 2.5 Security classified information is ***transmitted*** in accordance with organisational security policy and procedures. 2.6 ***Expert advice*** is obtained as required in accordance with organisational policy and procedures.
3. Maintain security classified information	3.1 Security classified information is ***secured*** in accordance with organisational policy and procedures. 3.2 Security classified information is ***accounted for*** in accordance with organisational policy and procedures. 3.3 Security classified information is ***disposed of*** in accordance with organisational policy and procedures.

© Commonwealth of Australia, 2024 Public Skills Australia

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to government security management
- applying security classification systems
- using analysis and problem solving
- tailoring communication to the needs of a diverse range of people inside and outside the organisation who classify, transmit or advise on security classified information
- responding to diversity, including gender and disability
- undertaking recordkeeping requiring attention to detail, and adherence to standards
- applying procedures relating to occupational health and safety and environment in the context of government security management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to government security management
- standards for management of security classified information
- classification system for national security and non-national security information
- procedures for confirming initial security classifications
- international protocols and treaties impacting on government security management
- available sources of expert advice
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of government security management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training

© Commonwealth of Australia, 2024 Public Skills Australia

Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV406B Gather and analyse information
  - PSPGOV422A Apply government processes
  - PSPLEGN401A Encourage compliance with legislation in the public sector
  - PSPREG401C Exercise regulatory powers

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- security classified information handled in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to handling security classified information
- case studies and workplace scenarios to capture the range of situations likely to be encountered when handling security classified information

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when handling security classified information, including coping with difficulties, irregularities and breakdowns in routine
- security classified information handled in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse

© Commonwealth of Australia, 2024 Public Skills Australia

backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Security classified information may include:

- hard copy
- electronic
- audio-visual
- photographic
- encrypted
- national security classified
- non-national security classified
- classified by third parties

© Commonwealth of Australia, 2024 Public Skills Australia

Security classified information may be ***received*** by:	• hand • mail • safe hand mail • courier • electronic means
Reviewed information may include:	• single or aggregated information
Transmission may be by:	• hand • mail • courier • electronic means

Expert advice may include:	• agency security adviser/s
	• specialist agencies such as:
	  • Australian Security Intelligence Organisation
	  • Department of Foreign Affairs and Trade
	  • Australian Public Service Commission
	  • Defence Signals Directorate
	  • Australian Federal Police
	  • Attorney-General's Department
	  • Australian National Audit Office
	  • Office of the Australian Information Commissioner

Securing practices may include:	• correct filing
	• clean desk
	• quitting all electronic systems and networks
	• checking environment including:
	  • desks
	  • whiteboards
	  • waste bins
	  • computer drives
	  • containers
	  • cabinets
	  • safes
	  • vaults
	  • windows
	  • doors
	• safe carriage of keys

Accounting for security classified information	• audit • spot checks

© Commonwealth of Australia, 2024 Public Skills Australia

may include:	• correct notation or markings • file records • transmission records • receipts
Methods of ***disposal*** may include:	• pulping • burning • pulverisation • shredding • overwriting • degaussing • destruction • archiving

PSPSOHS402A Contribute to the implementation of the OHS consultation process

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the outcomes required to effectively contribute to the promotion of consultative arrangements in the workplace by communicating, influencing and consulting as part of a systematic approach to managing OHS. The unit addresses the formal and informal processes of ensuring people in the organisation are informed about OHS and have opportunities to effectively participate in OHS processes.

In practice, contributing to the implementation of the OHS consultation process may overlap with other generalist or specialist public sector work activities such as acting ethically, using communication strategies, delivering client services, supporting policy implementation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to individuals with supervisory responsibilities for implementing and monitoring the organisation's OHS policies, procedures, programs in a work area. It addresses the formal and informal processes of ensuring people in the organisation are informed about OHS and have opportunities to effectively participate in OHS processes.

This unit will involve working with individuals and working with groups.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Contribute to procedures as individuals or as part of a group to raise OHS issues or request information and data	1.1 ***Strategies and tools*** for individuals or groups to raise OHS issues or request information and data are identified. 1.2 Procedures for individuals and groups to raise OHS issues or request information and data are implemented and communicated to ***stakeholders*** and ***interested parties***. 1.3 ***Barriers*** to individuals or groups seeking OHS information and data or raising issues are identified. 1.4 Recommendations are made to address any identified barriers.
2 Contribute to procedures for communicating OHS information and data	2.1 Needs for ***OHS information and data***, communication and consultation, including relevant ***legislative requirements***, are identified with stakeholders. 2.2 Information and data about OHS is provided to key personnel on a regular basis, in a readily accessible manner and appropriate to the target group. 2.3 Formal and informal ***communication processes*** are used to provide information and data about OHS. 2.4 Any barriers to individuals or groups gaining information and data about OHS are identified. 2.5 Recommendations are made to address any identified barriers.
3 Communicate OHS information, data and advice	3.1 Timely and appropriate OHS information and data and advice are provided to stakeholder groups and individuals. 3.2 OHS-related contributions in the form of ideas, information and

ELEMENT	PERFORMANCE CRITERIA
effectively to influence management decision making and action	solutions are made to influence management decision making and action. 3.3 Awareness of the organisation's cultural and industrial environment is used when dealing with OHS issues.
4 Contribute to maintaining consultative arrangements	4.1 Support and advice are provided to those involved in ***OHS consultative arrangements***. 4.2 The OHS issue resolution process is supported to facilitate timely and equitable resolution of OHS issues. 4.3 OHS consultative processes are facilitated to meet legislative and workplace requirements. 4.4 The effectiveness of OHS consultation and participative arrangements is monitored.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of the organisation, OHS specialists and, as required, emergency service personnel
- preparing brief summary reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors
- managing own tasks within a time frame
- employing consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and where appropriate access resources
- analysing relevant workplace information and data, making observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- using a range of communication media
- conducting effective formal and informal meetings
- using language and literacy skills appropriate to the workgroup and the task
- dealing with conflict and contestability
- identifying and developing links between different activity areas in the

© Commonwealth of Australia, 2024 Public Skills Australia

workplace.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- legislative requirements for OHS information and data and consultation
- roles and responsibilities in relation to communication and consultation for OHS committees, OHS representatives, line management, employees and inspectors
- requirements for record keeping that addresses OHS, privacy and other relevant legislation
- requirements for reporting under OHS and other relevant legislation including obligations for notification and reporting of incidents
- State/Territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- internal and external sources of OHS information and data
- benefits and limitations and use a range of communication strategies and tools appropriate to the workplace
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS e.g.
- labour market changes
- structure and organisation of workforce - part-time, casual and contract workers, shift rosters, geographical location
- language, literacy and numeracy
- communication skills
- cultural background/workplace diversity
- gender
- workers with special needs
- principles of effective meetings including agendas, action planning, chair/secretarial duties, minutes and action items
- knowledge of organisational OHS policies and procedures
- key personnel, including identifying 'change agents', within workplace management structure
- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the work group
- organisational culture as it impacts on the workgroup
- public policy basis of OHS

© Commonwealth of Australia, 2024 Public Skills Australia

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV402B Deliver and monitor service to clients
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV422A Apply government processes
- PSPPOL404A Support policy implementation
- PSPSOHS401A Contribute to the implementation of a systematic approach to managing OHS
- PSPSOHS404A Contribute to the implementation of strategies to control OHS risk
- PSPSOHS407A Ensure compliance with OHS and other relevant laws.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to OHS consultation processes
- case studies and workplace scenarios to capture the range of situations likely to be encountered when contributing to the implementation of OHS consultation processes.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when contributing to the implementation of OHS consultation processes, including coping with difficulties, irregularities and breakdowns in routine
- contribution to the implementation of OHS consultation in a range of three or more contexts or occasions, over time.

© Commonwealth of Australia, 2024 Public Skills Australia

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance criteria is explained here.

Strategies and tools may include:

- OHS committees
- meetings with health and safety and employee representatives
- employee meetings
- input to safety audits, hazard identification and risk assessment processes
- hazard alerts
- surveys, checklists
- tool box meetings
- intranet or email systems
- suggestion boxes and processes
- informal discussions with team members

Stakeholders may

- managers

© Commonwealth of Australia, 2024 Public Skills Australia

include:	• supervisors • health and safety and other employee representatives • OHS committees • employees
Interested parties may include:	• contractors • visitors • clients • community
Barriers may include:	• language • literacy and numeracy • special needs of employees • shift work and rostering arrangements • contractual arrangements • timing of information provision • workplace organisational structures (eg geographic, hierarchical) • workplace culture related to OHS
Information and data about OHS may include:	• OHS legislation, codes of practice and guidelines • OHS consultation and participation processes • rights and responsibilities • hazards that exist in the workplace • risk assessments • risk control strategies • workplace OHS policies and procedures • safe work procedures • access to training information and data • manufacturers' manuals and specifications
Legislative requirements may include:	• OHS legislation, regulations and codes of practice • workplace equity, diversity and privacy legislation • freedom of information (FOI) legislation
Communication processes may include:	• group and individual meetings • interviews • notice boards • signs, posters and brochures • emails, letters, minutes, memos, reports • photographs, maps and plans • audio-visual media eg video • newsletters
OHS consultative	• OHS and other consultative and planning committees

© Commonwealth of Australia, 2024 Public Skills Australia

arrangements may include:	• health and safety representatives and other employee representatives • employee and supervisor involvement in OHS activities such as inspections and audits • procedures for reporting hazards, and raising and addressing OHS issues • employee and workgroup meetings

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Communicate verbally	1.1 Language used in all communications is clear concise and appropriate to client, assignment and organisation's requirements. 1.2 Active listening skills and questioning techniques are used to clarify issues. 1.3 Established ***communication*** pathways are used for routine and non-routine communication.
2. Communicate non verbally	2.1 ***Non verbal communication*** is positive, culturally appropriate and tailored to the audience. 2.2 Non verbal communication is consistent with verbal communication.
3. Communicate with clients	3.1 Questioning, learning and summarising skills are used to establish ***client needs.*** 3.2 The needs of ***clients*** are addressed in line with organisation's policy and procedures. 3.3 Confidentiality is observed in accordance with organisation's policies and procedures.
4. Give and receive instructions	4.1 ***Instructions*** received are acted upon within an agreed time frame and to meet organisation needs. 4.2 Difficulties/problem areas are identified and communicated to the appropriate person in a timely manner. 4.3 Clarification of instructions is sought from the appropriate person. 4.4 Instructions are relayed clearly, concisely and accurately and confirmation of understanding obtained.
5. Take part in group discussions and informal meetings	5.1 Contributions are made in small informal group activities and meetings to facilitate outcomes. 5.2 Responses are sought from, and provided to, other group members in a constructive way. 5.3 Views and opinions of individuals or a group are understood, acknowledged and accurately represented to others where required.
6. Prepare and process routine written correspondence notes and records	6.1 Information and ideas are presented in a format, language and timeframe to meet organisation's requirements. 6.2 Presentation of written documents meets organisation's standards of style and accuracy. 6.3 Documents are processed to comply with legislative

ELEMENT	PERFORMANCE CRITERIA
	requirements and organisation's policy and procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate in group setting
- follow written instructions
- give and receive verbal instructions
- interact with clients
- use information technology effectively

Required Knowledge

- effective non verbal communication techniques
- effective verbal communication techniques
- group communication techniques
- small group dynamics
- written communication skills

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in effectively interacting with clients and communicate verbally and non verbally.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

- A combination of oral or written presentations
- observations
- on the job and/or in a simulated workplace environment

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Clients may include:
- external
- internal
- representatives of other organisations
- representatives of non government organisations
- contractors
- members of the public
- persons from culturally and linguistically diverse backgrounds
- people with hearing/vision impairments

Instructions may include:
- verbal
- non verbal
- written and may include requests
- directions

Modes of communication may include:
- written
- face to face
- radio
- mobile telephone
- land line telephone
- facsimile
- information technology systems
- signalling systems
- pamphlets translated in other languages for persons from culturally and linguistically diverse backgrounds
- Auslan gestures
- use of interpreters
- signals
- visual signalling re vessels
- helicopter signals
- fixed plane signals
- signalling to vessel skipper re anchoring, towing etc

Client needs may include:
- information
- advice
- directions
- assistance

© Commonwealth of Australia, 2024 Public Skills Australia

Workplace may include:	• office • in the field • workshop • operational area • surf or ocean environment • blue water coastal areas, barrier reef • bars and bar crossings
Non verbal communication may include:	• body language • gestures and signals
Routine correspondence may include:	• brief notes • documents • number of themes covered in document would be simple and limited

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify client needs and expectations	1.1 Current and potential ***clients*** are identified. 1.2 Needs and expectations are discussed and clarified with clients.
2. Determine and implement response to client needs	2.1 Appropriate decision making processes are established with client and relevant stakeholders. 2.2 Options are identified. 2.3 Decision making criteria are identified taking account of client needs and organisational context. 2.4 Decision making criteria are applied to options in order to identify range of relevant outcomes. 2.5 ***Appropriate response*** are selected and implemented. 2.6 Client needs are recognised and taken into consideration in accordance with anti discrimination and other organisation policy and procedures.
3. Manage client expectations	3.1 Range of possible organisational responses are communicated to the client in a timely manner. 3.2 Client is informed of options for further action. 3.3 Courtesy, consideration and sensitivity are exercised at all times with the client. 3.4 All ***necessary documentation*** is obtained, completed and processed according to organisation's policy and procedures. 3.5 ***Organisation's policy and procedures*** relating to confidentiality are implemented. 3.6 Assistance is sought to manage clients' expectations when necessary. 3.7 Clients are referred to other personnel where necessary to ensure their needs are managed efficiently.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- interpersonal skills
- locating information
- reading selectively and summarising information

© Commonwealth of Australia, 2024 Public Skills Australia

Required Knowledge

- major regulatory functions of organisation
- organisation and structure
- organisation services, facilities and activities
- organisation's anti-discrimination procedures
- organisation's policies and procedures relevant to client service and information provision

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in:

- locating, interpreting and providing relevant information to requests
- seeking assistance when necessary
- completing appropriate workplace records
- working in accordance with organisation's policies and procedures

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

A combination of oral or written presentation, observation on the job and/or in a simulated workplace environment.

Specific resources for assessment

No special requirements.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify information needs and sources	1.1 The ***information*** needs of individuals/teams are determined and the sources are identified. 1.2 Information held by the organisation is reviewed to determine suitability and accessibility. 1.3 Plans are prepared to obtain information which is not available or accessible within the organisation.
2. Collect and analyse information	2.1 ***Collection*** of information is timely and relevant to the needs of individuals/teams. 2.2 Information is in a formal suitable for ***analysis***, interpretation and dissemination. 2.3 Information is analysed to identify relevant trends and developments in terms of the needs for which is was acquired.
3. Use management information systems	3.1 ***Management information systems*** are used to store and retrieve data for decision making. 3.2 Technology available in the work area/organisation is used to manage information. 3.3 Recommendations for improving the information system are submitted to designated persons/groups.
4. Record and support information	4.1 The results of information gathering, analysis and synthesis are reported within specified time frames and to the standard defined by the organisation. 4.2 The results of information gathering, analysis and synthesis are reported so they can be inputs to policy development and organisation decision making. 4.3 Information which is gathered is disseminated to appropriate personnel within the specified timeframe.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse record information

© Commonwealth of Australia, 2024 Public Skills Australia

- collect and collate information
- communicate effectively
- disseminate information
- present information
- use management information systems to store and retrieve data

Required Knowledge

- analysis and display techniques
- information collection, collation
- information evaluation issues
- information storage requirements and methods
- reporting procedures of the organisation

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Establish an effective information system which facilitates achievement of organisational objectives. **Consistency in performance** Evidence will need to be collected over time in a range of actual and/or simulated management contexts.
Context of and specific resources for assessment	**Context of assessment** Evidence will need to be collected over time in a range of actual and/or simulated information management contexts. **Specific resources for assessment** Evidence of competent performance should be obtained by observing an individual in an information management role within the workplace or operational or simulated environment.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Presentation of information may include:	• routine and complex reports and submissions • briefing notes • ministerials

© Commonwealth of Australia, 2024 Public Skills Australia

- proposals
- project plans
- articles and promotional material

Management information systems may include:

- computers
- communication channels
- records management
- procedures
- manuals
- protocol
- legislation
- guidelines and awards
- organisational
- legal and policy materials
- client information
- market trends
- registries and file records
- library
- financial records
- basic statistical information

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop communication strategies	1.1 Strategies for effective internal and external dissemination of information are developed to meet the organisation's requirements. 1.2 ***Special communication needs*** are considered in developing ***strategies to avoid discrimination*** in the workplace. 1.3 ***Communication strategies*** are analysed, evaluated and revised where necessary to make sure they are effective.
2. Establish and maintain communication pathways	2.1 Pathways of communication are established to meet requirements of organisation and workforce. 2.2 Pathways are maintained and reviewed to ensure personnel are informed of relevant information.
3. Promote the use of communication strategies	3.1 Information is provided to all areas of the organisation to facilitate implementation of the strategy. 3.2 Effective communication techniques are articulated and modelled to the workforce. 3.3 Personnel are given guidance about adapting communication strategies to suit a range of contexts.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- building relationships
- coaching
- conflict resolution
- listening
- negotiation
- networking
- verbal communication

Required Knowledge

- conflict resolution strategies and techniques

© Commonwealth of Australia, 2024 Public Skills Australia

- language and literacy levels of personnel
- negotiation strategies and techniques
- possible communication difficulties
- range of communication strategies
- special communication needs of personnel
- techniques for improving communication and listening skills

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in:

- Strategies developed suit organisation's core business and different audiences

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Special communication needs may include:	• persons from culturally and linguistically diverse backgrounds • people with a disability
Strategies to avoid discrimination may include:	• emphasis on verbal rather than written communication • simple proformas • plain English documents • provision of individual assistance with reading/writing
Communication strategies	• internal and external information requirements

© Commonwealth of Australia, 2024 Public Skills Australia

may include:
- range of content areas
- dissemination of organisational information
- evaluation and effectiveness

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Promote the organisation in the community	1.1 ***Community*** requests for ***information*** or participation are responded to in accordance with the organisation's policies and procedures. 1.2 ***Opportunities to*** explain and ***promote*** the organisation's activities are acted on to promote community recognition and support. 1.3 Non-routine requests for information are referred to an ***appropriate person.***
2. Represent the organisation in the community	2.1 The organisation's position on particular issues is represented in a way which acknowledges community concerns and promotes community awareness. 2.2 Communication and presentation to the public enhances the organisation's public image.
3. Advise and involve the community in public safety activities	3.1 The community is advised of a range of ***prevention and mitigation techniques.*** 3.2 Community members are informed and skilled to implement prevention and mitigation activities. 3.3 Community is assisted to initiate, develop and conduct prevention and mitigation techniques addressing their own particular needs.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicating with wide variety of people

© Commonwealth of Australia, 2024 Public Skills Australia

- evaluating activities
- interpreting comments
- listening to questions

Required Knowledge

- a range of presentation strategies and techniques
- legislative responsibilities relevant to provision of information
- organisation policy relevant to provision of advice
- organisation's position on current issues
- relevant recording procedures

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrate in ability to provide advice on prevention and mitigation techniques in a way that acknowledges community concerns. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated work environment. In a Fire Sector specific context, this unit should be assessed with PUAFIR301B Undertake community safety activities. **Specific resources for assessment** Access to promotional/informational material.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Information may include:

- how to participate
- publicity material
- contact information

© Commonwealth of Australia, 2024 Public Skills Australia

- prevention and mitigation strategies

Community may include:

- local community
- business community including a range of ages and persons from culturally and linguistically diverse backgrounds
- people with a disability

Opportunities to promote may include:

- answering general enquiries
- presentations at community group gatherings
- special interest forums
- other organisation forums
- community events and festivals
- participating in conferences
- representing organisation on associations and committees
- school visits

Special promotions may include:

- career promotions
- local shows
- marches and ceremonies
- organisation specific weeks and regular state/national events e.g. fire awareness week
- bluey day
- shopping mall promotions

Appropriate person may include:

- more senior personnel
- personnel with specific expertise
- community liaison officer
- other organisation
- bilingual

Response may include:

- referral
- provide action
- details of where to access further information

Prevention and mitigation techniques may include:

- dances
- school/community group visitations/presentations
- station open days
- Police Citizens Clubs
- specific co-operative arrangements with community groups
- business owners
- shopping centres/malls
- etc, and should focus on local community safety issues and the fostering of closer linkages/partnership with policy

detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan public awareness/ information presentation	1.1 Details of the ***audience***'s, requirements and expectations are confirmed and clarified to ensure presentation meets client requirements
	1.2 Objectives of presentation and respective roles of those involved are determined in consultation with ***relevant personnel.***
	1.3 Presentation is structured taking into account ***characteristics of the audience***, including ethic composition, anticipated questions and the subject matter to be presented.
	1.4 Relevant ***information*** is accessed and familiarity with subject matter is confirmed to ensure all information ***imparted*** is current and accurate.
	1.5 Required ***equipment*** aids and resources appropriate to the audience are identified and organised.
2. Conduct public awareness/ information presentation	2.1 Information is accurate, culturally appropriate and is presented in a clear manner, in logical sequence.
	2.2 Aids and equipment are used effectively and correctly to help the audience gain knowledge and retain the information.
	2.3 Presentations are conducted using recognised principles of group learning appropriate to the audience characteristics.
	2.4 Feedback from audience and observers is used to assist in assessing own performance and program content.
	2.5 Current publications suitable to audience, and sources of additional information are provided to enable follow-up.
	2.6 Questions asked are answered and ***supplemented with relevant information***.
	2.7 Queries outside the area of responsibility or expertise are referred to the relevant area.
3. Conduct visits to facilities/specific	3.1 ***Facilities***, ***locations*** and/or equipment are prepared prior to demonstration/tour to meet organisation

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
locations of interest	standards and occupational health and safety guidelines, and to promote a positive public image. 3.2 Information given is accurate and provides comprehensive coverage of the facility/location/equipment being discussed or demonstrated.
4. Store resources and complete records	4.1 Equipment and resources are stored according to organisation procedures. 4.2 ***Records*** of presentations/demonstrations are completed in line with organisation requirements.
5. Evaluate/review presentations and demonstrations	5.1 Improvements to own delivery of presentations are implemented within ***operational constraints.*** 5.2 Recommendations for improvement to presentations/demonstrations and associated resources are made to relevant personnel.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analysing feedback
- analysing information requirements
- communicating information verbally and non-verbally
- completing forms
- planning presentations
- presentation techniques
- reviewing own performance

Required Knowledge

- available presentation aids and resources
- knowledge of hazards related to the organisation's responsibility
- occupational health and safety guidelines relevant to safety of public around equipment and in facilities
- organisation procedures for packing up and storing equipment
- organisation requirements for completing records of presentations/demonstrations
- organisation standards relevant to presentation of equipment and facilities
- organisation standards relevant to safety of public in station/base premises
- overhead projector
- policy and procedures relating to provision of information about the organisation's

© Commonwealth of Australia, 2024 Public Skills Australia

activities
- range of communication strategies
- slide presentation equipment
- technical information relevant to presentation/tour
- use of a variety of learning/training/presentation equipment including whiteboard

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrate in:

- The preparation and presentation of information which is accurate and in accordance with the organisation's policies and procedures, guidelines and legal requirements

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Review plan against organisational guidelines and assess performance on the job.

Specific resources for assessment

Access to presentation venue.

presentation equipment and aids will be required.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Audience may include:
- adults
- children
- senior citizens
- other agencies
- pre-school children
- community groups
- persons from culturally and linguistically diverse

© Commonwealth of Australia, 2024 Public Skills Australia

	backgrounds • people with disabilities
Relevant personnel may include:	• co-presenter • team leader/supervisor • training officer • human resources manager • technical expert/experienced person
Characteristics of audience may include:	• age • size of group • anticipated level of existing knowledge on the subject • the reason for attendance and level of English proficiency
Information may include:	• how to reduce public safety risk • organisation's services • facilities and activities • legal obligations of public and organisations involved
Information ***imparted*** may include:	• in a range of formal and informal situations including organisation displays and information stands • demonstrations • exercises • group displays • ceremonial displays • at local events and festivals •
Venues may include:	• shopping malls • station/base • any public place where organisation is being represented • front counter of station/base • community venues • schools • other organisation's facilities • specific locations of interest, • places of worship
Equipment may include:	• overhead projectors • electronic whiteboard • electronic presentation equipment • organisation technical equipment • practical demonstration equipment

essential outcomes of a Unit of Competency.	needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish networks and relationships	1.1 Formal and informal networks are established to support ongoing and future liaisons and collaboration. 1.2 Relationships are developed and used in a way which provides identifiable benefits to the organisation from shared expertise, information and/or resources. 1.3 Participation in regular meetings and forums supports mutual cooperation. 1.4 Consultation with ***affected and interested parties*** is undertaken to support the ***organisational goals and objectives***.
2. Communicate and interact with other organisations	2.1 Information is provided to other ***organisations*** in a clear, concise and comprehensive manner. 2.2 Communication with other organisations is conducted in accordance with organisational policy and procedures. 2.3 Information from other organisations is gathered to inform the improvement of services and to avoid duplication of effort.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- chairing meetings
- networking and developing relationships
- public speaking
- using networks effectively

© Commonwealth of Australia, 2024 Public Skills Australia

Required Knowledge

- awareness of role and responsibilities of other organisations
- chairing meetings
- knowledge of current practices and procedures for communicating in the workplace
- meeting protocols and procedures
- organisation's confidentiality requirements
- organisational policy and procedures relating to liaison with other organisations
- role

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated as follows:

- Networks and relationships developed and used effectively
- All information provided is accurate and clear

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment.

Specific resources for assessment

No special requirements.

Range Statement

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop networks within the community	1.1 Individual and group ***stakeholders*** within the community, and their issues and concerns, are identified. 1.2 Rapport is established and maintained with appropriate community representatives and groups.
2. Manage public safety awareness activities	2.1 Need for activities is determined. 2.2 Cooperation and support is enlisted from industry, government and the ***community*** in planning and initiating special promotions which target the identified needs. 2.3 Representation for the organisation in public forums and community events is arranged to promote awareness and a positive public image of the organisation.
3. Facilitate community group discussions and formal meetings	3.1 Relevant ***information*** is provided to the group to facilitate its outcomes. 3.2 Contributions are sought, acknowledged and encouraged to foster group participation. 3.3 ***Strategies*** appropriate to the group are implemented to promote ongoing participation of all group members. 3.4 Objectives and agendas for meetings are negotiated to assist the community. 3.5 Meeting procedures are appropriate to the level of formality and the community context.
4. Report on public safety awareness activities	4.1 Community perceptions of organisational personnel and quality of service delivery are consistently monitored by listening to feedback, both direct and via the media. 4.2 ***Public safety awareness*** activities are evaluated.

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.3 Reports detailing activities, results and recommendations are completed and processed in line with organisation guidelines.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse and evaluate the effectiveness of public safety awareness activities
- analysing community safety needs
- communicating in a group setting
- communicating with wide variety of people
- establishing networks
- evaluating activities
- facilitating group discussion and participation
- interpreting comments
- listening to questions
- media liaison
- relevant recording procedures
- reporting procedures and standards
- writing reports

Required Knowledge

- a range of presentation strategies and techniques
- activities and level of community activity of various organisations in the community
- fairs and events
- how to identify leaders/stakeholders representatives'
- legislative considerations and organisation standards relevant to communication and provision of information
- organisation policy relevant to provision of advice
- possible implications of community festivals
- possible protocols and procedures
- promotional techniques and methods
- role
- small group dynamics

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in the identification and establishment of networks relevant to the development and implementation of public safety awareness activities.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Stakeholders may include:
- local community
- service clubs
- neighbourhood watch
- ethnic groups
- festival and show committees
- sporting groups
- tourist industry
- local businesses
- chambers of commerce
- local facility management

Community includes:
- local community
- business community and will include a range of ages and a diversity of cultural, linguistic and ethnic backgrounds

Information may include:
- how to manage public safety risks

Opportunities to promote may include:
- presentations at community group gatherings
- special interest forums
- other organisation forums
- community events and festivals

© Commonwealth of Australia, 2024 Public Skills Australia

- speaking at seminars
- participating in conferences
- representing organisation on associations and committees

Public safety awareness may include:

- career promotions
- local shows
- marches and ceremonies
- organisation - specific weeks and regular state/national events e.g. fire safety week
- bluey day
- shopping mall promotions
- processes derived from models such as community fire guard
- Neighbourhood Watch and Landcare

Appropriate person may include:

- more senior personnel
- personnel with specific expertise
- community liaison officer
- other organisation and bilingual personnel

Public safety awareness activities should be evaluated in terms of:

- their costs and benefits

Identification of needs may include:

- surveys
- questionnaires
- research
- policy directive from management

Appropriate media and equipment may include:

- whiteboard
- overhead projectors
- slides
- multi-media
- electronic whiteboard
- computerised slide presentation
- organisation technical equipment
- models
- dummies
- microphones

Appropriate presentation techniques style and language may include:

- recognised group presentation techniques including audience participation
- questioning
- activities
- change of pace
- use of range of equipment
- level of formality appropriate to group/own position

© Commonwealth of Australia, 2024 Public Skills Australia

	• language appropriate to age • language level of group
Strategies may include:	• encouragement • reinforcement • icebreakers • active physical involvement
Records may include:	• minutes of meetings • diarised entries • formal reports • proformas
Response may include:	• refer • provide advice • details of where to access further information

PUACOM012B Liaise with media at a local level

Modification History

Release	TP Version	Comments
3	PUA12 V2.1	Editorial changes.
2	PUA12 V2	Layout adjusted. Application added.
1	PUA00 V8.1	Primary release.

Unit Descriptor

This unit covers the liaison with media at a low level incident and providing information about local events.

Application of the Unit

This unit applies to workers of local public safety groups who are delegated the responsibility to liaise with media in both emergency and non-emergency situations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

© Commonwealth of Australia, 2024 Public Skills Australia

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine media requirements	1.1 ***Organisational protocols*** are followed when ***liaising with the media.***
	1.2 The media's potential interest is assessed and arrangements are made to meet needs where appropriate.
	1.3 ***Operational responsibilities*** are balanced against the provision of information to the ***media.***
2. Provide information to the media	2.1 A positive image of the ***organisation*** is maintained when liaising with the media.
	2.2 Every opportunity is used to promote the organisation, its services and personnel.
	2.3 ***Relevant and succinct information*** is supplied to media when operational responsibilities are under control and when organisational representative is available to talk to the media.
3. Publicise an event	3.1 Relationship is established with media contacts.
	3.2 ***Event*** details and support materials are gathered and presented in a logical, relevant and concise manner to the media.
	3.3 Information provided to media is recorded and maintained.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- attention to detail
- communicating facts in a fluent, clear and interesting manner
- empathy with victims and operational personnel
- liaison with media and other organisation personnel
- media presentation
- prioritisation between operational responsibilities and provision of information to

© Commonwealth of Australia, 2024 Public Skills Australia

media
- public speaking
- retaining professionalism under duress

Required Knowledge

- organisational protocols relating to media liaison, for example legal and organisation requirements relating to:
  - confidentiality
  - libel
  - accuracy
  - discrimination
- role of media in disseminating information
- requirements of media to present information in a newsworthy/informative manner
- requirements of different media:
  - newspapers
  - magazines
  - radio
  - television (local, regional, national media)
- communication skills
- establishing media relationship

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in providing information to media whilst managing operational responsibilities. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated work environment. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisation may include	• Fire • Police • State Emergency Service • Emergency Management
Organisational protocols may include	• organisational policies and procedures • personal presentation being as neat as possible considering the operational circumstances • ensuring media liaison person is fully briefed and prepared • acknowledge support of other organisations • seeking advice from headquarters where appropriate • limiting comments on role of own service • relevant Federal and State legislation and regulations
Liaising with the media may include	• print (local, community, daily newspapers, magazines) • television (live or pre-recorded) • radio (live or pre-recorded)
Operational responsibilities may include	• preservation of life and property, which is the principal concern to all public safety personnel • presenting information relevant to the public
Event may include	• long service to organisation • medal presentation • awarding of certificates • donations/sponsorships/fundraising • recruiting • new equipment • VIP visit • open day • training • unusual rescues • self help information
Media's potential interest may include:	• enormous media event • standard report • human interest • in the public's interest
Media's requirements may include:	• deadlines • capabilities

© Commonwealth of Australia, 2024 Public Skills Australia

- visual and verbal requirements
- types of medium
- variation
- journalists
- amenities
- briefing area
- access to media liaison person
- bilingual personnel and bilingual information

Media may include:

- representatives from mainstream, community and ethnic television
- print and broadcast media

Organisational positive image may include:

- promote the relevance and efficiency of the service
- report the facts
- heroism of personnel
- organisational personnel are co-operative and responsive
- organisational personnel well presented
- handling media in most positive manner in even the most adverse conditions/circumstances

Media opportunity may include:

- opportunity to promote the services
- provide educational information to the public
- airplay

Relevant and succinct information may include:

- information that according to protocol is available for public release
- report facts and avoid speculation
- do not supply classified information
- use language that can be readily understood by all to avoid misinterpretation

PUAEMR009B Facilitate emergency risk assessment

Modification History

PUAEMR009B Release 2: Layout adjusted. Minor edits to unit wording.

PUAEMR009B Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to facilitate development of an agreed list of prioritised risks using an emergency risk management process developed in close cooperation with the community and consistent with the Australian Standard AS/NZS ISO 31000:2009.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to workers who undertake emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

This unit is relevant to individuals whose role is to act as the project manager or facilitator for working groups used to conduct an emergency risk assessment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element.

of Competency.

Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

1 Identify, define and engage the community	1.1 A community profile is developed to identify broad characteristics and special needs. 1.2 Known risks, ***stakeholder*** analysis, community and agency ***sources of information*** are used to identify communication and consultation networks that may be useful. 1.3 A working group is established with an appropriate balance of expertise, representation and authority. 1.4 Group's knowledge of emergency risk management principles, terminology and processes is developed. 1.5 Means of implementing the emergency risk management process are negotiated with stakeholders. 1.6 ***Communication options*** are selected to develop a communication plan. 1.7 Need for specialised information, additional skills and expertise is identified.
2 Establish context and risk criteria	2.1 Community concerns, ***drivers/triggers***; applicable ***legislative, regulatory and organisational requirements; policies, procedures*** and desired outcomes are identified. 2.2 Objectives and scope are identified using emergency risk management ***standards and guidelines.*** 2.3 ***Information on community characteristics***, safety expectations, risk perceptions and the roles and requirements of stakeholders is collected. 2.4 ***Practical constraints***, existing treatment strategies and community expectations are considered when developing relevant ***risk criteria.*** 2.5 Draft criteria and supporting explanations are circulated widely for comment.
3 Identify and analyse risks	3.1 ***Sources of risk*** are identified by considering the interaction of hazards, communities and ***the environment***.

© Commonwealth of Australia, 2024 Public Skills Australia

	3.2 Elements at risk are identified. 3.3 Vulnerability of communities and/or the environment is determined by considering their susceptibility and resilience to sources of risk. 3.4 Risk statements describing consequences are generated. 3.5 Risks are analysed by considering the likelihood of particular consequences occurring. 3.6 Risks are rated in accordance with agreed risk criteria. 3.7 Stakeholders are consulted throughout the process.
4 Evaluate risks	4.1 Risks requiring additional analysis or treatment are determined. 4.2 Tolerability and acceptability of risks are agreed with stakeholders. 4.3 Risk treatments are prioritised using agreed risk criteria.
5 Promote ongoing commitment and ownership for the process and outcomes	5.1 Consultation is undertaken at all stages of the process using a wide range of networks and individuals. 5.2 A variety of communication strategies is used. 5.3 All stages of the process, decisions taken and outcomes are documented accurately in accordance with accountability and audit requirements. 5.4 Information is provided to the community in ways that suit their language, literacy and cultural needs.
6 Monitor and review the process and outcomes	6.1 Emergency risk assessment is completed efficiently. 6.2 All relevant data and contact information for key individuals and organisations is regularly reviewed for currency and updated. 6.3 Risk register is reviewed in accordance with the review schedule or in response to drivers/triggers. 6.4 Opportunities for improving emergency management processes are reported.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- define and solve problems

© Commonwealth of Australia, 2024 Public Skills Australia

- demonstrate effective interpersonal interactions
- gain cooperation of stakeholders
- listen actively
- locate and interpret community information
- manage projects
- maximise the participation of committee members
- monitor and enhance team work
- negotiate agreed outcomes despite incomplete and/or uncertain information
- recognise the relevance and significance of information for the emergency risk management process
- resolve conflicts between participants constructively
- summarise and explain key information clearly
- value diversity of views and perceptions of risks

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines
- risk management process included in the current Australian Standard (AS/NZS ISO 31000:2009*Risk management—Principles and guidelines,* and companion handbook HB 327:2010 *Communicating and consulting about risk*
- risk identification tools, such as bow-tie diagram
- format of risk statements and risk register
- structure of risk criteria and the application of scenario dynamics (how a hazard creates consequences)
- concepts of ‘credible consequence level’, likelihood rating, confidence rating, ‘as low as reasonably practicable’ principle
- application of spatial analysis techniques
- jurisdiction or organisational emergency risk management principles and guidelines
- problem solving and decision making techniques
- research, demographic and economic analysis techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- explain emergency risk management concepts, the process and how to promote its benefits to a wide range of audiences
- apply the emergency risk assessment process (National Emergency Risk Assessment Guidelines)
- facilitate the development of an appropriate and sustainable emergency risk assessment in cooperation with the community and stakeholders

© Commonwealth of Australia, 2024 Public Skills Australia

- work with committee members to translate a wide range of risk perceptions, issues of concern and risk evaluation criteria into an agreed set of prioritised risks
- promote community cooperation, input and ownership for the emergency risk management process used and the outcomes
- produce an agreed risk register for a community
- obtain feedback, monitor and review the process and outcomes
- maintain momentum and achieve the project outcomes within available resources
- establish a project and see it through to produce a risk register that has broad community and stakeholder support

Consistency in performance

Competency should be demonstrated in at least two different contexts throughout the life of a community emergency risk management project, or during components of a number of projects.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed facilitating a group emergency risk management process in the workplace or in a simulated workplace environment

Specific resources for assessment

For the demonstration of competence in this unit it will be necessary to participate in a real-world project

Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments

Guidance information for assessment

This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context.

Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning project.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Stakeholders may include:
- staff
- client groups
- decision makers
- members of the public
- community groups
- industry groups
- public and private sector organisations
- non-government organisations
- elected officials

Sources of information may include:
- community information booklets
- credible individuals, group and community leaders
- documented risk assessments by companies, organisations
- family and historical records
- libraries, research reports, Australian Bureau of Statistics data
- special needs groups, significant cultural organisations
- media, council and emergency service personnel and records

Communication options may include:
- community meetings
- pamphlets/flyers/brochures
- print newsletters
- noticeboards
- word of mouth
- posters/billboards
- face-to-face
- email newsletters
- websites
- local newspapers
- text messaging
- social media
- radio and television
- video communication

© Commonwealth of Australia, 2024 Public Skills Australia

	• blogs
Drivers/triggers may include:	• changes in community characteristics • changes in legislation, policies and disaster/emergency management plans • changes in insurance policies and premiums • new sources of risk or changed perception of risk • planning deficiencies • recent emergency incident reports/debriefs, safety issues • recent judicial decisions • strategic and corporate plans
Legislative, regulatory and organisational requirements may include:	• arrangements specified in emergency management, land-use, environmental or other legislation • organisational or jurisdictional emergency risk management policies or procedures • existing disaster plans, agreements or memoranda of understanding • local planning regulations, development controls and environmental plans
Standards and guidelines include:	• AS/NZS ISO 31000:2009, *Risk management—Principles and Guidelines* • HB 327:2010, *Communicating and consulting about risk* • ISO Guide 73:2009, *Risk management—Vocabulary* • National Emergency, Management Committee (2010), *National Emergency Risk Assessment Guidelines* or updates thereof. • jurisdictional or organisational emergency risk management policies and procedures
Information on community characteristics may include:	• characteristics of natural, local and built environments • demographics (population distribution, social, cultural, health status and education data) • details of key infrastructure and emergency/support services • economic activity reports (employment, products, services, revenue) • government reports e.g. environmental impacts
Practical constraints may include:	• arrangements, roles and responsibilities set down in existing emergency management plans • availability of technical expertise, technology, equipment • budgets, time, availability and capability of people • land use planning

© Commonwealth of Australia, 2024 Public Skills Australia

	• legislation covering emergency management, environmental management, safety standards, local government regulations • limited community knowledge of emergency risk management processes and benefits • political, social and cultural considerations
Risk criteria may include:	• the nature and types of causes and consequences that can occur and how they will be measured • how likelihood will be defined • the timeframe(s) of the likelihood and/or consequence(s) • how the level of risk is to be determined • the views of stakeholders • the level at which risk becomes acceptable or tolerable • whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered
Sources of risk may include:	• commercial and legal relationships • economic systems and relationships • human behaviour • natural events • built environment failures • disease (plant, animal or human) • political circumstances • technology/technical issues • management activities and controls
The environment may include:	• social environment (individuals, families and common interest groups that form whole communities), • build environment (human-made assets that underpin the functioning of a community), • economic environment, and/or • natural environment

PUAEMR012B Determine treatment options

Modification History

PUAEMR012B Release 2: Layout adjusted. Content reviewed.

PUAEMR012B Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to determine a range of treatment options to treat emergency risks.

Application of the Unit

This unit to people people who are part of a working group that develops treatment options during an emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

The emergency risk management process used will be developed in close cooperation with the community and consistent with the National Emergency Risk Assessment Guidelines and AS/NZS ISO 31000:2009 *Risk management—Principles and guidelines*.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAEMR008B Contribute to an emergency risk management process

OR

PUAEMR009B Facilitate emergency risk assessment

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

1 Establish the project and working group	1.1 Applicable ***policies and procedures***, reports, records and emergency risk assessments are located and analysed.
	1.2 A working group is established with an appropriate balance of expertise, representation and authority.
	1.3 Group's knowledge of emergency risk management principles, terminology and processes is confirmed.
	1.4 A sustainable emergency risk management process is negotiated that suits the ***community context*** and capability, ***stakeholder*** needs and ***practical constraints***.
	1.5 Project management and consultation plans are developed with stakeholders.
	1.6 Need for ***specialised information***, additional skills and expertise is identified.
2 Confirm risks to be considered	2.1 Existing risk assessment is reviewed for continuing relevance.
	2.2 ***Sources of risk*** are identified.
	2.3 Responsibility for single agency or multi-agency management of risks is identified.
	2.4 Risk treatment objectives are identified in consultation with stakeholders.
3 Identify treatment options	3.1 Effectiveness of existing risk treatments is established through research and stakeholder consultation.
	3.2 Community vulnerability is reconsidered as a basis for identifying treatment options.
	3.3 A range of potential risk treatment options is identified through research and stakeholder consultation.
4 Evaluate treatment	4.1 ***Evaluation methods*** are agreed with stakeholders.

© Commonwealth of Australia, 2024 Public Skills Australia

	options	4.2 Treatment options are assessed and the risks and implications for stakeholders are identified for each option. 4.3 Treatment options are documented so that they are understandable by a wide range of audiences. 4.4 Feedback on likely implications and impacts of treatment options is obtained from stakeholders. 4.5 Residual risks are assessed for tolerability or acceptance. 4.6 Cost-benefit analysis is completed for each risk treatment option.
5	**Recommend treatment options for each risk**	5.1 Recommended options, including implementation responsibilities, are agreed in consultation with stakeholders. 5.2 Recommended options and residual risk are documented according to organisational policies and procedures. 5.3 Recommendations are submitted for approval in accordance with applicable policies and procedures.
6	**Promote ongoing commitment and ownership for the process and outcomes**	6.1 Communication and consultation is undertaken, using a range of options throughout the process. 6.2 A range of communication strategies is used. 6.3 All stages of the process, decisions taken and outcomes are documented accurately in accordance with relevant policy and procedures. 6.4 Information is provided to the community in ways that suit their language, literacy and cultural needs.
7	**Monitor and review the process**	7.1 All relevant data and contact information for key individuals and organisations is regularly reviewed for currency and updated. 7.2 Treatment options are reviewed for continuing relevance. 7.3 Opportunities for improving emergency risk management processes are reported.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- research and analysis skills to determine potential treatment options

© Commonwealth of Australia, 2024 Public Skills Australia

- ability to negotiate and work effectively with stakeholder groups
- ability to lead workgroups
- ability to work effectively in small groups
- analytical techniques to determine residual risk
- analytical techniques to conduct benefit: cost analysis at an appropriate level
- facilitation and team leadership
- managing meetings
- negotiation and communication
- progress management and monitoring skills

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines and AS/NZS ISO 31000:2009 *Risk management—Principles and guidelines*
- legislative and regulatory requirements relevant to emergency risk management
- jurisdiction and organisational documentation and submission procedures
- analytical, problem solving and decision making techniques to facilitate evaluating residual risk and cost-benefit analysis
- concepts of ‘credible consequence level’, likelihood rating, confidence rating, ‘as low as reasonably practicable’ principle
- sources of demographic, geographic and economic information
- geospatial databases and presentation options
- range of options for treating emergency risk

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- establish a project and see it through to produce a set of recommended treatment options that has broad community and stakeholder support
- work with committee members to develop feasible and effective treatment options for a given set of risks
- promote community cooperation, input and ownership for the emergency risk management process used and the recommended treatment options
- obtain feedback, monitor and review the process and outcomes
- maintain momentum and achieve the project outcomes within available resources

Consistency in performance

© Commonwealth of Australia, 2024 Public Skills Australia

	Competency should be demonstrated in a range of contexts throughout the life of a community emergency risk management project, or during components of a number of projects.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed facilitating a group emergency risk management process where an agreed set of treatment options is produced for a given set of risks in the workplace or in a simulated workplace environment. **Specific resources for assessment** For the demonstration of competence in this unit it will be necessary to participate in a real-world project. Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.
Guidance information for assessment	This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning project. This unit may be assessed with other units that address other parts of the emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Policies and procedures may include:	• arrangements specified in legislation • organisational or jurisdictional emergency risk management policies or procedures • existing disaster plans, agreements or memoranda of understanding
Community context may include:	• characteristics of social, built, natural and economic

© Commonwealth of Australia, 2024 Public Skills Australia

	environments • demographics (population distribution, social, cultural, health status and education data) • details of key infrastructure and emergency/support services • economic activity reports (employment, products, services, revenue) • government reports e.g. environmental impacts
Stakeholders may include:	• staff • client groups • decision makers • members of the public • community groups • industry groups • public and private sector organisations • non-government organisations • elected officials
Practical constraints may include:	• arrangements, roles and responsibilities set down in existing emergency management plans • availability of technical expertise, technology, equipment • budgets, time, availability and capability of people • land use planning policy, authority and regulation • legislation covering emergency management, environmental management, safety standards, local government regulations • limited community knowledge of emergency risk management processes and benefits • political, social and cultural considerations
Risk treatment options may include:	• avoidance of the risk • removing a risk source • changing the likelihood of • an initiating event or source of risk occurring • a hazard impacting on elements at risk • changing the consequences of an identified hazard impact • sharing the risk • retaining the risk based on an informed decision
Specialised information may include:	• community information booklets • documented risk assessments by companies, organisations • family and historical records • research reports, Australian Bureau of Statistics data

© Commonwealth of Australia, 2024 Public Skills Australia

Sources of risk may include:	• media, council, and emergency service records • spatial information data • commercial and legal relationships • economic systems and relationships • human behaviour • natural events • built environment failures • disease (plant, animal or human); • political circumstances; and • technology/technical issues, management activities and controls.
Evaluation methods may include:	• first-pass cost-benefit analysis • analysis of treatment effectiveness • potential to create new or secondary risks • stakeholder acceptability • legal, regulatory and compliance impact

PUAEMR013B Facilitate treatment strategy development and implementation

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor	This unit covers the competency required to facilitate the identification, evaluation and implementation of complex treatment strategies in cooperation with major stakeholders such as governments, agencies, organisations and service providers.

Application of the Unit

Application of the Unit	The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package. This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Confirm project context**	1.1 Project ***drivers***/***triggers***, risks, risk management context, treatment options and priorities and ***practical constraints*** are clarified 1.2 Applicable ***legislative***/***regulatory and organisational requirements***, ***policies***, ***procedures*** and relevant emergency management arrangements are identified 1.3 Key ***stakeholders*** are identified along with their potential interests, sensitivities, roles and responsibilities 1.4 Project brief is developed and refined with key stakeholders
2. **Establish project process**	2.1 Working group is established with an appropriate balance of expertise, representation and authority for the project brief 2.2 Purpose, scope and desired outcomes outlined in the project brief are confirmed with group members 2.3 Project management plan is developed in consultation with the group 2.4 Processes for negotiating outcomes and making decisions are developed within existing

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	accountabilities
	2.5 ***Consultation strategies*** are developed for effective stakeholder input, commitment and ongoing ownership of outcomes
	2.6 Information management, reporting and accountability strategies are developed and agreed
3. **Assess and select treatment strategies**	3.1 Existing risk assessments, current treatment programs and other ***plans*** that may impact on the project are identified by group members and analysed for relevance
	3.2 Items from the risk register are selected for consideration
	3.3 A wide range of alternatives are considered when canvassing possible treatment strategies
	3.4 Input from relevant specialists and stakeholders is sought and analysed
	3.5 Each ***treatment strategy*** is assessed for the ability to reduce risk
	3.6 Preferred treatment strategy is selected and the reasons documented
	3.7 Broad tactics, roles, tasks, responsibilities, resource implications and timeframe for implementing the selected strategy are documented
	3.8 Support is developed by validating the strategy with agency/service providers and other stakeholders
4. **Plan implementation of agreed strategy**	4.1 Treatment strategy is broken down into a logical sequence of manageable and time-related activities
	4.2 Ability and responsibility of agencies and service providers to undertake specific activities is jointly assessed
	4.3 Accountability for components of the strategy is negotiated and confirmed with the appropriate agency/service provider
	4.4 Project risks are assessed and contingencies developed for all key components of the strategy
	4.5 Performance criteria are established for monitoring and reviewing the effectiveness of the treatment strategy

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.6 An overall implementation plan that identifies key activities, roles and responsibilities, resource requirements, management arrangements and timetable is developed and validated
	4.7 Agency implementation strategies are reviewed and refined as necessary
5. **Facilitate treatment strategy implementation**	5.1 Treatment tasks/activities are allocated in accordance with the implementation plan
	5.2 Effectiveness of treatment activities, adequacy of resources, project progress and expenditure is monitored against plans and recorded
	5.3 Effective communication between working group members is maintained
	5.4 Stakeholders are kept fully informed of progress, performance and any proposed variations in strategy or implementation
	5.5 Agreed variations to the treatment plan are introduced to accommodate changed circumstances or to achieve more effective outcomes
	5.6 Treatment tasks/activities are completed on time and within budget
6. **Establish and maintain productive working relationships**	6.1 Influence and support for the treatment strategy is built by cultivating relationships with key stakeholders
	6.2 Clear and accurate information is provided
	6.3 Differences of opinion and the views of others are respected
	6.4 Negotiations are kept focussed on key issues and moving forward towards resolution
	6.5 Conflict is resolved in a timely, constructive manner
	6.6 Agreements are adhered to and commitments met
7. **Review treatment strategy implementation**	7.1 Effectiveness of the treatment strategy is evaluated using agreed performance criteria
	7.2 Residual risk is identified and decisions made to accept this risk or re-examine treatment strategies
	7.3 Planning processes are reviewed to identify opportunities for improvement
	7.4 Project reporting requirements are completed
	7.5 Outcomes are disseminated to relevant stakeholders

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- assess a range of alternatives, develop solutions and practical strategies that are 'outside the box'
- communicate clearly with a range of audiences
- compromise to achieve realistic/achievable outcomes
- enhance input/feedback through active listening and effective questioning
- harness cooperation, motivation and diversity of others
- interpret and critically analyse complex information
- liaise with key individuals, organisations, agencies
- manage projects
- negotiate and lobby persuasively
- prepare for, participate in and lead meetings to achieve effective outcomes
- resolve conflicts constructively
- think strategically

Required Knowledge

- Australian Standard AS/NZS 4360
- cost benefit analysis
- emergency management agencies, organisations, service providers and other key stakeholders
- emergency management best practice models for benchmarking during implementation and review
- emergency risk management guidelines (1999)
- evaluation methods
- government and budget processes, relevant public policy/programs
- ISO 9000 and 14000 series quality standards
- legislation, policy, budget development processes
- political context (parties, platforms, processes)
- problem solving and decision making techniques
- project budgeting
- project management techniques

© Commonwealth of Australia, 2024 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- protocols for the release of information and communicating with the media and public principles of negotiation, mediation, conflict resolution, incident de-escalation
- relevant legislative and regulatory framework and emergency management arrangements
- risk analysis and management
- state/territory emergency risk management guidelines
- strategic planning approaches
- structured and inclusive meeting procedures

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • establish/maintain a network of key contacts • work collaboratively to secure stakeholder input, support and commitment • develop effective processes for cooperative planning and implementation of complex treatment strategies • develop and evaluate strategic options • develop feasible and effective plans, tactics and activities to achieve treatment objectives • coordinate and monitor multi-agency/service provider inputs to implementation of strategies • address the need to vary plans • address residual risk • maintain records of progress, decisions, stakeholder input and audit trail • manage project within resource allocation • establish a project and see it through to produce treatment outcomes that have broad community and stakeholder support **Consistency in performance** Competency should be demonstrated in a range of

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

	contexts throughout the life of a significant project, or during components of a number of projects
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed facilitating the development and implementation of a treatment strategy plan that involves the cooperation of multi-agencies, organisations and/or service providers in the workplace or in a simulated workplace environment **Specific resources for assessment** Access to complex emergency risk management treatment strategy or strategies
Guidance information for assessment	Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Drivers/triggers may include	Changes in community characteristics Changes in legislation, policies and disaster/emergency management plans Changes in insurance policies and premiums New sources of risk or changed perception of risk Planning deficiencies Recent emergency incident reports/debriefs, safety issues Recent judicial decisions Strategic and corporate plans
Practical constraints may include	Arrangements, roles and responsibilities set down in existing emergency management plans Availability of technical expertise, technology,

RANGE STATEMENT

	equipment
	Budgets, time, availability and capability of people
	Land use planning
	Legislation covering emergency management, environmental management, safety standards, local government regulations
	Limited community knowledge of emergency risk management processes and benefits
	Political, social and cultural considerations
Legislative, **regulatory and organisational requirements may include**	Acts dealing with disasters, emergencies, occupational health and safety and the environment
	Land use planning
	Local government regulations
	Privacy
	Regulations for handling and transport of dangerous goods
	Safety standards
Policies and procedures may include	Agreements between agencies and/or organisations
	Emergency management arrangements specified in legislation or policies
	Existing disaster or emergency management plans
	Standard operating procedures, operational manuals
Stakeholders may include	Emergency services (eg. fire, police, SES, ambulance, recovery agencies)
	Event organisers (eg. concerts, car rallies, sport)
	Hospital/medical personnel and care givers
	Interest, community, professional and industry groups
	Local business people
	Local government (eg. elected representatives, shire engineers, community development officers)
	Managers of critical infrastructure (eg. telecommunications, mining, petrochemical and gas)
	Managers of high occupancy facilities (eg. shopping centres, high rise apartment/office blocks)

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	Members of parliament and/or their advisers Providers of utilities (power, water, radio/TV) School staff State/territory/commonwealth agencies (eg. public works, human services, health, transport, natural resources, primary industry, environmental protection, emergency management) Tourist operators Venue operators
Consultation strategies may include	Advertising in local media Broadcast facsimile and email messages, web sites Contacting individual organisations, professional bodies, unions and recreational/sport associations Distributing pamphlets Focus groups, workshops, surveys Initiating media interviews Letters and articles written for specific audiences Meetings with groups, key individuals and leaders of minority/ethnic/cultural groups Presentations to a variety of community groups; speaking at community functions Preparing media releases
Possible treatment strategies may include	All aspects of emergency management practices arising from considering prevention/mitigation, preparedness, response and recovery including: • building codes • community education • community restoration, reconstruction • critical incident stress management, personal support and counselling • emergency management planning • financial support • land use management • legislation and regulation • mutual aid agreements • safety standards

Unit Descriptor

This unit describes the outcomes required to determine an emergency risk assessment's objectives, scope, stakeholders, and risk criteria.

Application of the Unit

This unit applies to people required to initiate an emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

© Commonwealth of Australia, 2024 Public Skills Australia

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
1. Identify objectives and scope by research and consultation	1.1 Objectives and scope are identified using emergency risk management ***standards and guidelines.***
	1.2 ***Stakeholder*** roles and required inputs are determined in accordance with ***policies and procedures.***
	1.3 Budget, timeframe and schedule for research and consultation are determined.
	1.4 Information about communities is obtained.
2. Identify and consult with stakeholders	2.1 Stakeholders are identified.
	2.2 Existing and potential liaison networks are identified and evaluated for relevance.
	2.3 Stakeholder networks are developed using a range of strategies.
	2.4 Communication and consultation are established.
	2.5 Communication options are selected to develop a communication plan.
3. Clarify roles and requirements with stakeholders	3.1 Stakeholders' roles and the need for their input are clearly defined and emphasised in seeking their cooperation.
	3.2 Stakeholders are informed of the aims, objectives, risk management context and structure within which they must operate.
	3.3 Stakeholders' needs are determined and conflicting needs identified and noted.
4. Develop risk criteria with stakeholders	4.1 Social, environmental, financial and timeframe needs are identified in consultation with stakeholders.
	4.2 Legal, technical and political considerations are identified in consultation with stakeholders.
	4.3 Reasons for, and selection of, criteria are negotiated with stakeholders and agreed upon.
	4.4 ***Risk criteria*** are recommended which take into account ***practical constraints*** and the community's

© Commonwealth of Australia, 2024 Public Skills Australia

	acceptance of risk.
	4.5 Community expectations of acceptable risk are established.
5. Monitor and review	5.1 Context and evaluation criteria are monitored in accordance with policies and procedures.
	5.2 Context and evaluation criteria are reviewed in accordance with standards and guidelines.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- stakeholder analysis
- communication and consultation in a group context
- facilitation of group processes
- negotiation
- problem solving
- project management
- research skills to conduct geographic, demographic and socio-economic analysis

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines
- legislative and regulatory requirements relevant to emergency risk management
- problem solving and decision making techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Stakeholders are comprehensively identified and consulted to establish a clear context, which includes objectives, scope and risk criteria. **Consistency in performance** Candidates should be expected to present evidence from at least two different contexts, one of which may be simulated.
Context of and specific	**Context of assessment**

© Commonwealth of Australia, 2024 Public Skills Australia

resources for assessment	Evidence of competence in this unit may be collected in a simulated environment and a real environment, often as part of a larger project with concurrent assessment of other emergency risk management competencies. **Specific resources for assessment** For the demonstration of competence in this unit it will be necessary to participate in a real-world project. Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.
Guidance information for assessment	This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning context. This unit may be assessed with other units that address other parts of the emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Standards and guidelines may include:	• AS/NZS ISO 31000:2009, Risk management—Principles and Guidelines • HB 327:2010, Communicating and consulting about risk • ISO Guide 73:2009, Risk management—Vocabulary • National Emergency, Management Committee (2010), National Emergency Risk Assessment Guidelines • jurisdictional or organisational emergency risk management policies and procedures
Stakeholders may include:	• staff • client groups • decision makers • members of the public

© Commonwealth of Australia, 2024 Public Skills Australia

	• community groups • industry groups • public and private sector organisations • non-government organisations • elected officials
Policies and procedures may include:	• arrangements specified in legislation • organisational or jurisdictional emergency risk management policies or procedures • existing disaster plans, agreements or memoranda of understanding
Information about communities may include:	• demographic measures • socio-economic measures • local economy and industry makeup and interdependencies • cultural makeup and mix
Risk criteria may include:	• the nature and types of causes and consequences that can occur and how they will be measured • how likelihood will be defined • the timeframe(s) of the likelihood and/or consequence(s) • how the level of risk is to be determined • the views of stakeholders • the level at which risk becomes acceptable or tolerable • whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered
Practical constraints may include:	• arrangements, roles and responsibilities set down in existing emergency management plans • availability of technical expertise, technology, equipment • budgets, time, availability and capability of people • land use planning policy, authority and regulation • legislation covering emergency management, environmental management, safety standards, local government regulations • limited community knowledge of emergency risk management processes and benefits • political, social and cultural considerations

PUAEMR023 Assess emergency risk

Modification History

Release	TP version	Comments
1	PUA12 V1	First release.

Unit Descriptor

This unit describes the outcomes required to identify, analyse and evaluate risk to determine which risks need treatment and the treatment priorities.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to workers undertaking an emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAEMR022 Establish context for emergency risk assessment

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

© Commonwealth of Australia, 2024 Public Skills Australia

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify risk	1.1 ***Sources of risk*** are identified by considering the interaction of hazards, communities and ***the environment***. 1.2 ***Elements at risk*** are identified. 1.3 ***Stakeholders*** are consulted throughout the risk assessment process. 1.4 Risk statements describing consequences are generated.
2. Analyse risk	2.1 Risks are analysed by considering the likelihood of particular consequences occurring. 2.2 The vulnerability of communities and/or environments is determined by analysing their susceptibility and resilience to risks. 2.3 Risks are rated in accordance with agreed ***risk criteria.***
3. Evaluate risk	3.1 Risks requiring additional analysis or treatment are determined. 3.2 Tolerability and acceptability of risks are agreed with stakeholders. 3.3 Risk treatments are prioritised using agreed risk criteria.
4. Monitor and review	4.1 Evaluated risks are monitored in accordance with ***standards and guidelines.*** 4.2 Evaluated risks are reviewed in accordance with standards and guidelines.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- research skills to identify sources of risk to the social, built, economic and natural

© Commonwealth of Australia, 2024 Public Skills Australia

environments
- analysis skills for qualitative and quantitative risk analysis
- workshop facilitation skills
- identification of stakeholders
- negotiation with stakeholders
- problem definition
- risk analysis
- use emergency risk modelling processes to estimate risk

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines
- risk identification tools
- format of risk statements and risk register
- structure of risk criteria and the application of scenario dynamics (how a hazard creates consequences)
- concepts of 'credible consequence level', likelihood rating, confidence rating, 'as low as reasonably practicable' principle
- application of spatial analysis techniques
- jurisdiction or organisational emergency risk management principles and guidelines
- problem solving and decision making techniques
- research, demographic and economic analysis techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Learners must demonstrate that they can apply an appropriate method to identify risk, produce meaningful risk statements and apply risk criteria in consultation with stakeholders.

Consistency in performance

Candidates should be expected to present evidence from at least two different contexts, one of which may be simulated.

Context of and specific resources for assessment

Context of assessment

Evidence of competence in this unit may be collected in a simulated environment and real environment, often as part of a larger project with concurrent assessment of other emergency risk management competencies.

Specific resources for assessment

For the demonstration of competence in this unit it will

© Commonwealth of Australia, 2024 Public Skills Australia

	be necessary to participate a real life project. Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.
Guidance information for assessment	This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-life project, often in an action-learning context. This unit may be assessed with other units that address the whole emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Sources of risk may include	• commercial and legal relationships • economic systems and relationships • human behaviour • natural events • built environment failures • disease (plant, animal or human) • political circumstances • technology/technical issues, management activities and controls
The environment may include	• social environment (individuals, families and common interest groups that form whole communities) • build environment (human-made assets that underpin the functioning of a community) • economic environment • natural environment
Elements at risk may include	• people • buildings and civil engineering works • infrastructure • economic activities

© Commonwealth of Australia, 2024 Public Skills Australia

	• public services • natural environment
Stakeholders may include	• staff • client groups • decision makers • members of the public • community groups • industry groups • public and private sector organisations • non-government organisations • elected officials
Risk criteria may include	• the nature and types of causes and consequences that can occur and how they will be measured • how likelihood will be defined • the timeframe(s) of the likelihood and/or consequence(s) • how the level of risk is to be determined • the views of stakeholders • the level at which risk becomes acceptable or tolerable • whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered
Standards and guidelines may include	• AS/NZS ISO 31000:2009, Risk management—Principles and Guidelines • HB 327:2010, Communicating and consulting about risk • ISO Guide 73:2009, Risk management—Vocabulary • National Emergency, Management Committee (2010), *National Emergency Risk Assessment Guidelines* • jurisdictional or organisational emergency risk management policies and procedures

PUAEMR024 Develop treatment options for emergency risk

Modification History

Release	TP version	Comments
1	PUA12 V1	First release.

Unit Descriptor

This unit describes the outcomes required to determine a range of treatment options which can be used to reduce emergency risk.

Application of the Unit

This unit applies to people who are part of a working group that develops treatment options during an emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify treatment options	1.1 Risk treatment objectives are identified in consultation with ***stakeholders***. 1.2 Existing ***risk treatment options*** are identified through research and stakeholder consultation. 1.3 A range of potential risk treatment options are identified through research and stakeholder consultation.
2. Evaluate options	2.1 ***Evaluation methods*** are agreed with stakeholders. 2.2 Feedback on likely implications and impacts of treatment options is obtained from stakeholders. 2.3 Residual risks are assessed for tolerability or acceptance 2.4 Cost-benefit analysis is completed for each risk treatment option.
3. Recommend treatment options	3.1 Recommended options, including implementation responsibilities, are agreed in consultation with stakeholders. 3.2 Recommended options and residual risk are documented according to organisational ***policies and procedures***. 3.3 Recommended options are submitted for approval in line with organisational policies and procedures.
4. Develop treatment plan	4.1 Treatment options, resources required, milestones, budget, reporting procedures and roles and responsibilities for implementation are identified. 4.2 Communication and project management strategies are developed with stakeholders. 4.3 Implementation issues are identified and

© Commonwealth of Australia, 2024 Public Skills Australia

	contingencies developed where necessary.
	4.4 An agreed treatment plan is documented and submitted for approval in accordance with organisational policies procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- Research and analysis skills to determine potential treatment options
- ability to negotiate and work effectively with stakeholder groups
- analytical techniques to determine residual risk
- analytical techniques to conduct benefit:cost analysis at an appropriate level

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines and AS/NZS ISO 31000:2009 *Risk management—Principles and Guidelines*
- legislative and regulatory requirements relevant to emergency risk management
- jurisdiction and organisational documentation and submission procedures
- analytical, problem solving and decision making techniques to facilitate evaluating residual risk and cost-benefit analysis
- geospatial databases and presentation options
- range of options for treating emergency risk

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Candidates must demonstrate an ability to work with stakeholders and generate an agreed list of recommended treatment options in an appropriate format. **Consistency in performance** Candidates should be expected to present evidence from at least two different contexts, one of which may be simulated.
Context of and specific	**Context of assessment**

resources for assessment	Evidence of competence in this unit may be collected in a simulated environment and real environment, often as part of a larger project with concurrent assessment of other emergency risk management competencies. **Specific resources for assessment** For the demonstration of competence in this unit it will be necessary to participate in a real-world project. Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.
Guidance information for assessment	This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning project. This unit may be assessed with other units that address other parts of the emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Stakeholders may include:	• staff • client groups • decision makers • members of the public • community groups • industry groups • public and private sector organisations • non-government organisations • elected officials
Risk treatment options may include:	• avoidance of the risk • removing a risk source • changing the likelihood of

© Commonwealth of Australia, 2024 Public Skills Australia

	• an initiating event or source of risk occurring • a hazard impacting on elements at risk • changing the consequences of an identified hazard impact • sharing the risk • retaining the risk based on an informed decision
Evaluation methods may include:	• first-pass cost-benefit analysis • analysis of treatment effectiveness • potential to create new or secondary risks • stakeholder acceptability • legal, regulatory and compliance impact
Policies and procedures may include:	• arrangements specified in legislation • organisational or jurisdictional emergency risk management policies or procedures • existing disaster plans, agreements or memoranda of understanding

PUAEMR025 Manage risk treatment implementation

Modification History

PUAEMR025 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to communicate, facilitate and review implementation of selected risk treatments.

Application of the Unit

This unit applies to managers or members of project teams responsible for implementing all or part of a risk treatment plan. It recognises that the manager or project team will commonly not have direct responsibility for implementing parts of the risk treatment plan. Such managers or teams may be working at local, regional or state level within local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm implementation context	1.1 Project ***drivers/triggers***, risks, risk management context, treatment options, priorities and ***practical constraints*** are clarified. 1.2 Applicable ***policies and procedures*** are identified. 1.3 Key ***stakeholders*** are identified along with their potential interests, sensitivities, roles and responsibilities.
2. Develop implementation plan	2.1 Risk(s) to be treated and current relevance of treatment option(s) confirmed. 2.2 Performance criteria for assessing the effectiveness of treatment implementation are established in consultation with stakeholders. 2.3 Treatment actions, resources required, milestones, budget, reporting procedures and roles and responsibilities of project team members are identified. 2.4 Implementation issues are identified and contingencies developed where necessary. 2.5 An agreed treatment plan is documented and submitted for approval in accordance with organisational policies and procedures.
3. Communicate the treatment plan	3.1 Processes to effectively consult and communicate about implementation are selected. 3.2 A consultation plan is developed and implemented.
4. Facilitate treatment plan implementation	4.1 Treatment tasks/activities are allocated in accordance with the implementation plan. 4.2 Effective communication between working group members is maintained. 4.3 Stakeholders are kept fully informed of progress, performance and any proposed variations in strategy or implementation. 4.4 Agreed variations to the treatment plan are introduced to accommodate changed circumstances or to achieve more effective outcomes.
5. Monitor and review treatment plan implementation	5.1 A review process is established in consultation with stakeholders. 5.2 Effectiveness of treatment activities, adequacy of

© Commonwealth of Australia, 2024 Public Skills Australia

resources, project progress and expenditure is monitored against plans, recorded and reported.

5.3 Implementation plans are adjusted as required following the review process.

5.4 Adjustments to implementation plans are communicated to stakeholders.

5.5 Residual risk is re-evaluated and a decision made whether to accept this risk or to re-visit the risk assessment.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- networking and relationship building
- ability to work effectively with stakeholder groups
- ability to apply a range of communication media and methods to communicate with stakeholders
- project planning and oversight
- budgeting and phasing to measure progress against targets

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines
- jurisdictional, organisational and operational responsibilities for implementing risk treatment options
- legislative and regulatory requirements relevant to implementing risk treatments
- jurisdiction and organisational documentation and reporting procedures
- project management techniques
- options for communicating with stakeholders
- analytical, problem solving and decision making techniques to facilitate monitoring progress against targets

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate	Candidates must demonstrate that they have developed criteria to monitor implementation progress, actually monitored and reported on progress, and communicated

© Commonwealth of Australia, 2024 Public Skills Australia

competency in this unit	and consulted with stakeholders. **Consistency in performance** Candidates should be expected to present evidence from at least two different contexts, one of which may be simulated.
Context of and specific resources for assessment	**Context of assessment** Evidence of competence in this unit may be collected in a simulated environment and real environment, often as part of a larger project with concurrent assessment of other emergency risk management competencies. **Specific resources for assessment** For the demonstration of competence in this unit it will be necessary to participate in a real-world project. Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.
Guidance information for assessment	This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning context. This unit may be assessed with other units that address the whole emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Drivers/triggers may include:

- changes in community characteristics
- changes in legislation, policies and disaster/emergency management plans
- changes in insurance policies and premiums
- new sources of risk or changed perception of risk
- planning deficiencies

© Commonwealth of Australia, 2024 Public Skills Australia

	• recent emergency incident reports/debriefs, safety issues • recent judicial decisions • strategic and corporate plans
Practical constraints may include:	• arrangements, roles and responsibilities set down in existing emergency management plans • availability of technical expertise, technology, equipment • budgets, time, availability and capability of people • land use planning • legislation covering emergency management, environmental management, safety standards, local government regulations • limited community knowledge of emergency risk management processes and benefits • political, social and cultural considerations
Policies and procedures may include:	• arrangements specified in legislation • organisational or jurisdictional emergency risk management policies or procedures • existing disaster plans, agreements or memoranda of understanding • local planning regulations, development controls and environmental plans
Stakeholders may include:	• staff • client groups • decision makers • members of the public • community groups • industry groups • public and private sector organisations • non-government organisations • elected officials
Performance criteria for assessing the effectiveness of treatment implementation may include:	• continuous monitoring of the maintenance of equity • continued involvement of stakeholders • cost effectiveness of treatment • evaluation of effectiveness in terms of actual risk reduction • the evaluation of the need for the redefinition of policy • a feedback mechanism • consideration of change that takes place over time

PUAEMR026 Treat operational risk

Modification History

Release	TP Version	Comments
2	PUA12 V2.1	Editorial changes.
1	PUA12 V2	New unit.

Unit Descriptor

This unit describes the outcomes required to identify, plan and implement treatment options in order to reduce risk.

Application of the Unit

This unit applies to people working in a relatively simple and routine workplace in which they use the organisation's policy and procedures. They would normally have local supervisory/management responsibility and will apply known solutions to a variety of predictable problems.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAEMR027 Assess operational risk

Employability Skills Information

This unit contains employability skills.

essential outcomes of a Unit of Competency.	needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Make risk decision	1.1 Calculated level of risk is compared to the established ***risk criteria*** and determined to be acceptable or unacceptable in consultation with the supervisor. 1.2 Risk that is determined as unacceptable is documented and noted for treatment.
2. Identify and select treatment options	2.1 ***Treatment options*** of known risks are identified and confirmed as contained in ***organisational standards and guidelines*** or supervisor's guidance. 2.2 Treatment options under consideration are evaluated for ***effectiveness*** within the given context. 2.3 Selected treatment options are documented and communicated in accordance with organisational policies and procedures.
3. Implement treatment options	3.1 ***Treatment plans*** incorporating selected options are implemented in accordance with organisational policies and procedures. 3.2 Treatment plans are communicated in the workplace in accordance with organisational policies and procedures.
4. Monitor and review risk and the process	4.1 Effectiveness and efficiency of the treatment plan is ***monitored***, reviewed and recorded in accordance with organisational policies and procedures to ensure compliance and validity. 4.2 Residual risk is calculated and communicated to supervisors so that a decision can be made whether to accept this risk or to re-establish the risk management process. 4.3 Treatments are adjusted and communicated following the review process.

© Commonwealth of Australia, 2024 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicating effectively with personnel at all levels of organisation and risk management specialists
- preparing more detailed reports for a range of target groups including OHS or risk committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically treat risks and, where appropriate, access resources
- manage simple project implementation
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on risk
- undertaking basic research to access relevant information and data
- paying attention to detail when making observations and recording outcomes

Required Knowledge

- organisational policies, procedures and guidelines relevant to risk
- risk management terminology and language in accordance with relevant standards (risk, hazard, risk assessment, risk management and risk treatment)
- specified methods or tools endorsed by an organisation and provided for use in the identification and analysis of risk
- treatment options for risks relevant in the workplace
- team work principles and strategies
- basic project management strategies
- techniques for giving and receiving feedback in a constructive manner
- concept of common law duty of care
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- techniques/methods used to identify or analyse information
- verbal and non-verbal communication techniques including language style, active listening

© Commonwealth of Australia, 2024 Public Skills Australia

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholders' involvement throughout the treatment process and that an informed analysis and selection of treatment options has been undertaken using the methodology and procedures approved by the organisation.

Consistency in performance

Competency should be demonstrated by gathering evidence over a range of workplace scenarios, using a variety of tools and methodology and should include the assessment of a variety of risks that may adversely impact on the organisation.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or under conditions that closely simulate the workplace.

Specific resources for assessment

Access to:

- organisational documentation
- relevant organisational standards
- appropriate tools and methods used within the organisation
- simulated or real-world workplace

Guidance information for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying the principles of treating operational risk, including coping with difficulties, irregularities and breakdowns in routine
- application of the principles of treating operational risk in a range of 3 or more contexts or occasions, over time

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and should include a combination of two or more of:

© Commonwealth of Australia, 2024 Public Skills Australia

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Risk criteria may include:

- the nature and types of causes and consequences that can occur and how they will be measured
- how likelihood will be defined
- the timeframe(s) of the likelihood and/or consequence(s)
- how the level of risk is to be determined
- the views of stakeholders
- the level at which risk becomes acceptable or tolerable
- whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered

Treatment options may include:

- avoidance of the risk
- removing a risk source
- changing the likelihood of
- an initiating event or source of risk occurring
- a hazard impacting on elements at risk
- changing the consequences of an identified hazard impact
- sharing the risk
- retaining the risk based on an informed decision

Organisational standards and guidelines may include:

- AS/NZS ISO 31000:2009 Risk management—Principles and guidelines
- regulatory or legislative requirements
- environmental protection and sustainability regulations
- industry standards and codes of practice
- organisational charter/business plan
- organisational OHS, risk management or resilience

© Commonwealth of Australia, 2024 Public Skills Australia

	policies or operating procedures
Effectiveness may include:	• benefits to the individual • benefits to the organisation • cost benefits resulting from the implementation of the treatment • cost of implementing the treatment option
Treatment plans may include:	• budgeting • expected outcome of treatments • performance measures • responsibilities • review process to be set in place • schedules
Monitored may include:	• critical observation • identification of changes over time • regular checking • regular recording

PUAEMR027 Assess operational risk

Modification History

PUAEMR027 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to identify and assess risk in an operational environment.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This competency applies to workers at a relatively simple and routine level, in which they use established organisational policy and procedures. Workers would normally have local supervisory or management responsibility and apply known solutions to a variety of predicable problems.

The unit covers the first four steps of the risk management process and provides the skills and knowledge required to conduct a risk assessment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2024 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish the risk context	1.1 Objectives and scope are identified using organisational risk management standards and guidelines.
	1.2 ***Risk criteria*** are identified and confirmed as contained in organisational policies, procedures or supervisor guidance.
	1.3 ***Structure for the planning*** required to conduct a risk assessment is determined.
	1.4 ***Stakeholder*** aims and objectives are identified and recorded in accordance with workplace procedures and guidelines.
2. Identify risk	2.1 All possible sources of risk which may affect the situation or objectives are identified and recorded in consultation with stakeholders.
	2.2 Risks are identified using a ***specified methodology or tool*** in accordance with workplace procedures and guidelines.
	2.3 Risk statements describing consequences are generated.
3. Analyse risk	3.1 Risks are analysed by estimating the likelihood of particular consequences occurring.
	3.2 Levels of risk are determined, documented and communicated in accordance with organisational policies and procedures.
4. Evaluate risk	4.1 Levels of risk are prioritised for treatment.
	4.2 Calculated level of risk is compared to the established risk evaluation criteria, and communicated to supervisors.
	4.3 Risks are monitored and reviewed until appropriate treatment measures have been implemented.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2024 Public Skills Australia

Required Skills

- communicating effectively with risk management specialists and people at all organisational levels
- preparing more detailed reports for a range of target groups including OHS or risk committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically assess risks and, where appropriate, access resources
- analysing relevant workplace information and data, and make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (e.g. % change), and produce graphs of workplace information and data to identify trends and recognise limitations
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on risk
- undertaking basic research to access relevant information and data
- paying attention to detail when making observations and recording outcomes.

Required Knowledge

- organisational policies, procedures and guidelines relevant to risk
- risk management terminology and language in accordance with relevant standards
- specified methods or tools endorsed by an organisation and provided for use in the identification and analysis of risk
- team work principles and strategies
- techniques for giving and receiving feedback in a constructive manner
- concept of common law duty of care as applies in emergency risk management context
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- roles and responsibilities under OHS legislation of employees, including supervisors and contractors
- techniques/methods used to identify or analyse information
- verbal and non-verbal communication techniques including language style, active listening

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisational risk management standards and guidelines may include:	• Standard AS/NZS/ISO 31000:2009 Risk Management—Principles and Guidelines • regulatory or legislative requirements e.g. ohs act • environmental protection and sustainability regulations • industry standards and codes of practice • organisational charter/business plan • organisational ohs, risk management or resilience policies or operating procedures
Risk criteria may include:	• the nature and types of causes and consequences that can occur and how they will be measured • how likelihood will be defined • the timeframe(s) of the likelihood and/or consequence(s) • how the level of risk is to be determined • the views of stakeholders • the level at which risk becomes acceptable or tolerable • whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered
Structure for the planning may include:	• documentation required • analysis tools which are required to conduct the assessment • approach taken to conduct the assessment • depth of assessment
Specified methodology or tools may include:	• a risk matrix • analysis of risk registers • brainstorming • business continuity planning • examining any available data e.g. audit

PUAEMR030 Manage and evaluate emergency management exercises

Modification History

PUAEMR030 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to manage and evaluate activities which exercise elements of emergency management arrangements.

Application of the Unit

This unit applies to people who are responsible for implementing and evaluating pre-designed emergency management exercises. Emergency management exercises may be used in any context where there is a requirement to plan for, or manage an emergency. The exercise scale can range from a small activity in a volunteer emergency response unit to a major evacuation exercise for an industrial plant. The skills in this unit can be applied to any context in which an emergency management exercise is appropriate.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not applicable.Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to manage the exercise	1.1 Exercise ***documentation*** reviewed to confirm governance and ***stakeholder*** requirements. 1.2 Exercise aim**,** objectives, activities and evaluation plan are confirmed. 1.3 Relevant permissions, authorities, clearances and approvals are identified and confirmed. 1.4 ***Logistic requirements*** are identified and organised. 1.5 Communication plan is designed and implemented in consultation with stakeholders.
2. Manage exercise activities	2.1 Exercise management team is formed where required. 2.2 Communication and consultation is established with ***activity personnel*** and maintained throughout the conduct of the exercise. 2.3 Exercise site preparation and familiarisation are ensured in accordance with the exercise plan. 2.4 Briefings are prepared and delivered to stakeholders reflecting exercise objectives and activities. 2.5 Confirmation and management of logistic requirements required to conduct exercise activities is ensured. 2.6 The exercise plan is used to initiate and facilitate the conduct and direction of the exercise. 2.7 Risk is managed throughout the exercise.
3. Evaluate outcomes against exercise objectives	3.1 Post-exercise debriefings are conducted and feedback is gathered. 3.2 Exercise feedback is collated, recorded, analysed and issues identified. 3.3 An ***exercise report,*** including recommendations, is prepared to organisational standards and distributed to stakeholders.

© Commonwealth of Australia, 2024 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- manage small-group activities
- build effective networks and relationships
- work effectively in a group setting
- consult with stakeholders
- manage and direct activity personnel
- plan and deliver briefings and debriefings
- manage the pace and intensity of the exercise
- manage risk and safety
- gather and analyse feedback

Required Knowledge

- exercise management concepts and principles
- educational principles underpinning the design of objectives and linking those to activities
- legislative, regulatory and insurance arrangements relevant to using resources, such as land, buildings, equipment, staff and volunteers
- relevant organisational policies and procedures (such as legislation relevant to the operation/ incident/response; legislation relevant to the organisation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- problem solving and decision making techniques
- project management principles
- project management principles
- risk and safety management principles
- budgeting and logistic management principles

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • ensure all permissions, authorities, clearances and approvals are obtained,

© Commonwealth of Australia, 2024 Public Skills Australia

- ensure all resources are available for the exercise, and
- the pace of the exercise proceeds appropriately to achieve the objectives

Consistency in performance

Candidates should be expected to present evidence of managing two different types of exercise, including at least one exercise that requires multi-agency or organisation input.

Context of and specific resources for assessment

Context of assessment

This competency cannot be assessed in a simulated environment.

Specific resources for assessment

- Access is required to real-life exercises, including supporting resources.

Method of assessment

This unit contains transferable skills, such as communication, consultation, and logistic management skills that can be applied to managing an emergency management exercise. Assessors may use formative assessment strategies in a simulated environment to contextualise underpinning knowledge.

Summative assessment requires application of the unit to manage exercises in the workplace. Evidence of performance can be gathered by:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Documentation may include:

- activity inputs (general and special ideas)
- activity notification
- activity management checklists
- assessor documentation

© Commonwealth of Australia, 2024 Public Skills Australia

- evaluation checklist
- evidence collection templates
- exercise injects
- general instruction
- incident action plans
- permissions and approvals risk assessments
- risk action plans
- safety instructions
- specific inputs
- timetable/schedule of events
- umpire documentation

Stakeholder may include:

- staff
- client groups
- decision makers
- members of the public
- community groups
- industry groups
- public and private sector organisations
- non-government organisations
- elected officials

Logistic requirements may include:

- catering
- equipment
- facilities
- finance and accounting procedures
- transport
- accommodation
- guest or specialist speaker(s) or presenters
- first aid and medical supplies and personnel
- exercise management personnel
- role players
- participants

Activity personnel may include:

- exercise management staff
- exercise evaluation staff
- casualty simulation staff
- role players
- public information staff
- participants' management

Exercise report may include:

- executive summary
- acknowledgements
- exercise aim and objectives
- introduction

© Commonwealth of Australia, 2024 Public Skills Australia

- exercise scenario
- sequence of events
- exercise critique (relating observations and feedback to the objectives)
- summary
- recommendations
- attachments (exercise management team, participating organisations and volunteers, referee reports, debrief notes)

Unit Sector(s)

Not applicable.

PUAEMR031 Design emergency management exercises

Modification History

PUAEMR031 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to design, develop or modify activities that exercise elements of emergency management arrangements.

Emergency management exercises are used to test emergency plans, practise responding to an emergency, develop and/or practise emergency management skills, build motivation for emergency management personnel, and/or measure an organisation's ability to manage an emergency.

Application of the Unit

This unit applies to workers with the responsibility for designing emergency management exercises. It does not cover the skills and knowledge for implementing those designs.

Emergency management exercises can be used in any context where there is a requirement to plan for, or manage an emergency. The exercise scale can range from a small activity in a volunteer emergency response unit to a major evacuation exercise for an industrial plant. The design skills in this unit can be applied to any context in which an emergency management exercise is appropriate.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance Criteria describe the required performance

essential outcomes of a Unit of Competency.	needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine exercise purpose	1.1 Exercise ***stakeholders*** are identified and engaged. 1.2 Exercise governance arrangements are confirmed. 1.3 Exercise aim is identified in consultation with stakeholders. 1.4 ***Exercise objectives*** that meet the identified aim are determined. 1.5 ***Exercise focus*** is determined, based on operational outcomes, results of training needs analysis, previous exercises and evaluation reports.
2. Design and plan exercise activities	2.1 Planning team is established where required. 2.2 Governance and planning meetings are held, agreements and decisions are made, and outcomes are communicated to stakeholders. 2.3 ***Components of the exercise program*** are identified, developed and documented in the exercise plan. 2.4 ***Exercise style*** and activities consistent with exercise objectives are selected in consultation with stakeholders. 2.5 ***Design planning processes*** are undertaken with stakeholders to meet exercise objectives and components. 2.6 Exercise documentation is prepared.
3. Assess exercise risks	3.1 Risk and safety considerations are included in planning process. 3.2 Activities which mitigate/reduce risks associated with conducting exercise activities are designed and included. 3.3 Exercise risk and safety management plan is prepared.
4. Plan resource allocation	4.1 ***Resources*** to support the exercise are identified and secured. 4.2 Exercise host is identified and commitment to

© Commonwealth of Australia, 2024 Public Skills Australia

achieving exercise objectives is secured.

4.3 Appropriate authorisation(s) to use resources are obtained and documented.

4.4 Availability and timeframes for use of resources is agreed by appropriate authorities.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- manage small-group workshops and activities
- build effective networks and relationships
- work effectively in a group setting
- liaise and communicate with other agencies
- plan and deliver briefings and debriefings
- prepare exercise documentation
- interpret organisational needs to develop measurable, achievable objectives
- research skills to build scenarios and exercise inputs

Required Knowledge

- exercise management concepts and principles
- educational principles underpinning the design of objectives and linking those to activities
- incident management principles
- legislative and regulatory arrangements relevant to using resources, such as land, buildings, equipment and volunteers
- problem solving and decision making techniques
- project management principles
- risk and safety management principles
- budgeting and logistic management principles
- jurisdictional emergency management arrangements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for Assessment must confirm the ability to:

© Commonwealth of Australia, 2024 Public Skills Australia

assessment and evidence required to demonstrate competency in this unit

- bring together an effective exercise design and planning team
- facilitate the construction of realistic, meaningful and safe activities that address the exercise aim and objectives

Consistency in performance

Candidates should be expected to present evidence from at least two different contexts or exercise styles, including at least one exercise that requires multi-agency or organisation input and of which one may be simulated

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job or in a simulated workplace environment.

Specific resources for assessment

Access is required to a real-life exercise design project.

Method of assessment

Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-life project, often in an action-learning context.

Assessment may occur in a work environment or in a simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Stakeholders may include:

- staff
- client groups
- decision makers
- members of the public

© Commonwealth of Australia, 2024 Public Skills Australia

- community groups
- industry groups
- public and private sector organisations
- non-government organisations
- elected officials

Exercise objectives may include:

- assessing and/or demonstrating the capability of individuals, teams, systems and/or arrangements
- assessing or auditing system(s) performance
- developing new skills
- evaluating emergency management plans
- evaluating individuals/teams/facilities/systems
- evaluating risk treatment strategies
- exploring issues
- improving team cohesion
- meeting legislative or regulatory requirements
- practising skills, systems or procedures
- promoting awareness
- sharing information
- validating training objectives or learning outcomes

Exercise focus may include:

- improving systems, plans or arrangements
- developing/training participants
- sharing information
- testing or auditing systems, plans, arrangements, facilities, and/or individual or team competencies

Components of the exercise program may include:

- exercise name
- authorities, permissions and governance
- scope or purpose statement
- aim and objectives
- activity plan
- detailed schedule of activities
- location (s)
- risk and safety management plan
- budget and logistics plan
- evaluation/assessment plan
- evidence collection tools/templates
- debrief plan

Exercise style may include:

- case study
- discussion/desktop exercises
- hypothetical exercise/scenario analysis
- distributed interactive exercise
- field exercise
- functional centre exercises

© Commonwealth of Australia, 2024 Public Skills Australia

	• role play
Design planning processes may include:	• Determining assessment and performance criteria • planning briefings and debriefings • developing contingency plans • scenario and activity design • developing background information and exercise inputs • determination of activity management structure • developing documentation • issuing notification s to affected stakeholders • identifying and managing risks • identifying and securing resources • meetings • developing and reviewing key performance indicators • scoping of agencies participating and the level at which they are participating • seasonal weather considerations • agreeing on duration of exercise activities
Exercise documentation may include:	• Activity inputs (general and special ideas) • activity notification • activity management checklists • assessor documentation • evaluation checklist • evidence collection templates • exercise injects • general instruction • incident action plans • meeting details • permissions and approvals • risk assessments • risk action plans • safety instructions • specific inputs • timetable/schedule of events • umpire documentation
Resources may include:	• agency guidelines/instructions • catering • equipment • exercise staff • facilities • finance

PUAFIR512 Develop and analyse the behaviour and suppression options for a Level 2 wildfire

Modification History

Release	TP Version	Comments
2	PUA12 V2.1	Editorial changes.
1	PUA12 V2	New unit.

Unit Descriptor

This unit covers the competency required to provide an analysis of the spread and behaviour of an intermediate wildfire and to prepare fire suppression options that are appropriate for the expected fire behaviour.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel required to provide fire behaviour and spread predictions for consideration by the Incident Management Team.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2024 Public Skills Australia

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse factors impacting on the spread and behaviour of an intermediate wildfire and develop an incident prediction	1.1 Information on the current and future fire spread and ***fire behaviour*** is collected from a range of ***sources*** and recorded. 1.2 Analysis is conducted using ***consideration of fuels and fuel assessment***, ***weather analysis***, the ***effects of topography*** and likely resultant fire behaviour. ***1.3 Fire prediction tools and references*** are effectively utilised in the analysis of fire spread and behaviour. 1.4 Results of the fire behaviour analysis are validated against fire observations as they become available.
2. Develop maps and data, and maintain associated information regarding projected fire spread and behaviour	2.1 Necessary ***map information and data*** is prepared. 2.2 Fire spread and behaviour projections are developed in a manner appropriate to the incident. 2.3 Use of the information in planning the control of the incident is facilitated through quality, timeliness and presentation of the information. 2.4 Fire spread and fire behaviour projections are updated as new weather and fire information becomes available.
3. Analyse and communicate key risks of the projected fire spread and behaviour	3.1 Site information is sought from agency databases or experts. 3.2 Area and timing of potential future impact of the fire is projected. 3.3 Key ***risks*** of the fire to ***human, economic and environmental assets*** are considered. 3.4 Fire and weather are monitored to assess if or when fire danger is likely to suddenly increase.
4. Prepare and analyse a range of fire suppression	4.1 Range of options with an analysis of probable level of success and consequences of failure is prepared

© Commonwealth of Australia, 2024 Public Skills Australia

options consistent with incident objectives	for consideration by the Incident Management Team. 4.2 Time available and the threshold fire behaviour for which each ***strategy*** and ***tactic*** is likely to be effective are considered. 4.3 Projected changes to or variation in fire behaviour conditions (due to fuel, weather, topography, fire size) are considered. 4.4 Advice and analysis are provided to the Incident Management Team to assist in development of strategies and fallback strategies.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- access and interpret weather products
- implement strategic risk analysis techniques
- interpret fire spread source data
- manage data and maintain accurate records
- understand and interpret topographic maps in order to plot potential fire spread
- use fire prediction tools and suppression guides

Required Knowledge

- categories of risk
- conditions suitable for and the limitations of fire suppression strategies
- effects of topography on fire behaviour
- fire behaviour factors
- fire suppression strategies and tactics
- fire weather
- fuel and fuel assessment
- sources of data relating to fire behaviour

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence	Assessment must confirm the ability to:

© Commonwealth of Australia, 2024 Public Skills Australia

required to demonstrate competency in this unit	• provide (for use by the Incident Management Team to plan the control of an intermediate wildfire):
	  • accurate analysis and projection of fire spread and fire behaviour, indicating probable and possible scenarios
	  • analysis of a range of appropriate fire suppression options
	Consistency in performance
	Competency should be demonstrated over time in actual or simulated wildfire incidents.

Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in a range of actual or simulated wildfire incidents. **Specific resources for assessment** Access is required to: • range of actual or simulated fires • range of sources of information related to fire spread and behaviour • agency templates for fire behaviour prediction
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for

© Commonwealth of Australia, 2024 Public Skills Australia

different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.	
Fire behaviour must include:	• fire perimeter • fire size/growth/shape • fire whirls • flame characteristics (height and depth) • heat output and intensity • junction zones • rate of spread • smoke • spotting
Sources may include:	• air or ground observations • automated weather stations • Bureau of Meteorology websites and/or fire weather experts • fire history maps • fuel type maps • fireground information, operational situation reports and infrared scans • geographic information systems (GIS) and agency site-related databases • land managers • persons with local knowledge
Consideration of fuels and fuel assessment may include:	• bark fine fuels • canopy fine fuels • coarse fuels • coarse standing fuels • coarse surface fuels • dead course fuel moisture • dead fine fuel moisture • elevated fine fuels • fine fuels • fuel and fire behaviour • live fuel moisture • moisture content assessment • near surface fine fuels • surface fine fuels • total fuel load
Weather analysis may include:	• atmospheric stability • Bureau of Meteorology products and tools • calculation of fire danger ratings

© Commonwealth of Australia, 2024 Public Skills Australia

	• cold fronts • diurnal cycles • droughts • Foehn winds • Katabatic and Anabatic winds • long-term weather cycles • relative humidity and dew point temperature • sea breezes and land breezes • seasonal cycles • short-term and local weather effects • temperature • temperature inversions • wind gustiness and directional variation • wind speed and direction
Eeffects of topography on fire behaviour must include:	• acceleration effects • dry upper winds – mixing/range effect • drought index and drought factor • fuel distribution • elevation • rockiness/continuity • land form (channelling) • slope and aspect
Fire prediction tools and references may include:	• CSIRO (Mcarthur) forest fire danger meter • CSIRO (Mcarthur) grassland fire danger meter • CSIRO (Mcarthur) grassland fire spread meter • Vesta fire model • WA forest fire behaviour tables • overall fuel hazard guide (DSE, 1999) • other fuel specific fire behaviour prediction systems (such as buttongrass in Tasmania, mallee-heath model, spinifex model)
Map information and data may include:	• maps of fire spread, estimated at time intervals as required by the incident management team, with separate mapping for probable and possible scenarios • narrative regarding limitations, assumptions, prediction uncertainties and other comment to assist in the interpretation of the data • victoria fire behaviour estimates
Risks may include:	• operational risk • public safety risk • risks to public and private assets

© Commonwealth of Australia, 2024 Public Skills Australia

	• economic risk • environmental risk • legal risk • technical risk • political risk
Human, economic and environmental assets may include:	• areas of environmental or conservation value • areas of tourism value • crops and farm assets • historic sites • indigenous cultural sites • key infrastructure such as a major bridge or power transmission lines • plantations • private or public buildings • towns or settlements • water catchments

Strategy may include:	• offensive strategies:
	  • direct attack
	  • indirect attack
	  • parallel attack
	• defensive strategies:
	  • community and asset protection

Tactic may include:	• aerial suppression • back-burning/burning out • control line construction (hand, machine)

PUAMAN002B Administer work group resources

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency to administer work group resources to support the achievements of organisational and operational objectives.

Application of the Unit

This unit applies to public safety managers with responsibility for resources allocation. It is relevant for managers at a local level through to organisational level.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

© Commonwealth of Australia, 2024 Public Skills Australia

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Access and allocate resources	1.1 Required ***resources*** are identified, and accessed in accordance with organisation's policy and procedures. 1.2 ***Resources are allocated*** to facilitate required outcomes . 1.3 Equipment stock and supplies are stored in accordance with ***organisation's policy and procedures.*** 1.4 Resources are handled in accordance with organisation's policy and procedures and ***resource management systems.***
2. Monitor, evaluate and report on resource usage	2.1 Records of resources allocation and usage are maintained in accordance with relevant legislation and organisational guidelines. 2.2 Resource usage is monitored and evaluated against targets and organisational standards. 2.3 Resource utilisation issues are addressed.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- evaluate resource usage
- interpret budget reports
- monitor resource allocation and usage
- produce resource reports
- utilise resource inventories

Required Knowledge

- computer based tools to produce resource reports
- equal employment opportunity policy and procedures
- management information systems

© Commonwealth of Australia, 2024 Public Skills Australia

- occupational health and safety policy and procedures
- organisation's policies and procedures for budget administration
- organisation's policy and procedures relating to resource acquisition and allocation
- stock handling procedures

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in knowledge and application of the coordination of resources in a range of contexts to achieve the organisation's objectives.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Evidence of competent performance should be gathered by observing an individual in a resource coordination role in the workplace or exercise or operational environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Resources may include:

- finances
- facilities equipment
- stock and supplies
- human resources

Organisation's policy procedures and standards may include:

- equal employment opportunity and occupational health and safety work group policy and procedures
- environmental protection and sustainability
- organisation's work group plans
- organisation's financial and other resource

© Commonwealth of Australia, 2024 Public Skills Australia

	management guidelines • technology and data associated with management information systems
Resource management systems may include:	• human resource systems • computer databases resource lists • contact details lists • financial accounting systems • communication systems
Allocations of resources considerations may include:	• suitability • type of resource • urgency • cost effectiveness • accessibility • maintenance demands • availability • deployment time

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare appropriate documentation	1.1 Preparation of documentation is managed. 1.2 Conditions of tendering the contract and specifications meet organisation/government policies and guidelines. 1.3 Tendering process conforms with tender/supply code. 1.4 An appropriately experienced officer is identified to handle all inquiries during the tender process and all tenderers are advised of clarifications.
2. Establish the basis of tendering	2.1 ***The form of tender***, public or selective is determined. 2.2 Expressions of interest are sought. 2.3 Expressions of interest are evaluated and potential tenderers short listed.
3. Receive and assess tenders	3.1 Documents are received and opened in accordance with ***organisational policies and procedures.*** 3.2 Tenders are checked for compliance with conditions set out in request for offers. 3.3 Details of tenders are compared with established ***evaluation criteria.*** 3.4 Checks are made to ensure that principles of probity, fairness and commercial confidentiality are met throughout the tender process. 3.5 Issues which may require negotiation are identified.
4. Select successful respondent/s	4.1 ***Selection*** is based on evaluation criteria and relevant factors affecting the tender. 4.2 Selection is ethically sound and does not breach probity principles. 4.3 All actual or potential conflicts of interests are disclosed. 4.4 Where possible the contractor is selected from a registered panel of contractors who are proven to have the relevant expertise and capacity. 4.5 Contractor's price and conditions are examined in

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	order to determine that the offer is clear, calculable and not open to manipulation.
	4.6 A cost-benefit analysis shows that the selected contractor offers best value for money.
5. Finalise contract details	5.1 Letter of acceptance outlines all relevant requirements for signing of documentation and satisfaction of pre-commencement conditions.
	5.2 Discrepancies and disagreements about proposed supply arrangements are clarified and resolved prior to entering into the agreement.
	5.3 Contract is properly executed by the successful proponent and is in accordance with legal requirements.
	5.4 Unsuccessful tenderers are briefed if appropriate.
	5.5 Contract conditions are read and understood by all personnel involved in contract administration.
	5.6 Contract documents are prepared, approved and distributed.
	5.7 Fulfilment of any ***outstanding requirements*** is checked and rectified if necessary.
6. Evaluate performance of the contract on completion	6.1 Contract conditions and responsibilities are reviewed with relevant personnel to ensure satisfactory completion of contract.
	6.2 Contract completion is authorised in writing to confirm completed services have been undertaken according to contract objectives and specifications.
	6.3 ***Contractor performance***/level of service is evaluated against agreed benchmark.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- establish effective feedback and monitoring systems
- implement risk management plans
- monitor and review contract performance
- plan effectively and solve problems
- supply information relevant to contract performance

© Commonwealth of Australia, 2024 Public Skills Australia

Required Knowledge

- assessment of tenders
- award of contracts
- basics of contract law
- contract administration
- contract requirements
- negotiation processes
- organisational procedures and guidelines for the calling of tenders
- principles of quality assurance
- risk management principles
- sources of legal advice
- terms and conditions

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Demonstration of knowledge and skills required to award, manage and evaluate a contractor's performance and attend to any variations and difficulties which arise during the course of the contract. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated contract management environments.
Context of and specific resources for assessment	**Context of assessment** Evidence should be gathered over a period of time in a range of actual or simulated contract management environments. **Specific resources for assessment** Evidence of competent performance by observing an individual in a contract management role within the workplace or simulated environment. Knowledge may be assessed through written assignments, project reports, debriefings and action learning projects.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised***

© Commonwealth of Australia, 2024 Public Skills Australia

wording in the Performance Criteria is detailed below.

Forms of tenders may include:	• public • selective
Evaluation criteria may include:	• project objectives • technical specifications • risk • user requirements • timing resources – staff • supplies • budget • environmental policies
Selection of contractors may be based on:	• assessment against evaluation criteria • expertise of contractor • resources allocated to project • contractor's proven performance record • contractor's reputation for quality • contractor's background knowledge of the project • contractor's understanding of organisational requirements • availability of contractor • estimated cost
Performance of contractors may be evaluated on:	• progress towards milestones and objectives • adherence to proposed timelines • adherence to estimated costs • access to resources • staff • supplies • materials • goods • advice • implementation of recommendations • technical specifications • quality assurance • environmental policies
Outstanding requirements may include:	• insurance (public liability • professional indemnity • WorkCover • personal accident) • evidence of covers • security deposits/bank guarantees • warranties of equipment performance

© Commonwealth of Australia, 2024 Public Skills Australia

Monitoring of contractor performance may include:	• site visits • inspections • project management meetings • progress meetings • reports validation of quality systems • partial or full audits
Organisational policy and procedures may vary between sectors and organisations and may include:	• legislation relevant to procurement • legislation relevant to the organisation • operational corporate and strategic plans • operational performance standards • organisational personnel practices and guidelines

PUAOHS002B Maintain safety at an incident scene

Modification History

Release	TP version	Comments
3	PUA12 V2.1	Editorial changes.
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency to recognise potential health and safety risks and take action to eliminate or control those risks at incident scenes, to prevent injury to self, other personnel or members of the public.

Application of the Unit

This unit applies to all public safety workers attending an incident scene, and links to the individual's responsibility to maintain personal safety and to be aware of how actions affect the safety of others, including team members, other agency workers, and general public.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR215 Prevent Injury (Fire sector specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance Criteria describe the required performance

essential outcomes of a Unit of Competency.	needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine hazards at incident site	1.1 Issues affecting safety of self and other personnel are established by identification of ***hazards*** and assessment of ***risks***, and by liaison with others at the scene. 1.2 Relevant operational safety procedures are implemented in accordance with organisation's policies. 1.3 Duties are undertaken in line with organisational health and safety codes of practice and ***relevant legislation.***
2. Implement hazard controls at incident scene	2.1 Hazards are identified and mitigation procedures are selected in line with work instructions and procedures. 2.2 Hazardous situations rectified where possible and reported and/or recorded according to organisation's policies and procedures. 2.3 Changes in situation and/or conditions are reported immediately to ***designated person.*** 2.4 ***Hazard controls*** are monitored and communicated to relevant personnel to ensure continuing effectiveness. 2.5 Hazard control and mitigation measures are implemented with minimum damage to the environment, while maintaining safety of self and others. 2.6 Incident/accident scene is effectively secured to preserve the scene and maintain ***public safety*** in line with legislative requirements.
3. Maintain personal safety	3.1 ***Personal protective clothing and equipment*** is selected and checked according to organisational procedures to ensure it is operational prior to entry into incident situation. 3.2 Personal protective clothing and equipment

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	appropriate to dealing with the hazard is worn/fitted and used in accordance with organisation's policies and procedures and manufacturer's guidelines.
	3.3 Water and food intake, rest breaks and shelter requirements are maintained.
	3.4 ***Survival technique strategies*** are implemented in accordance with organisation's policies and guidelines.
4. Contribute to maintaining safety of other work group members	4.1 Impact of own actions on safety of others is recognised.
	4.2 Contact is maintained at all times with other work group members.
	4.3 Signals are correctly used, interpreted, confirmed and acted upon in a timely manner.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate non-verbally and verbally
- follow procedures and instructions
- record information
- use communication equipment
- work with others in a team situation

Required Knowledge

- accidents and incidents
- commonly encountered hazards and procedures and safety precautions to prevent injury on encountering various hazards
- employee responsibilities and obligations
- food intake
- hazards
- heat induced illness - factors leading to prevention
- injuries
- labelling and storage of hazardous substances
- manual handling hazards
- means of relaying warnings to other personnel
- methods of hazard control and reporting
- organisation's occupational health and safety policy

© Commonwealth of Australia, 2024 Public Skills Australia

- problems associated with insufficient water intake
- procedures for investigating injuries
- procedures for participating in occupational health and safety arrangements
- procedures for reporting hazards
- protection
- relevant standard operating procedures
- respiratory system - functions
- rest breaks
- State and Territory occupational health and safety requirements
- survival techniques for various situations
- symptoms and treatment
- techniques and aids
- use and limitations of relevant protective clothing and equipment

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in maintaining personal safety and safety of others. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** A real life incident, exercise or simulation, or series of tasks are required to demonstrate competence in this unit. This may involve setting scenarios to be completed either individually or as a member of a team. Written or verbal questions may be used as supporting evidence. **Specific resources for assessment** A range of protective clothing and equipment may be required.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

© Commonwealth of Australia, 2024 Public Skills Australia

Working environment may be:	• hazardous • unpredictable • subject to time pressure • chaotic and expose responders to risk
Public Safety workplaces include:	• any location where a Public Safety incident occurs
Response situation include:	• single and multi agency response situations
Hazards include:	• all potential sources of injury or damage to property or the environment including identified and potential hazards to persons • equipment or the environment
Risk is:	• the likelihood of injury or damage occurring and the potential consequences of any injury or damage

Incidents may include:	• a variety of natural or man made events including but not limited to rescues and extrications
	• flood
	• storm
	• tempest
	• natural disaster
	• vehicle
	• aircraft
	• rail
	• industrial
	• civil defence
	• fires:
	  • structural
	  • wild
	  • prescribed burning
	• search and rescue :
	  • urban
	  • rural
	  • sea
	• hazardous materials and dangerous goods

Hazards may be identified by:	• scene assessment • visual inspections • plan reviews • recognising hazard warnings • accessing data bases • interviewing others at scene • seeking expert advice

© Commonwealth of Australia, 2024 Public Skills Australia

Others at scene may include:	• organisational personnel • personnel from other organisations • general public
Hazardous materials may include:	• thermal • mechanical • explosives • toxic • corrosive • asphyxiant • radiation • etiological hazards • mutagenic materials
Biological hazards may include:	• bacteria • viruses • fungi and yeasts • including exotic organisms
Physical hazards may include:	• noise • slippery surfaces • poor visibility • smoky environments • fallen/falling objects • fatigue
Electrical hazards may include:	• pole fires • electrical fires • electricity in damaged/burning structures • energised vehicles/structures due to downed wires • photovoltaic generation systems
Manual handling hazards may include:	• heavy objects • content and shape of containers
Environmental hazards may include:	• temperature • darkness • fire • snow • floods • winds • rain • hail • flora • fauna • postural restrictions and access • terrain

© Commonwealth of Australia, 2024 Public Skills Australia

Hazard control measures may include:	• traffic • erection of barriers • establishment of control zone • use of spill clean up kits • use of electrically insulated tools and equipment • vehicle protection hoses and devices • life support equipment (heat radiation shielded crew cabin • vehicle cabins with/without sprays) • entry control procedures to hazardous areas • decontamination • isolation of electricity supply
Relevant legislation may include:	• state or territory occupational health and safety acts and regulations
Personal protective clothing and equipment may include:	• breathing apparatus • personal lines • air lines • personal distress units • respiratory protection • protective hoods • goggles • hearing protectors • sunscreen • chemical protective clothing • personal flotation devices • wet suits • turnout uniform • gloves • hard hat • safety boots • overalls • chainsaw chaps • bullet proof vests • firearms • batons • handcuffs
Hazard control equipment may include:	• atmospheric monitoring equipment • meteorological equipment • radiation monitoring equipment • oxygen meters • flammable gas detectors

© Commonwealth of Australia, 2024 Public Skills Australia

Reporting may include:	• verbal • written reports • completing standard forms • logs • sitreps • note taking • logging entry to hazardous areas
Designated person may include:	• supervisor • team leader • workplace occupational health and safety representative • officer in charge
Survival strategies which may be applied in:	• buildings • wildfire situations • water • extreme heat or cold
Factors which may require monitoring may include:	• traffic • weather conditions • vegetation type • spectators • temperature • structural integrity • relative humidity • slope • terrain • water supply/pressure • fire development • stream flows • suspect atmospheres
Contact with other personnel may include:	• visual • vocal • touch • radio • audible warnings • signalling

PUAOPE013A Operate communications systems and equipment

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to transmit and receive communications in routine and operational situations using the organisation's communications systems and equipment.

Application of the Unit

This unit applies to a person who is required to operate an organisation's communications systems and equipment in support of the tasks they are undertaking. This work may occur either in the field or from a facility.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

© Commonwealth of Australia, 2024 Public Skills Australia

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use communications systems and equipment	1.1 ***Communications equipment*** and techniques including ***verbal communications*** and ***voice procedures***, are selected to best meet the task, context and needs of the situation 1.2 Equipment is operated safely to support communications consistent with organisational policies and procedures 1.3 ***Communications system*** is correctly utilised to facilitate transmission and reception
2. Transmit and receive communications	2.1 Information is transmitted concisely and clearly to facilitate accurate reception of the message in accordance with organisational policies and procedures 2.2 Contact is acknowledged, communication is confirmed and action is initiated 2.3 Communication faults and deficiencies are reported according to organisational policies and procedures 2.4 Alternative communications strategies are employed according to organisational procedures to address identified faults and deficiencies in communication 2.5 Communication is processed and recorded in accordance with organisational policies and procedures
3. Maintain communications equipment	3.1 Communications equipment is inspected to ensure operational readiness 3.2 Fault finding techniques are applied and basic maintenance is conducted according to organisational policies and procedures 3.3 Faulty equipment is identified and noted for repair, and documentation is completed in accordance with organisational procedures

© Commonwealth of Australia, 2024 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- maintain communications equipment according to organisational procedures
- operate the different communications equipment required by the organisation
- report communication faults and deficiencies according to organisational procedures
- use verbal communication procedures consistent with the organisation's communications system
- utilise the organisation's communications processes and systems

Required Knowledge

- organisational policies and procedures relevant to the operation of communications equipment (such as relevant legislation; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- organisation's communications system
- range of communications equipment available to the organisation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • use communications equipment under non-operational and operational conditions • accurately transmit and receive communications using the organisation's communications systems and equipment. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an operational environmentor in an industry-approved multi-agency simulated workplace environment. **Specific resources for assessment**

© Commonwealth of Australia, 2024 Public Skills Australia

	Access is required to: • relevant communications equipment.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Communications equipment may include:	• Computers • Facsimiles • Pagers • Radio • Signalling devices • Telephones (mobile, landline and satellite)
Verbal communications procedures may include:	• Call signs • Coded messages • Emergency procedures • Phonetic alphabet • Pro-words • Use of abbreviations
Voice procedures may include:	• Corrections • Pitch • Repetitions • Rhythm

© Commonwealth of Australia, 2024 Public Skills Australia

Communications systems may include:	• Sentences • Speed • Volume • Communication protocols • Communications software • Organisation's networks • Verbal communication procedures

PUAOPE015A Conduct briefings and debriefings

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to lead and manage a briefing and a debriefing.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to people who are required to conduct briefings and debriefings in operational and non-operational situations in a range of environments.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element.

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare for the briefing and debriefing	1.1 ***Content and format*** for briefing and debriefing are determined. 1.2 Briefing and debriefing plan is prepared in accordance with organisational policies and procedures. 1.3 ***Relevant personnel*** involved in the ***activity*** are identified and informed of briefing and debriefing requirements. 1.4 ***Safe and appropriate location*** for the briefing and debriefing is selected.
2. Conduct the briefing and debriefing	2.1 Purpose and structure of the briefing and debriefing is outlined to incident personnel. 2.2 Understanding is sought and clarifications are provided, where required. 2.3 Contributions from personnel during the debriefing and evaluation by personnel of their anticipated or actual roles in the activity is encouraged. 2.4 Briefing and debriefing is ***conducted*** in accordance with organisational policies and procedures. 2.5 Briefing and debriefing ***checklist*** is used as appropriate.
3. Conclude the briefing and debriefing	3.1 Contributions of personnel are acknowledged in a positive way. 3.2 ***Briefing and debriefing follow-up action*** is identified and acted upon in a timely manner. 3.3 Debriefing activity is reviewed against the policies, practices and training of the organisation to identify opportunities for continuous improvement and to identify lessons learnt. 3.4 Briefing and debriefing findings are summarised and recorded, if appropriate, in a format suitable for ***subsequent action*** by appropriate personnel.

© Commonwealth of Australia, 2024 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate clearly in a group setting
- lead and manage group processes
- prepare briefing and debriefing plans
- provide feedback and encourage contributions from group members

Required Knowledge

- organisational policies
- organisational procedures for activity briefing and debriefing
- practices and training processes in relation to activity

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • communicate effectively with personnel • elicit and encourage contributions to the briefings and debriefings in a constructive and positive way **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed conducting briefings and debriefings in a variety of actual and/or simulated workplace contexts. **Specific resources for assessment** There are no specific resource requirements for this unit.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified

	assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Content and format for briefing and debriefing may include:	• Collaborative • Descriptive illustrative • Facilitator led • Level of language used • Predetermined (SMEAC) • Problem based
Briefing and debriefing plan may include:	• Appropriate incident information collected prior to undertaking operational activities • Location • Methodology • Participants • Purpose • Subject matter • Timing
Organisational policies and procedures may include:	• Briefing and debriefing formats • Legislation relevant to the operation/incident/response • Legislation relevant to the organisation • Operational, corporate and strategic plans • Operational performance standards • Operational policies and procedures • Organisational personnel and occupational health and safety practices and guidelines • Organisational quality standards

© Commonwealth of Australia, 2024 Public Skills Australia

	• Organisation's approach to environmental management and sustainability
Relevant personnel may include:	• Contractors • Local, state/territory and federal government employees • Operations personnel • Support personnel • Volunteers • Other agency personnel
Activity may include:	• Incidents • Meetings • Public safety campaigns
Safe and appropriate locations may vary according to:	• Ambient conditions (noise, light, smell) • Distractions • Timing of the briefing and debriefing which may be before, during or following an activity • Weather • Whether briefing and debriefing is under operational or non-operational conditions
Briefing and debriefing may be conducted:	• After a meeting/event • As soon as possible following an incident • At convenient time after the incident • At regular intervals • At shift change over • Immediately after the incident • Prior to undertaking training • Prior to undertaking workplace projects and other work related activities • When incident personnel have been relieved • When personnel return to their home base • When significant changes are anticipated at an incident
Briefing and debriefing checklist may include:	• Control and command • Communications • Damage • Equipment and plant • Fatalities • First aid and medical • Incident background • Incident response • Injuries • Loss

© Commonwealth of Australia, 2024 Public Skills Australia

	• Resources committed to the incident • Strategies to improve response • Stress • Supporting organisations • Welfare
Briefing and debriefing follow-up action may include	• Action taken to address issues identified • Informing participants on the outcomes of the debriefing
Subsequent action may include	• Reporting to appropriate supervisor or agency • Reviewing procedures

PUAPOLFC003B Detect, record and collect physical evidence

Modification History

Release	TP version	Comments
3	PUA12 V1.1	Unit Descriptor revised.
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to process activities involved in recording and collecting physical evidence during ***incident*/*crime scenes*** and ***laboratory examinations***.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Detecting, recording and collecting physical evidence is of the utmost importance and can be applied in various contexts within incident/crime scenes and laboratory examinations.

This unit is relevant for all aspects of handling physical evidence.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2024 Public Skills Australia

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Detect and record physical evidence	1.1 ***Physical evidence*** is ***detected*** using observation techniques and appropriate technological methods. 1.2 Physical evidence is collected to prevent contamination or loss. 1.3 Samples collected are sufficient in quantity, where possible, to allow all potential examinations/analysis to be carried out. 1.4 Samples collected are sufficient to represent the ***natural variation*** that occurs in the physical evidence. 1.5 ***Control reference samples*** are collected, where available and appropriate. 1.6 Documented record of the physical evidence is produced in line with agreed agency procedures.
2. Collect physical evidence	2.1 Physical evidence is recorded prior to examination to ensure continuity and accuracy. 2.2 ***Recording methods*** are identified to document the physical evidence in accordance with quality system requirements and within resource limitations. 2.3 Latent evidence is ***collected***/detected by physical or chemical means.
3. Package physical evidence	3.1 Items are ***packaged and stored*** to maintain continuity and prevent degradation or contamination. 3.2 Physical evidence is packaged in accordance with occupational health and safety (OH&S) guidelines. 3.3 Details of evidence collected are entered in case notes and where appropriate in the exhibit register to maintain continuity.

© Commonwealth of Australia, 2024 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse, make decisions and solve problems in responding to a range of physical evidence contexts including the systematic examination of items of physical evidence
- collect, package and preserve specific evidence types
- communicate in writing clearly and unambiguously
- handle exhibits and preserve continuity of evidence
- maintain operational safety
- manage resources and time effectively
- use specialised evidence recording equipment as required

Required Knowledge

- application and potential limitations of forensic investigative techniques
- legislative, policy, and quality system context in which forensic examinations are conducted
- legislative, policy, and quality system requirements for search and the seizure of physical evidence
- legislative, policy, and quality system requirements for collecting, preserving continuity and disposing of exhibits
- legislative, policy and quality system requirements for the security, protection and preservation of the evidence
- OH&S practices to be followed when recording, collecting and packaging physical evidence
- range of techniques available for the recording, collecting, packaging and preserving physical evidence
- required forensic documentation for the recording and collection of physical evidence
- role and functions of other forensic discipline specialists in the recording, collection, preservation and continuity of physical evidence

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate	Assessment must confirm the ability to: • maximise the potential evidentiary value of the exhibit

© Commonwealth of Australia, 2024 Public Skills Australia

competency in this unit	**Consistency in performance** Competency should be demonstrated over time and across a range of workplace or simulated situations.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed on-the-job or in a simulated work environment. This unit must be assessed against the relevant discipline such as Crime Scenes, Fingerprints, Documents, Firearms, Toolmarks, Fire and Explosion, Criminalistics or Biology. Competency in this unit in one particular discipline does not imply competence in any other forensic discipline in this same unit. **Specific resources for assessment** There are no specific resource requirements for this unit.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Incident/crime scenes may	• Civil investigations

© Commonwealth of Australia, 2024 Public Skills Australia

include:	• Controlled drug deliveries • Criminal investigations • Disasters • Drug substitutions • Fire and explosions • Industrial accidents • Search of persons/evidence • Searches and evidence collection • Sudden deaths • Special events • Vehicle collisions • Vehicle identification
Laboratory examinations may include:	• Document examination • Fingerprint development/enhancement/examination • Firearm examinations • Motor vehicle examinations • Shoeprint development/enhancement/examination • Toolmark examinations • Trace evidence examinations
Physical evidence may include:	• Any and all objects • Liquid or gas including the relationship between all such objects • Living or inanimate objects • Objects gross or microscopic in size • Solid • Tyremarks, shoemarks, toolmarks, fingerprints, fibres, biological tissue, blood stain analysis, vehicle examinations, paint, clothing, fire debris and documents
Detection methods may include:	• Chemical • Optical • Physical
Natural variation refers to:	• Diversity of characteristics that occurs in all items of physical evidence
Control/reference samples refers to:	• Control samples which represent background contaminants • Samples collected from a known source (such as elimination fingerprints, hairs from the victim and suspect)
Recording methods can be:	• Audio recording • Computer generated data • Digital imaging

© Commonwealth of Australia, 2024 Public Skills Australia

	• Hand written notes • Global positioning system (GPS) • Photographic • Physical capture • Sketch plan • Video recording
Evidence collection methods may include:	• Hand picking (including use of forceps, gloves) • Swabbing • Sweeping • Tape lifting • Vacuuming
Packaging and storing to maintain continuity and prevent degradation or contamination may include consideration of:	• Drying of wet exhibits • Exhibit labels • Packaging medium • Physical nature of exhibit • Storage temperature • Tamper evident seals

PUAPRO001B Promote a learning environment in the workplace

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency to promote a workplace learning environment in which work and learning are integrated to support the achievement of individual and organisation objectives.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to all Public Safety workers who have leadership roles in their organisation, but is particularly relevant to those workers with supervisory or managerial responsibilities for teams.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2024 Public Skills Australia

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Create learning opportunities	1.1 Workplace environments which facilitate learning are developed and supported. 1.2 Learning plans are developed as an integral part of individual/team performance plans. 1.3 Learning plans reflect the diversity of learning styles, development needs and ***learning opportunities.*** 1.4 Individual/team access to, and participation in, learning opportunities is facilitated. 1.5 Consultation with training and development specialists results in the planning and provision of learning which enhances individual, team and organisation performance.
2. Facilitate and promote learning	2.1 Workplace activities are used as opportunities for learning. 2.2 Coaching and mentoring is used to develop workplace knowledge, skills and attitudes. 2.3 The benefits of learning are shared with others in the team/organisation. 2.4 Workplace achievement is recognised by timely and appropriate recognition, feedback and rewards.
3. Monitor and improve learning effectiveness	3.1 Performance of individuals/teams is monitored to determine the type and extent of additional work based support. 3.2 Feedback from individuals/teams is used to identify and introduce improvements in future learning arrangements. 3.3 Change in the workplace environment is facilitated to promote learning. 3.4 Records and reports of competency are documented

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and maintained within the organisation's systems and procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- develop learning plans
- develop links between work and learning
- promote collaborative processes in developing a learning environment
- promote the achievement of competencies in the workplace
- provide leadership and support to individuals and teams to develop and maintain a flexible learning environment
- provide or arrange support for those who have learning difficulties
- support and encourage learning by individuals and teams

Required Knowledge

- group dynamics
- learning strategies
- organisation records and reports of competency procedures
- principles of adult learning

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Knowledge and application of strategies which facilitate and promote an effective workplace learning environment. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Evidence in facilitating and promoting a learning environment in the workplace Knowledge may be assessed through: • written assignment • debriefings and action learning projects.

© Commonwealth of Australia, 2024 Public Skills Australia

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Learning opportunities arise from organisation may include:	• objectives • plans • systems • processes • performance plans • quality and continuous improvement processes and standards • resources • participation in committees • managing projects • developing plans • analysis of incidents/response/emergency • organisation's approach to environmental management and sustainability
Learning strategies may include:	• coaching • mentoring • exchange/rotation • action learning • structured training programs

Unit Descriptor

This unit covers competency for working as a member of a team or as an individual for periods of time without direct supervision and for mentoring and coaching either in an operational or non-operational environment.

Application of the Unit

This unit applies to all workers working in the Public Safety Industry, but is particularly relevant for new workers to understand the organisation’s expectations and limits in regards decision making.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUATEA001B Work in a team (Fire sector specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Undertake work activities	1.1 Work requirements are identified and undertaken. 1.2 Instructions and directions are understood and implemented. 1.3 Communication is maintained with team leader advising of progress of task/activity. 1.4 Personal safety and safety of others is maintained. 1.5 Any legal requirements and/or ramifications of ***activities*** are communicated to team leader. 1.6 ***Work area*** is determined or selected in accordance with operational or organisation's requirements. 1.7 Equipment is operated in accordance with the manufacturer's specifications. 1.8 OH&S and the organisation's policies and procedures.
2. Accept responsibilities	2.1 Responsibilities are accepted according to the organisation's policy and procedures. 2.2 Team leader is appraised of the outcome of task/activity. 2.3 Any activity that exceeds the scope of the defined task is referred to the supervisor.
3. Set performance requirements	3.1 ***Performance requirements*** are based on objectives and goals and agreed with supervisor.
4. Maintain team performance	4.1 Individual performance is monitored against defined performance requirements and appropriate action taken to maintain performance if required. 4.2 Performance of others is monitored and appropriate action is taken through coaching and mentoring to ensure team objectives and goals are met. 4.3 Supervisor is provided with feedback and

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	constructive advice.
	4.4 Issues which cannot be rectified or addressed are referred to the supervisor for appropriate action according to the organisation's policy.
	4.5 Supervisor is advised of any changes in priorities or tasks.
	4.6 All ***required documentation*** relevant to performance is completed.
5. Act as a team leader as required	5.1 Responsibility for the performance of the team is accepted.
	5.2 Goals are set, tasks identified and presented to team members.
	5.3 Instructions and directions are communicated to team members clearly and unambiguously.
	5.4 Team members' concerns and queries are recognised, discussed and dealt with.
	5.5 Any legal requirements and/or ramifications of team activities are communicated to team members.
	5.6 Duties, rosters and responsibilities are allocated to team members having regard to the skills and knowledge required to properly undertake the assignment or task and according to organisation's policy and procedures.
	5.7 Feedback on own performance is provided as required.
	5.8 Level of authority is recognised and adhered to.
	5.9 Operational debrief is conducted in accordance with the organisation's requirements.

Required Skills and Knowledge

Required Skills

- communicating instructions and directions
- communicating performance expectations
- completing a range of documentation
- encouraging team members
- informal performance counselling
- providing feedback on performance
- representing issues to management

© Commonwealth of Australia, 2024 Public Skills Australia

- team building

Required Knowledge

- defined OH&S policies and procedures
- knowledge of current principles and practices
- legal requirements and ramifications of team activities
- method of monitoring performance
- organisation's policy for referring performance issues
- organisation's policy relevant to hours of work and work allocation
- organisation's requirements for documenting team performance and activities
- procedures and methods of setting performance expectations
- required to work in a team
- team members' duties and responsibilities

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in communication of performance expectations and providing feedback to team members. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated work environment. Where workplace observation is insufficient simulations or case studies may be used. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Scope of allocated task may include:	• extent of activity • content of activity • degree of responsibility for task

© Commonwealth of Australia, 2024 Public Skills Australia

Performance requirements include	• goals • objectives • plans • standards • performance indicators • production rates
Work area may be dependent upon	• activity conducted • road accessibility • logistical support • water availability • vicinity of built-up areas • areas of reduced visibility • distance to operation • hazards • vehicle parking
Performance issues may include:	• occupational health and safety • hours of work details • concerns about ability to complete work • inadequate resources
Appropriate personnel may include:	• manager • human resource personnel • team leader • supervisor • team members
Required documentation may include:	• forms • proformas • incident reports • rosters • timesheets • written reports • logs • standard operating procedures • checklists

Activities may include:	• non operational activities:
	  • tasks
	  • projects
	  • preparing documentation
	• operational activities:
	  • responding in a combat or support role to natural emergencies (fire/flood)
	  • technological/industrial emergencies

© Commonwealth of Australia, 2024 Public Skills Australia

- civil/political emergencies and non-emergency operations including community events
- public relations activities
- sporting events
- parades
- festivals

Conditions under which operational activities may be may include:

- hazardous conditions including adverse weather
- after dark operations
- emergency operations
- difficult terrain
- time pressure
- varying time frames from immediate/short term to long term response operations
- varying access to equipment necessitating the use of improvised techniques
- varying levels of resources
- single or multi organisation responses

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop and maintain a team	1.1 Work contributions or suggestions from staff are continually sought and encouraged. 1.2 Contributions to team operations are acknowledged and suggestions are dealt with constructively. 1.3 Team members' skills are used and developed according to work requirements. 1.4 Team members are consulted about implementing new work practices.
2. Communicate objectives and required standards	2.1 Team members are provided with up-to-date information concerning the objectives and standards required by the organisation. 2.2 Team members' understanding of objectives and standards is checked. 2.3 Organisational standards and values relating to equal employment opportunity, anti discrimination and workplace harassment are modelled and promoted to team members.
3. Manage and improve performance of teams and individuals	3.1 Relevant and realistic team development plans are based on identified strengths and weaknesses of all team members. 3.2 Regular constructive feedback on all aspects of work performance is provided to individuals and the team. 3.3 Performance is assessed and addressed in a fair and timely manner in accordance with organisational guidelines and procedures.
4. Support and participate in development activities	4.1 Training needs of individuals and the team are identified and assessed on a regular basis in line with organisational guidelines and procedures. 4.2 An action plan to meet individual and team training and development needs is developed, agreed and

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	implemented. 4.3 On the job training is provided to the required organisational standard and to meet team needs. 4.4 Team members are encouraged and supported to attend ***training*** and to undertake other ***development opportunities.*** 4.5 Coaching and mentoring are utilised as development tools.
5. Provide leadership to individuals and teams	5.1 The link between the function of the team and the goals of the organisation is understood and communicated to the team. 5.2 Participative decision making is used to develop, implement and review work of the team and allocate responsibilities where appropriate. 5.3 Opportunities are given to individuals and teams to develop new and innovative work practices and strategies. 5.4 Delegation to individuals and team members is appropriate and relevant to team objectives and goals in accordance with organisational policy and procedures. 5.5 Allocated tasks are within the competence of team members and supported with appropriate authority, autonomy and training.
6. Manage difficulties to achieve positive outcomes	6.1 Potential or actual conflict between team members or between self and other individuals is recognised and addressed. 6.2 Difficulties in achieving required outcomes are identified, analysed and solutions developed and communicated to appropriate personnel. 6.3 Individuals experiencing difficulties which cannot be addressed within the team are referred to ***appropriate personnel*** according to organisational policies and procedures.
7. Create and maintain conditions for productive work	7.1 Work environment is monitored to ensure it is maintained in line with organisational standards. 7.2 Improvements to working environment are recommended and implemented where possible. 7.3 Workplace hazards are identified or anticipated and managed to maintain safe working conditions.

© Commonwealth of Australia, 2024 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- assessing training needs
- conflict resolution and negotiation
- consulting team members
- interpersonal skills
- leading and supervising individuals and teams
- problem solving
- providing constructive feedback

Required Knowledge

- all organisational policies
- anti discrimination and harassment
- industrial awards and agreements
- legislation relevant to work group activities
- occupational health and safety requirements
- organisational personnel practices and guidelines
- organisational policy relating to equal employment opportunity
- organisational quality standards and values
- principles of effective team operation and leadership
- principles of human resource management
- principles of leadership
- procedures
- protocols and standards affecting work group activities
- relevant training courses and development opportunities

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated by team leader meeting objectives and performance requirements. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** A combination of oral or written presentations on the job and/or in a simulated scenario.

© Commonwealth of Australia, 2024 Public Skills Australia

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Training and development opportunities may include:	• formal course participation • on the job training • work experience • external study • conference and seminar attendance • induction • job rotation
Training standards may include:	• industry best practice • legislative requirements • organisational standards • Australian standards • manufacturers' specifications • endorsed competencies
Appropriate personnel may include:	• human resource manager • counsellors • supervisors • team members • managers
Organisational policy procedures requirements and guidelines may vary between sectors and organisations and may include:	• legislation relevant to the organisation • operational • corporate and strategic plans • organisational performance standards • organisational personnel practices and guidelines • organisational quality standards • protocols • standard operating procedures • equal employment opportunity policies • occupational health and safety and welfare policy • learning strategies • codes of conduct • Civil Aviation Orders

PUAWER004B Respond to workplace emergencies

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to recognise emergencies in the workplace, to report emergencies and to take appropriate action.

For this unit workplace is defined as the area encompassed by an individual's responsibilities.

This unit has been developed to cover the broad range of emergencies and workplaces as considered in Australian Standard 3745—2010.

Application of the Unit

This unit applies to all personnel within an organisation, within all industries and in all contexts.

This unit places responsibility on individual employees in the workplace to recognise, report and take action during workplace emergency situations. This requirement is consistent with the legislative obligations of employees as prescribed in OHS legislation.

The knowledge and skills gained through the completion of this unit may be applied by all employees across all industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for emergency situations	1.1 Current workplace emergency procedures to be used by employees and other workplace occupants are identified and followed. 1.2 Emergency resources in the workplace are identified and located. 1.3 ***Emergency response exercises*** are participated in according to workplace emergency procedures.
2. Report emergencies and potential emergencies	2.1 Emergencies and potential emergencies are identified and reported according to workplace emergency procedures. 2.2 People in any immediate danger from the emergency or potential emergency are alerted according to workplace emergency procedures.
3. Respond to emergency warnings and advice	3.1 ***Emergency warnings*** and advice are responded to according to workplace emergency procedures. 3.2 ***Instructions*** from emergency control response personnel are complied with during an emergency. 3.3 Sources of additional information are identified and information is sought from relevant people if the situation is not clear.
4. Evacuate from the work area	4.1 Need to evacuate from the work area is determined according to the level of immediate danger or instruction issued under the workplace emergency procedures. 4.2 Work area is prepared for evacuation according to workplace emergency procedures and the nature of

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	the emergency. 4.3 Area of danger is evacuated according to workplace emergency procedures. 4.4 Where it is safe to do so, assistance is provided to ***people who may require assistance.*** 4.5 Evacuation procedures and instructions from emergency control organisation or ***emergency response personnel*** are followed. 4.6 Alternative pathways or methods of evacuation are identified, assessed and chosen according to workplace emergency procedures if usual means of evacuation are blocked or endangered. 4.7 Communication systems are used according to workplace procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively in an emergency situation as outlined in the workplace emergency procedures
- identify an emergency/potential emergency
- adhere to documented workplace emergency procedures

Required Knowledge

- circumstances where evacuation may need to be modified
- emergency reporting systems and procedures used on site
- emergency warning system, signals and instructions used on site
- evacuation alarms and workplace emergency procedures used at the workplace
- location of assembly areas and post-evacuation actions
- location of emergency equipment in the workplace
- procedures for reporting emergencies
- roles, responsibilities and authority of emergency personnel, emergency control organisation and emergency response team
- types of emergencies, the hazards and the evacuation actions associated with each one

© Commonwealth of Australia, 2024 Public Skills Australia

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to apply workplace procedures; to maintain own safety and the safety of others in emergency situations; and to follow workplace emergency procedures and the advice of emergency control organisation members.

Consistency in performance

Competency should be demonstrated over time with a range of emergencies that could be expected in the workplace including assisting people who may need assistance.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or in a simulated workplace.

Specific resources for assessment

Access to:

- scenarios that reflect a range of emergency situations that may be expected in the workplace
- appropriate emergency resources
- range of communication equipment relevant to the workplace
- workplace emergency procedures and documentation

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Emergency response exercises may include

- briefings
- debriefings
- emergency exercises, simulations and reviews
- table/desk top exercises

Emergency warnings may include

- audible/visual alarms
- audible or vibrating pagers
- coded or uncoded public address announcements
- e-mail
- screen alerts
- stench alarms

© Commonwealth of Australia, 2024 Public Skills Australia

People who may require assistance may include	• verbal alert • babies and children • people with a mobility, intellectual, visual, auditory or sensory impairment, either temporary or permanent, who require assistance during an emergency response • people from diverse cultural and linguistic backgrounds • people who are injured • people who are not able to comprehend the instructions given • pregnant women • the elderly
Emergency response personnel may include	• emergency control organisation members • counsellors • emergency response team members • police, fire and emergency services • peer support • recovery team

RIISTD201D Read and interpret maps

Modification History

Release	Comment
1	This unit replaces RIISTD201A Read and interpret maps
2	Removed irrelevant points in Knowledge Evidence; Editorial corrections
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to read and interpret maps in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

No licensing or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

1. Plan and prepare for navigation	1.1 Access, interpret and apply navigation documentation and ensure the work activity is compliant 1.2 Obtain, interpret, clarify and confirm navigation information, work requirements and travel details 1.3 Select maps, equipment and navigation aids, and check for accuracy, currency and operational effectiveness 1.4 Identify faults/errors in maps and equipment, and record, report and address issues 1.5 Establish and maintain communication plan
2. Plan the route	2.1 Assess and select route to destination, consider information from map/plan/field observations 2.2 Examine maps, and identify relevant symbols, information and navigation data 2.3 Identify and locate current position in the field, on map/plan

© Commonwealth of Australia, 2024 Public Skills Australia

	using landmarks and key geographical features 2.4 Identify and locate required destination on map/plan 2.5 Review the map route/plan, field observations, and local knowledge 2.6 Identify potential hazards and plan risk control measures 2.7 Measure and estimate distance to destination using map scale for selected route 2.8 Document in writing planned route on a navigation data sheet
3. Conduct navigation	3.1 Navigate planned route and schedule 3.2 Orientate the map/plan to surroundings and planned route 3.3 Use and interpret navigation aids 3.4 Navigate alternative routes to bypass obstacles and improve efficiency of route or course 3.5 Maintain clear and concise communication during navigation activity

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIISTD201A Read and interpret maps

Links

Assessment Requirements for RIISTD201D Read and interpret maps

Modification History

Release	Comment
1	This unit replaces RIISTD201A Read and interpret maps
2	Removed irrelevant points in Knowledge Evidence; Editorial corrections
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements requirements, procedures and techniques for the safe, effective read and interpret map activities including:
  - applying problem solving skills to resolve issues to navigation route
  - applying mathematical skills, including: basic angles and geometry for compass bearings, estimation and measurement
- works effectively with others to undertake and complete read and interpret map activities that meets all of the required outcomes including:
  - communicating by speaking clearly and listening actively
  - demonstrating the practice of working with others to read and interpret maps
  - maintaining written records and reporting
- demonstrates completion of the reading and interpreting of maps that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - reviewing the map route/plan by identifying and using:
    - symbols
    - navigation data
    - landmarks

© Commonwealth of Australia, 2024 Public Skills Australia

  - geographical features
  - scale
- identifying obstacles and navigating alternative routes
- undertaking a minimum 2 km navigation following established route
- traversing a 2 km route to specified destination
- orienting the map to ground and surrounds
- documenting the navigation route and details on the navigational data sheet
- communicating the planned navigation route to others

Knowledge Evidence

The candidate must demonstrate knowledge of reading and interpreting maps through:

- identifying fatigue management techniques
- identifying and using various types of communication systems and equipment
- engaging map reading and road navigation techniques
- identifying and interpreting types of maps, charts and scales and their uses
- determining representation of topographic features on maps and plans
- determining common scales used on maps and plans
- identifying and using features and use of a compass and factors that affect compass accuracy
- identifying the applications of a GPS
- advantages and disadvantages of different map and chart types and sources of error
- techniques for estimating distance travelled

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,

© Commonwealth of Australia, 2024 Public Skills Australia

- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

SISOBWG201A Demonstrate bushwalking skills in a controlled environment

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to participate in supervised bushwalks. This unit focuses on the demonstration of bushwalking skills through the participation in planned bushwalks and associated activities under the supervision of a suitably qualified leader.

Application of the Unit

This unit applies to those working as assistant bushwalking guides under supervision, in tracked or easy untracked areas that are reliably marked on maps and are obvious on the ground.

This unit may also apply to outdoor recreation leaders working for outdoor education or adventure providers, volunteer groups, not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan for a bushwalk.	1.1. Identify ***food and water requirements*** according to ***principles of nutrition*** and the ***duration of the walk*** to maintain physiological well being during activity. 1.2. Identify an appropriate activity location according to ***relevant legislation*** and ***organisational policies and procedures***. 1.3. Obtain and become familiar with appropriate map for the intended walk. 1.4. Access ***relevant sources*** to interpret ***weather and environmental information***. 1.5. Identify potential ***hazards*** associated with the activity.
2. Select equipment.	2.1. Select, fit and adjust ***equipment*** to ensure comfort and safety according to ***contextual issues*** and organisational policies and procedures. 2.2. Ensure pack weight is appropriate to body weight and level of fitness. 2.3. Select personal clothing and footwear and identify the design and or construction features that make it appropriate.
3. Apply bushwalking skills.	3.1. Adopt appropriate posture when lifting and carrying backpack. 3.2. Approach ***obstacles*** and hazards in a safe manner and minimise ***risks*** to self and group where possible. 3.3. Apply ***ascending techniques*** and ***descending techniques*** on slopes. 3.4. Follow a route in ***tracked or easy untracked areas***, demonstrating use of ***navigation aids***.
4. Evaluate the bushwalk.	4.1. Evaluate ***relevant aspects*** of the walk. 4.2. Identify improvements for future walks.

© Commonwealth of Australia, 2024 Public Skills Australia

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to:
  - read and interpret maps
  - analyse weather and environmental information
- planning and organising skills to select an appropriate activity location and equipment
- communication skills to:
  - follow instructions and directions from the supervisor
  - interact with other participants
- numeracy skills to navigate and follow a route using a map and compass
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of all bushwalking activities
- minimal impact walking codes to ensure protection of environment
- equipment types, characteristics and technology used for bushwalking, the advantages and disadvantages of the range of equipment provided by supervisor, and factors affecting appropriate selection of equipment
- packing techniques in order to protect personal and group equipment
- clothing requirements for outdoor activities and factors affecting appropriate clothing selection, such as layering and protective clothing
- footwear types, the advantages and disadvantages of different footwear, and factors affecting appropriate selection for the anticipated track conditions
- principles of nutrition to maintain health during activity
- navigation techniques in tracked or easy untracked areas to determine location, direction and potential hazards under supervision
- basic weather and environmental information to ascertain possible conditions and their affect on the activity
- emergency procedures and potential hazards relevant to the location to ensure risk minimisation to self and group.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2024 Public Skills Australia

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies relevant process to plan equipment and supply requirements according to the conditions and duration of the bushwalk
- demonstrates bushwalking techniques including ascending and descending techniques
- seeks advice and feedback from leader to improve skills and ensure safety of self and group
- evaluates and reflects on own bushwalking performance to identify strengths and weaknesses and areas that need improvement.

Context of and specific resources for assessment

Assessment must ensure participation in bushwalking activities in tracked and untracked areas that reflect local conditions and are of sufficient duration to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- resources and information, such as maps and meteorological data, to plan for the bushwalk
- a suitable outdoor location with tracks that are reliably marked on maps, are obvious on the ground and are inspected on a regular basis
- a qualified leader or supervisor
- bushwalking, navigation and safety equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of safe participation and demonstration of bushwalking skills
- oral or written questioning to assess knowledge of relevant legislation and organisational policies and procedures to enable safe conduct of all bushwalking activities
- written or verbal self evaluation
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOOPS202A Use and maintain a temporary or overnight site.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Food and water requirements may include:	• menu planning and preparation • range of foods • emergency food and water.
Principles of nutrition may include:	• food groups • dietary guidelines • essential nutrients • individual food requirements and allergies.
Duration of the walk may include:	• short walks of up to two hours • day walks • two day walks.
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations.
Organisational procedures may include:	• occupational health and safety • emergency procedures • communication protocols • use and maintenance of equipment • code of ethics.
Relevant sources may include:	• Bureau of Meteorology • media • land managers or agencies • local knowledge.
Weather and environmental information may include:	• satellite images • daily and weekly forecasts • maximum and minimum temperatures • weather warnings • event warnings • river levels • synoptic charts • high and low tide predictions.

© Commonwealth of Australia, 2024 Public Skills Australia

Hazards may include:	• temperature extremes • slippery or unstable terrain • dangerous animals and insects • stinging trees and nettles • dense vegetation • group management hazards.
Equipment may include:	• bushwalking equipment • navigation equipment • safety and first aid equipment • overnight equipment.
Contextual issues may include:	• weather conditions, including times • season • transport • location • trip distance and duration • group objectives • group size.
Obstacles may include:	• rivers • logs • rocks • gullies • exposed areas.
Risks may include:	• hypothermia • heat exhaustion • injuries • exhaustion • lost party or party member • equipment failure.
Ascending techniques may include:	• zig-zagging • placing feet down flat with a deliberate step • resting heels on any available projections.
Descending techniques may include:	• placing toes against projections to avoid overstriding • avoiding placing feet down heavily • using flat-footed or stiff-heeled technique.
Tracked or easy untracked areas include:	• those that align with Class 4 Tracks within the Australian Standard for Walking Tracks.
Navigation aids may include:	• maps • compass.
Relevant aspects may include:	• objectives

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to navigate in controlled environments where there are significant landmarks.

Application of the Unit

This unit applies to those working as assistant outdoor recreation guides, such as bushwalking or skiing, under supervision, in controlled environments that are reliably marked on maps and are obvious on the ground, snow or in the water.

This unit may also apply to outdoor recreation leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the Evidence Guide.
1. Plan for navigation.	1.1. Obtain and become familiar with ***map or maps*** for the activity. 1.2. Identify ***symbols and information*** contained on the map and how these may be used in navigation. 1.3. Apply information contained on the map to plan an efficient route or course and consider all ***relevant factors***. 1.4. Obtain and identify features of a compass and how it is used to maintain a designated course. 1.5. Calculate grid and magnetic bearings using a map and compass. 1.6. Obtain ***additional information*** to assist in navigation from the map. 1.7. Identify emergency or contingency escape routes.
2. Navigate in controlled environments.	2.1. Orientate map to ***surroundings*** with and without the use of a compass. 2.2. Follow a route in ***controlled environments***, demonstrating use of ***navigation aids*** according to ***relevant legislation*** and ***organisational policies and procedures***. 2.3. Apply ***techniques for estimating distance*** travelled. 2.4. Maintain, where necessary, a compass course while bypassing an ***obstacle***. 2.5. Identify unknown features in the field using map and compass. 2.6. Select a route or course for the surroundings and conditions.
3. Evaluate navigations.	3.1. Evaluate ***relevant aspects***. 3.2. Identify improvements for future navigations.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills

- literacy skills to:
  - read and interpret maps
  - follow instructions and procedures
- planning and organising skills to:
  - obtain navigation equipment
  - plan a route or course
- communication skills to interact with group leader and other participants to maintain a positive and safe environment while navigating
- numeracy skills to navigate and calculate grid and magnetic bearings and distances using a map and compass.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of all activities
- different types of maps, and their advantages and disadvantages to enable appropriate map selection
- map features, including symbols, contour lines, scales, grid lines and legends to enable effective map reading
- features of a compass, their use and factors that affect compass accuracy
- route planning and factors that should be considered, such as weather and type of terrain
- navigation techniques in controlled environments to determine distance, location, direction and potential hazards.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • applies relevant process to plan a route in controlled environments and demonstrates navigation techniques to orientate and follow directions • seeks advice and feedback from leader to improve skills and ensure safety of self and group • evaluates and reflects on own navigation performance to identify strengths, weaknesses and areas that need improvement.

© Commonwealth of Australia, 2024 Public Skills Australia

Context of and specific resources for assessment	Assessment must ensure participation in navigation activities in controlled environments that are of sufficient breadth and duration to demonstrate competency and consistency of performance. Assessment must also ensure access to: • a suitable outdoor location, with tracks that are reliably marked on maps, are obvious on the ground and are inspected on a regular basis that align with Class 4 Tracks within the Australian Standard for Walking Tracks • navigation equipment such as map or maps, compass and activity specific equipment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of the planning and review process with evidence of reference to resources and aids • oral or written questioning to assess knowledge of navigation techniques • observation of safe participation and demonstration of navigation skills, such as maintaining a compass course while bypassing an obstacle • third-party reports from a supervisor detailing performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • SISOBWG201A Bushwalk in controlled environments or • SISOSKT201A Demonstrate basic cross country skiing skills or • SISORAF201A Demonstrate rafting skills on moving water.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Map or maps may include:	• cadastral and topographic maps • charts • guide books and diagrams.
Symbols and information may include:	• grid lines and numbers • contour lines • scale • map legend • topographic features • markers and beacons • water depth.
Relevant factors may include:	• type of terrain and gradient • weather conditions • experience • hazards • access to required resources and facilities.
Additional information may include:	• altitude gain or loss • distance • gradient • travelling time • magnetic bearings • water depth.
Surroundings may include:	• ground or terrain • snow conditions • bodies of water • beacons and markers • natural formations • landmarks • man-made features.
Controlled environments may include:	• areas reliably marked on maps • areas obvious on the ground or snow or water • tracks align with Class 4 Tracks within the Australian Standard for Walking Tracks.
Navigation aids may include:	• track and creek junctions and crossings • survey markers • beacons • track markers • cairns

© Commonwealth of Australia, 2024 Public Skills Australia

	• paths • lines • signs • arrows • compass • man-made objects or features • transits.
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations.
Organisational policies and procedures may include:	• occupational health and safety • use and maintenance of equipment • communication protocols • code of ethics.
Techniques for estimating distance may include:	• time • observation of surroundings • pacing.
Obstacles may include:	• rivers • logs • rocks • gullies • trees • snow conditions • exposed areas.
Relevant aspects may include:	• objectives • planning process • activity site • weather • equipment selection • clothing selection • food selection • instructional content • instructional technique • assessment technique • group feedback • directing techniques • rescue techniques employed.

SISONAV302A Apply navigation skills in an intermediate environment

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to navigate in uncontrolled environments within an activity-specific context. This includes areas with few obvious visible landmarks, minimal clearance and limited modifications made to the natural surface and where the changes in weather and visibility may occur.

Application of the Unit

This unit applies to outdoor recreation guides or instructors working for private outdoor adventure companies and or school based outdoor education programs, such as holiday programs and camps. Activities requiring navigation may include bushwalking, skiing, snowboarding, off - highway motorcycling or mountain biking in uncontrolled environments with few obvious visible landmarks, minimal clearance and signage, limited modifications made to the natural surface and may include terrain and man-made hazards, such as cliff lines or dense forests.

This unit may also apply to navigation on difficult or trackless waterways where there are few obvious visible waterway landmarks and the craft may be affected by wind and or currents and tides.

This unit also applies to outdoor recreation leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

ELEMENT	PERFORMANCE CRITERIA
3. Evaluate navigations	3.1. Evaluate ***relevant aspects*** of navigation. 3.2. Identify improvements or modifications for future navigations in uncontrolled environments.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to:
  - read and interpret maps
  - follow instructions and procedures
  - develop a navigation data sheet
- planning and organising skills to:
  - obtain navigation equipment
  - plan and follow routes and courses
- numeracy skills to navigate and calculate grid and magnetic bearings and distances using a map and compass
- problem-solving skills to:
  - maintain a compass course while bypassing an obstacle
  - fix position and determine current location when lost in uncontrolled environments.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of all activities
- different types of maps, sources of error and accuracy, and their advantages and disadvantages to enable selection of appropriate maps
- map features, including symbols, contour lines, scales, grid lines and legends to enable effective map reading
- features of a compass, their use and factors that affect compass accuracy
- route planning and factors that should be considered, such as weather and type of terrain
- navigation techniques in uncontrolled environments to determine distance, location, direction and potential obstacles
- techniques for estimating distance travelled, determining position when lost and navigating around obstacles.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • applies relevant process to plan a route in uncontrolled environments and demonstrates navigation techniques to orientate and follow directions • navigates around obstacles in uncontrolled environments while maintaining a compass course • evaluates and reflects on own navigation performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure participation in navigation activities in uncontrolled environments that are of sufficient breadth and duration to demonstrate competency and consistency of performance. Assessment must also ensure access to: • a suitable outdoor location with uncontrolled environments within an activity-specific context that align with Class 5 Tracks within the Australian Standards for Walking Tracks • navigation equipment such as map or maps, compass, GPS and activity-specific equipment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • oral or written questioning to assess knowledge of navigation techniques used to maintain a course in uncontrolled environments • observation of safe participation and demonstration of navigation skills, such as maintaining a compass course while bypassing an obstacle and identifying unknown features when lost • third-party reports from a supervisor detailing performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

© Commonwealth of Australia, 2024 Public Skills Australia

- SISOBWG302A Apply intermediate bushwalking skills.

or

- SISOMBK302A Apply advanced off-road cycling skills.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Map or maps may include:

- cadastral and topographic maps
- charts
- hydrographic
- aerial photographs
- guide books and diagrams
- satellite imagery
- digital map
- sketch maps.

Symbols and information may include:

- grid lines and numbers
- contour lines
- magnetic variation
- scale
- map legend
- topographic features
- markers and beacons
- water depth.

Contextual issues may include:

- weather conditions, including times
- season
- transport
- location
- trip distance and duration
- group objectives
- group size.

Relevant legislation may include:

- occupational health and safety
- permits or permission for access
- environmental regulations.

© Commonwealth of Australia, 2024 Public Skills Australia

Organisational policies and procedures may include:	• occupational health and safety • communication protocols • use and maintenance of equipment • code of ethics.
Navigation data sheet may include:	• grid reference points • grid and magnetic bearings • distances • estimated travelling times • height gain or loss • gradient • identifiable features • escape routes.
Navigation techniques may include:	• use of compass • linear features • point features • attack points • aiming off • collecting features • spiral search • sweep search • backbearings and resections • use of Global Positioning Systems (GPS).
Surroundings may include:	• ground or terrain • snow conditions • bodies of water • beacons and markers • natural formations • landmarks • man-made features.
Uncontrolled environments may include:	• limited modifications to the natural surface • minimal clearance along the track and signage • terrain and man-made hazards • tracks align with Class 5 Tracks within the Australian Standards for Walking Tracks • areas of water where there are few obvious visible landmarks.
Navigation aids may include:	• track and creek junctions and crossings • survey markers • beacons • track markers • cairns

ELEMENT	PERFORMANCE CRITERIA
unit of competency.	required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the Evidence Guide.
1. Determine the environmental impacts of outdoor recreation activities.	1.1. Identify the ***impacts*** caused by participation in specific outdoor recreation activities. 1.2. Determine the possible ***causes*** of these impacts. 1.3. Identify the consequences of the impact on the environment. 1.4. Source and analyse information on key ***organisational practices and procedures*** used to reduce the environmental impact.
2. Adopt minimal impact practices.	2.1. Follow instructions of ***relevant personnel*** to apply ***minimal impact environmental practices*** and procedures during outdoor activities. 2.2. Use equipment in a manner that reduces impact on the natural environment. 2.3. Demonstrate appropriate behaviour toward the environment when interacting with staff and participants. 2.4. Utilise heritage or cultural sites according to ***relevant legislation*** and or directions from relevant personnel. 2.5. Report ***inappropriate environmental practices*** to relevant personnel.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - follow instructions to implement minimal environmental impact practices in outdoor activities
  - report inappropriate practices
- literacy skills to read and interpret organisational procedures to reduce environmental impact
- problem-solving skills to:
  - anticipate the consequences of outdoor recreation activities on the environment
  - implement strategies to reduce the potential impact.

© Commonwealth of Australia, 2024 Public Skills Australia

Required knowledge

- legislation and codes relating to environmental protection and cultural and heritage protection for the activity area and location to enable outdoor recreation activities to be undertaken responsibly
- area restrictions and resource management requirements to enable compliance during outdoor recreation activities
- basic ecological principles and interrelationships to enable understanding of potential causes and consequences of environmental impact
- organisational procedures for minimal environmental impact practices relevant to specific activities, sites or locations.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • utilises environmental resources responsibly and with minimal impact to participate in outdoor recreation activities • complies with general legislation, land managers requirements, industry codes and activity specific codes of practice to minimise environmental impact • applies contingency management techniques to deal with problems in implementing minimal environmental impact practices.
Context of and specific resources for assessment	Assessment must ensure implementation of minimal impact practices relevant to specific activities, sites and or locations while participating in outdoor recreation activities to demonstrate competency and consistency of performance, on multiple occasions. Assessment must also ensure access to: • an outdoor environment or site to participate in outdoor activity • relevant personnel • documentation such as organisational minimal environmental impact procedures and practices and relevant environmental protection legislation.

© Commonwealth of Australia, 2024 Public Skills Australia

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate's ability to implement minimal environmental practices while participating in and assisting in an outdoor activity
- written and oral questioning to assess knowledge of key environmental practices and procedures to minimise activity impact appropriate to the locality or site of the outdoor activity
- third-party reports from a supervisor detailing evidence of the candidate's implementation of minimal environmental impact practices during an outdoor activity.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOODR201A Assist in conducting outdoor recreation sessions
- Activity specialisations.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Impacts may include:

- pollution
- vegetation tramping and breakage
- breakage and dislodgment of rock and other formations
- compaction of soil and other deposits
- disturbance or removal of fauna
- introduction of new flora and fauna
- chemical alteration of environments
- damage to, or inappropriate behaviour in, cultural sites
- graffiti
- reduction in decomposing timber

© Commonwealth of Australia, 2024 Public Skills Australia

	• campfire scars • noise.
Causes may include:	• development of facilities and signs • increased use.
Organisational practices and procedures may include:	• restricting access • limiting group size • seasonal restrictions • use of permits • codes of ethics and conduct • heritage and cultural site protocols and guidelines.
Relevant personnel may include:	• supervisors • resource managers • peak activity groups • custodians.
Minimal impact environmental practices may include:	• avoidance of sensitive areas • site and route selection • limited party size • removal of rubbish • appropriate sanitation practices • use of fuel stoves • use of low impact equipment • keeping to marked tracks or routes • appropriate washing procedures • respect and protection of heritage and cultural sites • camp fire management and rehabilitation.
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations • marine regulations.
Inappropriate environmental practices may include:	• trampling over sensitive areas • leaving rubbish behind • accessing out of bounds areas • disturbing cultural sites.

	environmental impact.
	4.5. ***Pack up*** and clean area when leaving according to relevant legislation and organisational policies and procedures.
5. Evaluate the activity.	5.1. Evaluate ***relevant aspects*** of using and maintaining an overnight site.
	5.2. Identify improvements for future overnight stays.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy and numeracy skills to:
  - read and interpret legislation and organisational policies and procedures
  - analyse weather and environmental information
- planning and organising skills to:
  - allocate and select equipment for overnight stay
  - establish and erect shelter at an appropriate site
- communication skills to:
  - interact with other participants
  - work as a team to set up camp and maintain a positive and safe environment
- problem-solving skills to:
  - deal with unforeseen circumstances
  - keep warm and sheltered, in the case of extreme environmental conditions and or loss of equipment
  - handle and prepare food hygienically
  - apply minimal impact camping techniques
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of camping activities
- minimal impact camping and walking codes to ensure protection of environment
- equipment, clothing, footwear, food and water required for the duration of activity
- packing and maintenance techniques before, during and after the activity to protect personal and group equipment and ensure prolonged life
- principles of nutrition to maintain health and energy during activity

© Commonwealth of Australia, 2024 Public Skills Australia

- food and water in emergency situations to maintain health for prolonged periods
- food preparation and cooking methods used in outdoor environments
- sanitation procedures in outdoor environments to avoid contamination and illness
- types and purposes of different shelters to enable selection and use in various weather conditions
- weather and environmental information to ascertain possible conditions and their affect on the activity including life threatening conditions
- emergency procedures and potential hazards relevant to the location to ensure risk minimisation to self and group.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • makes logistical arrangements based on knowledge of the area and selects equipment and supply requirements according to the conditions and duration of the activity • applies camping techniques and adapts to contingencies that may arise, such as sudden change of weather • takes precautions to maintain physical well being of self and group, such as hygiene and sanitation procedures to prevent contamination and illnesses • evaluates and reflects on performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure establishment, use and maintenance of a temporary or overnight site on multiple occasions to demonstrate competency and consistency of performance. Assessment must also ensure access to: • resources and information regarding site to plan logistical arrangements • a suitable outdoor location • appropriate camping equipment.
Method of assessment	A range of assessment methods should be used to assess

© Commonwealth of Australia, 2024 Public Skills Australia

practical skills and knowledge. The following examples are appropriate for this unit:

- observation of planning logistical arrangements for the activity
- oral and or written questioning and reports to assess knowledge in relation to human impact on the environment
- observation of establishing and maintaining an overnight shelter
- observation of dealing with contingencies, such as repairing and or improvising on items of essential equipment in the case of breakage or loss.
- written and or verbal self evaluation.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOOPS201A Minimise environmental impact
- Activity-specific units requiring the use and maintenance of a temporary or overnight site.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information may include:

- maps and charts
- guide books
- land managers and agencies.

Temporary sites may include:

- rest stops
- activity sites
- temporary or overnight shelter.

Relevant legislation may include:

- occupational health and safety
- permits or permission for access
- environmental regulations
- marine regulations.

Organisational policies and procedures may include:

- occupational health and safety
- use and maintenance of equipment
- camp fire regulations

- emergency procedures
- code of ethics.

Relevant sources may include:

- Bureau of Meteorology
- media
- land managers or agencies
- local knowledge.

Weather and environmental information may include:

- satellite images
- daily and weekly forecasts
- maximum and minimum temperatures
- weather warnings
- event warnings
- river levels
- synoptic charts
- high and low tide predictions.

Hazards may include:

- temperature extremes
- slippery or unstable terrain
- dangerous animals and insects
- stinging trees and nettles
- dense vegetation
- group management hazards.

Human impact may include:

- pollution
- physical damage
- alteration to the environment
- visual
- noise
- damage to cultural heritage
- crowding.

Risk may include:

- hypothermia
- frostbite
- dehydration
- heat exhaustion
- hyperthermia
- injuries and illness
- insect bites and stings
- food poisoning
- lost party or party member
- falling trees and branches.

Food and water requirements may include:

- menu planning and preparation
- range of foods:
  - perishability
  - packaging

© Commonwealth of Australia, 2024 Public Skills Australia

- storage
- cooking methods.

Principles of nutrition may include:

- food groups
- dietary guidelines
- essential nutrients
- food preparation:
  - methods of cooking
  - safe food handling and hygiene practices
- individual food requirements and allergies.

Equipment may include:

- torch
- tent
- poles
- tarp
- sleeping bag
- cooking system and utensils
- pots and pans
- ropes
- plastic bags for rubbish
- first aid kit
- activity-specific equipment.

Contextual issues may include:

- weather conditions, including times
- season
- transport
- location
- trip distance and duration
- group objectives
- group size.

Shelter may include:

- tents
- bivvies
- snow caves
- lean-to
- mobile trailers and vans.

Impact on natural environment may include:

- soil
- plants
- water
- geology
- wildlife.

Pack up may include:

- gather all rubbish for removal
- wipe or clean gear.

Relevant aspects may include:

- objectives
- planning process

SISOYSB201A Demonstrate basic skills to sail a small boat in controlled conditions

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to rig and sail a small boat on a marked course in controlled conditions, under supervision. This unit also focuses on participating in capsize, towing and crew recovery drills.

Application of the Unit

This unit applies to those who assist in small boat sailing activities under supervision in a range of controlled conditions.

This unit also applies to leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the	Performance criteria describe the performance needed to demonstrate

ELEMENT	PERFORMANCE CRITERIA
essential outcomes of a unit of competency.	achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the Evidence Guide.
1. Plan for the sailing activity.	1.1. Select an activity site or location with ***controlled conditions*** according to ***relevant legislation*** and ***organisational policies and procedures***. 1.2. Access ***relevant sources*** to interpret ***weather and environmental information***. 1.3. Identify potential ***hazards*** within the ***small boat*** sailing environment and implement strategies to reduce ***risks***, as advised by the supervisor. 1.4. Identify ***food and water requirements*** to maintain physiological well being during activity.
2. Select equipment.	2.1. Select small boat and ***equipment*** according to design and construction features and check working condition. 2.2. Identify and select suitable ***sails*** for boat. 2.3. Select clothing suitable for the prevailing and expected conditions. 2.4. Fit and adjust equipment to ensure comfort, safety and suitability.
3. Rig and de-rig small boat.	3.1. Identify the ***main parts of a small boat*** and fittings on the mast and boom. 3.2. Identify ***sails*** and their component parts. 3.3. Use ***appropriate knots*** to rig ***sails***, under supervision.
4. Launch and land small boat.	4.1. Determine ***wind direction*** to identify safe and easy launching location. 4.2. Launch and land the ***small boat*** in calm, ***controlled conditions*** while maintaining stability, direction and ***speed control***. 4.3. Adopt position on the ***small boat***, and secure the centreboard and rudder.
5. Sail a marked course in calm conditions.	5.1. Apply ***primary boat controls***, and identify their effect on boat movement. 5.2. ***Determine wind direction and use wind, wind indicators and directional change to follow the marked course***. 5.3. Use wind indicators and angle of the sail to vary speed ***and*** use a basic heave to as a reference point. 5.4. Identify when the boat is being sailed close hauled and sail to the destination directly upwind 5.5. Identify the No-Go Zone perimeters and tack the boat from close-hauled to close-hauled.

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	5.6. Determine when the boat is being sailed on a dead run and gybe the mainsail while the boat remains sailing on a dead run. 5.7. Identify potential hazards of gybing while sailing downwind, and implement strategies to avoid the unexpected gybe.
6. Perform capsize drills.	6.1. Identify and implement procedures for capsize according to relevant legislation and organisational policies and procedures. 6.2. Demonstrate technique and order of events to right a small boat, as part of a team, according to organisational policies and procedures.
7. Participate in towing drills.	7.1. Identify situations requiring ***towing*** and prepare boat for towing. 7.2. Tow boat safely under instructor guidance, according to organisational policies and procedures. 7.3. Release ***boat*** from tow under instructor guidance, according to organisational policies and procedures. 7.4. Implement, under direct supervision and instructor guidance, a ***crew recovery drill***, in the event of separation of a crew member from the boat.
8. Return small boat ashore.	8.1. Prepare and raise centreboard and rudder for return. 8.2. Carry and stow the ***small boat*** according to supervisor's directions and organisational policies and procedures. 8.3. Stow or store ***equipment*** according to manufacturer's recommendations, supervisor's directions and organisational policies and procedures.
9. Evaluate sailing activity.	9.1. Evaluate ***relevant aspects*** of the activity. 9.2. Identify improvements for future small boat sailing experiences in controlled conditions.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- problem-solving skills to:
  - rig boat using suitable knots
  - determine wind direction
  - maintain stability, position, direction and speed control
  - determine when the boat is being sailed on a dead run
- planning and organising skills to:

© Commonwealth of Australia, 2024 Public Skills Australia

  - select an appropriate location with controlled conditions
  - source small boat, equipment, and food and water
  - prepare for capsizing and towing drills
- numeracy skills to:
  - select correct sized sail for boat
  - use the angle of the sail to slow and speed up the small boat
  - determine points of sail in relation to course, wind direction and angles
- literacy skills to interpret and apply weather and environmental information, relevant legislation and organisational policies and procedures
- communication skills to interact with other craft and crew members
- teamwork skills to:
  - right a small boat after capsize
  - assist and support crew members in all aspects of sailing a small boat
- emergency response and crew recovery skills to enable initial response to emergencies.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of sailing activities
- rules of the road to safely sail alongside other water craft
- types of small boats and equipment, characteristics and technology used for sailing
- knots and their application to a sailing setting to enable accurate rigging of sails
- sailing manoeuvres and techniques to enable negotiation of courses
- sailing and weather terminology to enable clear communication between crew members
- the main points of sailing and sail positions to manoeuvre small boat efficiently
- information on tide and wind to safe launching, landing and manoeuvring
- capsize procedures and methods to right a small boat
- food and water requirements to maintain health and energy during activities
- weather and environmental information to ascertain possible conditions and their affect on the activity
- emergency, towing and recovery procedures to ensure risk minimisation.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate	Evidence of the following is essential: • selects small boat and equipment suitable for

© Commonwealth of Australia, 2024 Public Skills Australia

competency in this unit	controlled conditions and uses terminology to identify parts and fittings of small boat • rigs small boat using appropriate knots, and launches, lands and returns boat while maintaining stability, direction and ***control*** • applies capsize procedures to right a small boat, and participates in towing and crew recovery drills while maintaining adequate communication with crew • evaluates and reflects on own small boat sailing performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure participation in multiple small boat sailing activities in controlled conditions that are of sufficient duration to demonstrate competency and consistency of performance. Assessment must also ensure access to: • resources and information to plan and select equipment for the sailing activity • a suitable location with sheltered waters, light winds of 0-8 knots, wave height up to 0.3m, and controlled conditions suitable to participants • a qualified leader or supervisor • a small sailing boat, suitable sails and safety equipment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • oral or written questioning to assess knowledge of small boat sailing environments, including wind direction and speed and possible hazards • observation of safe participation and demonstration of basic small boat sailing techniques and manoeuvres • third-party reports from a supervisor detailing performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

© Commonwealth of Australia, 2024 Public Skills Australia

wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Controlled conditions may include:	• light winds of 0-8 knots • sheltered waters with partially smooth waters • wave height up to 0.3m.
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations • marine regulations.
Organisational policies and procedures may include:	• occupational health and safety • use, maintenance and storage of equipment • communication protocols • ***sailing etiquette*** • minimal impact environmental codes • code of ethics.
Relevant sources may include:	• Bureau of Meteorology • media • land managers or agencies • coastal patrol or coastguard • volunteer marine rescue • local knowledge.
Weather and environmental information may include:	• satellite images • daily and weekly forecasts • maximum and minimum temperatures • weather warnings • event warnings • river heights • synoptic charts • high and low tides.
Hazards may include:	• temperature extremes • slippery or unstable terrain • dangerous animals and insects • stinging trees and nettles • dense vegetation • group management hazards • slippery or unstable shore • poor posture, poor technique • poor carrying techniques • loose or insecure craft when being transported

© Commonwealth of Australia, 2024 Public Skills Australia

	• other craft.
Small boat may include:	• 18ft and under • single masted unballasted mono or multi-hulled vessel • stayed or unstayed mast • one, two or three sails.
Risks may include:	• hypothermia • heat exhaustion • injuries • exhaustion • lost party or party member • equipment and course failure.
Food and water requirements may include:	• range of foods • energy content • hydration.
Equipment may include:	• safety and rescue equipment • protective equipment • small boat • sails.
Sails may include:	• mainsail • jib • spinnaker.
Appropriate knots may include:	• figure of eight • bowline • half hitch • reef knot • rolling hitch.
Primary boat controls may include:	• mainsail • jib • balance • trim • centreboard.
Towing may include:	• single tow • multiple tow • pick-up of tow • release from tow.
Crew recovery drills may include:	• maintain sight of crew overboard at all times • teamwork • approach and stop to leeward of crew member in water • slow speed of approach

© Commonwealth of Australia, 2024 Public Skills Australia

Relevant aspects may include:

- assist crew on board.
- objectives
- planning process
- activity site
- weather
- equipment selection
- clothing selection
- food selection
- instructional content
- instructional technique
- assessment technique
- group feedback
- directing techniques
- rescue techniques employed.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify the role and function of key stakeholders.	1.1 Identify key stakeholders and personnel that impact on the organisation and its service delivery. 1.2 Access and analyse information on the roles and functions of key stakeholders.

© Commonwealth of Australia, 2024 Public Skills Australia

	1.3 Determine the decision making processes within key stakeholder organisations and their impact on the organisation.
	1.4 Research types of information and resources available from key stakeholder personnel.
2. Develop and implement strategies to promote effective stakeholder relationships.	2.1 Consult with stakeholders to establish their needs.
	2.2 Plan activities to facilitate effective rapport with stakeholders.
	2.3 Adopt communication techniques and methods appropriate to the needs of stakeholders.
	2.4 Identify and respond to factors that may negatively impact stakeholder communication
	2.5 Develop strategies to maintain working relationships with stakeholders.
3. Evaluate stakeholder relationships.	3.1 Seek feedback from stakeholders on communication and engagement activities.
	3.2 Assess organisational strategies in developing effective working relationships with stakeholders.
	3.3 Modify strategies in consultation with key organisational and stakeholder personnel.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for SISXMGT001 Develop and maintain stakeholder relationships

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop, implement and evaluate strategies to promote effective stakeholder relationships with at least two of the following stakeholder types:
  - government agencies
  - funding agencies
  - community organisations
  - peak bodies
  - boards of management
  - enterprises
  - industry associations
- select and use at least three different techniques and methods for stakeholder communication.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- key stakeholders likely to impact the organisation and the types of strategies and communication methods for building relationships, as specified in the Performance Evidence
- roles and functions of different stakeholders in the industry and how these are changing in relation to:
  - funding
  - management
  - decision-making
  - sponsorship
- organisational policies and procedures for stakeholder relationship management:
  - stakeholder consultation and engagement
  - communication protocols and methods for different situations
  - evaluation measures and criteria
  - conflict resolution procedures

© Commonwealth of Australia, 2024 Public Skills Australia

    - information management and security
- strengths and weaknesses of different types of stakeholder communication
- barriers to effective communication with stakeholders and ways to respond
- information and resources of stakeholders:
    - facilities
    - equipment
    - grants or funding
    - personnel
    - services
- legislative requirements relating to communication of information.

Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated industry environment.

Assessment must ensure use of:

- legislative information related to communication of information
- information about stakeholder groups / organisations
- individuals and groups with whom the candidate builds relationships; these can be:
    - individuals in industry organisations, or
    - individuals who participate in project activities, role plays or simulated activities, set up for the purpose of assessment, within a training organisation.

Assessment activities that allow the individual to:

- plan and implement strategies over time.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SITEEVT010 Manage on-site event operations

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to manage on-site operational activities for the staging of events. It requires the ability to finalise operational plans, oversee event set-up, execution and break-down, and evaluate the operational success of events.

This unit is relevant to events that are diverse in nature and are coordinated in many industry contexts, including the tourism, hospitality, sport, cultural and community sectors.

It applies to event coordinators and managers as well as venue duty, front of house and operations managers who operate independently, and are responsible for operational decisions. They may work in event management companies, in event venues, or in organisations that organise their own events.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

essential outcomes.	demonstrate achievement of the element.
1. Finalise event preparations.	1.1. Check final arrangements for event and address any discrepancies or outstanding matters. 1.2. Analyse event requirements and develop plans and procedures for event staging. 1.3. Prepare and collate operational documentation to facilitate effective on-site management, and distribute to relevant personnel. 1.4. Develop and provide event briefings to relevant personnel in advance of event. 1.5. Minimise use of printed materials and maximise electronic transmission of documents to reduce waste.
2. Oversee event set-up.	2.1. Establish on-site contact with contractors and reconfirm all requirements. 2.2. Assess all aspects of event set-up against prearranged service agreements and check for safety and ease of attendee access. 2.3. Identify deficiencies and discrepancies and take prompt action to resolve. 2.4. Conduct final briefing on event operational details, including communication and control mechanisms.
3. Monitor event operation.	3.1. Monitor event operation through observation and communication with relevant personnel to ensure effective delivery of services. 3.2. Identify and quickly evaluate operational problems as they arise and take prompt action to resolve. 3.3. Monitor compliance with environmental and social sustainability procedures to ensure minimal impacts. 3.4. Liaise with client throughout event to ensure satisfaction with service delivery and make necessary adjustments.
4. Oversee event break-down.	4.1. Ensure event break-down is completed according to agreements. 4.2. Check and sign invoices according to contractor agreements. 4.3. Debrief relevant personnel to improve future event service delivery.
5. Evaluate operational success of event.	5.1. Obtain feedback from customers and seek input from personnel and contractors on event operations. 5.2. Reflect on and evaluate operational problems. 5.3. Provide recommendations for improvements to future event management practices.

© Commonwealth of Australia, 2024 Public Skills Australia

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	• interpret complex event planning documentation.
Writing skills to:	• write complex and detailed, yet easily accessible, event operational documents.
Oral communication skills to:	• provide precise instructions to event team members and contractors throughout the operation of the event • negotiate solutions and provide clear instructions when problems arise.
Numeracy skills to:	• interpret event budgets and event service agreement costings to determine correct on-site supply of contracted services • work quickly and accurately with budget figures to calculate effect on event profitability when resolving on-site problems.
Problem-solving skills to:	• negotiate solutions with clients, and internal and external personnel under pressure where time constraints play a key factor.
Teamwork skills to:	• lead a team of event staging personnel and external contractors to effectively deliver events • consult with team members and take account of suggested solutions to on-site staging problems.
Self-management skills to:	• take responsibility for the finalisation of event plans and on-site coordination of the delivery of the event.
Technology skills to:	• use calculators, computers, software programs and printers for processing event documentation • use two-way communication equipment for on-site management.

Assessment Requirements for SITEEVT010 Manage on-site event operations

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- manage on-site event operations for at least one event type listed in the knowledge evidence with multiple operational components, overseeing event:
  - set-up
  - operation
  - break-down
- develop comprehensive plans, procedures and operational documentation for staging at above event
- conduct event briefings prior to and following the above event
- liaise and consult with contractors and other relevant personnel during event finalisation, operation and break-down to ensure service agreements are met and potential risks are mitigated
- manage on-site event operations in live time where commercially realistic time pressures and constraints play a key factor.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- types of events:
  - business and corporate
  - entertainment and leisure
  - exhibitions, expositions and fairs
  - festivals
  - fundraising
  - government and civic
  - marketing
  - meetings and conventions
  - sports
- characteristics of different types of events; their purpose, format and running order
- personnel and others involved in the operation of an event:

    - clients
    - contractors
    - event operations team
    - exhibitors
    - merchandisers
    - organising committee
    - sponsors
    - suppliers
    - venue coordinators or duty managers
    - volunteers
- roles, responsibilities, hierarchy of controls, and reporting for event staging of:
    - corporate clients
    - internal event team members, venue personnel and external contractors
    - on-site event manager
- features and functions of two-way communication equipment used to facilitate communication between event personnel
- techniques for managing stress and time during operation of events
- types of event contractors:
    - caterers
    - display suppliers
    - entertainers
    - food and beverage personnel
    - florists
    - equipment hire companies
    - registration and ticket sales specialist companies
    - security personnel
    - speakers and facilitators
    - suppliers of technical equipment and services
    - venue coordinators or duty managers
- key features and functions of event staging products and services:
    - catering
    - displays, stands and signage
    - exhibitor services
    - security
    - talent
    - technical equipment and services:
        - audiovisual
        - lighting
        - rigging
        - sets

© Commonwealth of Australia, 2024 Public Skills Australia

    - sound
    - special effects
    - stage design
  - venue or site:
    - furniture
    - layouts
    - registration areas and equipment
    - styling
- styles used in venue room set-up and their different purposes:
  - banquet
  - classroom
  - cabaret
  - theatre
  - u shape
- formats for, inclusions, and uses of:
  - operational plans and procedures used to manage on-site event logistics:
    - event documentation issued to operational personnel and contractors
    - briefing papers
    - running sheets for delivery of event
    - registration reports
    - layout plan for venue or site
  - event service agreements
- key environmental and social impacts of event delivery and minimal impact procedures to reduce them:
  - reducing impacts on the lifestyle of neighbouring residents
  - maintaining natural and cultural integrity
  - recycling and disposing of waste, especially hazardous substances
  - safety for crowds and the movement of large numbers of attendees
  - use of energy, water and other resources during event set up, operation and break down
- control measures to mitigate risk for:
  - attendees
  - contract staff
  - personnel
  - volunteers
- components of event break-down:
  - correctly removing infrastructure and facilities to ensure site is left in good condition
  - debriefing participants, exhibitors and contractors
  - directing event team member participation
  - liaising with venue and site personnel

© Commonwealth of Australia, 2024 Public Skills Australia

- overseeing recycling and environmentally sound disposal of waste
- packing and removing items.

Assessment Conditions

Skills must be demonstrated in an operational events context where the management of on-site event operations is required. This can be:

- a live event
- a simulated industry event set up for the purpose of skills assessment.

Assessment must ensure access to:

- dedicated event budgets
- venues and sites where events are operated
- computers, software programs and printers currently used by the events industry to prepare event documentation
- two-way communication equipment for on-site management
- industry current operational documents used to facilitate effective on-site management:
  - briefing papers
  - contact numbers for contractors and/or emergency services
  - copies of agreements with contractors and/or clients
  - event program and scheduled time for activities
  - event orders
  - incident reports
  - itemised lists of resources, suppliers and costs
  - layout plan for venue or site
  - plans and procedures
  - registration reports
  - risk assessments
  - running sheet for delivery of event
  - service vouchers
  - signage
  - sign-in and sign-out sheets
  - site maps
  - staffing rosters
- client's internal event team members, venue personnel and external contractors with whom the individual can interact; these can be:
  - those in an industry workplace who are assisted by the individual during the assessment process; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

© Commonwealth of Australia, 2024 Public Skills Australia

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTVAF005 Fill LPG gas cylinders

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to safely fill liquefied petroleum gas (LPG) cylinders up to a maximum of 9kg. It requires sound knowledge of working with volatile and hazardous gas and how to respond to an emergency.

The unit is relevant to holiday parks and resorts and other associated hospitality or retail workplaces that provide LPG cylinder filling services.

It applies to frontline service or supervisory personnel who operate with a level of independence. Work is undertaken according to organisational policy and procedures and relevant legislative requirements.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Venue and Facility Operations

Unit Sector

Tourism

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Implement work health and	1.1.Implement safe work practices when preparing,

© Commonwealth of Australia, 2024 Public Skills Australia

safety policies and procedures for working with LPG.	undertaking and finalising LPG decanting. 1.2.Lift and carry LPG cylinders following manual handling procedures. 1.3.Carry out first aid in the event of a cold burn. 1.4.Identify, eliminate or control hazards in LPG decanting area as they arise. 1.5.Report and document safety issues, hazards or incidents according to organisational work health and safety (WHS) reporting procedure. 1.6.Explain safe LPG decanting practices and relevant WHS procedures and information to customers and colleagues. 1.7.Participate in LPG WHS consultation processes.
2. Check LPG decanting cylinder for compliance.	2.1.Locate required warning notices and verify they are correct in accordance with legislative requirements. 2.2.Inspect decanting cylinder to confirm it meets safety regulations, standards and statutory requirements. 2.3.Ensure appropriate firefighting equipment is in place and has been tested within the required timeframe. 2.4.Rectify areas of non-compliance or refer to appropriate personnel as required.
3. Prepare for filling of cylinders.	3.1.Locate LPG decanting tool kit and confirm required tools and equipment are available. 3.2.Inspect LPG cylinders to confirm they are safe to fill according to legislative requirements and national standards. 3.3.Explain to customers the specific reason and potential safety risks if cylinder does not comply. 3.4.Retain hazardous cylinders according to organisational policies and procedures as required and offer customer alternative options. 3.5.Drill holes in hazardous LPG cylinder to ‘make safe’ if customer insists on having it returned. 3.6.Scan decanting area to ensure it is safe to commence decanting process. 3.7.Earth cylinder and discharge body build-up of static electricity. 3.8.Put on required protective equipment.
4. Fill cylinders.	4.1.Place cylinder in an upright position, connect decanting hose and commence filling. 4.2.When cylinder is full safely close bleed valve, remove filling hose and finalise decanting. 4.3.Check cylinder for leaks and empty if required.

© Commonwealth of Australia, 2024 Public Skills Australia

	4.4. Secure all tools and equipment and lock decanting cylinder.
5. Follow LPG emergency procedures.	5.1. Respond to LPG emergencies according to organisational emergency procedures and call for assistance from colleagues and authorities as required. 5.2. Clean up following emergencies and check all equipment for damage. 5.3. Repair, replace or re-order damaged equipment as required. 5.4. Complete LPG emergency incident and hazard report.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	• interpret unfamiliar and complex materials describing regulatory requirements for LPG safety management and organisational policies and procedures.
Writing skills to:	• prepare reports on hazards and the effectiveness of LPG safe management practices and, recommendations for change • create accurate written records according to WHS policy and procedures and regulatory compliance.
Problem-solving skills to:	• analyse LPG safety requirements, deficiencies and recommend change.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SITTVAF005 Fill LPG gas cylinders

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- demonstrate the liquefied petroleum gas (LPG) decanting process safely for at least three LPG cylinders following organisational policy and procedures for:
  - storage of tools, equipment and cylinders
  - correct positioning of LPG decanting cylinder
  - handling and transportation of full and empty LPG cylinders
  - filling cylinders
  - testing newly filled cylinders for leaks
- explain procedure to identify a hazardous cylinder and explain organisational policy and procedures for:
  - notifying customers of hazards and offering alternatives
  - retention and safe storage of hazardous cylinders
  - emptying hazardous cylinders as required
  - making cylinders safe
  - reporting and recording the identified hazard or potential hazard
- explain procedure for responding to each of the following emergency situations:
  - leaking decanting cylinder
  - leaking customer cylinder
  - LPG cylinder on fire
  - fire in location of LPG cylinders
  - vehicle driving into decanting cylinder
  - naked flame in proximity of decanting process
  - decanting cylinder leak into drainage system
  - LPG explosion
- explain procedure to complete incident reports for three of the emergency situations listed above.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

© Commonwealth of Australia, 2024 Public Skills Australia

- properties of LPG and its potentially highly volatile and dangerous nature
- potential hazards associated with LPG gas and methods of control
- unsafe conditions or environment when working with LPG:
  - damage to plant equipment
  - breaches in procedures
- required warning notices and their correct positioning
- HAZCHEM/HAZMAT symbols associated with LPG
- current legislation relating to filling LPG cylinders:
  - Australian New Zealand Standards AS/NZS1596 The storage and handling of LP gas
  - Dangerous Goods Act
  - Work Health and Safety Act
- employer responsibilities under the WHS Act to provide a safe workplace
- safe location of LPG decanting cylinder
- regulatory firefighting equipment for LPG and audit timeframe
- tools and equipment required to fill LPG cylinders
- appropriate safe environment to decant LPG
- safe standards for LPG cylinders:
  - capacity greater than 10kg
  - test pressure greater than 3.3 MPa
  - test date less than 10 years old
  - bleed valve fitted that can be easily operated
  - no rust or other damage
  - no leaking fittings
- personal protective equipment (PPE) for decanting LPG and the reason for wearing each:
  - heavy duty gloves
  - eye protection
  - work boots
- safety procedures for controlling static electricity:
  - earthing of cylinders
  - discharging body build-up of static electricity
- manual handling techniques
- operation and purpose of ‘dead man’s handle’
- safe capacity of LPG cylinders and how to identify when cylinders are at capacity
- outcomes of over filling cylinders
- how a ‘cold burn’ occurs and appropriate first aid
- emergency procedures for:
  - leaking decanting or customer cylinder
  - LPG cylinder on fire
  - fire in location of LPG cylinders
  - vehicle driving into the LPG decanting cylinder

© Commonwealth of Australia, 2024 Public Skills Australia

    - naked flame in proximity of decanting process
    - decanting cylinder leak into drainage system
    - LPG explosion
- environmental standards and safe release procedures for emptying LPG cylinders
- potential impact of LPG leaks to environment, workplace, customers and personnel
- alternative options for customers in the event their LPG gas cylinder must be retained
- organisational policies and procedures for:
    - preparing for decanting LPG
    - decanting LPG
    - finalizing cylinders
    - testing filled cylinders for leaks
    - risk management and workplace safety
    - safe storage and delivery of LPG
    - retention of hazardous cylinders
    - ‘making safe’ a hazardous cylinder
    - reporting of hazards and incidents or potential hazards and incidents
- reportable unsafe practices:
    - being asked to participate in unsafe work practices
    - failing to replace unsafe damaged property or fittings
    - ignoring direction of safety signage, supervisors, or managers
    - lack of required safety signage
    - lack of training in health and safety procedures and safe work practices
    - seeing others using unsafe work practices
    - broken or malfunctioning equipment.

Assessment Conditions

Skills must be demonstrated in an operational business or activity where LPG cylinder filling is required and safe working practices must be maintained, this can be:

- an industry workplace
- a simulated environment set up for the purpose of skills assessment.

Assessment must ensure use of:

- relevant documentation:
    - current plain English regulatory documents distributed by the LPG supplier and local work health and safety government regulator
    - policies, procedures, codes of practice and standards issued by government regulators or industry groups
    - LPG safe handling and decanting manuals
    - current organisational policies, procedures and template documents

© Commonwealth of Australia, 2024 Public Skills Australia

    - LPG incident and hazard report identifying:
        - cause of emergency
        - outcome
        - recommendation for prevention of reoccurrence
- safety equipment for decanting LPG:
    - PPE
    - 9kg dry chemical powder fire extinguisher
    - hose attached permanently to a water tap
- tools and equipment for decanting LPG:
    - set spanner or adjustable spanner to fit plug and connection
    - screwdrivers to meet size of bleed valves on different size cylinders
    - lockable padlock on decanting bottle
    - filling hose
- drill and drill bits for making a hazardous cylinder safe
- LPG gas cylinders requiring filling
- LPG decanting cylinder
- required warning notices positioned correctly
- customers and colleagues with whom the individual can interact; these can be:
    - customers or colleagues in an industry workplace; or
    - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and;

- have worked in industry for at least three years where that have applied the skills and knowledge of this unit of competency.

TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with *TAE Training and Education Training Package Version 2.0.*

Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one's own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations,

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Organise instruction and demonstration	1.1 Gather information about learner characteristics and learning needs 1.2 Confirm a safe learning environment 1.3 Gather and check instruction, demonstration objectives, and seek assistance if required 1.4 Access and review relevant learning resources and learning

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	materials for suitability and relevance, and seek assistance to interpret the contextual application 1.5 Organise access to necessary equipment or physical resources required for instruction and demonstration 1.6 Notify learners of details regarding the implementation of the learning program and/or delivery plan
2. Conduct instruction and demonstration	2.1 Use interpersonal skills with learners to establish a safe and comfortable learning environment 2.2 Follow the learning program and/or delivery plan to cover all learning objectives 2.3 Brief learners on any workplace health and safety (WHS) procedures and requirements prior to, and during, training 2.4 Use delivery techniques to structure, pace and enhance learning 2.5 Apply coaching techniques to assist learning 2.6 Use communication skills to provide information, instruct learners and demonstrate relevant work skills 2.7 Provide opportunities for practice during instruction and through work activities 2.8 Provide and discuss feedback on learner performance to support learning
3. Check training performance	3.1 Use measures to ensure learners are acquiring, and can use, new technical and generic skills and knowledge 3.2 Monitor learner progress and outcomes in consultation with the learner 3.3 Review relationship between the trainer/coach and the learner, and adjust to suit learner needs
4. Review personal training performance	4.1 Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement 4.2 Maintain, store and secure learner records, according to organisational and legal requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2024 Public Skills Australia

Skill	Performance Criteria	Description
Learning	4.1	• Reflects on practice to improve
Reading	1.1, 1.3, 1.4, 2.2	• Sources and interprets processes and procedures, learning resources and information relevant to providing a work instruction and delivery
Writing	1.4, 1.6, 2.3, 2.6, 2.8, 3.2, 4.1, 4.2	• Accurately maintains learner records and documentation appropriate to the learning context and audience
Oral Communication	1.1, 1.6, 2.3, 2.4, 2.6	• Uses appropriate communication strategies to engage, build rapport, provide instruction, monitor progress and provide feedback to individuals or groups
Interact with others	1.2, 1.3, 2.1, 2.5, 2.8, 3.2	• Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes • Asks questions in order to clarify understanding, and to provide and seek feedback • Builds rapport to establish effective working relationships and to achieve effective outcomes
Get the work done	1.1-1.6, 2.1-2.8, 3.1-3.3, 4.1, 4.2	• Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes • Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches

Assessment Requirements for TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with *TAE Training and Education Training Package Version 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
  - different learning objectives
  - a range of delivery techniques and effective communication skills appropriate to the audience.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
  - risk controls for the specific learning environment.

© Commonwealth of Australia, 2024 Public Skills Australia

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL401 Plan, organise and deliver group-based learning

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes the skills and knowledge required to plan, organise and deliver training for individuals within a group.

It applies to a person working as an entry-level trainer, teacher or facilitator structuring a learning program developed by others in, or with, a training and assessment organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Interpret learning environment and delivery requirements	1.1 Access, read, and interpret learning program documentation to determine delivery requirements 1.2 Use available information and documentation to identify group and individual learner needs, and learner characteristics 1.3 Identify and assess constraints, and risks to delivery

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Confirm personal role and responsibilities in planning, and delivering training, with relevant personnel
2. Prepare session plans	2.1 Refine existing learning objectives according to program requirements and specific needs of individual learners 2.2 Develop session plans and document these plans for each segment of the learning program 2.3 Use knowledge of learning principles and theories to generate ideas for managing session delivery
3. Prepare resources for delivery	3.1 Contextualise learning materials to meet the needs of the specific learner group 3.2 Finalise learning materials and organise facility, technology and equipment needs in time for delivery of learning sessions 3.3 Confirm overall delivery arrangements with relevant personnel
4. Deliver and facilitate training sessions	4.1 Conduct each session according to the session plan, modified where appropriate to meet learner needs 4.2 Use the diversity of the group as another resource to support learning 4.3 Employ a range of delivery methods to optimise learner experiences 4.4 Demonstrate effective facilitation skills to ensure effective participation and group management
5. Support and monitor learning	5.1 Monitor, and document, learner progress to ensure outcomes are being achieved, and individual learner needs are being met 5.2 Make adjustments to the delivery sessions to reflect specific needs and circumstances 5.3 Manage inappropriate behaviour to ensure that learning can take place 5.4 Maintain and store learner records according to organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2024 Public Skills Australia

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 3.1, 5.1	• Access, read and interpret documentation relevant to the learning context, including program documents, learning materials, policies and procedures relevant to the context
Writing	2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 5.1, 5.2, 5.4	• Develops and maintains workplace documentation accurately and in response to required needs
Oral Communication	1.2, 1.3, 4.1, 4.3, 4.4	• Uses communication techniques to build rapport and explore requirements • Facilitates training in an appropriate style for both individuals and groups
Navigate the world of work	1.4, 5.4	• Recognises and follows organisational protocols, policies and procedures relevant to own role
Interact with others	1.4, 3.3, 4.4, 5.3	• Cooperates and collaborates with others as part of routine activities to achieve team results, and to confirm that outcomes meet requirements • Recognises inappropriate behaviours and the potential for conflict, and implements strategies to maintain an appropriate learning environment
Get the work done	1.1-1.4, 2.1-2.3, 3.1-3.3, 4.1-4.4, 5.1-5.4	• Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes • Identifies and responds to problems and opportunities for improvement and considers options for different approaches • Uses information and communications technology (ICT) based tools to access, organise, analyse and display information relevant to role

Assessment Requirements for TAEDEL401 Plan, organise and deliver group-based learning

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete the tasks outlined in the elements and performance criteria of this unit, including:

- facilitating group-based learning by preparing and delivering at least three training sessions, including:
  - at least two consecutive sessions of at least 40 minutes duration, that follow one of the learning program designs, to a learner group of at least eight individuals
  - at least one session delivered to a learner group of at least eight individuals, with evidence of how the characteristics and needs of this group were addressed
- identifying and responding to individual needs
- accessing and using documented resources, and any support personnel required to guide inclusive practices.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learning theories and principles
- resources available to identify different learner styles
- the relevant industry area and subject matter of the delivery
- the learner group profile, including characteristics and needs of individual learners in the group
- the requirements of the learning program and/or delivery plan, and the content purpose
- different delivery methods and techniques appropriate to face-to-face group delivery

© Commonwealth of Australia, 2024 Public Skills Australia

- different techniques for the recognition and resolution of inappropriate behaviours
- behaviours that may indicate learner difficulties, and the methods used to address these difficulties
- the purpose of organisational record-management systems and reporting requirements
- evaluation and revision techniques used to improve session plans
- specific resources, equipment and support services available for learners with special needs
- assessment and risk control measures relating to the facilitation of group-based learning
- policies and procedures relevant to the learning environment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to learning program designs in use in the learning environment.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL401A Plan, organise and deliver group-based learning

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to plan, organise and deliver training for individuals within a group.

Application of the Unit

Application of the unit	This unit typically applies to a person working as an entry-level trainer, teacher or facilitator in or with a training and assessment organisation. The person will be working from a learning program developed by someone else, and structuring the learning around that program.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

© Commonwealth of Australia, 2024 Public Skills Australia

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret learning environment and delivery requirements	1.1. Access, read and interpret ***learning program documentation*** to determine delivery requirements 1.2. Use available information and documentation to identify group and individual learner needs and learner characteristics 1.3. Identify and assess constraints and risks to delivery 1.4. Confirm personal role and responsibilities in planning and delivering training with relevant personnel
2. Prepare session plans	2.1. Refine existing learning objectives according to program requirements and specific needs of individual learners 2.2. Develop ***session plans*** and document these for each segment of the learning program 2.3. Use knowledge of learning principles and theories to generate ideas for managing session delivery
3. Prepare resources for delivery	3.1. Contextualise existing learning materials to meet the needs of the specific learner group 3.2. Finalise learning materials and organise facility, technology and equipment needs in time for delivery of learning sessions 3.3. Confirm overall delivery arrangements with relevant personnel
4. Deliver and facilitate training sessions	4.1. Conduct each session according to session plan, modified where appropriate to meet learner needs 4.2. Use the diversity of the group as another resource to

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	support learning 4.3. Employ a range of delivery methods as training aids to optimise learner experiences 4.4. Demonstrate effective facilitation skills to ensure effective participation and group management
5. Support and monitor learning	5.1. Monitor and document learner progress to ensure outcomes are being achieved and individual learner needs are being met 5.2. Make adjustments to the delivery sessions to reflect specific needs and circumstances 5.3. Manage ***inappropriate behaviour*** to ensure learning can take place 5.4. Maintain and store learner records according to organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- presentation skills to ensure delivery is engaging and relevant, including:
  - synthesising information and ideas
  - preparing equipment, such as data projectors and computer presentation applications
  - speaking with appropriate tone and pitch
  - using language appropriate to audience
  - encouraging and dealing appropriately with questions
- group facilitation skills to ensure that:
  - every individual has an opportunity for participation and input
  - group cohesion is maintained
  - behaviour that puts others at risk is observed, interpreted and addressed
  - discussion and group interaction are enhanced
- conflict resolution and negotiation skills to:
  - identify critical points, issues, concerns and problems
  - identify options for changing behaviours
- oral communication and language skills to:

© Commonwealth of Australia, 2024 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• motivate learners to transfer skills and knowledge • engage with the learner • interpersonal skills to maintain appropriate relationships and ensure inclusivity • observation skills to monitor individual and group progress
Required knowledge

• introductory knowledge of learning theories
• sound knowledge of learning principles
• sound knowledge of learner styles
• industry area and subject matter of the delivery
• learner group profile, including characteristics and needs of individual learners in the group
• content and requirements of the learning program and/or delivery plan
• different delivery methods and techniques appropriate to face-to-face group delivery
• techniques for the recognition and resolution of inappropriate behaviours
• behaviours in learners that may indicate learner difficulties
• organisational record-management systems and reporting requirements
• evaluation and revision techniques
• specific resources, equipment and support services available for learners with special needs
• relevant policy, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector
• OHS relating to the facilitation of group-based learning, including:
  • assessment and risk control measures
  • reporting requirements for hazards
  • safe use and maintenance of relevant equipment
  • emergency procedures
  • sources of OHS information
  • role of key workplace persons
• policies and procedures relevant to the learning environment

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. Arange of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to:
	• facilitate group-based learning by preparing and delivering a series of training sessions, including:
	  • at least two consecutive sessions, of a duration commensurate with a substantive training session (e.g. 40-60 minutes), that follow one of the learning program designs
	  • at least one session delivered to a different learner group, with evidence of how the characteristics and needs of this group were addressed
	• identify and respond to diversity and individual needs
	• access and use documented resources and support personnel to guide inclusive practices.

Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided. Assessment must ensure access to: • training products, such as training packages and accredited course documentation.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT	
work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	

Learning program documentation may include:	• competencies or other benchmarks to be achieved
	• for each chunk or segment of the learning program:
	  • specific learning outcomes derived from the benchmarks
	  • overview of content to be covered
	  • learning resources, learning materials and activities
	  • delivery methods
	• number and duration of training sessions or classes required, and overall timelines
	• OHS issues to be addressed in delivery
	• identification of assessment points to measure learner progress
	• assessment methods and tools to be used to collect evidence of competency, where assessment is required.

Session plans may include:	• outline of objectives and content to be addressed • plan of delivery methods and learning activities to be used within the session • timelines and duration for each learning activity • formative assessment points and opportunities • learning materials required.
Inappropriate behaviour may include:	• violent or inappropriate language • verbal or physical abuse or bullying • insensitive verbal or physical behaviour towards other learners or the trainer/facilitator, including cultural, racial, disability or gender-based insensitivities • dominant or overbearing behaviour • disruptive behaviour • non-compliance with safety instructions.

TAEDEL402 Plan, organise and facilitate learning in the workplace

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1*. Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes skills and knowledge required to plan, organise and facilitate learning for individuals in a workplace, using real work activities as the basis for learning.

It applies to a person working as an entry-level trainer, teacher or facilitator or an employee, team leader or workplace supervisor responsible for guiding learning through work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish effective work environment for learning	1.1 Establish, and agree upon, the objectives and scope of the work-based learning 1.2 Analyse work practices and routines to determine their effectiveness in meeting established learning objectives

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.3 Identify, and address any workplace health and safety (WHS) implications of using work as the basis for learning
2. Develop a work-based learning pathway	2.1 Address contractual requirements and responsibilities for learning at work 2.2 Arrange for the integration and monitoring of external learning activities with the work-based learning pathway 2.3 Obtain agreement from relevant personnel to implement the work-based learning pathway
3. Establish the learning-facilitation relationship	3.1 Identify the context for learning and the individual's learning style 3.2 Select an appropriate technique or process to facilitate learning, and explain the basis of the technique to the learner 3.3 Develop, document and discuss an individualised learning plan with the learner 3.4 Access, read and interpret documentation outlining the WHS responsibilities of the various parties in the learning environment 3.5 Monitor supervisory arrangements appropriate to learner's levels of knowledge, skill and experience to provide support and encouragement and ensure learner's health and safety
4. Implement the work-based learning pathway	4.1 Explain the objectives of work-based learning, and the processes involved, to the learner 4.2 Sequence the introduction of workplace tasks, activities and processes to reflect the agreed work-based learning pathway 4.3 Encourage learner to take responsibility for learning and to self-reflect 4.4 Develop techniques that facilitate the learner's transfer of skills and knowledge
5. Maintain and develop the learning-facilitation relationship	5.1 Prepare for each session 5.2 Structure learning activities to support and reinforce new learning, build on strengths, and identify areas for further development 5.3 Observe learner cues, and change approaches where necessary, in order to maintain momentum 5.4 Practise ethical behaviour at all times 5.5 Monitor the effectiveness of the learning/facilitation relationship through regular meetings between the parties

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
6. Close and evaluate the learning-facilitation relationship	6.1 Carry out the closure smoothly, using appropriate interpersonal and communication skills 6.2 Seek feedback from the learner on the outcomes achieved, and the value of the relationship 6.3 Evaluate effectiveness of the work-based pathway against the objectives, processes and techniques used 6.4 Recommend improvements to work-based practice in light of the review process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.1, 3.1, 3.4, 3.5, 6.3	• Accesses and interprets compliance information, contractual information, WHS information, and documents relevant to learning in the workplace, in the context of consultation and continuous improvement, to apply relevance to requirements
Writing	1.1, 2.3, 3.3, 4.1, 6.3	• Develops and maintains documentation relevant to workplace learning, including learning plans and evaluations, in accordance with organisational and workplace requirements
Oral Communication	2.2, 3.3, 4.2, 5.5, 6.1	• Uses oral communication techniques to identify needs, build rapport, agree on learning plans, facilitate effective learning and monitor practice • Selects appropriate vocabulary adjusting language, tone and pace to maintain effective interactions, and to build and maintain engagement with individuals or groups
Navigate the world of work	1.3, 2.1, 5.4	• Follows organisational protocols, policies and procedures in the management of records • Recognises and responds to contractual and ethical requirements associated with own role
Interact with others	1.1, 2.3, 3.5, 4.3, 6.2	• Asks questions to clarify understanding, and seeks feedback and further information • Cooperates and collaborates with others as part of

© Commonwealth of Australia, 2024 Public Skills Australia

		routine activities to achieve team results, and to confirm outcomes meet requirements
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.5, 4.1-4.4, 5.1-5.3, 5.5, 6.1-6.3	• Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes • Uses systematic, analytical processes in complex, routine and non-routine situations, gathering information, and identifying and evaluating options based on organisational needs • Identifies and responds to problems and opportunities for improvement, considering options for different approaches • Uses information and communications technology (ICT) based tools to design work processes and to complete work tasks

Assessment Requirements for TAEDEL402 Plan, organise and facilitate learning in the workplace

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1*. Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- preparing and facilitating work-based learning
- providing a minimum of two examples of developing work-based learning pathways, that include:
  - identifying needs for learning
  - analysing work practices, work environment and work activities
  - organising and allocating work in a way that reflects learning needs, and provides effective learning opportunities through work processes
- conducting a learning facilitation relationship:
  - with at least two individuals
  - demonstrating communication skills and flexibility
  - demonstrating one or more of the processes, or techniques, identified.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- systems, processes and practices within the organisation where work-based learning is taking place
- systems for identifying skill needs within the workplace
- different learning styles, and how to encourage learning for those who learn in different ways

© Commonwealth of Australia, 2024 Public Skills Australia

- workplace health and safety (WHS) relating to the work role, including:
  - hazards relating to the industry and specific workplace
  - reporting requirements for hazards and incidents
  - specific procedures for work tasks
  - safe use and maintenance of relevant equipment
  - emergency procedures
  - sources of WHS information.
  -

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to any documentation relating to workplace procedures required by the candidate.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL404A Mentor in the workplace

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to establish and develop a professional mentoring relationship with a learner, in particular an apprentice or trainee employed by, or undertaking work placement in, a workplace. It includes establishing the need for mentoring, developing a mentoring plan/framework, facilitating and monitoring the mentoring relationship, and evaluating the effectiveness of mentoring.

Application of the Unit

Application of the unit	This unit typically applies to workplace supervisors or other work colleague with responsibility for mentoring in the workplace.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2024 Public Skills Australia

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop a mentoring plan	1.1. Identify scope and boundaries of the ***mentoring*** relationship according to organisational procedures 1.2. Establish ***ground rules*** and negotiate realistic expectations 1.3. Establish and maintain confidentiality of the relationship in accordance with ***legislation***, ***policy and procedures***
2. Facilitate mentoring relationship	2.1. Develop learner's confidence, self-esteem, respect and trust in the mentoring relationship 2.2. Share personal experiences and knowledge with the person being mentored according to agreed objectives 2.3. Support the person being mentored to develop and use skills in problem solving and decision making 2.4. Use personal and professional networks to assist the person being mentored 2.5. Provide information, guidance and constructive guidance to enhance engagement in the workplace 2.6. Use ***techniques for resolving differences*** without damaging the relationship, and obtain assistance according to organisational policy and procedures
3. Monitor mentoring relationship	3.1. Provide planning assistance and guidance as requested by the person being mentored in a form

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and style to suit their requirements 3.2. Provide feedback to the person being mentored on progress towards achieving the expectations and goals of the mentoring process 3.3. Recognise and discuss changes in the ***mentoring relationship*** with appropriate ***stakeholders*** 3.4. Negotiate and manage closure of the mentoring arrangement once objectives have been met
4. Evaluate effectiveness of mentoring	4.1. Establish and discuss ***benefits*** gained from the mentoring process 4.2. Reflect on and articulate the personal benefits gained from providing mentoring 4.3. Identify and report the outcomes of the mentoring arrangement and the ***benefits to the organisation*** according to organisational policy and procedures to improve the mentoring system or program

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills

• planning and time-management skills to mentor in a workplace
• oral communication and language skills to motivate learners
• organisational skills to provide guidance and feedback to individuals
• interpersonal skills to:
  • engage in relationship building, including building trust and maintaining confidentiality
  • respond to diversity, including gender and disability
• communication skills to use a range of communication strategies, including listening, questioning, and giving andreceiving feedback
• initiative and enterprise skills to apply procedures relating to OHS and environmentallegislation in the context of workplace mentoring

Required knowledge
• relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring • training contracts and responsibilities of employer, registered training organisation

© Commonwealth of Australia, 2024 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

(RTO) and funding body
• training plans and responsibilities
• training products and strategies for learning
• mentoring methodologies and strategies
• acceptable behaviour in the mentoring relationship
• equal employment opportunity, equity and diversity principles
• OHS relating to the work role, including:
  • hazards relating to the industry and specific workplace
  • reporting requirements for hazards and incidents
  • specific procedures for work tasks
  • safe use and maintenance of relevant equipment
  • emergency procedures
  • sources of OHS information

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. Arange of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • prepare a mentoring plan between the mentor and learner that reflects the scope and substance expected within a plan prepared for a learner undertaking a contracted apprenticeship or traineeship • facilitate at least three mentoring sessions • provide information on sessions, including comments and notes from both mentor and learner.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be

EVIDENCE GUIDE	
	provided.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	

Mentoring may include:	• long-term focus on personal growth and learning
	• wide range of learning oriented to:
	  • support
	  • guidance in personal or career growth
	• relationship, not just a procedure or activity
	• one person professionally assisting the career development of another.

Ground rules may include:	• training for mentoring partners • mentoring agreement • active involvement of both partners in the mentoring process.

Legislation, ***policy and procedures*** may include:	• commonwealth and state or territory legislation and regulations, such as:
	  • privacy legislation
	  • equal employment opportunity, anti-discrimination and harassment legislation
	  • OHS legislation
	  • user choice
	• organisational policy, procedures and protocols.

Techniques for resolving differences	• finding a mutually beneficial solution • self-disclosure

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT	
may include:	• inviting discussion • providing explanations • accessing assistance.
Mentoring relationship may include:	• informal workplace development program • formal mentoring process associated with a contracted apprenticeship or traineeship, involving a formal training plan.
Stakeholders may include:	• trainee or apprentice • manager or supervisor • RTO • learning support services, including assistive technology and diagnostic testing • funding organisation • supplier of learning resources.
Benefits may include:	• insights into organisational culture, attitudes and expected behaviours • supportive environment in which successes and failures can be evaluated • networking opportunities • development of workplace competence and self-confidence • recognition and job satisfaction • mutual respect.
Benefits to the organisation may include:	• increased productivity • new competencies in the person being mentored • staff motivation • more committed, involved and responsible learners.

TAEDES505A Evaluate a training program

Modification History

Version	Comments
TAEDES505A	Released with *TAE10 Training and Education Training Package version 2.0*

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to evaluate a training program to measure the effectiveness of training in meeting workforce performance needs and capability requirements.

In an AQTF context it can contributes to the continuous improvement cycle within a registered training organisation (RTO).

Application of the Unit

This unit typically applies to those who have responsibility for delivery and assessment strategies in the training programs of an organisation.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of*

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT **PERFORMANCE CRITERIA**

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Plan and prepare evaluation	1.1 Document the ***aim and scope of the evaluation*** study 1.2 Identify the ***data and information*** required and access sources of information 1.3 Establish a project plan and timelines which identify tasks and ***stakeholders in the evaluation process*** 1.4 Select and brief staff to be involved 1.5 Establish constructive relationships with the stakeholders identified in the evaluation plan
2. Collect and collate evaluation data and information for a training program	2.1 Identify the most appropriate ***technique(s) for gathering quantitative and qualitative data and information*** 2.2 Develop ***evaluation instruments*** to gather data and information 2.3 Arrange workplace visits and meetings, and access to data and information 2.4 Collect data and information and store in compliance with the record keeping and privacy policies and procedures of the organisation 2.5 Identify and record potentially useful information which is not identified in the evaluation plan 2.6 Collate and process data relevant to the evaluation
3. Analyse evaluation data and information and make conclusions	3.1 Analyse the data and information to identify the outcomes of training and their impact on workforce capability 3.2 Cross-check findings where possible by comparing with the results from different evaluation instruments 3.3 Develop conclusions about the effectiveness and efficiency of the training program, as per the evaluation aim and scope 3.4 Document areas of training that are satisfactory and those requiring improvement 3.5 Identify factors affecting performance and suggest possible enhancements or ***alternatives to the training program***
4. Report on the conclusions and	4.1 Document issues and conclusions arising from the analysis conducted

© Commonwealth of Australia, 2024 Public Skills Australia

recommendations of the evaluation	4.2 Make recommendations to stakeholders on ***areas of possible improvement***
	4.3 Discuss preliminary findings with stakeholders
	4.4 Produce an evaluation report and distribute to all stakeholders

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analysis and interpretation skills to:
  - evaluate information management systems, policies and procedures of an organisation
  - select relevant evaluation information and documentation
  - access and interpret the organisation's standards and values
  - analyse records/notes of the evaluation process
- communication skills to:
  - explain the evaluation process
  - give clear and precise instructions and advice
  - discuss the evaluation process with other relevant people
  - seek information relevant to the evaluation
  - discuss the evaluation outcome with the stakeholders
- language and literacy skills to:
  - interpret training program requirements (including, where appropriate AQTF requirements)
  - develop resources to support the evaluation process
  - communicate with key stakeholders
  - produce and maintain documentation
- planning and organising skills to:
  - plan projects
  - plan and sequence work programs
  - coordinate the work of self and others
- research and evaluation skills to investigate training and workforce data, and determine and implement appropriate improvement.

Required knowledge

- Commonwealth and state/territory legislation, codes of practice and standards, for example:
  - Training Packages and accredited courses, and what comprises quality training and assessment services
  - how training and/or assessment organisations operate

© Commonwealth of Australia, 2024 Public Skills Australia

  - terminology relating to quality evaluation processes
  - evaluation models/methods, including the Kirkpatrick Model
  - records management systems of the organisation
- other relevant policy, legislation, codes of practice and national standards, including Commonwealth and state/territory legislation, for example:
  - plagiarism
  - copyright and privacy laws
  - security of information and confidentiality requirements
  - duty of care, as it relates to coordinating personnel and learning
  - the industrial relations system, industry/workplace relations and industrial awards/enterprise agreements
  - anti-discrimination legislation, including equal opportunity, racial vilification and disability discrimination
  - vocational education and training systems
  - OHS relating to planning and conducting an evaluation.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • evaluate a training program against workforce performance needs and capability requirements • produce an evaluation report that addresses all phases of the evaluation process including recommendations on areas for improvement • critically review the evaluation process and approaches taken and propose changes to improve the process.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	

© Commonwealth of Australia, 2024 Public Skills Australia

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Aim of the evaluation study may include:	• evaluating the effectiveness of the training in meeting workforce needs • estimating the cost effectiveness of the training provided • evaluating outcomes of a learning or assessment process or product • determining or trialling new processes/products • establishing client satisfaction • ensuring learning/assessment strategies and programs are relevant to client needs and capability requirements • determining resource requirements • providing solutions to organisational performance problems.
Scope of the evaluation study may include:	• whole of training and/or assessment of the RTO • specific training and/or assessment services • specific training and/or assessment products • specific aspects of training and/or assessment systems • partner organisation arrangements • workforce training needs.
Data and information to be gathered may include:	• work performance • workplace productivity • employer feedback • trainee feedback.
Stakeholders in the evaluation process may include:	• employer organisations • training graduates • workplace supervisors and managers • trainers and assessors • training designers • HR managers.
Technique(s) for gathering data/information may include:	• surveys • group discussion sessions • researching of organisational performance data

© Commonwealth of Australia, 2024 Public Skills Australia

	• conducting interviews with course graduates, their supervisors and managers, trainers/ facilitators and assessors
	• examining the organisations documents and systems, such as:
	  • policies and procedures
	  • learning and assessment strategies
	  • training/assessment records
	  • course evaluation questionnaires
	  • resources for delivery and assessment including assessment tools.

Evaluation instruments may include:	• surveys • feedback forms • work performance specifications • questionnaires • diaries • logs • discussion group questions.
Alternatives to the training program may include:	• job redesign • change in supervision arrangements or work support • individual mentoring • communication and information campaign, e.g. posters, brochures • job aids, e.g. manuals • standard operating procedures (SOPs).
Areas of possible improvement may include:	• analysis of skills requirements and training needs • design of training and assessment strategies • training materials development • training delivery methods and resources • assessment methods and tools • employer and trainee liaison and management.

TLIA2011A Package goods

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to package goods in accordance with regulatory and workplace requirements including selecting materials, packing and unwrapping products, and labelling packaged products/loads to the required labelling standards. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the packaging of goods.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the packaging of goods as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Select materials and pack and unwrap products	1.1 Packaging specifications and order packaging documentation are correctly interpreted 1.2 Appropriate packaging technology suitable for the goods to be packed is selected 1.3 Packaging materials are identified and matched to specifications 1.4 Work plan ensures materials are used economically and that appropriate packaging is used that minimises loss and damage in transit or storage 1.5 Work is planned in accordance with OH&S requirements 1.6 Completed packed goods are stacked to minimise damage from within and outside
2 Label packaged products/loads	2.1 Workplace labelling standards are identified 2.2 Appropriate goods handling, labelling and other identification symbols are utilised 2.3 Invoices and picking slips are attached (where required) 2.4 Workplace documentation is completed

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to the packaging of goods including the Australian Dangerous Goods Code (ADG Code)

© Commonwealth of Australia, 2024 Public Skills Australia

REQUIRED KNOWLEDGE AND SKILLS

- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the packaging of goods
- Focus of operation of work systems, equipment, management and site operating systems for the packaging of goods
- Problems that may occur when packaging goods and appropriate action that can be taken to resolve the problems
- Documentation requirements for the packaging of goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when packaging goods
- Read and interpret instructions, procedures and labels relevant to the packaging of goods
- Complete documentation related to work activities when packaging goods
- Work collaboratively with others when packaging goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when packaging goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events that may occur when packaging goods
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of equipment when packaging goods
- Check operation of packaging equipment in terms of service schedule and standard operating procedures
- Select and use relevant communications, computing equipment and materials when packaging goods
- Estimate the size, shape and special requirements of goods and loads

© Commonwealth of Australia, 2024 Public Skills Australia

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

© Commonwealth of Australia, 2024 Public Skills Australia

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	• in a range of work environments • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• restricted spaces • exposed conditions • controlled or open environments
Goods may involve:	• special handling, storage and/or packaging requirements, including temperature controlled goods and dangerous goods
Hazards in the work area may include exposure to:	• chemicals • dangerous or hazardous substances • movements of equipment, goods and materials • oil or water on floor • a fire or explosion • damaged packaging or pallets • debris on floor • faulty racking • poorly stacked pallets • faulty equipment
Consultative processes may involve:	• other employees and supervisors • suppliers, customers and clients • relevant authorities and institutions • management and union representatives • industrial relations and OH&S specialists • other maintenance, professional or technical staff
Communication in the work area may include:	• phone • electronic data interchange (EDI) • fax • email • internet • radio • oral, aural or signed communications
Depending on the type of organisation concerned and the	• company procedures • enterprise procedures

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

local terminology used, workplace procedures may include:	• organisational procedures • established procedures
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios • high visibility clothing
Information/documents may include:	• goods identification numbers and codes • manifests, picking slips, merchandise transfers, stock requisitions and bar codes • codes of practice and regulations relevant to the packaging of goods • Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances • operations manuals, job specifications and induction documentation • manufacturers specifications for equipment • workplace procedures and policies • supplier and/or client instructions • dangerous goods declarations and material safety data sheets (where applicable) • award, enterprise bargaining agreement, other industrial arrangements • relevant Australian standards and certification requirements • quality assurance procedures • emergency procedures

Applicable regulations and legislation may include:	• relevant codes and regulations for the packaging of goods
	• Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
	  • Australian and International Dangerous Goods Codes
	  • Australian and International Explosives Codes
	• licence, patent or copyright arrangements
	• water and road use and licence arrangements
	• export/import/quarantine/bond requirements
	• marine orders
	• relevant state/territory OH&S and environmental protection legislation
	• workplace relations regulations

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify workplace order picking processes, policies and procedures	1.1 Workplace procedures for order picking and related workplace documentation are interpreted
	1.2 Stock allocation and location systems are identified and located
	1.3 Appropriate manual handling equipment is selected in accordance with OH&S regulations and workplace procedures
2 Pick and despatch an order	2.1 Work requirements are planned with appropriate equipment and documentation assembled
	2.2 Zones of the warehouse which store required products are identified and located
	2.3 Pick path is established
	2.4 Where required, appropriate pallet(s) for orders are selected and stacked to minimise stock damage and maximise stability
	2.5 Products are selected and consolidated
	2.6 Products/pallets are located in despatch areas
	2.7 Products are assembled to meet workplace schedules
	2.8 Orders are consolidated, secured, arranged and placed in storage zones in accordance with the schedule
3 Record stock levels	3.1 Storage areas are checked and stocks are noted for replenishment in accordance with workplace procedures
	3.2 Workplace records are completed in accordance with workplace requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

© Commonwealth of Australia, 2024 Public Skills Australia

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to the picking and processing of orders, including relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the picking and processing of orders
- Focus of operation of work systems, equipment, management and site operating systems for the picking and processing of orders
- Problems that may occur when picking and processing an order and appropriate action that can be taken to resolve the problems
- Documentation and record requirements when picking and processing an order
- Equipment used during picking and processing operations and the precautions and procedures that should be followed in its use
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when picking and processing orders
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures, signs and labels relevant to the picking and processing of orders
- Complete documentation related to picking and processing orders
- Identify relevant stock and goods coding and labelling, including ADG and IMDG markings
- Work collaboratively with others when picking and processing orders
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when picking and processing orders in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when picking and processing orders
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when picking and processing orders
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use relevant equipment and communications technology when picking and processing orders
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Estimate the size, shape and special requirements of goods/loads

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	• by day or night • in a range of work environments
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• limited or restricted spaces • exposed conditions • controlled or open environments
Problems that may occur when picking and processing an order include:	• wrong stock is picked • wrong carton for order • incorrect location • damaged stock • no stock at location • incorrect quantity • failing to meet a special order requirement
Special order requirements may include:	• pricing • special packing • specific size of carton • special categories of stock
Hazards in the work area may include exposure to:	• chemicals • dangerous or hazardous substances • movements of equipment, goods and materials • oil or water on floor • a fire or explosion

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• damaged packaging or pallets • debris on floor • faulty racking • poorly stacked pallets • faulty equipment
Consultative processes may involve:	• workplace personnel • supervisors and managers • customers/clients • contractors • official representatives
Communication in the work area may include:	• phone • electronic data interchange (EDI) • fax • email • internet • RF communications • barcode readers • oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios • high visibility clothing
Information/documents may include:	• goods identification numbers and codes • manifests, picking slips, merchandise transfers, stock requisitions and bar codes • manufacturers specifications for equipment/tools • workplace procedures and policies • supplier and/or client instructions • material safety data sheets • codes of practice including the National Standards for Manual Handling and the Industry Safety Code • relevant legislation, regulations and related documentation • award, enterprise bargaining agreement, other industrial arrangements • standards and certification requirements

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

Applicable regulations and legislation may include:	• quality assurance procedures • emergency procedures • relevant codes and regulations pertaining to the picking and processing of orders • Australian Dangerous Goods Code • relevant state/territory OH&S legislation • relevant state/territory environmental protection legislation • licence, patent or copyright arrangements • water and road use and licence arrangements • export/import/quarantine/bond requirements • workplace relations regulations • workers compensation regulations

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to receive goods in accordance with regulatory and workplace requirements, including identifying workplace procedures and documentation requirements for the receipt of goods; checking and inspecting goods on arrival and completing workplace documentation; and unloading, packing and storing stock. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the receiving of goods.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the receiving of goods as part of work activities in the warehousing, distribution and/or storage industries.

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify workplace procedures and documentation requirements for the receipt of goods	1.1 Workplace procedures for receipt of goods are identified 1.2 Purpose of documents associated with the receipt of goods is interpreted 1.3 Workplace documentation requirements for the receipt of goods and reporting of damage are identified
2 Check and inspect goods on arrival and complete workplace documentation	2.1 Procedures for checking of goods in comparison with orders or manifests are identified and followed 2.2 Discrepancies and/or damaged goods are reported 2.3 Non-conforming goods are appropriately documented and despatched or stored in accordance with company procedures
3 Unload, unpack and store stock	3.1 Appropriate manual handling techniques and equipment are identified 3.2 Safe work procedures are used when unloading, unpacking and storing stock 3.3 Advice on appropriate storage locations and requirements for particular products is sought 3.4 Goods are unloaded and unpacked in accordance with workplace procedures 3.5 Assistance from others is sought when required to maintain safe and effective work 3.6 Directions are followed to store stock in appropriate areas

© Commonwealth of Australia, 2024 Public Skills Australia

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to the receiving of goods including the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the receiving of goods
- Focus of operation of work systems, equipment, management and site operating systems for the receiving of goods
- Problems that may occur when receiving goods and appropriate action that can be taken to resolve the problems
- Specifications and standards for the checking and inspection of received goods
- Documentation requirements for the receiving of goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when receiving goods
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures, information, labels and signs relevant to receiving goods
- Complete documentation related to the receival of goods
- Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels
- Work collaboratively with others when receiving goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when receiving goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when receiving goods
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when receiving goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

damage to goods or equipment

- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use relevant load handling equipment when receiving goods
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Estimate the size, shape and special requirements of goods and loads

Evidence Guide

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse order to identify work requirements	1.1 Order request and consignment note documentation is interpreted 1.2 Required schedules for despatch are identified 1.3 Product(s) in order are identified 1.4 Workplace and product knowledge is used to plan sequence of work 1.5 Appropriate materials handling equipment is selected within required OH&S regulations and timeframe for the despatch
2 Follow workplace order picking processes to prepare goods for despatch	2.1 Goods for despatch are selected, checking against product knowledge, labels and other identification systems 2.2 Products are sorted, assembled and consolidated 2.3 Orders are secured and placed in storage/despatch zones, in accordance with schedule 2.4 Order is checked against despatch schedule and order form
3 Complete despatch following workplace procedures and schedules	3.1 Workplace records are completed, and labels and appropriate documentation attached 3.2 Load labels and documentation are checked and loading is organised in accordance with workplace procedures and ADG Code (where applicable) 3.3 Final check of load labels and documentation is completed in accordance with requirements 3.4 Transportation requirements are described to driver where appropriate

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to despatch operations, including the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the organising of despatch operations
- Focus of operation of work systems, equipment, management and site operating systems for despatching goods
- Problems that may occur when despatching goods and appropriate action that can be taken to resolve the problems
- Documentation and record requirements for despatch operations
- Equipment used during despatch operations and the precautions and procedures that should be followed in its use
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when organising despatch operations
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the organising of despatch operations
- Complete documentation related to the organising of despatch operations
- Work collaboratively with others when organising despatch operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when organising despatch operations in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in goods and equipment in accordance with standard

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare for stocktake	1.1 Goods to be counted and appropriate inventory systems are identified
	1.2 Required resources including equipment and record keeping systems are identified
	1.3 Allocated tasks, zones and work requirements are identified
	1.4 Sequence work role is planned in a time effective manner
2 Stocktake and count stock	2.1 Stocktaking and cyclical counts are undertaken in accordance with enterprise policies and procedures
	2.2 Inventory data is interpreted
	2.3 Inventory data is confirmed to match stock
	2.4 Stock levels are accurately counted and documented
3 Identify stock discrepancies	3.1 Discrepancies in type, number and quality of stock are accurately recorded and documented
	3.2 Products stored in inappropriate storage locations are relocated and stock records adjusted
4 Complete documentation	4.1 Inventory data is reconciled to match warehouse stock in accordance with company procedures
	4.2 Workplace documentation is completed

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

TLIA3015 Complete receival/despatch documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to complete receival/despatch documentation in accordance with relevant regulations and workplace requirements as part of work activities within the transport and logistics industry.

It includes analysing orders to identify work requirements to fill order, following workplace order documentation processes, and finalising documentation in accordance with workplace procedures and any relevant regulatory requirements.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing receival and despatch documentation
- estimating size, shape and special requirements of goods and loads
- identifying containers and goods coding, Australian Dangerous Goods (ADG) Code markings and emergency information panels
- monitoring work activities in terms of planned schedule
- reading and interpreting relevant instructions, procedures and labels
- selecting and using relevant computer, communications and office equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and International Standards, codes and regulations relevant to completing receival/despatch documentation, including current ADG Code and relevant bond, quarantine or other legislative requirements
- documentation requirements for receiving and despatching goods
- focus of operation of work systems, equipment, management and site operating systems for receiving and despatching goods
- housekeeping standards and procedures
- problems that may occur when completing receival and despatch documentation and

© Commonwealth of Australia, 2024 Public Skills Australia

appropriate action that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- site layout and obstacles
- specifications and standards for checking and inspecting received and despatched goods
- workplace procedures and policies for completing receival/despatch documentation.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, ADG Code, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to complete receival/despatch documentation in accordance with regulatory and workplace requirements including analysing orders to identify work requirements to fill order, following workplace order documentation processes, and finalising documentation in accordance with workplace procedures and any relevant regulatory requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the completion of receival/despatch documentation.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the completion of receival/despatch documentation as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse order to identify work requirements to fill order	1.1 Order request documentation is interpreted 1.2 Product(s) in order are noted and workplace location(s) are identified 1.3 Workplace and product knowledge is used to organise documentation 1.4 Required schedules for order movement are identified and noted where required 1.5 Special aspects of the order such as dangerous/hazardous goods or temperature controlled goods are identified and information on required documentation procedures and relevant regulatory requirements is identified, accessed and interpreted
2 Follow workplace order documentation processes	2.1 Workplace procedures for documentation of an order are identified 2.2 Workplace documentation is completed in accordance with workplace procedures and any relevant regulatory requirements
3 Finalise documentation	3.1 Order is checked against schedule and order form 3.2 Workplace records are completed, and labels and appropriate documentation are attached in accordance with workplace procedures and any relevant regulatory requirements 3.3 Special transportation requirements are identified and conveyed to appropriate personnel 3.4 Where applicable, all required documentation requirements for dangerous goods and hazardous materials are completed in accordance with the relevant regulations and codes

© Commonwealth of Australia, 2024 Public Skills Australia

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to the completion of receival/despatch documentation, including the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the completion of receival/despatch documentation
- Focus of operation of work systems, equipment, management and site operating systems for the receiving and despatch of goods
- Problems that may occur when completing receival and despatch documentation and appropriate action that can be taken to resolve the problems
- Specifications and standards for the checking and inspection of received and despatched goods
- Documentation requirements for the receipt and despatch of goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when completing receival and despatch documentation
- Read rand interpret instructions, procedures and labels relevant to the completion of receival and despatch documentation
- Complete receival and despatch documentation
- Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels
- Work collaboratively with others when completing receival and despatch documentation
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when completing receival and despatch documentation in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use relevant computer, communication and office equipment when completing receival and despatch documentation

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

- Estimate the size, shape and special requirements of goods and loads

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation • As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests • Practical assessment must occur: • through activities in an appropriately simulated environment at the registered training organisation, and/or

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	• in a range of work environments • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• limited or restricted spaces • exposed conditions • controlled or open environments
Received/despatched goods may involve:	• special handling and storage requirements, including temperature controlled goods, dangerous goods, explosives and hazardous substances
Problems that may occur when receiving/despatching goods include:	• damaged stock • damaged pallets or packaging • wrong stock • error in paperwork • poorly stacked stock • incorrect quantity
Aspects of goods to be checked when receiving/despatching goods may include:	• correct type • number • condition • quality • packaging • labelling • dangerous goods declarations and marking (where applicable)
Hazards in the work area may include exposure to:	• chemicals • dangerous or hazardous substances • movements of equipment, goods and materials • oil or water on floor • a fire or explosion

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• damaged packaging or pallets • debris on floor • poorly stacked pallets • faulty equipment
Consultative processes may involve:	• other employees and supervisors • suppliers, customers and clients • drivers and agents • relevant authorities and institutions • management and union representatives • industrial relations and OH&S specialists • other maintenance, professional or technical staff
Communication in the work area may include:	• phone • electronic data interchange (EDI) • fax • email • internet • RF systems • oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios • high visibility clothing
Information/documents may include:	• goods identification numbers and codes • manifests, picking slips, merchandise transfers, stock requisitions and bar codes • codes of practice and regulations relevant to the receiving of goods • Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances • operations manuals, job specifications and induction documentation • manufacturers specifications for equipment • workplace procedures and policies • supplier and/or client instructions

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• dangerous goods declarations and material safety data sheets (where applicable) • award, enterprise bargaining agreement, other industrial arrangements • relevant Australian standards and certification requirements • quality assurance procedures • emergency procedures

Applicable regulations and legislation may include:	• relevant codes and regulations for the receiving of goods
	• Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
	  • Australian and International Dangerous Goods Codes
	  • Australian Marine Orders and the International Maritime Dangerous Goods Code
	  • IATA Dangerous Goods by Air Regulations
	  • Australian and international explosives codes
	• licence, patent or copyright arrangements
	• water and road use and licence arrangements
	• export/import/quarantine/bond requirements
	• marine orders
	• relevant state/territory OH&S and environmental protection legislation
	• workplace relations regulations
	• workers compensation regulations

TLIA3023A Coordinate stocktakes

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to coordinate stocktakes in accordance with workplace requirements including planning stocktakes, coordinating stocktake activities, identifying stock discrepancies, and adjusting documentation in accordance with workplace procedures and relevant regulatory requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements when coordinating stocktakes.

Work is performed under some supervision generally within a team environment. It involves the application of product knowledge and an understanding of relevant workplace procedures and regulatory requirements when coordinating stocktakes as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan stocktake	1.1 Goods to be counted and appropriate inventory systems are identified
	1.2 Required resources including equipment, record keeping systems and personnel are identified
	1.3 Members of the team are instructed and assisted
	1.4 Team members are allocated to particular tasks and zones and given clear directions for work requirements
	1.5 Sequence and operations of the stocktake are planned in a time effective manner
2 Coordinate stocktake	2.1 Stocktaking and cyclical counts are coordinated in accordance with workplace policies and procedures
	2.2 Inventory data is interpreted
	2.3 Inventory data is confirmed to match stock
	2.4 Stock levels are accurately counted and documented
3 Identify stock discrepancies	3.1 Discrepancies in type, number and quality of stock are accurately recorded and documented
	3.2 Possible reasons for discrepancies are identified
	3.3 Products stored in inappropriate storage locations are relocated and stock records are adjusted in accordance with workplace procedures
4 Adjust documentation	4.1 Inventory data is reconciled to match warehouse stock in accordance with regulations, workplace practices, policies and procedures
	4.2 Information is reconciled with audit requirements
	4.3 Workplace documentation is completed

© Commonwealth of Australia, 2024 Public Skills Australia

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian codes and regulations relevant to the coordination of stocktakes
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the coordination of stocktakes
- Focus of operation of work systems, equipment, management and site operating systems for the conduct of stocktakes
- Workplace processes for records management and the production of stocktake reports
- Principles and functions of stocktakes
- Problems that may occur when coordinating a stocktake and appropriate action that can be taken
- Computer records and documentation requirements for the coordination of stocktakes
- Housekeeping standards procedures required in the workplace
- Site layout

Required skills:

- Communicate effectively with others when coordinating stocktakes
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the coordination of stocktakes
- Complete documentation related to the coordination of stocktakes
- Work collaboratively with others when coordinating stocktakes
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when coordinating stocktakes in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

damage to goods or equipment

- Operate and adapt to differences in stock and equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant communications, computing and office equipment when coordinating stocktakes

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation

EVIDENCE GUIDE

- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	• in a range of work environments • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• restricted spaces • exposed conditions • controlled or open environments
Equipment used in stocktaking may include:	• calculators • scanners • hand-held computers
Inventory systems may be:	• automated • manual • paper-based • computerised • microfiche
Categories or groups of products/stock may include:	• small parts • perishable goods • overseas export • dangerous goods • refrigerated products • temperature controlled stock • fragile goods

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

The characteristics of products/stock may include:	• small parts • toxicity • flammability • form • weight • size • state • perishability • fragility • security risk
Labelling systems may include:	• batch code • bar code • identification numbering systems • serial numbers • symbols for safe handling • ADG and HAZCHEM Codes
Hazards in the work area may include:	• chemicals • dangerous or hazardous substances • movements of equipment, goods and materials • oil or water on floor • a fire or explosion • damaged packaging or pallets • debris on floor • faulty racking • poorly stacked pallets • faulty equipment
Communication in the work area may include:	• phone • electronic data interchange (EDI) • fax • email • internet • RF systems • oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Personal protective equipment may include:	• gloves • safety headwear and footwear

TLIA5029A Plan and manage storage of dangerous goods and hazardous substances

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to plan and manage the storage of dangerous goods and hazardous substances in accordance with all relevant regulatory requirements and workplace procedures including the current ADG Code. This includes defining the objectives of the required handling and storage operations; specifying equipment and system performance requirements; evaluating and selecting bulk handling and storage resources; and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with all the relevant regulations, standards and codes of practice, including the current ADG Code.

Work is under general guidance on progress and outcomes of work. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within workplace policy and procedures.

A range of opportunities may be used to develop the work area and to support the development of work systems, innovative strategies to deal with contingencies and to encourage the achievement of the workplace's goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource coordination and allocation and provides leadership of others individually or in teams.

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Define objectives of required handling and storage operation	1.1 Requirements for bulk handling and storage activities are identified in accordance with workplace requirements 1.2 Current best practice and future trends for handling and storage equipment are assessed and compared to present operations 1.3 Consideration of workplace goals and present capabilities and constraints is undertaken in selecting bulk handling and storage resources
2 Specify equipment and system performance requirements	2.1 Bulk handling and storage equipment and system requirements are documented 2.2 Performance measures for equipment and system operations are developed and documented 2.3 Consultations are conducted with relevant employees and management to verify documented requirements
3 Evaluate and select bulk handling and storage resources	3.1 The range of bulk handling and storage equipment and facilities which meet specifications are researched for costs and benefits including potential adaptability for new business opportunities 3.2 A rating system is instigated to facilitate comparisons of cost/benefit and other qualitative properties of bulk handling

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and storage equipment and systems
	3.3 An analysis of current employee competency to required competency is undertaken and documented
	3.4 Equipment is selected based on comparisons of performance specifications including cost, output, set-up requirements, maintenance and retraining
4 Complete documentation	4.1 Workplace documentation is completed as appropriate
	4.2 Handling and storage requirements are documented and communicated to relevant personnel
	4.3 Reports are compiled and forwarded to appropriate personnel

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant regulations, codes of practice and legislative requirements including local and international regulations relevant to handling and storage
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- Relevant OH&S and environmental protection procedures and regulations
- Workplace procedures for the planning and management of the storage of dangerous goods and hazardous substances
- Problems that may occur during the planning and management of the storage of dangerous goods and hazardous substances and action that can be taken to resolve or report the problems
- Hierarchy of risks and hazards related to the storage of dangerous goods and hazardous substances and ways of controlling the risks involved
- Focus of operation of work systems, resources, management and workplace operating systems
- Equipment applications, capacities, configurations, safety hazards and control mechanisms
- Relevant permit and licence requirements
- Application of all relevant Australian and International Standards
- Operational procedures for safe transfer and storage of dangerous goods and hazardous materials
- Resource availability including the competencies of individuals in the team and group
- Understanding and knowledge of the application of current competencies within functional activity

© Commonwealth of Australia, 2024 Public Skills Australia

REQUIRED KNOWLEDGE AND SKILLS

- Coaching and mentoring approaches to support team members to share knowledge and skills
- Relevant workplace documentation procedures

Required skills:

- Communicate effectively with others when planning and managing the storage of dangerous goods and hazardous substances
- Read and interpret instructions, procedures, technical data, drawings, instructions and manuals relevant to the planning and management of storage of dangerous goods and hazardous substances
- Complete documentation related to the planning and management of the storage of dangerous goods and hazardous substances
- Provide leadership to others when planning and managing the storage of dangerous goods and hazardous substances
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise during the planning and management of the storage of dangerous goods and hazardous substances in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when planning and managing the storage of dangerous goods and hazardous substances
- Prioritise work and coordinate self and others in relation to activities
- Recognise hazards and apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Modify activities depending on differing operational contingencies, risk situations and environments
- Select and apply appropriate technology, information systems and procedures when planning and managing the storage of dangerous goods and hazardous substances

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

demonstrate competency in this unit	requirements of the elements and performance criteria of this unit and include demonstration of: • planning and assessing options for the safe and efficient storage of dangerous goods and hazardous substances to regulatory requirements as a minimum • identifying container markings and HAZCHEM codes • completing documentation as required for the storage of dangerous goods and hazardous goods • identifying potential hazards and planning work to minimise risks when storing dangerous goods and hazardous goods • determining (any) required permits/licensing • estimating weight and volume of goods to be stored and any special requirements • undertaking a hazard analysis
Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts • Resources for assessment include: • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or • access to an appropriate range of relevant operational situations in the workplace • In both real and simulated environments, access is required to: • relevant and appropriate materials and equipment, and • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation • As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests • Practical assessment must occur: • through activities in an appropriately simulated environment at the registered training organisation, and/or • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be undertaken in:	• various work environments in the bulk handling, dangerous goods and freight forwarding sections of the warehousing, storage, transport and distribution industries
Customers may be:	• internal or external
Operations may be conducted:	• by day or night
The workplace environment may involve:	• twenty-four hour operation • single and multi site location • large, medium and small workplaces
Work may involve:	• exposure to corrosive chemicals, solvents and adhesives, carcinogenic and other harmful substances • movement of equipment, goods, and vehicular traffic
Regulatory controls and workplace procedures:	• govern requirements for co-storage, volume, mass and required controls
Requirements for bulk handling and storage activities may include:	• types of bulk materials • quantities • handling requirements including any special equipment or operating procedures required • storage requirements • stock control methods • negating contaminant sources • controlling pest infestation
Requirements for work may include:	• site restrictions and procedures • use of safety and personal protective equipment • communications equipment • specialised lifting and/or handling equipment • incident/accident breakdown procedures • additional gear and equipment • noise restrictions • hours of operations • authorities and permits
Hazards may include:	• hazardous or dangerous materials • contamination of, or from, materials being handled

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• fire/explosions • noise, light, energy sources • stationary and moving machinery, parts or components • radioactive goods • dust/vapours • service lines • spills, leakages, ruptures
Hazard management is consistent with:	• the principle of hierarchy or control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment • Personal protective equipment may include: gloves, safety headwear and footwear, safety glasses, mask and respirator, protective clothing, breathing apparatus
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • mask and respirator • protective clothing • breathing apparatus
Consultative processes may involve:	• other employees and supervisors • relevant authorities and institutions • suppliers , potential customers and existing clients • government instrumentalities • emergency services • management and union representatives • industrial relations and OH&S specialists • other maintenance, professional or technical staff
Communication in the work area may include:	• phone • electronic data interchange (EDI) • fax • email • internet • RF communications • barcode readers • oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

Information/documentation may include:	• Australian and international codes of practice and regulations relevant to bulk handling and storage • Australian and international regulations and codes of practice for the handling, storage and transport of dangerous goods and hazardous substances, including the current ADG Code • workplace operating procedures and policies • supplier and/or client instructions • operations manuals, job specifications and procedures and induction documentation • manufacturers specifications and/or suppliers handling and storage advice • material safety data sheets • Safe Working Limits (SWL) and Working Load Limits (WLL) of load shifting equipment and storage facilities • Australian and International standards, criteria and certification requirements • communications technology equipment, oral, aural or signed communications • quality assurance standards and procedures • emergency procedures • relevant competency standards and training materials • QA plans, data and document control • conditions of service, legislation and industrial agreements including workplace agreements and awards

Applicable procedures and codes may include:	• relevant codes and regulations for bulk handling and storage
	• Australian and international regulations and codes of practice for the handling, storage and transport of dangerous goods and hazardous substances, including:
	  • Australian and International Dangerous Goods Codes
	  • Australian and International Explosives Codes
	• all relevant Australian and international standards and certification requirements,
	• relevant state/territory OH&S and environmental protection legislation in terms of duties of employers, employees, suppliers and contractors
	• licence, patent or copyright arrangements
	• relevant workplace relations legislation
	• relevant workers compensation legislation
	• equal opportunity legislation
	• equal employment opportunity and affirmative action

TLIB1028 Maintain and use hand tools

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to maintain and use hand tools in accordance with workplace procedures and safeworking codes across a variety of operational workplace contexts within the transport and logistics industry.

It includes selecting and using hand tools to complete workplace tasks, maintaining basic hand tools in accordance with manufacturer's instructions, and securing and storing hand tools in accordance with workplace procedures.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Select and use	1.1 Correct tools are chosen to complete workplace tasks and to

© Commonwealth of Australia, 2024 Public Skills Australia

	hand tools	ensure efficient and safeworking conditions
		1.2 Appropriate personal safety protection is used to minimise personal injury risk
2	**Maintain hand tools**	2.1 Equipment is cleaned and maintained in accordance with manufacturer's specifications and/or local instructions to ensure correct functionality of equipment
		2.2 Unserviceable tools are repaired, replaced or reported to relevant personnel to ensure correct functionality
3	**Secure and store hand tools**	3.1 Tools are transported in a safe, secure, efficient manner to minimise risk of injury to personnel and damage to equipment
		3.2 Tools are stored and secured according to manufacturer's or workplace procedures to prevent damage to, and losses of, equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIB1028A Maintain and use hand tools.

Assessment Requirements for TLIB1028 Maintain and use hand tools

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- identifying, selecting, and efficiently and effectively using relevant hand tools and related materials
- reading, interpreting and following relevant instructions, procedures, information and signs.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- emergency procedures
- materials for maintaining and using hand tools and the procedures and precautions for their care, use and storage
- problems that can occur maintaining and using hand tools and related action that should be taken
- relevant work health and safety (WHS)/occupational health and safety (OHS), and environmental procedures and regulations
- relevant sections of state/territory regulations, codes of practice and safeworking system requirements
- workplace documentation and records requirements
- workplace procedures and policies for maintaining and using hand tools.

© Commonwealth of Australia, 2024 Public Skills Australia

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
-

TLIB3006A Carry out inspection of vehicles designed to carry special loads

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to carry out an inspection of a commercial vehicle designed to carry a special load, including action to implement manufacturers specifications for routine checks of the vehicle and its associated equipment, to clean the vehicle and its associated equipment, and to ensure that all specified safety requirements are met and that the vehicle and equipment are operational to the requirements of both the workplace and the relevant state/territory roads and traffic authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the regulations of the relevant roads and traffic authority and workplace procedures and policy concerning vehicle inspection.

Work is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine vehicle checking and maintenance principles and procedures to inspect a commercial vehicle designed to carry special loads across a variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

© Commonwealth of Australia, 2024 Public Skills Australia

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Check vehicle	1.1 A visual check of the internal and external condition of the vehicle is carried out in accordance with workplace procedures
	1.2 Pre-operational inspections and checks of the vehicle's tyres, suspension, fluid levels and other critical features are carried out to ensure conformance with road safety standards
	1.3 Associated equipment is tested to ensure it functions correctly to manufacturers specifications
	1.4 Post start-up and shut-down checks are carried out after engine is started to identify possible engine or electrical problems
	1.5 Warning systems (instruments and gauges) are checked to ensure they are operational
	1.6 Where relevant, vehicle-monitoring device is logged on/off in accordance with manufacturers instructions and workplace policy
2 Clean vehicle and ancillary equipment	2.1 Vehicle and associated equipment is cleaned in accordance with workplace procedures and legislation
	2.2 Special purpose ancillary equipment is cleaned in accordance with any relevant government regulations and workplace procedures
3 Complete documentation	3.1 Basic faults are identified and/or diagnosed and appropriate action taken to report or remedy them as required by workplace procedures and legislation

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.2 Records of inspection are updated and recommended repairs documented in accordance with workplace polices

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant duty of care requirements for the routine inspection of vehicles designed to carry special loads
- Relevant OH&S and environmental procedures and regulations
- Procedures for the checking and routine inspection of a commercial vehicle designed to carry special loads in accordance with workplace and manufacturers requirements and established safety rules and regulations including visual inspection procedures, pre-operational checking procedures and warning systems checking procedures
- Problems that may occur during the routine inspection of a vehicle and its associated ancillary equipment, and appropriate actions and solutions
- Techniques for the recognition of faults and vehicle/ancillary system irregularities
- Basic principles of operation of systems on commercial vehicles, including electrical systems, fuel systems, cooling systems, steering systems, exhaust systems, tyres, brakes, and relevant ancillary systems
- Relevant recording and documentation procedures

Required skills:

- Communicate effectively with others when carrying out the routine inspection of a vehicle and its associated ancillary equipment
- Read and interpret instructions, procedures, information, technical data and drawings relevant to the routine inspection of a vehicle and its associated ancillary equipment
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the routine inspection of a vehicle and its associated ancillary equipment
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when carrying out the routine inspection of a vehicle and its associated ancillary equipment
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

interactions with others

- Promptly report and/or rectify any identified problems, faults or malfunctions that may be identified when carrying out the routine inspection of a vehicle and its associated ancillary equipment in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when carrying out the routine inspection of a vehicle and its associated ancillary equipment
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

	situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation
	• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment at the registered training organisation, and/or
	  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle may include all vehicles designed to carry special loads, for example:	• concrete agitator • livestock transporter • armoured car • tanker • refrigerated vehicle • waste vehicle • fresh produce vehicle • car carrier • container carrier • recovery vehicle
Inspection may be carried out in typical road transport situations, including:	• at day or night • typical weather conditions • in confined spaces, exposed conditions and controlled or open environment • while in a workplace, depot, base or warehouse

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• while in the vehicle on the road • while at a client's worksite
Ancillary equipment will be dependent on type of special load carried and may include:	• refrigeration systems • concrete agitation systems • car transporter systems • livestock transporter systems • waste loading/discharge systems • recovery systems • tanker pumping and related systems • on-board cranes and hoists • armoured car systems
Inspection may include:	• visual checks of vehicle • routine checks of vehicle systems • checks in accordance with a detailed inspection schedule
Routine checks may include:	• water levels • oil levels • air pressure in tyres • brakes • lights • condition of tyres • battery • exhaust system • suspension • functions of associated ancillary equipment
Environmental hazards may include:	• leaking oil and fuel • defective or inappropriately adjusted exhaust systems • inappropriate disposal of vehicle fluids in drains or sewerage systems
Dependent of the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Information/records may include:	• workplace routine inspection procedures, checklists and instructions for both the vehicle and associated ancillary equipment • relevant state/territory roads and traffic authority vehicle maintenance regulations • inspection checklists and records • manufacturers instructions, specifications and recommended procedures for both the vehicle and any

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	associated ancillary equipment • precautions and procedures to be adopted to protect the environment when inspecting and servicing vehicles designed to carry special loads • OH&S procedures to be followed when inspecting and servicing vehicles designed to carry special loads
Applicable regulations and legislation may include:	• relevant state/territory roads and traffic authority regulations and requirements pertaining to the inspection of vehicles designed to carry special loads • relevant state/territory OH&S legislation • relevant state/territory environmental protection legislation

TLIB5010A Plan and implement maintenance schedules

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to plan and implement maintenance schedules in accordance with relevant regulatory requirements and workplace procedures. This includes establishing maintenance requirements, organising maintenance activities, organising resources, and completing all required procedures and documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant Australian regulations, standards and codes of practice, including the ADG Code.

Work is under general guidance on progress and outcomes of work. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within workplace policy and procedures.

A range of opportunities may be used to develop the work area and to support the development of work systems, innovative strategies to deal with contingencies and to encourage the achievement of the workplace's goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource co-ordination and allocation and provides leadership of others individually or in teams.

Licensing/Regulatory Information

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Establish maintenance requirements	1.1 Equipment specifications, service requirements and workplace procedures are checked for recommended maintenance intervals and processes
	1.2 Special requirements for maintenance of storage zones are identified
	1.3 Comparisons with previous experience, future equipment use, work requirements and standard operating procedures are made to inform the planning process
	1.4 Work plan and work schedule are developed
	1.5 Contractors and/or maintenance providers (internal/external) are identified
	1.6 Costings for process are identified based on work schedule (equipment/staff off-line), equipment manufacturers recommendations, charges for materials, equipment and consumables and external/internal labour charges
	1.7 Required interruptions, processes and procedures are documented and recorded
	1.8 Clearances for any required costs for maintenance are obtained
2 Organise maintenance activities	2.1 Work schedules and staff rosters are checked to identify times when the maintenance process may be scheduled including optimum timing for any shut down
	2.2 Permission from supervisory personnel is obtained for timing of

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	maintenance to optimise the maintenance process and work
	2.3 Detailed work plans are developed to accord with work schedules, availability of expertise and the resource availability
	2.4 Employees with the required competencies are identified and where necessary appropriate training and assessment is facilitated
	2.5 Approvals for work schedule, employee work pattern and maintenance schedule adjustments are obtained and work plan is refined to ensure the maintenance program will maintain workplace outputs in terms of workplace policy
3 Organise resources	3.1 Required equipment, personnel and consumables are allocated in accordance with workplace procedures
	3.2 Consumables, equipment and expertise are located and coordinated to meet maintenance work schedule
	3.3 Externally sourced equipment, consumables and expertise are identified and appropriate arrangements made for procurement
4 Complete maintenance procedures	4.1 Completed work is checked against the maintenance schedule and the work plan
	4.2 Records of work are completed and forwarded to appropriate personnel noting areas where additional maintenance is required to maintain optimum work output and equipment life

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant Australian and international regulations, codes of practice and legislative requirements including local and international freight regulations
- Relevant OH&S and environmental procedures and regulations
- Procedures for identification and interpretation of maintenance requirements
- Procedures for identification and evaluation of information needed to plan and implement maintenance schedules
- Procedures for reviewing system options for maintenance operations including appropriate risk analysis
- Procedures for liaising with manufacturers and suppliers
- Procedures establishing and/or monitoring suitable maintenance systems

© Commonwealth of Australia, 2024 Public Skills Australia

REQUIRED KNOWLEDGE AND SKILLS

- Focus of operation of maintenance systems, resources, management and workplace operating systems
- Characteristics and capabilities of equipment, materials and processes used
- Relative features and risks of various maintenance systems, their applications and processes, and issues involved in their use
- Quality and customer service standards, policies and procedures
- Application of relevant Australian and international standards and associated certification requirements
- Resource availability including the competencies of individuals in the team/group
- The application of current competencies within functional activity
- Coaching and mentoring approaches to support team members to share knowledge and skills
- Relevant workplace documentation procedures
- Contacts and sources of information/documentation needed when planning and implementing maintenance systems
- Procedures for operating electronic communications equipment

Required skills:

- Communicate effectively with others when planning and implementing maintenance schedules
- Read and interpret instructions, procedures, information and signs relevant to the planning and implementing of maintenance schedules
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the planning and implementing of maintenance schedules
- Work collaboratively with others in the planning and implementing of maintenance schedules
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Adapt to differences in equipment in accordance with standard operating procedures
- Ensure the servicing of equipment in terms of maintenance schedule and standard operating

Required skills:

procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be undertaken in:	• various work environments in the warehousing, storage, transport and distribution industries
Customers may be:	• internal or external
Operations may be conducted:	• by day or night
The workplace environment may involve:	• twenty-four hour operation • single- and multi-site location • large, medium and small workplaces
Work systems may include:	• preventative and remedial maintenance schedules, protocols and procedures • faulty equipment tagging and repair/replacement systems • equipment inventory and identification systems • communications equipment • workplace operations • authorities and permits • hours of operation • relevant regulations
Consultative processes may involve:	• employees, supervisors and managers • equipment manufacturers and suppliers • contractors • industrial relations and OH&S specialists • other professional or technical staff
Communications systems may involve:	• telephone • fax • email • electronic data transfer of information • mail
Depending on the type of organisation concerned and the local terminology used, workplace	• company procedures • enterprise procedures

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

procedures may include:	• organisational procedures • established procedures
Documentation/records may include:	• Australian and international codes of practice and regulations relevant to equipment maintenance • Australian and international regulations and codes of practice for the handling, storage and transport of dangerous goods and hazardous substances, including the ADG Code • workplace operating procedures, maintenance schedules and policies • operations manuals, job specifications and procedures and induction documentation • Safe Working Limits (SWL) and Working Load Limits (WLL) of transport options • supplier and/or client instructions • statistical information on equipment malfunctions, maintenance and repairs • relevant Australian standards, criteria and certification requirements • communications technology equipment and oral, aural or signed communications • quality assurance and customer service standards and procedures • emergency procedures • relevant competency standards and training materials • QA plans, data and document control • conditions of service, legislation and industrial agreements including workplace agreements and awards
Applicable regulations and legislation may include:	• regulations and codes of practice related to equipment maintenance • Australian and international regulations and codes of practice for the handling, storage and transfer of dangerous goods and hazardous substances • relevant Australian and international standards and certification requirements • relevant state/territory OH&S legislation • relevant state/territory environmental protection legislation • licence, patent or copyright arrangements • relevant workplace relations legislation • relevant workers compensation legislation • equal opportunity, equal employment opportunity and affirmative action legislation

TLIC3063A Operate vehicle carrying special loads

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to drive a vehicle carrying a special load safely including compliance with road traffic authority and other relevant government regulations and company policies; and effective management of hazardous situations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence and permit requirements and regulations of the relevant state/territory roads and traffic authority as well as the specific regulatory and permit requirements pertaining to the special load being carried.

Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial vehicle carrying a special load across a variety of driving contexts.

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Carry out pre-operational checks	1.1 The pre-operational checks for the special purpose vehicle and its associated ancillary equipment are carried out in accordance with manufacturers requirements, government regulations and workplace policies and procedures
	1.2 All faults and defects identified during checks are repaired or reported in accordance with workplace procedures
2 Drive a vehicle carrying special loads	2.1 The vehicle is manoeuvred in accordance with the regulations/permit requirements for the class of vehicle involved and the load being carried
	2.2 Vehicles carrying explosives or dangerous goods are driven along designated routes in accordance with the relevant codes, relevant government regulations and workplace policies
	2.3 The load is transported and the vehicle manoeuvred in accordance with any required precautions relating to unusual/special characteristics of the load and/or relevant government regulations pertaining to the special load including the Australian Dangerous Goods Code and the Australian Explosives Code
	2.4 Signs or indicators are fixed to the vehicle if required
	2.5 Appropriate procedures are followed for the load concerned in the event of a driving emergency

© Commonwealth of Australia, 2024 Public Skills Australia

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Where applicable, Australian regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including the Australian Dangerous Goods Code and the Australian Explosives Code
- Relevant OH&S and environmental procedures and regulations
- Vehicle controls, instruments and indicators and their use
- Workplace driving and operational instructions
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on vehicle and related action
- Differences between transmission types
- Map reading and road navigation techniques
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a vehicle designed to carry special loads
- Read and interpret instructions, procedures, information and signs relevant to the driving of a vehicle designed to carry special loads
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a vehicle designed to carry special loads
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a vehicle designed to carry special loads
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when driving a vehicle designed to carry special loads in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when driving a vehicle designed to carry special loads
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the driving of a vehicle designed to carry special loads
- Monitor and anticipate traffic hazards and take appropriate action
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of vehicle and its equipment and load and take appropriate action if required
- Service vehicle and its equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources	• Performance is demonstrated consistently over a period

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

for assessment	of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation
	• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment at the registered training organisation, and/or
	  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:	• all vehicles designed to carry special loads, for example concrete agitator, livestock transporter, armoured car, tanker, refrigerated vehicle, waste vehicle, fresh produce vehicle, car carrier, container carrier, recovery vehicle
Driving may be carried out in typical road transport situations, including:	• operations conducted at day or night • typical weather conditions • on the open road • on a private road • while at a depot, base or warehouse

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• while at a client's workplace or work site
Vehicle handling procedures may include:	• starting a vehicle • steering and manoeuvring a vehicle • accelerating and braking • positioning and stopping a vehicle • reversing a vehicle • operating vehicle controls, instruments and indicators • using defensive driving techniques • managing engine performance
Pre-operational checks may include:	• visual check of vehicle • checking and topping up of fluid levels • checks of tyre pressures • checks of operation of vehicle lights and indicators • checks of brakes
Minor routine repairs may include:	• replacement of blown globes in vehicle lights • replacement of broken fan belt • replacement of blown fuse • replacement of door mirrors • repairs to rear tail-light lens • changing of tyres • repair of tyre punctures • replacement of broken coolant hose
Designated routes are:	• those that are determined by permit/regulatory requirements for a specific class of load such as explosives or dangerous goods
Driving hazards may include (examples only):	• wet and iced roads • oil on road • animals and objects on road • fire in vehicle • leaking fuel • faulty brakes • parked vehicles on the road • faulty steering mechanism on vehicle • pedestrians crossing the road • flooded sections of road • windy sections of road • foggy conditions
Factors that can cause traffic delays and diversions may include (examples only):	• traffic accidents • flooded sections of road • road damage

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• bridge/tunnel damage • road works • building construction • emergency situations such as bushfires, building fires, etc • road closures for special events such as marches, parades, etc • holiday traffic • road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Documentation/records may include:	• state/territory driving licence requirements • state/territory road rules • workplace driving instructions and procedures for drivers of vehicles carrying the specific load concerned • vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle • procedures/designated routes prescribed by the relevant authority for vehicles carrying the specific loads concerned
Applicable procedures and codes may include:	• relevant state/territory roads and traffic authority driving regulations and licence/permit requirements pertaining to the class of vehicle • relevant regulations/permit requirements specific to the load being carried • Australian regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including the Australian Dangerous Goods Code and the Australian Explosives Code • relevant state/territory road rules • relevant state/territory OH&S legislation • relevant state/territory fatigue management regulations • relevant State/Territory environmental protection legislation

TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift loads safely using manual handling methods. Work must be carried out in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning the manual handling and movement of loads.

It includes assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Assess risks associated with	1.1 Products, goods or materials to be relocated are identified and assessed to determine appropriate relocation method

© Commonwealth of Australia, 2024 Public Skills Australia

relocating load	1.2	Storage locations are determined and potential routes to be followed are identified
	1.3	Effect of load relocation on original load base is predicted
	1.4	Points of balance are estimated
	1.5	Required clearances are compared to available space and adjustments are made to moving loads to reflect required clearance
	1.6	Effects of moving contents, which may be loose, liquid, dangerous or hazardous, are considered
	1.7	Risks in potential routes are considered
	1.8	Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods
	1.9	Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified
	1.10	Team lifting processes are considered when moving loads
	1.11	Appropriate personal protective equipment is determined
	1.12	Size to weight ratio of items to be manually handled are identified
2 Plan load relocation	2.1	Relocation of the load is planned, consistent with the code of practice for manual handling and in accordance with the risk assessment
	2.2	Process for relocating load is proposed including predicting and planning for potential difficulties
	2.3	Proposed process is checked for compliance with code of practice and workplace procedures
3 Relocate load	3.1	Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and WHS/OHS requirements
	3.2	Applications appropriate for team relocation of load are identified
	3.3	Team lifting tasks are coordinated
	3.4	Planned process and route are followed

© Commonwealth of Australia, 2024 Public Skills Australia

3.5 Relocated materials are set down without damage to goods, personnel or equipment and are checked for stability

3.6 Relocation is checked to see it meets work requirements and variance/s are reported

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID1001A Shift materials safely using manual handling methods.

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851

Assessment Requirements for TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- applying relevant legislation and workplace procedures
- communicating effectively with others when manually lifting and handling materials and goods
- implementing contingency plans when manually lifting and handling, materials and goods
- interpreting and following operational instructions and prioritising work
- interpreting manual handling risks
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in loads and materials in accordance with standard operating procedures
- reading and interpreting instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using correct manual handling practices
- working collaboratively with others when manually lifting and handling materials and goods
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2024 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards and procedures
- relevant WHS/OHS procedures and guidelines concerning the manual lifting and movement of loads
- risks when manually lifting and handling materials and goods, and related precautions to control the risk, including:
- controlled actions on a movement during lifting
- distance over which load is to be shifted
- frequency of shifting operations
- load on the spine during lifting
- postures and positions during lifting
- rotation and side movement of the spine during lifting
- time allowed for shifting the load
- type, weight and position of the load
- work layout
- site layout and obstacles
- workplace procedures and policies for manual handling.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice

© Commonwealth of Australia, 2024 Public Skills Australia

and operation manuals.

TLID1001A Shift materials safely using manual handling methods

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to shift loads using manual handling methods, including assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the manual handling and movement of loads.

Work is performed under some supervision generally within a team environment.

Work involves the application of the basic principles for the safe manual handling techniques and movement of loads when shifting materials using manual handling methods as part of day-to-day work.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

© Commonwealth of Australia, 2024 Public Skills Australia

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Assess risks associated with the relocation of the load	1.1 Products, goods or materials to be relocated are identified and assessed for the appropriate method of relocation 1.2 Locations for storage are determined and potential routes to be followed are identified 1.3 Effect of load relocation on original load base is predicted 1.4 Points of balance are estimated 1.5 Required clearances are compared to available space and adjustments are made 1.6 Effects of moving contents which may be loose, liquid, dangerous or hazardous are considered 1.7 Potential risks in route(s) which may be followed are considered 1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods 1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified 1.10 Team lifting processes are considered for application 1.11 Appropriate personal protective equipment is worn 1.12 Size to weight ratio of items to be manually handled are identified
2 Plan load relocation	2.1 Relocation of the load is planned consistent with the code of practice for manual handling 2.2 Process for relocating load is proposed including predicting and planning for potential difficulties 2.3 Proposed process is checked against code of practice and workplace procedures for compliance

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3 Relocate load	3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and OH&S requirements 3.2 Applications appropriate for team relocation of load are identified 3.3 Team lifting tasks are coordinated 3.4 Planned process and route are followed 3.5 Relocated materials are set down without damage to goods, personnel or equipment and checked for stability 3.6 Relocation is checked to see that it meets work requirements, with any variance(s) reported

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S procedures and guidelines concerning the manual lifting and movement of loads
- Risks when manually lifting and handling materials and goods and related precautions to control the risk, including: the load on the spine during lifting; controlled actions on a movement during lifting; rotation and side movement of the spine during lifting; postures and positions during lifting; work layout; the type, weight and position of the load; frequency of shifting operations; distance over which load is to be shifted; and time allowed for the shifting of the load
- Workplace procedures and policies for manual handling
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when manually lifting and handling materials and goods
- Read and interpret instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- Interpret and follow operational instructions and prioritise work
- Work collaboratively with others when manually lifting and handling materials and goods

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when manually lifting and handling materials and goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected situations that may occur when manually lifting and handling materials and goods
- Apply precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in loads and materials in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
	  • applying the underpinning knowledge and skills
	  • interpreting manual handling risks
	  • using correct manual handling practices
	  • applying relevant legislation and workplace procedures

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment, and/or
	  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The shifting operations may be conducted:	• in a range of work environments • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• restricted spaces • exposed conditions • controlled or open environments
Materials to be shifted may include:	• goods • large luggage items • baggage items

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• equipment and tools • cleaning materials • components and parts of vehicles and equipment such as tyres, batteries, lifting gear, etc. • materials used in the course of work such as drums of fuel, raw materials, packaging, etc.
Loads to be shifted may be:	• irregularly shaped • packaged or unpackaged • labelled or unlabelled
Hazards in the work area may include exposure to:	• chemicals • dangerous or hazardous substances • movements of equipment, goods and materials • weight of items being handled
Personnel in the work area may include:	• workplace personnel • site visitors • contractors • official representatives
Communication in the work area may include:	• phone • electronic data interchange • fax • email • internet • radio • oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios • high visibility clothing
Information/documents may include:	• goods identification numbers and codes • manifests, bar codes, goods and container identification • manufacturers specifications for equipment/tools • workplace procedures and policies • supplier and/or client instructions • material safety data sheets • codes of practice including the National Standards for

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

Applicable regulations and legislation may include:	Manual Handling and the Industry Safety Code • relevant legislation, regulations and related documentation • award, enterprise bargaining agreement, other industrial arrangements • standards and certification requirements • quality assurance procedures • emergency procedures • relevant state/territory OH&S legislation • relevant state/territory environmental protection legislation • workplace relations regulations • workers compensation regulations • licence, patent or copyright arrangements • dangerous goods and air freight regulations • export/import/quarantine/bond requirements • marine orders

TLID2003 Handle dangerous goods/hazardous substances

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to handle dangerous goods and hazardous substances in accordance with relevant work health safety (WHS)/occupational health and safety (OHS) regulations concerning the safe handling of dangerous goods and hazardous substances, within the transport and logistics industry.

It includes identifying requirements for working with dangerous goods and/or hazardous substances, confirming site incident procedures and selecting handling techniques.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the	Performance criteria describe the performance needed to

essential outcomes.	demonstrate achievement of the element.
1 Identify requirements for working with dangerous goods and/or hazardous substances	1.1 Dangerous goods/hazardous substances are identified from information including class labels, manifests and other documentation
	1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.3 Storage requirements for dangerous goods/hazardous substances are identified and applied
	1.4 Legislative requirements for dangerous goods/hazardous substances are used to plan work activities
	1.5 Handling procedures for different classes and characteristics of goods are observed
	1.6 Confirmation is sought from relevant personnel where dangerous goods/hazardous materials do not appear to be appropriately marked
2 Confirm site incident procedures	2.1 Incident reporting processes are identified
	2.2 Emergency equipment is located and checked in accordance with workplace procedures and statutory regulations
	2.3 Emergency procedures are identified and confirmed
3 Select handling techniques	3.1 Load handling and shifting procedures are selected in accordance with identified requirements for particular goods
	3.2 Handling equipment is checked for conformity with workplace requirements and manufacturer guidelines
	3.3 Suitable signage or placards are checked for compliance with workplace procedures, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for TLID2003 Handle dangerous goods/hazardous substances

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with others
- completing relevant documentation
- determining required permits
- estimating weight and dimensions of load and any special requirements
- identifying and assessing handling and storage precautions and requirements for dangerous goods/hazardous substances
- identifying and selecting safety requirements for handling dangerous goods/hazardous substances
- identifying containers and goods coding, markings and emergency information panels for mode of transport storage selected
- identifying dangerous goods/hazardous substances using labels, International Maritime Dangerous Goods (IMDG) Code markings, HAZCHEM signs and other relevant identification criteria
- identifying job and site hazards, and planning work to minimise risks
- implementing contingency plans
- maintaining workplace records and documentation
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule, predicting consequences and identifying improvements
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, regulations, information and signs
- recognising hazards and applying precautions and required action to minimise, control or eliminate recognised hazards
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures

© Commonwealth of Australia, 2024 Public Skills Australia

- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- selecting appropriate equipment and work systems including PPE
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- equipment applications, capacities, configurations, safety hazards and control mechanisms
- housekeeping standards and procedures
- permit and licence requirements
- problems that may arise when handling of dangerous goods and hazardous substances and actions that should be taken to prevent or solve these problems
- relevant aspects of current Australian Dangerous Goods (ADG) Code and relevant Australian Standards
- relevant regulations and codes concerning handling dangerous goods/hazardous substances
- risks when handling dangerous goods/hazardous substances and related precautions to control risk
- workplace procedures for handling and storing dangerous goods/hazardous substances.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload goods and cargo in accordance with relevant state/territory roads and traffic authority regulations/permit requirements.

It includes loading and unloading goods and cargo, securing and protecting a load and completing all required documentation.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2024 Public Skills Australia

1	**Load and unload goods/cargo**	1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading workplace procedures
		1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
		1.3 Dangerous or hazardous goods are identified and handled in accordance with the current Australian Dangerous Goods (ADG) Code and other relevant regulations/permit requirements
		1.4 Load is packed/unpacked to make safe and effective use of available spaces
		1.5 Goods/cargo are loaded in accordance with relevant mass and loading regulations and workplace procedures
		1.6 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
		1.7 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
		1.8 Goods requiring special handling and/or documentation are identified and workplace procedures are followed
		1.9 Relocated material is restacked appropriate for transport method, safe height, weight loading, size and crushability of goods
2	**Secure and protect load**	2.1 Load distribution is checked to ensure it is even, legal and within safe working capacity
		2.2 Load is checked to ensure dangerous goods and hazardous substances are appropriately segregated in accordance with current ADG Code
		2.3 Load is secured using correct load restraint and protection equipment for different loads, carrying and storage conditions
		2.4 Load is protected in accordance with legal and workplace safety requirements
3	**Complete**	3.1 Load is inspected and checked for security to travel, in accordance with relevant regulations/permit requirements

© Commonwealth of Australia, 2024 Public Skills Australia

documentation		and current ADG Code, as required
	3.2	All required goods documentation is completed in accordance with workplace requirements including current ADG Code, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying required action to minimise, control or eliminate identified hazards
- completing relevant documentation
- estimating load size, shape and special requirements and taking appropriate action
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels, and taking appropriate action
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in cargo and equipment in accordance with operating procedures
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures, information, signs and labels
- applying relevant legislation and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2024 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- chain of responsibility workplace procedures
- housekeeping workplace procedures
- national load restraint guidelines
- problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve these problems
- relevant Australian and international regulations and codes of practice for handling and transporting dangerous goods and hazardous substances
- relevant Australian Standards and regulations including state/territory mass and loading regulations
- risks when loading and unloading goods/cargo and related precautions to control risk
- safe work methods for securing load
- security awareness requirements when loading and unloading vehicles and in particular recognising, isolating and reporting suspicious cargo and goods
- site layout and obstacles
- WHS/OHS procedures and guidelines concerning the lifting and movement of loads
- workplace procedures and policies for loading and unloading goods/cargo.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift in compliance with the relevant state/territory authority licence requirements and regulations, in a variety of operational contexts.

It includes checking forklift condition, driving forklift to fulfil operational requirements, and monitoring and maintaining forklift performance and site conditions.

Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory work health and safety (WHS)/occupational health and safety (OHS) authority.

Operation of a forklift is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

© Commonwealth of Australia, 2024 Public Skills Australia

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Check forklift condition	1.1 Condition of forklift is checked for compliance with WHS/OHS and workplace requirements for warning devices, manufacturer specifications and nature of load shifting task
	1.2 Attachments are checked to ensure appropriate adjustment and operation
	1.3 Mirrors and seats are adjusted for safe operation by driver
	1.4 Logbooks are checked and appropriate workplace documentation is completed in accordance with workplace requirements
2 Drive forklift	2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturer instructions
	2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
	2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques
	2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning
	2.5 Forklift is parked, shut down and secured in accordance with manufacturer specifications, regulations and workplace procedures
3 Operate forklift to handle loads	3.1 Lifting task to be undertaken is appropriately planned, and correct lifting truck and attachments are selected
	3.2 Load is lifted, carried, lowered and set down in accordance with WHS/OHS legislation, manufacturer specifications and company procedures
4 Monitor site conditions	4.1 Hazards and traffic flow are identified when selecting the most efficient route and appropriate adjustments are made
	4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs

© Commonwealth of Australia, 2024 Public Skills Australia

5 Monitor and maintain forklift performance	5.1 Performance and efficiency of vehicle operation is monitored during use
	5.2 Defective/irregular performance and malfunctions are reported to relevant personnel
	5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2010A Operate a forklift.

Assessment Requirements for TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids, and carrying out lubrication processes
- communicating and working effectively with others
- completing relevant documentation
- ensuring forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of forklift and its equipment, and taking appropriate action as required
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2024 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- forklift handling procedures
- high risk work licence requirements
- operating hazards and related defensive driving and hazard control techniques
- operational emergency procedures
- pre-operational checks carried out on forklift and related action
- principles of stress management when driving a forklift
- relevant duty of care requirements for operating a forklift
- relevant WHS/OHS and environmental procedures and regulations
- site layout and obstacles
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate a forklift, including checking forklift condition, driving the forklift to fulfil operational requirements, monitoring site conditions, and monitoring and maintaining forklift performance. Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory OH&S authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Operation of a forklift must be carried out in compliance with the licence requirements and regulations of the relevant state/territory authority.

Operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of routine equipment operation principles and procedures to maintain the safety and operation of a forklift in a variety of operational contexts.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Check forklift condition	1.1 Condition of forklift is checked for compliance with OH&S and workplace requirements for warning devices, manufacturers specifications and the nature of the load shifting task
	1.2 Attachments are checked to ensure appropriate adjustment and operation
	1.3 Mirrors and seats are adjusted for safe operation by the driver
	1.4 Log books are checked and appropriate workplace documentation is completed in accordance with workplace requirements
2 Drive the forklift	2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturers instructions
	2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
	2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques
	2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning
	2.5 The forklift is parked, shut down and secured in accordance with manufacturers specifications, regulations and workplace procedures
3 Operate a forklift to handle loads	3.1 The lifting task to be undertaken is appropriately planned and the correct lifting truck and attachments are selected
	3.2 The load is lifted, carried, lowered and set down in accordance with OH&S legislation, manufacturers specifications and company procedures

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
4 Monitor site conditions	4.1 When selecting the most efficient route, hazards and traffic flow are identified and appropriate adjustments are made
	4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs
5 Monitor and maintain forklift performance	5.1 Performance and efficiency of vehicle operation is monitored during use
	5.2 Defective/irregular performance and malfunctions reported to relevant personnel
	5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant duty of care requirements pertaining to the operation of a forklift
- Relevant OH&S and environmental procedures and regulations
- Workplace operating procedures
- Forklift controls, instruments and indicators and their use
- Forklift handling procedures
- Procedures to be followed in the event of an operational emergency
- Engine power management and safe operating strategies
- Efficient driving techniques
- Operating hazards and related defensive driving and hazard control techniques
- Pre-operational checks carried out on forklift and related action
- Principles of stress management when driving a forklift
- Site layout and obstacles

Required skills:

- Communicate effectively with others when operating a forklift
- Read and interpret instructions, procedures, information and signs relevant to the operation of a forklift

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the operation of a forklift
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a forklift
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when operating a forklift
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a forklift
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- Monitor performance of forklift and its equipment and take appropriate action where required
- Ensure that a forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

demonstrate competency in this unit	requirements of the elements and performance criteria of this unit and include demonstration of applying: • the underpinning knowledge and skills • relevant legislation and workplace procedures • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation
	• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment at the registered training organisation, and/or
	  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Types of forklift may include:	• counterbalance trucks • reach trucks • pallet trucks

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

Operations may be carried out in typical forklift operational situations, including:	• operations conducted at day or night • typical weather conditions • on the open road • on a private road or worksite • while at a workplace
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• restricted spaces • exposed conditions • controlled or open environments
Loads to be shifted may require:	• special precautions
Loads to be shifted may be:	• irregularly shaped • packaged or unpackaged • labelled or unlabelled • palleted or unpalleted
Hazards in the work area may include exposure to:	• chemicals • dangerous or hazardous substances • movements of equipment, goods and materials
Personnel in the work area may include:	• workplace personnel • site visitors • contractors • official representatives
Forklift handling procedures may include:	• starting a forklift • steering and manoeuvring a forklift • accelerating and braking • positioning and stopping a forklift • reversing a forklift • operating forklift controls, instruments and indicators • using defensive driving techniques • managing engine performance
Pre-operational checks may include:	• visual check of forklift • checking and topping up of fluid levels • checks of tyres • checks of operation of forklift lights and indicators • checks of brakes
Hazards may include (examples only):	• wet and iced operating surfaces • oil on operating surface

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• faulty brakes • workplace obstacles and other operational equipment and vehicles • damaged loads and pallets • other personnel in work area
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Personal protection equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios • high visibility clothing
Information/documents may include:	• goods identification numbers and codes, including IMDG markings and HAZCHEM signs • manifests, bar codes, picking slips, merchandise transfers, stock requisitions, goods and container identification • Australian Standard 2359 - Industrial Truck Code • manufacturers specifications for forklift and associated equipment • operations and service record book or log • workplace procedures and policies for the operation of forklifts • supplier and/or client instructions • ADG Code and material safety data sheets • regulatory requirements concerning the use of forklifts • award, enterprise bargaining agreement, other industrial arrangements • standards and certification requirements • quality assurance procedures • emergency procedures
Applicable procedures and codes may include:	• relevant state/territory regulations pertaining to the operation of forklifts • relevant codes and standards, including Australian Standard 2359 - Industrial Truck Code • relevant state/territory OH&S legislation • relevant state/territory fatigue management regulations • relevant state/territory environmental protection legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate specialised load shifting equipment in accordance with workplace requirements and relevant regulatory requirements, including planning work for the current working conditions; using controls and equipment operating systems to manage movement of the unit and accessory operations; locating load and identifying load characteristics; moving materials and loads; monitoring and operating controls; and stopping, parking and securing equipment after operation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in accordance with codes, regulations, licence and/or permit and workplace requirements relevant to operation of the specialised load shifting equipment concerned.

Safety checks and equipment tests are performed under limited supervision.

Work involves the application of regulatory requirements and workplace procedures to the operation of specialised load shifting equipment in the stevedoring, transport, warehousing, distribution and/or storage industries.

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan work for the current working conditions	1.1 Traffic flow and work area conditions are constantly assessed and anticipated to allow safe operation to ensure no injury to people, or damage to equipment, loads or facilities 1.2 Characteristics of the load are taken into account to ensure that, where applicable, appropriate attachments are used to transport the load 1.3 Any occurrences in the work area that may affect the safety and efficiency of operations are reported to the appropriate personnel
2 Use controls and equipment operating systems to manage movement of the unit and accessory operations	2.1 Equipment is prepared and any appropriate attachment fitted 2.2 Gear and operational levers are checked to ensure that they are in the neutral position prior to inserting ignition key and starting engine 2.3 Engine is started in accordance with manufacturers guidelines to bring the engine to speed 2.4 Instruments and gauges are monitored during start-up and operations to ensure that operation is within manufacturers specifications and enterprise safety requirements 2.5 Engine power is managed for efficiency of equipment movement and economy of equipment operations 2.6 Equipment operations are conducted within the manufacturer's specified torque range 2.7 Any faults or damage to equipment are immediately reported to the appropriate personnel

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3 Locate load and identify load characteristics	3.1 Load is located and identified according to instructions 3.2 Loading and unloading plans are followed to ensure efficiency and safety of operations 3.3 Characteristics of the load are taken into account to ensure that appropriate loading and unloading procedures are followed 3.4 Hazardous goods are identified and relevant procedures are taken into account when planning and conducting the work 3.5 Load weight and dimensions are within the capacity of the equipment
4 Move materials and loads	4.1 Equipment is manoeuvred and positioned using smooth and controlled movements 4.2 Manoeuvres are within the limits of the equipment and in line with manufacturers specifications 4.3 Materials are moved ensuring no injury to personnel or damage to equipment or goods
5 Monitor and operate controls	5.1 Equipment controls are monitored and operated in accordance with manufacturers operating instructions 5.2 Control systems are understood and acted upon in accordance with statutory authority regulations, manufacturers guidelines and site operating procedures 5.3 Control faults are identified and reported in accordance with manufacturers instructions and workplace guidelines
6 Stop, park and secure equipment	6.1 Equipment is brought to a controlled halt within manufacturers guidelines 6.2 Equipment is parked without injury to personnel or damage to equipment, loads or facilities in accordance with company procedures 6.3 Equipment is secured on a flat, even surface and not close to doorways, aisles, access-ways or blind corners and in accordance with securing procedures for the appropriate equipment

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

© Commonwealth of Australia, 2024 Public Skills Australia

REQUIRED KNOWLEDGE AND SKILLS

- Regulations relevant to the operation of specialised load shifting equipment, including, where relevant, the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the operation of the specialised load shifting equipment
- Focus of operation of work systems, equipment, management and site operating systems for the operation of the specialised load shifting equipment
- The purpose, characteristics, capabilities, requirements and limitations of the specialised load shifting equipment
- Conveyed materials' potential for toxicity, reactiveness, material grade, type and purpose including information from relevant material safety data sheets and ADG Code documentation (where applicable)
- Problems that may occur when operating specialised load shifting equipment and appropriate action that can be taken to resolve the problems
- Operational safety requirements and precautions for the specialised load shifting equipment concerned
- Documentation and record requirements
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles
- Relevant permit and licence requirements

Required skills:

- Communicate effectively with others when operating specialised load shifting equipment
- Read and interpret instructions, procedures, information and signs relevant to work activities
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the operation of specialised load shifting equipment
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating specialised load shifting equipment
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when operating specialised load shifting equipment in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when operating specialised load shifting equipment
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of specialised load shifting equipment
- Plan own work including predicting consequences and identifying improvements
- Monitor work activities in terms of planned schedule

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use relevant gear and accessories when operating specialised load shifting equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of specialised load shifting equipment and take appropriate action where required
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation
	• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment at the registered training organisation, and/or
	  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	• in a range of work environments • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• limited or restricted spaces • holds on ships • exposed conditions • controlled or open environments • even or uneven surfaces • wet or dry surfaces
Equipment may include:	• reach stackers • straddle trucks • excavators • front-end loaders (over 10 tonne)

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• bulldozers (both in transport and shipping terminals and in the holds of ships) • straddle carriers
Requirements for work may include:	• site restrictions and procedures • use of safety and personal protective equipment • communications equipment • specialised lifting and/or handling equipment • additional gear and equipment • noise restrictions • hours of operations • authorities and permits
Hazards in the work area may include exposure to:	• chemicals and fumes • dangerous or hazardous substances • stationary and moving machinery, goods, materials and vehicular traffic • contamination of, or from, materials being handled • service lines • spills, leakages and ruptures • dust/vapours • faulty gear/equipment/tools
Consultative processes may involve:	• workplace personnel including supervisors and managers • equipment manufacturers and suppliers • site visitors and contractors • union representatives, industrial relations and OH&S specialists • other professional or technical staff
Communication in the work area may include:	• phone • fax • email • internet • electronic data interchange (EDI) • RF communications • bar code readers • oral, aural or signed communications
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios • respirators and fume masks • protective clothing

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• high visibility clothing • company procedures • enterprise procedures • organisational procedures • established procedures
Information/documents may include:	• workplace procedures and policies for the operation of the specialised load shifting equipment concerned • goods identification numbers and codes • manifests, picking slips, merchandise transfers, stock requisitions and bar codes • manufacturers specifications for equipment/tools • equipment identification labels, bar codes and serial numbers • supplier and/or client instructions • relevant OH&S requirements and policies • relevant Australian standards and certification requirements • material safety data sheets where applicable • codes of practice including the National Standards for Manual Handling and the Industry Safety Code • relevant legislation, regulations and related documentation including the ADG Code • award, enterprise bargaining agreement and other industrial arrangements • quality assurance procedures • emergency procedures
Applicable regulations and legislation may include:	• relevant codes, regulations and licence/permit requirements pertaining to the operation of the specialised load shifting equipment concerned including the ADG Code (where applicable) • relevant state/territory OH&S legislation • relevant state/territory environmental protection legislation • relevant Australian standards and certification requirements • licence, patent or copyright arrangements • water and road use and licence arrangements • export/import/quarantine/bond requirements • workplace relations regulations including equal opportunity, equal employment opportunity and affirmative action legislation • workers compensation regulations

TLID2013A Move materials mechanically using automated equipment

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to move materials mechanically using automated equipment such as automatic guided vehicles, tow motors, high level order pickers, conveyor systems, and mechanised pallet movers. This includes selecting appropriate mechanical moving equipment (where relevant), moving materials/goods in accordance with operational requirements, checking condition of materials/goods and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the movement of materials mechanically using automated equipment.

Work is performed under limited or minimum supervision. It involves the application of the basic principles and routine procedures for the safe movement of materials mechanically using automated equipment.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Select load moving equipment	1.1 The mechanised handling equipment, the route to be taken and procedures to be used are selected appropriate to the characteristics of the goods
	1.2 Dangerous goods and hazardous materials are identified and handled in accordance with codes of practice, OH&S requirements and workplace procedures
2 Move goods	2.1 Goods are moved using the selected materials handling equipment in accordance with occupational health and safety regulations, manufacturers instructions and company procedures
	2.2 Problems in the movement of goods and materials using the automated equipment are identified and are reported in accordance with workplace procedures
3 Check goods and complete documentation	3.1 Moved goods are inspected for possible damage during transit/movement and appropriate action is taken
	3.2 All required documentation is completed for the tracking of the moved goods in accordance with company requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

© Commonwealth of Australia, 2024 Public Skills Australia

REQUIRED KNOWLEDGE AND SKILLS

Required knowledge:

- Regulations relevant to the use of automated equipment to move materials mechanically
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the use of automated equipment to move materials mechanically
- Focus of operation of work systems, equipment, management and site operating systems for the use of automated equipment to move materials mechanically
- The purpose, characteristics, capabilities, requirements and limitations of the automated materials moving equipment
- Problems that may occur during the use of automated equipment to move materials mechanically and appropriate action that can be taken to resolve the problems
- Risks when using automated equipment to move materials and related precautions to control the risks
- Documentation and record requirements
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when using automated equipment to move materials mechanically
- Read and interpret instructions, procedures, information and signs relevant to the use of automated equipment to move materials mechanically
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the use of automated equipment to move materials mechanically
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when using automated equipment to move materials mechanically
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when using automated equipment to move materials mechanically in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of automated equipment and take appropriate action where required
- Ensure servicing of automated equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids (where applicable) and carry out lubrication processes in the course of work activities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment,

TLID2016A Load and unload explosives and dangerous goods

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to load and unload explosives and dangerous goods, including identifying explosives/dangerous goods; loading and unloading explosives/dangerous goods using appropriate equipment; securing and protecting the vehicle load; and checking the vehicle to ensure the load is secure and the vehicle is marked in accordance with regulatory requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant Australian and state/territory regulations including the current Australian Dangerous Goods (ADG) Code, the current Australian Explosives Code, and mass and loading regulations.

Work is performed under limited or minimum supervision. It involves the application of the basic principles, routine procedures and specific regulatory requirements to the loading and unloading of explosives and dangerous goods in a range of operational situations.

Licensing/Regulatory Information

Refer to Unit Descriptor

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare to load and unload vehicle	1.1 Explosives and/or dangerous goods are identified and their characteristics taken into account when determining appropriate handling, loading and storage procedures including confirmation that the relevant emergency procedures are being carried out
	1.2 Compatibility of explosives and/or dangerous goods is taken into account when assembling and segregating cargo for loading
	1.3 Vehicle and/or loading equipment is checked to ensure it is suitable to handle/carry load
2 Load/unload vehicle	2.1 Vehicle is loaded/unloaded in accordance with workplace procedures and the current ADG/Australian Explosives Code as applicable
	2.2 The load is segregated according to class and subsidiary risk, and the distribution of the load is checked in accordance with workplace procedures, relevant mass and loading regulations and the current ADG/Australian Explosives Code as applicable
	2.3 Personal protective equipment is used during the loading/unloading operations as required for the type of dangerous goods/explosive concerned
	2.4 Emergency procedures are followed in the event of an incident or accident when loading or unloading explosives and/or dangerous goods
3 Secure and protect vehicle load	3.1 The vehicle load is secured using the correct load restraint and protection equipment for different loads, vehicles and carriage conditions concerned
	3.2 The load is protected in accordance with legal and workplace

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	safety requirements
	3.3 The distribution of the load is checked to ensure that it is even, legal and within the safe working capacity of the vehicle
	3.4 Vehicle is clearly marked/placarded to indicate the carriage of explosives and/or dangerous goods, in accordance with government regulations and company procedures
4 Check the vehicle	4.1 The loaded vehicle is inspected and checked to ensure that it is suitable to carry explosives and/or dangerous goods and the load weight and dimensions are within the vehicle's safe carrying capacity and equipment capability
	4.2 The loaded vehicle is checked to ensure that it can be safely parked and secured
	4.3 Dangerous goods declaration and all required transportation documentation for the cargo is completed in accordance with workplace requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant Australian and state/territory regulations and codes pertaining to the identification, handling and marking of explosives and dangerous goods
- Relevant state/territory mass and loading regulations
- OH&S procedures and guidelines concerning the lifting and movement of loads
- Risks and hazards when loading, unloading and handling explosives and dangerous goods, and related precautions to control the risk
- Workplace procedures and policies for the loading and unloading of explosives and dangerous goods
- Characteristics of various classes of explosives and dangerous goods relevant to handling and transport
- Compatibility of various types of explosives and dangerous goods
- Housekeeping standards procedures required in the workplace
- Manual handling techniques and manually-operated load shifting equipment required for the loading, unloading and handling of explosives and dangerous goods
- Methods of securing a load on a vehicle
- Methods of placarding or marking a vehicle carrying explosives/dangerous goods

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

- Communicate effectively with others when loading, unloading and handling explosives and dangerous goods
- Read and interpret instructions, procedures, information and signs relevant to the loading, unloading and handling of explosives and dangerous goods
- Identify and interpret containers and goods coding, markings and, where applicable, emergency information panels for the mode of transport/storage selected
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Operate electronic communication equipment to required protocol
- Estimate the size, shape and special requirements of loads
- Work collaboratively with others when loading, unloading and handling explosives and dangerous goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when loading, unloading and handling explosives and dangerous goods
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the loading, unloading and handling of explosives and dangerous goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Use manual handling techniques and operate manually-operated load shifting equipment when loading, unloading and handling explosives and dangerous goods
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the

EVIDENCE GUIDE

performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
	  • identifying load characteristics, loading equipment and related practices
	  • identifying load label in accordance with identified classification and subsidiary risk information
	  • identifying markings/placards for vehicle in accordance with relevant regulatory requirements
	  • segregating, distributing and securing load for safe transport in accordance with regulations and current ADG/AEG Code requirements
	  • safely loading and unloading explosives and dangerous goods in accordance with workplace procedures and current ADG/AEG Code requirements

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation • As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests • Practical assessment must occur: • through activities in an appropriately simulated environment at the registered training organisation, and/or

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:	• in a range of work environments and weather conditions • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• limited and restricted spaces • exposed conditions • controlled or open environments • a workplace, warehouse or depot • in a vehicle on the road • at a client's workplace
Goods/cargo to be loaded and unloaded may require:	• special precautions for handling and stacking
Classes of dangerous goods and explosives are:	• as defined in the respective Australian codes
Standard placarding, marking and signage for identified explosives and dangerous goods are:	• as required in the respective Australian codes, including HAZCHEM Codes
Personnel in the work area may include:	• workplace personnel • site visitors • contractors • official representatives
Communication in the work area may include:	• phone • electronic data interchange • fax • email • internet • radio

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• oral, aural or signed communications • company procedures • enterprise procedures • organisational procedures • established procedures
Loading operations may be carried out:	• manually • with the aid of lifting equipment and/or appliances
Load restraint procedures and equipment are:	• as specified in mass and loading regulations and guidelines and current ADG Code/Australian Explosives Code as applicable
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios • high visibility clothing
Information/documents may include:	• goods identification numbers and codes, including current ADG Code and IMDG markings and HAZCHEM signs • relevant codes of practice, including the Australian Dangerous Goods Code, the Australian Explosives Code, the Industry Safety Code, and National Standards for Manual Handling • manifests, bar codes, goods and container identification/serial number • material safety data sheets • manufacturers specifications for equipment/tools • workplace procedures and policies for the loading and unloading of vehicles • supplier and/or client instructions • National Load Restraint Guide • Australian Truck Drivers Manual • award, enterprise bargaining agreement, other industrial arrangements • standards and certification requirements • quality assurance procedures • emergency procedures
Applicable regulations and legislation may include:	• Australian and state/territory mass and loading regulations • Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including: • Australian and International Dangerous Goods Codes

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

- Australian Marine Orders and the International Maritime Dangerous Goods Code
- IATA Dangerous Goods by Air regulations
- Australian and International Explosives Codes
- Code of Practice for the Safe Transport of Radioactive Substances
- state/territory legislation covering the safe handling of infectious substances

- relevant state/territory environmental protection legislation
- workplace relations regulations
- equal opportunity legislation
- equal employment opportunity and affirmative action legislation
- relevant state/territory OH&S legislation

TLID2047 Prepare cargo for transfer with slings

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare cargo for the transfer with slings in accordance with workplace requirements and relevant regulatory requirements, within the transport and logistics industry.

It includes preparing for cargo transfer, calculating safe working load (SWL) or working load limit (WLL) of slings and loads, slinging and unslinging cargo, and strapping and unstrapping goods.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated high risk work licence requirements and to comply with relevant codes of practice and/or guidelines.

Safety checks and equipment tests are performed under limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare cargo transfer	1.1 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.2 Working area is prepared and maintained in accordance with national standards, safety codes and site operating procedures
	1.3 Unsafe work practices and/or faulty equipment is reported in accordance with enterprise procedures
	1.4 Correct protective equipment is identified and worn/used
2 Calculate safe working load or working load limit of slings and loads	2.1 SWL or WLL is calculated using standardised formulae for different types of lifting cables
	2.2 Lifting equipment is checked to determine SWL
	2.3 Slinging gear is checked for conformity with safety equipment
3 Sling and unsling cargo	3.1 Cargo is slung/unslung in accordance with national standards, safety codes and site operating procedures
	3.2 Correct securing devices are identified and used
	3.3 Load is steadied by tag lines as required
	3.4 Damaged cargo is identified and reported in accordance with enterprise procedures
	3.5 Slinging attachments are released from load ensuring no injury to personnel or damage to machinery or cargo
4 Strap and unstrap goods	4.1 Cargo is strapped and unstrapped in accordance with national standards, safety codes and site operating procedures
	4.2 Mechanical strapping equipment is used in accordance with manufacturer instructions
	4.3 Damaged cargo is identified and reported in accordance with enterprise reporting procedures
	4.4 Strapping arrangements are secured/released to/from load ensuring no injury to personnel or damage to machinery or

Assessment Requirements for TLID2047 Prepare cargo for transfer with slings

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant high risk work legislation and workplace procedures
- calculating safe working load (SWL) and working load limit (WLL)
- communicating and working effectively with others
- completing relevant documentation
- inspecting equipment prior to use
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with workplace operating procedures
- planning own work, predicting consequences and identifying improvements
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant gear and equipment when preparing cargo for transfer with slings
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using balance points and estimating weights in setting up loads to be shifted
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2024 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- cargo potential for toxicity, reactiveness, material grade, type and purpose including information from relevant safety data sheets (SDSs)/material safety data sheets (MSDSs) and current Australian Dangerous Goods (ADG) Code documentation
- documentation and record requirements
- gear and equipment used when transferring cargo with slings, and precautions and procedures that should be followed in their use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating procedures for transferring cargo with slings
- problems that may occur when preparing cargo for transfer with slings and appropriate action that can be taken to resolve these problems
- relevant regulations for transferring cargo with slings, including current ADG Code and bond, quarantine and other high risk work legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- requirements for SWL and WLL
- slings, dogging and rigging licence to perform high risk work requirements
- site layout and obstacles
- workplace procedures and policies for transferring cargo with slings.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and

© Commonwealth of Australia, 2024 Public Skills Australia

operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLID3015A Identify and label explosives and dangerous goods

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to identify and label explosives and dangerous goods, including assessing explosives/dangerous goods; handling explosives/dangerous goods in accordance with regulatory requirements; labelling explosives/dangerous goods in accordance with regulatory requirements; and complying with all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the regulatory requirements of the relevant Australian state/territory authorities concerned with the carriage of explosives and dangerous goods including the current Australian Dangerous Goods and Australian Explosives Codes.

Work is performed under limited or minimum supervision. It involves the application of standard procedures and regulatory requirements for the identification and labelling of explosives and dangerous goods.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Assess explosives/dangerous goods	1.1 Load is checked for explosives/dangerous goods in accordance with the relevant codes and government regulations
	1.2 Types of explosives/dangerous goods are identified from labels, DG declarations and placarding in accordance with workplace procedures, and all required action is taken to ensure compliance with relevant government regulations and ADG/Australian Explosives Codes as applicable
	1.3 Hazards posed by load are identified from labels and material safety data sheets (MSDS)
2 Handle explosives/dangerous goods	2.1 Identified explosives/dangerous goods are handled and loaded/unloaded in accordance with regulatory requirements, codes, National Load Restraint Guide, and employer policy
	2.2 Appropriate personal protective equipment is used when handling explosives/dangerous goods in accordance with class, subsidiary risk and MSDS information
	2.3 Handling of different types of load takes into account the identified hazards posed by the explosives/dangerous goods concerned
	2.4 When loading/storing explosives/dangerous goods, segregation procedures are followed according to the class and subsidiary risk information
3 Label explosives/dangerous goods	3.1 All packages/containers are labelled with the class and subsidiary risk in accordance with current ADG/Australian Explosives Codes as applicable
	3.2 A dangerous goods declaration is included with manifest and other shipping documents

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.3 Vehicles carrying explosives and/or dangerous goods are placarded in accordance with current ADG/Australian Explosives Codes as applicable
4 Complete documentation	4.1 All required transport documents are completed in accordance with current ADG/Australian Explosives Codes as applicable

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant Australian and state/territory regulations and codes pertaining to the identification and labelling of explosives and dangerous goods including the current ADG and Australian Explosives Codes
- OH&S procedures and guidelines concerning the lifting and movement of loads
- Risks and hazards when loading, unloading and handling explosives and dangerous goods, and related precautions to control the risk
- Workplace procedures and policies for the identification and labelling of explosives and dangerous goods
- Characteristics of explosives and dangerous goods relevant to handling and transport
- Compatibility of various types of explosives and dangerous goods
- Site layout and obstacles
- Housekeeping standards procedures required in the workplace

Required skills:

- Communicate effectively with others when loading, unloading and handling explosives and dangerous goods
- Read and interpret instructions, procedures, information and signs relevant to the loading, unloading and handling of explosives and dangerous goods
- Interpret material safety data sheets, containers and goods coding, markings and other information describing explosives and dangerous goods including, where applicable, emergency information panels for the mode of transport/storage selected
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the loading, unloading and handling of explosives and dangerous goods

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

- Correctly mark/label explosives and dangerous goods
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when loading, unloading and handling explosives and dangerous goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when loading, unloading and handling explosives and dangerous goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when loading, unloading and handling explosives and dangerous goods
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the loading, unloading and handling of explosives and dangerous goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of: • identifying explosives and dangerous goods from labels in accordance with regulatory requirements and practices

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

	• handling explosives and dangerous goods according to regulatory requirements, codes, National Load Restraint Guide and employer policy as appropriate • locating, interpreting and applying relevant codes and regulations • indentifying the hazards from labels of explosives and dangerous goods • identifying the personal protective equipment required when handling explosives and dangerous goods • maintaining workplace records for the explosives and dangerous goods

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation
	• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment at the registered training organisation, and/or
	  • in an appropriate range of situations in the workplace

TLID3024 Use specialised liquid bulk transfer equipment (gravity/pressurised)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use specialised gravity and pressurised liquid bulk transfer equipment in accordance with the current Australian Dangerous Goods (ADG) Code and relevant state/territory regulations.

It includes planning work, transferring liquid bulk in accordance with regulatory and operational requirements, monitoring and operating controls, and completing all operations, as required.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the	Performance criteria describe the performance needed to

© Commonwealth of Australia, 2024 Public Skills Australia

essential outcomes.	demonstrate achievement of the element.
1 Plan work	1.1 Liquid transfer method is identified for loading and unloading as gravity or pressure
	1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.3 Dangerous or hazardous (including regulated waste) or other materials requiring specialised handling are identified and relevant workplace procedures are taken into account when planning work
	1.4 Precautions are undertaken to eliminate all ignition sources
	1.5 Traffic flow, vehicle positioning and work area conditions are assessed to ensure safe operation and no injury to people, or damage to equipment, loads or facilities
	1.6 Characteristics of liquid, transfer and holding method are taken into account when evaluating procedural requirements, special precautions for method, equipment and, as required, appropriate attachments to transfer load
	1.7 Potential occurrences in work area that may affect safety and efficiency of operations are reported to appropriate personnel
	1.8 Liquid transfer is planned, taking into account requirements of load, transfer method, storage facility, transport mode, load weight, volume, viscosity and equipment capacity
	1.9 Load is checked prior to and at completion of transfer to ensure ullage and/or maximum permitted capacity complies with current ADG Code
	1.10 Adjustments are made to process to accommodate special requirements such as temperature control and combustion
	1.11 Required personal protective equipment, signage, barriers and special precautions are identified in plan and utilised
	1.12 Procedures to deal with spills, leakages and ruptures are identified
2 Transfer material	2.1 Equipment is prepared and appropriate attachments are fitted
	2.2 Equipment controls are checked for correct operational status before commencing transfer
	2.3 Instruments and gauges are monitored during operations to

© Commonwealth of Australia, 2024 Public Skills Australia

		ensure operation is in accordance with manufacturer specifications, workplace schedule and safety requirements
	2.4	Speed of operation is managed for safety and efficiency of materials movement and equipment operations
	2.5	Faults or damage to equipment are immediately reported to appropriate personnel
3 Monitor and operate controls	3.1	Equipment controls are monitored and operated in accordance with manufacturer operating instructions
	3.2	Control systems are monitored in accordance with statutory authority regulations, manufacturer guidelines and site operating procedures
	3.3	Materials are moved without injury to personnel or damage to equipment or goods
	3.4	Faults are identified and reported in accordance with workplace procedures
4 Complete operations	4.1	Equipment is shut down in accordance with manufacturer guidelines without injury to personnel or damage to equipment, loads or facilities in accordance with workplace procedures
	4.2	Clean up methods for transfer equipment are completed in accordance with workplace procedures
	4.3	Equipment is secured in accordance with securing procedures for appropriate equipment
	4.4	Workplace documentation is completed and filed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

© Commonwealth of Australia, 2024 Public Skills Australia

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3024A Use specialised liquid bulk transfer equipment (gravity/pressurised).

Assessment Requirements for TLID3024 Use specialised liquid bulk transfer equipment (gravity/pressurised)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking equipment compliance plate for equipment capability
- communicating effectively with others
- completing relevant documentation
- estimating mass, volume and special requirements of liquid bulk product
- identifying and correctly using equipment required to transfer liquid bulk product
- identifying goods coding, International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- interpreting and following operational instructions and prioritising work
- monitoring transfer equipment performance
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in transfer equipment in accordance with manufacturer and operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- servicing transfer equipment in terms of maintenance schedule and operating procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2024 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian Dangerous Goods (ADG) Code and relevant state/territory mass and loading regulations as they apply to vehicles transporting liquid bulk product
- hazards involved in transferring liquid bulk product using specialised equipment and ways and means of controlling the risks involved
- hazard management consistent with the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
- housekeeping standards and procedures
- manufacturer operators instructions/manuals
- methods of securing a vehicle following transfer of liquid bulk product
- problems, faults or malfunctions that may occur when transferring liquid bulk product using specialised equipment and action that should be taken to prevent or resolve these problems
- relevant permit, and health and safety requirements
- risks when transferring liquid bulk product and related precautions to control the risk
- WHS/OHS procedures and guidelines for using specialised liquid bulk transfer equipment
- workplace procedures and policies for efficiently using specialised gravity and/or pressurised equipment to transfer liquid bulk product.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

TLID3027 Prepare for transport of dangerous goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare for the transport of dangerous goods as part of work activities undertaken within the transport and logistics industry. This is undertaken in accordance with relevant state/territory regulations for transporting dangerous goods, including the current Australian Dangerous Goods (ADG) Code.

It includes checking dangerous goods load, assessing vehicle suitability to transport intended load, checking emergency procedures and equipment, evaluating documented route plans, and completing required assessment process.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the	Performance criteria describe the performance needed to

© Commonwealth of Australia, 2024 Public Skills Australia

essential outcomes.	demonstrate achievement of the element.
1 Check dangerous goods load	1.1 Load is compared against transport documentation and discrepancies are noted
	1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.3 Load is checked to ensure dangerous goods labels are clearly visible and legible, and packaged goods are correctly labelled
	1.4 Load is checked to ensure containers are not damaged
	1.5 Vehicle load is checked for compatibility or, where not compatible, is checked for appropriate segregation in accordance with regulatory requirements
	1.6 Load is assessed to ensure it is stowed and secured in or on vehicles in accordance with the current ADG Code and national Load Restraint Guide(LRG)
	1.7 Shipping documentation and other relevant documents are located in cabin in accordance with regulatory requirements
2 Assess vehicle suitability to transport intended load	2.1 Vehicle is assessed for suitability and appropriateness to carry designated dangerous goods including classification, mass and configuration
	2.2 Licence and insurance requirements are checked for conformity with current ADG Code and/or other applicable regulatory requirements as required
	2.3 Load restraint system/s is checked for serviceability and appropriateness to secure intended load
	2.4 Vehicle is checked to ensure it is correctly and clearly marked/placarded for load being carried
3 Check emergency procedures and equipment	3.1 Emergency information for each type of transported dangerous good is noted
	3.2 Regulatory and workplace procedures for an incident are noted including notification of relevant personnel and authorities and, as required, use of equipment for containment, clean up or recovery
	3.3 Personal protective equipment and safety equipment are checked for operational capability and appropriateness to proposed load

© Commonwealth of Australia, 2024 Public Skills Australia

	3.4	Emergency information is located in cabin in accordance with current ADG Code requirements
4 Evaluate documented route plan	4.1	Selected route plan and potential difficulties including regulatory restrictions, traffic flow and conditions, obstacles, road standards and construction activities are assessed
	4.2	Regulatory and workplace procedures for driving, parking, loading and unloading are identified including actions for disengaging and/or securing vehicle
5 Complete documentation	5.1	Load is inspected and checked for security to travel in accordance with relevant regulations/permit requirements and current ADG Code
	5.2	All required documentation for dangerous goods is completed in accordance with regulatory and workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3027A Prepare for transport of dangerous goods.

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851

Assessment Requirements for TLID3027 Prepare for transport of dangerous goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying fatigue management knowledge and techniques
- applying hierarchy of hazard control
- assessing operational suitability of equipment and vehicles for dangerous goods transportation
- communicating effectively with others
- completing relevant documentation
- determining required permits
- estimating mass, volume and special requirements of load
- estimating weight and dimensions of load and special requirements
- identifying and correctly using equipment required to load dangerous goods
- identifying goods coding, markings and emergency information panels for mode of transport/storage selected
- identifying hazards and applying precautions and required action to minimise, control or eliminate identified hazards
- identifying hazards and planning work to minimise risks
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- maintaining workplace records and documentation including completion of dangerous goods declaration
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work

© Commonwealth of Australia, 2024 Public Skills Australia

health safety (WHS)/occupational health and safety (OHS) standards
- selecting appropriate equipment and work systems to enable safe, efficient work
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- current Australian Dangerous Goods (ADG) Code
- housekeeping standards and procedures
- methods of securing a vehicle following loading of dangerous goods
- problems that may occur when preparing to transport dangerous goods and action that should be taken to prevent or solve these problems
- relevant permit and licence requirements
- relevant state/territory mass and loading regulations for vehicles transporting dangerous goods
- risks when transporting dangerous goods and related precautions to control the risk
- WHS/OHS procedures and guidelines for transporting dangerous goods
- workplace procedures and policies for preparing dangerous goods.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

© Commonwealth of Australia, 2024 Public Skills Australia

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, current ADG Code, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLID3027A Prepare for transport of dangerous goods

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to prepare for the transport of dangerous goods, including checking the dangerous goods load; assessing vehicle suitability to transport the intended load; checking emergency procedures and equipment; evaluating documented route plan; and completing required assessment process. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant state/territory regulations concerning the transport of dangerous goods, including the current ADG Code.

Work is performed under general supervision. It involves the application of basic principles, routine procedures and regulatory requirements to the preparation of dangerous goods for transport.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Check dangerous goods load	1.1 Load is compared against transport documentation and discrepancies are noted 1.2 Load is checked to ensure that dangerous goods labels are clearly visible and legible, and that packaged goods are correctly labelled 1.3 Load is checked to ensure containers are not damaged 1.4 Vehicle load is checked for compatibility or, where not compatible, is checked for appropriate segregation in accordance with regulatory requirements 1.5 Load is assessed to ensure that it is stowed and secured in or on vehicles in accordance with the current ADG Code and the National Load Restraint Guide 1.6 Shipping documentation and other relevant documents are located in the cabin in accordance with regulatory requirements
2 Assess vehicle suitability to transport intended load	2.1 Vehicle is assessed for suitability and appropriateness to carry designated dangerous goods including classification, mass and configuration 2.2 Licence and insurance requirements (where relevant) are checked for conformity with the current Australian Code for the Transport of Dangerous Goods by Road and Rail and/or other applicable regulatory requirements 2.3 Load restraint system(s) is/are checked for serviceability and appropriateness to secure intended load 2.4 Vehicle is checked to ensure that it is correctly and clearly marked/placarded for the load being carried
3 Check emergency procedures and equipment	3.1 Emergency information for each type of transported dangerous good is noted 3.2 Regulatory and workplace procedures for an incident are noted including notification of relevant personnel and authorities and, where appropriate, use of equipment for containment, clean up

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	or recovery
	3.3 Personal protective equipment and safety equipment are checked for operational capability and appropriateness to the proposed load
	3.4 Emergency information is located in the cabin in accordance with current ADG Code requirements
4 Evaluate documented route plan	4.1 Selected route plan and potential difficulties including regulatory restrictions, traffic flow and conditions, obstacles, road standards and construction activities are assessed
	4.2 Regulatory and workplace procedures for driving, parking, loading and unloading are identified including actions for disengaging and/or securing the vehicle
5 Complete documentation	5.1 The load is inspected and checked for security to travel in accordance with relevant regulations/permit requirements and the current ADG Code
	5.2 All required documentation for the dangerous goods is completed in accordance with regulatory and workplace requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Current Australian Dangerous Goods Code and relevant state/territory mass and loading regulations as they apply to vehicles transporting dangerous goods
- OH&S procedures and guidelines concerning the transport of dangerous goods
- Risks when transporting dangerous goods and related precautions to control the risk
- Workplace procedures and policies for the preparation of dangerous goods
- Problems that may occur when preparing for the transport of dangerous goods and action that should be taken to prevent or solve them
- Housekeeping standards procedures required in the workplace
- Methods of securing a vehicle following loading of dangerous goods
- Relevant permit and licence requirements

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

- Communicate effectively with others when preparing for the transport dangerous goods
- Read and interpret instructions, procedures, information and signs relevant to the preparation of dangerous goods for transport
- Identify goods coding, markings and, where applicable, emergency information panels for the mode of transport/storage selected
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the preparation of dangerous goods for transport
- Operate electronic communication equipment to required protocol
- Estimate the mass, volume and special requirements of a load
- Work collaboratively with others when preparing for the transport of dangerous goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when preparing for the transport of dangerous goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when preparing for the transport of dangerous goods
- Recognise the hazards and apply precautions and required action to minimise, control or eliminate hazards that may exist during the preparation of dangerous goods for transport
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Identify and correctly use equipment required to load dangerous goods
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
  - assessing operational suitability of equipment and vehicles pertinent to dangerous goods transportation
  - estimating weight and dimensions of load and any special requirements
  - applying hierarchy of hazard control
  - maintaining workplace records and documentation including completion of dangerous goods declaration
  - determining (any) required permits
  - identifying hazards and planning work to minimise risks when transporting dangerous goods
  - selecting appropriate equipment and work systems to enable safe, efficient work

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

© Commonwealth of Australia, 2024 Public Skills Australia

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:	• in a range of work environments and weather conditions • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• restricted spaces • exposed conditions • controlled or open environments
Vehicle refers to:	• all applicable transportation modes
Hazards in the work area may include exposure to:	• hazardous or dangerous materials • contamination of, or from, materials being handled • noise, light, energy sources • stationary and moving machinery, parts or components • service lines • spills, leakages, ruptures • dust/vapours
Hazard management is:	• consistent with the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • mask or respirator • breathing apparatus • high visibility clothing
Load restraint systems are:	• as detailed in the National Load Restraint Guide
Preparation of packaged dangerous goods for transport may:	• require special precautions as specified by the manufacturer
Transport documentation may	• Initial Emergency Response Guide

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

include:	• Emergency Procedure Guide • Material Safety Data Sheet (MSDS) • descriptions for dangerous goods (i.e. proper shipping name, class and division number, packing group, subsidiary risk(s) if any) • UN or ID number
Requirements for work may include:	• site restrictions and procedures • use of safety and personal protective equipment • communications equipment • specialised lifting and/or handling equipment • incident breakdown procedures • additional gear and equipment • noise restrictions • hours of operation • authorities and permits
Consultative processes may involve:	• other employees and supervisors • suppliers, potential customers and existing clients • management and union representatives • industrial relations, OH&S specialists, and other maintenance, professional or technical staff
Communication in the work area may include:	• phone • electronic data interchange • fax • email • internet • radio • oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures • site procedures
Safety equipment on vehicle may include:	• fire extinguishers • portable warning devices • eye wash kit
Information/documents may include:	• current Australian Dangerous Goods Code, relevant Australian Standards and International Standards • Safe Working Load (SWL) and Working Load Limit (WLL) • manifests, bar codes, goods and product identification

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• manufacturers specifications for equipment/tools • workplace procedures and policies for the transfer of product • goods identification numbers, codes and signs • supplier and/or client instructions • award, enterprise bargaining agreement, other industrial arrangements • relevant standards and certification requirements • quality assurance procedures • emergency procedures • manufacturers specifications, instructions and labelling advice for the packaged dangerous goods, including material safety data sheets

Applicable regulations and legislation may include:	• state/territory mass and loading regulations
	• current Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
	  • Australian and International Dangerous Goods Codes
	  • Australian Marine Orders and the International Maritime Dangerous Goods Code
	  • International Air Transport Association (IATA) Dangerous Goods by Air regulations
	• Australian and state/territory regulations related to the carriage of dangerous goods
	• workplace relations regulations
	• equal opportunity legislation
	• equal employment opportunity and affirmative action legislation
	• relevant Australian and International Standards
	• relevant state/territory environmental protection legislation
	• relevant state/territory OH&S legislation

TLID3043 Shift loads using gantry equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift loads using gantry equipment in accordance with relevant regulations and workplace requirements, as part of work activities in the transport and logistics industry.

It includes planning work for the prevailing working conditions, using controls and operating systems to manage the operation of equipment, and locating and identifying load characteristics. It also includes safely moving the load, monitoring controls and stopping, shutting down and securing equipment after the completion of operations.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2024 Public Skills Australia

1 Plan work for the prevailing working conditions	1.1 Traffic flow, weather and work area conditions are constantly assessed and anticipated to allow safe operation to ensure no injury to people, or damage to equipment, loads or facilities
	1.2 Load characteristics are taken into account to ensure appropriate attachments/gear are used to move the load as required
	1.3 Occurrences in the work area that may affect the safety and efficiency of operations are reported to appropriate personnel
2 Use controls and operating systems to manage the operation of the equipment	2.1 Equipment is prepared and appropriate attachments are fitted as required
	2.2 Gear and operational levers are checked to ensure they are in the neutral position prior to inserting ignition key and starting engine
	2.3 Engine is started in accordance with manufacturer guidelines to bring engine to speed
	2.4 Instruments and gauges are monitored during start up and operations to ensure operation is within manufacturer specifications, and workplace and regulatory safety requirements
	2.5 Engine power is managed for efficiency of equipment movement and economy of equipment operations
	2.6 Equipment operations are conducted within manufacturer specified torque range
	2.7 Faults or damage to equipment are immediately reported to appropriate personnel
3 Locate load and identify load characteristics	3.1 Load is located and identified in accordance with instructions
	3.2 Requirements for safe working load (SWL) and working load limit (WLL) of gantry equipment are identified
	3.3 Load weight and dimensions are checked to ensure they fall within equipment capacity
	3.4 Loading and unloading plans are followed to ensure efficiency and safety of operations

© Commonwealth of Australia, 2024 Public Skills Australia

	3.5 Load characteristics are taken into account to ensure appropriate loading and unloading procedures are followed
	3.6 Hazardous cargo is identified and relevant procedures are taken into account when planning and conducting work
4 Safely move load	4.1 Equipment is operated and positioned using smooth and controlled movements
	4.2 Manoeuvres are within equipment limits and in line with manufacturer specifications
	4.3 Load is moved ensuring no injury to personnel or damage to equipment or cargo
	4.4 Continuous communication is maintained with personnel assisting the operator in the load movement operations using appropriate communications technology and procedures
	4.5 In an incident or emergency, equipment is immediately stopped and workplace emergency procedures are followed
	4.6 Safety incidents and emergencies are reported in accordance with workplace procedures and regulatory requirements
5 Monitor and operate controls	5.1 Equipment controls are monitored and operated in accordance with manufacturer operating instructions
	5.2 Control systems are confirmed and acted on in accordance with regulatory requirements, manufacturer guidelines and workplace operating procedures
	5.3 Control faults are identified and reported in accordance with enterprise guidelines
	5.4 Hazards in the work area are identified and appropriate measures are adopted to control the risks in accordance with regulatory requirements and workplace procedures
6 Stop, shut down and secure equipment	6.1 Equipment is brought to a controlled halt and is shut down without injury to personnel or damage to equipment, loads or facilities in accordance with manufacturer guidelines and workplace procedures

© Commonwealth of Australia, 2024 Public Skills Australia

6.2 Equipment is secured in accordance with manufacturer instructions and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3043A Shift loads using gantry equipment.

Links

Assessment Requirements for TLID3043 Shift loads using gantry equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying effective eye-hand coordination to operational tasks
- applying fatigue management knowledge and techniques
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes
- communicating effectively with others
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) Code and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- identifying, selecting and using relevant equipment, processes and procedures
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring equipment performance
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- receiving, acknowledging and sending messages using appropriate communications equipment
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- servicing equipment in terms of maintenance schedule and operating procedures
- working collaboratively with others

© Commonwealth of Australia, 2024 Public Skills Australia

- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes, regulations, licence/permit requirements relevant for using gantry equipment to shift loads
- cargo marking and numbering systems
- operational work systems, equipment, management and site operating systems for using gantry equipment to shift loads
- problems that may occur and appropriate action that can be taken to resolve these problems
- relevant bond, quarantine or other legislative requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- relevant safety codes and emergency procedures
- requirements for safe working load (SWL) and working load limit (WLL) of gantry equipment
- types of gantry equipment used to shift loads in terminals/wharves, their applications and procedures and precautions for their use
- workplace procedures and policies for using gantry equipment to shift loads.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

© Commonwealth of Australia, 2024 Public Skills Australia

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to shift loads using gantry equipment in accordance with workplace and regulatory requirements, including planning the work for the prevailing working conditions; using the controls and operating systems to manage the operation of the equipment; locating the load and identifying the load characteristics; safely moving the load; monitoring the controls; and stopping, shutting down and securing the equipment after the completion of operations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the shifting of loads using gantry equipment.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements when shifting loads using gantry equipment as part of work activities in the stevedoring, transport, distribution and allied industries.

Licensing/Regulatory Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan work for the prevailing working conditions	1.1 Traffic flow, weather and work area conditions are constantly assessed and anticipated to allow safe operation to ensure no injury to people, or damage to equipment, loads or facilities 1.2 Characteristics of the load are taken into account to ensure that, where applicable, appropriate attachments/gear are used to move the load 1.3 Any occurrences in the work area that may affect the safety and efficiency of operations are reported to the appropriate personnel
2 Use controls and operating systems to manage the operation of the equipment	2.1 Equipment is prepared and appropriate attachments fitted (where applicable) 2.2 Gear and operational levers are checked to ensure that they are in the neutral position prior to inserting ignition key and starting engine 2.3 Engine is started in accordance with manufacturers guidelines to bring the engine to speed 2.4 Instruments and gauges are monitored during start-up and operations to ensure that operation is within manufacturers specifications and workplace and regulatory safety requirements 2.5 Engine power is managed for efficiency of equipment movement and economy of equipment operations 2.6 Equipment operations are conducted within manufacturers specified torque range 2.7 Any faults or damage to equipment are immediately reported to the appropriate personnel
3 Locate load and identify	3.1 Load is located and identified according to instructions

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
load characteristics	3.2 Requirements for Safe Working Load (SWL) and Working Load Limit (WLL) of the gantry equipment are identified
	3.3 Load weight and dimensions are checked to ensure they fall within the capacity of the equipment
	3.4 Loading and unloading plans are followed to ensure efficiency and safety of operations
	3.5 Characteristics of the load are taken into account to ensure that appropriate loading and unloading procedures are followed
	3.6 Hazardous cargo is identified and relevant procedures are taken into account when planning and conducting the work
4 Safely move load	4.1 Equipment is operated and positioned using smooth and controlled movements
	4.2 Manoeuvres are within the limits of the equipment and in line with manufacturers specifications
	4.3 Load is moved ensuring no injury to personnel or damage to equipment or cargo
	4.4 Continuous communication is maintained with personnel assisting the operator in the load movement operations using appropriate communications technology and procedures
	4.5 In the event of a safety incident or emergency, the equipment is immediately stopped and workplace emergency procedures followed
	4.6 Safety incidents and emergencies are reported in accordance with workplace procedures and regulatory requirements
5 Monitor and operate controls	5.1 Equipment controls are monitored and operated in accordance with manufacturers operating instructions
	5.2 Control systems are understood and acted upon in accordance with regulatory requirements, manufacturers guidelines and workplace operating procedures
	5.3 Control faults are identified and reported in accordance with enterprise guidelines
	5.4 Hazards in the work area are identified and appropriate measures are adopted to control the risks in accordance with regulatory requirements and workplace procedures
6 Stop, shut down and secure equipment	6.1 Equipment is brought to a controlled halt and shut down without injury to personnel or damage to equipment, loads or facilities in accordance with manufacturers guidelines and workplace procedures
	6.2 Equipment is secured in accordance with manufacturers instructions and workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes, regulations, licence/permit requirements relevant to the use of gantry equipment to shift loads
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the use of gantry equipment to shift loads
- Focus of operation of work systems, equipment, management and site operating systems for the use of gantry equipment to shift loads
- Problems that may occur when using gantry equipment to shift loads and appropriate action that can be taken to resolve the problems
- Relevant safety codes and emergency procedures
- Types of gantry equipment used to shift loads in terminals/wharves, their applications and procedures and precautions for their use
- Requirements for Safe Working Load (SWL) and Working Load Limit (WLL) of gantry equipment
- The marking and numbering systems for cargo
- Relevant bond, quarantine or other legislative requirements

Required skills:

- Communicate effectively with others when shifting loads using gantry equipment
- Read and interpret instructions, procedures, information and labels relevant to the shifting of loads using gantry equipment
- Identify cargo, container and goods, coding, ADG and IMDG markings and where applicable emergency information panels
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the shifting of loads using gantry equipment
- Receive, acknowledge and send messages with appropriate communications equipment
- Estimate the size, shape and special requirements of loads
- Work collaboratively with others when shifting loads using gantry equipment
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when shifting loads using gantry equipment in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise when shifting loads

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

using gantry equipment

- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the shifting of loads using gantry equipment
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Identify, select and use relevant equipment, processes and procedures when using gantry equipment to shift loads
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Apply effective eye-hand coordination to operational tasks
- Monitor performance of equipment
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts • Resources for assessment include: • a range of relevant exercises, case studies and/or

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

	other simulated practical and knowledge assessment, and/or • access to an appropriate range of relevant operational situations in the workplace • In both real and simulated environments, access is required to: • relevant and appropriate materials and equipment, and • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation • As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests • Practical assessment must occur: • through activities in an appropriately simulated environment at the registered training organisation, and/or • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	• in a range of work environments • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• limited or restricted spaces • exposed conditions • controlled or open environments • even or uneven surfaces • wet or dry surfaces
Cargo/freight may include:	• goods/containers with specialist requirements, including

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	temperature controlled goods and dangerous goods
Range of equipment may include:	• various types of bridge and gantry cranes
Hazards in the work area may include exposure to:	• chemicals • dangerous or hazardous substances • movements of equipment, goods, materials and vehicular traffic
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios • protective clothing • high visibility clothing
Communication in the work area may include:	• phone • fax • email • electronic data transfer (EDI) • RF systems • radio • oral, aural or signed communications
Personnel in work area may include:	• workplace personnel • site visitors • contractors • official representatives
Consultative processes may involve:	• staff members • management • union representatives • industrial relations, OH&S specialists • other professional or technical staff
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Information/documents may include:	• goods identification numbers and codes • manifests, bar codes, and container identification/serial number • Australian and international codes of practice and regulations relevant to the shifting of loads using gantry equipment • Australian and international regulations and codes of

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	practice for the handling and transport of dangerous goods and hazardous substances • operations manuals, job specifications and induction documentation • manufacturers specifications for equipment • workplace procedures and policies • supplier and/or client instructions • dangerous goods declarations and material safety data sheets • award, enterprise bargaining agreement, other industrial arrangements • relevant Australian standards and certification requirements • quality assurance procedures • emergency procedures

Applicable regulations and legislation may include:	• relevant codes and regulations for the shifting of cargo/containers using gantry equipment
	• Australian and international regulations and codes of practice for the handling of dangerous goods and hazardous substances, including:
	  • Australian and International Dangerous Goods Codes
	  • Australian Marine Orders and the International Maritime Dangerous Goods Code
	  • IATA Dangerous Goods by Air regulations
	  • Australian and International Explosives Codes
	• relevant Australian Standards including AS 1418 and AS 2550
	• licence, patent or copyright arrangements
	• water and road use and licence arrangements
	• export/import/quarantine/bond requirements
	• marine orders
	• relevant state/territory OH&S and environmental protection legislation
	• workplace relations regulations
	• workers compensation regulations

TLIE2007 Use communications systems

Modification History

Release. ISC Upgrade - Minor edits to text in Performance Criteria.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use communications systems in accordance with relevant regulations and workplace procedures.

It includes identifying system features, operating a communications system effectively, using appropriate communications system protocols, maintaining equipment and completing documentation.

It involves applying established communication principles and practices, and using local technical, colloquial language and vocabulary in day-to-day communication.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential	Performance criteria describe the performance needed to

outcomes.	demonstrate achievement of the element.
1 Check communications system requirements	1.1 System features and control functions are identified
	1.2 Impact of battery and signal levels on system's capability is determined
	1.3 Mobile equipment is set up to optimise communication
	1.4 Channels are selected appropriate to the communication as required
2 Communicate using communications technology	2.1 System checks are carried out to confirm communications system is operational, in accordance with manufacturer's instructions and workplace procedures
	2.2 Communications system is operated safely in accordance with manufacturer's instructions, workplace procedures and regulatory requirements
	2.3 Telephone and radio security is maintained in accordance with workplace procedures
	2.4 Channel selection is appropriate for the location and type of communication
	2.5 Messages are transmitted clearly and precisely, and user ethics and protocols are followed
	2.6 Public address (PA) system is used, as required, to communicate with passengers and/or crew in accordance with standard operating procedures
	2.7 Incoming messages are received and answered promptly and courteously in accordance with operating procedures and regulatory requirements
	2.8 Appropriate language, protocols, procedures and codes are followed when using communications systems
	2.9 Received messages are interpreted and recorded in accordance with workplace procedures
	2.10 Clear and unambiguous vocal communication is used
3 Maintain communications equipment operational status	3.1 Equipment is checked and maintained in working order in accordance with workplace procedures
	3.2 Minor communications systems faults are promptly

© Commonwealth of Australia, 2024 Public Skills Australia

		identified, diagnosed, and repaired or reported in accordance with workplace procedures
4 Complete documentation	4.1	Appropriate communications records are maintained in accordance with workplace procedures
	4.2	Communications records are stored/filed as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE2007A Use communication systems.

Assessment Requirements for TLIE2007 Use communications systems

Modification History

Release. ISC Upgrade - Minor edits to text in Performance Criteria.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist when using communications systems
- communicating and working effectively with others using available communications systems
- completing documentation related to work activities when using communications systems
- following communications security procedures
- identifying and using required communications technology
- implementing contingency plans
- modifying activities depending on differing operational contingencies, risk situations and environments
- monitoring communications equipment performance and taking appropriate action as required
- planning, monitoring and prioritising work activities in terms of planned schedule, including predicting consequences and identifying improvements
- operating and adapting to differences in communications equipment in accordance with standard operating procedures
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with workplace procedures
- reading, interpreting and following communications systems instructions, procedures and relevant legislation
- using communications equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2024 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic communication techniques including barriers to effective communication and how to overcome them
- basic principles of effective communication
- features of various communications systems
- minor routine maintenance procedures for communications equipment
- pre-operational checks for communications systems and equipment
- procedures and protocols for using communications systems during an emergency
- protocols and procedures for communicating with others using relevant communications technology including PA systems
- relevant work health and safety work health and safety (WHS)/occupational health and safety (OHS) responsibilities
- relevant procedures and duty of care requirements
- typical problems that may occur when using communications systems, and appropriate action and solutions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to estimate and calculate mass, area and quantify dimensions of loads in accordance with workplace requirements and relevant regulations, as part of work functions within the transport and logistics industry.

It includes estimating loads to be transported or placed in storage, estimating load limits of transport and/or storage systems, and organising a load.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Assessment Requirements for TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- identifying, selecting and using relevant calculators, computing and office equipment
- interpreting and following operational instructions and prioritising work
- performing basic mathematical operations required when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities including addition, subtraction, multiplication and division
- reading and interpreting relevant instructions, procedures, information and labels
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to workplace activities
- documentation requirements for the workplace activities concerned
- focus of operation of work systems, equipment, management and site operating systems for transporting and/or storing goods and stock
- problems that may occur when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities, and appropriate action that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines

© Commonwealth of Australia, 2024 Public Skills Australia

- workplace procedures and policies for estimating and/or calculating mass, area and volumes of loads, and transport and storage facilities, including the quantification of dimensions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to estimate and calculate mass and area and quantify dimensions of loads as part of work functions in the transport, stevedoring, warehousing, and/or storage sectors. This includes estimating loads to be transported or placed in storage, identifying mass, area and volume limitations of available transport/storage systems and carrying out calculations required to organise load(s) to match identified transport/storage limitations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with workplace requirements and any relevant regulations related to the estimation and/or calculation of mass and area and the quantification of dimensions as part of workplace tasks.

Work is performed under some supervision generally within a team environment. It involves the application of basic mathematical principles and operations to the estimation and/or calculation of mass and area and the quantification of dimensions as part of workplace activities in the transport, stevedoring, warehousing, distributi

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Estimate loads for transport or storage	1.1 Order forms/work orders are read and requirements are noted 1.2 Shape, balance characteristics, dimensions and mass of the load(s) are identified 1.3 Area/volume required for storage is estimated 1.4 Weights and volumes are totalled to calculate load requirements of transport or storage system
2 Estimate load limits of transport and/or storage	2.1 Allowable load limits for storage and/or transport systems are identified in accordance with workplace procedures 2.2 Capacity of transport and storage systems in terms of mass, area and volume are calculated
3 Organise load	3.1 Load(s) is restricted to allowable range(s) 3.2 Load(s) is spread to ensure safe weighting on pallets, trucks, platforms or other storage or transport systems 3.3 Appropriate workplace documentation is completed

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

© Commonwealth of Australia, 2024 Public Skills Australia

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to workplace activities
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the estimation and/or calculation of mass, area and volumes of loads and transport and storage facilities including the quantification of dimensions
- Basic mathematical operations required when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities including addition, subtraction, multiplication and division
- Focus of operation of work systems, equipment, management and site operating systems for the transport and/or storage of goods and stock
- Problems that may occur when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities and appropriate action that can be taken to resolve the problems
- Documentation requirements for the workplace activities concerned

Required skills:

- Communicate effectively with others when estimating and/or calculating mass, area and volumes of loads and transport and storage facilities
- Read and interpret instructions, procedures, information and labels relevant to the estimation and/or calculation of mass, area and volumes of loads and transport and storage facilities
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when estimating and/or calculating mass, area and volumes of loads and transport and storage facilities in accordance with workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Identify, select and use relevant calculators, computing and office equipment when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

- through activities in an appropriately simulated environment at the registered training organisation, and/or
- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	• in a range of work environments • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• limited or restricted spaces • exposed conditions • controlled or open environments
Estimating/calculation tasks may include:	• estimating loads to be transported or placed in storage • identifying mass, area and volume limitations of available transport/storage systems • carrying out calculations required to organise load(s) to match identified transport/storage limitations • calculations and estimations of weights and dimensions of cargo and containers to be shifted, stored or lifted
Calculations may include mathematical operations of addition, subtraction, multiplication and division and may be carried out:	• manually • with the aid of a calculator • with the aid of a computer • using appropriate tables and/or charts
Consultative processes may involve:	• other employees and supervisors • suppliers, customers and clients • relevant authorities and institutions • management and union representatives • industrial relations and OH&S specialists • other maintenance, professional or technical staff
Communication in the work area	• phone

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

may include:	• electronic data interchange (EDI) • fax • email • internet • radio • RF systems • oral, aural or signed communications
Hazards in the work area may include exposure to:	• chemicals • dangerous or hazardous substances • movements of equipment, goods and materials
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Information/documents may include:	• workplace procedures and policies • operations manuals, job specifications and induction documentation • goods identification numbers and codes • manifests, picking slips, merchandise transfers, stock requisitions and bar codes, goods and container identification/serial number • Australian and international codes of practice and regulations relevant to workplace activities including mass and loading regulations • Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances • manufacturers specifications for equipment • supplier and/or client instructions • dangerous goods declarations and material safety data sheets (where applicable) • award, enterprise bargaining agreement, other industrial arrangements • relevant Australian standards and certification requirements • quality assurance procedures • emergency procedures
Applicable regulations and legislation may include:	• relevant codes and regulations relevant to workplace activities • Australian and international regulations and codes of practice for the handling and transport of dangerous goods

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

and hazardous substances
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- marine orders
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations

TLIE3004 Prepare workplace documents

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare workplace documents and forms in accordance with workplace requirements and applicable regulations or codes, as part of work activities within the transport and logistics industry.

It includes planning and preparing simple workplace documents and gathering relevant information enabling the completion of a workplace form.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2024 Public Skills Australia

1	**Plan workplace document**	1.1	Purpose and audience for document are identified
		1.2	Appropriate format for document is established to meet workplace requirements
		1.3	Relevant information is identified and selected for inclusion in document
2	**Prepare workplace document**	2.1	Document is drafted in accordance with workplace procedures and conventions for sentence construction, grammar, spelling, style, punctuation and vocabulary appropriate for reader/s
		2.2	Document is edited and presented in a final version appropriate to task
3	**Complete workplace forms**	3.1	Work related form/s is interpreted to identify information required for its completion
		3.2	Required information for completion of form is gathered from relevant sources in accordance with workplace procedures
		3.3	Form/s is completed in accordance with workplace policy and procedures, and applicable regulations and codes

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3004A Prepare workplace documents.

Assessment Requirements for TLIE3004 Prepare workplace documents

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing documentation related to work activities
- reading and interpreting relevant instructions, procedures, information and labels
- reading, writing and comprehending simple statements in English
- working collaboratively with others
- working systematically with required attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- conventions for sentence construction, grammar, spelling, style and punctuation
- equipment and materials required for completing documents and forms, and instructions and precautions for their use
- format and layout of various documents and forms used in workplace activities
- relevant Australian and international codes of practice and regulations relevant to documents and/or forms being prepared
- relevant work health safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- workplace procedures and policies for completing documents/forms.

TLIF1001 Follow work health and safety procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to follow and apply work health and safety (WHS)/occupational health and safety (OHS) procedures when carrying out work activities in compliance with the relevant WHS/OHS regulations and procedures.

It includes following workplace procedures for hazard identification and risk control, contributing to WHS/OHS management arrangements and completing WHS/OHS records.

Work is performed under some supervision generally within a team environment. It involves applying established WHS/OHS and hazard minimisation principles and procedures to conduct workplace activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for TLIF1001 Follow work health and safety procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- communicating effectively with others when following WHS/OHS procedures
- completing documentation related to WHS/OHS in the workplace
- implementing WHS/OHS workplace procedures
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- reading and comprehending simple statements in English
- reading and interpreting relevant safety-related information including safety labels, instructions for safe work, relevant safety data sheets (SDSs)/material safety data sheets (MSDSs), workplace procedures and codes of practice
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working collaboratively with others when following WHS/OHS procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- emergency and evacuation procedures
- HAZCHEM symbols and implications for safe work and storage
- housekeeping standards and procedures
- location and use of safety alarms, manifests, emergency shut-off systems, emergency

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulation
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to conduct housekeeping activities in the workplace, including identifying required housekeeping requirements, procedures and resources for different areas of the workplace, monitoring and maintaining cleanliness and tidiness in the workplace, and completing assigned housekeeping tasks. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in accordance with workplace housekeeping procedures.

Work is performed under some supervision generally within a team environment. It involves the application of the basic safety principles to the completion of housekeeping tasks as part of workplace operations.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify the housekeeping requirements procedures, and resources of different areas of the workplace	1.1 Workplace procedures for housekeeping are identified 1.2 Equipment and consumables are selected in accordance with work area requirements 1.3 Specific requirements for housekeeping activities in different parts of the employees' work area are identified and followed 1.4 Requirements for the minor disassembly/reassembly of storage zones are identified (where applicable)
2 Monitor and maintain cleanliness and tidiness in the workplace	2.1 Initiative is used to continuously monitor the cleanliness and tidiness of the worksites used by the employees 2.2 Housekeeping issues are raised with designated personnel in accordance with workplace procedures 2.3 Housekeeping equipment and supplies are maintained and stored
3 Complete assigned housekeeping duties	3.1 Assigned housekeeping duties are conducted following workplace procedures and ensuring that waste is removed 3.2 Maintenance requirements of any damaged items are notified to appropriate personnel 3.3 Minor disassembly/reassembly of storage zones is conducted within enterprise policies and procedures 3.4 Schedules and records for housekeeping duties are maintained 3.5 Work areas are checked and meet required workplace standards 3.6 Work is carried out following enterprise practices and safe work procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S procedures and guidelines concerning housekeeping operations
- Workplace procedures and policies for the carrying out housekeeping tasks in the workplace
- Risks when carrying out housekeeping tasks and related precautions to control the risk
- Housekeeping standards required in the workplace
- Site layout and obstacles
- Application of relevant industrial regulations and requirements
- Servicing procedures for housekeeping equipment

Required skills:

- Communicate effectively with others when carrying out housekeeping tasks
- Read and interpret instructions, procedures, information and signs relevant to housekeeping activities in the workplace
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to housekeeping in the workplace
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when carrying out housekeeping tasks
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any problems, faults or malfunctions identified when carrying out housekeeping tasks in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during housekeeping activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Monitor condition and performance of housekeeping tools and equipment
- Service housekeeping tools and equipment in terms of servicing schedule and standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The housekeeping tasks may be conducted:	• in a range of work environments • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• tight or restricted spaces • exposed conditions • controlled or open environments
Housekeeping duties may include:	• cleaning • returning goods or equipment to storage • repacking • waste removal • maintenance
Hazards in the work area may include exposure to:	• chemicals • dangerous or hazardous substances • movements of equipment, goods and materials
Personnel in the work area may include:	• workplace personnel • site visitors • contractors • official representatives
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Depending on workplace context, personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios • high visibility clothing

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

Information/documents may include:	• OH&S and environmental protection regulations • workplace housekeeping procedures and policies • codes of practice including the National Standards for Manual Handling and the Industry Safety Code • material safety data sheets • policies and procedures for entry and work in confined spaces • manufacturers instructions concerning the use and servicing of equipment • supplier and/or client instructions • emergency procedures • regulations and policies concerning noise, smoking, work station ergonomics and other critical OH&S issues • goods identification numbers and codes • manifests, bar codes, goods and container identification • relevant legislation, regulations and related documentation • award, enterprise bargaining agreement, other industrial arrangements • standards and certification requirements • quality assurance procedures
Applicable regulations and legislation may include:	• relevant state/territory OH&S legislation • relevant state/territory environmental protection legislation • workplace relations regulations • dangerous goods and air freight regulations

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

© Commonwealth of Australia, 2024 Public Skills Australia

REQUIRED KNOWLEDGE AND SKILLS

Required knowledge:

- Workplace procedures and policies for carrying out housekeeping tasks in the workplace
- Risks when carrying out housekeeping tasks and related precautions to control them
- Housekeeping standards required in the workplace
- Purpose of housekeeping within the workplace
- Site layout and obstacles
- Servicing procedures for housekeeping equipment
- Relevant enterprise practices and safe work procedures for the job role

Required skills:

- Communicate effectively with others when carrying out housekeeping tasks
- Interpret and follow operational instructions and prioritise work
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when carrying out housekeeping tasks
- Report and rectify within limits of own role problems, faults and malfunctions identified when carrying out housekeeping tasks in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during housekeeping activities
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Monitor condition and performance of housekeeping tools and equipment
- Service housekeeping tools and equipment in terms of servicing schedule and standard operating procedures
- Select and use required personal protective equipment (PPE), conforming to industry and OH&S standards

TLIF2012 Apply safe procedures when handling/transporting dangerous goods or explosives

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply safe handling strategies when handling/transporting dangerous goods or explosives.

It includes driving vehicle concerned in a safe manner and consulting with relevant authorities/persons in accordance with regulatory requirements.

Work must be carried out in accordance with relevant Australian and state/territory regulations and codes, including current:

- Australian Code for the Transport of Explosives by Road and Rail (AE Code)
- Australian Dangerous Goods (ADG) Code
- Code for the Safe Transport of Radioactive Material.

Work is performed under limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Operate equipment and/or vehicle in a safe manner	1.1 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.2 Safety equipment is checked for serviceability and required quantities and types
	1.3 Equipment/vehicle is operated safely in accordance with the relevant industry regulations, licence/permit requirements/or standards and as directed by police and/or competent authority
	1.4 Safety guidelines and codes of practice are applied in accordance with workplace procedures
	1.5 Dangerous goods/explosives/hazardous substances are handled/conveyed in accordance with relevant government regulations and current ADG Code
	1.6 Relevant emergency procedures are assessed relative to the dangerous goods/explosives/hazardous substances concerned
	1.7 Emergency procedures are instigated in accordance with current ADG Code, relevant codes of practice and government regulations, to ensure precautions are taken consistent with directions set out in emergency workplace procedures
	1.8 Procedures are implemented to minimise damage to equipment, facilities and the environment, and to minimise injury to personnel
2 Consult with relevant authorities/persons	2.1 Dangerous goods occurrences are reported in specified timeframes to competent authority, fire brigade and/or police using appropriate workplace procedures, in accordance with relevant regulatory requirements
	2.2 Assistance is provided to competent authority as requested
	2.3 Other persons within affected emergency area are warned about hazard/s in accordance with workplace procedures as required

© Commonwealth of Australia, 2024 Public Skills Australia

2.4	Documentation is completed and proofread in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF2012A Apply safe procedures when handling/transporting dangerous goods or explosives.

Links

Assessment Requirements for TLIF2012 Apply safe procedures when handling/transporting dangerous goods or explosives

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- communicating effectively with others
- completing relevant documentation
- handling/transporting dangerous goods/explosives/hazardous substances safely, in accordance with workplace procedures and regulatory requirements
- identifying characteristics and hazards of dangerous goods/explosives/hazardous substances being handled
- identifying, selecting and using appropriate handling/transportation equipment, vehicles, personal protection equipment and related procedures
- interpreting and following operational instructions and prioritising work
- interpreting relevant signs, placards, labels and codes
- locating, interpreting and applying relevant information
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in handling and transportation equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and use required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

© Commonwealth of Australia, 2024 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics of various dangerous goods, explosives or hazardous substances and their implications for handling and transport
- company incident reporting system and employer responsibility to report incidents to relevant government authority
- compatibility of various types of dangerous goods, explosives or hazardous substances
- emergency management plan
- housekeeping standards and procedures
- relevant Australian and state/territory regulations and codes pertaining to identifying, handling and marking dangerous goods, explosives or hazardous substances including current ADG Code
- risks and hazards when handling and conveying dangerous goods, explosives or hazardous substances, and related precautions to control the risk
- site layout and obstacles
- WHS/OHS procedures and guidelines for lifting and movement of loads
- workplace procedures for handling and transporting dangerous goods, explosives or hazardous substances.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, current ADG/AE Code, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in

© Commonwealth of Australia, 2024 Public Skills Australia

industry.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to apply safe handling strategies when handling dangerous goods or explosives, including driving the vehicle concerned in a safe manner and consulting with relevant authorities/persons in accordance with regulatory requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant Australian and state/territory regulations and codes, including the current Australian Dangerous Goods Code, the Australian Explosives Code, and the Code of Practice for the Safe Transport of Radioactive Substances.

Work is performed under limited or minimum supervision. It involves the application of the basic principles, routine procedures and regulatory requirements to safe handling/transport of dangerous goods/explosives/hazardous substances in a range of operational situations.

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant Australian and state/territory regulations and codes pertaining to the identification, handling and marking of dangerous goods, explosives or hazardous substances including the current Australian Dangerous Goods Code
- OH&S procedures and guidelines concerning the lifting and movement of loads
- The company's incident reporting system, and the responsibility of the employer to report incidents to the relevant State or Government authority
- Risks and hazards when handling and conveying dangerous goods, explosives or hazardous substances, and related precautions to control the risk
- Workplace procedures and policies for the handling and transport of dangerous goods, explosives or hazardous substances
- Characteristics of various dangerous goods, explosives or hazardous substances and their implications for handling and transport
- Compatibility of various types of dangerous goods, explosives or hazardous substances
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when handling or transporting dangerous goods or explosives
- Read and interpret instructions, procedures, information and signs relevant to the handling or transporting of dangerous goods or explosives
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the handling or transporting of dangerous goods or explosives
- Operate electronic communication equipment to required protocol
- Work collaboratively with others handling or transporting dangerous goods or explosives
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when handling or transporting dangerous or hazardous goods or explosives in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise during the handling or

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

transporting of dangerous goods or explosives

- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the handling or transporting of dangerous goods or explosives
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in handling and transportation equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
	  • identifying characteristics and hazards of the dangerous goods/explosives/hazardous substances being handled
	  • interpreting relevant signs, labels and codes
	  • locating, interpreting and applying relevant information
	  • safely handling/transporting dangerous goods/explosives/hazardous substances in accordance with workplace procedures and regulatory requirements
	  • identifying, selecting and using appropriate handling/transport equipment, vehicles, personal protection equipment and related procedures

Context of and specific resources	• Performance is demonstrated consistently over a period

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

for assessment	of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation
	• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment at the registered training organisation, and/or
	  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:	• in a range of work environments and weather conditions • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• internal or external
Work may be conducted in:	• restricted spaces • exposed conditions • controlled or open environments

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• a workplace, warehouse or depot • a vehicle on the road • client's workplace • convoy of a group of vehicles
Goods/cargo being handled/conveyed may require:	• special precautions for handling, stacking and transport
Classes of dangerous goods/explosives/hazardous substances are:	• as defined in the respective Australian Codes
Standard marking and signage for identified explosives and dangerous goods is as required:	• in the respective Australian Codes
Personnel in the work area may include:	• workplace personnel • site visitors • contractors • official representatives
Communication in the work area may include:	• phone • electronic data interchange • fax • email • internet • radio • oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Handling operations may be carried out:	• both manually and with the aid of lifting equipment and/or appliances
Load restraint procedures and equipment are:	• as specified in mass and loading regulations and guidelines
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios • high visibility clothing • protective clothing

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

Information/documents may include:	• goods/materials identification numbers, codes and signs • manifests, bar codes, goods and container identification • manufacturers specifications for equipment/tools • workplace procedures and policies for the handling of dangerous goods, explosives and radioactive and other hazardous substances, and incident reporting • supplier and/or client instructions • material safety data sheets • relevant codes of practice, including the Australian Dangerous Goods Code, the Australian Explosives Code, the Code of Practice for the Safe Transport of Radioactive Substances, the Industry Safety Code, and National Standards for Manual Handling • National Load Restraint Guide • award, enterprise bargaining agreement, other industrial arrangements • standards and certification requirements • quality assurance procedures • emergency procedures

Applicable regulations and legislation may include:	• Australian and state/territory regulations pertaining to the handling of dangerous goods/explosives/hazardous substances
	• Australian and international regulations and codes of practice for the handling and transport of explosives, dangerous goods and hazardous substances, including:
	  • Australian and International Dangerous Goods Codes
	  • Australian Marine Orders and the International Maritime Dangerous Goods Code
	  • IATA Dangerous Goods by Air regulations
	  • Australian and International Explosives Codes
	  • Code of Practice for the Safe Transport of Radioactive Substances
	  • state/territory legislation covering the safe handling of infectious substances
	• relevant state/territory environmental protection legislation
	• equal opportunity
	• workplace relations regulations
	• equal employment opportunity and affirmative action legislation
	• relevant state/territory OH&S legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to implement and coordinate accident-emergency procedures, including responding to the incident, conducting on-site activities, and completing follow-up actions. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace procedures concerning action to be taken in the event of an emergency, fire or accident.

Work is performed under some supervision generally within a team environment. It involves the application of the basic emergency response principles to the implementation of accident-emergency procedures including the provision of assistance ranging from simple injuries to the application of life support systems.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Respond to the incident	1.1 Details of incidents, accidents and emergencies are received, analysed and confirmed
	1.2 Immediate coordination requirements are identified and actioned in accordance with organisation procedures
	1.3 Travel to the incident site is by the shortest, fastest, legal means and routes
2 Coordinate on-site activities	2.1 Control of site activities is assumed on arrival and the operator and other authorities present are informed of this action
	2.2 Assistance is provided to clients and operators within the limitations of duty of care and organisation requirements
	2.3 Details of personnel, including names and nature of injuries, are notified to relevant personnel, following enterprise procedures
	2.4 Assistance is provided to relevant authorities within legal and policy limitations
3 Complete follow-up actions	3.1 Details of affected personnel, including names, nature of injuries and follow-up treatments are notified to next-of-kin in accordance with organisation procedures
	3.2 Incidents resulting in a near miss, accident or emergency are investigated and a report, including recommendations, is completed in accordance with enterprise policies and procedures
	3.3 Accident procedures and emergency plans are reviewed for effectiveness and recommendations for changes are prepared and submitted to appropriate persons

© Commonwealth of Australia, 2024 Public Skills Australia

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S and other regulatory codes, procedures and guidelines concerning response to accidents and emergencies
- Risks and hazards in the workplace and related precautions to control the risk
- Workplace procedures and policies for responding to accident/emergency situations
- Types of accidents and emergencies that can occur in a workplace and the appropriate action to be taken in each case
- Types of emergency equipment in the workplace and instructions for its use
- Site layout and obstacles
- Means to control and organise the accident scene, provide practical assistance and cooperate with others at the scene
- Focus of operation of work systems, equipment, management and site operating systems

Required skills:

- Communicate effectively with others when implementing and coordinating accident and emergency procedures
- Read and interpret instructions, procedures, information and signs relevant to the implementation and coordination of accident and emergency procedures
- Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the implementation and coordination of accident and emergency procedures
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when implementing and coordinating accident and emergency procedures
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when implementing and coordinating accident and emergency procedures in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events that may occur when implementing and coordinating accident and emergency procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Identify, select and use emergency equipment, processes and procedures
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

	operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation
	• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment at the registered training organisation, and/or
	  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	• in a range of work environments and weather conditions • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• restricted spaces • exposed conditions • controlled or open environments
Action to be taken in the event of an accident-emergency may include:	• identifying and following established emergency procedures • assessing the nature and extent of the emergency • rendering assistance and first aid • isolating and coordinating safety of the scene • alerting relevant organisational personnel and emergency services • recording relevant information and reporting on accident/emergency situation in accordance with regulatory and workplace requirements
Emergency equipment may include:	• first aid kit • fire extinguishers • fire hose

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• fire blanket • resuscitation equipment
Hazards in the work area may include:	• exposure to chemicals • exposure to dangerous or hazardous substances • movements of equipment, goods and materials • accidents involving chemicals, toxic substances and other harmful substances • accidents involving equipment and vehicles • explosion and/or fire • personal accidents including lifting injuries • waste management and disposal • violent incidents such as armed robberies
Consultative processes may include:	• workplace personnel and management • designated workplace emergency officers • emergency services personnel including ambulance, police, fire services, etc. • union representatives • industrial relations and OH&S specialists • other professional or technical staff • site visitors • contractors • official representatives
Communication in the work area may include:	• phone • electronic data interchange • fax • email • internet • radio • oral, aural or signed communications
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios • high visibility clothing • breathing apparatus
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Information/documents may	• workplace emergency/fire/accident procedures

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

include:

- workplace procedures for the use of emergency equipment and personal protection equipment
- first aid instructions and procedures
- manufacturers instructions concerning the use and servicing of equipment
- manifests, bar codes, goods and container identification goods identification numbers and codes
- material safety data sheets
- codes of practice including the Dangerous Goods Code
- IMDG code markings, HAZCHEM codes and where applicable emergency information panels
- relevant legislation, regulations and related documentation related to emergency response situations
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- supplier and/or client advice on the hazards involved with goods or cargo

Applicable regulations and legislation may include:

- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- emergency procedures regulations
- dangerous goods and hazardous goods regulations
- relevant Australian standards and certification including Australian Standard AS 2865 - Safe Working in a Confined Space Code
- workplace relations regulations
- workers compensation regulations

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to follow security procedures in the transport and logistics industry. It includes checking and maintaining the security of any passengers, workplace personnel and visitors; identifying and responding to any security threats or situations; and completing all required security records. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Persons achieving competence in this unit will need to fulfil the applicable security regulations and the relevant sections of a transport organisation's workplace security program and procedures.

Work is performed under some supervision generally within a team environment. It involves the application of an organisation's workplace security program and procedures and regulatory requirements to ensure that appropriate security procedures are followed when carrying out work activities in the transport and logistics industry.

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Maintain security of passengers, workplace personnel and visitors	1.1 Where applicable, security checks of passengers, workplace personnel and visitors are carried out in accordance with workplace security program and procedures and within limits of role and responsibilities
	1.2 Precautions and measures aimed at protecting the security of passengers, workplace personnel and visitors are followed in accordance with workplace security procedures and applicable security regulations
	1.3 Signs of suspicious behaviour of passengers or other personnel are recognised and reported promptly to designated personnel in accordance with workplace security procedures
	1.4 Any breaches of security requirements for passengers, workplace personnel and visitors are reported promptly to designated personnel in accordance with workplace procedures
2 Identify a security threat or situation	2.1 Signs of security threats are recognised and investigated where applicable in accordance with workplace security procedures
	2.2 Security threat or situation is promptly identified, assessed and reported in accordance with workplace security procedures
	2.3 Implications of the security threat or situation are evaluated in accordance with workplace security procedures
	2.4 Relevant personnel are alerted to the security threat or situation as required within workplace security
	2.5 Communications are maintained with relevant personnel to determine appropriate course of action
3 Respond to a security threat or situation	3.1 Response to an identified security threat or situation is in accordance with workplace security procedures, received

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	instructions, regulatory requirements and emergency response plan where relevant
	3.2 Security threats or incidents are handled appropriately in accordance with established response plan and within limits of responsibility and duty of care
	3.3 Responsibilities are fulfilled in accordance with workplace security procedures and regulatory requirements
	3.4 Assistance is provided in controlling the site both prior to and following arrival of security and/or emergency services
	3.5 In the case of a security threat or emergency, assistance is provided to other staff and emergency services personnel conducting an initial survey of the scene
	3.6 Directions of the controlling security/emergency authority are followed and all possible assistance is provided in response to those directions
4 Maintain security records	4.1 Records of security checks and precautions are kept as applicable in accordance with workplace security procedures
	4.2 Reports of security incidents or threats are completed as applicable in accordance with workplace security procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Applicable transport security legislation including relevant international, national, state and territory acts, regulations codes and/or guidelines
- Relevant workplace security program and policies and procedures for responding to security threats, situations and emergencies
- Relevant quarantine regulations and requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Common security threats and incidents that may occur in transport, logistics and allied industries, and related roles and responsibilities of personnel when reporting them and responding to them
- Applicable measures for the securing of transport terminals, storage facilities, vehicles, trains, aircraft and/or vessels
- Signs of pillaging and theft

© Commonwealth of Australia, 2024 Public Skills Australia

REQUIRED KNOWLEDGE AND SKILLS

- Signs of suspicious behaviour of passengers and other personnel
- Precautions and procedures aimed at protecting the security of passengers, workplace personnel and visitors
- Focus of operation of work systems, equipment, management and site operating systems when carrying out operations in the transport and logistics industries
- Common security problems that may occur when carrying out operations in the transport and logistics industries, and action that can be taken to address and resolve the problems
- Relevant documentation and reporting requirements
- Layout of worksite, vehicle, vessel, train or aircraft and operating procedures
- Procedures for operating any electronic communications equipment with required protocol

Required skills:

- Communicate effectively with others when following security procedures
- Read and interpret instructions, procedures, applicable regulatory requirements, labels, markings, ID cards and other information relevant to workplace security in the transport and logistics industries
- Complete required documentation and reports related to security procedures
- Work collaboratively with others when following security procedures
- Identify and solve and/or report problems that arise when following security procedures
- Modify activities depending on differing workplace contexts, risk situations and environments
- Adapt to differences in equipment, facilities, cargo and passengers
- Apply procedures for security checks and precautions as per limits of role and responsibilities
- Recognise signs of pillage and theft
- Recognise signs of security threats and situations
- Promptly report and/or rectify any identified problems that may arise when following security procedures in accordance with regulatory requirements and workplace procedures
- Follow security threat/incident response plan and procedures
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use relevant communications and other equipment required when following security procedures
- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
  - applying the underpinning knowledge and skills
  - identifying signs of a possible security threat
  - responding to a possible security threat
  - applying relevant legislation and workplace procedures

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
- Practical assessment must occur:
  - through activities in an appropriately simulated environment, and/or
  - in an appropriate range of situations in the workplace

© Commonwealth of Australia, 2024 Public Skills Australia

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Transport and logistics enterprises may involve:	• warehousing and distribution • road transport • rail transport • aviation • maritime • freight forwarding and customs broking • multimodal transport and logistics
Work may be conducted:	• in a range of work environments by day or night • in large, medium or small transport terminals and storage facilities • at international airports, domestic airports, regional airports and remote airfields • on vehicles, trains, aircraft and vessels
Security procedures may be aimed at preventing or identifying:	• persons trespassing on security zones and restricted areas • unauthorised airside access at security controlled airports and airfields • carriage or storage of prohibited goods • the carriage of improvised explosive devices • smuggling of goods • acts or threats of terrorism • hijacking of a vehicle, train, aircraft or vessel • extortion • assault • fraud • vandalism and graffiti
Security measures may include:	• security guards at access points and gates to secured areas • locked doors, gates and fences • use of personal electronic access cards • recording of carrier and vehicle registration details at gates and checkpoints • bag check points • escorts for visitors in restricted areas • access control into and out of restricted security areas • use of ID cards • video surveillance equipment • X-ray screening of passengers, workplace personnel and visitors

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• explosives trace detection (ETD) screening of passengers, workplace personnel and visitors • screening of passengers, workplace personnel and visitors using hand-held and walk through magnetometers
Communication in the work area may include:	• phone • radio • fax • email • electronic data transfer (EDI) • internet • oral, aural or signed communications
Personal protection equipment may include:	• gloves • safety headwear and footwear • eye and ear protection • safety glasses • two-way radios • high visibility clothing
Depending on the organisation concerned workplace procedures may be called:	• standard operating procedures • company procedures • enterprise procedures • organisational procedures • established procedures
Information and documents may include:	• Australian transport security legislation and regulations • Australian and international codes of practice and regulations relevant to the secure transport of passengers • workplace security procedures and related policies and procedures • workplace standard operating procedures and policies • signs and instructions pertaining to security matters • operations manuals, job specifications and induction documentation • manufacturers specifications for equipment • supplier and/or client instructions
Applicable legislation, regulations and codes may include:	• Australian transport security legislation and regulations • Australian and international codes of practice and regulations relevant to the secure transport of passengers • export/import/quarantine regulations • relevant state/territory OH&S legislation

TLIR4001 Monitor supplier performance

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to monitor the performance of contracted suppliers of goods/materials/services in compliance with workplace procedures and requirements.

It includes administering supplier contract, assessing for conformity to contracted requirements and completing all required contract documentation.

Work is performed under general guidance on progress and outcomes of work. It involves discretion and judgement for self and others in monitoring supplier performance.

Work involves responsibility for resource coordination and allocation, and for leading individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

R – Contract Procurement

Unit Sector

Not applicable.

© Commonwealth of Australia, 2024 Public Skills Australia

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Administer supplier contract	1.1 Procedures for receiving supplied goods/materials/services are documented and implemented within the workplace
	1.2 Supplied goods/material/services are assessed for conformity to contracted requirements including price, quantity, quality and delivery schedules
	1.3 Non-conformance of supplier with contracted requirements is accurately detailed
	1.4 Actions to rectify non-conformance are undertaken in accordance with enterprise procedures and within scope of authority
	1.5 Issues of non-conformance beyond scope of authority are referred to designated personnel in accordance with enterprise operating procedures
2 Complete documentation	2.1 Annotations and performance assessment/evaluations are completed and appended to supplier file
	2.2 Action taken in regard to non-conformance of contracted requirements is documented and appended to supplier file
	2.3 System records are maintained and updated in accordance with enterprise information management system and required regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

© Commonwealth of Australia, 2024 Public Skills Australia

Unit Mapping Information

This unit replaces and is equivalent to TLIR4001A Monitor supplier performance.

Assessment Requirements for TLIR4001 Monitor supplier performance

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- Administering supplier contract
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- Contract non-conformance
- interpreting data and providing appropriate, timely information on data analysis outcomes to appropriate personnel
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures and information
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and appropriately applying technology, information systems and procedures
- working systematically with required attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- focus of operation of recording, reporting and statistical analysis systems and resources
- relevant regulatory and code requirements
- typical problems that can occur with supply contracts and related appropriate action that

© Commonwealth of Australia, 2024 Public Skills Australia

can be taken
- workplace business policies and plans as they relate to supply contracts, including procedures for maintaining confidentiality
- workplace contract performance and disputation policies and procedures
- workplace protocols and procedures for monitoring supply contractor performance.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIX4016 Implement and monitor materiel sustainment plans

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and monitor materiel sustainment plans and associated subordinate plans in accordance with relevant organisational policy and procedures.

This unit was developed for materiel sustainment specialists working within materiel logistics but is applicable to individuals in broader logistics roles.

Typically these individuals work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

outcomes.	demonstrate achievement of the element.
1 Identify requirements for providing materiel sustainment plans	1.1 Sources of information relevant to materiel sustainment plans are identified and relevant information is obtained in accordance with organisational policy and procedures
	1.2 Currency of information is reviewed and documented in accordance with organisational policy and procedures
	1.3 Materiel sustainment plans are assessed against reviewed information
2 Implement materiel sustainment plans	2.1 Performance indicators and other criteria for measuring achievement are developed
	2.2 Materiel sustainment risks and impacts relevant to the plan are identified, reported and managed
	2.3 Materiel sustainment plans are implemented in accordance with organisational policy and procedures
	2.4 Participation and contribution to materiel sustainment activities is established and maintained in accordance with schedule
3 Monitor and report on materiel sustainment plans implementation	3.1 Materiel sustainment plans are monitored and regularly reviewed in accordance with organisational policy and procedures
	3.2 Plans are amended and documented in accordance with organisational policy and procedures
	3.3 Performance measures are monitored to ensure they address all key aspects of organisational performance and meet stakeholder requirements
	3.4 Performance data is analysed on a regular basis in terms of indicators and compliance with organisational policy and procedures
	3.5 Strategic performance is reported to all stakeholders in a transparent manner in accordance with compliance requirements

Assessment Requirements for TLIX4016 Implement and monitor materiel sustainment plans

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing data and information
- applying relevant materiel sustainment and project management knowledge to work and to guide problem solving
- applying relevant implementation processes
- developing and/or complying with procedures to implement and monitor materiel sustainment plans
- displaying resilience by continuing to move forward despite criticism or setbacks, remaining positive and responding to pressure in a controlled manner
- ensuring mechanisms are in place to monitor materiel sustainment plans
- identifying relationships between organisational goals and recognising how own work contributes to achieving these goals
- monitoring and reporting on implementation processes
- negotiating and communicating with key internal and external stakeholders , receiving their input, and resolving potential areas of conflict or concern to ensure overall objectives are achieved
- undertaking performance measurement to enable objectives to be measured against defined parameters
- using organisational strategic objectives to identify long-term factors and external considerations for implementing material sustainment plans.

© Commonwealth of Australia, 2024 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- codification and cataloguing processes
- configuration management
- contract management
- level of written communication required to prepare correspondence and reports
- logistics support analysis principles and processes
- materiel sustainment processes related to planning
- organisational policy and procedures impacting on materiel sustainment
- organisational role relevant to materiel sustainment
- performance measurement
- product knowledge related to systems and/or equipment in service in the organisation
- safety, legislative and statutory requirements, including environmental and sustainability issues
- technical regulatory framework.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIX4028 Apply knowledge of logistics

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to analyse and apply knowledge of logistics in accordance with relevant organisational policy and procedures.

It includes accessing and interpreting relevant logistics information and applying this information in the workplace.

This unit applies to emerging logistics specialists who need an understanding of the functions and activities of the wider organisation but is applicable to any individual in this field of work.

The application of this knowledge is required by people who are not currently specialists in the field but need the knowledge to inform their decision making.

Typically these individuals must demonstrate the ability to work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for TLIX4028 Apply knowledge of logistics

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to relevant logistics requirements
- analysing and interpreting logistics information to determine where internal and external factors impact on the logistics requirements, and adjusting planning accordingly
- applying knowledge of logistics to assist work and to guide problem solving
- communicating key logistics information clearly, presenting information confidently and selecting the appropriate communication medium for a range of audiences
- using appropriate information technology and software.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- logistics information or information systems
- logistics knowledge relevant to the work performed
- relevant and industry specific information regarding the support to capability and support to operations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

© Commonwealth of Australia, 2024 Public Skills Australia

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Access and interpret relevant logistics information	1.1 Relevant logistics requirements are identified and obtained 1.2 Logistics information obtained is analysed to determine the relevance and application to the organisation 1.3 Outcomes of the analysis are documented and recommendations relevant to logistics are determined
2 Use knowledge of logistics	2.1 Logistics requirements and recommendations relevant to work are applied in accordance with organisational policy and procedures 2.2 Effectiveness of the recommendations is assessed, reviewed and recorded in accordance with organisational policy and procedures 2.3 Recommendations are adjusted if required and documented for future application in accordance with organisational policy and procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Logistics information or information systems

© Commonwealth of Australia, 2024 Public Skills Australia

REQUIRED KNOWLEDGE AND SKILLS

- Logistics knowledge relevant to the work performed
- Logistics relevant to logistics support to capability and logistics support to operations
- Safety, legislative and statutory requirements, including environmental, sustainability issues relevant to logistics

Required skills:

- Undertake, analyse and interpret logistics information to determine where internal and external factors impact on the logistics requirements, and adjust planning accordingly
- Consult and negotiate with key stakeholders (both internal and external) and resolve any potential areas of conflict or concern to ensure that overall objectives are achieved
- Display resilience by continuing to move forward despite criticism or setbacks
- Focus on clear communication of key logistics information, present information confidently and select the appropriate medium for communication to a range of audiences
- Identify the relationship between organisational goals and recognise how own work contributes to the achievement of those goals
- Use appropriate information technology and software

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• Assessment must confirm the ability to:
	  • adhere to relevant logistics requirements
	  • apply knowledge of logistics to assist in work and to guide problem solving
	  • demonstrate understanding of personal role in relation to wider organisational or project context
	• Competency should be demonstrated over time and should be observed in a range of actual or simulated work contexts

Context of and specific resources for assessment	• Competency should be assessed in the workplace or in a simulated workplace environment • Access is required to: • computer and relevant software

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

- legislation, guidelines, procedures and protocols relating to logistics
- plans
- workplace documentation

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- Where possible, assessment should be supported by questions to assess required knowledge. Questioning techniques should suit the language and literacy levels of the candidate
- Assessment methods should reflect workplace demands such as literacy and the needs of particular groups
- Assessment methods suitable for valid and reliable assessment of this unit of competency may include a combination of methods such as:
  - authenticated evidence from the workplace and/or training programs
  - case studies
  - demonstration
  - feedback from supervisors and peers regarding the candidate's ability
  - observation
  - portfolios
  - projects
  - questioning
  - reviews or reports prepared by the candidate
  - scenarios
  - simulation or role plays

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Logistics may include:

- logistics support to capability
- logistics support to operations and logistics systems

Organisation may include:

- enterprises that work in logistics

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

Organisational policy and procedures may include:	• other government departments or instrumentalities that require logistics support • Australian Standards • international standards • organisational instructions and standards

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to analyse and apply knowledge of integrated logistics support. Integrated logistics support is a disciplined and iterative approach to materiel management, which addresses supportability throughout the life cycle of a materiel system with the aim of ensuring that operational and preparedness requirements are met, at a minimised life cycle cost, within regulatory, legislative and contractual constraints. The application of this knowledge is required by people who are not integrated logistics support specialists but who need the knowledge to inform their decision making. The application of integrated logistics support knowledge is specific to a variety of component processes in material logistics activities. There are no specific licensing or certification requirements applicable to this unit.

Application of the Unit

Application of the Unit

This unit was developed for logistics specialists working within materiel logistics but is applicable to any individual in this field of work.

Typically these individuals must demonstrate the ability to work independently or as part of a team under direct and/or indirect supervision, use discretion, and judgement and take responsibility for the quality of their outputs. All activities are carried out in accordance with relevant organisational policy and procedures.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to develop and review configuration management plans and associated subordinate plans to ensure efficient and effective delivery of configuration management across the materiel and materiel system life cycle. Configuration management plans document how the materiel or materiel system will be supported to ensure they meet the stated capability requirement. Configuration management is a discipline applying technical and administrative direction and surveillance to: identify and document the functional and physical characteristics of a configuration item, control changes to those characteristics, and record and report change processing and implementation status. There are no specific licensing or certification requirements applicable to this unit.

ELEMENT	PERFORMANCE CRITERIA
	identified and prepared in accordance with relevant organisational policy and procedures
	3.3 Amendments to configuration management plans are prepared and promulgated to relevant stakeholders or personnel in accordance with relevant organisational policy and procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Codification and cataloguing processes
- Configuration management
- Legislative and regulatory environment as it pertains to materiel logistics
- Logistics governance
- Materiel logistics
- Organisational policy and procedures
- Organisational role relevant to configuration management
- Planning processes
- Product knowledge related to systems and/or equipment in service in the organisation
- Safety, legislative and statutory requirements relevant to configuration management

Required skills:

- Apply configuration management and project management knowledge relevant to planning
- Consult and negotiate effectively with stakeholders (both internal and external) and resolve any potential areas of conflict or concern to ensure that overall configuration management planning objectives are achieved
- Demonstrate an understanding of the strategic objectives of the organisation and identify and assess potential alliances and effective strategies
- Display resilience by continuing to move forward despite criticism or setbacks
- Draw on information from a variety of sources using research, analysis and judgement to identify and develop configuration management plans
- Identify, review and analyse information that may impact on configuration management planning, or may be impacted by configuration management planning

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

- Identify the relationship between organisational goals and recognise how own work contributes to the achievement of those goals
- Undertake performance measurement relevant to configuration management planning to enable objectives to be measured against defined parameters
- Use appropriate information technology and software

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify configuration management requirements	1.1 Sources of information relevant to configuration management are identified and obtained in accordance with organisational policy and procedures 1.2 Currency of information is reviewed and documented in accordance with organisational policy and procedures 1.3 Configuration management requirements are defined and documented in accordance with organisational policy and procedures
2 Develop configuration management processes	2.1 Consultation with stakeholders is conducted in accordance with organisational policy and procedures 2.2 Configuration management processes are developed and recorded in accordance with organisational policy and procedures 2.3 Key performance indicators are developed and documented in accordance with organisational policy and procedures 2.4 Analysis of configuration management processes is developed and documented in accordance with organisational policy and procedures
3 Apply configuration management processes	3.1 Configuration management risks and impacts are identified, recorded and managed 3.2 Configuration management procedures are applied in accordance with legislative requirements 3.3 Configuration management processes are carried out in accordance with organisational policy and procedures 3.4 Failures and variances are documented, reported and managed in accordance with organisational policy and procedures

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.5 Participation and contribution to configuration management processes is established and maintained
4 Review configuration management processes	4.1 Performance systems and processes are monitored and analysed to assess progress
	4.2 Systems, procedures and records associated with documenting performance are managed in accordance with organisation's requirements
	4.3 Configuration management processes are reviewed in accordance with organisational policy and procedures
	4.4 Changes required are identified and prepared in accordance with organisational policy and procedures
	4.5 Amendments to configuration management processes are incorporated into plans and promulgated to relevant stakeholders in accordance with organisational policy and procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Codification and cataloguing processes
- Configuration management principles and processes
- Industrial base capability
- Legislative and regulatory environment, including environmental, sustainability issues as it pertains to materiel logistics
- Logistics governance
- Management processes
- Organisational policy and procedures
- Organisational role relevant to configuration management
- Product knowledge related to systems and/or equipment in service in the organisation
- Safety, legislative and statutory requirements, including environmental, sustainability issues relevant to configuration management

Required skills:

© Commonwealth of Australia, 2024 Public Skills Australia

Required skills:

- Apply configuration management and project management knowledge relevant to configuration management processes
- Demonstrate an understanding of the strategic objectives of the organisation and identify and assess potential alliances and effective strategies
- Display resilience by continuing to move forward despite criticism or setbacks
- Focus on clear communication of configuration management processes, present information confidently and select appropriate medium for communication to a range of audiences
- Identify, review and analyse information that may impact on configuration management processes, or may be impacted by configuration management processes
- Negotiate and communicate effectively with key stakeholders (both internal and external) and resolve any potential areas of conflict or concern to ensure that overall configuration management objectives are achieved
- Undertake research and analysis to identify and develop configuration management processes
- Use appropriate information technology and software for configuration management processes

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• Assessment must confirm the ability to:
	  • adhere to relevant occupational health and safety requirements
	  • identify and establish configuration management operation processes
	  • identify, acquire and adjust resources as necessary to ensure effective/efficient performance of the processes
	  • initiate and efficiently monitor processes
	  • initiate any remedial action required
	  • effectively and efficiently manage configuration management processes
	• Competency should be demonstrated over time and should be observed in a range of actual or simulated work contexts

Context of and specific resources	• Competency should be assessed in the workplace or in a

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to manage and monitor all technical data and information creation, capture, use and monitoring activities within the data management system. This competency occurs with the system framework established by others. It may also be used to review these processes and activities. There are no specific licensing or certification requirements applicable to this unit.

Application of the Unit

Application of the Unit

This unit was developed for technical regulatory framework specialists working within materiel logistics but is applicable to any individual in this field of work.

Typically these individuals must demonstrate the ability to work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. All activities are carried out in accordance with relevant organisational policy and procedures.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Designate detailed technical data and information use, and maintenance responsibilities	1.1 Responsibilities for technical data and information use and maintenance activities are designated to staff in accordance with approved system framework, organisational policy and the abilities of individual staff 1.2 Rules for the operation of the system are devised in compliance with approved systems framework 1.3 Resources for approved budget period are allocated in accordance with policy and the strategic plan
2 Develop key performance indicators for technical data management activities	2.1 Measurable performance indicators are developed for technical data management activities in accordance with the authorised systems 2.2 Data management responsibilities of individual personnel/organisational units are identified and documented 2.3 Acceptable range of variation for compliance is determined based upon data management responsibilities, applicable data management system and organisation's risk management analysis
3 Develop monitoring methodology	3.1 Methodology for monitoring the technical data management system's rules, standards and procedures is developed based upon authorised systems 3.2 Methodology developed includes timeframes involved, means of surveillance and form of reporting 3.3 Methodology, performance criteria and the ranges of variation from the standards and rules are submitted to appropriate authority for approval
4 Monitor a technical	4.1 Monitoring is undertaken in accordance with approved

© Commonwealth of Australia, 2024 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
data management system	timeframes and frequency 4.2 Staff being monitored are notified in accordance with organisational policy and guidelines, where applicable 4.3 Any variation from data management system's framework, rule, standards and procedures that exceed the agreed limit is noted and details of the situation are recorded 4.4 Where required, reports are provided to appropriate authority relating to technical data and information use and maintenance, and are in the required format, at the required intervals
5 Identify and respond to problems and changes	5.1 Problems and changes requiring a systematic response are identified from monitoring reports and external events 5.2 Recommendations are made for revisions to systems, procedures, and future (strategic) plans in response to identified variations, changes and problems 5.3 Amendments to systems are devised and implementation is planned, in response to problems and changes that require a systemic response 5.4 Recommendations for system amendments and the planning and implementation required are prepared, and approval is sought from appropriate authority 5.5 Procedures for using technical data and information systems, and subsequent alterations and amendments to the procedures are authorised, ensuring that performance indicator parameters and access rules are adhered to
6 Designate technical data and information creation and capture responsibilities	6.1 Responsibilities for technical data and information creation and capture activities are designated to staff in accordance with organisational policy 6.2 Technical data and information creation and capture performance targets are set within the parameters of the technical data management plan 6.3 Resources for the budget period are allocated in accordance with organisational policy and strategic plan

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

© Commonwealth of Australia, 2024 Public Skills Australia

REQUIRED KNOWLEDGE AND SKILLS

- Area of technical expertise
- Data management, standards, principles, process and functional requirements
- Details of the technical regulatory framework, organisation's engineering management plans and the technical data management plan
- Established communication channels and protocols
- Organisational functions, structure and culture
- Organisational policy, strategies and procedures
- Organisation's data management systems
- Organisation's rules for the capture of, access to, and use and maintenance of, technical data and information
- Organisation's technical classification scheme and language
- Problem identification and resolution
- Procedures for recording, reporting and maintaining workplace records and information
- Quality assurance principles and processes
- Work flow and business process re-engineering principles and practices

Required skills:

- Apply technical data and information and project management knowledge to technical data and information systems
- Consult and negotiate effectively with key stakeholders (both internal and external) and resolve any potential areas of conflict or concern to ensure that overall technical data and information systems objectives are achieved
- Display resilience by continuing to move forward despite criticism or setbacks
- Identify the relationship between organisational goals and recognise how own work contributes to the achievement of those goals
- Implement processes to enable new technical data and information system requirements to be effectively transitioned across the life cycle - this includes integrated logistics support considerations, including environmental, sustainability issues, and validation and verification activities
- Monitor processes to ensure that the technical data and information systems continue to enable the operational requirements to be attained - this may include performance metrics

Evidence Guide

EVIDENCE GUIDE

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Assessment must confirm the ability to:
  - apply relevant implementation processes
  - monitor and report on implementation processes
  - analyse data and information
  - apply knowledge of technical data and information plans to assist in work and to guide problem solving
  - demonstrate understanding of personal role in relation to wider organisational or project context
- Competency should be demonstrated over time and should be observed in a range of actual or simulated work contexts

Context of and specific resources for assessment

- Competency should be assessed in the workplace or in a simulated workplace environment
- Access is required to:
  - computer and relevant software
  - legislation, guidelines, procedures and protocols relating to technical data and information systems
  - plans
  - workplace documentation

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- Where possible, assessment should be supported by questions to assess required knowledge. Questioning techniques should suit the language and literacy levels of the candidate
- Assessment methods should reflect workplace demands such as literacy and the needs of particular groups
- Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of:
  - authenticated evidence from the workplace and/or training programs
  - case studies
  - demonstration
  - feedback from supervisors and peers regarding the candidate's ability
  - observation

© Commonwealth of Australia, 2024 Public Skills Australia

EVIDENCE GUIDE

- portfolios
- projects
- questioning
- reviews or reports prepared by the candidate
- scenarios
- simulation or role plays

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Technical data and information may be:

- as specified and defined in the technical regulatory framework
- included either explicitly or implicitly in the established system framework

Approved system framework:

- is established by an approved authority and issued as the basis of all technical data and information management
- contains:
  - high level accountability and functional responsibilities
  - high level control/management requirements and protocols
  - key aspects of technical regulatory framework
  - outline of the structuring rules for repositories, cataloguing systems, security access systems, processes and software
  - protocols on functionality, maintainability and growth
  - technical context
  - technologies/standards

Rules may include:

- allocating access/security status
- capturing structural and contextual metadata
- classifying and indexing items
- generating and allocating unique identifiers to data items
- identifying and recording disposal status items
- identifying technical data and information creators
- links between technical data and information items
- locating and tracking items

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• naming/titling items • negotiating transfer of custody or ownership • recording the use of history of items

Measurable performance indicators may include:	• those developed for specific tasks
	• those incorporated in the data management system
	• performance indicators that relate to:
	  • disposal (percentage of data, unsentenced data, overdue for disposal action, functions/data not covered by disposal schedules)
	  • parameters for tracking of technical data and information
	  • retrieval and access (security and access rules, response to request time limits, service levels for requests)

Data management responsibilities may include:	• established systems framework • organisation's responsibility and accountability analysis • system's rules, standards and procedures
Identified and documented may include:	• established systems framework • organisation's responsibility and accountability analysis • system's rules, standards and procedures
Means of surveillance may include:	• examination of results (technical data and information) • form/s of reporting • real-time observation (security of process) • statistical reports • selected snapshots of the system
Appropriate authority may include:	• chief executive officer • delegated individual • external public authority • nominated senior management representative • senior management team • technical/engineering authority
Monitoring may include:	• number of systems • single data management system
Variation may include:	• increases or decreases in the use of particular technologies/standards • variations from the data management system's performance or capacity • variations within the agreed limit but which are consistent
Reports may include:	• technical data and information capture • technical data and information compliance

© Commonwealth of Australia, 2024 Public Skills Australia

RANGE STATEMENT

	• technical data and information creation • technical data and information maintenance • technical data and information use
Problems and changes may include:	• changes in administrative changes to functions/activities • changes to organisational structures • legislative or technical regulatory changes • technological change and implementation

Systemic may include:	• current technical data management systems
	• technical systems (which generate technical data and information)
	• storage facilities systems
	• systemic changes which may include:
	  • amendment to the classification system
	  • bulk movement of technical data and information to control
	  • migration of systems
	  • new classification and control language
	  • new disposal classes or retention periods
	  • new organisational or business unit functions

Revisions may include:	• access rules and procedures • classification and indexing schemes • disposal schedules • storage projections and requirements • technical data and information specifications
Recommendations for system amendments may include:	• changes to/enforcement of procedures • counselling of non-conforming individuals/business units • disciplinary action

DEFSS00008 Communication Operations Skill Set

Modification History

Release	Comments
1	This skill set was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. • New skill set composed of units previously contained in DEF20912 Certificate II in Communications Operations

Description

This skill set provides a set of skills for Defence Communication Operators to ensure commanders can communicate effectively using satellite terminals, radios, hand held and desk-top data terminals and security equipment. Whatever the location, deployment or task, Communication Operators provide the appropriate communications systems for the Military whether it is on land, in the air or at sea.

Pathways Information

These units may provide credit towards a range of qualifications in the Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

Units	
DEFCMM001	Maintain security in a Defence communications and information systems environment
DEFCMM002	Transmit and receive messages utilising Defence messaging systems
DEFCMM003	Transmit and receive data via information exchange systems
DEFCMM004	Conduct operator level maintenance in a Defence environment

© Commonwealth of Australia, 2024 Public Skills Australia

DEFCMM005	Transmit and receive messages via voice systems
DEFCMM006	Support the operation of a communication and information system facility

Target Group

This skill set applies to those working as communications operators within Defence.

Suggested words for Statement of Attainment

These competencies meet the industry standards for communication operators.

© Commonwealth of Australia, 2024 Public Skills Australia

DEFSS00009 Physical Training Skill Set

Modification History

Release	Comments
1	This skill set was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. • DEF unit codes updated • SISSSPT303A and SRXGRO001A units removed

Description

This skill set applies to people who provide fitness training support.

This skill set provides a set of skills to combat fitness leaders who provide fitness training support to small groups or organisations in an operational setting. This function is performed in addition to their primary trade or employment over a range of familiar and predictable contexts.

Pathways Information

This skill set is stand alone and does not lead to a specific Defence qualification. The units it includes may provide credit towards a Sport, Fitness and Recreational Training Package qualification.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

Units	
DEFFIT001	Conduct a group fitness appraisal
DEFFIT002	Develop a group fitness program
DEFFIT003	Conduct individual fitness assessments

© Commonwealth of Australia, 2024 Public Skills Australia

DEFFIT004	Instruct a workplace physical training session

Target Group

This skill set applies to people who provide fitness training support.

Suggested words for Statement of Attainment

These competencies meet the industry standards for providing basic fitness training to small groups in an operational setting.

© Commonwealth of Australia, 2024 Public Skills Australia

DEFSS00010 Maritime Operations Skill Set

Modification History

Release	Comments
1	This skill set was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. • New Skill set composed of units previously contained in DEF31012 Certificate III in Maritime Operations

Description

This skill set provides a set of skills to perform and assist in a range of seamanship operations and would be typically implemented in a Naval or Army Defence maritime environment.

Pathways Information

These units may provide credit towards a range of qualifications in the Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

Units	
DEFSEA001	Assist in seamanship operations
DEFSEA002	Assist in boarding operations
DEFSEA003	Control persons using non firearms options
DEFSEA004	Defend persons using firearms
DEFSEA005	Maintain weapons and associated equipment
DEFSEA006	Track and engage targets

© Commonwealth of Australia, 2024 Public Skills Australia

DEFSEA007	Assist in ship navigation
DEFSEA008	Operate a chaff firing system
DEFSEA009	Operate a visual target designation system

Target Group

This skill set applies to those working in a military maritime environment such as Boatswains Mates.

Suggested words for Statement of Attainment

These competencies meet the industry standards for Defence maritime operations.

© Commonwealth of Australia, 2024 Public Skills Australia

DEFSS00011 Survival Skill Set

Modification History

Release	Comments
1	This skill set was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. • New skill set composed of existing units

Description

This skill set provides a set of skills to survive for a significant period of time under food restrictions and in the absence of normal living conditions. For example; a person parachuting from a downed plane into a remote and/or hostile environment.

Pathways Information

These units may provide credit towards a range of qualifications in the Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

Units	
DEFSUR001	Catch aquatic animals in a survival situation
DEFSUR002	Construct improvised weapons and equipment in a survival situation
DEFSUR003	Employ visual emergency signalling techniques in a survival situation
DEFSUR004	Erect a survival shelter using natural resources in a survival situation
DEFSUR005	Maintain physical and emotional health and fitness in a survival environment
DEFSUR006	Navigate using celestial aids

© Commonwealth of Australia, 2024 Public Skills Australia

DEFSUR007	Preserve and cook foodstuffs in a survival situation
DEFSUR008	Produce fire using improvised means in a survival situation
DEFSUR009	Trap and kill animals in a survival situation
DEFSUR010	Locate, treat and manage water in a survival situation
DEFSUR011	Survive at sea

Target Group

This skill set applies to people who are required to survive in a remote environment with little or no resources.

Suggested words for Statement of Attainment

These competencies meet the industry standards for surviving in a remote environment.

© Commonwealth of Australia, 2024 Public Skills Australia

DEFSS00012 Defence Chaplain Skill Set

Modification History

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to DEFSS00002 Defence Chaplain.

Description

This skill set allows for the attainment of competencies in Defence Chaplaincy.

Pathways Information

The DEFSS00012 Defence Chaplain Skill Set is part of the DEF Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 5 units of competency must be attained.

DEFCHP001	Provide pastoral care
DEFCHP002	Provide ethical and pastoral advice
DEFCHP003	Plan the delivery of chaplaincy support
DEFCHP004	Conduct and facilitate religious observances and activities
DEFCHP005	Perform as an effective member of the Chaplains' branch

Target Group

Defence Chaplains provide service to men and women in uniform in peace time and operational environments. They also help care for the families of serving members of the Australian Defence Force (ADF).

Their primary aim is to serve denominational members and their families, to facilitate services for those of other denominations or faiths, and to care for all personnel regardless of any religious affiliation.

© Commonwealth of Australia, 2024 Public Skills Australia

Suggested words for Statement of Attainment

This skill set meets industry requirements as specified in the DEF Defence Training Package for work in the area of Defence Chaplaincy.

© Commonwealth of Australia, 2024 Public Skills Australia

DEFSS00013 Defence Heavy Vehicle Recovery Skill Set

Modification History

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to DEFSS00003 Defence Heavy Vehicle Recovery.

Description

This skill set allows for the attainment of competencies required to recover heavy vehicles and equipment that have become bogged or broken down, and due to terrain or environmental factors, cannot be extracted by other means.

Pathways Information

The DEFSS00013 Defence Heavy Vehicle Recovery Skill Set is part of the DEF Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 2 units of competency must be attained.

DEFVEH001	Conduct recovery vehicle operations in a field environment
DEFVEH002	Extract disabled equipment using winching techniques in a field environment

Target Group

This skill set covers the competency required by Defence personnel to recover equipment and vehicles that have become bogged or broken down, and due to terrain or environmental factors cannot be extracted by other means.

Typically, operations are conducted by personnel acting independently or in charge of a small team, operating in remote environments isolated from assistance or supervision.

© Commonwealth of Australia, 2024 Public Skills Australia

Suggested words for Statement of Attainment

This skill set meets industry requirements as specified in the DEF Defence Training Package for work in recovering heavy vehicles and equipment that have become bogged or broken down and which, due environmental factors, cannot be extracted by other means.

© Commonwealth of Australia, 2024 Public Skills Australia

DEFSS00014 Enter Confined Space Skill Set

Modification History

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to DEFSS00004 Enter Confined Space.

Description

This skill set allows for the attainment of competencies in confined space entry.

Pathways Information

The DEFSS00014 Enter Confined Space Skill Set is part of the DEF Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 2 units of competency must be attained.

DEFWHS010	Identify confined space
DEFWHS011	Enter confined space

Target Group

This skill set applies to a member of the Defence workforce who is required to enter and work in a confined space. This function is performed as part of their primary trade or employment.

Suggested words for Statement of Attainment

This skill set meets industry requirements as specified in the DEF Defence Training Package for work in the area of confined space entry within a Defence environment.

© Commonwealth of Australia, 2024 Public Skills Australia

DEFSS00015 Field Kitchen Assistant Skill Set

Modification History

Release 1. New Skill Set

This Skill Set replaces and is equivalent to DEFSS00005 Field Kitchen Assistant.

Description

This skill set allows for the attainment of competency for field kitchen assistants who establish and operate a kitchen within a field environment.

Pathways Information

The DEFSS00015 Field Kitchen Assistant Skill Set is part of the DEF Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 1 unit of competency must be attained.

DEFMIL148	Assist with the establishment and operation of a field kitchen

Target Group

Field kitchen assistants assist with the establishment and operation of a kitchen within a field environment.

This skill set was designed for field kitchens in an operational environment that would be encountered in Defence operations and disaster sites but could be equally applicable to field kitchens in other settings such as fetes and markets.

Suggested words for Statement of Attainment

This skill set meets industry requirements as specified in the DEF Defence Training Package for work in the area of assisting with the establishment and operation of a field kitchen.

© Commonwealth of Australia, 2024 Public Skills Australia

© Commonwealth of Australia, 2024 Public Skills Australia

DEFSS00016 Field Kitchen Manager Skill Set

Modification History

Release 1. New Skill Set

This Skill Set replaces and is equivalent to DEFSS00006 Field Kitchen Manager.

Description

This skill set allows for the attainment of competencies for field kitchen managers who establish and operate a mobile kitchen facility in a field environment.

Pathways Information

The DEFSS00016 Field Kitchen Manager Skill Set is part of the DEF Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 1 unit of competency must be attained.

DEFMIL147	Establish and operate a field kitchen

Target Group

Field kitchen managers establish and run a mobile kitchen facility in a field environment.

This skill set was designed for field kitchens in an operational environment that would be encountered in Defence operations and disaster sites but could be equally applicable to field kitchens in other similar settings.

Suggested words for Statement of Attainment

This skill set meets industry requirements as specified in the DEF Defence Training Package for work in the area of establishing and managing a field kitchen.

© Commonwealth of Australia, 2024 Public Skills Australia

DEFSS00017 Military Policing Skill Set

Modification History

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to DEFSS00007 Military Policing.

Description

This skill set allows for the attainment of competencies for military policing.

Pathways Information

The DEFSS00017 Military Policing Skill Set is part of the DEF Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 3 units of competency must be attained.

DEFPOL001	Apply the values and principles of Defence police
DEFPOL002	Conduct battlefield circulation and control operations
DEFPOL003	Participate in population protection and control

Target Group

This skill set covers the competencies to carry out policing operations in a Defence environment.

Suggested words for Statement of Attainment

This skill set meets industry requirements as specified in the DEF Defence Training Package for work in the area of policing operations in a Defence environment.

© Commonwealth of Australia, 2024 Public Skills Australia

DEFSS00018 Performance Based Contracting Practitioner Skill Set

Modification History

Release 1. New Skill Set

Description

This Skill Set provides a set of skills for managers using the Performance Based Contract (PBC) management framework to ensure that Defence managers and other stakeholders within external organisations employ effective performance based measures in the management of strategic contracts.

Pathways Information

The DEFSS00018 Performance Based Contracting Practitioner Skill Set is part of the DEF Defence Training Package Release 2.0. These units may provide credit towards the DEF40917 Certificate IV in Performance Based Contracting.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 7 units of competency must be attained.

DEFPBC001	Employ the fundamentals of a Performance Based Contract
DEFPBC002	Establish the basis of a Performance Based Contract
DEFPBC003	Establish a Performance Based Contract performance measures hierarchy
DEFPBC004	Establish the contract details of a Performance Based Contract
DEFPBC005	Operate a Performance Based Contract
DEFGEN005	Develop relationships with other organisations
PSPGEN034	Compose complex workplace documents

© Commonwealth of Australia, 2024 Public Skills Australia

Target Group

This is a Skill Set covering the role of Defence managers and other stakeholders within external organisations employing effective performance based measures in the management of strategic contracts.

Suggested words for Statement of Attainment

The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge required by persons performing the duties of Defence managers and other stakeholders within external organisations employ effective performance-based measures in the management of strategic contracts.

© Commonwealth of Australia, 2024 Public Skills Australia

DEFSS00019 Range Control Skill Set

Modification History

Release 1. New Skill Set

Description

This skill set provides a set of skills for Range Control Staff (RCS) to ensure that Defence training area and range (TAR) are operated safely, are fit for purpose and RCS employ safe and effective coordination of training activities on assigned training areas.

Pathways Information

The DEFSS00019 Range Control Skill Set is part of the DEF Defence Training Package Release 2.0. These units may provide credit towards the DEF50717 Diploma of Range Control and Management.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 4 units of competency must be attained.

DEFRNG013	Control training area and range activities
DEFRNG014	Monitor training area and range activities
DEFRNG015	Inspect, maintain and monitor training area and range activities
PUAFIR512	Develop and analyse the behaviour and suppression options for a Level 2 wildfire

Target Group

This skill set applies to those working as Range Control Staff (RCS) within Defence.

© Commonwealth of Australia, 2024 Public Skills Australia

Suggested words for Statement of Attainment

The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge required by persons performing the duties Range Control Staff (RCS) within Australian Defence Force (ADF) environments.

© Commonwealth of Australia, 2024 Public Skills Australia

DEFSS00020 Basic Geospatial Skill Set

Modification History

Release 1. New Skill Set

Description

This Skill Set is for individuals who perform the duties of basic support to Defence geospatial operations within the Australian Geospatial Workplace environment. It provides the skills and knowledge required to perform basic surveying computations, store and retrieve spatial data, read and interpret maps, support Defence geospatial operations and apply Defence geospatial visualisation.

Pathways Information

The DEFSS00020 Basic Geospatial Skill Set is part of the Defence Training Package.

Licensing/Regulatory Information

Personnel seeking certification as basic geospatial technicians are to comply with the requirements of the Defence Training Package.

Skill Set Requirements

A total of **5 units** of competency must be attained.

CPPSIS3020	Perform basic surveying computations
CPPSIS4022	Store and retrieve spatial data
DEFGEO001	Support geospatial operations
DEFGEO002	Apply geospatial visualisation
RIISTD201D	Read and interpret maps

Target Group

This is a Skill Set covering the role of the Basic Geospatial Technician within the Australian and New Zealand Standard Classification of Occupations (ANZSCO) 2322 Surveyors and Spatial Scientists. This Skill Set focusses on the operational application of Geospatial data.

© Commonwealth of Australia, 2024 Public Skills Australia

Suggested words for Statement of Attainment

The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge required by persons performing the duties of Basic Geospatial Technician within the Australian Geospatial environment.

Custom Content Section

© Commonwealth of Australia, 2024 Public Skills Australia

DEFSS00021 Intermediate Geospatial Skill Set

Modification History

Release 1. New Skill Set

Description

This skill set is for individuals who perform the duties of providing intermediate geospatial support to Defence operations within the Australian geospatial workplace environments. It provides the skills and knowledge required to store and retrieve spatial data, source and assess spatial data, provide geospatial support to Defence operations and provide geospatial technical advice.

Pathways Information

The DEFSS00021 Intermediate Geospatial Skill Set is part of the Defence Training Package.

Licensing/Regulatory Information

Personnel seeking certification as intermediate geospatial technicians are to comply with the requirements of the Defence Training Package.

Skill Set Requirements

A total of **4 units** of competency must be attained.

CPPSIS4022	Store and retrieve spatial data
CPPSIS4024	Source and assess spatial data
